Effective Date

The Provisional Formula Rate, under Rate Schedule Provo River Formula Rate PR–2, will take effect on the first day of the first full billing period beginning on or after April 1, 2020, and will remain in effect through March 31, 2025, pending approval by FERC on a final basis or until superseded.

Public Notice and Comment

WAPA followed the Procedures for Public Participation in Power and Transmission Rate Adjustments and Extensions, 10 CFR part 903, in developing this formula rate. Following are the steps WAPA took to involve interested parties in the rate process:

1. On July 17, 2019, a Federal Register notice (84 FR 34175) (Proposal FRN) announced the proposed continuation of the existing firm power formula rate and launched the 30-day public consultation and comment period to give the public an opportunity to comment on the proposed formula rate.

2. On July 19, 2019, WAPA emailed letters to preference customers and interested parties transmitting a copy of the Proposal FRN.

3. WAPA provided a website containing all dates, customer letters, presentations, FRNs, and other information about this rate process. The website is located at (https://www.wapa.gov/regions/CRSP/rates/Pages/rate-order-189.aspx).

4. During the 30-day consultation and comment period, which ended on August 16, 2019, WAPA did not receive any verbal or written comments.

Existing Firm Power Rate

WAPA markets the output of the PRP to the Utah Associated Municipal Power Systems, Utah Municipal Power Agency, and Heber Light and Power (Customers). The Customers receive all marketable power generation from the PRP and pay the annual revenue requirement in 12 monthly installments based on the estimated operation, maintenance, interest, and replacement costs for the Deer Creek Power Plant. The payments do not depend upon the power and energy made available for sale each year. At the end of each fiscal year, WAPA reconciles estimates to actual expenses and includes any differences in the following fiscal year’s revenue requirement.

Basis for Rate Development

WAPA is continuing use of its existing firm power formula rate. The Provisional Formula Rate, under Rate Schedule Provo River Formula Rate PR–2, will provide sufficient revenue to pay all annual costs, including interest expenses, and repay investments and irrigation aid within the allowable periods.

Certification of Rates

WAPA’s Administrator certified that the Provisional Formula Rate, under Rate Schedule Provo River Formula Rate PR–2, is the lowest possible rate, consistent with sound business principles. The Provisional Formula Rate was developed following administrative policies and applicable laws.

Availability of Information

Information about this rate adjustment, including the power repayment study, letters, memorandums, and other supporting materials that were used to develop the Provisional Formula Rate, is available for inspection and copying at the Colorado River Storage Project Management Center, Western Area Power Administration, 299 South Main Street, Suite 200, Salt Lake City, Utah. Many of these documents are also available on WAPA’s website at: https://www.wapa.gov/regions/CRSP/rates/Pages/rate-order-189.aspx.

A copy of the categorical exclusion determination is available on WAPA’s website at https://www.wapa.gov/regions/CRSP/rates/Pages/rate-order-189.aspx.

Determination Under Executive Order 12866

WAPA has an exemption from centralized regulatory review under Executive Order 12866; accordingly, no clearance of this notice by the Office of Management and Budget is required.

Order

In view of the above, and under the authority delegated to me, I hereby confirm, approve, and place into effect, on an interim basis, Rate Order No. WAPA–189. The rate will remain in effect on an interim basis until: (1) FERC confirms and approves it on a final basis; (2) a subsequent rate is confirmed and approved; or (3) such rate is superseded.
