FEDERAL REGISTER

Vol. 85 Tuesday,

No. 32 February 18, 2020

Pages 8717–9362

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 85 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2020–0098; Product Identifier 2020–NM–011–AD; Amendment 39–19844; AD 2020–03–20]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for certain The Boeing Company Model MD–11, MD–11F, and 717–200 airplanes, all Model 737–8 and 737–9 airplanes, all Model 737–600, –700, –700C, –800, –900, and –900ER series airplanes, certain Model 747–400 and 747–400F series airplanes, certain Model 757 and 767 airplanes, and all Model 777 airplanes. This AD requires revising the existing airplane flight manual (AFM) to include a limitation to prohibit operations that require less than 0.3 required navigational performance (RNP) within a specified area for airplanes having a certain multi-mode receiver (MMR) with certain software installed. This AD was prompted by reports of the loss of global positioning system (GPS) data or degraded GPS positional accuracy while using a certain MMR. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective February 18, 2020.

The FAA must receive comments on this AD by April 3, 2020.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Examining the AD Docket

You may examine the AD docket on the internet at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2020–0098; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the regulatory evaluation, any comments received, and other information. The street address for Docket Operations (phone: 800–647–5527) is listed above. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: David Sumner, Aerospace Engineer, Systems and Equipment Section, FAA, Seattle ACO Branch, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206–231–3538; email: *david.sumner@faa.gov*.

SUPPLEMENTARY INFORMATION:

Discussion

In December 2019, the FAA received reports of the loss of GPS data or degraded GPS positional accuracy while using a certain MMR with certain software installed. An investigation determined that within a certain region of the world, operational software (OPS), number COL4D–0087–0002, COL4E–0087–0001, COL48–0087–0700, or COL49–0087–0701, if installed on Collins GLU–2100 MMR, part number (P/N) 822–2532–100, could result in a GPS positional error. The affected area occurs in a funnel shaped region of the world that mainly extends +/− 20 degrees on either side of 180 degrees West Longitude, and encompasses the Northern Hemisphere to 10 degrees Latitude in the Southern Hemisphere. When an airplane is within this affected region, the software should map the computed ionospheric pierce point (IPP) to the correct hemisphere, but the software is not doing that. The consequences of the GPS error are:

- An annunciated loss of GPS output, where the Global Navigation Satellite System (GNSS) bus becomes inactive anywhere from a few seconds to up to 40 minutes.
- Un-annunciated reduced positional accuracy in the affected region when the Satellite-Based Augmentation System (SBAS) ionosphere corrections are improperly applied. The positional error will be bounded to 0.3 nautical miles, but may not be bounded by the horizontal protection level (HPL) that is output by the GNSS.

This improper mapping within the OPS, if not addressed, could, during a high-precision approach with a GPS error, result in controlled flight into terrain.

FAA's Determination

The FAA is issuing this AD because the agency evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

AD Requirements

This AD requires revising the existing airplane flight manual to include a limitation to prohibit operations that require less than 0.3 RNP within a specified area for airplanes having a certain MMR with certain software installed.

Interim Action

The FAA considers this AD interim action. Collins is currently developing a software update that will further address the unsafe condition identified in this AD. Once this software update is developed, approved, and available, the FAA might consider additional rulemaking.

Justification for Immediate Adoption and Determination of the Effective Date

Section 553(b)(3)(B) of the Administrative Procedure Act (APA) (5 U.S.C.) authorizes agencies to dispense with notice and comment procedures for rules when the agency, for ''good cause,'' finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Under this section, an agency, upon finding good cause, may issue a final rule without seeking comment prior to the

rulemaking. Similarly, Section 553(d) of the APA authorizes agencies to make rules effective in less than thirty days, upon a finding of good cause.

An unsafe condition exists that requires the immediate adoption of this AD without providing an opportunity for public comments prior to adoption. The FAA has found that the risk to the flying public justifies foregoing notice and comment prior to adoption of this rule because, as described in the Discussion section of this AD, the loss of GPS data, or degraded GPS positional accuracy, during a high-precision approach with a GPS positional error, could result in controlled flight into terrain. Given the significance of the risk presented by this unsafe condition, it must be immediately addressed.

Accordingly, notice and opportunity for prior public comment are impracticable and contrary to the public interest pursuant to 5 U.S.C. 553(b)(3)(B). In addition, for the reasons stated above, the FAA finds that good cause exists pursuant to 5 U.S.C. 553(d) for making this amendment effective in less than 30 days.

Comments Invited

This AD is a final rule that involves requirements affecting flight safety and was not preceded by notice and an opportunity for public comment. However, the FAA invites you to send any written data, views, or arguments about this final rule. Send your comments to an address listed under the **ADDRESSES** section. Include the docket number FAA–2020–0098 and Product Identifier 2020–NM–011–AD at the beginning of your comments. The FAA specifically invites comments on the overall regulatory, economic, environmental, and energy aspects of this final rule. The FAA will consider all comments received by the closing date and may amend this final rule because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *https://www.regulations.gov,* including any personal information you provide. The FAA will also post a report summarizing each substantive verbal contact the agency receives about this final rule.

Confidential Business Information

Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this AD contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this AD, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this AD. Submissions containing CBI should be sent to David Sumner, Aerospace Engineer, Systems and Equipment Section, FAA, Seattle ACO Branch, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206–231–3538; email: *david.sumner@faa.gov*. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Regulatory Flexibility Act (RFA)

The requirements of the RFA do not apply when an agency finds good cause pursuant to 5 U.S.C. 553 to adopt a rule without prior notice and comment. Because the FAA has determined that it has good cause to adopt this rule without notice and comment, RFA analysis is not required.

Costs of Compliance

Although the FAA estimates the number of airplanes identified in the applicability of this AD as 3,200 airplanes of U.S. registry, the AFM revision specified in this AD is required only for the airplanes having a configuration identified in paragraph (g) of this AD. The FAA estimates that 409 airplanes of U.S. registry are affected by the AFM revision specified in paragraph (g) of this AD.

The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
AFM revision	1 work-hour × $85 per hour = $85	$0	$85	$34,765

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs'' describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866, and

(2) Will not affect intrastate aviation in Alaska.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2020–03–20 The Boeing Company: Amendment 39–19844; Docket No. FAA–2020–0098; Product Identifier 2020–NM–011–AD.

(a) Effective Date

This AD is effective February 18, 2020.

(b) Affected ADs

None.

(c) Applicability

This AD applies to The Boeing Company airplanes, certificated in any category, as identified in paragraphs (c)(1) through (9) of this AD.

(1) Model MD–11 and MD–11F airplanes modified by supplemental type certificate (STC) ST01895WI.

(2) Model 717–200 airplanes modified by STC ST04416AT.

(3) All Model 737–8 and 737–9 airplanes.

(4) All Model 737–600, –700, –700C, –800, –900, and –900ER series airplanes.

(5) Model 747–400 and 747–400F series airplanes modified by STC ST01892WI.

(6) Model 757–200, –200PF, –200CB, and –300 series airplanes modified by STC ST04436AT.

(7) Model 767–200, –300, –300F, –400ER, and –2C series airplanes modified by STC ST04436AT or ST01883WI.

(8) All Model 777–200, –200LR, –300, and –300ER series airplanes.

(9) All Model 777F series airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 34, Navigation.

(e) Unsafe Condition

This AD was prompted by reports of the loss of global positioning system (GPS) data or degraded GPS positional accuracy while using a certain multi-mode receiver (MMR). The FAA is issuing this AD to address the loss of GPS data and degraded GPS positional accuracy, which, during a high-precision approach with this GPS error, could result in controlled flight into terrain.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Airplane Flight Manual (AFM) Revision

For airplanes equipped with Collins GLU–2100 MMR, part number (P/N) 822–2532–100, having any applicable GLU–2100 operational software (OPS) identified in figure 1 to paragraph (g) of this AD installed: At the applicable time specified in paragraphs (g)(1) and (2) of this AD, revise the limitations or certificate limitations section, as applicable, of the existing AFM to include the information specified in figure 2 to paragraph (g) of this AD and revise the procedures or normal procedures section, as applicable, of the existing AFM to include the information specified in figure 3 to paragraph (g) of this AD. This may be done by inserting a copy of figures 2 and 3 to paragraph (g) of this AD into the existing AFM.

(1) For Model 737–8 and 737–9 airplanes: Before further flight.

(2) For all airplanes except Model 737–8 and 737–9 airplanes: Within 7 days after the effective date of this AD.

Electronics – Global Landing Unit (GLU)

(Required by AD 2020-03-20)

Operations that require less than 0.3 RNP (For example, 0.1, 0.11, 0.15, etc.) in the region identified below are prohibited with GLU-2100 OPS software number COL4D-0087-0002, COL4E-0087-0001, COL48-0087-0700, or COL49-0087-0701 installed.

Exception: Anchorage (PANC) approach procedures that allow less than RNP 0.3 are authorized provided the instructions outlined in the Electronics – Global Landing Unit Section of Normal Procedures Chapter are followed.

Note: Currently, Fairbanks (PAFA) and Anchorage (PANC) are the only airports in the region with an RNP approach that requires better than 0.3 nmi performance.

Region bounded by the following coordinates:

Latitude Range (degrees)	Longitude Range (degrees)
80 N to 70 N	40 E to 40 W
70 N to 69 N	134.5 E to 134.38 W
69 N to 68 N	134.5 E to 137.28 W

Electronics – Global Landing Unit (GLU)

(Required by AD 2020-03-20)

To conduct an approach procedure with GLU-2100 OPS software number COL4D-0087-0002, COL4E-0087-0001, COL48-0087-0700, or COL49-0087-0701, installed at Anchorage (PANC) with less than 0.3 RNP, accomplish the following prior to dispatch in accordance with AC 90-101A:

Perform a RNP GPS prediction to ensure the predicted availability of GPS Horizontal Integrity Limit (HIL) is less than MAX HIL for the planned operation time frame at Anchorage (PANC).

MAX HIL = 1.8 (RNP – 0.0726 nm) for LNAV with A/P engaged

MAX HIL = 1.8 (RNP – 0.0926 nm) for LNAV with F/D

BILLING CODE 4910–13–C

(h) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Seattle ACO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (i) of this AD. Information may be emailed to: *9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by The Boeing Company Organization Designation Authorization (ODA) that has been authorized by the Manager, Seattle ACO Branch, FAA, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(i) Related Information

For more information about this AD, contact David Sumner, Aerospace Engineer, Systems and Equipment Section, FAA, Seattle ACO Branch, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206–231–3538; email: *david.sumner@faa.gov.*

(j) Material Incorporated by Reference

None.

BILLING CODE 4910–13–P

DEPARTMENT OF COMMERCE

Bureau of Industry and Security

15 CFR Parts 744 and 762

[Docket No. 200211–0051]

RIN 0694–AH97

Temporary General License: Extension of Validity

AGENCY: Bureau of Industry and Security, Commerce.

ACTION: Final rule.

SUMMARY: The U.S. Government has decided to extend through April 1, 2020, the temporary general license to Huawei Technologies Co., Ltd. (Huawei) and one hundred and fourteen of its non-U.S. affiliates on the Entity List. In order to implement this decision, this final rule revises the temporary general license to remove the expiration date of February 16, 2020, and substitute the date of April 1, 2020.

DATES: This rule is effective February 13, 2020, through April 1, 2020, except for amendatory instructions 1 and 3, which are effective February 13, 2020.

FOR FURTHER INFORMATION CONTACT: Director, Office of Exporter Services, Bureau of Industry and Security, Department of Commerce, Phone: (949) 660–0144 or (408) 998–8806 or email your inquiry to: *ECDOEXS@bis.doc.gov.*

SUPPLEMENTARY INFORMATION:

Background

As published on May 22, 2019 (84 FR 23468) and extended and amended through a final rule published on August 21, 2019 (84 FR 43487), this temporary general license authorizes certain activities, including those necessary for the continued operations of existing networks and equipment as well as the support of existing mobile services, including cybersecurity research critical to maintaining the integrity and reliability of existing and fully operational networks and equipment. Exporters, reexporters, and transferors are required to maintain certifications and other records, to be made available when requested by BIS, regarding their use of the temporary general license. The expiration date was again updated through February 16, 2020 (84 FR 64018, Nov. 20, 2019).

As published on May 22, 2019 (84 FR 22961), and as revised and clarified by a final rule published on August 21, 2019 (84 FR 43493), any exports, reexports, or in-country transfers of items subject to the EAR to any of the listed Huawei entities as of the effective date they were added to the Entity List continue to require a license, with the exception of transactions explicitly authorized by the temporary general license and eligible for export, reexport, or transfer (in-country) prior to May 16, 2019 without a license or under a license exception. License applications will continue to be reviewed under a presumption of denial, as stated in the Entity List entries for the listed Huawei

entities. No persons are relieved of other obligations under the EAR, including but not limited to licensing requirements to the People's Republic of China (PRC or China) or other destinations and the requirements of part 744 of the EAR. The temporary general license also does not authorize any activities or transactions involving Country Group E countries (*i.e.,* Cuba, Iran, North Korea, Sudan, and Syria) or foreign nationals.

Extension of validity

At this time, the U.S. Government has decided to extend the temporary general license until April 1, 2020. In order to implement this U.S. Government decision, this final rule revises the temporary general license to remove the date of February 16, 2020 and substitute the date of April 1, 2020 in the introductory text in paragraph (b)(1) of the temporary general license and in the introductory text of paragraph (c) of Supplement No. 7 to part 744.

Export Control Reform Act of 2018

On August 13, 2018, the President signed into law the John S. McCain National Defense Authorization Act for Fiscal Year 2019, which included the Export Control Reform Act of 2018 (ECRA) (50 U.S.C. 4801–4852). ECRA provides the legal basis for BIS's principal authorities and serves as the authority under which BIS issues this rule. As set forth in Section 1768 of ECRA, all delegations, rules, regulations, orders, determinations, licenses, or other forms of administrative action that were made, issued, conducted, or allowed to become effective under the Export Administration Act of 1979 (previously, 50 U.S.C. 4601 *et seq.*) (as in effect prior to August 13, 2018 and as continued in effect pursuant to the International Emergency Economic Powers Act (50 U.S.C. 1701 *et seq.*)) or the Export Administration Regulations, and were in effect as of August 13, 2018, shall continue in effect according to their terms until modified, superseded, set aside, or revoked under the authority of ECRA.

Rulemaking Requirements

1. Executive Orders 13563 and 12866 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has been determined to be not significant for purposes of Executive Order 12866. This rule is not an Executive Order 13771 regulatory action because this rule is not significant under Executive Order 12866.

2. Notwithstanding any other provision of law, no person is required to respond to or be subject to a penalty for failure to comply with a collection of information, subject to the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) (PRA), unless that collection of information displays a currently valid Office of Management and Budget (OMB) Control Number. This regulation involves collections previously approved by OMB under control number 0694–0088, Simplified Network Application Processing System, which includes, among other things, license applications, and carries a burden estimate of 42.5 minutes for a manual or electronic submission. Total burden hours associated with the PRA and OMB control number 0694–0088 are not expected to increase as a result of this rule. You may send comments regarding the collection of information associated with this rule, including suggestions for reducing the burden, to Jasmeet K. Seehra, Office of Management and Budget (OMB), by email to *Jasmeet_K._Seehra@omb.eop.gov,* or by fax to (202) 395–7285.

3. This rule does not contain policies with federalism implications as that term is defined in Executive Order 13132.

4. Pursuant to section 1762 of ECRA, this action is exempt from the Administrative Procedure Act (5 U.S.C. 553) requirements for notice of proposed rulemaking, opportunity for public participation, and delay in effective date.

5. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by 5 U.S.C. 553, or by any other law, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.,* are not applicable. Accordingly, no regulatory flexibility analysis is required, and none has been prepared.

List of Subjects

15 CFR Part 744

Exports, Reporting and recordkeeping requirements, Terrorism.

15 CFR Part 762

Administrative practice and procedure, Business and industry, Confidential business information, Exports, Reporting and recordkeeping requirements.

Accordingly, parts 744 and 762 of the Export Administration Regulations (15 CFR parts 730 through 774) is amended as follows:

PART 744—[AMENDED]

■ 1. The authority citation for 15 CFR part 744 is revised to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* 22 U.S.C. 3201 *et seq.;* 42 U.S.C. 2139a; 22 U.S.C. 7201 *et seq.;* 22 U.S.C. 7210; E.O. 12058, 43 FR 20947, 3 CFR, 1978 Comp., p. 179; E.O. 12851, 58 FR 33181, 3 CFR, 1993 Comp., p. 608; E.O. 12938, 59 FR 59099, 3 CFR, 1994 Comp., p. 950; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13099, 63 FR 45167, 3 CFR, 1998 Comp., p. 208; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; E.O. 13224, 66 FR 49079, 3 CFR, 2001 Comp., p. 786; Notice of September 19, 2019, 83 FR 49633 (September 20, 2019); Notice of November 12, 2019, 84 FR 61817 (November 13, 2019).

■ 2. Supplement No. 7 to part 744 is added to read as follows:

Supplement No. 7 to Part 744—Temporary General License

Notwithstanding the requirements and other provisions of Supplement No. 4 to this part, which became effective as to Huawei Technologies Co., Ltd. (Huawei), Shenzhen, Guangdong, China on May 16, 2019, and its non-U.S. affiliates listed in Supplement No. 4 to this part on, as applicable, May 16, 2019 or August 19, 2019, the licensing and other requirements in the EAR as of May 15, 2019, are restored in part as of May 20, 2019, and through April 1, 2020, pertaining to exports, reexports, and transfers (in-country) of items subject to the EAR to any of the listed Huawei entities. The licensing and other policies of the EAR that were in effect as of May 15, 2019, are available to export, reexport, or transfer (in-country) such items to the listed Huawei entities if the transaction meets the conditions of paragraph (b) of this supplement, is limited in scope to one or more of the activities described in paragraphs (c)(1) through (3) of this supplement, and if the transaction parties satisfy the requirements of paragraph (d)(1) of this supplement and, if applicable, paragraph (d)(2) of this supplement. Thus, for example, the authority of NLR or a License Exception that was available as of May 15, 2019, may be used in connection with a transaction as per this temporary general license.

(a) *Identification of non-U.S. affiliates.* The non-U.S. affiliates to whom the licensing and other

requirements of the EAR are restored as described herein are those Huawei entities and affiliates added to the Entity List through the **Federal Register** documents listed in paragraphs (a)(1) and (2) of this supplement:

(1) Addition of Entities to the Entity List, published on 5/21/19.

(2) Non-U.S. affiliates of Huawei added to the Entity List on August 19, 2019.

(b) *Conditions for use of temporary general license.* Use of this temporary general license is subject to the following conditions:

(1) This temporary general license is effective from May 20, 2019, through April 1, 2020.

(2) This temporary general license does not resolve persons of other obligations under the EAR, including but not limited to licensing requirements to the People's Republic of China or elsewhere and/or the requirements of part 744 of the EAR. This authorization does not authorize any activities or transactions involving Country Group E countries (*i.e.,* Cuba, Iran, North Korea, Sudan and Syria) or persons.

(3) With the exception of those explicitly authorized in this temporary general license, exports, reexports, transfers (in-country) continue to require a license pursuant to the licensing policy described on the Entity List and license applications will be reviewed under the license review policy for that entry.

(c) *Authorized transactions.* This temporary general license allows, from May 20, 2019, through April 1, 2020, the following:

(1) *Continued operation of existing networks and equipment.* BIS authorizes, subject to other provisions of the EAR, engagement in transactions necessary to maintain and support existing and currently 'fully operational network' and equipment, including software for bug fixes, security vulnerability patches, and other changes to existing versions of the software, subject to legally binding contracts and agreements executed between Huawei, or one of its listed non-U.S. affiliates, and 'third parties' on or before May 16, 2019. Such transactions may not enhance the functional capacities of the original software or equipment.

(i) *Exclusions.* (A) The authorization under paragraph (c)(1) of this supplement extends only to activities such as patching networks and network infrastructure equipment, not end-devices such as general-purpose computing devices that would not be considered to be part of an existing and 'fully operational network.' Paragraph (c)(1) of this supplement does not authorize support for equipment that is not directly related to the support and maintenance of the network.

(B) The provision of the temporary general license under paragraph (c)(1) of this supplement does not authorize transfers of equipment for general business purposes or for activities that are not in direct support of an existing and 'fully operational network' (*e.g.,* semiconductor production equipment).

(ii) [Reserved]

Note 1 to paragraph (c)(1): The term 'third parties' in paragraph (c)(1) of this supplement and the term 'third party' in Notes 2 and 3 to paragraph (c)(1) refer to a party that is not Huawei, one of its listed non-U.S. affiliates, or the exporter, reexporter, or transferor, but rather an organization such as a telecommunications service provider.

Note 2 to paragraph (c)(1): The term 'fully operational network' in paragraph (c)(1) of this supplement, as well as in paragraph (c)(3) of the supplement, refers to a 'third party' network providing services to the 'third party's' customers.

(2) *Support to existing 'personal consumer electronic devices' and 'Customer Premises Equipment (CPE)'.* BIS authorizes, subject to other provisions of the EAR, engagement in transactions necessary to provide service and support, including software for bug fixes, security vulnerability patches, and other changes to existing versions of the software, to existing Huawei 'personal consumer electronic devices.' Such transactions may not enhance the functional capacities of the original software or equipment. For the purposes of this paragraph (c)(2), the term 'personal consumer electronic devices' is defined as including phones and other personally-owned equipment, such as a tablets, smart watches, and mobile hotspots such as MiFi devices. The authorized transactions under this paragraph (c)(2) include support for personal use of telecommunications hardware known as 'Customer Premises Equipment (CPE),' such as network switches, residential internet gateways, set-top boxes, home networking adapters and other personally-owned equipment that enables consumers to access network communications services and distribute them within their residence or small business. The authorization conferred by this paragraph (c)(2) is limited to models of Huawei 'personal consumer electronic devices' and 'CPE' that were available to the public on or before May 16, 2019.

(3) *Cybersecurity research and vulnerability disclosure.* BIS authorizes, subject to other provisions of the EAR, the disclosure to Huawei and/or to its listed non-U.S. affiliates of information regarding security vulnerabilities in items owned, possessed, or controlled by Huawei or any of its non-U.S. affiliates when related to the process of providing ongoing security research critical to maintaining the integrity and reliability of existing and currently 'fully operational network' and equipment.

(d) *Certification statement.* Prior to making an export, reexport, or transfer (in-country) pursuant to the temporary general license, the exporter, reexporter, or transferor must obtain a certification statement and any additional support documentation needed to substantiate the certification statement from the listed Huawei entity that will receive the item(s), as specified in paragraph (d)(1) of this supplement.

(1) *Certification statement required from Huawei or one of its listed non-U.S. affiliates.* Prior to any export, reexport, or transfer (in-country) under the temporary general license to Huawei or any of its listed non-U.S. affiliates identified in paragraph (a) of this supplement, the exporter, reexporter, or transferor must obtain a certification statement from the entity that will receive the item(s). The temporary general license also requires the party exporting, reexporting, or transferring (in-country) an item ''subject to the EAR'' to obtain, from the listed Huawei entity receiving the item, a certification statement under paragraph (d) of this supplement specifying how the export, reexport, or in-country transfer satisfies the provisions of the temporary general license, including specifying whether the activity or activities that will be supported by the transaction fall within paragraph (c)(1), (2), or (3) of this supplement. In order to substantiate the certification statement for transactions that fall within paragraph (c)(1), the exporter, reexporter, or transferor must obtain documentation from Huawei or one of its listed non-U.S. affiliates showing that there was a legally binding contract or agreement executed between the listed Huawei entity and a 'third party' on or before May 16, 2019. The exporter, reexporter, or transferor and the listed Huawei entity are each responsible for retaining the certification statement and any additional support documentation needed to substantiate the certification statement under paragraph (d). See part 762 of the EAR for record retention requirements. The certification statement must be in writing (which may be conveyed by email), be signed and dated by an individual of sufficient authority to legally bind the listed

entity, and shall provide the information required in paragraphs (d)(1)(i) and (ii) of this supplement and the certifications specified in paragraphs (d)(1)(iii) through (v) of this supplement.

(i) Name of the entity; complete physical address, to include shipping, corporate, and end user addresses, if different (simply listing a post office box is insufficient); telephone number; email address; website (if available); and name and title of individual signing the certification statement;

(ii) A complete list of the item(s), including the applicable Export Control Classification Number(s) or designation (if EAR99) for the item(s) under the EAR, and (for tangible shipments of commodities and software) the quantity or quantities of the item(s) that will be exported, reexported, or transferred under the authority of the temporary general license (this inclusive list may cover multiple exports, reexports, or transfers (in-country) under the temporary general license of the same item(s); see paragraph (d)(2) of this supplement);

(iii) The end-use of the item(s) to be received as an export, reexport, or transfer (in-country) falls within the scope of a specified authorizing paragraph under paragraph (c) of this supplement (a general statement or declaration that the item falls within the scope of paragraph (c) or the scope of the temporary general license will not be sufficient, as the specific authorizing paragraph under paragraph (c) must be identified);

(iv) The entity will comply with the recordkeeping requirements in part 762 of the EAR, including by providing copies of the certification statement and all other export, reexport, or transfer (in-country) records required to be retained in part 762 to any authorized agent, official, or employee of BIS, the U.S. Customs Service, or any other agency of the U.S. Government as required in § 762.7 of the EAR; and

(v) The individual signing the certification statement, on behalf of the consignee identified in paragraph (a) of this supplement, has sufficient authority to legally bind the entity.

(2) *Certification statements may be used for multiple exports, reexports, and transfers (in-country).* Exporters, reexporters, and transferors may rely on the certification statements obtained under paragraph (d)(1) of this supplement for multiple exports, reexports, and transfers (in-country) involving the same item(s) to the same consignee/end-user, provided the information included remains accurate for those additional exports, reexports, and transfers (in-country). If one certification statement is used for multiple exports, reexports, or transfers (in-country) made pursuant to the temporary general license, the exporter, reexporter, and transferor must maintain a log or other similar record that identifies each such export, reexport, and transfer (in-country) against that specific certification statement. The log or other similar record must be retained in accordance with part 762 of the EAR.

PART 762—[AMENDED]

■ 3. The authority citation for part 762 is revised to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783.

■ 4. Section 762.2 is amended by adding paragraph (b)(55) to read as follows:

§ 762.2 Records to be retained.

* * * * *

(b) * * *

(55) Supplement No. 7 to part 744, Temporary General License Certification Statements and logs or other records required, including any additional support documentation needed to substantiate the certification statement, under paragraph (d) of Supplement 7 to part 744 of this chapter.

Transfers of Certain Property by U.S. Persons to Partnerships With Related Foreign Partners; Correction

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations; correction.

SUMMARY: This document contains a correction to final regulations (T.D. 9891) that were published in the **Federal Register** on Thursday, January 23, 2020. Treasury Decision 9891 contains final regulations that provide guidance applicable to transfers of appreciated property by U.S. persons to partnerships with foreign partners related to the transferor.

DATES:

Effective date: These regulations are effective February 18, 2020 and applicable January 23, 2020.

Applicability dates: For dates of applicability, see § 1.721(c)–6.

FOR FURTHER INFORMATION CONTACT: Chadwick Rowland, (202) 317–6937 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The final regulations (TD 9891) that are the subject of this correction are issued under section 721 of the Internal Revenue Code.

Need for Correction

As published, the final regulations (TD 9891), contains errors that may prove to be misleading and are in need of clarification.

Correction to Publication

Accordingly, the final regulations (TD 9891), that are the subject of FR Doc. 2020–00383, in the issue of January 23, 2020 (85 FR 3833), are corrected as follows:

■ 1. On page 3834, in the third column, in the second and third sentence of the second full paragraph, ''PRS1 wholly owns a domestic corporation (UST). In Year 1, UST forms a new partnership (PRS2); as part of the formation, UST contributes section 721(c) property (as defined in § 1.721(c)–1(b)(15)) in return for a 90 percent interest in PRS2's capital and profits, and a U.S. individual (unrelated to UST) contributes cash in return for the remaining interest in PRS2's capital and profits.'' is corrected to read ''PRS1 wholly owns a domestic corporation (UST) and holds 90 percent of the interests in a lower tier partnership's (PRS2) capital and profits. In Year 1, UST and PRS2 form a new partnership (PRS3); as part of the formation, UST contributes section 721(c) property (as defined in § 1.721(c)–1(b)(15)) in return for a 90 percent interest in PRS3's capital and profits, and a U.S. individual (unrelated to UST) contributes cash in return for the remaining interest in PRS3's capital and profits''.

■ 2. On page 3834, in the third column, the second line of the fourth partial paragraph, ''PRS2'' is corrected to read ''PRS3''.

■ 3. On page 3835, in the first column, the second line from the bottom of the first full paragraph, ''consequence, PRS2'' is corrected to read ''consequence, PRS3''.

■ 4. On page 3835, in the third column, the third line from the bottom of the page, ''filed before March 17'' is corrected to read ''filed before July 17.''

Martin V. Franks,

Chief, Publications and Regulations Branch, Legal Processing Division, Associate Chief Counsel, (Procedure and Administration).

OSHA Standards and Regulations; Corrections

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Final rule; correcting amendments.

SUMMARY: In this rule OSHA is correcting typographical errors, including extraneous or omitted materials and inaccurate graphics, in 27 OSHA standards and regulations. These revisions do not affect the substantive requirements or coverage of the standards, do not modify or revoke existing rights or obligations, and do not establish new rights or obligations. The purpose of these correcting amendments is to reduce regulatory burdens by correcting the inaccuracies in regulatory text and graphics. This rule revises standards in recordkeeping, construction, general industry, shipyard employment, and longshoring.

DATES: Effective February 18, 2020.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Executive Summary

This rule corrects certain minor errors in 27 OSHA standards and regulations in 29 CFR parts 1904, 1910, 1915, 1918, and 1926. The corrections concern the following regulations and standards: (a) Recording and Reporting Injuries and Illnesses Regulations—including: Partial exemptions; annual summary of work-related injuries and illnesses; and definitions; (b) Occupational Safety and Health Standards for General Industry—including: Applicability of standards to employments in territories; definition and requirements for nationally recognized testing laboratories; electrical generation, transmission, and distribution; lead; and cadmium; (c) Occupational Safety and Health Standards for Shipyard Employment—eye and face protection against welding radiation; (d) Safety and Health Regulations for Longshoring—recommended Specific Program Elements for first aid training; and (e) Safety and Health Regulations for Construction—including: General safety and health provisions concerning applicability to employments in territories; lead; hazardous waste operations and emergency response; electrical use of flexible cords and cables; scaffolds; fall protection-roof width determinations; helicopters-hoists-elevators-and-conveyors-personnel hoists; excavation-Appendix A; steel erection-joists tables; metal decking and shear connectors; fall hazard training; underground construction; electric power transmission and distribution definitions; asbestos; cadmium; and cranes and derricks—routine access to underground construction. The corrections revise typographical errors, including extraneous or omitted materials and inaccurate graphics, in the listed standards.

II. Background

From time to time OSHA receives inquiries from inside and outside the agency concerning minor misprinted, technically inaccurate materials. OSHA researches the inaccuracies and potential revisions. Where necessary, the agency undertakes rulemaking to correct the issues. Where revisions are limited to minor corrections and technical amendments, OSHA publishes a document in the **Federal Register** directing the required revisions be made to the codified version of the regulations. This rule details the errors, the revisions, and directs the needed revisions to be made. Revisions are to be made to both electronic and printed versions of the Code of Federal Regulations (CFR). The agency has researched the changes necessary to correct minor misprints in the following five parts of Title 29: Recording and reporting occupational injuries and illnesses (part 1904), Occupational safety and health standards (Part 1910), Occupational safety and health standards for shipyard employment (part 1915), Longshoring safety and health (part 1918), and Construction safety and health (part 1926). The revisions in this rule serve to correct certain minor errors in the 27 OSHA standards and regulations. This rule is not an E.O. 13771 regulatory action because this rule is not significant under E.O. 12866.

III. Summary and Explanation

This rule corrects certain minor errors in 27 OSHA standards and regulations, as summarized in the Executive Summary. These corrections revise typographical errors, including extraneous or omitted materials and inaccurate graphics, in the listed standards. A more detailed discussion of each revision follows.

A. Revisions in Recording and Reporting Occupational Injuries and Illnesses (29 CFR Part 1904)

1. Subpart B of 1904—Scope, Partial Exemption in 29 CFR 1904.1

The agency is correcting omissions in the recordkeeping and reporting scope provision, § 1904.1(a)(1). This section refers to the requirement of § 1904.39 that even partially exempt employers must report certain injuries to OSHA. Existing section § 1904.1(a)(1) mirrors prior § 1904.39(a) reporting requirements for all employers. The prior requirement was to report each fatality and each hospitalization of three or more employees. OSHA revised those reporting requirements in the **Federal Register** (79 FR 56130, September 18, 2014), and the revisions became effective January 1, 2015. The revisions to § 1904.39(a) require all employers, even those partially exempted from recording by the § 1904.1 size exemption, to report a fatality, a hospitalization of one or more employees, an employee amputation, or an employee loss of an eye. This correction will place the corresponding language in § 1904.1(a)(1) so that it mirrors the current requirement. The change in this paragraph is not substantive and does not impose new obligations.

2. Subpart D of 1904—Other OSHA Injury and Illness Recordkeeping Requirements, Annual Summary of Work-Related Injuries and Illnesses in 29 CFR 1904.32

OSHA is also correcting a typographical error in the recordkeeping annual summary provision (§ 1904.32(b)(2)(iii)). The error is a faulty reference to § 1904.6(b)(4) describing equivalent forms allowed for recording annual injury/illness summary data. There is no § 1904.6(b)(4). The correct reference is to § 1904.29(b)(4) ''What is an equivalent form?''

3. Subpart G of 1904—Definitions, in 29 CFR 1904.46

OSHA is also updating § 1904.46 Definitions to correct a typographic omission. The agency revised a longstanding reference to the outdated 1987 Standard Industry Classification (SIC code) manual in 29 CFR 1904.2(b) (79 FR 56130, 56186 (September 18, 2014)). The document replaced the SIC code with the modern North American Industry Classification System-2007 code (NAICS). However, the corresponding replacement of SIC code with NAICS code in the § 1904.46 definition of Establishment at paragraph (1)(iii) did not occur. This rule makes that correction.

B. Revisions in Occupational Safety and Health Standards (29 CFR Part 1910)

1. Subpart A—General, Applicability of Standards in 29 CFR 1910.5

In § 1910.5, OSHA is correcting obsolete regulatory text, which, in addition to any State, the District of Columbia, and U.S. territories, applies OSHA standards to two territories that no longer exist: Trust Territory of the Pacific Islands and the Canal Zone. Section 29 CFR 1910.5(a) corrections will replace the reference to the Trust Territory of the Pacific Island with the Commonwealth of the Northern Mariana Islands and remove the reference to the Canal Zone.

2. Subpart A—General, Definition and Requirements for a Nationally Recognized Testing Laboratory in 29 CFR 1910.7

In Appendix A to § 1910.7 OSHA is correcting a typographical error for the Recognition Process for Nationally Recognized Testing Laboratories (NRTLs). Appendix A, section ''*I. Procedures for Initial OSHA Recognition*'' currently includes sections ''A. Applications,'' ''B. Review and Decision Process; Issuance or Renewal,'' and ''c. *Terms and Conditions of Recognition*.'' In order to eliminate confusion, the existing c title must conform to those of ''A.'' and ''B.'' As it exists, section ''c. *Terms and Conditions of Recognition*'' follows a similarly formatted paragraph B(7)(e),''*Review of final decision,*'' which is the last paragraph of ''B. Review and Decision Process; Issuance or Renewal.'' Existing paragraph ''c'' introduces its own topic, ''Terms and Conditions of Recognition,'' which is corrected to the same format as the A and B titles. Due to the change in the heading, OSHA is also renumbering current c. (1), (2), (3), and (4) to (1)(a), (b), (c), and (d). OSHA is also removing the outdated current paragraph c.(5), *Temporary Recognition of Certain NRTLs,* as the period of temporary recognition ended in 1993 and the two NRTLs listed in the paragraph now have regular NRTL recognition.

3. Subpart R—Special Industries, Electric Power Generation, Transmission, and Distribution in 29 CFR 1910.269

In § 1910.269(x), this rule corrects an outdated reference in the fifth definition of Hazardous Atmosphere to ''Material Safety Data Sheets.'' Due to the global harmonization of Hazard Communications standards, OSHA changed ''Material Safety Data Sheets'' (MSDS) to ''Safety Data Sheet'' (SDS) at 77 FR 17574, 17577 (March 26, 2012).

4. Subpart Z—Toxic and Hazardous Substances, Lead in 29 CFR 1910.1025

OSHA is also correcting a misprinted reference to § 1910.1025(e)(6) in § 1910.1025(e)(3)(ii)(G). In 1995, OSHA removed § 1910.1025(e)(4) and renumbered paragraph (e)(5) as (e)(4) and paragraph (e)(6) as (e)(5) (60 FR 52856, 52858, October 11, 1995). At that time, the reference to paragraph (e)(6) in § 1910.1025(e)(3)(ii)(G) should have been changed to (e)(5) but was not changed. This final rule is correcting the

reference in § 1910.1025(e)(3)(ii)(G) to paragraph (e)(5).

5. Subpart Z—Toxic and Hazardous Substances, Cadmium in 29 CFR 1910.1027

OSHA is removing § 1910.1027(n)(6), which requires medical records to be transferred to the National Institute for Occupational Safety and Health (NIOSH) if the employer goes out of business and does not have a successor employer or other organization designated to receive the records. In the Standards Improvement Project Phase III (SIP–III) rulemaking, OSHA explained that NIOSH found these records were not valuable for research and that the cost of storing the records could not be justified. OSHA then removed the transfer of records requirement from 18 health standards in 29 CFR parts 1910, 1915 and 1926, and in § 1910.1020 itself, but the cadmium standard was inadvertently overlooked (76 FR 33590, 33598, June 8, 2011). OSHA is now making that update in the general industry cadmium standard.

C. Revisions for Occupational Safety and Health Standards for Shipyard Employment (29 CFR 1915)

Subpart I—Personal Protective Equipment (PPE), Eye and Face Protection in 29 CFR 1915.153.

In § 1915.153, this rule corrects format errors in Table I–1—Filter Lenses for Protection Against Radiant Energy by reformatting the table so that the values for ''Operations,'' ''Electrode size,'' ''Arc current,'' and ''Minimum protective shade'' correspond with each other correctly.

D. Revisions to Safety and Health Regulations for Longshoring (29 CFR Part 1918)

Appendix V to Part 1918—Basic Elements of a First Aid Training Program (Non-Mandatory), Specific Program Elements (A)(3) Poisoning

In Non-mandatory Appendix V, Basic Elements of a First Aid Training Program, to 29 CFR 1918, Specific Program Elements paragraph (A)(3), OSHA is updating ''Materials Safety Data Sheet (MSDS)'' to the current terminology ''Safety Data Sheet (SDS).''

E. Revisions to Safety and Health Regulations for Construction (29 CFR Part 1926)

1. Subpart C—General Safety and Health Provisions, General Safety and Health provisions in 29 CFR 1926.20

At § 1926.20(c), General safety and health provisions for construction, this rule corrects the list of territories to which OSHA construction standards apply. The territories are the same as the ones listed in § 1910.5(a) above, as modified by this rule.

2. Subpart D—Occupational Health and Environmental Conditions, Lead in 29 CFR 1926.62

In § 1926.62, the lead standard for construction, OSHA is correcting paragraphs 1926.62(d)(2)(iii) and (iv) by replacing the existing outdated references to ''Table 1 of this section'' with the correct references to ''paragraph (f) of this section.'' Table 1 no longer exists (71 FR 50122, 50191 (August 24, 2006)). Respirator selection must be conducted in accordance with 29 CFR 1910.134(d)(3)(i)(A), as required by § 1926.62(f)(3).

In § 1926.62(d)(3)(iii) and (d)(4)(ii), OSHA is replacing existing misprints referencing ''(d)(10) of this section'' with correct references to ''(d)(9) of this section,'' which addresses the accuracy of measurement required by paragraphs (d)(3)(iii) and (d)(4)(ii). There is no paragraph (d)(10).

In § 1926.62, Appendix B, Section IV—Paragraph (F), OSHA is replacing the outdated reference to Table 1 with the correct reference to § 1926.62(f)(3) of this section for selecting respirators as explained above regarding § 1926.62(d)(2)(iii) and (iv).

3. Subpart D—Occupational Health and Environmental Conditions, Hazardous Waste Operations and Emergency Response in 29 CFR 1926.65

In § 1926.65(a)(2)(i) of Hazardous waste operations and emergency response, OSHA is correcting a misprinted reference to § 1926.20(e)(1). There is no § 1926.20(e)(1); the correct reference, § 1926.20(e), was added in 1993 (58 FR 35076, 35078 (June 30, 1993)).

In § 1926.65(g)(2), OSHA is correcting the outdated acronym ''MSDS'' and term ''Material Safety Data Sheet.'' Due to the global harmonization of Hazard Communications standards OSHA changed these terms to ''SDS'' and ''Safety Data Sheet'' (77 FR 17574, 17577 (March 26, 2012)).

In § 1926.65(l)(3)(vi) and (p)(8)(iv)(E), OSHA is removing misprinted references to § 1926.159. OSHA had imported regulatory text for §§ 1926.97, 1926.98, and 1926.156–1926.159 in error from part 1910 fire protection standards. The 1910 standards, however, were expressly limited in scope and did not cover construction. OSHA corrected the improper incorporation by removing the sections from part 1926, including § 1926.159, in 1996 (61 FR 31427, 31429, 31432 (June 20, 1996)).

In § 1926.65(q)(3)(iii), OSHA is removing a misprinted reference to § 1926.97, for the reason explained in the prior paragraph. The particular text in former § 1926.97 concerned protective clothing for fire brigades. After § 1926.97 was removed (61 FR 31427, 31432 (June 20, 1996)), OSHA later revived § 1926.97 as an unrelated electrical personal protective equipment standard (79 FR 20316, 20693 (April 11, 2014)).

In paragraph 5.1 of Section B in Appendix A to 29 CFR 1926.65, OSHA is correcting an outdated reference of MSDS to SDS and Safety Data Sheet as explained above regarding § 1926.65(g)(2).

4. Subpart K—Electrical, Wiring Methods, Components, and Equipment for General Use in 29 CFR 1926.405

In § 1926.405(g)(1)(iii)(C), OSHA is correcting a misprinted reference to a nonexistent § 1926.405(a)(2)(ii)(1). The correct reference is to § 1926.405(a)(2)(ii)(I), which allows the use of flexible cords and cables through pinch points during construction work if protection is provided to avoid damage.

5. Subpart L—Scaffolds, Additional Requirements Applicable to Specific Types of Scaffolds in 29 CFR 1926.452

In § 1926.452(a)(3), in the Scaffolds standards, OSHA is correcting a pole scaffold metric conversion by replacing the inaccurate conversion of 50 pounds to 222 kilograms. The accurate rounded conversion number is 22.7 kilograms.

In § 1926.452(w)(6)(ii), OSHA is correcting a mobile scaffold reference by replacing the existing misprinted reference to paragraph (x) (Repair bracket scaffolds) of 29 CFR part 1926 subpart L appendix A. The correct reference is to paragraph 2.(w) (Mobile scaffolds) of the same appendix.

Also in § 1926.452(w)(6)(ii), OSHA is removing the misprinted parenthetical phrase ''(ANSI/SIA A92.5 and A92.6)''. The A92.5 standard applies to boom-supported elevating work platforms, and A92.6 applies to self-propelled elevating work platforms.

6. Subpart L—Scaffolds, Appendix E to Subpart L, Drawings and Illustrations

In (Non-mandatory) appendix E of 29 CFR subpart L, OSHA is correcting text and graphic pages, which show maximum vertical tie spacing for scaffolds. The graphics being corrected are titled ''Maximum Vertical Tie Spacing Wider Than 3′–0″ Bases'' and ''Maximum Vertical Tie Spacing 3′–0″

And Narrower Bases.'' Both corrections depict guys, ties, and braces instead of just ties, and the revisions correct captions for attachment points, which must be closest to the required height dimension, whether above or below the exact measurement. Also the revisions correctly depict that connections must be where horizontal scaffold frame members connect inner and outer scaffold legs whether at or closest to the exact height measurement.

7. Subpart M—Fall Protection, Appendix A to Subpart M, Determining Roof Widths

In appendix A to 29 CFR 1926 subpart M, paragraph (1), OSHA is correcting ''Non-mandatory Guidelines for Complying with § 1926.501(b)(10)'' by replacing the misprinted reference to § 1910.501(b)(10) with the correct reference to § 1926.501(b)(10).

Also in appendix A to 29 CFR part 1926 subpart M, OSHA is correcting Example C. Irregularly Shaped Roofs With Rectangular Shaped Sections and Example E. Roofs With Penthouses, Open Courtyards, Additional Floors, Etc., by replacing misprinted references to § 1926.502(b)(10) with the correct reference to § 1926.501(b)(10).

Additionally in subpart M, appendix A, Example C and Example E, OSHA is correcting these titles by centering and conforming the titles with the format used for titles in Examples A, B, D, and F of the appendix. OSHA is also correcting notations in Examples C and E to show that a W symbol means a correct measurement and that a circled ''w'' symbol means an incorrect measurement. The corrections explain a symbol included on the graphics but not included in the explanatory text. The corrections clarify the graphics.

8. Subpart N—Helicopters, Hoists, Elevators, and Conveyors in 29 CFR 1926.552

At § 1926.552(c)(17)(iv), OSHA is replacing misprinted lower case parenthetical italicized paragraph letters (a) through (e) in Personnel hoists with capital parenthetical letters. Preexisting § 1926.552(c)(17)(iv) includes paragraphs (a), (b), (c), (d), and (e). Paragraph 1926.552(c)(17)(iv)(e) is immediately followed by § 1926.552(d) Permanent elevators. This sequence causes confusion. The **Federal Register** Document Drafting Handbook at Table 2–4 requires paragraphs at the (c)(17)(iv) level to be listed with capital parenthetical letters, *i.e.,* (A), (B), (C), (D), and (E). This capitalization would correctly distinguish requirements for material or personnel hoists used only for construction activities from permanent elevators used during construction activities.

9. Subpart P—Excavations, Appendix A to Subpart P, Soil Classification

In paragraph (b) of appendix A to 29 CFR part 1926, subpart P, Excavations, OSHA corrects criteria for *Type C* soil case *(v).* The *Definition* for case *(v)* contains a misprinted, ''or'', which confuses how layered soil systems are interpreted to dip into excavations. The correction, which is consistent with Soil Types A, B, and C in the proposed rule at 52 FR 12288, 12329–30 (April 15, 1987) as well as with Type A and Type B in the Final Rule at 54 FR 45894, 45963 (October 31, 1989), will use ''on.'' ''On'' accurately describes how a layered soil system dips into the excavation. The language is being corrected to explain that a layered system dips into the excavation ''on a slope of four horizontal to one vertical (4H:1V) or steeper.'' OSHA is also correcting an unrelated misspelling of ''minimum'' in paragraph (d)(2)(iii)-*Thumb Penetration* of appendix A.

10. Subpart R—Steel Erection, Structural Steel Assembly in 29 CFR 1926.754

In § 1926.754(c)(2), OSHA is correcting the Steel Erection standard by replacing the current misprinted reference to nonexistent § 1926.760(c)(8) with the correct reference to § 1926.760(c)(7).

11. Subpart R—Steel Erection, Open Web Steel Joists in 29 CFR 1926.757

Additionally, OSHA is correcting Steel Erection joist Tables A and B in § 1926.757(c) (66 FR 5196, 5270 (January 18, 2001)) by revising a typographical footnote error that incorrectly limits an exemption from erection bridging requirements. The footnotes in both Table A, Erection Bridging For Short Span Joists, and Table B, Erection Bridging For Long Span Joists read ''NM=diagonal bolted bridging not mandatory for joists under 40 feet.'' This incorrectly limits the exemption by joist length. The agency discovered the misprinted footnote after it was published and addressed the inaccuracy through question 36(a) in compliance directive CPL 02–01–034 (originally CPL 2–1.34) (March 22, 2002). There is no length limitation for the NM notation. It means not mandatory regardless of joist length.

12. Subpart R—Steel Erection, Training in 29 CFR 1926.761

In § 1926.761(b) *Fall hazard training,* OSHA is correcting misprinted fall protection training requirements. The December 12, 2008 **Federal Register** at page 75589 instructed that § 1926.761(b) be revised. An inadvertent misprint replaced § 1926.761(b) and the subparagraphs with just the regulatory text for paragraph (b) alone, leaving out the subparagraphs (66 FR 5196, 5273 (Jan. 18, 2001)); as amended at (73 FR 75568, 75589 (Dec. 12, 2008)). The correction replaces the inadvertently removed paragraphs (b)(1) through (5). The correction includes the original regulatory text concerning: (1) Hazard recognition, (2) use of fall protection systems, (3) correct procedures for erecting, maintaining fall protection systems, (4) fall prevention procedures, and (5) the fall protection requirements of subpart R.

13. Subpart V—Power Transmission and Distribution, Definitions in 29 CFR 1926.968

In § 1926.968, the definition of *Hazardous atmosphere* includes five examples. The Note to example five contains the outdated term ''Material Safety Data Sheet.'' Due to the global harmonization of Hazard Communications standards, OSHA changed the term to ''Safety Data Sheet (SDS),'' as explained above in the revision to § 1926.65(g)(2)).

14. Subpart Z—Toxic and Hazardous Substances, Asbestos in 29 CFR 1926.1101

At § 1926.1101(e)(4), OSHA is correcting a typographical error in the Asbestos standard by replacing a reference to ''(h)(2) of this section'' with ''(h)(3) of this section.'' For entrance into a regulated area § 1926.1101(e)(4) requires that employees wear respirators selected in accordance with the referenced paragraph. Paragraph (h)(2) requires the employer to implement a respiratory protection program. Paragraph (h)(3) details the criteria that employers must use to select and provide each employee an appropriate respirator for protection against asbestos exposure.

In § 1926.1101(f)(3)(iii), OSHA is removing the redundant use of the word ''respirator''.

At § 1926.1101(g)(7), OSHA is correcting a typographical error by correctly italicizing the section title, *Work Practices and Engineering Controls for Class II work.*

In § 1926.1101(g)(8)(v), OSHA is replacing a misprinted reference to § 1926.1101(g)(8)(iv)(A) through (D) with the correct reference to ''§ 1926.1101(g)(8)(i) through (iv)'' of this section.

In § 1926.1101(n)(2)(iii) and (n)(3)(i) and (iii), OSHA is replacing misprinted

references to § 1910.33 with correct references to § 1910.1020.

At § 1926.1101(p)(1), OSHA is also correcting the Asbestos standard by deleting the reference to appendix C of 29 CFR 1926.1101 because the appendix no longer exists. OSHA removed and reserved the appendix when it consolidated respiratory protection requirements for general industry, construction, shipyard, longshoring, and marine terminal workplaces in 29 CFR 1910.134 (see 63 FR 1152, 1298 (January 8, 1998)).

In appendix K to § 1926.1101 paragraph (e) to paragraph 3.1, OSHA is correcting an outdated reference to MSDS with reference to SDS and Safety Data Sheet as discussed above in the similar correction to § 1926.65(g)(2).

15. Subpart Z—Toxic and Hazardous Substances, Cadmium in 29 CFR 1926.1127

In paragraph (d)(1)(i) to § 1926.1127, OSHA is correcting an outdated reference to MSDS with reference to SDS and Safety Data Sheet as discussed above in the similar correction to § 1926.65(g)(2).

In paragraphs (n)(1)(iii) and (n)(3)(iii) of § 1926.1127, OSHA is revising the references to § 1926.33 to more directly refer to § 1910.1020. Section 1910.1020 is the *Access to employee exposure and medical records regulation,* and § 1926.33 is currently a cross-reference to § 1910.1020, so the change is simply to make the reference more direct. Recent rulemakings have used this direct reference to the general industry standard in the construction standards. Above, regarding § 1926.1101(n), OSHA corrected misprinted references to § 1910.1020, and OSHA made the same change in other sections of the construction Asbestos standard in the SIP–III rulemaking (76 FR 33590, 33601, June 8, 2011). Existing § 1926.1127(n)(4)(i) also currently refers directly to § 1910.1020.

OSHA is also removing subparagraph (n)(5), which requires medical records to be transferred to NIOSH if the employer goes out of business and does not have a successor employer or other organization designated to receive the records for the reasons described above regarding the cadmium standard for general industry, § 1910.1027(n)(6).

16. Subpart CC—Cranes and Derricks in Construction, Hoisting Personnel in 29 CFR 1926.1431

In § 1926.1431(a), OSHA is adding a particular work activity, routine employee access to an underground construction worksite via a shaft when hoisted by a crane or derrick, to the list of work activities exempt from an employer's infeasibility demonstration requirement before using equipment to hoist employees. The infeasibility requirement for this activity was removed by changes to § 1926.800(t) ''*Hoisting unique to underground construction*'' (78 FR 23837 (April 23, 2013)).

IV. Agency Considerations

A. Economic Analysis and Regulatory Flexibility Analysis

The revisions will correct minor misprints, omissions, outdated references, and tabular and graphic inaccuracies. This will make the standards easier for employers and workers to understand and follow, as well as improve compliance assistance and enforcement. In addition, the corrections reduce confusion, save time, and thus may save costs.

The corrections and revisions are minor. None of them expand employer obligations or impose new costs. The corrections do not have significant impact on any small employer. Therefore, OSHA has determined that this rulemaking is not a significant rule with respect to Executive Order 12866 and complies with Executive Order 13563. OSHA certifies that this rulemaking will not have a significant economic impact on a substantial number of small entities.

B. Legal Considerations: Exemption from Notice and Comment Procedures

OSHA determined that this rulemaking is not subject to the procedures for public notice and comment specified in Section 4 of the Administrative Procedure Act (5 U.S.C. 553) or Section 6(b) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 655(b)). This rulemaking does not affect or change any existing rights or obligations, and no stakeholder is likely to object to them. Therefore, the agency finds good cause, in accordance with 29 CFR 1911.5, that public notice and comment are unnecessary within the meaning of 5 U.S.C. 553(b)(3)(B) and 29 U.S.C. 655(b).

C. Paperwork Reduction Act

After reviewing the rule and associated information collections, OSHA has determined that none of the correcting amendments would create new or revise existing information collections. Table A lists the collections of information affected by the correcting amendments.

TABLE A—AFFECTED COLLECTIONS OF INFORMATION

OMB Control No.	Collection of information
1218–0176 ..	Recordkeeping and Reporting Injuries and Illnesses (29 CFR 1904).
1218–0092 ..	Lead in General Industry Standard (29 CFR 1910.1025).
1218–0185 ..	Cadmium in General Industry Standard (29 CFR 1910.1027).
1218–0134 ..	Asbestos in Construction Standard (29 CFR 1926.1101).

OSHA notes that a Federal agency cannot conduct or sponsor a collection of information unless OMB approves it under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), and the agency displays a currently valid OMB control number. The public need not respond to a collection of information requirement unless the agency displays a currently valid OMB control number, and, notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information requirement if the requirement does not display a currently valid OMB control number.

D. Federalism

OSHA reviewed the included minor revisions in accordance with the Executive Order on Federalism (Executive Order 13132, 64 FR 43255, August 10, 1999), which requires that Federal agencies, to the extent possible, refrain from limiting State policy options, consult with States prior to taking any actions that would restrict State policy options, and take such actions only when clear constitutional authority exists and the problem is national in scope. Executive Order 13132 provides for preemption of State law only with the expressed consent of Congress. Agencies must limit any such preemption to the extent possible.

Under Section 18 of the OSH Act, Congress expressly provides that States may adopt, with Federal approval, a plan for the development and enforcement of occupational safety and health standards; States that obtain Federal approval for such a plan are referred to as ''State Plan States.'' (29 U.S.C. 667.) Occupational safety and health standards developed by State Plan States must be at least as effective in providing safe and healthful employment and places of employment as the Federal standards.

While OSHA drafted these minor revisions to clarify existing employee protections in every State, Section 18(c)(2) of the OSH Act permits State Plan States and Territories to develop and enforce their own standards, provided the requirements in these standards are at least as safe and healthful as the requirements specified in these corrections to existing standards.

In summary, as described above in Section IV(B) Legal Considerations, OSHA determined that this rule does not affect or change any existing rights or obligations, and no stakeholder is likely to object to them; therefore, in States with OSHA-approved State Plans, this rulemaking would not significantly limit State policy options.

E. State Plans

When Federal OSHA promulgates a new standard or a more stringent amendment to an existing standard, the 28 States and U.S. Territories with their own OSHA-approved occupational safety and health plans (State Plans) must amend their standards to reflect the new standard or amendment. Optionally they may show OSHA why such action is unnecessary (*e.g.,* because an existing State standard covering this area is already ''at least as effective'' as the new Federal standard or amendment (29 CFR 1953.5(a)). Since this rule publishes minor corrections to existing standards, it is unlikely that any State Plan needs to draft a new standard or amendment to an existing standard. When OSHA promulgates technical amendments or minor corrections that do not impose additional or more stringent requirements than the existing standards, State Plans are not required to amend or correct their standards, although OSHA may encourage them to do so.

The 28 States and territories with OSHA-approved State Plans are: Alaska, Arizona, California, Connecticut, Hawaii, Illinois, Indiana, Iowa, Kentucky, Maine, Maryland, Michigan, Minnesota, Nevada, New Mexico, New Jersey, New York, North Carolina, Oregon, Puerto Rico, South Carolina, Tennessee, Utah, Vermont, Virginia, Virgin Islands, Washington, and Wyoming. Of those Connecticut, Illinois, Maine, New Jersey, New York, and the Virgin Islands have OSHA-approved State Plans that apply to State and local government employees only.

OSHA concludes that these minor corrections and technical amendments will clarify existing protections afforded employees while reducing the compliance burden and confusion for employers. Therefore, OSHA urges States and Territories with approved State Plans to make appropriate revisions to their standards.

F. Unfunded Mandates Reform Act of 1995

OSHA reviewed the included minor corrections in accordance with the Unfunded Mandates Reform Act of 1995 (UMRA; 2 U.S.C. 1501 *et seq.*) and Executive Order 12875 (56 FR 58093). As noted under section IV(E) (''State Plans'') of this rule, the agency's standards do not apply to State and local governments except in States that elect voluntarily to adopt a State Plan approved by the agency. Consequently, these corrections and technical amendments, in addition to being minor and not changing substantive protections, do not meet the definition of a ''Federal intergovernmental mandate'' (see Section 421(5) of the UMRA (2 U.S.C. 658(5)). Therefore, for the purposes of the UMRA, the agency certifies that these minor corrections and technical amendments do not mandate that State, local, or tribal governments adopt new, unfunded regulatory obligations, or increase expenditures by the private sector of more than $100 million in any year.

V. Authority and Signature

Loren Sweatt, Principal Deputy Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, authorized the preparation of this rule pursuant to Sections 4, 6, and 8 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 653, 655, 657), 29 CFR part 1911, and Secretary's Order 1–2012 (77 FR 3912).

Signed at Washington, DC.

Loren Sweatt,

Principal Deputy Assistant Secretary of Labor for Occupational Safety and Health.

Corrections to Standards

For the reasons stated in the preamble of this final rule, the Occupational Safety and Health Administration amends 29 CFR parts 1904, 1910, 1915, 1918, and 1926 as follows:

PART 1904—RECORDING AND REPORTING OCCUPATIONAL INJURIES AND ILLNESSES

■ 1. The authority citation for part 1904 continues to read as follows:

Authority: 29 U.S.C. 657, 658, 660, 666, 669, 673, Secretary of Labor's Order 1–2012 (77 FR 3912, Jan. 25, 2012).

Subpart B—Scope

■ 2. In § 1904.1, revise paragraph (a)(1) to read as follows:

§ 1904.1 Partial exemption for employers with 10 or fewer employees.

(a) * * *

(1) If your company had 10 or fewer employees at all times during the last calendar year, you do not need to keep OSHA injury and illness records unless OSHA or the Bureau of Labor Statistics informs you in writing that you must keep records under § 1904.41 or § 1904.42. However, as required by § 1904.39, all employers covered by the OSH Act must report to OSHA any work-related incident that results in a fatality, the in-patient hospitalization of one or more employees, an employee amputation, or an employee loss of an eye.

* * * * *

Subpart D—Other OSHA Injury and Illness Recordkeeping Requirements

■ 3. In § 1904.32, revise paragraph (b)(2)(iii) to read as follows:

§ 1904.32 Annual summary.

* * * * *

(b) * * *

(2) * * *

(iii) If you are using an equivalent form other than the OSHA 300–A summary form, as permitted under § 1904.29(b)(4), the summary you use must also include the employee access and employer penalty statements found on the OSHA 300–A Summary form.

* * * * *

Subpart G—Definitions

■ 4. In § 1904.46, revise paragraph (1)(iii) in the definition of ''Establishment'' to read as follows:

§ 1904.46 Definitions.

* * * * *

Establishment. * * *

(1) * * *

(iii) No one industry description in the North American Industry Classification System (2007) codes applies to the joint activities of the establishments; and

* * * * *

PART 1910—OCCUPATIONAL SAFETY AND HEALTH STANDARDS

Subpart A—General

■ 5. The authority citation for subpart A continues to read as follows:

Authority: 29 U.S.C. 653, 655, 657; Secretary of Labor's Order Numbers 12–71 (36 FR 8754), 8–76 (41 FR 25059), 9–83 (48 FR 35736), 1–90 (55 FR 9033), 6–96 (62 FR 111), 3–2000 (65 FR 50017), 5–2002 (67 FR 65008), 5–2007 (72 FR 31159), 4–2010 (75 FR 55355), or 1–2012 (77 FR 3912), as applicable.

Sections 1910.6, 1910.7, 1910.8 and 1910.9 also issued under 29 CFR 1911. Section 1910.7(f) also issued under 31 U.S.C. 9701, 29 U.S.C. 9a, 5 U.S.C. 553; Public Law 106–113 (113 Stat. 1501A–222); Pub. L. 11–8 and 111–317; and OMB Circular A–25 (dated July 8, 1993) (58 FR 38142, July 15, 1993).

■ 6. In § 1910.5, revise paragraph (a) to read as follows:

§ 1910.5 Applicability of standards.

(a) Except as provided in paragraph (b) of this section, the standards contained in this Part shall apply with respect to employments performed in a workplace in a State, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, Wake Island, Outer Continental Shelf lands defined in the Outer Continental Shelf Lands Act, and Johnston Island.

* * * * *

■ 7. In § 1910.7, in appendix A, revise section I.c to read as follows:

§ 1910.7 Definition and requirements for a nationally recognized testing laboratory.

* * * * *

Appendix A to § 1910.7—OSHA Recognition Process for Nationally Recognized Testing Laboratories

* * * * *

I. Procedures for Initial OSHA Recognition

* * * * *

C. Terms and Conditions of Recognition

1. The following terms and conditions shall be part of every recognition:

a. *Letter of recognition.* The recognition by OSHA of any NRTL will be evidenced by a letter of recognition from OSHA. The letter will provide the specific details of the scope of the OSHA recognition, including the specific equipment or materials for which OSHA recognition has been granted, as well as any specific conditions imposed by OSHA.

b. *Period of recognition.* The recognition by OSHA of each NRTL will be valid for five years, unless terminated before the expiration of the period. The dates of the period of recognition will be stated in the recognition letter.

c. *Constancy in operations.* The recognized NRTL shall continue to satisfy all the requirements or limitations in the letter of recognition during the period of recognition.

d. *Accurate publicity.* The OSHA-recognized NRTL shall not engage in or permit others to engage in misrepresentation of the scope or conditions of its recognition.

2. [Reserved]

* * * * *

Subpart R—Special Industries

■ 8. The authority citation for subpart R continues to read as follows:

Authority: 29 U.S.C. 653, 655, 657; Secretary of Labor's Order Nos. 12–71 (36 FR 8754), 8–76 (41 FR 25059), 9–83 (48 FR 35736), 1–90 (55 FR 9033), 6–96 (62 FR 111), 5–2007 (72 FR 31159), 4–2010 (75 FR 55355), or 1–2012 (77 FR 3912), as applicable; and 29 CFR part 1911.

■ 9. In § 1910.269, in paragraph (x), revise the note following paragraph (5) of the definition of ''hazardous atmosphere'' to read as follows:

§ 1910.269 Electric power generation, transmission, and distribution.

* * * * *

(x) * * *

Hazardous atmosphere. * * *

(5) * * *

Note to the definition of ''hazardous atmosphere'' (5): For air contaminants for which the Occupational Safety and Health Administration has not determined a dose or permissible exposure limit, other sources of information, such as Safety Data Sheets (SDS) that comply with the Hazard Communication Standard, § 1910.1200, published information, and internal documents can provide guidance in establishing acceptable atmospheric conditions.

* * * * *

Subpart Z—Toxic and Hazardous Substances

■ 10. The authority citation for subpart Z continues to read as follows:

Authority: 29 U.S.C. 653, 655, 657; Secretary of Labor's Order No. 12–71 (36 FR 8754), 8–76 (41 FR 25059), 9–83 (48 FR 35736), 1–90 (55 FR 9033), 6–96 (62 FR 111), 3–2000 (65 FR 50017), 5–2002 (67 FR 65008), 5–2007 (72 FR 31160), 4–2010 (75 FR 55355), or 1–2012 (77 FR 3912), 29 CFR part 1911; and 5 U.S.C. 553, as applicable.

Section 1910.1030 also issued under Pub. L. 106–430, 114 Stat. 1901.

Section 1910.1201 also issued under 49 U.S.C. 5101 *et seq.*

■ 11. In § 1910.1025, revise paragraph (e)(3)(ii)(G) to read as follows:

§ 1910.1025 Lead.

* * * * *

(e) * * *

(3) * * *

(ii) * * *

(G) An administrative control schedule required by paragraph (e)(5) of this section, if applicable;

* * * * *

§ 1910.1027 [Amended]

■ 12. In § 1910.1027, remove paragraph (n)(6).

PART 1915—OCCUPATIONAL SAFETY AND HEALTH STANDARDS FOR SHIPYARD EMPLOYMENT

■ 13. The authority citation for part 1915 continues to read:

Authority: 33 U.S.C. 941; 29 U.S.C. 653, 655, 657; Secretary of Labor's Order No. 12–71 (36 FR 8754), 8–76 (41 FR 25059), 9–83 (48 FR 35736), 1–90 (55 FR 9033), 6–96 (62 FR 111), 3–2000 (65 FR 50017), 5–2002 (67 FR 65008), 5–2007 (72 FR 31160), 4–2010 (75 FR 55355), or 1–2012 (77 FR 3912); 29 CFR part 1911; and 5 U.S.C. 553, as applicable.

Subpart I—Personal Protective Equipment (PPE)

■ 14. In § 1915.153, revise Table I—1 to read as follows:

§ 1915.153 Eye and face protection.

* * * * *

TABLE I–1—FILTER LENSES FOR PROTECTION AGAINST RADIANT ENERGY

Operations	Electrode size 1/32 in	Arc current	Minimum * protective shade
Shielded metal arc welding	Less than 3	Less than 60	7
	3–5	60–160	8
	5–8	160–250	10
	More than 8	250–550	11
Gas metal arc welding and flux cored arc welding.		Less than 60	7
		60–160	10
		160–250	10
		250–500	10
Gas Tungsten arc welding		Less than 50	8
		50–150	8
		150–500	10
Air carbon	(Light)	Less than 500	10

TABLE I–1—FILTER LENSES FOR PROTECTION AGAINST RADIANT ENERGY—Continued

Operations	Electrode size 1/32 in	Arc current	Minimum * protective shade
Arc cutting	(Heavy)	500–1000	11
Plasma arc welding		Less than 20	6
		20–100	8
		100–400	10
		400–800	11
Plasma arc cutting	(light) **	Less than 300	8
	(medium) **	300–400	9
	(heavy) **	400–800	10
Torch brazing			3
Torch soldering			2
Carbon arc welding			14

** These values apply where the actual arc is clearly seen. Lighter filters may be used when the arc is hidden by the workpiece.

FILTER LENSES FOR PROTECTION AGAINST RADIANT ENERGY

Operations	Plate thickness—inches	Plate thickness—mm	Minimum * protective shade
Gas Welding:			
Light	Under 1/8	Under 3.2	4
Medium	1/8 to 1/2	3.2 to 12.7	5
Heavy	Over 1/2	Over 12.7	6
Oxygen cutting:			
Light	Under 1	Under 25	3
Medium	1 to 6	25 to 150	4
Heavy	Over 6	Over 150	5

* As a rule of thumb, start with a shade that is too dark to see the weld zone. Then go to a lighter shade which gives sufficient view of the weld zone without going below the minimum. In oxyfuel gas welding or cutting where the torch produces a high yellow light, it is desirable to use a filter lens that absorbs the yellow or sodium line in the visible light of the (spectrum) operation.

* * * * *

PART 1918—SAFETY AND HEALTH REGULATIONS FOR LONGSHORING

■ 15. The authority citation for part 1918 is revised to read as follows:

Authority: 33 U.S.C. 941; 29 U.S.C. 653, 655, 657; Secretary of Labor's Order No. 12–71 (36 FR 8754), 8–76 (41 FR 25059), 9–83 (48 FR 35736), 1–90 (55 FR 9033), 6–96 (62 FR 111), 3–2000 (65 FR 50017), 5–2002 (67 FR 65008), 5–2007 (72 FR 31160), 4–2010 (75 FR 55355), or 1–2012 (77 FR 3912), as applicable; and 29 CFR 1911.

Section 1918.90 also issued under 5 U.S.C. 553.

Section 1918.100 also issued under 49 U.S.C. 5101 *et seq.* and 5 U.S.C. 553.

Subpart H—Handling Cargo

■ 16. In appendix V to part 1918 to read as follows:

Appendix V to Part 1918—Basic Elements of a First Aid Training Program (Non-Mandatory)

Note: This appendix is non-mandatory and provides guidelines for small businesses and institutions teaching first aid, as well as for the recipients of first aid training.

General Program Elements

A. Teaching Methods

1. Trainees should develop ''hands on'' skills through the use of manikins and trainee partners during their training.

2. Trainees should be exposed to acute injury and illness settings as well as the appropriate response to those settings through the use of visual aids, such as video tape and slides.

3. Training should include a course workbook which discusses first aid principles and responses to settings that require interventions.

4. Training duration should allow enough time for particular emphasis on situations likely to be encountered in particular workplaces.

5. An emphasis on quick response to first aid situations should be incorporated throughout the program.

B. Principles of Responding to a Health Emergency

The training program should include instruction in:

1. Injury and acute illness as a health problem.

2. Interactions with the local emergency medical services system. Trainees have the responsibility for maintaining a current list of emergency telephone numbers (police, fire, ambulance, poison control) easily accessible to all employees.

3. The principles of triage.

4. The legal aspects of providing first aid services.

C. Methods of Surveying the Scene and the Victim(s)

The training program should include instruction in:

1. The assessment of scenes that require first aid services including:

a. General scene safety.

b. likely event sequence.

c. rapid estimate of the number of persons injured.

d. identification of others able to help at the scene.

2. Performing a primary survey of each victim including airway, breathing, and circulation assessments as well as the presence of any bleeding.

3. The techniques and principles of taking a victim's history at the scene of an emergency.

4. Performing a secondary survey of the victim including assessments of vital signs, skin appearance, head and neck, eye, chest, abdomen, back, extremities, and medical alert symbols.

D. Basic Adult Cardiopulmonary Resuscitation (CPR)

Basic adult CPR training should be included in the program. Retesting should occur every year. The training program should include instruction in:

1. Establishing and maintaining adult airway patency.

2. Performing adult breathing resuscitation.

3. Performing adult circulatory resuscitation.
4. Performing choking assessments and appropriate first aid interventions.
5. Resuscitating the drowning victim.

E. Basic First Aid Intervention

Trainees should receive instruction in the principles and performance of:
1. Bandaging of the head, chest, shoulder, arm, leg, wrist, elbow, foot, ankle, fingers, toes, and knee.
2. Splinting of the arm, elbow, clavicle, fingers, hand, forearm, ribs, hip, femur, lower leg, ankle, knee, foot, and toes.
3. Moving and rescuing victims including one and two person lifts, ankle and shoulder pulls, and the blanket pull.

F. Universal Precautions

Trainees should be provided with adequate instruction on the need for and use of universal precautions. This should include:
1. The meaning of universal precautions, which body fluids are considered potentially infectious, and which are regarded as hazardous.
2. The value of universal precautions for infectious diseases such as AIDS and hepatitis B.
3. A copy of OSHA's standard for occupational exposure to bloodborne pathogens or information on how to obtain a copy.
4. The necessity for keeping gloves and other protective equipment readily available and the appropriate use of them.
5. The appropriate tagging and disposal of any sharp item or instrument requiring special disposal measures such as blood soaked material.
6. The appropriate management of blood spills.

G. First Aid Supplies

The first aid provider should be responsible for the type, amount, and maintenance of first aid supplies needed for their particular worksite(s). These supplies need to be stored in a convenient area available for emergency access.

H. Trainee Assessments

Assessment of successful completion of the first aid training program should include instructor observation of acquired skills and written performance assessments. First aid skills and knowledge should be reviewed every three years.

I. Program Update

The training program should be periodically reviewed with current first aid techniques and knowledge. Outdated material should be replaced or removed.

Specific Program Elements

A. Type of Injury Training

1. Shock

Instruction in the principles and first aid intervention in:
a. Shock due to injury.
b. shock due to allergic reactions.
c. the appropriate assessment and first aid treatment of a victim who has fainted.

2. Bleeding

a. The types of bleeding including arterial, venous, capillary, external, and internal.
b. the principles and performance of bleeding control interventions including direct pressure, pressure points, elevation, and pressure bandaging.
c. the assessment and approach to wounds including abrasions, incisions, lacerations, punctures, avulsions, amputations, and crush injuries.
d. the principles of wound care including infection precautions, wounds requiring medical attention, and the need for tetanus prophylaxis.

3. Poisoning

Instruction in the principles and first aid intervention of:
a. Alkali, acid and systemic poisons. In addition, all trainees should know how and when to contact the local Poison Control Center.
b. inhaled poisons including carbon monoxide, carbon dioxide, smoke, and chemical fumes, vapors and gases as well as the importance of assessing the toxic potential of the environment to the rescuer and the need for respirators.

Trainees should be instructed in the acute effect of chemicals utilized in their plants, the location of chemical inventories, Safety Data Sheets (SDS), chemical emergency information, and antidote supplies.
c. topical poisons including poison ivy, poison sumac, poison oak, and insecticides.
d. drugs of abuse including alcohol, narcotics such as heroin and cocaine, tranquilizers, and amphetamines.

4. Burns

Instruction in the principles and first aid intervention of:
a. Assessing the severity of the burn including first degree, second degree, and third degree burns.
b. differentiating between the types of third degree burns (thermal, electrical, and chemical) and their specific interventions. Particular attention should be focused upon chemical burns, and the use of specific chemicals in the workplace which may cause them.

5. Temperature Extremes

Instruction in the principles and first aid intervention of:
a. Exposure to cold including frostbite and hypothermia.
b. exposure to heat including heat cramps, heat exhaustion, and heat stroke.

6. Musculoskeletal Injuries

The training program should include instruction in the principles and first aid intervention in:
a. Open fractures, closed fractures, and splinting.
b. dislocations, especially the methods of joint dislocations of the upper extremity. The importance of differentiating dislocations from fractures.
c. joint sprains.
d. muscle strains, contusions, and cramps.
e. head, neck, back, and spinal injuries.

7. Bites and Stings

Instruction in the principles and first aid intervention in:
a. Human and animal (especially dog and snake) bites.
b. bites and stings from insects (spiders, ticks, scorpions, hornets and wasps). Interventions should include responses to anaphylactic shock; other allergic manifestations; and rabies and tetanus prophylaxis.

8. Medical Emergencies

Instruction in the principles and first aid intervention of:
a. Heart attacks.
b. strokes.
c. asthma attacks.
d. diabetic emergencies including diabetic coma, insulin shock, hyperglycemia, and hypoglycemia.
e. seizures including tonic-clonic and absence seizures. Importance of *not* putting gags in mouth.
f. pregnancy including the appropriate care of any abdominal injury or vaginal bleeding.

9. Confined Spaces

a. The danger of entering a confined space to administer first aid without having the appropriate respiratory protection.
b. if first aid personnel will be required to assist evacuations from confined spaces, additional training will be needed.

B. Site of Injury Training

Instruction in the principles and first aid intervention of injuries to the following sites:

1. Head and Neck

a. Including skull fractures, concussions, and mental status assessments with particular attention to temporary loss of consciousness and the need for referral to a physician.
b. including the appropriate approach to the management of the individual who has suffered a potential neck injury or fracture.

2. Eye

a. Foreign bodies, corneal abrasions and lacerations.
b. chemical burns and the importance of flushing out the eye.
c. the importance of not applying antibiotics without physician supervision.

3. Nose

a. Nose injuries and nose bleeds.

4. Mouth and Teeth

a. Oral injuries, lip and tongue injuries, and broken and removed teeth. The importance of preventing inhalation of blood and teeth.

5. Chest

a. Rib fractures, flail chest, and penetrating wounds.

6. Abdomen

a. Blunt injuries, penetrating injuries, and protruding organs.

7. Hand, Finger, and Foot Injuries

a. Finger/toe nail hematoma, lacerations, splinters, finger nail avulsion, ring removal, and foreign bodies.
b. the importance of identifying amputation care hospitals in the area. When

an amputation occurs, appropriate handling of amputated fingers, hands, and feet during the immediate transportation of the victim and body part to the hospital.

PART 1926—SAFETY AND HEALTH REGULATIONS FOR CONSTRUCTION

Subpart C—General Safety and Health Provisions

■ 17. The authority citation for subpart C continues to read as follows:

Authority: 40 U.S.C. 3701 *et seq.;* 29 U.S.C. 653, 655, 657; Secretary of Labor's Order No. 12–71 (36 FR 8754), 8–76 (41 FR 25059), 9–83 (48 FR 35736), 6–96 (62 FR 111), 5–2007 (72 FR 31160), or 1–2012 (77 FR 3912) as applicable; and 29 CFR part 1911.

■ 18. In § 1926.20, revise paragraph (c) to read as follows:

§ 1926.20 General safety and health provisions.

* * * * *

(c) The standards contained in this part shall apply with respect to employments performed in a workplace in a State, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, Wake Island, Outer Continental Shelf lands defined in the Outer Continental Shelf Lands Act, and Johnston Island.

* * * * *

Subpart D—Occupational Health and Environmental Controls

■ 19. The authority citation for subpart D continues to read as follows:

Authority: 40 U.S.C. 3704; 29 U.S.C. 653, 655, and 657; Secretary of Labor's Order No. 12–71 (36 FR 8754), 8–76 (41 FR 25059), 9–83 (48 FR 35736), 1–90 (55 FR 9033), 6–96 (62 FR 111), 3–2000 (65 FR 50017), 5–2002 (67 FR 65008), 5–2007 (72 FR 31159), 4–2010 (75 FR 55355), or 1–2012 (77 FR 3912); 29 CFR part 1911; and 5 U.S.C. 553, as applicable.

Section 1926.61 also issued under 49 U.S.C. 5101 *et seq.*

Section 1926.62 also issued under 42 U.S.C. 4853.

Section 1926.65 also issued under 126 of Public Law 99–499, 100 Stat. 1613.

■ 20. In § 1926.62, revise paragraphs (d)(2)(iii) introductory text, (d)(2)(iv), (d)(3)(iii), and (d)(4)(ii) and revise section IV paragraph (F) of appendix B to read as follows:

§ 1926.62 Lead.

* * * * *

(d) * * *

(2) * * *

(iii) With respect to the tasks listed in this paragraph (d)(2)(iii) of this section, where lead is present, until the employer performs an employee exposure assessment as required in this paragraph (d), and documents that the employee performing any of the listed tasks is not exposed in excess of 500 μg/m^3, the employer shall treat the employee as if the employee were exposed to lead in excess of 500 μg/m^3 and shall implement employee protective measures as prescribed in paragraph (d)(2)(v) of this section. Where the employer does establish that the employee is exposed to levels of lead below 500 μg/m^3, the employer may provide the exposed employee with the appropriate respirator prescribed for such use at such lower exposures, in accordance with paragraph (f) of this section. The tasks covered by this requirement are:

* * * * *

(iv) With respect to the tasks listed in this paragraph (d)(2)(iv), where lead is present, until the employer performs an employee exposure assessment as required in this paragraph (d) and documents that the employee performing any of the listed tasks is not exposed to lead in excess of 2,500 μg/m^3 (50×PEL), the employer shall treat the employee as if the employee were exposed to lead in excess of 2,500 μg/m^3 and shall implement employee protective measures as prescribed in paragraph (d)(2)(v) of this section. Where the employer does establish that the employee is exposed to levels of lead below 2,500 μg/m^3, the employer may provide the exposed employee with the appropriate respirator prescribed for use at such lower exposures, in accordance with paragraph (f) of this section. Interim protection as described in this paragraph is required where lead containing coatings or paint are present on structures when performing:

* * * * *

(3) * * *

(iii) Where the employer has previously monitored for lead exposures, and the data were obtained within the past 12 months during work operations conducted under workplace conditions closely resembling the processes, type of material, control methods, work practices, and environmental conditions used and prevailing in the employer's current operations, the employer may rely on such earlier monitoring results to satisfy the requirements of paragraphs (d)(3)(i) and (d)(6) of this section if the sampling and analytical methods meet the accuracy and confidence levels of paragraph (d)(9) of this section.

* * * * *

(4) * * *

(ii) Where the employer has previously monitored for lead exposure, and the data were obtained within the past 12 months during work operations conducted under workplace conditions closely resembling the processes, type of material, control methods, work practices, and environmental conditions used and prevailing in the employer's current operations, the employer may rely on such earlier monitoring results to satisfy the requirements of paragraph (d)(4)(i) of this section if the sampling and analytical methods meet the accuracy and confidence levels of paragraph (d)(9) of this section.

* * * * *

Appendix B to § 1926.62—Employee Standard Summary

* * * * *

IV. Respiratory Protection—Paragraph (F)

Your employer is required to provide and assure your use of respirators when your exposure to lead is not controlled below the PEL by other means. The employer must pay the cost of the respirator. Whenever you request one, your employer is also required to provide you a respirator even if your air exposure level is not above the PEL. You might desire a respirator when, for example, you have received medical advice that your lead absorption should be decreased. Or, you may intend to have children in the near future, and want to reduce the level of lead in your body to minimize adverse reproductive effects. While respirators are the least satisfactory means of controlling your exposure, they are capable of providing significant protection if properly chosen, fitted, worn, cleaned, maintained, and replaced when they stop providing adequate protection.

Your employer is required to select your respirator according to the requirements of 29 CFR 1926.62(f)(3), including the requirements referenced in 29 CFR 1910.134(d)(3)(i)(A) of this chapter. Any respirator chosen must be approved by NIOSH under the provisions of 42 CFR part 84. These respirator selection references will enable your employer to choose a type of respirator that will give you a proper amount of protection based on your airborne lead exposure. Your employer may select a type of respirator that provides greater protection than that required by the standard; that is, one recommended for a higher concentration of lead than is present in your workplace. For example, a powered air-purifying respirator (PAPR) is much more protective than a typical negative pressure respirator, and may also be more comfortable to wear. A PAPR has a filter, cartridge, or canister to clean the air, and a power source that continuously blows filtered air into your breathing zone. Your employer might make a PAPR available to you to ease the burden of having to wear a respirator for long periods of time. The standard provides that you can obtain a PAPR upon request.

Your employer must also start a Respiratory Protection Program. This

program must include written procedures for the proper selection, use, cleaning, storage, and maintenance of respirators.

Your employer must ensure that your respirator facepiece fits properly. Proper fit of a respirator facepiece is critical to your protection from airborne lead. Obtaining a proper fit on each employee may require your employer to make available several different types of respirator masks. To ensure that your respirator fits properly and that facepiece leakage is minimal, your employer must give you either a qualitative or quantitative fit test as specified in appendix A of the Respiratory Protection standard located at 29 CFR 1910.134.

You must also receive from your employer proper training in the use of respirators. Your employer is required to teach you how to wear a respirator, to know why it is needed, and to understand its limitations.

The standard provides that if your respirator uses filter elements, you must be given an opportunity to change the filter elements whenever an increase in breathing resistance is detected. You also must be permitted to periodically leave your work area to wash your face and respirator facepiece whenever necessary to prevent skin irritation. If you ever have difficulty in breathing during a fit test or while using a respirator, your employer must make a medical examination available to you to determine whether you can safely wear a respirator. The result of this examination may be to give you a positive pressure respirator (which reduces breathing resistance) or to provide alternative means of protection.

■ 21. In § 1926.65, revise paragraphs (a)(2)(i), (g)(2), (l)(3)(vi), (p)(8)(iv)(E), and (q)(3)(iii) and in appendix A revise paragraph 5.1 in section B to read as follows:

§ 1926.65 Hazardous waste operations and emergency response.

(a) * * *

(2) * * *

(i) All requirements of 29 CFR parts 1910 and 1926 apply pursuant to their terms to hazardous waste and emergency response operations whether covered by this section or not. If there is a conflict or overlap, the provision more protective of employee safety and health shall apply without regard to 29 CFR 1926.20(e).

* * * * *

(g) * * *

(2) *Engineering controls, work practices, and PPE for substances not regulated either in § 1926.55, elsewhere in subpart D, or in other pertinent sections of this Part.* An appropriate combination of engineering controls, work practices, and personal protective equipment shall be used to reduce and maintain employee exposure to or below published exposure levels for hazardous substances and health hazards not regulated either in § 1926.55, elsewhere in subpart D, or in other pertinent sections of this part. The employer may use the published literature and Safety Data Sheets (SDS) as a guide in making the employer's determination as to what level of protection the employer believes is appropriate for hazardous substances and health hazards for which there is no permissible exposure limit or published exposure limit.

* * * * *

(l) * * *

(3) * * *

(vi) An employee alarm system shall be installed to notify employees of an emergency situation; to stop work activities if necessary; to lower background noise in order to speed communication; and to begin emergency procedures.

* * * * *

(p) * * *

(8) * * *

(iv) * * *

(E) An employee alarm system shall be installed to notify employees of an emergency situation; to stop work activities if necessary; to lower background noise in order to speed communication; and to begin emergency procedures.

* * * * *

(q) * * *

(3) * * *

(iii) Based on the hazardous substances and/or conditions present, the individual in charge of the ICS shall implement appropriate emergency operations, and assure that the personal protective equipment worn is appropriate for the hazards to be encountered.

* * * * *

Appendix A to § 1926.65—Personal Protective Equipment Test Methods

* * * * *

B. Totally-Encapsulating Chemical Protective Suit Qualitative Leak Test

* * * * *

5.1 Concentrated aqueous ammonium hydroxide, NH_4OH, is a corrosive volatile liquid requiring eye, skin, and respiratory protection. The person conducting the test shall review the Safety Data Sheet (SDS) for aqueous ammonia.

* * * * *

Subpart K—Electrical

■ 22. The authority citation for subpart K is revised to read as follows:

Authority: 29 U.S.C. 653, 655, 657; 40 U.S.C. 333; Secretary of Labor's Order No. 9–83 (48 FR 35736), 1–90 (55 FR 9033) or 1–2012 (77 FR 3912), as applicable; 29 CFR part 1911.

* * * * *

■ 23. In § 1926.405, revise paragraph (g)(1)(iii)(C) to read as follows:

§ 1926.405 Wiring methods, components, and equipment for general use.

* * * * *

(g) * * *

(1) * * *

(iii) * * *

(C) Where run through doorways, windows, or similar openings, except as permitted in paragraph (a)(2)(ii)(I) of this section;

* * * * *

Subpart L—Scaffolds

■ 24. The authority citation for subpart L continues to read as follows:

Authority: 40 U.S.C. 333; 29 U.S.C. 653, 655, 657; Secretary of Labor's Order Nos. 1–90 (55 FR 9033), 5–2007 (72 FR 31159), or 1–2012 (77 FR 3912); and 29 CFR part 1911.

* * * * *

■ 25. In § 1926.452, revise paragraphs (a)(3) and (w)(6)(ii) to read as follows:

§ 1926.452 Additional requirements applicable to specific types of scaffolds.

* * * * *

(a) * * *

(3) Diagonal bracing in both directions shall be installed across the entire inside face of double-pole scaffolds used to support loads equivalent to a uniformly distributed load of 50 pounds (22.7 kg) or more per square foot (929 square cm).

* * * * *

(w) * * *

(6) * * *

(ii) The height to base width ratio of the scaffold during movement is two to one or less, unless the scaffold is designed and constructed to meet or exceed nationally recognized stability test requirements such as those listed in paragraph 2.(w) of appendix A to this subpart;

* * * * *

■ 26. In appendix E to subpart L of part 1926 subpart L:

■ a. Remove the graphic ''Maximum Vertical Tie Spacing Wider Than 3′-0″ Bases'' and add in its place the graphic ''Maximum Vertical Guy, Tie or Brace Spacing Wider Than 3′-0″ Bases''; and

■ b. Remove the graphic ''Maximum Vertical Tie Spacing 3′-0″and Narrower Bases'' and add in its place the ''Maximum Vertical Guy, Tie or Brace Spacing 3′-0″ And Narrower Bases''.

The additions read as follows:

* * * * *

Subpart M—Fall Protection

■ 27. The authority citation for subpart M continues to read as follows:

Authority: 40 U.S.C. 3701 *et seq.;* 29 U.S.C. 653, 655, 657; Secretary of Labor's Order No. 1–90 (55 FR 9033), 6–96 (62 FR 111), 3–2000 (65 FR 50017), 5–2007 (72 FR 31159), or 1–2012 (77 FR 3912), as applicable; and 29 CFR part 1911.

■ 28. Revise appendix A to subpart M of part 1926 to read as follows:

Appendix A to Subpart M of Part 1926—Determining Roof Widths

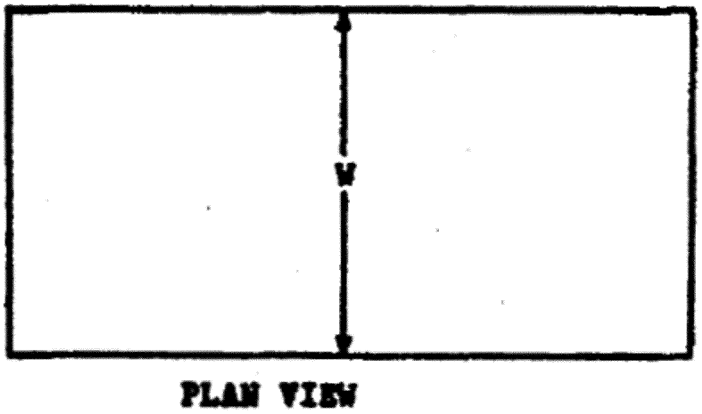
Non-Mandatory Guidelines for Complying With § 1926.501(b)(10)

(1) This appendix serves as a guideline to assist employers complying with the requirements of § 1926.501(b)(10). Section 1926.501(b)(10) allows the use of a safety monitoring system alone as a means of providing fall protection during the performance of roofing operations on low-sloped roofs 50 feet (15.25 m) or less in width. Each example in the appendix shows a roof plan or plans and indicates where each roof or roof area is to be measured to determine its width. Section views or elevation views are shown where appropriate. Some examples show ''correct'' and ''incorrect'' subdivisions of irregularly shaped roofs divided into smaller, regularly shaped areas. In all examples, the dimension selected to be the width of an area is the lesser of the two primary dimensions of the area, as viewed from above. Example A shows that on a simple rectangular roof, width is the lesser of the two primary overall dimensions. This is also the case with roofs which are sloped toward or away from the roof center, as shown in Example B.

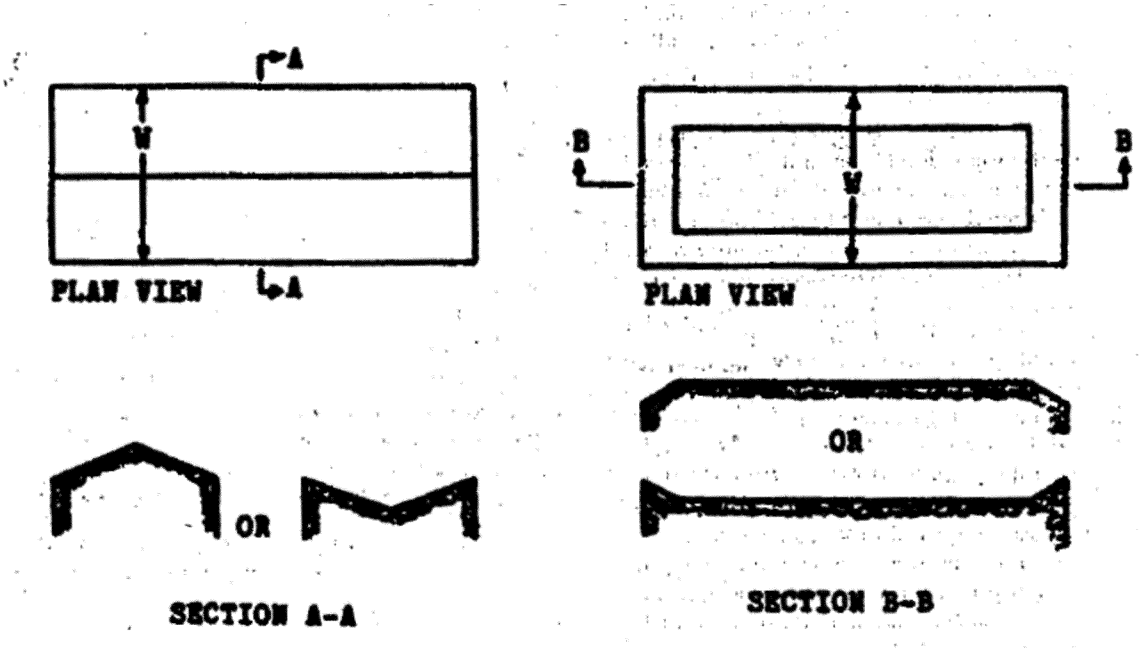
(2) Many roofs are not simple rectangles. Such roofs may be broken down into subareas as shown in Example C. The process of dividing a roof area can produce many different configurations. Example C gives the general rule of using dividing lines of minimum length to minimize the size and number of the areas which are potentially less than 50 feet (15.25 m) wide. The intent is to minimize the number of roof areas where safety monitoring systems alone are sufficient protection.

(3) Roofs which are comprised of several separate, non-contiguous roof areas, as in Example D, may be considered as a series of individual roofs. Some roofs have penthouses, additional floors, courtyard openings, or similar architectural features; Example E shows how the rule for dividing roofs into subareas is applied to such configurations. Irregular, non-rectangular roofs must be considered on an individual basis, as shown in Example F.

EXAMPLE A: RECTANGULAR SHAPED ROOFS

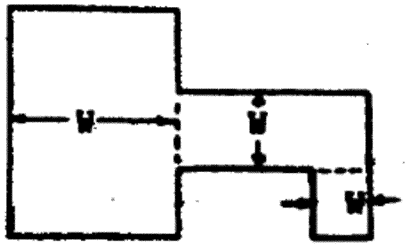


EXAMPLE B: SLOPED RECTANGULAR SHAPED ROOFS

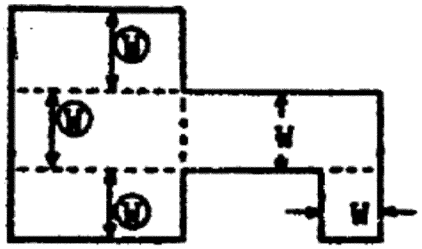


EXAMPLE C: IRREGULARLY SHAPED ROOFS WITH RECTANGULAR SHAPED SECTIONS

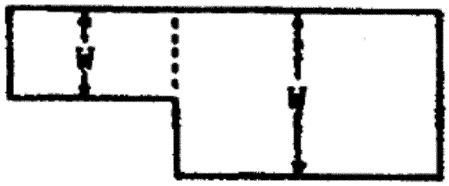
Such roofs are to be divided into sub-areas by using dividing lines of minimum length to minimize the size and number of the areas which are potentially less than or equal to 50 feet (15.25 meters) in width, in order to limit the size of roof areas where the safety monitoring system alone can be used [1926.501(b)(10)]. Dotted lines are used in the examples to show the location of dividing lines. W denotes correct measurements and Ⓦ denotes incorrect measurements of width.



Correct



Incorrect



Correct

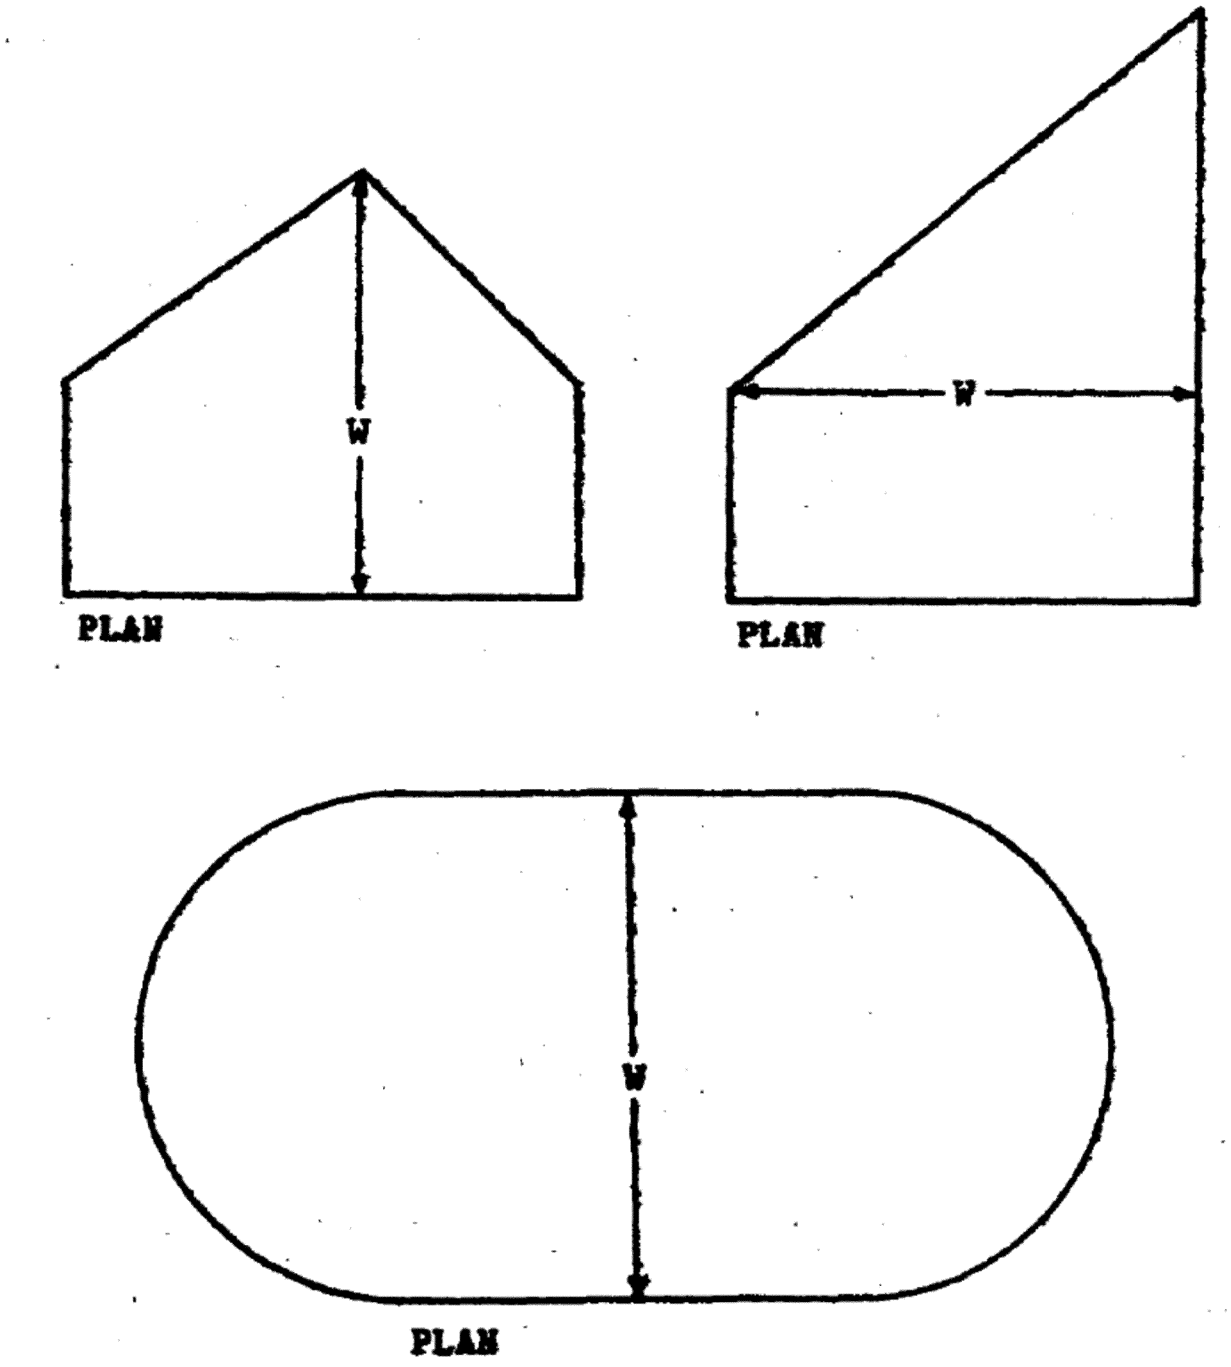
EXAMPLE F: IRREGULAR, NON-RECTANGULAR SHAPED ROOFS



BILLING CODE 4510–26–C

Subpart N—Helicopters, Hoists, Elevators, and Conveyors

■ 29. The authority citation for subpart N is revised to read as follows:

Authority: 40 U.S.C. 3701; 29 U.S.C. 653, 655, 657; Secretary of Labor's Order Nos. 12–71 (36 FR 8754), 8–76 (41 FR 25059), 9–83 (49 FR 35736), 5–2007 (72 FR 31159), or 1–2012 (77 FR 3912), as applicable; and 29 CFR 1911.

§ 1926.552 [Amended]

■ 30. In § 1926.552, in paragraph (c)(17)(iv), redesignate paragraphs (*a*) through (*e*) as paragraphs (A) through (E).

Subpart P—Excavations

■ 31. The authority citation for subpart P is revised to read as follows:

Authority: 40 U.S.C. 333; 29 U.S.C. 653, 655, and 657; Secretary of Labor's Order No. 12–71 (36 FR 8754), 8–76 (41 FR 25059), 9–83 (48 FR 35736), or 1–2012 (77 FR 3912), as applicable; and 29 CFR part 1911.

■ 32. Revise appendix A to subpart P of part 1926 to read as follows:

Appendix A to Subpart P of Part 1926—Soil Classification

(a) *Scope and application*—(1) *Scope.* This appendix describes a method of classifying soil and rock deposits based on site and environmental conditions, and on the

structure and composition of the earth deposits. The appendix contains definitions, sets forth requirements, and describes acceptable visual and manual tests for use in classifying soils.

(2) *Application.* This appendix applies when a sloping or benching system is designed in accordance with the requirements set forth in § 1926.652(b)(2) as a method of protection for employees from cave-ins. This appendix also applies when timber shoring for excavations is designed as a method of protection from cave-ins in accordance with appendix C to subpart P of part 1926, and when aluminum hydraulic shoring is designed in accordance with appendix D. This appendix also applies if other protective systems are designed and selected for use from data prepared in accordance with the requirements set forth in § 1926.652(c), and the use of the data is predicated on the use of the soil classification system set forth in this appendix.

(b) *Definitions.* The definitions and examples given below are based on, in whole or in part, the following: American Society for Testing Materials (ASTM) Standards D653–85 and D2488; The Unified Soils Classification System, the U.S. Department of Agriculture (USDA) Textural Classification Scheme; and The National Bureau of Standards Report BSS–121.

Cemented soil means a soil in which the particles are held together by a chemical agent, such as calcium carbonate, such that a hand-size sample cannot be crushed into powder or individual soil particles by finger pressure.

Cohesive soil means clay (fine grained soil), or soil with a high clay content, which has cohesive strength. Cohesive soil does not crumble, can be excavated with vertical sideslopes, and is plastic when moist. Cohesive soil is hard to break up when dry, and exhibits significant cohesion when submerged. Cohesive soils include clayey silt, sandy clay, silty clay, clay and organic clay.

Dry soil means soil that does not exhibit visible signs of moisture content.

Fissured means a soil material that has a tendency to break along definite planes of fracture with little resistance, or a material that exhibits open cracks, such as tension cracks, in an exposed surface.

Granular soil means gravel, sand, or silt, (coarse grained soil) with little or no clay content. Granular soil has no cohesive strength. Some moist granular soils exhibit apparent cohesion. Granular soil cannot be molded when moist and crumbles easily when dry.

Layered system means two or more distinctly different soil or rock types arranged in layers. Micaceous seams or weakened planes in rock or shale are considered layered.

Moist soil means a condition in which a soil looks and feels damp. Moist cohesive soil can easily be shaped into a ball and rolled into small diameter threads before crumbling. Moist granular soil that contains some cohesive material will exhibit signs of cohesion between particles.

Plastic means a property of a soil which allows the soil to be deformed or molded without cracking, or appreciable volume change.

Saturated soil means a soil in which the voids are filled with water. Saturation does not require flow. Saturation, or near saturation, is necessary for the proper use of instruments such as a pocket penetrometer or sheer vane.

Soil classification system means, for the purpose of this subpart, a method of categorizing soil and rock deposits in a hierarchy of Stable Rock, Type A, Type B, and Type C, in decreasing order of stability. The categories are determined based on an analysis of the properties and performance characteristics of the deposits and the environmental conditions of exposure.

Stable rock means natural solid mineral matter that can be excavated with vertical sides and remain intact while exposed.

Submerged soil means soil which is underwater or is free seeping.

Type A means cohesive soils with an unconfined compressive strength of 1.5 ton per square foot (tsf) (144 kPa) or greater. Examples of cohesive soils are: clay, silty clay, sandy clay, clay loam and, in some cases, silty clay loam and sandy clay loam. Cemented soils such as caliche and hardpan are also considered Type A. However, no soil is Type A if:

(i) The soil is fissured; or

(ii) The soil is subject to vibration from heavy traffic, pile driving, or similar effects; or

(iii) The soil has been previously disturbed; or

(iv) The soil is part of a sloped, layered system where the layers dip into the excavation on a slope of four horizontal to one vertical (4H:1V) or greater; or

(v) The material is subject to other factors that would require it to be classified as a less stable material.

Type B means:

(i) Cohesive soil with an unconfined compressive strength greater than 0.5 tsf (48 kPa) but less than 1.5 tsf (144 kPa); or

(ii) Granular cohesionless soils including: angular gravel (similar to crushed rock), silt, silt loam, sandy loam and, in some cases, silty clay loam and sandy clay loam.

(iii) Previously disturbed soils except those which would otherwise be classified as Type C soil.

(iv) Soil that meets the unconfined compressive strength or cementation requirements for Type A, but is fissured or subject to vibration; or

(v) Dry rock that is not stable; or

(vi) Material that is part of a sloped, layered system where the layers dip into the excavation on a slope less steep than four horizontal to one vertical (4H:1V), but only if the material would otherwise be classified as Type B.

Type C means:

(i) Cohesive soil with an unconfined compressive strength of 0.5 tsf (48 kPa) or less; or

(ii) Granular soils including gravel, sand, and loamy sand; or

(iii) Submerged soil or soil from which water is freely seeping; or

(iv) Submerged rock that is not stable; or

(v) Material in a sloped, layered system where the layers dip into the excavation on a slope of four horizontal to one vertical (4H:1V) or steeper.

Unconfined compressive strength means the load per unit area at which a soil will fail in compression. It can be determined by laboratory testing, or estimated in the field using a pocket penetrometer, by thumb penetration tests, and other methods.

Wet soil means soil that contains significantly more moisture than moist soil, but in such a range of values that cohesive material will slump or begin to flow when vibrated. Granular material that would exhibit cohesive properties when moist will lose those cohesive properties when wet.

(c) *Requirements*—(1) *Classification of soil and rock deposits.* Each soil and rock deposit shall be classified by a competent person as Stable Rock, Type A, Type B, or Type C in accordance with the definitions set forth in paragraph (b) of this appendix.

(2) *Basis of classification.* The classification of the deposits shall be made based on the results of at least one visual and at least one manual analysis. Such analyses shall be conducted by a competent person using tests described in paragraph (d) below, or in other recognized methods of soil classification and testing such as those adopted by the America Society for Testing Materials, or the U.S. Department of Agriculture textural classification system.

(3) *Visual and manual analyses.* The visual and manual analyses, such as those noted as being acceptable in paragraph (d) of this appendix, shall be designed and conducted to provide sufficient quantitative and qualitative information as may be necessary to identify properly the properties, factors, and conditions affecting the classification of the deposits.

(4) *Layered systems.* In a layered system, the system shall be classified in accordance with its weakest layer. However, each layer may be classified individually where a more stable layer lies under a less stable layer.

(5) *Reclassification.* If, after classifying a deposit, the properties, factors, or conditions affecting its classification change in any way, the changes shall be evaluated by a competent person. The deposit shall be reclassified as necessary to reflect the changed circumstances.

(d) *Acceptable visual and manual tests*—(1) *Visual tests.* Visual analysis is conducted to determine qualitative information regarding the excavation site in general, the soil adjacent to the excavation, the soil forming the sides of the open excavation, and the soil taken as samples from excavated material.

(i) Observe samples of soil that are excavated and soil in the sides of the excavation. Estimate the range of particle sizes and the relative amounts of the particle sizes. Soil that is primarily composed of fine-grained material is cohesive material. Soil composed primarily of coarse-grained sand or gravel is granular material.

(ii) Observe soil as it is excavated. Soil that remains in clumps when excavated is cohesive. Soil that breaks up easily and does not stay in clumps is granular.

(iii) Observe the side of the opened excavation and the surface area adjacent to the excavation. Crack-like openings such as

tension cracks could indicate fissured material. If chunks of soil spall off a vertical side, the soil could be fissured. Small spalls are evidence of moving ground and are indications of potentially hazardous situations.

(iv) Observe the area adjacent to the excavation and the excavation itself for evidence of existing utility and other underground structures, and to identify previously disturbed soil.

(v) Observe the opened side of the excavation to identify layered systems. Examine layered systems to identify if the layers slope toward the excavation. Estimate the degree of slope of the layers.

(vi) Observe the area adjacent to the excavation and the sides of the opened excavation for evidence of surface water, water seeping from the sides of the excavation, or the location of the level of the water table.

(vii) Observe the area adjacent to the excavation and the area within the excavation for sources of vibration that may affect the stability of the excavation face.

(2) *Manual tests.* Manual analysis of soil samples is conducted to determine quantitative as well as qualitative properties of soil and to provide more information in order to classify soil properly.

(i) *Plasticity.* Mold a moist or wet sample of soil into a ball and attempt to roll it into threads as thin as ⅛-inch in diameter. Cohesive material can be successfully rolled into threads without crumbling. For example, if at least a two inch (50 mm) length of ⅛-inch thread can be held on one end without tearing, the soil is cohesive.

(ii) *Dry strength.* If the soil is dry and crumbles on its own or with moderate pressure into individual grains or fine powder, it is granular (any combination of gravel, sand, or silt). If the soil is dry and falls into clumps which break up into smaller clumps, but the smaller clumps can only be broken up with difficulty, it may be clay in any combination with gravel, sand or silt. If the dry soil breaks into clumps which do not break up into small clumps and which can only be broken with difficulty, and there is no visual indication the soil is fissured, the soil may be considered unfissured.

(iii) *Thumb penetration.* The thumb penetration test can be used to estimate the unconfined compressive strength of cohesive soils. (This test is based on the thumb penetration test described in American Society for Testing and Materials (ASTM) Standard designation D2488—''Standard Recommended Practice for Description of Soils (Visual—Manual Procedure).'') Type A soils with an unconfined compressive strength of 1.5 tsf can be readily indented by the thumb; however, they can be penetrated by the thumb only with very great effort. Type C soils with an unconfined compressive strength of 0.5 tsf can be easily penetrated several inches by the thumb, and can be molded by light finger pressure. This test should be conducted on an undisturbed soil sample, such as a large clump of spoil, as soon as practicable after excavation to keep to a minimum the effects of exposure to drying influences. If the excavation is later exposed to wetting influences (rain, flooding), the classification of the soil must be changed accordingly.

(iv) *Other strength tests.* Estimates of unconfined compressive strength of soils can also be obtained by use of a pocket penetrometer or by using a hand-operated shearvane.

(v) *Drying test.* The basic purpose of the drying test is to differentiate between cohesive material with fissures, unfissured cohesive material, and granular material. The procedure for the drying test involves drying a sample of soil that is approximately one inch thick (2.54 cm) and six inches (15.24 cm) in diameter until it is thoroughly dry:

(A) If the sample develops cracks as it dries, significant fissures are indicated.

(B) Samples that dry without cracking are to be broken by hand. If considerable force is necessary to break a sample, the soil has significant cohesive material content. The soil can be classified as an unfissured cohesive material and the unconfined compressive strength should be determined.

(C) If a sample breaks easily by hand, it is either a fissured cohesive material or a granular material. To distinguish between the two, pulverize the dried clumps of the sample by hand or by stepping on them. If the clumps do not pulverize easily, the material is cohesive with fissures. If they pulverize easily into very small fragments, the material is granular

Subpart R—Steel Erection

■ 33. The authority citation for subpart R is revised to read as follows:

Authority: 40 U.S.C. 3701; 29 U.S.C. 653, 655, 657; Secretary of Labor's Order Nos. 3–2000 (65 FR 50017), 5–2002 (67 FR 65008), 5–2007 (72 FR 31159), or 1–2012 (77 FR 3912), as applicable; and 29 CFR part 1911.

■ 34. In § 1926.754, revise paragraph (c)(2) to read as follows;

§ 1926.754 Structural steel assembly.

* * * * *

(c) * * *

(2*) Installation of shear connectors on composite floors, roofs and bridge decks.* When shear connectors are used in construction of composite floors, roofs and bridge decks, employees shall lay out and install the shear connectors after the metal decking has been installed, using the metal decking as a working platform. Shear connectors shall not be installed from within a controlled decking zone (CDZ), as specified in § 1926.760(c)(7).

* * * * *

■ 35. In § 1926.757, revise the footnotes to Tables A and B to read as follows:

§ 1926.757 Open web steel joists

* * * * *

TABLE A—ERECTION BRIDGING FOR SHORT SPAN JOISTS

Joist	Span
* * * * *	

NM = diagonal bolted bridging not mandatory.

* * * * *

TABLE B—ERECTION BRIDGING FOR LONG SPAN JOISTS

Joist	Span
* * * * *	

NM = diagonal bolted bridging not mandatory.

* * * * *

■ 36. In § 1926.761, revise paragraph (b) to read as follows:

§ 1926.761 Training.

* * * * *

(b) *Fall hazard training.* The employer shall train each employee exposed to a fall hazard in accordance with the requirements of this section. The employer shall institute a training program and ensure employee participation in the program. The program shall include training and instruction in the following areas:

(1) The recognition and identification of fall hazards in the work area;

(2) The use and operation of guardrail systems (including perimeter safety cable systems), personal fall arrest systems, positioning device systems, fall restraint systems, safety net systems, and other protection to be used;

(3) The correct procedures for erecting, maintaining, disassembling, and inspecting the fall protection systems to be used;

(4) The procedures to be followed to prevent falls to lower levels and through or into holes and openings in walking/working surfaces and walls; and

(5) The fall protection requirements of this subpart.

* * * * *

Subpart V—Electric Power Transmission and Distribution

■ 37. The authority citation for subpart V continues to read as follows:

Authority: 40 U.S.C. 3701 *et seq.;* 29 U.S.C. 653, 655, 657; Secretary of Labor's Order No. 1–2012 (77 FR 3912); and 29 CFR part 1911.

■ 38. In § 1926.968, in the definition of ''Hazardous atmosphere'', revise the note following paragraph (5) to read as follows:

§ 1926.968 Definitions.

* * * * *

Hazardous atmosphere. * * *

(5) * * *

Note to the Definition of ''Hazardous Atmosphere'' (5): For air contaminants for which the Occupational Safety and Health Administration has not determined a dose or permissible exposure limit, other sources of information, such as Safety Data Sheets (SDS) that comply with the Hazard Communication Standard, § 1910.1200, published information, and internal documents can provide guidance in establishing acceptable atmospheric conditions.

* * * * *

Subpart Z—Toxic and Hazardous Substances

■ 39. The authority citation for subpart Z continues to read as follows:

Authority: 40 U.S.C. 3704; 29 U.S.C. 653, 655, 657; Secretary of Labor's Order No. 12–71 (36 FR 8754), 8–76 (41 FR 25059), 9–83 (48 FR 35736), 1–90 (55 FR 9033), 6–96 (62 FR 111), 3–2000 (65 FR 50017), 5–2002 (67 FR 65008), 5–2007 (72 FR 31160), 4–2010 (75 FR 55355), or 1–2012 (77 FR 3912) as applicable; 29 CFR part 1911; and 5 U.S.C. 553, as applicable.

■ 40. In § 1926.1101, revise paragraphs (e)(4) and (f)(3)(iii), the paragraph (g)(7) subject heading, paragraphs (g)(8)(v) introductory text, (n)(2)(iii), (n)(3)(i) and (iii), and (p)(1), and in appendix K, in section 3.1, revise paragraph (e) to read as follows:

§ 1926.1101 Asbestos.

* * * * *

(e) * * *

(4) *Respirators.* All persons entering a regulated area where employees are required pursuant to paragraph (h)(1) of this section to wear respirators shall be supplied with a respirator selected in accordance with paragraph (h)(3) of this section.

* * *

(f) * * *

(3) * * *

(iii) Exception: When all employees required to be monitored daily are equipped with supplied-air respirators operated in the pressure demand mode, or other positive pressure mode, the employer may dispense with the daily monitoring required by this paragraph. However, employees performing Class I work using a control method which is not listed in paragraph (g)(4)(i), (ii), or (iii) of this section or using a modification of a listed control method, shall continue to be monitored daily even if they are equipped with supplied-air respirators.

* * * * *

(g) * * *

(7) *Work Practices and Engineering Controls for Class II work.* * * *

* * * * *

(8) * * *

(v) When performing any other Class II removal of asbestos containing material for which specific controls have not been listed in paragraph (g)(8)(i) through (iv) of this section, the employer shall ensure that the following work practices are complied with.

* * * * *

(n) * * *

(2) * * *

(iii) The employer shall maintain this record for at least thirty (30) years, in accordance with § 1910.1020 of this chapter

(3) * * *

(i) The employer shall establish and maintain an accurate record for each employee subject to medical surveillance by paragraph (m) of this section, in accordance with § 1910.1020 of this chapter.

* * * * *

(iii) The employer shall ensure that this record is maintained for the duration of employment plus thirty (30) years, in accordance with § 1910.1020 of this chapter.

* * * * *

(p) * * *

(1) Appendices A, D, and E to this section are incorporated as part of this section and the contents of these appendices are mandatory.

* * * * *

Appendix K to § 1926.1101—Polarized Light Microscopy of Asbestos (Non-Mandatory)

* * * * *

3.1. Safety

* * * * *

(e) Some of the solvents used, such as THF (tetrahydrofuran), are toxic and should only be handled in an appropriate fume hood and according to instructions given in the Safety Data Sheet (SDS).

* * * * *

■ 41. In § 1926.1127, revise paragraphs (d)(1)(i), (n)(1)(iii), and (n)(3)(iii) and remove paragraph (n)(5).

The revisions read as follows:

§ 1926.1127 Cadmium.

* * * * *

(d) * * *

(1) * * *

(i) Prior to the performance of any construction work where employees may be potentially exposed to cadmium, the employer shall establish the applicability of this standard by determining whether cadmium is present in the workplace and whether there is the possibility that employee exposures will be at or above the action level. The employer shall designate a competent person who shall make this determination. Investigation and material testing techniques shall be used, as appropriate, in the determination. Investigation shall include a review of relevant plans, past reports, Safety Data Sheets (SDS), and other available records, and consultations with the property owner and discussions with appropriate individuals and agencies.

* * * * *

(n) * * *

(1) * * *

(iii) The employer shall maintain this record for at least thirty (30) years, in accordance with § 1910.1020 of this chapter.

* * * * *

(3) * * *

(iii) The employer shall assure that this record is maintained for the duration of employment plus thirty (30) years, in accordance with § 1910.1020 of this chapter.

* * * * *

Subpart CC—Cranes and Derricks in Construction

■ 42. The authority citation for Part 1926 subpart CC continues to read as follows:

Authority: 40 U.S.C. 3701 *et seq.;* 29 U.S.C. 653, 655, 657; Secretary of Labor's Order No. 5–2007 (72 FR 31159) or 1–2012 (77 FR 3912), as applicable; and 29 CFR part 1911.

■ 43. In § 1926.1431, revise paragraph (a) to read as follows:

§ 1926.1431 Hoisting personnel.

* * * * *

(a) The use of equipment to hoist employees is prohibited except where the employer demonstrates that the erection, use, and dismantling of conventional means of reaching the work area, such as a personnel hoist, ladder, stairway, aerial lift, elevating work platform, or scaffold, would be more hazardous, or is not possible because of the project's structural design or worksite conditions. This paragraph does not apply to work covered by subpart R (Steel Erection) of this part and also does not apply to routine personnel access to an underground worksite via shaft as covered by § 1926.800 (Underground Construction) of this part.

BILLING CODE 4510–26–P

DEPARTMENT OF THE TREASURY

Office of Investment Security

31 CFR Parts 800 and 802

RIN 1505–AC63, 1505–AC64

Provisions Pertaining to Certain Investments in the United States by Foreign Persons and Provisions Pertaining to Certain Transactions by Foreign Persons Involving Real Estate in the United States; Correction

AGENCY: Office of Investment Security, Department of the Treasury.

ACTION: Final rule; technical corrections.

SUMMARY: On January 17, 2020, the Department of the Treasury published two final rules implementing provisions of section 721 of the Defense Production Act of 1950, as amended by the Foreign Investment Risk Review Modernization Act of 2018. This final rule makes a limited number of technical corrections to those rules to provide clarity.

DATES: Effective February 13, 2020.

FOR FURTHER INFORMATION CONTACT: Laura Black, Director of Investment Security Policy and International Relations; Meena R. Sharma, Deputy Director of Investment Security Policy and International Relations; David Shogren, Senior Policy Advisor; or Alexander Sevald, Senior Policy Advisor, at U.S. Department of the Treasury, 1500 Pennsylvania Avenue NW, Washington, DC 20220; telephone: (202) 622–3425; email: *CFIUS.FIRRMA@treasury.gov.*

SUPPLEMENTARY INFORMATION: This rule makes technical corrections to a limited number of provisions in 85 FR 3112 (January 17, 2020) and 85 FR 3158 (January 17, 2020). These changes are intended to improve the clarity of the rule.

■ In FR Doc. 2020–00188, appearing on page 3112 in the **Federal Register** on Friday, January 17, 2020, make the following corrections:

§ 800.219 [Corrected]

1. On page 3129, in the first column, in § 800.219, in paragraph (a)(3) introductory text, ''A foreign entity that meets each of the following conditions with respect to itself and each of its parents (if any):'' is corrected to read, ''An entity that meets each of the following conditions with respect to itself and each of its parents (if any):''.

2. On page 3129, in the first column, in § 800.219, paragraph (a)(3)(iv)(C) is corrected to read:

''(C) An entity that is organized under the laws of an excepted foreign state or in the United States and has its principal place of business in an excepted foreign state or in the United States; and''

3. On page 3129, in the first column, in § 800.219, paragraph (a)(3)(v)(D) is corrected to read:

''(D) An entity that is organized under the laws of an excepted foreign state or in the United States and has its principal place of business in an excepted foreign state or in the United States.''

§ 800.401 [Corrected]

4. On page 3140, in the third column, in § 800.401, correct paragraph (e)(4) by removing the word ''or'' following the semicolon and correct paragraph (e)(5) to read:

''(5) A covered control transaction involving an air carrier, as defined in 49 U.S.C. 40102(a)(2), that holds a certificate issued under 49 U.S.C. 41102; or''.

§ 800.502 [Corrected]

5. On page 3146, in the third column, in § 800.502, paragraph (c)(4)(i) is corrected to read:

''(i) Possesses any licenses, permits, or other authorizations other than those under the regulatory authorities listed in paragraph (c)(3)(x)(A) of this section that have been granted by an agency of the U.S. Government (if applicable, identification of the relevant licenses shall be provided); or''

6. On page 3148, in the third column, in § 800.502, in paragraph (o), the third sentence is corrected to read:

''(o) * * * The required description of the basis shall include discussion of all relevant information responsive to paragraphs (c)(5)(iii) through (v) of this section. * * *''

In FR Doc. 2020–00187, appearing on page 3158 in the **Federal Register** on Friday, January 17, 2020, make the following corrections:

§ 802.215 [Corrected]

7. On page 3169, in the first column, in § 802.215, correct paragraph (a)(3) introductory text to read:

''(3) An entity that meets each of the following conditions with respect to itself and each of its parents (if any):''

8. On page 3169, in the second column, in § 802.215, paragraph (a)(3)(iv)(C) is corrected to read:

''(C) An entity that is organized under the laws of an excepted real estate foreign state or in the United States and has its principal place of business in an excepted real estate foreign state or in the United States; and''

9. On page 3169, in the second column, in § 802.215, paragraph (a)(3)(v)(D) is corrected to read:

''(D) An entity that is organized under the laws of an excepted real estate foreign state or in the United States and has its principal place of business in an excepted real estate foreign state or in the United States.''

Dated: February 6, 2020.

Laura Black,

Director, Office of Investment Security Policy and International Relations.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2019–0086]

RIN 1625–AA09

Drawbridge Operation Regulation; Hackensack River, Little Snake Hill, NJ

AGENCY: Coast Guard, DHS.

ACTION: Final rule.

SUMMARY: The Coast Guard is modifying the operating schedule that governs the Amtrak Portal Bridge across the Hackensack River, mile 5.0 at Little Snake Hill, New Jersey. The bridge owner, National Railroad Passenger Corporation (Amtrak), submitted a request to require a greater advance notice for bridge openings, to increase the time periods the bridge remains in the closed position, and to reduce bridge openings during the morning and evening commuter rush hours. It is expected that this change to the regulations will better serve the needs of the community while continuing to meet the reasonable needs of navigation.

DATES: This rule is effective March 19, 2020.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *http://www.regulations.gov.* Type USCG–2019–0086 in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this rulemaking.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email Ms. Judy Leung-Yee, First Coast Guard District, Project Officer, telephone 212–514–4336, email *Judy.K.Leung-Yee@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
DHS Department of Homeland Security

FR Federal Register
OMB Office of Management and Budget
NPRM Notice of Proposed Rulemaking (Advance, Supplemental)
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

On March 15, 2019, the Coast Guard also published a temporary deviation with a request for comments (84 FR 9459), to test a proposed schedule. Five comments were received during the test period and those comments were addressed in the aforementioned NPRM.

On October 7, 2019, the Coast Guard published a notice of proposed rulemaking entitled ''Drawbridge Operation Regulation; Hackensack River, Little Snake Hill, NJ,'' in the **Federal Register** (84 FR 53350). In the NPRM, incorrect number of openings was provided. The correct number is provided below in Section III. We received three comments in response to the NPRM.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under the authority of 33 U.S.C. 499. The Amtrak Portal Bridge at mile 5.0 over the Hackensack River at Little Snake Hill, New Jersey, has a vertical clearance of 23 feet at mean high water and 28 feet at mean low water. Horizontal clearance is approximately 99 feet. The waterway users include recreational and commercial vessels, including tugboat/barge combinations.

The existing drawbridge operating regulations are listed at 33 CFR 117.723(e). In December of 2018, the owner of the bridge, National Railroad Passenger Corporation, requested a change to the drawbridge operation regulations because the volume of train traffic across the bridge during the peak commuting hours makes bridge openings impractical under the current schedule. As a result, bridge openings that occur during peak commuter train hours cause significant delays to commuter rail traffic. The owner proposed that the bridge opening schedule be revised so the bridge need not open for the passage of vessel traffic, Monday through Friday, from 5 a.m. to 10 a.m. and from 3 p.m. to 8 p.m. At all other times the bridge shall open on signal if at least 24 hour notice is given.

The Coast Guard reached out to the maritime stakeholders with the requested change proposed by the bridge owner. A stakeholder provided a general objection to the change in the original request.

In the NPRM, the Coast Guard mistakenly reported that there were three requests to open from March 14, 2019 through July 12, 2019. There were actually only two requests to open during this period.

IV. Discussion of Comments, Changes and the Final Rule

The Coast Guard provided 60 days for comment regarding this rule and three comments in the docket were received, with one comment received after the December 6, 2019, closing date. Two of comments supported the rulemaking but recommended greater advance notice (24 & 48 hours, respectively), increasing each peak commuting hour time periods by one hour and completely banning bridge openings during these commuter time periods. A third commenter recommended a four-hour advance notice for tide-restricted vessels. In addition, one commenter recommended changing the language from ''need not open'' to ''shall not open.'' The Coast Guard disagrees with these suggestions. As a result of the aforementioned reach out to maritime stakeholders, and in agreement with Amtrak, all concerned agreed a two-hour advance notice would be sufficient time for the bridge owner to assemble a team of technicians for the scheduled opening and address any mechanical and electrical issues that might arise. There is active commercial and recreational traffic on this waterway with the bridge logs indicating two requests to open from October 7, 2019, through December 6, 2019, during the NPRM comment period; therefore any permanent closure of the bridge is not an option. If the word ''need'' be replaced with ''shall,'' this would make passage prohibitive, due to the safety of navigation for vessels affected by tide influence and the permissibility of emergency vessels or vessels in an emergency situation (33 CFR 117.31) to pass. One commenter recommended permanently leaving the bridge closed with an agreement by Amtrak to replace it with a new fixed bridge with a vertical clearance of 25 feet. A Coast Guard Bridge Permit was issued to Amtrak approving a new fixed bridge with 50ft of vertical clearance.

There are no changes in the regulatory text of this rule from the proposed rule in the NPRM.

The final rule provides the draw need not open for the passage of vessel traffic from 5 a.m. to 10 a.m. and from 3 p.m. to 8 p.m. Additional bridge openings shall be provided for tide restricted commercial vessels between 7 a.m. and 8 a.m. and between 5 p.m. and 6 p.m., if at least a two-hour advance notice is given by calling the number posted at the bridge. At all other times the bridge shall open on signal if at least two-hour advance notice is given. It is the Coast Guard's opinion that this rule meets the reasonable needs of marine and rail traffic.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive Orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive Orders, and we discuss First Amendment rights of protesters.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13771 directs agencies to control regulatory costs through a budgeting process. This rule has not been designated a ''significant regulatory action,'' under Executive Order 12866. Accordingly, it has not been reviewed by the Office of Management and Budget (OMB) and pursuant to OMB guidance it is exempt from the requirements of Executive Order 13771.

The Coast Guard believes this rule is not a significant regulatory action. The bridge will still open for all vessel traffic after a two-hour advance notice is given, except during the morning and afternoon commuter rush hour periods, where a one-hour time period will allow passage of commercial vessels. The vertical clearance under the bridge in the closed position is relatively high enough to accommodate most vessel traffic during the time periods the draw is closed during the morning and evening commuter rush hours. We believe that this change to the drawbridge operation regulations at 33 CFR 117.723(e) will meet the reasonable needs of navigation.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601–612, as amended, requires federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard received no comment from the Small Business Administration on this rule. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact

on a substantial number of small entities.

The bridge provides 23 feet of vertical clearance at mean high water that should accommodate all the present vessel traffic except deep draft vessels. The bridge will continue to open on signal for any vessel provided at least two-hour advance notice is given. While some owners or operators of vessels intending to transit the bridge may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT**, above.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Government

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this rule has implications for federalism or Indian tribes, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA)(42 U.S.C. 4321–4370f) andhave determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule promulgates the operating regulations or procedures for drawbridges. This action is categorically excluded from further review, under paragraph L49, of Chapter 3, Table 3–1 of the U.S. Coast Guard Environmental Planning Implementation Procedures.

