

transportation; cultural and historic resources; land use, including agriculture and recreation; visual quality and aesthetics; socioeconomic and environmental justice; public health and safety; Upper Mississippi River National Wildlife and Fish Refuge; and cumulative effects).

The RUS selected Alternative 6. See ROD Section 2.6.1 “Selected Alternative and Agency Rationale” for the rationale for selecting Alternative 6. The resources or environmental impacts that could be affected by the C–HC Project selected alternative are summarized in the ROD Section 2.7 “Summary of Environmental Consequences.”

Based on an evaluation of the information and impact analyses presented in the FEIS, including the evaluation of all alternatives, and in consideration of RUS’s NEPA implementing regulations, Environmental Policies and Procedures, as amended (7 CFR part 1970), RUS finds the evaluation of reasonable alternatives is consistent with NEPA.

Because the proposed project may involve action in floodplains or wetlands, this NOA also serves as a final notice of action in floodplains and wetlands (in accordance with Executive Orders 11988 and 11990).

The ROD is not a decision on Dairyland’s loan application and therefore not an approval of the expenditure of Federal funds. This notice of the ROD concludes RUS’s environmental review process in accordance with NEPA and RUS’s Environmental Policies and Procedures (7 CFR 1970). The ultimate decision as to loan approval depends upon the conclusion of this environmental review process plus financial and engineering analyses. Issuance of the ROD will allow these reviews to proceed.

The ROD is not a decision on the ROW permit application the USFWS has received from Dairyland and ITC Midwest, and therefore not an approval for crossing the Refuge. This notice concludes USFWS’s environmental review process in accordance with NEPA and USFWS Environmental Policies and Procedures (43 CFR 46.10–46.450 and 516 DM 8). Processing, review, and further evaluation of the ROW permit application received from Dairyland Power and ITC can proceed with issuance of the ROD.

**SUPPLEMENTARY INFORMATION:**

**I. Abstract**

Title 13, Section 161 of the United States Code requires the Secretary of Commerce to conduct a Census of Governments every five years, in years ending in “2” and “7”. Section 193

provides for the collection of preliminary and supplementary statistics as related to the main topic of the census. The Census of Governments publishes unit counts and legal descriptions as well as employment and finance data for all county, municipal, township, school district, and special district governments in the United States. Prior to conducting the Census of Governments, it is necessary to ensure that the universe of all governments is as accurate and up to date as possible. The Government Units Survey (GUS) is conducted the year prior to the full Census of Governments collection operation and is used to evaluate and update the universe of all local and special district governments. Public sector surveys draw their sampling frames from this universe.

The 2021 GUS will target townships, special districts, independent school districts, and educational service authorities (ESA). The GUS is particularly beneficial for identifying smaller units that have not been included in surveys in-between census years and identifying changes to the universe of special district governments that experience substantial change in a five-year period. The GUS contributes to the quality and timely releases of the other components of the Census of Governments.

The 2021 GUS consists of yes/no type questions and checkbox selection questions designed to determine whether a government unit is in operation and verify contact information. Other questions collect information about a unit’s function, legal organization, and other characteristics. The 2021 GUS estimated time to respond is 15 minutes which is the same as the 2016 GUS. The 2021 GUS is designed to diminish unnecessary burden, and to collect information essential for maintaining the government universe.

The scope for 2021 GUS collections is scaled back in comparison to the 2016 GUS collection operation. For greater efficiency, the 2021 GUS intends to collect information only from government units for which this information is difficult to obtain via other methods, such as internet research. There are a number of governments, particularly special district governments, for which information has not been collected since the 2017 Census of Governments. It is necessary to determine if these governments still exist. The GUS obtains information that can be difficult to verify conclusively through regular internet research, as many states do not provide this information for free via

online tools. It is necessary to verify and update this information prior to mailing the Employment and Finance components of the 2022 Census of Governments. GUS information also assists the Census Bureau with maintaining accurate classification of all local and special district governments.

**II. Method of Collection**

Respondents will receive emails and letters about completing the GUS via the internet. The GUS collection instrument will be available online to respondents in February 2021. The website is secure, and respondents will receive a unique user identification and password for login. A toll-free number will be provided to respondents, which they may call to obtain assistance.

**III. Data**

*OMB Control Number:* 0607-0930.

*Form Number(s):* The GUS will utilize an electronic collection instrument and have four paths based on the type of respondent.

*Type of Review:* Regular submission.

*Affected Public:* Public sector entities consisting of townships; special districts; independent school districts; and educational service authorities in the U.S.

*Estimated Number of Respondents:* 43,454.

*Estimated Time per Response:* 15 minutes.

*Estimated Total Annual Burden Hours:* 10,864.

*Estimated Total Annual Cost to Public:* \$0. (This is not the cost of respondents' time, but the indirect costs

respondents may incur for such things as purchases of specialized software or hardware needed to report, or expenditures for accounting or records maintenance services required specifically by the collection.)

*Respondent's Obligation:* Voluntary.

*Legal Authority:* Title 13 U.S.C., Sections 161 and 193.

**IV. Request for Comments**

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.
