SUPPLEMENTARY INFORMATION:

I. Background

In accordance with section 51.118 of title 10 of the *Code of Federal Regulations* (10 CFR), the NRC is

making available final Supplement 10, Second Renewal to NUREG–1437, regarding the renewal of Exelon Generation Company, LLC. (Exelon), operating licenses DPR–44 and DPR–56 for an additional 20 years of operation for Peach Bottom Atomic Power Station, Units 2 and 3 (Peach Bottom). A Notice of Availability of Draft Supplement 10, Second Renewal to NUREG–1437 was published in the **Federal Register** on August 9, 2019 (84 FR 39296), by the Environmental Protection Agency. The public comment period on draft Supplement 10, Second Renewal to NUREG–1437 ended on September 23, 2019, and the comments received are addressed in final Supplement 10, Second Renewal to NUREG–1437.

II. Discussion

As discussed in Chapter 5 of final Supplement 10, Second Renewal to NUREG–1437, the NRC staff determined that the adverse environmental impacts of subsequent license renewal for Peach Bottom are not so great that preserving the option of subsequent license renewal for energy-planning decisionmakers would be unreasonable. This recommendation is based on: (1) The analysis and findings in the GEIS; (2) information provided in the environmental report and other documents submitted by Exelon; (3) consultation with Federal, State, local, and Tribal agencies; (4) the NRC staff's independent environmental review; and (5) consideration of public comments received during the scoping process and on the Draft Supplemental Environmental Impact Statement.

Dated at Rockville, Maryland, this 27th day of January, 2020.

For the Nuclear Regulatory Commission.

Robert B. Elliott,

Chief, Environmental Review License Renewal Branch, Division of Rulemaking, Environmental, and Financial Support, Office of Nuclear Material Safety and Safeguards.