Neither a Record of Environmental Consideration nor a Memorandum for the Record are required for this rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

List of Subjects in 33 CFR Part 117

Bridges.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 117 as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

■ 1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 33 CFR 1.05–1; and Department of Homeland Security Delegation No. 0170.1.

■ 2. Revise § 117.723(e) to read as follows:

§ 117.723 Hackensack River.

* * * * *

(e) The draw of the Amtrak Portal Bridge, mile 5.0, at Little Snake Hill, New Jersey, need not open for the passage of vessel traffic from 5 a.m. to 10 a.m. and from 3 p.m. to 8 p.m. Additional bridge openings shall be provided for tide restricted commercial vessels between 7 a.m. and 8 a.m. and between 5 p.m. and 6 p.m., if at least a two-hour advance notice is given by calling the number posted at the bridge. At all other times the bridge shall open on signal if at least two-hour advance notice is given.

BILLING CODE 9110–04–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R04–OAR–2019–0462; FRL–10005–28–Region 4]

Air Plan Approval; Georgia: Revisions to Cross-State Air Pollution Rule

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving a State Implementation Plan (SIP) revision submitted by the State of Georgia, through the Georgia Environmental Protection Division (GA EPD) of the Department of Natural Resources, via a letter dated July 31, 2018. Specifically, EPA is approving typographical changes to Georgia's SIP-approved regulations regarding its Cross-State Air Pollution Rule (CSAPR) state trading programs. This action is being approved pursuant to the Clean Air Act (CAA or Act) and its implementing regulations.

DATES: This rule will be effective March 19, 2020.

ADDRESSES: EPA has established a docket for this action under Docket Identification No. EPA–R04–OAR–2019–0462. All documents in the docket are listed on the *www.regulations.gov* website. Although listed in the index, some information is not publicly available, *i.e.,* Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through *www.regulations.gov* or in hard copy at the Air Regulatory Management Section, Air Planning and Implementation Branch, Air and Radiation Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960. EPA requests that if at all possible, you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday 8:30 a.m. to 4:30 p.m., excluding Federal holidays.

FOR FURTHER INFORMATION CONTACT: Steven Scofield, Air Regulatory Management Section, Air Planning and Implementation Branch, Air and Radiation Division, Region 4, U.S. Environmental Protection Agency, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960. The telephone number is (404) 562–9034. Mr. Scofield can also be reached via electronic mail at *scofield.steve@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

On October 15, 2019 (84 FR 55107), EPA proposed to approve into the Georgia SIP several changes to Georgia's air quality rule 391–3–1–.02, ''Provisions. Amended.'' GA EPD submitted a SIP revision through a letter dated July 31, 2018,[1] to EPA for review and approval that revises Georgia's SIP-approved rules regarding its CSAPR [2] state trading programs at Rule 391–3–1–.02(12)—''Cross State Air Pollution Rule NO_X Annual Trading Program,'' Rule 391–3–1–.02(13)—''Cross State Air Pollution Rule SO_2 Annual Trading Program,'' and Rule 391–3–1–.02(14)—''Cross State Air Pollution Rule NO_X Ozone Season Trading Program.'' The details of the Georgia submission and the rationale for EPA's action are explained in the proposed rulemaking. Comments on the proposed rulemaking were due on or before November 14, 2019. EPA did not receive any adverse comments on the proposed action. EPA is now taking final action to approve the above-referenced revisions.

II. Incorporation by Reference

In this document, EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, EPA is finalizing the incorporation by reference of Georgia Rule 391–3–1–.02(12)—''Cross State Air Pollution Rule NO_X Annual Trading Program,'' Rule 391–3–1–.02(13)—''Cross State Air Pollution Rule SO_2 Annual Trading Program,'' and Rule 391–3–1–.02(14)—''Cross State Air Pollution Rule NO_X Ozone Season Trading Program,'' State effective July 23, 2018. EPA has made, and will continue to make, these materials generally available through *www.regulations.gov* and at the EPA Region 4 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information). Therefore, these materials have been approved by EPA for inclusion in the State implementation plan, have been incorporated by reference by EPA into that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of EPA's approval, and will be incorporated by reference in the next update to the SIP compilation.[3]

III. Final Action

EPA is approving the aforementioned changes to Georgia's SIP at Rule 391–3–1–.02(12)—''Cross State Air Pollution Rule NO_X Annual Trading Program,'' Rule 391–3–1–.02(13)—''Cross State Air Pollution Rule SO_2 Annual Trading Program,'' and Rule 391–3–1–.02(14)—''Cross State Air Pollution Rule NO_X Ozone Season Trading Program.'' These changes are consistent with the CAA.

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. *See* 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. This action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible

[1] EPA received the SIP revision on August 2, 2018. EPA received several other SIP revisions from Georgia through GA EPD's July 31, 2018, letter. These other revisions have been or will be addressed in separate EPA actions.

[2] CSAPR is a Federal rule that requires 27 Eastern states to limit their statewide emissions of sulfur dioxide (SO_2) and nitrogen oxides (NO_x) from electric generating units (EGUs) that significantly contribute to downwind nonattainment of the 1997 Annual fine particulate matter ($PM_{2.5}$) and 8-hour ozone national ambient air quality standards (NAAQS), 2006 24-hour $PM_{2.5}$ NAAQS, and the 2008 8-hour ozone NAAQS. Through its CSAPR rulemakings, EPA determined that air pollution transported from EGUs in Georgia would unlawfully affect other states' ability to attain or maintain the 1997 8-hour ozone NAAQS, the 1997 Annual $PM_{2.5}$ NAAQS, and the 2006 24-hour $PM_{2.5}$ NAAQS, and included Georgia in the CSAPR ozone season NO_X trading program and the annual SO_2 and NO_X trading programs. In 2017, EPA approved Georgia's State trading programs for annual NO_X, annual SO_2, and ozone season NO_X emissions and incorporated Georgia Rules 391–3–1–.02(12), .02(13), and .02(14) into the SIP. *See* 82 FR 47930 (October 13, 2017) for more information on CSAPR and Georgia's CSAPR state trading programs.

[3] *See* 62 FR 27968 (May 22, 1997).

methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

The SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by April 20, 2020. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. *See* section 307(b)(2).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon moNO$_X$ide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: January 31, 2020.

Mary S. Walker,

Regional Administrator, Region 4.

40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart L—Georgia

■ 2. Section 52.570(c) is amended in the table under the heading ''391–3–1–.02(2) Emission Standards'' by revising the entries for ''391–3–1–.02(12)'', ''391–3–1–.02(13)'', and ''391–3–1–.02(14)'' to read as follows:

§ 52.570 Identification of plan.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 60, 61, and 63

[EPA–R09–OAR–2019–0632; FRL–10004–33–Region 9]

Delegation of New Source Performance Standards and National Emission Standards for Hazardous Air Pollutants for the States of Arizona and Nevada

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking direct final action to update the Code of Federal Regulations delegation tables to reflect the current delegation status of New Source Performance Standards and National Emission Standards for Hazardous Air Pollutants in Arizona and Nevada.

DATES: This rule is effective on April 20, 2020 without further notice, unless EPA receives adverse comments by March 19, 2020. If we receive such comments, we will publish a timely withdrawal in the **Federal Register** to notify the public that this direct final rule will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R09–OAR–2019–0632 at *http://*

www.regulations.gov, or via email to *buss.jeffrey@epa.gov.* For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* For either manner of submission, the EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Jeffrey Buss, EPA Region IX, (415) 947–4152, *buss.jeffrey@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, ''we,'' ''us'' and ''our'' refer to the EPA.

Table of Contents

I. Background

A. What is the purpose of this document?

Through this document, the EPA is accomplishing the following objectives:

(1) Update the delegation tables in the Code of Federal Regulations, title 40 (40 CFR), parts 60, 61, and 63 to provide an accurate listing of the delegated New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAP); and

(2) Clarify those authorities that the EPA retains and are not granted to state or local agencies as part of NSPS or NESHAP delegation.

Update of Tables in the CFR

This action will update the delegation tables in 40 CFR parts 60, 61, and 63, to allow easier access by the public to the status of delegations in various state or local jurisdictions.

The updated delegation tables will include the delegations approved in response to recent requests, as well as those previously granted. The tables are shown at the end of this document.

Recent requests for delegation that will be incorporated into the updated 40 CFR parts 60, 61, and 63 tables are identified below. Each individual submittal identifies the specific NSPS and NESHAP for which delegation was requested. The requests have already been approved by letter and simply need to be included in the CFR tables.

Agency	Date of request	Date of approval by letter
Maricopa County Air Quality Department	January 18, 2018, December 6, 2018 and November 21, 2019.	September 7, 2018, May 20, 2019 and December 23, 2019.
Nevada Division of Environmental Protection	May 26, 2017 and March 29, 2019	July 26, 2017 and May 20, 2019.

B. Who is authorized to delegate these authorities?

Sections 111(c)(1) and 112(l) of the Clean Air Act, as amended in 1990, authorizes the Administrator to delegate his or her authority for implementing and enforcing standards in 40 CFR parts 60, 61, and 63.

C. What does delegation accomplish?

Delegation grants a state or local agency the primary authority to implement and enforce Federal standards. All required notifications and reports should be sent to the delegated state or local agency with a copy to EPA Region IX, as appropriate. Acceptance of delegation constitutes agreement by the state or local agency to follow 40 CFR parts 60, 61, and 63, and the EPA's test methods and continuous monitoring procedures.

D. What authorities are not delegated by the EPA?

In general, the EPA does not delegate to state or local agencies the authority to make decisions that are likely to be nationally significant or alter the stringency of the underlying standards. For a more detailed description of the authorities in 40 CFR parts 60 and 61 that are retained by the EPA, *see* 67 FR 20652 (April 26, 2002). For a more detailed description of the authorities in 40 CFR part 63 that are retained by the EPA, *see* 65 FR 55810 (September 14, 2000).

As additional assurance of national consistency, state and local agencies must send to EPA Region IX Enforcement Division's Air Section Chief a copy of any written decisions made pursuant to the following delegated authorities:

- Applicability determinations that state a source is not subject to a rule or requirement;
- approvals or determination of construction, reconstruction, or modification;
- minor or intermediate site-specific changes to test methods or monitoring requirements; or
- site-specific changes or waivers of performance testing requirements.

For decisions that require EPA review and approval (for example, major changes to monitoring requirements), the EPA intends to make determinations in a timely manner.

In some cases, the standards themselves specify that specific provisions cannot be delegated. State and local agencies should review each individual standard for this information.

E. Does the EPA keep some authority?

The EPA retains independent authority to enforce the standards and regulations of 40 CFR parts 60, 61, and 63.

II. EPA Action

This document serves to notify the public that the EPA is updating the 40 CFR parts 60, 61, and 63 tables for Arizona and Nevada to codify recent delegations of NSPS and NESHAP as authorized under Sections 111(c)(1) and 112(1)(l) of the Clean Air Act.

III. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve delegation requests that comply with the provisions of the Act and applicable Federal regulations. 42 U.S.C. Sections 7410(c) and 7412(l). Thus, in reviewing delegation submissions, the EPA's role is to approve state choices, provided

that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide EPA with the discretionary authority to address disproportionate human health or environmental effects with practical, appropriate, and legally permissible methods under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the delegation submissions are not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

List of Subjects in 40 CFR Parts 60, 61, and 63

Environmental protection, Administrative practice and procedure, Air pollution control, Hazardous substances, Intergovernmental relations, Reporting and recordkeeping requirements.

Dated: December 23, 2019.

Elizabeth J. Adams,

Director, Air and Radiation Division, Region IX.

For the reasons set out in the preamble, title 40, chapter I, of the Code of Federal Regulations is amended as follows:

PART 60—[AMENDED]

■ 1. The authority citation for part 60 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart A—General Provisions

■ 2. Section 60.4 is amended by revising the tables in paragraphs (d)(1) and (4) to read as follows:

§ 60.4 Address.

BILLING CODE 6560–50–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No.: 200212–0053]

RIN 0648–XX037

Fisheries of the Northeastern United States; Blueline Tilefish Fishery; 2020 Specifications

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: We are implementing 2020 specifications for the Mid-Atlantic blueline tilefish fishery, including the annual catch and total allowable landings limits. This action establishes allowable harvest levels and other management measures to prevent overfishing, consistent with the Magnuson-Stevens Fishery Conservation and Management Act and the Tilefish Fishery Management Plan.

DATES: Effective February 18, 2020, through December 31, 2020.

FOR FURTHER INFORMATION CONTACT: Laura Hansen, Fishery Management Specialist, 978–281–9225.

SUPPLEMENTARY INFORMATION:

Background

The Mid-Atlantic Fishery Management Council manages the blueline tilefish fishery north of the Virginia/North Carolina border under the Tilefish Fishery Management Plan (FMP), which outlines the Council's process for setting annual specifications. Regulations implementing the Tilefish FMP appear at 50 CFR part 648, subparts A and N, which require the Council to recommend acceptable biological catch (ABC), annual catch limit (ACL), annual catch target (ACT), total allowable landings (TAL), and other management measures, for up to 3 years at a time. On November 18, 2018, we proposed 2019 specifications for the blueline tilefish fishery and announced projected specifications for 2020 and 2021 based on Council recommendations (83 FR 58219). Public comment was accepted through December 4, 2018. We published a final rule implementing the 2019 specifications on February 12, 2019 (84 FR 3341).

At the end of each fishing year, we evaluate available catch information and determine if the ACL has been exceeded. If the ACL is exceeded, the regulations at 50 CFR 648.293 require a pound-for-pound reduction in a subsequent fishing year. During fishing year 2019, there were no annual catch limit or total allowable landings overages, nor is there any new biological information that would require altering the projected 2020 specifications. As a result, we are announcing the final specifications for fishing year 2020, as projected in the final rule implementing 2019 specifications (See Table 1).

TABLE 1—SUMMARY OF BLUELINE TILEFISH SPECIFICATIONS

Specifications	2020
ABC—North of NC/VA line	100,520 lb (45.6 mt)
Recreational ACL	73,380 (33.3 mt)
Commercial ACL	27,140 lb (12.3 mt)
Recreational TAL	71,912 lb (32.6 mt)
Commercial TAL	26,869 lb (12.2 mt)

All other management measures in the blueline tilefish fishery will remain unchanged for the 2020 fishing year.

The FMP allows for the previous year's specifications to remain in place until replaced by a subsequent specifications action (rollover provision). As a result, the 2019 specifications remain in effect until replaced by the 2020 specifications included in this rule.

Classification

Pursuant to section 304(b)(1)(A) of the Magnuson-Stevens Act, the NMFS Assistant Administrator has determined that this rule is consistent with the Tilefish FMP, other provisions of the Magnuson-Stevens Act, and other applicable laws.

The Assistant Administrator for Fisheries, NOAA finds it is impracticable, unnecessary, and contrary to the public interest to provide for prior notice and an opportunity for public comment, under to authority at U.S.C. 553(b)(B). The proposed rule for 2019–2021 specifications (83 FR 58219, November 18, 2018) provided the public with the opportunity to comment on the specifications for 2019, and projected 2020 and 2021 specifications. The specifications for fishing year 2020 remain the same as projected in the specifications rulemaking. All comments received were addressed in the final rule (84 FR 3341).

Similarly, the need to implement these measures in a timely manner for the start of the blueline tilefish fishing year, constitutes good cause under authority contained in 5 U.S.C. 553(d)(3), to establish an effective date less than 30 days after date of publication. The public and fishing industry participants expect this action because we previously alerted the public in the proposed and final rules that we would conduct this review in interim years of the status quo multi-year specifications and announce the final quota.

This final rule is exempt from review under Executive Order 12866 because this action contains no implementing regulations.

This final rule does not duplicate, conflict, or overlap with any existing Federal rules.

This final rule does not contain a collection of information requirement for the purposes of the Paperwork Reduction Act.

The Chief Counsel for Regulation for the Department of Commerce certified to the Small Business Administration that the 2019–2021 blueline tilefish specifications rulemaking would not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act. No comments were received that would change the initial certification. Because advance notice and the opportunity for public comment are not required for this action under the Administrative Procedure Act, or any other law, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.,* do not apply to this rule. Therefore, no new regulatory flexibility analysis is required and none has been prepared.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: February 12, 2020.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

[FR Doc. 2020–03198 Filed 2–14–20; 8:45 am]

BILLING CODE 3510–22–P

Proposed Rules

Federal Register
Vol. 85, No. 32
Tuesday, February 18, 2020

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

FEDERAL RETIREMENT THRIFT INVESTMENT BOARD

5 CFR Parts 1600 and 1650

Automatic Enrollment Program

AGENCY: Federal Retirement Thrift Investment Board.

ACTION: Proposed rule.

SUMMARY: The Federal Retirement Thrift Investment Board (FRTIB) is proposing to amend its regulations to increase the automatic enrollment percentage from 3 percent to 5 percent of basic pay for all participants who are automatically enrolled in the Thrift Savings Plan (TSP) on or after October 1, 2020 and for Blended Retirement Service (BRS) participants who are automatically re-enrolled in the TSP on or after January 1, 2021. In addition, the FRTIB is proposing a non-substantive clarification regarding installment payments calculated based on life expectancy.

DATES: Comments must be received on or before April 20, 2020.

ADDRESSES: You may submit comments using one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* (202) 942–1676.
- *Mail or Hand Deliver/Courier:* Office of General Counsel, Attn: Megan G. Grumbine, Federal Retirement Thrift Investment Board, 77 K Street NE, Suite 1000, Washington, DC 20002.

FOR FURTHER INFORMATION CONTACT: Austen Townsend, (202) 864–8647.

SUPPLEMENTARY INFORMATION: The FRTIB administers the Thrift Savings Plan (TSP), which was established by the Federal Employees' Retirement System Act of 1986 (FERSA), Public Law 99–335, 100 Stat. 514. The TSP provisions of FERSA are codified, as amended, largely at 5 U.S.C. 8351 and 8401–79. The TSP is a tax-deferred retirement savings plan for federal civilian employees and members of the uniformed services. The TSP is similar to cash or deferred arrangements established for private-sector employees under section 401(k) of the Internal Revenue Code (26 U.S.C. 401(k)).

Automatic Enrollment

The Thrift Savings Plan Enhancement Act of 2009 authorized the FRTIB to add an automatic enrollment program for all Federal employees eligible to participate in the TSP. The National Defense Authorization Act for Fiscal Year 2016 extended the automatic enrollment program, with an additional automatic re-enrollment feature, to certain members of the uniformed services. Under the automatic enrollment program, the Executive Director has the statutory authority to select a default contribution rate for automatically enrolled participants that is no less than 2 percent and no more than 5 percent of basic pay.

Currently, the following participants are automatically enrolled in the TSP at the statutory default rate of 3 percent: (1) Federal Employees Retirement System (FERS) participants hired or rehired after July 31, 2010; (2) Civil Service Retirement System (CSRS) participants rehired after July 31, 2010; (3) members of the uniformed services who began serving on or after January 1, 2018 (BRS participants); and (4) rehired BRS participants (whether automatically enrolled or opt-ins). In addition, BRS participants subject to automatic enrollment who terminate their TSP contributions at any point during the year and do not elect to resume them by the last full pay period of the year are automatically re-enrolled at a contribution rate of 3 percent as of January 1st of the following year.

The FRTIB proposes to increase the automatic enrollment rate and the automatic re-enrollment rate to 5 percent, effective October 1, 2020 and January 1, 2021, respectively. Participants who are automatically enrolled in the TSP as of September 30, 2020 will not be affected by the automatic enrollment rate increase. However, BRS participants who are automatically enrolled in the TSP as of September 30, 2020 and subsequently terminate their TSP contributions will be affected by the automatic re-enrollment rate increase unless they elect to resume TSP contributions by the last full pay period of the year. All participants may elect to change their contribution rates at any time by contacting their respective agencies.

The TSP's goal is to help federal employees and members of the uniformed services retire with dignity. As of December 31, 2018, 26 percent of TSP participants were contributing less than 5 percent to their accounts, which means they were not receiving the full amount of Agency/Service Matching Contributions they are entitled to.

Increasing the rate to 5 percent not only increases the amount that a participant saves from his or her basic pay, but also ensures that that participant receives the full amount of Agency/Service Matching Contributions he or she is entitled to, both of which will allow the participant, everything else being equal, to achieve significantly greater retirement savings.

Installment Payments Calculated Based on Life Expectancy

The FRTIB is proposing to amend its rule regarding installment payments calculated based on life expectancy to clarify that, for each year following the year in which the installment payments begin, the installment payment amount for the year will be calculated on the first installment payment date of that year.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities. This regulation will affect Federal employees, members of the uniformed services who participate in the TSP, and beneficiary participants.

Paperwork Reduction Act

I certify that these regulations do not require additional reporting under the criteria of the Paperwork Reduction Act.

Unfunded Mandates Reform Act of 1995

Pursuant to the Unfunded Mandates Reform Act of 1995, 2 U.S.C. 602, 632, 653, and 1501–1571, the effects of this regulation on state, local, and tribal governments and the private sector have been assessed. This regulation will not compel the expenditure in any one year of $100 million or more by state, local, and tribal governments, in the aggregate, or by the private sector. Therefore, a statement under 2 U.S.C. 1532 is not required.

List of Subjects

5 CFR Part 1600

Government employees, Pensions, Retirement.

5 CFR Part 1650

Alimony, Claims, Government employees, Pensions, Retirement.

Ravindra Deo,

Executive Director, Federal Retirement Thrift Investment Board.

For the reasons stated in the preamble, the FRTIB proposes to amend 5 CFR Chapter VI as follows:

PART 1600—EMPLOYEE CONTRIBUTION ELECTIONS, CONTRIBUTION ALLOCATIONS, AND AUTOMATIC ENROLLMENT PROGRAM

■ 1. The authority citation will continue to read as follows:

Authority: 5 U.S.C. 8351, 8432(a), 8432(b), 8432(c), 8432(j), 8432d, 8474(b)(5) and (c)(1), and 8440e.

§ 1600.34 [Amended]

■ 2. In § 1600.34, amend paragraphs (a), (b), and (c) by removing the term ''3%'' and adding the term ''5%'' in its place.

§ 1600.37 [Amended]

■ 3. In § 1600.37, amend paragraph (a) by removing the term ''3 percent'' and adding the term ''5 percent'' in its place.

PART 1650—METHODS OF WITHDRAWING FUNDS FROM THE THRIFT SAVINGS PLAN

■ 4. The authority citation continues to read as follows:

Authority: 5 U.S.C. 8351, 8432d, 8433, 8434, 8435, 8474(b)(5) and 8474(c)(1).

■ 5. Amend § 1650.13 by revising paragraph (a)(2) to read as follows:

§ 1650.13 Installment payments.

(a) * * *

(2) *An installment payment amount calculated based on life expectancy.* Payments based on life expectancy are determined using the factors set forth in the Internal Revenue Service life expectancy tables codified at 26 CFR 1.401(a)(9)–9, Q&A 1 and 2. The installment payment amount is calculated by dividing the account balance by the factor from the IRS life expectancy tables based upon the participant's age as of his or her birthday in the year payments are to begin. This amount is then divided by the number of installment payments to be made per calendar year to yield the installment payment amount. In subsequent years, the installment payment amount is recalculated on the first installment payment date of the year by dividing the prior December 31 account balance by the factor in the IRS life expectancy tables based upon the participant's age as of his or her birthday in the year payments will be made. There is no minimum amount for an installment payment calculated based on this method.

BILLING CODE 6760–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2020–0092; Product Identifier 2020–NM–001–AD]

RIN 2120–AA64

Airworthiness Directives; Bombardier, Inc. Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for certain Bombardier, Inc., Model CL–600–2B19 (Regional Jet Series 100 & 440) airplanes, Model CL–600–2C10 (Regional Jet Series 700, 701 & 702) airplanes, Model CL–600–2D15 (Regional Jet Series 705) airplanes, and Model CL–600–2D24 (Regional Jet Series 900) airplanes; and all Model CL–600–2C11 (Regional Jet Series 550) airplanes. This proposed AD was prompted by reports of fractured rudder primary feel unit shafts; a subsequent investigation determined that the fractures in the shafts are consistent with fatigue damage. This proposed AD would require replacement of the rudder primary feel unit shaft. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by April 3, 2020.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Bombardier, Inc., 400 Côte-Vertu Road West, Dorval, Québec H4S 1Y9, Canada; Widebody Customer Response Center North America toll-free telephone 1–866–538–1247 or direct-dial telephone 1–514–855–2999; fax 514–855–7401; email *ac.yul@aero.bombardier.com;* internet *http://www.bombardier.com.* You may view this service information at the FAA, Transport Standards Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

Examining the AD Docket

You may examine the AD docket on the internet at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2020–0092; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the regulatory evaluation, any comments received, and other information. The street address for Docket Operations is listed above. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Andrea Jimenez, Aerospace Engineer, Airframe and Mechanical Systems Section, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7330; fax 516–794–5531; email *9-avs-nyaco-cos@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2020–0092; Product Identifier 2020–NM–001–AD'' at the beginning of your comments. The FAA specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this NPRM. The FAA will consider all comments received by the closing date and may amend this NPRM because of those comments.

The FAA will post all comments received, without change, to *https://www.regulations.gov,* including any personal information you provide. The FAA will also post a report summarizing each substantive verbal contact received about this NPRM.

Discussion

Transport Canada Civil Aviation (TCCA), which is the aviation authority for Canada, has issued Canadian AD CF–2019–42, dated November 8, 2019 (referred to after this as the Mandatory Continuing Airworthiness Information, or ''the MCAI''), to correct an unsafe condition for certain Bombardier, Inc., Model CL–600–2B19 (Regional Jet Series 100 & 440) airplanes, Model CL–600–2C10 (Regional Jet Series 700, 701 & 702) airplanes, Model CL–600–2D15 (Regional Jet Series 705) airplanes, and Model CL–600–2D24 (Regional Jet Series 900) airplanes; and all Model CL–600–2C11 (Regional Jet Series 550) airplanes. You may examine the MCAI in the AD docket on the internet at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2020–0092.

This proposed AD was prompted by reports of fractured rudder primary feel unit shafts; a subsequent investigation determined that the fractures in the shafts are consistent with fatigue damage. The FAA is proposing this AD to address fractures of the rudder primary feel unit shaft, which could result in a loss of feel in the yaw axis and thereby impact the controllability of the airplane. See the MCAI for additional background information.

Related Service Information Under 1 CFR Part 51

Bombardier has issued Service Bulletin 601R–27–166, dated April 5, 2019, and Service Bulletin 670BA–27–075, dated April 5, 2019. This service information describes procedures for replacing the rudder primary feel unit shaft that has part number 600–90251–1 with a new shaft. These documents are distinct since they apply to different airplane models. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Proposed Requirements of This NPRM

This proposed AD would require accomplishing the actions specified in the service information described previously.

Costs of Compliance

The FAA estimates that this proposed AD affects 1,002 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
18 work-hours × $85 per hour = $1,530	$158	$1,688	$1,691,376

According to the manufacturer, some or all of the costs of this proposed AD may be covered under warranty, thereby reducing the cost impact on affected individuals. The FAA does not control warranty coverage for affected individuals. As a result, the FAA has included all known costs in our cost estimate.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA has determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

Bombardier, Inc.: Docket No. FAA–2020–0092; Product Identifier 2020–NM–001–AD.

(a) Comments Due Date

We must receive comments by April 3, 2020.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Bombardier, Inc. airplanes, certificated in any category, as specified in paragraphs (c)(1) through (4) of this AD.

(1) Model CL–600–2B19 (Regional Jet Series 100 & 440) airplanes, serial number (S/N) 7003 through 7990 inclusive, and S/N 8000 and subsequent.

(2) Model CL–600–2C10 (Regional Jet Series 700, 701 & 702) airplanes, S/N 10002 through 10347 inclusive.

(3) Model CL–600–2D15 (Regional Jet Series 705) airplanes and Model CL–600–2D24 (Regional Jet Series 900) airplanes, S/N 15001 through 15469 inclusive.

(4) Model CL–600–2C11 (Regional Jet Series 550) airplanes, all serial numbers.

(d) Subject

Air Transport Association (ATA) of America Code 27, Flight controls.

(e) Reason

This AD was prompted by reports of fractured rudder primary feel unit shafts; a subsequent investigation determined that the fractures in the shafts are consistent with fatigue damage. The FAA is issuing this AD to address fractures of the rudder primary feel unit shaft, which could result in a loss of feel in the yaw axis and thereby impact the controllability of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Replacement

Within the compliance times specified in figure (1) to paragraph (g) of this AD: Replace all rudder primary feel unit shafts that have part number (P/N) 600–90251–1 with a new shaft, in accordance with the Accomplishment Instructions of the Bombardier Service Bulletin 601R–27–166, dated April 5, 2019; or Bombardier Service Bulletin 670BA–27–075, dated April 5, 2019; as applicable. For Model CL–600–2C11 (Regional Jet Series 550) airplanes, do the replacement in accordance with the Accomplishment Instructions of Bombardier Service Bulletin 670BA–27–075, dated April 5, 2019.

Figure 1 to paragraph (g) – *Compliance Times*

Accumulated Airplane Flight Cycles	Compliance Time for the Replacement
For airplanes that have accumulated 22,000 total flight cycles or less as of the effective date of this AD.	Before the airplane reaches 30,000 total flight cycles.
For airplanes that have accumulated more than 22,000 total flight cycles, but less than 37, 000 total flight cycles as of the effective date of this AD.	Within 8,000 flight cycles from the effective date of this AD.
For airplanes that have accumulated 37,000 total flight cycles or more, but less than 40,000 total flight cycles as of the effective date of this AD.	Before the airplane reaches 45,000 total flight cycles.
For airplanes that have accumulated 40,000 total flight cycles or more, but less than 46,500 total flight cycles as of the effective date of this AD.	Within 5,000 flight cycles from the effective date of this AD.
For airplanes that have accumulated 46,500 total flight cycles or more as of the effective date of this AD.	Before the airplane reaches 51,500 total flight cycles.

(h) Parts Installation Prohibition

As of the effective date of this AD, no person may install a rudder primary feel unit shaft, P/N 600–90251–1, on any airplane.

(i) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, New York ACO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the certification office, send it to ATTN: Program Manager, Continuing Operational Safety, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; fax 516–794–5531. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, New York ACO Branch, FAA; or Transport Canada Civil Aviation (TCCA); or Bombardier, Inc.'s TCCA Design Approval Organization (DAO). If approved by the DAO, the approval must include the DAO-authorized signature.

(j) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) Canadian AD CF–2019–42, dated November 8, 2019, for related information. This MCAI may be found in the AD docket on the internet at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2020–0092.

(2) For more information about this AD, contact Andrea Jimenez, Aerospace Engineer, Airframe and Mechanical Systems Section, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7330; fax 516–794–5531; email *9-avs-nyaco-cos@faa.gov*.

(3) For service information identified in this AD, contact Bombardier, Inc., 400 Côte-Vertu Road West, Dorval, Québec H4S 1Y9, Canada; Widebody Customer Response Center North America toll-free telephone 1–866–538–1247 or direct-dial telephone 1–514–855–2999; fax 514–855–7401; email *ac.yul@aero.bombardier.com*; internet *http://www.bombardier.com.* You may view this service information at the FAA, Transport Standards Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

Issued on February 11, 2020.

Gaetano A. Sciortino,

Deputy Director for Strategic Initiatives, Compliance & Airworthiness Division, Aircraft Certification Service.

Airworthiness Directives; Sikorsky Aircraft Corporation Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for certain Sikorsky Aircraft Corporation (Sikorsky) Model S–92A helicopters. This proposed AD was prompted by two incidents of erroneous low oil pressure caution cockpit indications and unintended actuation of the main gearbox (MGB) auto bypass valve. This proposed AD would require installing auxiliary circuit breaker modification (MOD) kits and inserting a Rotorcraft Flight Manual (RFM) Supplement into the RFM for your helicopter. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by April 3, 2020.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

Discussion

The FAA proposes to adopt a new AD for Sikorsky Model S–92A helicopters. This proposed AD is prompted by two incidents of erroneous low oil pressure caution cockpit indications and unintended actuation of the MGB auto bypass valve caused by unintended popping of the M XMSN OIL WARN circuit breaker during flight. The root cause of this circuit breaker popping is unknown. When this circuit breaker trips, the following cautions will display ''MGB PUMP 1 FAIL, MGB PUMP 2 FAIL, MGB OIL HOT, MGB MAN COOL, MGB OIL PRES.'' With the MGB auto bypass valve actuated, the MGB BYPASS caution will not annunciate. For the given conditions, the appropriate action for the crew is ''land as soon as possible'' in accordance with the RFM Emergency Procedures. The erroneous indications conflicting with correct gauge readings may overwhelm the flight crew, resulting in a forced landing of the helicopter.

To address this unsafe condition, Sikorsky developed MOD kits based on helicopter serial number (S/N) to introduce a separate circuit breaker for the MGB last jet pressure switch. These MOD kits specify reworking the overhead panel to install new clips and brackets, circuit breaker wiring harnesses, wiring MODs, the auxiliary circuit breaker panel, and the M XMSN PRESS SWITCH circuit breaker.

Related Service Information Under 1 CFR Part 51

The FAA reviewed Sikorsky Special Service Instructions No. 92–121, dated October 26, 2017 (SSI 92–121). This service information describes procedures for installing an auxiliary circuit breaker panel MOD kit and M XMSN PRESS SWITCH circuit breaker MOD kit based on helicopter S/N.

The FAA also reviewed RFM Supplement No. 45, Revision No. 2, Sikorsky Model S–92A, Part 1, dated April 27, 2017 (S–92A RFMS 45, Part 1, Revision 2). This service information specifies operating limitations, preflight checks, normal and emergency procedures, and malfunction information for helicopters with Avionics Management System version 7.1 or 8.0 with the MGB OIL OUT warning activated, pump failure indicating system, MGB auto bypass, and M XMSN PRESS SWITCH circuit breaker installed.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Other Related Service Information

The FAA reviewed Sikorsky S–92 Helicopter Alert Service Bulletin 92–63–037, Revision A, dated March 1, 2018. This service information contains planning information pertaining to the auxiliary circuit breaker panel and M XMSN PRESS SWITCH circuit breaker MOD kits, accomplishing SSI 92–121, and inserting S–92A RFMS 45, Part 1, Revision 2 into the helicopter cockpit.

FAA's Determination

The FAA is proposing this AD after evaluating all the relevant information and determining that the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements

This proposed AD would require, within 400 hours time-in-service:

- For helicopters S/N 920006 through 920296 inclusive, installing an auxiliary circuit breaker panel and M XMSN PRESS SWITCH circuit breaker by installing MOD Kit Clips and Brackets part number (P/N) 92070–20115–015, MOD Kit Left Hand (LH) Cockpit Auxiliary Power Unit P/N 92070–55096–012, MOD Kit LH Cabin Auxiliary Power Unit P/N 92070–55096–013, MOD Kit LH Top Deck FLD P/N 92070–55096–016, MOD Kit MGB XMSN P/N 92070–55096–017, MOD Kit Auxiliary Circuit Break Panel P/N 92070–55075–011, and MOD Kit Auxiliary Cabin Panel Faceplate P/N 92070–55075–012.
- For helicopters S/N 920297 through 920304 inclusive and S/N 920311 through 920314 inclusive, modifying the auxiliary circuit breaker panel and transmission harness and installing MOD Kit Auxiliary Cabin Panel Faceplate P/N 92070–55075–012.
- Inserting a copy of S–92A RFMS 45, Part 1, Revision 2 into the RFM for your helicopter.

Costs of Compliance

The FAA estimates that this proposed AD affects 36 helicopters of U.S. registry. The FAA estimate the following costs to comply with this proposed AD. Labor costs are estimated at $85 per work-hour.

Modifying helicopters S/N 920006 through 920296 inclusive would take about 48 work-hours and parts would cost about $1,618 for an estimated cost of $5,698 per helicopter and $182,336 for the U.S. fleet size of 32 helicopters.

Modifying helicopters S/N 920297 through 920304 inclusive and S/N 920311 through 920314 inclusive would take about 2 work-hours and parts would cost about $65 for an estimated cost of $235 per helicopter and $940 for the U.S. fleet size of 4 helicopters.

Revising the RFM would take about 0.5 work-hour for an estimated cost of $43 per helicopter and $1,548 for the U.S. fleet.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866,

2. Will not affect intrastate aviation in Alaska, and

3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA prepared an economic evaluation of the estimated costs to comply with this proposed AD and placed it in the AD docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

Sikorsky Aircraft Corporation: Docket No. FAA–2019–1115; Product Identifier 2018–SW–065–AD.

(a) Comments Due Date

The FAA must receive comments by April 3, 2020.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Sikorsky Aircraft Corporation Model S–92A helicopters, serial number (S/N) 920006 through 920304 inclusive and S/N 920311 through 920314 inclusive, certificated in any category.

(d) Subject

Joint Aircraft System Component (JASC) Code: 6340, Rotor Drive Indicating System.

(e) Unsafe Condition

This AD was prompted by two incidents of erroneous low oil pressure caution cockpit indications and unintended actuation of the main gearbox (MGB) auto bypass valve. The FAA is issuing this AD to prevent the M XMSM OIL WARN circuit breaker from presenting erroneous cautions when tripped. The unsafe condition, if not addressed, could result in erroneous low oil pressure caution cockpit indication, unintended actuation of the MGB auto bypass valve, increased oil temperature, conflicting indications, and forced landing of the helicopter.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Within 400 hours time-in-service:

(1) For helicopters S/N 920006 through 920296 inclusive:

(i) Install Modification (MOD) Kit Clips and Brackets part number (P/N) 92070–20115–015 by following the Instructions, paragraph B. of Sikorsky Special Service Instructions No. 92–121, dated October 26, 2017 (SSI 92–121).

(ii) Install the first portion of MOD Kit Auxiliary Circuit Breaker Panel P/N 92070–55075–011 by following the Instructions, paragraph C. of Sikorsky SSI 92–121.

(iii) Install MOD Kit Left Hand (LH) Cockpit Auxiliary Power Unit P/N 92070–55096–012 by following the Instructions, paragraph D. of Sikorsky SSI 92–121.

(iv) Install MOD Kit LH Cabin Auxiliary Power Unit P/N 92070–55096–013 by following the Instructions, paragraph E. of Sikorsky SSI 92–121.

(v) Install MOD Kit LH Top Deck FLD P/N 92070–55096–016 by following the Instructions, paragraph F. of Sikorsky SSI 92–121.

(vi) Install MOD Kit MGB XMSN P/N 92070–55096–017 by following the Instructions, paragraph G. of Sikorsky SSI 92–121.

(vii) Install the completion portion of MOD Kit Auxiliary Circuit Break Panel P/N 92070–55075–011 by following the Instructions, paragraph H. of Sikorsky SSI 92–121.

(viii) Install MOD Kit Auxiliary Cabin Panel Faceplate P/N 92070–55075–012 by following the Instructions, paragraph J. of Sikorsky SSI 92–121.

(2) For helicopters S/N 920297 through 920304 inclusive and S/N 920311 through 920314 inclusive:

(i) Modify the auxiliary circuit breaker panel and transmission harness by following the Instructions, paragraph I. of Sikorsky SSI 92–121.

(ii) Install MOD Kit Auxiliary Cabin Panel Faceplate P/N 92070–55075–012 by following the Instructions, paragraph J. of Sikorsky SSI 92–121.

(3) Insert a copy of the Rotorcraft Flight Manual (RFM) Supplement No. 45, Revision No. 2, Sikorsky Model S–92A, Part 1, dated April 27, 2017, into the RFM for your helicopter.

(h) Credit for Previous Actions

Completion of the Accomplishment Instructions of Sikorsky S–92 Helicopter Alert Service Bulletin 92–63–037, Revision A, dated March 1, 2018, before the effective date of this AD is considered acceptable for compliance with the actions required by paragraph (g) of this AD.

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Boston ACO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (j)(1) of this AD.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(j) Related Information

(1) For more information about this AD, contact Michael Schwetz, Aviation Safety Engineer, Boston ACO Branch, Compliance & Airworthiness Division, FAA, 1200 District Avenue, Burlington, MA 01803; telephone 781–238–7761; email *michael.schwetz@faa.gov.*

(2) For service information identified in this AD, contact your local Sikorsky Field Representative or Sikorsky's Service Engineering Group at Sikorsky Aircraft Corporation, 124 Quarry Road, Trumbull, CT 06611; telephone 1–800–Winged–S; email *wcs_cust_service_eng.gr-sik@lmco.com.* Operators may also log on to the Sikorsky 360 website at *https://www.sikorsky360.com.* You may view this referenced service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy, Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call 817–222–5110.

Issued in Fort Worth, Texas, on February 4, 2020.

Lance T. Gant,

Director, Compliance & Airworthiness Division, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede Airworthiness Directive (AD) 2018–06–07, which applies to all The Boeing Company Model 757–200, –200CB, and –300 series airplanes. AD 2018–06–07 requires inspecting the fuselage frame at a certain station for existing repairs, repetitive inspections, and applicable repairs. Since the FAA issued AD 2018–06–07, the agency has received reports of new crack findings outside of the AD 2018–06–07 inspection area, which the current inspections will not detect. This proposed AD would continue to require the actions in AD 2018–06–07, with an expanded inspection area, additional inspections, a modified inspection type, and applicable repairs. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by April 3, 2020.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For Boeing service information identified in this NPRM, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; phone: 562–797–1717; internet: *https://www.myboeingfleet.com.*

For Aviation Partners Boeing service information identified in this NPRM, contact Aviation Partners Boeing, 2811 S 102nd Street, Suite 200, Seattle, WA 98168; phone: 206–830–7699; internet: *https://www.aviationpartnersboeing.com.*

You may view this service information at the FAA, Transport Standards Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. Boeing Alert Service Bulletin 757–53A0108, Revision 1, dated July 17, 2019, is also available on the internet at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2020–0094.

Examining the AD Docket

You may examine the AD docket on the internet at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2020–0094; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the regulatory evaluation, any comments received, and other information. The street address for Docket Operations is listed above. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Peter Jarzomb, Aerospace Engineer, Airframe Section, FAA, Los Angeles ACO Branch, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 562–627–5234; fax: 562–627–5210; email: *peter.jarzomb@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2020–0094; Product Identifier 2019–NM–188–AD'' at the beginning of your comments. The FAA specifically invites comments on the overall regulatory, economic, environmental, and energy aspects of this NPRM. The FAA will consider all comments received by the closing date and may amend this NPRM because of those comments.

The FAA will post all comments received, without change, to *https://www.regulations.gov,* including any personal information you provide. The FAA will also post a report summarizing each substantive verbal contact received about this proposed AD.

Discussion

The FAA issued AD 2018–06–07, Amendment 39–19227 (83 FR 13398, March 29, 2018) (''AD 2018–06–07''), for all The Boeing Company Model 757–200, –200CB, and –300 series airplanes. AD 2018–06–07 requires inspecting the fuselage frame at station (STA) 1640 for existing repairs, repetitive inspections, and applicable repairs. AD 2018–06–07 resulted from a report of fatigue cracking found in a certain fuselage frame, which severed the inner chord and web. The FAA issued AD 2018–06–07 to address cracking of the fuselage frame at STA 1640, which could result in reduced structural integrity of the airplane.

Actions Since AD 2018–06–07 Was Issued

Since the FAA issued AD 2018–06–07, the FAA has received reports of new crack findings outside of the AD 2018–06–07 inspection area. During the inspections required by AD 2018–06–07, an operator found the STA 1640 frame with a crack starting from the third fastener below the stringer S–14 intercostal on the right side. The crack was approximately 3 inches long and had grown into an insulation stud hole in the web near the outer chord. The crack was not in the area inspected as required by AD 2018–06–07. There have also been reports of cracks found growing out of the fastener holes in the inner chord in the aft direction, towards the web away from the original inspection areas. The FAA has therefore determined that the inspection area must be expanded and new inspections must be added.

Related Service Information Under 1 CFR Part 51

The FAA has reviewed Boeing Alert Service Bulletin 757–53A0108, Revision 1, dated July 17, 2019. This service information describes procedures for an inspection of the fuselage frame for existing frame repairs or replacements, a detailed inspection for any crack, nick, or gouge in the STA 1640 fuselage frame, repetitive high frequency eddy current and low frequency eddy current inspections for cracking in the STA 1640 fuselage frame between stringers S–11 and S–16, and repair.

The FAA has also reviewed Aviation Partners Boeing (APB) Alert Service Bulletin AP757–53–001, Revision 2, dated October 22, 2019. This service information provides compliance times for accomplishing the procedures identified in Boeing Alert Service Bulletin 757–53A0108, Revision 1, dated July 17, 2019, for airplanes on which APB blended or scimitar blended winglets are installed.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

The FAA is proposing this AD because the FAA has evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements

Although this proposed AD does not explicitly restate the requirements of AD 2018–06–07, this proposed AD would retain certain requirements of AD 2018–06–07. Those requirements are referenced in the service information identified previously, which, in turn, is referenced in paragraph (g) of this proposed AD. This proposed AD would expand the inspection area, add inspections, and modify a certain inspection type.

This proposed AD would also require accomplishment of the actions identified as ''RC'' (required for compliance) in the Accomplishment Instructions of Boeing Alert Service Bulletin 757–53A0108, Revision 1, dated July 17, 2019; and Aviation Partners Boeing (APB) Alert Service Bulletin AP757–53–001, Revision 2, dated October 22, 2019, described previously, except for any differences identified as exceptions in the regulatory text of this proposed AD.

The initial compliance times for the airplanes identified in Boeing Alert Service Bulletin 757–53A0108, Revision 1, dated July 17, 2019, range from within 500 flight cycles after the effective date of this AD, to within 16,000 flight cycles after the installation of the local frame replacement, depending on the configuration. The repetitive intervals range from 1,800 flight cycles to 10,400 flight cycles, depending on the configuration.

The initial compliance times for the airplanes identified in Aviation Partners Boeing (APB) Alert Service Bulletin AP757–53–001, Revision 2, dated October 22, 2019, range from within 500 flight cycles after the effective date of this AD, to within 16,000 flight cycles after the installation of the local frame replacement, depending on the configuration. The repetitive intervals range from 1,900 flight cycles to 8,600 flight cycles, depending on the configuration.

For information on the procedures and compliance times, see Boeing Alert Service Bulletin 757–53A0108, Revision 1, dated July 17, 2019, at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2020–0094.

Costs of Compliance

The FAA estimates that this proposed AD affects 606 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspection for existing frame repairs or replacements.	1 work-hour × $85 per hour = $85	$0	$85	$51,510.
Detailed inspection	1 work-hour × $85 per hour	0	$85	$51,510.

ESTIMATED COSTS FOR REQUIRED ACTIONS—Continued

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Repetitive high and low frequency inspections for Groups 1 through 3 airplanes (598 airplanes).	54 work-hours × $85 per hour = $4,590 per inspection cycle.	0	$4,590 per inspection cycle.	$2,744,820 per inspection cycle.
Repetitive high and low frequency inspections for Groups 4 and 5 airplanes (8 airplanes).	49 work-hours × $85 per hour = $4,165 per inspection cycle.	0	$4,165 per inspection cycle.	$33,320 per inspection cycle.

The FAA has received no definitive data that would enable us to provide cost estimates for the on-condition repair specified in this proposed AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA has determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing Airworthiness Directive (AD) 2018–06–07, Amendment 39–19227 (83 FR 13398, March 29, 2018), and adding the following new AD:

The Boeing Company: Docket No. FAA–2020–0094; Product Identifier 2019–NM–188–AD.

(a) Comments Due Date

The FAA must receive comments on this AD action by April 3, 2020.

(b) Affected ADs

This AD replaces AD 2018–06–07, Amendment 39–19227 (83 FR 13398, March 29, 2018) (''AD 2018–06–07'').

(c) Applicability

This AD applies to all The Boeing Company Model 757–200, –200CB, and –300 series airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 53, Fuselage.

(e) Unsafe Condition

This AD was prompted by a report of fatigue cracking found in the fuselage frame at station (STA) 1640, which severed the inner chord and web. The FAA is issuing this AD to address cracking of the fuselage frame at STA 1640, which could result in reduced structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Actions Required for Compliance

(1) For all airplanes except those identified in paragraphs (g)(2) through (4) of this AD: Except as specified by paragraph (h) of this AD, at the applicable times specified in paragraph 1.E., ''Compliance,'' of Boeing Alert Service Bulletin 757–53A0108, Revision 1, dated July 17, 2019, do all applicable actions identified as ''RC'' (required for compliance) in, and in accordance with, the Accomplishment Instructions of Boeing Alert Service Bulletin 757–53A0108, Revision 1, dated July 17, 2019.

(2) For airplanes on which Aviation Partners Boeing (APB) blended or scimitar blended winglets are installed using Supplemental Type Certificate (STC) ST01518SE: Except as specified by paragraph (h) of this AD, at the applicable times specified in paragraph 1.E., ''Compliance,'' of Aviation Partners Boeing (APB) Alert Service Bulletin AP757–53–001, Revision 2, dated October 22, 2019, do all applicable actions identified as ''RC'' in, and in accordance with, the Accomplishment Instructions of Aviation Partners Boeing (APB) Alert Service Bulletin AP757–53–001, Revision 2, dated October 22, 2019.

(3) For Group 1 airplanes that have been converted from passenger to freighter configuration using VT Mobile Aerospace Engineering (MAE) Inc. STC ST03562AT: Except as specified by paragraph (h) of this AD, at the applicable times specified for Group 2 airplanes in the ''Compliance'' paragraph of Boeing Alert Service Bulletin 757–53A0108, Revision 1, dated July 17, 2019, do all applicable Group 2 actions, as identified in, and in accordance with, the Accomplishment Instructions of Boeing Alert Service Bulletin 757–53A0108, Revision 1, dated July 17, 2019.

(4) For Group 4 airplanes that have been converted from a passenger to freighter configuration using VT MAE Inc. STC ST03562AT: Except as specified by paragraph (h) of this AD, at the applicable times specified for Group 5 airplanes in the ''Compliance'' paragraph of Boeing Alert Service Bulletin 757–53A0108, Revision 1, dated July 17, 2019, do all applicable Group 5 actions as identified in, and in accordance with, the Accomplishment Instructions of Boeing Alert Service Bulletin 757–53A0108, Revision 1, dated July 17, 2019.

(h) Exceptions to Service Information Specifications

(1) Where Boeing Alert Service Bulletin 757–53A0108, Revision 1, dated July 17, 2019, specifies contacting Boeing for repair instructions or for alternative inspections: This AD requires doing the repair, or doing the alternative inspections and applicable on-condition actions using a method approved in accordance with the procedures specified in paragraph (i) of this AD.

(2) Where Boeing Alert Service Bulletin 757–53A0108, Revision 1, dated July 17, 2019, uses the phrase ''the original issue date of this service bulletin,'' this AD requires using ''May 3, 2018 (the effective date of AD 2018–06–07),'' except where Alert Service Bulletin 757–53A0108, Revision 1, dated July 17, 2019, uses the phrase ''the original issue date of this service bulletin'' in a note or flag note.

(3) Where Boeing Alert Service Bulletin 757–53A0108, Revision 1, dated July 17, 2019, uses the phrase ''the revision 1 date of this service bulletin,'' this AD requires using ''the effective date of this AD.''

(4) Where Aviation Partners Boeing (APB) Alert Service Bulletin AP757–53–001, Revision 2, dated October 22, 2019, specifies contacting Boeing for repair instructions or for alternative inspections: This AD requires doing the repair, or doing the alternative inspections and applicable on-condition actions using a method approved in accordance with the procedures specified in paragraph (i) of this AD.

(5) Where Aviation Partners Boeing (APB) Alert Service Bulletin AP757–53–001, Revision 2, dated October 22, 2019, uses the phrase ''the revision 1 issue date of this service bulletin,'' this AD requires using ''May 3, 2018 (the effective date of AD 2018–06–07),'' except where Aviation Partners Boeing (APB) Alert Service Bulletin AP757–53–001, Revision 2, dated October 22, 2019, uses the phrase ''the revision 1 issue date of this service bulletin'' in a note or flag note.

(6) Where Aviation Partners Boeing (APB) Alert Service Bulletin AP757–53–001, Revision 2, dated October 22, 2019, uses the phrase ''the revision 2 issue date of this service bulletin,'' this AD requires using ''the effective date of this AD.''

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Los Angeles ACO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (j)(1) of this AD. Information may be emailed to: *9-ANM-LAACO-AMOC-Requests@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by The Boeing Company Organization Designation Authorization (ODA) that has been authorized by the Manager, Los Angeles ACO Branch, FAA, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(4) AMOCs approved previously for AD 2018–06–07 are not approved as AMOCs for the corresponding provisions of this AD.

(5) Except as specified by paragraph (h) of this AD: For service information that contains steps that are labeled as Required for Compliance (RC), the provisions of paragraphs (i)(5)(i) and (ii) of this AD apply.

(i) The steps labeled as RC, including substeps under an RC step and any figures identified in an RC step, must be done to comply with the AD. If a step or substep is labeled ''RC Exempt,'' then the RC requirement is removed from that step or substep. An AMOC is required for any deviations to RC steps, including substeps and identified figures.

(ii) Steps not labeled as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the RC steps, including substeps and identified figures, can still be done as specified, and the airplane can be put back in an airworthy condition.

(j) Related Information

(1) For more information about this AD, contact Peter Jarzomb, Aerospace Engineer, Airframe Section, FAA, Los Angeles ACO Branch, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 562–627–5234; fax: 562–627–5210; email: *peter.jarzomb@faa.gov.*

(2) For Aviation Partners Boeing service information identified in this AD, contact Aviation Partners Boeing, 2811 S 102nd Street, Suite 200, Seattle, WA 98168; phone: 206–830–7699; internet: *https://www.aviationpartnersboeing.com.*

(3) For Boeing service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; phone: 562–797–1717; internet: *https://www.myboeingfleet.com.*

(4) You may view this referenced service information at the FAA, Transport Standards Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

Issued on February 11, 2020.

Gaetano A. Sciortino,

Deputy Director for Strategic Initiatives, Compliance & Airworthiness Division, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2020–0097; Product Identifier 2019–NM–208–AD]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for all The Boeing Company Model 737–300, –400, and –500 series airplanes. This proposed AD was prompted by a report that a crack indication consistent with fatigue cracking was found on the left nacelle support overwing fitting flange fastener hole during teardown of a Model 737–300 series airplane. This proposed AD would require a general visual inspection of the strut to wing diagonal brace at a certain location for cracking. For certain airplanes, this proposed AD would also require an ultrasonic inspection of certain fasteners of the nacelle support overwing fitting at a certain location for cracking. For certain other airplanes, this proposed AD would also require a magnetic check of the nacelle support overwing fitting at a certain location to determine the material composition. This proposed AD would also require applicable on-condition actions. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by April 3, 2020.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; internet *https://www.myboeingfleet.com.* You may view this referenced service information at the FAA, Transport Standards Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available on the internet at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2020–0097.

Examining the AD Docket

You may examine the AD docket on the internet at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2020–0097; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the regulatory evaluation, any comments received, and other information. The street address for Docket Operations is listed above. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Wayne Ha, Aerospace Engineer, Airframe Section, FAA, Los Angeles ACO Branch, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 562–627–5238; fax: 562–627–5210; email: *wayne.ha@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2020–0097; Product Identifier 2019–NM–208–AD'' at the beginning of your comments. The FAA specifically invites comments on the overall regulatory, economic, environmental, and energy aspects of this NPRM. The FAA will consider all comments received by the closing date and may amend this NPRM because of those comments.

The FAA will post all comments, without change, to *https://www.regulations.gov,* including any personal information you provide. The FAA will also post a report summarizing each substantive verbal contact the agency receives about this proposed AD.

Discussion

The FAA has received a report indicating that a crack indication consistent with fatigue cracking was found on the left nacelle support overwing fitting flange fastener hole during teardown of a Model 737–300 series airplane. Further analysis determined the root cause of the crack is stress at the first two forward fasteners of the nacelle support overwing fitting being higher than anticipated. Existing maintenance planning document (MPD) inspections do not provide opportunities to detect a failed nacelle support overwing fitting at wing buttock line (WBL) 191. The crack finding occurred at 67,695 total flight cycles and 80,269 total flight hours. This condition, if not addressed, could result in an undetected crack in the nacelle support overwing fittings or strut to wing diagonal brace, which could result in the inability of the structure to carry limit load and could adversely affect the structural integrity of the airplane.

Related Service Information Under 1 CFR Part 51

The FAA reviewed Boeing Alert Requirements Bulletin 737–57A1345 RB, dated December 17, 2019. This service information describes procedures for a magnetic check to determine material composition of the nacelle support overwing fitting at WBL 191; ultrasonic inspections of the nacelle support overwing fitting at WBL 191 for cracking; general visual inspections of the strut to wing diagonal brace at nacelle station (STA) 278 for cracking; and applicable on-condition actions. On-condition actions include repetitive ultrasonic inspections of the nacelle support overwing fitting at WBL 191 for cracking, repetitive general visual inspections of the strut to wing diagonal brace at nacelle STA 278 for cracking, and repair. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

The FAA is proposing this AD because the FAA evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements

This proposed AD would require accomplishment of the actions identified in Boeing Alert Requirements Bulletin 737–57A1345 RB, dated December 17, 2019, described previously, except for any differences identified as exceptions in the regulatory text of this proposed AD.

For information on the procedures and compliance times, see this service information at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2020–0097.

Explanation of Requirements Bulletin

The FAA worked in conjunction with industry, under the Airworthiness Directive Implementation Aviation Rulemaking Committee (AD ARC), to enhance the AD system. One enhancement is a process for annotating which steps in the service information are ''required for compliance'' (RC) with an AD. Boeing has implemented this RC concept into Boeing service bulletins.

In an effort to further improve the quality of ADs and AD-related Boeing service information, a joint process improvement initiative was worked between the FAA and Boeing. The initiative resulted in the development of a new process in which the service information more clearly identifies the actions needed to address the unsafe condition in the ''Accomplishment Instructions.'' The new process results in a Boeing Requirements Bulletin, which contains only the actions needed to address the unsafe condition (*i.e.,* only the RC actions).

Costs of Compliance

The FAA estimates that this proposed AD affects 158 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Magnetic Check	1 work-hour × $85 per hour = $85	$0	$85	$13,430
Ultrasonic Inspection	5 work-hours × $85 per hour = $425	0	425	67,150
General Visual Inspection	1 work-hour × $85 per hour = $85	0	85	13,430

The FAA estimates the following costs to do any necessary on-condition inspections that would be required. The FAA has no way of determining the number of aircraft that might need these on-condition inspections:

ESTIMATED COSTS OF ON-CONDITION INSPECTIONS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Ultrasonic Inspections	5 work-hours × $85 per hour = $425 per inspection cycle.	$0	$425 per inspection cycle	$67,150 per inspection cycle.
General Visual Inspections	1 work-hour × $85 per hour = $85 per inspection cycle.	0	$85 per inspection cycle	$13,430 per inspection cycle.

The FAA has received no definitive data that would enable us to provide cost estimates for the on-condition repairs specified in this proposed AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

The Boeing Company: Docket No. FAA–2020–0097; Product Identifier 2019–NM–208–AD.

(a) Comments Due Date

The FAA must receive comments by April 3, 2020.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all The Boeing Company Model 737–300, –400, and –500 series airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 57, Wings.

(e) Unsafe Condition

This AD was prompted by a report that a crack indication consistent with fatigue cracking was found on the left nacelle support overwing fitting flange fastener hole during teardown of a Model 737–300 series airplane. The FAA is issuing this AD to address the potential for undetected cracks in the nacelle support overwing fittings or strut to wing diagonal brace, which could result in the inability of the structure to carry limit load and could adversely affect the structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Except as specified by paragraph (h) of this AD: At the applicable times specified in the ''Compliance'' paragraph of Boeing Alert Requirements Bulletin 737–57A1345 RB, dated December 17, 2019, do all applicable actions identified in, and in accordance with, the Accomplishment Instructions of Boeing Alert Requirements Bulletin 737–57A1345 RB, dated December 17, 2019. Actions identified as terminating actions in Boeing Alert Requirements Bulletin 737–57A1345 RB, dated December 17, 2019, terminate the applicable required actions of this AD, provided the terminating action is done in accordance with the Accomplishment Instructions of Boeing Alert Requirements Bulletin 737–57A1345 RB, dated December 17, 2019.

Note 1 to paragraph (g): Guidance for accomplishing the actions required by this AD can be found in Boeing Alert Service Bulletin 737–57A1345, dated December 17, 2019, which is referred to in Boeing Alert Requirements Bulletin 737–57A1345 RB, dated December 17, 2019.

(h) Exceptions to Service Information Specifications

(1) Where Boeing Alert Requirements Bulletin 737–57A1345 RB, dated December 17, 2019, uses the phrase ''the original issue date of Requirements Bulletin (RB) 737–57A1345 RB,'' this AD requires using ''the effective date of this AD.''

(2) Where Boeing Alert Requirements Bulletin 737–57A1345 RB, dated December 17, 2019, specifies contacting Boeing for repair instructions: This AD requires doing the repair before further flight using a method approved in accordance with the procedures specified in paragraph (i) of this AD.

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Los Angeles ACO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (j)(1) of this AD. Information may be emailed to: *9-ANM-LAACO-AMOC-Requests@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by The Boeing Company Organization Designation Authorization (ODA) that has been authorized by the Manager, Los Angeles ACO Branch, FAA, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the

certification basis of the airplane, and the approval must specifically refer to this AD.

(j) Related Information

(1) For more information about this AD, contact Wayne Ha, Aerospace Engineer, Airframe Section, FAA, Los Angeles ACO Branch, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 562–627–5238; fax: 562–627–5210; email: *wayne.ha@faa.gov*.

(2) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; internet *https://www.myboeingfleet.com*. You may view this referenced service information at the FAA, Transport Standards Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

Issued on February 11, 2020.

Gaetano A. Sciortino,

Deputy Director for Strategic Initiatives, Compliance & Airworthiness Division, Aircraft Certification Service.

[Docket No. FAA–2019–1022; Airspace Docket No. 19–ANM–81]

RIN 2120–AA66

Proposed Amendment of Class E Airspace and Establishment of Class E Airspace Extension; Port Angeles, WA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to modify the Class E surface area, Class E airspace extending upward from 700 feet above the surface and create Class E airspace as an extension to the Class E surface area at William R Fairchild International Airport, Port Angeles, WA. Following a review of the airspace, the FAA found it necessary to modify the existing airspace for William R Fairchild Airport for the safety and management of Instrument Flight Rules (IFR) operations at the Airport.

DATES: Comments must be received on or before April 3, 2020.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590; telephone: (800) 647–5527, or (202) 366–9826. You must identify FAA Docket No. FAA–2019–1022; Airspace Docket No. 19–ANM–81, at the beginning of your comments. You may also submit comments through the internet at *https://www.regulations.gov.*

FAA Order 7400.11D, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *https://www.faa.gov/air_traffic/publications/.* For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11D at NARA, email *fedreg.legal@nara.gov* or go to *https://www.archives.gov/federal_register/cfr/ibr_locations.html.*

FOR FURTHER INFORMATION CONTACT: Richard Roberts, Federal Aviation Administration, Operations Support Group, Western Service Center, 2200 S 216th Street, Des Moines, WA 98198–6547; telephone (206) 231–2245.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would modify the existing Class E airspace and establish new Class E airspace as an extension to the Class E surface area at William R Fairchild International Airport, Port Angeles, WA, in support of IFR operations at the airport.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (Docket No. FAA–2019–1022; Airspace Docket No. 19–ANM–81) and be submitted in triplicate to DOT Docket Operations (see **ADDRESSES** section for address and phone number). You may also submit comments through the internet at *https://www.regulations.gov.*

Persons wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: ''Comments to Docket No. FAA–2019–1022; Airspace Docket No. 19–ANM–81.'' The postcard will be date/time stamped and returned to the commenter.

All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the internet at *https://www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *https://www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An informal docket may also be examined between 8:00 a.m. and 4:30 p.m., Monday through Friday, except federal holidays, at the Northwest Mountain Regional Office of the Federal Aviation Administration, Air Traffic Organization, Western Service Center, Operations Support Group, 2200 S 216th St., Des Moines, WA 98198–6547.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11D, Airspace Designations and Reporting Points, dated August 8, 2019, and effective September 15, 2019. FAA Order

7400.11D is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11D lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 by amending the Class E airspace description for William R Fairchild International Airport, Port Angeles, WA. This action is being submitted coincidental with an FAA proposal, Docket No. FAA–2019–1023; 19–ANM–94 to establish Class E airspace for Port Angeles CGAS, Port Angeles, WA. That action would provide the airspace needed for independent operations at Port Angeles CGAS to facilitate training and mission accomplishment. This action would modify the airspace at William R Fairchild International Airport, Port Angeles, WA, to only that airspace needed for their operations. The Class E surface area would be modified to include the airspace within 4.1 miles of the airport from the 235° bearing clockwise to the 120° bearing and exclude the airspace within 1.5 miles of the Port Angeles CGAS. This exclusion would allow independent air traffic operations at the Port Angeles CGAS when weather conditions at this location varies from those at the William R Fairchild International Airport.

A Class E extension to the surface area would be established 2 miles both sides of the 284° bearing extending from the 4.1-mile radius to 8 miles west of the airport. This would provide the airspace required for the RNAV approach to runway 8, as aircraft descend through 1000 feet AGL.

The Class E airspace extending upward from 700 feet AGL would be modified to within 4.1 miles of William R Fairchild International Airport and that area 3.1 miles on both sides of the 284° bearing from the airport to 11 miles west. This area would provide airspace for the RNAV and the ILS Approach to runway 8, as aircraft descend through 1500 feet.

To the southeast, the airspace extending upward from 700 feet AGL would be modified to 1-mile north and 4 miles south of the 105° bearing from the 4.1-mile radius to 7 miles from the airport.

This action would also remove the Class E surface airspace 3 miles north and 2.2 miles south of the William R Fairchild international Airport 079° bearing extending from the 4.1-mile radius to 11.4 miles east of the airport, as it is not needed for operations at William R. Fairchild airport. This airspace would support IFR operations at William R Fairchild Airport, Port Angeles, WA.

Class E airspace designations are published in paragraph 6002, 6004 and 6005 of FAA Order 7400.11D, dated August 8, 2019 and effective September 15, 2019, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order. FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial, and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Given this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.11D, Airspace Designations and Reporting Points, dated August 8, 2019, and effective September 15, 2019, is amended as follows:

Paragraph 6002 Class E Airspace Designated as Surface Areas.

* * * * *

ANM WA E2 Port Angeles, WA [Amended]

William R. Fairchild International Airport, WA
(Lat. 48°07′13″ N, long. 123°29′59″ W)
Port Angeles CGAS
(Lat. 48°08′29″ N, long. 123°24′50″ W)

That airspace within a 4.1-mile radius of the William R. Fairchild International Airport from the 235° bearing clockwise to the 120° bearing excluding the airspace within 1.5 miles of the Port Angeles CGAS.

Paragraph 6004 Class E Airspace Areas Designated as an Extension to a Class D or Class E Surface Area.

* * * * *

ANM WA E4 Port Angeles, WA [New]

William R. Fairchild International Airport, WA
(Lat. 48°07′13″ N, long. 123°29′59″ W)

That airspace extending upward from the surface within 2 miles both sides of the 284° bearing extending from the 4.1 mile radius to 8 miles west of the airport.

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ANM WA E5 Port Angeles, WA [Amended]

William R. Fairchild International Airport, WA
(Lat. 48°07′13″ N, long. 123°29′59″ W)

That airspace extending upward from 700 feet above the surface within a 4.1-mile radius of the William R. Fairchild International Airport, and within 1 mile north and 4 miles south of the William R. Fairchild International Airport 105° bearing extending from the 4.1-mile radius to 7 miles east of the airport and that airspace 3.1 miles each side of the 284° bearing from the 4.1-mile radius to 11 miles west of the airport.

Issued in Seattle, Washington, on February 11, 2020.

Stephanie C. Harris,

Group Manager (Acting), Operations Support Group, Western Service Center.

BILLING CODE 4910–13–P

FEDERAL TRADE COMMISSION

16 CFR Part 303

RIN 3084–AB28

Rules and Regulations Under the Textile Fiber Products Identification Act

AGENCY: Federal Trade Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Trade Commission (''FTC'' or ''Commission'') proposes amending the Rules and Regulations under the Textile Fiber Products Identification Act (''Textile Rules'' or ''Rules'') to incorporate the most recent ISO 2076 standard for generic fiber names. The proposed amendment should reduce compliance costs and increase flexibility for firms providing textile fiber information to consumers.

DATES: Written comments must be received on or before March 19, 2020.

ADDRESSES: Interested parties may file a comment online or on paper by following the instructions in the Request for Comments part of the **SUPPLEMENTARY INFORMATION** section below. Write ''Textile Rules, 16 CFR part 303, Project No. P948404'' on your comment, and file your comment online through *https://www.regulations.gov* by following the instructions on the web-based form. If you prefer to file your comment on paper, write ''Textile Rules, 16 CFR part 303, Project No. P948404'' on your comment and on the envelope and mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW, Suite CC–5610 (Annex C), Washington, DC 20580, or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Constitution Center, 400 7th Street SW, 5th Floor, Suite 5610 (Annex C), Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: Jock Chung (202–326–2984), Attorney, Division of Enforcement, Bureau of Consumer Protection, Federal Trade Commission, 600 Pennsylvania Avenue NW, Washington, DC 20580.

SUPPLEMENTARY INFORMATION:

I. Introduction

The Textile Fiber Products Identification Act (''Textile Act'') [1] and Rules require marketers to, among other things, attach a label to each covered textile product disclosing: (1) The generic names and percentages by weight of the constituent fibers in the product; (2) the name under which the manufacturer or other responsible company does business or, in lieu thereof, the company's registered identification number; and (3) the name of the country where the product was processed or manufactured.[2]

Section 303.7 of the Textile Rules (generic names and definitions for manufactured fibers) establishes the generic names for manufactured fibers that must be used in the required fiber content disclosures by: (1) Listing the generic names and definitions the Commission has established through its textile petition process,[3] and (2) incorporating by reference the generic names and definitions set forth in the ISO 2076 standard.

The Commission incorporated the ISO 2076:1989 standard into § 303.7 in 1998 so that a ''manufacturer or other marketer of a fiber not listed in [16 CFR 303.7] but recognized in ISO's 1989 standard need not petition the Commission for recognition of the fiber name, but may simply use the ISO established name.'' [4] The Commission stated that it ''may accommodate future changes in the ISO Standard by amending the Textile Rules to incorporate the new Standard without going through the petition process.'' [5] It also recommended that ''. . . manufacturers seeking recognition of new fiber names first seek recognition from the ISO,'' [6] noting that ''FTC recognition of new fibers by ISO in the future . . . can be accomplished easily by amending the Textile Rules to incorporate the most recent ISO standard.'' [7] The Commission subsequently incorporated the updated 2076:1999(E) standard into § 303.7 in 2000,[8] and incorporated the updated 2076:2010(E) standard in 2014.[9]

During these proceedings, commenters strongly supported incorporating the latest ISO 2076 standard in the Rule by asserting that doing so would expedite the use of new fiber names,[10] benefit businesses by establishing an international consensus that removes unnecessary barriers to trade, and help manufacturers develop labeling that satisfies the requirements of multiple countries.[11] Commenters further stated that incorporating updated ISO standards in the Rule reduces potential Customs challenges and helps forestall nationally biased standards that can create barriers to trade and hinder efficient supply-chain management.[12]

II. Proposed Amendment

The Commission proposes to incorporate the most recent version of the relevant standard, ISO 2076:2013(E), ''Textiles—Man-made fibres—Generic names,'' Sixth edition, November 15, 2013 (ISO 2076:2013(E)), in § 303.7 of the Textile Rule. The updated 2013 standard adds seven generic fiber names not defined in the 2010 standard: ''Chitin,'' ''ceramic,'' ''polybenzimidazol,'' ''polycarbamide,'' ''polypropylene/polyamide bicomponent,'' ''protein,'' and ''trivinyl.''

Commission staff has received several inquiries from manufacturers interested in initiating a proceeding to amend the Commission's list of approved generic fiber names under 16 CFR 303.8 to add ''chitin,'' a name recognized in ISO 2076:2013(E). Therefore, incorporating that standard into the Textile Rules will resolve the current requests, save the Commission and the manufacturers resources, and harmonize the two standards without the need to address other ISO recognized names individually.

III. Request for Comments

You can file a comment online or on paper. For the Commission to consider your comment, we must receive it on or before March 19, 2020. Write ''Textile Rules, 16 CFR part 303, Project No. P948404'' on your comment. Your comment—including your name and your state—will be placed on the public record of this proceeding, including, to the extent practicable, on the *https://www.regulations.gov* website.

Postal mail addressed to the Commission is subject to delay due to heightened security screening. As a result, we encourage you to submit your comments online. To make sure that the Commission considers your online comment, you must file it through

[1] 15 U.S.C. 70 *et seq.*

[2] *See* 15 U.S.C. 70b(b).

[3] To establish a generic name under 16 CFR 303.8, the petitioner must submit evidence that: (1) The fiber has a chemical composition radically different from other fibers, and that the distinctive chemical composition results in distinctive physical properties of significance to the general public; (2) the fiber is in active commercial use or such use is immediately foreseen; and (3) the grant of the generic name is of importance to the consuming public at large. 38 FR 34112, 34114 (Dec. 11, 1973). The Commission must then review the evidence, solicit public comment on a proposed amendment to the Rules to add the generic name, and issue a final amendment to the Rules.

[12] *Id.*

https://www.regulations.gov, by following the instruction on the web-based form provided.

If you file your comment on paper, write ''Textile Rules, 16 CFR part 303, Project No. P948404'' on your comment and on the envelope, and mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW, Suite CC–5610 (Annex C), Washington, DC 20580, or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Constitution Center, 400 7th Street SW, 5th Floor, Suite 5610 (Annex C), Washington, DC 20024. If possible, submit your paper comment to the Commission by courier or overnight service.

Because your comment will be placed on the publicly accessible website, *https://www.regulations.gov,* you are solely responsible for making sure that your comment does not include any sensitive or confidential information. In particular, your comment should not include any sensitive personal information, such as your or anyone else's Social Security number; date of birth; driver's license number or other state identification number, or foreign country equivalent; passport number; financial account number; or credit or debit card number. You are also solely responsible for making sure that your comment does not include any sensitive health information, such as medical records or other individually identifiable health information. In addition, your comment should not include any ''trade secret or any commercial or financial information which . . . is privileged or confidential''—as provided by Section 6(f) of the FTC Act, 15 U.S.C. 46(f), and FTC Rule 4.10(a)(2), 16 CFR 4.10(a)(2)—including in particular competitively sensitive information such as costs, sales statistics, inventories, formulas, patterns, devices, manufacturing processes, or customer names.

Comments containing material for which confidential treatment is requested must be filed in paper form, must be clearly labeled ''Confidential,'' and must comply with FTC Rule 4.9(c). In particular, the written request for confidential treatment that accompanies the comment must include the factual and legal basis for the request, and must identify the specific portions of the comment to be withheld from the public record. *See* FTC Rule 4.9(c). Your comment will be kept confidential only if the General Counsel grants your request in accordance with the law and the public interest. Once your comment has been posted publicly at *https://www.regulations.gov*—as legally required by FTC Rule 4.9(b)—we cannot redact or remove your comment, unless you submit a confidentiality request that meets the requirements for such treatment under FTC Rule 4.9(c), and the General Counsel grants that request.

Visit the FTC website to read this NPRM and the news release describing it. The FTC Act and other laws that the Commission administers permit the collection of public comments to consider and use in this proceeding as appropriate. The Commission will consider all timely and responsive public comments that it receives on or before March 19, 2020. For information on the Commission's privacy policy, including routine uses permitted by the Privacy Act, see *https://www.ftc.gov/site-information/privacy-policy.*

The Commission invites members of the public to comment on the costs and benefits to industry members and consumers, as well as any issues or concerns they believe are relevant or appropriate to the Commission's consideration of the proposed amendment to the Textile Rules. The Commission requests that comments provide factual data upon which they are based.

IV. Communications to Commissioners and Commissioner Advisors by Outside Parties

Written communications and summaries or transcripts of oral communications respecting the merits of this proceeding from any outside party to any Commissioner or Commissioner's advisor will be placed on the public record.[13]

V. Regulatory Flexibility Act

The Regulatory Flexibility Act (''RFA'')[14] requires that the Commission conduct an analysis of the anticipated economic impact of the proposed amendment on small entities. The purpose of a regulatory flexibility analysis is to ensure that an agency considers potential impacts on small entities and examines regulatory alternatives that could achieve the regulatory purpose while minimizing burdens on small entities. The RFA requires that the Commission provide an Initial Regulatory Flexibility Analysis (''IRFA'') with a proposed rule and a Final Regulatory Flexibility Analysis (''FRFA'') with a final rule, if any, unless the Commission certifies that the rule will not have a significant economic impact on a substantial number of small entities.[15]

The Commission believes that the proposed amendment would not have a significant economic impact upon small entities, although it may affect a substantial number of small businesses. In the Commission's view, the proposed amendment should not increase the costs of small entities that manufacture or import textile fiber products. Therefore, based on available information, the Commission certifies that amending the Rules as proposed will not have a significant economic impact on a substantial number of small businesses. Although the Commission certifies under the RFA that the proposed amendment would not, if promulgated, have a significant impact on a substantial number of small entities, the Commission has determined, nonetheless, that it is appropriate to publish an IRFA to inquire into the impact of the proposed amendment on small entities. Therefore, the Commission has prepared the following analysis:

A. Description of the Reasons That Action by the Agency Is Being Taken

The Commission proposes amending the Rules to incorporate an updated version of the standard establishing generic fiber names to provide covered entities with greater flexibility in complying with the Rules' disclosure requirements.

B. Statement of the Objectives of, and Legal Basis for, the Proposed Amendment

The Textile Act authorizes the Commission to implement its requirements through the issuance of rules. The proposed amendment would incorporate the updated ISO standard 2076:2013(E) into the Textile Rules, and provide covered entities with additional labeling options (*i.e.,* to market products covered by the Textile Rules that are made from generic fibers defined in ISO 2076:2013(E) but not otherwise defined) without imposing new burdens or additional costs.

C. Small Entities To Which the Proposed Amendments Will Apply

The Rules apply to various segments of the textile fiber product industry, including manufacturers and wholesalers of textile apparel products. Under the Small Business Size Standards issued by the Small Business Administration, textile apparel manufacturers qualify as small businesses if they have 500 or fewer

[13] *See* 16 CFR 1.26(b)(5).

[14] 5 U.S.C. 601–612.

[15] 5 U.S.C. 605.

employees. Clothing wholesalers qualify as small businesses if they have 100 or fewer employees. The Commission's staff has estimated that approximately 10,744 textile fiber product manufacturers and importers are covered by the Rules' disclosure requirements.[16] A substantial number of these entities likely qualify as small businesses. The Commission estimates that the proposed amendment will not have a significant impact on small businesses because it imposes no new obligations.

D. Projected Reporting, Recordkeeping, and Other Compliance Requirements, Including Classes of Covered Small Entities and Professional Skills Needed To Comply

As explained earlier in this document, the proposed amendment would incorporate the updated ISO standard 2076:2013(E) into the Textile Rules, thus providing greater flexibility to companies covered by the Rules. The proposed amendment would impose no new reporting, recordkeeping, or other compliance requirements. The small entities potentially covered by the proposed amendment will include all such entities subject to the Rules.

E. Duplicative, Overlapping, or Conflicting Federal Rules

The Commission has not identified any other federal statutes, rules, or policies that would duplicate, overlap, or conflict with the proposed amendment.

F. Significant Alternatives to the Proposed Amendment

The Commission has not proposed any specific small entity exemption or other significant alternatives because the proposed amendment would not impose any new requirements or compliance costs.

VI. Paperwork Reduction Act

The Rules contain reporting requirements that constitute information collection requirements under the Paperwork Reduction Act (PRA).[17] The Office of Management and Budget (OMB) has approved the Rule's existing information collection requirements through May 31, 2021 (OMB Control No. 3084–0101). The proposed amendment does not impose any additional collection of information requirements.

IX. Incorporation by Reference

Consistent with 5 U.S.C. 552(a) and 1 CFR part 51, the Commission proposes to incorporate the specifications of the following standard issued by the International Organization of Standardization (ISO): ISO 2076:2013(E), which lists the generic names used to designate the different categories of man-made fibres, based on a main polymer, currently manufactured on an industrial scale for textile and other purposes, together with the distinguishing attributes that characterize them.

This ISO standard is reasonably available to interested parties. Members of the public can obtain copies of ISO 2076:2013(E) from the American National Standards Institute, 25 West 43rd Street, Fourth Floor, New York, NY 10036–7417; (212) 642–4900; *isot@ansi.org; https://www.ansi.org.* This ISO standard is also available for inspection at the FTC Library, (202) 326–2395, Federal Trade Commission, Room H–630, 600 Pennsylvania Avenue NW, Washington, DC 20580.

VIII. Proposed Rule Language

List of Subjects in 16 CFR Part 303

Advertising, Incorporation by reference, Labeling, Recordkeeping, Textile fiber products.

PART 303—RULES AND REGULATIONS UNDER THE TEXTILE FIBER PRODUCTS IDENTIFICATION ACT

■ 1. The authority citation for part 303 continues to read:

Authority: 15 U.S.C. 70 *et seq.*

■ 2. Amend § 303.7 by revising the introductory text to read as follows:

§ 303.7 Generic names and definitions for manufactured fibers.

Pursuant to the provisions of section 7(c) of the Act, the Commission hereby establishes the generic names for manufactured fibers, together with their respective definitions, set forth in this section, and the generic names for manufactured fibers, together with their respective definitions, set forth in International Organization for Standardization ISO 2076:2013(E), ''Textiles—Man-made fibres—Generic names.'' International Organization for Standardization ISO 2076:2013(E), ''Textiles—Man-made fibres—Generic names,'' Sixth edition, November 15, 2013, is incorporated by reference into this section with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. To enforce any edition other than that specified in this section, the Federal Trade Commission must publish notice of change in the **Federal Register** and the material must be available to the public. All approved material is available for inspection at the Federal Trade Commission, 600 Pennsylvania Ave. NW, Room H–630, Washington, DC 20580, (202) 326–2222, and is available from the American National Standards Institute, 25 West 43rd Street, Fourth Floor, New York, NY 10036–7417; (212) 642–4900; *isot@ansi.org; https://www.ansi.org.* It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email *fedreg.legal@nara.gov,* or go to *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

AMERICAN BATTLE MONUMENTS COMMISSION

36 CFR Part 404

RIN 3263–AA01

ABMC FOIA Regulation

AGENCY: American Battle Monuments Commission.

ACTION: Proposed rule.

SUMMARY: The American Battle Monuments Commission (ABMC) is proposing to revise its procedures and guidelines for compliance with the Freedom of Information Act (FOIA) to incorporate changes required by the FOIA Improvement Act of 2016 and applicable Department of Justice Office of Information Policy guidance.

DATES: Comments must be received by March 19, 2020.

ADDRESSES: You may submit comments, identified by docket number and/or Regulatory Information Number (RIN) and title, by any of the following methods:

- *Federal Rulemaking Portal: http://www.regulations.gov.*

Follow the instructions for submitting comments. All submissions received must include the agency name and docket number or RIN for this document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: Edwin L. Fountain, General Counsel, American Battle Monuments Commission, 2300 Clarendon Boulevard, Suite 500, Arlington VA 22201, *fountaine@abmc.gov*.

SUPPLEMENTARY INFORMATION: The authority for this rulemaking is Section 3 of the FOIA Improvement Act of 2016, Public Law 114–185, 5 U.S.C. 552 note, which requires agencies to issue regulations on procedures for the disclosure of records under FOIA in accordance with that Act.

Changes Proposed By ABMC in This Rulemaking

This action updates and revises ABMC's procedures and guidelines for compliance with FOIA. The revisions to the rule:

- Update the description of and contact information for ABMC and the ABMC FOIA Office.
- Require ABMC to make available for public inspection in an electronic format records that have been requested three or more times.
- Set forth verification of identity requirements for requesters making a request for records about himself or another individual.
- Outline procedures for consultation, referral, and coordination with other agencies when appropriate.
- Update procedures and time periods for appeals of denials of requests.
- Notify requesters of their right to seek dispute resolution services from the Office of Government Information Services.

Regulatory Procedures

Executive Order 12866, Regulatory Planning and Review, and Executive Order 13563, Improving Regulation and Regulatory Review

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule benefits the public and the United States Government by providing clear procedures for members of the public, contractors, and employees to follow with regard to the ABMC privacy program. This rule is not a significant regulatory action under E.O. 12866.

Executive Order 13771, Reducing Regulations and Controlling Regulatory Costs

This proposed rule is not expected to be subject to the requirements of E.O. 13771 (82 FR 9339, February 3, 2017) because this proposed rule is not significant under E.O. 12866.

Unfunded Mandates Reform Act

This rule will not result in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more in any one year, and it will not significantly or uniquely affect small governments.

Public Law 96–354, Regulatory Flexibility Act

The ABMC certifies this proposed rule is not subject to the Regulatory Flexibility Act (5 U.S.C. Ch. 6) because it would not, if promulgated, have a significant economic impact on a substantial number of small entities. Therefore, the Regulatory Flexibility Act, as amended, does not require ABMC to prepare a regulatory flexibility analysis.

Executive Order 13132, Federalism

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct requirement costs on State and local governments, preempts State law, or otherwise has Federalism implications. This rule will not have a substantial effect on the States; the relationship between the National Government and the States; or the distribution of power and responsibilities among the various levels of Government.

Public Law 96–511, Paperwork Reduction Act

It has been determined that this rule does not impose reporting or record keeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Dated: February 10, 2020.

Robert J. Dalessandro,

Deputy Secretary, ABMC.

List of Subjects in 36 CFR Part 404

Freedom of Information Act.

For the reasons stated in the preamble, ABMC proposes to revise 36 CFR part 404 to read as follows:

Title 36: Parks, Forests, and Public Property

PART 404—PROCEDURES AND GUIDELINES FOR COMPLIANCE WITH THE FREEDOM OF INFORMATION ACT

Sec

Authority: FOIA Improvement Act of 2016, Pub. L. 114–185, 5 U.S.C. 552 note.

§ 404.1 General.

This information is furnished for the guidance of the public and in compliance with the requirements of the Freedom of Information Act (FOIA), 5 U.S.C. 552, as amended. Nothing in this subpart shall be construed to entitle any person to any service or to the disclosure of any record to which such person is not entitled under the FOIA. These rules should be read in conjunction with the text of the FOIA and the Uniform Freedom of Information Fee Schedule and Guidelines published by the Office of Management and Budget (''OMB Guidelines'').

§ 404.2 Authority and functions.

The general functions of the American Battle Monuments Commission (ABMC or Commission), as provided by statute, 36 U.S.C. 2101 *et seq.,* are to build and maintain suitable memorials commemorating the service of American Armed Forces and to maintain permanent American military cemeteries in foreign countries.

§ 404.3 Organization.

(a) *Personnel.* (1) The Commission is composed of not more than 11 members appointed by the President.

(2) The day to day operation of the Commission is under the direction of a Secretary appointed by the President.

(3) Principal officials subordinate to the Secretary include the Deputy Secretary, Chief Operating Officer, Chief of Staff, Executive Officer, Chief Financial Officer, Chief of Human Resources and Administration, Chief Information Officer, Director of Cemetery Operations, Executive Engineer, General Counsel, and Public Affairs Officer.

(4) The Commission also creates temporary offices when tasked with

major additional responsibilities not of a permanent nature.

(b) *Locations.* (1) The principal office of the American Battle Monuments Commission is located at 2300 Clarendon Boulevard, Suite 500, Arlington, VA 22201, (703) 696–6900.

(2) The American Battle Monuments Commission maintains an overseas field office in Paris, France, and cemetery offices at 25 locations in Belgium, France, Italy, Luxembourg, Mexico, the Netherlands, Panama, the Philippines, Tunisia, and the United Kingdom.

§ 404.4 Access to information.

(a) *Contact information.* (1) Individuals wishing to file a request under the Freedom of Information Act (FOIA) should address their request in writing to the FOIA Office, American Battle Monuments Commission, 2300 Clarendon Boulevard, Suite 500, Arlington, VA 22201, or to *FOIA@abmc.gov,* or via *https://www.foia.gov.*

(2) The American Battle Monuments Commission makes available information pertaining to Commission matters within the scope of 5 U.S.C. 552(a)(2), including records that have been requested three or more times, by publishing them electronically at the ABMC home page at *https://www.abmc.gov/foia.* Additional information may be found on the National FOIA Portal at *https://www.foia.gov. Note:* The *ABMC.gov* site provides all of the information the Commission has regarding burials at its cemeteries. ABMC does not have service records, casualty lists, or information on burials within the United States.

(b) *Requests.* (1) Requesters must provide contact information, such as their phone number, email address, and/or mailing address, to assist ABMC in communicating with them and providing released records.

(2)(A) Requests for records must reasonably describe the records sought. Requesters must describe the records sought in sufficient detail to enable agency personnel to locate them with a reasonable amount of effort. To the extent possible, requesters should include specific information that may help ABMC identify the requested records, such as the date, title or name, author, recipient, subject matter, case number, file designation, or reference number. Before submitting their requests, requesters may contact the ABMC FOIA Assistant or FOIA Public Liaison to discuss the records they seek and to receive assistance in describing the records.

(B) If a request does not reasonably describe the records sought, response to the request may be delayed. If, after receiving a request, ABMC determines that the request does not reasonably describe the records sought, ABMC must inform the requester what additional information is needed or why the request is otherwise insufficient. Requesters who are attempting to reformulate or modify such a request may discuss their request with the FOIA Assistant or FOIA Public Liaison.

(3) Requests may specify the preferred form or format (including electronic formats) for the records sought. ABMC will accommodate the request if the record is readily reproducible in that form or format.

(c) *Responses to requests.* (1) The ABMC FOIA Office is responsible for responding to FOIA requests. Upon receipt of any perfected request for records, the FOIA Office will determine within 20 days (excepting Saturdays, Sundays and legal public holidays) of the date the request is received in the FOIA Office whether it is appropriate to grant the request and will immediately provide written notification to the person making the request.

(2) ABMC responds to requests in the order of receipt, using multitrack processing. Tracks include simple, and complex, based on whether unusual circumstances apply (see paragraph (d) of this section), the volume of potential records, the need for consultation or referral, and the amount of work or time needed to process the request.

(3) ABMC will acknowledge requests with a tracking number, summary of the request, estimated completion dates, track information, the opportunity to narrow or modify the scope, and contact information for the FOIA Public Liaison.

(4) In determining which records are responsive to a request, ABMC ordinarily will include only records in its possession as of the date that it begins its search. If any other date is used, ABMC must inform the requester of that date.

(d) *Extending time limits.* If the ABMC FOIA Office determines that unusual circumstances apply to the processing of a request, and provides timely written notice to the requester, ABMC may extend the time limits prescribed in paragraphs (c) and (h) of this section for not more than 10 days (excepting Saturdays, Sundays, or legal public holidays). Where unusual circumstances merit an extension of more than 10 working days, ABMC will provide the requester with an opportunity to modify the request or arrange an alternative time period for processing the original or modified request.

(1) As used herein, but only to the extent reasonably necessary to the proper processing of the particular request, the term unusual circumstances means:

(A) The need to search for and collect the requested records from establishments that are separated from the office processing the request;

(B) The need to search for, collect, and appropriately examine a voluminous amount of separate and distinct records which are demanded in a single request; or

(C) The need for consultation, which shall be conducted with all practicable speed, with another agency having a substantial interest in the determination of the request or among two or more components of the agency which have a substantial subject matter interest therein.

(2) Extensions will be by written notice to the persons making the request. The notice of extension will set forth the reasons for the extension and the date the determination is expected, and will notify the requester of the right to seek assistance from ABMC's FOIA Public Liaison to resolve any disputes between the requester and ABMC, or to seek dispute resolution services from the Office of Government Information Services.

(3) Modification and aggregation of requests. Before issuing a written notice extending time limits, the agency shall provide the person an opportunity to limit the scope of the request so that it may be processed within that time limit or an opportunity to arrange with the agency an alternative time frame for processing the request or a modified request.

(4) When ABMC reasonably believes that a requester, or a group of requestors acting in concert, has submitted requests that constitute a single request, involving clearly related matters, ABMC may aggregate those requests for purposes of this paragraph. One element to be considered in determining whether a belief would be reasonable is the time period over which the requests have occurred.

(5) If ABMC fails to comply with the extended time limit, it may not charge search fees (or for requesters with preferred fee status, may not charge duplication fees), except if unusual circumstances apply and more than 5000 pages are necessary to respond to the request, ABMC may charge search fees (or, for requesters in preferred fee status, may charge duplication fees) *if* timely written notice has been made to the requester and ABMC has discussed with the requester (or made not less than 3 good-faith attempts to do so) how the requester could effectively limit the scope of the request.

(6) If a court determines that exceptional circumstances exist, ABMC's failure to comply with a time limit shall be excused for the length of time provided by the court order. Refusal by the person to reasonably modify the request or arrange such an alternative time frame shall be considered as a factor in determining whether exceptional circumstances exist.

(e) *Consultation, referral, and classified information.* When reviewing records located in response to a request, ABMC will determine whether another agency of the Federal Government is better able to determine whether the record is exempt from disclosure under the FOIA. As to any such record, the ABMC must proceed in one of the following ways:

(1) Consultation. When ABMC records contain within them information of interest to another agency, ABMC should typically consult with that other agency prior to making a release determination.

(2) Referral. When an ABMC record originated with a different agency or contains significant information that originated with a different agency, or when ABMC believes that a different agency is best able to determine whether to disclose a record, ABMC typically should refer the responsibility for responding to the request regarding that record to that agency. When ABMC refers any part of the responsibility for responding to a request to another agency, it must document and maintain a copy of the record, and notify the requester of the referral, informing the requester of the name of the agency and FOIA contact information.

(3) Classified information. On receipt of any request involving classified information, ABMC must determine whether the information is currently and properly classified in accordance with applicable classification rules. ABMC must refer the responsibility for responding to the request regarding that information to the agency that classified the information, or that should consider the information for classification.

(f) *Expedited processing.* (1) Requests and appeals will be taken out of order and given expedited treatment whenever it is determined that they involve:

(i) Circumstances in which the lack of expedited treatment could reasonably be expected to pose an imminent threat to the life or physical safety of an individual;

(ii) An urgency to inform the public about an actual or alleged federal government activity, beyond the public's right to know about government activity generally, if made by a person primarily engaged in disseminating information;

(iii) The loss of substantial due process rights; or

(iv) A matter of widespread and exceptional media interest in which there exist possible questions about the government's integrity which affect public confidence.

(2) A request for expedited processing may be made at the time of the initial request for records or at any later time. A request must include a statement, certified to be true and correct to the best of that person's knowledge and belief, explaining in detail the basis for requesting expedited processing.

(3) Within 10 days of receipt of a request for expedited processing, ABMC will decide whether to grant it and will notify the requester of the decision. If a request for expedited treatment is granted, the request will be given priority and will be processed as soon as practicable. If a request for expedited processing is denied, any appeal of that decision will be acted on expeditiously.

(g) *Grants and denials of requests.* (1) Once ABMC determines it will grant a request in full or in part, it shall notify the requester in writing. ABMC must also inform the requester of any fees charged under § 10 of this subpart and must disclose the requested records to the requester promptly upon payment of any applicable fees. ABMC must inform the requester of the availability of its FOIA Public Liaison to offer assistance.

(2) ABMC may provide interim releases for voluminous requests.

(3) If ABMC determines that a full disclosure of a requested record is not possible, it will consider whether partial disclosure of information is possible. Records disclosed in part will be marked clearly to show the amount of information deleted and the exemption under which the deletion was made, unless doing so would harm an interest protected by an applicable exemption. The location of the information deleted will also be indicated on the record, if technically feasible.]

(4) If the request is denied, in part or in full, the written notification to the requester shall include the reasons for the denial and the estimated volume withheld (unless indicated via markings, or if providing such an estimate would harm an interest protected by an exemption). The notification must inform the requester of:

(i) The requester's right to seek assistance from ABMC's FOIA Public Liaison;

(2) The requester's right to lodge an appeal with ABMC within 90 days after the date of the denial; and

(3) The requester's right to seek dispute resolution services from the Office of Government Information Services (OGIS).

(h) *Appeals.* Appeals shall be set forth in writing within 90 days of receipt of a denial and addressed to the FOIA Office at the address specified in paragraph (a) of this section. The appeal should clearly identify the agency determination that is being appealed and the assigned request number. To facilitate handling, the requester should mark both the appeal letter and envelope, or subject line of the electronic transmission, ''Freedom of Information Act Appeal.'' The appeal shall include a statement explaining the basis for the appeal. Appeals will be adjudicated by the ABMC Secretary, or his designee, and the adjudication will be set forth in writing within 20 days of receipt of the appeal in the ABMC FOIA Office (excepting Saturdays, Sundays, and legal public holidays). If, on appeal, the denial is upheld in whole or in part, the written determination will also contain a notification of the provisions for judicial review and contact information for OGIS dispute resolution services. An appeal ordinarily will not be adjudicated if the request becomes a matter of FOIA litigation.

§ 404.5 Inspection and copying.

When a request for information has been approved pursuant to § 404.4, the person making the request may make an appointment to inspect or copy the materials requested during regular business hours by writing or telephoning the FOIA Officer at the address or telephone number listed in § 404.4(b). Such materials may be copied and reasonable facilities will be made available for that purpose. Copies of individual pages of such materials will be made available at the price per page specified in § 404.7(d); however, the right is reserved to limit to a reasonable quantity the copies of such materials which may be made available in this manner when copies also are offered for sale by the Superintendent of Documents.

§ 404.6 Definitions.

For the purpose of these regulations:

(a) All the terms defined in the Freedom of Information Act apply.

(b) The term *direct costs* means those expenditures that ABMC actually incurs in searching for and duplicating (and in the case of commercial requesters, reviewing) documents to respond to a FOIA request. Direct costs include, for

example, the salary of the employee performing work (the basic rate of pay for the employee plus 16 percent of that rate to cover benefits) and the cost of operating duplicating machinery. Not included in direct costs are overhead expenses such as costs of space, and heating or lighting the facility in which the records are stored.

(c) The term *search* means the process of looking for and retrieving records or information responsive to a request. It includes page-by-page or line-by-line identification of information within records and also includes reasonable efforts to locate and retrieve information from records maintained in electronic form or format. ABMC employees should ensure that searching for material is done in the most efficient and least expensive manner so as to minimize costs for both the agency and the requester. For example, employees should not engage in line-by-line search when merely duplicating an entire document would prove the less expensive and quicker method of complying with a request. Search should be distinguished, moreover, from review of material in order to determine whether the material is exempt from disclosure (see paragraph (f) of this section).

(d) The term *duplication* means the making of a copy of a document, or of the information contained in it, necessary to respond to a FOIA request. Such copies can take the form of paper, microform, audio-visual materials, or electronic records (*e.g.,* magnetic tape or disk), among others. The requester's specified preference of form or format of disclosure will be honored if the record is readily reproducible in that format.

(e) The term *review* refers to the process of examining documents located in response to a request to determine whether any portion of any document located is permitted to be withheld. It also includes processing any documents for disclosure, *e.g.,* doing all that is necessary to excise them and otherwise prepare them for release. Review does not include time spent resolving general legal or policy issues regarding the application of exemptions.

(f) The term *commercial use request* refers to a request from or on behalf of one who seeks information for a use or purpose that furthers the commercial, trade, or profit interests of the requester or the person on whose behalf the request is made. In determining whether a requester properly belongs in this category, ABMC must determine the use to which a requester will put the documents requested. Moreover, where an ABMC employee has reasonable cause to doubt the use to which a requester will put the records sought, or where that use is not clear from the request itself, the employee should seek additional clarification before assigning the request to a specific category.

(g) The term *educational institution* refers to a school that operates a program of scholarly research. A requester in this fee category must show that the request is made in connection with his or her role at the educational institution. Agencies may seek verification from the requester that the request is in furtherance of scholarly research and agencies will advise requesters of their placement in this category.

(h) The term *non-commercial scientific institution* refers to an institution that is not operated on a commercial basis (as that term is referenced in paragraph (g) of this section), and that is operated solely for the purpose of conducting scientific research the results of which are not intended to promote any particular product or industry.

(i) The term *representative of the news media* refers to any person or entity that gathers information of potential interest to a segment of the public, uses its editorial skills to turn the raw materials into a distinct work, and distributes that work to an audience. The term ''news'' means information that is about current events or that would be of current interest to the public. Examples of news media entities include television or radio stations that broadcast news to the public at large, and publishers of periodicals that disseminate ''news'' and make their products available through a variety of means to the general public, including news organizations that disseminate solely on the internet. ''Freelance'' journalists who demonstrate a solid basis for expecting publication through a news media entity will be considered as a representative of the news media. A publishing contract would provide the clearest evidence that publication is expected; however, agencies can also consider a requester's past publication record in making this determination. Agencies will advise requesters of their placement in this category. A request for records supporting the news-dissemination function of the requester will not be considered to be for a commercial use.

§ 404.7 Fees to be charged—general.

ABMC shall charge fees that recoup the full allowable direct costs it incurs. ABMC will collect all applicable fees before sending copies of records to the requester. Moreover, it shall use the most efficient and least costly methods to comply with requests for documents made under the FOIA. ABMC may recover the cost of searching for and reviewing records even if there is ultimately no disclosure of records.

(a) *Manual searches for records.* ABMC will charge at the salary rate(s) (*i.e.,* basic pay plus 16 percent) of the employee(s) making the search.

(b) *Computer searches for records.* ABMC will charge at the salary rate(s) (*i.e.,* basic pay plus 16 percent) of the employee(s) making the search. Before assessing fees associated with creating a new computer program, ABMC will ensure that requester is first notified and agrees to pay such fees, pursuant to sub-paragraph (g)(3) of this section.

(c) *Review of records.* Only requesters who are seeking documents for commercial use may be charged for time spent reviewing records to determine whether they are exempt from mandatory disclosure. Charges may be assessed only for the initial review; *i.e.,* the review undertaken the first time ABMC analyzes the applicability of a specific exemption to a particular record or portion of a record. Records or portions of records withheld in full under an exemption that is subsequently determined not to apply may be reviewed again to determine the applicability of other exemptions not previously considered. The costs for such a subsequent review is assessable.

(d) *Duplication of records.* Records will be duplicated at a rate of $.10 per page. For copies prepared by computer, such as tapes or printouts, ABMC shall charge the actual cost, including operator time, of production of the tape or printout. For other methods of reproduction or duplication, ABMC will charge the actual direct costs of producing the document(s). If ABMC estimates that duplication charges are likely to exceed $25, it shall notify the requester of the estimated amount of fees, unless the requester has indicated in advance his willingness to pay fees as high as those anticipated. Such a notice shall offer a requester the opportunity to confer with agency personnel with the object of reformulating the request to meet his or her needs at a lower cost.

(e) *Other charges.* (1) When it elects to charge them, ABMC will recover the full costs of providing services such as certifying that records are true copies or sending records by special methods such as express mail.

(2) For requests that require the retrieval of records stored by an agency at a Federal records center operated by the National Archives and Records Administration (NARA), ABMC will

charge additional costs in accordance with the Transactional Billing Rate Schedule established by NARA.

(f) *Payment of fees.* Remittances shall be in the form either of a personal check or bank draft drawn on a bank in the United States, or a postal money order. Remittances shall be made payable to the order of the Treasury of the United States and mailed to the FOIA Officer, American Battle Monuments Commission, 2300 Clarendon Blvd., Suite 500, Arlington, VA 22201. A receipt for fees paid will be given upon request.

(g) *Restrictions on assessing fees.* With the exception of requesters seeking documents for a commercial use, ABMC will provide the first 100 pages of duplication and the first 2 hours of search time without charge. Moreover, ABMC will not charge fees to any requester, including commercial use requesters, if the cost of collecting a fee would be equal to or greater than the fee itself.

(1) The elements to be considered in determining the cost of collecting a fee are the administrative costs of receiving and recording a requester's remittance, and processing the fee for deposit in the Treasury Department's special account.

(2) For purposes of these restrictions on assessment of fees, the word *pages* refers to paper copies of 8½ x 11 or 11 x 14. Thus, requesters are not entitled to 100 microfiche or 100 computer disks, for example. A microfiche containing the equivalent of 100 pages or 100 pages of computer printout, does meet the terms of the restriction.

(3) Similarly, the term *search time* in this context has as its basis, manual search. To apply this term to searches made by computer, ABMC will determine the hourly cost of operating the central processing unit and the operator's hourly salary plus 16 percent. When the cost of search equals the equivalent dollar amount of two hours of the salary of the person performing the search, *i.e.,* the operator, ABMC will begin assessing charges.

§ 404.8 Fees to be charged—categories of requesters.

For purposes of assessing fees, the FOIA establishes four categories of requesters: Commercial use requesters, educational and non-commercial scientific institution requesters; news media requesters, and all other requesters.

(a) *Commercial use requesters.* When ABMC receives a request for documents for commercial use, it will assess charges that recover the full direct costs of searching for, reviewing for release, and duplicating the records sought. Commercial use requesters are not entitled to 2 hours of free search time nor 100 free pages of reproduction of documents.

(b) *Educational and noncommercial scientific institution requesters.* Requesters in this category who meet the criteria in § 404.6(g) or (h) are entitled to two free hours of search time and the first 100 pages of duplication without charge. To be eligible for inclusion in this category, a requester must show that the request is authorized by and under the auspices of a qualifying institution and that the records are not sought for a commercial use, but are sought in furtherance of scholarly (if the request is from an educational institution) or scientific (if the request is from a non-commercial scientific institution) research.

(c) *Requesters who are representatives of the news media.* Requesters in this category who meet the criteria in § 404.6(i) are entitled to two free hours of search time and the first 100 pages of duplication without charge. To be eligible for inclusion in this category, a requester must show that the records are not sought for a commercial use, but are sought in furtherance of the news dissemination function of the requester.

(d) *All other requesters.* ABMC shall charge requesters who do not fit into any of the categories above fees that recover the full reasonable direct cost of searching for and reproducing records that are responsive to the request, except that the first 100 pages of reproduction and the first 2 hours of search time shall be furnished without charge.

§ 404.9 Miscellaneous fee provisions.

(a) *Charging interest—notice and rate.* ABMC may begin assessing interest charges on an unpaid bill starting on the 31st day following the day on which the billing was sent. The fact that the fee has been received by ABMC within the 30-day grace period, even if not processed, will suffice to stay the accrual of interest. Interest will be at the rate prescribed in 31 U.S.C. 3717 and will accrue from the date of the billing.

(b) *Charges for unsuccessful search.* ABMC may assess charges for time spent searching, even if it fails to locate the records or if records located are determined to be exempt from disclosure. If ABMC estimates that search charges are likely to exceed $25, it shall notify the requester of the estimated amount of fees, unless the requester has indicated in advance his willingness to pay fees as high as those anticipated. Such a notice shall offer the requester the opportunity to confer with agency personnel with the object of reformulating the request to meet his or her needs at a lower cost.

(c) *Aggregating requests.* A requester may not file multiple requests at the same time, each seeking portions of a document or documents, solely in order to avoid payment of fees. When ABMC reasonably believes that a requester, or a group of requestors acting in concert, has submitted requests that constitute a single request, involving clearly related matters, ABMC may aggregate those requests and charge accordingly. One element to be considered in determining whether a belief would be reasonable is the time period over which the requests have occurred.

(d) *Advance payments.* ABMC may not require a requester to make an advance payment, *i.e.,* payment before work is commenced or continued on a request, unless:

(1) ABMC estimates or determines that allowable charges that a requester may be required to pay are likely to exceed $250. Then, ABMC will notify the requester of the likely cost and obtain satisfactory assurance of full payment where the requester has a history of prompt payment of FOIA fees, or require an advance payment of an amount up to the full estimated charges in the case of requesters with no history of payment; or

(2) A requester has previously failed to pay a fee charged in a timely fashion (*i.e.,* within 30 days of the date of the billing). Then, ABMC may require the requester to pay the full amount owed plus any applicable interest as provided above or demonstrate that he or she has, in fact, paid the fee, and to make an advance payment of the full amount of the estimated fee before the agency begins to process a new request or a pending request from that requester.

(3) When ABMC acts under paragraph (d)(1) or (2) of this section, the administrative time limits prescribed in the FOIA, 5 U.S.C. 552(a)(6) (*i.e.,* 20 working days from receipt of initial requests and 20 working days from receipt of appeals from initial denial, plus permissible extensions of these time limits), will begin only after ABMC has received fee payments described in paragraphs (d)(1) and (2) of this section.

(e) *Effect of the Debt Collection Act.* ABMC will comply with provisions of the Debt Collection Act of 1982 (Pub. L. 97–365), including disclosure to consumer reporting agencies and use of collection agencies, where appropriate, to encourage repayment.

(e) *Tolling.* If the requester has indicated a willingness to pay some designated amount of fees, but the ABMC estimates that the total fee will exceed that amount, ABMC will toll the

processing of the request when it notifies the requester of the estimated fees in excess of the amount the requester has indicated a willingness to pay. The agency will inquire whether the requester wishes to revise the amount of fees the requester is willing to pay or modify the request. Once the requester responds, the time to respond will resume from where it was at the date of the notification.

(f) *Reducing costs.* At any time a request may contact the ABMC FOIA Public Liaison or other FOIA professional to assist in reformulating a request to meet the requester's needs at a lower cost.

§ 404.10 Waiver or reduction of charges.

Requesters may seek a waiver of fees by submitting a written application demonstrating how disclosure of the requested information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government and is not primarily in the commercial interest of the requester.

(a) ABMC will waive its fees in whole or in part when it determines, based on all available information, that the following factors are satisfied:

(1) Disclosure of the requested information will shed light on identifiable operations or activities of the Federal Government with a connection that is direct and clear, not remote or attenuated.

(2) The disclosure will contribute to the understanding of a reasonably broad audience of persons interested in the subject, as opposed to the individual understanding of the requester. ABMC will consider the requester's expertise in the subject area as well as the requester's ability and intention to effectively convey information to the public. ABMC will presume that a representative of the news media satisfies this consideration.

(3) The disclosure is not primarily in the commercial interest of the requester. Requesters will be given an opportunity to provide explanatory information regarding this consideration. ABMC ordinarily will presume that when a news media requester has satisfied factors in paragraphs (a)(1) and (a)(2) of this section, the request is not primarily in the commercial interest of the requester.

(b) Where only some of the records to be released satisfy the requirements for a waiver of fees, a waiver must be granted for those records.

(c) Requests for a waiver or reduction of fees should be made when the request is first submitted to the agency and should address the criteria referenced above. A requester may submit a fee waiver request at a later time so long as the underlying record request is pending or on administrative appeal. When a requester who has committed to pay fees subsequently asks for a waiver of those fees and that waiver is denied, the requester must pay any costs incurred up to the date the fee waiver request was received.

BILLING CODE 6120–01–P

POSTAL REGULATORY COMMISSION

39 CFR Chapter III

[Docket No. RM2020–4; Order No. 5422]

Amendments to Rules of Practice

AGENCY: Postal Regulatory Commission.

ACTION: Advanced notice of proposed rulemaking.

SUMMARY: The Commission seeks input from the public about what regulations promulgated by the Commission may be necessary to carry out certain statutory responsibilities related to the letter monopoly, specifically those instances where the letter monopoly does not apply to a mailpiece.

DATES: *Comments are due:* April 7, 2020.

ADDRESSES: For additional information, Order No. 5422 can be accessed electronically through the Commission's website at *https://www.prc.gov.* Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction

The Commission issues this advance notice of proposed rulemaking to seek input from the public about what regulations promulgated by the Commission may be necessary to carry out the requirements of 39 U.S.C. 601, ''Letters carried out of the mail,'' which, as explained in greater detail below, describes when the letter monopoly does not apply to a mailpiece.[1]

II. Background

The Postal Service has exclusive rights in the carriage and delivery of letters under certain circumstances. This letter monopoly is codified in the Private Express Statutes (PES), which are a group of civil and criminal statutes that make it unlawful for any entity other than the Postal Service to send or carry letters. *See* 18 U.S.C. 1693–1699; 39 U.S.C. 601–606.[2]

Section 601 provides specific instances (exceptions) where letters may be carried out of the mail (*i.e.,* not subject to the letter monopoly). These statutory exceptions include letters charged more than six times the current rate for the first ounce of a single-piece first class letter and letters weighing more than 12.5 ounces. *See* 39 U.S.C. 601(b)(1), (b)(2). A ''grandfather clause'' in Section 601(b)(3) also references exceptions from prior Postal Service policies and regulations. The statute also directs the Commission to promulgate any regulations necessary to carry out this section. *See* 39 U.S.C. 601(c).

Prior to the Postal Accountability and Enhancement Act (PAEA) of 2006, the Postal Service issued regulations to define and suspend the PES.[3] These regulations defined the crucial term ''letter'' as ''a message directed to a specific person or address and recorded in or on a tangible object,'' subject to several provisions. 39 CFR 310.1(a). The regulations also described several statutory exceptions to the letter monopoly, such as when the letter accompanies and relates to cargo or when a special messenger is used. *See* 39 CFR 310.3. In addition, the regulations describe administrative suspensions of the PES (39 CFR 310.1(a)(7) n.1, 320), including suspensions for certain data processing materials or for extremely urgent letters. *See* 39 CFR 320.2, 320.6. These regulations were originally promulgated by the Postal Service in 1974 and have been amended several times.[4] In 2003,

[1] The scope of this proceeding and inquiry does not extend to the mailbox monopoly (or mailbox rule), which grants the Postal Service the exclusive ability to deposit mailable matter in a letter box. See 18 U.S.C. 1725.

[2] Although these provisions of the U.S. Code are customarily referred to collectively as the ''Private Express Statutes,'' they do not all relate to private expresses or prohibit carriage of letters out of the mails.

[3] *See* Postal Accountability and Enhancement Act, Public Law 109–435, 120 Stat. 3198 (2006); *see also* 39 CFR 310, 320.

[4] *See* Comprehensive Standards for Permissible Private Carriage, 39 FR 33211 (Sept. 16, 1974).

the President's Commission on the United States Postal Service recommended that the scope of the letter monopoly should be clarified and periodically reviewed by a Postal Regulatory Board.[5]

In 2006, Congress passed PAEA to clarify the limited statutory exemptions to the monopoly.[6] In addition to adding price and weight limits as exceptions (601(b)(1), (b)(2)), Congress also added a ''grandfather clause'' in Section 601(b)(3) to authorize the continuation of private activities that the Postal Service had permitted by regulations to be carried out of the mail. The House Report on the PAEA explains that the clause protects mailers and private carriers who had relied upon the regulations adopted as of the date of the bill. *See id.* at 58. Congress also eliminated the Postal Service's authority to adopt any future regulations creating additional exceptions or defining the scope of the postal monopoly. *See* 39 U.S.C. 401(2), 404a(a)(1), 601. Congress instead gave the Commission the authority to promulgate ''any regulations necessary to carry out this section [601].'' [7] To date, the Commission has not promulgated any regulations pursuant to Section 601(c), and issues this advance notice of proposed rulemaking to explore potential options for doing so now.

III. Issues for Consideration

In the more than 45 years since the Postal Service initially promulgated its regulations, the postal industry has fundamentally changed. The Postal Service recently stated that the ''most significant competitor for First-Class Mail is digital communication, including electronic mail, and other digital technologies such as online bill payment and presentment.'' [8] The USPS Office of Inspector General also released a report citing electronic diversion as a key factor that has affected the First-Class Mail correspondence segment.[9]

Over time there have been several published reports discussing or evaluating the letter monopoly. In a 2007 report, the Federal Trade Commission stated that the monopoly should only be as broad as needed to satisfy the statutory requirement of universal service.[10] The Commission, in response to Section 702 of the PAEA, issued a report on Universal Postal Service and the Postal Monopoly, which traced the history of the monopoly to its current status.[11] The Government Accountability Office reported that narrowing the monopoly could decrease revenues and threaten the universal service obligation, but may also lead to greater efficiencies and innovation.[12] In 2018, the Task Force on the United States Postal System stated that the statutory monopoly business model is increasingly ineffective.[13] In particular, it explained that ''technological changes have significantly reduced the effectiveness of the statutory monopoly business model by undermining the historical barriers to market competition and product substitution.'' *Id.*

The Commission has generally discussed or acknowledged the letter monopoly when reviewing requests to modify the product lists. In such cases, the Commission must consider whether a product is covered by the monopoly. *See* 39 U.S.C. 3642(b)(2). For example, in Docket Nos. MC2012–14 and R2012–8, where the Commission approved a new product as a Market Dominant Negotiated Service Agreement, the Commission acknowledged, without considering the merits of, assertions by the Postal Service that a specific product is subject to the postal monopoly. Order No. 1448 at 6–7.

Specifically in dockets where the Postal Service seeks to classify a product as competitive, it often cites various statutory and regulatory exceptions to the monopoly. For example, in Docket No. MC2012–13, the Postal Service asserted that the contents of Parcel Post are outside the scope of the letter monopoly because: (1) Invoices or receipts accompanying merchandise mailed as Parcel Post are subject to the cargo exception in 39 CFR 310.3(a), (2) incidental, non-addressed, non-personalized advertising may be enclosed pursuant to 39 CFR 320.7, and (3) any letters enclosed would be permitted due to the price exception pursuant to 39 U.S.C. 601(b)(1). Order No. 1411 at 6–7. In another case, the Postal Service acknowledged that a sealed parcel could contain letter material and, therefore, stated it intended to raise prices consistent with 39 U.S.C. 601(b)(1) to avoid the application of the PES.[14] The Commission has acknowledged these past assertions.[15]

In Docket No. MC2013–57, several parties addressed whether the Round-Trip Mailer product, which consists of a round-trip mailing of a disc, was covered by the postal monopoly.[16] In particular, the parties disputed whether the content of the Round-Trip Mailer constitutes a ''letter'' that is subject to the Private Express Statutes. *Id.* Because of a finding on market power, the Commission did not rule on the merits of the monopoly issue. *Id.* at 56. However, the Commission noted that ''[t]he legal and policy issues surrounding the postal monopoly have far-reaching and important implications that go beyond the boundaries of this proceeding.'' *Id.* The Commission further stated that the ''issue may be appropriate for review in a separate proceeding.'' *Id.* The Commission believes it is now time for that separate proceeding.

With this background, the Commission issues this advance notice of proposed rulemaking to consider approaches to fulfilling its statutory

[5] Embracing the Future: Making the Tough Choices to Preserve Universal Mail Service, July 31, 2003, at 71. The President's Commission recommended ''transforming the narrowly focused Postal Rate Commission [ ] into an independent Postal Regulatory Board.'' *Id.* at XIII.

[6] *See* H.R. Rep. No. 109–66 (2005) part 1, at 57. Congress stated that ''the bill clarifies the scope of the statutory monopoly that historically has been defined solely by the [Postal Service].'' *Id.* at 58.

responsibilities under 39 U.S.C. 601(c), including considering whether changes are needed to the regulations concerning the letter monopoly or necessary to carry out Section 601.

The Commission is soliciting comments to identify issues that may be considered when developing regulations to implement 39 U.S.C. 601. *See* 39 U.S.C. 601(c). All relevant comments will be considered. However, the Commission is interested in comments on the following specific issues:

1. Are the statutory requirements of 39 U.S.C. 601(a) clear and concise, or are additional regulations necessary to carry out the intent of the statute?

2. Are the statutory requirements of 39 U.S.C. 601(b) clear and concise, or are additional regulations necessary to carry out the intent of the statute?

3. Is the scope of 39 U.S.C. 601(b)(3)—permitting that the carriage of letters out of the mail provided ''such carriage is within the scope of services described by regulations of the United States Postal Service (including, in particular, sections 310.1 and 320.2–320.8 of title 39 of the Code of Federal Regulations, as in effect on July 1, 2005) that purport to permit private carriage by suspension of the operation of this section (as then in effect)''—sufficiently clear and concise, or are additional regulations necessary to carry out the intent of the statute?

4. Do any terms that currently appear in 39 U.S.C. 601 require further definition?

5. Can consumers and competitors easily determine when a mailpiece is subject to monopoly protections?

6. What is the current effect of the letter monopoly on consumers, small businesses, and competitors?

7. Are the weight and/or price requirements found in 39 U.S.C. 601(b) still relevant?

8. Are the weight and/or price requirements found in 39 U.S.C. 601(b) applied uniformly?

9. Have there been any post-PAEA Postal Service regulations that appear to limit, expand, or otherwise affect the scope of the letter monopoly contrary to law?

10. Is the term ''letter'' clear and concise, or can any improvements be made to the definition? If so, please provide any proposed definitions and explain how the proposed definition may better implement the intent of Congress and affect the scope of the letter monopoly.

11. Do the current statutory and regulatory requirements correctly implement the intent of Congress and advance the public interest, or should consideration be given to any changes that may be implemented by regulation?

12. How might changes to the statutory and regulatory requirements regarding the scope of the letter monopoly affect the financial condition of the Postal Service, competitors of the Postal Service, users of the Postal Service, and/or the general public interest?

13. Are there any social, economic, technological, or other trends that should be taken into account by Congress in considering the scope of the monopoly?

14. Because the Commission is tasked with developing regulations to carry out 39 U.S.C. 601, to what extent should the Commission adopt regulations that replicate, in whole or in part, the Postal Service's regulations that appear at 39 CFR 310.1 and 320.2 through 320.8?

IV. Ordering Paragraphs

It is ordered:

1. Docket No. RM2020–4 is established for the purpose of considering amendments to the Code of Federal Regulations, title 39, chapter III, as discussed in this advance notice of proposed rulemaking.

2. Interested persons may submit comments no later than April 7, 2020.

3. Pursuant to 39 U.S.C. 505, Kenneth E. Richardson is appointed to serve as Public Representative in this proceeding.

4. The Secretary shall arrange for publication of this Order in the **Federal Register**.

By the Commission.

Erica A. Barker,

Secretary.

BILLING CODE 7710–FW–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R07–OAR–2020–0011; FRL–10005–43–Region 7]

Air Plan Approval; Missouri; Control of Nitrogen Oxide Emissions From Portland Cement Kilns

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve revisions to the Missouri State Implementation Plan (SIP) received on February 15, 2019. The submission revises a Missouri regulation that establishes nitrogen oxide (NO_X) control equipment and NO_X emission levels for Portland cement kilns. Specifically, the revisions add a definition, remove obsolete dates, update references to test methods, clarify rule language, remove unnecessary words, and make other minor edits. These revisions do not impact the stringency of the SIP and do not impact air quality. Approval of these revisions will ensure consistency between State and federally-approved rules.

DATES: Comments must be received on or before March 19, 2020.

ADDRESSES: You may send comments, identified by Docket ID No. EPA–R07–OAR–2020–0011 to *https://www.regulations.gov.* Follow the online instructions for submitting comments.

Instructions: All submissions received must include the Docket ID No. for this rulemaking. Comments received will be posted without change to *https://www.regulations.gov/,* including any personal information provided. For detailed instructions on sending comments and additional information on the rulemaking process, see the ''Written Comments'' heading of the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Tracey Casburn, Environmental Protection Agency, Region 7 Office, Air Quality Planning Branch, 11201 Renner Boulevard, Lenexa, Kansas 66219; telephone number (913) 551–7016; email address *casburn.tracey@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document ''we,'' ''us,'' and ''our'' refer to the EPA.

Table of Contents

I. Written Comments

Submit your comments, identified by Docket ID No. EPA–R07–OAR–2020–0011, at *https://www.regulations.gov.* Once submitted, comments cannot be edited or removed from *Regulations.gov.* The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the

official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.*

II. What is being addressed in this document?

The State revised title 10, division 10 of the code of state regulations, 10 CSR 10–6.380 ''Control of NO_X Emissions from Portland Cement Kilns'', which establishes NO_X control equipment and NO_X emission levels for Portland cement kilns. Specifically, the revisions add a definition, remove obsolete dates, update references to test methods, clarify rule language, remove unnecessary words, and make other minor edits. 10 CSR 10–6.380 is SIP approved in the Code of Federal Regulations at 40 CFR 52.1320(c). The State submitted its revisions to 10 CSR 10–6.380 to the EPA as a SIP revision on February 15, 2019. In this action, the EPA is proposing to approve the revisions. The revisions are administrative in nature and do not impact air quality. The EPA's analysis of the revisions can be found in the technical support document (TSD) included in this docket.

III. Have the requirements for approval of a SIP revision been met?

The State submission has met the public notice requirements for SIP submissions in accordance with 40 CFR 51.102. The submission also satisfied the completeness criteria of 40 CFR part 51, appendix V. The State provided public notice of the revisions from July 30, 2018, to September 6, 2018, and held a public hearing on August 30, 2018. The State received and addressed comments from the EPA. As explained in more detail in the TSD which is part of this docket, the SIP revision submission meets the substantive requirements of the CAA, including section 110 and implementing regulations.

IV. What action is the EPA taking?

The EPA is proposing to amend the Missouri SIP by approving the State's request to revise 10 CSR 10–6.380,''Control of NO_X Emissions From Portland Cement Kilns.'' Approval of these revisions will ensure consistency between State and federally-approved rules. The EPA has determined that these changes will not adversely impact air quality.

The EPA is processing this as a proposed action because we are soliciting comments on the action. Final rulemaking will occur after consideration of any comments.

V. Incorporation by Reference

In this rule, the EPA is proposing to include regulatory text that includes incorporation by reference. In accordance with the requirements of 1 CFR 51.5, the EPA is proposing to incorporate by reference the State's rule as described in the proposed amendments to 40 CFR part 52 set forth below. The EPA has made, and will continue to make, these materials generally available through *www.regulations.gov* and at the EPA Region 7 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

VI. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, if they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866.
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of the National Technology Transfer and Advancement Act (NTTA) because this rulemaking does not involve technical standards; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

The SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Nitrogen oxide, Portland cement kilns.

Dated: February 11, 2020.

James Gulliford,

Regional Administrator, Region 7.

For the reasons stated in the preamble, the EPA proposes to amend 40 CFR part 52 as set forth below:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart AA—Missouri

■ 2. In § 52.1320, the table in paragraph (c) is amended by revising entry ''10–6.380'' to read as follows:

§ 52.1320 Identification of plan.

[EPA–R09–OAR–2019–0632; FRL–10004–32–Region 9]

Delegation of New Source Performance Standards and National Emission Standards for Hazardous Air Pollutants for the States of Arizona and Nevada

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve updates to the Code of Federal Regulations delegation tables to reflect the current delegation status of New Source Performance Standards and National Emission Standards for Hazardous Air Pollutants in Arizona and Nevada.

DATES: Comments must be received by March 19, 2020.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R09–OAR–2019–0632 at *http://www.regulations.gov,* or via email to *buss.jeffrey@epa.gov.* For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* For either manner of submission, the EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, *etc.*) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Jeffrey Buss, EPA Region IX, (415) 947–4152, *buss.jeffrey@epa.gov.*

SUPPLEMENTARY INFORMATION: In the ''Rules and Regulations'' section of this **Federal Register**, the EPA is approving updates to the Code of Federal Regulations delegation tables to reflect the current delegation status of New Source Performance Standards and National Emission Standards for Hazardous Air Pollutants in Arizona and Nevada. We are approving these updates in a direct final action without prior proposal because we believe this action is not controversial. A detailed rationale for the approval is set forth in the direct final rule. If we receive adverse comments, however, we will publish a timely withdrawal of the direct final rule and address the comments in a subsequent final rule based on this proposed rule. Please note that if the EPA receives adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, the EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment.

We do not plan to open a second comment period, so anyone interested in commenting should do so at this time. If we do not receive adverse comments, no further activity is planned. For further information, see please see the direct final action.

Dated: December 23, 2019.

Elizabeth J. Adams,

Director, Air and Radiation Division, Region IX.

RIN 0938–AT86

Medicare Program; Medicare Secondary Payer and Certain Civil Money Penalties

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Proposed rule.

SUMMARY: This proposed rule would specify how and when CMS must calculate and impose civil money penalties (CMPs) when group health plan (GHP) and non-group health plan (NGHP) responsible reporting entities

(RREs) fail to meet their Medicare Secondary Payer (MSP) reporting obligations in any one or more of the following ways: When RREs fail to register and report as required by MSP reporting requirements; when RREs report as required, but report in a manner that exceeds error tolerances established by the Secretary of the Department of Health and Human Services (the Secretary); when RREs contradict the information the RREs have reported when CMS attempts to recover its payments from these RREs. This proposed rule would also establish CMP amounts and circumstances under which CMPs would and would not be imposed.

DATES: *Comment date:* To be assured consideration, comments must be received at one of the addresses provided below, no later than 5 p.m. on April 20, 2020.

ADDRESSES: In commenting, please refer to file code CMS–6061–P. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

You may submit comments in one of four ways (please choose only one of the ways listed).

1. *Electronically.* You may submit electronic comments on this regulation to *http://www.regulations.gov.* Follow the ''Submit a comment'' instructions.

2. *By regular mail.* You may mail written comments (one original and two copies) to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–6061–P, P.O. Box 8013, Baltimore, MD 21244–8013.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments (one original and two copies) to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–6061–P, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: Jacqueline Cipa, (410) 786–3259.

SUPPLEMENTARY INFORMATION: *Inspection of Public Comments:* All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following website as soon as possible after they have been received: *http://regulations.gov.* Follow the search instructions on that website to view public comments.

Comments received timely will be also available for public inspection as they are received, generally beginning approximately 3 weeks after publication of a document, at the headquarters of the Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, Maryland 21244, Monday through Friday of each week from 8:30 a.m. to 4 p.m. To schedule an appointment to view public comments, phone 1–800–743–3951.

I. Background

A. Imposition of Civil Money Penalties (CMPs)—Legislative Overview

In 1981, the Congress added section 1128A to the Social Security Act (the Act) (section 2105 of Pub. L. 97–35) to authorize the Secretary of Health and Human Services (the Secretary) to impose civil money penalties (CMPs) and assessments on certain health care facilities, health care practitioners, and other suppliers for noncompliance with rules of the Medicare and Medicaid programs. CMPs and assessments provide an enforcement tool for agencies to use to ensure compliance with statutory and regulatory requirements. These administrative penalties may be imposed in addition to potential criminal or civil penalties.

Since 1981, the Congress has increased both the number and the types of circumstances under which the Secretary may impose CMPs. Some CMP authorities address fraud, misrepresentation, or falsification, while others address noncompliance with programmatic or regulatory requirements. The Secretary has delegated the authority for certain provisions to either the Office of Inspector General (OIG) or Centers for Medicare & Medicaid Services (CMS). (See the October 20, 1994 notice, titled ''Office of Inspector General; Health Care Financing Administration; Statement of Organization, Functions, and Delegations of Authority,'' (58 FR 52967).) A summary of these CMP changes are discussed in this section of this proposed rule.

B. Legislative History

In 1980, the Congress added section 1862(b) of the Act, which defined when Medicare is the secondary payer to certain primary plans. These provisions are known as the Medicare Secondary Payer (MSP) provisions of the Act.

Section 1862(b) of the Act prohibits Medicare from making payment if payment has been made, or can reasonably be expected to be made by any of the following primary plans:

- Group Health Plans (GHPs).
- Workers' compensation plans.
- Liability insurance (including self-insurance).
- No-fault insurance.

Medicare may make conditional payments, subject to Medicare payment rules, in situations where workers' compensation, liability insurance (including self-insurance), or no-fault insurance has not made payment or cannot be expected to make payment promptly. See section 1862(b)(2)(A) of the Act. Any conditional payments that Medicare makes are subject to reimbursement from the primary plan. See section 1862(b)(2)(B) of the Act.

C. Legislative Provisions Regarding Mandatory Reporting Requirements

To enhance enforcement of the MSP provisions, section 111 of the Medicare, Medicaid, and SCHIP Extension Act of 2007 (MMSEA) (Pub. L. 110–173) added paragraphs (7) and (8) to section 1862(b) of the Act. These paragraphs established new mandatory reporting requirements regarding Medicare beneficiaries who have coverage under GHP arrangements as well as for Medicare beneficiaries who receive settlements, judgments, awards or other payment from liability insurance (including self-insurance), no-fault insurance, or workers' compensation (collectively referred to as Non-Group Health Plan, or NGHP). Sections 1862(b)(7)(A) and 1862(b)(8)(F) of the Act define those parties responsible for this reporting (collectively referred to as RREs); they are generally identified as group health insurers or third party administrators or both as well as NGHP applicable plans. RREs are currently required to submit coverage information for Medicare beneficiaries on a quarterly basis through an electronic file submission process that may vary depending upon the number of beneficiary records being reported or updated. This coverage information primarily consists of enough identifying information to uniquely identify the Medicare beneficiary and confirm their beneficiary status, as well as information about the nature of the coverage (such as GHP or NGHP, coverage effective dates, policy limits, settlement amounts, and so forth). These section 111 of MMSEA reporting provisions do not eliminate any other existing statutory provisions or

regulations. Further, these reporting provisions include authority for Medicare to impose CMPs against entities that fail to comply with the section 111 of MMSEA reporting requirements under section 1862(b)(7) or (b)(8) of the Act, and required that GHPs and NGHPs that fail to comply with these reporting requirements shall be subject to a CMP of up to $1,000 for each calendar day of noncompliance.

In 2013, Congress enacted the Medicare IVIG Access and Strengthening Medicare and Repaying Taxpayers Act of 2012 (the SMART Act, at SSA section 1862(b), and codified at 42 U.S.C. 1395(y)(b)(2). The SMART Act amended section 1862(b)(8)(E) of the Act, which includes the section 111 of MMSEA reporting requirements and describes the enforcement provisions for NGHPs that fail to comply with the reporting requirements. The SMART Act revised section 1862(b)(8)(E) of the Act to state that NGHP applicable plans that fail to comply with the reporting requirements *may* be subject to a civil money penalty of *up to* $1,000 for each calendar day of reporting noncompliance required of NGHP applicable plans under section 1862(b)(8)(E) of the Act. The SMART Act also added section 1862(b)(8)(I) of the Act, which specifically required rulemaking actions regarding the enforcement of CMP provisions under section 1862(b)(8)(E) of the Act.

We note that the SMART Act did not amend any CMP provisions for GHP arrangements that have reporting obligations under section 1862(b)(7) of the Act. Such GHP arrangements remain subject to *mandatory* CMPs of $1,000 per calendar day of noncompliance and per individual for whom submission of information was required. In addition, the SMART Act directed rulemaking for NGHP applicable plans regarding the imposition and non-imposition of CMPs.

We further note that the statutory language speaks to ''individuals,'' though there are situations described that are specifically applicable to Medicare beneficiaries; we have attempted to be consistent with the usage of this statutory terminology but use the term ''beneficiary'' where it is more appropriate.

D. Summary of Public Comments Received on the December 11, 2013 Advanced Notice of Proposed Rulemaking (ANPRM)

In accordance with the rulemaking directed by the SMART Act, on December 11, 2013 (78 FR 75304), we published an advance notice of proposed rulemaking (ANPRM) titled ''Medicare Secondary Payer and Certain Civil Money Penalties.'' The December 2013 ANPRM solicited public comment on specific practices for which CMPs may or may not be imposed for failure to comply with MSP reporting requirements for certain GHP and NGHP arrangements.

We received 34 timely pieces of correspondence in response to the December 2013 ANPRM. In this section of the proposed rule, we provide an analysis of the public comments received by subject area, with a focus on the most common issues raised, and briefly discuss how we propose to address the issues raised by commenters in response to the 2013 ANPRM in this proposed rule.

1. CMPs and ''Good Faith Efforts'' To Obtain Information To Report

Commenters suggested that CMS refrain from imposing CMPs where NGHPs with reporting obligations under section 1862(b)(8) of the Act make ''good faith efforts'' to obtain required information from individuals who are unwilling or unable to provide it. Some ''good faith efforts'' suggested included the following: (1) CMS could accept documentation signed by the individual stating that he, or she is either not a Medicare beneficiary, or will not provide the NGHP entity with his or her Social Security Number (SSN) (full SSN or last 5 digits); and (2) CMS could accept a judicial order establishing that the individual is not required to provide his or her Medicare Beneficiary Identifier (MBI) or SSN to the NGHP entity. We note that concerns about ''good faith efforts'' were received from the NGHP industry and not the GHP industry, which we believe is reflective of fundamental differences between the two industries and the relationships between those plans and the individuals in question. Our understanding is that NGHP applicable plans may be in an adversarial relationship at times with the reportable individual, whereas the reportable individual is typically the client of a GHP.

In response to the comments, we are proposing that we would not assess CMPs against NGHP entities where those entities make efforts as defined in this proposed rule to obtain necessary reporting information. NGHP entities would document their records with their efforts to obtain this reporting information, as we would retain the right to audit such documentation.

2. Determining Noncompliance

Most commenters suggested that ''noncompliance'' with CMS's reporting requirements include failure to—(1) report when an entity is required to report; (2) report all Medicare beneficiaries who are/were plan participants (GHP) or claimants (NGHP); and (3) report when medical care was either claimed or released (as a part of a settlement, judgment, award, or other payment). We generally agree with the suggested concepts and have incorporated them into section II. of this proposed rule involving these reporting requirements.

3. Amounts of CMPs

A number of commenters recommended developing a ''sliding scale'' or ''tiered'' CMP approach, based upon the requirement of the responsible reporting entity (RRE) to obtain the necessary reporting information from these entities. We considered the possibility of incorporating penalty tiers for NGHP entities that have reporting obligations under section 1862(b)(8) of the Act. However, we are not proposing to rely on the intent of the NGHP entity reporting. Instead, we are proposing that we would assign CMP amounts based on the number of times, meaning individuals, a particular entity fails to report, or fails to report correctly. We solicit comment on this proposal, as explained in section II. of this proposed rule.

4. Proposed ''Safe Harbors''

Many commenters suggested that CMS should establish a series of ''safe harbors'' that would preclude the assessment of a CMP. We note that multiple commenters were concerned about non-compliance due to technical issues and wished to define these myriad situations as ''safe harbors.'' In section II. of this proposed rule, we are proposing to employ tolerances related to submissions that contain certain types of errors or mistakes to address these comments, and to only consider performance against those tolerances over time so that a few poor submissions do not necessarily result in the imposition of a CMP. Multiple commenters were also concerned about their ability to obtain all of the required information for reporting and requested safe harbors for non-compliance due to non-cooperation on the part of the reportable individual. This situation has been addressed under ''good faith efforts'' in this section.

5. Develop an Appeals Process

A number of commenters suggested that CMS should develop a formal appeals process to provide entities with reporting obligations a formal structure in which to appeal any notice of a pending or imposed CMP. We would

expect that this proposed rule, once finalized, would comport with the appeals process as prescribed by 42 CFR 402.19 and set forth under 42 CFR part 1005. In broad terms, parties subject to CMP would receive formal written notice at the time penalty is proposed. The recipient would have the right to request a hearing with an Administrative Law Judge (ALJ) within 60 calendar days of receipt. Any party may appeal the initial decision of the ALJ to the Departmental Appeals Board (DAB) within 30 calendar days. The DAB's decision becomes binding 60 calendar days following service of the DAB's decision, absent petition for judicial review

6. Rule is Prospective

Many commenters suggested that the rule should be enforced prospectively only. We agree and would evaluate compliance based only upon files submitted by the RRE on or after the effective date of any final rule.

7. Statute of Limitations

Many commenters requested a statute of limitations on the imposition of CMPs. We agree and will apply the 5-year statute of limitations as required by 28 U.S.C. 2462. Under 28 U.S.C. 2462, we may only impose a CMP within 5 years from the date when the non-compliance was identified by CMS. An explanation and example of how this proposed statute of limitations would work for each of the three proposed types of CMPs is provided in this section of this rule.

For failure to report, the noncompliance occurs on every day of non-reporting after the required timeframe for reporting has elapsed:

If an RRE fails to report any beneficiary record as required beginning in 2023, and CMS identifies this non-compliance in 2024 but fails to take action until 2030, then no CMP would be imposed.

For responses to recovery efforts contradicting reporting, the noncompliance occurs when the response is received by CMS:

If in 2023 an RRE reported ongoing primary payment responsibility for a given beneficiary and then responded to recovery efforts 1 year later, in 2024, with an assertion that coverage for that beneficiary was actually terminated prior to the issuance of the recovery demand letter. If CMS fails to impose a CMP for this noncompliance within 5 years (no later than 2029), then no CMP would be imposed for this incident of noncompliance.

For situations where the reporter exceeds the error tolerance threshold, the noncompliance occurs at the end of the fourth consecutive reporting period over the 20 percent threshold (out of eight consecutive reporting periods):

If an RRE exceeds the error tolerance threshold in all four reporting periods of 2023 and then never exceeds the threshold again, it would normally be subject to a CMP. But if CMS fails to impose a CMP for this noncompliance within 5 years (no later than 2028), then no CMP would be imposed for this noncompliance.

We do appreciate the concerns raised by commenters and wish to reiterate that CMPs would only be imposed on a prospective basis.

8. Informal and Formal Notice

Many commenters requested that CMS explain how it will provide notice to entities regarding pending or imposed CMPs and how much information will be included.

We would expect to communicate with the entity informally before issuing formal notice regarding a CMP. Informal communications would depend upon the nature of the non-compliance. Regarding the potential imposition of CMPs on other grounds, CMS anticipates utilizing an informal (that is, prior to formal enforcement actions) written ''pre-notice'' process that would allow the RRE the opportunity to present mitigating evidence before the imposition of a CMP. Once we determine that a CMP will be imposed, we would provide formal notice to the entity in writing in accordance with 42 CFR 402.7, which would contain information on the reason for the assessment of a CMP, the amount of the CMP, and next steps for the entity, including appeal rights.

For example, we expect to continue to utilize the current messaging procedures around file errors described in the MMSEA Section 111 User Guides, which entail indicators on response files, emails, and phone calls depending upon the nature and severity of the error. RREs thus would remain informed about the performance of their quarterly file submissions. Upon the third submission out of seven consecutive reporting periods that exceeds error tolerances, the RRE would receive an ''informal notice'' that consists of a written warning letter (which requires no response, but is intended to warn the RRE that a subsequent submission that exceeds tolerances would result in potential CMP imposition). Upon the fourth submission out of eight consecutive reporting periods that exceeds error tolerances (and any additional triggering submissions), the RRE would receive another ''informal'' written notice of non-compliance indicating the nature of the non-compliance and the determination of the potential amount of the CMP, with 30 calendar days to respond with any mitigating information prior to the issuance of a notice of proposed determination in accordance with 42 CFR 402.7.

In the event that a CMP may be imposed for lack of timely reporting, CMS would issue an informal written notice of non-compliance, identifying the nature of the non-compliance and the determination of the potential amount of the CMP. The RRE would again have 30 calendar days to respond with mitigating information before the issuance of a written notice in accordance with 42 CFR 402.7.

Recovery demand letters would be revised to include information regarding the potential for CMPs should an RRE contradict its own reporting in the recovery process. If an RRE submits a dispute or redetermination request in response to the recovery process that appears to directly contradict its own reporting, an informal written notice of non-compliance identifying the nature of the non-compliance and the determination of the potential amount of the CMP would be issued to the RRE. The RRE would again have 30 calendar days to respond with mitigating information before the issuance of a written notice in accordance with 42 CFR 402.7.

9. Suspension of CMP Imposition Where Programmatic Changes Are Required

Commenters suggested that CMS consider suspending the imposition of CMPs, where changes to mandatory reporting procedure require RREs to make significant revisions to the systems used to prepare the data for reporting.

We would expect to continue to provide at least 6 months' (180 calendar days) notice regarding any changes in policy or procedure associated with section 111 of MMSEA required reporting to allow reporting entities adequate time to react. We would not assess any CMPs associated with a specific policy or procedural change for a minimum of two reporting periods following the implementation of that policy or procedural change.

10. Duplicative Reporting and CMPs

Commenters suggested that CMS should not impose CMPs in situations where required information has already been reported to another agency or entity, such as the Department of Labor, or in situations where multiple entities have obligations to report the same

information to CMS and one entity has already reported.

The reporting requirements established under sections 1862(b)(7) and (b)(8) of the Act imposed certain unique requirements on specific entities to report data to CMS for the purposes of identifying those situations where another party has primary payment responsibility. These reporting requirements were imposed under the Act, regardless of whether another agency or entity requires the same or similar data (and such data must also be reported to CMS in the manner and form specified by the Secretary). The current OMB control number assigned to this information collection effort, as required under the Paperwork Reduction Act, is 0938–1074.

11. Correct Coordination of Benefits and Recovery

Commenters suggested that CMS not impose CMPs when CMS has been able to coordinate benefits correctly or CMS has otherwise been able to recover.

The obligations to report under section 1862(b)(7) and (b)(8) of the Act are separate and distinct from any other obligation with respect to MSP. The fact that we may be able to correctly coordinate benefits and pursue recovery does not negate the obligations established under section 1862(b)(7) and (b)(8) of the Act.

II. Provisions of Proposed Regulations

We have reviewed the public comments in response to our December 11, 2013 ANPRM (78 FR 75304), and other policy considerations as discussed in section I.D. of this proposed rule. Accordingly, we are proposing specific criteria for when CMPs would be imposed and proposing specific criteria for when CMPs would not be imposed, in circumstances when a GHP or an NGHP entity fails to comply (either on its own or through a reporting agent) with MSP reporting requirements specified under section 1862(b)(7) and (b)(8) of the Act. We note that the proposed CMPs would be levied in addition to any MSP reimbursement obligations.

Further, we proposed to amend the amount of these CMPs, as set forth under 45 CFR 102.3 (Penalty adjustment and table).

A. CMP Bases and Scope

Section 402.1 describes the basis for imposition CMPs against parties who violate the provisions of the Act. We propose to add regulatory language under § 402.1(c), which would identify situations in which GHP entities and NGHP entities with RREs would be subject to CMPs under sections 1862(b)(7) and (b)(8) of the Act. To accomplish this regulatory addition, we are proposing the following regulatory revisions in § 402.1:

- Removing paragraph (c)(20).
- Redesignating paragraph (c)(21) as paragraph (c)(20).
- Redesignating paragraphs (c)(22) through (34) as paragraphs (c)(23) through (35).
- Adding new paragraphs (c)(21) and (22).

Section 402.105(b) establishes the amount of penalties assessed against parties who violate the provisions of the Act. The proposed regulation at § 402.105(b)(2) would establish the amount of penalties imposed against GHPs, and the proposed regulation at § 402.105(b)(3) would establish the amount of penalties imposed against NGHPs. The regulatory provisions proposed would amend § 402.105(b) by revising paragraph (b)(2) and adding a new paragraph (b)(3). The proposed regulatory changes would establish the amount of CMPs imposed in these situations.

In addition, we have revised the regulations at 45 CFR 102.3 to establish the updated amounts for all CMPs at issue in these and the impacted proposed regulations. The table in this section sets forth the changes described for these amounts.

B. CMP Imposition and Amounts

The proposed regulations at § 402.1(c) would identify circumstances where GHP entities and NGHP entities with RREs would be subject to CMPs for violation of sections 1862(b)(7) and (b)(8) of the Act. We may become aware of these violations through various means. Currently self-referral is the most common means by which RREs that have failed to properly register and report are identified, which we expect to continue. Following publication of the final rule, we will enhance monitoring of recovery process disputes and appeals that contradict reported data, as well as monitoring of the reported data and performance over time to identify reporting that exceeds error tolerances. The proposed regulations at § 402.105(b) would clarify how we would calculate CMP amounts for GHP and NGHP entities that have reporting obligations under sections 1862(b)(7) and (b)(8) of the Act. Furthermore, the proposed § 402.1(c) would identify situations where GHP and NGHP RREs would not be subject to CMPs for violation of section 1862(b)(7) and (b)(8) of the Act.

Under section 1862(b)(7) of the Act, a GHP RRE shall be subject to a CMP of $1,000 as adjusted annually under 45 CFR part 102 (currently $1,569 as of January 17, 2020; please see 85 FR 2869) for each calendar day of noncompliance for each individual for which the required information should have been submitted. Under section 1862(b)(8) of the Act, an NGHP RRE may be subject to a CMP of up to $1,000 (as adjusted annually under 45 CFR part 102) for each calendar day of noncompliance for each individual for which the required information should have been submitted. These CMPs would be in addition to any other penalties prescribed by law, and in addition to any MSP claim under section 1862(b) of the Act with respect to an individual.

1. Imposition of a CMP

We would impose a CMP in the following situations:

- If an RRE fails to report any GHP beneficiary record within the required timeframe (no more than 1 calendar year after GHP coverage effective date or the Medicare beneficiary's entitlement date, whichever is later). The penalty would be calculated on a daily basis, based on the actual number of individual beneficiaries' records that the entity submitted untimely (that is, beyond the required timeframe after the GHP MSP effective date). The penalty would be $1,000 (as adjusted annually under 45 CFR part 102) for each calendar day of noncompliance for each individual for which the required information should have been submitted, as counted from the day after the last day of the RRE's assigned reporting window where the information should have been submitted through the day that CMS received the information, up to a maximum penalty of $365,000 (as adjusted annually under 45 CFR part 102, currently $572,685) per individual per year.
- If an RRE fails to report any NGHP beneficiary record within the required timeframe (no more than 1 year of the date of the settlement, judgment, award, or other payment (also referred to as the Total Payment Obligation to Claimant (TPOC)). The penalty would be calculated on a daily basis, based on the actual number of individual beneficiaries' records that the entity submitted untimely (that is, in excess of the required timeframe after the TPOC date). The penalty would be up to $1,000 (as adjusted annually under 45 CFR part 102) for each calendar day of noncompliance for each individual for which the required information should have been submitted, as counted from the day after the last day of the RRE's assigned reporting window where the information should have been submitted through the day that CMS received the

information, up to a maximum penalty of $365,000 (as adjusted annually under 45 CFR part 102) per individual per year.

• If a GHP's or NGHP's response to CMS recovery efforts contradicts the entity's section 111 of MMSEA reporting. For example, if an RRE reported and repeatedly affirmed ongoing primary payment responsibility for a given beneficiary, then responded to recovery efforts with the assertion that coverage for that beneficiary actually terminated 2 years prior to the issuance of the recovery demand letter. The penalty would be calculated based on the number of calendar days that the entity failed to appropriately report updates to beneficiary records, as required for accurate and timely reporting under section 111 of MMSEA. For a GHP, the penalty would be $1,000 (as adjusted annually under 45 CFR part 102) for each calendar day of noncompliance for each individual for which the required information should have been submitted. For an NGHP, the penalty would be up to $1,000 (as adjusted annually under 45 CFR part 102) per calendar day of noncompliance for each individual, for a maximum annual penalty of $365,000 (as adjusted annually under 45 CFR part 102) for each individual for which the required information should have been submitted.

• If a GHP or NGHP entity has reported, and exceeds any error tolerance(s) threshold established by the Secretary in any 4 out of 8 consecutive reporting periods. We propose that the initial and maximum error tolerance threshold would be 20 percent (representing errors that prevent 20 percent or more of the beneficiary records from being processed), with any reduction in that tolerance to be published for notice and comment in advance of implementation. We intend for this tolerance to be applied as an absolute percentage of the records submitted in a given reporting cycle; we welcome feedback on this proposed methodology and threshold. The errors that would be used to determine whether the error tolerance is met must also be defined in advance of implementation of the final rule; we are only considering those significant errors which prevent a file or individual beneficiary record from processing. These errors are defined in the Section 111 User Guides, but we welcome the public's feedback. We would maintain the current notification process in place where RREs receive notice via response file and direct outreach (email and, in more serious cases, telephone call) when there are errors with their file submissions.

Although the Act indicates that CMPs are calculated based on the number of days of RRE noncompliance, RREs do not report on a daily basis and so non-conformance in this situation cannot be defined on a daily basis. Therefore under this proposed rule, an RRE is considered to be out of compliance for the entire reporting period when the RRE exceeds the error tolerance threshold. A reporting period is defined as one quarter (defined as 90 calendar days for the purposes of standardizing quarters). For a GHP entity, the penalty would be imposed if the GHP entity was determined to have exceeded the error tolerances(s) in the entity's fourth above-tolerance submission out of any eight consecutive reporting periods. The penalty would be $1,000 (as adjusted annually under 45 CFR part 102) for each calendar day of noncompliance for each individual for which the required information should have been submitted. An RRE is considered to be out of compliance for the entire reporting period when the error tolerance is exceeded; as previously noted, a reporting period is currently defined as one quarter (standardized to 90 calendar days). Therefore, the penalty for a non-compliant GHP would be $90,000 (as adjusted, currently $141,210) for each individual for which the required information should have been submitted, per reporting period where a CMP may be imposed.

For an NGHP entity, a CMP would be imposed on a tiered approach if the NGHP entity exceeded the error tolerance(s) in the entity's fourth above-tolerance submission. As with GHP entities, an NGHP entity is considered to be out of compliance for the entire reporting period when the error tolerance is exceeded; a reporting period is defined as one quarter, standardized to 90 calendar days. For the first level of this penalty (reflecting the fourth submission exceeding error tolerances in any of the previous eight consecutive reporting periods), we would impose a penalty of one quarter, or 25 percent, of the maximum penalty per individual record per calendar day of non-compliance (this maximum penalty is currently defined as $1,000, as adjusted annually under 45 CFR part 102) after the required date of submission (last calendar day of the NGHP's reporting period), based upon the number of beneficiaries whose records exceeded any error tolerance(s) established by the Secretary. In effect, $250 (as adjusted, currently $392) per calendar day, over the 90 calendar days of non-compliance for the full reporting period, per individual record. If the NGHP entity fails to comply again in the next consecutive reporting period, the amount of the penalty would increase to one half, or 50 percent, of the maximum penalty (currently defined as $1000, as adjusted annually under 45 CFR part 102) per beneficiary per calendar day of non-compliance. In effect, $500 (as adjusted, currently $785) per calendar day, over the 90 calendar days of non-compliance for the full reporting period, per individual record. If the NGHP entity fails to comply again in the next consecutive reporting period, the amount would increase again to three-quarters, or 75 percent, of the maximum penalty (currently defined as $1,000, as adjusted annually under 45 CFR part 102), and so on, up to the maximum penalty of $1,000 (as adjusted annually under 45 CFR part 102) per beneficiary per calendar day of non-compliance (in effect, $90,000 as adjusted, over the 90 calendar days of non-compliance for the full reporting period, per individual record). However, the potential penalty amount for the next penalty-eligible file would be reduced by one quarter (25 percent) of the maximum penalty of $1,000 (as adjusted annually under 45 CFR part 102) per individual record per calendar day of non-compliance for each immediately consecutive subsequent quarter of compliance where an NGHP entity reports after the assessment of a penalty and the entity remains below any error tolerances. Such reductions may accumulate for each subsequent reporting period where the entity remains below the error tolerance until the entity is once again at the minimum penalty of one quarter, or 25 percent, of the maximum penalty per individual record per calendar day of non-compliance.

The following chart depicts how the concept of ''any 4 out of the most recent 8 consecutive reporting periods'' would work. CMP amounts are used for illustration purposes only; all amounts should be assumed to be adjusted annually.

Example	Year 1				Year 2				Year 3				CMP Imposed
	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	
1	E	E	G	E	G	G	G	E	G	G	E	G	Q4 of Year 2.
2	E	E	G	G	G	G	E	G	G	G	E	E	No.
3	*	*	*	*	E	G	E	G	G	G	G	E	No.
4	*	*	*	E	E	G	G	E	G	G	E	E	Q3 and Q4 of Year 3.
5	*	E	G	E	G	E	G	E	G	E	G	G	Q4 of Year 2 and Q2 of Year 3.

Key: * = No File; E = Error Tolerance Exceeded; G = Good File.

The following explanations correlate to the examples depicted in this chart.

Example 1. CMP Imposed: Error tolerances exceeded in 4 out of 8 quarters as of year 2, quarter 4. As of year 3, quarter 3, there are only three out of eight quarters where submissions exceeded error tolerances, so no additional CMP would be imposed.

Example 2. No CMP Imposed: In no 8 sequential quarters were error tolerances exceeded 4 or more times.

Example 3. No CMP Imposed: In no 8 sequential quarters were error tolerances exceeded 4 or more times.

Example 4. CMP Imposed: Error tolerances were exceeded in 4 out of 8 quarters as of year 3, quarter 3. The subsequent submission (year 3, quarter 4) also exceeded error tolerances. According to the assessments proposed for GHP reporting entities, a GHP RRE would be assessed a CMP of $1,000 per calendar day for each individual for whom information should have been submitted. According to the tiered approach proposed for NGHP reporting entities discussed later, an NGHP RRE would be assessed a CMP of $250 per calendar day per for quarter 3 and $500 per beneficiary above the tolerance per calendar day for quarter 4.

Example 5. CMP Imposed: Error tolerances were exceeded in 4 out of 7 quarters by year 2, quarter 4. According to the assessments proposed for GHP reporting entities, a GHP RRE would be assessed a CMP of $1,000 per calendar day for each individual for whom information should have been submitted. According to the tiered approach proposed for NGHP reporting entities discussed later, an NGHP RRE would be assessed a CMP of $250 per calendar day per individual for whom information should have been submitted. Error tolerances were again exceeded in year 3, quarter 2. Because error tolerances were not exceeded in year 3, quarter 1, an NGHP RRE would only be assessed a CMP of $250 per calendar day per individual for whom information should have been submitted for year 3, quarter 2 instead of $500.

The following examples demonstrate how the concept of exceeding error tolerances in ''any 4 out of 8 consecutive reporting periods'' would work:

Example 1: The RRE, ABC Insurer, submitted a file for each quarter in Year 1 of its required submissions. For Year 1, quarters 1 and 2, ABC Insurer submitted files where the file submissions entirely failed processing (100 percent error rate), and thus the quarterly submissions exceeded the error rate tolerance. In quarter 3 of Year 1, ABC Insurer submitted a file with no serious errors that prevented the files from being processed. However, severe file errors again occurred in quarter 4 and 25 percent of its records failed. These errors were corrected by the RRE for the first quarter of Year 2. ABC Insurer continued to submit error-free files for quarter 2 and quarter 3 of Year 2. However, in quarter 4 of Year 2, 50 percent of the submitted records failed. CMS would impose a CMP because the error tolerances exceeded four out of the eight quarterly reporting periods as of quarter 4 of Year 2.

Example 2: In the first two quarters of Year 1, Acme Insurance submitted files with errors that prevented 30 percent of the records from processing (exceeding error tolerances for quarter 1 and quarter 2). The file submissions for the last two quarters of Year 1 and quarters 1 through 3 of Year 2 did not have any significant errors and did not exceed tolerances. However, quarter 4 of Year 2 saw a recurrence of serious errors and Acme Insurance again exceeded the error tolerance with 25 percent of its records failing to process. Quarters 1 and 2 of Year 3 did not exceed tolerances, but the third and fourth quarters of Year 3 again saw Acme Insurance exceed the error tolerance with 30 percent and 20 percent of its records failing to process, respectively. CMS would not impose a CMP as in no continuous eight reporting periods did Acme Insurance exceed error tolerance four or more times.

We are proposing a maximum 20 percent per file submission error tolerance. Any future modification to this error tolerance threshold will be subject to notice and comment. We would not consider submission errors that fall below this tolerance in determining the imposition of a potential CMP; we would continue to provide the response file that allows submitters to be aware of their performance. We have evaluated the historical error rates from RRE submissions and have determined that the vast majority of submitters are able to meet or exceed this initial minimum acceptable performance level. The 20 percent per file tolerance for errors would only include those errors and condition flags that are within the entities' direct control and cause CMS to be unable to process the individual beneficiary records or entire file submissions. The errors that would be used to determine whether the error tolerance is met shall also be defined a minimum of 6 months in advance of imposition of any CMP (after publication of the final rule) in the reporting User Guides and will be subject to notice and comment. We would only consider those significant errors which prevent a file or individual beneficiary record from processing, such as failure to provide an individual's last name or valid date of birth, or failure to provide a matching Tax Identification Number. Less serious errors, such as internal CMS processing errors, will continue to be noted on the response files, but will not be considered in determining compliance. We currently interact with RREs to inform them of errors with file submissions, between response files to email notifications to, in more severe situations, direct telephone outreach. Following publication of the final rule, we would implement a monitoring system but would continue to review submissions each reporting period to determine whether the entity has continued to exceed error tolerance(s) and preserve the notification apparatus currently in place. GHP and NGHP entities will continue to have penalties assessed for each reporting period, until the entity submits a file that does not exceed any error tolerance(s).

2. No CMP Imposed

We would not impose a CMP in the following situations, where all of the applicable conditions are met:

• If a RRE reports any GHP beneficiary record that is reported on a quarterly submission timeframe within the required timeframe (not to exceed 1 year after the GHP effective date), or any NGHP beneficiary record that is submitted within the required timeframe (not to exceed 1 year after the TPOC date).

• If an RRE complies with any TPOC reporting thresholds or any other reporting exclusions published in CMS's MMSEA Section 111 User Guides or otherwise granted by CMS. Note that these thresholds are not defined in the regulatory text as TPOC reporting thresholds are currently subject to change on an annual basis per 42 U.S.C. 1395(y)(b)(9)(i). CMS also elects to impose operational thresholds for reporting, such as the current $5,000 threshold for Health Reimbursement Arrangements.

• If a GHP entity or NGHP entity does not exceed any error tolerance(s) in any four out of eight consecutive reporting periods.

• If an NGHP entity fails to report required information because the NGHP entity was unable to obtain information necessary for reporting from the reportable individual, including an individual's last name, first name, date of birth, gender, MBI, or SSN (or the last 5 digits of the SSN), and the responsible applicable plan has made and maintained records of its good faith effort to obtain this information by taking *all* of the following steps:

++ The NGHP has communicated the need for this information to the individual and his or her attorney or other representative and requested the information from the individual and his or her attorney or other representative at least twice by mail and at least once by phone or other means of contact such as electronic mail in the absence of a response to the mailings.

++ The NGHP certifies that it has not received a response in writing, or has received a response in writing that the individual will not provide his or her MBI or SSN (or last 5 digits of his or her SSN).

++ The NGHP has documented its records to reflect its efforts to obtain the MBI or SSN (or the last 5 digits of the SSN) and the reason for the failure to collect this information.

The NGHP entity should maintain records of these good faith efforts (such as dates and types of communications with the individual) in order to be produced as mitigating evidence should CMS contemplate the imposition of a CMP. Such records must be maintained for a period of 5 years. The current OMB control number assigned to this information collection effort, as required under the Paperwork Reduction Act, is 0938–1074.

We solicit comments on our proposed approaches to imposing and not imposing CMPs, including our proposed methods of calculating CMP amounts, and our proposed error tolerance rates. Our proposed approach to imposing CMPs was developed to give entities meaningful opportunities to resolve most reporting issues, without the immediate risk that a CMP would be imposed.

III. Collection of Information Requirements

This document does not impose any new information collection and recordkeeping requirements that have not already been reviewed by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995.

IV. Responses to Comments

Because of the large number of public comments we normally receive on **Federal Register** documents, we are not able to acknowledge or respond to them individually. We will consider all comments we receive by the date and time specified in the ''DATES'' section of this preamble, and, when we proceed with a subsequent document, we will respond to the comments in the preamble to that document.

V. Regulatory Impact Statement

We have examined the impact of this rule as required by Executive Order 12866 on Regulatory Planning and Review (September 30, 1993), Executive Order 13563 on Improving Regulation and Regulatory Review (January 18, 2011), the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96–354), section 1102(b) of the Social Security Act, section 202 of the Unfunded Mandates Reform Act of 1995 (March 22, 1995; Pub. L. 104–4), Executive Order 13132 on Federalism (August 4, 1999), the Congressional Review Act (CRA) (5 U.S.C. 804(2)), and Executive Order 13771 on Reducing Regulation and Controlling Regulatory Costs (January 30, 2017).

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). A detailed regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects ($100 million or more in any 1 year). Estimating the economic effects of this rule presents a significant challenge under current circumstances. At this point in time, the reporting program has not yet reached a level of maturity where we have definitively identified any additional RREs that have failed to register and report as required. We have purposely selected an error tolerance threshold (20 percent) that is achievable for all current RREs based on recent performance, and thus would not impose any CMPs based on current performance. However, we do not yet have eight consecutive reporting periods of data, and, as such, we are not able to currently model the potential imposition of CMPs on this basis at this time. We also do not have the systems in place at this time to monitor when entities contradict their reported data in response to CMS MSP recovery efforts. At this point in time, we do not expect to collect CMPs totaling $100 million or more in any given year, nor do we expect this rule to have any other economic effects that meet or exceed that threshold. Therefore, this rule is not considered a major rule under the CRA. We note that we are currently implementing monitoring systems that will allow us to better model future reporting violations and CMP imposition. Therefore, when we are ready to develop the final rule we expect to have available a significantly increased array of relevant data. As a result, we commit to providing a detailed analysis of the costs and benefits of this rule at that time. We also invite feedback from the public that would assist us in determining the quantifiable costs and benefits of this proposed rule.

The RFA requires agencies to analyze options for regulatory relief of small entities. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdictions. Most hospitals and most other providers and suppliers are small entities, either by nonprofit status or by having revenues of $7.0 million to $35.5 million in any 1 year. Individuals and States are not included in the definition of a small entity. We consider a rule to have a significant impact on a substantial number of small entities if it has at least a 3-percent impact of revenue on at least 5 percent of small entities. Affected entities with reporting responsibilities have been required to comply with sections 1862(b)(7) and (b)(8) of the Act since these provisions were added to the Act in 2007. This proposed rule is intended to define how CMPs would be

imposed as a consequence of non-compliance with these statutory obligations, and thus does not present any additional burden beyond the review of the rule. As discussed later in this section, the total cost impact of reviewing this rule by all 20,855 currently registered RREs, regardless of size, is estimated to be $6,842,437, or $328 per entity. This falls below the standard definition of ''significance'' of 3 or more of small entity revenue. As a result, we have determined, and the Secretary certifies, that this proposed rule would not have a significant economic impact on a substantial number of small entities.

In addition, section 1102(b) of the Act requires us to prepare an RIA if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 603 for the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area for Medicare payment regulations and has fewer than 100 beds. We are not preparing an analysis for section 1102(b) of the Act because we have determined, and the Secretary certifies, that this proposed rule would not have a significant impact on the operations of a substantial number of small rural hospitals.

Section 202 of the Unfunded Mandates Reform Act of 1995 also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of $100 million in 1995 dollars, updated annually for inflation. In 2019, that threshold is approximately $154 million. This proposed rule has no consequential effect on state, local, or tribal governments or on the private sector.

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct requirement costs on State and local governments, preempts State law, or otherwise has federalism implications. Since this regulation does not impose any costs on State or local governments, the requirements of Executive Order 13132 are not applicable.

Executive Order 13771, titled Reducing Regulation and Controlling Regulatory Costs, was issued on January 30, 2017 It has been determined that this proposed rule is not a ''significant regulatory action'' and thus does not trigger the previously discussed requirements of Executive Order 13771.

We used the current number of GHP RREs (1,039) and NGHP RREs (19,816) to determine the total number of impacted entities (20,855). We recognize that this is a slight overestimate, as a single corporate parent may have multiple associated RREs. We welcome any comments on the approach in estimating the number of entities which will review this proposed rule.

Using the May 2018 wage information from the U.S. Department of Labor Bureau of Labor Statistics for medical and health service managers (Code 11–9111), we estimate that the cost of reviewing this rule is $109.36 per hour, based on doubling the mean hourly wage of $54.68 to include overhead and fringe benefits (see *https://www.bls.gov/oes/current/oes119111.htm*). We assume that one individual associated with each of the 20,855 impacted entities will read the rule. Assuming an average reading speed, we estimate that it would take approximately 3 hours for the staff to review this proposed rule. For each entity that reviews the rule, the estimated cost is $328.08 (3 hours × $109.36). Therefore, we estimate that the total cost of reviewing this proposed rule is $6,842,437 ($328.08 × 20,855).

In accordance with the provisions of Executive Order 12866, this proposed rule was reviewed by the Office of Management and Budget.

List of Subjects

42 CFR Part 402

Assessments, Civil money penalties, Exclusions.

45 CFR Part 102

Administrative practice and procedure, Penalties.

For the reasons set forth in the preamble, the Centers for Medicare & Medicaid Services proposes to amend 42 CFR chapter IV as set forth below:

PART 402—CIVIL MONEY PENALTIES, ASSESSMENTS, AND EXCLUSIONS

■ 1. The authority citation for part 402 is revised to read as follows:

Authority: 42 U.S.C. 1302 and 1395hh.

■ 2. Section 402.1 is amended—

■ a. In paragraph (c) introductory text by removing the reference ''(c)(34) of this section'' and adding in its place the reference ''(c)(35) of this section'';

■ b. By removing paragraph (c)(20);

■ c. By redesignating paragraph (c)(21) as paragraph (c)(20);

■ d. By redesignating paragraphs (c)(22) through (34) as paragraphs (c)(23) through (35); and

■ e. By adding new paragraphs (c)(21) and (22).

The additions read as follows:

§ 402.1 Basis and scope.

* * * * *

(c) * * *

(21) Section 1862(b)(7)(B)—Except for the situation described in paragraphs (c)(21)(iv)(A) and (B) of this section, any entity that has a reporting obligation under section 1862(b)(7) of the Act (''reporting entity'') reports, but fails to comply with the reporting instructions in the following situations:

(i) Fails to report any beneficiary record within 1 year from the group health plan (GHP) coverage effective date or the Medicare beneficiary's entitlement date.

(ii) Contradicts its reporting under section 1862(b)(7) of the Act in response to CMS recovery efforts.

(iii) Has reported and exceeds any error tolerance(s) threshold established by the Secretary in any 4 out of 8 consecutive reporting periods.

(iv) A civil money penalty (CMP) is not imposed if—

(A) It is associated with a specific policy or procedural change is not imposed for a minimum of two reporting periods following the implementation of that policy or procedural change; or

(B) The entity complies with any reporting thresholds or any other reporting exclusions.

(22) Section 1862(b)(8)(E)—An applicable plan has a reporting obligation under section 1862(b)(8) of the Act (''applicable plan''), but fails to comply with the reporting instructions in the following situations:

(i) Except for the situations described in paragraphs (c)(22)(iv)(A) through (C) of this section, fails to report any beneficiary record within 1 year from the date of the settlement, judgment, award, or other payment.

(ii) Contradicts its reporting under section 1862(b)(8) of the Act in response to CMS recovery efforts.

(iii) Has reported, and exceeds any error tolerance(s) threshold established by the Secretary (not to exceed 20 percent) in any 4 out of 8 (or less) consecutive reporting periods.

(iv) A CMP is not imposed in the following situations:

(A) If a non-group health plan (NGHP) applicable plan fails to report required information as a result of the applicable plan's inability to obtain an individual's last name, first name, date of birth, gender, Medicare Beneficiary Identifier (MBI), Social Security Number (SSN), or the last 5 digits of the SSN, and the applicable plan has made a good faith effort to obtain this information by meeting all of the following:

(*1*) Communicating the need for this information to the individual and his or her attorney or other representative.

(*2*) Requesting the information from the individual and his or her attorney or other representative at least twice by mail and at least once by phone or other means of contact.

(*3*) Has not received a response or has received a response in writing that the individual refuses to provide his or her MBI or SSN or a truncated form of the MBI or SSN.

(*4*) Has documented its efforts to obtain the MBI or SSN (or the last 5 digits of the SSN).

(B) A CMP is not imposed if an NGHP applicable plan complies with any reporting thresholds or any other reporting exclusions.

(C) A CMP associated with a specific policy or procedural change is not imposed for a minimum of two reporting periods following the implementation of that policy or procedural change.

* * * * *

■ 3. Section 402.105 is amended by revising paragraphs (b)(2) and adding paragraph (b)(3) to read as follows:

§ 402.105 Amount of penalty.

* * * * *

(b) * * *

(2) For entities with reporting obligations under section 1862(b)(7) of the Act (''reporting entity'') as follows:

(i) A reporting entity fails to report any beneficiary record within the specified period from the latter of the GHP coverage effective date or the Medicare beneficiary's entitlement date. The penalty is—

(A) Calculated on a daily basis, based on the actual number of beneficiary records that the entity submitted more than 1 year after the GHP Medicare Secondary Payer (MSP) effective date; and

(B) $1,000 as adjusted annually under 45 CFR part 102 for each calendar day of noncompliance for each individual for which the required information should have been submitted, up to a maximum penalty of $365,000 as adjusted annually under 45 CFR part 102 per individual per year.

(ii) A reporting entity's response to CMS recovery efforts contradicts the entity's reporting under section 1862(b)(7) of the Act. The penalty is—

(A) Calculated based on the number of calendar days that the entity failed to appropriately report updates to beneficiary records, as required for accurate and timely reporting; and

(B) $1,000 as adjusted annually under 45 CFR part 102 for each calendar day of noncompliance for each individual for which the required information should have been submitted.

(iii) A reporting entity has reported, and exceeds any error tolerance(s) threshold established by the Secretary (not to exceed 20 percent) in any 4 out of 8 (or less) consecutive reporting periods. The penalty is—

(A) Based upon the number of beneficiary records on the fourth submission that exceed any such error tolerance(s); and

(B) $1,000 as adjusted annually under 45 CFR part 102 for each calendar day of noncompliance for each individual for which the required information should have been submitted.

(3) For entities with reporting obligations under section 1862(b)(8) (''applicable plan'') of the Act as follows:

(i) An applicable plan fails to report any NGHP beneficiary record within the specified period from the date of the settlement, judgment, award, or other payment. The penalty is—

(A) Calculated on a daily basis, based on the actual number of beneficiary records that the entity submitted more than 1 year after the Total Payment Obligation to Claimant (TPOC) date; and

(B) Up to $1,000 as adjusted annually under 45 CFR part 102 for each calendar day of noncompliance for each individual for which the required information should have been submitted, up to a maximum penalty of $365,000 as adjusted annually under 45 CFR part 102 per individual per year.

(ii) An applicable plan's response to CMS recovery efforts contradicts the entity's reporting under section 1862(b)(8) of the Act. The penalty is—

(A) Calculated based on the number of calendar days that the entity failed to appropriately report updates to beneficiary records, as required for accurate and timely reporting; and

(B) Up to $1,000 as adjusted annually under 45 CFR part 102 per calendar day of noncompliance, for a maximum penalty of $365,000 as adjusted annually under 45 CFR part 102.

(iii) An applicable plan has reported, and exceeds any error tolerance(s) threshold established by the Secretary (not to exceed 20 percent) in any 4 out of 8 consecutive reporting periods. The penalty is calculated using the following tiered approach, based on the number of calendar days that the applicable plan exceeded the error tolerance(s) in the entity's fourth above-tolerance submission.

(A) *Initial penalty amount.* For the first penalty, CMS imposes a penalty of one-quarter (25 percent) of the maximum penalty per beneficiary per calendar day of non-compliance after the required date of submission (last calendar day of the applicable plan's reporting period), based upon the number of beneficiaries whose records exceeded any error tolerance(s) established by the Secretary.

(B) *Subsequent penalty amounts.* For the second and subsequent penalties, CMS increases the penalty specified in paragraph (b)(3)(iii)(A) of this section in increments of one-quarter (25 percent) of the maximum penalty for applicable plans that fail to comply in consecutive reporting periods to a maximum of $1,000 as adjusted annually under 45 CFR part 102 per beneficiary per calendar day of non-compliance.

(C) *Reduction in penalty amount.* If the applicable plan reports after the assessment of a penalty and the entity remains below any error tolerances, the penalty amount for the next penalty eligible file is reduced by increments of one-quarter (25 percent) of the maximum penalty per beneficiary per calendar day of non-compliance per consecutive subsequent quarter of compliance, to the minimum penalty of one-quarter (25 percent) of the maximum penalty per beneficiary per calendar day of non-compliance.

* * * * *

For the reasons specified in the preamble, the Department of Health and Human Services proposes to amend 45 CFR part 102 as specified below:

PART 102—ADJUSTMENT OF CIVIL MONETARY PENALTIES FOR INFLATION

■ 4. The authority for part 102 continues to read as follows:

Authority: Public Law 101–410, Sec. 701 of Public Law 114–74, 31 U.S.C. 3801–3812.

■ 5. Section 102.3 is amended in the table by:

■ a. Revising the entries ''1395m(k)(6),'' ''1395m(l)(6),'' ''1395y(b)(6)(B),'' and ''1395y(b)(7)(B)(i);''

■ b. Adding an entry for ''1395y(b)(8)(E)(i)'' in alphanumeric order; and

■ c. Revising the entries for ''1395pp(h),'' ''1395ss(a)(2),'' ''1395ss(p)(8),'' ''1395ss(p)(9)(C),'' ''1395ss(q)(5)(C),'' ''1395ss(r)(6)(A),'' ''1395ss(s)(4),'' and ''1395ss(t)(2).''

The revisions and addition read as follows:

§ 102.3 Penalty adjustment and table.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

February 11, 2020.

The Department of Agriculture will submit the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13 on or after the date of publication of this notice. Comments are requested regarding: Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), New Executive Office Building, Washington, DC; New Executive Office Building, 725 17th Street NW, Washington, DC 20503. Commenters are encouraged to submit their comments to OMB via email to: *OIRA_Submission@omb.eop.gov* or fax (202) 395–5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250–7602.

Comments regarding these information collections are best assured of having their full effect if received by March 19, 2020. Copies of the submission(s) may be obtained by calling (202) 720–8681.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

National Agricultural Statistics Service

Title: Poultry Litter Nutrient Distribution Producer Survey.

OMB Control Number: 0535–0264.

Summary of Collection: The primary objectives of the National Agricultural Statistics Service (NASS) are to prepare and issue official State and national estimates of crop and livestock production, disposition and prices, economic statistics, and environmental statistics related to agriculture and to conduct the Census of Agriculture and its follow-on surveys. NASS will conduct a survey of select agricultural operations in Delaware, Maryland, Pennsylvania, and Virginia. Each selected farmer or rancher will be asked to provide data on (1) Basic crop and tillage practices in 2019, (2) Preferred sources of nutrients and actual sources of nutrients used, (3) Where the operator gets information and recommendations on nutrients, and (4) Farmer perception between poultry litter co-products and other sources of nutrients. General authority for these data collection activities is granted under U.S.C. Title 7, Section 2204.

Need and Use of the Information: A comprehensive evaluation of farmer preferences for using fresh poultry litter or poultry litter ash co-products has not been previously conducted in the Chesapeake Bay area.

Data may be used for market development, policy, and/or budgeting for cost-share/poultry transport programs. Stakeholders would be farmers (poultry growers and crop producers), policy makers, technology vendors, fertilizer manufacturers, and manure brokers/haulers.

Information from the survey could be used by commercial fertilizer dealers, poultry growers, technology vendors, or state agencies to make investment decisions regarding fresh poultry litter and poultry litter ash co-products. For example, policy makers could base changes to the state cost share program for manure transport on the results, or a fertilizer company/technology vendor could invest in a new fertilizer product based on the results.

The survey will also complement on-going efforts in Chesapeake Bay states to achieve water quality goals via promoting on-farm and regional phosphorus balance. Several states (Maryland and Delaware for example) offer funding to transport poultry litter from farms where it is produced to fields where it is needed. Despite cost share incentives to use poultry litter, many farmers choose not to use poultry litter. This survey will identify barriers to expanded use of poultry litter on farms in the region.

Description of Respondents: A sample of all active agricultural operations in Delaware, Maryland, Pennsylvania, and Virginia that produce:

- 200 or more acres of row crops (corn, soybeans, wheat, peanuts, cotton),
- 25 or more acres of specialty crops (vegetables, fruit, flowers), and/or
- at least $10,000 of floriculture sales.

Number of Respondents: 1,000.

Frequency of Responses: Reporting: Once a year.

Total Burden Hours: 483.

Ruth Brown,

Departmental Information Collection Clearance Officer.

BILLING CODE 3410–20–P

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

February 12, 2020.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of

information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by March 19, 2020 will be considered. Written comments should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), New Executive Office Building, 725 17th Street NW, Washington, DC 20502. Commenters are encouraged to submit their comments to OMB via email to: *OIRA_Submission@OMB.EOP.GOV* or fax (202) 395–5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250–7602. Copies of the submission(s) may be obtained by calling (202) 720–8958.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Food Safety and Inspection Service

Title: Specified Risk Materials.

OMB Control Number: 0583–0129.

Summary of Collection: The Food Safety and Inspection Service (FSIS) has been delegated the authority to exercise the functions of the Secretary as provided in the Federal Meat Inspection Act (FMIA) (21 U.S.C. 601 *et seq.*). The statutes mandate that FSIS protect the public by ensuring that meat products are safe, wholesome, not adulterated, and properly labeled and packaged. FSIS requires that official establishments that slaughter cattle and or process carcasses or parts of cattle develop written procedures for the removal, segregation, and disposition of specified risk materials (SRMs). FSIS requires that establishments maintain daily records sufficient to document the implementation and monitoring of their procedures for the removal, segregation, and disposition of SRMs, and any corrective actions taken to ensure that such procedures are effective.

Need and Use of the Information: FSIS will collect information from establishments to ensure meat and meat products distributed in commerce for use as human food do not contain SMRs.

Description of Respondents: Business or other for-profit.

Number of Respondents: 3,512.

Frequency of Responses: Recordkeeping; Reporting: On occasion.

Total Burden Hours: 123,916.

Ruth Brown,

Departmental Information Collection Clearance Officer.

BILLING CODE 3410–DM–P

FOREIGN AGRICULTURAL SERVICE

Notice of a Request for Revision of a Currently Approved Information Collection

AGENCY: Foreign Agricultural Service, USDA.

ACTION: Notice and request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act, this notice announces the Foreign Agricultural Service's intention to request a revision for a currently approved information collection relating to the issuance of certificates of quota eligibility (CQEs) required to enter sugar and sugar-containing products under tariff-rate quotas (TRQs) into the United States.

DATES: Comments on this notice must be received by no later than April 20, 2020 to be assured of consideration.

ADDRESSES: You may send comments, identified by the OMB Control number 0551–0014, by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for sending comments.
- *Email: William.Janis@usda.gov.* Include OMB Control number 0551–0014 in the subject line of the message.
- *Fax:* 202–720–0876.
- *Mail:* U.S. Department of Agriculture, 1400 Independence Avenue SW, Washington, DC 20250–1021.

FOR FURTHER INFORMATION CONTACT: *William.Janis@usda.gov,* 202–720–2194, *William.Janis@usda.gov.*

SUPPLEMENTARY INFORMATION:

Title: Certificates for Quota Eligibility.

OMB Number: 0551–0014.

Expiration Date of Approval: April 30, 2020.

Type of Request: Revision of a currently approved information collection.

Abstract: Additional U.S. note 5 to Chapter 17 of the Harmonized Tariff Schedule of the United States (HTS), established by Presidential Proclamation 6763 of December 1994, authorizes the Secretary of Agriculture to establish for each fiscal year the quantity of sugars, syrups, and molasses that may be entered at the lower tariff rates of TRQs established under the Uruguay Round of multilateral trade negotiations as reflected in the provisions of Schedule XX (United States), annexed to the Marrakesh Agreement Establishing the World Trade Organization (WTO).

Pursuant to 15 CFR part 2011, Allocation of Tariff-Rate Quota on Imported Sugars, Syrups, and Molasses, Subpart A—Certificates of Quota, CQEs are issued to foreign countries that have been allocated a share of the WTO sugar TRQ. This regulation provides for the issuance of CQEs by the Secretary of Agriculture and in general prohibits sugar entered under the WTO TRQ from being imported into the United States or withdrawn from a warehouse for consumption at the in-quota duty rates unless such sugar is accompanied by a valid CQE.

In addition, CQEs are required for the import of sugar into the United States under the sugar TRQs established under the U.S.—Colombia, U.S.—Panama, and U.S.—Peru Trade Promotion Agreements, as set forth in 19 U.S.C. 3805.

CQEs for the aforementioned WTO and FTA sugar TRQs are distributed to foreign countries by the Senior Director of the Multilateral Affairs Division, Foreign Agriculture Service, or his or her designee. The distribution of CQEs is in such amounts and at such times as the Senior Director determines are appropriate to enable the foreign country to fill its quota allocation for such quota period in a reasonable manner, taking into account harvesting periods, U.S. import requirements, and other relevant factors. The information required to be collected on the CQE is used to monitor and control the imports of products subject to the WTO and FTA sugar TRQs. A valid CQE, duly executed and issued by the Certifying Authority of the foreign country, is required for eligibility to enter the products into U.S. customs territory under the TRQs.

Estimate of burden: The public reporting burden for the collection directly varies with the number of CQEs issued.

Respondents: Foreign governments.

Estimated Number of WTO Respondents: 30.

Estimated Number of FTA Respondents: 2.

Estimated Number of Responses per Respondent: 124 per fiscal year.

Estimated Total Annual Reporting Burden: 3,968 hours

Copies of this information collection can be obtained from Connie Ehrhart, the Agency Information Collection Coordinator, at (202) 690–1578.

Requests for Comments: Send comments regarding (a) Whether the information collection is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information including validity of the methodology and assumption used; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. Copies of this information collection may be obtained from Ronald Croushorn, the Agency Information Collection Coordinator, at (202) 720–3038.

Comments may be sent to William Janis, International Economist, Multilateral Affairs Division, AgStop 1021, U.S. Department of Agriculture, 1400 Independence Avenue SW, Washington, DC 20250–1021 or telephone (202) 720–2194 or email *William.Janis@usda.gov.* All comments received will be available for public inspection in Room 5526 at the above address.

Persons with disabilities who require an alternative means of communication for information (Braille, large print, audiotape, etc.) should contact USDA's target center at (202) 720–2600 (voice and TDD). All responses to this notice will be summarized and included in the request for OMB approval. All comments also will become a matter of public record.

FAS is committed to complying with the Government Paperwork Elimination Act which requires Government agencies, to the maximum extent feasible, to provide the public the option of electronically submitting information collection. CQEs permit exporters to ship raw cane sugar to the United States at the U.S. sugar price, which is ordinarily higher than the world sugar price. Therefore, in contrast to most information collection documents, CQEs have a monetary value equivalent to the substantial benefits to exporters. CQEs have always been carefully handled as secure documents and distributed only to foreign government-approved Certifying Authorities.

Dated: February 7, 2020.

Kenneth Isley,

Administrator, Foreign Agricultural Service.

BILLING CODE 3410–10–P

COMMISSION ON CIVIL RIGHTS

Agenda and Notice of Public Meeting of the Delaware Advisory Committee

AGENCY: Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission), and the Federal Advisory Committee Act (FACA), that a planning meeting of the Delaware Advisory Committee to the Commission will convene by conference call, on Monday, February 24, 2020 at 4 p.m. (EST). The purpose of the meeting is to discuss next steps following the publication of the Committee's civil rights project report on the agency's website, and recruitment of potential candidates for appointment to the DE Advisory Committee—members terms end June 16, 2020.

DATES: Monday, February 24, 2020 at 4 p.m. (EST).

Public Call-In Information: Conference call number: 1–866–556–2429 and conference call ID: 4512490.

FOR FURTHER INFORMATION CONTACT: Ivy L. Davis, at *ero@usccr.gov* or by phone at 202–376–7533

SUPPLEMENTARY INFORMATION: Interested members of the public may listen to the discussion by calling the following toll-free conference call number: 1–866–556–2429 and conference call ID: 4512490. Please be advised that before placing them into the conference call, the conference call operator may ask callers to provide their names, their organizational affiliations (if any), and email addresses (so that callers may be notified of future meetings). Callers can expect to incur charges for calls they initiate over wireless lines, and the Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number herein.

Persons with hearing impairments may also follow the discussion by first calling the Federal Relay Service at 1–800–877–8339 and providing the operator with the toll-free conference call number: 1–866–556–2429 and conference call ID: 4512490.

Members of the public are invited make statements during the Public Comment section of the meeting or to submit written comments; the written comments must be received in the regional office approximately 30 days after each scheduled meeting. Written comments may be mailed to the Eastern Regional Office, U.S. Commission on Civil Rights, 1331 Pennsylvania Avenue, Suite 1150, Washington, DC 20425 or emailed to Evelyn Bohor at *ero@usccr.gov.* Persons who desire additional information may contact the Eastern Regional Office at (202) 376–7533.

Records and documents discussed during the meeting will be available for public viewing, as they become available at: *https://gsageo.force.com/FACA/FACAPublicViewCommitteeDetails?id=a10t0000001gzlEAAQ,* click the ''Meeting Details'' and ''Documents'' links. Records generated from this meeting may also be inspected and reproduced at the Eastern Regional Office, as they become available, both before and after the meetings. Persons interested in the work of this advisory committee are advised to go to the Commission's website, *www.usccr.gov,* or to contact the Eastern Regional Office at the above phone number, email or street address.

Agenda

Monday, February 24, 2020 at 4:00 p.m. (EST)

I. Welcome and Roll Call
II. Discussion
—Next steps following publication of the Committee's civil rights project report
—Recruitment of potential candidates for appointment to the DE Advisory Committee
III. Other Business
IV. Public Comments
V. Next Meeting
VI. Adjourn

Dated: February 12, 2020.

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Indiana Advisory Committee to the U.S. Commission on Civil Rights

AGENCY: U.S. Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission

on Civil Rights (Commission) and the Federal Advisory Committee Act that the Indiana Advisory Committee (Committee) will hold a public briefing on Thursday, February 27, 2020, for the purpose of discussing the civil rights implications of indoor and outdoor lead exposure in the state.

DATES: The meeting will be held on Thursday, February 27, 2020, from 9:00 a.m.–2:00 p.m. Eastern Time.

ADDRESSES: Ivy Technical Community College, The Event Center, 2820 N Meridian Street, Indianapolis, IN 46208.

FOR FURTHER INFORMATION CONTACT: David Barreras, DFO, at *dbarreras@usccr.gov* or 312–353–8311.

SUPPLEMENTARY INFORMATION: This meeting is free and open to the public. Members of the public may attend and speak to the committee at the designated time for open forum. Members of the public will be invited to make a statement as time allows. Speakers will be asked to identify themselves, the organization they are affiliated with (if any), and an email address prior to addressing the committee.

Members of the public are also entitled to submit written comments; the comments must be received within 30 days following the briefing. Written comments may be mailed to the Advisory Committee Management Unit, U.S. Commission on Civil Rights, 230 S Dearborn, Suite 2120, Chicago, IL 60604. They may also be faxed to the Commission at (312) 353–8324 or emailed to David Barreras at *dbarreras@usccr.gov.* Persons who desire additional information may contact the Committee Management Office at (312) 353–8311.

Records generated from this meeting may be inspected and reproduced at the Committee Management Office, as they become available, both before and after the meeting. Records of the meeting will be available via *www.facadatabase.gov* under the Commission on Civil Rights, Indiana Advisory Committee link. Persons interested in the work of this Committee are directed to the Commission's website, *http://www.usccr.gov,* or may contact the Regional Programs Unit Office at the above email or street address.

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Wyoming Advisory Committee

AGENCY: U.S. Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act (FACA) that the meeting of the Wyoming Advisory Committee (Committee) to the Commission will be held at 1:00 p.m. (MDT) Friday, March 20, 2020. The purpose of this meeting is to discuss potential findings and recommendations that will be included in their hate crimes report.

DATES: Friday, March 20, 2020 at 1:00 p.m. MDT.

FOR FURTHER INFORMATION CONTACT: Ana Victoria Fortes (DFO) at *afortes@usccr.gov* or (213) 894–3437.

SUPPLEMENTARY INFORMATION:

Public Call Information: Dial: 800–367–2403; Conference ID: 7266173.

This meeting is available to the public through the following toll-free call-in number: 800–367–2403, conference ID number: 7266173. Any interested member of the public may call this number and listen to the meeting. Callers can expect to incur charges for calls they initiate over wireless lines, and the Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Persons with hearing impairments may also follow the proceedings by first calling the Federal Relay Service at 1–800–877–8339 and providing the Service with the conference call number and conference ID number.

Members of the public are entitled to make comments during the open period at the end of the meeting. Members of the public may also submit written comments; the comments must be received in the Regional Programs Unit within 30 days following the meeting. Written comments may be mailed to the Western Regional Office, U.S. Commission on Civil Rights, 300 North Los Angeles Street, Suite 2010, Los Angeles, CA 90012. They may be faxed to the Commission at (213) 894–0508, or emailed Ana Victoria Fortes at *afortes@usccr.gov.* Persons who desire additional information may contact the Regional Programs Unit at (213) 894–3437.

BILLING CODE P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–570–119]

Certain Vertical Shaft Engines Between 225cc and 999cc, and Parts Thereof From the People's Republic of China: Initiation of Less-Than-Fair-Value Investigation

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATES: Applicable February 4, 2020.

FOR FURTHER INFORMATION CONTACT: Leo Ayala, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3945.

SUPPLEMENTARY INFORMATION:

The Petition

On January 15, 2020, the U.S. Department of Commerce (Commerce) received an antidumping duty (AD) petition concerning imports of certain vertical shaft engines between 225cc and 999cc, and parts thereof (vertical shaft engines) from the People's Republic of China (China), filed in proper form on behalf of the Coalition of American Vertical Engine Producers (the petitioner or the Coalition).[1] The Petition was accompanied by a countervailing duty (CVD) petition concerning imports of vertical shaft engines from China.

On January 17, 2020, Commerce requested supplemental information pertaining to certain aspects of the Petition,[2] to which the petitioner filed its response on January 22, 2020.[3] On January 27, 2020, Commerce had a phone conversation with the petitioner requesting that it address certain issues.[4] The petitioner filed responses to these requests on January 29, 2020.[5]

In accordance with section 732(b) of the Tariff Act of 1930, as amended (the Act), the petitioner alleges that imports of vertical shaft engines from China are being, or are likely to be, sold in the United States at less than fair value (LTFV) within the meaning of section 731 of the Act, and that such imports are materially injuring, or threatening material injury to, the domestic industry producing vertical shaft engines in the United States. Consistent with section 732(b)(1) of the Act, the Petition is accompanied by information reasonably available to the petitioner supporting its allegations.

Commerce finds that the petitioner filed the Petition on behalf of the domestic industry, because the petitioner is an interested party, as defined in sections 771(9)(C) and (F) of the Act. Commerce also finds that the

[1] *See* Petitioner's Letter, ''Petitions for the Imposition of Antidumping and Countervailing Duties on Certain Vertical Shaft Engines between 225cc and 999cc, and Parts Thereof from the People's Republic of China,'' dated January 15, 2020 (the Petition).

[2] *See* Commerce's Letter, ''Petitions for the Imposition of Antidumping and Countervailing Duties on Imports of certain vertical shaft engines between 225cc and 999cc, and parts thereof from the People's Republic of China: Supplemental Questions Concerning Volume II,'' dated January 17, 2020.

[3] *See* Petitioner's Letter, ''Responses to Supplemental Questions Concerning Volume II of the Petitions for the Imposition of Antidumping and Countervailing Duties Pursuant to Sections 701 and 731 of the Tariff Act of 1930, As Amended on Certain Vertical Shaft Engines Between 225cc and 999cc, and Parts Thereof from the People's Republic of China,'' dated January 22, 2020 (AD Supplement); *see also* Petitioner's Letter, ''Responses to Supplemental Questions Concerning Volume I of the Petitions for the Imposition of Antidumping and Countervailing Duties Pursuant to Sections 701 and 731 of the Tariff Act of 1930, As Amended on Certain Vertical Shaft Engines Between 225cc and 999cc, and Parts Thereof from the People's Republic of China,'' dated January 22, 2020 (General Issues Supplement).

[4] *See* Memorandum, ''Certain Vertical Shaft Engines Between 225cc and 999cc, and Parts Thereof from The People's Republic of China: Call to Counsel,'' dated January 27, 2020.

[5] *See* Petitioner's Letter, ''Certain Vertical Shaft Engines Between 225cc and 999cc, and Parts Thereof from the People's Republic of China: Responses to Second Supplemental Questions Concerning Volume II of the Petitions,'' dated January 29, 2020 (AD Second Supplement); *see also* Petitioner's Letter, ''Certain Vertical Shaft Engines Between 225cc and 999cc, and Parts Thereof from the People's Republic of China: Responses to Second Supplemental Questions Concerning Volume I of the Petitions,'' dated January 29, 2020 (Second General Issues Supplement).

petitioner demonstrated sufficient industry support with respect to the initiation of the requested AD investigation.[6]

Period of Investigation

Because China is a non-market economy (NME) country, pursuant to 19 CFR 351.204(b)(1), and because the Petition was filed on January 15, 2020, the period of investigation (POI) is July 1, 2019 through December 31, 2020.

Scope of the Investigation

The merchandise covered by this investigation is vertical shaft engines from China. For a full description of the scope of this investigation, *see* the appendix to this notice.

Comments on Scope of the Investigation

As discussed in the *Preamble* to Commerce's regulations, we are setting aside a period for interested parties to raise issues regarding product coverage (*i.e.,* scope).[7] Commerce will consider all comments received from interested parties and, if necessary, will consult with interested parties prior to the issuance of the preliminary determination. If scope comments include factual information,[8] all such factual information should be limited to public information. To facilitate preparation of its questionnaires, Commerce requests that all interested parties submit scope comments by 5:00 p.m. Eastern Time (ET) on February 24, 2020, which is 20 calendar days from the signature date of this notice. Any rebuttal comments, which may include factual information, must be filed by 5:00 p.m. ET on March 5, 2020, which is 10 calendar days from the initial comment deadline.[9]

Commerce requests that any factual information the parties consider relevant to the scope of the investigation be submitted during this time period. However, if a party subsequently finds that additional factual information pertaining to the scope of the investigation may be relevant, the party may contact Commerce and request permission to submit the additional information. All such comments must also be filed on the record of the concurrent AD and CVD investigations.

Filing Requirements

All submissions to Commerce must be filed electronically using Enforcement and Compliance's Antidumping Duty and Countervailing Duty Centralized Electronic Service System (ACCESS).[10] An electronically filed document must be received successfully in its entirety by the time and date it is due. Documents exempted from the electronic submission requirements must be filed manually (*i.e.,* in paper form) with Enforcement and Compliance's APO/Dockets Unit, Room 18022, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230, and stamped with the date and time of receipt by the applicable deadlines.

Comments on Product Characteristics for AD Questionnaires

Commerce is providing interested parties an opportunity to comment on the appropriate physical characteristics of vertical shaft engines to be reported in response to Commerce's AD questionnaire. This information will be used to identify the key physical characteristics of the subject merchandise in order to report the relevant factors of production (FOPs) accurately, as well as to develop appropriate product-comparison criteria.

Interested parties may provide any information or comments that they believe are relevant to the development of an accurate list of physical characteristics. In order to consider the suggestions of interested parties in developing and issuing the AD questionnaire, all comments must be filed by 5:00 p.m. ET on February 24, 2020, which is 20 calendar days from the signature date of this notice. Any rebuttal comments, which may include factual information, must be filed by 5:00 p.m. ET on March 5, 2020, which is 10 calendar days from the initial comment deadline.[11] All comments and submissions to Commerce must be filed electronically using ACCESS, as explained above, on the record of this AD investigation.

Determination of Industry Support for the Petition

Section 732(b)(1) of the Act requires that a petition be filed on behalf of the domestic industry. Section 732(c)(4)(A) of the Act provides that a petition meets this requirement if the domestic producers or workers who support the petition account for: (i) At least 25 percent of the total production of the domestic like product; and (ii) more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the petition. Moreover, section 732(c)(4)(D) of the Act provides that, if the petition does not establish support of domestic producers or workers accounting for more than 50 percent of the total production of the domestic like product, Commerce shall: (i) Poll the industry or rely on other information in order to determine if there is support for the petition, as required by subparagraph (A); or (ii) determine industry support using a statistically valid sampling method to poll the ''industry.''

Section 771(4)(A) of the Act defines the ''industry'' as the producers as a whole of a domestic like product. Thus, to determine whether a petition has the requisite industry support, the statute directs Commerce to look to producers and workers who produce the domestic like product. The International Trade Commission (ITC), which is responsible for determining whether ''the domestic industry'' has been injured, must also determine what constitutes a domestic like product in order to define the industry. While both Commerce and the ITC must apply the same statutory definition regarding the domestic like product,[12] they do so for different purposes and pursuant to a separate and distinct authority. In addition, Commerce's determination is subject to limitations of time and information. Although this may result in different definitions of the like product, such differences do not render the decision of either agency contrary to law.[13]

Section 771(10) of the Act defines the domestic like product as ''a product which is like, or in the absence of like, most similar in characteristics and uses with, the article subject to an investigation under this title.'' Thus, the reference point from which the domestic like product analysis begins is ''the article subject to an investigation'' (*i.e.,* the class or kind of merchandise to be investigated, which normally will be the scope as defined in the petition).

With regard to the domestic like product, the petitioner does not offer a

definition of the domestic like product distinct from the scope of the investigation.[14] Based on our analysis of the information submitted on the record, we have determined that vertical shaft engines, as defined in the scope, constitute a single domestic like product, and we have analyzed industry support in terms of that domestic like product.[15]

In determining whether the petitioner has standing under section 732(c)(4)(A) of the Act, we considered the industry support data contained in the Petition with reference to the domestic like product as defined in the ''Scope of the Investigation,'' in the appendix to this notice. To establish industry support, the petitioner provided 2019 shipments of the domestic like product for members of the Coalition.[16] The petitioner estimated the production of the domestic like product for the entire domestic industry based on U.S. shipment data, export data, and its own knowledge of the industry, because shipments and production of vertical shaft engines correlate with one another and shipments are a reasonable proxy for production in the vertical shaft engines industry.[17] The petitioner compared the 2019 shipments of the Coalition to the estimated total shipments of the domestic like product for the entire domestic industry.[18] We relied on data provided by the petitioner for purposes of measuring industry support.[19]

Our review of the data provided in the Petition, the General Issues Supplement, the Second General Issues Supplement, and other information readily available to Commerce indicates that the petitioner has established industry support for the Petition.[20] First, the Petition established support from domestic producers (or workers) accounting for more than 50 percent of the total production of the domestic like product and, as such, Commerce is not required to take further action in order to evaluate industry support (*e.g.,* polling).[21] Second, the domestic producers (or workers) have met the statutory criteria for industry support under section 732(c)(4)(A)(i) of the Act because the domestic producers (or workers) who support the Petition account for at least 25 percent of the total production of the domestic like product.[22] Finally, the domestic producers (or workers) have met the statutory criteria for industry support under section 732(c)(4)(A)(ii) of the Act because the domestic producers (or workers) who support the Petition account for more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the Petition.[23] Accordingly, Commerce determines that the Petition was filed on behalf of the domestic industry within the meaning of section 732(b)(1) of the Act.[24]

Allegations and Evidence of Material Injury and Causation

The petitioner alleges that the U.S. industry producing the domestic like product is being materially injured, or is threatened with material injury, by reason of the imports of the subject merchandise sold at LTFV. In addition, the petitioner alleges that subject imports exceed the negligibility threshold provided for under section 771(24)(A) of the Act.[25]

The petitioner contends that the industry's injured condition is illustrated by a significant and increasing volume of subject imports; reduced market share; underselling and price depression or suppression; lost sales and revenues; and a decline in the domestic industry's financial performance and profitability.[26] We have assessed the allegations and supporting evidence regarding material injury, threat of material injury, causation, as well as negligibility, and we have determined that these allegations are properly supported by adequate evidence, and meet the statutory requirements for initiation.[27]

Allegations of Sales at Less Than Fair Value

The following is a description of the allegation of sales at LTFV upon which Commerce based its decision to initiate an AD investigation of vertical shaft engines from China. The sources of data for the deductions and adjustments relating to U.S. price and normal value (NV) are discussed in greater detail in the AD Initiation Checklist.

Export Price

The petitioner based export price (EP) on sales offers to customers in the United States for the sale of vertical shaft engines produced in and exported from China.[28] In order to calculate ex-factory U.S. prices, where appropriate, the petitioner made deductions from U.S. prices for foreign inland freight and foreign brokerage and handling.[29]

Normal Value

Commerce considers China to be a non-market economy (NME) country.[30] In accordance with section 771(18)(C)(i) of the Act, any determination that a foreign country is an NME country shall remain in effect until revoked by Commerce. Therefore, we continue to treat China as an NME country for purposes of the initiation of this investigation. Accordingly, NV in China is appropriately based on FOPs valued in a surrogate market economy country,

in accordance with section 773(c) of the Act.[31]

The petitioner claims that Turkey is an appropriate surrogate country for China, because it is a market economy country that is at a level of economic development comparable to that of China and it is a significant producer of comparable merchandise.[32] The petitioner valued direct material inputs and packing materials using Trade Data Monitor, data from the International Energy Agency to value electricity and natural gas, and data from the International Labor Organization to value labor.[33] Based on the information provided by the petitioner, we determine that it is appropriate to use Turkey as a surrogate country for purposes of initiation.[34]

Interested parties will have the opportunity to submit comments regarding surrogate country selection and, pursuant to 19 CFR 351.301(c)(3)(i), will be provided an opportunity to submit publicly available information to value FOPs, within 30 days before the scheduled date of the preliminary determination.

Factors of Production

Because information regarding the volume of inputs consumed by Chinese producers/exporters were not reasonably available, the petitioner used the product-specific consumption rates of a U.S. vertical shaft engines producer as a surrogate to estimate a Chinese manufacturer's FOPs.[35] The petitioner valued the estimated FOPs using surrogate values from Turkey.[36] The petitioner calculated factory overhead, selling, general and administrative expenses, and profit based on the experience of a Turkish producer of comparable merchandise (*i.e.,* radiators, boilers, heat pumps, motors, and other products).[37]

Fair Value Comparisons

Based on the data provided in the Petition, there is reason to believe that imports of vertical shaft engines from China are being, or are likely to be, sold in the United States at LTFV. Based on comparisons of EP to NV, in accordance with sections 772 and 773 of the Act, the estimated dumping margins for vertical shaft engines from China range from 324.73 percent to 637.73 percent.[38]

Initiation of LTFV Investigation

We find that the Petition on vertical shaft engines from China, we find that the Petition meets the requirements of section 732 of the Act. Therefore, we are initiating an AD investigation to determine whether imports of vertical shaft engines from China are being, or are likely to be, sold in the United States at LTFV. In accordance with section 733(b)(1)(A) of the Act and 19 CFR 351.205(b)(1), unless postponed, we will make our preliminary determination no later than 140 days after the date of this initiation.

Critical Circumstances

The petitioner alleges, based on trade statistics and documented prior knowledge of an impending trade case, that there is a reasonable basis to believe or suspect that critical circumstances exist with regard to imports of vertical shaft engines from China.[39]

Section 733(e)(1) of the Act states that if a petitioner alleges critical circumstances, Commerce will find that such circumstances exist, at any time after the date of initiation, when there is a reasonable basis to believe or suspect that under, subparagraph (A)(i), there is a history of dumping and there is material injury by reason of dumped imports in the United States or elsewhere of the subject merchandise, or (ii) the person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the subject merchandise at less than its fair value and that there was likely to be material injury by reason of such sales, and (B) that ''there have been massive imports of the subject merchandise over a relatively short period.'' Section 351.206(h)(2) of Commerce's regulations provides that, generally, imports must increase by at least 15 percent during the ''relatively short period'' to be considered ''massive'' and section 351.206(i) defines a ''relatively short period'' as normally being the period beginning on the date the proceeding begins (*i.e.,* the date the petition is filed) [40] and ending at least three months later.[41] The regulations also provide, however, that if Commerce ''finds that importers, or exporters and producers, had reason to believe, at some time prior to the beginning of the proceeding, that a proceeding was likely,'' Commerce ''may consider a period of not less than three months from that earlier time.'' [42]

The petitioner alleges that there is a history of dumping and material injury by reason of dumped imports of vertical shaft engines, and that U.S. importers knew or should have known that vertical shaft engines were being sold at LTFV and that there was likely to be material injury by reason of such sales.[43] The petitioner notes that the dumping margins calculated in Volume II of the Petition range from approximately 320% to over 630%, which exceed the 25 percent threshold used by Commerce to impute knowledge of dumping.[44]

The petitioner also asserts that there have been massive imports of vertical shaft engines over a relatively short period. Based on the petitioner's calculation, the imports of engines in the classification that most closely approximates vertical shaft engines surged 35.7 percent between June 2019 through November 2019 against the same period in calendar year 2018.[45] The petitioner chose these base and comparison periods in order to account for seasonality and the unusual circumstances caused by the imposition of 25 percent Section 301 duties, in accordance with 19 CFR 351.206(h)(1)(ii). The petitioner asserts that, because the surge in imports constituted more than a 15 percent change, import volumes of vertical shaft engines are massive, as defined in Commerce's regulations.

The petitioner requests that Commerce make a preliminary finding of critical circumstances within 45 days of the filing of the Petition.[46] Section 732(e) of the Act states that when there is a reasonable basis to believe or suspect (1) there is a history of dumping in the United States or elsewhere of the subject merchandise, or (2) the person by whom, or for whose account, the merchandise was imported knew, or should have known, that the exporter was selling the subject merchandise at LTFV, Commerce may request that U.S. Customs and Border Protection (CBP) compile information on an expedited basis regarding entries of the subject merchandise.

Taking into consideration the foregoing, we will analyze this matter further. We will monitor imports of

vertical shaft engines from China and may request that CBP compile information on an expedited basis regarding entries of subject merchandise.[47] If, at any time, the criteria for a finding of critical circumstances are established, we will issue a critical circumstances determination at the earliest possible date.[48]

Respondent Selection

The petitioner named 35 companies in China as producers/exporters of vertical shaft engines.[49] In accordance with our standard practice for respondent selection in AD investigations involving NME countries, Commerce selects respondents based on quantity and value (Q&V) questionnaires in cases where it has determined that the number of companies is large and it cannot individually examine each company based upon its resources. After considering the large number of producers and exporters identified in the Petition, and considering the resources that must be used by Commerce to send Q&V questionnaires to all of these companies, Commerce has determined that it does not have sufficient administrative resources to send Q&V questionnaires to all 35 identified producers and exporters. Therefore, Commerce has determined to limit the number of Q&V questionnaires that it will send out to exporters and producers based on CBP data for U.S. imports of vertical shaft engines during the POI under the appropriate Harmonized Tariff Schedule of the United States numbers listed in the ''Scope of the Investigation,'' in the appendix. Accordingly, Commerce will send Q&V questionnaires to the largest producers and exporters that are identified in the CBP data for which there is address information on the record.

On February 4, 2020, Commerce released CBP data on imports of vertical shaft engines from China under administrative protective order (APO) to all parties with access to information protected by APO, and indicated that interested parties wishing to comment on the CBP data must do so within three business days of the publication date of the notice of initiation of this investigation.[50] We further stated that we will not accept rebuttal comments.

Interested parties must submit applications for disclosure under APO in accordance with 19 CFR 351.305(b). Instructions for filing such applications may be found on the Commerce website at *http://enforcement.trade.gov/apo.*

Comments must be filed electronically using ACCESS. An electronically filed document must be received successfully, in its entirety, by ACCESS no later than 5:00 p.m. ET on the deadline noted above. Commerce intends to finalize its decisions regarding respondent selection within 20 days of publication of this notice.

In addition, Commerce will post the Q&V questionnaire along with filing instructions on Enforcement and Compliance's website at *http://www.trade.gov/enforcement/news.asp.* In accordance with the standard practice for respondent selection in AD cases involving NME countries, Commerce intends to base respondent selection on the responses to the Q&V questionnaire that it receives.

Producers/exporters of vertical shaft engines from China that do not receive Q&V questionnaires may still submit a response to the Q&V questionnaire and can obtain a copy of the Q&V questionnaire from Enforcement & Compliance's website. The Q&V questionnaire response must be submitted by the relevant China exporters/producers no later than February 14, 2020. All Q&V questionnaire responses must be filed electronically via ACCESS.

Separate Rates

In order to obtain separate-rate status in an NME investigation, exporters and producers must submit a separate-rate application.[51] The specific requirements for submitting a separate-rate application in a China investigation are outlined in detail in the application itself, which is available on Commerce's website at *http://enforcement.trade.gov/nme/nme-sep-rate.html.* The separate-rate application will be due 30 days after publication of this initiation notice.[52] Exporters and producers who submit a separate-rate application and have been selected as mandatory respondents will be eligible for consideration for separate-rate status only if they respond to all parts of Commerce's AD questionnaire as mandatory respondents. Commerce requires that companies from China submit a response to both the Q&V questionnaire and the separate-rate application by the respective deadlines in order to receive consideration for separate-rate status. Companies not filing a timely Q&V questionnaire response will not receive separate rate consideration.

Use of Combination Rates

Commerce will calculate combination rates for certain respondents that are eligible for a separate rate in an NME investigation. The Separate Rates and Combination Rates Bulletin states: {w}hile continuing the practice of assigning separate rates only to exporters, all separate rates that Commerce will now assign in its NME Investigation will be specific to those producers that supplied the exporter during the period of investigation. Note, however, that one rate is calculated for the exporter and all of the producers which supplied subject merchandise to it during the period of investigation. This practice applies both to mandatory respondents receiving an individually calculated separate rate as well as the pool of non-investigated firms receiving the weighted-average of the individually calculated rates. This practice is referred to as the application of ''combination rates'' because such rates apply to specific combinations of exporters and one or more producers. The cash-deposit rate assigned to an exporter will apply only to merchandise both exported by the firm in question *and* produced by a firm that supplied the exporter during the period of investigation.[53]

Distribution of Copies of the Petition

In accordance with section 732(b)(3)(A) of the Act and 19 CFR 351.202(f), a copy of the public version of the Petition has been provided to the Government of China via ACCESS.

Furthermore, to the extent practicable, Commerce will attempt to provide a copy of the public version of the Petition to each exporter named in the Petition, as provided under 19 CFR 351.203(c)(2).

ITC Notification

Commerce will notify the ITC of its initiation, as required by section 732(d) of the Act.

Preliminary Determinations by the ITC

The ITC will preliminarily determine, within 45 days after the date on which the Petition was filed, whether there is a reasonable indication that imports of

[48] *See Change in Policy Regarding Timing of Issuance of Critical Circumstances Determinations,* 63 FR 55364 (October 15, 1998).

[49] *See* Volume I of the Petition, at Exhibit I–10.

[50] *See* Memorandum, ''Antidumping Duty Investigation of Certain Vertical Shaft Engines between 225cc and 999cc, and Parts Thereof From the People's Republic of China: Release of U.S. Customs and Border Protection Data,'' dated February 4, 2020.

[51] *See* Policy Bulletin 05.1: Separate-Rates Practice and Application of Combination Rates in Antidumping Investigation involving Non-Market Economy Countries (April 5, 2005), available at *http://enforcement.trade.gov/policy/bull05-1.pdf* (Policy Bulletin 05.1).

[52] Although in past investigations this deadline was 60 days, consistent with 19 CFR 351.301(a), which states that ''the Secretary may request any person to submit factual information at any time during a proceeding,'' this deadline is now 30 days.

[53] *See* Policy Bulletin 05.1, at 6 (emphasis added).

vertical shaft engines from China are materially injuring or threatening material injury to a U.S. industry.[54] A negative ITC determination will result in the investigation being terminated.[55] Otherwise, this investigation will proceed according to statutory and regulatory time limits.

Submission of Factual Information

Factual information is defined in 19 CFR 351.102(b)(21) as: (i) Evidence submitted in response to questionnaires; (ii) evidence submitted in support of allegations; (iii) publicly available information to value factors under 19 CFR 351.408(c) or to measure the adequacy of remuneration under 19 CFR 351.511(a)(2); (iv) evidence placed on the record by Commerce; and (v) evidence other than factual information described in (i)–(iv). Any party, when submitting factual information, must specify under which subsection of 19 CFR 351.102(b)(21) the information is being submitted [56] and, if the information is submitted to rebut, clarify, or correct factual information already on the record, to provide an explanation identifying the information already on the record that the factual information seeks to rebut, clarify, or correct.[57] Time limits for the submission of factual information are addressed in 19 CFR 351.301, which provides specific time limits based on the type of factual information being submitted. Please review the regulations prior to submitting factual information in this investigation.

Extensions of Time Limits

Parties may request an extension of time limits before the expiration of a time limit established under 19 CFR 351.301, or as otherwise specified by Commerce. In general, an extension request will be considered untimely if it is filed after the expiration of the time limit established under 19 CFR 351.301. For submissions that are due from multiple parties simultaneously, an extension request will be considered untimely if it is filed after 10:00 a.m. ET on the due date. Under certain circumstances, Commerce may elect to specify a different time limit by which extension requests will be considered untimely for submissions which are due from multiple parties simultaneously. In such a case, Commerce will inform parties in a letter or memorandum of the deadline (including a specified time) by which extension requests must be filed to be considered timely. An extension request must be made in a separate, standalone submission; under limited circumstances Commerce will grant untimely filed requests for the extension of time limits. Parties should review *Extension of Time Limits; Final Rule,* 78 FR 57790 (September 20, 2013), available at *http://www.gpo.gov/fdsys/pkg/FR-2013-09-20/html/2013-22853.htm,* prior to submitting extension requests or factual information in this investigation.

Certification Requirements

Any party submitting factual information in an AD or CVD proceeding must certify to the accuracy and completeness of that information.[58] Parties must use the certification formats provided in 19 CFR 351.303(g).[59] Commerce intends to reject factual submissions if the submitting party does not comply with the applicable certification requirements.

Notification to Interested Parties

Interested parties must submit applications for disclosure under APO in accordance with 19 CFR 351.305. Instructions for filing such applications may be found on the Commerce website at *http://enforcement.trade.gov/apo.*

On January 22, 2008, Commerce published *Antidumping and Countervailing Duty Proceedings: Documents Submission Procedures; APO Procedures,* 73 FR 3634 (January 22, 2008). Parties wishing to participate in this investigation should ensure that they meet the requirements of these procedures (*e.g.,* the filing of letters of appearance as discussed in 19 CFR 351.103(d)).

This notice is issued and published pursuant to sections 732(c)(2) and 777(i) of the Act, and 19 CFR 351.203(c).

Dated: February 4, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Appendix

Scope of the Investigation

The merchandise covered by this investigation consists of spark-ignited, non-road, vertical shaft engines, whether finished or unfinished, whether assembled or unassembled, primarily for riding lawn mowers and zero-tum radius lawn mowers. Engines meeting this physical description may also be for other non-hand-held outdoor power equipment such as, including but not limited to, tow-behind brush mowers, grinders, and vertical shaft generators. The subject engines are spark ignition, single or multiple cylinder, air cooled, internal combustion engines with vertical power take off shafts with a minimum displacement of 225 cubic centimeters (cc) and a maximum displacement of 999cc. Typically, engines with displacements of this size generate gross power of between 6.7 kilowatts (kw) to 42 kw.

Engines covered by this scope normally must comply with and be certified under Environmental Protection Agency (EPA) air pollution controls title 40, chapter I, subchapter U, part 1054 of the Code of Federal Regulations standards for small non-road spark-ignition engines and equipment. Engines that otherwise meet the physical description of the scope but are not certified under 40 CFR part 1054 and are not certified under other parts of subchapter U of the EPA air pollution controls are not excluded from the scope of this proceeding. Engines that may be certified under both 40 CFR part 1054 as well as other parts of subchapter U remain subject to the scope of this proceeding.

For purposes of this investigation, an unfinished engine covers at a minimum a sub-assembly comprised of, but not limited to, the following components: crankcase, crankshaft, camshaft, piston(s), and connecting rod(s). Importation of these components together, whether assembled or unassembled, and whether or not accompanied by additional components such as an oil pan, manifold, cylinder head(s), valve train, or valve cover(s), constitutes an unfinished engine for purposes of this investigation. The inclusion of other products such as spark plugs fitted into the cylinder head or electrical devices (*e.g.,* ignition modules, ignition coils) for synchronizing with the motor to supply tension current does not remove the product from the scope. The inclusion of any other components not identified as comprising the unfinished engine subassembly in a third country does not remove the engine from the scope.

The engines subject to this investigation are typically classified in the Harmonized Tariff Schedule of the United States (HTSUS) at subheadings: 8407.90.1020, 8407.90.1060, and 8407.90.1080. The engine subassemblies that are subject to this investigation enter under HTSUS 8409.91.9990. Engines subject to this investigation may also enter under HTSUS 8407.90.9060 and 8407.90.9080. The HTSUS subheadings are provided for convenience and customs purposes only, and the written description of the merchandise under investigation is dispositive.

International Trade Administration

[A–583–856]

Certain Corrosion-Resistant Steel Products From Taiwan: Affirmative Preliminary Determination of Circumvention Inquiry Involving Malaysia

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) preliminarily determines that imports of certain corrosion-resistant steel products (CORE) completed in Malaysia, using hot-rolled steel (HRS) and/or cold-rolled steel (CRS) flat products manufactured in Taiwan, are circumventing the antidumping duty (AD) order on CORE from Taiwan.

DATES: Applicable February 18, 2020.

FOR FURTHER INFORMATION CONTACT: Shanah Lee and Stephanie Berger, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–6386 and (202) 482–2483, respectively.

SUPPLEMENTARY INFORMATION:

Background

On August 12, 2019, Commerce self-initiated a country-wide anti-circumvention inquiry of the *Taiwan CORE Order*[1] covering Taiwanese-origin HRS and/or CRS exported to Malaysia for completion into CORE and subsequently exported to the United States.[2] In the *Initiation Notice,* Commerce initiated the instant anti-circumvention inquiry based on available information and an analysis pursuant to section 781(b) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.225(h), to determine whether the importation of Taiwanese-origin HRS or CRS substrate for completion into CORE in Malaysia and subsequent sale of that CORE to the United States constitutes circumvention of the *Taiwan CORE Order.*

For a complete description of the record developed since the initiation of this inquiry, *see* the Preliminary Decision Memorandum.[3] A list of topics included in the Preliminary Decision Memorandum is included as Appendix I to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov,* and to all parties in the Central Records Unit, Room B8024 of the main Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *http://enforcement.trade.gov/frn/.* The signed and the electronic versions of the Preliminary Decision Memorandum are identical in content.

Scope of the Order

The products covered by this order are certain flat-rolled steel products, either clad, plated, or coated with corrosion-resistant metals such as zinc, aluminum, or zinc-, aluminum-, nickel- or iron-based alloys, whether or not corrugated or painted, varnished, laminated, or coated with plastics or other non-metallic substances in addition to the metallic coating. For a complete description of the scope of the order, *see* the Preliminary Decision Memorandum.

Scope of the Anti-Circumvention Inquiry

This anti-circumvention inquiry covers CORE completed in Malaysia from HRS and/or CRS substrate input manufactured in Taiwan and subsequently exported from Malaysia to the United States (merchandise subject to this inquiry).

Methodology

Commerce is conducting this anti-circumvention inquiry in accordance with section 781(b) of the Act. Because certain interested parties did not cooperate to the best of their abilities in responding to Commerce's requests for information, we have based parts of our preliminary determination on the facts available, with adverse inferences, pursuant to sections 776(a) and (b) of the Act. For a full description of the methodology underlying Commerce's preliminary determination, *see* the Preliminary Decision Memorandum.

Preliminary Finding

As detailed in the Preliminary Decision Memorandum, we preliminarily determine that CORE completed in Malaysia from HRS and/or CRS substrate sourced from Taiwan is circumventing the *Taiwan CORE Order.* We therefore preliminarily determine that it is appropriate to include this merchandise within the *Taiwan CORE Order* and to instruct U.S. Customs and Border Protection (CBP) to suspend any entries of CORE from Malaysia produced from HRS and/or CRS from Taiwan.

Suspension of Liquidation

As stated above, Commerce has made a preliminary affirmative determination that imports of CORE completed in Taiwan, using HRS and/or CRS flat products manufactured in China, are circumventing the *Taiwan CORE Order.* In accordance with 19 CFR 351.225(l)(2), Commerce will direct CBP to suspend liquidation and to require a cash deposit of estimated duties on unliquidated entries of CORE produced in Malaysia, as appropriate, that were entered, or withdrawn from warehouse, for consumption on or after August 12, 2019, the date of initiation of the anti-circumvention inquiry. The suspension of liquidation instructions will remain in effect until further notice.

CORE produced in Malaysia from HRS and/or CRS that is not of Taiwanese-origin is not subject to this inquiry. However, imports of such merchandise are subject to certification requirements, and cash deposits may be required if the certification requirements are not satisfied. CORE completed in Malaysia from HRS and/or CRS from China also has preliminarily been found to be circumventing the AD/CVD orders on CORE from China and such merchandise is subject to similar certification requirements.[4] Additionally, if an importer imports CORE from Malaysia and claims that the CORE was not produced from HRS and/or CRS substrate manufactured in Taiwan, the importer and exporter are required to meet the certification and documentation requirements described

[1] *See Certain Corrosion-Resistant Steel Flat Products from India, Italy, the People's Republic of China, the Republic of Korea, and Taiwan: Amended Final Affirmative Antidumping Duty Determination for India and Taiwan, and Antidumping Duty Orders,* 81 FR 48390 (July 25, 2016) (*Taiwan CORE Order*).

[2] The notice of initiation was subsequently published in the **Federal Register** on August 21, 2019. *See Corrosion-Resistant Steel Products from Taiwan: Initiation of Anti-Circumvention Inquiry on the Antidumping Duty Order,* 84 FR 43581 (August 21, 2019) (*Initiation Notice*) and accompanying Memorandum, ''Certain Corrosion-Resistant Steel Products from Taiwan: Initiation of Anti-Circumvention Inquiry on the Antidumping Duty Order,'' dated August 12, 2019.

[3] *See* Memorandum, ''Decision Memorandum for the Preliminary Determination in the Anti-Circumvention Inquiry of Certain Corrosion-Resistant Steel Products from Taiwan,'' dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

[4] *See* **Federal Register** notice, ''*Certain Corrosion-Resistant Steel Products from Taiwan: Affirmative Preliminary Determination of Anti-Circumvention Inquiry on the Antidumping Duty Order,*'' dated concurrently with this notice.

in Appendices II, III and IV, in order for cash deposits pursuant to the *Taiwan CORE Order* not to be required.

In the situation where no certification is provided for an entry, and AD/CVD orders from two countries (China and Taiwan) potentially apply to that entry, Commerce intends to instruct CBP to suspend liquidation of the entry and collect cash deposits at the rates applicable to the *China CORE Orders*[5] (*i.e.,* the AD rate established for the China-wide entity (199.43 percent) and the CVD rate established for all-other Chinese producers/exporters (39.05 percent)).[6] This is to prevent evasion, given that the *CORE China Orders* rates are higher than the AD rate established for CORE from Taiwan. In the situation where a certification is provided for the AD/CVD orders on CORE from China (stating that the merchandise was not produced from HRS and/or CRS from China), but no other certification is provided, then Commerce intends to instruct CBP to suspend the entry and collect cash deposits at the AD all-others rate applicable to the *Taiwan CORE Order* (*i.e.,* 3.66 percent).

Commerce preliminarily determines that the following companies are not eligible for the certification process: Hsin Kuang Steel Co Ltd; FIW Steel Sdn Bhd; NS BlueScope Malaysia Sdn Bhd; and YKGI/Yung Kong Galv. Ind/Starshine Holdings Sdn Bhd/ASTEEL Sdn Bhd. Additionally, exporters are not eligible to certify shipments of merchandise produced by above-listed companies. Further, imports of CORE from Malaysia that is produced and/or exported by these ineligible companies are similarly ineligible for the certification process with regard to those imports.

Verification

As provided in 19 CFR 351.307, Commerce intends to verify information relied upon in making its final determination.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last final verification report is issued in this anti-circumvention inquiry, unless the Secretary alters the time limit. Rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than five days after the deadline date for case briefs.[7] Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this anti-circumvention inquiry are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at the U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230, at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

International Trade Commission Notification

Commerce, consistent with section 781(e) of the Act, has notified the International Trade Commission (ITC) of this preliminary determination to include the merchandise subject to this anti-circumvention inquiry within the *Taiwan CORE Order.* Pursuant to section 781(e) of the Act, the ITC may request consultations concerning Commerce's proposed inclusion of the merchandise subject to this inquiry. If, after consultations, the ITC believes that a significant injury issue is presented by the proposed inclusion, it will have 60 days from the date of notification by Commerce to provide written advice.

Notification to Interested Parties

This determination is issued and published in accordance with section 781(b) of the Act and 19 CFR 351.225(f).

Dated: February 7, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Appendix I

List of Topics Discussed in the Preliminary Decision Memorandum

Appendix II

Certification Requirements

If an importer imports certain corrosion-resistant steel products (CORE) from Malaysia and claims that the CORE was not produced from hot-rolled steel and/or cold-rolled steel substrate (substrate) manufactured in Taiwan, the importer is required to complete and maintain the importer certification attached hereto as Appendix III and all supporting documentation. Where the importer uses a broker to facilitate the entry process, it should obtain the entry number from the broker. Agents of the importer, such as brokers, however, are not permitted to make this certification on behalf of the importer.

The exporter is required to complete and maintain the exporter certification, attached as Appendix III, and is further required to provide the importer a copy of that certification and all supporting documentation.

For shipments and/or entries on or after August 12, 2019 through March 7, 2020 for which certifications are required, importers and exporters should complete the required certification within 30 days of the publication of this notice in the **Federal Register**. Accordingly, where appropriate, the relevant bullet in the certification should be edited to reflect that the certification was completed within the time frame specified above. For example, the bullet in the importer certification that reads: ''This certification was completed at or prior to the time of Entry,'' could be edited as follows: ''The imports referenced herein entered before March 8, 2020. This certification was completed on mm/dd/yyyy, within 30 days of the **Federal Register** notice publication of the preliminary determination of circumvention.'' Similarly, the bullet in the exporter certification that reads, ''This certification was completed at or prior to the time of shipment,'' could be edited as follows: ''The shipments/products referenced herein shipped before March 8, 2020. This certification was completed on mm/dd/yyyy, within 30 days of the **Federal Register** notice publication of the preliminary determination of circumvention. For such entries/

[5] *See Certain Corrosion-Resistant Steel Flat Products from India, Italy, the People's Republic of China, the Republic of Korea, and Taiwan: Amended Final Affirmative Antidumping Duty Determination for India and Taiwan, and Antidumping Duty Orders,* 81 FR 48390 (July 25, 2016); *see also Certain Corrosion-Resistant Steel Products from India, Italy, Republic of Korea, and the People's Republic of China: Countervailing Duty Order,* 81 FR 48387 (July 25, 2016) (collectively, *China CORE Orders*).

[6] *See China CORE Orders.*

[7] *See* 19 CFR 351.309; *see also* 19 CFR 351.303 (for general filing requirements).

shipments, importers and exporters each have the option to complete a blanket certification covering multiple entries/shipments, individual certifications for each entry/shipment, or a combination thereof.

For shipments and/or entries on or after March 8, 2020, for which certifications are required, importers should complete the required certification at or prior to the date of Entry and exporters should complete the required certification and provide it to the importer at or prior to the date of shipment.

The importer and Malaysian exporter are also required to maintain sufficient documentation supporting their certifications. The importer will not be required to submit the certifications or supporting documentation to U.S. Customs and Border Protection (CBP) as part of the entry process at this time. However, the importer and the exporter will be required to present the certifications and supporting documentation, to Commerce and/or CBP, as applicable, upon request by the respective agency. Additionally, the claims made in the certifications and any supporting documentation are subject to verification by Commerce and/or CBP. The importer and exporter are required to maintain the certifications (the importer must retain both certifications) and supporting documentation for the later of (1) a period of five years from the date of entry or (2) a period of three years after the conclusion of any litigation in United States courts regarding such entries.

In the situation where no certification is provided for an entry, and AD/CVD orders from two countries (China and Taiwan) potentially apply to that entry, Commerce intends to instruct CBP to suspend the entry and collect cash deposits at the rate applicable to the *China CORE Orders* (*i.e.,* the AD rate established for the China-wide entity (199.43 percent) and the CVD rate established for all-other Chinese producers/exporters (39.05 percent)).[8] In the situation where a certification is provided for the AD/CVD orders on CORE from China (stating that the merchandise was not produced from HRS and/or CRS from China), but no other certification is provided, then Commerce intends to instruct CBP to suspend the entry and collect cash deposits at the AD all-others rate applicable to the AD order on CORE from Taiwan (*i.e.,* 3.66%).

Appendix III

Exporter Certification

I hereby certify that:

- My name is {COMPANY OFFICIAL'S NAME} and I am an official of {NAME OF EXPORTING COMPANY}, located at {ADDRESS OF EXPORTING COMPANY};
- I have direct personal knowledge of the facts regarding the production and exportation of the corrosion resistant steel products identified below. ''Direct personal knowledge'' refers to facts the certifying party is expected to have in its own books and records. For example, an exporter should have direct personal knowledge of the producer's identity and location.
- The corrosion resistant steel products covered by this certification were produced by {NAME OF PRODUCING COMPANY}, located at {ADDRESS OF PRODUCING COMPANY}; *for each additional company, repeat:* {NAME OF PRODUCING COMPANY}, located at {ADDRESS OF PRODUCING COMPANY}
- The corrosion resistant steel products produced in Malaysia were not manufactured using hot-rolled steel and/or cold-rolled steel substrate from Taiwan;
- This certification applies to the following sales:

Producer	Invoice No.	Invoice line item No.

- The corrosion resistant steel products covered by this certification were sold to {NAME OF U.S. CUSTOMER}, located at {ADDRESS OF U.S. CUSTOMER}.
- The corrosion resistant steel products covered by this certification were shipped to {NAME OF PARTY TO WHOM MERCHANDISE WAS SHIPPED}, located at {ADDRESS OF SHIPMENT}.
- I understand that {NAME OF EXPORTING COMPANY} is required to maintain a copy of this certification and sufficient documentation supporting this certification (*i.e.,* documents maintained in the normal course of business, or documents obtained by the certifying party, for example, mill certificates, production records, invoices, etc.) for the later of (1) a period of five years from the date of entry or (2) a period of three years after the conclusion of any litigation in the United States courts regarding such entries;
- I understand that {NAME OF EXPORTING COMPANY} must provide a copy of this Exporter Certification to the U.S. importer by the time of shipment;
- I understand that {NAME OF EXPORTING COMPANY} is required to provide a copy of this certification and supporting records, upon request, to U.S. Customs and Border Protection (CBP) and/or the Department of Commerce (Commerce);
- I understand that the claims made herein, and the substantiating documentation, are subject to verification by CBP and/or Commerce;
- I understand that failure to maintain the required certification, and/or failure to substantiate the claims made herein, and/or failure to allow CBP and/or Commerce to verify the claims made herein, may result in a de facto determination that all sales to which this certification applies are within the scope of the antidumping/countervailing duty order on corrosion resistant steel products from Taiwan. I understand that such finding will result in:
  - Suspension of all unliquidated entries (and entries for which liquidation has not become final) for which these requirements were not met; and
  - the requirement that the importer post applicable antidumping duty and/or countervailing duty cash deposits (as appropriate) equal to the rates as determined by Commerce;
  - the revocation of {NAME OF EXPORTING COMPANY}'s privilege to certify future exports of corrosion resistant steel products from Malaysia as not manufactured using hot-rolled steel and/or cold-rolled steel substrate from Taiwan.
- This certification was completed at or prior to the time of shipment; and
- I am aware that U.S. law (including, but not limited to, 18 U.S.C. 1001) imposes criminal sanctions on individuals who knowingly and willfully make materially false statements to the U.S. government.

Importer Certification

I hereby certify that:

- My name is {IMPORTING COMPANY OFFICIAL'S NAME} and I am an official of {NAME OF IMPORTING COMPANY}, located at {ADRESS OF IMPORTING COMPANY}.
- I have direct personal knowledge of the facts regarding the importation into the Customs territory of the United States of the corrosion resistant steel products produced in Malaysia that entered under entry number(s), identified below, and which are covered by this certification. ''Direct personal knowledge'' refers to facts the certifying party is expected to have in its own records. For example, the importer should have direct personal knowledge of the importation of the product (*e.g.,* the name of the exporter) in its records;
- The corrosion resistant steel products covered by this certification were exported by {NAME OF EXPORTING COMPANY}, located at {ADDRESS OF EXPORTING COMPANY}.

If the importer is acting on behalf of the first U.S. customer, complete this paragraph:

- The corrosion resistant steel products

[8] *See China CORE Orders.*

covered by this certification were imported by {NAME OF IMPORTING COMPANY} on behalf of {NAME OF U.S. CUSTOMER}, located at {ADDRESS OF U.S. CUSTOMER}.
- The corrosion resistant steel products covered by this certification were shipped to {NAME OF PARTY TO WHOM MERCHANDISE WAS FIRST SHIPPED IN THE UNITED STATES}, located at {ADDRESS OF SHIPMENT}.
- I have personal knowledge of the facts regarding the production of the corrosion resistant steel products identified below. ''Personal knowledge'' includes facts obtained from another party, (*e.g.,* correspondence received by the importer (or exporter) from the producer regarding the country of manufacture of the imported products);
- The corrosion resistant steel products covered by this certification were produced by {NAME OF PRODUCING COMPANY}, located at {ADDRESS OF PRODUCING COMPANY}; *for each additional company, repeat:* {NAME OF PRODUCING COMPANY}, located at {ADDRESS OF PRODUCING COMPANY}.
- The corrosion resistant steel products covered by this certification were not manufactured using hot-rolled steel and/or cold-rolled steel substrate from Taiwan.
- This certification applies to the following entries:

Producer	Entry summary No.	Entry summary line item No.	Invoice No.	Invoice Line Item No.

- I understand that {NAME OF IMPORTING COMPANY} is required to maintain a copy of this certification and sufficient documentation supporting this certification (*i.e.,* documents maintained in the normal course of business, or documents obtained by the certifying party, for example, mill certificates, production records, invoices, etc.) for the later of (1) a period of five years from the date of entry or (2) a period of three years after the conclusion of any litigation in the United States courts regarding such entries;
- I understand that {NAME OF IMPORTING COMPANY} is required to provide this certification and supporting records, upon request, to U.S. Customs and Border Protection (CBP) and/or the Department of Commerce (Commerce);
- I understand that {NAME OF IMPORTING COMPANY} is required to maintain a copy of the exporter's certification (attesting to the production and/or export of the imported merchandise identified above), and any supporting records provided by the exporter to the importer, for the later of (1) a period of five years from the date of entry or (2) a period of three years after the conclusion of any litigation in United States courts regarding such entries;
- I understand that {NAME OF IMPORTING COMPANY}is required to maintain and, upon request, provide a copy of the exporter's certification and any supporting records provided by the exporter to the importer, to CBP and/or Commerce;
- I understand that the claims made herein, and the substantiating documentation, are subject to verification by CBP and/or Commerce;
- I understand that failure to maintain the required certifications, and/or failure to substantiate the claims made herein, and/or failure to allow CBP and/or Commerce to verify the claims made herein, may result in a de facto determination that all entries to which this certification applies are within the scope of the antidumping/countervailing duty order on corrosion resistant steel products from Taiwan. I understand that such finding will result in:
  - Suspension of liquidation of all unliquidated entries (and entries for which liquidation has not become final) for which these requirements were not met; and;
  - the requirement that the importer post applicable antidumping duty and/or countervailing duty cash deposits (as appropriate) equal to the rates determined by Commerce;

the revocation of {NAME OF IMPORTING COMPANY}'s privilege to certify future imports of corrosion resistant steel products from Malaysia as not manufactured using hot-rolled steel and/or cold-rolled steel substrate from Taiwan.
- I understand that agents of the importer, such as brokers, are not permitted to make this certification;
- This certification was completed at or prior to the time of Entry; and
- I am aware that U.S. law (including, but not limited to, 18 U.S.C. 1001) imposes criminal sanctions on individuals who knowingly and willfully make materially false statements to the U.S. government.

Carbon and Alloy Steel Threaded Rod From India: Final Affirmative Determination of Sales at Less Than Fair Value

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) determines that carbon and alloy steel threaded rod (steel threaded rod) from India is being, or is likely to be, sold in the United States at less than fair value (LTFV).

DATES: Applicable February 18, 2020.

FOR FURTHER INFORMATION CONTACT: Annathea Cook or Jerry Huang, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–0250 or (202) 482–4047, respectively.

SUPPLEMENTARY INFORMATION:

Background

On September 25, 2019, Commerce published the *Preliminary Determination* in this LTFV investigation.[1] On January 9, 2020, we issued a Post-Preliminary Determination with respect to the petitioner's particular market situation allegation.[2] We invited interested parties to comment on the *Preliminary Determination* and Post-Preliminary Determination. A summary of the events that occurred since Commerce published the *Preliminary Determination,* as well as a full discussion of the issues raised by parties for this final determination, may be found in the Issues and Decision Memorandum.[3]

[1] *See Carbon and Alloy Steel Threaded Rod from India: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of provisional Measures,* 84 FR 50376 (September 25, 2019) (*Preliminary Determination*), and accompanying Preliminary Decision Memorandum.

[2] *See* Memorandum, ''Antidumping Duty Investigation of Carbon and Alloy Steel Threaded Rod from India: Decision on Particular Market Situation Allegation,'' dated January 9, 2020 (Post-Preliminary Determination).

[3] *See* Memorandum, ''Issues and Decision Memorandum for the Final Determination in the Less-Than-Fair-Value Investigation of Carbon and Alloy Steel Threaded Rod from India,'' dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to register users at *http://access.trade.gov,* and to all parties in the Central Records Unit, room B8024 of the main Commerce building. In addition, a complete version of the Issues and Decision Memorandum can be access directly at *http://enforcement.trade.gov.* The signed and electronic versions of the Issues and Decision Memorandum are identical in content.

Period of Investigation

The period of investigation is January 1, 2018 through December 31, 2018.

Scope of the Investigation

The products covered by this investigation are steel threaded rods from India. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

During the course of this investigation and the concurrent countervailing duty (CVD) investigation of steel threaded rod from India, the concurrent antidumping duty (AD) and CVD investigations of steel threaded rod from the People's Republic of China, and the concurrent AD investigations of steel threaded rod from Taiwan and Thailand, certain interested parties commented on the scope of the investigations as it appeared in the *Initiation Notices.*[4]

On July 22, 2019, we issued a Preliminary Scope Memorandum.[5] Interested parties' scope-related case briefs were due on August 28, 2019.[6] Because we did not receive any comments on the Preliminary Scope Memorandum, we are adopting the proposed scope language in this final determination, *see* Appendix I.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs submitted by interested parties in this investigation are addressed in the Issues and Decision Memorandum. For a list of these issues, *see* Appendix II.

Verification

Between October and December 2019, we conducted verification of the sales and cost of production data reported by the participating respondent in this investigation, Mangal Steel Enterprises (Mangal), as well as the sales data reported by Mangal's U.S. affiliate, North American Steel Connection, in accordance with section 783(i) of Tariff Act of 1930, as amended (the Act).[7]

Changes Since the Preliminary Determination

Based on our analysis of the comments received and our findings at verification, we made certain changes to the margin calculations for Mangal since the *Preliminary Determination.* For a discussion of these changes, *see* the Issues and Decision Memorandum.

Additionally, for purposes of this final determination, Commerce determined Daksh Fasteners' margin on the basis of adverse facts available (AFA), pursuant to sections 776(a)(2)(A)–(C) and 776(b) of the Act. For further information, *see* the Issues and Decision Memorandum.

All-Others Rate

Section 735(c)(5)(A) of the Act provides that the estimated weighted-average dumping margin for all other producers and exporters not individually investigated shall be equal to the weighted average of the estimated weighted-average dumping margins established for individually investigated exporters and producers, excluding any margins that are zero, *de minimis,* or determined entirely under section 776 of the Act. Because the final rate determined for Daksh Fasteners is based entirely on AFA, we based the all-others rate on the rate calculated for Mangal.

Final Determination

Commerce determines that the weighted-average dumping margins are as follows:

Exporter/producer	Estimated weighted-average dumping margin (percent)	Cash deposit rate (adjusted for export subsidy offset(s))[8] (percent)
Daksh Fasteners[9]	28.34	22.86
Mangal Steel Enterprise Limited	2.47	0.00
All Others	2.47	0.00

Continuation of Suspension of Liquidation

In accordance with section 735(c)(1)(B) of the Act, Commerce will instruct U.S. Customs and Border Protection (CBP) to continue to suspend liquidation of all appropriate entries of steel threaded rod from India, as described in Appendix I of this notice, which are entered or withdrawn from warehouse for consumption on or after September 25, 2019, the date of

[4] *See Carbon and Alloy Steel Threaded Rod from India, Taiwan, Thailand, and the People's Republic of China: Initiation of Less-Than-Fair-Value Investigations,* 84 FR 10034 (March 19, 2019); *Carbon and Alloy Steel Threaded Rod from India and the People's Republic of China: Initiation of Countervailing Duty Investigations,* 84 FR 10040 (March 19, 2019) (collectively, *Initiation Notices*).

[5] *See* Memorandum, ''Carbon and Alloy Steel Threaded Rod from India, Taiwan, Thailand, and the People's Republic of China: Scope Comments Decision Memorandum for the Preliminary Determinations,'' dated July 22, 2019.

[6] *See* Preliminary Scope Decision Memorandum at 3.

[7] *See* Memorandum, ''Verification of Cost Response of Mangal Steel Enterprises Ltd. in the Antidumping Duty Investigation of Carbon and Alloy Steel Threaded Rod from India,'' dated December 10, 2019; Memorandum, ''Verification of the Sales Response of Mangal Steel Enterprise Limited in the Antidumping Duty Investigation of Carbon and Alloy Steel Threaded Rod from India,'' dated January 3, 2020; and Memorandum, ''Verification of the Constructed Export Price (CEP) Sales Response of North American Steel Connection in the Antidumping Duty Investigation of Carbon and Alloy Steel Threaded Rod from India,'' dated January 3, 2020.

[8] As noted in the ''Continuation of Suspension of Liquidation'' section, we are adjusting the cash deposit rates to take into account the export subsidy rates found in the companion CVD investigation. Specifically, for Mangal and all others, we adjusted the cash deposit rates by the export contingent subsidy rate calculated for Mangal in that investigation (*i.e.,* 5.48 percent). We also adjusted the cash deposit rate for Daksh Fasteners by the export contingent subsidy rate for Mangal, because it is the lowest export subsidy rate determined for any party in the companion CVD proceeding.

[9] As explained in the Issues and Decision Memorandum, this company is receiving a rate based on total AFA because it did not respond to our AD questionnaire.

publication in the **Federal Register** of the affirmative *Preliminary Determination.*

Pursuant to section 735(c)(1)(B)(ii) of the Act and 19 CFR 351.210(d), we will instruct CBP to require a cash deposit for entries of subject merchandise equal to the estimated weighted-average dumping margin as follows: (1) The cash deposit rate for the respondents listed above will be equal to the company-specific estimated weighted-average dumping margins determined in this final determination; (2) if the exporter is not a respondent identified above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin, *i.e.,* 2.47 percent. These suspension of liquidation instructions will remain in effect until further notice.

In the event that a CVD order is issued, and suspension of liquidation is resumed in the companion CVD investigation on steel threaded rod from India, Commerce will instruct CBP to require cash deposits adjusted by the amount of export subsidies, as appropriate. These adjustments are reflected in the final column of the rate chart above. Until such suspension of liquidation is resumed in the companion CVD investigation, and so long as suspension of liquidation continues under this AD investigation, the cash deposit rates for this AD investigation will be the rates identified in the estimated weighted-average dumping margin column in the rate chart above.

Disclosure

Commerce will disclose to interested parties the calculations performed in connection with a final determination within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of the notice of final determination in the **Federal Register**, in accordance with 19 CFR 351.224(b).

International Trade Commission Notification

In accordance with section 735(d) of the Act, we will notify the U.S. International Trade Commission (ITC) of the final affirmative determination of sales at LTFV. Because the final determination in this proceeding is affirmative, in accordance with section 735(b)(2) of the Act, the ITC will make its final determination as to whether the domestic industry in the United States is materially injured, or threatened with material injury, by reason of imports of steel threaded rod from India no later than 45 days after this final determination. If the ITC determines that material injury, or threat of material injury, does not exist, the proceeding will be terminated, and all cash deposits will be refunded. If the ITC determines that such injury does exist, Commerce will issue an AD duty order directing CBP to assess, upon further instruction by Commerce, AD duties on all imports of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the effective date of the suspension of liquidation.

Notification Regarding Administrative Protective Order

This notice serves as a reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

Notification to Interested Parties

This determination is issued and published in accordance with sections 735(d) and 777(i)(1) of the Act, and 19 CFR 351.210(c).

Dated: February 7, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise covered by the scope of this investigation is carbon and alloy steel threaded rod. Steel threaded rod is certain threaded rod, bar, or studs, of carbon or alloy steel, having a solid, circular cross section of any diameter, in any straight length. Steel threaded rod is normally drawn, cold-rolled, threaded, and straightened, or it may be hot-rolled. In addition, the steel threaded rod, bar, or studs subject to these investigations are non-headed and threaded along greater than 25 percent of their total actual length. A variety of finishes or coatings, such as plain oil finish as a temporary rust protectant, zinc coating (*i.e.,* galvanized, whether by electroplating or hot-dipping), paint, and other similar finishes and coatings, may be applied to the merchandise.

Steel threaded rod is normally produced to American Society for Testing and Materials (ASTM) specifications ASTM A36, ASTM A193 B7/B7m, ASTM A193 B16, ASTM A307, ASTM A320 L7/L7M, ASTM A320 L43, ASTM A354 BC and BD, ASTM A449, ASTM F1554–36, ASTM F1554–55, ASTM F1554 Grade 105, American Society of Mechanical Engineers (ASME) specification ASME B18.31.3, and American Petroleum Institute (API) specification API 20E. All steel threaded rod meeting the physical description set forth above is covered by the scope of these investigations, whether or not produced according to a particular standard.

Subject merchandise includes material matching the above description that has been finished, assembled, or packaged in a third country, including by cutting, chamfering, coating, or painting the threaded rod, by attaching the threaded rod to, or packaging it with, another product, or any other finishing, assembly, or packaging operation that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the threaded rod.

Carbon and alloy steel threaded rod are also included in the scope of the investigation whether or not imported attached to, or in conjunction with, other parts and accessories such as nuts and washers. If carbon and alloy steel threaded rod are imported attached to, or in conjunction with, such non-subject merchandise, only the threaded rod is included in the scope.

Excluded from the scope of the investigation are: (1) Threaded rod, bar, or studs which are threaded only on one or both ends and the threading covers 25 percent or less of the total actual length; and (2) stainless steel threaded rod, defined as steel threaded rod containing, by weight, 1.2 percent or less of carbon and 10.5 percent or more of chromium, with our without other elements.

Specifically excluded from the scope of the investigation is threaded rod that is imported as part of a package of hardware in conjunction with a ready-to-assemble piece of furniture. Steel threaded rod is currently classifiable under subheadings 7318.15.5051, 7318.15.5056, and 7318.15.5090 of the Harmonized Tariff Schedule of the United States (HTSUS). Subject merchandise may also enter under subheading 7318.15.2095 and 7318.19.0000 of the HTSUS. The HTSUS subheadings are provided for convenience and U.S. Customs purposes only. The written description of the scope is dispositive.

Alloy and Certain Carbon Steel Threaded Rod From the People's Republic of China: Final Affirmative Determination of Sales at Less Than Fair Value

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) determines that imports of alloy and certain carbon steel threaded rod (threaded rod) from the People's Republic of China (China) are being, or are likely to be, sold in the United States at less than fair value (LTFV). The final dumping margins of sales at LTFV are listed in the ''Final Determination'' section of this notice.

DATES: Applicable February 18, 2020.

FOR FURTHER INFORMATION CONTACT: Yang Jin Chun, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–5760.

SUPPLEMENTARY INFORMATION:

Background

Commerce published the *Preliminary Determination* in the LTFV investigation of threaded rod from China on September 25, 2019.[1] For a complete description of the events that followed the *Preliminary Determination, see* the Issues and Decision Memorandum.[2]

Period of Investigation

The period of investigation is July 1, 2018 through December 31, 2018.

Scope of the Investigation

The product covered by this investigation is threaded rod from China. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

On July 22, 2019, we issued a Preliminary Scope Memorandum.[3] The scope case briefs were due on August 28, 2019.[4] We received no scope case briefs from interested parties. Therefore, Commerce has made no changes to the scope of this investigation since the *Preliminary Determination.*

Verification

As provided in section 782(i) of the Tariff Act of 1930, as amended (the Act), we verified the U.S. sales and factors of production information submitted by Ningbo Zhongjiang High Strength Bolts Co., Ltd. (Zhongjiang) [5] and Zhejiang Junyue Standard Part Co., Ltd. (Junyue) [6] in November 2019. We used standard verification procedures, including an examination of relevant accounting and production records, and original source documents provided by these two respondents.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs that were submitted by parties in this investigation are addressed in the Issues and Decision Memorandum. For a list of the issues raised by interested parties and addressed in the Issues and Decision Memorandum, *see* Appendix II to this notice. The Issues and Decision Memorandum is a public document and is made available to the public via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *http://access.trade.gov,* and to all parties in the Central Records Unit, Room B8024 of the main Commerce building. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at *https://enforcement.trade.gov/frn/index.html.* The signed and electronic versions of the Issues and Decision Memorandum are identical in content.

China-Wide Entity and Use of Adverse Facts Available (AFA)

We continue to find that the use of facts available is warranted in determining the rate of the China-wide entity pursuant to sections 776(a)(1) and (a)(2)(A)–(C) of the Act.[7] Further, use of AFA is warranted because the China-wide entity did not cooperate to the best of its ability to comply with our requests for information and, accordingly, we applied adverse inferences in selecting from the facts available, pursuant to section 776(b) of the Act and 19 CFR 351.308(a).

Changes From the Preliminary Determination

Based on our analysis of the comments received and our findings at verification, we made certain changes to the dumping margin calculations for Junyue and Zhongjiang.[8] Consistent with our *Preliminary Determination,* as AFA, we continued to rely on the highest petition rate of 59.45 percent to determine the China-wide entity's dumping margin.[9]

Combination Rates

Consistent with the *Preliminary Determination* [10] and Policy Bulletin 05.1,[11] Commerce calculated combination rates for the respondents that are eligible for a separate rate in this investigation.

Final Determination

Commerce determines that the following weighted-average dumping margins exist:

[1] *See Alloy and Certain Carbon Steel Threaded Rod from the People's Republic of China: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination and Extension of Provisional Measures,* 84 FR 50379 (September 25, 2019) (*Preliminary Determination*), and accompanying Preliminary Decision Memorandum (PDM).

Disclosure

We intend to disclose the calculations performed to parties in this proceeding within five days after public announcement of the final determination in accordance with 19 CFR 351.224(b).

Continuation of Suspension of Liquidation

In accordance with sections 735(c)(1)(B) of the Act, Commerce will instruct U.S. Customs and Border Protection (CBP) to continue to suspend liquidation of all entries of threaded rod from China, as described in Appendix I of this notice, which were entered or withdrawn from warehouse for consumption on or after September 25, 2019, the date of publication of the *Preliminary Determination* of this investigation in the **Federal Register**.

Pursuant to section 735(c)(1)(B)(ii) of the Act, upon the publication of this notice, Commerce will instruct CBP to require a cash deposit equal to the weighted-average amount by which the normal value exceeds U.S. price as follows: (1) The cash deposit rate for the exporter/producer combinations listed in the table above will be the rate identified in the table; (2) for all combinations of Chinese exporters/producers of subject merchandise that have not received their own separate rate above, the cash-deposit rate will be the cash deposit rate established for the China-wide entity; and (3) for all non-Chinese exporters of subject merchandise which have not received their own separate rate above, the cash-deposit rate will be the cash deposit rate applicable to the Chinese exporter/producer combination that supplied that non-Chinese exporter. These suspension of liquidation instructions will remain in effect until further notice.

To determine the cash deposit rate, Commerce normally adjusts the estimated weighted-average dumping margin by the amount of domestic subsidy pass-through and export subsidies determined in a companion countervailing duty (CVD) proceeding when CVD provisional measures are in effect. Accordingly, where Commerce makes an affirmative determination for domestic subsidy pass-through or export subsidies, Commerce offsets the calculated estimated weighted-average dumping margin by the appropriate rate(s). In this case, we have made a negative determination for domestic subsidy pass-through for all respondents, but we have also found export subsidies for all respondents. In particular, Commerce issued the final determination of the concurrent CVD investigation of threaded rod from China, in which it found export-contingent subsidies of 10.54 percent for Zhongjiang and 31.62 percent for Junyue.[13] Therefore, we deducted export subsidies from the final margins and adjusted the cash deposit rates.[14] However, suspension of liquidation for provisional measures in the companion CVD case has been discontinued;[15] therefore, we are not instructing CBP to collect cash deposits based upon the adjusted estimated weighted-average dumping margin for those export subsidies at this time.

[12] Commerce preliminarily denied the separate rate eligibility for Jiaxing Xingcheng Electronics Co., Ltd., Ningbo Panxiang Imp & Exp Co., Ltd., Ningbo Zhonglian Fastener Co., Ltd., and Ningbo Zhong Xin Angora Spinning Mill. *See Preliminary Determination,* 84 FR at 50380, n. 12. For the final determination, Commerce continues to deny their separate rate eligibility and treat them as part of the China-wide entity.

[13] *See* the unpublished **Federal Register** notice entitled ''Carbon and Alloy Steel Threaded Rod from the People's Republic of China: Final Affirmative Countervailing Duty Determination,'' dated concurrently with this notice.

[14] *See* Memorandum, ''Alloy and Certain Carbon Steel Threaded Rod from the People's Republic of China: Final Separate Rate for Non-Selected Respondents,'' dated concurrently with this notice for the cash deposit rate adjustment for non-selected separate rate respondents.

[15] *See* CBP Message No. 9331312 dated November 27, 2019, available at *https://aceservices.cbp.dhs.gov/adcvdweb/ad_cvd_msgs/27895.*

International Trade Commission Notification

In accordance with section 735(d) of the Act, we will notify the International Trade Commission (ITC) of our final affirmative determination of sales at LTFV. Because the final determination in this proceeding is affirmative, in accordance with section 735(b)(2) of the Act, the ITC will make its final determination as to whether the domestic industry in the United States is materially injured, or threatened with material injury, by reason of imports of subject merchandise from China no later than 45 days after our final determination. If the ITC determines that such injury does not exist, this proceeding will be terminated and all cash deposits posted will be refunded or canceled. If the ITC determines that such injury does exist, Commerce will issue an antidumping duty order directing CBP to assess, upon further instruction by Commerce, antidumping duties on all imports of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the effective date of the suspension of liquidation.

Notification Regarding Administrative Protective Order

This notice will serve as a reminder to the parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

Notification to Interested Parties

This determination is issued and published in accordance with sections 735(d) and 777(i)(1) of the Act, and 19 CFR 351.210(c).

Dated: February 7, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise covered by the scope of this investigation is alloy and certain carbon steel threaded rod. Alloy and certain carbon steel threaded rod are certain threaded rod, bar, or studs, of carbon or alloy steel, having a solid, circular cross section of any diameter, in any straight length. Alloy and certain carbon steel threaded rod are normally drawn, cold-rolled, threaded, and straightened, or it may be hot-rolled. In addition, the alloy and certain carbon steel threaded rod, bar, or studs subject to this investigation are non-headed and threaded along greater than 25 percent of their total actual length. A variety of finishes or coatings, such as plain oil finish as a temporary rust protectant, zinc coating (*i.e.,* galvanized, whether by electroplating or hot-dipping), paint, and other similar finishes and coatings, may be applied to the merchandise. Alloy Steel threaded rod is normally produced to American Society for Testing and Materials (ASTM) specifications A193 B7/B7m, A193 B16, A320 L7/L7m, A320 L43, A354 BC and BD, and F1554 Grade 105. Other specifications are Society of Automotive Engineers (SAE) specification 1429 grades 5 and 8, International Organization for Standardization (ISO) specification 898 class 8.8 and 10.9, and American Petroleum Institute (API) specification 20E. Certain carbon steel threaded rod is normally produced to ASTM specification A449. All steel threaded rod meeting the physical description set forth above is covered by the scope of this investigation, whether or not produced according to a particular standard.

Subject merchandise includes material matching the above description that has been finished, assembled, or packaged in a third country, including by cutting, chamfering, coating, or painting the threaded rod, by attaching the threaded rod to, or packaging it with, another product, or any other finishing, assembly, or packaging operation that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the threaded rod.

Alloy and certain carbon steel threaded rod are also included in the scope of this investigation whether or not imported attached to, or in conjunction with, other parts and accessories such as nuts and washers. If carbon and alloy steel threaded rod are imported attached to, or in conjunction with, such non-subject merchandise, only the threaded rod is included in the scope. Excluded from the scope of this investigation are: (1) Threaded rod, bar, or studs which are threaded only on one or both ends and the threading covers 25 percent or less of the total actual length; and (2) stainless steel threaded rod, defined as steel threaded rod containing, by weight, 1.2 percent or less of carbon and 10.5 percent or more of chromium, with or without other elements.

Excluded from the scope of the antidumping investigation on steel threaded rod from the People's Republic of China is any merchandise covered by the existing antidumping order on Certain Steel Threaded Rod from the People's Republic of China. *See Certain Steel Threaded Rod from the People's Republic of China: Notice of Antidumping Duty Order,* 74 FR 17154 (April 14, 2009).

Specifically excluded from the scope of this investigation is threaded rod that is imported as part of a package of hardware in conjunction with a ready-to-assemble piece of furniture. Alloy and certain carbon steel threaded rod are currently classifiable under subheadings 7318.15.5051, 7318.15.5056, and 7318.15.5090 of the Harmonized Tariff Schedule of the United States (HTSUS). Subject merchandise may also enter under subheading 7318.15.2095 and 7318.19.0000 of the HTSUS. The HTSUS subheadings are provided for convenience and U.S. Customs purposes only. The written description of the scope is dispositive.

Certain Corrosion-Resistant Steel Products From the People's Republic of China: Affirmative Preliminary Determination of Circumvention Involving Malaysia

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) preliminarily determines that imports of certain corrosion-resistant steel products (CORE), completed in Malaysia using hot-rolled steel (HRS) and/or cold-rolled steel (CRS) flat products manufactured in the People's Republic of China (China), are circumventing the antidumping duty (AD) and countervailing duty (CVD) orders on CORE from China.

DATES: Applicable February 18, 2020.

FOR FURTHER INFORMATION CONTACT: Shanah Lee, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–6386.

SUPPLEMENTARY INFORMATION:

Background

On August 12, 2019, Commerce self-initiated country-wide anti-circumvention inquiries of the *China CORE Orders* [1] covering Chinese-origin HRS and/or CRS exported to various countries, including Malaysia, for completion into CORE and subsequently exported to the United States.[2] In the *Initiation Notice,* Commerce initiated the instant anti-circumvention inquiries based on available information and an analysis pursuant to section 781(b) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.225(h), to determine whether the importation of the Chinese-origin HRS or CRS substrate for completion into CORE in Malaysia and subsequent exportation of that CORE to the United States constitutes circumvention of the *China CORE Orders.*

For a complete description of the record developed since the initiation of these inquiries, *see* the Preliminary Decision Memorandum.[3] A list of topics included in the Preliminary Decision Memorandum is included as Appendix I to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov,* and to all parties in the Central Records Unit, Room B8024 of the main Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *http://enforcement.trade.gov/frn/.* The signed and the electronic versions of the Preliminary Decision Memorandum are identical in content.

Scope of the Orders

The products covered by these orders are certain flat-rolled steel products, either clad, plated, or coated with corrosion-resistant metals such as zinc, aluminum, or zinc-, aluminum-, nickel- or iron-based alloys, whether or not corrugated or painted, varnished, laminated, or coated with plastics or other non-metallic substances in addition to the metallic coating. For a complete description of the scope of the orders, *see* the Preliminary Decision Memorandum.

Scope of the Anti-Circumvention Inquiries

These anti-circumvention inquiries cover CORE completed in Malaysia from HRS or CRS substrate input manufactured in China and subsequently exported from Malaysia to the United States (merchandise subject to these inquiries).

Methodology

Commerce is conducting these anti-circumvention inquiries in accordance with section 781(b) of the Act. Because certain interested parties did not cooperate to the best of their abilities in responding to Commerce's requests for information, we have based parts of our preliminary determination on the facts available, with adverse inferences, pursuant to sections 776(a) and (b) of the Act. For a full description of the methodology underlying Commerce's preliminary determination, *see* the Preliminary Decision Memorandum.

Preliminary Finding

As detailed in the Preliminary Decision Memorandum, we preliminarily determine that CORE completed in Malaysia from HRS and/or CRS substrate sourced from China is circumventing the *China CORE Orders.* We therefore preliminarily determine that it is appropriate to include this merchandise within the *China CORE Orders* and to instruct U.S. Customs and Border Protection (CBP) to suspend liquidation of any entries of CORE from Malaysia produced from HRS and/or CRS from China.

Suspension of Liquidation

As stated above, Commerce has made a preliminary affirmative determination that imports of CORE completed in Malaysia, using HRS and/or CRS flat products manufactured in China, are circumventing the *China CORE Orders.* In accordance with 19 CFR 351.225(1)(2), Commerce will direct CBP to suspend liquidation and to require a cash deposit of estimated duties on unliquidated entries of CORE produced in Malaysia, as appropriate, that were entered, or withdrawn from warehouse, for consumption on or after August 12, 2019, the date of initiation of the anti-circumvention inquiries. The suspension of liquidation instructions will remain in effect until further notice.

CORE produced in Malaysia from HRS and/or CRS that is not of Chinese origin is not subject to these inquiries. However, imports of such merchandise are subject to certification requirements, and cash deposits may be required if the certification requirements are not satisfied. Additionally, CORE completed in Malaysia from HRS and/or CRS from Taiwan also has preliminarily been found to be circumventing the AD order on CORE from Taiwan and such merchandise is subject to similar certification requirements.[4] Accordingly, if an importer imports CORE from Malaysia and claims that the CORE was not produced from HRS and/or CRS substrate manufactured in China, the importer and exporter are required to meet the certification and documentation requirements described in Appendices II, III and IV, in order for cash deposits pursuant to the *China CORE Orders* not to be required.

In the situation where no certification is provided for an entry, and AD/CVD orders from two countries (China and Taiwan) potentially apply to that entry, Commerce intends to instruct CBP to suspend liquidation of the entry and collect cash deposits at the rates applicable to the *China CORE Orders* (*i.e.,* the AD rate established for the China-wide entity (199.43 percent) and the CVD rate established for all-other Chinese producers/exporters (39.05 percent)).[5] This is to prevent evasion, given that the rates applicable to the AD/CVD orders on CORE from China [6] are higher than the AD rate established for CORE from Taiwan. In the situation where a certification is provided for the

AD/CVD orders on CORE from China (stating that the merchandise was not produced from HRS and/or CRS from China), but no other certification is provided, then Commerce intends to instruct CBP to suspend the entry and collect cash deposits at the AD all-others rate applicable to the AD order on CORE from Taiwan (*i.e.,* 3.66 percent).

Commerce preliminarily determines that the following companies are not eligible for the certification process: FIW Steel Sdn Bhd; Hsin Kuang Steel Co Ltd; Nippon EGalv Steel Sdn Bhd; NS BlueScope Malaysia Sdn Bhd; and YKGI/Yun Kong Galv. Ind/Starshine Holdings Sdn Bhd./ASTEEL Sdn Bhd. Additionally, exporters are not eligible to certify shipments of merchandise produced by the above-listed companies. Further, importers of CORE from Malaysia that is produced and/or exported by these ineligible companies are similarly ineligible for the certification process with regard to those imports.

Verification

As provided in 19 CFR 351.307, Commerce intends to verify information relied upon in making its final determination.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last final verification report is issued in these anti-circumvention inquiries, unless the Secretary alters the time limit. Rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than five days after the deadline date for case briefs.[7] Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in these anti-circumvention inquiries are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at the U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington DC 20230, at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

International Trade Commission Notification

Commerce, consistent with section 781(e) of the Act, has notified the U.S. International Trade Commission (ITC) of this preliminary determination to include the merchandise subject to these anticircumvention inquiries within the *China CORE Orders.* Pursuant to section 781(e) of the Act, the ITC may request consultations concerning Commerce's proposed inclusion of the merchandise subject to these inquiries. If, after consultations, the ITC believes that a significant injury issue is presented by the proposed inclusion, it will have 60 days from the date of notification by Commerce to provide written advice.

Notification to Interested Parties

This determination is issued and published in accordance with section 781(b) of the Act and 19 CFR 351.225(f).

Dated: February 7, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Appendix I—List of Topics Discussed in the Preliminary Decision Memorandum

Appendix II—Certification Requirements

If an importer imports certain corrosion-resistant steel products (CORE) from Malaysia and claims that the CORE was not produced from hot-rolled steel and/or cold-rolled steel substrate (substrate) manufactured in the People's Republic of China (China), the importer is required to complete and maintain the importer certification attached hereto as Appendix III and all supporting documentation. Where the importer uses a broker to facilitate the entry process, it should obtain the entry number from the broker. Agents of the importer, such as brokers, however, are not permitted to make this certification on behalf of the importer.

The exporter is required to complete and maintain the exporter certification, attached as Appendix III, and is further required to provide the importer a copy of that certification and all supporting documentation.

For shipments and/or entries on or after August 12, 2019 through March 7, 2020, for which certifications are required, importers and exporters should complete the required certification within 30 days of the publication of this notice in the **Federal Register**. Accordingly, where appropriate, the relevant bullet in the certification should be edited to reflect that the certification was completed within the time frame specified above. For example, the bullet in the importer certification that reads: ''This certification was completed at or prior to the time of Entry,'' could be edited as follows: ''The imports referenced herein entered before March 8, 2020. This certification was completed on mm/dd/yyyy, within 30 days of the **Federal Register** notice publication of the preliminary determination of circumvention.'' Similarly, the bullet in the exporter certification that reads, ''This certification was completed at or prior to the time of shipment,'' could be edited as follows: ''The shipments/products referenced herein shipped before March 8, 2020. This certification was completed on mm/dd/yyyy, within 30 days of the **Federal Register** notice publication of the preliminary determination of circumvention. For such entries/shipments, importers and exporters each have the option to complete a blanket certification covering multiple entries/shipments, individual certifications for each entry/shipment, or a combination thereof.

For shipments and/or entries on or after March 8, 2020, for which certifications are required, importers should complete the required certification at or prior to the date of Entry and exporters should complete the required certification and provide it to the importer at or prior to the date of shipment.

The importer and Malaysian exporter are also required to maintain sufficient documentation supporting their certifications. The importer will not be required to submit the certifications or supporting documentation to U.S. Customs and Border Protection (CBP) as part of the entry process at this time. However, the importer and the exporter will be required to present the certifications and supporting documentation, to Commerce and/or CBP, as applicable, upon request by the respective agency. Additionally, the claims made in the certifications and any supporting documentation are subject to verification by Commerce and/or CBP. The importer and exporter are required to maintain the certifications (the importer must retain both certifications) and supporting documentation for the later of (1) a period of five years from the date of entry or (2) a period of three years after the conclusion of any litigation in United States courts regarding such entries.

[7] *See* 19 CFR 351.309; *see also* 19 CFR 351.303 (for general filing requirements).

In the situation where no certification is provided for an entry, and AD/CVD orders from two countries (China and Taiwan) potentially apply to that entry, Commerce intends to instruct CBP to suspend the entry and collect cash deposits at the rate applicable to the *China CORE Orders* (*i.e.,* the AD rate established for the China-wide entity (199.43 percent) and the CVD rate established for all-other Chinese producers/exporters (39.05 percent)). In the situation where a certification is provided for the AD/CVD orders on CORE from China (stating that the merchandise was not produced from HRS and/or CRS from China), but no other certification is provided, then Commerce intends to instruct CBP to suspend the entry and collect cash deposits at the AD all-others rate applicable to the AD order on CORE from Taiwan (*i.e.,* 3.66%).

Appendix III—Exporter Certification

I hereby certify that:

• My name is {COMPANY OFFICIAL'S NAME} and I am an official of {NAME OF EXPORTING COMPANY}, located at {ADDRESS OF EXPORTING COMPANY};

• I have direct personal knowledge of the facts regarding the production and exportation of the corrosion resistant steel products identified below. ''Direct personal knowledge'' refers to facts the certifying party is expected to have in its own books and records. For example, an exporter should have direct personal knowledge of the producer's identity and location.

• The corrosion resistant steel products covered by this certification were produced by {NAME OF PRODUCING COMPANY}, located at {{ADDRESS OF PRODUCING COMPANY}; *for each additional company, repeat:* {NAME OF PRODUCING COMPANY}, located at {ADDRESS OF PRODUCING COMPANY}

• The corrosion resistant steel products produced in Malaysia were not manufactured using hot-rolled steel and/or cold-rolled steel substrate from China;

• This certification applies to the following sales:

Producer	Invoice No.	Invoice line item No.

• The corrosion resistant steel products covered by this certification were sold to {NAME OF U.S. CUSTOMER}, located at {ADDRESS OF U.S. CUSTOMER}.

• The corrosion resistant steel products covered by this certification were shipped to {NAME OF PARTY TO WHOM MERCHANDISE WAS SHIPPED}, located at {ADDRESS OF SHIPMENT}.

• I understand that {NAME OF EXPORTING COMPANY} is required to maintain a copy of this certification and sufficient documentation supporting this certification (*i.e.,* documents maintained in the normal course of business, or documents obtained by the certifying party, for example, mill certificates, production records, invoices, etc.) for the later of (1) a period of five years from the date of entry or (2) a period of three years after the conclusion of any litigation in the United States courts regarding such entries;

• I understand that {NAME OF EXPORTING COMPANY} must provide a copy of this Exporter Certification to the U.S. importer by the time of shipment;

• I understand that {NAME OF EXPORTING COMPANY} is required to provide a copy of this certification and supporting records, upon request, to U.S. Customs and Border Protection (CBP) and/or the Department of Commerce (Commerce);

• I understand that the claims made herein, and the substantiating documentation, are subject to verification by CBP and/or Commerce;

• I understand that failure to maintain the required certification, and/or failure to substantiate the claims made herein, and/or failure to allow CBP and/or Commerce to verify the claims made herein, may result in a de facto determination that all sales to which this certification applies are within the scope of the antidumping/countervailing duty order on corrosion resistant steel products from China. I understand that such finding will result in:

○ Suspension of all unliquidated entries (and entries for which liquidation has not become final) for which these requirements were not met; and

○ the requirement that the importer post applicable antidumping duty and/or countervailing duty cash deposits (as appropriate) equal to the rates as determined by Commerce;

○ the revocation of {NAME OF EXPORTING COMPANY}'s privilege to certify future exports of corrosion resistant steel products from Malaysia as not manufactured using hot-rolled steel and/or cold-rolled steel substrate from China.

• This certification was completed at or prior to the time of shipment; and

• I am aware that U.S. law (including, but not limited to, 18 U.S.C. 1001) imposes criminal sanctions on individuals who knowingly and willfully make materially false statements to the U.S. government.

Appendix IV—Importer Certification

I hereby certify that:

• My name is {IMPORTING COMPANY OFFICIAL'S NAME} and I am an official of {NAME OF IMPORTING COMPANY}, located at {ADRESS OF IMPORTING COMPANY}.

• I have direct personal knowledge of the facts regarding the importation into the Customs territory of the United States of the corrosion resistant steel products produced in Malaysia that entered under entry number(s), identified below, and which are covered by this certification. ''Direct personal knowledge'' refers to facts the certifying party is expected to have in its own records. For example, the importer should have direct personal knowledge of the importation of the product (*e.g.,* the name of the exporter) in its records;

• The corrosion resistant steel products covered by this certification were exported by {NAME OF EXPORTING COMPANY}, located at {ADDRESS OF EXPORTING COMPANY}.

If the importer is acting on behalf of the first U.S. customer, complete this paragraph:

• The corrosion resistant steel products covered by this certification were imported by {NAME OF IMPORTING COMPANY} on behalf of {NAME OF U.S. CUSTOMER}, located at {ADDRESS OF U.S. CUSTOMER}.

• The corrosion resistant steel products covered by this certification were shipped to {NAME OF PARTY TO WHOM MERCHANDISE WAS FIRST SHIPPED IN THE UNITED STATES}, located at {ADDRESS OF SHIPMENT}.

• I have personal knowledge of the facts regarding the production of the corrosion resistant steel products identified below. ''Personal knowledge'' includes facts obtained from another party, (*e.g.,* correspondence received by the importer (or exporter) from the producer regarding the country of manufacture of the imported products);

• The corrosion resistant steel products covered by this certification were produced by {NAME OF PRODUCING COMPANY}, located at {ADDRESS OF PRODUCING COMPANY}; *for each additional company, repeat:* {NAME OF PRODUCING COMPANY}, located at {ADDRESS OF PRODUCING COMPANY}.

• The corrosion resistant steel products covered by this certification were not manufactured using hot-rolled steel and/or cold-rolled steel substrate from China.

• This certification applies to the following entries:

Producer	Entry summary No.	Entry summary line item No.	Invoice No.	Invoice line item No.

• I understand that {NAME OF IMPORTING COMPANY} is required to maintain a copy of this certification and sufficient documentation supporting this certification (*i.e.,* documents maintained in the normal course of business, or documents obtained by the certifying party, for example, mill certificates, production records, invoices, etc.) for the later of (1) a period of five years from the date of entry or (2) a period of three years after the conclusion of

any litigation in the United States courts regarding such entries;

• I understand that {NAME OF IMPORTING COMPANY} is required to provide this certification and supporting records, upon request, to U.S. Customs and Border Protection (CBP) and/or the Department of Commerce (Commerce);

• I understand that {NAME OF IMPORTING COMPANY} is required to maintain a copy of the exporter's certification (attesting to the production and/or export of the imported merchandise identified above), and any supporting records provided by the exporter to the importer, for the later of (1) a period of five years from the date of entry or (2) a period of three years after the conclusion of any litigation in United States courts regarding such entries;

• I understand that {NAME OF IMPORTING COMPANY}is required to maintain and, upon request, provide a copy of the exporter's certification and any supporting records provided by the exporter to the importer, to CBP and/or Commerce;

• I understand that the claims made herein, and the substantiating documentation, are subject to verification by CBP and/or Commerce;

• I understand that failure to maintain the required certifications, and/or failure to substantiate the claims made herein, and/or failure to allow CBP and/or Commerce to verify the claims made herein, may result in a de facto determination that all entries to which this certification applies are within the scope of the antidumping/countervailing duty order on corrosion resistant steel products from China. I understand that such finding will result in:

○ Suspension of liquidation of all unliquidated entries (and entries for which liquidation has not become final) for which these requirements were not met; and;

○ the requirement that the importer post applicable antidumping duty and/or countervailing duty cash deposits (as appropriate) equal to the rates determined by Commerce;

the revocation of {NAME OF IMPORTING COMPANY}'s privilege to certify future imports of corrosion resistant steel products from Malaysia as not manufactured using hot-rolled steel and/or cold-rolled steel substrate from China.

• I understand that agents of the importer, such as brokers, are not permitted to make this certification;

• This certification was completed at or prior to the time of Entry; and

• I am aware that U.S. law (including, but not limited to, 18 U.S.C. 1001) imposes criminal sanctions on individuals who knowingly and willfully make materially false statements to the U.S. government.

Quarterly Update to Annual Listing of Foreign Government Subsidies on Articles of Cheese Subject to an In-Quota Rate of Duty

AGENCY: Enforcement and Compliance, International Trade Administration Department of Commerce.

DATES: Applicable February 18, 2020.

FOR FURTHER INFORMATION CONTACT: Stephanie Moore, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Ave. NW, Washington, DC 20230, telephone: (202) 482–3692.

SUPPLEMENTARY INFORMATION: On November 5, 2019, the Department of Commerce (Commerce), pursuant to section 702(h) of the Trade Agreements Act of 1979 (as amended) (the Act), published the quarterly update to the annual listing of foreign government subsidies on articles of cheese subject to an in-quota rate of duty covering the period April 1, 2019 through June 30, 2019.[1] In the *Second Quarter 2019 Update,* we requested that any party that has information on foreign government subsidy programs that benefit articles of cheese subject to an in-quote rate of duty submit such information to Commerce.[2] We received no comments, information, or requests for consultation from any party.

Pursuant to section 702(h) of the Act, we hereby provide Commerce's update of subsidies on articles of cheese that were imported during the period July 1, 2019 through September 30, 2019. The appendix to this notice lists the country, the subsidy program or programs, and the gross and net amounts of each subsidy for which information is currently available.

Commerce will incorporate additional programs which are found to constitute subsidies, and additional information on the subsidy programs listed, as the information is developed. Commerce encourages any person having information on foreign government subsidy programs which benefit articles of cheese subject to an in-quota rate of duty to submit such information in writing to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, 1401 Constitution Ave. NW, Washington, DC 20230.

This determination and notice are in accordance with section 702(a) of the Act.

Dated: February 7, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Carbon and Alloy Steel Threaded Rod From India: Final Affirmative Countervailing Duty Determination

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) determines that countervailable subsidies are being provided to producers and exporters of carbon and alloy steel threaded rod (steel threaded rod) from India during the period of investigation (POI) January 1, 2018 through December 31, 2018. The final estimated subsidy rates are shown in the ''Final Determination'' section of this notice.

DATES: Applicable February 18, 2020.

FOR FURTHER INFORMATION CONTACT: Genevieve Coen or Hannah Falvey, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3251 or (202) 482–4889, respectively.

SUPPLEMENTARY INFORMATION:

Background

On July 29, 2019, Commerce published the *Preliminary Determination* of this investigation, in which we found that countervailable subsidies are being provided to producers and exporters of steel threaded rod from India.[1] On October 16, 2019, we issued a Post-Preliminary Analysis Memorandum.[2] We invited interested parties to comment on the *Preliminary Determination* and the Post-Preliminary Analysis Memorandum. We received no comments from interested parties.

Period of Investigation

The POI is January 1, 2018 through December 31, 2018.

Scope of the Investigation

The product covered by this investigation is steel threaded rod from India. For a complete description of the scope of this investigation, *see* the appendix to this notice.

Scope Comments

On July 22, 2019, we issued a Preliminary Scope Memorandum.[3] The scope case briefs were due on August 28, 2019.[4] We received no scope case briefs from interested parties. Therefore, Commerce has made no changes to the scope of this investigation since the *Preliminary Determination.*

Verification

Commerce conducted verification of the questionnaire responses provided by Mangal Steel Enterprises Limited (Mangal) between October 21 and October 24, 2019.[5] Because the second mandatory respondent in this investigation, Daksh Fasteners (Daksh), did not provide the information requested, Commerce did not conduct verification of Daksh.[6]

Analysis of Comments Received

As noted above, we received no comments in response to the *Preliminary Determination* or Post-Preliminary Analysis Memorandum. However, Commerce is revising its decision regarding the application of adverse facts available (AFA) to the Government of India (GOI) regarding the duty drawback (DDB) program.[7] Consistent with other proceedings, which we referenced in the *Preliminary Determination,*[8] for this final determination, we find that the GOI's responses regarding the DDB program did not warrant the application of AFA, but instead, the GOI's responses were insufficient to establish that the GOI has a system in place for this program that is reasonable or effective for the purposes intended.[9] Therefore, we find that this program is countervailable.[10] Because we continue to find this program countervailable, our calculations regarding this program remain unchanged for this final determination.

Methodology

We continue to find, as stated in the *Preliminary Determination,* that mandatory respondent Daksh withheld requested information, failed to provide information by the specified deadlines, and significantly impeded the proceeding, pursuant to section 776(a) of the Tariff Act of 1930, as amended (the Act). Further, we continue to find that Daksh failed to cooperate to the best of its ability to comply with our requests for information, and, accordingly, we continue to apply an adverse inference when selecting from among the facts otherwise available to determine the relevant countervailable subsidy rate, in accordance with section 776(b) of the Act. We continue to find, using AFA, that Daksh used all the programs on which Commerce initiated, and continue to apply AFA rates for each program as discussed in the *Preliminary Determination* and the Post-Preliminary Analysis Memorandum.[11]

All-Others Rate

We continue to assign the countervailable subsidy rate calculated for Mangal as the all-others rate applicable to all exporters and/or producers not individually examined.[12]

Final Determination

Commerce determines that the following estimated countervailable subsidy rates exist:

Exporter/producer	Net subsidy rate (percent)
Daksh Fasteners	211.72
Mangal Steel Enterprises Limited	6.07
All Others	6.07

[1] *See Carbon and Alloy Steel Threaded Rod from India: Preliminary Affirmative Countervailing Duty Determination and Alignment of Final Determination with Final Antidumping Duty Determination,* 84 FR 36570 (July 29, 2019) (*Preliminary Determination*), and accompanying Preliminary Decision Memorandum (PDM).

[11] *Id.* at 11–15; *see also* Post-Preliminary Analysis Memorandum at 2–3.

[12] *See Preliminary Determination,* 84 FR at 36571.

Continuation of Suspension of Liquidation

As a result of our *Preliminary Determination* and pursuant to section 703(d)(1)(B) and (d)(2) of the Act, we instructed U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise as described in the scope of the investigation section entered, or withdrawn from warehouse, for consumption on or after the date of publication of the *Preliminary Determination* in the **Federal Register**. In accordance with section 703(d) of the Act, we issued instructions to CBP to discontinue the suspension of liquidation for countervailing duty purposes for subject merchandise entered, or withdrawn from warehouse, on or after November 26, 2019, but to continue the suspension of liquidation of all entries from July 29 through November 25, 2019.

If the U.S. International Trade Commission (ITC) issues a final affirmative injury determination, we will issue a countervailing duty order, reinstate the suspension of liquidation under section 706(a) of the Act, and require a cash deposit of estimated countervailing duties for such entries of subject merchandise in the amounts indicated above. If the ITC determines that material injury, or threat of material injury, does not exist, this proceeding will be terminated, and all estimated duties deposited or securities posted as a result of the suspension of liquidation will be refunded or canceled.

Disclosure

Normally, Commerce discloses to interested parties the calculations performed in connection with a final determination within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of the notice of final determination in the **Federal Register**, in accordance with 19 CFR 351.224(b). However, because there are no changes from the *Preliminary Determination,* there are no new calculations to disclose.

ITC Notification

In accordance with section 705(d) of the Act, we will notify the ITC of the final affirmative determination of countervailable subsidies. In addition, we are making available to the ITC all non-privileged and non-proprietary information related to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order (APO), without the written consent of the Assistant Secretary for Enforcement and Compliance.

Because the final determination in this proceeding is affirmative, in accordance with section 705(b)(2) of the Act, the ITC will make its final determination as to whether the domestic industry in the United States is materially injured, or threatened with material injury, by reason of imports of steel threaded rod from India no later than 45 days after this final determination. If the ITC determines that material injury, or threat of material injury, does not exist, the proceeding will be terminated, and all cash deposits will be refunded. If the ITC determines that such injury does exist, Commerce will issue a countervailing duty order directing CBP to assess, upon further instruction by Commerce, countervailing duties on all imports of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the effective date of the suspension of liquidation.

Notification Regarding APO

This notice serves as a reminder to parties subject to APO of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

Notification to Interested Parties

This determination is issued and published in accordance with sections 705(d) and 777(i)(1) of the Act, and 19 CFR 351.210(c).

Dated: February 7, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Appendix

Scope of the Investigation

The merchandise covered by the scope of this investigation is carbon and alloy steel threaded rod. Steel threaded rod is certain threaded rod, bar, or studs, of carbon or alloy steel, having a solid, circular cross section of any diameter, in any straight length. Steel threaded rod is normally drawn, cold-rolled, threaded, and straightened, or it may be hot-rolled. In addition, the steel threaded rod, bar, or studs subject to this investigation are non-headed and threaded along greater than 25 percent of their total actual length. A variety of finishes or coatings, such as plain oil finish as a temporary rust protectant, zinc coating (*i.e.,* galvanized, whether by electroplating or hot-dipping), paint, and other similar finishes and coatings, may be applied to the merchandise.

Steel threaded rod is normally produced to American Society for Testing and Materials (ASTM) specifications ASTM A36, ASTM A193 B7/B7m, ASTM A193 B16, ASTM A307, ASTM A320 L7/L7M, ASTM A320 L43, ASTM A354 BC and BD, ASTM A449, ASTM F1554–36, ASTM F1554–55, ASTM F1554 Grade 105, American Society of Mechanical Engineers (ASME) specification ASME B18.31.3, and American Petroleum Institute (API) specification API 20E. All steel threaded rod meeting the physical description set forth above is covered by the scope of this investigation, whether or not produced according to a particular standard. Subject merchandise includes material matching the above description that has been finished, assembled, or packaged in a third country, including by cutting, chamfering, coating, or painting the threaded rod, by attaching the threaded rod to, or packaging it with, another product, or any other finishing, assembly, or packaging operation that would not otherwise remove the merchandise from the scope of this investigation if performed in the country of manufacture of the threaded rod.

Carbon and alloy steel threaded rod are also included in the scope of this investigation whether or not imported attached to, or in conjunction with, other parts and accessories such as nuts and washers. If carbon and alloy steel threaded rod are imported attached to, or in conjunction with, such non-subject merchandise, only the threaded rod is included in the scope.

Excluded from the scope of this investigation are: (1) Threaded rod, bar, or studs which are threaded only on one or both ends and the threading covers 25 percent or less of the total actual length; and (2) stainless steel threaded rod, defined as steel threaded rod containing, by weight, 1.2 percent or less of carbon and 10.5 percent or more of chromium, with our without other elements.

Excluded from the scope of the antidumping investigation on steel threaded rod from the People's Republic of China is any merchandise covered by the existing antidumping order on Certain Steel Threaded Rod from the People's Republic of China. *See Certain Steel Threaded Rod from the People's Republic of China: Notice of Antidumping Duty Order,* 74 FR 17154 (April 14, 2009).

Specifically excluded from the scope of this investigation is threaded rod that is imported as part of a package of hardware in conjunction with a ready-to-assemble piece of furniture. Steel threaded rod is currently classifiable under subheadings 7318.15.5051, 7318.15.5056, and 7318.15.5090 of the Harmonized Tariff Schedule of the United States (HTSUS). Subject merchandise may also enter under subheading 7318.15.2095 and 7318.19.0000 of the HTSUS. The HTSUS subheadings are provided for convenience and U.S. Customs purposes only. The written description of the scope is dispositive.

Certain Corrosion-Resistant Steel Products From the People's Republic of China: Affirmative Preliminary Determination of Circumvention Involving Costa Rica

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) preliminarily determines that imports of certain corrosion-resistant steel products (CORE) completed in Costa Rica, using hot-rolled steel (HRS) and/or cold-rolled steel (CRS) flat products manufactured in the People's Republic of China (China), are circumventing the antidumping duty (AD) and countervailing duty (CVD) orders on CORE from China.

DATES: Applicable February 18, 2020.

FOR FURTHER INFORMATION CONTACT: Ariela Garvett, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3609.

SUPPLEMENTARY INFORMATION:

Background

On August 12, 2019, Commerce self-initiated country-wide anti-circumvention inquiries of the *China CORE Orders* [1] covering Chinese-origin HRS and/or CRS exported to various countries, including Costa Rica, for completion into CORE and subsequently exported to the United States.[2] In the *Initiation Notice,* Commerce initiated the instant anti-circumvention inquiries based on available information and an analysis pursuant to section 781(b) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.225(h), to determine whether the importation of the Chinese-origin HRS or CRS substrate for completion into CORE in Costa Rica and subsequent exportation of that CORE to the United States constitutes circumvention of the *China CORE Orders.*

For a complete description of the record developed since the initiation of these inquiries, *see* the Preliminary Decision Memorandum.[3] A list of topics included in the Preliminary Decision Memorandum is included as Appendix I to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov,* and to all parties in the Central Records Unit, Room B8024 of the main Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *http://enforcement.trade.gov/frn/.* The signed and the electronic versions of the Preliminary Decision Memorandum are identical in content.

Scope of the Orders

The products covered by these orders are certain flat-rolled steel products, either clad, plated, or coated with corrosion-resistant metals such as zinc, aluminum, or zinc-, aluminum-, nickel- or iron-based alloys, whether or not corrugated or painted, varnished, laminated, or coated with plastics or other non-metallic substances in addition to the metallic coating. For a complete description of the scope of the orders, *see* the Preliminary Decision Memorandum.

Scope of the Anti-Circumvention Inquiries

These anti-circumvention inquiries cover CORE completed in Costa Rica from HRS or CRS substrate input manufactured in China and subsequently exported from Costa Rica to the United States (merchandise subject to these inquiries).

Methodology

Commerce is conducting these anti-circumvention inquiries in accordance with section 781(b) of the Act and 19 CFR 351.225(h). Because an interested party (*i.e.,* Metas A.) did not cooperate to the best of its abilities in responding to Commerce's requests for information, we have based parts of our preliminary determination on the facts available, with adverse inferences, pursuant to sections 776(a) and (b) of the Act. For a full description of the methodology underlying Commerce's preliminary determination, *see* the Preliminary Decision Memorandum.

Preliminary Finding

As detailed in the Preliminary Decision Memorandum, we preliminarily determine that CORE completed in Costa Rica from HRS and/or CRS substrate sourced from China is circumventing the *China CORE Orders.* We therefore preliminarily determine that it is appropriate to include this merchandise within the *China CORE Orders* and to instruct U.S. Customs and Border Protection (CBP) to suspend liquidation of any entries of CORE from Costa Rica produced from HRS and/or CRS from China.

Suspension of Liquidation

As stated above, Commerce has made a preliminary affirmative determination that imports of CORE completed in Costa Rica, using HRS and/or CRS flat products manufactured in China, are circumventing the *China CORE Orders.* In accordance with 19 CFR 351.225(l)(2), Commerce will direct CBP to suspend liquidation and to require a cash deposit of estimated duties on unliquidated entries of CORE produced in Costa Rica, as appropriate, that were entered, or withdrawn from warehouse, for consumption on or after August 12, 2019, the date of initiation of the anti-circumvention inquiries. The suspension of liquidation instructions will remain in effect until further notice.

CORE produced in Costa Rica from HRS and/or CRS that is not of Chinese origin is not subject to these inquiries. However, imports of such merchandise are subject to certification requirements, and cash deposits may be required if the certification requirements are not satisfied. Accordingly, if an importer imports CORE from Costa Rica and claims that the CORE was not produced from HRS and/or CRS substrate manufactured in China, the importer and exporter are required to meet the certification and documentation requirements described in Appendices II, III, and IV, in order for cash deposits

[1] *See Certain Corrosion-Resistant Steel Flat Products from India, Italy, the People's Republic of China, the Republic of Korea, and Taiwan: Amended Final Affirmative Antidumping Duty Determination for India and Taiwan, and Antidumping Duty Orders,* 81 FR 48390 (July 25, 2016); *see also Certain Corrosion-Resistant Steel Products from India, Italy, Republic of Korea, and the People's Republic of China: Countervailing Duty Order,* 81 FR 48387 (July 25, 2016) (collectively, *China CORE Orders*).

[2] The notice of initiation subsequently published in the **Federal Register** on August 21, 2019. *See Corrosion-Resistant Steel Products from the People's Republic of China: Initiation of Anti-Circumvention Inquiries on the Antidumping Duty and Countervailing Duty Orders,* 84 FR 43585 (August 21, 2019) (*Initiation Notice*) and accompanying Memorandum, ''Certain Corrosion-Resistant Steel Products from the People's Republic of China: Initiation of Anti-Circumvention Inquiries on the Antidumping Duty and Countervailing Duty Orders,'' dated August 12, 2019.

[3] *See* Memorandum, ''Preliminary Decision Memorandum for the Anti-Circumvention Inquiries Involving Costa Rica of the Antidumping and Countervailing Duty Orders on Certain Corrosion-Resistant Steel Products from the People's Republic of China,'' dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

pursuant to the *China CORE Orders* not to be required.

In the situation where no certification is provided for an entry, and AD/CVD orders from China therefore potentially apply to that entry, Commerce intends to instruct CBP to suspend liquidation of the entry and collect cash deposits at the rates applicable to the *China CORE Orders* (*i.e.,* the AD rate established for the China-wide entity (199.43 percent) and the CVD rate established for the China all-others rate (39.05 percent)).[4]

Commerce preliminarily determines that the following company is not eligible for the certification process: Metas A. Additionally, exporters are not eligible to certify shipments of merchandise produced by Metas A. Further, importers of CORE from Costa Rica that is produced and/or exported by this ineligible company are similarly ineligible for the certification process with regard to those imports.

Verification

As provided in 19 CFR 351.307, Commerce intends to verify information relied upon in making its final determination.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the final verification report is issued in these anti-circumvention inquiries, unless the Secretary alters the time limit. Rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than five days after the deadline date for case briefs.[5] Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in these anti-circumvention inquiries are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at the U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington DC 20230 at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

International Trade Commission Notification

Commerce, consistent with section 781(e) of the Act, has notified the U.S. International Trade Commission (ITC) of this preliminary determination to include the merchandise subject to these anti-circumvention inquiries within the *China CORE Orders*. Pursuant to section 781(e) of the Act, the ITC may request consultations concerning Commerce's proposed inclusion of the merchandise subject to these inquiries. If, after consultations, the ITC believes that a significant injury issue is presented by the proposed inclusion, it will have 60 days from the date of notification by Commerce to provide written advice.

Notification to Interested Parties

This determination is issued and published in accordance with section 781(b) of the Act and 19 CFR 351.225(f).

Dated: February 7, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Appendix I

List of Topics Discussed in the Preliminary Decision Memorandum

Appendix II

Certification Requirements

If an importer imports certain corrosion-resistant steel products (CORE) from Costa Rica and claims that the CORE was not produced from hot-rolled steel and/or cold-rolled steel substrate (substrate) manufactured in the People's Republic of China (China), the importer is required to complete and maintain the importer certification attached hereto as Appendix IV and all supporting documentation. Where the importer uses a broker to facilitate the entry process, it should obtain the entry number from the broker. Agents of the importer, such as brokers, however, are not permitted to make this certification on behalf of the importer.

The exporter is required to complete and maintain the exporter certification, attached as Appendix III, and is further required to provide the importer a copy of that certification and all supporting documentation.

For shipments and/or entries on or after August 12, 2019 through March 7, 2020, for which certifications are required, importers and exporters should complete the required certification within 30 days of the publication of this notice in the **Federal Register**. Accordingly, where appropriate, the relevant bullet in the certification should be edited to reflect that the certification was completed within the time frame specified above. For example, the bullet in the importer certification that reads: ''This certification was completed at or prior to the time of Entry,'' could be edited as follows: ''The imports referenced herein entered before March 8, 2020. This certification was completed on mm/dd/yyyy, within 30 days of the **Federal Register** notice publication of the preliminary determination of circumvention.'' Similarly, the bullet in the exporter certification that reads, ''This certification was completed at or prior to the time of shipment,'' could be edited as follows: ''The shipments/products referenced herein shipped before March 8, 2020. This certification was completed on mm/dd/yyyy, within 30 days of the **Federal Register** notice publication of the preliminary determination of circumvention. For such entries/shipments, importers and exporters each have the option to complete a blanket certification covering multiple entries/shipments, individual certifications for each entry/shipment, or a combination thereof.

For shipments and/or entries on or after March 8, 2020, for which certifications are required, importers should complete the required certification at or prior to the date of Entry and exporters should complete the required certification and provide it to the importer at or prior to the date of shipment.

The importer and Costa Rican exporter are also required to maintain sufficient documentation supporting their certifications. The importer will not be required to submit the certifications or supporting documentation to U.S. Customs and Border Protection (CBP) as part of the entry process at this time. However, the importer and the exporter will be required to present the certifications and supporting documentation, to Commerce and/or CBP, as applicable, upon request by the respective agency. Additionally, the claims made in the certifications and any supporting documentation are subject to verification by Commerce and/or CBP. The importer and exporter are required to maintain the certifications (the importer must retain both certifications) and supporting documentation for the later of: (1) A period of five years from the date of entry or (2) a period of three years

[4] *See China CORE Orders,* 81 FR at 48389 and 48393.

[5] *See* 19 CFR 351.309; *see also* 19 CFR 351.303 (for general filing requirements).

after the conclusion of any litigation in United States courts regarding such entries.

In the situation where no certification is provided for an entry, Commerce intends to instruct CBP to suspend liquidation of the entry and collect cash deposits at the rate applicable to the *CORE China Orders* (*i.e.,* the AD rate established for the China-wide entity (199.43 percent) and the CVD rate established for China all-others rate (39.05 percent)).

Appendix III

Exporter Certification

I hereby certify that:

- My name is {COMPANY OFFICIAL'S NAME} and I am an official of {NAME OF EXPORTING COMPANY}, located at {ADDRESS OF EXPORTING COMPANY};
- I have direct personal knowledge of the facts regarding the production and exportation of the corrosion resistant steel products identified below. ''Direct personal knowledge'' refers to facts the certifying party is expected to have in its own books and records. For example, an exporter should have direct personal knowledge of the producer's identity and location.
- The corrosion resistant steel products covered by this certification were produced by {NAME OF PRODUCING COMPANY}, located at {ADDRESS OF PRODUCING COMPANY}; *for each additional company, repeat:* {NAME OF PRODUCING COMPANY}, located at {ADDRESS OF PRODUCING COMPANY}
- The corrosion resistant steel products produced in Costa Rica were not manufactured using hot-rolled steel and/or cold-rolled steel substrate from China;
- This certification applies to the following sales:

Producer	Invoice No.	Invoice line item No.

- The corrosion resistant steel products covered by this certification were sold to {NAME OF U.S. CUSTOMER}, located at {ADDRESS OF U.S. CUSTOMER}.
- The corrosion resistant steel products covered by this certification were shipped to {NAME OF PARTY TO WHOM MERCHANDISE WAS SHIPPED}, located at {ADDRESS OF SHIPMENT}.
- I understand that {NAME OF EXPORTING COMPANY} is required to maintain a copy of this certification and sufficient documentation supporting this certification (*i.e.,* documents maintained in the normal course of business, or documents obtained by the certifying party, for example, mill certificates, production records, invoices, etc.) for the later of (1) a period of five years from the date of entry or (2) a period of three years after the conclusion of any litigation in the United States courts regarding such entries;
- I understand that {NAME OF EXPORTING COMPANY} must provide a copy of this Exporter Certification to the U.S. importer by the time of shipment;
- I understand that {NAME OF EXPORTING COMPANY} is required to provide a copy of this certification and supporting records, upon request, to U.S. Customs and Border Protection (CBP) and/or the Department of Commerce (Commerce);
- I understand that the claims made herein, and the substantiating documentation, are subject to verification by CBP and/or Commerce;
- I understand that failure to maintain the required certification, and/or failure to substantiate the claims made herein, and/or failure to allow CBP and/or Commerce to verify the claims made herein, may result in a de facto determination that all sales to which this certification applies are within the scope of the antidumping/countervailing duty order on corrosion resistant steel products from China. I understand that such finding will result in:
  - Suspension of all unliquidated entries (and entries for which liquidation has not become final) for which these requirements were not met; and
  - the requirement that the importer post applicable antidumping duty and/or countervailing duty cash deposits (as appropriate) equal to the rates as determined by Commerce;
  - the revocation of {NAME OF EXPORTING COMPANY}'s privilege to certify future exports of corrosion resistant steel products from Costa Rica as not manufactured using hot-rolled steel and/or cold-rolled steel substrate from China.
- This certification was completed at or prior to the time of shipment; and
- I am aware that U.S. law (including, but not limited to, 18 U.S.C. 1001) imposes criminal sanctions on individuals who knowingly and willfully make material false statements to the U.S. government.

Appendix IV

Importer Certification

I hereby certify that:

- My name is {IMPORTING COMPANY OFFICIAL'S NAME} and I am an official of {NAME OF IMPORTING COMPANY}, located at {ADDRESS OF IMPORTING COMPANY}.
- I have direct personal knowledge of the facts regarding the importation into the Customs territory of the United States of the corrosion resistant steel products produced in Costa Rica that entered under entry number(s), identified below, and which are covered by this certification. ''Direct personal knowledge'' refers to facts the certifying party is expected to have in its own records. For example, the importer should have direct personal knowledge of the importation of the product (*e.g.,* the name of the exporter) in its records;
- The corrosion resistant steel products covered by this certification were exported by {NAME OF EXPORTING COMPANY}, located at {ADDRESS OF EXPORTING COMPANY}.

If the importer is acting on behalf of the first U.S. customer, complete this paragraph:

- The corrosion resistant steel products covered by this certification were imported by {NAME OF IMPORTING COMPANY} on behalf of {NAME OF U.S. CUSTOMER}, located at {ADDRESS OF U.S. CUSTOMER}.
- The corrosion resistant steel products covered by this certification were shipped to {NAME OF PARTY TO WHOM MERCHANDISE WAS FIRST SHIPPED IN THE UNITED STATES}, located at {ADDRESS OF SHIPMENT}.
- I have personal knowledge of the facts regarding the production of the corrosion resistant steel products identified below. ''Personal knowledge'' includes facts obtained from another party, (*e.g.,* correspondence received by the importer (or exporter) from the producer regarding the country of manufacture of the imported products);
- The corrosion resistant steel products covered by this certification were produced by {NAME OF PRODUCING COMPANY}, located at {ADDRESS OF PRODUCING COMPANY}; *for each additional company, repeat:* {NAME OF PRODUCING COMPANY}, located at {ADDRESS OF PRODUCING COMPANY}.
- The corrosion resistant steel products covered by this certification were not manufactured using hot-rolled steel and/or cold-rolled steel substrate from China.
- This certification applies to the following entries:

Producer	Entry summary No.	Entry summary line item No.	Invoice No.	Invoice line item No.

• I understand that {NAME OF IMPORTING COMPANY} is required to maintain a copy of this certification and sufficient documentation supporting this certification (*i.e.,* documents maintained in the normal course of business, or documents obtained by the certifying party, for example, mill certificates, production records, invoices, etc.) for the later of (1) a period of five years from the date of entry or (2) a period of three years after the conclusion of any litigation in the United States courts regarding such entries;

• I understand that {NAME OF IMPORTING COMPANY} is required to provide this certification and supporting records, upon request, to U.S. Customs and Border Protection (CBP) and/or the Department of Commerce (Commerce);

• I understand that {NAME OF IMPORTING COMPANY} is required to maintain a copy of the exporter's certification (attesting to the production and/or export of the imported merchandise identified above), and any supporting records provided by the exporter to the importer, for the later of (1) a period of five years from the date of entry or (2) a period of three years after the conclusion of any litigation in United States courts regarding such entries;

• I understand that {NAME OF IMPORTING COMPANY} is required to maintain and, upon request, provide a copy of the exporter's certification and any supporting records provided by the exporter to the importer, to CBP and/or Commerce;

• I understand that the claims made herein, and the substantiating documentation, are subject to verification by CBP and/or Commerce;

• I understand that failure to maintain the required certifications, and/or failure to substantiate the claims made herein, and/or failure to allow CBP and/or Commerce to verify the claims made herein, may result in a de facto determination that all entries to which this certification applies are within the scope of the antidumping/countervailing duty order on corrosion resistant steel products from China. I understand that such finding will result in:

○ Suspension of liquidation of all unliquidated entries (and entries for which liquidation has not become final) for which these requirements were not met; and;

○ the requirement that the importer post applicable antidumping duty and/or countervailing duty cash deposits (as appropriate) equal to the rates determined by Commerce;

the revocation of {NAME OF IMPORTING COMPANY}'s privilege to certify future imports of corrosion resistant steel products from Costa Rica as not manufactured using hot-rolled steel and/or cold-rolled steel substrate from China.

• I understand that agents of the importer, such as brokers, are not permitted to make this certification;

• This certification was completed at or prior to the time of Entry; and

• I am aware that U.S. law (including, but not limited to, 18 U.S.C. 1001) imposes criminal sanctions on individuals who knowingly and willfully make material false statements to the U.S. government.

Carbon and Alloy Steel Threaded Rod From the People's Republic of China: Final Affirmative Countervailing Duty Determination

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) determines that countervailable subsidies are being provided to producers and exporters of carbon and alloy steel threaded rod (steel threaded rod) from the People's Republic of China (China).

DATES: Applicable February 18, 2020.

FOR FURTHER INFORMATION CONTACT: Thomas Schauer or Allison Hollander, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–0410 or (202) 482–2805, respectively.

SUPPLEMENTARY INFORMATION:

Background

On July 29, 2019, Commerce published the *Preliminary Determination* in the **Federal Register**.[1] In addition to the Government of China (GOC), the selected mandatory respondents in this investigation are Ningbo Zhongjiang High Strength Bolts Co., Ltd. (Zhongjiang Bolts) and Zhejiang Junyue Standard Part Co., Ltd. (Junyue). In the *Preliminary Determination,* and in accordance with section 705(a)(1) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.210(b)(4), Commerce aligned the final countervailable duty (CVD) determination with the final antidumping duty (AD) determination. The revised deadline for the final determination of this investigation is now February 7, 2020. On October 2, 2019, Commerce issued its Post-Preliminary Analysis.[2]

A summary of the events that occurred since Commerce published the *Preliminary Determination,* as well as a full discussion of the issues raised by parties for this final determination, may be found in the Issues and Decision Memorandum.[3] The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *http://access.trade.gov,* and to all parties in the Central Records Unit, Room B8024 of the main Commerce building. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at *http://enforcement.trade.gov/frn/.* The signed and electronic versions of the Issues and Decision Memorandum are identical in content.

Period of Investigation

The period of investigation is January 1, 2018 through December 31, 2018.

Scope of the Investigation

The products covered by this investigation are steel threaded rod from China. For a full description of the scope of the investigation, *see* Appendix I.

Scope Comments

On July 22, 2019, we issued a Preliminary Scope Memorandum.[4] The scope case briefs were due on August 28, 2019.[5] We received no scope case briefs from interested parties. Therefore, Commerce has made no changes to the scope of this investigation since the *Preliminary Determination.*

Verification

As provided in section 782(i) of the Act, in November 2019, Commerce

[1] *See Carbon and Alloy Steel Threaded Rod from the People's Republic of China: Preliminary Affirmative Countervailing Duty Determination and Alignment of Final Determination with Final Antidumping Duty Determination,* 84 FR 36578 (July 29, 2019) (*Preliminary Determination*), and accompanying Preliminary Decision Memorandum.

[2] *See* Memorandum, ''Decision Memorandum for the Post-Preliminary Analysis in the Countervailing Duty Investigation of Carbon and Alloy Steel Threaded Rod from the People's Republic of China,'' dated October 2, 2019 (Post-Preliminary Analysis).

[3] *See* Memorandum, ''Issues and Decision Memorandum for the Final Determination in the Countervailing Duty Investigation of Carbon and Alloy Steel Threaded Rod from the People's Republic of China,'' dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

[4] *See* Memorandum, ''Carbon and Alloy Steel Threaded Rod from India, Taiwan, Thailand, and the People's Republic of China: Scope Comments Decision Memorandum for the Preliminary Determinations,'' dated July 22, 2019 (Preliminary Scope Memorandum).

[5] The scope case briefs were due 30 days after the publication of the *Preliminary Determination. See* Preliminary Scope Memorandum at 3.

verified the subsidy information reported by Zhongjiang Bolts and Junyue. We used standard verification procedures, including an examination of relevant accounting and production records, and original source documents provided by Junyue and Zhongjiang Bolts.

Analysis of Subsidy Programs and Comments Received

The subsidy programs under investigation and the issues raised in the case and rebuttal briefs by parties in this investigation are discussed in the Issues and Decision Memorandum. For a list of the issues raised by parties, and to which we responded in the Issues and Decision Memorandum, *see* Appendix II of this notice.

Methodology

Commerce conducted this investigation in accordance with section 701 of the Act. For each of the subsidy programs found countervailable, Commerce determines that there is a subsidy, *i.e.,* a financial contribution by an ''authority'' that gives rise to a benefit to the recipient, and that the subsidy is specific.[6]

Use of Adverse Facts Available

In making this final determination, Commerce relied, in part, on facts available and, because the GOC and Junyue did not act to the best of their ability in responding to Commerce's requests for information, we drew an adverse inference where appropriate in selecting from among the facts otherwise available, pursuant to sections 776(a) and (b) of the Act. For further information, *see* the section ''Use of Facts Otherwise Available and Adverse Inferences'' and Comments 1 through 3, 6, and 7 in the Issues and Decision Memorandum.

Changes Since the Preliminary Determination

Based on our analysis of our findings at verification and the comments received, we have made certain changes to the countervailable subsidy rate calculations. For discussion of these changes, *see* the Issues and Decision Memorandum.

All-Others Rate

In accordance with section 705(c)(5)(A)(i) of the Act, for companies not individually examined, we apply an all-others rate, which is normally calculated by weighting the subsidy rates of the mandatory respondents by those companies' exports of the subject merchandise to the United States. Under section 705(c)(5)(A)(i) of the Act, the all-others rate should exclude zero and *de minimis* rates or any rates based entirely on facts otherwise available pursuant to section 776 of the Act.

Commerce calculated individual estimated countervailable subsidy rates for Junyue and Zhongjiang Bolts that are not zero, *de minimis,* or based entirely on facts otherwise available. Commerce calculated the all-others rate using a weighted-average of the estimated subsidy rates calculated for the examined respondents using each company's publicly ranged U.S. sales quantities for the merchandise under consideration.[7]

Final Determination

Company	Net subsidy rate (percent)
Ningbo Zhongjiang High Strength Bolts Co., Ltd	31.02
Zhejiang Junyue Standard Part Co., Ltd	66.81
All Others	41.17

We determine the countervailable subsidy rates to be:

Disclosure

We intend to disclose the calculations performed to parties in this proceeding within five days after public announcement of the final determination in the **Federal Register**, in accordance with 19 CFR 351.224(b).

Continuation of Suspension of Liquidation

As a result of our *Preliminary Determination* and pursuant to section 703(d)(1)(B) and (d)(2) of the Act, we instructed U.S. Customs and Border Protection (CBP) to suspend liquidation of all steel threaded rod from China, that were entered, or withdrawn from warehouse, for consumption on or after July 29, 2019, the date of the publication of the *Preliminary Determination* in the **Federal Register**. In accordance with section 703(d) of the Act, we instructed CBP to discontinue the suspension of liquidation for CVD purposes for subject merchandise entered, or withdrawn from warehouse, on or after November 26, 2019, but continue the suspension of liquidation of all entries from July 29 through November 25, 2019.

If the U.S. International Trade Commission (ITC) issues a final affirmative injury determination, we will issue a CVD order and will reinstate the suspension of liquidation under section 706(a) of the Act and will require a cash deposit of estimated countervailable duties for such entries of subject merchandise in the amounts indicated above. If the ITC determines that material injury, or threat of material injury, does not exist, this proceeding will be terminated, and all cash deposits will be refunded or canceled.

ITC Notification

In accordance with section 705(d) of the Act, we will notify the ITC of our determination. Because the final determination in this proceeding is affirmative, in accordance with section 705(b) of the Act, the ITC will make its final determination as to whether the domestic industry in the United States is materially injured, or threatened with material injury, by reason of imports of steel threaded rod from China no later than 45 days after our final determination. In addition, we are making available to the ITC all non-privileged and non-proprietary information related to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order (APO), without the written consent of the Assistant Secretary for Enforcement and Compliance.

Notification Regarding APO

In the event that the ITC issues a final negative injury determination, this notice will serve as the only reminder to the parties subject to APO of their

[6] *See* sections 771(5)(B) and (D) of the Act regarding financial contribution; section 771(5)(E) of the Act regarding benefit; and section 771(5A) of the Act regarding specificity.

[7] With two respondents under examination, Commerce normally calculates (A) a weighted-average of the estimated subsidy rates calculated for the examined respondents; (B) a simple average of the estimated subsidy rates calculated for the examined respondents; and (C) a weighted-average of the estimated subsidy rates calculated for the examined respondents using each company's publicly-ranged U.S. sale quantities for the merchandise under consideration. Commerce then compares (B) and (C) to (A) and selects the rate closest to (A) as the most appropriate rate for all other producers and exporters. *See, e.g., Ball Bearings and Parts Thereof from France, Germany, Italy, Japan, and the United Kingdom: Final Results of Antidumping Duty Administrative Reviews, Final Results of Changed-Circumstances Review, and Revocation of an Order in Part,* 75 FR 53661, 53663 (September 1, 2010). As complete publicly ranged sales data was available, Commerce based the all-others rate on the publicly ranged sales data of the mandatory respondents. In addition, using the same methodology, Commerce calculated an all-others export subsidy rate of 16.52 percent, an all-others subsidy rate for the provision of steel bar at less than adequate remuneration (LTAR) of 12.75 percent, and an all-others subsidy rate for the provision of wire rod at LTAR of 9.75 percent. For a complete analysis of the data, *see* the All-Others' Rate Calculation Memorandum, dated concurrently with this notice.

responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

Notification to Interested Parties

This determination is issued and published in accordance with sections 705(d) and 77(i)(1) of the Act, and 19 CFR 351.210(c).

Dated: February 7, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise covered by the scope of this investigation is carbon and alloy steel threaded rod. Steel threaded rod is certain threaded rod, bar, or studs, of carbon or alloy steel, having a solid, circular cross section of any diameter, in any straight length. Steel threaded rod is normally drawn, cold-rolled, threaded, and straightened, or it may be hot-rolled. In addition, the steel threaded rod, bar, or studs subject to this investigation are non-headed and threaded along greater than 25 percent of their total actual length. A variety of finishes or coatings, such as plain oil finish as a temporary rust protectant, zinc coating (*i.e.,* galvanized, whether by electroplating or hot-dipping), paint, and other similar finishes and coatings, may be applied to the merchandise.

Steel threaded rod is normally produced to American Society for Testing and Materials (ASTM) specifications ASTM A36, ASTM A193 B7/B7m, ASTM A193 B16, ASTM A307, ASTM A320 L7/L7M, ASTM A320 L43, ASTM A354 BC and BD, ASTM A449, ASTM F1554–36, ASTM F1554–55, ASTM F1554 Grade 105, American Society of Mechanical Engineers (ASME) specification ASME B18.31.3, and American Petroleum Institute (API) specification API 20E. All steel threaded rod meeting the physical description set forth above is covered by the scope of this investigation, whether or not produced according to a particular standard.

Subject merchandise includes material matching the above description that has been finished, assembled, or packaged in a third country, including by cutting, chamfering, coating, or painting the threaded rod, by attaching the threaded rod to, or packaging it with, another product, or any other finishing, assembly, or packaging operation that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the threaded rod.

Carbon and alloy steel threaded rod are also included in the scope of this investigation whether or not imported attached to, or in conjunction with, other parts and accessories such as nuts and washers. If carbon and alloy steel threaded rod are imported attached to, or in conjunction with, such non-subject merchandise, only the threaded rod is included in the scope.

Excluded from the scope of this investigation are: (1) Threaded rod, bar, or studs which are threaded only on one or both ends and the threading covers 25 percent or less of the total actual length; and (2) stainless steel threaded rod, defined as steel threaded rod containing, by weight, 1.2 percent or less of carbon and 10.5 percent or more of chromium, with our without other elements.

Excluded from the scope of the antidumping investigation on steel threaded rod from the People's Republic of China is any merchandise covered by the existing antidumping order on Certain Steel Threaded Rod from the People's Republic of China. *See* Certain Steel Threaded Rod from the People's Republic of China: Notice of Antidumping Duty Order, 74 FR 17154 (April 14, 2009).

Specifically excluded from the scope of this investigation is threaded rod that is imported as part of a package of hardware in conjunction with a ready-to-assemble piece of furniture. Steel threaded rod is currently classifiable under subheadings 7318.15.5051, 7318.15.5056, and 7318.15.5090 of the Harmonized Tariff Schedule of the United States (HTSUS). Subject merchandise may also enter under subheading 7318.15.2095 and 7318.19.0000 of the HTSUS. The HTSUS subheadings are provided for convenience and U.S. Customs purposes only. The written description of the scope is dispositive.

DEPARTMENT OF COMMERCE

International Trade Administration

[C–570–120]

Certain Vertical Shaft Engines Between 223cc and 999cc, and Parts Thereof From the People's Republic of China: Initiation of Countervailing Duty Investigation

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATES: Applicable February 4, 2020.

FOR FURTHER INFORMATION CONTACT: Andrew Huston, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4261.

SUPPLEMENTARY INFORMATION:

The Petition

On January 15, 2020, the U.S. Department of Commerce (Commerce) received a countervailing duty (CVD) petition concerning imports of certain vertical shaft engines between 223cc and 999cc, and parts thereof (vertical shaft engines) from the People's Republic of China (China) filed in proper form on behalf of the Coalition of American Vertical Engine Producers and its individual members (the petitioner or the Coalition).[1] The Petition was accompanied by an antidumping duty (AD) petition concerning imports of vertical shaft engines from China.

On January 17, 2020, Commerce requested supplemental information pertaining to certain aspects of the Petition,[2] to which the petitioner filed its response on January 22, 2020.[3] On January 27, 2020, Commerce had a phone conversation with the petitioner requesting that it address certain

[1] *See* Petitioner's Letter, ''Petitions for the Imposition of Antidumping and Countervailing Duties on Certain Vertical Shaft Engines Between 225cc and 999cc, and Parts Thereof from the People's Republic of China,'' dated January 15, 2020 (the Petition).

[2] *See* Commerce's Letter, ''Petitions for the Imposition of Antidumping and Countervailing Duties on Imports of Certain Vertical Shaft Engines Between 223cc and 999cc, and Parts Thereof from the People's Republic of China: Supplemental Questions,'' dated January 17, 2020.

[3] *See* Petitioner's Letter, ''Response to Supplemental Questions Concerning Volume I of the Petitions for the Imposition of Antidumping and Countervailing Duties Pursuant to Sections 701 and 731 of the Tariff Act of 1930, As Amended on Certain Vertical Shaft Engines Between 223cc and 999cc, and Parts Thereof from the People's Republic of China,'' dated January 22, 2020 (General Issues Supplement).

issues.[4] The petitioner filed responses to these requests on January 29, 2020.[5]

In accordance with section 702(b)(1) of the Tariff Act of 1930, as amended (the Act), the petitioner alleges that the Government of China (GOC) is providing countervailable subsidies, within the meaning of sections 701 and 771(5) of the Act, to producers of vertical shaft engines in China, and that such imports are materially injuring, or threatening material injury to, the domestic industry producing vertical shaft engines in the United States. Consistent with section 702(b)(1) of the Act and 19 CFR 351.202(b), for those alleged programs on which we are initiating a CVD investigation, the Petition is supported by information reasonably available to the petitioner supporting its allegations.

Commerce finds that the petitioner filed the Petition on behalf of the domestic industry because the petitioner is an interested party as defined in sections 771(9)(C) and (E) of the Act. Commerce also finds that the petitioner demonstrated sufficient industry support with respect to the initiation of the requested CVD investigation.[6]

Period of Investigation

Because the Petition was filed on January 15, 2020, the period of investigation (POI) is January 1, 2019 through December 31, 2019.[7]

Scope of the Investigation

The merchandise covered by this investigation is vertical shaft engines from China. For a full description of the scope of this investigation, *see* the appendix to this notice.

Comments on Scope of the Investigation

As discussed in the *Preamble* to Commerce's regulations, we are setting aside a period for interested parties to raise issues regarding product coverage (*i.e.,* scope).[8] Commerce will consider all comments received from interested parties and, if necessary, will consult with interested parties prior to the issuance of the preliminary determination. If scope comments include factual information,[9] all such factual information should be limited to public information. To facilitate preparation of its questionnaires, Commerce requests that all interested parties submit scope comments by 5:00 p.m. Eastern Time (ET) on February 24, 2020, which is 20 calendar days from the signature date of this notice. Any rebuttal comments, which may include factual information, must be filed by 5:00 p.m. ET on March 5, 2020, which is 10 calendar days from the initial comment deadline.[10]

Commerce requests that any factual information the parties consider relevant to the scope of the investigation be submitted during this time period. However, if a party subsequently finds that additional factual information pertaining to the scope of the investigation may be relevant, the party may contact Commerce and request permission to submit the additional information. All such comments must also be filed on the record of the concurrent AD and CVD investigations.

Filing Requirements

All submissions to Commerce must be filed electronically using Enforcement and Compliance's Antidumping Duty and Countervailing Duty Centralized Electronic Service System (ACCESS).[11] An electronically filed document must be received successfully in its entirety by the time and date it is due. Documents exempted from the electronic submission requirements must be filed manually (*i.e.,* in paper form) with Enforcement and Compliance's APO/Dockets Unit, Room 18022, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230, and stamped with the date and time of receipt by the applicable deadlines.

Consultations

Pursuant to sections 702(b)(4)(A)(i) and (ii) of the Act, Commerce notified the GOC of the receipt of the Petition and provided it the opportunity for consultations with respect to the CVD Petition.[12] The GOC did not request consultations.

Determination of Industry Support for the Petition

Section 702(b)(1) of the Act requires that a petition be filed on behalf of the domestic industry. Section 702(c)(4)(A) of the Act provides that a petition meets this requirement if the domestic producers or workers who support the petition account for: (i) At least 25 percent of the total production of the domestic like product; and (ii) more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the petition. Moreover, section 702(c)(4)(D) of the Act provides that, if the petition does not establish support of domestic producers or workers accounting for more than 50 percent of the total production of the domestic like product, Commerce shall: (i) Poll the industry or rely on other information in order to determine if there is support for the petition, as required by subparagraph (A); or (ii) determine industry support using a statistically valid sampling method to poll the ''industry.''

Section 771(4)(A) of the Act defines the ''industry'' as the producers as a whole of a domestic like product. Thus, to determine whether a petition has the requisite industry support, the statute directs Commerce to look to producers and workers who produce the domestic like product. The International Trade Commission (ITC), which is responsible for determining whether ''the domestic industry'' has been injured, must also determine what constitutes a domestic like product in order to define the industry. While both Commerce and the ITC must apply the same statutory definition regarding the domestic like product,[13] they do so for different purposes and pursuant to a separate and distinct authority. In addition, Commerce's determination is subject to limitations of time and information. Although this may result in different definitions of the like product, such differences do not render the decision of either agency contrary to law.[14]

Section 771(10) of the Act defines the domestic like product as ''a product which is like, or in the absence of like,

most similar in characteristics and uses with, the article subject to an investigation under this title.'' Thus, the reference point from which the domestic like product analysis begins is ''the article subject to an investigation'' (*i.e.,* the class or kind of merchandise to be investigated, which normally will be the scope as defined in the petition).

With regard to the domestic like product, the petitioner does not offer a definition of the domestic like product distinct from the scope of the investigation.[15] Based on our analysis of the information submitted on the record, we have determined that vertical shaft engines, as defined in the scope, constitute a single domestic like product, and we have analyzed industry support in terms of that domestic like product.[16]

In determining whether the petitioner has standing under section 702(c)(4)(A) of the Act, we considered the industry support data contained in the Petition with reference to the domestic like product as defined in the ''Scope of the Investigation,'' in the appendix to this notice. To establish industry support, the petitioner provided 2019 shipments of the domestic like product for members of the Coalition.[17] The petitioner estimated the production of the domestic like product for the entire domestic industry based on U.S. shipment data, export data, and its own knowledge of the industry, because shipments and production of vertical shaft engines correlate with one another and shipments are a reasonable proxy for production in the vertical shaft engines industry.[18] The petitioner compared the 2019 shipments of the Coalition to the estimated total shipments of the domestic like product for the entire domestic industry.[19] We relied on data provided by the petitioner for purposes of measuring industry support.[20]

Our review of the data provided in the Petition, the General Issues Supplement, the Second General Issues Supplement, and other information readily available to Commerce indicates that the petitioner has established industry support for the Petition.[21] First, the Petition established support from domestic producers (or workers) accounting for more than 50 percent of the total production of the domestic like product and, as such, Commerce is not required to take further action in order to evaluate industry support (*e.g.,* polling).[22] Second, the domestic producers (or workers) have met the statutory criteria for industry support under section 702(c)(4)(A)(i) of the Act because the domestic producers (or workers) who support the Petition account for at least 25 percent of the total production of the domestic like product.[23] Finally, the domestic producers (or workers) have met the statutory criteria for industry support under section 702(c)(4)(A)(ii) of the Act because the domestic producers (or workers) who support the Petition account for more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the Petition.[24] Accordingly, Commerce determines that the Petition was filed on behalf of the domestic industry within the meaning of section 702(b)(1) of the Act.[25]

Injury Test

Because China is a ''Subsidies Agreement Country'' within the meaning of section 701(b) of the Act, section 701(a)(2) of the Act applies to these investigations. Accordingly, the ITC must determine whether imports of the subject merchandise from China materially injure, or threaten material injury to, a U.S. industry.

Allegations and Evidence of Material Injury and Causation

The petitioner alleges that imports of the subject merchandise are benefitting from countervailable subsidies and that such imports are causing, or threaten to cause, material injury to the U.S. industry producing the domestic like product. In addition, the petitioner alleges that subject imports exceed the negligibility threshold provided for under section 771(24)(A) of the Act.[26] In CVD petitions, section 771(24)(B) of the Act provides that imports of subject merchandise from developing and least developed countries must exceed the negligibility threshold of four percent.

The petitioner contends that the industry's injured condition is illustrated by a significant and increasing volume of subject imports; reduced market share; underselling and price depression or suppression; lost sales and revenues; and a decline in the domestic industry's financial performance and profitability.[27] We have assessed the allegations and supporting evidence regarding material injury, threat of material injury, causation, as well as cumulation, and we have determined that these allegations are properly supported by adequate evidence, and meet the statutory requirements for initiation.[28]

Initiation of CVD Investigation

Based upon the examination of the Petition on vertical shaft engines from China, we find that the Petition meets the requirements of section 702 of the Act. Therefore, we are initiating a CVD investigation to determine whether imports of vertical shaft engines from China benefit from countervailable subsidies conferred by the GOC. Based on our review of the Petition, we find that there is sufficient information to initiate a CVD investigation on each of the alleged programs. For a full discussion of the basis for our decision to initiate on each program, *see* China CVD Initiation Checklist.[29] A public

Continued

version of the initiation checklist for this investigation is available on ACCESS. In accordance with section 703(b)(1) of the Act and 19 CFR 351.205(b)(1), unless postponed, we will make our preliminary determination no later than 65 days after the date of this initiation.

Critical Circumstances

The petitioner alleges, based on trade statistics, that there is a reasonable basis to believe or suspect that critical circumstances exist with regard to imports of vertical shaft engines from China.[30]

Section 703(e)(1) of the Act provides that if a petitioner alleges critical circumstances, Commerce will find that such circumstances exist, at any time after the date of initiation, when there is a reasonable basis to believe or suspect: (A) That ''the alleged countervailable subsidy'' is inconsistent with the Agreement on Subsidies and Countervailing Measures (SCM Agreement) of the World Trade Organization, and (B) that ''there have been massive imports of the subject merchandise over a relatively short period.'' Section 351.206(h)(2) of the Commerce's regulations provides that, generally, imports must increase by at least 15 percent during the ''relatively short period'' to be considered ''massive,'' and section 351.206(i) defines a ''relatively short period'' as normally being the period beginning on the date the proceeding begins (*i.e.,* the date the petition is filed) [31] and ending at least three months later.[32] The regulations also provide, however, that, if Commerce ''finds that importers, or exporters or producers, had reason to believe, at some time prior to the beginning of the proceeding, that a proceeding was likely,'' Commerce ''may consider a period of not less than three months from that earlier time.'' [33]

The petitioner alleges that Chinese vertical shaft engine producers benefit from numerous Chinese government subsidies, which include subsidies that are contingent upon export performance, subsidies for inputs provided for less than adequate remuneration (LTAR), tax benefits, and export incentives.[34] Specifically, the GOC supported vertical shaft engines producers and exporters through the provision of aluminum and pig iron for LTAR, GOC subsidies for the development of famous export brands and China world top brands, export credits granted under the catalogue of Chinese high-tech products for export, and the provision of land at LTAR.[35]

The petitioner also asserts that there have been massive imports of vertical shaft engines over a relatively short period. Based on the petitioner's calculation, the imports of engines in the classification that most closely approximates vertical shaft engines surged 35.7 percent between June 2019 through November 2019 against the same period in calendar year 2018.[36] The petitioner chose these base and comparison periods in order to account for seasonality and the unusual circumstances caused by the imposition of 25 percent Section 301 duties, in accordance with 19 CFR 351.206(h)(1)(ii). The petitioner asserts that, because the surge in imports constituted more than a 15 percent change, import volumes of vertical shaft engines are massive, as defined in Commerce's regulations.

The petitioner requests that the Commerce make a preliminary finding of critical circumstances within 45 days of the filing of the Petition.[37] Section 702(e) of the Act states that if ''at any time after the initiation of an investigation under this subtitle, the administering authority finds a reasonable basis to suspect that the alleged countervailable subsidy is inconsistent with the {SCM} Agreement, the administering authority may request the Commissioner of Customs to compile information on an expedited basis regarding entries of the subject merchandise.''

Taking into consideration the foregoing, we will analyze this matter further. We will monitor imports of vertical shaft engines from China and may request that U.S. Customs and Border Protection (CBP) compile information on an expedited basis regarding entries of subject merchandise.[38] If, at any time, the criteria for a finding of critical circumstances are established, we will issue a critical circumstances determination at the earliest possible date.[39]

Respondent Selection

The petitioner named 35 companies in China as producers/exporters of vertical shaft engines.[40] Commerce intends to follow its standard practice in CVD investigations and calculate company-specific subsidy rates in this investigation. In the event Commerce determines that the number of companies is large and it cannot individually examine each company based upon Commerce's resources, where appropriate, Commerce intends to select mandatory respondents based on CBP data for U.S. imports of vertical shaft engines from China during the POI under the appropriate Harmonized Tariff Schedule of the United States numbers listed in the ''Scope of the Investigation,'' in the appendix.

On February 3, 2020, Commerce released CBP data on imports of vertical shaft engines from China under administrative protective order (APO) to all parties with access to information protected by APO and indicated that interested parties wishing to comment on the CBP data must do so within three business days of the publication date of the notice of initiation of this investigation.[41] We further stated that we will not accept rebuttal comments.

Interested parties must submit applications for disclosure under APO in accordance with 19 CFR 351.305(b). Instructions for filing such applications may be found on the Commerce website at *http://enforcement.trade.gov/apo.*

Comments must be filed electronically using ACCESS. An electronically filed document must be received successfully, in its entirety, by ACCESS no later than 5:00 p.m. ET on the date noted above. Commerce intends to finalize its decisions regarding respondent selection within 20 days of publication of this notice.

Distribution of Copies of the Petition

In accordance with section 702(b)(3)(A) of the Act and 19 CFR 351.202(f), a copy of the public version of the Petition has been provided to the GOC via ACCESS.

Furthermore, to the extent practicable, Commerce will attempt to provide a copy of the public version of the Petition to each exporter named in the Petition, as provided under 19 CFR 351.203(c)(2).

[41] *See* Memorandum, ''Certain Vertical Shaft Engines between 225cc and 999cc, and Parts Thereof from the People's Republic of China Countervailing Duty Petition: Release of U.S. Customs and Border Protection Data,'' dated February 3, 2020.

ITC Notification

Commerce will notify the ITC of its initiation, as required by section 702(d) of the Act.

Preliminary Determinations by the ITC

The ITC will preliminarily determine, within 45 days after the date on which the Petition was filed, whether there is a reasonable indication that imports of vertical shaft engines from China are materially injuring or threatening material injury to a U.S. industry.[42] A negative ITC determination will result in the investigation being terminated.[43] Otherwise, this investigation will proceed according to statutory and regulatory time limits.

Submission of Factual Information

Factual information is defined in 19 CFR 351.102(b)(21) as: (i) Evidence submitted in response to questionnaires; (ii) evidence submitted in support of allegations; (iii) publicly available information to value factors under 19 CFR 351.408(c) or to measure the adequacy of remuneration under 19 CFR 351.511(a)(2); (iv) evidence placed on the record by Commerce; and (v) evidence other than factual information described in (i)–(iv). Any party, when submitting factual information, must specify under which subsection of 19 CFR 351.102(b)(21) the information is being submitted [44] and, if the information is submitted to rebut, clarify, or correct factual information already on the record, to provide an explanation identifying the information already on the record that the factual information seeks to rebut, clarify, or correct.[45] Time limits for the submission of factual information are addressed in 19 CFR 351.301, which provides specific time limits based on the type of factual information being submitted. Please review the regulations prior to submitting factual information in this investigation.

Extensions of Time Limits

Parties may request an extension of time limits before the expiration of a time limit established under 19 CFR 351.301, or as otherwise specified by Commerce. In general, an extension request will be considered untimely if it is filed after the expiration of the time limit established under 19 CFR 351.301. For submissions that are due from multiple parties simultaneously, an extension request will be considered untimely if it is filed after 10:00 a.m. ET on the due date. Under certain circumstances, Commerce may elect to specify a different time limit by which extension requests will be considered untimely for submissions which are due from multiple parties simultaneously. In such a case, Commerce will inform parties in a letter or memorandum of the deadline (including a specified time) by which extension requests must be filed to be considered timely. An extension request must be made in a separate, standalone submission; under limited circumstances Commerce will grant untimely filed requests for the extension of time limits. Parties should review *Extension of Time Limits; Final Rule,* 78 FR 57790 (September 20, 2013), available at *http://www.gpo.gov/fdsys/pkg/FR-2013-09-20/html/2013-22853.htm,* prior to submitting extension requests or factual information in this investigation.

Certification Requirements

Any party submitting factual information in an AD or CVD proceeding must certify to the accuracy and completeness of that information.[46] Parties must use the certification formats provided in 19 CFR 351.303(g).[47] Commerce intends to reject factual submissions if the submitting party does not comply with the applicable certification requirements.

Notification to Interested Parties

Interested parties must submit applications for disclosure under APO in accordance with 19 CFR 351.305. Instructions for filing such applications may be found on the Commerce website at *http://enforcement.trade.gov/apo.*

On January 22, 2008, Commerce published *Antidumping and Countervailing Duty Proceedings: Documents Submission Procedures; APO Procedures,* 73 FR 3634 (January 22, 2008). Parties wishing to participate in this investigation should ensure that they meet the requirements of these procedures (*e.g.,* the filing of letters of appearance as discussed at 19 CFR 351.103(d)).

This notice is issued and published pursuant to sections 702 and 777(i) of the Act, and 19 CFR 351.203(c).

Dated: February 4, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Appendix

Scope of the Investigation

The merchandise covered by this investigation consists of spark-ignited, non-road, vertical shaft engines, whether finished or unfinished, whether assembled or unassembled, primarily for riding lawn mowers and zero-tum radius lawn mowers. Engines meeting this physical description may also be for other non-hand-held outdoor power equipment such as, including but not limited to, tow-behind brush mowers, grinders, and vertical shaft generators. The subject engines are spark ignition, single or multiple cylinder, air cooled, internal combustion engines with vertical power take off shafts with a minimum displacement of 225 cubic centimeters (cc) and a maximum displacement of 999cc. Typically, engines with displacements of this size generate gross power of between 6.7 kilowatts (kw) to 42 kw.

Engines covered by this scope normally must comply with and be certified under Environmental Protection Agency (EPA) air pollution controls title 40, chapter I, subchapter U, part 1054 of the Code of Federal Regulations standards for small non-road spark-ignition engines and equipment. Engines that otherwise meet the physical description of the scope but are not certified under 40 CFR part 1054 and are not certified under other parts of subchapter U of the EPA air pollution controls are not excluded from the scope of this proceeding. Engines that may be certified under both 40 CFR part 1054 as well as other parts of subchapter U remain subject to the scope of this proceeding.

For purposes of this investigation, an unfinished engine covers at a minimum a sub-assembly comprised of, but not limited to, the following components: Crankcase, crankshaft, camshaft, piston(s), and connecting rod(s). Importation of these components together, whether assembled or unassembled, and whether or not accompanied by additional components such as an oil pan, manifold, cylinder head(s), valve train, or valve cover(s), constitutes an unfinished engine for purposes of this investigation. The inclusion of other products such as spark plugs fitted into the cylinder head or electrical devices (*e.g.,* ignition modules, ignition coils) for synchronizing with the motor to supply tension current does not remove the product from the scope. The inclusion of any other components not identified as comprising the unfinished engine subassembly in a third-country does not remove the engine from the scope.

The engines subject to this investigation are typically classified in the Harmonized Tariff Schedule of the United States (HTSUS) at subheadings: 8407.90.1020, 8407.90.1060, and 8407.90.1080. The engine subassemblies that are subject to this investigation enter under HTSUS 8409.91.9990. Engines subject to this investigation may also enter under HTSUS 8407.90.9060 and 8407.90.9080. The

Certain Corrosion-Resistant Steel Products From the People's Republic of China: Negative Preliminary Determination of Circumvention Involving Guatemala

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) preliminarily determines that imports of certain corrosion-resistant steel products (CORE) completed in Guatemala are not circumventing the antidumping duty (AD) and countervailing duty (CVD) orders on CORE from the People's Republic of China (China) at this time.

DATES: Applicable February 18, 2020.

FOR FURTHER INFORMATION CONTACT: Drew Jackson, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4406.

SUPPLEMENTARY INFORMATION:

Background

On August 12, 2019, Commerce self-initiated country-wide anti-circumvention inquiries of the *China CORE Orders* [1] covering Chinese-origin hot-rolled steel (HRS) and/or cold-rolled steel (CRS) exported to various countries, including Guatemala, for completion into CORE and subsequently exported to the United States.[2] In the *Initiation Notice,* Commerce initiated the instant anti-circumvention inquiries based on available information and an analysis pursuant to section 781(b) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.225(h), to determine whether the importation of the Chinese-origin HRS or CRS substrate for completion into CORE in Guatemala and subsequent exportation of that CORE to the United States constitutes circumvention of the *China CORE Orders.*

For a complete description of the record developed since the initiation of these inquiries, *see* the Preliminary Decision Memorandum.[3] A list of topics included in the Preliminary Decision Memorandum is included as Appendix I to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov,* and to all parties in the Central Records Unit, Room B8024 of the main Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *http://enforcement.trade.gov/frn/.* The signed and the electronic versions of the Preliminary Decision Memorandum are identical in content.

Scope of the Orders

The products covered by these orders are certain flat-rolled steel products, either clad, plated, or coated with corrosion-resistant metals such as zinc, aluminum, or zinc-, aluminum-, nickel- or iron-based alloys, whether or not corrugated or painted, varnished, laminated, or coated with plastics or other non-metallic substances in addition to the metallic coating. For a complete description of the scope of the orders, *see* the Preliminary Decision Memorandum.

Scope of the Anti-Circumvention Inquiries

These anti-circumvention inquiries cover CORE completed in Guatemala from HRS or CRS substrate input manufactured in China and subsequently exported from Guatemala to the United States.

Methodology

Commerce is conducting these anti-circumvention inquiries in accordance with section 781(b) of the Act and 19 CFR 351.225(h). For a full description of the methodology underlying Commerce's preliminary determination, *see* the Preliminary Decision Memorandum.

Preliminary Finding

As detailed in the Preliminary Decision Memorandum, we preliminarily determine that Ternium Internacional Guatemala S.A. is neither producing CORE from Chinese substrate in Guatemala nor exporting CORE incorporating Chinese substrate to the United States at present, or at any point recent enough to support the concerns which served as the basis for the initiation of these inquiries, and thus action is not appropriate to address circumvention of the *China CORE Orders,* at this time. Accordingly, Commerce is making a preliminary negative finding of circumvention of the *China CORE Orders.*

Verification

As provided in 19 CFR 351.307, Commerce intends to verify information relied upon in making its final determination.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the final verification report is issued in these anti-circumvention inquiries, unless the Secretary alters the time limit. Rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than five days after the deadline date for case briefs.[4] Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in these anti-circumvention inquiries are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date

International Trade Administration

[A–570–026; C–570–027]

Certain Corrosion-Resistant Steel Products From the People's Republic of China: Affirmative Preliminary Determination of Circumvention Involving the United Arab Emirates

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) preliminarily determines that imports of certain corrosion-resistant steel products (CORE), completed in the United Arab Emirates (the UAE) using hot-rolled steel (HRS) and/or cold-rolled steel (CRS) flat products manufactured in the People's Republic of China (China), are circumventing the antidumping duty (AD) and countervailing duty (CVD) orders on CORE from China.

DATES: Applicable February 18, 2020.

FOR FURTHER INFORMATION CONTACT: Eli Lovely, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–1593.

SUPPLEMENTARY INFORMATION:

Background

On August 12, 2019, Commerce self-initiated country-wide anti-circumvention inquiries of the *China CORE Orders* [1] covering Chinese-origin HRS and/or CRS exported to various countries, including the UAE, for completion into CORE and subsequently exported to the United States.[2] In the *Initiation Notice,* Commerce initiated the instant anti-circumvention inquiries based on available information and an analysis pursuant to section 781(b) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.225(h), to determine whether the importation of the Chinese-origin HRS or CRS substrate for completion into CORE in the UAE and subsequent exportation of that CORE to the United States constitutes circumvention of the *China CORE Orders.*

For a complete description of the record developed since the initiation of these inquiries, *see* the Preliminary Decision Memorandum.[3] A list of topics included in the Preliminary Decision Memorandum is included as Appendix I to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov,* and to all parties in the Central Records Unit, Room B8024 of the main Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *http://enforcement.trade.gov/frn/.* The signed and the electronic versions of the Preliminary Decision Memorandum are identical in content.

Scope of the Orders

The products covered by these orders are certain flat-rolled steel products, either clad, plated, or coated with corrosion-resistant metals such as zinc, aluminum, or zinc-, aluminum-, nickel- or iron-based alloys, whether or not corrugated or painted, varnished, laminated, or coated with plastics or other non-metallic substances in addition to the metallic coating. For a complete description of the scope of the orders, *see* the Preliminary Decision Memorandum.

Scope of the Anti-Circumvention Inquiries

These anti-circumvention inquiries cover CORE completed in the UAE from HRS or CRS substrate input manufactured in China and subsequently exported from the UAE to the United States (merchandise subject to these inquiries).

Methodology

Commerce is conducting these anti-circumvention inquiries in accordance with section 781(b) of the Act and 19 CFR 351.225(h). Because certain interested parties did not cooperate to the best of their abilities in responding to Commerce's requests for information, we have based parts of our preliminary determination on the facts available, with adverse inferences, pursuant to sections 776(a) and (b) of the Act. For a full description of the methodology underlying Commerce's preliminary determination, *see* the Preliminary Decision Memorandum.

Preliminary Finding

As detailed in the Preliminary Decision Memorandum, we preliminarily determine that CORE completed in the UAE from HRS and/or CRS substrate sourced from China is circumventing the *China CORE Orders.* We therefore preliminarily determine that it is appropriate to include this merchandise within the *China CORE Orders* and to instruct U.S. Customs and Border Protection (CBP) to suspend liquidation of any entries of CORE from

[1] *See Certain Corrosion-Resistant Steel Flat Products from India, Italy, the People's Republic of China, the Republic of Korea, and Taiwan: Amended Final Affirmative Antidumping Duty Determination for India and Taiwan, and Antidumping Duty Orders,* 81 FR 48390 (July 25, 2016); *see also Certain Corrosion-Resistant Steel Products from India, Italy, Republic of Korea, and the People's Republic of China: Countervailing Duty Order,* 81 FR 48387 (July 25, 2016) (collectively, *China CORE Orders*).

[2] The notice of initiation subsequently published in the **Federal Register** on August 21, 2019. *See Corrosion-Resistant Steel Products from the People's Republic of China: Initiation of Anti-Circumvention Inquiries on the Antidumping Duty and Countervailing Duty Orders,* 84 FR 43585 (August 21, 2019) (*Initiation Notice*) and accompanying Memorandum, ''Certain Corrosion-Resistant Steel Products from the People's Republic of China: Initiation of Anti-Circumvention Inquiries on the Antidumping Duty and Countervailing Duty Orders,'' dated August 12, 2019.

[3] *See* Memorandum, ''Preliminary Decision Memorandum for the Anti-Circumvention Inquiry Involving the United Arab Emirates of the Antidumping and Countervailing Duty Orders on Certain Corrosion-Resistant Steel Products from the People's Republic of China,'' dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

the UAE produced from HRS and/or CRS from China.

Suspension of Liquidation

As stated above, Commerce has made a preliminary affirmative determination that imports of CORE complete in the UAE, using HRS and/or CRS flat products manufactured in China, are circumventing the *China CORE Orders.* In accordance with 19 CFR 351.225(l)(2), Commerce will direct CBP to suspend liquidation and to require a cash deposit of estimated duties on unliquidated entries of CORE produced in the UAE, as appropriate, that were entered, or withdrawn from warehouse, for consumption on or after August 12, 2019, the date of initiation of the anti-circumvention inquiries. The suspension of liquidation instructions will remain in effect until further notice.

CORE produced in the UAE from HRS and/or CRS that is not of Chinese origin is not subject to these inquiries. However, imports of such merchandise are also subject to certification requirements, and cash deposits may be required if the certification requirements are not satisfied. Accordingly, if an importer imports CORE from the UAE and claims that the CORE was not produced from HRS and/or CRS substrate manufactured in China, the importer and exporter are required to meet the certification and documentation requirements described in Appendices II, III, and IV, in order for cash deposits pursuant to the *China CORE Orders* not to be required.

In the situation where no certification is provided for an entry, and AD/CVD orders from China therefore potentially apply to that entry, Commerce intends to instruct CBP to suspend liquidation of the entry and collect cash deposits at the rates applicable to the *China CORE Orders* (*i.e.,* the AD rate established for the China-wide entity (199.43 percent) and the CVD rate established for the China all-others rate (39.05 percent)).[4]

Commerce preliminarily determines that the following company is not eligible for the certification process: Asian Ispat FZ LLC. Additionally, exporters are not eligible to certify shipments of merchandise produced by Asian Ispat FZ LLC. Further, importers of CORE from the UAE that is produced and/or exported by this ineligible company are similarly ineligible for the certification process with regard to those imports.

Verification

As provided in 19 CFR 351.307, Commerce intends to verify information relied upon in making its final determination.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last final verification report is issued in these anti-circumvention inquiries, unless the Secretary alters the time limit. Rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than five days after the deadline date for case briefs.[5] Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in these anti-circumvention inquiries are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at the U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington DC 20230, at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

International Trade Commission Notification

Commerce, consistent with section 781(e) of the Act, has notified the U.S. International Trade Commission (ITC) of this preliminary determination to include the merchandise subject to these anti-circumvention inquiries within the *China CORE Orders.* Pursuant to section 781(e) of the Act, the ITC may request consultations concerning Commerce's proposed inclusion of the merchandise subject to these inquiries. If, after consultations, the ITC believes that a significant injury issue is presented by the proposed inclusion, it will have 60 days from the date of notification by Commerce to provide written advice.

Notification to Interested Parties

This determination is issued and published in accordance with section 781(b) of the Act and 19 CFR 351.225(f).

Dated: February 7, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Appendix I

List of Topics Discussed in the Preliminary Decision Memorandum

Appendix II

Certification Requirements

If an importer imports certain corrosion-resistant steel products (CORE) from the UAE and claims that the CORE was not produced from hot-rolled steel and/or cold-rolled steel substrate (substrate) manufactured in the People's Republic of China (China), the importer is required to complete and maintain the importer certification attached hereto as Appendix III and all supporting documentation. Where the importer uses a broker to facilitate the entry process, it should obtain the entry number from the broker. Agents of the importer, such as brokers, however, are not permitted to make this certification on behalf of the importer.

The exporter is required to complete and maintain the exporter certification, attached as Appendix III, and is further required to provide the importer a copy of that certification and all supporting documentation.

For shipments and/or entries on or after August 12, 2019 through March 7, 2020, for which certifications are required, importers and exporters should complete the required certification within 30 days of the publication of this notice in the **Federal Register**. Accordingly, where appropriate, the relevant bullet in the certification should be edited to reflect that the certification was completed within the time frame specified above. For example, the bullet in the importer certification that reads: ''This certification was completed at or prior to the time of Entry,'' could be edited as follows: ''The imports referenced herein entered before March 8, 2020. This certification was completed on mm/dd/yyyy, within 30 days of the **Federal Register** notice publication of the preliminary determination of circumvention.'' Similarly, the bullet in the

[4] *See China CORE Orders.*

[5] *See* 19 CFR 351.309; *see also* 19 CFR 351.303 (for general filing requirements).

exporter certification that reads, ''This certification was completed at or prior to the time of shipment,'' could be edited as follows: ''The shipments/products referenced herein shipped before March 8, 2020. This certification was completed on mm/dd/yyyy, within 30 days of the **Federal Register** notice publication of the preliminary determination of circumvention. For such entries/shipments, importers and exporters each have the option to complete a blanket certification covering multiple entries/shipments, individual certifications for each entry/shipment, or a combination thereof.

For shipments and/or entries on or after March 7, 2020, for which certifications are required, importers should complete the required certification at or prior to the date of Entry and exporters should complete the required certification and provide it to the importer at or prior to the date of shipment.

The importer and UAE exporter are also required to maintain sufficient documentation supporting their certifications. The importer will not be required to submit the certifications or supporting documentation to U.S. Customs and Border Protection (CBP) as part of the entry process at this time. However, the importer and the exporter will be required to present the certifications and supporting documentation, to Commerce and/or CBP, as applicable, upon request by the respective agency. Additionally, the claims made in the certifications and any supporting documentation are subject to verification by Commerce and/or CBP. The importer and exporter are required to maintain the certifications (the importer must retain both certifications) and supporting documentation for the later of: (1) A period of five years from the date of entry or (2) a period of three years after the conclusion of any litigation in United States courts regarding such entries.

In the situation where no certification is provided for an entry, Commerce intends to instruct CBP to suspend liquidation of the entry and collect cash deposits at the rate applicable to the *CORE China Orders* (*i.e.,* the AD rate established for the China-wide entity (199.43 percent) and the CVD rate established for China all-others rate (39.05 percent)).

Appendix III

Exporter Certification

I hereby certify that:

- My name is {COMPANY OFFICIAL'S NAME} and I am an official of {NAME OF EXPORTING COMPANY}, located at {ADDRESS OF EXPORTING COMPANY};
- I have direct personal knowledge of the facts regarding the production and exportation of the corrosion resistant steel products identified below. ''Direct personal knowledge'' refers to facts the certifying party is expected to have in its own books and records. For example, an exporter should have direct personal knowledge of the producer's identity and location.
- The corrosion resistant steel products covered by this certification were produced by {NAME OF PRODUCING COMPANY}, located at {ADDRESS OF PRODUCING COMPANY}; *for each additional company, repeat:* {NAME OF PRODUCING COMPANY}, located at {ADDRESS OF PRODUCING COMPANY}
- The corrosion resistant steel products produced in the UAE were not manufactured using hot-rolled steel and/or cold-rolled steel substrate from China;
- This certification applies to the following sales:

Producer	Invoice No.	Invoice line item No.

- The corrosion resistant steel products covered by this certification were sold to {NAME OF U.S. CUSTOMER}, located at {ADDRESS OF U.S. CUSTOMER}.
- The corrosion resistant steel products covered by this certification were shipped to {NAME OF PARTY TO WHOM MERCHANDISE WAS SHIPPED}, located at {ADDRESS OF SHIPMENT}.
- I understand that {NAME OF EXPORTING COMPANY} is required to maintain a copy of this certification and sufficient documentation supporting this certification (*i.e.,* documents maintained in the normal course of business, or documents obtained by the certifying party, for example, mill certificates, production records, invoices, etc.) for the later of (1) a period of five years from the date of entry or (2) a period of three years after the conclusion of any litigation in the United States courts regarding such entries;
- I understand that {NAME OF EXPORTING COMPANY} must provide a copy of this Exporter Certification to the U.S. importer by the time of shipment;
- I understand that {NAME OF EXPORTING COMPANY} is required to provide a copy of this certification and supporting records, upon request, to U.S. Customs and Border Protection (CBP) and/or the Department of Commerce (Commerce);
- I understand that the claims made herein, and the substantiating documentation, are subject to verification by CBP and/or Commerce;
- I understand that failure to maintain the required certification, and/or failure to substantiate the claims made herein, and/or failure to allow CBP and/or Commerce to verify the claims made herein, may result in a de facto determination that all sales to which this certification applies are within the scope of the antidumping/countervailing duty order on corrosion resistant steel products from China. I understand that such finding will result in:
  - Suspension of all unliquidated entries (and entries for which liquidation has not become final) for which these requirements were not met; and
  - the requirement that the importer post applicable antidumping duty and/or countervailing duty cash deposits (as appropriate) equal to the rates as determined by Commerce;
  - the revocation of {NAME OF EXPORTING COMPANY}'s privilege to certify future exports of corrosion resistant steel products from the UAE as not manufactured using hot-rolled steel and/or cold-rolled steel substrate from China.
- This certification was completed at or prior to the time of shipment; and
- I am aware that U.S. law (including, but not limited to, 18 U.S.C. 1001) imposes criminal sanctions on individuals who knowingly and willfully make material false statements to the U.S. government.

Importer Certification

I hereby certify that:

- My name is {IMPORTING COMPANY OFFICIAL'S NAME} and I am an official of {NAME OF IMPORTING COMPANY}, located at {ADRESS OF IMPORTING COMPANY}.
- I have direct personal knowledge of the facts regarding the importation into the Customs territory of the United States of the corrosion resistant steel products produced in the UAE that entered under entry number(s), identified below, and which are covered by this certification. ''Direct personal knowledge'' refers to facts the certifying party is expected to have in its own records. For example, the importer should have direct personal knowledge of the importation of the product (*e.g.,* the name of the exporter) in its records;
- The corrosion resistant steel products covered by this certification were exported by {NAME OF EXPORTING COMPANY}, located at {ADDRESS OF EXPORTING COMPANY}.

If the importer is acting on behalf of the first U.S. customer, complete this paragraph:

- The corrosion resistant steel products covered by this certification were imported by {NAME OF IMPORTING COMPANY} on behalf of {NAME OF U.S. CUSTOMER}, located at {ADDRESS OF U.S. CUSTOMER}.
- The corrosion resistant steel products covered by this certification were shipped to {NAME OF PARTY TO WHOM MERCHANDISE WAS FIRST SHIPPED IN THE UNITED STATES}, located at {ADDRESS OF SHIPMENT}.
- I have personal knowledge of the facts regarding the production of the corrosion resistant steel products identified below.

''Personal knowledge'' includes facts obtained from another party, (*e.g.,* correspondence received by the importer (or exporter) from the producer regarding the country of manufacture of the imported products);

• The corrosion resistant steel products covered by this certification were produced by {NAME OF PRODUCING COMPANY}, located at {ADDRESS OF PRODUCING COMPANY}; *for each additional company, repeat:* {NAME OF PRODUCING COMPANY}, located at {ADDRESS OF PRODUCING COMPANY}.

• The corrosion resistant steel products covered by this certification were not manufactured using hot-rolled steel and/or cold-rolled steel substrate from China.

• This certification applies to the following entries:

Producer	Entry summary No.	Entry summary line item No.	Invoice No.	Invoice line item No.

• I understand that {NAME OF IMPORTING COMPANY} is required to maintain a copy of this certification and sufficient documentation supporting this certification (*i.e.,* documents maintained in the normal course of business, or documents obtained by the certifying party, for example, mill certificates, production records, invoices, etc.) for the later of (1) a period of five years from the date of entry or (2) a period of three years after the conclusion of any litigation in the United States courts regarding such entries;

• I understand that {NAME OF IMPORTING COMPANY} is required to provide this certification and supporting records, upon request, to U.S. Customs and Border Protection (CBP) and/or the Department of Commerce (Commerce);

• I understand that {NAME OF IMPORTING COMPANY} is required to maintain a copy of the exporter's certification (attesting to the production and/or export of the imported merchandise identified above), and any supporting records provided by the exporter to the importer, for the later of (1) a period of five years from the date of entry or (2) a period of three years after the conclusion of any litigation in United States courts regarding such entries;

• I understand that {NAME OF IMPORTING COMPANY} is required to maintain and, upon request, provide a copy of the exporter's certification and any supporting records provided by the exporter to the importer, to CBP and/or Commerce;

• I understand that the claims made herein, and the substantiating documentation, are subject to verification by CBP and/or Commerce;

• I understand that failure to maintain the required certifications, and/or failure to substantiate the claims made herein, and/or failure to allow CBP and/or Commerce to verify the claims made herein, may result in a de facto determination that all entries to which this certification applies are within the scope of the antidumping/countervailing duty order on corrosion resistant steel products from China. I understand that such finding will result in:

○ Suspension of liquidation of all unliquidated entries (and entries for which liquidation has not become final) for which these requirements were not met; and;

○ the requirement that the importer post applicable antidumping duty and/or countervailing duty cash deposits (as appropriate) equal to the rates determined by Commerce;

the revocation of {NAME OF IMPORTING COMPANY}'s privilege to certify future imports of corrosion resistant steel products from the UAE as not manufactured using hot-rolled steel and/or cold-rolled steel substrate from China.

• I understand that agents of the importer, such as brokers, are not permitted to make this certification;

• This certification was completed at or prior to the time of Entry; and

• I am aware that U.S. law (including, but not limited to, 18 U.S.C. 1001) imposes criminal sanctions on individuals who knowingly and willfully make material false statements to the U.S. government.

Certain Corrosion-Resistant Steel Products From the People's Republic of China: Negative Preliminary Determination of Circumvention Involving South Africa

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) preliminarily determines that imports of certain corrosion-resistant steel products (CORE), completed in South Africa are not circumventing the antidumping duty (AD) and countervailing duty (CVD) orders on CORE from the People's Republic of China (China) at this time.

DATES: Applicable February 18, 2020.

FOR FURTHER INFORMATION CONTACT: Laura Griffith, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–6430.

SUPPLEMENTARY INFORMATION:

Background

On August 12, 2019, Commerce self-initiated country-wide anti-circumvention inquiries of the *China CORE Orders* [1] covering Chinese-origin hot-rolled steel (HRS) and/or cold-rolled steel (CRS) exported to various countries, including South Africa, for completion into CORE and subsequently exported to the United States.[2] In the *Initiation Notice,* Commerce initiated the instant anti-circumvention inquiries based on available information and an analysis pursuant to section 781(b) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.225(h), to determine whether the importation of the Chinese-origin HRS or CRS substrate for completion into CORE in South Africa and subsequent exportation of that CORE to the United States constitutes circumvention of the *China CORE Orders.*

For a complete description of the record developed since the initiation of these inquiries, *see* the Preliminary Decision Memorandum.[3] A list of topics

[1] *See Certain Corrosion-Resistant Steel Flat Products from India, Italy, the People's Republic of China, the Republic of Korea, and Taiwan: Amended Final Affirmative Antidumping Duty Determination for India and Taiwan, and Antidumping Duty Orders,* 81 FR 48390 (July 25, 2016); *see also Certain Corrosion-Resistant Steel Products from India, Italy, Republic of Korea, and the People's Republic of China: Countervailing Duty Order,* 81 FR 48387 (July 25, 2016) (collectively, *China CORE Orders*).

[2] The notice of initiation subsequently published in the **Federal Register** on August 21, 2019. *See Corrosion-Resistant Steel Products from the People's Republic of China: Initiation of Anti-Circumvention Inquiries on the Antidumping Duty and Countervailing Duty Orders,* 84 FR 43585 (August 21, 2019) (*Initiation Notice*) and accompanying Memorandum, ''Certain Corrosion-Resistant Steel Products from the People's Republic of China: Initiation of Anti-Circumvention Inquiries on the Antidumping Duty and Countervailing Duty Orders,'' dated August 12, 2019.

[3] *See* Memorandum, ''Preliminary Decision Memorandum for the Anti-Circumvention Inquiries Involving the Republic of South Africa of the Antidumping and Countervailing Duty Orders on Certain Corrosion-Resistant Steel Products from the People's Republic of China,'' dated concurrently

included in the Preliminary Decision Memorandum is included as Appendix I to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov,* and to all parties in the Central Records Unit, Room B8024 of the main Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *http://enforcement.trade.gov/frn/.* The signed and the electronic versions of the Preliminary Decision Memorandum are identical in content.

Scope of the China CORE Orders

The products covered by these orders are certain flat-rolled steel products, either clad, plated, or coated with corrosion-resistant metals such as zinc, aluminum, or zinc-, aluminum-, nickel- or iron-based alloys, whether or not corrugated or painted, varnished, laminated, or coated with plastics or other non-metallic substances in addition to the metallic coating. For a complete description of the scope of the orders, *see* the Preliminary Decision Memorandum.

Scope of the Anti-Circumvention Inquiries

These anti-circumvention inquiries cover CORE completed in South Africa from HRS or CRS substrate input manufactured in China and subsequently exported from South Africa to the United States.

Methodology

Commerce is conducting these anti-circumvention inquiries in accordance with section 781(b) of the Act and 19 CFR 351.225(h). For a full description of the methodology underlying Commerce's preliminary determination, *see* the Preliminary Decision Memorandum.

Preliminary Finding

As detailed in the Preliminary Decision Memorandum, we preliminarily determine that CORE produced in South Africa and exported to the United States is not being completed from Chinese-origin HRS or CRS substrate at present, or at any point recent enough to support the concerns which served as the basis for the initiation of these inquiries, and thus, action is not appropriate to address circumvention of the *China CORE Orders* at this time. Accordingly, Commerce is making a preliminary negative finding of circumvention of the *China CORE Orders.*

Verification

As provided in 19 CFR 351.307, Commerce intends to verify information relied upon in making its final determination.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the final verification report is issued in these anti-circumvention inquiries, unless the Secretary alters the time limit. Rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than five days after the deadline date for case briefs.[4] Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in these anti-circumvention inquiries are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at the U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington DC 20230, at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

Notification to Interested Parties

This determination is issued and published in accordance with section 781(b) of the Act and 19 CFR 351.225(f).

Dated: February 7, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Proposed Information Collection; Comment Request; West Coast Region Groundfish Trawl Fishery Electronic Monitoring Program

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before April 20, 2020.

ADDRESSES: Direct all written comments to Adrienne Thomas, Government Information Specialist, NOAA, 151 Patton Avenue, Room 159, Asheville, NC 28801 (or via the internet at *PRAcomments@doc.gov*). All comments received are part of the public record. Comments will generally be posted without change. All Personally Identifiable Information (for example, name and address) voluntarily submitted by the commenter may be publicly accessible. Do not submit Confidential Business Information or otherwise sensitive or protected information. You may submit attachments to electronic comments in Microsoft Word, Excel, or Adobe PDF file formats.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection

with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

[4] *See* 19 CFR 351.309; *see also* 19 CFR 351.303 (for general filing requirements).

instrument and instructions should be directed to Jahnava Duryea, National Marine Fisheries Service, California Central Valley Office, 650 Capital Mall, Suite 5–100, Sacramento, CA 95814, (916) 930–3725 or via email at *jahnava.duryea@noaa.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

This is a revision and extension of a currently approved information collection.

The National Marine Fisheries Service (NMFS) published a final rule on June 28, 2019 (84 FR 31146), to implement an electronic monitoring (EM) program for two sectors of the limited entry trawl fishery, consistent with the Magnuson-Stevens Fishery Conservation and Management Act (MSA) and the Pacific Coast Groundfish Fishery Management Plan (FMP). The action allows catcher vessels in the Pacific whiting fishery and fixed gear vessels in the shorebased Individual Fishing Quota (IFQ) fishery to use EM in place of observers to meet the requirements of the Trawl Rationalization Program for 100-percent at-sea observer coverage. This action is necessary to increase operational flexibility and reduce monitoring costs for vessels in the trawl fishery by providing an alternative to observers.

Under this collection, some catcher vessels will have the option to use EM in place of observers to reduce total fleet monitoring costs to levels sustainable for the fleet and agency and meet the requirements for 100-pecent observer coverage at-sea. In place of an observer documenting discards onboard, captains would report estimates of their own discards on a logbook and submit them to NMFS. NMFS would use the discards reported on the logbook to debit allocations in the Vessel Accounting System (VAS) and North Pacific Database Program (NorPac). They would also install and carry and EM system to capture fishing activities at-sea. Following the trip, an analyst would review the video and report estimates of discards of allocated species to NMFS to use to audit the validity of the logbook estimates. The EM data would also be used to monitor compliance with the requirements of the catch share program. In this way, logbooks and EM systems would be used in tandem in place of observers to meet the objectives of 100-percent at-sea monitoring of the catch share program.

Vessel operators would be required to submit a logbook reporting their discards of IFQ species. NMFS would use the logbook data to debit discards of IFQ species from IFQs and cooperative allocations, and use the EM data to audit the logbook data. EM data would also be used to monitor compliance with the requirements of the catch share program. Vessel operators would be required to submit a logbook reporting their discards of IFQ species.

New requirements being added to this collection include:

EM Service Providers will be required to submit catch reports and feedback reports, and store EM data and other records.

Vessel Owners will be required to obtain services from an NMFS-permitted EM service provider to analyze and store EM data, and report it to NMFS.

II. Method of Collection

Information that would be required is specified in the regulations at 50 CFR 660.603(b)(1) and 660.604(b)(1) in the final rule 0648–BF52. Information is collected by mail, electronically, and by phone by the NMFS West Coast Region Fisheries Permit Office.

The following information is collected by mail: *EM service providers:* EM service provider application and renewals; EM service plan and any subsequent changes to plan; submission of two EM units and standard operating procedures (SOPs), if requested by NMFS; EM service provider appeals; and EM data storage downloaded to hard drive and shipped (not required until 2021). *Vessel owners:* Initial application; final application (EM system certification, tentative fishing plan, vessel monitoring plan); changes to vessel monitoring plan; and EM system certification; *Vessel operators:* Federal discard logbook for each landing; and hard drive submission.

The following information is collected electronically: *EM service providers:* EM provider reports of technical assistance requests, harassment and intimidation, and non-compliance; catch reports, feedback reports, and EM data storage uploaded to a secure website (not required until 2021); *Vessel operators:* One-time online EM training provided by NMFS; and federal discard logbook (if authorized in writing by NMFS).

The following information may be collected by phone: *EM service providers:* follow-up debriefings with EM provider employees regarding technical assistance, harassment and intimidation, or non-compliance; and ongoing program and technical support.

III. Data

OMB Control Number: 0648–0785.

Form Number(s): None.

Type of Review: Regular (revision and extension of a current approved collection).

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 146 (5 EM service providers, 58 vessel owners, 83 vessel operators).

Estimated Time per Response: EM service providers: Application (application form, EM service plan, submission of EM units)—5 hours; application renewals (biennial)—1 hour; EM service provider appeal—4 hours; EM service plan changes—2 hours; EM system certification—30 minutes; reports (technical assistance—40 minutes, harassment and intimidation—1 hour, compliance reports—20 minutes, catch reports—15 minutes, feedback to vessel—10 minutes, data storage—15 minutes); debrief of EM staff—2 hours 45 minutes. *Vessel owners:* Initial application—30 minutes; final application (updated application, EM system certification, tentative fishing plan, vessel monitoring plan)—8 hours 40 minutes; changes to vessel monitoring plan—1 hour; annual EM authorization renewal—30 minutes. *Vessel operators:* One-time online EM training provided by NMFS 1 hour 30 minutes; federal discard logbook for each landing; hard drive submission—10 minutes.

Estimated Total Annual Burden Hours: 7,727.

Estimated Total Annual Cost to Public: $1,721,073.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XA047]

Mid-Atlantic Fishery Management Council (MAFMC); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The Mid-Atlantic Fishery Management Council's (Council) Scientific and Statistical Committee (SSC) of the will hold a meeting.

DATES: The meeting will be held on Tuesday, March 10, 2020, starting at 1 p.m. and continue through 12:30 p.m. on Wednesday, March 11, 2020. See **SUPPLEMENTARY INFORMATION** for agenda details.

ADDRESSES: The meeting will take place at the Royal Sonesta Harbor Place, 550 Light Street, Baltimore, MD 21202; telephone: (410) 234–0550.

Council address: Mid-Atlantic Fishery Management Council, 800 N State Street, Suite 201, Dover, DE 19901; telephone: (302) 674–2331; website: *www.mafmc.org*.

FOR FURTHER INFORMATION CONTACT: Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, telephone: (302) 526–5255.

SUPPLEMENTARY INFORMATION: The purpose of this meeting is to make acceptable biological catch (ABC) recommendations for golden tilefish for the 2021 fishing year and interim recommendations for the 2022 fishing year based on information in the 2020 data update. The SSC will also review the most recent survey and fishery data and the previously recommended 2021 ABC for blueline tilefish. The SSC will also review and provide feedback on the most recent Mid-Atlantic State of the Ecosystem report and other Ecosystem Approach to Fisheries Management (EAFM) related activities. The SSC and staff from the NMFS Marine Recreational Information Program (MRIP) will have an open discussion and question and answer session regarding the recently implemented changes to the recreational data collection program with a focus on specific implications to Mid-Atlantic stocks. The SSC will discuss the 2020–2024 stock assessment schedule, recent changes to the Mid-Atlantic Council's risk policy, and receive an update from the *Illex* workgroup. In addition, the SSC may take up any other business as necessary.

A detailed agenda and background documents will be made available on the Council's website (*www.mafmc.org*) prior to the meeting.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aid should be directed to M. Jan Saunders, (302) 526–5251, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: February 12, 2020.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

Patent and Trademark Office

[Docket No. PTO–T–2020–0007]

Privacy Act of 1974; System of Records

AGENCY: United States Patent and Trademark Office, Commerce.

ACTION: Notice of a new system of records.

SUMMARY: Pursuant to the Privacy Act of 1974 and the Office of Management and Budget (OMB) Circular A–108, the United States Patent and Trademark Office (USPTO) hereby gives notice it has established a new system of records titled COMMERCE/USPTO–26, Trademark Application and Registration Records. The USPTO proposes to establish this system of records to manage trademark application and registration records.

DATES: To be considered, written comments must be submitted on or before March 19, 2020. This new system of records will become effective on February 18, 2020, with routine uses becoming effective on March 19, 2020.

ADDRESSES: Comments may be submitted by any of the following methods:

- *Email: SORN@USPTO.gov.* Include ''Privacy Act USPTO–26 comment'' in the subject line of the message.
- *Federal Rulemaking Portal: http://www.regulations.gov.*
- *Mail:* Trademark Portfolio Manager, Office of the Chief Information Officer, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450.

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to Eunice Wang, Trademark Portfolio Manager, Office of the Chief Information Officer, USPTO, by mail to P.O. Box 1450, Alexandria, VA 22313–1450; by telephone at 571–272–8872; or by email to *TrademarkAssistanceCenter@uspto.gov* with ''Trademark Application and Registration Records'' in the subject line.

SUPPLEMENTARY INFORMATION: The USPTO is giving notice of a proposed new system of records that is subject to the Privacy Act of 1974. The USPTO is the federal agency responsible for registering trademarks, and this system of records would collect and maintain information related to trademark applications and registrations, including on trademark applicants and their authorized representatives, to carry out the USPTO's duties.

The Privacy Act requires each agency that proposes to establish a system of records to provide adequate advance notice of any such proposal to the Office of Management and Budget (OMB), the Committee on Oversight and Government Reform of the House of Representatives, and the Committee on Homeland Security and Governmental Affairs of the Senate (5 U.S.C. 552a(r)). The purpose of providing the advance notice to OMB and Congress is to permit an evaluation of the potential effect of the proposal on the privacy and other rights of individuals. The USPTO filed a report describing the new system of records covered by this notice with the Chair of the Senate Committee on Homeland Security and Governmental Affairs, the Chair of the House Committee on Oversight and Government Reform, and the Deputy Administrator of the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), on [insert date of letters].

SYSTEM NAME AND NUMBER:

Trademark Application and Registration Records, COMMERCE/USPTO–26.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

United States Patent and Trademark Office, 600 Dulany Street, Alexandria, VA 22313.

SYSTEM MANAGER(S):

Trademark Portfolio Manager, Office of the Chief Information Officer, United States Patent and Trademark Office, Alexandria, VA 22313–1450, or by

email to *TrademarkAssistanceCenter@uspto.gov.*

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

35 U.S.C. 2 and 15 U.S.C. 1051–1141n.

PURPOSE(S) OF THE SYSTEM:

The purpose of this system of records is to carry out the duties of the USPTO to issue federal trademark registrations and maintain a register of trademarks. The system allows the USPTO to collect and maintain records generated as customers apply for and prosecute a trademark application and maintain a trademark registration.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Applicants for trademark registration, registrants, and legal and other authorized representatives for such applicants and registrants.

CATEGORIES OF RECORDS IN THE SYSTEM:

All categories of records may include the name, citizenship, domicile, email address, postal address, and telephone number of the trademark applicant, registrant, and applicant's or registrant's legal or other authorized representative(s), an attorney's law firm or company affiliation and professional licensing information, and other information pertaining to an applicant's or registrant's activities in connection with the applied-for or registered mark. Records in this system include trademark applications, applicant and registrant declarations, office actions, registration certificates, and correspondence generated in the course of the prosecution of a trademark application or maintenance of a trademark registration.

RECORD SOURCE CATEGORIES:

Information in this system of records is derived from records developed during the prosecution of a trademark application or the maintenance of a trademark registration and, thus, the information may come from the trademark applicant, registrant, and applicant's or registrant's legal or other authorized representative.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

1. *Public Disclosure*—Records in this system of records are available for public inspection, except as of December 21, 2019, the USPTO will not make publicly available the address provided in the ''Domicile Address'' field on trademark forms. The USPTO will continue to make postal addresses provided for mark owners on trademark forms available for public inspection. Postal and domicile addresses can be different, but when a mark owner elects to provide the same address for both the postal and domicile address, that address will still be available for public inspection. Individuals may also request domicile addresses provided before December 21, 2019, or otherwise present in this system of records, not be made available for public inspection. The information in this system is used by the Agency and the public for a variety of business purposes related to determining eligibility of a mark for federal registration and enforcing trademark rights. The information is available at USPTO facilities and can also be accessed and downloaded at the USPTO's website.

2. *Foreign Entity Disclosure*—A record in this system of records may be disclosed to a foreign entity (foreign government or international organization) to satisfy requirements for the processing of an application for a foreign trademark registration or an international trademark registration.

3. *Professional Organizations or Associations*—A record in this system of records may be disclosed to professional organizations or associations with which individuals covered by this system of records may be affiliated, such as state bar disciplinary authorities, to meet their responsibilities in connection with the administration and maintenance of standards of conduct and discipline.

4. *Audit Disclosure*—A record from this system of records may be disclosed to an agency, organization, or individual for the purpose of performing an audit or oversight operations as authorized by law, but only such information as is necessary and relevant to such audit or oversight function when necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to USPTO officers and employees.

5. *Governments Disclosure*—A record from this system of records may be disclosed to a federal, state, local, or international agency, in response to its request, in connection with (1) the assignment, hiring, or retention of an individual, (2) the issuance of a security clearance, (3) the letting of a contract, or (4) the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

6. *Law Enforcement and Investigation*—A record in this system of records may be disclosed to a Federal, state, local, or foreign agency or other appropriate entity where a record, either alone or in conjunction with other information, indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by (1) general statute or particular program statute or contract, (2) rule, regulation, or order issued pursuant thereto, or (3) the necessity to protect an interest of the Agency. The agency receiving the record(s) must be charged with the responsibility of investigating or prosecuting such violations or with enforcing or implementing the statute, rule, regulation, or order issued pursuant thereto, or protecting the interest of the Agency.

7. *Non-Federal Personnel*—A record in this system of records may be disclosed to contractors, agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other work assignment for the Agency who have need for information from the system of records: (1) In the course of operating or administrating the system of records; (2) In the course of fulfilling an agency function, but only to the extent necessary to fulfill that function; or (3) In order to fulfill their contract(s), but who do not operate the system of records within the meaning of 5 U.S.C. 552a(m).

8. *Record Informational Inquiries*—A record in this system of records may be disclosed to a Federal, state, local, or international agency, maintaining civil, criminal, or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to an Agency decision concerning (1) the assignment, hiring, or retention of an individual, (2) the issuance of a security clearance, (3) the letting of a contract, or (4) the issuance of a license, grant, or other benefit.

9. *Data Breach Notification*—A record in this system of records may be disclosed to appropriate agencies, entities, and persons when (1) the USPTO suspects or has confirmed that there has been a breach of the system of records; (2) USPTO has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, USPTO (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and person is reasonably necessary to assist in connection with USPTO's efforts to respond to the suspected or confirmed

breach or to prevent, minimize, or remedy such harm.

10. *Data Breach Assistance*—A record in this system of records may be disclosed to another Federal agency or Federal entity when the Agency determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

11. *Adjudication and Litigation*—A record in this system of records may be disclosed to a court, magistrate, or administrative tribunal during the course of presenting evidence, including disclosures to opposing counsel or witnesses in the course of civil discovery, litigation, or settlement negotiations.

12. *Department of Justice Litigation*—A record in this system of records may be disclosed to any component of the Department of Justice for the purpose of representing the Agency, or any employee of the Agency, in pending or potential litigation to which the record is pertinent.

13. *Freedom of Information Act Assistance from Department of Justice*—A record in this system of records may be disclosed to the Department of Justice, in connection with determining whether disclosure thereof is required by the Freedom of Information Act (5 U.S.C. 552).

14. *Office of Personnel Management*—A record in this system of records may be disclosed to the Office of Personnel Management (OPM) for personnel research purposes, as a data source for management information, for the production of summary descriptive statistics and analytical studies in support of the function for which the records are collected and maintained, or for related manpower studies.

15. *Congressional Inquiries*—A record in this system of records may be disclosed to a Member of Congress or staff acting upon the Member's behalf when the Member or staff requests the information on behalf of, and at the request of, the individual who is the subject of the record.

16. *National Archives and Records Administration*—A record in this system of records may be disclosed to the Administrator of the National Archives and Records Administration (NARA), or said administrator's designee, during an inspection of records conducted by NARA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with NARA regulations governing inspection of records for this purpose, and any other relevant directive. Such disclosure shall not be used to make determinations about individuals.

17. *Office of Management and Budget*—A record in this system of records may be disclosed to the Office of Management and Budget (OMB), in connection with the review of private relief legislation as set forth in OMB Circular No. A–19 at any stage of the legislative coordination and clearance process.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

USPTO stores the records on electronic storage media, paper records in file folders, and microfilm.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records may be retrieved by mark, application serial number, filing date, registration number, registration date, name of the owner, name of the attorney of record, and other identifiers in the system.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records retention and disposal is performed in accordance with the USPTO Records Control Schedule N1–241–06–2:2 or N1–241–06–2:3 (Trademark Case File Records and Related Indexes). Trademark application and case files meeting certain selection criteria (2:2) are permanent records and transferred to NARA six years after the registrations are cancelled, expired, or go abandoned. Non-selected trademark application and case files (2:3) are temporary records destroyed two years after trademark registrations are cancelled, expired, or go abandoned.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Records are maintained in areas accessible only to authorized personnel in buildings protected by security guards. The electronic records stored in systems can be accessed for maintenance only by authorized personnel. Personally and Business identifiable information stored in systems are safeguarded and protected in conformance with all Federal statutory and OMB guidance requirements. The hosting facility is supported by 24/7 onsite hosting and network monitoring by trained technical staff.

RECORD ACCESS PROCEDURES:

Requests from individuals should be submitted as stated in the notification section below.

CONTESTING RECORD PROCEDURES:

The general provisions for access and/or contesting information by the individual concerned appear in 37 CFR 102 subpart B. Requests from individuals should be submitted as stated in the notification section below.

NOTIFICATION PROCEDURES:

Information about the records contained in this system may be obtained by sending a signed request to the system manager at the address above or to the address provided in 37 CFR 102 subpart B for making inquiries about records covered by the Privacy Act. Requesters should provide their name, address, and record sought in accordance with the procedures for making inquiries appearing in 37 CFR 102 subpart B.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

No exemptions claimed.

HISTORY:

None.

Dated: February 11, 2020.

Frederick W. Steckler,

Chief Administrative Officer, Office of the Chief Administrative Officer, United States Patent and Trademark Office.

BILLING CODE 3510–16–P

COMMODITY FUTURES TRADING COMMISSION

Agency Information Collection Activities Under OMB Review

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995 (''PRA''), this notice announces that the Information Collection Request (''ICR'') abstracted below has been forwarded to he Office of Management and Budget (''OMB'') for review and comment. The ICR describes the nature of the information collection and its expected costs and burden.

DATES: Comments must be submitted on or before March 19, 2020.

ADDRESSES: Comments regarding the burden estimate or any other aspect of the information collection, including

suggestions for reducing the burden, may be submitted directly to the Office of Information and Regulatory Affairs (''OIRA'') in OMB within 30 days of this notice's publication by either of the following methods. Please identify the comments by ''OMB Control No. 3038–0055.''

- *By email addressed to: OIRAsubmissions@omb.eop.gov* or
- *By mail addressed to:* The Office of Information and Regulatory Affairs, Office of Management and Budget, Attention Desk Officer for the Commodity Futures Trading Commission, 725 17th Street NW, Washington, DC 20503.

A copy of all comments submitted to OIRA should be sent to the Commodity Futures Trading Commission (''CFTC'' or ''Commission'') by either of the following methods. The copies should refer to ''OMB Control No. 3038–0055.''

- *By mail addressed to:* Christopher Kirkpatrick, Secretary of the Commission, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW, Washington, DC 20581;
- By Hand Delivery/Courier to the same address; or
- Through the Commission's website at *http://comments.cftc.gov.* Please follow the instructions for submitting comments through the website.

Please submit your comments to the Commission using only one method. A copy of the supporting statement for the collection of information discussed herein may be obtained by visiting *http://RegInfo.gov.*

All comments must be submitted in English, or if not, accompanied by an English translation. Comments will be posted as received to *http://www.cftc.gov.* You should submit only information that you wish to make available publicly. If you wish the Commission to consider information that you believe is exempt from disclosure under the Freedom of Information Act, a petition for confidential treatment of the exempt information may be submitted according to the procedures established in § 145.9 of the Commission's regulations.[1] The Commission reserves the right, but shall have no obligation, to review, pre-screen, filter, redact, refuse or remove any or all of your submission from *http://www.cftc.gov* that it may deem to be inappropriate for publication, such as obscene language. All submissions that have been redacted or removed that contain comments on the merits of the ICR will be retained in the public comment file and will be considered as required under the Administrative Procedure Act and other applicable laws, and may be accessible under the Freedom of Information Act.

FOR FURTHER INFORMATION CONTACT: Jacob Chachkin, Special Counsel, Division of Swap Dealer and Intermediary Oversight, Commodity Futures Trading Commission, (202) 418–5496, email: *jchachkin@cftc.gov,* and refer to OMB Control No. 3038–0055.

SUPPLEMENTARY INFORMATION:

Title: Privacy of Consumer Financial Information (OMB Control No. 3038–0055). This is a request for an extension of a currently approved information collection.

Abstract: Section 124 of the Commodity Futures Modernization Act of 2000[2] amended the Commodity Exchange Act (the ''Act'') and added a new Section 5g[3] to the Act to (i) add that futures commission merchants, commodity trading advisors, commodity pool operators, and introducing brokers that are subject to CFTC jurisdiction with respect to any financial activity shall be treated as a financial institution for purposes of Title V, Subtitle A of the Gramm-Leach-Bliley Act (''GLB Act''), (ii) treat the Commission as a Federal functional regulator for purposes of applying the provisions of the GLB Act, and (iii) direct the Commission to prescribe regulations under Title V of the GLB Act. The Commission adopted regulations for these entities under part 160 and later extended them to retail foreign exchange dealers, swap dealers, and major swap participants.[4] Part 160 requires those subject to the regulations, among other things, to provide privacy and opt out notices to customers and to adopt appropriate policies and procedures to safeguard customer records and information.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. On December 11, 2019, the Commission published in the **Federal Register** notice of the proposed extension of this information collection and provided 60 days for public comment on the proposed extension, 84 FR 67724 (''60-Day Notice''). The Commission did not receive any relevant comments on the 60-Day Notice.

Burden Statement: The respondent burden for this collection is estimated to be as follows:

Estimated Number of Respondents: 2,789.

Estimated Average Burden Hours per Respondent: 3.0326.

Estimated Total Annual Burden Hours: 8,458.

Frequency of Collection: As applicable.

There are no capital costs or operating and maintenance costs associated with this collection.

(Authority: 44 U.S.C. 3501 *et seq.*)

Dated: February 11, 2020.

Robert Sidman,

Deputy Secretary of the Commission.

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Innovation Board; Notice of Federal Advisory Committee Meeting

AGENCY: Under Secretary of Defense for Research and Engineering, Department of Defense (DoD).

ACTION: Notice of Federal Advisory Committee meeting.

SUMMARY: The DoD is publishing this notice to announce that the following Federal Advisory Committee meeting of the Defense Innovation Board will take place.

DATES: Open to the public, Thursday, March 5, 2020 from 2:00 p.m. to 4:00 p.m.

ADDRESSES: The meeting will be held at Capital Factory, 701 Brazos St., Austin, TX 78701.

FOR FURTHER INFORMATION CONTACT: Colleen Laughlin, 571–372–0933 (Voice), (Facsimile), *colleen.r.laughlin.civ@mail.mil* (Email). Mailing address is Defense Innovation Board, 9010 Defense Pentagon, Room 5E572, Washington, DC 20301–9010. Website: *https://innovation.defense.gov/.* The most up-to-date changes to the meeting agenda can be found on the website.

SUPPLEMENTARY INFORMATION: This meeting is being held under the provisions of the Federal Advisory Committee Act (FACA) of 1972 (5 U.S.C., Appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and 41 CFR 102–3.140 and 102–3.150.

Purpose of the Meeting: To obtain, review, and evaluate information related to the Board's mission in advising the Secretary of Defense and the Deputy Secretary of Defense independent advice and recommendations on innovative means to address future challenges in terms of integrated change to organizational structure and processes, business and functional concepts, and technology applications. The Board focuses on (a) technology and capabilities, (b) practices and operations, (c) people and culture, and (d) other research and analysis of topics raised by the Secretary of Defense, Deputy Secretary of Defense, or the Under Secretary of Defense for Research and Engineering.

Agenda: The meeting will begin on March 5, 2020 at 2:00 p.m. with opening remarks by Ms. Colleen Laughlin, the Designated Federal Officer (DFO), and Dr. Eric Schmidt, Board Chair. The Workforce, Behavior, and Culture Subcommittee will present on workforce issues, to include recommendations for a Chief Digital Engineering and Recruiting Management Officer. The Science and Technology Subcommittee will present on a Biotechnology and Data Strategy for the Joint Pathology Center to include presentations from external experts. The Science and Technology committee will also share progress updates from ongoing projects. Following all updates the board will deliberate and vote on pertinent recommendations. The Board will receive an update from the Department on the implementation status of its recommendations. The meeting will adjourn at 4:00 p.m.

Meeting Accessibility: Pursuant to Federal statutes and regulations (the FACA, the Sunshine Act, and 41 CFR 102–3.140 through 102–3.165) and the availability of space, the meeting is open to the public from 2:00 p.m. to 4:00 p.m. Seating is on a first-come basis. Members of the public wishing to attend the meeting or wanting to receive a link to the live stream webcast should register on the Board website, *http://innovation.defense.gov/meetings,* no later than February 27, 2020. Members of the media should RSVP to the Office of the Assistant to the Secretary of Defense (Public Affairs), at *osd.pentagon.pa.list.dop-atl@mail.mil.*

Special Accommodations: Individuals requiring special accommodations to access the public meeting should contact the DFO, see the **FOR FURTHER INFORMATION CONTACT** section for contact information, no later than February 27, 2020, so that appropriate arrangements can be made.

Written Statements: Written comments may be submitted to the DFO via email to mailbox address: *osd.innovation@mail.mil* in either Adobe Acrobat or Microsoft Word format. The DFO will compile all written submissions and provide them to Board members for consideration. Please note that because the Board operates under the provisions of the FACA, all submitted comments will be treated as public documents and will be made available for public inspection, including, but not limited to, being posted on the Board's website.

Oral Statements: Individuals wishing to make an oral statement to the Board at the public meeting may be permitted to speak for up to two minutes. Anyone wishing to speak to the Board should submit a request by email at *osd.innovation@mail.mil* no later than February 27, 2020 for planning. Requests for oral comments should include a copy or summary of planned remarks for archival purposes. Individuals may also be permitted to submit a comment request at the public meeting; however, depending on the number of individuals requesting to speak, the schedule may limit participation. Webcast attendees will be provided instructions with the live stream link if they wish to submit comments during the open meeting.

Dated: February 12, 2020.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001–06–P

DEPARTMENT OF EDUCATION

[Docket No. ED–2019–ICCD–0153]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Formula Grant EASIE Electronic Application System for Indian Education

AGENCY: Office of Elementary and Secondary Education (OESE), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing an extension of an existing information collection.

DATES: Interested persons are invited to submit comments on or before March 19, 2020.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2019–ICCD–0153. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. If the regulations.gov site is not available to the public for any reason, ED will temporarily accept comments at *ICDocketMgr@ed.gov.* Please include the docket ID number and the title of the information collection request when requesting documents or submitting comments. *Please note that comments*

submitted by fax or email and those submitted after the comment period will not be accepted. Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Strategic Collections and Clearance Governance and Strategy Division, U.S. Department of Education, 400 Maryland Ave. SW, LBJ, Room 6W–208D, Washington, DC 20202–4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Kimberly Smith, 202–453–6469.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Formula Grant EASIE Electronic Application System for Indian Education.

OMB Control Number: 1810–0021.

Type of Review: An extension of an existing information collection.

Respondents/Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 11,300.

Total Estimated Number of Annual Burden Hours: 9,590.

Abstract: The Indian Education Formula Grant (CFDA 84.060A) requires the annual submission of the application from the local educational agency and/or tribe. The amount of each applicant's award is determined by formula, based upon the reported number of American Indian/Alaska Native students identified in the application, the state per pupil expenditure, and the total appropriation available. Applicants provide the data required for funding electronically, and the Office of Indian Education (OIE) is able to apply electronic tools to facilitate the review and analysis leading to grant awards. The application has been named Formula Grant Electronic Application System for Indian Education (EASIE), and is located in the EDFacts System (ESS) website.

Dated: February 12, 2020.

Kate Mullan,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer.

ELECTION ASSISTANCE COMMISSION

EAC 2020 Elections Disability, Accessibility, and Security Forum

AGENCY: U.S. Election Assistance Commission.

ACTION: Meeting notice; open to the public.

DATES: Thursday, February 20, 2020, 9:00 a.m.–3:00 p.m. (EDT).

ADDRESSES: Westin Georgetown, 2350 M St. NW, The Washington Room, Washington, DC 20037.

FOR FURTHER INFORMATION CONTACT: Patrick Leahy at (301) 960–1833.

SUPPLEMENTARY INFORMATION:

Agenda

The US Election Assistance Commission (EAC) is hosting an all-day forum to address growing concerns regarding accessibility and security in election administration. This forum will bring together state and local election officials, people with disabilities, disability advocates, and election security experts to discuss issues and potential actionable items. Agenda discussion topics will include: (1) The 2020 elections and voters with disabilities, (2) ballot-marking devices, (3) proven best practices in voting accessibility, (4) vote-by-mail, (5) electronic ballot delivery, and (6) emerging voting technology for people with disabilities. The EAC is committed to upholding the voting rights of people with disabilities established under the Help America Vote Act (HAVA) and Americans with Disabilities Act (ADA) amidst growing security needs. The full agenda will be posted in advance on the EAC website: *https://www.eac.gov.*

The Forum will be recorded and live streamed. The recording will be made available on the EAC website at a later date.

As space is limited, attendees are encouraged to register. Registration instructions and additional event information will be posted on the EAC event web page: *https://www.eac.gov/events/2020/02/20/2020-elections-disability-accessibility-and-security-forum.*

Nichelle S. Williams,

Director of Research, U.S. Election Assistance Commission.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. IC20–3–000]

Commission Information Collection Activities (FERC–574); Comment Request; Extension

AGENCY: Federal Energy Regulatory Commission, Department of Energy.

ACTION: Notice of information collection and request for comments.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995 (PRA), the Federal Energy Regulatory Commission (Commission or FERC) is soliciting public comment on the currently approved information collection FERC–574 (Gas Pipeline Certificates: Hinshaw Exemption) and submitting the information collection to the Office of Management and Budget (OMB) for review. Any interested person may file comments directly with OMB and should address a copy of those comments to the Commission as explained below.

DATES: Comments on the collection of information are due by March 19, 2020.

ADDRESSES: Comments filed with OMB, identified by the OMB Control No. 1902–0116, should be sent via email to the Office of Information and Regulatory Affairs: *oira_submission@omb.gov.* Attention: Federal Energy Regulatory Commission Desk Office.

A copy of the comments should also be sent to the Commission, in Docket No. IC20–3–000, by either of the following methods:

- *eFiling at Commission's Website: http://www.ferc.gov/docs-filing/efiling.asp.*
- *Mail:* Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE, Washington, DC 20426.

Instructions: All submissions must be formatted and filed in accordance with submission guidelines at: *http://www.ferc.gov/help/submission-guide.asp.* For user assistance, contact FERC Online Support by email at *ferconlinesupport@ferc.gov,* or by phone at: (866) 208–3676 (toll-free), or (202) 502–8659 for TTY.

Docket: Users interested in receiving automatic notification of activity in this docket or in viewing/downloading comments and issuances in this docket may do so at *http://www.ferc.gov/docs-filing/docs-filing.asp.*

FOR FURTHER INFORMATION CONTACT: Ellen Brown may be reached by email at *DataClearance@FERC.gov,* telephone at (202) 502–8663, and fax at (202) 273–0873.

SUPPLEMENTARY INFORMATION:

Title: FERC–574 (Gas Pipeline Certificates: Hinshaw Exemption).

OMB Control No.: 1902–0116.

Type of Request: Three-year extension of the FERC–574 with no changes to the current reporting requirements.

Abstract: On November 26, 2019 (84 FR 65148), the Commission published a Notice in the **Federal Register** in Docket No. IC20–3–000 requesting public comments. The Commission received no comments and is noting that in the related submittal to OMB. On December 19, 2019, OMB granted the Commission an emergency extension for FERC–574, from December 31, 2019 to March 31, 2020.

The Commission uses the information collected under the requirements of FERC–574 to implement the statutory provisions of Sections 1(c), 4, and 7 of the Natural Gas Act (NGA). Natural gas pipeline companies file applications with the Commission furnishing information in order to facilitate a determination of an applicant's qualification for an exemption under the provisions of the section 1(c). If the Commission grants an exemption, the natural gas pipeline company is not required to file certificate applications, rate schedules, or any other applications or forms prescribed by the Commission.

The exemption applies to companies engaged in the transportation, sale, or resale of natural gas in interstate commerce if: (a) They receive gas at or within the boundaries of the state from another person at or within the boundaries of that state; (b) such gas is ultimately consumed in such state; (c) the rates, service and facilities of such company are subject to regulation by a State Commission; and (d) that such State Commission is exercising that jurisdiction. 18 CFR part 152 specifies the data required to be filed by pipeline companies for an exemption.

Type of Respondents: Pipeline companies.

Estimate of Annual Burden: [1] The Commission estimates the annual public reporting burden and cost [2] for the information collection as:

[1] ''Burden'' is the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a federal agency. See 5 CFR 1320 for additional information on the definition of information collection burden.

[2] Commission staff estimates that the industry's skill set and cost (for wages and benefits) for FERC–574 are approximately the same as the Commission's average cost. The FERC 2019 average salary plus benefits for one FERC full-time equivalent (FTE) is $167,091/year (or $80.00/hour).

FERC–574—GAS PIPELINE CERTIFICATES: HINSHAW EXEMPTION

Number of respondents	Number of responses per respondent	Total number of responses	Average burden hours & average cost ($) per response	Total annual burden hours & total annual cost ($)	Cost ($) per respondent
(1)	(2)	(1) * (2) = (3)	(4)	(3) * (4) = (5)	(5) ÷ (1) = (6)
2	1	2	60 hours; $4,800	120 hours; $9,600	$4,800

Comments: Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: February 11, 2020.

Kimberly D. Bose,

Secretary.

Combined Notice of Filings

Take notice that the Commission has received the following Natural Gas Pipeline Rate and Refund Report filings:

Docket Numbers: RP20–505–000.

Applicants: Transcontinental Gas Pipe Line Company, LLC.

Description: § 4(d) Rate Filing: PAL Rate Adjustment Filing to be effective 3/8/2020.

Filed Date: 2/6/20.

Accession Number: 20200206–5061.

Comments Due: 5 p.m. ET 2/18/20.

Docket Numbers: RP20–506–000.

Applicants: Dauphin Island Gathering Partners.

Description: Storm Surcharge Adjustment Filing for 2020 of Dauphin Island Gathering Partners under RP20–506.

Filed Date: 2/7/20.

Accession Number: 20200207–5035.

Comments Due: 5 p.m. ET 2/19/20.

Docket Numbers: RP20–507–000.

Applicants: Enable Mississippi River Transmission, LLC.

Description: § 4(d) Rate Filing: Negotiated Rate Filing—Elementis Specialties RP18–923 & RP20–131 Settlement to be effective 1/1/2019.

Filed Date: 2/7/20.

Accession Number: 20200207–5119.

Comments Due: 5 p.m. ET 2/19/20.

The filings are accessible in the Commission's eLibrary system by clicking on the links or querying the docket number.

Any person desiring to intervene or protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Regulations (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: February 10, 2020.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. IC19–25–000]

Commission Information Collection Activities (FERC–551); Comment Request; Extension

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of information collection and request for comments.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995, the Federal Energy Regulatory Commission (Commission or FERC) is soliciting public comment on the currently approved information collection, FERC–551 (Reporting of Flow Volume and Capacity by Interstate Natural Gas Pipelines).

DATES: Comments on the collection of information are due March 19, 2020.

ADDRESSES: Comments filed with OMB, identified by the OMB Control No. 1902–0243, should be sent via email to the Office of Information and Regulatory Affairs: *oira_submission@omb.gov.* Attention: Federal Energy Regulatory Commission Desk Officer:

A copy of the comments should also be sent to the Commission, in Docket No. IC19–25–000, by either of the following methods:

- *eFiling at Commission's Website: http://www.ferc.gov/docs-filing/efiling.asp.*
- *Mail/Hand Delivery/Courier:* Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE, Washington, DC 20426.

Instructions: All submissions must be formatted and filed in accordance with submission guidelines at: *http://www.ferc.gov/help/submission-guide.asp.* For user assistance, contact FERC Online Support by email at *ferconlinesupport@ferc.gov,* or by phone at: (866) 208–3676 (toll-free), or (202) 502–8659 for a text telephone (TTY).

Docket: Users interested in receiving automatic notification of activity in this docket or in viewing/downloading comments and issuances in this docket may do so at *http://www.ferc.gov/docs-filing/docs-filing.asp.*

FOR FURTHER INFORMATION CONTACT: Ellen Brown may be reached by email at *DataClearance@FERC.gov,* telephone at (202) 502–8663, and fax at (202) 273–0873.

SUPPLEMENTARY INFORMATION:

Title: FERC–551, Reporting of Flow Volume and Capacity by Interstate Natural Gas Pipelines.

OMB Control No.: 1902–0243.

Type of Request: Three-year extension of the FERC–551 information collection requirements with no changes to the current reporting requirements.

Abstract: The Commission is authorized to facilitate price transparency in markets for the sale or transportation of physical natural gas in interstate commerce, having due regard for the public interest, the integrity of

those markets, fair competition, and the protection of consumers. FERC–551 uses the information provided by pipelines as part of its overall implementation of the statutory provisions of section 23 of the Natural Gas Act, 16 U.S.C. 717t–2. More specifically, the Commission relies, in part, on section 23(a)(1) of the Natural Gas Act, for authority to collect this information and uses the pipelines' FERC–551 postings as part of fulfilling the transparency provisions of section 23(a)(1) of the Natural Gas Act. The data requirements for pipelines are in listed the Code of Federal Regulations (CFR) under 18 CFR 284.13, reporting requirements for interstate pipelines. The Commission has directed that the data requirements under FERC–551 are to be posted on interstate pipelines' websites and provided in downloadable file formats, in conformity with 18 CFR 284.12.

The posting requirements are based on the Commission's authority under section 23 of the NGA (as added by the Energy Policy Act of 2005), which provides, in relevant part, that the Commission may issue such rules as necessary and appropriate to provide for the dissemination of ''information about the availability and prices of natural gas at wholesale and in interstate commerce.'' [1] This provision enhances the Commission's authority to ensure confidence in the nation's natural gas markets. The Commission's market-oriented policies for the wholesale natural gas industry require that interested persons have broad confidence that reported market prices accurately reflect the interplay of legitimate market forces. Without confidence in the efficiency of price formation, the true value of transactions is very difficult to determine. Further, price transparency facilitates ensuring that jurisdictional prices are ''just and reasonable.'' [2]

The posting of FERC–551 information occurs on a daily basis. The data must be available for download for not less than 90 days from the date of posting and must be retained by the pipeline for three years.

The daily posting requirements for major non-interstate pipelines prescribed in the Commission's Order No. 720 are no longer required. The number of respondents used to develop the burden estimates do not include any major non-interstate pipelines.

Type of Respondents: Interstate Natural Gas Pipelines.

Estimate of Annual Burden [3]: The Commission estimates the total public reporting burden and cost for this information collection as follows:

FERC–551—Reporting of Flow Volume and Capacity by Interstate Natural Gas Pipelines [4]

	Number of respondents	Annual number of responses per respondent	Total number of responses	Average burden & cost per response [5]	Total annual burden hours & total annual cost	Burden hour & cost per respondent ($)
	(1)	(2)	(1) * (2) = (3)	(4)	(3) * (4) = (5)	(5) ÷ (1)
FERC–551	172	365	62,780	0.5 hours; $25.59 ...	31,390 hrs.; $1,606,540.20.	182.5 hrs.; $9,340.35

Comments: Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: February 11, 2020.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 3409–032]

Boyne USA, Inc.; Notice of Application Tendered for Filing With the Commission and Soliciting Additional Study Requests and Establishing Procedural Schedule for Relicensing and a Deadline for Submission of Final Amendments

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* Subsequent Minor License.

b. *Project No.:* 3409–032.

c. *Date Filed:* January 31, 2020.

[1] Section 23(a)(2) of the NGA, 15 U.S.C. 717t–2(a)(2) (2000 & Supp. V 2005).

[2] *See* sections 4 and 5 of the NGA, 15 U.S.C. 717c and 717d.

[3] Burden is defined as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, refer to 5 CFR 1320.3.

[4] The hourly figures in the 30-day notice differ from the wages used in the 60-day notice. The figures used here are the most current figures from the Bureau of Labor Statistics for the National Industry-Specific Occupational Employment and Wage Estimates.

[5] The hourly figure (wages plus benefits) is based on the average of the occupational categories for 2018 found on the Bureau of Labor Statistics website (*http://www.bls.gov/oes/current/naics2_22.htm* and *http://www.bls.gov/news.release/ecec.nr0.htm*):

—*Management (Occupation Code:* 11–0000): $66.67

—*Business (Occupation Code:* 13–0000): $41.98

—*Financial (Occupation Code:* 13–2051): $44.92

These various occupational categories' wage (and benefits) figures are averaged and weighted equally, giving an average of $51.19/hour. The resulting wage figure is rounded to $51.00/hour for use in calculating wage figures in the FERC–551 renewal.

d. *Applicant:* Boyne USA, Inc.

e. *Name of Project:* Boyne River Hydroelectric Project.

f. *Location:* On the Boyne River in Boyne Valley Township, Charlevoix County, Michigan.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791 (a)–825(r).

h. *Applicant Contact:* Randall Sutton, Boyne Mountain Resort Area Manager Boyne USA, Inc., P.O. Box 19, Boyne Falls, MI 49713; (231) 549–6076; *rsutton@boynemountain.com.*

i. *FERC Contact:* Patrick Ely at *patrick.ely@ferc.gov* or (202) 502–8570.

j. *Cooperating Agencies:* Federal, state, local, and tribal agencies with jurisdiction and/or special expertise with respect to environmental issues that wish to cooperate in the preparation of the environmental document should follow the instructions for filing such requests described in item l below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of the environmental document cannot also intervene. *See,* 94 FERC 61,076 (2001).

k. Pursuant to section 4.32(b)(7) of 18 CFR of the Commission's regulations, if any resource agency, Indian Tribe, or person believes that an additional scientific study should be conducted in order to form an adequate factual basis for a complete analysis of the application on its merit, the resource agency, Indian Tribe, or person must file a request for a study with the Commission not later than 60 days from the date of filing of the application, and serve a copy of the request on the applicant.

l. *Deadline for filing additional study requests and requests for cooperating agency status:* March 31, 2020.

The Commission strongly encourages electronic filing. Please file additional study requests and requests for cooperating agency status using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. The first page of any filing should include docket number P–3409–032.

m. The application is not ready for environmental analysis at this time.

n. The Boyne River Hydroelectric Project (project) consists of a reservoir with a gross storage capacity of 356 acre-feet and a surface area of 68 acres at a pool elevation of 636.8 feet National Geodetic Vertical Datum 1988. The project includes: (a) An existing 610-foot-long by 30-foot-high (left) earth-fill dam embankment, a 180-foot-long by 18-foot-high (right) earth-fill dam embankment, a 75-foot-long concrete spillway; (b) a 132-foot-long by 50 to 72-foot-wide by 12-foot-deep concrete lined headrace channel; (c) a 74-foot-long steel penstock consisting of two 5-foot-diameter and one 7-foot-diameter sections; (d) a 20-foot-long by 8.3-foot-wide to 16-foot-wide by 4-foot-deep stilling basin; and (e) a 24-foot-long by 24-foot-wide concrete powerhouse with a single 250-kilowatt propeller turbine. The project also consists of a 2.5-mile-long, 12.5-kilovolt transmission line and appurtenant facilities. The project generates about 661 megawatt-hours annually. The applicant proposes to continue to operate the project in a run-of-river mode.

o. A copy of the application is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's website at *http://www.ferc.gov* using the eLibrary link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support. A copy is also available for inspection and reproduction at the address in item h above.

You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

p. *Procedural schedule and final amendments:* The application will be processed according to the following preliminary schedule. Revisions to the schedule will be made as appropriate.

Issue Deficiency Letter (if necessary)—March 2020

Request Additional Information (if necessary)—March 2020

Issue Scoping Document 1 for comments—July 2020

Request Additional Information (if necessary)—September 2020

Issue Scoping Document 2 (if necessary)—October 2020

Issue Notice of Ready for Environmental Analysis—October 2020

Commission issues EA—April 2021

Final amendments to the application must be filed with the Commission no later than 30 days from the issuance date of the notice of ready for environmental analysis.

Dated: February 11, 2020.

Kimberly D. Bose,

Secretary.

[FR Doc. 2020–03125 Filed 2–14–20; 8:45 am]

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Notice of Filing

	Docket Nos.
Balfour, Scott C.	ID–7646–004
Bennett, Robert R.	ID–7647–002
Blunden, Gregory W.	ID–7981–001
Muldoon, Daniel P.	ID–8749–001
Schwartz, David E.	ID–3396–002
Strickland, Valerie C.	ID–8254–001
Weatherford, William W.	ID–8850–000

Take notice that on February 10, 2020, Scott C. Balfour, Robert R. Bennett, Gregory W. Blunden, Daniel P. Muldoon, David E. Schwartz, Valerie C. Strickland, and William W. Weatherford, submitted for filing, applications for authority to hold interlocking positions, pursuant to section 305(b) of the Federal Power Act, 16 U.S.C. 825d(b) (2019) and section 45.8 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18 CFR part 45.8 (2019).

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. On or before the comment date, it is not necessary to serve motions to intervene or protests on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the eFiling link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

This filing is accessible on-line at *http://www.ferc.gov,* using the eLibrary link and is available for electronic review in the Commission's Public

Reference Room in Washington, DC. There is an eSubscription link on the website that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov,* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Comment Date: 5:00 p.m. Eastern Time on March 2, 2020.

Dated: February 10, 2020.

Nathaniel J. Davis, Sr.,

Deputy Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2879–012]

Green Mountain Power Corporation; Notice of Application Tendered For Filing With the Commission and Establishing Procedural Schedule for Licensing and Deadline for Submission of Final Amendments

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* New Major License.

b. *Project No.:* 2879–012.

c. *Date Filed:* January 30, 2020.

d. *Applicant:* Green Mountain Power Corporation (Green Mountain Power).

e. *Name of Project:* Bolton Falls Hydroelectric Project.

f. *Location:* The existing project is located on the Winooski River in Washington County, Vermont. The project does not affect federal lands.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Mr. John Greenan, P.E., Engineer, Green Mountain Power Corporation, 1252 Post Road, Rutland, Vermont 05701; phone: (802) 770–2195 or email at *John.Greenan@greenmountainpower.com.*

i. *FERC Contact:* Michael Tust, (202) 502–6522 or *michael.tust@ferc.gov.*

j. This application is not ready for environmental analysis at this time.

k. Project *Description:* The project consists of the following constructed facilities: (1) A 92-foot-high, 275-foot-wide timber crib dam with a 5-foot-high rubber dam atop the timber crib construction with a maximum crest elevation of 397 feet referenced to National Geodetic Vertical 1929 Datum and a 196-foot-long reinforced concrete spillway cap at a crest elevation of 392 feet; (2) a 59-acre impoundment with a total storage capacity of 300 acre-feet at a normal operating elevation of 397 feet; (3) a forebay with two concrete intakes, each with a 3-inch-spaced trashrack; (4) two 10-foot diameter, 120-foot-long steel penstocks encased in concrete, extending from each intake through the dam to the generating units; (5) a 73-foot-long, 57-foot-wide powerhouse containing two horizontal, 3,750-kilowatt Kaplan turbines with a total installed capacity of 7,500 kilowatts; (6) a 36-inch diameter steel bypass pipe with an invert elevation of 383 feet that discharges near the left side of the spillway base; (7) an approximately 130-foot long, 5-kilovolt underground transmission line connecting to an adjacent switchyard; (8) a 600-foot-long, 34.5-kilovolt overhead transmission line connecting to a second switchyard; and (9) appurtenant facilities. Green Mountain Power also maintains day-use recreation facilities at the project, including a picnic area, parking lot, trails, fishing access, and a canoe launch and portage trail.

Green Mountain Power proposes to operate in automated run-of-river mode as it does under its current practice but instead of providing a 300-cfs minimum flow into the bypassed reach via spill over the dam or through the powerhouse, Green Mountain Power proposes to provide a seasonal aesthetic spill flow of 75 cfs or inflow, whichever is less, into the bypassed reach during daylight hours from April 1 through December 15. Green Mountain Power would only provide leakage flows from the dam into the bypassed reach during nighttime hours from April 1 through December 15 as well as during day and nighttime hours from December 16 through March 31. Under normal flow conditions during periods when aesthetic spillage is required, Green Mountain proposes to maintain the impoundment at an elevation of 397.25 feet. During periods when aesthetic spillage over the dam is not required, Green Mountain Power proposes to maintain the reservoir at an elevation of 397 feet as it does under its existing operation. In addition to operating and maintaining its existing recreation facilities, Green Mountain Power proposes the following improvements to its recreation facilities: (1) Relocate the existing parking area out of the floodplain; (2) place barriers and signage to redirect foot traffic away from areas with state-designated rare creeping lovegrass at the day-use area; (3) add two picnic tables and an information kiosk to the day-use area; (4) improve signage at the portage landing and along the portage trail for boaters; (5) construct an improved portage landing; and (6) clear brush along the portage trail.

Green Mountain Power is proposing to remove approximately 9.2 acres of lands and water from the current project boundary because these areas do not contain any project recreation facilities and are not necessary for project operation and maintenance. These areas include 4.2 acres of land south of the existing portage trail and northwest of the VELCO transmission line, 2.9 acres of land south of Power Plant Road, and 2.1 acres of the Winooski River and shoreline downstream of the dam located outside of the project bypassed reach and tailrace. In addition, Green Mountain Power is proposing to add approximately 7.6 acres of land to the project boundary. These areas include: (1) Approximately 1.4 acres of land along a secondary access road located to the south of the portage trail take-out; (2) approximately 4.1 acres of land along the middle section of the portage trail to fully enclose the portage trail; and (3) approximately 2.1 acres of lands along the primary project access road to provide vehicular and pedestrian access to the project for operation and maintenance purposes as well as access to the project's day-use recreation area.

l. *Locations of the Application:* A copy of the application is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's website at *http://www.ferc.gov* using the eLibrary link. BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–10005–08–Region 8]

Public Water System Supervision Program Revision for the State of South Dakota

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Public notice is hereby given that the state of South Dakota has revised its Public Water System Supervision (PWSS) Program by adopting federal regulations for the Revised Total Coliform Rule (RTCR) that correspond to the National Primary Drinking Water Regulations (NPDWR). The EPA has reviewed South Dakota's regulations and determined they are no less stringent than the federal regulations. The EPA is proposing to approve South Dakota's primacy revision for the RTCR.

This approval action does not extend to public water systems in Indian country. Please see **SUPPLEMENTARY INFORMATION**, section B.

DATES: Any member of the public is invited to request a public hearing on this determination by March 19, 2020. Please see **SUPPLEMENTARY INFORMATION**, section C, for details. Should no timely and appropriate request for a hearing be received, and the Regional Administrator (RA) does not elect to hold a hearing on his/her own motion, this determination shall become applicable March 19, 2020. If a public hearing is requested and granted, then this determination shall not become applicable until such time following the hearing as the RA issues an order affirming or rescinding this action.

ADDRESSES: Requests for a public hearing should be addressed to: Robert Clement, Drinking Water B Section, EPA Region 8, 1595 Wynkoop Street, Denver, CO 80202–1129.

All documents relating to this determination are available for inspection at: EPA Region 8, Drinking Water Section (5th floor), 1595 Wynkoop Street, Denver, Colorado.

FOR FURTHER INFORMATION CONTACT: Robert Clement, Drinking Water B Section, EPA Region 8, 1595 Wynkoop Street, Denver, CO 80202–1129, phone 303–312–6653.

SUPPLEMENTARY INFORMATION: In accordance with the provisions of section 1413 of the Safe Drinking Water Act (SDWA), 42 U.S.C. 300g–2, and 40 CFR 142.13, public notice is hereby given that the state of South Dakota has revised its PWSS program by adopting federal regulations for the RTCR that correspond to the NPDWR in 40 CFR parts 141 and 142. The EPA has reviewed South Dakota's regulations and determined they are no less stringent than the federal regulations. The EPA is proposing to approve South Dakota's primacy revision for the RTCR.

This approval action does not extend to public water systems in Indian country as defined in 18 U.S.C. 1151. Please see **SUPPLEMENTARY INFORMATION**, section B.

A. Why are revisions to State programs necessary?

States with primary PWSS enforcement authority must comply with the requirements of 40 CFR part 142 to maintain primacy. They must adopt regulations that are at least as stringent as the NPDWRs at 40 CFR parts 141 and 142, as well as adopt all new and revised NPDWRs in order to retain primacy (40 CFR 142.12(a)).

B. How does this action affect Indian country (18 U.S.C. 1151) in South Dakota?

The EPA's approval of South Dakota's revised PWSS program does not extend to Indian country as defined in 18 U.S.C. 1151. Indian country in South Dakota generally includes (1) lands within the exterior boundaries of the following Indian reservations located within South Dakota, in part or in full: The Cheyenne River Reservation, the Crow Creek Reservation, the Flandreau Indian Reservation, the Lower Brule Reservation, the Pine Ridge Reservation, the Rosebud Indian Reservation, the Standing Rock Reservation, and the Yankton Reservation (subject to federal court decisions removing lands from Indian country status within the Yankton Reservation); (2) any land held in trust by the United States for an Indian tribe; and (3) any other areas which are ''Indian country'' within the meaning of 18 U.S.C. 1151. The EPA or eligible Indian tribes, as appropriate, will retain PWSS program responsibilities over public water systems in Indian country.

C. Requesting a Hearing

Any member of the public may request a hearing on this determination within thirty (30) days of this notice. All requests shall include the following information: Name, address, and telephone number of the individual, organization, or other entity requesting a hearing; a brief statement of interest and information to be submitted at the hearing; and a signature of the interested individual or responsible official, if made on behalf of an organization or other entity. Frivolous or insubstantial requests for a hearing may be denied by the RA.

Notice of any hearing shall be given not less than fifteen (15) days prior to the time scheduled for the hearing and will be made by the RA in the **Federal Register** and in a newspaper of general circulation in the state. A notice will also be sent to both the person(s) requesting the hearing and the state. The hearing notice will include a statement of purpose of the hearing, information regarding time and location for the hearing, and the address and telephone number where interested persons may obtain further information. The RA will issue an order affirming or rescinding the determination upon review of the hearing record.

Please bring this notice to the attention of any persons known by you to have an interest in this determination.

Dated: December 19, 2019.

Gregory E. Sopkin,

Regional Administrator, Region 8.

[FR Doc. 2020–03155 Filed 2–14–20; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPPT–2019–0075; FRL–9992–85]

Certain New Chemicals; Receipt and Status Information for November 2019

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is required under the Toxic Substances Control Act (TSCA), as amended by the Frank R. Lautenberg Chemical Safety for the 21st Century Act, to make information publicly available and to publish information in the **Federal Register** pertaining to submissions under TSCA Section 5, including notice of receipt of a Premanufacture notice (PMN), Significant New Use Notice (SNUN) or Microbial Commercial Activity Notice (MCAN), including an amended notice or test information; an exemption application (Biotech exemption); an application for a test marketing exemption (TME), both pending and/or concluded; a notice of commencement (NOC) of manufacture (including import) for new chemical substances; and a periodic status report on new chemical substances that are currently under EPA review or have recently concluded review. This document covers the period from 11/01/2019 to 11/30/2019.

DATES: Comments identified by the specific case number provided in this document must be received on or before March 19, 2020.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPPT–2019–0075, and the specific case number for the chemical substance related to your comment, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.
- *Mail:* Document Control Office (7407M), Office of Pollution Prevention and Toxics (OPPT), Environmental Protection Agency, 1200 Pennsylvania Ave. NW Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: *For technical information contact:* Jim Rahai, Information Management Division (7407M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 564–8593; email address: *rahai.jim@epa.gov.*

For general information contact: The TSCA-Hotline, ABVI-Goodwill, 422 South Clinton Ave., Rochester, NY 14620; telephone number: (202) 554–1404; email address: *TSCA-Hotline@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. What action is the Agency taking?

This document provides the receipt and status reports for the period from 11/01/2019 to 11/30/2019. The Agency is providing notice of receipt of PMNs, SNUNs and MCANs (including amended notices and test information); an exemption application under 40 CFR part 725 (Biotech exemption); TMEs, both pending and/or concluded; NOCs to manufacture a new chemical substance; and a periodic status report on new chemical substances that are currently under EPA review or have recently concluded review.

EPA is also providing information on its website about cases reviewed under the amended TSCA, including the section 5 PMN/SNUN/MCAN and exemption notices received, the date of receipt, the final EPA determination on the notice, and the effective date of EPA's determination for PMN/SNUN/MCAN notices on its website at: *https://www.epa.gov/reviewing-new-chemicals-under-toxic-substances-control-act-tsca/status-pre-manufacture-notices.* This information is updated on a weekly basis.

B. What is the Agency's authority for taking this action?

Under the TSCA, 15 U.S.C. 2601 *et seq.,* a chemical substance may be either an ''existing'' chemical substance or a ''new'' chemical substance. Any chemical substance that is not on EPA's TSCA Inventory of Chemical Substances (TSCA Inventory) is classified as a ''new chemical substance,'' while a chemical substance that is listed on the TSCA Inventory is classified as an ''existing chemical substance.'' (See TSCA section 3(11).) For more information about the TSCA Inventory go to: *https://www.epa.gov/tsca-inventory.*

Any person who intends to manufacture (including import) a new chemical substance for a non-exempt commercial purpose, or to manufacture or process a chemical substance in a non-exempt manner for a use that EPA has determined is a significant new use, is required by TSCA section 5 to provide EPA with a PMN, MCAN or SNUN, as appropriate, before initiating the activity. EPA will review the notice, make a risk determination on the chemical substance or significant new use, and take appropriate action as described in TSCA section 5(a)(3).

TSCA section 5(h)(1) authorizes EPA to allow persons, upon application and under appropriate restrictions, to manufacture or process a new chemical substance, or a chemical substance subject to a significant new use rule (SNUR) issued under TSCA section 5(a)(2), for ''test marketing'' purposes, upon a showing that the manufacture, processing, distribution in commerce, use, and disposal of the chemical will not present an unreasonable risk of injury to health or the environment. This is referred to as a test marketing exemption, or TME. For more information about the requirements applicable to a new chemical go to: *http://www.epa.gov/oppt/newchems.*

Under TSCA sections 5 and 8 and EPA regulations, EPA is required to publish in the **Federal Register** certain information, including notice of receipt of a PMN/SNUN/MCAN (including amended notices and test information); an exemption application under 40 CFR part 725 (biotech exemption); an application for a TME, both pending and concluded; NOCs to manufacture a new chemical substance; and a periodic status report on the new chemical substances that are currently under EPA review or have recently concluded review.

C. Does this action apply to me?

This action provides information that is directed to the public in general.

D. Does this action have any incremental economic impacts or paperwork burdens?

No.

E. What should I consider as I prepare my comments for EPA?

1. *Submitting confidential business information (CBI).* Do not submit this information to EPA through

regulations.gov or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD–ROM that you mail to EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at *http://www.epa.gov/dockets/comments.html.*

II. Status Reports

In the past, EPA has published individual notices reflecting the status of TSCA section 5 filings received, pending or concluded. In 1995, the Agency modified its approach and streamlined the information published in the **Federal Register** after providing notice of such changes to the public and an opportunity to comment (See the **Federal Register** of May 12, 1995, (60 FR 25798) (FRL–4942–7). Since the passage of the Lautenberg amendments to TSCA in 2016, public interest in information on the status of section 5 cases under EPA review and, in particular, the final determination of such cases, has increased. In an effort to be responsive to the regulated community, the users of this information, and the general public, to comply with the requirements of TSCA, to conserve EPA resources and to streamline the process and make it more timely, EPA is providing information on its website about cases reviewed under the amended TSCA, including the section 5 PMN/SNUN/MCAN and exemption notices received, the date of receipt, the final EPA determination on the notice, and the effective date of EPA's determination for PMN/SNUN/MCAN notices on its website at: *https://www.epa.gov/reviewing-new-chemicals-under-toxic-substances-control-act-tsca/status-pre-manufacture-notices.* This information is updated on a weekly basis.

III. Receipt Reports

For the PMN/SNUN/MCANs that have passed an initial screening by EPA during this period, Table I provides the following information (to the extent that such information is not subject to a CBI claim) on the notices screened by EPA during this period: The EPA case number assigned to the notice that indicates whether the submission is an initial submission, or an amendment, a notation of which version was received, the date the notice was received by EPA, the submitting manufacturer (*i.e.,* domestic producer or importer), the potential uses identified by the manufacturer in the notice, and the chemical substance identity.

As used in each of the tables in this unit, (S) indicates that the information in the table is the specific information provided by the submitter, and (G) indicates that this information in the table is generic information because the specific information provided by the submitter was claimed as CBI. Submissions which are initial submissions will not have a letter following the case number. Submissions which are amendments to previous submissions will have a case number followed by the letter ''A'' (*e.g.,* P–18–1234A). The version column designates submissions in sequence as ''1'', ''2'', ''3'', etc. Note that in some cases, an initial submission is not numbered as version 1; this is because earlier version(s) were rejected as incomplete or invalid submissions. Note also that future versions of the following tables may adjust slightly as the Agency works to automate population of the data in the tables.

TABLE I—PMN/SNUN/MCANS APPROVED * FROM 11/01/2019 TO 11/30/2019

Case No.	Version	Received date	Manufacturer	Use	Chemical substance
J–19–0024A	2	9/10/2019	CBI	(G) Ethanol production	(G) Biofuel producting Saccharomyces cerevisiae modified, genetically stable.
J–19–0025A	2	9/10/2019	CBI	(G) Ethanol production	(G) Biofuel producting Saccharomyces cerevisiae modified, genetically stable.
J–19–0026A	2	11/13/2019	CBI	(G) Production of biofuel ..	(G) Biofuel-producing modified microorganism(s), with chromosomally-borne modifications.
J–19–0026A	3	11/15/2019	CBI	(G) Production of biofuel ..	(G) Biofuel-producing modified microorganism(s), with chromosomally-borne modifications.
J–19–0027A	2	11/13/2019	CBI	(G) Production of biofuel ..	(G) Biofuel-producing modified microorganism(s), with chromosomally-borne modifications.
J–19–0027A	3	11/15/2019	CBI	(G) Production of biofuel ..	(G) Biofuel-producing modified microorganism(s), with chromosomally-borne modifications.
P–16–0486A	4	11/1/2019	CBI	(G) Site-limited intermediate in the production of a refrigerant precursor.	(G) Polychloropropane.
P–17–0007A	6	11/15/2019	CBI	(S) Intermediate	(G) dialkyl 7,10-dioxa, dithiahexadeca diene.
P–17–0260A	3	11/21/2019	Shin Etsu Silicones of America.	(G) Resin modifier	(G) Alkoxy silane modified butadiene-styrene copolymer.
P–18–0019A	3	10/29/2019	Cabot Corporation.	(S) Dispersive pigment	(G) Substituted Benzene, 4-[2-[2-hydroxy-3-[[(3-nitrophenyl)amino]carbonyl]-1-naphthalenyl]diazenyl]-, sodium salt (1:1).
P–18–0029A	2	10/30/2019	CBI	(G) Industrial use in Oilfield.	(G) Fatty acids and fatty acid unsatd., reaction products with ethyleneamines and maleic anhydride.
P–18–0031A	6	11/20/2019	CBI	(G) Ingredient for industrial coating.	(G) Substituted dicarboxylic acid, polymer with various alkanediols.

TABLE I—PMN/SNUN/MCANS APPROVED * FROM 11/01/2019 TO 11/30/2019—Continued

Case No.	Version	Received date	Manufacturer	Use	Chemical substance
P–18–0160A	4	11/11/2019	CBI	(G) Coating component	(G) Heteropolycyclic, halo substituted alkyl substituted- diaromatic amino substituted carbomonocycle, halo substituted alkyl substituted heteropolycyclic, tetraaromatic metalloid salt (1:1).
P–18–0165A	6	11/1/2019	Cabot Corporation.	(S) Chemical intermediate	(G) 2,5-Furandione, polymer with ethenylbenzene, 4-hydroxy-substituted butyl amide, sodium salts.
P–18–0166A	6	11/1/2019	Cabot Corporation.	(S) Chemical Intermediate	(G) 2,5-Furandione, polymer with ethenylbenzene, 4-hydroxy- substituted butyl [3-[2-[1-[[(2-methoxyphenyl)amino]carbonyl]-2-oxopropyl]diazenyl]phenyl]substituted, sodium salts.
P–18–0167A	4	11/6/2019	Cabot Corporation.	(S) Chemical intermediate	(G) Butanamide, 2-[2-[(substitutued phenyl)diazenyl]-N-(2-methoxyphenyl)-3-oxo-.
P–18–0190A	5	11/6/2019	Cabot Corporation.	(S) Pigment Dispersing Aid.	(G) 2,5-Furandione, polymer with ethenylbenzene, 4-hydroxy-substituted butyl amide, polymers with epichlorohydrin and trimethylolpropane, sodium salts.
P–18–0191A	5	11/6/2019	Cabot Corporation.	(S) Pigment Dispersing Aid.	(G) 2,5-Furandione, polymer with ethenylbenzene, 4-hydroxy-substitutedbutyl [3-[2-[1-[[(substitutedphenyl)amino]carbonyl]-2-oxopropyl]diazenyl]phenyl]methyl amide, polymers with epichlorohydrin and trimthylolpropane, sodium salts.
P–18–0213A	3	11/8/2019	CBI	(S) polyester or polyamide modifer incorporated into backbone of polymer.	(S) 1,3-Benzenedicarboxylic acid, 5-sulfo-, calcium salt (2:1).
P–18–0214A	4	11/21/2019	CBI	(G) Curing agent	(G) Polycyclic substituted alkane, polymer with cyclicalkylamine, epoxide, and polycyclic epoxide ether, reaction products with dialkylamine substituted alkyl amine.
P–18–0215A	4	11/21/2019	CBI	(G) Curing agent	(G) Polycyclic alkane, polymer with monocyclic amine, polycyclic epoxide ether, reaction products with dialkylamine alkyl amine.
P–18–0216A	4	11/21/2019	CBI	(G) Curing agent	(G) Polycyclic substituted alkane, polymer with epoxide, reaction products with cyclicalkylamine and dialkylamine substituted alkyl amine.
P–18–0236A	3	11/14/2019	The Sherwin Williams Company.	(G) Paint additive	(G) Metal, alkenoic acid-alkyl alkenoate-alkyl substituted alkenoate polymer carbopolycycle complexes.
P–18–0274A	7	11/5/2019	CBI	(S) Chemical intermediate and (G) Additive.	(G) Heterocycle fluoroalkyl sulfonyl.
P–18–0275A	6	11/5/2019	CBI	(G) Polymer additive	(G) Methanone phenylene fluoroalkyl sulfonyl heterocycle.
P–18–0363A	3	10/31/2019	CBI	(G) Adhesive	(G) Phenol, polymer with formaldehyde, substituted phenol, sodium salts.
P–18–0367	2	11/11/2019	Afcona Chemicals USA Inc.	(S) Acid-modified polyether used as a wetting and dispersing additive for pigments in industrial paints and coatings.	(M) (G) Acid-modified polyether.
P–18–0376A	2	11/5/2019	Sumitomo Chemical Advanced Technologies LLC.	(S) Substance used to improve physical properties in rubber products.	(G) Thiosulfuric acid, aminoalkyl ester.
P–18–0387A	4	11/11/2019	CBI	(G) Plastic Additive	(G) Alkanal, reaction products with alkanediyl bis[alkyl-tris(alkyl-heterocycle)-1,3,5-triazine-2,4,6-triamine and hydrogen peroxide.
P–18–0388A	4	11/11/2019	CBI	(G) Plastic additive	(G) 1,3,5-triazine-2,4,6-triamine, alkanediyl bis[alkyl-tris(alkyl-heterocycle)-, allyl derivs., oxidized, hydrogenated.
P–18–0399A	7	11/18/2019	CBI	(G) Open, non-dispersive use additive for industrial use only.	(G) Rosin adduct ester, polymer with polyols, compd. with ethanolamine.
P–18–0400A	7	11/18/2019	CBI	(G) Open, non-dispersive use, additive for textile industry.	(G) Rosin adduct ester, polymer with polyols, potassium salt.

The fragrance oils containing the notified substance will then be incorporated into soaps, detergents, cleaners, air fresheners, candles and other similar commercial and consumer products.	(G) heteropolycycle, 2,6-dimethyl-3a-(1-methylethyl)-.
P–20–0025	1	11/19/2019	Biosynthetic Technologies.	(S) Motor oil lubricant, formulation #1 and formulation #2.	(S) Octadecanoic acid, 12-(acetoxy)-, 2-ethylhexyl ester.
SN–18–0002A ...	4	11/4/2019	CBI	(G) Flame retardant for textile.	(G) Phosphoramidic acid, carbomonocyclic-, diphenylester (accession number 261553).

* The term 'Approved' indicates that a submission has passed a quick initial screen ensuring all required information and documents have been provided with the submission prior to the start of the 90-day review period, and in no way reflects the final status of a complete submission review.

In Table II of this unit, EPA provides the following information (to the extent that such information is not claimed as CBI) on the NOCs that have passed an initial screening by EPA during this period: The EPA case number assigned to the NOC including whether the submission was an initial or amended submission, the date the NOC was received by EPA, the date of commencement provided by the submitter in the NOC, a notation of the type of amendment (*e.g.,* amendment to generic name, specific name, technical contact information, etc.) and chemical substance identity.

TABLE II—NOCS APPROVED * FROM 11/01/2019 TO 11/30/2019

Case No.	Received date	Commencement date	If amendment, type of amendment	Chemical substance
J–19–0017	11/14/2019	10/29/2019	N	(G) Genetically modified microorganism.
P–17–0007A	11/15/2019	9/20/2018	Y ..... CBI Substantiation provided	(G) Dialkyl 7,10-dioxa, dithiahexadeca diene.
P–18–0172	11/7/2019	11/6/2019	N	(G) Calcium carbonate carboxylate.
P–18–0276	11/5/2019	10/7/2019	N	(S) Benzenesulfonamide, N-[2-[[(phenylamino)carbonyl]amino]phenyl]-.

TABLE II—NOCS APPROVED * FROM 11/01/2019 TO 11/30/2019—Continued

Case No.	Received date	Commencement date	If amendment, type of amendment	Chemical substance
P–18–0312	11/6/2019	10/23/2019	N	(G) Formaldehyde, polymer with 2-phenoxyalkanol and alpha.-phenyl-.omega. hydroxypoly(oxy-1,2-alkylnediyl), dihydrogen phosphate 2-phenoxyalkyl hydrogen phosphate, alkaline salt.
P–18–0321	11/6/2019	10/23/2019	N	(G) Polyalkylene glycol.
P–19–0086	11/15/2019	11/15/2019	N	(S) Benzeneacetic acid, 2,3-difluoro-, sodium salt (1:1).

P–19–0091	11/18/2019	11/18/2019	N	(S) Benzeneacetic acid, 2,3-difluoro-.
P–19–0092	11/18/2019	11/18/2019	N	(S) Benzenepropanoic acid, 3-fluoro-.
P–19–0096	11/21/2019	11/4/2019	N	(S) 2(3H)-Benzofuranone, 5,7-bis(1,1-dimethylethyl)-3-[3,5-dimethyl-4-[[2,4,8,10-tetrakis(1,1-dimethylethyl)-12-methyl- 12H-dibenzo[d,g][1,3,2]dioxaphosphocin-6-yl]oxy]phenyl]-.
P–19–0097	11/18/2019	11/18/2019	N	(S) Benzoic acid, 5-fluoro-2-methyl-, ethyl ester.
P–19–0100	11/18/2019	11/18/2019	N	(S) Benzoic acid, 4-fluoro-2-methyl-, ethyl ester.
P–19–0101	11/18/2019	11/18/2019	N	(S) Benzoic acid, 4-chloro-2-methyl-, ethyl ester.
P–19–0102	11/18/2019	11/18/2019	N	(S) Benzoic acid, 5-chloro-2-methyl-, ethyl ester.
P–19–0105	11/18/2019	11/18/2019	N	(S) Benzoic acid, 2-chloro-5-fluoro-, ethyl ester.
P–19–0106	11/18/2019	11/18/2019	N	(S) Benzoic acid, 2-chloro-5-methyl-, ethyl ester.
P–19–0107	11/18/2019	11/18/2019	N	(S) Benzoic acid, 3-fluoro-4-methyl-, ethyl ester.
P–19–0110	11/18/2019	11/18/2019	N	(S) Benzoic acid, 2,4-dichloro-5-fluoro-, ethyl ester.
P–19–0117	11/4/2019	10/18/2019	N	(G) Polycyclic amine, reaction products with polyalkylalkene, polymers.
P–19–0130	10/30/2019	10/23/2019	N	(G) Aminohydroxy salt.

* The term 'Approved' indicates that a submission has passed a quick initial screen ensuring all required information and documents have been provided with the submission.

In Table III of this unit, EPA provides the following information (to the extent such information is not subject to a CBI claim) on the test information that has been received during this time period: The EPA case number assigned to the test information; the date the test information was received by EPA, the type of test information submitted, and chemical substance identity.

TABLE III—TEST INFORMATION RECEIVED FROM 11/01/2019 TO 11/30/2019

Case No.	Received date	Type of test information	Chemical substance
P–09–0644	11/4/2019	Annual Analytical Report	(G) Substituted alkyl phosphate ester.
P–16–0543	11/4/2019 11/18/2019	Exposure Monitoring Report	(G) Halogenophosphoric acid metal salt.
P–16–0593	11/4/2019	Particle Size Distribution Study and Surface Tension Study (OECD Test Guideline 115).	(G) Aromatic Polyester Polyol.
P–17–0195	11/4/2019 11/20/2019	Combined Repeated Dose and Reproductive/Development Test of [Claimed CBI] by Oral Administration in Rats (OECD Test Guideline 422), Clinical signs table, Plasma concentration of total T4 in rats table. Evaluation of DNA Repair Inducing Ability of [CBI] in Male Rat Hepatocytes (in vivo Rat Hepatocyte DNA-Repair Assay) (OECD Test Guideline 486).	(G) 1,3-Propanediol, 2-methylene- substituted.
P–18–0027	11/7/2019	Substance Identifiers	(G) 2-Propenoic acid, 2-alkyl-, 2-(dialkylamino)alkyl ester, polymer with alpha-(2-alkyl-1-oxo-2-alken-1-yl)-omega-methoxypoly(oxy-1,2-alkanediyl).

TABLE III—TEST INFORMATION RECEIVED FROM 11/01/2019 TO 11/30/2019—Continued

Case No.	Received date	Type of test information	Chemical substance
P–18–0141	11/18/2019	Evaluation of the Ability of [CBI] to Induce Chromosome Aberration in Cultured Peripheral Human Lymphocytes (OECD Test Guideline 473), Activated Sludge Respiration Inhibition Test with [CBI] (OECD Test Guideline 209), DEREK Prediction on Skin Sensitization of [CBI],. Combined Repeated Dose Toxicity Study with the Reproduction/Developmental Toxicity Screening Test (OECD Test Guideline 422), Determination of Physico-Chemical Properties of [CBI] (OECD Test Guideline s101, 102, 103, 104, 109), *In vitro* Skin Corrosion Test with using a Human Skin Model (OECD Test Guideline 431), Ready Biodegeradability (OECD Test Guideline 301B), Evaluation of the Eye Hazard Potential of using the Bovine Corneal Opacity and Permeability Test (OECD Test Guideline 437), Acute Oral Toxicity (OCED Test Guideline 423), *In Vitro* Skin Irritation (OECD Test Guideline 439), Acute Inhalation Toxicity (OECD Test Guideline 403).	(G) Ethyl modified lactam.
P–18–0293	11/7/2019	Skin Sensitization Test (Local Lymph Node Assay) (OECD Test Guideline 429).	(S) propanedioic acid, 2-methylene-, 1,3-dihexyl ester.
P–18–0294	11/7/2019	Skin Sensitization Test (Local Lymph Node Assay) (OECD Test Guideline 429).	(S) propanedioic acid, 2-methylene-, 1,3-dicyclohexyl ester.
P–18–0350	11/26/2019	Acute Oral Toxicity (OECD Test Guideline 401), Hydrolysis as a Function of pH (OECD Test Guideline 111), Read Across Justification.	(G) Aqueous methacrylamido modified polysiloxane.
P–19–0041	11/26/2019 Submitted	Acute Toxicity to Fish Mitigated by Humic Acid.	(G) Alkyl diester, polymer with (dialkylamino alkyl) amine and bis(halogenated alkyl) ether.

If you are interested in information that is not included in these tables, you may contact EPA's technical information contact or general information contact as described under **FOR FURTHER INFORMATION CONTACT** to access additional non-CBI information that may be available.

Authority: 15 U.S.C. 2601 *et seq.*

Dated: January 29, 2020.

Pamela Myrick,

Director, Information Management Division, Office of Pollution Prevention and Toxics.

[FR Doc. 2020–03146 Filed 2–14–20; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPPT–2019–0075; FRL–9992–86]

Certain New Chemicals; Receipt and Status Information for December 2019

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is required under the Toxic Substances Control Act (TSCA), as amended by the Frank R. Lautenberg Chemical Safety for the 21st Century Act, to make information publicly available and to publish information in the **Federal Register** pertaining to submissions under TSCA Section 5, including notice of receipt of a Premanufacture notice (PMN), Significant New Use Notice (SNUN) or Microbial Commercial Activity Notice (MCAN), including an amended notice or test information; an exemption application (Biotech exemption); an application for a test marketing exemption (TME), both pending and/or concluded; a notice of commencement (NOC) of manufacture (including import) for new chemical substances; and a periodic status report on new chemical substances that are currently under EPA review or have recently concluded review. This document covers the period from 12/01/2019 to 12/31/2019.

DATES: Comments identified by the specific case number provided in this document must be received on or before March 19, 2020.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPPT–2019–0075, and the specific case number for the chemical substance related to your comment, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.
- *Mail:* Document Control Office (7407M), Office of Pollution Prevention and Toxics (OPPT), Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT:

For technical information contact: Jim Rahai, Information Management Division (7407M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 564–8593; email address: *rahai.jim@epa.gov.*

For general information contact: The TSCA-Hotline, ABVI-Goodwill, 422 South Clinton Ave., Rochester, NY 14620; telephone number: (202) 554–1404; email address: *TSCA-Hotline@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. What action is the Agency taking?

This document provides the receipt and status reports for the period from 12/01/2019 to 12/31/2019. The Agency is providing notice of receipt of PMNs, SNUNs and MCANs (including amended notices and test information); an exemption application under 40 CFR part 725 (Biotech exemption); TMEs, both pending and/or concluded; NOCs to manufacture a new chemical substance; and a periodic status report on new chemical substances that are currently under EPA review or have recently concluded review.

EPA is also providing information on its website about cases reviewed under the amended TSCA, including the section 5 PMN/SNUN/MCAN and exemption notices received, the date of receipt, the final EPA determination on the notice, and the effective date of EPA's determination for PMN/SNUN/MCAN notices on its website at: *https://www.epa.gov/reviewing-new-chemicals-under-toxic-substances-control-act-tsca/status-pre-manufacture-notices.* This information is updated on a weekly basis.

B. What is the Agency's authority for taking this action?

Under the TSCA, 15 U.S.C. 2601 *et seq.,* a chemical substance may be either an ''existing'' chemical substance or a ''new'' chemical substance. Any chemical substance that is not on EPA's TSCA Inventory of Chemical Substances (TSCA Inventory) is classified as a ''new chemical substance,'' while a chemical substance that is listed on the TSCA Inventory is classified as an ''existing chemical substance.'' (See TSCA section 3(11).) For more information about the TSCA Inventory go to: *https://www.epa.gov/tsca-inventory.*

Any person who intends to manufacture (including import) a new chemical substance for a non-exempt commercial purpose, or to manufacture or process a chemical substance in a non-exempt manner for a use that EPA has determined is a significant new use, is required by TSCA section 5 to provide EPA with a PMN, MCAN or SNUN, as appropriate, before initiating the activity. EPA will review the notice, make a risk determination on the chemical substance or significant new use, and take appropriate action as described in TSCA section 5(a)(3). TSCA section 5(h)(1) authorizes EPA to allow persons, upon application and under appropriate restrictions, to manufacture or process a new chemical substance, or a chemical substance subject to a significant new use rule (SNUR) issued under TSCA section 5(a)(2), for ''test marketing'' purposes, upon a showing that the manufacture, processing, distribution in commerce, use, and disposal of the chemical will not present an unreasonable risk of injury to health or the environment. This is referred to as a test marketing exemption, or TME. For more information about the requirements applicable to a new chemical go to: *http://www.epa.gov/oppt/newchems.*

Under TSCA sections 5 and 8 and EPA regulations, EPA is required to publish in the **Federal Register** certain information, including notice of receipt of a PMN/SNUN/MCAN (including amended notices and test information); an exemption application under 40 CFR part 725 (biotech exemption); an application for a TME, both pending and concluded; NOCs to manufacture a new chemical substance; and a periodic status report on the new chemical substances that are currently under EPA review or have recently concluded review.

C. Does this action apply to me?

This action provides information that is directed to the public in general.

D. Does this action have any incremental economic impacts or paperwork burdens?

No.

E. What should I consider as I prepare my comments for EPA?

1. *Submitting confidential business information (CBI).* Do not submit this information to EPA through regulations.gov or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD–ROM that you mail to EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at *http://www.epa.gov/dockets/comments.html.*

II. Status Reports

In the past, EPA has published individual notices reflecting the status of TSCA section 5 filings received, pending or concluded. In 1995, the Agency modified its approach and streamlined the information published in the **Federal Register** after providing notice of such changes to the public and an opportunity to comment (See the **Federal Register** of May 12, 1995, (60 FR 25798) (FRL–4942–7). Since the passage of the Lautenberg amendments to TSCA in 2016, public interest in information on the status of section 5 cases under EPA review and, in particular, the final determination of such cases, has increased. In an effort to be responsive to the regulated community, the users of this information, and the general public, to comply with the requirements of TSCA, to conserve EPA resources and to streamline the process and make it more timely, EPA is providing information on its website about cases reviewed under the amended TSCA, including the section 5 PMN/SNUN/MCAN and exemption notices received, the date of receipt, the final EPA determination on the notice, and the effective date of EPA's determination for PMN/SNUN/MCAN notices on its website at: *https://www.epa.gov/reviewing-new-chemicals-under-toxic-substances-control-act-tsca/status-pre-manufacture-notices.* This information is updated on a weekly basis.

III. Receipt Reports

For the PMN/SNUN/MCANs that have passed an initial screening by EPA during this period, Table I provides the following information (to the extent that such information is not subject to a CBI claim) on the notices screened by EPA during this period: The EPA case number assigned to the notice that indicates whether the submission is an

initial submission, or an amendment, a notation of which version was received, the date the notice was received by EPA, the submitting manufacturer (*i.e.,* domestic producer or importer), the potential uses identified by the manufacturer in the notice, and the chemical substance identity.

As used in each of the tables in this unit, (S) indicates that the information in the table is the specific information provided by the submitter, and (G) indicates that this information in the table is generic information because the specific information provided by the submitter was claimed as CBI. Submissions which are initial submissions will not have a letter following the case number. Submissions which are amendments to previous submissions will have a case number followed by the letter ''A'' (*e.g.,* P–18–1234A). The version column designates submissions in sequence as ''1'', ''2'', ''3'', etc. Note that in some cases, an initial submission is not numbered as version 1; this is because earlier version(s) were rejected as incomplete or invalid submissions. Note also that future versions of the following tables may adjust slightly as the Agency works to automate population of the data in the tables.

TABLE I—PMN/SNUN/MCANS APPROVED * FROM 12/01/2019 TO 12/31/2019

Case No.	Version	Received date	Manufacturer	Use	Chemical substance
J–20–0002	1	11/25/2019	CBI	(G) Production of a chemical	Microorganism with chromosomally-borne genetic modifications for the production of a chemical.
P–16–0486A	5	11/22/2019	CBI	(G) Site-limited intermediate in the production of a refrigerant precursor.	(G) Polychloropropane.
P–16–0539A	5	12/3/2019	CBI	(G) photolithography	(G) Organic sulfonate compound.
P–17–0239A	7	12/11/2019	CBI	(G) Adhesive for open non-descriptive use	(G) Substituted carboxylic acid, polymer with 2,4-diisocyanato-1-methylbenzene, hexanedioic acid, alpha-hydro-omega-hydroxypoly[oxy(methyl-1,2-ethanediyl)], 1,1′-methylenebis[4-isocyanatobenzene], 2,2′-oxybis[ethanol], 1,1′-oxybis[2-propanol] and 1,2-propanediol.
P–17–0245A	7	12/12/2019	CBI	(G) Adhesive for open, non-dispersive use	(G) Unsaturated polyfluoro ester.
P–17–0282A	11	12/11/2019	Elantas PDG, Inc	(S) This is a component of a mixture that is used as an impregnating varnish for stators and motors.	(S) Isocyanic acid, polymethylenepolyphenylene ester, caprolactam- and phenol-blocked.
P–17–0405A	8	12/6/2019	CBI	(G) Oil and gas well performance	(G) halogenated benzoic acid ethyl ester.
P–17–0406A	7	12/6/2019	CBI	(G) Oil and gas well performance	(G) halogenated benzoic acid ethyl ester.
P–17–0407	6	12/6/2019	CBI	(G) Well performance	(G) halogenated benzoic acid ethyl ester.
P–17–0408	5	12/6/2019	CBI	(G) Well performance	(G) halogenated benzoic acid ethyl ester.
P–17–0409	6	12/6/2019	CBI	(G) Monitor well performance	(G) halogenated benzoic acid ethyl ester.
P–17–0410	5	12/6/2019	CBI	(G) Monitor well performance	(G) halogenated benzoic acid ethyl ester.
P–17–0411	5	12/6/2019	CBI	(G) Monitor well performance	(G) halogenated benzoic acid ethyl ester.
P–17–0412	5	12/6/2019	CBI	(G) Monitor well performance	(G) halogenated benzoic acid ethyl ester.
P–17–0414	5	12/6/2019	CBI	(G) Monitor well performance	(G) halogenated benzoic acid.
P–17–0415	6	12/6/2019	CBI	(G) Monitor well performance	(G) halogenated benzoic acid.
P–17–0416	6	12/6/2019	CBI	(G) Monitor well performance	(G) halogenated benzoic acid.
P–17–0417	6	12/6/2019	CBI	(G) Monitor well performance	(G) halogenated benzoic acid.
P–17–0418A	6	12/6/2019	CBI	(G) Monitor well performance	(G) halogenated benzoic acid.
P–17–0420A	7	12/6/2019	CBI	(G) Monitor well performance	(G) halogenated benzoic acid.
P–17–0421A	6	12/6/2019	CBI	(G) Monitor well performance	(G) halogenated benzoic acid.
P–17–0422A	6	12/6/2019	CBI	(G) Monitor well performance	(G) halogenated benzoic acid.
P–17–0423	5	12/6/2019	CBI	(G) Monitor well performance	(G) halogenated benzoic acid ethyl ester.
P–17–0441	5	12/9/2019	CBI	(G) Monitor well performance	(G) halogenated sodium benzoate.
P–17–0442	5	12/9/2019	CBI	(G) Monitor well performance	(G) halogenated sodium benzoate.
P–17–0443A	6	12/9/2019	CBI	(G) Monitor well performance	(G) halogenated sodium benzoate.
P–17–0444	4	12/11/2019	CBI	(G) Monitor well performance	(G) halogenated sodium benzoate.
P–17–0445A	7	12/9/2019	CBI	(G) Monitor well performance	(G) halogenated sodium benzoate.
P–17–0446A	6	12/9/2019	CBI	(G) Monitor well performance	(G) halogenated sodium benzoate.
P–17–0447	6	12/9/2019	CBI	(G) Monitor well performance	(G) halogenated sodium benzoate.
P–17–0448	5	12/9/2019	CBI	(G) Monitor well performance	(G) halogenated sodium benzoate.
P–17–0449	5	12/9/2019	CBI	(G) Monitor well performance	(G) halogenated sodium benzoate.
P–17–0450	5	12/9/2019	CBI	(G) Monitor well performance	(G) Halogenated benzoic acid.
P–18–0133A	3	12/2/2019	CBI	(G) component in hydraulic fracturing fluids.	(G) Polyol adduct of bisaldehyde.
P–18–0253A	3	11/22/2019	UBE America, Inc	(G) Extrusion and Injection Molding Polymer.	(S) Dodecanoic acid, 12-amino-, homopolymer.
P–18–0254A	3	11/22/2019	UBE America, Inc	(G) Extrusion and Injection Molding Polymer.	(G) Hexanedioic acid, polymer with 12-aminododecanoic acid and a polyetheramine.
P–18–0255A	3	11/22/2019	UBE America, Inc	(G) Recreational equipment	(S) Dodecanoic acid, 12-amino-, polymer with hexahydro-2H-azepin-2-one.
P–18–0267A	4	11/21/2019	CBI	(G) curing agent	(G) Branched alkanoic acid, epoxy ester, reaction products with monocyclic dialkylamine and polycyclic alcohol epoxy polymer.
P–18–0268A	4	11/21/2019	CBI	(G) curing agent	(G) Branched alkanoic acid, epoxy ester, reaction products with monocyclicdialkanamine and polycyclic dialkanol ether polymer.
P–18–0269A	4	11/21/2019	CBI	(G) curing agent	(G) Branched alkanoic acid, epoxy ester, reaction products with monocyclicalkanamine, polycyclic alcohol ether homopolymer, and polycyclic alcohol epoxy polymer.
P–18–0273A	2	12/11/2019	CBI	(G) Used in polymer manufacturing	(S) 1,4-Cyclohexanedicarboxylic acid, 1,4-bis(2-ethylhexyl) ester.

TABLE I—PMN/SNUN/MCANS APPROVED * FROM 12/01/2019 TO 12/31/2019—Continued

Case No.	Version	Received date	Manufacturer	Use	Chemical substance
P–18–0287A	9	12/4/2019	CBI	(G) Company plans to produce ''tires, wastes, pyrolyzed, condensate oil fraction'' (hereafter referred to as syn oil) (CASRN: 1312024–02–4) from scrap tire materials.	(G) Synthetic oil from tires.
P–18–0300A	3	12/4/2019	CBI	(S) Additive for automatic dishwashing detergent.	(G) Heteromonocycle, alkenoic 1:1 salt, polymer with alpha-(2-methyl-1-oxo-2-propen-1-y)l-omegamethoxypoly(oxy-1,2-ethanediyl) and methyl-alkenoic acid.
P–18–0345A	2	12/10/2019	Chitec Technology Co., Ltd.	(S) R-gen 990 is a liquid aminoketone-based photoinitator (PI) intended for use as an ultraviolet (UV) curing agent in highly pigmented inks, photo-resists, and masks.	(S) 1-Butanone, 2-(dimethylamino)-1-[4-(2-ethyl-2-methyl-3-oxazolidinyl)phenyl]-2-(phenylmethyl)-.
P–18–0350A	2	12/4/2019	Evonik Corporation ..	(S) Additive in water-borne UV-curable coatings,(S) Filler & pigment treatment,(S) Glass fiber treatment.	(G) Aqueous methacrylamido modified polysiloxane.

P–19–0150A	2	12/13/2019	CBI	(G) Fertilizer ingredient	(G) Iron, complexes with ethylenediamine-4-hydroxycarbomonocycle hetero-acid-2-oxoacetic acid reaction products, sodium salts.
P–19–0151A	2	12/13/2019	CBI	(G) Fertilizer ingredient	(G) Iron, complexes with ethylenediamine-4-hydroxycarbomonocycle hetero-acid sodium salt (1:1)-sodium 2-oxoacetate (1:1) reaction products, sodium salts.
P–19–0152A	3	11/21/2019	UBE America, Inc	(G) Pre-polymer for polyurethane roll covers.	(G) alkaneic acid, dialkyl ester polymer with alkanediol, [[(isocyanatocarbomonocycl-e)alkyl)carbomonocycle)carbamate.
P–19–0159A	5	12/6/2019	CBI	(G) As Catalyst in Industrial sector	(G) Titanium (4+) hydroxy-alkylcarboxylate salt complex.
P–19–0159A	6	12/13/2019	CBI	(G) As Catalyst in Industrial sector	(G) Titanium (4+) hydroxy-alkylcarboxylate salt complex.
P–19–0174	3	12/11/2019	International Lubricants, Inc.	(G) Phosphorus antiwear compound	(G) Octadecanoic acid, (alkylphosphinyl), polyol ester.
P–20–0009A	3	12/11/2019	Resinate Materials Group, Inc.	(S) Intermediate for use in the manufacture of polymers.	(G) Waste plastics, poly(ethylene terephthalate), depolymd. with polyol, polymers with alkanedioic acid and alkanoic acid.
P–20–0011A	4	12/2/2019	CBI	(G) Light stabilizer	(G) Tetraoxaspiro[5.5]alkyl-3,9-diylbis(alkyl-2,1-diyl) bis(2-cyano-3-(3,4-dimethoxyphenyl)acrylate).
P–20–0012A	5	12/12/2019	CBI	(G) Ink Additive	(G) Polyol, polymer with alkyl diisocyanate, alkyl substituted heterocycle blocked.
P–20–0018	2	11/26/2019	CBI	(G) Component in candles	(G) Fatty acid dimers, polymers with glycerol and triglycerides.
P–20–0019	2	11/26/2019	CBI	(G) Component in candles	(G) Fatty acid dimers, polymers with glycerol and triglycerides.
P–20–0020	2	11/26/2019	CBI	(G) Component in candles	(G) Fatty acid dimers, polymers with glycerol and triglycerides.
P–20–0021	2	11/26/2019	CBI	(G) Component in candles	(G) Fatty acid dimers, polymers with glycerol and fatty acids.
P–20–0022	2	12/9/2019	CBI	(G) Fuel additive for combustion improver	(G) Polyalkoxycarbopolycycle hydroxy.
P–20–0024	3	12/4/2019	CBI	(G) Dispersant polymer for coatings	(G) Phenol-formaldehyde polymer with amino-oxirane copolymer and nitrobenzoates.
P–20–0026	2	12/20/2019	GE Healthcare	(S) The new monomer is isolated and used for subsequent polymerization.	(G) N-alkyl heteromonocyclic diphenolamide.
P–20–0029	2	12/18/2019	KURARAY America, Inc.	(G) Oil soluble additive	(S) Octanal, 7(or 8)-formyl-.

TABLE I—PMN/SNUN/MCANS APPROVED * FROM 12/01/2019 TO 12/31/2019—Continued

Case No.	Version	Received date	Manufacturer	Use	Chemical substance
P–20–0030	1	12/16/2019	CBI	(S) Plasticizer for Plastisols, and Plasticizer in caulks and sealants.	(G) Hexanedioic acid, alkyl ester.
P–20–0032	1	12/18/2019	Engineered Bonded Structures and Composites.	(S) Talathol PO3, the material for which this notice is filed, is intended to be used as a copolymer in the production of urethane foam or coating.	(G) Polyethylene terephthalate polyol.
P–20–0035	1	12/19/2019	CBI	(G) Colorant	(G) Substituted aromatic, 3,3′-[[6-[(substituted alkyl amino)]-1,3,5-triazine-2,4-diyl]bis[imino[2-(substituted)-5-[substituted alkoxy]-4,1-phenylene]-2,1- diazenediyl]]bis[substituted, sodium salt].
P–20–0038	1	12/23/2019	Nissan Chemical Houston Corporation.	(S) PMN substance will be used as resist compound for semiconductor manufacture.	(S) 1,3,5-Triazine-2,4,6(1H,3H,5H)-trione, 1,3,5-tris[3-(2-oxiranyl)propyl]-.

* The term 'Approved' indicates that a submission has passed a quick initial screen ensuring all required information and documents have been provided with the submission prior to the start of the 90-day review period, and in no way reflects the final status of a complete submission review.

In Table II of this unit, EPA provides the following information (to the extent that such information is not claimed as CBI) on the NOCs that have passed an initial screening by EPA during this period: The EPA case number assigned to the NOC including whether the submission was an initial or amended submission, the date the NOC was received by EPA, the date of commencement provided by the submitter in the NOC, a notation of the type of amendment (*e.g.,* amendment to generic name, specific name, technical contact information, etc.) and chemical substance identity.

TABLE II—NOCS APPROVED * FROM 12/01/2019 TO 12/31/2019

Case No.	Received date	Commencement date	If amendment, type of amendment	Chemical substance
P–16–0132A	12/12/2019	10/24/2019	Withdrew CBI claim.	(S) Oxirane, 2-methyl-, polymer with oxirane, mono-c16-18-alkyl ethers, phosphates.
P–16–0388	12/3/2019	11/25/2019	N	(S) Amines, n-(3-aminopropyl)-n-tallow alkyltrimethylenedi-, polymers with bisphenol A and epichlorohydrin.
P–16–0470	11/28/2019	11/19/2019	N	(S) 2,7-Nonadien-4-ol, 4,8-dimethyl-.
P–16–0572A	12/10/2019	9/19/2019	Generic chemical name.	(G) Fatty acids, tall oil, reaction products with polyalkylene-polysubstituted-terephthalic acid polymer.
P–17–0362	12/11/2019	11/12/2019	N	(G) Aliphatic phosphoric amide ester.
P–18–0125	11/26/2019	11/18/2019	N	(S) Acetic acid, 2-oxo-, sodium salt (1:1).
P–18–0155	12/4/2019	11/20/2019	N	(G) Crosslinked polymer of alkyl acrylamides, acrylate esters, and alkyl acrylamide sulfonate salt.
P–18–0156	12/4/2019	11/20/2019	N	(G) Crosslinked polymer of alkyl acrylamides, acrylate esters, and alkyl acrylamide sulfonic acid.
P–18–0295	11/27/2019	11/5/2019	N	(S) 1,3-Butanediol, (3R)-.
P–18–0300	12/4/2019	11/20/2019	N	(G) Heteromonocycle, alkenoic 1:1 salt, polymer with .alpha.-(2-methyl-1-oxo-2-propen-1-yl)-.omega.-methoxypoly(oxy-1,2-ethanediyl) and methyl-alkenoic acid.
P–18–0321A	12/5/2019	10/23/2019	Withdrew CBI claim.	(S) Poly(oxy-1,2-ethanediyl), alpha,alpha′-(1-methyl-1,2-ethanediyl)bis[omega-hydroxy-.
P–19–0065	12/9/2019	11/15/2019	N	(S) 2lamda5,4lamda5,6lamda5—1,3,5,2,4,6 triazatriphosphorine, 2,2,4,4,6,6 -hexaphenoxy-.
P–19–0108	12/3/2019	11/18/2019	N	(S) Benzoic acid, 2-chloro-4-methyl-, ethyl ester.
P–19–0120	12/11/2019	11/21/2019	N	(G) Alkenoic acid, polymer with alkanediyl bis substituted alkylene bis heteromonocycle, substituted carbomonocycle and (alkylalkenyl) carbomonocycle, alkali metal salt.

* The term 'Approved' indicates that a submission has passed a quick initial screen ensuring all required information and documents have been provided with the submission.

In Table III of this unit, EPA provides the following information (to the extent such information is not subject to a CBI claim) on the test information that has been received during this time period: The EPA case number assigned to the test information; the date the test information was received by EPA, the type of test information submitted, and chemical substance identity.

TABLE III—TEST INFORMATION RECEIVED FROM 12/01/2019 TO 12/31/2019

Case No.	Received date	Type of test information	Chemical substance
L–18–0168 ...	11/25/2019	Particle Size Distribution Study	(G) Aromatic carboxylic acid, 2-[2-(6-amino-1-hydroxy-3-sulfo-2-aromaticyl)diazenyl]-, reaction products with 4-[[7-[2-(4-amino-2-alkoxyaromaticyl)diazenyl]-8-hydroxy-6-sulfo-2-aromaticyl]amino]aromatic carboxylic acid, 4-[2-(4-aminoaromaticyl)diazenyl]aromaticsulfonic acid, metal sulfate, 2,2′-(1,2-alkenediyl)bis[5-nitroaromaticsulfonic acid] and sodium hydroxide.
P–06–0489 ..	12/14/2019	Annual Impurity Report	(G) Fluoroalkyl methacrylate copolymer.
P–06–0494 ..	12/14/2019	Annual Impurity Report	(G) Fluoroalkyl methacrylate copolymer.
P–06–0576 ..	12/14/2019	Annual Impurity Report	(G) Fluoroalkyl acrylate copolymer.
P–06–0586 ..	12/14/2019	Annual Impurity Report	(G) Fluoroalkyl methacrylate copolymer.
P–07–0447 ..	12/14/2019	Annual Impurity Report	(G) Fluoroalkyl acrylate copolymer.
P–08–0222 ..	12/14/2019	Annual Impurity Report	(G) Fluoroalkyl acrylate copolymer.
P–09–0037 ..	12/14/2019	Annual Impurity Report	(G) Fluoroalkyl methacrylate copolymer.
P–09–0511 ..	12/14/2019	Annual Impurity Report	(G) Fluoroalkyl acrylate copolymer.
P–10–0317 ..	12/14/2019	Annual Impurity Report	(G) Fluoroalkyl acrylate copolymer.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0185, OMB 3060–0627, OMB 3060–0837 and OMB 3060–0928; FRS 16485]

Information Collections Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before April 20, 2020. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0185.

Title: Section 73.3613, Availability of Contracts.

Form Number: N/A.

Respondents: Business or other for-profit entities and Not-for-profit institutions.

Number of Respondents and Responses: 2,400 respondents; 2,400 responses.

Estimated Time per Response: 0.25 to 0.5 hours.

Frequency of Response: On-occasion reporting requirement, Recordkeeping requirement, Third-party disclosure requirement.

Obligation To Respond: Required to obtain or retain benefits. The statutory authority for this information collection is contained in sections 154(i) and 303 the Communications Act of 1934, as amended.

Total Annual Burden: 975 hours.

Total Annual Cost: $ 135,000.

Nature and Extent of Confidentiality: There is no need for confidentiality with this information collection.

Privacy Act: No impact(s).

Needs and Uses: The information collection requirements included under OMB Control Number 3060–0185 require that commercial and noncommercial AM, FM, TV, and international broadcast stations make station contracts and other documents available to the FCC as set forth in 47 CFR 73.3613.

OMB Control Number: 3060–0627.

Title: FCC Form 302–AM, Application for AM Broadcast Station License.

Form Number: FCC Form 302–AM.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities, not for profit institutions.

Number of Respondents and Responses: 380 respondents and 380 responses.

Estimated Time per Response: 4–20 hours.

Frequency of Response: On occasion reporting requirement.

Total Annual Burden: 2,800 hours.

Total Annual Cost: $5,684,350.

Obligation To Respond: Required to obtain or retain benefits. The statutory authority is contained in Sections 154(i), 303 and 308 of the Communications Act of 1934, as amended.

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Privacy Impact Assessment(s): No impact(s).

Needs and Uses: Licenses and permittees of AM broadcast stations are required to file FCC Form 302–AM to obtain a new or modified station license, and/or to notify the Commission of certain changes in the licensed facilities of these stations. Additionally, when changes are made to an AM station that alter the resistance of the antenna system, a licensee must initiate a determination of the operating power by the direct method. The results of this are reported to the Commission using the FCC 302–AM.

OMB Control No.: 3060–0837.

Title: FCC Form 2100, Application for Media Bureau Audio and Video Service Authorization, Schedule B (Former FCC Form 302–DTV), Section 73.3700(b)(3), Section 73.3700(h)(2) and Section 73.3800.

Form No.: FCC Form 2100, Schedule B.

Type of Review: Extension of a currently approved information collection.

Respondents: Business or other for-profit entities; Not for profit institutions.

Number of Respondents and Responses: 975 respondents and 975 responses.

Estimated Time per Response: 2 hours.

Frequency of Response: One-time reporting requirement and on occasion reporting requirement.

Obligation To Respond: Required to obtain or retain benefits. The statutory authority for this collection is contained in Sections 154(i), 307, 308, 309, and 319 of the Communications Act of 1934, as amended; the Community Broadcasters Protection Act of 1999, Public Law 106–113, 113 Stat. Appendix I at pp. 1501A–594–1501A–598 (1999) (codified at 47 U.S.C. 336(f)); and the Middle Class Tax Relief and Job Creation Act of 2012, Public Law 112–96, 6402 (codified at 47 U.S.C. 309(j)(8)(G)), 6403 (codified at 47 U.S.C. 1452), 126 Stat. 156 (2012) (Spectrum Act).

Total Annual Burden: 1,950 hours.

Annual Cost Burden: $585,945.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Needs and Uses: FCC Form 2100, Schedule B (formerly FCC Form 302–DTV) is used by licensees and permittees of full power broadcast stations to obtain a new or modified station license and/or to notify the Commission of certain changes in the licensed facilities of those stations. It may be used: (1) To cover an authorized construction permit (or auxiliary antenna), provided that the facilities have been constructed in compliance with the provisions and conditions specified on the construction permit; or (2) To implement modifications to existing licenses as permitted by 47 CFR Sections 73.1675(c) or 73.1690(c).

The information collection requirements contained in Section 73.3700(b)(3) require the licensee of each channel sharee station and channel sharer station to file an application for a license for the shared channel using FCC Form 2100 Schedule B (for a full power station) or F (for a Class A station) within six months of the date that the channel sharee station licensee receives its incentive payment pursuant

to section 6403(a)(1) of the Spectrum Act.

The information collection requirements contained in Section 73.3700(h)(2) state that, upon termination of the license of a party to a CSA, the spectrum usage rights covered by that license may revert to the remaining parties to the CSA. Such reversion shall be governed by the terms of the CSA in accordance with paragraph (h)(4)(E) of this section. If upon termination of the license of a party to a CSA only one party to the CSA remains, the remaining licensee may file an application to change its license to non-shared status using FCC Form 2100, Schedule B (for a full power licensee) or F (for a Class A licensee).

Lastly, Section 73.3800 allows full power television stations to channel share with other full power stations, Class A, LPTV and TV translator stations outside of the incentive auction context. Full power stations file FCC Form 2100, Schedule B in order to complete the licensing of their shared channel.

OMB Control No.: 3060–0928.

Title: FCC Form 2100, Application for Media Bureau Audio and Video Service Authorization, Schedule F (Formerly FCC 302–CA); 47 CFR 73.6028; Section 73.3700(b)(3); Section 73.3700(h)(2) and Section 73.3572(h).

Form No.: FCC Form 2100, Schedule F.

Type of Review: Extension of a currently approved information collection.

Respondents: Business or other for-profit entities; Not for profit institutions; State, local or Tribal Government.

Number of Respondents and Responses: 975 respondents and 975 responses.

Estimated Time per Response: 2 hours.

Frequency of Response: One-time reporting requirement and on occasion reporting requirement.

Total Annual Burden: 1,950 hours.

Annual Cost Burden: $307,125.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Needs and Uses: The FCC Form 2100, Schedule F is used by Low Power TV (LPTV) stations that seek to convert to Class A status; existing Class A stations seeking a license to cover their authorized construction permit facilities; and Class A stations entering into a channel sharing agreement. The FCC Form 2100, Schedule F requires a series of certifications by the Class A applicant as prescribed by the Community Broadcasters Protection Act of 1999 (CBPA). Licensees will be required to provide weekly announcements to their listeners: (1) Informing them that the applicant has applied for a Class A license and (2) announcing the public's opportunity to comment on the application prior to Commission action.

Information Collection Requirements

Section 73.6028 permits Class A stations to seek approval to share a single television channel with LPTV, TV translator, full power and Class A television stations. Class A stations interested in terminating operations and sharing another station's channel must submit FCC Form 2100 Schedule F in order to complete the licensing of their channel sharing arrangement.

Section 73.3700(b)(3) requires the licensee of each channel sharee station and channel sharer station to file an application for a license for the shared channel using FCC Form 2100 Schedule B (for a full power station) or F (for a Class A station) within six months of the date that the channel sharee station licensee receives its incentive payment pursuant to section 6403(a)(1) of the *Spectrum Act.*

Section 73.3700(h)(2) states that, upon termination of the license of a party to a channel sharing assignees (CSA), the spectrum usage rights covered by that license may revert to the remaining parties to the CSA. Such reversion shall be governed by the terms of the CSA in accordance with 47 CFR 73.3700(h)(4)(E). If upon termination of the license of a party to a CSA only one party to the CSA remains, the remaining licensee may file an application to change its license to non-shared status using FCC Form 2100, Schedule B (for a full power licensee) or F (for a Class A licensee).

Section 73.3572(h)—Class A TV station licensees shall file a license application for either the flash cut channel or the digital companion channel they choose to retain for post-transition digital operations. Class A TV stations will retain primary, protected regulatory status on their desired post-transition digital channel. Class A TV applicants must certify that their proposed post-transition digital facilities meet all Class A TV interference protection requirements.

Federal Communications Commission.

Marlene Dortch,

Secretary.

BILLING CODE 6712–01–P

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

Senior Executive Service; Performance Review Board

AGENCY: Federal Mine Safety and Health Review Commission.

ACTION: Notice.

SUMMARY: This notice announces the appointment of the members of the Performance Review Board (PRB) for the Federal Mine Safety and Health Review Commission. The PRB reviews the performance appraisals of career and non-career senior executives. The PRB makes recommendations regarding proposed performance appraisals, ratings, bonuses, pay adjustments, and other appropriate personnel actions.

DATES: Effective on February 18, 2020.

FOR FURTHER INFORMATION CONTACT: Lisa Boyd, Executive Director, Federal Mine Safety and Health Review Commission, (202) 434–9910.

SUPPLEMENTARY INFORMATION: This Notice announces the appointment of the following primary and alternate members to the Federal Mine Safety and Health Review Commission PRB:

Primary Members

David Copenhaver, Assistant Commissioner, Office of Shared Services, Bureau of the Fiscal Service
Jason Hill, Deputy Assistant Commissioner, Office of Shared Services, Bureau of the Fiscal Service
Marisa Schmader, Deputy Assistant Commissioner, Fiscal Accounting Support and Outreach, Bureau of the Fiscal Service

Alternate Members

None.

Authority: 5 U.S.C. 4313(c)(4).

Lisa M. Boyd,

Executive Director, Federal Mine Safety and Health Review Commission.

BILLING CODE 6735–01–P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or

the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank indicated. The applications will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)).

Comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Ann E. Misback, Secretary of the Board, 20th Street and Constitution Avenue NW, Washington, DC 20551–0001, not later than March 18, 2020.

A. Federal Reserve Bank of St. Louis (David L. Hubbard, Senior Manager) P.O. Box 442, St. Louis, Missouri 63166–2034. Comments can also be sent electronically to *Comments.applications@stls.frb.org:*

1. *First Illinois Bancorp, Inc., East St. Louis, Illinois;* to acquire Rockwood Bancshares, Inc., and thereby indirectly acquire Rockwood Bank, both of Eureka, Missouri.

Board of Governors of the Federal Reserve System, February 12, 2020.

Yao-Chin Chao,

Assistant Secretary of the Board.

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

Privacy Act of 1974; Matching Program

AGENCY: Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services (HHS).

ACTION: Notice of New Matching Program.

SUMMARY: In accordance with subsection (e)(12) of the Privacy Act of 1974, as amended, the Department of Health and Human Services (HHS), Centers for Medicare & Medicaid Services (CMS) is providing notice of a new matching program between CMS and the Department of the Treasury (Treasury), Internal Revenue Services (IRS), ''Verification of Household Income and Family Size for Insurance Affordability Programs and Exemptions.''

DATES: The deadline for comments on this notice is March 19, 2020. The re-established matching program will commence not sooner than 30 days after publication of this notice, provided no comments are received that warrant a change to this notice. The matching program will be conducted for an initial term of 18 months (from approximately April 2020 to October 2021) and within 3 months of expiration may be renewed for one additional year if the parties make no change to the matching program and certify that the program has been conducted in compliance with the matching agreement.

ADDRESSES: Interested parties may submit comments on the new matching program to the CMS Privacy Officer by mail at: Division of Security, Privacy Policy & Governance, Information Security & Privacy Group, Office of Information Technology, Centers for Medicare & Medicaid Services, Location: N1–14–56, 7500 Security Blvd., Baltimore, MD 21244–1850, or *walter.stone@cms.hhs.gov.*

FOR FURTHER INFORMATION CONTACT: If you have questions about the matching program, you may contact Anne Pesto, Senior Advisor, Marketplace Eligibility and Enrollment Group, Center for Consumer Information and Insurance Oversight, Centers for Medicare & Medicaid Services, at 410–786–3492, by email at *anne.pesto@cms.hhs.gov,* or by mail at 7500 Security Blvd., Baltimore, MD 21244.

SUPPLEMENTARY INFORMATION: The Privacy Act of 1974, as amended (5 U.S.C. 552a) provides certain protections for individuals applying for and receiving federal benefits. The law governs the use of computer matching by federal agencies when records in a system of records (meaning, federal agency records about individuals retrieved by name or other personal identifier) are matched with records of other federal or non-federal agencies. The Privacy Act requires agencies involved in a matching program to:

1. Enter into a written agreement, which must be prepared in accordance with the Privacy Act, approved by the Data Integrity Board of each source and recipient federal agency, provided to Congress and the Office of Management and Budget (OMB), and made available to the public, as required by 5 U.S.C. 552a(o), (u)(3)(A), and (u)(4).

2. Notify the individuals whose information will be used in the matching program that the information they provide is subject to verification through matching, as required by 5 U.S.C. 552a(o)(1)(D).

3. Verify match findings before suspending, terminating, reducing, or making a final denial of an individual's benefits or payments or taking other adverse action against the individual, as required by 5 U.S.C. 552a(p).

4. Report the matching program to Congress and the OMB, in advance and annually, as required by 5 U.S.C. 552a(o) (2)(A)(i), (r), and (u)(3)(D).

5. Publish advance notice of the matching program in the **Federal Register** as required by 5 U.S.C. 552a(e)(12).

This matching program meets these requirements.

Barbara Demopulos,

Privacy Advisor, Division of Security, Privacy Policy and Governance, Information Security and Privacy Group, Office of Information Technology, Centers for Medicare & Medicaid Services.

Participating Agencies

The Department of Health and Human Services (HHS), Centers for Medicare & Medicaid Services (CMS) is the recipient agency, and the Department of the Treasury (Treasury), Internal Revenue Services (IRS) is the source agency.

Authority for Conducting the Matching Program

The statutory authority for the matching program is 42 U.S.C. 18001.

Purpose(s)

The purpose of the matching program is to provide CMS with IRS return information which CMS and state-based administering entities (AEs) will use to verify household income and family size for applicants and enrollees receiving eligibility determinations and redeterminations for benefits including: enrollment in a Qualified Health Plan (QHP) or a state's Basic Health Plan (BHP) through the federally-facilitated Exchange (FFE) or a state-based Exchange (SBE); advance payments of the premium tax credit (APTC); a cost sharing reduction (CSR); Medicaid and the Children's Health Insurance Program (CHIP); and certain certificates of exemption.

Categories of Individuals

The individuals whose information will be used in the matching program are consumers (applicants and enrollees) who receive the eligibility determinations and redeterminations described in the preceding Purpose(s) section (in particular, taxpayers whose return information is requested from IRS to verify an applicant's or enrollee's household income and family size).

Categories of Records

The categories of records used in the matching program are identity information and return information (specifically, household income and family size information). To request return information from IRS, CMS will provide IRS with the relevant taxpayer's name, social security number (SSN), and relationship to the applicant(s) or enrollee(s) (*i.e.,* primary, spouse, or dependent). When IRS is able to match the SSN and name provided by CMS and return information is available, IRS will disclose to CMS the following items of return information with respect to that taxpayer:

1. SSN;

2. family size;

3. tax filing status;

4. modified adjusted gross income (MAGI);

5. taxable year with respect to which the preceding information relates or, if applicable, the fact that such information is not available; and

6. any other specified item of return information authorized pursuant to 26 U.S.C. 6103(1)(21) and its implementing regulations.

System(s) of Records

The records used in this matching program will be disclosed from the following systems of records, as authorized by routine uses published in the System of Records Notices (SORNs) cited below:

A. System of Records Maintained by CMS

- CMS Health Insurance Exchanges System (HIX), CMS System No. 09–70–0560, last published in full at 78 FR 63211 (Oct. 23, 2013), as amended at 83 FR 6591 (Feb. 14, 2018).

B. System of Records Maintained by IRS

- Customer Account Data Engine (CADE) Individual Master File, Privacy Act SOR Treasury/IRS 24.030, published at 80 FR 54064 (Sept. 8, 2015).

[FR Doc. 2020–03051 Filed 2–14–20; 8:45 am]

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[CMS–3391–PN]

Medicare and Medicaid Programs: Application From the Joint Commission for Continued Approval of Its Hospital Accreditation Program

AGENCY: Centers for Medicare and Medicaid Services, HHS.

ACTION: Proposed notice.

SUMMARY: This proposed notice acknowledges the receipt of an application from the Joint Commission for continued recognition as a national accrediting organization for hospitals that wish to participate in the Medicare or Medicaid programs.

DATES: To be assured consideration, comments must be received at one of the addresses provided below, no later than 5 p.m. on March 19, 2020.

ADDRESSES: In commenting, please refer to file code CMS–3391–PN. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

Comments, including mass comment submissions, must be submitted in one of the following three ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to *http://www.regulations.gov.* Follow the ''submit a comment'' instructions.

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–3391–PN, P.O. Box 8010, Baltimore, MD 21244–8010.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–3391–PN, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: Caecilia Blondiaux, (410) 786–2190.

SUPPLEMENTARY INFORMATION: *Inspection of Public Comments:* All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following website as soon as possible after they have been received: *http://www.regulations.gov.* Follow the search instructions on that website to view public comments.

I. Background

Under the Medicare program, eligible beneficiaries may receive covered services from a hospital provided certain requirements are met. Sections 1861(e) of the Social Security Act (the Act), establish distinct criteria for facilities seeking designation as a hospital. Regulations concerning provider agreements are at 42 CFR part 489 and those pertaining to activities relating to the survey and certification of facilities are at 42 CFR part 488. The regulations at 42 CFR part 482 specify the minimum conditions that a hospital must meet to participate in the Medicare program.

Generally, to enter into an agreement, a hospital must first be certified by a state survey agency (SA) as complying with the conditions or requirements set forth in part 482 of our regulations. Thereafter, the hospital is subject to regular surveys by a SA to determine whether it continues to meet these requirements. There is an alternative; however, to surveys by SAs.

Section 1865(a)(1) of the Act provides that, if a provider entity demonstrates through accreditation by a Centers for Medicare & Medicaid Services (CMS) approved national accrediting organization (AO) that all applicable Medicare conditions are met or exceeded, we will deem those provider entities as having met the requirements. Accreditation by an AO is voluntary and is not required for Medicare participation.

If an AO is recognized by the Secretary of the Department of Health and Human Services (the Secretary) as having standards for accreditation that meet or exceed Medicare requirements, any provider entity accredited by the national accrediting body's approved program would be deemed to meet the Medicare conditions. A national AO applying for approval of its accreditation program under part 488, subpart A, must provide CMS with reasonable assurance that the AO requires the accredited provider entities to meet requirements that are at least as stringent as the Medicare conditions. Our regulations concerning the approval of AOs are set forth at §§ 488.4, 488.5 and 488.5(e)(2)(i). The regulations at

§ 488.5(e)(2)(i) require AOs to reapply for continued approval of its accreditation program every 6 years or sooner as determined by CMS.

The Joint Commission's current term of approval for their hospital accreditation program expires July 15, 2020.

II. Approval of Deeming Organizations

Section 1865(a)(2) of the Act and our regulations at § 488.5 require that our findings concerning review and approval of a national AO's requirements consider, among other factors, the applying AO's requirements for accreditation; survey procedures; resources for conducting required surveys; capacity to furnish information for use in enforcement activities; monitoring procedures for provider entities found not in compliance with the conditions or requirements; and ability to provide CMS with the necessary data for validation.

Section 1865(a)(3)(A) of the Act further requires that we publish, within 60 days of receipt of an organization's complete application, a notice identifying the national accrediting body making the request, describing the nature of the request, and providing at least a 30-day public comment period. We have 210 days from the receipt of a complete application to publish notice of approval or denial of the application.

The purpose of this proposed notice is to inform the public of the Joint Commission's request for continued approval of its hospital accreditation program. This notice also solicits public comment on whether the Joint Commission's requirements meet or exceed the Medicare conditions of participation (CoPs) for hospitals.

III. Evaluation of Deeming Authority Request

The Joint Commission submitted all the necessary materials to enable us to make a determination concerning its request for continued approval of its hospital accreditation program. This application was determined to be complete on December 18, 2019. Under section 1865(a)(2) of the Act and our regulations at § 488.5 (Application and re-application procedures for national accrediting organizations), our review and evaluation of the Joint Commission will be conducted in accordance with, but not necessarily limited to, the following factors:

- The equivalency of the Joint Commission's standards for hospitals as compared with CMS' hospital CoPs.
- The Joint Commission's survey process to determine the following:

++ The composition of the survey team, surveyor qualifications, and the ability of the organization to provide continuing surveyor training.

++ The comparability of the Joint Commission's processes to those of state agencies, including survey frequency, and the ability to investigate and respond appropriately to complaints against accredited facilities.

++ The Joint Commission's processes and procedures for monitoring a hospital found out of compliance with the Joint Commission's program requirements. These monitoring procedures are used only when the Joint Commission identifies noncompliance. If noncompliance is identified through validation reviews or complaint surveys, the SA monitors corrections as specified at § 488.9.

++ The Joint Commission's capacity to report deficiencies to the surveyed facilities and respond to the facility's plan of correction in a timely manner.

++ The Joint Commission's capacity to provide CMS with electronic data and reports necessary for effective validation and assessment of the organization's survey process.

++ The adequacy of the Joint Commission's staff and other resources, and its financial viability.

++ The Joint Commission's capacity to adequately fund required surveys.

++ The Joint Commission's policies with respect to whether surveys are announced or unannounced, to assure that surveys are unannounced.

++ The Joint Commission's policies and procedures to avoid conflicts of interest, including the appearance of conflicts of interest, involving individuals who conduct surveys or participate in accreditation decisions.

++ The Joint Commission's agreement to provide CMS with a copy of the most current accreditation survey together with any other information related to the survey as we may require (including corrective action plans).

IV. Collection of Information Requirements

This document does not impose information collection requirements, that is, reporting, recordkeeping or third party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

V. Response to Public Comments

Because of the large number of public comments we normally receive on **Federal Register** documents, we are not able to acknowledge or respond to them individually. We will consider all comments we receive by the date and time specified in the **DATES** section of this preamble, and, when we proceed with a subsequent document, we will respond to the comments in the preamble to that document.

Dated: February 6, 2020.

Seema Verma,

Administrator, Centers for Medicare & Medicaid Services.

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2020–N–0597]

Request for Information on Vaping Products Associated With Lung Injuries

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; request for information.

SUMMARY: The Food and Drug Administration (FDA) is opening a docket to obtain data and information related to the use of vaping products that are associated with recent lung injuries. This request for information (RFI) responds to direction from Congress to gather information from the public that could help identify and evaluate additional steps the Agency could take to ''address the recent pulmonary illnesses reported to be associated with the use of e-cigarettes and vaping products.'' FDA is seeking information on product design and potential ways to prevent consumers from modifying or adding substances to these products that are not intended by the manufacturers. In particular, FDA is seeking data and information in the form of reports and manuscripts that are unpublished or not available through indexed bibliographic databases. FDA has searched the publicly available scientific literature and is now seeking to supplement that with information not included in the published scientific literature.

DATES: Submit either electronic or written comments or information by April 20, 2020.

ADDRESSES: You may submit either electronic or written comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

• *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*

• If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

• *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

• For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2020–N–0597 for ''Request for Information on Vaping Products Associated With Lung Injuries.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Samantha LohCollado, Center for Tobacco Products, Food and Drug Administration, Document Control Center, 10903 New Hampshire Ave., Bldg. 71, Rm. G335, Silver Spring, MD 20993–0002, email: *CTPRegulations@fda.hhs.gov,* 1–877–287–1373.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the opening of a docket entitled ''Request for Information on Vaping Products Associated With Lung Injuries.''

FDA remains deeply concerned about the recent lung injuries and deaths and is working closely with other agencies, as well as State and local public health partners, to investigate these incidents. To help gather and analyze as much information as possible, FDA is working closely with Federal and State partners to identify the vaping products or other substances that may be causing the injuries. Specifically, FDA is analyzing samples submitted by a number of States for the presence of a broad range of chemicals, including nicotine, tetrahydrocannabinol (THC) and other cannabinoids, along with cutting agents/diluents and other additives, pesticides, opioids, poisons, heavy metals, and toxins. As of February 3, 2020, FDA has received over 1,300 samples from 31 States and 1 territory with roughly 1,070 of these samples connected to patients.[1] These samples have been collected directly from consumers, hospitals, and State offices. They have included vaping devices and products containing varied levels of liquid as well as packaging and other documentation. FDA has not found one product or substance that is implicated in all of the cases; however, we do know that THC is present in most of the samples being tested and many of these samples have vitamin E acetate as a diluent. FDA is following all potential leads and is committed to taking appropriate actions as additional facts emerge.

On December 20, 2019, the President signed the ''Further Consolidated Appropriations Act, 2020'' which directs FDA to issue a RFI to solicit information regarding ''the recent pulmonary illnesses reported to be associated with the use of e-cigarettes and vaping products.'' [2] To further this goal, FDA is seeking information related to the use of vaping products that are associated with the recent lung injuries, including public comment on product design and ways to prevent the public from modifying or adding substances to these products that are not intended by the manufacturer. This information may be used by FDA to inform future rulemaking and review of industry premarket application submissions, or in taking other regulatory actions.

II. Request for Information

FDA seeks to obtain data and information related to the use of vaping products that are associated with recent lung injuries. FDA has searched the publicly available scientific literature and is now seeking to supplement that search with information from other sources, specifically unpublished data or other information. If the work is not directly conducted in tobacco products,

[1] For more information regarding FDA's current efforts to identify and address lung injuries related to the use of vaping products, please see *https://www.fda.gov/news-events/public-health-focus/lung-illnesses-associated-use-vaping-products.*

[2] Further Consolidated Appropriations Act, 2020, Public Law 116–94, § 785. FDA uses the term ''vaping products'' for purposes of this RFI. ''Vaping products'' include e-cigarettes as well as other electronic nicotine delivery systems (ENDS). *See* ''Guidance for Industry: Enforcement Priorities for Electronic Nicotine Delivery Systems (ENDS) and Other Deemed Products on the Market Without Premarket Authorization,'' available at *https://www.fda.gov/industry/fda-basics-industry/guidances* (defining ''ENDS'' as including ''include devices, components, and/or parts that deliver aerosolized e-liquid when inhaled. For example, FDA considers vapes or vape pens, personal vaporizers, e-cigarettes, cigalikes, e-pens, e-hookahs, e-cigars, and e-pipes to be ENDS.'')

responses should include a discussion of how the information or data can be applied specifically to tobacco products or to lung injuries associated with the use of vaping products.

For this RFI, FDA is requesting: (1) Unpublished data or information (summarized); (2) unpublished or prepublication copies of manuscripts, conference presentations, and/or posters; (3) dissertations and/or theses; and (4) white papers or other unpublished reports. FDA is requesting data and information from all interested parties, including, but not limited to, academic and government researchers, industry, and any other sources.

Specifically, FDA is requesting unpublished data or information on the following:

- Specific chemicals, compounds, ingredients or combinations of ingredients that when inhaled or aerosolized, may be associated with the symptoms observed in ''e-cigarette, or vaping, product use-associated lung injury'' (EVALI) patients; *e.g.,* cough, chest pain, shortness of breath, abdominal pain, nausea, vomiting, diarrhea, fever, chills; [3]
- nature of pulmonary pathological changes associated with inhaling the specific chemicals, compounds, ingredients, or combinations of ingredients that elicit the symptoms observed in EVALI;
- methods or sources for obtaining chemicals, compounds, ingredients, or combinations of ingredients, other than those intended by the manufacturer, that are added to vaping products;
- in what ways and how frequently consumers add chemicals, compounds, ingredients or combinations of ingredients, other than those intended by the manufacturer, to vaping products and how these changes affect the health impacts, frequency, and patterns of consumer use of the products;
- methods for identifying and detecting materials added or modifications to vaping products after the manufacturing process and not intended by the manufacturer; and
- methods of changing the manufacturing process or product design features for vaping products that will reduce or prevent consumers from modifying products after the manufacturing process.

Data may come from studies outside of the United States; however, FDA prefers that reports be submitted in English.

[3] For more information concerning the symptoms observed in EVALI patients, please see *https://www.cdc.gov/tobacco/basic_information/e-cigarettes/severe-lung-disease/need-to-know/index.html#symptoms.*

When submitting information, please include details about how the data were collected, including the sample composition, year(s) of data collection, and a detailed summary of the methods and measures used. For data summaries, please include both point estimates and measures of variance, as well as effect sizes (if available).

Please also note that when submitting information and data to the docket, certain compressed file formats (*e.g.,* zip files) are not allowed. Acceptable file formats include: .doc, .docx, .pdf, .ppt, .pptx, .rtf, .txt, .xls, .xlsx, .xlsm, .xlsb, and .wpd.

Dated: February 12, 2020.

Lowell J. Schiller,

Principal Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2020–N–0259]

Patient-Focused Drug Development for Stimulant Use Disorder; Public Meeting; Request for Comments

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of public meeting; request for comments.

SUMMARY: The Food and Drug Administration (FDA, the Agency, or we) is announcing the following public meeting entitled ''Patient-Focused Drug Development for Stimulant Use Disorder.'' The purpose of the public meeting is to allow FDA to obtain stakeholder perspectives on the impact of stimulant use disorder and views on treatment approaches for stimulant use disorder.

DATES: The public meeting will be held on March 10, 2020, from 12:30 p.m. to 5 p.m. Submit either electronic or written comments on this public meeting by May 11, 2020. See the **SUPPLEMENTARY INFORMATION** section for registration date and information.

ADDRESSES: The public meeting will be held at the Silver Spring Civic Building, 1 Veterans Pl., Silver Spring, MD 20910. The building is located at Veterans Plaza in downtown Silver Spring and is accessible via the Silver Spring Metro Station on the Red Line. Paid public parking is also available at the Town Square Garage (Garage 61), 801 Ellsworth Dr., Silver Spring, MD 20910, and the Wayne-Ellsworth Garage (Garage 60), 921 Wayne Ave., Silver Spring, MD 20910. For more information regarding parking, Metro access, and the meeting location, please refer to *https://www.montgomerycountymd.gov/cupf/info-reservation/SSCB.html.*

You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before May 11, 2020. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of May 11, 2020. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2020–N–0259 for ''Patient-Focused Drug Development for Stimulant Use Disorder; Public Meeting; Request for Comments.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Lyna Merzoug, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6308, Silver Spring, MD 20993–0002, 301–796–6001, *PatientFocused@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

This meeting will provide FDA the opportunity to obtain input from individuals with stimulant use disorder and other related stakeholders on the impact of stimulant use disorder and views on treatment goals and approaches. FDA is interested in stakeholders' perspectives on: (1) The health effects and daily impacts of their condition; (2) the impact (if any) of opioid and polysubstance use on their condition; (3) treatment goals; and (4) decision factors considered when seeking out or selecting a treatment.

Stimulant use disorder describes a range of problems associated with the use of illicit stimulant drugs, including methamphetamine and cocaine, and prescription stimulants (*e.g.,* ADDERALL, RITALIN), but not including caffeine or nicotine. A diagnosis of stimulant use disorder is made when a clinician identifies a pattern of use of amphetamine-type substance, cocaine, or other stimulant that leads to clinically significant impairment or distress, including an inability to reduce or control consumption, cravings to use a stimulant, continued use of a stimulant despite it causing negative consequences, and the need to use increased amounts of a stimulant to achieve the desired effect. There are no FDA-approved medications for stimulant use disorder.

The questions that will be asked of individuals with stimulant use disorder and other stakeholders at the meeting are listed in the following section and organized by topic. For each topic, a brief initial panel discussion will begin the dialogue. This will be followed by a facilitated discussion inviting comments from other audience participants. In addition to input generated through this public meeting, FDA is interested in receiving stakeholder input addressing these questions through written comments, which can be submitted to the public docket (see **ADDRESSES**). As noted above, when submitting comments, if you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' When submitting comments, if you are commenting on behalf of a stimulant user, please indicate that you are doing so and answer the following questions as much as possible from the stimulant user's perspective, but please refrain from providing information that would identify third parties, including minor children.

FDA will post the agenda and other meeting materials approximately 5 days before the meeting at *https://www.fda.gov/drugs/news-events-human-drugs/public-meeting-patient-focused-drug-development-stimulant-use-disorder-03102020-03102020.*

II. Discussion Questions at the Public Meeting

A. Topic 1: Health Effects and Daily Impacts

1. How would you describe your experience with stimulant use disorder?

a. Which stimulant(s) did you start using first?

b. What stimulant(s) are you using now?

c. Did you use any other illicit or prescription drugs before you started using the stimulant that you are currently using?

d. How are you using stimulants? How has your stimulant(s) use changed over time? Are you using more frequently or at higher doses?

e. Do you use stimulants in combination with other drug(s)? If so, what other drugs do you use and why?

f. Have you used a stimulant(s) as treatment for opioid withdrawal and/or overdose?

2. Of all the ways that stimulant use disorder impacts your health and well-being, which effects have the most significant impact on your daily life and the daily life of your family and/or friends? Examples may include physical and mental effects of using stimulants (effects on your body and thinking), effects of stimulant withdrawal, effects of cravings, impacts on your ability to function in personal or professional life, or emotional or social effects.

a. What drives your use of stimulants?

b. Are there certain activities that you can only do if you take a stimulant? If so, what are those activities?

c. Are there specific activities that are important to you but that you cannot do at all or as fully as you would like because of your stimulant use? Examples of activities may include daily hygiene; meeting school, work, or family responsibilities; participation in social activities.

d. How does your stimulant use affect daily life on your best days? On your worst days?

3. What worries you most about your condition?

B. Topic 2: Current Approaches to Management

1. Have you considered seeking treatment? Why or why not?

2. What are you currently doing to help manage your stimulant use?

a. How well have these management approaches worked for you?

b. How well have they helped address the effects of stimulant use that are most troubling to you?

c. What are the biggest problems you have faced in using these approaches? Examples may include bothersome side effects, challenges or barriers to access, concern about stigma.

3. What are the biggest factors that you consider when making decisions about seeking out or engaging in treatment for stimulant use disorder?

4. What specific things would you look for in an ideal treatment for stimulant use disorder?

5. If you had the opportunity to participate in a clinical study to test an experimental treatment for stimulant use disorder, what factors would you consider when deciding whether you would participate?

III. Participating in the Public Meeting

Registration: To register for the public meeting, visit *https://stimulantusedisorder-pfdd.eventbrite.com/.* Contact information provided during registration will remain confidential and only be used to send meeting updates to participants.

Registration is free and based on space availability, with priority given to early registrants. Persons interested in attending this public meeting must register by March 3, 2020, 11:59 p.m. Eastern Time. Early registration is recommended because seating is limited; therefore, FDA may limit the number of participants from each organization. If time and space permit, onsite registration on the day of the public meeting will be provided beginning at 11:30 a.m.

If you need special accommodations due to a disability, please contact Lyna Merzoug (**SEE FURTHER INFORMATION CONTACT**) no later than March 3, 2020.

Panelist Selection: Stakeholders, particularly people suffering from stimulant use disorder, who are interested in presenting comments as part of the initial panel discussions will be asked to indicate in their registration which topic(s) they wish to address. These stakeholders also will be asked to send *PatientFocused@fda.hhs.gov* a brief summary of responses to the discussion questions listed above by February 26, 2020. Panelists will be notified of their selection approximately 7 days before the public meeting. We will try to accommodate all stakeholders who wish to speak, either through the panel discussion or audience participation; however, the duration of comments may be limited by time constraints.

Open Public Comment: There will be time allotted during the meeting for open public comment. Signup for this session will be on a first-come, first-serve basis on the day of the workshop. Individuals and organizations with common interests are urged to consolidate or coordinate and request time for a joint presentation. No commercial or promotional material will be permitted to be presented or distributed at the public workshop.

Persons attending FDA's meetings are advised that FDA is not responsible for providing access to electrical outlets.

Streaming Webcast of the public meeting: FDA will also stream a live audio recording of this public meeting with the presentation slides. The audio recording and presentation slides, along with a meeting transcript and summary report, will also be made publicly available after the meeting. Because of the sensitive nature of the meeting topic, and the importance of gathering candid, meaningful input from individuals who have come forward to speak about living with stimulant use disorder, no other audio recording, video recording, and/or photography will be allowed at this Patient-Focused Drug Development meeting. FDA is asking for your cooperation and strongly requests that you respect the privacy of all attendees. You will be asked to indicate in your registration whether you plan to attend in person or via the webcast. To register for the webcast, please visit *https://stimulantusedisorder-pfdd.eventbrite.com/.*

If you have never attended a Connect Pro event before, test your connection at *https://collaboration.fda.gov/common/help/en/support/meeting_test.htm.* To get a quick overview of the Connect Pro program, visit *https://www.adobe.com/go/connectpro_overview.* FDA has verified the website addresses in this document, as of the date this document publishes in the **Federal Register**, but websites are subject to change over time.

Transcripts: Please be advised that as soon as a transcript of the public meeting is available, it will be accessible at *https://www.regulations.gov.* It may be viewed at the Dockets Management Staff (see **ADDRESSES**). A link to the transcript will also be available on the internet at *https://www.fda.gov/industry/prescription-drug-user-fee-amendments/fda-led-patient-focused-drug-development-pfdd-public-meetings.*

Dated: February 12, 2020.

Lowell J. Schiller,

Principal Associate Commissioner for Policy.

[FR Doc. 2020–03159 Filed 2–14–20; 8:45 a.m.]

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket Nos. FDA–2017–E–5899 and FDA–2017–E–5911]

Determination of Regulatory Review Period for Purposes of Patent Extension; INTRAROSA

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or the Agency) has determined the regulatory review period for INTRAROSA and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of applications to the Director of the U.S. Patent and Trademark Office (USPTO), Department of Commerce, for the extension of a patent which claims that human drug product.

DATES: Anyone with knowledge that any of the dates as published (see **SUPPLEMENTARY INFORMATION**) are incorrect may submit either electronic or written comments and ask for a redetermination by April 20, 2020. Furthermore, any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period by August 17, 2020. See ''Petitions'' in the **SUPPLEMENTARY INFORMATION** section for more information.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before April 20, 2020. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of April 20, 2020. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

• *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*

• If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

• *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

• For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket Nos. FDA–2017–E–5899 and FDA–2017–E–5911 for ''Determination of Regulatory Review Period for Purposes of Patent Extension; INTRAROSA.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with § 10.20 (21 CFR 10.20) and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Beverly Friedman, Office of Regulatory Policy, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6250, Silver Spring, MD 20993, 301–796–3600.

SUPPLEMENTARY INFORMATION:

I. Background

The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98–417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100–670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: A testing phase and an approval phase. For human drug products, the testing phase begins when the exemption to permit the clinical investigations of the drug becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human drug product and continues until FDA grants permission to market the drug product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Director of USPTO may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human drug product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA has approved for marketing the human drug product, INTRAROSA (prasterone), indicated for the treatment of moderate to severe dyspareunia, a symptom of vulvar and vaginal atrophy, due to menopause. Subsequent to this approval, the USPTO received patent term restoration applications for INTRAROSA (U.S. Patent Nos. 8,629,129 and 8,957,054) from Endorecherche, Inc., and the USPTO requested FDA's assistance in determining the patents' eligibility for patent term restoration. In a letter dated February 20, 2018, FDA advised the USPTO that this human drug product had undergone a regulatory review period and that the approval of INTRAROSA represented the first permitted commercial marketing or use of the product. Thereafter, the USPTO requested that FDA determine the product's regulatory review period.

II. Determination of Regulatory Review Period

FDA has determined that the applicable regulatory review period for INTRAROSA is 3,381 days. Of this time, 2,983 days occurred during the testing phase of the regulatory review period, while 398 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 355(i)) became effective:* August 17, 2007. FDA has verified the applicant's claim that the date the investigational new drug application became effective was August 17, 2007.

2. *The date the application was initially submitted with respect to the human drug product under section 505 of the FD&C Act:* October 16, 2015. FDA has verified the applicant's claim that the new drug application (NDA) for INTRAROSA (NDA 208470) was initially submitted on October 16, 2015.

3. *The date the application was approved:* November 16, 2016. FDA has verified the applicant's claim that NDA 208470 was approved on November 16, 2016.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the USPTO applies several statutory limitations in its calculations of the actual period for patent extension. In its applications for patent extension, this applicant seeks 717 days or 518 days of patent term extension.

III. Petitions

Anyone with knowledge that any of the dates as published are incorrect may submit either electronic or written comments and, under 21 CFR 60.24, ask for a redetermination (see **DATES**). Furthermore, as specified in § 60.30 (21 CFR 60.30), any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must comply with all the requirements of § 60.30, including but not limited to: Must be timely (see **DATES**), must be filed in accordance with § 10.20, must contain sufficient facts to merit an FDA investigation, and must certify that a true and complete copy of the petition has been served upon the patent applicant. (See H. Rept. 857, part 1, 98th Cong., 2d sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Submit petitions electronically to *https://www.regulations.gov* at Docket No. FDA–2013–S–0610. Submit written petitions (two copies are required) to the Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Dated: February 12, 2020.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

[Document Identifier: OS–4040–0019]

Agency Information Collection Request; 30-Day Public Comment Request

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: In compliance with the requirement of the Paperwork Reduction Act of 1995, the Office of the Secretary (OS), Department of Health and Human Services, is publishing the following summary of a proposed collection for public comment.

DATES: Comments on the ICR must be received on or before March 19, 2020.

ADDRESSES: Submit your comments to *OIRA_submission@omb.eop.gov* or via facsimile to (202) 395–5806.

FOR FURTHER INFORMATION CONTACT: Ed Calimag, *ed.calimag@hhs.gov* or (202) 690–7569. When submitting comments or requesting information, please include the document identifier 4040–0019–30D and project title for reference.

SUPPLEMENTARY INFORMATION: Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Title of the Collections: Project Abstract Summary.

Type of Collection: Revision.

OMB No.: 4040–0019.

Abstract: Project Abstract Summary form provides the Federal grant-making agencies an alternative to the Standard Form 424 data set and form. Project Abstract Summary programs are not required to collect all the data that is required on the SF–424 core data set and form. *Grants.gov* seeks revision without renewal and designation as a Common Form due to updates to the IC. The IC was modified to remove data elements. The IC was renewed with an expiration date of 02/28/2022 and does not require an extension.

ESTIMATED ANNUALIZED BURDEN TABLE

Forms	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
Project Abstract Summary	3,467	1	1	3,467
Total	3,467			3,467

Contact Person: Shalanda A. Bynum, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3206, Bethesda, MD 20892, (301) 755–4355, *bynumsa@csr.nih.gov.*

Name of Committee: Center for Scientific Review Special Emphasis Panel; Dissemination and Implementation Research in Health Review-Overflow.

Date: March 16, 2020.

Time: 8:00 a.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Embassy Suites at the Chevy Chase Pavilion, 4300 Military Road NW, Washington, DC 20015.

Contact Person: John H. Newman, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3222, MSC 7808, Bethesda, MD 20892, (301) 435–0628, *newmanjh@csr.nih.gov.*

Name of Committee: Center for Scientific Review Special Emphasis Panel; PAR 17–190: Maximizing Investigators' Research Award for Early Stage Investigators (R35).

Date: March 16–17, 2020.

Time: 8:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Hyatt Regency Bethesda, One Bethesda Metro Center, Bethesda, MD 20814.

Contact Person: Thomas Beres, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Rm. 5201, MSC 7840, Bethesda, MD 20892, (301) 435–1175, *berestm@mail.nih.gov.*

Name of Committee: Center for Scientific Review Special Emphasis Panel; Fellowships: Oncology.

Date: March 16–17, 2020.

Time: 8:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Bethesda North Marriott Hotel & Conference Center, Montgomery County Conference Center Facility, 5701 Marinelli Road, North Bethesda, MD 20852.

Contact Person: Reigh-Yi Lin, Ph.D., Scientific Review Officer, Center for

Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Rm. 4152, Bethesda, MD 20892, (301) 827–6009, *lin.reigh-yi@nih.gov*.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Small Business: Cancer Diagnostics and Treatments (CDT).

Date: March 16–17, 2020.

Time: 8:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Embassy Suites—Chevy Chase Pavilion, 4300 Military Road NW, Washington, DC 20015.

Contact Person: Zhang-Zhi Hu, MD, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 6186, MSC 7804, Bethesda, MD 20892, (301) 437–8135, *huzhuang@csr.nih.gov*.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Topics in Gastroenterology.

Date: March 16–17, 2020.

Time: 8:30 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Hilton Washington/Rockville, 1750 Rockville Pike, Rockville, MD 20852.

Contact Person: Alexander D. Politis, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3210, MSC 7808, Bethesda, MD 20892, (301) 435–1150, *politisa@csr.nih.gov*.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Small Business: Drug Discovery and Development.

Date: March 16, 2020.

Time: 8:30 a.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Hyatt Regency Bethesda, One Bethesda Metro Center, Bethesda, MD 20814.

Contact Person: Sergei Ruvinov, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4158, MSC 7806, Bethesda, MD 20892, (301) 435–1180, *ruvinser@csr.nih.gov*.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Small Business: Orthopedic, Musculoskeletal, Oral, Skin and Rehabilitation Sciences.

Date: March 16–17, 2020.

Time: 8:30 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Residence Inn Bethesda, 7335 Wisconsin Avenue, Bethesda, MD 20814.

Contact Person: Aftab A. Ansari, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4108, MSC 7814, Bethesda, MD 20892, (301) 237–9931, *ansaria@csr.nih.gov*.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Member Conflict: Neurodevelopment, Myelination, Transport, and Synaptic Plasticity.

Date: March 16, 2020.

Time: 12:00 p.m. to 3:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Rockledge II, 6701 Rockledge Dr., Bethesda, MD 20892 (Telephone Conference Call).

Contact Person: Carol Hamelink, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4192, MSC 7850, Bethesda, MD 20892, (301) 213–9887, *hamelinc@csr.nih.gov*.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG–2019–0754]

National Maritime Security Advisory Committee; Initial Solicitation for Members

AGENCY: Coast Guard, Department of Homeland Security.

ACTION: Request for applications.

SUMMARY: The Coast Guard is requesting applications from persons interested in serving as a member of the National Maritime Security Advisory Committee (''Committee''). This Committee will advise the Secretary of the Department of Homeland Security, via the Commandant of the U.S. Coast Guard, on matters relating to national maritime security, including on enhancing the sharing of information related to cybersecurity risks that may cause a transportation security incident, between relevant Federal agencies and State, local, and tribal governments; relevant public safety and emergency response agencies; relevant law enforcement and security organizations; maritime industry; port owners and operators; and terminal owners and operators. Please read this notice for a description of 21 Committee positions we are seeking to fill.

DATES: Your completed application should reach the Coast Guard on or before April 20, 2020.

ADDRESSES: Applicants should send a cover letter expressing interest in an appointment to the National Maritime Security Advisory Committee and a resume detailing the applicant's experience. We will not accept a biography.

Applications should be submitted via one of the following methods:

- *By Email: ryan.f.owens@uscg.mil* (preferred);
- *By Fax:* 202–372–8428; ATTN: Ryan F. Owens, Alternate Designated Federal Officer; or
- *By Mail:* Mr. Ryan F. Owens, Alternate Designated Federal Officer, Commandant (CG–FAC–1), U.S. Coast Guard Stop 7501, 2703 Martin Luther

King Jr. Avenue SE, Washington, DC 20593–7501.

FOR FURTHER INFORMATION CONTACT: Mr. Ryan Owens, Alternate Designated Federal Officer of the National Maritime Security Advisory Committee; Telephone 202–372–1108; or Email at *ryan.f.owens@uscg.mil.*

SUPPLEMENTARY INFORMATION: The National Maritime Security Advisory Committee is a Federal advisory committee. It will operate under the provisions of the *Federal Advisory Committee Act,* 5 U.S.C., Appendix, the administrative provisions contained in section 601 of the *Frank LoBiondo Coast Guard Authorization Act of 2018 (CGAA18),* Public Law 115–282, 132 Stat. 4192, the *Maritime Transportation Security Act* of *2002* (Pub. L. 107–295, November 25, 2002, as codified in 46 U.S.C. Chapter 701, 46 U.S.C. 70101 *et seq.*), and the provisions of section 15109 of Title 46 of the U.S. Code (46 U.S.C. 15109).

The establishment of the Committee is authorized under *Maritime Transportation Security Act of 2002* as amended by the *Frank LoBiondo Coast Guard Authorization Act of 2018.*

Under 46 U.S.C. 15109, the Committee is to advise the Secretary of Homeland Security on matters relating to national maritime security, including on enhancing the sharing of information related to cybersecurity risks that may cause a transportation security incident, between relevant Federal agencies and—

A. State, local, and tribal governments;

B. relevant public safety and emergency response agencies;

C. relevant law enforcement and security organizations;

D. maritime industry;

E. port owners and operators; and

F. terminal owners and operators.

The Committee is required to hold meetings at least once a year in accordance with 46 U.S.C. 15109(a). We expect the Committee to meet at least twice a year, but it may meet more frequently.

The members listed above are appointed to represent the interests of their respective organizations or associations. They are only considered Special Government Employees, as defined in 18 U.S.C. 202(a), for purposes of (1) 5 U.S.C. 8101–8193; (2) 28 U.S.C. 2671–2680; (3) any other Federal law relating to tort liability; and when they are existing Special Government employees as provided in 46 U.S.C. 15109(e)(2)(B).

The only compensation the members may receive is for travel expenses, including per diem in lieu of subsistence, and/or actual and reasonable expenses incurred in the performance of their direct duties at the Committee.

Under the provisions in 46 U.S.C. 15109(f)(6), if you are appointed as a member of the Committee, your membership term will expire on December 31 of the third full year after the effective date of your appointment. In this initial solicitation for Committee members, we will consider applications for 21 positions:

- Port authorities.
- Facilities owners and operators.
- Terminal owners and operators.
- Vessel owners and operators.
- Maritime labor organizations.
- The academic community.
- State and local governments.
- The maritime industry.

Each member of the Committee must have particular expertise, knowledge, and experience in matters relating to the function of the Committee, which is to advise the Secretary of Homeland Security on the matters described above.

Under 46 U.S.C. 15109(f)(4), its members are required to apply for, obtain, and maintain a government national security clearance at the Secret level. The U.S. Coast Guard will sponsor and assist candidates with this process.

Registered lobbyists are not eligible to serve on Federal Advisory Committees in an individual capacity. See ''*Revised Guidance on Appointment of Lobbyists to Federal Advisory Committees, Boards and Commissions*'' (79 FR 47482, August 13, 2014). Registered lobbyists are ''lobbyists,'' as defined in 2 U.S.C. 1602, who are required by 2 U.S.C. 1603 to register with the Secretary of the Senate and the Clerk of the House of Representatives.

The Department of Homeland Security does not discriminate in selection of Committee members on the basis of race, color, religion, sex, national origin, political affiliation, sexual orientation, gender identity, marital status, disabilities and genetic information, age, membership in an employee organization, or any other non-merit factor. The Department of Homeland Security strives to achieve a widely diverse candidate pool for all of its recruitment selections.

If you are interested in applying to become a member of the Committee, send your cover letter and resume to Mr. Ryan Owens, Alternate Designated Federal Officer of the National Maritime Security Advisory Committee via one of the transmittal methods in the **ADDRESSES** section by the deadline in the **DATES** section of this notice. If you send your application to us via email, we will send you an email confirming receipt of your application.

Dated: January 31, 2020.

David C. Barata,

Captain, U.S. Coast Guard, Director of Inspections and Compliance.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2020–0002; Internal Agency Docket No. FEMA–B–2009]

Proposed Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: Comments are requested on proposed flood hazard determinations, which may include additions or modifications of any Base Flood Elevation (BFE), base flood depth, Special Flood Hazard Area (SFHA) boundary or zone designation, or regulatory floodway on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports for the communities listed in the table below. The purpose of this notice is to seek general information and comment regarding the preliminary FIRM, and where applicable, the FIS report that the Federal Emergency Management Agency (FEMA) has provided to the affected communities. The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP). In addition, the FIRM and FIS report, once effective, will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings.

DATES: Comments are to be submitted on or before May 18, 2020.

ADDRESSES: The Preliminary FIRM, and where applicable, the FIS report for each community are available for inspection at both the online location *https://www.fema.gov/preliminary floodhazarddata* and the respective Community Map Repository address listed in the tables below. Additionally, the current effective FIRM and FIS

report for each community are accessible online through the FEMA Map Service Center at *https://msc.fema.gov* for comparison.

You may submit comments, identified by Docket No. FEMA–B–2009, to Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov.*

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Map Information eXchange (FMIX) online at *https://www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: FEMA proposes to make flood hazard determinations for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These flood hazard determinations are used to meet the floodplain management requirements of the NFIP and are used to calculate the appropriate flood insurance premium rates for new buildings built after the FIRM and FIS report become effective.

The communities affected by the flood hazard determinations are provided in the tables below. Any request for reconsideration of the revised flood hazard information shown on the Preliminary FIRM and FIS report that satisfies the data requirements outlined in 44 CFR 67.6(b) is considered an appeal. Comments unrelated to the flood hazard determinations also will be considered before the FIRM and FIS report become effective.

Use of a Scientific Resolution Panel (SRP) is available to communities in support of the appeal resolution process. SRPs are independent panels of experts in hydrology, hydraulics, and other pertinent sciences established to review conflicting scientific and technical data and provide recommendations for resolution. Use of the SRP only may be exercised after FEMA and local communities have been engaged in a collaborative consultation process for at least 60 days without a mutually acceptable resolution of an appeal. Additional information regarding the SRP process can be found online at *https://www.floodsrp.org/pdfs/srp_overview.pdf.*

The watersheds and/or communities affected are listed in the tables below. The Preliminary FIRM, and where applicable, FIS report for each community are available for inspection at both the online location *https://www.fema.gov/preliminaryfloodhazarddata* and the respective Community Map Repository address listed in the tables. For communities with multiple ongoing Preliminary studies, the studies can be identified by the unique project number and Preliminary FIRM date listed in the tables. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *https://msc.fema.gov* for comparison.

Fish and Wildlife Service

[FWS–R7–ES–2019–N138; FF07CAMM00–FX–ES111607MRG01]

Endangered Species; Marine Mammals; Seismic Survey Design and Impacts to Maternal Polar Bear Dens

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability of a peer-reviewed scientific manuscript and associated model; notice of public webinars; and request for public comments.

SUMMARY: We, the U.S. Fish and Wildlife Service, announce the availability of a peer-reviewed scientific manuscript and associated model regarding seismic survey design and potential impacts to maternal polar bear dens. This manuscript contains information, including a methodology and model that may be used for evaluating the effects of future seismic survey proposals for their potential impacts to maternal polar bear dens. We are also announcing public webinars that will provide an overview of the manuscript and model and respond to questions. We request public comments on the value of the model and the associated methodology described in the peer-viewed scientific manuscript in assisting in the evaluation of the effects of future seismic survey proposals for their potential impacts to maternal polar bear dens.

DATES: Comments will be accepted on or before April 20, 2020.

ADDRESSES: You may obtain a copy of the publication by any of the following methods:

Internet: View or download the document at *https://www.fws.gov/alaska/pages/marine-mammals/polar-bear.*

U.S. mail: Send a request via mail to Marine Mammals Management, U.S. Fish and Wildlife Service, 1011 East Tudor Road, MS 341, Anchorage, Alaska 99503.

Email: Send a request via email to *fw7_ak_marine_mammals@fws.gov.*

FOR FURTHER INFORMATION CONTACT: Marine Mammals Management via the U.S. mail or email address above, by telephone at 1–800–362–5148, or via the Federal Relay Service (FRS) at 1–800–877–8339.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service (Service), announce the availability of the following peer-reviewed scientific manuscript regarding seismic survey design and impacts to maternal polar bear (Ursus maritimus) dens:

Wilson, R.R. and G.M. Durner. Seismic survey design and impacts to maternal polar bear dens.

This manuscript contains scientific information, including a methodology that may be used for evaluating the effect of future seismic survey proposals for their potential impacts to maternal polar bear dens. Polar bears are currently protected by both the Marine Mammal Protection Act (MMPA; 16 U.S.C. 1361 *et seq.*), and the Endangered Species Act (ESA; 16 U.S.C. 1531 *et seq.*). When evaluating applications for incidental take authorization under the MMPA and when conducting section 7 consultations on proposed Federal actions under the ESA, the Service uses the best available scientific data. Typically, the analysis of a proposed action includes consideration of any overlap between the proposed action and marine mammals and threatened and endangered species, available information on the effects of the proposed action on the species and the species' habitat, and measures to avoid, minimize or mitigate impacts. The scientific methodology and model contained in the manuscript, made available here, is one piece of information being evaluated for use in such an analysis.

It is important to note that the specific analytical approach and inputs for any given analysis will be driven by the proposed action or application submitted to the Service. The referenced manuscript includes a model that was developed to analyze the spatial and temporal overlap between a hypothetical terrestrial seismic survey and denning polar bears. The potential use of this model should be of interest to individuals and entities considering or monitoring activities that may affect polar bears.

We will hold two webinars that will provide an overview of the publication and respond to questions, Thursday, March 19, 2020, from 10:00 a.m. to 11:30 a.m. Alaska Standard Time, and Friday, March 20, 2020, from 10:00 a.m. to 11:30 a.m. Alaska Standard Time. Information on electronically accessing the webinars will be posted on the Service's Alaska Region Marine Mammals Management program website at: *https://www.fws.gov/alaska/pages/marine-mammals.* We request public comments on the value of the methodology and model in the peer-reviewed scientific manuscript to assist in evaluating the effects of seismic survey or other proposals for their potential impacts to maternal polar bear dens.

Dated: February 7, 2020.

Gregory E. Siekaniec,

Regional Director, Alaska Region.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[20X.LLAZ921000.L14400000.BJ0000. LXSSA2250000.241A]

Notice of Filing of Plat of Survey; Arizona

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of official filing.

SUMMARY: The plat of survey of the following described land was officially filed in the Bureau of Land Management (BLM), Arizona State Office, Phoenix, Arizona, on the date indicated. The survey announced in this notice is necessary for the management of lands administered by the agency indicated.

ADDRESSES: This plat will be available for inspection in the Arizona State Office, Bureau of Land Management, One North Central Avenue, Suite 800, Phoenix, Arizona, 85004–4427. Protests of the survey should be sent to the Arizona State Director at the above address.

FOR FURTHER INFORMATION CONTACT: Geoffrey Graham, Chief Cadastral Surveyor of Arizona; (602) 417–9558; *ggraham@blm.gov*. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339 to contact the above individual during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION:

The Gila and Salt River Meridian, Arizona

The supplemental plat, in three sheets, showing the segregation of Public Land Order No. 5132 from Tract 48, Township 1 South, Range 13 East, accepted February 11, 2020, and officially filed February 13, 2020, for Group 9117, Arizona.

This plat was prepared at the request of the Bureau of Land Management.

A person or party who wishes to protest against this survey must file a written notice of protest within 30 calendar days from the date of this publication with the Arizona State Director, Bureau of Land Management, stating that they wish to protest.

A statement of reasons for a protest may be filed with the notice of protest to the State Director, or the statement of reasons must be filed with the State Director within 30 days after the protest is filed. Before including your address, or other personal information in your protest, please be aware that your entire protest, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

(Authority: 43 U.S.C. Chap. 3.)

Geoffrey A. Graham,

Chief Cadastral Surveyor of Arizona.

Notice of Availability of the Proposed Four Rivers Field Office Resource Management Plan and Final Environmental Impact Statement, Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: In accordance with the National Environmental Policy Act of 1969, as amended, and the Federal Land Policy and Management Act of 1976, as amended, the Bureau of Land Management (BLM) has prepared a Proposed Resource Management Plan (RMP) and Final Environmental Impact Statement (EIS) for the Four Rivers Field Office (FRFO) and by this notice is announcing its availability.

DATES: Persons or groups with standing to protest the Proposed RMP and Final EIS must submit protests in writing within 30 days of the date that the Environmental Protection Agency publishes its Notice of Availability in the **Federal Register**.

ADDRESSES: The Proposed RMP and Final EIS are available on the BLM ePlanning project website at *http://go.usa.gov/xnsn6* (case sensitive). Click the ''Documents and Report'' link on the left side of the screen to find the electronic version of these materials. Hard copies of the Proposed RMP/Final EIS are also available for public inspection at the Idaho State Office, 1387 South Vinnell Way, Boise ID 83709 and the Boise District Office, 3948 Development Ave., Boise ID 83705.

All protests must be in writing and filed with the BLM Director, either as a hard copy or electronically via the BLM's ePlanning project website listed previously. To submit a protest electronically, go to the ePlanning project website and follow the protest instructions highlighted at the top of the home page. If submitting a protest in hard copy, it must be mailed to one of the following addresses:

Regular Mail: BLM Director (210), Attention: Protest Coordinator, P.O. Box 71383, Washington, D.C. 20024–1383

Overnight Delivery: BLM Director (210), Attention: Protest Coordinator, Attention: Protest Coordinator, 20 M Street SE., Room 2134LM, Washington, D.C. 20003

FOR FURTHER INFORMATION CONTACT: Brent Ralston, Field Manager; telephone 208–384–3300; address 3948 Development Ave, Boise, ID 83705; email *Four_Rivers_RMP@blm.gov*. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339 to contact Mr. Ralston during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or question. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The FRFO encompasses an area in southwestern Idaho extending north of the Snake River from approximately Glenns Ferry in the southeast, west to Weiser, and north to McCall. The planning area includes all public lands within the FRFO located outside of the the Morley Nelson Snake River Birds of Prey National Conservation Area (NCA), which is governed by a separate RMP. The Four Rivers RMP will determine management for approximately 783,000 surface acres and 1,173,150 acres of mineral estate in Ada, Adams, Boise, Camas, Canyon, Elmore, Gem, Owyhee, Payette, Valley, and Washington counties administered by the BLM. Much of the planning area comprises interspersed sections of public, private, State or U.S. Forest Service lands. When approved, the Four Rivers RMP will replace the 1983 Kuna Management Framework Plan, the 1987 Jarbidge RMP, and the 1988 Cascade RMP.

The BLM engaged in public scoping to help identify planning issues that directed the formulation of alternatives and framed the analysis. Issues include managing the scattered BLM-administered land base, balancing increasing public demand with conservation of resources, and balancing resource uses (including energy development). The planning effort also considers socio-economic concerns and special designations including lands

with wilderness characteristics, wild and scenic rivers and Areas of Critical Environmental Concern (ACECs).

The Draft RMP/Draft EIS evaluated four alternatives in detail. Alternative A, the No Action Alternative, continues current management in the existing Land Use Plans (LUP). It does not address issues that were nonexistent or unforeseen when the BLM prepared the original LUPs.

Alternative B protects natural resource values from potential impacts of population growth and increased use and incorporates protective measures for plants and wildlife compared to other alternatives. While some areas emphasize recreation and community development uses, the primary emphases are for conservation and reduction of habitat fragmentation and resource degradation.

Alternative C accommodates increased population growth and use of public lands by emphasizing land disposal for local community expansion, providing economic expansion through extractive and renewable energy resource development and continues to provide recreational opportunities.

Alternative D, the Preferred Alternative in the Draft RMP/Draft EIS, is the Proposed Plan in the Final EIS and emphasizes management of public lands to promote economic development while maintaining natural resource values. The Proposed RMP opens some areas to fluid mineral development, improves opportunities to manage or reduce invasive annual grasses, maintains three ACECs, and improves opportunities for access to public lands. The FRFO Draft RMP/Draft EIS public comment period began on May 24, 2019, and was extended for 30 days at the request of the State of Idaho to September 23, 2019. The BLM conducted four public open house meetings during the public comment period. The BLM considered and incorporated, as appropriate, comments on the Draft RMP/Draft EIS received from the public, State of Idaho, other cooperating agencies and internal BLM review. Public comments resulted in the addition of management actions and clarifying text and the retention of the Boise Front ACEC. These changes do not significantly change the proposed LUP decisions.

Instructions for filing a protest with the Director of the BLM regarding the Proposed RMP and Final EIS may be found online at *https://www.blm.gov/programs/planning-and-nepa/public-participation/filing-a-plan-protest* and at 43 CFR 1610.5–2. All protests must be in writing and mailed to the appropriate address, as set forth in the **ADDRESSES** section or submitted electronically through the BLM ePlanning project website as described above. Protests submitted electronically by any means other than the ePlanning project website protest section will be invalid unless a protest is also submitted in hard copy. Protests submitted by fax will also be invalid unless also submitted either through ePlanning project website protest section or in hard copy.

Before including your phone number, email address, or other personal identifying information in your protest, you should be aware that your entire protest—including your personal identifying information—may be made publicly available at any time. While you can ask us in your protest to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Notice of Availability of the Final Programmatic Environmental Impact Statement for Fuel Breaks in the Great Basin; Idaho, Washington, Oregon, California, Nevada and Utah

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: In accordance with the National Environmental Policy Act of 1969, as amended, the Bureau of Land Management (BLM) has prepared a Final Programmatic Environmental Impact Statement (EIS) for Fuel Breaks in the Great Basin and by this notice is announcing its availability.

DATES: The BLM will not issue a final decision on the proposal for a minimum of 30 days after the date that the Environmental Protection Agency publishes its Notice of Availability (NOA) in the **Federal Register**.

ADDRESSES: Copies of the Final Programmatic EIS for Fuel Breaks in the Great Basin are available for public inspection during regular business hours at 1387 South Vinnell Way, Boise ID 83709. Interested persons may also review the Final Programmatic EIS online at: *https://go.usa.gov/xnQcG*. Additional copies can be made available at the California, Nevada, Oregon/Washington and Utah BLM State Offices upon request.

FOR FURTHER INFORMATION CONTACT: Ammon Wilhelm, telephone 208–373–3824; address BLM Idaho State Office, 1387 South Vinnell Way, Boise ID 83709; email *awilhelm@blm.gov* Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339 to contact the above individual during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: Strategically placed fuel breaks in the Great Basin region would improve firefighter safety and expand opportunities to catch rapidly moving fires, potentially reducing fire size. Fuel breaks should provide greater protection of human life and property, sagebrush communities, and habitat restoration investments. Reducing fire size helps to reduce the expansion of invasive species, such as cheatgrass and medusahead. Fuel breaks are needed due to the increased size and frequency of wildfires throughout the western United States in recent years. From 2009 through 2018 over 13.5 million acres of BLM-administered lands burned within the project area, impacting healthy rangelands, sagebrush communities, and the general productivity of the lands. Larger and more frequent wildfires result in increased risk for injuries and fatalities among wildland firefighters, destruction of private property, degradation and loss of rangelands, loss of recreational opportunities, and habitat loss for a variety of species, including conversion of native habitats to invasive annual grasses. Conversion of rangeland habitats to invasive annual grasslands further impedes rangeland health and productivity by slowing or preventing the recovery of sagebrush ecosystems.

This programmatic environmental impact statement (EIS) evaluates the Bureau of Land Management (BLM) proposal to create and maintain a system of fuel breaks in the Great Basin region. The project area, covering nearly 224 million acres, includes portions of California, Idaho, Nevada, Oregon, Utah, and Washington. The fuel breaks would be placed along a subset of available linear features, such as roads and rights-of-way on BLM-administered lands within sagebrush communities; these

potential treatment areas cover approximately 38 million acres within the project area boundary. The preferred alternative (Alternative D) analyzes a full suite of manual, chemical and mechanical treatments, including prescribed fire, seeding, and targeted grazing, to construct and maintain up to 11,000 miles of fuel breaks, potentially removing or altering vegetation on approximately 667,000 acres and protecting approximately 38 million acres of the sagebrush ecosystem. Fuel break types include green strips (areas planted with low-statured, fire-resistant vegetation), brown strips (areas where all vegetation is removed), and mowed fuel breaks (reduced vegetation height).

The NOA for the Draft Programmatic EIS published on June 21, 2019, initiating a 45-day public comment period. During July 2019, the BLM hosted 12 public comment meetings throughout the six-state project area. Agencies, organizations, and interested parties provided comments on the draft Programmatic EIS via mail, email, and at the public meetings. The BLM received 907 comment form letters and 138 unique comment letters. Comments on the Draft Programmatic EIS received from the public and internal BLM review were considered and incorporated as appropriate into the Final Programmatic EIS. Public comments resulted in the addition of clarifying text, but did not significantly change the alternatives or analysis.

Authority: 40 CFR 1506.6, 40 CFR 1506.10.

John F. Ruhs,

Idaho State Director, Bureau of Land Management.

BILLING CODE 4310–GG–P

DEPARTMENT OF THE INTERIOR

Bureau of Safety and Environmental Enforcement

[Docket ID BSEE–2019–0013; 201E1700D2 ET1SF0000.EAQ000 EEEE500000; OMB Control Number 1014–0026]

Agency Information Collection Activities; Application for Permit To Modify (APM) and Supporting Documentation

AGENCY: Bureau of Safety and Environmental Enforcement, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Bureau of Safety and Environmental Enforcement (BSEE) proposes to renew an information collection.

DATES: Interested persons are invited to submit comments on or before April 20, 2020.

ADDRESSES: Send your comments on this information collection request (ICR) by either of the following methods listed below:

- Electronically go to *http://www.regulations.gov.* In the Search box, enter BSEE–2019–0013 then click search. Follow the instructions to submit public comments and view all related materials. We will post all comments.
- Email *kye.mason@bsee.gov,* fax (703) 787–1546, or mail or hand-carry comments to the Department of the Interior; Bureau of Safety and Environmental Enforcement; Regulations and Standards Branch; ATTN: Nicole Mason; 45600 Woodland Road, Sterling, VA 20166. Please reference OMB Control Number 1014–0026 in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, contact Nicole Mason by email at *kye.mason@bsee.gov* or by telephone at (703) 787–1607.

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995, we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

We are soliciting comments on the proposed ICR that is described below. We are especially interested in public comments addressing the following issues: (1) Is the collection necessary to the proper functions of BSEE; (2) Will this information be processed and used in a timely manner; (3) Is the estimate of burden accurate; (4) How might BSEE enhance the quality, utility, and clarity of the information to be collected; and (5) How might BSEE minimize the burden of this collection on the respondents, including through the use of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: Throughout the regulations at 30 CFR part 250, BSEE requires the submission of Applications for Permit to Modify, and all supporting documentation on form BSEE–0124 that pertain to regulatory requirements of oil, gas, and sulfur operations in the Outer Continental Shelf (OCS) (including the associated forms), and are the subject of this collection. This request also covers any related Notices to Lessees and Operators (NTLs) that BSEE issues to clarify, supplement, or provide additional guidance on some aspects of our regulations.

The BSEE uses the information to ensure safe well control, completion, workover, and decommissioning operations and to protect the human, marine, and coastal environment. Among other things, BSEE specifically uses the information (see the burden table under A.12 to see what specific information BSEE collects) to ensure: The well control, completion, workover, and decommissioning unit (drilling/well operations) is fit for the intended purpose; equipment is maintained in a state of readiness and meets safety standards; each drilling/well operation crew is properly trained and able to promptly perform well-control activities at any time during well operations; compliance with safety standards; and the current regulations will provide for safe and proper field or reservoir development, resource evaluation, conservation, protection of correlative rights, safety, and environmental protection. We also review well records to ascertain whether the operations have encountered hydrocarbons or H2S and to ensure that H2S detection equipment, personnel protective equipment, and training of the crew are adequate for safe operations in zones known to contain H2S and zones where the presence of H2S is unknown.

Title of Collection: 30 CFR part 250, Application for Permit to Modify (APM) and supporting documentation.

OMB Control Number: 1014–0026.

Form Number: BSEE–0124.

Type of Review: Extension of a currently approved collection.

Respondents/Affected Public: Potential respondents are comprised of Federal OCS oil, gas, and sulfur lessees/

operators and holders of pipeline rights-of-way.

Total Estimated Number of Annual Respondents: Not all the potential respondents will submit information at any given time, and some may submit multiple times.

Total Estimated Number of Annual Responses: 12,252.

Estimated Completion Time per Response: Varies from 10 minutes to 154 hours, depending on activity.

Total Estimated Number of Annual Burden Hours: 17,353.

Respondent's Obligation: Responses are mandatory.

Frequency of Collection: On occasion and varies by section.

Total Estimated Annual Nonhour Burden Cost: $6,446,500.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq*).

Amy White,

Acting Chief, Regulations and Standards Branch.

[FR Doc. 2020–03131 Filed 2–14–20; 8:45 am]

BILLING CODE 4310–VH–P

INTERNATIONAL TRADE COMMISSION

Notice of Receipt of Complaint; Solicitation of Comments Relating to the Public Interest

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has received a complaint entitled *Certain Nicotine Pouches and Components Thereof and Methods of Making the Same DN 3434;* the Commission is soliciting comments on any public interest issues raised by the complaint or complainant's filing pursuant to the Commission's Rules of Practice and Procedure.

FOR FURTHER INFORMATION CONTACT: Lisa R. Barton, Secretary to the Commission, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–2000. The public version of the complaint can be accessed on the Commission's Electronic Document Information System (EDIS) at *https://edis.usitc.gov,* and will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–2000.

General information concerning the Commission may also be obtained by accessing its internet server at United States International Trade Commission (USITC) at *https://www.usitc.gov*. The public record for this investigation may be viewed on the Commission's Electronic Document Information System (EDIS) at *https://edis.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission has received a complaint and a submission pursuant to § 210.8(b) of the Commission's Rules of Practice and Procedure filed on behalf of NYZ AB, Swedish Match North America, LLC, Pinkerton Tobacco Co., LP; and wm17 holding GmbH on February 10, 2020. The complaint alleges violations of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain nicotine pouches and components thereof and methods of making the same. The complaint names as respondents: The Art Factory AB of Sweden; Kretek International, Inc. of Moorpark, CA; and DRYFT Sciences, LLC of Moorpark, CA. The complainant requests that the Commission issue a limited exclusion and cease desist orders and impose a bond upon respondents' alleged infringing articles during the 60-day Presidential review period pursuant to 19 U.S.C. 1337(j).

Proposed respondents, other interested parties, and members of the public are invited to file comments on any public interest issues raised by the complaint or § 210.8(b) filing. Comments should address whether issuance of the relief specifically requested by the complainant in this investigation would affect the public health and welfare in the United States, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, or United States consumers.

In particular, the Commission is interested in comments that:

(i) Explain how the articles potentially subject to the requested remedial orders are used in the United States;

(ii) identify any public health, safety, or welfare concerns in the United States relating to the requested remedial orders;

(iii) identify like or directly competitive articles that complainant, its licensees, or third parties make in the United States which could replace the subject articles if they were to be excluded;

(iv) indicate whether complainant, complainant's licensees, and/or third party suppliers have the capacity to replace the volume of articles potentially subject to the requested exclusion order and/or a cease and desist order within a commercially reasonable time; and

(v) explain how the requested remedial orders would impact United States consumers.

Written submissions on the public interest must be filed no later than by close of business, eight calendar days after the date of publication of this notice in the **Federal Register**. There will be further opportunities for comment on the public interest after the issuance of any final initial determination in this investigation. Any written submissions on other issues must also be filed by no later than the close of business, eight calendar days after publication of this notice in the **Federal Register**. Complainant may file replies to any written submissions no later than three calendar days after the date on which any initial submissions were due. Any submissions and replies filed in response to this Notice are limited to five (5) pages in length, inclusive of attachments.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above and submit 8 true paper copies to the Office of the Secretary by noon the next day pursuant to § 210.4(f) of the Commission's Rules of Practice and Procedure (19 CFR 210.4(f)). Submissions should refer to the docket number (''Docket No. 3434'') in a prominent place on the cover page and/or the first page. (*See* Handbook for Electronic Filing Procedures, Electronic Filing Procedures).[1] Persons with questions regarding filing should contact the Secretary (202–205–2000).

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. *See* 19 CFR 201.6. Documents

[1] Handbook for Electronic Filing Procedures: *https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf.*

for which confidential treatment by the Commission is properly sought will be treated accordingly. All information, including confidential business information and documents for which confidential treatment is properly sought, submitted to the Commission for purposes of this Investigation may be disclosed to and used: (i) By the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel,[2] solely for cybersecurity purposes. All nonconfidential written submissions will be available for public inspection at the Office of the Secretary and on EDIS.[3]

This action is taken under the authority of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and of §§ 201.10 and 210.8(c) of the Commission's Rules of Practice and Procedure (19 CFR 201.10, 210.8(c)).

By order of the Commission.

Issued: February 11, 2020.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2020–03085 Filed 2–14–20; 8:45 am]

BILLING CODE 7020–02–P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

[NARA–20–0003; NARA–2020–020]

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice of certain Federal agency requests for records disposition authority (records schedules). We publish notice in the **Federal Register** and on *regulations.gov* for records schedules in which agencies propose to dispose of records they no longer need to conduct agency business. We invite public comments on such records schedules.

DATES: NARA must receive comments by April 3, 2020.

ADDRESSES: You may submit comments by either of the following methods. You must cite the control number, which appears on the records schedule in parentheses after the name of the agency that submitted the schedule.

- *Federal eRulemaking Portal: http://www.regulations.gov.*
- *Mail:* Records Appraisal and Agency Assistance (ACR); National Archives and Records Administration; 8601 Adelphi Road, College Park, MD 20740–6001.

FOR FURTHER INFORMATION CONTACT: Kimberly Keravuori, Regulatory and External Policy Program Manager, about this notice by email at *regulation_comments@nara.gov.* For information on the schedules, contact Records Management Operations by email at *request.schedule@nara.gov,* by mail at the address above, or by phone at 301–837–1799.

SUPPLEMENTARY INFORMATION:

Public Comment Procedures

We are publishing notice of records schedules in which agencies propose to dispose of records they no longer need to conduct agency business. We invite public comments on these records schedules, as required by 44 U.S.C. 3303a(a), and list the schedules at the end of this notice by agency and subdivision requesting disposition authority.

In addition, this notice lists the organizational unit(s) accumulating the records or states that the schedule has agency-wide applicability. It also provides the control number assigned to each schedule, which you will need if you submit comments on that schedule.

We have uploaded the records schedules and accompanying appraisal memoranda to the regulations.gov docket for this notice as ''other'' documents. Each records schedule contains a full description of the records at the file unit level as well as their proposed disposition. The appraisal memorandum for the schedule includes information about the records.

We will post comments, including any personal information and attachments, to the public docket unchanged. Because comments are public, you are responsible for ensuring that you do not include any confidential or other information that you or a third party may not wish to be publicly posted. If you want to submit a comment with confidential information or cannot otherwise use the *regulations.gov* portal, you may contact *request.schedule@nara.gov* for instructions on submitting your comment.

We will consider all comments submitted by the posted deadline and consult as needed with the Federal agency seeking the disposition authority. After considering comments, we will post on *regulations.gov* a ''Consolidated Reply'' summarizing the comments, responding to them, and noting any changes we have made to the proposed records schedule. We will then send the schedule for final approval by the Archivist of the United States. You may elect at *regulations.gov* to receive updates on the docket, including an alert when we post the Consolidated Reply, whether or not you submit a comment. If you have a question, you can submit it as a comment, and can also submit any concerns or comments you would have to a possible response to the question. We will address these items in consolidated replies along with any other comments submitted on that schedule.

We will post schedules on our website in the Records Control Schedule (RCS) Repository, at *https://www.archives.gov/records-mgmt/rcs,* after the Archivist approves them. The RCS contains all schedules approved since 1973.

Background

Each year, Federal agencies create billions of records. To control this accumulation, agency records managers prepare schedules proposing retention periods for records and submit these schedules for NARA's approval. Once approved by NARA, records schedules provide mandatory instructions on what happens to records when no longer needed for current Government business. The records schedules authorize agencies to preserve records of continuing value in the National Archives or to destroy, after a specified period, records lacking continuing administrative, legal, research, or other value. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. Most schedules, however, cover records of only one office or program or a few series of records. Many of these update previously approved schedules, and some include records proposed as permanent.

Agencies may not destroy Federal records without the approval of the Archivist of the United States. The Archivist grants this approval only after thorough consideration of the records' administrative use by the agency of origin, the rights of the Government and of private people directly affected by the

[2] All contract personnel will sign appropriate nondisclosure agreements.

[3] Electronic Document Information System (EDIS): *https://edis.usitc.gov.*

Government's activities, and whether or not the records have historical or other value. Public review and comment on these records schedules is part of the Archivist's consideration process.

Schedules Pending

1. Department of Defense, Defense Counterintelligence and Security Agency, Continuous Evaluation Information System (DAA–0446–2019–0007).
2. National Archives and Records Administration, Research Services, General Records of the Department of State (N2–059–19–001).
3. Office of Personnel Management, Agency-wide, Records of the Office of the Director (DAA–0478–2017–0002).

Laurence Brewer,

Chief Records Officer for the U.S. Government.

BILLING CODE 7515–01–P

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Humanities

Meeting of Humanities Panel

AGENCY: National Endowment for the Humanities; National Foundation on the Arts and the Humanities.

ACTION: Notice of meeting.

SUMMARY: The National Endowment for the Humanities will hold twelve meetings of the Humanities Panel, a federal advisory committee, during March 2020. The purpose of the meetings is for panel review, discussion, evaluation, and recommendation of applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965.

DATES: See **SUPPLEMENTARY INFORMATION** for meeting dates. The meetings will open at 8:30 a.m. and will adjourn by 5:00 p.m. on the dates specified below.

ADDRESSES: The meetings will be held at Constitution Center, 400 7th Street SW, Washington, DC 20506, unless otherwise indicated.

FOR FURTHER INFORMATION CONTACT: Elizabeth Voyatzis, Committee Management Officer, 400 7th Street SW, Room 4060, Washington, DC 20506; (202) 606–8322; *evoyatzis@neh.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. App.), notice is hereby given of the following meetings:

1. Date: March 11, 2020

This meeting will discuss applications on the topics of American History and Literature, for the Scholarly Editions and Translations grant program, submitted to the Division of Research Programs.

2. Date: March 12, 2020

This meeting will discuss applications on the topics of History and Studies of the Americas, for the Collaborative Research grant program, submitted to the Division of Research Programs.

3. Date: March 23, 2020

This meeting will discuss applications on the topics of History and Literature, for the Scholarly Editions and Translations grant program, submitted to the Division of Research Programs.

4. Date: March 23, 2020

This meeting will discuss applications for the Public Humanities Projects: Historic Places (Implementation) grant program, submitted to the Division of Public Programs.

5. Date: March 24, 2020

This meeting will discuss applications on the topic of U.S. History, for the Public Humanities Projects: Exhibitions (Implementation) grant program, submitted to the Division of Public Programs.

6. Date: March 24, 2020

This meeting will discuss applications for the National Digital Newspaper Program, submitted to the Division of Preservation and Access.

7. Date: March 25, 2020

This meeting will discuss applications on the topics of Literature and the Arts, for the Collaborative Research grant program, submitted to the Division of Research Programs.

8. Date: March 26, 2020

This meeting will discuss applications on the topics of Literature and the Arts, for the Collaborative Research grant program, submitted to the Division of Research Programs.

9. Date: March 26, 2020

This meeting will discuss applications on the topic of Cultural History, for Media Projects: Production Grants, submitted to the Division of Public Programs.

10. Date: March 27, 2020

This meeting will discuss applications on the topic of Place-Based History, for the Public Humanities Projects: Exhibitions (Implementation) grant program, submitted to the Division of Public Programs.

11. Date: March 31, 2020

This meeting will discuss applications for the Short Documentaries grant program, submitted to the Division of Public Programs.

12. Date: March 31, 2020

This meeting will discuss applications for Landmarks of American History and Culture Workshops, submitted to the Division of Education Programs.

Because these meetings will include review of personal and/or proprietary financial and commercial information given in confidence to the agency by grant applicants, the meetings will be closed to the public pursuant to sections 552b(c)(4) and 552b(c)(6) of Title 5, U.S.C., as amended. I have made this determination pursuant to the authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings dated April 15, 2016.

Dated: February 11, 2020.

Elizabeth Voyatzis,

Committee Management Officer, National Endowment for the Humanities.

BILLING CODE 7536–01–P

NATIONAL SCIENCE FOUNDATION

Request for Information—Partnerships in Ocean Science and Technology

AGENCY: National Science Foundation.

ACTION: Notice of Request for Information on opportunities and constraints to building and sustaining partnerships in ocean science and technology.

SUMMARY: The National Science Foundation (NSF), on behalf of the Office of Science and Technology Policy (OSTP), requests input from all interested parties on opportunities for and constraints on building and sustaining partnerships in ocean science and technology (S&T). The public input provided in response to this Request for Information (RFI) will inform OSTP as it works with the Council on Environmental Quality (CEQ), Federal agencies, and other stakeholders to identify opportunities to build and sustain partnerships in ocean science and technology.

DATES: Interested persons are invited to submit comments on or before March 19, 2020.

ADDRESSES: Responses should be submitted via email to *oceansummit@ostp.eop.gov.* Include ''Partnerships in Ocean Science and Technology'' in the subject line of the message.

Instructions: Response to this RFI is voluntary. Respondents need not reply to all questions listed. For submissions via email, clearly indicate which questions are being answered. Email attachments will be accepted in plain text, Microsoft Word, or Adobe PDF formats only. Each individual or institution is requested to submit only one response. OSTP may post responses to this RFI, without change, on a Federal website. OSTP, therefore, requests that no business proprietary information, copyrighted information, or personally identifiable information be submitted in response to this RFI. Please note that the U.S. Government will not pay for response preparation, or for the use of any information contained in the response.

FOR FURTHER INFORMATION CONTACT: Deerin Babb-Brott, OSTP, *Deerin_S_Babb-Brott2@ostp.eop.gov,* 202–456–4444.

SUPPLEMENTARY INFORMATION: In 2018, the Trump Administration issued Science and Technology for America's Oceans: A Decadal Vision (Decadal Vision), which identified five goals to advance U.S. ocean S&T in the coming decade, including: (1) Understand the ocean in the earth system; (2) promote economic prosperity; (3) ensure maritime security; (4) safeguard human health; and (5) develop resilient coastal communities. The Decadal Vision also described areas of immediate ocean research and technology opportunities, including (1) fully integrating Big Data approaches in Earth system science; (2) advancing monitoring and predictive modeling capabilities; (3) improving data integration in decision-support tools; (4) supporting ocean exploration and characterization; and (5) supporting ongoing research and technology partnerships.

On November 14, 2019, OSTP and CEQ hosted The White House Summit on Partnerships in Ocean Science and Technology (Ocean S&T Summit). The Ocean S&T Summit brought together over 100 leaders and experts from philanthropy, the private sector, academia, and the Federal government to identify opportunities for S&T partnerships that advance the goals framed by the Decadal Vision. The Ocean S&T Summit addressed the following specific themes: (1) Exploring the Ocean; (2) Conserving Marine Living Resources; (3) Protecting Coastal Health and Safety; (4) Sustaining Ocean Observations; (5) Promoting Food Security; (6) Enabling Ocean Energy; (7) Characterizing Ocean Life; and (8) Leveraging Big Data. A summary of the Ocean S&T Summit is available at: *https://www.whitehouse.gov/wp-content/uploads/2019/11/Ocean-ST-Summit-Readout-Final.pdf.*

OSTP is soliciting public input through this RFI to obtain information from a wide range of stakeholders, including academia, private sector, philanthropy, and other relevant organizations and institutions, in order to inform OSTP and CEQ as they prepare to identify these opportunities and develop recommendations for collaboration across the ocean S&T enterprise.

Questions To Inform Development of the Recommendations

Through this RFI, OSTP seeks responses to the following questions to identify opportunities and inform development of recommendations that will address opportunities and barriers to partnerships in ocean science and technology across and among academia, private industry, philanthropy, and government sectors.

1. Please describe opportunities for cross-sector partnerships and collaborations in ocean S&T where the Federal government's participation or facilitation could advance the development and application of ocean S&T. The term ''partnership'' is defined broadly to include all Federal mechanisms available to engage, collaborate, and exchange resources, among other activities, with non-Federal organizations.

2. Please identify existing effective cross-sector partnerships in ocean S&T and the characteristics that cause them to be successful. Please specify what kinds of institutions (including the Federal government) are involved and describe their roles.

3. Please describe opportunities for the Federal government to strengthen or facilitate existing ocean S&T partnerships in the private, nonprofit, and other sectors. In what specific types of partnerships should they play a larger role and why?

4. Executive Order 13840, titled, *Ocean Policy to Advance the Economic, Security, and Environmental Interests of the United States,* highlights and supports Federal participation in projects conducted under the National Oceanographic Partnership Program (*www.nopp.org*) to maximize the effectiveness of agency investments in ocean research. Please describe opportunities to enhance utilization of the program by both Federal agencies and non-Federal partners.

5. Please describe existing barriers or constraints that limit opportunities for cross-sector partnerships in ocean S&T, including barriers limiting partnerships with the Federal government. Barriers or constraints may include legal authorities, regulatory, policy, cultural, lack of expertise, or other procedural hurdles that limit or prevent partnership opportunities.

Dated: February 11, 2020.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555–01–P

POSTAL SERVICE

Board of Governors; Sunshine Act Meeting

TIME AND DATE: February 7, 2020, at 8:00 a.m.

PLACE: Washington, DC

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Administrative Matters.
2. Strategic Matters.

On February 7, 2020, a majority of the members of the Board of Governors of the United States Postal Service voted unanimously to hold and to close to public observation a special meeting in Washington, DC. The Board determined that no earlier public notice was practicable.

General Counsel Certification: The General Counsel of the United States Postal Service has certified that the meeting may be closed under the Government in the Sunshine Act.

CONTACT PERSON FOR MORE INFORMATION: Michael J. Elston, Secretary of the Board, U.S. Postal Service, 475 L'Enfant Plaza SW, Washington, DC 20260–1000. Telephone: (202) 268–4800.

Michael J. Elston,

Secretary.

BILLING CODE 7710–12–P

RAILROAD RETIREMENT BOARD

Proposed Collection; Comment Request

Summary: In accordance with the requirement of Section 3506 (c)(2)(A) of the Paperwork Reduction Act of 1995 which provides opportunity for public

comment on new or revised data collections, the Railroad Retirement Board (RRB) will publish periodic summaries of proposed data collections.

Comments are invited on: (a) Whether the proposed information collection is necessary for the proper performance of the functions of the agency, including whether the information has practical utility; (b) the accuracy of the RRB's estimate of the burden of the collection of the information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden related to the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

1. Title and purpose of information collection: Placement Service; OMB 3220–0057. Section 12(i) of the Railroad Unemployment Insurance Act (RUIA), authorizes the RRB to establish, maintain, and operate free employment offices to provide claimants for unemployment benefits with job placement opportunities. Section 704(d) of the Regional Railroad Reorganization Act of 1973, as amended, and as extended by the Consolidated Omnibus Budget Reconciliation Act of 1985, required the RRB to maintain and distribute a list of railroad job vacancies, by class and craft, based on information furnished by rail carriers to the RRB. Although the requirement under the law expired effective August 13, 1987, the RRB has continued to obtain this information in keeping with its employment service responsibilities under Section 12(k) of the RUIA. Application procedures for the job placement program are prescribed in 20 CFR 325. The procedures pertaining to the RRB's obtaining and distributing job vacancy reports furnished by rail carriers are described in 20 CFR 346.1.

The RRB currently utilizes four forms to obtain information needed to carry out its job placement responsibilities. Form ES–2, *Central Register Notification,* is used by the RRB to obtain information needed to update a computerized central register of separated and furloughed railroad employees available for employment in the railroad industry. Forms ES–21, *Referral to State Employment Service,* and ES–21c, *Report of State Employment Service Office,* are used by the RRB to provide placement assistance for unemployed railroad employees through arrangements with State Employment Service offices. Form UI–35, Field Office Record of Claimant Interview, is used primarily by the RRB to conduct in-person interviews of claimants for unemployment benefits.

Completion of these forms is required to obtain or maintain a benefit. In addition, the RRB also collects Railroad Job Vacancies information received voluntarily from railroad employers. The RRB no longer offers the Central Register as a basic employment service as of April 2017 and propose to obsolete Form ES–2. The RRB proposes no changes to Forms ES–21 and ES–21c and proposes minor changes to Form UI–35 to remove all reference to the obsolete Central Register and renumber accordingly.

ESTIMATE OF CURRENT ANNUAL RESPONDENT BURDEN

Form No.	Annual responses	Time (minutes)	Burden (hours)
ES–2	3,750	0.25	16
ES–21	80	0.68	0.9
ES–21c	25	1.50	0.6
* UI–35 in person	6,300	7.00	735
* UI–35 by mail	700	10.50	123
Job Vacancies	470	10.00	78
Total	11,325	.....	953

ESTIMATE OF PROPOSED ANNUAL RESPONDENT BURDEN

Form No.	Annual responses	Time (minutes)	Burden (hours)
ES–21	80	1.00	1
ES–21c	25	2.00	1
*UI–35 in person	6,300	7.00	735
*UI–35 by mail	700	11.00	128
Job Vacancies	470	10.00	78
Total	7,575	.....	943

2. Title and purpose of information collection: Certification Regarding Rights to Unemployment Benefits; OMB 3220–0079.

Under Section 4 of the Railroad Unemployment Insurance Act (RUIA), an employee who leaves work voluntarily is disqualified for unemployment benefits unless the employee left work for good cause and is not qualified for unemployment benefits under any other law. RRB Form UI–45, *Claimant's Statement—Voluntary Leaving of Work,* is used by the RRB to obtain the claimant's statement when the claimant, the claimant's employer, or another source indicates that the claimant has voluntarily left work.

Completion of Form UI–45 is required to obtain or retain benefits. One response is received from each respondent. The RRB proposes no changes to Form UI–45.

ESTIMATE OF ANNUAL RESPONDENT BURDEN

Form No.	Annual responses	Time (minutes)	Burden (hours)
UI–45	200	15	50
Total	200		50

3. Title and purpose of information collection: Self-Employment and Substantial Service Questionnaire; OMB 3220–0138.

Section 2 of the Railroad Retirement Act (RRA) provides for payment of annuities to qualified employees and their spouses. In order to receive an age and service annuity, Section 2(e)(3) states that an applicant must stop all railroad work and give up any rights to return to such work. However, applicants are not required to stop nonrailroad work or self-employment.

The RRB considers some work claimed as ''self-employment'' to actually be employment for an employer. Whether the RRB classifies a particular activity as self-employment or as work for an employer depends upon the circumstances of each case. These circumstances are prescribed in 20 CFR 216.

Under the 1988 amendments to the RRA, an applicant is no longer required to stop work for a ''Last Pre-Retirement Nonrailroad Employer'' (LPE). However, Section 2(f)(6) of the RRA requires that a portion of the employee's Tier II benefit and supplemental annuity be deducted for earnings from the ''LPE.''

The ''LPE'' is defined as the last person, company, or institution with whom the employee or spouse applicant was employed concurrently with, or after, the applicant's last railroad employment and before their annuity beginning date. If a spouse never worked for a railroad, the LPE is the last person for whom he or she worked.

The RRB utilizes Form AA–4, *Self-Employment and Substantial Service Questionnaire,* to obtain information needed to determine if the work the applicant claims is self-employment is really self-employment or work for an LPE or railroad service. If the work is self-employment, the questionnaire identifies any month in which the applicant did not perform substantial service. One response is requested of each respondent. Completion is voluntary. However, failure to complete the form could result in the nonpayment of benefits. The RRB proposes to the following changes to Form AA–4:

- Update the officer title and RRB zip code in the Paperwork Reduction Act/ Privacy Act Notices section;
- update the example date in Section 1—General Instructions; and
- update the RRB office hours in Section 7—Certification.

ESTIMATE OF ANNUAL RESPONDENT BURDEN

Form No.	Annual responses	Time (minutes)	Burden (hours)
AA–4 (With assistance)	570	40	380
AA–4 (Without assistance)	30	70	35
Total	600		415

4. Title and purpose of information collection: Withholding Certificate for Railroad Retirement Monthly Annuity Payments; OMB 3220–0149.

The Internal Revenue Code requires that all payers of tax liable private pensions to U.S. citizens or residents: (1) Notify each recipient at least concurrent with initial withholding that the payer is, in fact, withholding benefits for tax liability and that the recipient has the option of electing not to have the payer withhold, or to withhold at a specific rate; (2) withhold benefits for tax purposes (in the absence of the recipient's election not to withhold benefits); and (3) notify all beneficiaries, at least annually, that they have the option to change their withholding status or elect not to have benefits withheld.

The RRB provides Form RRB–W4P, Withholding Certificate for Railroad Retirement Payments, to its annuitants to exercise their withholding options. Completion of the form is required to obtain or retain a benefit. One response is requested of each respondent. The RRB proposes no changes to Form W–4P.

The RRB estimates that 25,000 annuitants utilize Form RRB W–4P annually. The completion time for Form RRB W–4P varies depending on individual circumstances. The estimated average completion time for Form RRB W–4P is 39 minutes for recordkeeping, 24 minutes for learning about the law or the form, and 59 minutes for preparing the form.

5. Title and purpose of information collection: Designation of Contact Officials; 3220–0200 Coordination between railroad employers and the RRB is essential to properly administer the payment of benefits under the Railroad Retirement Act (RRA) and the Railroad Unemployment Insurance Act (RUIA). In order to enhance timely coordination activity, the RRB utilizes Form G–117a, *Designation of Contact Officials.* Form G–117a is used by railroad employers to designate employees who are to act as point of contact with the RRB on a variety of RRA and RUIA-related matters.

Completion is voluntary. One response is requested from each respondent. The RRB proposes no changes to Form G–117a.

ESTIMATE OF ANNUAL RESPONDENT BURDEN

Form No.	Annual responses	Time (minutes)	Burden (hours)
G–117a	100	15	25
Total	100		25

Additional Information or Comments: To request more information or to obtain a copy of the information collection justification, forms, and/or supporting material, contact Kennisha C. Tucker at (312) 469–2591 or *Kennisha.Tucker@rrb.gov*. Comments regarding the information collection should be addressed to Brian Foster, Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois 60611–1275 or emailed to *Brian.Foster@rrb.gov*. Written comments should be received within 60 days of this notice.

Brian D. Foster,

Clearance Officer.

BILLING CODE 7905–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–88164; File No. SR–CBOE–2020–005]

Self-Regulatory Organizations; Cboe Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Fees Schedule in Connection With Migration

February 11, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 28, 2020, Cboe Exchange, Inc. (the ''Exchange'' or ''Cboe Options'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

Cboe Exchange, Inc. (the ''Exchange'' or ''Cboe Options'') proposes to amend its Fees Schedule in connection with migration. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (*http://www.cboe.com/AboutCBOE/CBOELegalRegulatoryHome.aspx*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

In 2016, the Exchange's parent company, Cboe Global Markets, Inc. (formerly named CBOE Holdings, Inc.) (''Cboe Global''), which is also the parent company of Cboe C2 Exchange, Inc. (''C2''), acquired Cboe EDGA Exchange, Inc. (''EDGA''), Cboe EDGX Exchange, Inc. (''EDGX'' or ''EDGX Options''), Cboe BZX Exchange, Inc. (''BZX'' or ''BZX Options''), and Cboe BYX Exchange, Inc. (''BYX'' and, together with Cboe Options, C2, EDGX, EDGA, and BZX, the ''Affiliated Exchanges''). The Cboe Affiliated Exchanges recently aligned certain system functionality, including with respect to connectivity, retaining only intended differences between the Affiliated Exchanges, in the context of a technology migration. The Exchange migrated its trading platform to the same system used by the Affiliated Exchanges, which the Exchange completed on October 7, 2019 (the ''migration''). As a result of this migration, the Exchange's pre-migration connectivity architecture was rendered obsolete, and as such, the Exchange now offers new functionality, including new logical connectivity, and therefore proposes to adopt corresponding fees.[3] In determining the proposed fee changes, the Exchange assessed the impact on market participants to ensure that the proposed fees would not create an undue financial burden on any market participants, including smaller market participants. While the Exchange has no way of predicting with certainty the impact of the proposed changes, the Exchange had anticipated its post-migration connectivity revenue[4] to be approximately 1.75% lower than connectivity revenue pre-migration.[5] In addition to providing a consistent technology offering across the Cboe Affiliated Exchanges, the migration also provided market participants a latency equalized infrastructure, improved system performance, and increased sustained order and quote per second capacity, as discussed more fully below. Accordingly, in connection with the migration and in order to more closely align the Exchange's fee structure with that of its Affiliated Exchanges, the Exchange intends to update and simplify its fee structure with respect to access and connectivity and adopt new access and connectivity fees.[6]

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] As of October 7, 2019, market participants no longer have the ability to connect to the old Exchange architecture.

[4] Connectivity revenue post-migration includes revenue from physical port fees (other than for disaster recovery), Cboe Data Services Port Fee, logical port fees, Trading Permit Fees, Market-Maker EAP Appointment Unit fees, Tier Appointment Surcharges and Floor Broker Trading Surcharges, less the Floor Broker ADV discounts and discounts on BOE Bulk Ports via the Affiliate Volume Plan and the Market-Maker Access Credit program.

[5] The Exchange does not anticipate realizing the projected revenue reduction prior to February 2020, as the Exchange's legacy physical ports will not be decommissioned until January 31, 2020 and firms may still be in the process of transitioning their connectivity. As such, the Exchange believes any changes in revenue until such time are not reflective of the predicted and modeled impact.

[6] The Exchange initially filed the proposed fee changes on October 1, 2019 (SR–CBOE–2019–077). On business date October 2, 2019, the Exchange withdrew that filing and submitted SR–CBOE–2019–082, *See* Securities Exchange Act Release No. 87304 (October 15, 2019), 84 FR 56240, (October 21, 2019) (''Original Filing''). On business date November 29, 2019, Securities Exchange Act Release No. 87727 (December 12, 2019), 84 FR

Continued

Physical Connectivity

A physical port is utilized by a Trading Permit Holder (''TPH'') or non-TPH to connect to the Exchange at the data centers where the Exchange's servers are located. The Exchange currently assesses fees for Network Access Ports for these physical connections to the Exchange. Specifically, TPHs and non-TPHs can elect to connect to Cboe Options' trading system via either a 1 gigabit per second (''Gb'') Network Access Port or a 10 Gb Network Access Port. Pre-migration the Exchange assessed a monthly fee of $1,500 per port for 1 Gb Network Access Ports and a monthly fee of $5,000 per port for 10 Gb Network Access Ports for access to Cboe Options primary system. Through January 31, 2020, Cboe Options market participants will continue to have the ability to connect to Cboe Options' trading system via the current Network Access Ports. As of October 7, 2019, in connection with the migration, TPHs and non-TPHs may alternatively elect to connect to Cboe Options via new latency equalized Physical Ports.[7] The new Physical Ports similarly allow TPHs and non-TPHs the ability to connect to the Exchange at the data center where the Exchange's servers are located and TPHs and non-TPHs have the option to connect via 1 Gb or 10 Gb Physical Ports. As noted above, both the new 1 Gb and 10 Gb Physical Ports provide latency equalization, meaning that each market participant will be afforded the same latency for 1 Gb or 10 Gb Physical Ports in the primary data center to the Exchange's customer-facing switches regardless of location of the market participant's cage[8] in the primary data center relative to the Exchange's servers. Conversely, the legacy Network Access Ports are not latency equalized, meaning the location of a market participant's cage within the data center may affect latency. For example, in the legacy system, a cage located further from the Exchange's servers may experience higher latency than those located closer to the Exchange's servers.[9] As such, the proposed Physical Ports ensure all market participants connected to the Exchange via the new Physical Ports will receive the same respective latency for each port size and ensure that no market participant has a latency advantage over another market participant within the primary data center.[10] Additionally, the new infrastructure utilizes new and faster switches resulting in lower overall latency.

The Exchange proposes to assess the following fees for any physical port, regardless of whether the TPH or non-TPH connects via the current Network Access Ports or the new Physical Ports. Specifically, the Exchange proposes to continue to assess a monthly fee of $1,500 per port for 1 Gb Network Access Ports and new Physical Ports and increase the monthly fee for 10 Gb Network Access Ports and new Physical Ports to $7,000 per port. Physical port fees will be prorated based on the remaining trading days in the calendar month. The proposed fee for 10 Gb Physical Ports is in line with the amounts assessed by other exchanges for similar connections by its Affiliated Exchanges and other Exchanges that utilize the same connectivity infrastructure.[11]

In addition to the benefits resulting from the new Physical Ports providing latency equalization and new switches (*i.e.,* improved latency), TPHs and non-TPHs may be able to reduce their overall physical connectivity fees. Particularly, Network Access Port fees are assessed for unicast (orders, quotes) and multicast (market data) connectivity separately. More specifically, Network Access Ports may only receive one type of connectivity each (thus requiring a market participant to maintain two ports if that market participant desires both types of connectivity). The new Physical Ports however, allow access to both unicast and multicast connectivity with a single physical connection to the Exchange. Therefore, TPHs and non-TPHs that currently purchase two legacy Network Access Ports for the purpose of receiving each type of connectivity now have the option to purchase only one new Physical Port to accommodate their connectivity needs, which may result in reduced costs for physical connectivity.[12]

Cboe Data Services—Port Fees

The Exchange proposes to amend the ''Port Fee'' under the Cboe Data Services (''CDS'') Fees Schedule. Currently, the Port Fee is payable by any Customer[13] that receives data through two types of sources; a direct connection to CDS (''direct connection'') or through a connection to CDS provided by an extranet service provider (''extranet connection''). The Port Fee applies to receipt of any Cboe Options data feed but is only assessed once per data port. The Exchange proposes to amend the monthly CDS Port Fee to provide that it is payable ''per source'' used to receive data, instead of ''per data port''. The Exchange also proposes to increase the fee from $500 per data port/month to $1,000 per data source/month.[14] The

69428, (December 18, 2019) (''Second Proposed Rule Change''). On January 28, 2020 the Exchange withdrew that filing and submitted this filing (''Third Proposed Rule Change'').

[7] As previously noted, market participants will continue to have the option of connecting to Cboe Options via a 1 Gbps or 10 Gbps Network Access Port at the same rates as proposed, respectively.

[8] A market participant's ''cage'' is the cage within the data center that contains a market participant's servers, switches and cabling.

[9] The Exchange equalizes physical connectivity in the data center for its primary system by taking the farthest possible distance that a Cboe market participant cage may exist from the Exchange's customer-facing switches and using that distance as the cable length for any cross-connect.

[10] The Exchange notes that 10 Gb Physical Ports have an 11 microsecond latency advantage over 1 Gb Physical Ports. Other than this difference, there are no other means to receive a latency advantage as compared to another market participant in the new connectivity structure.

[11] *See* Cboe EDGA U.S. Equities Exchange Fee Schedule, Physical Connectivity Fees; Cboe EDGX U.S. Equities Exchange Fee Schedule, Physical Connectivity Fees; Cboe BZX U.S. Equities Exchange Fee Schedule, Physical Connectivity Fees; Cboe BYX U.S. Equities Exchange Fee Schedule, Physical Connectivity Fees; Cboe EDGX Options Exchange Fee Schedule, Physical Connectivity Fees; and Cboe BZX Options Exchange Fee Schedule, Physical Connectivity Fees (collectively, ''Affiliated Exchange Fee Schedules''). *See e.g.,* Nasdaq PHLX and ISE Rules, General Equity and Options Rules, General 8. Phlx and ISE each charge a monthly fee of $2,500 for each 1Gb connection, $10,000 for each 10Gb connection and $15,000 for each 10Gb Ultra connection. *See also* Nasdaq Price List—Trading Connectivity. Nasdaq charges a monthly fee of $7,500 for each 10Gb direct connection to Nasdaq and $2,500 for each direct connection that supports up to 1Gb. *See also* NYSE American Fee Schedule, Section V.B, and Arca Fees and Charges, Co-Location Fees. NYSE American and Arca each charge a monthly fee of $5,000 for each 1Gb circuit, $14,000 for each 10Gb circuit and $22,000 for each 10Gb LX circuit.

[12] The Exchange proposes to eliminate the current Cboe Command Connectivity Charges table in its entirety and create and relocate such fees in a new table in the Fees Schedule that addresses fees for physical connectivity, including fees for the current Network Access Ports, the new Physical Ports and Disaster Recovery (''DR'') Ports. The Exchange notes that it is not proposing any changes with respect to DR Ports other than renaming the DR ports from ''Network Access Ports'' to ''Physical Ports'' to conform to the new Physical Port terminology. The Exchange also notes that subsequent to the initial filings that proposed these fee changes on October 1 and 2, 2019 (SR–CBOE–2019–077 and SR–CBOE–2019–082), the Exchange amended the proposed port fees to waive fees for ports used for PULSe in filing No. SR–CBOE–2019–105. The additions proposed by filing SR–CBOE–2019–105 are double underlined in Exhibit 5A and the deletions are doubled bracketed in Exhibit 5A.

[13] A Customer is any person, company or other entity that, pursuant to a market data agreement with CDS, is entitled to receive data, either directly from CDS or through an authorized redistributor (*i.e.,* a Customer or extranet service provider), whether that data is distributed externally or used internally.

[14] For example, under the pre-migration ''per port'' methodology, if a TPH maintained 4 ports that receive market data, that TPH would be assessed $2,000 per month (*i.e.,* $500 × 4 ports), regardless of how many sources it used to receive data. Under the proposed ''per source'' methodology, if a TPH maintains 4 ports that

Exchange notes the proposed change in assessing the fee (*i.e.,* per source vs per port) and the proposed fee amount are the same as the corresponding fee on its affiliate C2.[15]

In connection with the proposed change, the Exchange also proposes to rename the ''Port Fee'' to ''Direct Data Access Fee''. As the fee will be payable ''per data source'' used to receive data, instead of ''per data port'', the Exchange believes the proposed name is more appropriate and that eliminating the term ''port'' from the fee will eliminate confusion as to how the fee is assessed.

Logical Connectivity

Next, the Exchange proposes to amend its login fees. By way of background, Cboe Options market participants were able to access Cboe Command via either a CMI or a FIX Port, depending on how their systems are configured. Effective October 7, 2019, market participants are no longer able to use CMI and FIX Login IDs. Rather, the Exchange utilizes a variety of logical connectivity ports as further described below. Both a legacy CMI/FIX Login ID and logical port represent a technical port established by the Exchange within the Exchange's trading system for the delivery and/or receipt of trading messages—*i.e.,* orders, accepts, cancels, transactions, etc. Market participants that wish to connect directly to the Exchange can request a number of different types of ports, including ports that support order entry, customizable purge functionality, or the receipt of market data. Market participants can also choose to connect indirectly through a number of different third-party providers, such as another broker-dealer or service bureau that the Exchange permits through specialized access to the Exchange's trading system and that may provide additional services or operate at a lower mutualized cost by providing access to multiple members. In light of the discontinuation of CMI and FIX Login IDs, the Exchange proposes to eliminate the fees associated with the CMI and FIX login IDs and adopt the below pricing for logical connectivity in its place.

Service	Cost per month
Logical Ports (BOE, FIX) 1 to 5.	$750 per port.
Logical Ports (BOE, FIX) >5.	$800 per port.
Logical Ports (Drop)	$750 per port.
BOE Bulk Ports 1 to 5	$1,500 per port.
BOE Bulk Ports 6 to 30 ..	$2,500 per port.
BOE Bulk Ports >30	$3,000 per port.
Purge ports	$850 per port.
GRP Ports	$750/primary (A or C Feed).
Multicast PITCH/Top Spin Server Ports.	$750/set of primary (A or C feed).

The Exchange proposes to provide for each of the logical connectivity fees that new requests will be prorated for the first month of service. Cancellation requests are billed in full month increments as firms are required to pay for the service for the remainder of the month, unless the session is terminated within the first month of service. The Exchange notes that the proration policy is the same on its Affiliated Exchanges.[16]

Logical Ports (BOE, FIX, Drop): The new Logical Ports represent ports established by the Exchange within the Exchange's system for trading purposes. Each Logical Port established is specific to a TPH or non-TPH and grants that TPH or non-TPH the ability to operate a specific application, such as order/quote[17] entry (FIX and BOE Logical Ports) or drop copies (Drop Logical Ports). Similar to CMI and FIX Login IDs, each Logical Port will entitle a firm to submit message traffic of up to specified number of orders per second.[18] The Exchange proposes to assess $750 per port per month for all Drop Logical Ports and also assess $750 per port per month (which is the same amount currently assessed per CMI/FIX Login ID per month), for the first 5 FIX/BOE Logical Ports and thereafter assess $800 per port, per month for each additional FIX/BOE Logical Port. While the proposed ports will be assessed the same monthly fees as current CMI/FIX Login IDs (for the first five logical ports), the proposed logical ports provide for significantly more message traffic as shown below:

	CMI/FIX login Ids		BOE/FIX logical ports
	Quotes	Orders	Quotes/orders
Bandwidth Limit per login	5,000 quotes/3 sec[19]	30 orders/sec	15,000 quotes/orders/3 sec.
Cost	$750 each	$750 each	$750/$800 each.
Cost per Quote/Order Sent @Limit	$0.15 per quote/3 sec	$25.00 per order/sec	$0.05/$0.053 per quote/order/3 sec.

Logical Port fees will be limited to Logical Ports in the Exchange's primary data center and no Logical Port fees will be assessed for redundant secondary data center ports. Each BOE or FIX Logical Port will incur the logical port fee indicated in the table above when used to enter up to 70,000 orders per trading day per logical port as measured on average in a single month. Each incremental usage of up to 70,000 per day per logical port will incur an additional logical port fee of $800 per month. Incremental usage will be determined on a monthly basis based on the average orders per day entered in a single month across all of a market participant's subscribed BOE and FIX Logical Ports. The Exchange believes that the pricing implications of going beyond 70,000 orders per trading day per Logical Port encourage users to mitigate message traffic as necessary. The Exchange notes that the proposed fee of $750 per port is the same amount assessed not only for current CMI and

receive market data, but receives data through only one source (*e.g.,* a direct connection) that TPH would be assessed $1,000 per month (*i.e.,* $1000 x 1 source). If that TPH maintains 4 ports but receives data from both a direct connection and an extranet connection, that TPH would be assessed $2,000 per month (*i.e.,* $1,000 × 2 sources). Similarly, if that TPH maintains 4 ports and receives data from two separate extranet providers, that TPH would be assessed $2,000 per month (*i.e.,* $1,000 × 2).

[15] *See* Cboe C2 Options Exchange Fee Schedule, Cboe Data Services, LLC Fees, Section IV, Systems Fees.

[16] *See* Affiliated Exchange Fee Schedules, Logical Port Fees.

[17] As of October 7, 2019, the definition of quote in Cboe Options Rule 1.1 means a firm bid or offer a Market-Maker (a) submits electronically as an order or bulk message (including to update any bid or offer submitted in a previous order or bulk message) or (b) represents in open outcry on the trading floor.

[18] Login Ids restrict the maximum number of orders and quotes per second in the same way logical ports do, and Users may similarly have multiple logical ports as they may have Trading Permits and/or bandwidth packets to accommodate their order and quote entry needs.

[19] Each Login ID has a bandwidth limit of 80,000 quotes per 3 seconds. However, in order to place such bandwidth onto a single Login ID, a TPH or non-TPH would need to purchase a minimum of 15 Market-Maker Permits or Bandwidth Packets (each Market-Maker Permit and Bandwidth Packet provides 5,000 quotes/3 sec). For purposes of comparing ''quote'' bandwidth, the provided example assumes only 1 Market-Maker Permit or Bandwidth Packet has been purchased.

[20] *See* Cboe BZX Options Exchange Fee Schedule, Options Logical Port Fees.

FIX Login Ids, but also similar ports available on an affiliate exchange.[20]

The Exchange also proposes to provide that the fee for one FIX Logical Port connection to PULSe and one FIX Logical Port connection to Cboe Silexx (for FLEX trading purposes) will be waived per TPH. The Exchange notes that only one FIX Logical Port connection is required to support a firm's access through each of PULSe and Cboe Silexx FLEX.

BOE Bulk Logical Ports: The Exchange also offers BOE Bulk Logical Ports, which provide users with the ability to submit single and bulk order messages to enter, modify, or cancel orders designated as Post Only Orders with a Time-in-Force of Day or GTD with an expiration time on that trading day. While BOE Bulk Ports will be available to all market participants, the Exchange anticipates they will be used primarily by Market-Makers or firms that conduct similar business activity, as the primary purpose of the proposed bulk message functionality is to encourage market-maker quoting on exchanges. As indicated above, BOE Bulk Logical Ports are assessed $1,500 per port, per month for the first 5 BOE Bulk Logical Ports, assessed $2,500 per port, per month thereafter up to 30 ports and thereafter assessed $3,000 per port, per month for each additional BOE Bulk Logical Port. Like CMI and FIX Login IDs, and FIX/BOX Logical Ports, BOE Bulk Ports will also entitle a firm to submit message traffic of up to specified number of quotes/orders per second.[21] The proposed BOE Bulk ports also provide for significantly more message traffic as compared to current CMI/FIX Login IDs, as shown below:

	CMI/FIX login Ids	BOE bulk ports
	Quotes	Quotes[22]
Bandwidth Limit	5,000 quotes/3 sec[23]	225,000 quotes 3 sec.
Cost	$750 each	$1,500/$2,500/$3,000 each.
Cost per Quote/Order Sent @Limit	$0.15 per quote/3 sec	$0.006/$0.011/$0.013 per quote/3 sec.

Each BOE Bulk Logical Port will incur the logical port fee indicated in the table above when used to enter up to 30,000,000 orders per trading day per logical port as measured on average in a single month. Each incremental usage of up to 30,000,000 orders per day per BOE Bulk Logical Port will incur an additional logical port fee of $3,000 per month. Incremental usage will be determined on a monthly basis based on the average orders per day entered in a single month across all of a market participant's subscribed BOE Bulk Logical Ports. The Exchange believes that the pricing implications of going beyond 30,000,000 orders per trading day per BOE Bulk Logical Port encourage users to mitigate message traffic as necessary. The Exchange notes that the proposed BOE Bulk Logical Port fees are similar to the fees assessed for these ports by BZX Options.[24]

Purge Ports: As part of the migration, the Exchange introduced Purge Ports to provide TPHs additional risk management and open order control functionality. Purge ports were designed to assist TPHs, in the management of, and risk control over, their quotes, particularly if the TPH is dealing with a large number of options. Particularly, Purge Ports allow TPHs to submit a cancelation for all open orders, or a subset thereof, across multiple sessions under the same Executing Firm ID (''EFID''). This would allow TPHs to seamlessly avoid unintended executions, while continuing to evaluate the direction of the market. While Purge Ports are available to all market participants, the Exchange anticipates they will be used primarily by Market-Makers or firms that conduct similar business activity and are therefore exposed to a large amount of risk across a number securities. The Exchange notes that market participants are also able to cancel orders through FIX/BOE Logical Ports and as such a dedicated Purge Port is not required nor necessary. Rather, Purge Ports were specially developed as an optional service to further assist firms in effectively managing risk. As indicated in the table above, the Exchange proposes to assess a monthly charge of $850 per Purge Port. The Exchange notes that the proposed fee is in line with the fee assessed by other exchanges, including its Affiliated Exchanges, for Purge Ports.[25]

Multicast PITCH/Top Spin Server and GRP Ports: In connection with the migration, the Exchange also offers optional Multicast PITCH/Top Spin Server (''Spin'') and GRP ports and proposes to assess $750 per month, per port. Spin Ports and GRP Ports are used to request and receive a retransmission of data from the Exchange's Multicast PITCH/Top data feeds. The Exchange's Multicast PITCH/Top data feeds are available from two primary feeds, identified as the ''A feed'' and the ''C feed'', which contain the same information but differ only in the way such feeds are received. The Exchange also offers two redundant feeds, identified as the ''B feed'' and the ''D feed.'' All secondary feed Spin and GRP Ports will be provided for redundancy at no additional cost. The Exchange notes a dedicated Spin and GRP Port is not required nor necessary. Rather, Spin ports enable a market participant to receive a snapshot of the current book quickly in the middle of the trading session without worry of gap request limits and GRP Ports were specially developed to request and receive retransmission of data in the event of missed or dropped message. The Exchange notes that the proposed fee is in line with the fee assessed for the same ports on BZX Options.[26]

Access Credits

The Exchange next proposes to amend its Affiliate Volume Plan (''AVP'') to provide Market-Makers an opportunity to obtain credits on their monthly BOE

[21] The Exchange notes that while technically there is no bandwidth limit per BOE Bulk Port, there may be possible performance degradation at 15,000 messages per second (which is the equivalent of 225,000 quotes/orders per 3 seconds). As such, the Exchange uses the number at which performance may be degraded for purposes of comparison.

[22] *See* Cboe Options Rule 1.1.

[23] Each Login ID has a bandwidth limit of 80,000 quotes per 3 seconds. However, in order to place such bandwidth onto a single Login ID, a TPH or non-TPH would need to purchase a minimum of 15 Market-Maker Permits or Bandwidth Packets (each Market-Maker Permit and Bandwidth Packet provides 5,000 quotes/3 sec). For purposes of comparing ''quote'' bandwidth, the provided example assumes only 1 Market-Maker Permit or Bandwidth Packet has been purchased.

[24] *See* Cboe BZX Options Exchange Fee Schedule, Options Logical Port Fees.

[25] *See e.g.,* Nasdaq ISE Options Pricing Schedule, Section 7(C), Ports and Other Services. *See also* Cboe EDGX Options Exchange Fee Schedule, Options Logical Port Fees; Cboe C2 Options Exchange Fee Schedule, Options Logical Port Fees and Cboe BZX Options Exchange Fee Schedule, Options Logical Port Fees.

[26] *See* Cboe BZX Options Exchange Fee Schedule, Options Logical Port Fees.

Bulk Port Fees.[27] By way of background, under AVP, if a TPH Affiliate [28] or Appointed OFP [29] (collectively, an ''affiliate'') of a Market-Maker qualifies under the Volume Incentive Program (''VIP'') (*i.e.,* achieves VIP Tiers 2–5), that Market-Maker will also qualify for a discount on that Market-Maker's Liquidity Provider (''LP'') Sliding Scale transaction fees and Trading Permit fees. The Exchange proposes to amend AVP to provide that qualifying Market-Makers will receive a discount on Bulk Port fees (instead of Trading Permits) where an affiliate achieves VIP Tiers 4 or 5. As discussed more fully below, the Exchange is amending its Trading Permit structure, such that off-floor Market-Makers no longer need to hold more than one Market-Maker Trading Permit. As such, in place of credits for Trading Permits, the Exchange will provide credits for BOE Bulk Ports.[30] The proposed credits are as follows:

Market Maker affiliate access credit	VIP tier	Percent credit on monthly BOE bulk port fees
Credit Tier	1	0
	2	0
	3	0
	4	15
	5	25

The Exchange believes the proposed change to AVP continues to allow the Exchange to provide TPHs that have both Market-Maker and agency operations reduced Market-Maker costs via the credits, albeit credits on BOE Bulk Port fees instead of Trading Permit fees. AVP also continues to provide incremental incentives for TPHs to strive for the higher tier levels, which provide increasingly higher benefits for satisfying increasingly more stringent criteria.

In addition to the opportunity to receive credits via AVP, the Exchange proposes to provide an additional opportunity for Market-Makers to obtain credits on their monthly BOE Bulk Port fees based on the previous month's make rate percentage. By way of background, the Liquidity Provider Sliding Scale Adjustment Table provides that Taker fees be applied to electronic ''Taker'' volume and a Maker rebate be applied to electronic ''Maker'' volume, in addition to the transaction fees assessed under the Liquidity Provider Sliding Scale.[31] The amount of the Taker fee (or Maker rebate) is determined by the Liquidity Provider's percentage of volume from the previous month that was Maker (''Make Rate'').[32] Market-Makers are given a Performance Tier based on their Make Rate percentage which currently provides adjustments to transaction fees. Thus, the program is designed to attract liquidity from traditional Market-Makers. The Exchange proposes to now also provide BOE Bulk Port fee credits if Market-Makers satisfy the thresholds of certain Performance Tiers. Particularly, the Performance Tier earned will also determine the percentage credit applied to a Market-Maker's monthly BOE Bulk Port fees, as shown below:

Market Maker access credit	Liquidity provider sliding scale adjustment performance tier	Make rate (percent based on prior month)	Percent credit on monthly BOE bulk port fees
Credit Tier	1	0–50	0
	2	Above 50–60	0
	3	Above 60–75	0
	4	Above 75–90	40
	5	Above 90	40

The Exchange believes the proposal mitigates costs incurred by traditional Market-Makers that focus on adding liquidity to the Exchange (as opposed to those that provide and take, or just take). The Exchange lastly notes that both the Market-Maker Affiliate Access Credit under AVP and the Market-Maker Access Credit tied to Performance Tiers can both be earned by a TPH, and these credits will each apply to the total monthly BOE Bulk Port Fees including any incremental BOE Bulk Port fees incurred, before any credits/adjustments have been applied (*i.e.,* an electronic MM can earn a credit from 15% to 65%).

Bandwidth Packets

As described above, post-migration, the Exchange utilizes a variety of logical ports. Part of this functionality is similar to bandwidth packets that were previously available on the Exchange. Bandwidth packets restricted the maximum number of orders and quotes per second. Post-migration, market participants may similarly have multiple Logical Ports and/or BOE Bulk Ports as they may have had bandwidth packets to accommodate their order and quote entry needs. As such, the Exchange proposes to eliminate all of

[27] As noted above, while BOE Bulk Ports will be available to all market participants, the Exchange anticipates they will be used primarily by Market Makers or firms that conduct similar business activity.

[28] For purposes of AVP, ''Affiliate'' is defined as having at least 75% common ownership between the two entities as reflected on each entity's Form BD, Schedule A.

[29] *See* Cboe Options Fees Schedule Footnote 23. Particularly, a Market-Maker may designate an Order Flow Provider (''OFP'') as its ''Appointed OFP'' and an OFP may designate a Market-Maker to be its ''Appointed Market-Maker'' for purposes of qualifying for credits under AVP.

[30] The Exchange notes that Trading Permits currently each include a set bandwidth allowance and 3 logins. Current logins and bandwidth are akin to the proposed logical ports, including BOE Bulk Ports which will primarily be used by Market-Makers.

[31] *See* Cboe Options Exchange Fees Schedule, Liquidity Provider Sliding Scale Adjustment Table.

[32] More specifically, the Make Rate is derived from a Liquidity Provider's electronic volume the previous month in all symbols excluding Underlying Symbol List A using the following formula: (i) The Liquidity Provider's total electronic automatic execution (''auto-ex'') volume (*i.e.,* volume resulting from that Liquidity Provider's resting quotes or single sided quotes/orders that were executed by an incoming order or quote), divided by (ii) the Liquidity Provider's total auto-ex volume (*i.e.,* volume that resulted from the Liquidity Provider's resting quotes/orders and volume that resulted from that LP's quotes/orders that removed liquidity). For example, a TPH's electronic Make volume in September 2019 is 2,500,000 contracts and its total electronic auto-ex volume is 3,000,000 contracts, resulting in a Make Rate of 83% (Performance Tier 4). As such, the TPH would receive a 40% credit on its monthly Bulk Port fees for the month of October 2019. For the month of October 2019, the Exchange will be billing certain incentive programs separately, including the Liquidity Provider Sliding Scale Adjustment Table, for the periods of October 1–October 4 and October 7–October 31 in light of the migration of its billing system. As such, a Market-Maker's Performance Tier for November 2019 will be determined by the Market-Maker's percentage of volume that was Maker from the period of October 7–October 31, 2019.

the current Bandwidth Packet fees.[33] The Exchange believes that the proposed pricing implications of going beyond specified bandwidth described above in the logical connectivity fees section will be able to otherwise mitigate message traffic as necessary.

CAS Servers

By way of background, in order to connect to the legacy Cboe Command, which allowed a TPH to trade on the Cboe Options System, a TPH had to connect via either a CMI or FIX interface (depending on the configuration of the TPH's own systems). For TPHs that connected via a CMI interface, they had to use CMI CAS Servers. In order to ensure that a CAS Server was not overburdened by quoting activity for Market-Makers, the Exchange allotted each Market-Maker a certain number of CASs (in addition to the shared backups) based on the amount of quoting bandwidth that they had. The Exchange no longer uses CAS Servers, post-migration. In light of the elimination of CAS Servers, the Exchange proposes to eliminate the CAS Server allotment table and extra CAS Server fee.

Trading Permit Fees

By way of background, the Exchange may issue different types of Trading Permits and determine the fees for those Trading Permits.[34] Pre-migration, the Exchange issued the following three types of Trading Permits: (1) Market-Maker Trading Permits, which were assessed a monthly fee of $5,000 per permit; (2) Floor Broker Trading Permits, which were assessed a monthly fee of $9,000 per permit; and (3) Electronic Access Permits (''EAPs''), which were assessed a monthly fee of $1,600 per. The Exchange also offered separate Market-Maker and Electronic Access Permits for the Global Trading Hours (''GTH'') session, which were assessed a monthly fee of $1,000 per permit and $500 per permit respectively.[35] For further color, a Market-Maker Trading Permit entitled the holder to act as a Market-Maker, including a Market-Maker trading remotely, DPM, eDPM, or LMM, and also provided an appointment credit of 1.0, a quoting and order entry bandwidth allowance, up to three logins, trading floor access and TPH status.[36] A Floor Broker Trading Permit entitled the holder to act as a Floor Broker, provided an order entry bandwidth allowance, up to 3 logins, trading floor access and TPH status.[37] Lastly, an EAP entitled the holder to electronic access to the Exchange. Holders of EAPs must have been broker-dealers registered with the Exchange in one or more of the following capacities: (a) Clearing TPH, (b) TPH organization approved to transact business with the public, (c) Proprietary TPHs and (d) order service firms. The permit did not provide access to the trading floor. An EAP also provided an order entry bandwidth allowance, up to 3 logins and TPH status.[38] The Exchange also provided an opportunity for TPHs to pay reduced rates for Trading Permits via the Market Maker and Floor Broker Trading Permit Sliding Scale Programs (''TP Sliding Scales''). Particularly, the TP Sliding Scales allowed Market-Makers and Floor Brokers to pay reduced rates for their Trading Permits if they committed in advance to a specific tier that includes a minimum number of eligible Market-Maker and Floor Broker Trading Permits, respectively, for each calendar year.[39]

As noted above, Trading Permits were tied to bandwidth allocation, logins and appointment costs, and as such, TPH organizations may hold multiple Trading Permits of the same type in order to meet their connectivity and appointment cost needs. Post-Migration, bandwidth allocation, logins and appointment costs are no longer tied to a Trading Permit, and as such, the Exchange proposes to modify its Trading Permit structure. Particularly, in connection with the migration, the Exchange adopted separate on-floor and off-floor Trading Permits for Market-Makers and Floor Brokers, adopted a new Clearing TPH Permit, and proposes to modify the corresponding fees and discounts. As was the case pre-migration, the proposed access fees discussed below will continue to be non-refundable and will be assessed through the integrated billing system during the first week of the following month. If a Trading Permit is issued during a calendar month after the first trading day of the month, the access fee for the Trading Permit for that calendar month is prorated based on the remaining trading days in the calendar month. Trading Permits will be renewed automatically for the next month unless the Trading Permit Holder submits written notification to the Membership Services Department by 4 p.m. CT on the second-to-last business day of the prior month to cancel the Trading Permit effective at or prior to the end of the applicable month. Trading Permit Holders will only be assessed a single monthly fee for each type of electronic Trading Permit it holds.

First, TPHs no longer need to hold multiple permits for each type of electronic Trading Permit (*i.e.,* electronic Market-Maker Trading Permits and/or and Electronic Access Permits). Rather, for electronic access to the Exchange, a TPH need only purchase one of the following permit types for each trading function the TPH intends to perform: Market-Maker Electronic Access Permit (''MM EAP'') in order to act as an off-floor Market-Maker and which will continue to be assessed a monthly fee of $5,000, Electronic Access Permit (''EAP'') in order to submit orders electronically to the Exchange[40] and which will be assessed a monthly fee of $3,000, and a Clearing TPH Permit, for TPHs acting solely as a Clearing TPH, which will be assessed a monthly fee of $2,000 (and is more fully described below). For example, a TPH organization that wishes to act as a Market-Maker and also submit orders electronically in a non-Market Maker capacity would have to purchase one MM EAP and one EAP. TPHs will be assessed the monthly fee for each type of Permit once per electronic access capacity.

Next, the Exchange proposes to adopt a new Trading Permit, exclusively for Clearing TPHs that are approved to act solely as a Clearing TPH (as opposed to those that are also approved in a capacity that allows them to submit orders electronically). Currently any TPH that is registered to act as a Clearing TPH must purchase an EAP, whether or not that Clearing TPH acts solely as a Clearing TPH or acts as a Clearing TPH and submits orders electronically. The Exchange proposes to adopt a new Trading Permit, for any TPH that is registered to act solely as Clearing TPH at a discounted rate of $2,000 per month.[41]

[33] *See* Cboe Options Fees Schedule, Bandwidth Packet Fees.

[34] *See* Cboe Options Rules 3.1(a)(iv)–(v).

[35] The fees were waived through September 2019 for the first Market-Maker and Electronic Access GTH Trading Permits.

[36] *See* Cboe Options Fees Schedule.

[37] Id.

[38] Id.

[39] Due to the October 7 migration, the Exchange had amended the TP Sliding Scale Programs to provide that any commitment to Trading Permits under the TP Sliding Scales shall be in place through September 2019, instead of the calendar year. *See* Cboe Options Fees Schedule, Footnotes 24 and 25.

[40] EAPs may be purchased by TPHs that both clear transactions for other TPHs (*i.e.,* a ''Clearing TPH'') and submit orders electronically.

[41] Cboe Option Rules provides the Exchange authority to issue different types of Trading Permits which allows holders, among other things, to act in one or more trading functions authorized by the Rules. *See* Cboe Options Rule 3.1(a)(iv). The Exchange notes that currently 17 out of 38 Clearing TPHs are acting solely as a Clearing TPH on the Exchange.

Additionally, the Exchange proposes to eliminate its fees for Global Trading Hours Trading Permits. Particularly, the Exchange proposes to provide that any Market-Maker EAP, EAP and Clearing TPH Permit provides access (at no additional cost) to the GTH session.[42] Additionally, the Exchange proposes to amend Footnote 37 of the Fees Schedule regarding GTH in connection with the migration. Currently Footnote 37 provides that separate access permits and connectivity is needed for the GTH session. The Exchange proposes to eliminate this language as that is no longer the case post-migration (*i.e.,* an electronic Trading Permits will grant access to both sessions and physical and logical ports may be used in both sessions, eliminating the need to purchase separate connectivity). The Exchange also notes that in connection with migration, the Book used during Regular Trading Hours (''RTH'') will be the same Book used during GTH (as compared to pre-migration where the Exchange maintained separate Books for each session). The Exchange therefore also proposes to eliminate language in Footnote 37 stating that GTH is a segregated trading session and that there is no market interaction between the two sessions.

The Exchange next proposes to adopt MM EAP Appointment fees. By way of background, a registered Market-Maker may currently create a Virtual Trading Crowd (''VTC'') Appointment, which confers the right to quote electronically in an appropriate number of classes selected from ''tiers'' that have been structured according to trading volume statistics, except for the AA tier.[43] Each Trading Permit historically held by a Market-Maker had an appointment credit of 1.0. A Market-Maker could select for each Trading Permit the Market-Maker held any combination of classes whose aggregate appointment cost did not exceed 1.0. A Market-Maker could not hold a combination of appointments whose aggregate appointment cost was greater than the number of Trading Permits that Market-Maker held.[44]

As discussed, post-migration, bandwidth allocation, logins and appointment costs are no longer tied to a single Trading Permit and therefore TPHs no longer need to have multiple permits for each type of electronic Trading Permit. Market-Makers must still select class appointments in the classes they seek to make markets electronically.[45] Particularly, a Market-Maker firm will only be required to have one permit and will thereafter be charged for one or more ''Appointment Units'' (which will scale from 1 ''unit'' to more than 5 ''units''), depending on which classes they elect appointments in. Appointment Units will replace the standard 1.0 appointment cost, but function in the same manner. Appointment weights (formerly known as ''appointment costs'') for each appointed class will be set forth in Cboe Options Rule 5.50(g) and will be summed for each Market-Maker in order to determine the total appointment units, to which fees will be assessed. This was the manner in which the tier costs per class appointment were summed to meet the 1.0 appointment cost, the only difference being that if a Market-Maker exceeds this ''unit'', then their fees will be assessed under the ''unit'' that corresponds to the total of their appointment weights, as opposed to holding another Trading Permit because it exceeded the 1.0 ''unit''. Particularly, the Exchange proposes to adopt a new MM EAP Appointment Sliding Scale. Appointment Units for each assigned class will be aggregated for each Market-Maker and Market-Maker affiliate. If the sum of appointments is a fractional amount, the total will be rounded up to the next highest whole Appointment Unit. The following lists the progressive monthly fees for Appointment Units:[46]

Market-maker EAP appointments	Quantity	Monthly fees (per unit)
Appointment Units.	1	$0
	2	6,000
	3 to 5	4,000
	>5	3,100

As noted above, upon migration the Exchange required separate Trading Permits for on-floor and off-floor activity. As such, the Exchange proposes to maintain a Floor Broker Trading Permit and adopt a new Market-Maker Floor Permit for on-floor Market-Makers. In addition, RUT, SPX, and VIX Tier Appointment fees will be charged separately for Permit, as discussed more fully below.

As briefly described above, the Exchange currently maintains TP Sliding Scales, which allow Market-Makers and Floor Brokers to pay reduced rates for their Trading Permits if they commit in advance to a specific tier that includes a minimum number of eligible Market-Maker and Floor Broker Trading Permits, respectively, for each calendar year. The Exchange proposes to eliminate the current TP Sliding Scales, including the requirement to commit to a specific tier, and replace it with new TP Sliding Scales as follows:[47]

Floor TPH permits	Current permit qty	Current monthly fee (per permit)	Proposed permit qty	Proposed monthly fee (per permit)
Market-Maker Floor Permit	1–10	$5,000	1	$6,000
	11–20	3,700	2 to 5	4,500
	21 or more	1,800	6 to 10	3,500
			>10	2,000
Floor Broker Permit	1	9,000	1	7,500
	2–5	5,000	2 to 3	5,700
	6 or more	3,000	4 to 5	4,500
			>5	3,200

[42] The Exchange notes that Clearing TPHs must be properly authorized by the Options Clearing Corporation (''OCC'') to operate during the Global Trading Hours session and all TPHs must have a Letter of Guarantee to participate in the GTH session (as is the case today).

[43] *See* Cboe Options Rule 5.50 (Appointment of Market-Makers).

[44] For example, if a Market-Maker selected a combination of appointments that has an aggregate appointment cost of 2.5, that Market-Maker must hold at least 3 Market-Maker Trading Permits.

[45] *See* Cboe Options Rule 5.50(a).

[46] For example, if a Market-Maker's total appointment costs amount to 3.5 unites, the Market-Maker will be assessed a total monthly fee of $14,000 (1 appointment unit at $0, 1 appointment unit at $6,000 and 2 appointment units at $4,000) as and for appointment fees and $5,000 for a Market-Maker Trading Permit, for a total monthly sum of $19,000, where a Market-Maker currently (*i.e.,* prior to migration) with a total appointment cost of 3.5 would need to hold 4 Trading Permits and would therefore be assessed a monthly fee of $20,000.

[47] In light of the proposed change to eliminate the TP Sliding Scale, the Exchange proposes to eliminate Footnote 24 in its entirety.

Floor Broker ADV Discount

Footnote 25, which governs rebates on Floor Broker Trading Permits, currently provides that any Floor Broker that executes a certain average of customer or professional customer/voluntary customer (collectively ''customer'') open-outcry contracts per day over the course of a calendar month in all underlying symbols excluding Underlying Symbol List A (except RLG, RLV, RUI, and UKXM), DJX, XSP, and subcabinet trades (''Qualifying Symbols''), will receive a rebate on that TPH's Floor Broker Trading Permit Fees. Specifically, any Floor Broker Trading Permit Holder that executes an average of 15,000 customer (''C'' origin code) and/or professional customer and voluntary customer (''W'' origin code) open-outcry contracts per day over the course of a calendar month in Qualifying Symbols will receive a rebate of $9,000 on that TPH's Floor Broker Trading Permit fees. Additionally, any Floor Broker that executes an average of 25,000 customer open-outcry contracts per day over the course of a calendar month in Qualifying Symbols will receive a rebate of $14,000 on that TPH's Floor Broker Trading Permit fees. The Exchange proposes to maintain, but modify, its discount for Floor Broker Trading Permit fees. First, the measurement criteria to qualify for a rebate will be modified to only include customer (''C'' origin code) open-outcry contracts executed per day over the course of a calendar month in all underlying symbols, while the rebate amount will be modified to be a percentage of the TPH's Floor Broker Permit total costs, instead of a straight rebate.[48] The criteria and corresponding percentage rebates are noted below.[49]

Floor broker ADV discount tier	ADV	Floor broker permit rebate
1	0 to 99,999	0
2	100,000 to 174,999	15
3	>174,999	25

Next, the Exchange proposes to modify its SPX, VIX and RUT Tier Appointment Fees. Currently, these fees are assessed to any Market-Maker TPH that either (i) has the respective SPX, VIX or RUT appointment at any time during a calendar month and trades a specified number of contracts or (ii) trades a specified number of contracts in open outcry during a calendar month. More specifically, the Fees Schedule provides that the $3,000 per month SPX Tier Appointment is assessed to any Market-Maker Trading Permit Holder that either (i) has an SPX Tier Appointment at any time during a calendar month and trades at least 100 SPX contracts while that appointment is active or (ii) conducts any open outcry transaction in SPX or SPX Weeklys at any time during the month. The $2,000 per month VIX Tier Appointment is assessed to any Market-Maker Trading Permit Holder that either (i) has an SPX Tier Appointment at any time during a calendar month and trades at least 100 VIX contracts while that appointment is active or (ii) conducts at least 1000 open outcry transaction in VIX at any time during the month. Lastly, the $1,000 RUT Tier Appointment is assessed to any Market-Maker Trading Permit Holder that either (i) has an RUT Tier Appointment at any time during a calendar month and trades at least 100 RUT contracts while that appointment is active or (ii) conducts at least 1000 open outcry transaction in RUT at any time during the month.

Because the Exchange is separating Market-Maker Trading Permits for electronic and open-outcry market-making, the Exchange will be assessing separate Tier Appointment Fees for each type of Market-Maker Trading Permit. The Exchange proposes that a MM EAP will be assessed the Tier Appointment Fee whenever the Market-Maker executes the corresponding specified number of contracts, if any. The Exchange also proposes to modify the threshold number of contracts a Market-Maker must execute in a month to trigger the fee for SPX, VIX and RUT. Particularly, for SPX, the Exchange proposes to eliminate the 100 contract threshold for electronic SPX executions.[50] The Exchange notes that historically, all TPHs that trade SPX electronically executed more than 100 contracts electronically each month (*i.e.,* no TPH electronically traded between 1 and 100 contracts of SPX). As no TPH would currently be negatively impacted by this change, the Exchange proposes to eliminate the threshold for SPX and align the electronic SPX Tier Appointment Fee with that of the floor SPX Tier Appointment Fee, which is not subject to any executed volume threshold. For the VIX and RUT Tier appointments, the Exchange proposes to increase the threshold from 100 contracts a month to 1,000 contracts a month. The Exchange notes the Tier Appointment Fee amounts are not changing.[51] In connection with the proposed changes, the Exchange proposes to relocate the Tier Appointment Fees to a new table and eliminate the language in the current respective notes sections of each Tier Appointment Fee as it is no longer necessary.

Trading Permit Holder Regulatory Fee

The Fees Schedule provides for a Trading Permit Holder Regulatory Fee of $90 per month, per RTH Trading Permit, applicable to all TPHs, which fee helps more closely cover the costs of regulating all TPHs and performing regulatory responsibilities. In light of the changes to the Exchange's Trading Permit structure, the Exchange proposes to eliminate the TPH Regulatory Fee. The Exchange notes that there is no regulatory requirement to maintain this fee.

[48] As is the case today, the Floor Broker ADV Discount will be available for all Floor Broker Trading Permits held by affiliated Trading Permit Holders and TPH organizations.

[49] In light of the proposal to eliminate the TP Sliding Scales and the Floor Broker rebates currently set forth under Footnote 25, the Exchange proposes to eliminate Footnote 25 in its entirety.

[50] The Exchange notes that subsequent to the Original Filing that proposed these changes on October 1 and 2, 2019 (SR–CBOE–2019–077 and SR–CBOE–2019–082), and subsequent to the Second Proposed Rule Change filing that proposed these changes on November 29, 2019 (SR–CBOE–2019–111), the Exchange amended the proposed Market-Maker Tier Appointment fees to provide that the SPX Tier Appointment Fee will be assessed to any Market-Maker EAP that executes at least 1,000 contracts in SPX (including SPXW) excluding contracts executed during the opening rotation on the final settlement date of VIX options and futures with the expiration used in the VIX settlement calculation in filing No. SR–CBOE–2019–124. The additions proposed by filing SR–CBOE–2019–124 are double underlined in Exhibit 5A and the deletions are doubled bracketed in Exhibit 5A.

[51] Floor Broker Trading Surcharges for SPX/SPXW and VIX are also not changing. The Exchange however, is creating a new table for Floor Broker Trading Surcharges and relocating such fees in the Fees Schedule in connection with the proposal to eliminate fees currently set forth in the ''Trading Permit and Tier Appointment Fees'' Table.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[52] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [53] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with Section 6(b)(4) of the Act,[54] which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Trading Permit Holders and other persons using its facilities. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [55] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange first stresses that the proposed changes were not designed with the objective to generate an overall increase in access fee revenue, as demonstrated by the anticipated loss of revenue discussed above. Rather, the proposed changes were prompted by the Exchange's technology migration and the adoption of a new (and improved) connectivity infrastructure, rendering the pre-migration structure obsolete. Such changes accordingly necessitated an overhaul of the Exchange's previous access fee structure and corresponding fees. Moreover, the proposed changes more closely aligns the Exchange's access fees to those of its Affiliated Exchanges, and reasonably so, as the Affiliated Exchanges offer substantially similar connectivity and functionality and are on the same platform that the Exchange has now migrated to.

The Exchange also notes that it operates in a highly competitive environment. Indeed, there are currently 16 registered options exchanges that trade options. Based on publicly available information, no single options exchange has more than 23% of the market share.[56] Further, low barriers to entry mean that new exchanges may rapidly and inexpensively enter the market and offer additional substitute platforms to further compete with the Exchange. There is also no regulatory requirement that any market participant connect to any one options exchange, that any market participant connect at a particular connection speed or act in a particular capacity on the Exchange, or trade any particular product offered on an exchange. Moreover, membership is not a requirement to participate on the Exchange. Indeed, the Exchange is unaware of any one options exchange whose membership includes every registered broker-dealer.[57] The rule structure for options exchanges are, in fact, fundamentally different from those of equities exchanges. In particular, options market participants are not forced to connect to (and purchase market data from) all options exchanges. For example, there are many order types that are available in the equities markets that are not utilized in the options markets, which relate to mid-point pricing and pegged pricing which require connection to the SIPs and each of the equities exchanges in order to properly execute those orders in compliance with best execution obligations. Additionally, in the options markets, the linkage routing and trade through protection are handled by the exchanges, not by the individual members. Thus not connecting to an options exchange or disconnecting from an options exchange does not potentially subject a broker-dealer to violate order protection requirements. Gone are the days when the retail brokerage firms (the Fidelity's, the Schwab's, the eTrade's) were members of the options exchanges—they are not members of the Exchange or its affiliates, they do not purchase connectivity to the Exchange, and they do not purchase market data from the Exchange. The Exchange is also not aware of any reason why any particular market participant could not simply drop its connections and cease being a TPH of the Exchange if the Exchange were to establish ''unreasonable'' and uncompetitive price increases for its connectivity alternatives. Indeed, a number of firms currently do not participate on the Exchange, or participate on the Exchange though sponsored access arrangements rather than by becoming a member.

Additionally, the Exchange notes that non-TPHs such as Service Bureaus and Extranets resell Cboe Options connectivity.[58] This indirect connectivity is another viable alternative that is already being used by non-TPHs, which further constrains the price that the Exchange is able to charge for connectivity to its Exchange. Accordingly, in the event that a market participant views one exchange's direct connectivity and access fees as more or less attractive than the competition, they can choose to connect to that exchange indirectly or may choose not to connect to that exchange and connect instead to one or more of the other 15 options markets. For example, two TPHs that connected directly to the Exchange pre-migration, now connect indirectly via an extranet provider. The Exchange notes that it has not received any comments or evidence to suggest the two TPHs that transitioned from direct connections to an indirect connections post-migration were the result of an undue financial burden resulting from the proposed fee changes. Rather, the Exchange believes the transitions demonstrate that indirect connectivity is in fact a viable option for market participants, therefore reflecting a competitive environment.

Additionally, pre-migration, in August 2019, the Exchange had 97 members (TPH organizations), of which nearly half connected indirectly to the Exchange. Similarly, in December 2019, the Exchange had 97 members, of which nearly half of the participants connected indirectly to the Exchange. More specifically, in December 2019, 47 TPHs connected directly to the Exchange and accounted for approximately 66% of the Exchange's volume, 46 TPHs connected indirectly to the Exchange and accounted for approximately 29% of the Exchange's volume and 4 TPHs utilized

[56] *See* Cboe Global Markets U.S. Options Market Volume Summary (January 27, 2020), available at *https://markets.cboe.com/us/options/market_statistics/.*

[57] The Exchange further notes that even the number of members between the Exchange and its 3 other options exchange affiliates vary.

[58] Prior to migration, there were 13 firms that resold Cboe Options connectivity. Post-migration, the Exchange anticipated that there would be 19 firms that resell Cboe Options connectivity (both physical and logical) and currently there are 15 firms that resell Cboe Options connectivity. The Exchange does not receive any connectivity revenue when connectivity is resold by a third-party, which often is resold to multiple customers, some of whom are agency broker-dealers that have numerous customers of their own. The Exchange does not have specific knowledge as to what latency a market participant may experience using an indirect connection versus a direct connection and notes it may vary by the service provided by the extranet provider and vary between extranet providers. The Exchange believes however, that there are extranet providers able to provide connections with a latency that is comparable to latency experienced using a direct connection.

both direct and indirect connections and accounted for approximately 5% of the Exchange's volume. In December 2019, TPHs that connected directly to the Exchange purchased a collective 179 physical ports (including legacy physical ports), 144 of which were 10 Gb ports and 35 of which were 1 Gb ports.[59] The Exchange notes that of those market participants that do connect to the Exchange, it is the individual needs of each market participant that determine the amount and type of Trading Permits and physical and logical connections to the Exchange.[60] With respect to physical connectivity, many TPHs were able to purchase small quantities of physical ports. For example, approximately 36% of TPHs that connected directly to the Exchange purchased only one to two 1 Gb ports, approximately 40% purchased only one to two 10 Gb ports, and approximately 40% had purchased a combined total of one to two ports (for both 1 Gb and 10 Gb). Further, no TPHs that connected directly to the Exchange had more than five 1 Gb ports, and only 8.5% of TPHs that connected directly to the Exchange had between six and ten 10 GB ports and only 8.5% had between ten and fourteen 10 Gb ports. There were also a combined total of 41 ports used for indirect connectivity (twenty-one 1 Gb ports and twenty 10 Gb ports).[61] The Exchange notes that all types of members connected indirectly to the Exchange including Clearing firms, Floor Brokers, order flow providers, and on-floor and off-floor Market-Makers, further reflecting the fact that each type of market participant has the option to participate on an exchange without direct connectivity. Accordingly, market participants choose if and how to connect to a particular exchange and because it is a choice, the Exchange must set reasonable connectivity pricing, otherwise prospective members would not connect and existing members would disconnect or connect through a third-party reseller of connectivity.

Moreover, the Exchange notes that the Commission itself has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Particularly, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [62] The number of available exchanges to connect to ensures increased competition in the marketplace, and constrains the ability of exchanges to charge supracompetitive fees for access to its market. The Exchange is also not aware of any evidence that has been offered or demonstrated that a market share of approximately 23% provides the Exchange with anti-competitive pricing power. As discussed, if an exchange sets too high of a fee for connectivity and/or market data services for its relevant marketplace, market participants can choose to disconnect from the Exchange.

The Exchange also believes that competition in the marketplace constrains the ability of exchanges to charge supracompetitive fees for access to its market, even if such market, like the Exchange, offers proprietary products exclusive to that market. Notably, just as there is no regulatory requirement to become a member of any one options exchange, there is also no regulatory requirement for any market participant to trade any particular product, nor is there any requirement that any Exchange create or indefinitely maintain any particular product.[63] The Exchange also highlights that market participants may trade an Exchange's proprietary products through a third-party without directly or indirectly connecting to the Exchange. Additionally, market participants may trade any options product, including proprietary products, in the Over-the-Counter (OTC) markets. Market participants may also access other exchanges to trade other similar or competing proprietary or multi-listed products. Alternative products to the Exchange's proprietary products may include other options products, including options on ETFs or options futures, as well as particular ETFs or futures. For example, singly-listed SPX options may compete with the following products traded on other markets: Multiply-listed SPY options (options on the ETF), E-mini S&P 500 Options (options on futures), and E-Mini S&P 500 futures (futures on index). Other options exchanges are also not precluded from creating new proprietary products that may achieve similar objectives to (and therefore compete with) the Exchange's existing proprietary products. Indeed, even though exclusively-listed proprietary products may not be offered by competitors, a competitor could create similar products if demand were adequate. In connection with a recently proposed amendment to the National Market System Plan Governing the Consolidated Audit Trail (''CAT NMS Plan''),[64] the Commission discussed the existence of competition in the marketplace generally, and particularly for exchanges with unique business models. Specifically, the Commission contemplated the possibility of a forced exit by an exchange as a result of a proposed amendment that could reduce the amount of CAT funding a participant could recover if certain implementation milestones were missed. The Commission acknowledged that, even if an exchange were to exit the marketplace due to its proposed fee-related change, it would not significantly impact competition in the market for exchange trading services because these markets are served by multiple competitors.[65] The Commission explicitly stated that ''[c]onsequently, demand for these services in the event of the exit of a competitor is likely to be swiftly met by existing competitors.'' [66] The Commission further recognized that while some exchanges may have a unique business model that is not currently offered by competitors, a competitor could create similar business models if demand were adequate, and if they did not do so, the Commission believes it would be likely that new entrants would do so if the exchange

[59] Of the 4 TPHs that connected both directly and indirectly to the Exchange, 1 TPH had two 1 Gb Ports and the remaining 3 TPHs had a combined total of six 10 Gb ports.

[60] To assist market participants that are connected or considering connecting to the Exchange, the Exchange provides detailed information and specifications about its available connectivity alternatives in the Cboe C1 Options Exchange Connectivity Manual, as well as the various technical specifications. *See http://markets.cboe.com/us/options/support/technical/.*

[61] The Exchange notes that it does not know how many, and which kind of, connections each TPH that indirectly connects to the Exchange has.

[62] *See* Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005) (''Regulation NMS Adopting Release'').

[63] If an option class is open for trading on another national securities exchange, the Exchange may delist such option class immediately. For proprietary products, the Exchange may determine to not open for trading any additional series in that option class; may restrict series with open interest to closing transactions, provided that, opening transactions by Market-Makers executed to accommodate closing transactions of other market participants and opening transactions by TPH organizations to facilitate the closing transactions of public customers executed as crosses pursuant to and in accordance with Rule 6.74(b) or (d) may be permitted; and may delist the option class when all series within that class have expired. *See* Cboe Rule 4.4, Interpretations and Policies .11.

[64] *See* Securities Exchange Act Release No. 86901 (September 9, 2019), 84 FR 48458 (September 13, 2019) (File No. S7–13–19).

[65] *Id.*

[66] *Id.*

with that unique business model was otherwise profitable.[67] Similarly, although the Exchange may have proprietary products not offered by other competitors, not unlike unique business models, a competitor could create similar products to an existing proprietary product if demand were adequate. As such, the Exchange is still very much subject to competition and does not possess anti-competitive pricing power, even with its offering of proprietary products. Rather, the Exchange must still set reasonable connectivity pricing, otherwise prospective members would not connect, and existing members would disconnect or connect through a third-party reseller of connectivity, regardless of what products its offers.

For all the reasons discussed above and in this filing, the Exchange believes its proposed fees are reasonable as the Exchange was subject to significant competitive forces in setting its proposed fees. In addition, the Exchange believes its proposed fees are reasonable in light of the numerous benefits the new connectivity infrastructure provides market participants. As described, the post-migration connectivity architecture provides for a latency equalized infrastructure, improved system performance, and increased sustained order and quote per second capacity. As such, even where a fee for a particular type or kind of connectivity may be higher than it was to its pre-migration equivalent, such increase is reasonable given the increased benefits market participants are getting for a similar or modestly higher price. The Exchange further believes that the reasonableness of its proposed connectivity fees is demonstrated by the very fact that such fees are in line with, and in some cases lower than, the costs of connectivity at other Exchanges,[68] including its own affiliated exchanges which have the same connectivity infrastructure the Exchange has migrated to.[69]

Furthermore, in determining the proposed fee changes discussed above, the Exchange reviewed the current competitive landscape, considered the fees historically paid by market participants for connectivity to the pre-migration system, and also assessed the impact on market participants to ensure that the proposed fees would not create an undue financial burden on any market participants, including smaller market participants. Indeed, the Exchange received no comments from any TPH suggesting they were unduly burdened by the proposed changes described herein, which were first announced via Exchange Notice nearly two months in advance of the migration, nor were any timely comment letters received by the Commission by the comment period submission deadline of November 12, 2019.[70] The Exchange also underscores the fact that no comment letters were received in response to its Second Proposed Rule Change, and that no market participant has provided any written comments specifically suggesting that the Exchange has failed to provide sufficient information in the Second Proposed Rule Change to meets its burden to demonstrate its proposed fees are consistent with the requirements of the Exchange Act.

The proposed connectivity structure and corresponding fees, like the pre-migration connectivity structure and fees, continues to provide market participants flexibility with respect to how to connect to the Exchange based on each market participants' respective business needs. For example, the amount and type of physical and logical ports are determined by factors relevant and specific to each market participant, including its business model, costs of connectivity, how its business is segmented and allocated and volume of messages sent to the Exchange. Moreover, the Exchange notes that it does not have unlimited system capacity to support an unlimited number of order and quote entry per second. Accordingly, the proposed connectivity fees, and connectivity structure are designed to encourage market participants to be efficient with their respective physical and logical port usage. While the Exchange has no way of predicting with certainty the amount or type of connections market participants will in fact purchase, if any, the Exchange anticipates that like today, some market participants will continue to decline to connect and participate on the Exchange, some will participate on the Exchange via indirect connectivity, some will only purchase one physical connection and/or logical port connection, and others will purchase multiple connections.

In sum, the Exchange believes the proposed fees are reasonable and reflect a competitive environment, as the Exchange seeks to amend its access fees in connection with the migration of its technology platform, while still attracting market participants to continue to be, or become, connected to the Exchange.

Physical Ports

The Exchange believes increasing the fee for the new 10 Gb Physical Port is reasonable because unlike, the current 10 Gb Network Access Ports, the new Physical Ports provides a connection through a latency equalized infrastructure with faster switches and also allows access to both unicast order entry and multicast market data with a single physical connection. As discussed above, legacy Network Access Ports do not permit market participants to receive unicast and multicast connectivity. As such, in order to receive both connectivity types pre-migration, a market participant needed to purchase and maintain at least two 10 Gb Network Access Ports. The proposed Physical Ports not only provide latency equalization (*i.e.,* eliminate latency advantages between market participants based on location) as compared to the legacy ports, but also alleviate the need to pay for two physical ports as a result of needing unicast and multicast connectivity. Accordingly, market participants who historically had to purchase two separate ports for each of multicast and unicast activity, will be able to purchase only one port, and consequently pay lower fees overall. For example, pre-migration if a TPH had two 10 Gb legacy Network Access Ports, one of which received unicast traffic and the other of which received multicast traffic, that TPH would have been assessed $10,000 per month ($5,000 per port). Under the proposed rule change, using the new Physical Ports, that TPH has the option of utilizing one single port, instead of two ports, to receive both unicast and multicast traffic, therefore paying only $7,000 per month for a port that provides both connectivity types. The Exchange notes that pre-migration, approximately 50% of TPHs maintained two or more 10 Gb Network Access Ports. While the Exchange has no way of predicting with certainty the amount

[68] *See e.g.,* Nasdaq PHLX and ISE Rules, General Equity and Options Rules, General 8. Phlx and ISE each charge a monthly fee of $2,500 for each 1Gb connection, $10,000 for each 10Gb connection and $15,000 for each 10Gb Ultra connection. *See also* Nasdaq Price List—Trading Connectivity. Nasdaq charges a monthly fee of $7,500 for each 10Gb direct connection to Nasdaq and $2,500 for each direct connection that supports up to 1Gb. *See also* NYSE American Fee Schedule, Section V.B, and Arca Fees and Charges, Co-Location Fees. NYSE American and Arca each charge a monthly fee of $5,000 for each 1Gb circuit, $14,000 for each 10Gb circuit and $22,000 for each 10Gb LX circuit.

[69] *See e.g.,* Affiliated Exchange Fee Schedules, Physical Connectivity Fees. For example, Cboe BZX, Cboe EDGX and C2 each charge a monthly fee of $2,500 for each 1Gb connection and $7,500 for each 10Gb connection.

[70] *See* Exchange Notice ''Cboe Options Exchange Access and Capacity Fee Schedule Changes Effective October 1, 2019 and November 1, 2019'' Reference ID C2019081900.

or type of connections market participants will in fact purchase post-migration, the Exchange anticipated approximately 50% of the TPHs with two or more 10 Gb Network Access Ports to reduce the number of 10 Gb Physical Ports that they purchase and expected the remaining 50% of TPHs to maintain their current 10 Gb Physical Ports, but reduce the number of 1 Gb Physical Ports. Particularly, pre-migration, a number of TPHs maintained two 10 Gb Network Access Ports to receive multicast data and two 1 Gb Network Access Ports for order entry (unicast connectivity). As the new 10 Gb Physical Ports are able to accommodate unicast connectivity (order entry), TPHs may choose to eliminate their 1 Gb Network Access Ports and utilize the new 10 Gb Physical Ports for both multicast and unicast connectivity. The Exchange notes that many market participants are still transitioning to the new connectivity structure and as such, the Exchange does not expect its projections regarding port purchases to be realized prior to February 2020.

As discussed above, if a TPH deems a particular exchange as charging excessive fees for connectivity, such market participants may opt to terminate their connectivity arrangements with that exchange, and adopt a possible range of alternative strategies, including routing to the applicable exchange through another participant or market center or taking that exchange's data indirectly. Accordingly, if the Exchange charges excessive fees, it would stand to lose not only connectivity revenues but also revenues associated with the execution of orders routed to it, and, to the extent applicable, market data revenues. The Exchange believes that this competitive dynamic imposes powerful restraints on the ability of any exchange to charge unreasonable fees for physical connectivity. The Exchange also notes that the proposal represents an equitable allocation of reasonable dues, fees and other charges as its fees for physical connectivity are reasonably constrained by competitive alternatives, as discussed above. The proposed amounts are in line with, and in some cases lower than, the costs of physical connectivity at other Exchanges,[71] including the Cboe Affiliated Exchanges which have the same connectivity infrastructure the Exchange has migrated to.[72] The Exchange does not believe it is unreasonable to assess fees that are in line with fees that have already been established for the same physical ports used to connect to the same connectivity infrastructure and common platform. The Exchange believes the proposed Physical Port fees are equitable and not unreasonably discriminatory as the connectivity pricing is associated with relative usage of the various market participants and the Exchange has not been presented with any evidence to suggest its proposed fee changes would impose a barrier to entry for participants, including smaller participants. In fact, as noted above, the Exchange is unaware of any market participant that has terminated direct connectivity solely as a result of the proposed fee changes. The Exchange also believes increasing the fee for 10 Gb Physical Ports and charging a higher fee as compared to the 1 Gb Physical Port is equitable as the 1 Gb Physical Port is 1/10th the size of the 10 Gb Physical Port and therefore does not offer access to many of the products and services offered by the Exchange (*e.g.,* ability to receive certain market data products). Thus the value of the 1 Gb alternative is lower than the value of the 10 Gb alternative, when measured based on the type of Exchange access it offers. Moreover, market participants that purchase 10 Gb Physical Ports utilize the most bandwidth and therefore consume the most resources from the network. As such, the Exchange believes the proposed fees for the 1 and 10 Gb Physical Ports, respectively are reasonably and appropriately allocated.

Data Port Fees

The Exchange believes assessing the data port fee per data source, instead of per port, is reasonable because it may allow for market participants to maintain more ports at a lower cost and applies uniformly to all market participants. The Exchange believes the proposed increase is reasonable because, as noted above, market participants may pay lower fees as a result of charging per data source and not per data port. Indeed, while the Exchange has no way of predicting with certainty the impact of the proposed changes, the Exchange had anticipated approximately 76% of the 51 market participants who pay data port fees to pay the same or lower fees upon implementation of the proposed change. Currently, 46 market participants[73] pay the proposed data port fees, of which approximately 78% market participants are paying the same or lower fees in connection with the proposed change. Monthly savings for firms paying lower fees range from $500 to $6,000 per month. The Exchange also anticipated that 19% of TPHs who pay data port fees would pay a modest increase of only $500 per month. To date, approximately 22% market participants pay higher fees, with the majority of those market participants paying a modest monthly increase of $500 and only 3 firms paying either $1,000 or $1,500 more per month. Additionally as discussed above, the Exchange's affiliate C2 has the same fee which is also assessed at the proposed rate and assessed by data source instead of per port. The proposed name change is also appropriate in light of the Exchange's proposed changes and may alleviate potential confusion.

Logical Connectivity

Port Fees

The Exchange believes it's reasonable to eliminate certain fees associated with legacy options for connecting to the Exchange and to replace them with fees associated with new options for connecting to the Exchange that are similar to those offered at its Affiliated Exchanges. In particular, the Exchange believes it's reasonable to no longer assess fees for CMI and FIX Login IDs because the Login IDs were retired and rendered obsolete upon migration and because the Exchange is proposing to replace them with fees associated with the new logical connectivity options. The Exchange believes that it is reasonable to harmonize the Exchange's logical connectivity options and corresponding connectivity fees now that the Exchange is on a common platform as its Affiliated Exchanges. Additionally, the Exchange notes the proposed fees are the same as, or in line with, the fees assessed on its Affiliated Exchanges for similar connectivity.[74] The proposed logical connectivity fees are also equitable and not unfairly

[71] *See e.g.,* Nasdaq PHLX and ISE Rules, General Equity and Options Rules, General 8. Phlx and ISE each charge a monthly fee of $2,500 for each 1Gb connection, $10,000 for each 10Gb connection and $15,000 for each 10Gb Ultra connection. *See also* Nasdaq Price List—Trading Connectivity. Nasdaq charges a monthly fee of $7,500 for each 10Gb direct connection to Nasdaq and $2,500 for each direct connection that supports up to 1Gb. *See also* NYSE American Fee Schedule, Section V.B, and Arca Fees and Charges, Co-Location Fees. NYSE American and Arca each charge a monthly fee of $5,000 for each 1Gb circuit, $14,000 for each 10Gb circuit and $22,000 for each 10Gb LX circuit.

[72] *See e.g.,* Affiliated Exchange Fee Schedules, Physical Connectivity Fees. For example, Cboe BZX, Cboe EDGX and C2 each charge a monthly fee of $2,500 for each 1Gb connection and $7,500 for each 10Gb connection.

[73] The Exchange notes the reduction in market participants that pay the data port fee is due to firm consolidations and acquisitions.

[74] *See* Affiliated Exchange Fee Schedules, Logical Port Fees.

discriminatory because the Exchange will apply the same fees to all market participants that use the same respective connectivity options.

The Exchange believes the proposed Logical Port fees are reasonable as it is the same fee for Drop Ports and the first five BOE/FIX Ports that is assessed for CMI and FIX Logins, which the Exchange is eliminating in lieu of logical ports. Additionally, while the proposed ports will be assessed the same monthly fees as current CMI/FIX Login IDs, the proposed logical ports provide for significantly more message traffic. Specifically, the proposed BOE/FIX Logical Ports will provide for 3 times the amount of quoting [75] capacity and approximately 165 times order entry capacity. Similarly, the Exchange believes the proposed BOE Bulk Port fees are reasonable because while the fees are higher than the CMI and FIX Login Id fees and the proposed Logical Port fees, BOE Bulk Ports offer significantly more bandwidth capacity than both CMI and FIX Login Ids and Logical Ports. Particularly, a single BOE Bulk Port offers 45 times the amount of quoting bandwidth than CMI/FIX Login Ids [76] and 5 times the amount of quoting bandwidth than Logical Ports will offer. Additionally, the Exchange believes that its fees for logical connectivity are reasonable, equitable, and not unfairly discriminatory as they are designed to ensure that firms that use the most capacity pay for that capacity, rather than placing that burden on market participants that have more modest needs. Although the Exchange charges a ''per port'' fee for logical connectivity, it notes that this fee is in effect a capacity fee as each FIX, BOE or BOE Bulk port used for order/quote entry supports a specified capacity (*i.e.,* messages per second) in the matching engine, and firms purchase additional logical ports when they require more capacity due to their business needs.

An obvious driver for a market participant's decision to purchase multiple ports will be their desire to send or receive additional levels of message traffic in some manner, either by increasing their total amount of message capacity available, or by segregating order flow for different trading desks and clients to avoid latency sensitive applications from competing for a single thread of resources. For example, a TPH may purchase one or more ports for its market making business based on the amount of message traffic needed to support that business, and then purchase separate ports for proprietary trading or customer facing businesses so that those businesses have their own distinct connection, allowing the firm to send multiple messages into the Exchange's trading system in parallel rather than sequentially. Some TPHs that provide direct market access to their customers may also choose to purchase separate ports for different clients as a service for latency sensitive customers that desire the lowest possible latency to improve trading performance. Thus, while a smaller TPH that demands more limited message traffic may connect through a service bureau or other service provider, or may choose to purchase one or two logical ports that are billed at a rate of $750 per month each, a larger market participant with a substantial and diversified U.S. options business may opt to purchase additional ports to support both the volume and types of activity that they conduct on the Exchange. While the Exchange has no way of predicting with certainty the amount or type of logical ports market participants will in fact purchase post-migration, the Exchange anticipated approximately 16% of TPHs to purchase one to two logical ports, and approximately 22% of TPHs to not purchase any logical ports. To date, 13% of TPHs purchased one to two logical ports and 27% have not purchased any logical ports. At the same time, market participants that desire more total capacity due to their business needs, or that wish to segregate order flow by purchasing separate capacity allocations to reduce latency or for other operational reasons, would be permitted to choose to purchase such additional capacity at the same marginal cost. The Exchange believes the proposal to assess an additional Logical and BOE Bulk port fee for incremental usage per logical port is reasonable because the proposed fees are modestly higher than the proposed Logical Port and BOE Bulk fees and encourage users to mitigate message traffic as necessary. The Exchange notes one of its Affiliated Exchanges has similar implied port fees.[77]

In sum, the Exchange believes that the proposed BOE/FIX Logical Port and BOE Bulk Port fees are appropriate as these fees would ensure that market participants continue to pay for the amount of capacity that they request, and the market participants that pay the most are the ones that demand the most resources from the Exchange. The Exchange also believes that its logical connectivity fees are aligned with the goals of the Commission in facilitating a competitive market for all firms that trade on the Exchange and of ensuring that critical market infrastructure has ''levels of capacity, integrity, resiliency, availability, and security adequate to maintain their operational capability and promote the maintenance of fair and orderly markets.'' [78]

The Exchange believes waiving the FIX/BOE Logical Port fee for one FIX Logical Port used to access PULSe and Silexx (for FLEX Trading) is reasonable because it will allow all TPHs using PULSe and Silexx to avoid having to pay a fee that they would otherwise have to pay. The waiver is equitable and not unfairly discriminatory because TPHs using PULSe are already subject to a monthly fee for the PULSe Workstation, which the Exchange views as inclusive of fees to access the Exchange. Moreover, while PULSe users today do not require a FIX/CMI Login Id, post-migration, due to changes to the connectivity infrastructure, PULSe users will be required to maintain a FIX Logical Port and as such incur a fee they previously would not have been subject to. Similarly, the Exchange believes that the waiver for Silexx (for FLEX trading) will encourage TPHs to transact business using FLEX Options using the new Silexx System and encourage trading of FLEX Options. Additionally, the Exchange notes that it currently waives the Login Id fees for Login IDs used to access the CFLEX system.

The Exchange believes its proposed fee for Purge Ports is reasonable as it is also in line with the amount assessed for purge ports offered by its Affiliated Exchanges, as well as other exchanges.[79] Moreover, the Exchange believes that offering purge port functionality at the Exchange level promotes robust risk management across the industry, and thereby facilitates investor protection. Some market participants, and, in particular, larger firms, could build similar risk functionality on their trading systems that permit the flexible cancellation of orders entered on the Exchange. Offering Exchange level protections however, ensures that such functionality is widely available to all firms, including smaller firms that may otherwise not be willing to incur the costs and development work necessary

[75] Based on the purchase of a single Market-Maker Trading Permit or Bandwidth Packet.

[76] Based on the purchase of a single Market-Maker Trading Permit or Bandwidth Packet.

[78] *See* Securities Exchange Act Release No. 73639 (November 19, 2014), 79 FR 72251 (December 5, 2014) (File No. S7–01–13) (Regulation SCI Adopting Release).

[79] *See* Affiliated Exchange Fee Schedules, Logical Port Fees. *See also,* Nasdaq ISE Pricing Schedule, Section 7(C). ISE charges a fee of $1,100 per month for SQF Purge Ports.

to support their own customized mass cancel functionality. The Exchange operates in a highly competitive market in which exchanges offer connectivity and related services as a means to facilitate the trading activities of TPHs and other participants. As the proposed Purge Ports provide voluntary risk management functionality, excessive fees would simply serve to reduce demand for this optional product. The Exchange also believes that the proposed Purge Port fees are not unfairly discriminatory because they will apply uniformly to all TPHs that choose to use dedicated Purge Ports. The proposed Purge Ports are completely voluntary and, as they relate solely to optional risk management functionality, no TPH is required or under any regulatory obligation to utilize them. The Exchange believes that adopting separate fees for these ports ensures that the associated costs are borne exclusively by TPHs that determine to use them based on their business needs, including Market-Makers or similarly situated market participants. Similar to Purge Ports, Spin and GRP Ports are optional products that provide an alternative means for market participants to receive multicast data and request and receive a retransmission of such data. As such excessive fees would simply serve to reduce demand for these products, which TPHs are under no regulatory obligation to utilize. All TPHs that voluntarily select these service options (*i.e.,* Purge Ports, Spin Ports or GRP Ports) will be charged the same amount for the same respective services. All TPHs have the option to select any connectivity option, and there is no differentiation among TPHs with regard to the fees charged for the services offered by the Exchange.

Access Credits

The Exchange believes the proposal to adopt credits for BOE Bulk Ports is reasonable, equitable and not unfairly discriminatory because it provides an opportunity for TPHs to pay lower fees for logical connectivity. The Exchange notes that the proposed credits are in lieu of the current credits that Market-Makers are eligible to receive today for Trading Permits fees. Although only Market-Makers may receive the proposed BOE Bulk Port credits, Market-Makers are valuable market participants that provide liquidity in the marketplace and incur costs that other market participants do not incur. For example, Market-Makers have a number of obligations, including quoting obligations and fees associated with appointments that other market participants do not have. The Exchange also believes that the proposals provide incremental incentives for TPHs to strive for the higher tier levels, which provide increasingly higher benefits for satisfying increasingly more stringent criteria, including criteria to provide more liquidity to the Exchange. The Exchange believes the value of the proposed credits is commensurate with the difficulty to achieve the corresponding tier thresholds of each program.

First, the Exchange believes the proposed BOE Bulk Port fee credits provided under AVP will incentivize the routing of orders to the Exchange by TPHs that have both Market-Maker and agency operations, as well as incent Market-Makers to continue to provide critical liquidity notwithstanding the costs incurred with being a Market-Maker. More specifically, in the options industry, many options orders are routed by consolidators, which are firms that have both order router and Market-Maker operations. The Exchange is aware not only of the importance of providing credits on the order routing side in order to encourage the submission of orders, but also of the operations costs on the Market-Maker side. The Exchange believes the proposed change to AVP continues to allow the Exchange to provide relief to the Market-Maker side via the credits, albeit credits on BOE Bulk Port fees instead of Trading Permit fees. Additionally, the proposed credits may incentivize and attract more volume and liquidity to the Exchange, which will benefit all Exchange participants through increased opportunities to trade as well as enhancing price discovery. While the Exchange has no way of predicting with certainty how many and which TPHs will satisfy the required criteria to receive the credits, the Exchange had anticipated approximately two TPHs (out of approximately 5 TPHs that are eligible for AVP) to reach VIP Tiers 4 or 5 and consequently earn the BOE Bulk Port fee credits for their respective Market-Maker affiliate. For the month of October 2019, two TPHs received access credits under Tier 5 and no TPHs received credits under Tier 4. The Exchange notes that it believes its reasonable, equitable and not unfairly discriminatory to no longer provider access credits for Market-Makers whose affiliates achieve VIP Tiers 2 or 3 as the Exchange has adopted another opportunity for all Market-Makers, not just Market-Makers that are part of a consolidator, to receive credits on BOE Bulk Port fees (*i.e.,* credits available via the proposed Market-Maker Access Credit Program). More specifically, limiting the credits under AVP to the top two tiers enables the Exchange to provide further credits under the new Market-Maker Access Credit Program. Furthermore, the Exchange notes that it is not required to provide any credits at any tier level.

The Exchange believes the proposed BOE Bulk Port fee credits available for TPHs that reach certain Performance Tiers under the Liquidity Provider Sliding Scale Adjustment Table is reasonable as the credits provide for reduced connectivity costs for those Market-Makers that reach the required thresholds. The Exchange believe it's reasonable, equitable and not unfairly discriminatory to provide credits to those Market-Makers that primarily provide and post liquidity to the Exchange, as the Exchange wants to continue to encourage Market-Makers with significant Make Rates to continue to participate on the Exchange and add liquidity. Greater liquidity benefits all market participants by providing more trading opportunities and tighter spreads.

Moreover, the Exchange notes that Market-Makers with a high Make Rate percentage generally require higher amounts of capacity than other Market-Makers. Particularly, Market-Makers with high Make Rates are generally streaming significantly more quotes than those with lower Make Rates. As such, Market-Makers with high Make Rates may incur more costs than other Market-Makers as they may need to purchase multiple BOE Bulk Ports in order to accommodate their capacity needs. The Exchange believes the proposed credits for BOE Bulk Ports encourages Market-Makers to continue to provide liquidity for the Exchange, notwithstanding the costs incurred by purchasing multiple ports. Particularly, the proposal is intended to mitigate the costs incurred by traditional Market-Makers that focus on adding liquidity to the Exchange (as opposed to those that provide and take, or just take). While the Exchange cannot predict with certainty which Market-Makers will reach Performance Tiers 4 and 5 each month, based on historical performance it anticipated approximately 10 Market-Makers would achieve Tiers 4 or 5. In October 2019, 12 Market-Makers achieved Tiers 4 or 5. Lastly, the Exchange notes that it is common practice among options exchanges to differentiate fees for adding liquidity and fees for removing liquidity.[80]

[80] *See e.g.,* MIAX Options Fees Schedule, Section 1(a), Market Maker Transaction Fees.

Bandwidth Packets and CMI CAS Server Fees

The Exchange believes it's reasonable to eliminate Bandwidth Packet fees and the CMI CAS Server fee because TPHs will not pay fees for these connectivity options and because Bandwidth Packets and CAS Servers have been retired and rendered obsolete as part of the migration. The Exchange believes that even though it will be discontinuing Bandwidth Packets, the proposed incremental pricing for Logical Ports and BOE Bulk Ports will continue to encourage users to mitigate message traffic. The proposed change is equitable and not unfairly discriminatory because it will apply uniformly to all TPHs.

Access Fees

The Exchange believes the restructuring of its Trading Permits is reasonable in light of the changes to the Exchange's connectivity infrastructure in connection with the migration and the resulting separation of bandwidth allowance, logins and appointment costs from each Trading Permit. The Exchange also believes that it is reasonable to harmonize the Exchange's Trading Permit structure and corresponding connectivity options to more closely align with the structures offered at its Affiliated Exchanges once the Exchange is on a common platform as its Affiliated Exchanges.[81] The proposed Trading Permit structure and corresponding fees are also in line with the structure and fees provided by other exchanges. The proposed Trading Permit fees are also equitable and not unfairly discriminatory because the Exchange will apply the same fees to all market participants that use the same type and number of Trading Permits.

With respect to electronic Trading Permits, the Exchange notes that TPHs previously requested multiple Trading Permits because of bandwidth, login or appointment cost needs. As described above, in connection with migration, bandwidth, logins and appointment costs are no longer tied to Trading Permits or Bandwidth Packets and as such, the need to hold multiple permits and/or Bandwidth Packets is obsolete. As such, the Exchange believes the structure to require only one of each type of applicable electronic Trading Permit is appropriate. Moreover, the Exchange believes offering separate marketing making permits for off-floor and on-floor Market-Makers provides for a cleaner, more streamlined approach to trading permits and corresponding fees. Other exchanges similarly provide separate and distinct fees for Market-Makers that operate on-floor vs off-floor and their corresponding fees are similar to those proposed by the Exchange.[82]

The Exchange believes the proposed fee for its MM EAP Trading Permits is reasonable as it is the same fee it assess today for Market-Maker Trading Permits (*i.e.,* $5,000 per month per permit). Additionally, the proposed fee is in line with, and in some cases even lower than, the amounts assessed for similar access fees at other exchanges, including its affiliate C2.[83] The Exchange believes the proposed EAP fee is also reasonable, and in line with the fees assessed by other Exchanges for non-Market-Maker electronic access.[84] The Exchange notes that while the Trading Permit fee is increasing, TPHs overall cost to access the Exchange may be reduced in light of the fact that a TPH no longer must purchase multiple Trading Permits, Bandwidth Packets and Login Ids in order to receive sufficient bandwidth and logins to meet their respective business needs. To illustrate the value of the new connectivity infrastructure, the Exchange notes that the cost that would be incurred by a TPH today in order to receive the same amount of order capacity that will be provided by a single Logical Port post-migration (*i.e.,* 5,000 orders per second), is approximately 98% higher than the cost for the same capacity post-migration. The following examples further demonstrate potential cost savings/value added for an EAP holder with modest capacity needs and an EAP holder with larger capacity needs:

TPH That Holds 1 EAP, No Bandwidth Packets and 1 CMI Login

	Current fee structure	Post-migration fee structure
EAP	$1,600	$3,000.
CMI Login/Logical Port	$750	$750.
Bandwidth Packets	0	N/A.
Total Bandwidth Available	30 orders/sec	5,000 orders/sec.
Total Cost	$2,350	$3,750.
Total Cost per message	$78.33/order/sec	$0.75/order/sec.

TPH That Holds 1 EAP, 4 Bandwidth Packets and 15 CMI Logins

	Current fee structure	Post-migration fee structure
EAP	$1,600	$3,000.
CMI Login/Logical Port	$11,250 (15@750)	$750.
Bandwidth Packets	$6,400 (4@$1,600)	N/A.
Total Bandwidth Available	150 orders/sec	5,000 orders/sec.
Total Cost	$19,250	$3,750.
Total Cost per message	$128.33/order/sec	$0.75/order/sec.

[81] For example, the Exchange's affiliate, C2, similarly provides for Trading Permits that are not tied to connectivity, and similar physical and logical port options at similar pricings. *See* Cboe C2 Options Exchange Fees Schedule. Physical connectivity and logical connectivity are also not tied to any type of permits on the Exchange's other options exchange affiliates.

[82] *See e.g.,* PHLX Section 8A, Permit and Registration Fees. *See also,* BOX Options Fee Schedule, Section IX Participant Fees; NYSE American Options Fees Schedule, Section III(A) Monthly ATP Fees and NYSE Arca Options Fees and Charges, OTP Trading Participant Rights. For similar Trading Floor Permits for Floor Market Makers, Nasdaq PHLX charges $6,000; BOX charges up to $5,500 for 3 registered permits in addition to a $1,500 Participant Fee, NYSE Arca charges up to $6,000; and NYSE American charges up to $8,000.

[83] *See e.g.,* Cboe C2 Options Exchange Fees Schedule. *See also,* NYSE Arca Options Fees and Charges, General Options and Trading Permit (OTP) Fees, which assesses up to $6,000 per Market Maker OTP and NYSE American Options Fee Schedule, Section III. Monthly ATP Fees, which assess up to $8,000 per Market Maker ATP. *See also,* PHLX Section 8A, Permit and Registration Fees, which assesses up to $4,000 per Market Maker Permit.

[84] *See e.g.,* PHLX Section 8A, Permit and Registration Fees, which assesses up to $4,000 per Permit for all member and member organizations other than Floor Specialists and Market Makers.

The Exchange believes the proposal to adopt a new Clearing TPH Permit is reasonable because it offers TPHs that only clear transactions of TPHs a discount. Particularly, Clearing TPHs that also submit orders electronically to the Exchange would purchase the proposed EAP at $3,000 per permit. The Exchange believe it's reasonable to provide a discount to Clearing TPHs that only clear transactions and do not otherwise submit electronic orders to the Exchange. The Exchange notes that another exchange similarly charges a separate fee for clearing firms.[85]

The Exchange believes the proposed fee structure for on-floor Market-Makers is reasonable as the fees are in line with those offered at other Exchanges.[86] The Exchange believes that the proposed fee for MM Floor Permits as compared to MM EAPs is reasonable because it is only modestly higher than MM EAPs and Floor MMs don't have other costs that MM EAP holders have, such as MM EAP Appointment fees.

The Exchange believes its proposed fees for Floor Broker Permits are reasonable because the fees are similar to, and in some cases lower than, the fees the Exchange currently assesses for such permits. Specifically, based on the number of Trading Permits TPHs held upon migration, 60% of TPHs that hold Floor Broker Trading Permits will pay lower Trading Permit fees. Particularly, any Floor Broker holding ten or less Floor Broker Trading Permits will pay lower fees under the proposed tiers as compared to what they pay today. While the remaining 40% of TPHs holding Floor Broker Trading Permits (who each hold between 12–21 Floor Broker Trading Permits) will pay higher fees, the Exchange notes the monthly increase is de minimis, ranging from an increase of 0.6%–2.72%.[87]

The Exchange believes the proposed ADV Discount is reasonable because it provides an opportunity for Floor Brokers to pay lower FB Trading Permit fees, similar to the current rebate program offered to Floor Brokers. The Exchange notes that while the new ADV Discount program includes only customer volume (''C'' origin code) as compared to Customer and Professional Customer/Voluntary Professional, the amount of Professional Customer/Voluntary Professional volume was de minimis and the Exchange does not believe the absence of such volume will have a significant impact.[88] Additionally, the Exchange notes that while the ADV requirements under the proposed ADV Discount program are higher than are required under the current rebate program, the proposed ADV Discount counts volume from all products towards the thresholds as compared to the current rebate program which excludes volume from Underlying Symbol List A (except RLG, RLV, RUI, and UKXM), DJX, XSP, and subcabinet trades. Moreover, the ADV Discount is designed to encourage the execution of orders in all classes via open outcry, which may increase volume, which would benefit all market participants (including Floor Brokers who do not hit the ADV thresholds) trading via open outcry (and indeed, this increased volume could make it possible for some Floor Brokers to hit the ADV thresholds). The Exchange believes the proposed discounts are equitable and not unfairly discriminatory because all Floor Brokers are eligible. While the Exchange has no way of predicting with certainty how many and which TPHs will satisfy the various thresholds under the ADV Discount, the Exchange anticipated approximately 3 Floor Brokers to receive a rebate under the program. To date, 2 Floor Brokers have received a rebate under the program.

The Exchange believes its proposed MM EAP Appointment fees are reasonable in light of the Exchange's elimination of appointment costs tied to Trading Permits. Other exchanges also offer a similar structure with respect to fees for appointment classes.[89] Additionally, the proposed MM EAP Appointment fee structure results in approximately 36% electronic MMs paying lower fees for trading permit and appointment costs. For example, in order to have the ability to make electronic markets in every class on the Exchange, a Market-Maker would need 1 Market-Maker Trading Permit and 37 Appointment Units post-migration. Under, the current pricing structure, in order for a Market-Maker to quote the entire universe of available classes, a Market-Maker would need 33 Appointment Credits, thus necessitating 33 Market-Maker Trading Permits. With respect to fees for Trading Permits and Appointment Unit Fees, under the proposed pricing structure, the cost for a TPH wishing to quote the entire universe of available classes is approximately 29% less (if they are not eligible for the MM TP Sliding Scale) or approximately 2% less (if they are eligible for the MM TP Sliding Scale). To further demonstrate the potential cost savings/value added, the Exchange is providing the following examples comparing current Market-Maker connectivity and access fees to projected connectivity and access fees for different scenarios. The Exchange notes that the below examples not only compare Trading Permit and Appointment Unit costs, but also the cost incurred for logical connectivity and bandwidth. Particularly, the first example demonstrates the total minimum cost that would be incurred today in order for a Market-Maker to have the same amount of capacity as a Market-Maker post-migration that would have only 1 MM EAP and 1 Logical Port (*i.e.,* 15,000 quotes/3 sec). The Exchange is also providing examples that demonstrate the costs of (i) a Market-Maker with small capacity needs and appointment unit of 1.0 and (ii) a Market-Maker with large capacity needs and appointment cost/unit of 30.0:

MARKET-MAKER THAT NEEDS CAPACITY OF 15,000/QUOTES/3 SECONDS

	Current fee structure	Post-migration fee structure
MM Permit/MM EAP	$5,000	$5,000.
Appointment Unit Cost	N/A (1 appointment cost)	$0 (1 appointment unit).
CMI Login/Logical Port	$750[90]	$750.
Bandwidth Packets	$5,500 (2@$2,750)	N/A.
Total Bandwidth Available	15,000 quotes/3 sec	15,000 quotes/3 sec.
Total Cost	$11,250	$5,750.

[85] *See e.g.,* NYSE Arca Options Fees and Charges, General Options and Trading Permit (OTP) Fees and NYSE American Options Fee Schedule, Section III. Monthly ATP Fees.

[86] *See e.g.,* PHLX Section 8A, Permit and Registration Fees, which assesses $6,000 per permit for Floor Specialists and Market Makers.

[87] The Floor Brokers whose fees are increasing have each committed to a minimum number of permits and therefore currently receive the rates set forth in the current Floor Broker TP Sliding Scale.

[88] Furthermore, post-migration the Exchange will not have Voluntary Professionals.

[89] *See e.g.,* PHLX Section 8. Membership Fees, B, Streaming Quote Trader (''SQT'') Fees and C. Remote Market Maker Organization (RMO) Fee.

[90] The maximum quoting bandwidth that may be applied to a single Login Id is 80,000 quotes/3 sec.

MARKET-MAKER THAT NEEDS CAPACITY OF 15,000/QUOTES/3 SECONDS—Continued

	Current fee structure	Post-migration fee structure
Total Cost per message allowed	$0.75/quote/3 sec	$0.38/quote/3 sec.

MARKET MAKER THAT NEEDS CAPACITY OF NO MORE THAN 5,000 QUOTES/3 SECS

	Current fee structure	Post-migration fee structure
MM Permit/MM EAP	$5,000	$5,000.
Appointment Unit Cost	N/A (1 appointment cost)	$0 (1 appointment unit).
CMI Login/Logical Port	$750	$750.
Bandwidth Packets	0	N/A.
Total Bandwidth Available	5,000 quotes/3 sec	15,000 quotes/3 sec.
Total Cost	$5,750	$5,750.

Total Cost per message allowed	$0.63/quotes/3 sec	$0.23/quote/3 sec.

*Possible performance degradation at 15,000 messages per second.

The Exchange believes its proposal to provide separate fees for Tier Appointments for MM EAPs and MM Floor Permits as the Exchange will be issuing separate Trading Permits for on-floor and off-floor market making as discussed above. The proposal to eliminate the volume threshold for the electronic SPX Tier Appointment fee is reasonable as no TPHs in the past several months have electronically traded more than 1 SPX contract or less than 100 SPX contracts per month and therefore will not be negatively impacted by the proposed change, and because it aligns the electronic SPX Tier Appointment with the floor SPX Tier Appointment, which has no volume threshold. The Exchange believes the proposal to increase the electronic volume thresholds for VIX and RUT are reasonable as those that do not regularly trade VIX or RUT in open-outcry will continue to not be assessed the fee. In fact, any TPH that executes more than 100 contracts but less than 1,000 in the respective classes will no longer have to pay the proposed Tier Appointment fee. As noted above, the Exchange is not proposing to change the amounts assessed for each Tier Appointment Fee. The proposed change is equitable and not unfairly discriminatory because it will apply uniformly to all TPHs.

Trading Permit Holder Regulatory Fee

The Exchange believes it's reasonable to eliminate the Trading Permit Holder Regulatory fee because TPHs will not pay this fee and because the Exchange is restructuring its Trading Permit structure. The Exchange notes that although it will less closely be covering the costs of regulating all TPHs and performing its regulatory responsibilities, it still has sufficient funds to do so. The proposed change is equitable and not unfairly discriminatory because it will apply uniformly to all TPHs.

The Exchange believes corresponding changes to eliminate obsolete language in connection with the proposed changes described above and to relocate and reorganize its fees in connection with the proposed changes maintain clarity in the Fees Schedule and alleviate potential confusion, thereby removing impediments to and perfecting the mechanism of a free and open market and a national market system, and, in general, protecting investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

With respect to intra-market competition, the Exchange does not believe that the proposed rule change would place certain market participants at the Exchange at a relative disadvantage compared to other market participants or affect the ability of such market participants to compete. As stated above, the Exchange does not believe its proposed pricing will impose a barrier to entry to smaller participants and notes that its proposed connectivity pricing is associated with relative usage of the various market participants. For example, market participants with modest capacity needs can buy the less expensive 1 Gb Physical Port and utilize only one Logical Port. Moreover, the pricing for 1 Gb Physical Ports and FIX/BOE Logical Ports are no different than are assessed today (*i.e.,* $1,500 and $750 per port, respectively), yet the capacity and access associated with each is greatly increasing. While pricing may be increased for larger capacity physical and logical ports, such options provide far more capacity and are purchased by those that consume more resources from the network. Accordingly, the proposed

[91] For simplicity of the comparison, this assumes no appointments in SPX, VIX, RUT, XEO or OEX (which are not included in the TP Sliding Scale).

[92] Given the bandwidth limit per Login Id of 80,000 quotes/3 sec, example assumes Market-Maker purchases minimum amount of Login IDs to accommodate 300,000 quotes/3 sec.

connectivity fees do not favor certain categories of market participants in a manner that would impose a burden on competition; rather, the allocation reflects the network resources consumed by the various size of market participants—lowest bandwidth consuming members pay the least, and highest bandwidth consuming members pays the most, particularly since higher bandwidth consumption translates to higher costs to the Exchange.

The Exchange also does not believe that the proposed rule change will result in any burden on inter-market competition that is not necessary or appropriate in furtherance of the purposes of the Act. As discussed in the Statutory Basis section above, options market participants are not forced to connect to (or purchase market data from) all options exchanges, as shown by the number of TPHs at Cboe and shown by the fact that there are varying number of members across each of Cboe's Affiliated Exchanges. The Exchange operates in a highly competitive environment, and its ability to price access and connectivity is constrained by competition among exchanges and third parties. As discussed, there are other options markets of which market participants may connect to trade options. There is also a possible range of alternative strategies, including routing to the exchange through another participant or market center or taking the exchange's data indirectly. For example, there are 15 other U.S. options exchanges, which the Exchange must consider in its pricing discipline in order to compete for market participants. In this competitive environment, market participants are free to choose which competing exchange or reseller to use to satisfy their business needs. As a result, the Exchange believes this proposed rule change permits fair competition among national securities exchanges. Accordingly, the Exchange does not believe its proposed fee change imposes any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [93] and paragraph (f) of Rule 19b–4 [94] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–CBOE–2020–005 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–CBOE–2020–005. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–CBOE–2020–005, and should be submitted on or before March 10, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[95]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–88174; File No. SR–BX–2020–001]

Self-Regulatory Organizations; Nasdaq BX, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Remove Listing Rule and Other Amendments

February 11, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 29, 2020, Nasdaq BX, Inc. (''BX'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Options 1, Section 1 (Definitions), Options 2, Section 4 (Obligations of Market Makers and Lead Market Makers), Section 5 (Market Maker Quotations), Options 3, Section 2 (Units of Trading and Meaning if Premium Quotes and Orders), Options 3, Section 3 (Minimum Increments), Options 3, Section 8 (Opening and Halt Cross), Options 3, Section 19 (Mass Cancellation of Trading Interest), Options 4, Section 5 (Series of Options

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

Contracts Open for Trading), Options 4A, Section 12 (Terms of Index Options Contracts), Options 5, Section 2 (Order Protection) and Options 7 (Pricing Schedule). The Exchange also proposes to relocate current rule text to new Options 2, Section 6 entitled ''Market Maker Orders'' and reserve various sections of the Rulebook.

The text of the proposed rule change is available on the Exchange's website at *http://nasdaqbx.cchwallstreet.com/,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Options 1, Section 1 (Definitions), Options 2, Section 4 (Obligations of Market Makers and Lead Market Makers), Section 5 (Market Maker Quotations), Options 3, Section 2 (Units of Trading and Meaning if Premium Quotes and Orders), Options 3, Section 3 (Minimum Increments), Options 3, Section 8 (Opening and Halt Cross), Options 3, Section 19 (Mass Cancellation of Trading Interest), Options 4, Section 5 (Series of Options Contracts Open for Trading), Options 4A, Section 12 (Terms of Index Options Contracts), Options 5, Section 2 (Order Protection) and Options 7 (Pricing Schedule). The Exchange also proposes to relocate current rule text to new Options 2, Section 6 entitled ''Market Maker Orders'' and reserve various sections of the Rulebook. Each change is described below.

Rulebook Harmonization

The Exchange recently harmonized its Rulebook in connection with other Nasdaq affiliated markets. The Exchange proposes to reserve certain rules within the BX Rulebook to represent the presence of rules in similar locations in other Nasdaq affiliated Rulebooks (*e.g.* Nasdaq Phlx LLC).[3]

The Exchange proposes to reserve Sections 17–22 within General 2, Organization and Administration. The Exchange proposes to reserve Sections 11–14 within Options 2, Options Market Participants. The Exchange proposes to reserve Sections 17–21 within Options 4A, Options Index Rules. The Exchange proposes to reserve new section Options 4B. The Exchange proposes to reserve Sections 8–13 within Options 6, Options Trade Administration. The Exchange proposes to reserve Section 7 within Options 6C, Margins. The Exchange proposes to reserve Section 24 within Options 9, Business Conduct.

Definitions

The Exchange proposes to add the definition of an ''Away Best Bid or Offer'' or ''ABBO'' within Options 1, Section 1(a)(1). This term is utilized throughout the Rulebook. Defining this term will bring greater transparency to the Rulebook. The Exchange proposes to renumber the remaining definitions and also update corresponding cross-references within Options 7, Section 1.

The Exchange proposes to remove the terms ''System Book Feed'' and ''System Securities'' from the Options 1, Section 1. The term ''System Book Feed'' is not utilized in the Rulebook currently. The term ''System Securities'' is only utilized within the definition of the term ''System'' at current Options 1, Section 1(a)(58) and within Options 3, Section 8, Opening and Halt Cross.'' The term is simply replaced by referring to option series. The Exchange believes that replacing the term with the term ''option series'' will make the Rulebook clear and remove an unnecessary definition.

Finally, the Exchange is removing the phrase '', or the United States dollar'' from the definition of ''foreign currency'' within current Options 1, Section 1(a)(26). This reference is not needed in this string cite because the United States dollar is a medium of exchange as noted in the introductory phrase to the string cite.

Relocation of Options 2 Rules

The Exchange proposes to relocate Options 2, Section 4(d) and Section 5(e) to Options 2, Section 6, which is currently reserved. Specifically, the Exchange proposes to relocate these sections into Options 6(a) and (b), respectively. Proposed Options 2, Section 6 would be titled ''Market Maker Orders.'' This relocation will harmonize the location of these rules to other Nasdaq affiliated markets.

Removal of Various Listings

Mini Options

The Exchange has not listed Mini Options in several years and is proposing to delete its listing rules and other ancillary trading rules related to the listing of Mini Options. The Exchange notes that it has no open interest in Mini Options.

Specifically, the Exchange proposes to amend Options 3, Section 2 (Units of Trading and Meaning of Premium Quotes and Orders), Options 3, Section 3 (Minimum Increments), Options 4, and Section 5 (Series of Options Contracts Open for Trading) at Supplementary Material .15) to remove references to the handling of Mini Options in the System.

In the event that the Exchange desires to list Mini Options in the future, it would file a rule change with the Commission to adopt rules to list Mini Options.

U.S. Dollar-Settled Foreign Currency Options

The Exchange has not listed U.S. Dollar-Settled Foreign Currency Options (''FCOs'') in several years and is proposing to delete its listing rules and other ancillary trading rules related to the listing of FCOs. The Exchange notes that it has no open interest in FCOs.

Specifically, the Exchange proposes to amend Supplementary Material .16 to Options 4, Section 5 (Series of Options Contracts Open for Trading) to remove references to the handling of FCOs in the System.

In the event that the Exchange desires to list FCOs in the future, it would file a rule change with the Commission to adopt rules to list FCOs.

Mini-Nasdaq-100 Index

The Exchange has not listed Mini-Nasdaq-100 Index options or ''MNX'' or ''Mini-NDX'' in several years and is proposing to delete its listing rules and other ancillary trading rules related to the listing of Mini-Nasdaq-100 Index options. The Exchange notes that it has no open interest in Mini-Nasdaq-100 Index options.

Specifically, the Exchange proposes to amend Supplementary Material .05 to Options 4, Section 5 (Series of Options Contracts Open for Trading) to remove references to the handling of Mini-Nasdaq-100 Index options in the System.

In the event that the Exchange desires to list Mini-Nasdaq-100 Index options in the future, it would file a rule change

[3] *See* SR–Phlx–2020–03 (not yet published).

with the Commission to adopt rules to list Mini-Nasdaq-100 Index options.

Minimum Increments

The Exchange proposes to amend Options 3, Section 3 to relocate Section 3(a)(3) into a new Supplementary Material .01 and title the section, ''Penny Pilot Program.'' The Exchange also proposes to amend a typographical error in Options 3, Section 3(a)(3) to replace ''QQQQs'' with ''QQQs.'' The other changes relate to the removal of Mini Options as explained herein.

Mass Cancellation of Trading Interest

The Exchange proposes to amend the description of Options 3, Section 19 titled ''Mass Cancellation of Trading Interest.'' The proposed amended rule would state, ''An Options Participant may cancel any bids, offers, and orders in any series of options by requesting BX Market Operations [4] staff to effect such cancellation as per the instructions of the Options Participant.'' The Exchange is not amending the System with respect to this rule change. The proposed amended language merely makes clear that an Options Participant may contact BX Market Operations and request the Exchange to cancel any bid, offer or order in any series of options. This is a voluntary service that is offered to market participants. The Exchange, would cancel such bid, offer or order pursuant to the Member's instruction. This amendment would conform the BX rule text to rules of other Nasdaq affiliated markets.[5]

Other Amendments

The Exchange proposes to correct a rule citation within Options 3, Section 4 to risk protections. The Exchange proposes to correct a typographical error notes within Options 4A, Section 12. Specifically, the reference to Options 4, Section 6 should have referenced Options 4, Section 5 instead. The Exchange proposes to remove a reference to paragraph (c) within Options 5, Section 2, as there is no paragraph (c) within the Rule. The Exchange also proposes to update rulebook citations within Options 7, Pricing Schedule to reflect the proposed changes to Options 1, Section 1, Definitions.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[6] in general, and furthers the objectives of Section 6(b)(5) of the Act,[7] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

Rulebook Harmonization

The Exchange's proposal to reserve various sections of the Rules in order to harmonize its Rulebook with other Nasdaq affiliated markets is not a substantive amendment.

Definitions

The Exchange's proposal to add the definition of an ''Away Best Bid or Offer'' or ''ABBO'' within Options 1, Section 1(a)(1) is consistent with the Act because these amendments will add transparency to the Rulebook. The Exchange's proposal to remove the terms ''System Book Feed'' and ''System Securities'' from the Options 1, Section 1 is also consistent with the Act. The term ''System Book Feed'' is not utilized in the Rulebook currently and therefore this term does not need to be defined. The term ''System Securities'' is only utilized within the definition of the term ''System'' at Options 1, Section 1(a)(58) and within Options 3, Section 8, Opening and Halt Cross.'' Replacing the term with the term ''option series'' will make the Rulebook clear.

Relocation of Options 2 Rules

The proposal to relocate Options 2, Section 4(d), which is being reserved, and Section 5(e) to Section 6, which is currently reserved, into Options 6(a) and (b), respectively is consistent with the Act. This amendment is not substantive.

Removal of Various Listings

Mini Options

The Exchange's proposal to removal references to the listing and handling of Mini Options is consistent with the Act because Mini Options have not been listed in several years. Also, the Exchange notes that it has no open interest in Mini Options. In the event that the Exchange desires to list Mini Options in the future, it would file a rule change with the Commission to adopt rules to list Mini Options.

U.S. Dollar-Settled Foreign Currency Options

The Exchange's proposal to removal references to the listing and handling of FCOs is consistent with the Act because FCOs have not been listed in several years. Also, the Exchange notes that it has no open interest in FCOs. In the event that the Exchange desires to list FCOs in the future, it would file a rule change with the Commission to adopt rules to list FCOs.

Mini-Nasdaq-100 Index

The Exchange's proposal to removal references to the listing and handling Mini-Nasdaq-100 Index options is consistent with the Act because Mini-Nasdaq-100 Index options have not been listed in several years. Also, the Exchange notes that it has no open interest in Mini-Nasdaq-100 Index options.

In the event that the Exchange desires to list Mini-Nasdaq-100 Index options in the future, it would file a rule change with the Commission to adopt rules to list Mini-Nasdaq-100 Index options.

Minimum Increments

The Exchange's proposal to relocate parts of Options 3, Section 3 into a new Supplementary Material .01 and add a title for the Penny Pilot Program is consistent with the Act. This amendment will bring greater transparency to the Exchange's Rules.

Mass Cancellation of Trading Interest

The Exchange's proposal to amend the rule text of Mass Cancellation of Trading Interest rule within Options 3, Section 19 is consistent with the Act because the Exchange desires to conform the rule text to other Nasdaq affiliated markets.[8] Permitting Participants to contact Market Operations as a manual alternative to automated functionality, which similarly allows Participants to cancel interest, provides Participants experiencing their own system issues with a means to manage risk. Today, Participants are able to cancel interest, in an automated fashion through protocols [9] and the Kill Switch.[10] This is a voluntary service offered to all Participants.

This amended rule reflects the Exchange's current practice of allowing Participants to contact BX Market Operations and request the Exchange to cancel any bid, offer or order in any series of options. The Exchange would continue to permit Participants to contact market operations and manually request cancellation of interest. The proposed amended language will make

[4] The request to Market Operations is a manual request which is made telephonically.

[5] *See* Nasdaq Phlx LLC (''Phlx'') Nasdaq ISE, LLC (''ISE''), Nasdaq GEMX, LLC (''GEMX'') and Nasdaq MRX, LLC (''MRX'') Options 3, Section 19.

[6] 15 U.S.C. 78f(b).

[7] 15 U.S.C. 78f(b)(5).

[8] *See* note 5 above.

[9] *See* Options 3 at Supplementary Material .03 to Section 7.

[10] *See* Options 3, Section 17.

clear that an Options Participant may contact BX Market Operations and request the Exchange to cancel any bid, offer or order in any series of options. The Exchange would continue to cancel such bid, offer or order pursuant to the Participant's instruction.

This service, which permits Participants to cancel interest, does not diminish a Market Maker's obligation with respect to providing two-sided quotations and this rule is not inconsistent with other firm quote obligations of the Market Maker. Upon the request of a Participant, BX Market Operations will continue to manually input a mass cancellation message into the System consistent with the Participant's instruction to cancel trading interest. Once the mass cancellation message is entered into the System by BX Market Operations, the message will be accepted by the System in the order of receipt in the queue such that the interest that was already accepted into the System will be processed prior to the mass cancellation message. In addition, mass cancellation messages entered into the System by BX Market Operations are handled by the System through the same queuing mechanism that a quote or order message is handled by the System. The Exchange notes its processing of a mass cancellation message inputted by BX Market Operations and handled by the System is consistent with firm quote and order handling rules.

Other Amendments

The Exchange's proposal to correct certain typographical errors and update rulebook citations are not substantive.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Rulebook Harmonization

The Exchange's proposal to reserve various rules in connection with a larger Rulebook harmonization do not impose an undue burden on competition because these amendments are non-substantive.

Definitions

The Exchange's proposal to add the definition of an ''Away Best Bid or Offer'' or ''ABBO'' within Options 1, Section 1(a)(1) and remove the terms ''System Book Feed'' and ''System Securities'' from the Options 1, Section 1 do not impose an undue burden on competition because these amendments will add transparency to the Rulebook.

Relocation of Options 2 Rules

The proposal to relocate Options 2, Section 4(d) and Section 5(e) to Section 6, into Options 6(a) and (b) does not burden competition as this amendment is not substantive.

Removal of Various Listings

Mini Options

The Exchange's proposal to removal references to the listing and handling of Mini Options does not impose an undue burden on competition. Mini Options have not been listed in several years. Also, the Exchange notes that it has no open interest in Mini Options.

U.S. Dollar-Settled Foreign Currency Options

The Exchange's proposal to remove references to the listing of U.S. Dollar-Settled Foreign Currency Options (''FCOs'') does not impose an undue burden on competition. FCOs have not been listed in several years. The Exchange notes that it has no open interest in FCOs.

Mini-Nasdaq-100 Index

The Exchange's proposal to removal references to the listing and handling of Mini-Nasdaq-100 Index options does not impose an undue burden on competition. Mini-Nasdaq-100 Index options have not been listed in several years. Also, the Exchange notes that it has no open interest in Mini-Nasdaq-100 Index options.

Minimum Increments

The Exchange's proposal to relocate parts of Options 3, Section 3 into a new Supplementary Material .01 and add a title for the Penny Pilot Program do not impose an undue burden on competition as these amendments are non-substantive.

Mass Cancellation of Trading Interest

The Exchange's proposal to amend the rule text of the Mass Cancellation of Trading Interest rule within Options 3, Section 19 does not impose an undue burden on competition because there is no corresponding change to the manner in which this service will be offered. It will continue to be offered to all Participants.

Other Amendments

The Exchange's proposal to correct typographical error and update rulebook citations do not impose and undue burden on competition as these amendments are non-substantive.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act[11] and subparagraph (f)(6) of Rule 19b–4 thereunder.[12]

A proposed rule change filed under Rule 19b–4(f)(6)[13] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[14] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange requests that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Exchange believes that adoption the term ''ABBO,'' would add greater transparency to its rules, and that removing the rule text related to various options listing which are no longer listed on the Exchange will provide Participants with notice of the unavailability of these listing. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission waives the 30-day operative delay and designates the proposed rule change operative upon filing.[15]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if

[11] 15 U.S.C. 78s(b)(3)(A)(iii).

[12] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires the Exchange to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[13] 17 CFR 240.19b–4(f)(6).

[14] 17 CFR 240.19b–4(f)(6)(iii).

[15] For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–BX–2020–001 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–BX–2020–001. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BX–2020–001 and should be submitted on or before March 10, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[16]

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–88157; File No. SR–DTC–2020–003]

Self-Regulatory Organizations; The Depository Trust Company; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Transition the Application Used for Participant Access to the Imaging Function Relating to Deposited Certificates From a Non-Web-Based Application to a Web-Based Application

February 11, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 31, 2020, The Depository Trust Company (''DTC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the clearing agency. DTC filed the proposed rule change pursuant to Section 19(b)(3)(A) of the Act[3] and Rule 19b–4(f)(4) thereunder.[4] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change[5] would amend DTC's Procedures[6] set forth in the Deposits Guide and the Custody Guide to provide for an update of DTC's imaging function (''Imaging Function'') relating to Securities certificates deposited by Participants at DTC, through the Deposits service and Custody service, to transition the application used for Participant access to the Imaging Function from a non-web-based application, referred to as the Imaging Fax and Email System (''IFE''), available on DTC's Participant Terminal System (''PTS'') and Participant Browser Service (''PBS''),[7] to a web-based application accessible through PBS, to be named Image Viewer, as discussed below.[8] The proposed rule change to use Image Viewer on PBS as a replacement of IFE would (i) facilitate the modernization of the method of making certificate images available to Participants and (ii) make ministerial and clarifying changes to the text of Procedures set forth in the Deposits Guide and Custody Guide, as discussed below. In addition, DTC would amend the Guide to the DTC Fee Schedule (''Fee Guide'')[9] to conform the description of a fee relating to the Imaging Function to reflect the proposed changes to the Imaging Function, as described below.

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the clearing agency included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The clearing agency has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(4).

[5] Capitalized terms not otherwise defined in this rule filing are defined as set forth in the Rules, By-Laws and Organization Certificate of DTC (the ''Rules''), *available at http://www.dtcc.com/legal/rules-and-procedures.aspx,* the Deposits Service Guide (''Deposits Guide''), *available at http://www.dtcc.com/~/media/Files/Downloads/legal/service-guides/Deposits.pdf* and the Custody Service Guide (''Custody Guide''), *available at http://www.dtcc.com/~/media/Files/Downloads/legal/service-guides/Custody.pdf.*

[6] Pursuant to the Rules, the term ''Procedures'' means the Procedures, service guides, and regulations of DTC adopted pursuant to Rule 27, as amended from time to time. *See* Rule 1, *supra* note 5. The Procedures include, but are not limited to, the Deposits Guide and the Custody Guide.

[7] PTS is an interface accessible through a designated terminal that allows for Participant input and inquiry into DTC's services. PBS is an interface that allows Participants to make input and inquiry using functionality compatible with internet browser technology.

[8] DTC currently uses an application supported by a vendor for its imaging application. This application is reaching end-of-life because the vendor has notified DTC that it is terminating its support of the application, prompting DTC to replace it with a new application and providing an opportunity to modernize image viewing capabilities. Image Viewer, the application that DTC would implement for the imaging function pursuant to the proposed rule change, has been developed by DTC and would be supported by DTC.

(A) Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The proposed rule change would amend DTC's existing Procedures set forth in the Deposits Guide and the Custody Guide to provide for an update of the Imaging Function, to transition the application used for Participant access to the Imaging Function from an application referred to as the IFE, available on PTS and PBS, to a web-based application accessible through PBS, to be named Image Viewer, as discussed below. The proposed rule change to use Image Viewer on PBS as a replacement of IFE would (i) facilitate the modernization of the method of making certificate images available to Participants and (ii) make ministerial and clarifying changes to text of Procedures set forth in the Deposits Guide and Custody Guide, as discussed below. In addition, DTC would amend the Fee Guide to conform the description of a fee relating to the Imaging Function to reflect the proposed changes to the Imaging Function, as described below.

Deposit of Security Certificates With DTC

DTC performs various services for Participants to promote the prompt and accurate clearance and settlement of Securities, including maintaining Accounts that list a Participant's Securities holdings at DTC and allowing Participants to present Securities to be made eligible for DTC's depository and book-entry services. If a Security is accepted by DTC as meeting DTC's eligibility requirements for services and is Deposited with DTC for credit to the Securities Account of a Participant, it becomes an ''Eligible Security.'' [10] Other issues of Securities may be added through corporate actions with respect to Eligible Securities, including events such as name changes, mergers and spinoffs. Prior to processing a corporate action, DTC reviews the subject Securities for continuing eligibility.[11] Thereafter, Participants may Deposit shares of an Eligible Security into their respective DTC Accounts.[12]

Security certificates for Eligible Securities are eligible for Deposit at DTC when they are delivered to DTC in accordance with the Rules and Procedures and pursuant to Article 8 (''Article 8'') of the New York Uniform Commercial Code (''NYUCC'').[13] Under Article 8, a registered owner may transfer a Securities certificate, and the Securities the certificate represents, to a ''purchaser'' (in this case, DTC) by means of indorsement and Delivery.[14] DTC's Rules and Procedures require that the indorsement be made in favor of DTC's nominee, Cede & Co, which is the holder of record of Securities eligible for DTC's book-entry services.[15] Having thereby ''acquired'' the indorsed Security certificate as the purchaser, DTC comes into possession of the rights that the registered owner of the Security would have.[16] Ordinarily, under the DTC Rules and Procedures, the indorsed certificate is presented to the issuer or transfer agent for registration in the name of Cede & Co., so that, in addition to physical possession of the negotiable certificate, Cede & Co. is reflected as the registered holder on the books and records of the issuer maintained by its transfer agent.[17]

Separately, the Custody service enables Participants that hold (i) Securities that (A) are not presently eligible for book-entry services at DTC and/or (B) would otherwise be eligible for DTC book-entry services but are not registered in the name of DTC's nominee, Cede & Co., and/or (ii) certain assets that are not Securities (''Non-Security Assets''), to deposit those Securities and/or Non-Security Assets, as applicable, with DTC for safe-keeping, in accordance with requirements set forth in the Custody Guide.[18] Certificates for Securities and Non-Security Assets deposited through the Custody service are maintained in DTC's secure vault in a Participant's name or a Participant's customer's name (*i.e.,* they are not transferred into DTC's nominee name, Cede & Co).[19] In addition, once a Security is deposited into the Custody service, DTC may perform limited depository services relating to the Security including physical processing for the Security on a Participant's behalf, such as facilitating the transfer of Security Certificates, and providing services available through the Custody Reorganization Service.[20]

Imaging Function

DTC scans certificates that are deposited through the Deposits service or the Custody service to create electronic images that are made available to a Participant via email or facsimile per a request submitted by a Participant through IFE.[21] In order to be able to store or forward images, a Participant must access IFE, where it can request that an image be faxed or emailed to up to six recipients. Once received, an image can be converted into a compatible format, such as .pdf, before it can be stored on the recipient's own system or re-forwarded.

Proposed Replacement of IFE With Image Viewer

As mentioned above, IFE is reaching end-of-life because the vendor that supports it has notified DTC that it is terminating its support of the application, prompting DTC to replace it with a new application that would modernize image viewing capabilities. Image Viewer, the application that DTC would implement for the imaging function pursuant to the proposed rule change, has been developed by DTC and would be supported by DTC.

DTC believes that migrating the Imaging function from IFE, which is not web-based, to the web-based Image Viewer, would provide Participants with a method to obtain electronic images of their certificates that is more compatible with modern systems used by its Participants. Pursuant to the proposed rule change, Image Viewer would allow Participants to view, download and save images of certificates using the new web-based application Image Viewer. Through the new Image Viewer, images would be transmitted in a format that is readily accessible through most modern systems and which may be stored or viewed on the Participant's own systems.

As indicated above, the Image Viewer would only be available via PBS. DTC does not believe this will materially impact Participants' access to the service as all Participants that previously accessed IFE through PTS have connectivity to PBS.

[10] *See* Rule 5, *supra* note 5; DTC Operational Arrangements (Necessary for Securities to Become and Remain Eligible for DTC Services) (''Operational Arrangements''), Section 1, *available at http://www.dtcc.com/~/media/Files/Downloads/legal/issue-eligibility/eligibility/operational-arrangements.pdf.*

[14] NYUCC 8–301, 8–304, 8–102 and Official Comment 11 thereto.

[15] *See* Rule 6, *supra* note 5.

[16] NYUCC 8–302.

[17] *See* Deposits Guide, *supra* note 5 at 13.

[18] *See* Custody Guide for the types of Securities and Non-Security Assets eligible for deposit to the Custody Service, *supra* note 5, at 5, 12.

[19] *See* Custody Guide, *supra* note 5 at 4.

[20] *See* Custody Guide, *supra* note 5, at 14–17 (providing Procedures for the Custody Reorganization Service). The limited depository services provided by DTC as described above relate only to securities processing functions and do not apply to Non-Security Assets.

[21] *See* Deposits Guide, *supra* note 5 at 21; *See* Custody Guide *supra* note 5 at 4–5.

DTC believes that the capability to distribute facsimile copies of images through IFE has become obsolete as Participants request that images be delivered via email nearly all the time.[22] In this regard, pursuant to the proposed rule change, the option to choose facsimile distribution would be eliminated.

Proposed Rule Change

Pursuant to the proposed rule change DTC would make the following changes to the text of the Deposits Guide:

1. DTC would delete all references to IFE and its functionality, including related methods of distribution of images, throughout the Deposits Guide.

2. DTC would add a new section titled ''Image Viewer'' that describes the functionality for the application as described above, including that a Participant may view, download and save imaged copies of certificates via a web-based Image Viewer, which can be accessed from the following PBS functions: [23]

- Deposit Automation [24]—for regular, bearer [25]/nontransferable,[26] and reorg deposits; [27]
- Branch Inquiry [28]—for branch deposits;
- Restricted Deposit Service [29]—for deposits of certificates bearing a restricted legend;
- Deposit Inquiry—for deposits still in transfer as of the close of business the previous business day; [30] and
- Securities Transfer Legal Deposits—for legal deposits.[31]

3. DTC would revise individual references to imaging functionality included in tables relating to PTS/PBS functions for the Branch Deposits service and RDS to reflect the change that the Imaging Function would be accessible via Image Viewer instead of IFE, as described herein.

Pursuant to the proposed rule change DTC would make the following changes to the text of the Custody Guide:

1. DTC would make the following changes to the Imaging section:

a. Remove the two last paragraphs of the section that describe connectivity specifications necessary to obtain images (through IFE). These specifications would not apply to a Participant's ability to access Image Viewer;

b. Delete references to IFE and any IFE functionality;

c. Add a description that Participants using Image Viewer would have the ability to view, download and save and imaged copies of certificates via Image Viewer; and

d. Consolidate a sentence stating that each item is scanned front and back with another sentence that describes that each deposit ticket, certificate and legal document is scanned.

2. DTC would revise a reference to imaging functionality through IFE in the section titled ''Restricted Deposit Service'' to reflect that Participants would have the ability to view, download and save images of certificates via Image Viewer.

Pursuant to the proposed rule change, DTC would make the following change to the Fee Guide to conform text describing a related fee to the changes to the Imaging Function as described above:

Fee Name	**Amount($)**	**Conditions**
~~**Transmission of image of deposit by fax or e-mail, first recipient**~~ **Request to display/download an Image**	5.50	Per ~~**deposit per**~~ request

Implementation Timeframe

The proposed rule change would be implemented by February 28, 2020, on a date to be announced via a DTC Important Notice. DTC would include a legend on the cover page of the Deposits Guide and the Custody Guide stating (i) that proposed changes to the Procedures, as amended by proposed rule change would be available at *dtcc.com/~/media/Files/Downloads/legal/rule-filings/2020/DTC/SR-DTC-2020-003.pdf,* (ii) that these changes became effective upon filing with the SEC but have not yet been implemented,

[22] During the 12-month period ending November 2019, DTC received a total of approximately 29,000 IFE requests for images, with only 54 (less than .002 percent) of those requests using facsimile as the method of distribution. Although the option to choose facsimile distribution of an image by DTC would not be available upon implementation of the proposed rule change, every Participant has access to PBS and would be able to use Image Viewer upon implementation of the proposed change to retrieve an image. The image would be available to the Participant in a format that could be readily used by the Participant to re-transmit the image via facsimile if the Participant so chooses.

[23] These functions are currently available and are listed in the Deposits Guide for use by Participants for retrieval of certificate images through IFE. Pursuant to the proposed rule change, these functions would instead be used to access Image Viewer functionality.

[24] Deposit Automation is a PBS function that allows a Participant to prepare a deposit through the Deposit Automation System and generate a deposit ticket to be sent to DTC along with the physical Security certificates. *See* Deposits Guide, *supra* note 5 at 7 and 12.

[25] ''Bearer deposit'' refers to the deposit of a bearer Security. A bearer Security is a Security that is not registered with the issuer in the name of the owner and that is negotiable without endorsement and transferred by delivery. *See* Deposits Guide, *supra* note 5 at 10.

[26] Non-transferable Securities are Securities for which transfer services for a Security, typically through the registration of the Security on books maintained by a transfer agent, are not available. *See* Securities Exchange Act Release No. 86897 (September 6, 2019), 84 FR 48187 (September 12, 2019). *See* Deposits Guide, *supra* note 5 at 34–35 for Deposit Procedures relating to non-transferable Securities.

[27] Reorg Deposits refers to the function that allows Participants to deposit an Eligible Security that is undergoing or has undergone a mandatory reorganization, as well as full calls and partial calls. *See* Deposits Guide, *supra* note 5 at 25.

[28] ''Branch inquiry'' allows a Participant to view the status of a Branch Deposit. *See* Deposits Guide, *supra* note 5 at 12. A Branch Deposit refers to a deposit made through the Branch Deposit service where Participant's branch office receives physical certificates from their customers and enter details of the certificates into their internal system. *See* Deposits Guide, *supra* note 5 at 11. The branch office of the Participant then transmits the certificate details to its main office and ships the Securities to DTC. *See id.*

[29] *See* Deposits Guide, *supra* note 5 at 27–30. DTC's Restricted Deposit Service (''RDS'') allows a Participant to deposit restricted securities into a Participant's segregated account within DTC's Custody Service until the applicable restriction has been lifted and the full or partial sale of the securities is complete. *See* Securities Exchange Act Release No. 34–41891 (September 20, 1999), 64 FR 52115 (September 27, 1999). Securities credited to this account will not be registered in the name of Cede & Co. and therefore will not be available for book-entry transfer. *See id.* In addition, RDS functionality allows the processing of a transfer of all or a portion of the securities once the restriction is lifted, and the registration of the unrestricted securities (or portion thereof) in the name of Cede & Co. *See id.*

[30] The ''Deposit Inquiry'' function allows a Participant to receive a report that tracks the Participant's deposit activity. *See* Deposits Guide, *supra* note 5 at 37.

[31] A legal deposit consists of a Security registered in the name of the holder (*i.e.,* not a bearer security) and the legal documentation required for the transfer registration of that Security into the name of DTC's nominee, Cede & Co. *See* Deposits Guide, *supra* note 5 at 16.

(iii) the proposed changes will be implemented by February 28, 2020 on a date to be announced via a DTC Important Notice and (iv) upon implementation, this legend would automatically be removed from these Procedures.

2. Statutory Basis

DTC believes that this proposal is consistent with the requirements of the Act,[32] as described below.

Section 17A(b)(3)(F) of the Act [33] requires, *inter alia,* that the Rules be designed to assure the safeguarding of securities which are in the custody or control of DTC or for which it is responsible. As mentioned above, DTC scans certificates, that are deposited through the Deposits service or the Custody service and then held in DTC's secure vault, to create images that are made available to a Participant in an electronic format. The proposed rule change would migrate the distribution of images of certificates of Securities, to a more flexible application designed to use a web-based platform that would facilitate the accessibility of images to Participants by providing for enhanced compatibility with modern systems used by Participants to obtain the images. In this regard, the proposed rule change would allow DTC to continue to provide images of certificates in an electronic format that is readily accessible to Participants, without the need to remove a certificate from the vault to be able to make and provide a copy to the Participant. Therefore, DTC believes that the proposed rule change is consistent with Section 17A(b)(3)(F) of the Act,[34] because it is designed to assure the safeguarding of securities which are in the custody and control of DTC or for which it is responsible, by facilitating an accessible means for Participants to obtain copies of Securities certificates deposited by them without removal of the certificates from DTC's secure vault.

(B) Clearing Agency's Statement on Burden on Competition

DTC does not believe that the proposed rule change will have any impact on competition because neither the decommissioning of IFE nor the elimination of access to the Imaging Function through PTS would affect Participants' ability to access the Imaging Function, as Participants will be able direct their imaging requests through Image Viewer.

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments relating to this proposed rule change have not been solicited or received. DTC will notify the Commission of any written comments received by DTC.

III. Date of Effectiveness of the Proposed Rule Change, and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [35] and paragraph (f) of Rule 19b–4 thereunder.[36] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–DTC–2020–003 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

All submissions should refer to File Number SR–DTC–2020–003. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of DTC and on DTCC's website (*http://dtcc.com/legal/sec-rule-filings.aspx*). All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–DTC–2020–003 and should be submitted on or before March 10, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[37]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–88160; File No. SR–CboeBYX–2020–006]

Self-Regulatory Organizations; Cboe BYX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the BYX Fee Schedule To Correct an Inadvertent Drafting Error Introduced in a Previous Rule Filing

February 11, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that, on January 31, 2020, Cboe BYX Exchange, Inc. (the ''Exchange'' or ''BYX'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C.78s(b)(1).

[2] 17 CFR 240.19b–4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BYX Exchange (the ''Exchange'' or ''BYX'') is filing with the Securities and Exchange Commission (''Commission'') a proposed rule change to amend the BYX Fee Schedule to correct an inadvertent drafting error introduced in a previous rule filing. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (*http://markets.cboe.com/us/equities/regulation/rule_filings/byx/*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend the BYX Fee Schedule to correct an inadvertent drafting error introduced in a previous rule filing that adopted the definition of ''Step-Up Add TCV''.

On January 2, 2020, the Exchange filed a proposed rule change to replace the Non-Displayed Liquidity Incentives with Step-Up Tiers.[3] The purpose of that filing was to offer Step-Up Tiers that would provide Members an opportunity to receive a discounted rate from the standard fee assessment for displayed liquidity adding orders that yield fee codes ''B'',[4] ''V'',[5] or ''Y''.[6] Specifically, to qualify for Tier 1, a Member must have a ''Step-Up Add TCV'' from December 2019 of greater than or equal to 0.05%. Accordingly, the Exchange also adopted a definition of ''Step-Up Add TCV'' to the Fee Schedule which would mean add ADV as a percentage of TCV in the relevant baseline month subtracted from current add ADV as a percentage of TCV. In its adoption of the definition of ''Step-Up Add TCV'', the Exchange inadvertently referenced the terms ''add ADV'' rather than ''ADAV''.[7] Therefore, the Exchange now proposes to amend the definition of Step-Up Add TCV to reference the term ADAV rather than add ADV. The Exchange notes that the proposed definition is substantially consistent with the definition in the Fee Schedules of the Exchange's affiliated exchanges.[8]

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,[9] in general, and furthers the objectives of Section 6(b)(4),[10] in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and issuers and other persons using its facilities. Specifically, the Exchange believes that the proposed rule change is reasonable, equitable, and not unfairly discriminatory as it does not change the fees or rebates assessed by the Exchange, but rather corrects an inadvertent error to a definition noted in the Fee Schedule. The Exchange believes that amending the terms ''add ADV'' to ''ADAV'' in the definition of ''Step-Up Add TCV'' would reduce confusion around the Exchange's charges and ensure that these fees are appropriately referenced on the Fee Schedule.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on intramarket or intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. Rather, the proposed rule change is designed to reduce potential confusion to the definition of ''Step-Up Add TCV'' referenced in the Fee Schedule by amending the terms ''add ADV'' to ''ADAV''. The Exchange believes that this change would increase transparency to the benefit of members and investors without having any impact on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A)[11] of the Act and subparagraph (f)(2) of Rule 19b–4[12] thereunder, because it establishes a due, fee, or other charge imposed by the Exchange.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[13] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File No. SR–CboeBYX–2020–006 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

[3] *See* Securities Exchange Act Release No. 34–87960 (January 14, 2020) 85 FR 3437 (January 21, 2020) (SR–CboeBYX–2020–0001[sic]).

All submissions should refer to File No. SR–CboeBYX–2020–006. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR–CboeBYX–2020–006, and should be submitted on or before March 10, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[14]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–88172; File No. SR–NYSECHX–2020–02]

Self-Regulatory Organizations; NYSE Chicago, Inc.; Notice of Filing of Proposed Rule Change To Establish a Schedule of Wireless Connectivity Fees and Charges With Wireless Connections

February 11, 2020.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act''),[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on January 30, 2020, the NYSE Chicago, Inc. (''NYSE Chicago'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to establish a schedule of Wireless Connectivity Fees and Charges (the ''Wireless Fee Schedule'') with wireless connections between the Mahwah, New Jersey data center and other data centers. The proposed change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to establish the Wireless Fee Schedule with wireless connections between the Mahwah, New Jersey data center and three data centers that are owned and operated by third parties unaffiliated with the Exchange: (1) Carteret, New Jersey, (2) Secaucus, New Jersey, and (3) Markham, Canada (collectively, the ''Third Party Data Centers''). Market participants that purchase such a wireless connection (a ''Wireless Connection'') are charged an initial and monthly fee. In addition, the Exchange proposes to include a General Note to the Wireless Fee Schedule.

The Exchange does not believe that the present proposed change is a change to the ''rules of an exchange''[4] required to be filed with the Commission under the Act. The definition of ''exchange'' under the Act includes ''the market facilities maintained by such exchange.''[5] Based on its review of the relevant facts and circumstances, and as discussed further below, the Exchange has concluded that the Wireless Connections are not facilities of the Exchange within the meaning of the Act, and therefore do not need to be included in its rules.

The Exchange is making the current proposal solely because the Staff of the Commission has advised the Exchange that it believes the Wireless Connections are facilities of the Exchange and so must be filed as part of its rules.[6] The Staff has not set forth the basis of its conclusion beyond verbally noting that the Wireless Connections are provided by an affiliate of the Exchange and a market participant could use a Wireless Connection to trade on, or receive the market data of, the Exchange.[7]

The Exchange expects the proposed change to be operative 60 days after the present filing becomes effective.

The Exchange and the ICE Affiliates

To understand the Exchange's conclusion that the Wireless Connections are not facilities of the

[3] 17 CFR 240.19b–4.

[4] *See* 15 U.S.C. 78c(a)(27) (defining the term ''rules of an exchange'').

[5] 15 U.S.C. 78c(a)(1). See 15 U.S.C. 78c(a)(2) (defining the term ''facility'' as applied to an exchange).

[6] Telephone conversation between Commission staff and representatives of the Exchange, December 12, 2019.

[7] *Id.* The Commission has previously stated that services were facilities of an exchange subject to the rule filing requirements without fully explaining its reasoning. In 2010, the Commission stated that exchanges had to file proposed rule changes with respect to co-location because ''[t]he Commission views co-location services as being a material aspect of the operation of the facilities of an exchange.'' The Commission did not specify why it reached that conclusion. *See* Securities Exchange Act Release No. 61358 (January 14, 2010), 75 FR 3594 (January 21, 2010) (concept release on equity market structure), at note 76.

In addition, in 2014, the Commission instituted proceedings to determine whether to disapprove a proposed rule change by The NASDAQ Stock Market LLC (''Nasdaq'') on the basis that Nasdaq's ''provision of third-party market data feeds to co-located clients appears to be an integral feature of its co-location program, and co-location programs are subject to the rule filing process.'' Securities Exchange Act Release No. 72654 (July 22, 2014), 79 FR 43808 (July 28, 2014) (SR–NASDAQ–2014–034). In its order, the Commission did not explain why it believed that the provision of third party data was an integral feature of co-location, or if it believed that it was a facility of Nasdaq, although the Nasdaq filing analyzed each prong of the definition of facility in turn. *See* Securities Exchange Act Release No. 71990 (April 22, 2014), 79 FR 23389 (April 28, 2014) (SR–NASDAQ–2014–034).

Exchange within the meaning of the Act, it is important to understand the very real distinction between the Exchange and its corporate affiliates (the ''ICE Affiliates''). The Exchange is an indirect subsidiary of Intercontinental Exchange, Inc. (''ICE''). Around the world, ICE operates seven regulated exchanges in addition to the Exchange and its four national securities exchange affiliates,[8] including futures markets, as well as six clearing houses. Among others, the ICE Affiliates are subject to the jurisdiction of regulators in the U.S., U.K., E.U., the Netherlands, Canada and Singapore.[9] In all, the ICE Affiliates include hundreds of ICE subsidiaries, including more than thirty that are significant legal entity subsidiaries as defined by Commission rule.[10]

Through its ICE Data Services (''IDS'') business,[11] ICE operates the ICE Global Network (''IGN''), a global connectivity network whose infrastructure provides access to over 150 global markets, including the Exchange and Affiliate SROs, and over 750 data sources. All the ICE Affiliates are ultimately controlled by ICE, as the indirect parent company, but generally they do not control each other. In the present case, it is IDS, not the Exchange, that provides the Wireless Connections to market participants. The Exchange does not control IDS.

Wireless Connections

If a market participant wants a connection between one of the Third Party Data Centers and the Mahwah data center, it may opt to purchase a Wireless Connection, for which it will be charged an initial and monthly fee.

Once requested, IDS establishes a Wireless Connection between the IDS equipment in the Third Party Data Center and IDS equipment in the Mahwah data center. IDS contracts with a non-ICE entity to provide the Wireless Connections between the Secaucus and Carteret Third Party Data Centers and the Mahwah data center, through a series of towers equipped with wireless equipment. IDS uses its own wireless network for the Wireless Connection between the Markham Third Party Data Center and the Mahwah data center. At either end of the Wireless Connection, the customer uses a cross connect or other cable to connect its own equipment to the IDS equipment.[12] In the Mahwah data center, the cross connect leads to the customer's server in co-location.

The Wireless Connection does not connect to the Exchange trading and execution systems, nor is it a system of communication from the customer's server in co-location to the trading and execution systems of the Exchange or the Affiliate SROs (collectively, the ''SRO Systems''). Rather, a Wireless Connection facilitates the customer's interaction with itself. Essentially, a Wireless Connection is an empty pipe that a customer can use to communicate between its equipment in co-location and its equipment in the Third Party Data Center.

Customers have control over the data they send over their Wireless Connections. They may, but are not required to, use them to send trading orders to their equipment in co-location; relay Exchange market data, third party market data and public quote feeds from Securities Information Processors; send risk management, billing, or compliance information to their preferred location; or to carry any other market information or other data they wish to and from their equipment in the Third Party Data Centers and Mahwah data center. The Exchange does not, and cannot, know what data customers send over the Wireless Connections. The Exchange does not send or receive any data over the Wireless Connections.

Market participants that want a connection between a Third Party Data Center and the Mahwah data center have options. There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Carteret and Secaucus Third Party Data Centers using wireless equipment installed on towers and buildings near the Mahwah data center. Some market participants have their own proprietary wireless networks. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers.

The Wireless Connections Are Not Facilities of the Exchange

The Definition of ''Exchange''

The definition of ''exchange'' focuses on the exchange entity and what it does: [13]

The term ''exchange'' means any organization, association, or group of persons, whether incorporated or unincorporated, which constitutes, maintains, or provides a market place or facilities for bringing together purchasers and sellers of securities or for otherwise performing with respect to securities the functions commonly performed by a stock exchange as that term is generally understood, and includes the market place and the market facilities maintained by such exchange.

If the ''exchange'' definition included all of an exchange's affiliates, the ''Exchange'' would encompass a global network of futures markets, clearing houses, and data providers, and all of those entities worldwide would be subject to regulation by the Commission. That, however, is not what the definition in the Act provides.

The Exchange and the Affiliate SROs fall squarely within the Act's definition of an ''exchange'': They each provide a market place to bring together purchasers and sellers of securities and perform with respect to securities the functions commonly performed by a stock exchange.

That is not true for the non-exchange ICE Affiliates. Those ICE Affiliates do not provide such a marketplace or perform ''with respect to securities the functions commonly performed by a stock exchange,'' and therefore they are not an ''exchange'' or part of the ''Exchange'' for purposes of the Act. Accordingly, in conducting its analysis, the Exchange does not automatically collapse the ICE Affiliates into the Exchange. The Wireless Connections are also not part of the Exchange, as they are services, and as such cannot be part of an ''organization, association or group of persons'' with the Exchange.

In Rule 3b–16 the Commission further defined the term ''exchange'' under the Act, stating that: [14]

(a) An organization, association, or group of persons shall be considered to constitute, maintain, or provide ''a market place or facilities for bringing together purchasers and sellers of securities or for otherwise performing with respect to securities the functions commonly performed by a stock exchange,'' as those terms are used in

[8] The Exchange's four national securities exchange affiliates are the New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., and NYSE National, Inc. (together, the ''Affiliate SROs'').

[9] Intercontinental Exchange, Inc. Annual Report on Form 10–K for the year ended December 31, 2018, Exhibit 21.1 (filed February 7, 2019), at 15–16.

[10] *Id.* at Exhibit 21.1.

[11] The IDS business operates through several different ICE Affiliates, including NYSE Technologies Connectivity, Inc., an indirect subsidiary of the NYSE.

[12] A cable connects the IDS and customer equipment in the Markham Third Party Data Center. Elsewhere, the customer buys a cross connect from IDS. The cross connects utilized in the Mahwah data center are filed with the Commission. *See* Securities Exchange Act Release No. 87408 (October 28, 2019), 84 FR 58778 (November 1, 2019) (SR–NYSECHX–2019–12), at 58783.

[13] 15 U.S.C. 78c(a)(1).

[14] 17 CFR 240.3b–16(a).

section 3(a)(1) of the Act . . . if such organization, association, or group of persons:

(1) Brings together the orders for securities of multiple buyers and sellers; and

(2) Uses established, non-discretionary methods (whether by providing a trading facility or by setting rules) under which such orders interact with each other, and the buyers and sellers entering such orders agree to the terms of a trade.

The non-exchange ICE Affiliates do not bring ''together orders for securities of multiple buyers and sellers,'' and so are not an ''exchange'' or part of the ''Exchange'' for purposes of Rule 3b–16.

The relevant question, then, is whether the Wireless Connections are ''facilities'' of the Exchange.

The Definition of ''Facility''

The Act defines a ''facility'' [15] as follows:

The term ''facility'' when used with respect to an exchange includes [1] its premises, [2] tangible or intangible property whether on the premises or not, [3] any right to the use of such premises or property or any service thereof for the purpose of effecting or reporting a transaction on an exchange (including, among other things, any system of communication to or from the exchange, by ticker or otherwise, maintained by or with the consent of the exchange), and [4] any right of the exchange to the use of any property or service.

In 2015 the Commission noted that whether something is a ''facility'' is not always black and white, as ''any determination as to whether a service or other product is a facility of an exchange requires an analysis of the particular facts and circumstances.'' [16] Accordingly, the Exchange understands that the specific facts and circumstances of the Wireless Connections must be assessed before a determination can be made regarding whether or not they are facilities of the Exchange.[17]

The first prong of the definition is that ''facility,'' when used with respect to an exchange, includes ''its premises.'' That prong is not applicable in this case, because the Wireless Connections are not premises of the Exchange. The term ''premises'' is generally defined as referring to an entity's building, land, and appurtenances.[18] The wireless network that runs between IDS equipment in the Mahwah data center and IDS equipment in Third Party Data Centers, much of which is actually owned, operated and maintained by a non-ICE entity,[19] does not connect to the Exchange trading and execution systems and is not the premises of the Exchange. The portion of the Mahwah data center where the ''exchange'' functions are performed—*i.e.,* the SRO Systems that bring together purchasers and sellers of securities and perform with respect to securities the functions commonly performed by a stock exchange—could be construed as the ''premises'' of the Exchange, but the same is not true for a wireless network that is almost completely outside of the Mahwah data center.

The second prong of the definition of ''facility'' provides that a facility includes the exchange's ''tangible or intangible property whether on the premises or not.'' The Wireless Connections are not the property of the Exchange: They are services. The underlying wireless network is owned by ICE Affiliates and a non-ICE entity. As noted, the Act does not automatically collapse affiliates into the definition of an ''exchange.'' A review of the facts set forth above shows that there is a real distinction between the Exchange and its ICE Affiliates with respect to the Wireless Connections, and so something owned by an ICE Affiliate is not owned by the Exchange.

The third prong of the definition of ''facility'' provides that a facility includes any right to the use of such premises or property or any service thereof for the purpose of effecting or reporting a transaction on an exchange (including, among other things, any system of communication to or from the exchange, by ticker or otherwise, maintained by or with the consent of the exchange).[20]

This prong does not capture the Wireless Connections because the Exchange does not have the right to use the Wireless Connections to effect or report a transaction on the Exchange. ICE Affiliates and a non-ICE entity own and maintain the wireless network underlying the Wireless Connections, and ICE Affiliates, not the Exchange, offer and provide the Wireless Connections to customers. The Exchange does not know whether or when a market participant has entered into an agreement for a Wireless Connection and has no right to approve or disapprove of the provision of a Wireless Connection, in the same way that the Exchange would have no right to approve or disapprove of the provision of connectivity to a market participant in co-location or elsewhere by any other provider. The Exchange does not put content onto the Wireless Connections. When a customer terminates a Wireless Connection, the Exchange does not consent to the termination.

The Wireless Connections do not connect to the Exchange trading and execution systems. As such, the Wireless Connections are not provided for ''the purpose of effecting or reporting a transaction on'' the Exchange. Rather, a Wireless Connection facilitates the customer's interaction with itself. Each Wireless Connection connects the IDS equipment in the Third Party Data Center and IDS equipment in the Mahwah data center. At either end of the Wireless Connection, the customer uses a cross connect or other cable to connect its own equipment to the IDS equipment. In the Mahwah data center, the cross connect leads to the customer's server in co-location, not the Exchange trading and execution systems.

It is important to remember that the customers' equipment in the Mahwah data center is not provided by, part of, or a facility of, the Exchange. The Exchange provides the space in which customers' equipment is housed, and permits customers to use their equipment to communicate with the SRO Systems through services, such as connections to the local area networks, that are filed with the Commission.[21]

[15] 15 U.S.C. 78c(a)(2).

[16] Securities Exchange Act Release No. 76127 (October 9, 2015), 80 FR 62584 (October 16, 2015) (SR–NYSE–2015–36), at note 9 (order approving proposed rule change amending Section 907.00 of the Listed Company Manual). *See also* 79 FR 23389, *supra* note 7, at note 4 (noting that that the definition of the term ''facility'' has not changed since it was originally adopted) and 23389 (stating that the SEC ''has not separately interpreted the definition of 'facility' '').

[17] As with the definition of ''exchange,'' the ICE Affiliates do not automatically fall within the definition of a ''facility.'' The definition focuses on ownership and the right to use properties and services, not corporate relationships. Indeed, if the term ''exchange'' in the definition of a facility included ''an exchange and its affiliates,'' then the rest of the functional prongs of the facility definition would be meaningless. Fundamental rules of statutory construction dictate that statutes be interpreted to give effect to each of their provisions, so as not to render sections of the statute superfluous.

[18] *See, e.g.,* definition of ''premises'' in Miriam-Webster Dictionary, at *https://www.merriam-webster.com/dictionary/premises,* and Cambridge English Dictionary, at *https://dictionary.cambridge.org/us/dictionary/english/premises.*

[19] A non-ICE entity owns, operates and maintains the wireless network between the Mahwah data center and the Carteret and Secaucus Third Party Data Centers pursuant to an agreement between the non-ICE entity and an ICE Affiliate.

[20] 15 U.S.C. 78c(a)(2).

[21] *See* 83 FR 26314, *supra* note 12. As described by the Commission, co-location is when a ''trading center . . . rents rack space to market participants that enables them to place their servers in close physical proximity to a trading center's matching

Continued

The Exchange provides the space, but not the equipment. Accordingly, even if a customer were to use a Wireless Connection to send instructions to trade or to receive a report of a trade, the customer would not be sending instructions to the Exchange, but rather to its own equipment.

The Exchange believes the example in the parenthetical in the third prong of the definition of ''facility'' cannot be read as an independent prong of the definition. Such a reading would ignore that the parentheses and the word ''including'' clearly indicate that ''any system of communication to or from an exchange . . . maintained by or with the consent of the exchange'' is explaining the preceding text. By its terms, the parenthetical is providing a non-exclusive example of the type of property or service to which the prong refers, and does not remove the requirement that there must be a right to use the premises, property or service to effect or report a transaction on an exchange. It is making sure the reader understands that ''facility'' includes a ticker system that an exchange has the right to use, not creating a new fifth prong to the definition. In fact, if the ''right to use'' requirement were ignored, every communication provider that connected to an exchange, including any broker-dealer system and telecommunications network, would become a facility of that exchange so long as the exchange consented to the connection, whether or not the connection was used to trade or report a trade, and whether or not the exchange had any right at all to the use of the connection.

The fourth prong of the definition provides that a facility includes ''any right of the exchange to the use of any property or service.'' [22] As described above, the Exchange does not have the right to use the Wireless Connections. Instead, the customers of the Wireless Connections are customers who enter into an agreement with ICE Affiliates for connections over a wireless network, much of which is owned, operated and maintained by a non-ICE entity.

Accordingly, for all the reasons discussed above, the Wireless Connections provided by ICE Affiliates are not facilities of the Exchange.

The legal conclusion that the Wireless Connections are not facilities of the Exchange is strongly supported by the facts. The Wireless Connections are neither necessary for, nor integrally connected to, the operations of the Exchange. They are empty pipes that customers can use as they like. In this context, IDS simply acts as a vendor selling connectivity, just like the other vendors that offer wireless connections in the Carteret and Secaucus Third Party Data Centers and fiber connections to all the Third Party Data Centers. The fact that in this case it is ICE Affiliates that offer the Wireless Connections does not make the Wireless Connections facilities of the Exchange any more than are the connections offered by other parties.

Further, the Exchange believes that requiring it to file this proposed rule change is not necessary in order for the Commission to ensure that the Exchange is satisfying its requirements under the Act. Because, as described above, the Wireless Connections are not necessary for, nor connected to, the operations of the Exchange, and customers are not required to use the Wireless Connections, holding the Wireless Connections to the statutory standards in Section 6(b) serves no purpose.

Instead, the sole impact of the requirement that the Exchange file the Wireless Connections is to place an undue burden on competition on the ICE Affiliates that offer the connections, compared to their market competitors. This filing requirement, thus, itself is inconsistent with the requirement under Section 6(b)(8) of the Act that the rules of the exchange not ''impose any burden on competition not necessary or appropriate in furtherance of the purposes of [the Act].'' [23] This burden on competition arises because IDS would be unable, for example, to offer a client or potential client a different bandwidth it requests, without the delay and uncertainty of a filing, but its competitors will. Similarly, if a competitor decides to undercut IDS' fees because IDS, unlike the competitor, has to make its fees public, IDS will not be able to respond quickly, if at all. Indeed, because its competitors are not required to make their services or fees public, and are not subject to a Commission determination of whether such services or fees are ''not unfairly discriminatory'' or equitably allocated, IDS is at a competitive disadvantage from the very start.

The Proposed Service and Fees

As noted above, the Exchange proposes to add to its rules a Wireless Fee Schedule setting forth the fees charged by IDS related to the Wireless Connections between the Mahwah data center and the Third Party Data Centers.

For each Wireless Connection, a customer would be charged a non-recurring initial charge and a monthly recurring charge (''MRC'') that would vary depending upon bandwidth and the location of the connection. The proposal would waive the first month's MRC, to allow customers to test a new Wireless Connection for a month before incurring any MRCs, and the Exchange proposes to add text to the Wireless Fee Schedule accordingly. If a customer had an existing Wireless Connection and opted to upgrade or downgrade to a different size circuit connecting to the same Third Party Access Center, it would not be subject to the initial charge.

The Exchange proposes to establish the Wireless Fee Schedule with a section under the heading ''A. Wireless Connectivity'' setting forth the fees charged by IDS related to the Wireless Connections, as follows:

Type of service	Description	Amount of charge
Wireless Connection between Mahwah Data Center and Secaucus access center.	10 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $9,000.
Wireless Connection between Mahwah Data Center and Secaucus access center.	50 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $13,500.
Wireless Connection between Mahwah Data Center and Secaucus access center.	100 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $23,000.
Wireless Connection between Mahwah Data Center and Secaucus access center.	200 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $44,000.
Wireless Connection between Mahwah Data Center and Carteret access center.	10 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $10,000.

engine.'' 75 FR 3594, *supra* note 7, at 3610 (noting that ''[c]o-location helps minimize network and other types of latencies between the matching engine of trading centers and the servers of market participants'').

[22] *Id.*

[23] 15 U.S.C. 78f(b)(8).

Type of service	Description	Amount of charge
Wireless Connection between Mahwah Data Center and Carteret access center.	50 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $15,000.
Wireless Connection between Mahwah Data Center and Carteret access center.	100 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $25,000.
Wireless Connection between Mahwah Data Center and Carteret access center.	200 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $45,000.
Wireless Connections between (a) Mahwah Data Center and Carteret access center and (b) Mahwah Data Center and Secaucus Data Center.	50 Mb Circuits	$15,000 initial charge for both connections plus monthly charge for both connections of $22,000.
Wireless Connection between Mahwah Data Center and Markham access center.	1 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $6,000.
Wireless Connection between Mahwah Data Center and Markham access center.	5 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $15,500.
Wireless Connection between Mahwah Data Center and Markham access center.	10 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $23,000.

Proposed General Note

The Exchange and each of the Affiliate SROs are filing the Wireless Connections. Although each such market will have a Wireless Fee Schedule, a market participant that obtains a Wireless Connection will not be charged more than once for that service, irrespective of whether it is a member of one, some or none of the Exchange and the Affiliate SROs. Accordingly, the Exchange proposes that the Wireless Fee Schedule include a General Note that describes the billing practice for market participants, as follows:

A market participant that incurs fees from the New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., NYSE Chicago, Inc. or NYSE National, Inc. (collectively, the ''Affiliate SROs'') for a particular service pursuant to this Fee Schedule shall not be subject to fees for the same service charged by the other Affiliate SROs.

The proposed General Note would be consistent with the first general note in the co-location section of the Exchange and Affiliate SROs' price lists and fee schedule,[24] as well as the Nasdaq Stock Market rules.[25]

Application and Impact of the Proposed Change

The proposed change would apply to all market participants equally. The proposed change would not apply differently to distinct types or sizes of market participants. Market participants that require other types or sizes of network connections between the Mahwah data center and the Third Party Data Centers could still request them. The purchase of the service is completely voluntary and the Wireless Fee Schedule will be applied uniformly to all market participants.

Competitive Environment

There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Secaucus and Carteret Third Party Access Centers using wireless equipment installed on towers and buildings near the Mahwah data center. In addition, some market participants have their own proprietary wireless networks. Based on the information available to it, the Exchange believes that the wireless connections offered by non-ICE entities provide connectivity at the same or similar speed as the Wireless Connections, and at the same or similar cost. The Exchange believes the Wireless Connections between the Mahwah data center and the Markham Third Party Data Center are the first public, commercially available wireless connections between the two points, creating a new connectivity option for customers in Markham.

Market participants that want a connection between a Third Party Data Center and the Mahwah data center have additional options. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers.

Wireless connections involve beaming signals through the air between antennas that are within sight of one another. Because the signals travel a straight, unimpeded line, and because light waves travel faster through air than through glass (fiber optics), wireless messages have lower latency than messages travelling through fiber optics. At the same time, as a general rule wireless networks have less uptime than fiber networks. Wireless networks are directly and immediately affected by adverse weather conditions, which can cause message loss and outage periods. Wireless networks cannot be configured with redundancy in the same way that fiber networks can. As a result, an equipment or weather issue at any one location on the network will cause the entire network to have an outage. In addition, maintenance can take longer than it would with a fiber based network, as the relevant tower may be in a hard to reach location, or weather conditions may present safety issues, delaying technicians servicing equipment. Even under normal conditions, a wireless network will have a higher error rate than a fiber network of the same length.

The proposed Wireless Connections traverse wireless connections through a series of towers equipped with wireless equipment, including, in the case of the Carteret and Secaucus connections, a pole on the grounds of the Mahwah data center. With the exception of the non-ICE entity that owns the wireless network used for the Wireless Connections to Secaucus and Carteret,[26] third parties do not have access to such pole. However, access to such pole is not required for third parties to establish wireless networks that can compete with the Wireless Connections to the Carteret and Secaucus Third Party Data Centers, as witnessed by the existing wireless connections offered by non-ICE entities currently serving market participants.

Proximity to a data center is not the only determinant of a wireless network's latency. Rather, the latency of a wireless network depends on several factors. Variables include the wireless equipment utilized; the route of, and

[24] *See* Securities Exchange Act Release Nos. 70206 (August 15, 2013), 78 FR 51765 (August 21, 2013) (SR–NYSE–2013–59); 70176 (August 13, 2013), 78 FR 50471 (August 19, 2013) (SR–NYSEMKT–2013–67); 70173 (August 13, 2013), 78 FR 50459 (August 19, 2013) (SR–NYSEArca–2013–80); and 83351 (May 31, 2019), 83 FR 26314 June 6, 2018) (SR–NYSENAT–2018–07), and 84 FR 58778, *supra* note 12, at 58778.

[25] *See, e.g.,* The Nasdaq Stock Market General Equity and Options Rules, General 8, Section 1.

[26] *See* note 19, *supra.*

number of towers or buildings in, the network; and the fiber equipment used at either end of the connection. Moreover, latency is not the only consideration that a market participant may have in selecting a wireless network. Other considerations may include the bandwidth of the offered connection; amount of network uptime; the equipment that the network uses; the cost of the connection; and the applicable contractual provisions. Indeed, fiber network connections may be more attractive to some market participants as they are more reliable and less susceptible to weather conditions.

2. Statutory Basis

Although the Exchange does not believe that the present proposed change is a change to the ''rules of an exchange'' [27] required to be filed with the Commission under the Act, the Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[28] in general, and furthers the objectives of Section 6(b)(5) of the Act,[29] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to, and perfect the mechanisms of, a free and open market and a national market system and, in general, to protect investors and the public interest and does not unfairly discriminate between customers, issuers, brokers, or dealers. The Exchange also believes that the proposed rule change is consistent with Section 6(b)(4) of the Act,[30] because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The Proposed Change Is Reasonable

The Exchange believes its proposal is reasonable.

There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Secaucus and Carteret Third Party Access Centers using wireless equipment installed on towers and buildings near the Mahwah data center. In addition, some market participants have their own proprietary wireless networks. Based on the information available to it, the Exchange believes that the wireless connections offered by non-ICE entities provide connectivity at the same or similar speed as the Wireless Connections, and at the same or similar cost. The Exchange believes the Wireless Connections between the Mahwah data center and the Markham Third Party Data Center are the first public, commercially available wireless connections between the two points, creating a new connectivity option for customers in Markham.

The Wireless Connections provide market participants with one means of connectivity, but substitute products are available, as witnessed by the existing wireless connections offered by non-ICE entities currently serving market participants. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers.

Market participants' considerations in determining what connectivity to purchase may include latency; bandwidth size; amount of network uptime; the equipment that the network uses; the cost of the connection; and the applicable contractual provisions. Indeed, fiber network connections may be more attractive to some market participants as they are more reliable and less susceptible to weather conditions.

The Exchange believes that the proposed pricing for the Wireless Connections is reasonable because it allows market participants to select the connectivity options that best suit their needs. A market participant that opts to connect with a Wireless Network would be able to select the route and bandwidth that better suit its needs, thereby helping it tailor its operations to the requirements of its business operations. The fees also reflect the benefit received by customers in terms of lower latency over the fiber optics options.

Only market participants that voluntarily select to receive Wireless Connections are charged for them, and those services are available to all market participants. Furthermore, the Exchange believes that the services and fees proposed herein are reasonable because, in addition to the services being completely voluntary, they are available to all market participants on an equal basis (*i.e.,* the same products and services are available to all market participants). All market participants that voluntarily select Wireless Connections would be charged the same amount for the same services and would have their first month's MRC for Wireless Connections waived.

Overall, the Exchange believes that the proposed change is reasonable because the Wireless Connections described herein are offered as a convenience to market participants, but offering them requires the provision, maintenance and operation of the Mahwah data center, wireless networks and access centers in the Third Party Data Centers, including the installation and monitoring, support and maintenance of the services.

The Exchange believes that the proposed waiver of the first month's MRC is reasonable as it would allow customers to test a Wireless Connection for a month before incurring any monthly recurring fees and may act as an incentive to market participants to connect to a Wireless Connection. The Exchange believes that the proposed waiver of the initial charge if a customer has an existing Wireless Connection and opted to upgrade or downgrade to a different size circuit at the same Third Party Data Center is reasonable because the change in Wireless Connection would not require IDS to do any physical work to implement the connection.

The Exchange believes that its proposed General Note is reasonable because it would provide transparency regarding how the billing practice for Wireless Connections functions. The Exchange believes that a customer should not be charged more than once for a Wireless Connection. For example, to charge one customer twice for a Wireless Connection because that customer is a member of two Affiliate SROs, and so subject to the rules of both Affiliate SROs, when another customer that buys the same Wireless Connection only pays once, would not promote just and equitable principles of trade, and could result in the Exchanges and Affiliate SROs receiving the proceeds from multiple fees despite only providing a service once.

The Proposed Change Is an Equitable Allocation of Fees and Credits

The Exchange believes its proposal equitably allocates its fees among its market participants.

The proposed change would not apply differently to distinct types or sizes of market participants. Rather, it would apply to all market participants equally. As is currently the case, the

[27] *See* 15 U.S.C. 78c(a)(27) (defining the term ''rules of an exchange'').

[28] 15 U.S.C. 78f(b).

[29] 15 U.S.C. 78f(b)(5).

[30] 15 U.S.C. 78f(b)(4).

purchase of any connectivity service is completely voluntary and the Wireless Fee Schedule will be applied uniformly to all customers.

Without this proposed rule change, market participants seeking connectivity to a Third Party Data Center would have fewer options. With it, because the Wireless Connections are offered at different bandwidths and price points, market participants have more choices with respect to the form and price of the connectivity they use, allowing a market participant that opts to connect with a wireless network to select the connectivity and bandwidth that better suit its needs, thereby helping it tailor its operations to the requirements of its business operations.

The Exchange believes that its proposed General Note is equitable because a customer would not be charged more than once for a Wireless Connection. For example, to charge one customer twice for a Wireless Connection because that customer is a member of two Affiliate SROs, and so subject to the rules of both Affiliate SROs, when another customer that buys the same Wireless Connection only pays once, would not promote just and equitable principles of trade, and could result in the Exchanges and Affiliate SROs receiving the proceeds from multiple fees despite only providing a service once. The Exchange believes that its proposed General Note is reasonable because it would provide transparency regarding how the billing practice for Wireless Connections functions.

The Proposed Change Is Not Unfairly Discriminatory

The Exchange believes its proposal is not unfairly discriminatory.

The proposed change would not apply differently to distinct types or sizes of market participants. Rather, it would apply to all market participants equally. As is currently the case, the purchase of any connectivity service is completely voluntary and the Wireless Fee Schedule will be applied uniformly to all customers.

Without this proposed rule change, market participants seeking connectivity to a Third Party Data Center would have fewer options. With it, because the Wireless Connections are offered at different bandwidths and price points, market participants have more choices with respect to the form and price of the connectivity they use, allowing a market participant that opts to connect with a wireless network to select the connectivity and bandwidth that better suit its needs, thereby helping it tailor its operations to the requirements of its business operations.

There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Secaucus and Carteret Third Party Access Centers using wireless equipment installed on towers and buildings near the Mahwah data center. In addition, some market participants have their own proprietary wireless networks. Based on the information available to it, the Exchange believes that the wireless connections offered by non-ICE entities provide connectivity at the same or similar speed as the Wireless Connections, and at the same or similar cost. The Exchange believes the Wireless Connections between the Mahwah data center and the Markham Third Party Data Center are the first public, commercially available wireless connections between the two points, creating a new connectivity option for customers in Markham.

Market participants that want a connection between a Third Party Data Center and the Mahwah data center have additional options. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers.

Market participants' considerations in determining what connectivity to purchase may include latency; bandwidth size; amount of network uptime; the equipment that the network uses; the cost of the connection; and the applicable contractual provisions. Indeed, fiber network connections may be more attractive to some market participants as they are more reliable and less susceptible to weather conditions.

The Exchange believes that its proposed General Note would not be unfairly discriminatory because a customer would not be charged more than once for a Wireless Connection. For example, to charge one customer twice for a Wireless Connection because that customer is a member of two Affiliate SROs, and so subject to the rules of both Affiliate SROs, when another customer that buys the same Wireless Connection only pays once, would not promote just and equitable principles of trade, and could result in the Exchanges and Affiliate SROs receiving the proceeds from multiple fees despite only providing a service once.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the only burden on competition of the proposed change is on IDS and other commercial connectivity providers. Solely because IDS is wholly owned by the same parent company as the Exchange, IDS will be at a competitive disadvantage to its commercial competitors, and its commercial competitors, without a filing requirement, will be at a relative competitive advantage to IDS.

By permitting IDS to continue to offer the Wireless Connectivity, approval of the proposed changes would contribute to competition by allowing IDS to compete with other connectivity providers, and thus provides market participants another connectivity option. For this reason, the proposed rule changes will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of Section 6(b)(8) of the Act.[31]

There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Secaucus and Carteret Third Party Access Centers using wireless equipment installed on towers and buildings near the Mahwah data center. In addition, some market participants have their own proprietary wireless networks. Based on the information available to it, the Exchange believes that the wireless connections offered by non-ICE entities provide connectivity at the same or similar speed as the Wireless Connections, and at the same or similar cost. The Exchange believes the Wireless Connections between the Mahwah data center and the Markham Third Party Data Center are the first public, commercially available wireless connections between the two points, creating a new connectivity option for customers in Markham. Importantly, the Exchange does not control the Third Party Data Centers and could not preclude other parties from creating new wireless or fiber connections to any of the Third Party Data Centers.

Market participants that want a connection between a Third Party Data Center and the Mahwah data center have additional options. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections

[31] 15 U.S.C. 78f(b)(8).

offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers. Indeed, fiber network connections may be more attractive to some market participants as they are more reliable and less susceptible to weather conditions.

The proposed Wireless Connections traverse wireless connections through a series of towers equipped with wireless equipment, including, in the case of the Carteret and Secaucus connections, a pole on the grounds of the Mahwah data center. With the exception of the non-ICE entity that owns the wireless network used for the Wireless Connections to Secaucus and Carteret,[32] third parties do not have access to such pole, as the IDS wireless network has exclusive rights to operate wireless equipment on the Mahwah data center pole. IDS does not sell rights to third parties to operate wireless equipment on the pole, due to space limitations, security concerns, and the interference that would arise between equipment placed too closely together.

Access to the pole or roof is not required for other parties to establish wireless networks that can compete with the Wireless Connections, as witnessed by the existing wireless connections offered by non-ICE entities currently serving market participants. The latency of a wireless network depends on several factors, not just proximity to a data center. Variables include the wireless equipment utilized; the route of, and number of towers or buildings in, the network; and the fiber equipment used at either end of the connection. In addition, latency is not the only consideration that a market participant may have in selecting a wireless network. Market participants' considerations in determining what connectivity to purchase may include latency; bandwidth size; amount of network uptime; the equipment that the network uses; the cost of the connection; and the applicable contractual provisions.

The Exchange operates in a highly competitive market in which exchanges and other vendors offer connectivity options between data centers as a means to facilitate the trading and other market activities of market participants. The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [33]

The proposed change does not affect competition among national securities exchanges or among members of the Exchange, but rather between IDS and its commercial competitors.

For the reasons described above, the Exchange believes that the proposed rule changes reflect this competitive environment.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSECHX–2020–02 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSECHX–2020–02. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSECHX–2020–02, and should be submitted on or before March 10, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[34]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–88171; File No. SR–NYSENAT–2020–03]

Self-Regulatory Organizations; NYSE National, Inc.; Notice of Filing of Proposed Rule Change To Establish a Schedule of Wireless Connectivity Fees and Charges With Wireless Connections

February 11, 2020.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act''),[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on January

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

30, 2020, NYSE National, Inc. (''NYSE National'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to establish a schedule of Wireless Connectivity Fees and Charges (the ''Wireless Fee Schedule'') with wireless connections between the Mahwah, New Jersey data center and other data centers. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to establish the Wireless Fee Schedule with wireless connections between the Mahwah, New Jersey data center and three data centers that are owned and operated by third parties unaffiliated with the Exchange: (1) Carteret, New Jersey, (2) Secaucus, New Jersey, and (3) Markham, Canada (collectively, the ''Third Party Data Centers''). Market participants that purchase such a wireless connection (a ''Wireless Connection'') are charged an initial and monthly fee. In addition, the Exchange proposes to include a General Note to the Wireless Fee Schedule.

The Exchange does not believe that the present proposed change is a change to the ''rules of an exchange'' [4] required to be filed with the Commission under the Act. The definition of ''exchange'' under the Act includes ''the market facilities maintained by such exchange.''[5] Based on its review of the relevant facts and circumstances, and as discussed further below, the Exchange has concluded that the Wireless Connections are not facilities of the Exchange within the meaning of the Act, and therefore do not need to be included in its rules.

The Exchange is making the current proposal solely because the Staff of the Commission has advised the Exchange that it believes the Wireless Connections are facilities of the Exchange and so must be filed as part of its rules.[6] The Staff has not set forth the basis of its conclusion beyond verbally noting that the Wireless Connections are provided by an affiliate of the Exchange and a market participant could use a Wireless Connection to trade on, or receive the market data of, the Exchange.[7]

The Exchange expects the proposed change to be operative 60 days after the present filing becomes effective.

The Exchange and the ICE Affiliates

To understand the Exchange's conclusion that the Wireless Connections are not facilities of the Exchange within the meaning of the Act, it is important to understand the very real distinction between the Exchange and its corporate affiliates (the ''ICE Affiliates''). The Exchange is an indirect subsidiary of Intercontinental Exchange, Inc. (''ICE''). Around the world, ICE operates seven regulated exchanges in addition to the Exchange and its four national securities exchange affiliates,[8] including futures markets, as well as six clearing houses. Among others, the ICE Affiliates are subject to the jurisdiction of regulators in the U.S., U.K., E.U., the Netherlands, Canada and Singapore.[9] In all, the ICE Affiliates include hundreds of ICE subsidiaries, including more than thirty that are significant legal entity subsidiaries as defined by Commission rule.[10]

Through its ICE Data Services (''IDS'') business,[11] ICE operates the ICE Global Network (''IGN''), a global connectivity network whose infrastructure provides access to over 150 global markets, including the Exchange and Affiliate SROs, and over 750 data sources. All the ICE Affiliates are ultimately controlled by ICE, as the indirect parent company, but generally they do not control each other. In the present case, it is IDS, not the Exchange, that provides the Wireless Connections to market participants. The Exchange does not control IDS.

Wireless Connections

If a market participant wants a connection between one of the Third Party Data Centers and the Mahwah data center, it may opt to purchase a Wireless Connection, for which it will be charged an initial and monthly fee.

Once requested, IDS establishes a Wireless Connection between the IDS equipment in the Third Party Data Center and IDS equipment in the Mahwah data center. IDS contracts with a non-ICE entity to provide the Wireless Connections between the Secaucus and Carteret Third Party Data Centers and the Mahwah data center, through a series of towers equipped with wireless equipment. IDS uses its own wireless network for the Wireless Connection between the Markham Third Party Data Center and the Mahwah data center. At either end of the Wireless Connection, the customer uses a cross connect or other cable to connect its own

[4] *See* 15 U.S.C. 78c(a)(27) (defining the term ''rules of an exchange'').

[5] 15 U.S.C. 78c(a)(1). See 15 U.S.C. 78c(a)(2) (defining the term ''facility'' as applied to an exchange).

[6] Telephone conversation between Commission staff and representatives of the Exchange, December 12, 2019.

[7] *Id.* The Commission has previously stated that services were facilities of an exchange subject to the rule filing requirements without fully explaining its reasoning. In 2010, the Commission stated that exchanges had to file proposed rule changes with respect to co-location because ''[t]he Commission views co-location services as being a material aspect of the operation of the facilities of an exchange.'' The Commission did not specify why it reached that conclusion. *See* Securities Exchange Act Release No. 61358 (January 14, 2010), 75 FR 3594 (January 21, 2010) (concept release on equity market structure), at note 76.

In addition, in 2014, the Commission instituted proceedings to determine whether to disapprove a proposed rule change by The NASDAQ Stock Market LLC (''Nasdaq'') on the basis that Nasdaq's ''provision of third-party market data feeds to co-located clients appears to be an integral feature of its co-location program, and co-location programs are subject to the rule filing process.'' Securities Exchange Act Release No. 72654 (July 22, 2014), 79 FR 43808 (July 28, 2014) (SR–NASDAQ–2014–034). In its order, the Commission did not explain why it believed that the provision of third party data was an integral feature of co-location, or if it believed that it was a facility of Nasdaq, although the Nasdaq filing analyzed each prong of the definition of facility in turn. *See* Securities Exchange Act Release No. 71990 (April 22, 2014), 79 FR 23389 (April 28, 2014) (SR–NASDAQ–2014–034).

[8] The Exchange's four national securities exchange affiliates are the New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., and NYSE Chicago, Inc. (together, the ''Affiliate SROs'').

[9] Intercontinental Exchange, Inc. Annual Report on Form 10–K for the year ended December 31, 2018, Exhibit 21.1 (filed February 7, 2019), at 15–16.

[10] *Id.* at Exhibit 21.1.

[11] The IDS business operates through several different ICE Affiliates, including NYSE Technologies Connectivity, Inc., an indirect subsidiary of the NYSE.

equipment to the IDS equipment.[12] In the Mahwah data center, the cross connect leads to the customer's server in co-location.

The Wireless Connection does not connect to the Exchange trading and execution systems, nor is it a system of communication from the customer's server in co-location to the trading and execution systems of the Exchange or the Affiliate SROs (collectively, the ''SRO Systems''). Rather, a Wireless Connection facilitates the customer's interaction with itself. Essentially, a Wireless Connection is an empty pipe that a customer can use to communicate between its equipment in co-location and its equipment in the Third Party Data Center.

Customers have control over the data they send over their Wireless Connections. They may, but are not required to, use them to send trading orders to their equipment in co-location; relay Exchange market data, third party market data and public quote feeds from Securities Information Processors; send risk management, billing, or compliance information to their preferred location; or to carry any other market information or other data they wish to and from their equipment in the Third Party Data Centers and Mahwah data center. The Exchange does not, and cannot, know what data customers send over the Wireless Connections. The Exchange does not send or receive any data over the Wireless Connections.

Market participants that want a connection between a Third Party Data Center and the Mahwah data center have options. There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Carteret and Secaucus Third Party Data Centers using wireless equipment installed on towers and buildings near the Mahwah data center. Some market participants have their own proprietary wireless networks. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers.

The Wireless Connections Are Not Facilities of the Exchange

The Definition of ''Exchange''

The definition of ''exchange'' focuses on the exchange entity and what it does: [13]

The term ''exchange'' means any organization, association, or group of persons, whether incorporated or unincorporated, which constitutes, maintains, or provides a market place or facilities for bringing together purchasers and sellers of securities or for otherwise performing with respect to securities the functions commonly performed by a stock exchange as that term is generally understood, and includes the market place and the market facilities maintained by such exchange.

If the ''exchange'' definition included all of an exchange's affiliates, the ''Exchange'' would encompass a global network of futures markets, clearing houses, and data providers, and all of those entities worldwide would be subject to regulation by the Commission. That, however, is not what the definition in the Act provides.

The Exchange and the Affiliate SROs fall squarely within the Act's definition of an ''exchange'': They each provide a market place to bring together purchasers and sellers of securities and perform with respect to securities the functions commonly performed by a stock exchange.

That is not true for the non-exchange ICE Affiliates. Those ICE Affiliates do not provide such a marketplace or perform ''with respect to securities the functions commonly performed by a stock exchange,'' and therefore they are not an ''exchange'' or part of the ''Exchange'' for purposes of the Act. Accordingly, in conducting its analysis, the Exchange does not automatically collapse the ICE Affiliates into the Exchange. The Wireless Connections are also not part of the Exchange, as they are services, and as such cannot be part of an ''organization, association or group of persons'' with the Exchange.

In Rule 3b–16 the Commission further defined the term ''exchange'' under the Act, stating that: [14]

(a) An organization, association, or group of persons shall be considered to constitute, maintain, or provide ''a market place or facilities for bringing together purchasers and sellers of securities or for otherwise performing with respect to securities the functions commonly performed by a stock exchange,'' as those terms are used in section 3(a)(1) of the Act . . . if such organization, association, or group of persons:

(1) Brings together the orders for securities of multiple buyers and sellers; and

(2) Uses established, non-discretionary methods (whether by providing a trading facility or by setting rules) under which such orders interact with each other, and the buyers and sellers entering such orders agree to the terms of a trade.

The non-exchange ICE Affiliates do not bring ''together orders for securities of multiple buyers and sellers,'' and so are not an ''exchange'' or part of the ''Exchange'' for purposes of Rule 3b–16.

The relevant question, then, is whether the Wireless Connections are ''facilities'' of the Exchange.

The Definition of ''Facility''

The Act defines a ''facility'' [15] as follows:

The term ''facility'' when used with respect to an exchange includes [1] its premises, [2] tangible or intangible property whether on the premises or not, [3] any right to the use of such premises or property or any service thereof for the purpose of effecting or reporting a transaction on an exchange (including, among other things, any system of communication to or from the exchange, by ticker or otherwise, maintained by or with the consent of the exchange), and [4] any right of the exchange to the use of any property or service.

In 2015 the Commission noted that whether something is a ''facility'' is not always black and white, as ''any determination as to whether a service or other product is a facility of an exchange requires an analysis of the particular facts and circumstances.'' [16] Accordingly, the Exchange understands that the specific facts and circumstances of the Wireless Connections must be assessed before a determination can be made regarding whether or not they are facilities of the Exchange.[17]

[12] A cable connects the IDS and customer equipment in the Markham Third Party Data Center. Elsewhere, the customer buys a cross connect from IDS. The cross connects utilized in the Mahwah data center are filed with the Commission. *See* Securities Exchange Act Release No. 83351 (May 31, 2018), 83 FR 26314 (June 6, 2018) (SR–NYSENAT–2018–07, at 26316.

[13] 15 U.S.C. 78c(a)(1).

[14] 17 CFR 240.3b–16(a).

[15] 15 U.S.C. 78c(a)(2).

[16] Securities Exchange Act Release No. 76127 (October 9, 2015), 80 FR 62584 (October 16, 2015) (SR–NYSE–2015–36), at note 9 (order approving proposed rule change amending Section 907.00 of the Listed Company Manual). *See also* 79 FR 23389, *supra* note 7, at note 4 (noting that that the definition of the term ''facility'' has not changed since it was originally adopted) and 23389 (stating that the SEC ''has not separately interpreted the definition of 'facility' '').

[17] As with the definition of ''exchange,'' the ICE Affiliates do not automatically fall within the definition of a ''facility.'' The definition focuses on ownership and the right to use properties and services, not corporate relationships. Indeed, if the term ''exchange'' in the definition of a facility included ''an exchange and its affiliates,'' then the

The first prong of the definition is that ''facility,'' when used with respect to an exchange, includes ''its premises.'' That prong is not applicable in this case, because the Wireless Connections are not premises of the Exchange. The term ''premises'' is generally defined as referring to an entity's building, land, and appurtenances.[18] The wireless network that runs between IDS equipment in the Mahwah data center and IDS equipment in Third Party Data Centers, much of which is actually owned, operated and maintained by a non-ICE entity,[19] does not connect to the Exchange trading and execution systems and is not the premises of the Exchange. The portion of the Mahwah data center where the ''exchange'' functions are performed—*i.e.* the SRO Systems that bring together purchasers and sellers of securities and perform with respect to securities the functions commonly performed by a stock exchange—could be construed as the ''premises'' of the Exchange, but the same is not true for a wireless network that is almost completely outside of the Mahwah data center.

The second prong of the definition of ''facility'' provides that a facility includes the exchange's ''tangible or intangible property whether on the premises or not.'' The Wireless Connections are not the property of the Exchange: They are services. The underlying wireless network is owned by ICE Affiliates and a non-ICE entity. As noted, the Act does not automatically collapse affiliates into the definition of an ''exchange.'' A review of the facts set forth above shows that there is a real distinction between the Exchange and its ICE Affiliates with respect to the Wireless Connections, and so something owned by an ICE Affiliate is not owned by the Exchange.

The third prong of the definition of ''facility'' provides that a facility includes any right to the use of such premises or property or any service thereof for the purpose of effecting or reporting a transaction on an exchange (including, among other things, any system of communication to or from the exchange, by ticker or otherwise, maintained by or with the consent of the exchange).[20]

This prong does not capture the Wireless Connections because the Exchange does not have the right to use the Wireless Connections to effect or report a transaction on the Exchange. ICE Affiliates and a non-ICE entity own and maintain the wireless network underlying the Wireless Connections, and ICE Affiliates, not the Exchange, offer and provide the Wireless Connections to customers. The Exchange does not know whether or when a market participant has entered into an agreement for a Wireless Connection and has no right to approve or disapprove of the provision of a Wireless Connection, in the same way that the Exchange would have no right to approve or disapprove of the provision of connectivity to a market participant in co-location or elsewhere by any other provider. The Exchange does not put content onto the Wireless Connections. When a customer terminates a Wireless Connection, the Exchange does not consent to the termination.

The Wireless Connections do not connect to the Exchange trading and execution systems. As such, the Wireless Connections are not provided for ''the purpose of effecting or reporting a transaction on'' the Exchange. Rather, a Wireless Connection facilitates the customer's interaction with itself. Each Wireless Connection connects the IDS equipment in the Third Party Data Center and IDS equipment in the Mahwah data center. At either end of the Wireless Connection, the customer uses a cross connect or other cable to connect its own equipment to the IDS equipment. In the Mahwah data center, the cross connect leads to the customer's server in co-location, not the Exchange trading and execution systems.

It is important to remember that the customers' equipment in the Mahwah data center is not provided by, part of, or a facility of, the Exchange. The Exchange provides the space in which customers' equipment is housed, and permits customers to use their equipment to communicate with the SRO Systems through services, such as connections to the local area networks, that are filed with the Commission.[21] The Exchange provides the space, but not the equipment. Accordingly, even if a customer were to use a Wireless Connection to send instructions to trade or to receive a report of a trade, the customer would not be sending instructions to the Exchange, but rather to its own equipment.

The Exchange believes the example in the parenthetical in the third prong of the definition of ''facility'' cannot be read as an independent prong of the definition. Such a reading would ignore that the parentheses and the word ''including'' clearly indicate that ''any system of communication to or from an exchange . . . maintained by or with the consent of the exchange'' is explaining the preceding text. By its terms, the parenthetical is providing a non-exclusive example of the type of property or service to which the prong refers, and does not remove the requirement that there must be a right to use the premises, property or service to effect or report a transaction on an exchange. It is making sure the reader understands that ''facility'' includes a ticker system that an exchange has the right to use, not creating a new fifth prong to the definition. In fact, if the ''right to use'' requirement were ignored, every communication provider that connected to an exchange, including any broker-dealer system and telecommunications network, would become a facility of that exchange so long as the exchange consented to the connection, whether or not the connection was used to trade or report a trade, and whether or not the exchange had any right at all to the use of the connection.

The fourth prong of the definition provides that a facility includes ''any right of the exchange to the use of any property or service.'' [22] As described above, the Exchange does not have the right to use the Wireless Connections. Instead, the customers of the Wireless Connections are customers who enter into an agreement with ICE Affiliates for connections over a wireless network, much of which is owned, operated and maintained by a non-ICE entity.

Accordingly, for all the reasons discussed above, the Wireless Connections provided by ICE Affiliates are not facilities of the Exchange.

The legal conclusion that the Wireless Connections are not facilities of the Exchange is strongly supported by the facts. The Wireless Connections are

rest of the functional prongs of the facility definition would be meaningless. Fundamental rules of statutory construction dictate that statutes be interpreted to give effect to each of their provisions, so as not to render sections of the statute superfluous.

[18] See, *e.g.,* definition of ''premises'' in Miriam-Webster Dictionary, at *https://www.merriam-webster.com/dictionary/premises,* and Cambridge English Dictionary, at *https://dictionary.cambridge.org/us/dictionary/english/premises.*

[19] A non-ICE entity owns, operates and maintains the wireless network between the Mahwah data center and the Carteret and Secaucus Third Party Data Centers pursuant to an agreement between the non-ICE entity and an ICE Affiliate.

[20] 15 U.S.C. 78c(a)(2).

[21] *See* 83 FR 26314, *supra* note 12. As described by the Commission, co-location is when a ''trading center . . . rents rack space to market participants that enables them to place their servers in close physical proximity to a trading center's matching engine.'' 75 FR 3594, *supra* note 7, at 3610 (noting that ''[c]o-location helps minimize network and other types of latencies between the matching engine of trading centers and the servers of market participants'').

[22] *Id.*

neither necessary for, nor integrally connected to, the operations of the Exchange. They are empty pipes that customers can use as they like. In this context, IDS simply acts as a vendor selling connectivity, just like the other vendors that offer wireless connections in the Carteret and Secaucus Third Party Data Centers and fiber connections to all the Third Party Data Centers. The fact that in this case it is ICE Affiliates that offer the Wireless Connections does not make the Wireless Connections facilities of the Exchange any more than are the connections offered by other parties.

Further, the Exchange believes that requiring it to file this proposed rule change is not necessary in order for the Commission to ensure that the Exchange is satisfying its requirements under the Act. Because, as described above, the Wireless Connections are not necessary for, nor connected to, the operations of the Exchange, and customers are not required to use the Wireless Connections, holding the Wireless Connections to the statutory standards in Section 6(b) serves no purpose.

Instead, the sole impact of the requirement that the Exchange file the Wireless Connections is to place an undue burden on competition on the ICE Affiliates that offer the connections, compared to their market competitors. This filing requirement, thus, itself is inconsistent with the requirement under Section 6(b)(8) of the Act that the rules of the exchange not ''impose any burden on competition not necessary or appropriate in furtherance of the purposes of [the Act].'' [23] This burden on competition arises because IDS would be unable, for example, to offer a client or potential client a different bandwidth it requests, without the delay and uncertainty of a filing, but its competitors will. Similarly, if a competitor decides to undercut IDS' fees because IDS, unlike the competitor, has to make its fees public, IDS will not be able to respond quickly, if at all. Indeed, because its competitors are not required to make their services or fees public, and are not subject to a Commission determination of whether such services or fees are ''not unfairly discriminatory'' or equitably allocated, IDS is at a competitive disadvantage from the very start.

The Proposed Service and Fees

As noted above, the Exchange proposes to add to its rules a Wireless Fee Schedule setting forth the fees charged by IDS related to the Wireless Connections between the Mahwah data center and the Third Party Data Centers.

For each Wireless Connection, a customer would be charged a non-recurring initial charge and a monthly recurring charge (''MRC'') that would vary depending upon bandwidth and the location of the connection. The proposal would waive the first month's MRC, to allow customers to test a new Wireless Connection for a month before incurring any MRCs, and the Exchange proposes to add text to the Wireless Fee Schedule accordingly. If a customer had an existing Wireless Connection and opted to upgrade or downgrade to a different size circuit connecting to the same Third Party Access Center, it would not be subject to the initial charge.

The Exchange proposes to establish the Wireless Fee Schedule with a section under the heading ''A. Wireless Connectivity'' setting forth the fees charged by IDS related to the Wireless Connections, as follows:

Type of service	Description	Amount of charge
Wireless Connection between Mahwah Data Center and Secaucus access center.	10 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $9,000.
Wireless Connection between Mahwah Data Center and Secaucus access center.	50 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $13,500.
Wireless Connection between Mahwah Data Center and Secaucus access center.	100 Mb Circuit. ...	$10,000 per connection initial charge plus monthly charge per connection of $23,000.
Wireless Connection between Mahwah Data Center and Secaucus access center.	200 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $44,000.
Wireless Connection between Mahwah Data Center and Carteret access center.	10 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $10,000.
Wireless Connection between Mahwah Data Center and Carteret access center.	50 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $15,000.
Wireless Connection between Mahwah Data Center and Carteret access center.	100 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $25,000.
Wireless Connection between Mahwah Data Center and Carteret access center.	200 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $45,000.
Wireless Connections between (a) Mahwah Data Center and Carteret access center and (b) Mahwah Data Center and Secaucus Data Center.	50 Mb Circuits	$15,000 initial charge for both connections plus monthly charge for both connections of $22,000.
Wireless Connection between Mahwah Data Center and Markham access center.	1 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $6,000.
Wireless Connection between Mahwah Data Center and Markham access center.	5 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $15,500.
Wireless Connection between Mahwah Data Center and Markham access center.	10 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $23,000.

Proposed General Note

The Exchange and each of the Affiliate SROs are filing the Wireless Connections. Although each such market will have a Wireless Fee Schedule, a market participant that obtains a Wireless Connection will not be charged more than once for that service, irrespective of whether it is a member of one, some or none of the Exchange and the Affiliate SROs. Accordingly, the Exchange proposes that the Wireless Fee Schedule include a General Note that describes the billing practice for market participants, as follows:

A market participant that incurs fees from the New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., NYSE Chicago, Inc. or NYSE National, Inc. (collectively, the

[23] 15 U.S.C. 78f(b)(8).

''Affiliate SROs'') for a particular service pursuant to this Fee Schedule shall not be subject to fees for the same service charged by the other Affiliate SROs.

The proposed General Note would be consistent with the first general note in the co-location section of the Exchange and Affiliate SROs' price lists and fee schedule,[24] as well as the Nasdaq Stock Market rules.[25]

Application and Impact of the Proposed Change

The proposed change would apply to all market participants equally. The proposed change would not apply differently to distinct types or sizes of market participants. Market participants that require other types or sizes of network connections between the Mahwah data center and the Third Party Data Centers could still request them. The purchase of the service is completely voluntary and the Wireless Fee Schedule will be applied uniformly to all market participants.

Competitive Environment

There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Secaucus and Carteret Third Party Access Centers using wireless equipment installed on towers and buildings near the Mahwah data center. In addition, some market participants have their own proprietary wireless networks. Based on the information available to it, the Exchange believes that the wireless connections offered by non-ICE entities provide connectivity at the same or similar speed as the Wireless Connections, and at the same or similar cost. The Exchange believes the Wireless Connections between the Mahwah data center and the Markham Third Party Data Center are the first public, commercially available wireless connections between the two points, creating a new connectivity option for customers in Markham.

Market participants that want a connection between a Third Party Data Center and the Mahwah data center have additional options. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers.

Wireless connections involve beaming signals through the air between antennas that are within sight of one another. Because the signals travel a straight, unimpeded line, and because light waves travel faster through air than through glass (fiber optics), wireless messages have lower latency than messages travelling through fiber optics. At the same time, as a general rule wireless networks have less uptime than fiber networks. Wireless networks are directly and immediately affected by adverse weather conditions, which can cause message loss and outage periods. Wireless networks cannot be configured with redundancy in the same way that fiber networks can. As a result, an equipment or weather issue at any one location on the network will cause the entire network to have an outage. In addition, maintenance can take longer than it would with a fiber based network, as the relevant tower may be in a hard to reach location, or weather conditions may present safety issues, delaying technicians servicing equipment. Even under normal conditions, a wireless network will have a higher error rate than a fiber network of the same length.

The proposed Wireless Connections traverse wireless connections through a series of towers equipped with wireless equipment, including, in the case of the Carteret and Secaucus connections, a pole on the grounds of the Mahwah data center. With the exception of the non-ICE entity that owns the wireless network used for the Wireless Connections to Secaucus and Carteret,[26] third parties do not have access to such pole. However, access to such pole is not required for third parties to establish wireless networks that can compete with the Wireless Connections to the Carteret and Secaucus Third Party Data Centers, as witnessed by the existing wireless connections offered by non-ICE entities currently serving market participants.

Proximity to a data center is not the only determinant of a wireless network's latency. Rather, the latency of a wireless network depends on several factors. Variables include the wireless equipment utilized; the route of, and number of towers or buildings in, the network; and the fiber equipment used at either end of the connection. Moreover, latency is not the only consideration that a market participant may have in selecting a wireless network. Other considerations may include the bandwidth of the offered connection; amount of network uptime; the equipment that the network uses; the cost of the connection; and the applicable contractual provisions. Indeed, fiber network connections may be more attractive to some market participants as they are more reliable and less susceptible to weather conditions.

2. Statutory Basis

Although the Exchange does not believe that the present proposed change is a change to the ''rules of an exchange'' [27] required to be filed with the Commission under the Act, the Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[28] in general, and furthers the objectives of Section 6(b)(5) of the Act,[29] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to, and perfect the mechanisms of, a free and open market and a national market system and, in general, to protect investors and the public interest and does not unfairly discriminate between customers, issuers, brokers, or dealers. The Exchange also believes that the proposed rule change is consistent with Section 6(b)(4) of the Act,[30] because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The Proposed Change Is Reasonable

The Exchange believes its proposal is reasonable.

There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Secaucus and Carteret Third Party Access Centers using wireless equipment installed on towers and buildings near the Mahwah data center. In addition, some market participants have their own proprietary wireless networks. Based on the information available to it, the Exchange believes

[24] *See* Securities Exchange Act Release Nos. 70206 (August 15, 2013), 78 FR 51765 (August 21, 2013) (SR–NYSE–2013–59); 70176 (August 13, 2013), 78 FR 50471 (August 19, 2013) (SR–NYSEMKT–2013–67); 70173 (August 13, 2013), 78 FR 50459 (August 19, 2013) (SR–NYSEArca–2013–80); and 87408 (October 28, 2019), 84 FR 58778 (November 1, 2019) (SR–NYSECHX–2019–12), and 83 FR 26314, *supra* note 12, at 26314.

[25] *See, e.g.,* The Nasdaq Stock Market General Equity and Options Rules, General 8, Section 1.

[26] *See* note 19, *supra.*

[27] *See* 15 U.S.C. 78c(a)(27) (defining the term ''rules of an exchange'').

[28] 15 U.S.C. 78f(b).

[29] 15 U.S.C. 78f(b)(5).

[30] 15 U.S.C. 78f(b)(4).

that the wireless connections offered by non-ICE entities provide connectivity at the same or similar speed as the Wireless Connections, and at the same or similar cost. The Exchange believes the Wireless Connections between the Mahwah data center and the Markham Third Party Data Center are the first public, commercially available wireless connections between the two points, creating a new connectivity option for customers in Markham.

The Wireless Connections provide market participants with one means of connectivity, but substitute products are available, as witnessed by the existing wireless connections offered by non-ICE entities currently serving market participants. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers.

Market participants' considerations in determining what connectivity to purchase may include latency; bandwidth size; amount of network uptime; the equipment that the network uses; the cost of the connection; and the applicable contractual provisions. Indeed, fiber network connections may be more attractive to some market participants as they are more reliable and less susceptible to weather conditions.

The Exchange believes that the proposed pricing for the Wireless Connections is reasonable because it allows market participants to select the connectivity options that best suit their needs. A market participant that opts to connect with a Wireless Network would be able to select the route and bandwidth that better suit its needs, thereby helping it tailor its operations to the requirements of its business operations. The fees also reflect the benefit received by customers in terms of lower latency over the fiber optics options.

Only market participants that voluntarily select to receive Wireless Connections are charged for them, and those services are available to all market participants. Furthermore, the Exchange believes that the services and fees proposed herein are reasonable because, in addition to the services being completely voluntary, they are available to all market participants on an equal basis (*i.e.,* the same products and services are available to all market participants). All market participants that voluntarily select Wireless Connections would be charged the same amount for the same services and would have their first month's MRC for Wireless Connections waived.

Overall, the Exchange believes that the proposed change is reasonable because the Wireless Connections described herein are offered as a convenience to market participants, but offering them requires the provision, maintenance and operation of the Mahwah data center, wireless networks and access centers in the Third Party Data Centers, including the installation and monitoring, support and maintenance of the services.

The Exchange believes that the proposed waiver of the first month's MRC is reasonable as it would allow customers to test a Wireless Connection for a month before incurring any monthly recurring fees and may act as an incentive to market participants to connect to a Wireless Connection. The Exchange believes that the proposed waiver of the initial charge if a customer has an existing Wireless Connection and opted to upgrade or downgrade to a different size circuit at the same Third Party Data Center is reasonable because the change in Wireless Connection would not require IDS to do any physical work to implement the connection.

The Exchange believes that its proposed General Note is reasonable because it would provide transparency regarding how the billing practice for Wireless Connections functions. The Exchange believes that a customer should not be charged more than once for a Wireless Connection. For example, to charge one customer twice for a Wireless Connection because that customer is a member of two Affiliate SROs, and so subject to the rules of both Affiliate SROs, when another customer that buys the same Wireless Connection only pays once, would not promote just and equitable principles of trade, and could result in the Exchanges and Affiliate SROs receiving the proceeds from multiple fees despite only providing a service once.

The Proposed Change is an Equitable Allocation of Fees and Credits

The Exchange believes its proposal equitably allocates its fees among its market participants.

The proposed change would not apply differently to distinct types or sizes of market participants. Rather, it would apply to all market participants equally. As is currently the case, the purchase of any connectivity service is completely voluntary and the Wireless Fee Schedule will be applied uniformly to all customers.

Without this proposed rule change, market participants seeking connectivity to a Third Party Data Center would have fewer options. With it, because the Wireless Connections are offered at different bandwidths and price points, market participants have more choices with respect to the form and price of the connectivity they use, allowing a market participant that opts to connect with a wireless network to select the connectivity and bandwidth that better suit its needs, thereby helping it tailor its operations to the requirements of its business operations.

The Exchange believes that its proposed General Note is equitable because a customer would not be charged more than once for a Wireless Connection. For example, to charge one customer twice for a Wireless Connection because that customer is a member of two Affiliate SROs, and so subject to the rules of both Affiliate SROs, when another customer that buys the same Wireless Connection only pays once, would not promote just and equitable principles of trade, and could result in the Exchanges and Affiliate SROs receiving the proceeds from multiple fees despite only providing a service once. The Exchange believes that its proposed General Note is reasonable because it would provide transparency regarding how the billing practice for Wireless Connections functions.

The Proposed Change is Not Unfairly Discriminatory

The Exchange believes its proposal is not unfairly discriminatory.

The proposed change would not apply differently to distinct types or sizes of market participants. Rather, it would apply to all market participants equally. As is currently the case, the purchase of any connectivity service is completely voluntary and the Wireless Fee Schedule will be applied uniformly to all customers.

Without this proposed rule change, market participants seeking connectivity to a Third Party Data Center would have fewer options. With it, because the Wireless Connections are offered at different bandwidths and price points, market participants have more choices with respect to the form and price of the connectivity they use, allowing a market participant that opts to connect with a wireless network to select the connectivity and bandwidth that better suit its needs, thereby helping it tailor its operations to the requirements of its business operations.

There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Secaucus and Carteret Third Party

Access Centers using wireless equipment installed on towers and buildings near the Mahwah data center. In addition, some market participants have their own proprietary wireless networks. Based on the information available to it, the Exchange believes that the wireless connections offered by non-ICE entities provide connectivity at the same or similar speed as the Wireless Connections, and at the same or similar cost. The Exchange believes the Wireless Connections between the Mahwah data center and the Markham Third Party Data Center are the first public, commercially available wireless connections between the two points, creating a new connectivity option for customers in Markham.

Market participants that want a connection between a Third Party Data Center and the Mahwah data center have additional options. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers.

Market participants' considerations in determining what connectivity to purchase may include latency; bandwidth size; amount of network uptime; the equipment that the network uses; the cost of the connection; and the applicable contractual provisions. Indeed, fiber network connections may be more attractive to some market participants as they are more reliable and less susceptible to weather conditions.

The Exchange believes that its proposed General Note would not be unfairly discriminatory because a customer would not be charged more than once for a Wireless Connection. For example, to charge one customer twice for a Wireless Connection because that customer is a member of two Affiliate SROs, and so subject to the rules of both Affiliate SROs, when another customer that buys the same Wireless Connection only pays once, would not promote just and equitable principles of trade, and could result in the Exchanges and Affiliate SROs receiving the proceeds from multiple fees despite only providing a service once.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the only burden on competition of the proposed change is on IDS and other commercial connectivity providers. Solely because IDS is wholly owned by the same parent company as the Exchange, IDS will be at a competitive disadvantage to its commercial competitors, and its commercial competitors, without a filing requirement, will be at a relative competitive advantage to IDS.

By permitting IDS to continue to offer the Wireless Connectivity, approval of the proposed changes would contribute to competition by allowing IDS to compete with other connectivity providers, and thus provides market participants another connectivity option. For this reason, the proposed rule changes will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of Section 6(b)(8) of the Act.[31]

There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Secaucus and Carteret Third Party Access Centers using wireless equipment installed on towers and buildings near the Mahwah data center. In addition, some market participants have their own proprietary wireless networks. Based on the information available to it, the Exchange believes that the wireless connections offered by non-ICE entities provide connectivity at the same or similar speed as the Wireless Connections, and at the same or similar cost. The Exchange believes the Wireless Connections between the Mahwah data center and the Markham Third Party Data Center are the first public, commercially available wireless connections between the two points, creating a new connectivity option for customers in Markham. Importantly, the Exchange does not control the Third Party Data Centers and could not preclude other parties from creating new wireless or fiber connections to any of the Third Party Data Centers.

Market participants that want a connection between a Third Party Data Center and the Mahwah data center have additional options. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers. Indeed, fiber network connections may be more attractive to some market participants as they are more reliable and less susceptible to weather conditions.

The proposed Wireless Connections traverse wireless connections through a series of towers equipped with wireless equipment, including, in the case of the Carteret and Secaucus connections, a pole on the grounds of the Mahwah data center. With the exception of the non-ICE entity that owns the wireless network used for the Wireless Connections to Secaucus and Carteret,[32] third parties do not have access to such pole, as the IDS wireless network has exclusive rights to operate wireless equipment on the Mahwah data center pole. IDS does not sell rights to third parties to operate wireless equipment on the pole, due to space limitations, security concerns, and the interference that would arise between equipment placed too closely together.

Access to the pole or roof is not required for other parties to establish wireless networks that can compete with the Wireless Connections, as witnessed by the existing wireless connections offered by non-ICE entities currently serving market participants. The latency of a wireless network depends on several factors, not just proximity to a data center. Variables include the wireless equipment utilized; the route of, and number of towers or buildings in, the network; and the fiber equipment used at either end of the connection. In addition, latency is not the only consideration that a market participant may have in selecting a wireless network. Market participants' considerations in determining what connectivity to purchase may include latency; bandwidth size; amount of network uptime; the equipment that the network uses; the cost of the connection; and the applicable contractual provisions.

The Exchange operates in a highly competitive market in which exchanges and other vendors offer connectivity options between data centers as a means to facilitate the trading and other market activities of market participants. The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [33]

[31] 15 U.S.C. 78f(b)(8).

[32] *See* note 19, *supra.*

[33] *See* Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, at 37499 (June 29, 2005).

The proposed change does not affect competition among national securities exchanges or among members of the Exchange, but rather between IDS and its commercial competitors.

For the reasons described above, the Exchange believes that the proposed rule changes reflect this competitive environment.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSENAT–2020–03 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSENAT–2020–03. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSENAT–2020–03, and should be submitted on or before March 10, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[34]

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–88168; File No. SR–NYSE–2020–05]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing of Proposed Rule Change To Establish a Schedule of Wireless Connectivity Fees and Charges With Wireless Connections

February 11, 2020.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act''),[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on January 30, 2020, New York Stock Exchange LLC (''NYSE'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to establish a schedule of Wireless Connectivity Fees and Charges (the ''Wireless Fee Schedule'') with wireless connections between the Mahwah, New Jersey data center and other data centers. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to establish the Wireless Fee Schedule with wireless connections between the Mahwah, New Jersey data center and three data centers that are owned and operated by third parties unaffiliated with the Exchange: (1) Carteret, New Jersey, (2) Secaucus, New Jersey, and (3) Markham, Canada (collectively, the ''Third Party Data Centers''). Market participants that purchase such a wireless connection (a ''Wireless Connection'') are charged an initial and monthly fee. In addition, the Exchange proposes to include a General Note to the Wireless Fee Schedule.

The Exchange does not believe that the present proposed change is a change to the ''rules of an exchange''[4] required to be filed with the Commission under the Act. The definition of ''exchange'' under the Act includes ''the market facilities maintained by such

[34] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] *See* 15 U.S.C. 78c(a)(27) (defining the term ''rules of an exchange'').

exchange.'' [5] Based on its review of the relevant facts and circumstances, and as discussed further below, the Exchange has concluded that the Wireless Connections are not facilities of the Exchange within the meaning of the Act, and therefore do not need to be included in its rules.

The Exchange is making the current proposal solely because the Staff of the Commission has advised the Exchange that it believes the Wireless Connections are facilities of the Exchange and so must be filed as part of its rules.[6] The Staff has not set forth the basis of its conclusion beyond verbally noting that the Wireless Connections are provided by an affiliate of the Exchange and a market participant could use a Wireless Connection to trade on, or receive the market data of, the Exchange.[7]

The Exchange expects the proposed change to be operative 60 days after the present filing becomes effective.

The Exchange and the ICE Affiliates

To understand the Exchange's conclusion that the Wireless Connections are not facilities of the Exchange within the meaning of the Act, it is important to understand the very real distinction between the Exchange and its corporate affiliates (the ''ICE Affiliates''). The Exchange is an indirect subsidiary of Intercontinental Exchange, Inc. (''ICE''). Around the world, ICE operates seven regulated exchanges in addition to the Exchange and its four national securities exchange affiliates,[8] including futures markets, as well as six clearing houses. Among others, the ICE Affiliates are subject to the jurisdiction of regulators in the U.S., U.K., E.U., the Netherlands, Canada and Singapore.[9] In all, the ICE Affiliates include hundreds of ICE subsidiaries, including more than thirty that are significant legal entity subsidiaries as defined by Commission rule.[10]

Through its ICE Data Services (''IDS'') business,[11] ICE operates the ICE Global Network (''IGN''), a global connectivity network whose infrastructure provides access to over 150 global markets, including the Exchange and Affiliate SROs, and over 750 data sources. All the ICE Affiliates are ultimately controlled by ICE, as the indirect parent company, but generally they do not control each other. In the present case, it is IDS, not the Exchange, that provides the Wireless Connections to market participants. The Exchange does not control IDS.

Wireless Connections

If a market participant wants a connection between one of the Third Party Data Centers and the Mahwah data center, it may opt to purchase a Wireless Connection, for which it will be charged an initial and monthly fee.

Once requested, IDS establishes a Wireless Connection between the IDS equipment in the Third Party Data Center and IDS equipment in the Mahwah data center. IDS contracts with a non-ICE entity to provide the Wireless Connections between the Secaucus and Carteret Third Party Data Centers and the Mahwah data center, through a series of towers equipped with wireless equipment. IDS uses its own wireless network for the Wireless Connection between the Markham Third Party Data Center and the Mahwah data center. At either end of the Wireless Connection, the customer uses a cross connect or other cable to connect its own equipment to the IDS equipment.[12] In the Mahwah data center, the cross connect leads to the customer's server in co-location.

The Wireless Connection does not connect to the Exchange trading and execution systems, nor is it a system of communication from the customer's server in co-location to the trading and execution systems of the Exchange or the Affiliate SROs (collectively, the ''SRO Systems''). Rather, a Wireless Connection facilitates the customer's interaction with itself. Essentially, a Wireless Connection is an empty pipe that a customer can use to communicate between its equipment in co-location and its equipment in the Third Party Data Center.

Customers have control over the data they send over their Wireless Connections. They may, but are not required to, use them to send trading orders to their equipment in co-location; relay Exchange market data, third party market data and public quote feeds from Securities Information Processors; send risk management, billing, or compliance information to their preferred location; or to carry any other market information or other data they wish to and from their equipment in the Third Party Data Centers and Mahwah data center. The Exchange does not, and cannot, know what data customers send over the Wireless Connections. The Exchange does not send or receive any data over the Wireless Connections.

Market participants that want a connection between a Third Party Data Center and the Mahwah data center have options. There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Carteret and Secaucus Third Party Data Centers using wireless equipment installed on towers and buildings near the Mahwah data center. Some market participants have their own proprietary wireless networks. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers.

The Wireless Connections Are Not Facilities of the Exchange

The Definition of ''Exchange''

The definition of ''exchange'' focuses on the exchange entity and what it does: [13]

The term ''exchange'' means any organization, association, or group of

[5] 15 U.S.C. 78c(a)(1). See 15 U.S.C. 78c(a)(2) (defining the term ''facility'' as applied to an exchange).

[6] Telephone conversation between Commission staff and representatives of the Exchange, December 12, 2019.

[7] *Id.* The Commission has previously stated that services were facilities of an exchange subject to the rule filing requirements without fully explaining its reasoning. In 2010, the Commission stated that exchanges had to file proposed rule changes with respect to co-location because ''[t]he Commission views co-location services as being a material aspect of the operation of the facilities of an exchange.'' The Commission did not specify why it reached that conclusion. *See* Securities Exchange Act Release No. 61358 (January 14, 2010), 75 FR 3594 (January 21, 2010) (concept release on equity market structure), at note 76.

In addition, in 2014, the Commission instituted proceedings to determine whether to disapprove a proposed rule change by The NASDAQ Stock Market LLC (''Nasdaq'') on the basis that Nasdaq's ''provision of third-party market data feeds to co-located clients appears to be an integral feature of its co-location program, and co-location programs are subject to the rule filing process.'' Securities Exchange Act Release No. 72654 (July 22, 2014), 79 FR 43808 (July 28, 2014) (SR–NASDAQ–2014–034). In its order, the Commission did not explain why it believed that the provision of third party data was an integral feature of co-location, or if it believed that it was a facility of Nasdaq, although the Nasdaq filing analyzed each prong of the definition of facility in turn. *See* Securities Exchange Act Release No. 71990 (April 22, 2014), 79 FR 23389 (April 28, 2014) (SR–NASDAQ–2014–034).

[8] The Exchange's four national securities exchange affiliates are NYSE American LLC, NYSE Arca, Inc., NYSE Chicago, Inc., and NYSE National, Inc. (together, the ''Affiliate SROs'').

[9] Intercontinental Exchange, Inc. Annual Report on Form 10–K for the year ended December 31, 2018, Exhibit 21.1 (filed February 7, 2019), at 15–16.

[10] *Id.* at Exhibit 21.1.

[11] The IDS business operates through several different ICE Affiliates, including NYSE Technologies Connectivity, Inc., an indirect subsidiary of the NYSE.

[12] A cable connects the IDS and customer equipment in the Markham Third Party Data Center. Elsewhere, the customer buys a cross connect from IDS. The cross connects utilized in the Mahwah data center are filed with the Commission. *See* Securities Exchange Act Release No. 67666 (August 15, 2012), 77 FR 50742 (August 22, 2012) (SR–NYSE–2012–18).

[13] 15 U.S.C. 78c(a)(1).

persons, whether incorporated or unincorporated, which constitutes, maintains, or provides a market place or facilities for bringing together purchasers and sellers of securities or for otherwise performing with respect to securities the functions commonly performed by a stock exchange as that term is generally understood, and includes the market place and the market facilities maintained by such exchange.

If the ''exchange'' definition included all of an exchange's affiliates, the ''Exchange'' would encompass a global network of futures markets, clearing houses, and data providers, and all of those entities worldwide would be subject to regulation by the Commission. That, however, is not what the definition in the Act provides.

The Exchange and the Affiliate SROs fall squarely within the Act's definition of an ''exchange'': They each provide a market place to bring together purchasers and sellers of securities and perform with respect to securities the functions commonly performed by a stock exchange.

That is not true for the non-exchange ICE Affiliates. Those ICE Affiliates do not provide such a marketplace or perform ''with respect to securities the functions commonly performed by a stock exchange,'' and therefore they are not an ''exchange'' or part of the ''Exchange'' for purposes of the Act. Accordingly, in conducting its analysis, the Exchange does not automatically collapse the ICE Affiliates into the Exchange. The Wireless Connections are also not part of the Exchange, as they are services, and as such cannot be part of an ''organization, association or group of persons'' with the Exchange.

In Rule 3b–16 the Commission further defined the term ''exchange'' under the Act, stating that: [14]

(a) An organization, association, or group of persons shall be considered to constitute, maintain, or provide ''a market place or facilities for bringing together purchasers and sellers of securities or for otherwise performing with respect to securities the functions commonly performed by a stock exchange,'' as those terms are used in section 3(a)(1) of the Act . . . if such organization, association, or group of persons:

(1) Brings together the orders for securities of multiple buyers and sellers; and

(2) Uses established, non-discretionary methods (whether by providing a trading facility or by setting rules) under which such orders interact with each other, and the buyers and sellers entering such orders agree to the terms of a trade.

The non-exchange ICE Affiliates do not bring ''together orders for securities of multiple buyers and sellers,'' and so are not an ''exchange'' or part of the ''Exchange'' for purposes of Rule 3b–16.

The relevant question, then, is whether the Wireless Connections are ''facilities'' of the Exchange.

The Definition of ''Facility''

The Act defines a ''facility'' [15] as follows:

The term ''facility'' when used with respect to an exchange includes [1] its premises, [2] tangible or intangible property whether on the premises or not, [3] any right to the use of such premises or property or any service thereof for the purpose of effecting or reporting a transaction on an exchange (including, among other things, any system of communication to or from the exchange, by ticker or otherwise, maintained by or with the consent of the exchange), and [4] any right of the exchange to the use of any property or service.

In 2015 the Commission noted that whether something is a ''facility'' is not always black and white, as ''any determination as to whether a service or other product is a facility of an exchange requires an analysis of the particular facts and circumstances.'' [16] Accordingly, the Exchange understands that the specific facts and circumstances of the Wireless Connections must be assessed before a determination can be made regarding whether or not they are facilities of the Exchange.[17]

The first prong of the definition is that ''facility,'' when used with respect to an exchange, includes ''its premises.'' That prong is not applicable in this case, because the Wireless Connections are not premises of the Exchange. The term ''premises'' is generally defined as referring to an entity's building, land, and appurtenances.[18] The wireless network that runs between IDS equipment in the Mahwah data center and IDS equipment in Third Party Data Centers, much of which is actually owned, operated and maintained by a non-ICE entity,[19] does not connect to the Exchange trading and execution systems and is not the premises of the Exchange. The portion of the Mahwah data center where the ''exchange'' functions are performed—*i.e.* the SRO Systems that bring together purchasers and sellers of securities and perform with respect to securities the functions commonly performed by a stock exchange—could be construed as the ''premises'' of the Exchange, but the same is not true for a wireless network that is almost completely outside of the Mahwah data center.

The second prong of the definition of ''facility'' provides that a facility includes the exchange's ''tangible or intangible property whether on the premises or not.'' The Wireless Connections are not the property of the Exchange: They are services. The underlying wireless network is owned by ICE Affiliates and a non-ICE entity. As noted, the Act does not automatically collapse affiliates into the definition of an ''exchange.'' A review of the facts set forth above shows that there is a real distinction between the Exchange and its ICE Affiliates with respect to the Wireless Connections, and so something owned by an ICE Affiliate is not owned by the Exchange.

The third prong of the definition of ''facility'' provides that a facility includes any right to the use of such premises or property or any service thereof for the purpose of effecting or reporting a transaction on an exchange (including, among other things, any system of communication to or from the exchange, by ticker or otherwise, maintained by or with the consent of the exchange).[20]

This prong does not capture the Wireless Connections because the Exchange does not have the right to use the Wireless Connections to effect or report a transaction on the Exchange.

[14] 17 CFR 240.3b–16(a).

[15] 15 U.S.C. 78c(a)(2).

[16] Securities Exchange Act Release No. 76127 (October 9, 2015), 80 FR 62584 (October 16, 2015) (SR–NYSE–2015–36), at note 9 (order approving proposed rule change amending Section 907.00 of the Listed Company Manual). *See also* 79 FR 23389, *supra* note 7, at note 4 (noting that that the definition of the term ''facility'' has not changed since it was originally adopted) and 23389 (stating that the SEC ''has not separately interpreted the definition of 'facility' '').

[17] As with the definition of ''exchange,'' the ICE Affiliates do not automatically fall within the definition of a ''facility.'' The definition focuses on ownership and the right to use properties and services, not corporate relationships. Indeed, if the term ''exchange'' in the definition of a facility included ''an exchange and its affiliates,'' then the rest of the functional prongs of the facility definition would be meaningless. Fundamental rules of statutory construction dictate that statutes be interpreted to give effect to each of their provisions, so as not to render sections of the statute superfluous.

[18] *See, e.g.,* definition of ''premises'' in Miriam-Webster Dictionary, at *https://www.merriam-webster.com/dictionary/premises,* and Cambridge English Dictionary, at *https://dictionary.cambridge.org/us/dictionary/english/premises.*

[19] A non-ICE entity owns, operates and maintains the wireless network between the Mahwah data center and the Carteret and Secaucus Third Party Data Centers pursuant to an agreement between the non-ICE entity and an ICE Affiliate.

[20] 15 U.S.C. 78c(a)(2).

ICE Affiliates and a non-ICE entity own and maintain the wireless network underlying the Wireless Connections, and ICE Affiliates, not the Exchange, offer and provide the Wireless Connections to customers. The Exchange does not know whether or when a market participant has entered into an agreement for a Wireless Connection and has no right to approve or disapprove of the provision of a Wireless Connection, in the same way that the Exchange would have no right to approve or disapprove of the provision of connectivity to a market participant in co-location or elsewhere by any other provider. The Exchange does not put content onto the Wireless Connections. When a customer terminates a Wireless Connection, the Exchange does not consent to the termination.

The Wireless Connections do not connect to the Exchange trading and execution systems. As such, the Wireless Connections are not provided for ''the purpose of effecting or reporting a transaction on'' the Exchange. Rather, a Wireless Connection facilitates the customer's interaction with itself. Each Wireless Connection connects the IDS equipment in the Third Party Data Center and IDS equipment in the Mahwah data center. At either end of the Wireless Connection, the customer uses a cross connect or other cable to connect its own equipment to the IDS equipment. In the Mahwah data center, the cross connect leads to the customer's server in co-location, not the Exchange trading and execution systems.

It is important to remember that the customers' equipment in the Mahwah data center is not provided by, part of, or a facility of, the Exchange. The Exchange provides the space in which customers' equipment is housed, and permits customers to use their equipment to communicate with the SRO Systems through services, such as connections to the local area networks, that are filed with the Commission.[21] The Exchange provides the space, but not the equipment. Accordingly, even if a customer were to use a Wireless Connection to send instructions to trade or to receive a report of a trade, the customer would not be sending instructions to the Exchange, but rather to its own equipment.

The Exchange believes the example in the parenthetical in the third prong of the definition of ''facility'' cannot be read as an independent prong of the definition. Such a reading would ignore that the parentheses and the word ''including'' clearly indicate that ''any system of communication to or from an exchange . . . maintained by or with the consent of the exchange'' is explaining the preceding text. By its terms, the parenthetical is providing a non-exclusive example of the type of property or service to which the prong refers, and does not remove the requirement that there must be a right to use the premises, property or service to effect or report a transaction on an exchange. It is making sure the reader understands that ''facility'' includes a ticker system that an exchange has the right to use, not creating a new fifth prong to the definition. In fact, if the ''right to use'' requirement were ignored, every communication provider that connected to an exchange, including any broker-dealer system and telecommunications network, would become a facility of that exchange so long as the exchange consented to the connection, whether or not the connection was used to trade or report a trade, and whether or not the exchange had any right at all to the use of the connection.

The fourth prong of the definition provides that a facility includes ''any right of the exchange to the use of any property or service.'' [22] As described above, the Exchange does not have the right to use the Wireless Connections. Instead, the customers of the Wireless Connections are customers who enter into an agreement with ICE Affiliates for connections over a wireless network, much of which is owned, operated and maintained by a non-ICE entity.

Accordingly, for all the reasons discussed above, the Wireless Connections provided by ICE Affiliates are not facilities of the Exchange.

The legal conclusion that the Wireless Connections are not facilities of the Exchange is strongly supported by the facts. The Wireless Connections are neither necessary for, nor integrally connected to, the operations of the Exchange. They are empty pipes that customers can use as they like. In this context, IDS simply acts as a vendor selling connectivity, just like the other vendors that offer wireless connections in the Carteret and Secaucus Third Party Data Centers and fiber connections to all the Third Party Data Centers. The fact that in this case it is ICE Affiliates that offer the Wireless Connections does not make the Wireless Connections facilities of the Exchange any more than are the connections offered by other parties.

Further, the Exchange believes that requiring it to file this proposed rule change is not necessary in order for the Commission to ensure that the Exchange is satisfying its requirements under the Act. Because, as described above, the Wireless Connections are not necessary for, nor connected to, the operations of the Exchange, and customers are not required to use the Wireless Connections, holding the Wireless Connections to the statutory standards in Section 6(b) serves no purpose.

Instead, the sole impact of the requirement that the Exchange file the Wireless Connections is to place an undue burden on competition on the ICE Affiliates that offer the connections, compared to their market competitors. This filing requirement, thus, itself is inconsistent with the requirement under Section 6(b)(8) of the Act that the rules of the exchange not ''impose any burden on competition not necessary or appropriate in furtherance of the purposes of [the Act].'' [23] This burden on competition arises because IDS would be unable, for example, to offer a client or potential client a different bandwidth it requests, without the delay and uncertainty of a filing, but its competitors will. Similarly, if a competitor decides to undercut IDS' fees because IDS, unlike the competitor, has to make its fees public, IDS will not be able to respond quickly, if at all. Indeed, because its competitors are not required to make their services or fees public, and are not subject to a Commission determination of whether such services or fees are ''not unfairly discriminatory'' or equitably allocated, IDS is at a competitive disadvantage from the very start.

The Proposed Service and Fees

As noted above, the Exchange proposes to add to its rules a Wireless Fee Schedule setting forth the fees charged by IDS related to the Wireless Connections between the Mahwah data center and the Third Party Data Centers.

For each Wireless Connection, a customer would be charged a non-recurring initial charge and a monthly recurring charge (''MRC'') that would vary depending upon bandwidth and the location of the connection. The proposal would waive the first month's

[21] *See* Securities Exchange Act Release No. 62960 (September 21, 2010), 75 FR 59310 (September 27, 2010) (SR–NYSE–2010–56) (order approving a proposed rule change amending the price list to reflect fees charged for co-location services). As described by the Commission, co-location is when a ''trading center . . . rents rack space to market participants that enables them to place their servers in close physical proximity to a trading center's matching engine.'' 75 FR 3594, *supra* note 7, at 3610 (noting that ''[c]o-location helps minimize network and other types of latencies between the matching engine of trading centers and the servers of market participants'').

[22] *Id.*

[23] 15 U.S.C. 78f(b)(8).

MRC, to allow customers to test a new Wireless Connection for a month before incurring any MRCs, and the Exchange proposes to add text to the Wireless Fee Schedule accordingly. If a customer had an existing Wireless Connection and opted to upgrade or downgrade to a different size circuit connecting to the same Third Party Access Center, it would not be subject to the initial charge.

The Exchange proposes to establish the Wireless Fee Schedule with a section under the heading ''A. Wireless Connectivity'' setting forth the fees charged by IDS related to the Wireless Connections, as follows:

Type of service	Description	Amount of charge
Wireless Connection between Mahwah Data Center and Secaucus access center.	10 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $9,000.
Wireless Connection between Mahwah Data Center and Secaucus access center.	50 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $13,500.
Wireless Connection between Mahwah Data Center and Secaucus access center.	100 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $23,000.
Wireless Connection between Mahwah Data Center and Secaucus access center.	200 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $44,000.
Wireless Connection between Mahwah Data Center and Carteret access center.	10 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $10,000.
Wireless Connection between Mahwah Data Center and Carteret access center.	50 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $15,000.
Wireless Connection between Mahwah Data Center and Carteret access center.	100 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $25,000.
Wireless Connection between Mahwah Data Center and Carteret access center.	200 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $45,000.
Wireless Connections between (a) Mahwah Data Center and Carteret access center and (b) Mahwah Data Center and Secaucus Data Center.	50 Mb Circuits	$15,000 initial charge for both connections plus monthly charge for both connections of $22,000.
Wireless Connection between Mahwah Data Center and Markham access center.	1 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $6,000.
Wireless Connection between Mahwah Data Center and Markham access center.	5 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $15,500.
Wireless Connection between Mahwah Data Center and Markham access center.	10 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $23,000.

Proposed General Note

The Exchange and each of the Affiliate SROs are filing the Wireless Connections. Although each such market will have a Wireless Fee Schedule, a market participant that obtains a Wireless Connection will not be charged more than once for that service, irrespective of whether it is a member of one, some or none of the Exchange and the Affiliate SROs. Accordingly, the Exchange proposes that the Wireless Fee Schedule include a General Note that describes the billing practice for market participants, as follows:

A market participant that incurs fees from the New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., NYSE Chicago, Inc. or NYSE National, Inc. (collectively, the ''Affiliate SROs'') for a particular service pursuant to this Fee Schedule shall not be subject to fees for the same service charged by the other Affiliate SROs.

The proposed General Note would be consistent with the first general note in the co-location section of the Exchange and Affiliate SROs' price lists and fee schedule,[24] as well as the Nasdaq Stock Market rules.[25]

Application and Impact of the Proposed Change

The proposed change would apply to all market participants equally. The proposed change would not apply differently to distinct types or sizes of market participants. Market participants that require other types or sizes of network connections between the Mahwah data center and the Third Party Data Centers could still request them. The purchase of the service is completely voluntary and the Wireless Fee Schedule will be applied uniformly to all market participants.

Competitive Environment

There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Secaucus and Carteret Third Party Access Centers using wireless equipment installed on towers and buildings near the Mahwah data center. In addition, some market participants have their own proprietary wireless networks. Based on the information available to it, the Exchange believes that the wireless connections offered by non-ICE entities provide connectivity at the same or similar speed as the Wireless Connections, and at the same or similar cost. The Exchange believes the Wireless Connections between the Mahwah data center and the Markham Third Party Data Center are the first public, commercially available wireless connections between the two points, creating a new connectivity option for customers in Markham.

Market participants that want a connection between a Third Party Data Center and the Mahwah data center have additional options. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers.

Wireless connections involve beaming signals through the air between antennas that are within sight of one another. Because the signals travel a

[24] *See* Securities Exchange Act Release Nos. 70206 (August 15, 2013), 78 FR 51765 (August 21, 2013) (SR–NYSE–2013–59); 70176 (August 13, 2013), 78 FR 50471 (August 19, 2013) (SR–NYSEMKT–2013–67); 70173 (August 13, 2013), 78 FR 50459 (August 19, 2013) (SR–NYSEArca–2013–80); 83351 (May 31, 2018), 83 FR 26314 (June 6, 2018) (SR–NYSENAT–2018–07; and 87408 (October 28, 2019), 84 FR 58778 (November 1, 2019) (SR–NYSECHX–2019–12).

[25] *See, e.g.,* The Nasdaq Stock Market General Equity and Options Rules, General 8, Section 1.

straight, unimpeded line, and because light waves travel faster through air than through glass (fiber optics), wireless messages have lower latency than messages travelling through fiber optics. At the same time, as a general rule wireless networks have less uptime than fiber networks. Wireless networks are directly and immediately affected by adverse weather conditions, which can cause message loss and outage periods. Wireless networks cannot be configured with redundancy in the same way that fiber networks can. As a result, an equipment or weather issue at any one location on the network will cause the entire network to have an outage. In addition, maintenance can take longer than it would with a fiber based network, as the relevant tower may be in a hard to reach location, or weather conditions may present safety issues, delaying technicians servicing equipment. Even under normal conditions, a wireless network will have a higher error rate than a fiber network of the same length.

The proposed Wireless Connections traverse wireless connections through a series of towers equipped with wireless equipment, including, in the case of the Carteret and Secaucus connections, a pole on the grounds of the Mahwah data center. With the exception of the non-ICE entity that owns the wireless network used for the Wireless Connections to Secaucus and Carteret,[26] third parties do not have access to such pole. However, access to such pole is not required for third parties to establish wireless networks that can compete with the Wireless Connections to the Carteret and Secaucus Third Party Data Centers, as witnessed by the existing wireless connections offered by non-ICE entities currently serving market participants.

Proximity to a data center is not the only determinant of a wireless network's latency. Rather, the latency of a wireless network depends on several factors. Variables include the wireless equipment utilized; the route of, and number of towers or buildings in, the network; and the fiber equipment used at either end of the connection. Moreover, latency is not the only consideration that a market participant may have in selecting a wireless network. Other considerations may include the bandwidth of the offered connection; amount of network uptime; the equipment that the network uses; the cost of the connection; and the applicable contractual provisions. Indeed, fiber network connections may be more attractive to some market participants as they are more reliable and less susceptible to weather conditions.

2. Statutory Basis

Although the Exchange does not believe that the present proposed change is a change to the ''rules of an exchange'' [27] required to be filed with the Commission under the Act, the Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[28] in general, and furthers the objectives of Section 6(b)(5) of the Act,[29] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to, and perfect the mechanisms of, a free and open market and a national market system and, in general, to protect investors and the public interest and does not unfairly discriminate between customers, issuers, brokers, or dealers. The Exchange also believes that the proposed rule change is consistent with Section 6(b)(4) of the Act,[30] because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The Proposed Change Is Reasonable

The Exchange believes its proposal is reasonable.

There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Secaucus and Carteret Third Party Access Centers using wireless equipment installed on towers and buildings near the Mahwah data center. In addition, some market participants have their own proprietary wireless networks. Based on the information available to it, the Exchange believes that the wireless connections offered by non-ICE entities provide connectivity at the same or similar speed as the Wireless Connections, and at the same or similar cost. The Exchange believes the Wireless Connections between the Mahwah data center and the Markham Third Party Data Center are the first public, commercially available wireless connections between the two points, creating a new connectivity option for customers in Markham.

The Wireless Connections provide market participants with one means of connectivity, but substitute products are available, as witnessed by the existing wireless connections offered by non-ICE entities currently serving market participants. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers.

Market participants' considerations in determining what connectivity to purchase may include latency; bandwidth size; amount of network uptime; the equipment that the network uses; the cost of the connection; and the applicable contractual provisions. Indeed, fiber network connections may be more attractive to some market participants as they are more reliable and less susceptible to weather conditions.

The Exchange believes that the proposed pricing for the Wireless Connections is reasonable because it allows market participants to select the connectivity options that best suit their needs. A market participant that opts to connect with a Wireless Network would be able to select the route and bandwidth that better suit its needs, thereby helping it tailor its operations to the requirements of its business operations. The fees also reflect the benefit received by customers in terms of lower latency over the fiber optics options.

Only market participants that voluntarily select to receive Wireless Connections are charged for them, and those services are available to all market participants. Furthermore, the Exchange believes that the services and fees proposed herein are reasonable because, in addition to the services being completely voluntary, they are available to all market participants on an equal basis (*i.e.,* the same products and services are available to all market participants). All market participants that voluntarily select Wireless Connections would be charged the same amount for the same services and would have their first month's MRC for Wireless Connections waived.

Overall, the Exchange believes that the proposed change is reasonable because the Wireless Connections described herein are offered as a convenience to market participants, but offering them requires the provision,

[26] *See* note 19, *supra.*

[27] *See* 15 U.S.C. 78c(a)(27) (defining the term ''rules of an exchange'').

[28] 15 U.S.C. 78f(b).

[29] 15 U.S.C. 78f(b)(5).

[30] 15 U.S.C. 78f(b)(4).

maintenance and operation of the Mahwah data center, wireless networks and access centers in the Third Party Data Centers, including the installation and monitoring, support and maintenance of the services.

The Exchange believes that the proposed waiver of the first month's MRC is reasonable as it would allow customers to test a Wireless Connection for a month before incurring any monthly recurring fees and may act as an incentive to market participants to connect to a Wireless Connection. The Exchange believes that the proposed waiver of the initial charge if a customer has an existing Wireless Connection and opted to upgrade or downgrade to a different size circuit at the same Third Party Data Center is reasonable because the change in Wireless Connection would not require IDS to do any physical work to implement the connection.

The Exchange believes that its proposed General Note is reasonable because it would provide transparency regarding how the billing practice for Wireless Connections functions. The Exchange believes that a customer should not be charged more than once for a Wireless Connection. For example, to charge one customer twice for a Wireless Connection because that customer is a member of two Affiliate SROs, and so subject to the rules of both Affiliate SROs, when another customer that buys the same Wireless Connection only pays once, would not promote just and equitable principles of trade, and could result in the Exchanges and Affiliate SROs receiving the proceeds from multiple fees despite only providing a service once.

The Proposed Change Is an Equitable Allocation of Fees and Credits

The Exchange believes its proposal equitably allocates its fees among its market participants.

The proposed change would not apply differently to distinct types or sizes of market participants. Rather, it would apply to all market participants equally. As is currently the case, the purchase of any connectivity service is completely voluntary and the Wireless Fee Schedule will be applied uniformly to all customers.

Without this proposed rule change, market participants seeking connectivity to a Third Party Data Center would have fewer options. With it, because the Wireless Connections are offered at different bandwidths and price points, market participants have more choices with respect to the form and price of the connectivity they use, allowing a market participant that opts to connect with a wireless network to select the connectivity and bandwidth that better suit its needs, thereby helping it tailor its operations to the requirements of its business operations.

The Exchange believes that its proposed General Note is equitable because a customer would not be charged more than once for a Wireless Connection. For example, to charge one customer twice for a Wireless Connection because that customer is a member of two Affiliate SROs, and so subject to the rules of both Affiliate SROs, when another customer that buys the same Wireless Connection only pays once, would not promote just and equitable principles of trade, and could result in the Exchanges and Affiliate SROs receiving the proceeds from multiple fees despite only providing a service once. The Exchange believes that its proposed General Note is reasonable because it would provide transparency regarding how the billing practice for Wireless Connections functions.

The Proposed Change Is Not Unfairly Discriminatory

The Exchange believes its proposal is not unfairly discriminatory.

The proposed change would not apply differently to distinct types or sizes of market participants. Rather, it would apply to all market participants equally. As is currently the case, the purchase of any connectivity service is completely voluntary and the Wireless Fee Schedule will be applied uniformly to all customers.

Without this proposed rule change, market participants seeking connectivity to a Third Party Data Center would have fewer options. With it, because the Wireless Connections are offered at different bandwidths and price points, market participants have more choices with respect to the form and price of the connectivity they use, allowing a market participant that opts to connect with a wireless network to select the connectivity and bandwidth that better suit its needs, thereby helping it tailor its operations to the requirements of its business operations.

There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Secaucus and Carteret Third Party Access Centers using wireless equipment installed on towers and buildings near the Mahwah data center. In addition, some market participants have their own proprietary wireless networks. Based on the information available to it, the Exchange believes that the wireless connections offered by non-ICE entities provide connectivity at the same or similar speed as the Wireless Connections, and at the same or similar cost. The Exchange believes the Wireless Connections between the Mahwah data center and the Markham Third Party Data Center are the first public, commercially available wireless connections between the two points, creating a new connectivity option for customers in Markham.

Market participants that want a connection between a Third Party Data Center and the Mahwah data center have additional options. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers.

Market participants' considerations in determining what connectivity to purchase may include latency; bandwidth size; amount of network uptime; the equipment that the network uses; the cost of the connection; and the applicable contractual provisions. Indeed, fiber network connections may be more attractive to some market participants as they are more reliable and less susceptible to weather conditions.

The Exchange believes that its proposed General Note would not be unfairly discriminatory because a customer would not be charged more than once for a Wireless Connection. For example, to charge one customer twice for a Wireless Connection because that customer is a member of two Affiliate SROs, and so subject to the rules of both Affiliate SROs, when another customer that buys the same Wireless Connection only pays once, would not promote just and equitable principles of trade, and could result in the Exchanges and Affiliate SROs receiving the proceeds from multiple fees despite only providing a service once.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the only burden on competition of the proposed change is on IDS and other commercial connectivity providers. Solely because IDS is wholly owned by the same parent company as the Exchange, IDS will be at a competitive disadvantage to its commercial competitors, and its commercial competitors, without a filing requirement, will be at a relative competitive advantage to IDS.

By permitting IDS to continue to offer the Wireless Connectivity, approval of the proposed changes would contribute to competition by allowing IDS to compete with other connectivity providers, and thus provides market participants another connectivity option. For this reason, the proposed rule changes will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of Section 6(b)(8) of the Act.[31]

There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Secaucus and Carteret Third Party Access Centers using wireless equipment installed on towers and buildings near the Mahwah data center. In addition, some market participants have their own proprietary wireless networks. Based on the information available to it, the Exchange believes that the wireless connections offered by non-ICE entities provide connectivity at the same or similar speed as the Wireless Connections, and at the same or similar cost. The Exchange believes the Wireless Connections between the Mahwah data center and the Markham Third Party Data Center are the first public, commercially available wireless connections between the two points, creating a new connectivity option for customers in Markham. Importantly, the Exchange does not control the Third Party Data Centers and could not preclude other parties from creating new wireless or fiber connections to any of the Third Party Data Centers.

Market participants that want a connection between a Third Party Data Center and the Mahwah data center have additional options. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers. Indeed, fiber network connections may be more attractive to some market participants as they are more reliable and less susceptible to weather conditions.

The proposed Wireless Connections traverse wireless connections through a series of towers equipped with wireless equipment, including, in the case of the Carteret and Secaucus connections, a pole on the grounds of the Mahwah data center. With the exception of the non-ICE entity that owns the wireless network used for the Wireless Connections to Secaucus and Carteret,[32] third parties do not have access to such pole, as the IDS wireless network has exclusive rights to operate wireless equipment on the Mahwah data center pole. IDS does not sell rights to third parties to operate wireless equipment on the pole, due to space limitations, security concerns, and the interference that would arise between equipment placed too closely together.

Access to the pole or roof is not required for other parties to establish wireless networks that can compete with the Wireless Connections, as witnessed by the existing wireless connections offered by non-ICE entities currently serving market participants. The latency of a wireless network depends on several factors, not just proximity to a data center. Variables include the wireless equipment utilized; the route of, and number of towers or buildings in, the network; and the fiber equipment used at either end of the connection. In addition, latency is not the only consideration that a market participant may have in selecting a wireless network. Market participants' considerations in determining what connectivity to purchase may include latency; bandwidth size; amount of network uptime; the equipment that the network uses; the cost of the connection; and the applicable contractual provisions.

The Exchange operates in a highly competitive market in which exchanges and other vendors offer connectivity options between data centers as a means to facilitate the trading and other market activities of market participants. The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [33]

The proposed change does not affect competition among national securities exchanges or among members of the Exchange, but rather between IDS and its commercial competitors.

For the reasons described above, the Exchange believes that the proposed rule changes reflect this competitive environment.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSE–2020–05 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSE–2020–05. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than

[31] 15 U.S.C. 78f(b)(8).

[32] *See* note 19, *supra.*

[33] *See* Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, at 37499 (June 29, 2005).

those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSE–2020–05, and should be submitted on or before March 10, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[34]

J. Matthew DeLesDernier,

Assistant Secretary.

[FR Doc. 2020–03095 Filed 2–14–20; 8:45 am]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–88169; File No. SR–NYSEAMER–2020–05]

Self-Regulatory Organizations; NYSE American LLC; Notice of Filing of Proposed Rule Change To Establish a Schedule of Wireless Connectivity Fees and Charges With Wireless Connections

February 11, 2020.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act''),[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on January 30, 2020, NYSE American LLC (''NYSE American'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to establish a schedule of Wireless Connectivity Fees and Charges (the ''Wireless Fee Schedule'') with wireless connections between the Mahwah, New Jersey data center and other data centers. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to establish the Wireless Fee Schedule with wireless connections between the Mahwah, New Jersey data center and three data centers that are owned and operated by third parties unaffiliated with the Exchange: (1) Carteret, New Jersey, (2) Secaucus, New Jersey, and (3) Markham, Canada (collectively, the ''Third Party Data Centers''). Market participants that purchase such a wireless connection (a ''Wireless Connection'') are charged an initial and monthly fee. In addition, the Exchange proposes to include a General Note to the Wireless Fee Schedule.

The Exchange does not believe that the present proposed change is a change to the ''rules of an exchange''[4] required to be filed with the Commission under the Act. The definition of ''exchange'' under the Act includes ''the market facilities maintained by such exchange.''[5] Based on its review of the relevant facts and circumstances, and as discussed further below, the Exchange has concluded that the Wireless Connections are not facilities of the Exchange within the meaning of the Act, and therefore do not need to be included in its rules.

The Exchange is making the current proposal solely because the Staff of the Commission has advised the Exchange that it believes the Wireless Connections are facilities of the Exchange and so must be filed as part of its rules.[6] The Staff has not set forth the basis of its conclusion beyond verbally noting that the Wireless Connections are provided by an affiliate of the Exchange and a market participant could use a Wireless Connection to trade on, or receive the market data of, the Exchange.[7]

The Exchange expects the proposed change to be operative 60 days after the present filing becomes effective.

The Exchange and the ICE Affiliates

To understand the Exchange's conclusion that the Wireless Connections are not facilities of the Exchange within the meaning of the Act, it is important to understand the very real distinction between the Exchange and its corporate affiliates (the ''ICE Affiliates''). The Exchange is an indirect subsidiary of Intercontinental Exchange, Inc. (''ICE''). Around the world, ICE operates seven regulated exchanges in addition to the Exchange and its four national securities exchange affiliates,[8] including futures markets, as

[34] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] *See* 15 U.S.C. 78c(a)(27) (defining the term ''rules of an exchange'').

[5] 15 U.S.C. 78c(a)(1). See 15 U.S.C. 78c(a)(2) (defining the term ''facility'' as applied to an exchange).

[6] Telephone conversation between Commission staff and representatives of the Exchange, December 12, 2019.

[7] *Id.* The Commission has previously stated that services were facilities of an exchange subject to the rule filing requirements without fully explaining its reasoning. In 2010, the Commission stated that exchanges had to file proposed rule changes with respect to co-location because ''[t]he Commission views co-location services as being a material aspect of the operation of the facilities of an exchange.'' The Commission did not specify why it reached that conclusion. *See* Securities Exchange Act Release No. 61358 (January 14, 2010), 75 FR 3594 (January 21, 2010) (concept release on equity market structure), at note 76.

In addition, in 2014, the Commission instituted proceedings to determine whether to disapprove a proposed rule change by The NASDAQ Stock Market LLC (''Nasdaq'') on the basis that Nasdaq's ''provision of third-party market data feeds to co-located clients appears to be an integral feature of its co-location program, and co-location programs are subject to the rule filing process.'' Securities Exchange Act Release No. 72654 (July 22, 2014), 79 FR 43808 (July 28, 2014) (SR–NASDAQ–2014–034). In its order, the Commission did not explain why it believed that the provision of third party data was an integral feature of co-location, or if it believed that it was a facility of Nasdaq, although the Nasdaq filing analyzed each prong of the definition of facility in turn. *See* Securities Exchange Act Release No. 71990 (April 22, 2014), 79 FR 23389 (April 28, 2014) (SR–NASDAQ–2014–034).

[8] The Exchange's four national securities exchange affiliates are the New York Stock Exchange LLC, NYSE Arca, Inc., NYSE Chicago, Inc., and NYSE National, Inc. (together, the ''Affiliate SROs'').

well as six clearing houses. Among others, the ICE Affiliates are subject to the jurisdiction of regulators in the U.S., U.K., E.U., the Netherlands, Canada and Singapore.[9] In all, the ICE Affiliates include hundreds of ICE subsidiaries, including more than thirty that are significant legal entity subsidiaries as defined by Commission rule.[10]

Through its ICE Data Services (''IDS'') business,[11] ICE operates the ICE Global Network (''IGN''), a global connectivity network whose infrastructure provides access to over 150 global markets, including the Exchange and Affiliate SROs, and over 750 data sources. All the ICE Affiliates are ultimately controlled by ICE, as the indirect parent company, but generally they do not control each other. In the present case, it is IDS, not the Exchange, that provides the Wireless Connections to market participants. The Exchange does not control IDS.

Wireless Connections

If a market participant wants a connection between one of the Third Party Data Centers and the Mahwah data center, it may opt to purchase a Wireless Connection, for which it will be charged an initial and monthly fee.

Once requested, IDS establishes a Wireless Connection between the IDS equipment in the Third Party Data Center and IDS equipment in the Mahwah data center. IDS contracts with a non-ICE entity to provide the Wireless Connections between the Secaucus and Carteret Third Party Data Centers and the Mahwah data center, through a series of towers equipped with wireless equipment. IDS uses its own wireless network for the Wireless Connection between the Markham Third Party Data Center and the Mahwah data center. At either end of the Wireless Connection, the customer uses a cross connect or other cable to connect its own equipment to the IDS equipment.[12] In the Mahwah data center, the cross connect leads to the customer's server in co-location.

The Wireless Connection does not connect to the Exchange trading and execution systems, nor is it a system of communication from the customer's server in co-location to the trading and execution systems of the Exchange or the Affiliate SROs (collectively, the ''SRO Systems''). Rather, a Wireless Connection facilitates the customer's interaction with itself. Essentially, a Wireless Connection is an empty pipe that a customer can use to communicate between its equipment in co-location and its equipment in the Third Party Data Center.

Customers have control over the data they send over their Wireless Connections. They may, but are not required to, use them to send trading orders to their equipment in co-location; relay Exchange market data, third party market data and public quote feeds from Securities Information Processors; send risk management, billing, or compliance information to their preferred location; or to carry any other market information or other data they wish to and from their equipment in the Third Party Data Centers and Mahwah data center. The Exchange does not, and cannot, know what data customers send over the Wireless Connections. The Exchange does not send or receive any data over the Wireless Connections.

Market participants that want a connection between a Third Party Data Center and the Mahwah data center have options. There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Carteret and Secaucus Third Party Data Centers using wireless equipment installed on towers and buildings near the Mahwah data center. Some market participants have their own proprietary wireless networks. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers.

The Wireless Connections Are Not Facilities of the Exchange

The Definition of ''Exchange''

The definition of ''exchange'' focuses on the exchange entity and what it does:[13]

> The term ''exchange'' means any organization, association, or group of persons, whether incorporated or unincorporated, which constitutes, maintains, or provides a market place or facilities for bringing together purchasers and sellers of securities or for otherwise performing with respect to securities the functions commonly performed by a stock exchange as that term is generally understood, and includes the market place and the market facilities maintained by such exchange.

If the ''exchange'' definition included all of an exchange's affiliates, the ''Exchange'' would encompass a global network of futures markets, clearing houses, and data providers, and all of those entities worldwide would be subject to regulation by the Commission. That, however, is not what the definition in the Act provides.

The Exchange and the Affiliate SROs fall squarely within the Act's definition of an ''exchange'': They each provide a market place to bring together purchasers and sellers of securities and perform with respect to securities the functions commonly performed by a stock exchange.

That is not true for the non-exchange ICE Affiliates. Those ICE Affiliates do not provide such a marketplace or perform ''with respect to securities the functions commonly performed by a stock exchange,'' and therefore they are not an ''exchange'' or part of the ''Exchange'' for purposes of the Act. Accordingly, in conducting its analysis, the Exchange does not automatically collapse the ICE Affiliates into the Exchange. The Wireless Connections are also not part of the Exchange, as they are services, and as such cannot be part of an ''organization, association or group of persons'' with the Exchange.

In Rule 3b–16 the Commission further defined the term ''exchange'' under the Act, stating that:[14]

> (a) An organization, association, or group of persons shall be considered to constitute, maintain, or provide ''a market place or facilities for bringing together purchasers and sellers of securities or for otherwise performing with respect to securities the functions commonly performed by a stock exchange,'' as those terms are used in *section* 3(a)(1) of the Act . . . if such organization, association, or group of persons:
>
> (1) Brings together the orders for securities of multiple buyers and sellers; and
>
> (2) Uses established, non-discretionary methods (whether by providing a trading facility or by setting rules) under which such orders interact with each other, and the buyers and sellers entering such orders agree to the terms of a trade.

The non-exchange ICE Affiliates do not bring ''together orders for securities of multiple buyers and sellers,'' and so are not an ''exchange'' or part of the ''Exchange'' for purposes of Rule 3b–16.

The relevant question, then, is whether the Wireless Connections are ''facilities'' of the Exchange.

[9] Intercontinental Exchange, Inc. Annual Report on Form 10–K for the year ended December 31, 2018, Exhibit 21.1 (filed February 7, 2019), at 15–16.

[10] *Id.* at Exhibit 21.1.

[11] The IDS business operates through several different ICE Affiliates, including NYSE Technologies Connectivity, Inc., an indirect subsidiary of the NYSE.

[12] A cable connects the IDS and customer equipment in the Markham Third Party Data Center. Elsewhere, the customer buys a cross connect from IDS. The cross connects utilized in the Mahwah data center are filed with the Commission. *See* Securities Exchange Act Release No. 67665 (August 15, 2012), 77 FR 50734 (August 22, 2012) (SR–NYSEMKT–2012–11).

[13] 15 U.S.C. 78c(a)(1).

[14] 17 CFR 240.3b–16(a).

The Definition of ''Facility''

The Act defines a ''facility'' [15] as follows:

> The term ''facility'' when used with respect to an exchange includes [1] its premises, [2] tangible or intangible property whether on the premises or not, [3] any right to the use of such premises or property or any service thereof for the purpose of effecting or reporting a transaction on an exchange (including, among other things, any system of communication to or from the exchange, by ticker or otherwise, maintained by or with the consent of the exchange), and [4] any right of the exchange to the use of any property or service.

In 2015 the Commission noted that whether something is a ''facility'' is not always black and white, as ''any determination as to whether a service or other product is a facility of an exchange requires an analysis of the particular facts and circumstances.'' [16] Accordingly, the Exchange understands that the specific facts and circumstances of the Wireless Connections must be assessed before a determination can be made regarding whether or not they are facilities of the Exchange.[17]

The first prong of the definition is that ''facility,'' when used with respect to an exchange, includes ''its premises.'' That prong is not applicable in this case, because the Wireless Connections are not premises of the Exchange. The term ''premises'' is generally defined as referring to an entity's building, land, and appurtenances.[18] The wireless network that runs between IDS equipment in the Mahwah data center and IDS equipment in Third Party Data Centers, much of which is actually owned, operated and maintained by a non-ICE entity,[19] does not connect to the Exchange trading and execution systems and is not the premises of the Exchange. The portion of the Mahwah data center where the ''exchange'' functions are performed—*i.e.* the SRO Systems that bring together purchasers and sellers of securities and perform with respect to securities the functions commonly performed by a stock exchange—could be construed as the ''premises'' of the Exchange, but the same is not true for a wireless network that is almost completely outside of the Mahwah data center.

The second prong of the definition of ''facility'' provides that a facility includes the exchange's ''tangible or intangible property whether on the premises or not.'' The Wireless Connections are not the property of the Exchange: They are services. The underlying wireless network is owned by ICE Affiliates and a non-ICE entity. As noted, the Act does not automatically collapse affiliates into the definition of an ''exchange.'' A review of the facts set forth above shows that there is a real distinction between the Exchange and its ICE Affiliates with respect to the Wireless Connections, and so something owned by an ICE Affiliate is not owned by the Exchange.

The third prong of the definition of ''facility'' provides that a facility includes

> any right to the use of such premises or property or any service thereof for the purpose of effecting or reporting a transaction on an exchange (including, among other things, any system of communication to or from the exchange, by ticker or otherwise, maintained by or with the consent of the exchange).[20]

This prong does not capture the Wireless Connections because the Exchange does not have the right to use the Wireless Connections to effect or report a transaction on the Exchange. ICE Affiliates and a non-ICE entity own and maintain the wireless network underlying the Wireless Connections, and ICE Affiliates, not the Exchange, offer and provide the Wireless Connections to customers. The Exchange does not know whether or when a market participant has entered into an agreement for a Wireless Connection and has no right to approve or disapprove of the provision of a Wireless Connection, in the same way that the Exchange would have no right to approve or disapprove of the provision of connectivity to a market participant in co-location or elsewhere by any other provider. The Exchange does not put content onto the Wireless Connections. When a customer terminates a Wireless Connection, the Exchange does not consent to the termination.

The Wireless Connections do not connect to the Exchange trading and execution systems. As such, the Wireless Connections are not provided for ''the purpose of effecting or reporting a transaction on'' the Exchange. Rather, a Wireless Connection facilitates the customer's interaction with itself. Each Wireless Connection connects the IDS equipment in the Third Party Data Center and IDS equipment in the Mahwah data center. At either end of the Wireless Connection, the customer uses a cross connect or other cable to connect its own equipment to the IDS equipment. In the Mahwah data center, the cross connect leads to the customer's server in co-location, not the Exchange trading and execution systems.

It is important to remember that the customers' equipment in the Mahwah data center is not provided by, part of, or a facility of, the Exchange. The Exchange provides the space in which customers' equipment is housed, and permits customers to use their equipment to communicate with the SRO Systems through services, such as connections to the local area networks, that are filed with the Commission.[21] The Exchange provides the space, but not the equipment. Accordingly, even if a customer were to use a Wireless Connection to send instructions to trade or to receive a report of a trade, the customer would not be sending instructions to the Exchange, but rather to its own equipment.

The Exchange believes the example in the parenthetical in the third prong of the definition of ''facility'' cannot be read as an independent prong of the definition. Such a reading would ignore that the parentheses and the word ''including'' clearly indicate that ''any system of communication to or from an exchange . . . maintained by or with

[15] 15 U.S.C. 78c(a)(2).

[16] Securities Exchange Act Release No. 76127 (October 9, 2015), 80 FR 62584 (October 16, 2015) (SR–NYSE–2015–36), at note 9 (order approving proposed rule change amending Section 907.00 of the Listed Company Manual). *See also* 79 FR 23389, *supra* note 7, at note 4 (noting that that the definition of the term ''facility'' has not changed since it was originally adopted) and 23389 (stating that the SEC ''has not separately interpreted the definition of 'facility'").

[17] As with the definition of ''exchange,'' the ICE Affiliates do not automatically fall within the definition of a ''facility.'' The definition focuses on ownership and the right to use properties and services, not corporate relationships. Indeed, if the term ''exchange'' in the definition of a facility included ''an exchange and its affiliates,'' then the rest of the functional prongs of the facility definition would be meaningless. Fundamental rules of statutory construction dictate that statutes be interpreted to give effect to each of their provisions, so as not to render sections of the statute superfluous.

[18] *See, e.g.,* definition of ''premises'' in Miriam-Webster Dictionary, at *https://www.merriam-webster.com/dictionary/premises,* and Cambridge English Dictionary, at *https://dictionary.cambridge.org/us/dictionary/english/premises.*

[19] A non-ICE entity owns, operates and maintains the wireless network between the Mahwah data center and the Carteret and Secaucus Third Party Data Centers pursuant to an agreement between the non-ICE entity and an ICE Affiliate.

[20] 15 U.S.C. 78c(a)(2).

[21] *See* Securities Exchange Act Release No. 62961 (September 21, 2010), 75 FR 59299 (September 27, 2010) (SR–NYSEAmex–2010–80) order approving a proposed rule change amending the price list to reflect fees charged for co-location services). As described by the Commission, co-location is when a ''trading center . . . rents rack space to market participants that enables them to place their servers in close physical proximity to a trading center's matching engine.'' 75 FR 3594, *supra* note 7, at 3610 (noting that ''[c]o-location helps minimize network and other types of latencies between the matching engine of trading centers and the servers of market participants'').

the consent of the exchange'' is explaining the preceding text. By its terms, the parenthetical is providing a non-exclusive example of the type of property or service to which the prong refers, and does not remove the requirement that there must be a right to use the premises, property or service to effect or report a transaction on an exchange. It is making sure the reader understands that ''facility'' includes a ticker system that an exchange has the right to use, not creating a new fifth prong to the definition. In fact, if the ''right to use'' requirement were ignored, every communication provider that connected to an exchange, including any broker-dealer system and telecommunications network, would become a facility of that exchange so long as the exchange consented to the connection, whether or not the connection was used to trade or report a trade, and whether or not the exchange had any right at all to the use of the connection.

The fourth prong of the definition provides that a facility includes ''any right of the exchange to the use of any property or service.'' [22] As described above, the Exchange does not have the right to use the Wireless Connections. Instead, the customers of the Wireless Connections are customers who enter into an agreement with ICE Affiliates for connections over a wireless network, much of which is owned, operated and maintained by a non-ICE entity.

Accordingly, for all the reasons discussed above, the Wireless Connections provided by ICE Affiliates are not facilities of the Exchange.

The legal conclusion that the Wireless Connections are not facilities of the Exchange is strongly supported by the facts. The Wireless Connections are neither necessary for, nor integrally connected to, the operations of the Exchange. They are empty pipes that customers can use as they like. In this context, IDS simply acts as a vendor selling connectivity, just like the other vendors that offer wireless connections in the Carteret and Secaucus Third Party Data Centers and fiber connections to all the Third Party Data Centers. The fact that in this case it is ICE Affiliates that offer the Wireless Connections does not make the Wireless Connections facilities of the Exchange any more than are the connections offered by other parties.

Further, the Exchange believes that requiring it to file this proposed rule change is not necessary in order for the Commission to ensure that the Exchange is satisfying its requirements under the Act. Because, as described above, the Wireless Connections are not necessary for, nor connected to, the operations of the Exchange, and customers are not required to use the Wireless Connections, holding the Wireless Connections to the statutory standards in Section 6(b) serves no purpose.

Instead, the sole impact of the requirement that the Exchange file the Wireless Connections is to place an undue burden on competition on the ICE Affiliates that offer the connections, compared to their market competitors. This filing requirement, thus, itself is inconsistent with the requirement under Section 6(b)(8) of the Act that the rules of the exchange not ''impose any burden on competition not necessary or appropriate in furtherance of the purposes of [the Act].'' [23] This burden on competition arises because IDS would be unable, for example, to offer a client or potential client a different bandwidth it requests, without the delay and uncertainty of a filing, but its competitors will. Similarly, if a competitor decides to undercut IDS' fees because IDS, unlike the competitor, has to make its fees public, IDS will not be able to respond quickly, if at all. Indeed, because its competitors are not required to make their services or fees public, and are not subject to a Commission determination of whether such services or fees are ''not unfairly discriminatory'' or equitably allocated, IDS is at a competitive disadvantage from the very start.

The Proposed Service and Fees

As noted above, the Exchange proposes to add to its rules a Wireless Fee Schedule setting forth the fees charged by IDS related to the Wireless Connections between the Mahwah data center and the Third Party Data Centers.

For each Wireless Connection, a customer would be charged a non-recurring initial charge and a monthly recurring charge (''MRC'') that would vary depending upon bandwidth and the location of the connection. The proposal would waive the first month's MRC, to allow customers to test a new Wireless Connection for a month before incurring any MRCs, and the Exchange proposes to add text to the Wireless Fee Schedule accordingly. If a customer had an existing Wireless Connection and opted to upgrade or downgrade to a different size circuit connecting to the same Third Party Access Center, it would not be subject to the initial charge.

The Exchange proposes to establish the Wireless Fee Schedule with a section under the heading ''A. Wireless Connectivity'' setting forth the fees charged by IDS related to the Wireless Connections, as follows:

Type of service	Description	Amount of charge
Wireless Connection between Mahwah Data Center and Secaucus access center.	10 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $9,000.
Wireless Connection between Mahwah Data Center and Secaucus access center.	50 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $13,500.
Wireless Connection between Mahwah Data Center and Secaucus access center.	100 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $23,000.
Wireless Connection between Mahwah Data Center and Secaucus access center.	200 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $44,000.
Wireless Connection between Mahwah Data Center and Carteret access center.	10 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $10,000.
Wireless Connection between Mahwah Data Center and Carteret access center.	50 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $15,000.
Wireless Connection between Mahwah Data Center and Carteret access center.	100 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $25,000.
Wireless Connection between Mahwah Data Center and Carteret access center.	200 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $45,000.
Wireless Connections between (a) Mahwah Data Center and Carteret access center and (b) Mahwah Data Center and Secaucus Data Center.	50 Mb Circuits	$15,000 initial charge for both connections plus monthly charge for both connections of $22,000.

[22] *Id.*

[23] 15 U.S.C. 78f(b)(8).

Type of service	Description	Amount of charge
Wireless Connection between Mahwah Data Center and Markham access center.	1 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $6,000.
Wireless Connection between Mahwah Data Center and Markham access center.	5 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $15,500.
Wireless Connection between Mahwah Data Center and Markham access center.	10 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $23,000.

Proposed General Note

The Exchange and each of the Affiliate SROs are filing the Wireless Connections. Although each such market will have a Wireless Fee Schedule, a market participant that obtains a Wireless Connection will not be charged more than once for that service, irrespective of whether it is a member of one, some or none of the Exchange and the Affiliate SROs. Accordingly, the Exchange proposes that the Wireless Fee Schedule include a General Note that describes the billing practice for market participants, as follows:

A market participant that incurs fees from the New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., NYSE Chicago, Inc. or NYSE National, Inc. (collectively, the ''Affiliate SROs'') for a particular service pursuant to this Fee Schedule shall not be subject to fees for the same service charged by the other Affiliate SROs.

The proposed General Note would be consistent with the first general note in the co-location section of the Exchange and Affiliate SROs' price lists and fee schedule,[24] as well as the Nasdaq Stock Market rules.[25]

Application and Impact of the Proposed Change

The proposed change would apply to all market participants equally. The proposed change would not apply differently to distinct types or sizes of market participants. Market participants that require other types or sizes of network connections between the Mahwah data center and the Third Party Data Centers could still request them. The purchase of the service is completely voluntary and the Wireless Fee Schedule will be applied uniformly to all market participants.

Competitive Environment

There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Secaucus and Carteret Third Party Access Centers using wireless equipment installed on towers and buildings near the Mahwah data center. In addition, some market participants have their own proprietary wireless networks. Based on the information available to it, the Exchange believes that the wireless connections offered by non-ICE entities provide connectivity at the same or similar speed as the Wireless Connections, and at the same or similar cost. The Exchange believes the Wireless Connections between the Mahwah data center and the Markham Third Party Data Center are the first public, commercially available wireless connections between the two points, creating a new connectivity option for customers in Markham.

Market participants that want a connection between a Third Party Data Center and the Mahwah data center have additional options. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers.

Wireless connections involve beaming signals through the air between antennas that are within sight of one another. Because the signals travel a straight, unimpeded line, and because light waves travel faster through air than through glass (fiber optics), wireless messages have lower latency than messages travelling through fiber optics. At the same time, as a general rule wireless networks have less uptime than fiber networks. Wireless networks are directly and immediately affected by adverse weather conditions, which can cause message loss and outage periods. Wireless networks cannot be configured with redundancy in the same way that fiber networks can. As a result, an equipment or weather issue at any one location on the network will cause the entire network to have an outage. In addition, maintenance can take longer than it would with a fiber based network, as the relevant tower may be in a hard to reach location, or weather conditions may present safety issues, delaying technicians servicing equipment. Even under normal conditions, a wireless network will have a higher error rate than a fiber network of the same length.

The proposed Wireless Connections traverse wireless connections through a series of towers equipped with wireless equipment, including, in the case of the Carteret and Secaucus connections, a pole on the grounds of the Mahwah data center. With the exception of the non-ICE entity that owns the wireless network used for the Wireless Connections to Secaucus and Carteret,[26] third parties do not have access to such pole. However, access to such pole is not required for third parties to establish wireless networks that can compete with the Wireless Connections to the Carteret and Secaucus Third Party Data Centers, as witnessed by the existing wireless connections offered by non-ICE entities currently serving market participants.

Proximity to a data center is not the only determinant of a wireless network's latency. Rather, the latency of a wireless network depends on several factors. Variables include the wireless equipment utilized; the route of, and number of towers or buildings in, the network; and the fiber equipment used at either end of the connection. Moreover, latency is not the only consideration that a market participant may have in selecting a wireless network. Other considerations may include the bandwidth of the offered connection; amount of network uptime; the equipment that the network uses; the cost of the connection; and the applicable contractual provisions. Indeed, fiber network connections may be more attractive to some market participants as they are more reliable and less susceptible to weather conditions.

2. Statutory Basis

Although the Exchange does not believe that the present proposed change is a change to the ''rules of an

[24] *See* Securities Exchange Act Release Nos. 70206 (August 15, 2013), 78 FR 51765 (August 21, 2013) (SR–NYSE–2013–59); 70176 (August 13, 2013), 78 FR 50471 (August 19, 2013) (SR–NYSEMKT–2013–67); 70173 (August 13, 2013), 78 FR 50459 (August 19, 2013) (SR–NYSEArca–2013–80); 83351 (May 31, 2018), 83 FR 26314 (June 6, 2018) (SR–NYSENAT–2018–07; and 87408 (October 28, 2019), 84 FR 58778 (November 1, 2019) (SR–NYSECHX–2019–12).

[25] *See, e.g.,* The Nasdaq Stock Market General Equity and Options Rules, General 8, Section 1.

[26] *See* note 19, *supra.*

exchange'' [27] required to be filed with the Commission under the Act, the Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[28] in general, and furthers the objectives of Section 6(b)(5) of the Act,[29] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to, and perfect the mechanisms of, a free and open market and a national market system and, in general, to protect investors and the public interest and does not unfairly discriminate between customers, issuers, brokers, or dealers. The Exchange also believes that the proposed rule change is consistent with Section 6(b)(4) of the Act,[30] because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The Proposed Change Is Reasonable

The Exchange believes its proposal is reasonable.

There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Secaucus and Carteret Third Party Access Centers using wireless equipment installed on towers and buildings near the Mahwah data center. In addition, some market participants have their own proprietary wireless networks. Based on the information available to it, the Exchange believes that the wireless connections offered by non-ICE entities provide connectivity at the same or similar speed as the Wireless Connections, and at the same or similar cost. The Exchange believes the Wireless Connections between the Mahwah data center and the Markham Third Party Data Center are the first public, commercially available wireless connections between the two points, creating a new connectivity option for customers in Markham.

The Wireless Connections provide market participants with one means of connectivity, but substitute products are available, as witnessed by the existing wireless connections offered by non-ICE entities currently serving market participants. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers.

Market participants' considerations in determining what connectivity to purchase may include latency; bandwidth size; amount of network uptime; the equipment that the network uses; the cost of the connection; and the applicable contractual provisions. Indeed, fiber network connections may be more attractive to some market participants as they are more reliable and less susceptible to weather conditions.

The Exchange believes that the proposed pricing for the Wireless Connections is reasonable because it allows market participants to select the connectivity options that best suit their needs. A market participant that opts to connect with a Wireless Network would be able to select the route and bandwidth that better suit its needs, thereby helping it tailor its operations to the requirements of its business operations. The fees also reflect the benefit received by customers in terms of lower latency over the fiber optics options.

Only market participants that voluntarily select to receive Wireless Connections are charged for them, and those services are available to all market participants. Furthermore, the Exchange believes that the services and fees proposed herein are reasonable because, in addition to the services being completely voluntary, they are available to all market participants on an equal basis (*i.e.,* the same products and services are available to all market participants). All market participants that voluntarily select Wireless Connections would be charged the same amount for the same services and would have their first month's MRC for Wireless Connections waived.

Overall, the Exchange believes that the proposed change is reasonable because the Wireless Connections described herein are offered as a convenience to market participants, but offering them requires the provision, maintenance and operation of the Mahwah data center, wireless networks and access centers in the Third Party Data Centers, including the installation and monitoring, support and maintenance of the services.

The Exchange believes that the proposed waiver of the first month's MRC is reasonable as it would allow customers to test a Wireless Connection for a month before incurring any monthly recurring fees and may act as an incentive to market participants to connect to a Wireless Connection. The Exchange believes that the proposed waiver of the initial charge if a customer has an existing Wireless Connection and opted to upgrade or downgrade to a different size circuit at the same Third Party Data Center is reasonable because the change in Wireless Connection would not require IDS to do any physical work to implement the connection.

The Exchange believes that its proposed General Note is reasonable because it would provide transparency regarding how the billing practice for Wireless Connections functions. The Exchange believes that a customer should not be charged more than once for a Wireless Connection. For example, to charge one customer twice for a Wireless Connection because that customer is a member of two Affiliate SROs, and so subject to the rules of both Affiliate SROs, when another customer that buys the same Wireless Connection only pays once, would not promote just and equitable principles of trade, and could result in the Exchanges and Affiliate SROs receiving the proceeds from multiple fees despite only providing a service once.

The Proposed Change Is an Equitable Allocation of Fees and Credits

The Exchange believes its proposal equitably allocates its fees among its market participants.

The proposed change would not apply differently to distinct types or sizes of market participants. Rather, it would apply to all market participants equally. As is currently the case, the purchase of any connectivity service is completely voluntary and the Wireless Fee Schedule will be applied uniformly to all customers.

Without this proposed rule change, market participants seeking connectivity to a Third Party Data Center would have fewer options. With it, because the Wireless Connections are offered at different bandwidths and price points, market participants have more choices with respect to the form and price of the connectivity they use, allowing a market participant that opts to connect with a wireless network to select the connectivity and bandwidth that better suit its needs, thereby helping it tailor its operations to the requirements of its business operations.

The Exchange believes that its proposed General Note is equitable because a customer would not be

[27] *See* 15 U.S.C. 78c(a)(27) (defining the term ''rules of an exchange'').

[28] 15 U.S.C. 78f(b).

[29] 15 U.S.C. 78f(b)(5).

[30] 15 U.S.C. 78f(b)(4).

charged more than once for a Wireless Connection. For example, to charge one customer twice for a Wireless Connection because that customer is a member of two Affiliate SROs, and so subject to the rules of both Affiliate SROs, when another customer that buys the same Wireless Connection only pays once, would not promote just and equitable principles of trade, and could result in the Exchanges and Affiliate SROs receiving the proceeds from multiple fees despite only providing a service once. The Exchange believes that its proposed General Note is reasonable because it would provide transparency regarding how the billing practice for Wireless Connections functions.

The Proposed Change Is Not Unfairly Discriminatory

The Exchange believes its proposal is not unfairly discriminatory.

The proposed change would not apply differently to distinct types or sizes of market participants. Rather, it would apply to all market participants equally. As is currently the case, the purchase of any connectivity service is completely voluntary and the Wireless Fee Schedule will be applied uniformly to all customers.

Without this proposed rule change, market participants seeking connectivity to a Third Party Data Center would have fewer options. With it, because the Wireless Connections are offered at different bandwidths and price points, market participants have more choices with respect to the form and price of the connectivity they use, allowing a market participant that opts to connect with a wireless network to select the connectivity and bandwidth that better suit its needs, thereby helping it tailor its operations to the requirements of its business operations.

There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Secaucus and Carteret Third Party Access Centers using wireless equipment installed on towers and buildings near the Mahwah data center. In addition, some market participants have their own proprietary wireless networks. Based on the information available to it, the Exchange believes that the wireless connections offered by non-ICE entities provide connectivity at the same or similar speed as the Wireless Connections, and at the same or similar cost. The Exchange believes the Wireless Connections between the Mahwah data center and the Markham Third Party Data Center are the first public, commercially available wireless connections between the two points, creating a new connectivity option for customers in Markham.

Market participants that want a connection between a Third Party Data Center and the Mahwah data center have additional options. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers.

Market participants' considerations in determining what connectivity to purchase may include latency; bandwidth size; amount of network uptime; the equipment that the network uses; the cost of the connection; and the applicable contractual provisions. Indeed, fiber network connections may be more attractive to some market participants as they are more reliable and less susceptible to weather conditions.

The Exchange believes that its proposed General Note would not be unfairly discriminatory because a customer would not be charged more than once for a Wireless Connection. For example, to charge one customer twice for a Wireless Connection because that customer is a member of two Affiliate SROs, and so subject to the rules of both Affiliate SROs, when another customer that buys the same Wireless Connection only pays once, would not promote just and equitable principles of trade, and could result in the Exchanges and Affiliate SROs receiving the proceeds from multiple fees despite only providing a service once.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the only burden on competition of the proposed change is on IDS and other commercial connectivity providers. Solely because IDS is wholly owned by the same parent company as the Exchange, IDS will be at a competitive disadvantage to its commercial competitors, and its commercial competitors, without a filing requirement, will be at a relative competitive advantage to IDS.

By permitting IDS to continue to offer the Wireless Connectivity, approval of the proposed changes would contribute to competition by allowing IDS to compete with other connectivity providers, and thus provides market participants another connectivity option. For this reason, the proposed rule changes will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of Section 6(b)(8) of the Act.[31]

There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Secaucus and Carteret Third Party Access Centers using wireless equipment installed on towers and buildings near the Mahwah data center. In addition, some market participants have their own proprietary wireless networks. Based on the information available to it, the Exchange believes that the wireless connections offered by non-ICE entities provide connectivity at the same or similar speed as the Wireless Connections, and at the same or similar cost. The Exchange believes the Wireless Connections between the Mahwah data center and the Markham Third Party Data Center are the first public, commercially available wireless connections between the two points, creating a new connectivity option for customers in Markham. Importantly, the Exchange does not control the Third Party Data Centers and could not preclude other parties from creating new wireless or fiber connections to any of the Third Party Data Centers.

Market participants that want a connection between a Third Party Data Center and the Mahwah data center have additional options. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers. Indeed, fiber network connections may be more attractive to some market participants as they are more reliable and less susceptible to weather conditions.

The proposed Wireless Connections traverse wireless connections through a series of towers equipped with wireless equipment, including, in the case of the Carteret and Secaucus connections, a pole on the grounds of the Mahwah data center. With the exception of the non-ICE entity that owns the wireless network used for the Wireless Connections to Secaucus and Carteret,[32] third parties do not have access to such pole, as the IDS wireless network has exclusive rights to operate wireless equipment on the Mahwah data center pole. IDS does not sell rights to third parties to operate wireless equipment on the pole, due to space limitations,

[31] 15 U.S.C. 78f(b)(8).

[32] *See* note 19, *supra.*

security concerns, and the interference that would arise between equipment placed too closely together.

Access to the pole or roof is not required for other parties to establish wireless networks that can compete with the Wireless Connections, as witnessed by the existing wireless connections offered by non-ICE entities currently serving market participants. The latency of a wireless network depends on several factors, not just proximity to a data center. Variables include the wireless equipment utilized; the route of, and number of towers or buildings in, the network; and the fiber equipment used at either end of the connection. In addition, latency is not the only consideration that a market participant may have in selecting a wireless network. Market participants' considerations in determining what connectivity to purchase may include latency; bandwidth size; amount of network uptime; the equipment that the network uses; the cost of the connection; and the applicable contractual provisions.

The Exchange operates in a highly competitive market in which exchanges and other vendors offer connectivity options between data centers as a means to facilitate the trading and other market activities of market participants. The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [33]

The proposed change does not affect competition among national securities exchanges or among members of the Exchange, but rather between IDS and its commercial competitors.

For the reasons described above, the Exchange believes that the proposed rule changes reflect this competitive environment.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

[33] *See* Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, at 37499 (June 29, 2005).

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEAMER–2020–05 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEAMER–2020–05. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEAMER–2020–05, and should be submitted on or before March 10, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[34]

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–88159; File No. SR–CboeBZX–2020–013]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Fee Schedule

February 11, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that, on January 31, 2020, Cboe BZX Exchange, Inc. (the ''Exchange'' or ''BZX'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Equities Exchange (the ''Exchange'' or ''BZX Equities'') is filing with the Securities and Exchange Commission (''Commission'') a proposed rule change to amend its Fee Schedule. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (*http://markets.cboe.com/us/equities/regulation/rule_filings/bzx/*), at the Exchange's Office of the Secretary,

[34] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fee Schedule to amend the rate for liquidity adding orders that yield fee codes ''V'' [3] and ''Y''.[4] Additionally, the Exchange proposes to eliminate existing Add Volume Tier 1, Step-Up Tier 2, and Cross-Asset Add Volume Tiers 1 through 4. The Exchange also proposes to make corresponding changes to the numbering of the Add Volume Tiers and Step-Up Tiers.

The Exchange first notes that it operates in a highly-competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient. More specifically, the Exchange is only one of 13 registered equities exchanges, as well as a number of alternative trading systems and other off-exchange venues that do not have similar self-regulatory responsibilities under the Exchange Act, to which market participants may direct their order flow. Based on publicly available information,[5] no single registered equities exchange has more than approximately 16% of the market share. Thus, in such a low-concentrated and highly competitive market, no single equities exchange possesses significant pricing power in the execution of order flow.

The Exchange in particular operates a ''Maker-Taker'' model whereby it pays credits to Members that provide liquidity and assesses fees to those that remove liquidity. The Exchange's Fee Schedule sets forth the standard rebates and rates applied per share for orders that provide and remove liquidity, respectively. Particularly, for orders priced at or above $1.00, the Exchange provides a standard rebate of $0.0020 [6] to $0.0025 [7] per share for orders that add liquidity and assesses a fee of $0.0030 per share for orders that remove liquidity. The Exchange believes that the ever-shifting market share among the exchanges from month to month demonstrates that market participants can shift order flow, or discontinue to reduce use of certain categories of products, in response to fee changes. Accordingly, competitive forces constrain the Exchange's transaction fees, and market participants can readily trade on competing venues if they deem pricing levels at those other venues to be more favorable.

Proposed Change To Amend Standard Rebate for Liquidity Adding Orders in Securities at or Above $1.00

The Exchange currently provides rebates for liquidity adding orders that yield fee codes ''V'' or ''Y'' of $0.0020 in securities priced at or above $1.00 in Tape A or C securities. Liquidity adding orders yielding fee code ''B'' [8] are provided a rebate of $0.0025 in securities priced at or above $1.00 in Tape B securities. The Exchange now proposes to increase the current rebate of $0.0020 per share to $0.0025 per share for orders yielding fee codes ''V'' and ''Y'' in securities priced at or above $1.00 in Tape A and Tape C securities. As the proposed rebate for orders yielding fee code ''V'' or ''Y'' is higher than the current rebate for such orders, the Exchange believes the proposed amendment will encourage Members to increase their liquidity on the Exchange.

Proposed Change To Eliminate Tier 1 of the Add Volume Tiers

In response to the competitive environment, the Exchange offers tiered pricing which provides Members opportunities to qualify for higher rebates or reduced fees where certain volume criteria and thresholds are met. Tiered pricing provides incremental incentives for Members to strive for higher or different tier levels by offering increasingly higher discounts or enhanced benefits for satisfying increasingly more stringent criteria or different criteria. For example, pursuant to footnote 1 of the Fee Schedule, the Exchange currently offers Tier 1 of the Add Volume Tiers which provides Members with a higher rebate of $0.0025 per share for liquidity adding orders yielding fee codes ''B'', ''V'', or ''Y'' when the Member has an ADAV [9] as a percentage of TCV [10] greater than or equal to 0.10%. Currently, orders yielding fee codes ''V'' and ''Y'' provide a standard rebate of $0.0020; however, the proposed amendment to fee codes ''V'' and ''Y'' would increase the standard rebate from $0.0020 to $0.0025. As a result, the rebate provided under Tier 1 would be equal to the proposed standard rebate of $0.0025 applicable to orders yielding fee codes ''V'' or ''Y'' and the existing standard rebate of $0.0025 applicable to orders yielding fee code ''B''. Therefore, the Exchange proposes to eliminate Tier 1 of the Add Volume Tiers and renumber the remaining tiers accordingly.

Proposed Change To Eliminate Cross-Asset Add Volume Tiers 1 Through 4 of the Add Volume Tiers

Footnote 1 of the Fee Schedule currently provides for the Cross-Asset Add Volume Tiers 1 through 4, which provide enhanced rebates ranging from $0.0028 to $0.0030 per share to Members meeting (1) a certain ADV [11] percentage as compared to the TCV on BZX Equities, and (2) certain liquidity adding option volume on the Cboe BZX Options Exchange (''BZX Options'') as compared to the OCV.[12] The Exchange adopted the Cross-Asset Add Volume Tiers to encourage Members to add liquidity on both BZX Equities and BZX Options. The Exchange now proposes to eliminate the four Cross-Asset Add Volume Tiers. Particularly, no Member has reached any of these tiers in several months and the Exchange therefore no

[3] ''V'' is appended to displayed orders that add liquidity to BZX Equities (Tape A).

[4] ''Y'' is appended to displayed orders that add liquidity to BZX Equities (Tape C).

[5] See Cboe Global Markets, U.S. Equities Market Volume Summary (January 29, 2020), available at *https://markets.cboe.com/us/equities/market_statistics/*.

[6] Displayed orders which add liquidity in Tape B securities receive a standard rebate of $0.0025 per share.

[7] Displayed orders which add liquidity in Tape A and C securities receive a standard rebate of $0.0020 per share.

[8] ''B'' is appended to displayed orders that add liquidity to BZX Equities (Tape B).

[9] ADAV means average daily volume calculated as the number of shares added per day. ADAV is calculated on a monthly basis.

[10] TCV means total consolidated volume calculated as the volume reported by all exchanges and trade reporting facilities to a consolidated transaction reporting plan for the month for which the fees apply.

[11] ADV means average daily volume.

[12] OCC Customer Volume or ''OCV'' means the total equity and ETF options volume that clears in the Customer range at the Options Clearing Corporation (''OCC'') for the month for which the fees apply, excluding volume on any day that the Exchange experiences an Exchange System Disruption and on any day with a scheduled early market close, using the definition of Customer as provided under the Exchange's Fee Schedule for BZX Options.

longer wishes to, nor is it required to, maintain such tiers.

Proposed Change To Eliminate Tier 2 of the Step-Up Tiers

Footnote 2 of the Fee Schedule currently provides for Tier 2 of the Step-Up Tiers, which provides an enhanced rebate of $0.0030 per share for Members with Step-Up Add TCV [13] from April 2016 equal to or greater than 0.15% and an ADAV as a percentage of TCV equal to or greater than 0.20%. The Exchange adopted Tier 2 of the Step-Up Tiers to encourage Members to grow their ADAV on the Exchange on a monthly basis from an April 2016 baseline. The Exchange now proposes to eliminate the Tier 2 of the Step-Up Tiers. Particularly, no Member has reached Tier 2 of the Step-Up Tiers in several months and the Exchange therefore no longer wishes to, nor is it required to, maintain such tier. The Exchange no longer believes Tier 2 is necessary and notes the Exchange is not required to maintain such an incentive program. Additionally, the Exchange proposes to re-number Step-Up Tiers 4 and 5 to reflect the elimination of Step-Up Tier 2.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,[14] in general, and furthers the objectives of Section 6(b)(4),[15] in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and issuers and other persons using its facilities. The Exchange also notes that it operates in a highly-competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient. The proposed rule change reflects a competitive pricing structure designed to incentivize market participants to direct their order flow to the Exchange, which the Exchange believes would enhance market quality to the benefit of all Members.

The Exchange operates in a highly-competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient. The proposed rule changes reflect a competitive pricing structure designed to incentivize market participants to direct their order flow to the Exchange, which the Exchange believes would enhance market quality to the benefit of all Members.

In particular, the Exchange believes the proposed amendment to increase the rebate for orders yielding fee codes ''V'' and ''Y'' from $0.0020 to $0.0025 is reasonable because it would uniformly provide a rebate of $0.0025 per share across Tape A, Tape B, and Tape C securities priced at or above $1.00. Further, the Exchange believes the proposed increased rebate will encourage additional order flow on the Exchange, which may result in greater liquidity to the benefit of all market participants on the Exchange by providing more trading opportunities. The Exchange also believes the proposed amendment to remove existing Tier 1 of the Add Volume Tiers is reasonable because the tier offers the same rebate as the proposed standard rebate for orders yielding fee codes ''V'' and ''Y'' and the existing standard rebate for orders yielding fee code ''B''. Therefore, existing Tier 1 of the Add Volume Tiers would provide no further incentive for Members to achieve an ADAV greater than or equal to 0.10% as a percentage of TCV. The Exchange believes the proposed changes are equitable and not unfairly discriminatory because they apply equally to all Members.

The Exchange believes eliminating the Cross-Asset Add Volume Tiers 1 through 4 and Step-Up Tier 2 is reasonable because the Exchange is not required to maintain these tiers and Members still have a number of other opportunities and a variety of ways to receive enhanced rebates, including the proposed enhanced standard rebate to orders yielding fee code ''V'' or ''Y''. Moreover, as noted above, no Member has achieved these tiers in several months. The Exchange believes the proposal to eliminate these tiers is also equitable and not unfairly discriminatory because it applies to all Members.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on intramarket or intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. Rather, as discussed above, the Exchange believes that the proposed change would encourage the submission of additional displayed order flow to a public exchange, thereby promoting market depth, execution incentives and enhanced execution opportunities, as well as price discovery and transparency for all Members. As a result, the Exchange believes that the proposed change furthers the Commission's goal in adopting Regulation NMS of fostering competition among orders, which promotes ''more efficient pricing of individual stocks for all types of orders, large and small.'' [16]

The Exchange believes the proposed rule change does not impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. Particularly, the proposed change applies to all Members equally in that all Members are eligible to receive the enhanced standard rebate for orders yielding fee code ''V'' or ''Y''. Additionally the proposed change is designed to attract additional order flow to the Exchange. The Exchange believes that the modified standard rebate for orders yielding fee code ''V'' or ''Y'' would incentivize market participants to direct displayed liquidity and, as a result, executable order flow and improved price transparency, to the Exchange. Greater overall order flow and pricing transparency benefits all market participants on the Exchange by providing more trading opportunities, enhancing market quality, and continuing to encourage Members to send orders, thereby contributing towards a robust and well-balanced market ecosystem, which benefits all market participants. Next, the Exchange believes the proposed rule change does not impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. As previously discussed, the Exchange operates in a highly competitive market. Members have numerous alternative venues that they may participate on and direct their order flow, including other equities exchanges and off-exchange venues and alternative trading systems. Additionally, the Exchange represents a small percentage of the overall market. Based on publicly available information, no single equities exchange has more than approximately 16% of the market share.[17] Therefore, no exchange possesses significant pricing power in the execution of order flow. Indeed, participants can readily choose to send their orders to other exchange and off-exchange venues if they deem fee levels at those other venues to be more

[13] ''Step-Up Add TCV'' means ADAV as a percentage of TCV in the relevant baseline month subtracted from current ADAV as a percentage of TCV.

[14] 15 U.S.C. 78f.

[15] 15 U.S.C. 78f(b)(4).

[16] Securities Exchange Act Release No. 51808, 70 FR 37495, 37498–99 (June 29, 2005) (S7–10–04) (Final Rule).

[17] *See supra* note 5.

favorable. Moreover, the Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [18] The fact that this market is competitive has also long been recognized by the courts. In NetCoalition v. Securities and Exchange Commission, the D.C. Circuit stated as follows: ''[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'. . . .''.[19] Accordingly, the Exchange does not believe its proposed fee change imposes any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A) [20] of the Act and subparagraph (f)(2) of Rule 19b–4 [21] thereunder, because it establishes a due, fee, or other charge imposed by the Exchange.

[18] See Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005).

[19] *NetCoalition* v. *SEC*, 615 F.3d 525, 539 (D.C. Cir. 2010) (quoting Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770, 74782–83 (December 9, 2008) (SR–NYSEArca-2006–21)).

[20] 15 U.S.C. 78s(b)(3)(A).

[21] 17 CFR 240.19b–4(f)(2).

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [22] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File No. SR–CboeBZX–2020–013 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File No. SR–CboeBZX–2020–013. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR–CboeBZX–2020–013, and should be submitted on or before March 10, 2020.

[22] 15 U.S.C. 78s(b)(2)(B).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[23]

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–88170; File No. SR–NYSEArca–2020–08]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing of Proposed Rule Change To Establish a Schedule of Wireless Connectivity Fees and Charges With Wireless Connections

February 11, 2020.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act''),[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on January 30, 2020, NYSE Arca, Inc. (''NYSE Arca'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to establish a schedule of Wireless Connectivity Fees and Charges (the ''Wireless Fee Schedule'') with wireless connections between the Mahwah, New Jersey data center and other data centers. The proposed change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

[23] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to establish the Wireless Fee Schedule with wireless connections between the Mahwah, New Jersey data center and three data centers that are owned and operated by third parties unaffiliated with the Exchange: (1) Carteret, New Jersey, (2) Secaucus, New Jersey, and (3) Markham, Canada (collectively, the ''Third Party Data Centers''). Market participants that purchase such a wireless connection (a ''Wireless Connection'') are charged an initial and monthly fee. In addition, the Exchange proposes to include a General Note to the Wireless Fee Schedule.

The Exchange does not believe that the present proposed change is a change to the ''rules of an exchange'' [4] required to be filed with the Commission under the Act. The definition of ''exchange'' under the Act includes ''the market facilities maintained by such exchange.'' [5] Based on its review of the relevant facts and circumstances, and as discussed further below, the Exchange has concluded that the Wireless Connections are not facilities of the Exchange within the meaning of the Act, and therefore do not need to be included in its rules.

The Exchange is making the current proposal solely because the Staff of the Commission has advised the Exchange that it believes the Wireless Connections are facilities of the Exchange and so must be filed as part of its rules.[6] The Staff has not set forth the basis of its conclusion beyond verbally noting that the Wireless Connections are provided by an affiliate of the Exchange and a market participant could use a Wireless Connection to trade on, or receive the market data of, the Exchange.[7]

The Exchange expects the proposed change to be operative 60 days after the present filing becomes effective.

The Exchange and the ICE Affiliates

To understand the Exchange's conclusion that the Wireless Connections are not facilities of the Exchange within the meaning of the Act, it is important to understand the very real distinction between the Exchange and its corporate affiliates (the ''ICE Affiliates''). The Exchange is an indirect subsidiary of Intercontinental Exchange, Inc. (''ICE''). Around the world, ICE operates seven regulated exchanges in addition to the Exchange and its four national securities exchange affiliates,[8] including futures markets, as well as six clearing houses. Among others, the ICE Affiliates are subject to the jurisdiction of regulators in the U.S., U.K., E.U., the Netherlands, Canada and Singapore.[9] In all, the ICE Affiliates include hundreds of ICE subsidiaries, including more than thirty that are significant legal entity subsidiaries as defined by Commission rule.[10]

Through its ICE Data Services (''IDS'') business,[11] ICE operates the ICE Global Network (''IGN''), a global connectivity network whose infrastructure provides access to over 150 global markets, including the Exchange and Affiliate SROs, and over 750 data sources. All the ICE Affiliates are ultimately controlled by ICE, as the indirect parent company, but generally they do not control each other. In the present case, it is IDS, not the Exchange, that provides the Wireless Connections to market participants. The Exchange does not control IDS.

Wireless Connections

If a market participant wants a connection between one of the Third Party Data Centers and the Mahwah data center, it may opt to purchase a Wireless Connection, for which it will be charged an initial and monthly fee.

Once requested, IDS establishes a Wireless Connection between the IDS equipment in the Third Party Data Center and IDS equipment in the Mahwah data center. IDS contracts with a non-ICE entity to provide the Wireless Connections between the Secaucus and Carteret Third Party Data Centers and the Mahwah data center, through a series of towers equipped with wireless equipment. IDS uses its own wireless network for the Wireless Connection between the Markham Third Party Data Center and the Mahwah data center. At either end of the Wireless Connection, the customer uses a cross connect or other cable to connect its own equipment to the IDS equipment.[12] In the Mahwah data center, the cross connect leads to the customer's server in co-location.

The Wireless Connection does not connect to the Exchange trading and execution systems, nor is it a system of communication from the customer's server in co-location to the trading and execution systems of the Exchange or the Affiliate SROs (collectively, the ''SRO Systems''). Rather, a Wireless Connection facilitates the customer's interaction with itself. Essentially, a Wireless Connection is an empty pipe that a customer can use to communicate between its equipment in co-location

---

[4] *See* 15 U.S.C. 78c(a)(27) (defining the term ''rules of an exchange'').

[5] 15 U.S.C. 78c(a)(1). See 15 U.S.C. 78c(a)(2) (defining the term ''facility'' as applied to an exchange).

[6] Telephone conversation between Commission staff and representatives of the Exchange, December 12, 2019.

[7] *Id.* The Commission has previously stated that services were facilities of an exchange subject to the rule filing requirements without fully explaining its reasoning. In 2010, the Commission stated that exchanges had to file proposed rule changes with respect to co-location because ''[t]he Commission views co-location services as being a material aspect of the operation of the facilities of an exchange.'' The Commission did not specify why it reached that conclusion. *See* Securities Exchange Act Release No. 61358 (January 14, 2010), 75 FR 3594 (January 21, 2010) (concept release on equity market structure), at note 76.

In addition, in 2014, the Commission instituted proceedings to determine whether to disapprove a proposed rule change by The NASDAQ Stock Market LLC (''Nasdaq'') on the basis that Nasdaq's ''provision of third-party market data feeds to co-located clients appears to be an integral feature of its co-location program, and co-location programs are subject to the rule filing process.'' Securities Exchange Act Release No. 72654 (July 22, 2014), 79 FR 43808 (July 28, 2014) (SR–NASDAQ–2014–034). In its order, the Commission did not explain why it believed that the provision of third party data was an integral feature of co-location, or if it believed that it was a facility of Nasdaq, although the Nasdaq filing analyzed each prong of the definition of facility in turn. *See* Securities Exchange Act Release No. 71990 (April 22, 2014), 79 FR 23389 (April 28, 2014) (SR–NASDAQ–2014–034).

[8] The Exchange's four national securities exchange affiliates are the New York Stock Exchange LLC, NYSE American LLC, NYSE Chicago, Inc., and NYSE National, Inc. (together, the ''Affiliate SROs'').

[9] Intercontinental Exchange, Inc. Annual Report on Form 10–K for the year ended December 31, 2018, Exhibit 21.1 (filed February 7, 2019), at 15–16.

[10] *Id.* at Exhibit 21.1.

[11] The IDS business operates through several different ICE Affiliates, including NYSE Technologies Connectivity, Inc., an indirect subsidiary of the NYSE.

[12] A cable connects the IDS and customer equipment in the Markham Third Party Data Center. Elsewhere, the customer buys a cross connect from IDS. The cross connects utilized in the Mahwah data center are filed with the Commission. *See* Securities Exchange Act Release No. 67669 (August 15, 2012), 77 FR 50746 (August 22, 2012) (SR–NYSEArca–2012–62); and 67667 (August 15, 2012), 77 FR 50743 (August 22, 2012) (SR–NYSEArca–2012–63).

and its equipment in the Third Party Data Center.

Customers have control over the data they send over their Wireless Connections. They may, but are not required to, use them to send trading orders to their equipment in co-location; relay Exchange market data, third party market data and public quote feeds from Securities Information Processors; send risk management, billing, or compliance information to their preferred location; or to carry any other market information or other data they wish to and from their equipment in the Third Party Data Centers and Mahwah data center. The Exchange does not, and cannot, know what data customers send over the Wireless Connections. The Exchange does not send or receive any data over the Wireless Connections.

Market participants that want a connection between a Third Party Data Center and the Mahwah data center have options. There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Carteret and Secaucus Third Party Data Centers using wireless equipment installed on towers and buildings near the Mahwah data center. Some market participants have their own proprietary wireless networks. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers.

The Wireless Connections Are Not Facilities of the Exchange

The Definition of ''Exchange''

The definition of ''exchange'' focuses on the exchange entity and what it does: [13]

> The term ''exchange'' means any organization, association, or group of persons, whether incorporated or unincorporated, which constitutes, maintains, or provides a market place or facilities for bringing together purchasers and sellers of securities or for otherwise performing with respect to securities the functions commonly performed by a stock exchange as that term is generally understood, and includes the market place and the market facilities maintained by such exchange.

If the ''exchange'' definition included all of an exchange's affiliates, the ''Exchange'' would encompass a global network of futures markets, clearing houses, and data providers, and all of those entities worldwide would be subject to regulation by the Commission. That, however, is not what the definition in the Act provides.

The Exchange and the Affiliate SROs fall squarely within the Act's definition of an ''exchange'': They each provide a market place to bring together purchasers and sellers of securities and perform with respect to securities the functions commonly performed by a stock exchange.

That is not true for the non-exchange ICE Affiliates. Those ICE Affiliates do not provide such a marketplace or perform ''with respect to securities the functions commonly performed by a stock exchange,'' and therefore they are not an ''exchange'' or part of the ''Exchange'' for purposes of the Act. Accordingly, in conducting its analysis, the Exchange does not automatically collapse the ICE Affiliates into the Exchange. The Wireless Connections are also not part of the Exchange, as they are services, and as such cannot be part of an ''organization, association or group of persons'' with the Exchange.

In Rule 3b–16 the Commission further defined the term ''exchange'' under the Act, stating that: [14]

> (a) An organization, association, or group of persons shall be considered to constitute, maintain, or provide ''a market place or facilities for bringing together purchasers and sellers of securities or for otherwise performing with respect to securities the functions commonly performed by a stock exchange,'' as those terms are used in section 3(a)(1) of the Act . . . if such organization, association, or group of persons:
>
> (1) Brings together the orders for securities of multiple buyers and sellers; and
>
> (2) Uses established, non-discretionary methods (whether by providing a trading facility or by setting rules) under which such orders interact with each other, and the buyers and sellers entering such orders agree to the terms of a trade.

The non-exchange ICE Affiliates do not bring ''together orders for securities of multiple buyers and sellers,'' and so are not an ''exchange'' or part of the ''Exchange'' for purposes of Rule 3b–16.

The relevant question, then, is whether the Wireless Connections are ''facilities'' of the Exchange.

The Definition of ''Facility''

The Act defines a ''facility'' [15] as follows:

> The term ''facility'' when used with respect to an exchange includes [1] its premises, [2] tangible or intangible property whether on the premises or not, [3] any right to the use of such premises or property or any service thereof for the purpose of effecting or reporting a transaction on an exchange (including, among other things, any system of communication to or from the exchange, by ticker or otherwise, maintained by or with the consent of the exchange), and [4] any right of the exchange to the use of any property or service.

In 2015 the Commission noted that whether something is a ''facility'' is not always black and white, as ''any determination as to whether a service or other product is a facility of an exchange requires an analysis of the particular facts and circumstances.'' [16] Accordingly, the Exchange understands that the specific facts and circumstances of the Wireless Connections must be assessed before a determination can be made regarding whether or not they are facilities of the Exchange.[17]

The first prong of the definition is that ''facility,'' when used with respect to an exchange, includes ''its premises.'' That prong is not applicable in this case, because the Wireless Connections are not premises of the Exchange. The term ''premises'' is generally defined as referring to an entity's building, land, and appurtenances.[18] The wireless network that runs between IDS equipment in the Mahwah data center and IDS equipment in Third Party Data Centers, much of which is actually owned, operated and maintained by a non-ICE entity,[19] does not connect to the Exchange trading and execution systems and is not the premises of the Exchange. The portion of the Mahwah data center where the ''exchange'' functions are performed—*i.e.* the SRO Systems that bring together purchasers

[13] 15 U.S.C. 78c(a)(1).

[14] 17CFR 240.3b–16(a).

[15] 15 U.S.C. 78c(a)(2).

[16] Securities Exchange Act Release No. 76127 (October 9, 2015), 80 FR 62584 (October 16, 2015) (SR–NYSE–2015–36), at note 9 (order approving proposed rule change amending Section 907.00 of the Listed Company Manual). *See also* 79 FR 23389, *supra* note 7, at note 4 (noting that that the definition of the term ''facility'' has not changed since it was originally adopted) and 23389 (stating that the SEC ''has not separately interpreted the definition of 'facility'").

[17] As with the definition of ''exchange,'' the ICE Affiliates do not automatically fall within the definition of a ''facility.'' The definition focuses on ownership and the right to use properties and services, not corporate relationships. Indeed, if the term ''exchange'' in the definition of a facility included ''an exchange and its affiliates,'' then the rest of the functional prongs of the facility definition would be meaningless. Fundamental rules of statutory construction dictate that statutes be interpreted to give effect to each of their provisions, so as not to render sections of the statute superfluous.

[18] See, *e.g.,* definition of ''premises'' in Miriam-Webster Dictionary, at *https://www.merriam-webster.com/dictionary/premises,* and Cambridge English Dictionary, at *https://dictionary.cambridge.org/us/dictionary/english/premises.*

[19] A non-ICE entity owns, operates and maintains the wireless network between the Mahwah data center and the Carteret and Secaucus Third Party Data Centers pursuant to an agreement between the non-ICE entity and an ICE Affiliate.

and sellers of securities and perform with respect to securities the functions commonly performed by a stock exchange—could be construed as the ''premises'' of the Exchange, but the same is not true for a wireless network that is almost completely outside of the Mahwah data center.

The second prong of the definition of ''facility'' provides that a facility includes the exchange's ''tangible or intangible property whether on the premises or not.'' The Wireless Connections are not the property of the Exchange: They are services. The underlying wireless network is owned by ICE Affiliates and a non-ICE entity. As noted, the Act does not automatically collapse affiliates into the definition of an ''exchange.'' A review of the facts set forth above shows that there is a real distinction between the Exchange and its ICE Affiliates with respect to the Wireless Connections, and so something owned by an ICE Affiliate is not owned by the Exchange.

The third prong of the definition of ''facility'' provides that a facility includes

> any right to the use of such premises or property or any service thereof for the purpose of effecting or reporting a transaction on an exchange (including, among other things, any system of communication to or from the exchange, by ticker or otherwise, maintained by or with the consent of the exchange).[20]

This prong does not capture the Wireless Connections because the Exchange does not have the right to use the Wireless Connections to effect or report a transaction on the Exchange. ICE Affiliates and a non-ICE entity own and maintain the wireless network underlying the Wireless Connections, and ICE Affiliates, not the Exchange, offer and provide the Wireless Connections to customers. The Exchange does not know whether or when a market participant has entered into an agreement for a Wireless Connection and has no right to approve or disapprove of the provision of a Wireless Connection, in the same way that the Exchange would have no right to approve or disapprove of the provision of connectivity to a market participant in co-location or elsewhere by any other provider. The Exchange does not put content onto the Wireless Connections. When a customer terminates a Wireless Connection, the Exchange does not consent to the termination.

The Wireless Connections do not connect to the Exchange trading and execution systems. As such, the Wireless Connections are not provided for ''the purpose of effecting or reporting a transaction on'' the Exchange. Rather, a Wireless Connection facilitates the customer's interaction with itself. Each Wireless Connection connects the IDS equipment in the Third Party Data Center and IDS equipment in the Mahwah data center. At either end of the Wireless Connection, the customer uses a cross connect or other cable to connect its own equipment to the IDS equipment. In the Mahwah data center, the cross connect leads to the customer's server in co-location, not the Exchange trading and execution systems.

It is important to remember that the customers' equipment in the Mahwah data center is not provided by, part of, or a facility of, the Exchange. The Exchange provides the space in which customers' equipment is housed, and permits customers to use their equipment to communicate with the SRO Systems through services, such as connections to the local area networks, that are filed with the Commission.[21] The Exchange provides the space, but not the equipment. Accordingly, even if a customer were to use a Wireless Connection to send instructions to trade or to receive a report of a trade, the customer would not be sending instructions to the Exchange, but rather to its own equipment.

The Exchange believes the example in the parenthetical in the third prong of the definition of ''facility'' cannot be read as an independent prong of the definition. Such a reading would ignore that the parentheses and the word ''including'' clearly indicate that ''any system of communication to or from an exchange . . . maintained by or with the consent of the exchange'' is explaining the preceding text. By its terms, the parenthetical is providing a non-exclusive example of the type of property or service to which the prong refers, and does not remove the requirement that there must be a right to use the premises, property or service to effect or report a transaction on an exchange. It is making sure the reader understands that ''facility'' includes a ticker system that an exchange has the right to use, not creating a new fifth prong to the definition. In fact, if the ''right to use'' requirement were ignored, every communication provider that connected to an exchange, including any broker-dealer system and telecommunications network, would become a facility of that exchange so long as the exchange consented to the connection, whether or not the connection was used to trade or report a trade, and whether or not the exchange had any right at all to the use of the connection.

The fourth prong of the definition provides that a facility includes ''any right of the exchange to the use of any property or service.'' [22] As described above, the Exchange does not have the right to use the Wireless Connections. Instead, the customers of the Wireless Connections are customers who enter into an agreement with ICE Affiliates for connections over a wireless network, much of which is owned, operated and maintained by a non-ICE entity.

Accordingly, for all the reasons discussed above, the Wireless Connections provided by ICE Affiliates are not facilities of the Exchange.

The legal conclusion that the Wireless Connections are not facilities of the Exchange is strongly supported by the facts. The Wireless Connections are neither necessary for, nor integrally connected to, the operations of the Exchange. They are empty pipes that customers can use as they like. In this context, IDS simply acts as a vendor selling connectivity, just like the other vendors that offer wireless connections in the Carteret and Secaucus Third Party Data Centers and fiber connections to all the Third Party Data Centers. The fact that in this case it is ICE Affiliates that offer the Wireless Connections does not make the Wireless Connections facilities of the Exchange any more than are the connections offered by other parties.

Further, the Exchange believes that requiring it to file this proposed rule change is not necessary in order for the Commission to ensure that the Exchange is satisfying its requirements under the Act. Because, as described above, the Wireless Connections are not necessary for, nor connected to, the operations of the Exchange, and customers are not required to use the Wireless Connections, holding the Wireless Connections to the statutory standards in Section 6(b) serves no purpose.

Instead, the sole impact of the requirement that the Exchange file the Wireless Connections is to place an

[20] 15 U.S.C. 78c(a)(2).

[21] *See* Securities Exchange Act Release No. 63275 (November 8, 2010), 75 FR 70048 (November 16, 2010) (SR–NYSEArca–2010–100) notice of filing and immediate effectiveness of proposed rule change amending the schedules of fees and charges for exchange services for both its equities and options platforms to reflect fees charged for co-location services). As described by the Commission, co-location is when a ''trading center . . . rents rack space to market participants that enables them to place their servers in close physical proximity to a trading center's matching engine.'' 75 FR 3594, *supra* note 7, at 3610 (noting that ''[c]o-location helps minimize network and other types of latencies between the matching engine of trading centers and the servers of market participants'').

[22] *Id.*

undue burden on competition on the ICE Affiliates that offer the connections, compared to their market competitors. This filing requirement, thus, itself is inconsistent with the requirement under Section 6(b)(8) of the Act that the rules of the exchange not ''impose any burden on competition not necessary or appropriate in furtherance of the purposes of [the Act].'' [23] This burden on competition arises because IDS would be unable, for example, to offer a client or potential client a different bandwidth it requests, without the delay and uncertainty of a filing, but its competitors will. Similarly, if a competitor decides to undercut IDS' fees because IDS, unlike the competitor, has to make its fees public, IDS will not be able to respond quickly, if at all. Indeed, because its competitors are not required to make their services or fees public, and are not subject to a Commission determination of whether such services or fees are ''not unfairly discriminatory'' or equitably allocated, IDS is at a competitive disadvantage from the very start.

The Proposed Service and Fees

As noted above, the Exchange proposes to add to its rules a Wireless Fee Schedule setting forth the fees charged by IDS related to the Wireless Connections between the Mahwah data center and the Third Party Data Centers.

For each Wireless Connection, a customer would be charged a non-recurring initial charge and a monthly recurring charge (''MRC'') that would vary depending upon bandwidth and the location of the connection. The proposal would waive the first month's MRC, to allow customers to test a new Wireless Connection for a month before incurring any MRCs, and the Exchange proposes to add text to the Wireless Fee Schedule accordingly. If a customer had an existing Wireless Connection and opted to upgrade or downgrade to a different size circuit connecting to the same Third Party Access Center, it would not be subject to the initial charge.

The Exchange proposes to establish the Wireless Fee Schedule with a section under the heading ''A. Wireless Connectivity'' setting forth the fees charged by IDS related to the Wireless Connections, as follows:

Type of service	Description	Amount of charge
Wireless Connection between Mahwah Data Center and Secaucus access center.	10 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $9,000.
Wireless Connection between Mahwah Data Center and Secaucus access center.	50 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $13,500.
Wireless Connection between Mahwah Data Center and Secaucus access center.	100 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $23,000.
Wireless Connection between Mahwah Data Center and Secaucus access center.	200 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $44,000.
Wireless Connection between Mahwah Data Center and Carteret access center.	10 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $10,000.
Wireless Connection between Mahwah Data Center and Carteret access center.	50 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $15,000.
Wireless Connection between Mahwah Data Center and Carteret access center.	100 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $25,000.
Wireless Connection between Mahwah Data Center and Carteret access center.	200 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $45,000.
Wireless Connections between (a) Mahwah Data Center and Carteret access center and (b) Mahwah Data Center and Secaucus Data Center.	50 Mb Circuits	$15,000 initial charge for both connections plus monthly charge for both connections of $22,000.
Wireless Connection between Mahwah Data Center and Markham access center.	1 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $6,000.
Wireless Connection between Mahwah Data Center and Markham access center.	5 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $15,500.
Wireless Connection between Mahwah Data Center and Markham access center.	10 Mb Circuit	$10,000 per connection initial charge plus monthly charge per connection of $23,000.

Proposed General Note

The Exchange and each of the Affiliate SROs are filing the Wireless Connections. Although each such market will have a Wireless Fee Schedule, a market participant that obtains a Wireless Connection will not be charged more than once for that service, irrespective of whether it is a member of one, some or none of the Exchange and the Affiliate SROs. Accordingly, the Exchange proposes that the Wireless Fee Schedule include a General Note that describes the billing practice for market participants, as follows:

A market participant that incurs fees from the New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., NYSE Chicago, Inc. or NYSE National, Inc. (collectively, the ''Affiliate SROs'') for a particular service pursuant to this Fee Schedule shall not be subject to fees for the same service charged by the other Affiliate SROs.

The proposed General Note would be consistent with the first general note in the co-location section of the Exchange and Affiliate SROs' price lists and fee schedule,[24] as well as the Nasdaq Stock Market rules.[25]

Application and Impact of the Proposed Change

The proposed change would apply to all market participants equally. The proposed change would not apply differently to distinct types or sizes of market participants. Market participants that require other types or sizes of network connections between the Mahwah data center and the Third Party Data Centers could still request them. The purchase of the service is

[23] 15 U.S.C. 78f(b)(8).

[24] *See* Securities Exchange Act Release Nos. 70206 (August 15, 2013), 78 FR 51765 (August 21, 2013) (SR–NYSE–2013–59); 70176 (August 13, 2013), 78 FR 50471 (August 19, 2013) (SR–NYSEMKT–2013–67); 70173 (August 13, 2013), 78 FR 50459 (August 19, 2013) (SR–NYSEArca–2013–80); 83351 (May 31, 2018), 83 FR 26314 (June 6, 2018) (SR–NYSENAT–2018–07; and 87408 (October 28, 2019), 84 FR 58778 (November 1, 2019) (SR–NYSECHX–2019–12).

[25] *See, e.g.,* The Nasdaq Stock Market General Equity and Options Rules, General 8, Section 1.

completely voluntary and the Wireless Fee Schedule will be applied uniformly to all market participants.

Competitive Environment

There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Secaucus and Carteret Third Party Access Centers using wireless equipment installed on towers and buildings near the Mahwah data center. In addition, some market participants have their own proprietary wireless networks. Based on the information available to it, the Exchange believes that the wireless connections offered by non-ICE entities provide connectivity at the same or similar speed as the Wireless Connections, and at the same or similar cost. The Exchange believes the Wireless Connections between the Mahwah data center and the Markham Third Party Data Center are the first public, commercially available wireless connections between the two points, creating a new connectivity option for customers in Markham.

Market participants that want a connection between a Third Party Data Center and the Mahwah data center have additional options. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers.

Wireless connections involve beaming signals through the air between antennas that are within sight of one another. Because the signals travel a straight, unimpeded line, and because light waves travel faster through air than through glass (fiber optics), wireless messages have lower latency than messages travelling through fiber optics. At the same time, as a general rule wireless networks have less uptime than fiber networks. Wireless networks are directly and immediately affected by adverse weather conditions, which can cause message loss and outage periods. Wireless networks cannot be configured with redundancy in the same way that fiber networks can. As a result, an equipment or weather issue at any one location on the network will cause the entire network to have an outage. In addition, maintenance can take longer than it would with a fiber based network, as the relevant tower may be in a hard to reach location, or weather conditions may present safety issues, delaying technicians servicing equipment. Even under normal conditions, a wireless network will have a higher error rate than a fiber network of the same length.

The proposed Wireless Connections traverse wireless connections through a series of towers equipped with wireless equipment, including, in the case of the Carteret and Secaucus connections, a pole on the grounds of the Mahwah data center. With the exception of the non-ICE entity that owns the wireless network used for the Wireless Connections to Secaucus and Carteret,[26] third parties do not have access to such pole. However, access to such pole is not required for third parties to establish wireless networks that can compete with the Wireless Connections to the Carteret and Secaucus Third Party Data Centers, as witnessed by the existing wireless connections offered by non-ICE entities currently serving market participants.

Proximity to a data center is not the only determinant of a wireless network's latency. Rather, the latency of a wireless network depends on several factors. Variables include the wireless equipment utilized; the route of, and number of towers or buildings in, the network; and the fiber equipment used at either end of the connection. Moreover, latency is not the only consideration that a market participant may have in selecting a wireless network. Other considerations may include the bandwidth of the offered connection; amount of network uptime; the equipment that the network uses; the cost of the connection; and the applicable contractual provisions. Indeed, fiber network connections may be more attractive to some market participants as they are more reliable and less susceptible to weather conditions.

2. Statutory Basis

Although the Exchange does not believe that the present proposed change is a change to the ''rules of an exchange'' [27] required to be filed with the Commission under the Act, the Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[28] in general, and furthers the objectives of Section 6(b)(5) of the Act,[29] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to, and perfect the mechanisms of, a free and open market and a national market system and, in general, to protect investors and the public interest and does not unfairly discriminate between customers, issuers, brokers, or dealers. The Exchange also believes that the proposed rule change is consistent with Section 6(b)(4) of the Act,[30] because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The Proposed Change Is Reasonable

The Exchange believes its proposal is reasonable.

There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Secaucus and Carteret Third Party Access Centers using wireless equipment installed on towers and buildings near the Mahwah data center. In addition, some market participants have their own proprietary wireless networks. Based on the information available to it, the Exchange believes that the wireless connections offered by non-ICE entities provide connectivity at the same or similar speed as the Wireless Connections, and at the same or similar cost. The Exchange believes the Wireless Connections between the Mahwah data center and the Markham Third Party Data Center are the first public, commercially available wireless connections between the two points, creating a new connectivity option for customers in Markham.

The Wireless Connections provide market participants with one means of connectivity, but substitute products are available, as witnessed by the existing wireless connections offered by non-ICE entities currently serving market participants. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers.

Market participants' considerations in determining what connectivity to purchase may include latency; bandwidth size; amount of network uptime; the equipment that the network uses; the cost of the connection; and the applicable contractual provisions.

[26] *See* note 19, *supra*.

[27] *See* 15 U.S.C. 78c(a)(27) (defining the term ''rules of an exchange'').

[28] 15 U.S.C. 78f(b).

[29] 15 U.S.C. 78f(b)(5).

[30] 15 U.S.C. 78f(b)(4).

Indeed, fiber network connections may be more attractive to some market participants as they are more reliable and less susceptible to weather conditions.

The Exchange believes that the proposed pricing for the Wireless Connections is reasonable because it allows market participants to select the connectivity options that best suit their needs. A market participant that opts to connect with a Wireless Network would be able to select the route and bandwidth that better suit its needs, thereby helping it tailor its operations to the requirements of its business operations. The fees also reflect the benefit received by customers in terms of lower latency over the fiber optics options.

Only market participants that voluntarily select to receive Wireless Connections are charged for them, and those services are available to all market participants. Furthermore, the Exchange believes that the services and fees proposed herein are reasonable because, in addition to the services being completely voluntary, they are available to all market participants on an equal basis (*i.e.,* the same products and services are available to all market participants). All market participants that voluntarily select Wireless Connections would be charged the same amount for the same services and would have their first month's MRC for Wireless Connections waived.

Overall, the Exchange believes that the proposed change is reasonable because the Wireless Connections described herein are offered as a convenience to market participants, but offering them requires the provision, maintenance and operation of the Mahwah data center, wireless networks and access centers in the Third Party Data Centers, including the installation and monitoring, support and maintenance of the services.

The Exchange believes that the proposed waiver of the first month's MRC is reasonable as it would allow customers to test a Wireless Connection for a month before incurring any monthly recurring fees and may act as an incentive to market participants to connect to a Wireless Connection. The Exchange believes that the proposed waiver of the initial charge if a customer has an existing Wireless Connection and opted to upgrade or downgrade to a different size circuit at the same Third Party Data Center is reasonable because the change in Wireless Connection would not require IDS to do any physical work to implement the connection.

The Exchange believes that its proposed General Note is reasonable because it would provide transparency regarding how the billing practice for Wireless Connections functions. The Exchange believes that a customer should not be charged more than once for a Wireless Connection. For example, to charge one customer twice for a Wireless Connection because that customer is a member of two Affiliate SROs, and so subject to the rules of both Affiliate SROs, when another customer that buys the same Wireless Connection only pays once, would not promote just and equitable principles of trade, and could result in the Exchanges and Affiliate SROs receiving the proceeds from multiple fees despite only providing a service once.

The Proposed Change Is an Equitable Allocation of Fees and Credits

The Exchange believes its proposal equitably allocates its fees among its market participants.

The proposed change would not apply differently to distinct types or sizes of market participants. Rather, it would apply to all market participants equally. As is currently the case, the purchase of any connectivity service is completely voluntary and the Wireless Fee Schedule will be applied uniformly to all customers.

Without this proposed rule change, market participants seeking connectivity to a Third Party Data Center would have fewer options. With it, because the Wireless Connections are offered at different bandwidths and price points, market participants have more choices with respect to the form and price of the connectivity they use, allowing a market participant that opts to connect with a wireless network to select the connectivity and bandwidth that better suit its needs, thereby helping it tailor its operations to the requirements of its business operations.

The Exchange believes that its proposed General Note is equitable because a customer would not be charged more than once for a Wireless Connection. For example, to charge one customer twice for a Wireless Connection because that customer is a member of two Affiliate SROs, and so subject to the rules of both Affiliate SROs, when another customer that buys the same Wireless Connection only pays once, would not promote just and equitable principles of trade, and could result in the Exchanges and Affiliate SROs receiving the proceeds from multiple fees despite only providing a service once. The Exchange believes that its proposed General Note is reasonable because it would provide transparency regarding how the billing practice for Wireless Connections functions.

The Proposed Change Is Not Unfairly Discriminatory

The Exchange believes its proposal is not unfairly discriminatory.

The proposed change would not apply differently to distinct types or sizes of market participants. Rather, it would apply to all market participants equally. As is currently the case, the purchase of any connectivity service is completely voluntary and the Wireless Fee Schedule will be applied uniformly to all customers.

Without this proposed rule change, market participants seeking connectivity to a Third Party Data Center would have fewer options. With it, because the Wireless Connections are offered at different bandwidths and price points, market participants have more choices with respect to the form and price of the connectivity they use, allowing a market participant that opts to connect with a wireless network to select the connectivity and bandwidth that better suit its needs, thereby helping it tailor its operations to the requirements of its business operations.

There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Secaucus and Carteret Third Party Access Centers using wireless equipment installed on towers and buildings near the Mahwah data center. In addition, some market participants have their own proprietary wireless networks. Based on the information available to it, the Exchange believes that the wireless connections offered by non-ICE entities provide connectivity at the same or similar speed as the Wireless Connections, and at the same or similar cost. The Exchange believes the Wireless Connections between the Mahwah data center and the Markham Third Party Data Center are the first public, commercially available wireless connections between the two points, creating a new connectivity option for customers in Markham.

Market participants that want a connection between a Third Party Data Center and the Mahwah data center have additional options. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers.

Market participants' considerations in determining what connectivity to

purchase may include latency; bandwidth size; amount of network uptime; the equipment that the network uses; the cost of the connection; and the applicable contractual provisions. Indeed, fiber network connections may be more attractive to some market participants as they are more reliable and less susceptible to weather conditions.

The Exchange believes that its proposed General Note would not be unfairly discriminatory because a customer would not be charged more than once for a Wireless Connection. For example, to charge one customer twice for a Wireless Connection because that customer is a member of two Affiliate SROs, and so subject to the rules of both Affiliate SROs, when another customer that buys the same Wireless Connection only pays once, would not promote just and equitable principles of trade, and could result in the Exchanges and Affiliate SROs receiving the proceeds from multiple fees despite only providing a service once.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the only burden on competition of the proposed change is on IDS and other commercial connectivity providers. Solely because IDS is wholly owned by the same parent company as the Exchange, IDS will be at a competitive disadvantage to its commercial competitors, and its commercial competitors, without a filing requirement, will be at a relative competitive advantage to IDS.

By permitting IDS to continue to offer the Wireless Connectivity, approval of the proposed changes would contribute to competition by allowing IDS to compete with other connectivity providers, and thus provides market participants another connectivity option. For this reason, the proposed rule changes will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of Section 6(b)(8) of the Act.[31]

There are currently at least three other vendors that offer market participants wireless network connections between the Mahwah data center and the Secaucus and Carteret Third Party Access Centers using wireless equipment installed on towers and buildings near the Mahwah data center. In addition, some market participants have their own proprietary wireless networks. Based on the information available to it, the Exchange believes that the wireless connections offered by non-ICE entities provide connectivity at the same or similar speed as the Wireless Connections, and at the same or similar cost. The Exchange believes the Wireless Connections between the Mahwah data center and the Markham Third Party Data Center are the first public, commercially available wireless connections between the two points, creating a new connectivity option for customers in Markham. Importantly, the Exchange does not control the Third Party Data Centers and could not preclude other parties from creating new wireless or fiber connections to any of the Third Party Data Centers.

Market participants that want a connection between a Third Party Data Center and the Mahwah data center have additional options. A market participant may create a new proprietary wireless connection, connect through another market participant, or utilize fiber connections offered by the Exchange, ICE Affiliates, other service providers and third party telecommunications providers. Indeed, fiber network connections may be more attractive to some market participants as they are more reliable and less susceptible to weather conditions.

The proposed Wireless Connections traverse wireless connections through a series of towers equipped with wireless equipment, including, in the case of the Carteret and Secaucus connections, a pole on the grounds of the Mahwah data center. With the exception of the non-ICE entity that owns the wireless network used for the Wireless Connections to Secaucus and Carteret,[32] third parties do not have access to such pole, as the IDS wireless network has exclusive rights to operate wireless equipment on the Mahwah data center pole. IDS does not sell rights to third parties to operate wireless equipment on the pole, due to space limitations, security concerns, and the interference that would arise between equipment placed too closely together.

Access to the pole or roof is not required for other parties to establish wireless networks that can compete with the Wireless Connections, as witnessed by the existing wireless connections offered by non-ICE entities currently serving market participants. The latency of a wireless network depends on several factors, not just proximity to a data center. Variables include the wireless equipment utilized; the route of, and number of towers or buildings in, the network; and the fiber equipment used at either end of the connection. In addition, latency is not the only consideration that a market participant may have in selecting a wireless network. Market participants' considerations in determining what connectivity to purchase may include latency; bandwidth size; amount of network uptime; the equipment that the network uses; the cost of the connection; and the applicable contractual provisions.

The Exchange operates in a highly competitive market in which exchanges and other vendors offer connectivity options between data centers as a means to facilitate the trading and other market activities of market participants. The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [33]

The proposed change does not affect competition among national securities exchanges or among members of the Exchange, but rather between IDS and its commercial competitors.

For the reasons described above, the Exchange believes that the proposed rule changes reflect this competitive environment.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change, or

[31] 15 U.S.C. 78f(b)(8).

[32] *See* note 19, *supra.*

[33] *See* Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, at 37499 (June 29, 2005).

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEArca–2020–08 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2020–08. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2020–08, and should be submitted on or before March 10, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[34]

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–88163; File No. SR–NSCC–2020–002]

Self-Regulatory Organizations; National Securities Clearing Corporation; Notice of Filing of Proposed Rule Change to Enhance the Calculation of the Family-Issued Securities Charge

February 11, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 28, 2020, National Securities Clearing Corporation (''NSCC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the clearing agency.[3] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of modifications to NSCC's Rules and Procedures (''Rules'')[4] in order to enhance the calculation of NSCC's existing charge applied to long positions in Family-Issued Securities[5] (''FIS Charge'') by using the same haircut percentages for all Members and no longer using Members' ratings on the Credit Risk Rating Matrix (''CRRM'')[6] in calculating this charge, as described below.

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the clearing agency included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The clearing agency has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

(A) Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

NSCC is proposing to modify the Rules to enhance the calculation of the FIS Charge by using the same haircut percentages for all Members and no longer using Members' ratings on the CRRM in calculating this charge. By using the same haircut percentages to calculate the FIS Charge for all Members, NSCC believes this proposed enhancement would better mitigate the specific wrong-way risk posed by long positions in Family-Issued Securities that the charge was designed to address, as described below.

Background

As a central counterparty, NSCC occupies an important role in the securities settlement system by interposing itself between counterparties to financial transactions, thereby reducing the risk faced by participants and contributing to global financial stability. The effectiveness of a central counterparty's risk controls and the adequacy of its financial resources are critical to achieving these risk-reducing goals. As part of its market risk management strategy, NSCC manages its credit exposure to Members by determining the appropriate Required Fund Deposits to the Clearing Fund and monitoring its sufficiency, as provided for in the Rules.[7] The Required Fund Deposit serves as each Member's margin.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] On January 28, 2020, NSCC filed this proposed rule change as an advance notice (SR–NSCC–2020–801) with the Commission pursuant to Section 806(e)(1) of Title VIII of the Dodd-Frank Wall Street Reform and Consumer Protection Act entitled the Payment, Clearing, and Settlement Supervision Act of 2010, 12 U.S.C. 5465(e)(1), and Rule 19b–4(n)(1)(i) under the Act, 17 CFR 240.19b–4(n)(1)(i). A copy of the advance notice is *available at http://www.dtcc.com/legal/sec-rule-filings.aspx.*

[4] Terms not defined herein are defined in the Rules, *available at www.dtcc.com/~/media/Files/Downloads/legal/rules/nscc_rules.pdf.*

[5] A Family-Issued Security is defined in Rule 1 (Definitions and Descriptions) of the Rules as ''a security that was issued by a Member or an affiliate of that Member.'' *Supra* note 4.

[6] *See* Rule 1 and Section 4 of Rule 2B of the Rules, *supra* note 4. *See also* Securities Exchange Act Release Nos. 80734 (May 19, 2017), 82 FR 24177 (May 25, 2017) (SR–DTC–2017–002, SR–FICC–2017–006, SR–NSCC–2017–002); and 80731 (May 19, 2017), 82 FR 24174 (May 25, 2017) (SR–DTC–2017–801, SR–FICC–2017–804, SR–NSCC–2017–801).

[7] *See* Rule 4 (Clearing Fund) and Procedure XV (Clearing Fund Formula and Other Matters) of the Rules, *supra* note 4.

The objective of a Member's Required Fund Deposit is to mitigate potential losses to NSCC associated with liquidating a Member's portfolio in the event NSCC ceases to act for that Member (hereinafter referred to as a ''default'').[8] The aggregate of all Members' Required Fund Deposits constitutes the Clearing Fund of NSCC.[9] NSCC may access its Clearing Fund should a defaulting Member's own Required Fund Deposit be insufficient to satisfy losses to NSCC caused by the liquidation of that Member's portfolio.[10]

Pursuant to the Rules, each Member's Required Fund Deposit amount consists of a number of applicable components, each of which is calculated to address specific risks faced by NSCC, as identified within Procedure XV of the Rules.[11] NSCC regularly assesses the market, liquidity and other risks that its margining methodologies are designed to mitigate to evaluate whether margin levels are commensurate with the particular risk attributes of each relevant product, portfolio, and market.

Among the various risks that NSCC considers when evaluating the effectiveness of its margining methodology are its counterparty risks, including wrong-way risk. In particular, NSCC seeks to identify and mitigate its exposures to specific wrong-way risk, which is defined as the risk that an exposure to a counterparty is highly likely to increase when the creditworthiness of that counterparty deteriorates.[12] NSCC has identified exposure to specific wrong-way risk when it acts as central counterparty to a Member with long positions in Family-Issued Securities. In the event a Member with long positions in Family-Issued Securities defaults, NSCC would close out those positions following a likely drop in the creditworthiness of the issuer, possibly resulting in a loss to NSCC.

In order to address this exposure to specific wrong-way risk, NSCC implemented the FIS Charge in 2015.[13] The FIS Charge is applied to a Member's long positions in Family-Issued Securities, which are the positions NSCC would need to sell into the market following a Member default.[14]

When the FIS Charge was initially implemented, it was only applied to Members that were placed on the Watch List based on the CRRM rating.[15] As part of its ongoing monitoring of its membership, NSCC utilizes the internal CRRM to evaluate its credit risk exposures to its Members based on a scale from strongest to weakest.[16] Members that fall within the higher risk rating categories are considered on NSCC's Watch List and may be subject to enhanced surveillance or additional margin charges, as permitted under the Rules.[17] Therefore, the FIS Charge was applied only to Members on the Watch List based on the reasoning that these Members present a heightened credit risk to NSCC or have demonstrated higher risk related to their ability to meet settlement. However, in the Initial FIS Filing, NSCC proposed to further evaluate its exposure to wrong-way risk presented by positions in Family-Issued Securities by reviewing the impact of expanding the application of the FIS Charge to positions in Family-Issued Securities of all Members.[18]

Following that evaluation, NSCC implemented the current methodology for calculating the FIS Charge, which expanded the application of the charge to all Members, but continues to take into account Members' ratings on the CRRM in calculating the applicable charge.[19] Therefore, under the current methodology, in calculating its Members' Required Fund Deposits, NSCC first excludes long positions in Family-Issued Securities of Members from the applicable volatility charge, and instead charges an amount calculated by multiplying the absolute value of the long Net Unsettled Positions (as such term is defined in Procedure XV of the Rules) in that Member's Family-Issued Securities by a percentage that is no less than 40 percent.[20] The percentage that is used in calculating the FIS Charge depends on a Member's rating on the CRRM. Under Procedure XV of the Rules, long Net Unsettled Positions in (1) fixed income securities that are Family-Issued Securities are charged a haircut rate of no less than 80 percent for Members that are rated 6 or 7 on the CRRM, and no less than 40 percent for Members that are rated 1 through 5 on the CRRM; and (2) equity securities that are Family-Issued Securities are charged a haircut rate of 100 percent for Members that are rated 6 or 7 on the CRRM, and no less than 50 percent for Members that are rated 1 through 5 on the CRRM.[21] The haircut rates used in the FIS Charge as applied to positions in fixed income securities were calibrated based on historical corporate issue recovery rate data and address the risk that the Family-Issued Securities of a Member would be devalued in the event of that Member's default.

Proposed Change

NSCC is now proposing to enhance the methodology for calculating the FIS Charge by using the higher applicable percentage for all Members, and no longer using a Member's CRRM rating in the calculation.

Since implementation of the current calculation, NSCC has continued to monitor its exposure to specific wrong-way risk and determined that the risk characteristics to be considered when margining Family-Issued Securities extend beyond Members' creditworthiness as measured through the CRRM. More specifically, NSCC believes it may be exposed to specific wrong-way risk despite a Members' rating on the CRRM, and NSCC can better mitigate its exposure to this risk by calculating the FIS Charge without considering Members' CRRM ratings. While the current methodology appropriately assumes that Members with a higher rating on the CRRM present a heightened credit risk to NSCC or have demonstrated higher risk related to their ability to meet settlement, NSCC believes this approach does not take into account the risk that a firm may default due to unanticipated causes (referred to as a ''jump-to-default'' scenario) not captured by the CRRM rating. The CRRM rating necessarily relies on historical data as a predictor of future risks. Jump-to-default scenarios

[8] The Rules identify when NSCC may cease to act for a Member and the types of actions NSCC may take. For example, NSCC may suspend a firm's membership with NSCC or prohibit or limit a Member's access to NSCC's services in the event that Member defaults on a financial or other obligation to NSCC. *See* Rule 46 (Restrictions on Access to Services) of the Rules, *supra* note 4.

are triggered by unanticipated causes that could not be predicted based on historical trends or data, for example fraud or other bad acts by management. The proposed change is designed to improve NSCC's ability to cover the specific wrong-way risk posed by long positions in Family-Issued Securities by applying the higher applicable percentage in calculating the FIS Charge for all Members.

In order to implement this proposal, NSCC would amend Sections I.(A)(1)(a)(iv) and I.(A)(2)(a)(iv) of Procedure XV of the Rules, which describe the methodology for calculating the FIS Charge, and provide that (1) fixed income securities that are Family-Issued Securities shall be charged a haircut rate of no less than 80 percent; and (2) equity securities that are Family-Issued Securities shall be charged a haircut rate of 100 percent.

2. Statutory Basis

NSCC believes that the proposed change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a covered clearing agency. In particular, NSCC believes that the proposed change is consistent with Section 17A(b)(3)(F) of the Act,[22] and Rules 17Ad–22(e)(4)(i),[23] and (e)(6)(i) and (v),[24] each promulgated under the Act, for the reasons described below.

Section 17A(b)(3)(F) of the Act requires, in part, that the Rules be designed to promote the prompt and accurate clearance and settlement of securities transactions and to protect investors and the public interest.[25] The proposed change would enhance the margin methodology applied to long positions in Family-Issued Securities by using the higher applicable percentage for all Members, rather than considering Members' CRRM ratings in the calculation. The proposal would improve NSCC's ability to mitigate specific wrong-way risk exposures in a jump-to-default scenario and, in this way, would assist NSCC in collecting margin that more accurately reflects NSCC's exposure to a Member that clears Family-Issued Securities. The proposal would also assist NSCC in its continuous efforts to improve the reliability and effectiveness of its risk-based margining methodology by taking into account specific wrong-way risk. As such, the proposal would help NSCC, as a central counterparty, promote robust risk management, and thus promote the prompt and accurate clearance and settlement of securities transactions, as well as, in general, protect investors and the public interest, consistent with the requirements of Section 17A(b)(3)(F) of the Act.[26]

Rule 17Ad–22(e)(4)(i) under the Act requires that each covered clearing agency establish, implement, maintain and enforce written policies and procedures reasonably designed to effectively identify, measure, monitor, and manage its credit exposures to participants and those arising from its payment, clearing, and settlement processes, including by maintaining sufficient financial resources to cover its credit exposure to each participant fully with a high degree of confidence.[27] The specific wrong-way risk presented by Family-Issued Securities is the risk that, in the event a Member with unsettled long positions in Family-Issued Securities defaults, NSCC would close out those positions following a likely drop in the credit-worthiness of the issuer, possibly resulting in a loss to NSCC. The haircut rates used in calculating the FIS Charge as applied to positions in fixed income securities were calibrated based on historical corporate issue recovery rate data, and, therefore, address the risk that the Family-Issued Securities of a Member would be devalued in the event of that Member's default. The proposal to apply the higher haircuts to all Members would assist NSCC in addressing specific wrong-way risk exposures in a jump-to-default scenario. By addressing this additional risk exposure, NSCC believes the proposal would allow it to calculate the FIS Charge in a way that more accurately reflects the risk characteristics of Family-Issued Securities. The proposal would, therefore, permit NSCC to more accurately identify, measure, monitor and manage its credit exposures to Members with long positions in Family-Issued Securities, and would assist NSCC in collecting and maintaining financial resources that reflect its credit exposures to those Members. Therefore, NSCC believes the proposed change is consistent with Rule 17Ad–22(e)(4)(i).[28]

Rule 17Ad–22(e)(6)(i) under the Act requires that each covered clearing agency that provides central counterparty services establish, implement, maintain and enforce written policies and procedures reasonably designed to cover its credit exposures to its participants by establishing a risk-based margin system that, at a minimum, considers, and produces margin levels commensurate with, the risks and particular attributes of each relevant product, portfolio, and market.[29] Rule 17Ad–22(e)(6)(v) under the Act requires that each covered clearing agency that provides central counterparty services establish, implement, maintain and enforce written policies and procedures reasonably designed to cover its credit exposures to its participants by establishing a risk-based margin system that, at a minimum, uses an appropriate method for measuring credit exposure that accounts for relevant product risk factors and portfolio effects across products.[30]

As stated above, long positions in Family-Issued Securities present NSCC with exposure to specific wrong-way risk that, in the event a Member with these positions defaults, NSCC would close out those positions following a likely drop in the credit-worthiness of the issuer, possibly resulting in a loss to NSCC. The haircut rates used in the current methodology would continue to be used in the proposed methodology and as applied to positions in fixed income securities were calibrated based on historical corporate issue recovery rate data and address the risk that the Family-Issued Securities of a Member would be devalued in the event of that Member's default. Therefore, the calculation of the charge would continue to reflect the risk characteristics of Family-Issued Securities. As described above, the proposed change to apply the higher haircut rates to all Members would improve NSCC's ability to mitigate its exposure to specific wrong-way risk in a jump-to-default scenario. In this way, the proposal would assist NSCC in maintaining a risk-based margin system that considers, and produces margin levels commensurate with, the risks and particular attributes of long positions in Family-Issued Securities. Additionally, NSCC believes the proposed enhancement to the methodology for calculating the FIS Charge is an appropriate method for measuring its credit exposures to its Members, because the FIS Charge would continue to account for the risk factors presented by these securities, *i.e.,* the risk that these securities would be devalued in the event of a Member default. Therefore, NSCC believes the proposed change is consistent with Rule 17Ad–22(e)(6)(i) and (v).[31]

[22] 15 U.S.C. 78q–1(b)(3)(F).

[23] 17 CFR 240.17Ad–22(e)(4)(i).

[24] 17 CFR 240.17Ad–22(e)(6)(i) and (v).

[25] 15 U.S.C. 78q–1(b)(3)(F).

[31] 17 CFR 240.17Ad–22(e)(6)(i) and (v).

(B) Clearing Agency's Statement on Burden on Competition

By enhancing the methodology for calculating the FIS Charge, and, therefore, increasing the amount of margin that Members may be charged under the Rules, the proposed change may impose a burden on competition. More specifically, those Members that are currently rated 1–5 on the CRRM would be subject to an increased FIS Charge relative to the current applicable FIS Charge. However, Members' ratings on the CRRM are re-evaluated periodically and change from time to time. Therefore, all Members could have become subject to the higher FIS Charge at any time under the current methodology if their CRRM rating was increased to a 6 or 7 following a periodic reevaluation of their rating. Similarly, the volume of Net Unsettled Positions in Family-Issued Securities in a Member's portfolio could change periodically. The proposed enhancement to the calculation of the FIS Charge would be imposed on all Members on an individualized basis, based on the positions in their cleared portfolio, in an amount reasonably calculated to mitigate the risks posed to NSCC by those positions. Therefore, Members that present similar Net Unsettled Positions would have similar impacts on their Required Fund Deposits, and, as such, NSCC does not believe any burden on competition imposed by the proposed change would be significant.

Further, NSCC believes that any burden on competition imposed by the proposed change would be both necessary and appropriate in furtherance of NSCC's efforts to mitigate its risk exposures and meet the requirements of the Act,[32] as described in this filing and further below.

NSCC believes that the above described burden on competition that may be created by the proposed changes would be necessary in furtherance of the purposes of the Act, specifically Section 17A(b)(3)(F) of the Act,[33] because, as described above, the Rules must be designed to promote the prompt and accurate clearance and settlement of securities transactions and to protect investors and the public interest.

NSCC also believes the proposed change would be necessary in order to support NSCC's compliance with Rules 17Ad–22(e)(4)(i), and (e)(6)(i) and (v),[34] each promulgated under the Act, which require NSCC to establish, implement, maintain and enforce written policies and procedures reasonably designed to (x) effectively identify, measure, monitor, and manage its credit exposures to participants and those arising from its payment, clearing, and settlement processes, including by maintaining sufficient financial resources to cover its credit exposure to each participant fully with a high degree of confidence; (y) cover its credit exposures to its participants by establishing a risk-based margin system that, at a minimum, considers, and produces margin levels commensurate with, the risks and particular attributes of each relevant product, portfolio, and market; and (z) cover its credit exposures to its participants by establishing a risk-based margin system that, at a minimum, uses an appropriate method for measuring credit exposure that accounts for relevant product risk factors and portfolio effects across products. As described above, NSCC believes implementing the proposed enhancements to the FIS Charge would improve the risk-based methodology that NSCC employs to measure market price risk and would better limit NSCC's credit exposures to Members, consistent with these requirements.

NSCC believes that the above described burden on competition that could be created by the proposed changes would be appropriate in furtherance of the purposes of the Act, because such changes have been designed to promote the prompt and accurate clearance and settlement of securities transactions and to protect investors and the public interest, as described in detail above.

The proposed rule change would use the higher applicable haircut percentage in calculating the FIS Charge for all Members. These haircut percentages as applied to positions in fixed income securities were calibrated to address the risk that the Family-Issued Securities of a Member would be devalued in the event of that Member's default. Therefore, the proposed FIS Charge would better address NSCC's exposures to specific wrong-way risk with respect to all Members' positions in Family-Issued Securities, particularly in jump-to-default scenarios. By mitigating specific wrong-way risk for NSCC, the proposed change would also mitigate risk for Members, because lowering the risk profile for NSCC would in turn lower the risk exposure that Members may have with respect to NSCC in its role as a central counterparty. Further, NSCC believes that any burden on competition that may be imposed by this proposal would be appropriate in furtherance of the purposes of the Act, because it is designed to meet NSCC's risk management goals and its regulatory obligations.

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

NSCC has not received or solicited any written comments relating to this proposal. NSCC will notify the Commission of any written comments received by NSCC.

III. Date of Effectiveness of the Proposed Rule Change, and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

The proposal shall not take effect until all regulatory actions required with respect to the proposal are completed.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NSCC–2020–002 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

All submissions should refer to File Number SR–NSCC–2020–002. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements

[32] 15 U.S.C. 78q–1(b)(3)(I).

[33] 15 U.S.C. 78q–1(b)(3)(F).

[34] 17 CFR 240.17Ad–22(e)(4) and (e)(6).

with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of NSCC and on DTCC's website (*http://dtcc.com/legal/sec-rule-filings.aspx*). All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NSCC–2020–002 and should be submitted on or before March 10, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[35]

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–88161; File No. SR–BOX–2020–03]

Self-Regulatory Organizations; BOX Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Fee Schedule on the BOX Options Market LLC Facility To Establish BOX Connectivity Fees for Participants and Non-Participants Who Connect to the BOX Network

February 11, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 29, 2020, BOX Exchange LLC (the ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange filed the proposed rule change pursuant to Section 19(b)(3)(A)(ii) of the Act,[3] and Rule 19b–4(f)(2) thereunder,[4] which renders the proposal effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange is filing with the Securities and Exchange Commission (''Commission'') a proposed rule change to amend the Fee Schedule regarding connectivity to BOX in order to provide greater detail and clarity concerning BOX's costs, as they pertain to expenses for network connectivity services, on the BOX Options Market LLC (''BOX'') options facility. The text of the proposed rule change is available from the principal office of the Exchange, at the Commission's Public Reference Room and also on the Exchange's internet website at *http://boxexchange.com.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange is refiling its proposal to amend the Fee Schedule regarding connectivity to BOX in order to provide greater detail and clarity concerning BOX's costs, as they pertain to expenses for network connectivity services. The Exchange is now presenting more connectivity cost details that correspond with income statement expense line items to provide greater transparency into its actual costs associated with providing network connectivity services. The Exchange believes that its proposed fees are fair and reasonable because they will permit recovery of less than all of the Exchange's costs for providing connectivity and will not result in excessive pricing or supracompetitive profit, when comparing the Exchange's total annual expense associated with providing the network connectivity services versus the total projected annual revenue the Exchange projects to collect for providing the network connectivity services.

The Exchange proposes to amend Section VI. (Technology Fees) of the BOX Fee Schedule to establish BOX Connectivity Fees for Participants and non-Participants who connect to the BOX network. Connectivity fees will be based upon the amount of bandwidth that will be used by the Participant or non-Participant. Further, BOX Participants or non-Participants connected as of the last trading day of each calendar month will be charged the applicable Connectivity Fee for that month. The Connectivity Fees will be as follows:

Connection type	Monthly fees (per connection)
Non-10 Gb Connection ...	$1,000
10 Gb Connection	5,000

The Exchange also proposes to amend certain language and numbering in Section VI.A to reflect the changes discussed above. Specifically, the Exchange proposes to add the title ''Third Party Connectivity Fees'' under Section VI.A. Further, the Exchange proposes to add Section VI.A.2, which details the proposed BOX Connectivity Fees discussed above. Finally the Exchange is proposing to remove Section VI.C. High Speed Vendor Feed (''HSVF''), and reclassify the HSVF as a Port Fee.

The Exchange initially filed the proposed fees on July 19, 2018, designating the proposed fees effective July 1, 2018. The first proposed rule change was published for comment in the **Federal Register** on August 2, 2018.[5] The Commission received one comment letter on the proposal.[6] The proposed fees remained in effect until they were temporarily suspended pursuant to a suspension order (the ''Suspension Order'') issued by the Division of Trading and Markets, which also instituted proceedings to determine whether to approve or disapprove the

proposed rule change.[7] The Commission subsequently received one further comment letter on the proposed rule change, supporting the decision to suspend and institute proceedings on the proposed fee change.[8]

In response to the Suspension Order, the Exchange timely filed a Notice of Intention to Petition for Review [9] and Petition for Review to vacate the Division's Order,[10] which stayed the Division's suspension of the filing. On November 16, 2018 the Commission granted the Exchange's Petition for Review but discontinued the automatic stay.[11] The Exchange then filed a statement to reiterate the arguments set for in its petition for review and to supplement that petition with additional information.[12]

The Exchange subsequently refiled its fee proposal on November 30th, 2018. The proposed fees were noticed and again temporarily suspended pursuant to a suspension order issued by the Division of Trading and Markets, which also instituted proceedings to determine whether to approve or disapprove the proposed rule change.[13] The Commission received two comment letters supporting the decision to suspend and institute proceedings on the proposed fee change.[14]

The Exchange again refiled its fee proposal on February 13, 2019. The proposed fees were noticed and again temporarily suspended pursuant to a suspension order issued by the Division of Trading and Markets, which also instituted proceedings to determine whether to approve or disapprove the proposed rule change.[15] The Commission received four comment letters supporting the decision to suspend and institute proceedings on the proposed fee change.[16]

On March 29, 2019, the Commission issued its Order Disapproving each iteration of the BOX Proposal (''BOX Order''). In the BOX Order, the Commission highlighted a number of deficiencies it found in three separate rule filings by BOX to establish BOX's connectivity fees that prevented the Commission from finding that BOX's proposed connectivity fees were consistent with the Act.

On May 21, 2019 the Division of Trading and Markets released new Guidance on SRO Rule Filings Relating to Fees. The Exchange then refiled the proposed fees on June 26, 2019 to incorporate the new guidance released by the Commission.

The Commission received two comment letters on BOX's June 26, 2019 Proposal.[17] The Third SIFMA Comment Letter did not request that the Commission suspend BOX's Proposal, but rather requested that the Commission ''carefully consider whether BOX provided sufficient evidence to satisfy the applicable statutory standards.'' The Fourth Healthy Markets Letter walks through the procedural history of the BOX and MIAX filings and urges the Commission to propose reforms with regard to immediately effective rule filings.

On September 5, 2019 the Exchange withdrew the proposed rule change and refiled the proposed fees to further bolster its cost-based discussion to support its claim that the Proposal is fair and reasonable because they will permit recovery of a portion of BOX costs and will not result in excessive pricing or supra-competitive profit. The Commission received only one comment letter on the proposed rule change, twelve days after the comment period ended.[18] Of note, no Participant, other person, industry group, or operator of an options market commented on the proposed rule change. Rather, the only comment letter came from an operator of a single equities market (equities market structure and the resulting network demands are fundamentally different from those in the options markets) and which the operator also has a fundamentally different business model (and agenda) than does the Exchange. That letter called for, among other things, the Exchange to explain its basis for concluding it incurred substantially higher costs to provide lower-latency connections and further described the nature and closeness of the relationship between the identified costs and connectivity products and services as stated in the Exchange's cost allocation analysis.

The Exchange is again re-filing the fee proposal (''the Proposal'') to provide greater detail and clarity concerning the Exchange's costs, as they pertain to the Exchange's expense relating to the provision of network connectivity services. The Exchange is also refiling its proposal in order to clarify certain points raised in the IEX Letter.

The Exchange believes that the proposed fees are consistent with the Act because they (i) are reasonable, equitably allocated, not unfairly discriminatory, and not an undue burden on competition; (ii) comply with the BOX Order and the Guidance; (iii) are, as demonstrated by this Proposal and supported by evidence (including data and analysis), constrained by significant competitive forces; and (iv) are, supported by specific information (including quantitative information), fair and reasonable because they will permit recovery of a portion of BOX's costs and will not result in excessive pricing or supracompetitive profit. Accordingly, the Exchange believes that

the Commission should find that the proposed fees are consistent with the Act. The proposed rule change is immediately effective upon filing with the Commission pursuant to Section 19(b)(3)(A) of the Act.

As discussed herein, the Exchange believes that it is reasonable and appropriate to begin charging for physical connectivity fees to partially offset the costs associated with maintaining and enhancing a state-of-the-art exchange network infrastructure in the U.S. options industry. There are significant costs associated with various projects and initiatives to improve overall network performance and stability, as well as costs paid to the third-party data centers for space rental, power used, etc.

BOX has always offered physical connectivity to Participants and non-Participants to access the BOX's trading platforms, market data, test systems and disaster recovery facilities. These physical connections consist of 10 Gb and non-10 Gb connections, where the 10 Gb connection provides for faster processing of messages sent to it in comparison to the non-10 Gb connection. Since launching in 2012, BOX has not charged for physical connectivity and has instead relied on transaction fees as the basis of revenue. However, in recent years transaction fees have continually decreased across the options industry. At the same time these transactions fees were decreasing, the options exchanges, except for BOX, began charging physical connectivity fees to market participants. As such, BOX began to find itself at a significant competitive disadvantage due to the decreased transaction fees at other exchanges. To remain competitive, BOX was forced to follow suit and decrease its transaction fees in order to continue receiving order flow to the Exchange. While other exchanges lowered transaction fees, they were still able to rely on the connectivity fee revenues as a means of covering a portion of the costs to operate their respective exchanges. BOX had no choice but to begin charging Participants and non-Participants fees for connecting directly to the BOX network (which BOX has taken considerable measures to maintain and enhance for the benefit of those Participants and non-Participants) in order to remain competitive with the other options exchanges in the industry.

As discussed in the Exchange's recent Petition for Review of the Commission's Order Disapproving BOX's three filings, not allowing BOX to charge such connectivity fees arbitrarily and inequitably treats BOX differently from each of the other exchanges that submitted prior immediately effective connectivity fee filings that were not suspended or disapproved by the Commission.[19] The Exchange notes that all other options exchanges currently charge for similar physical connectivity.[20]

2. Statutory Basis

The Exchange believes that the proposal is consistent with the requirements of Section 6(b) of the Act, in general, and Section 6(b)(4) and 6(b)(5)of the Act,[21] in particular, in that it provides for the equitable allocation of reasonable dues, fees, and other charges among BOX Participants and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [22]

The Exchange believes that the proposed fees in general constitute an equitable allocation of fees, and are not unfairly discriminatory, because they allow BOX to recover costs associated with offering access through the network connections. The proposed fees are also expected to offset the costs both the Exchange and BOX incur in maintaining and implementing ongoing improvements to the trading systems, including connectivity costs, costs incurred on software and hardware enhancements and resources dedicated to software development, quality assurance, and technology support.

The Exchange believes that its proposal is consistent with Section 6(b)(4) of the Act, in that the proposed fee changes are fair, equitable and not unreasonably discriminatory, because the fees for the connectivity alternatives available on BOX, as proposed, are constrained by significant competitive forces. The U.S. options markets are highly competitive (there are currently 16 options markets) and a reliance on competitive markets is an appropriate means to ensure equitable and reasonable prices. As stated above, BOX instituted the proposed fees after finding itself at a competitive disadvantage with other options exchanges. As other options exchanges lowered their transaction fees, they were still able to rely on the connectivity fee revenues as a means of covering a portion of the costs to operate their respective exchanges. By not charging for connectivity, BOX could not realistically compete for order flow through reduced transaction fees and still remain solvent.

Further, as the Exchange explained to the Division in previous filings and comment letters, the existence of robust competition between exchanges to attract order flow requires exchanges to keep prices for all of their joint services—including connectivity to the exchanges' networks at a pro-competitive level.[23] This conclusion is substantiated by the report prepared by Professor Janusz A. Ordover and Gustavo Bamberger addressing the theory of ''Platform Competition'' and its application to the pricing of exchanges' services, including connectivity services.[24] In the report, Ordover and Bamberger explain that ''the provision of connectivity services . . . is inextricably linked to the provision of trading services, so that, as

[19] *See* Securities Exchange Act Release No. 85927. Order Granting Petition for Review and Scheduling Filing of Statements, dated May 23, 2019.

[20] Nasdaq PHLX LLC (''Phlx''), The Nasdaq Stock Market LLC (''Nasdaq''), NYSE Arca, Inc. (''Arca''), NYSE American LLC (''NYSE American''), Nasdaq ISE, LLC (''ISE''), Cboe Exchange, Inc. (''Cboe''), Cboe BZX Exchange, Inc. (''CboeBZX''), Cboe EDGX Exchange, Inc. (''CboeEDGX'') and Cboe C2 Exchange, Inc. (''C2'') all offer a type of 10 Gb and non-10 Gb connectivity alternative to their participants. See Phlx, and ISE Rules, General Equity and Options Rules, General 8, Section 1(b). Phlx and ISE each charge a monthly fee of $2,500 for each 1 Gb connection, $10,000 for each 10 Gb connection and $15,000 for each 10 Gb Ultra connection, which is the equivalent of the Exchange's 10 Gb ULL connection. See also Nasdaq Price List—Trading Connectivity. Nasdaq charges a monthly fee of $7,500 for each 10 Gb direct connection to Nasdaq and $2,500 for each direct connection that supports up to 1 Gb. See also NYSE American Fee Schedule, Section V.B, and Arca Fees and Charges, Co-Location Fees. NYSE American and Arca each charge a monthly fee of $5,000 for each 1 Gb circuit, $14,000 for each 10 Gb circuit and $22,000 for each 10 Gb LX circuit, which is the equivalent of the Exchange's 10 Gb ULL connection. See also Cboe, CboeBZX, CboeEDGX and C2 Fee Schedules. Cboe charges monthly quoting and order entry bandwidth packet fees. Specifically, Cboe charges $1,600 for the 1st through 5th packet, $800 for the 6th through 8th packet, $400 for the 9th through 13th packet and $200 for the 14th packet and each additional packet. CboeBZX, CboeEDGX and C2 each charge a monthly fee of $2,500 for each 1 Gb connection and $7,500 for each 10 Gb connection.

[23] Letter from Lisa J. Fall, BOX, to Brent J. Fields, Secretary, Securities and Exchange Commission (Feb. 19, 2019), *https://www.sec.gov/comments/sr-box-2018-24/srbox201824-4945872-178516.pdf.*

[24] *Id.*

a matter of economics, it is not possible to appropriately evaluate the pricing of connectivity services in isolation from the pricing of trading and other 'joint' services offered by'' an exchange. Ordover and Bamberger state that ''connectivity services are an 'input' into trading'' and that ''excessive pricing of such services would raise the costs of trading on [an exchange] relative to its rivals and thus discourage trading on'' that exchange.

Although the Ordover/Bamberger Statement focuses on the pricing of connectivity services by Nasdaq-affiliated equities exchanges, its ''overarching conclusion . . . that the pricing of connectivity services should not be analyzed in isolation'' applies with equal force to the proposed BOX fees. As discussed herein, BOX is engaged with rigorous competition with other exchanges to attract order flow to its platform. As such, BOX is constrained in its ability to price its joint services—including connectivity services—at supracompetitive levels. That competition ensures that BOX's connectivity fees are set at levels consistent with the requirements of the Exchange Act.

The Exchange acknowledges that there is no regulatory requirement that any market participant must connect to BOX, or that any participant must connect at any specific connection speed. The rule structure for options exchanges are, in fact, fundamentally different from those of equities exchanges. In particular, options market participants are not forced to connect to (and purchase market data from) all options exchanges, as shown by the number of Participants of BOX as compared to the much greater number of participants at other options exchanges. Not only does BOX have less than half the number of participants as certain other options exchanges, but there are also a number of BOX Participants that do not connect directly to BOX. Further, of the number of Participants that connect directly to BOX, many such Participants do not purchase market data from BOX. In addition, of the market makers that are connected to BOX, it is the individual needs of the market maker that require whether they need one connection or multiple connections to BOX. BOX has market maker Participants that only purchase one connection (10 Gb) and BOX has market maker Participants that purchase multiple connections. It is all driven by the business needs of the market maker. Market makers that are consolidators that target resting order flow tend to purchase more connectivity than market makers that simply quote all symbols on BOX. Even though non-Participants purchase and resell 10 Gb and non-10 Gb connections to both Participants and non-Participants, no market makers currently connect to BOX indirectly through such resellers.

The argument that all broker-dealers are required to connect to all exchanges is not true in the options markets. The options markets have evolved differently than the equities markets both in terms of market structure and functionality. For example, there are many order types that are available in the equities markets that are not utilized in the options markets, which relate to mid-point pricing and pegged pricing which require connection to the SIPs and each of the equities exchanges in order to properly execute those orders in compliance with best execution obligations. In addition, in the options markets there is a single SIP (OPRA) versus two SIPs in the equities markets, resulting in few hops and thus alleviating the need to connect directly to all the options exchanges. Additionally, in the options markets, the linkage routing and trade through protection are handled by the exchanges, not by the individual participants. Thus not connecting to an options exchange or disconnecting from an options exchange does not potentially subject a broker-dealer to violate order protection requirements as suggested by SIFMA. The Exchange recognizes that the decision of whether to connect to BOX is separate and distinct from the decision of whether and how to trade on BOX. The Exchange acknowledges that many firms may choose to connect to BOX, but ultimately not trade on it, based on their particular business needs.

Further, there is competition for connectivity to BOX. BOX competes with eleven (11) non-Participants who resell BOX connectivity or market data. These are resellers of BOX connectivity—they are not arrangements between broker dealers to share connectivity costs. Those non-Participants resell that connectivity to multiple market participants over that same connection, including both Participants and non-Participants of BOX. When connectivity is re-sold by a third-party, BOX does not receive any connectivity revenue from that sale. It is entirely between the third-party and the purchaser, thus constraining the ability of BOX to set its connectivity pricing as indirect connectivity is a substitute for direct connectivity. There are currently eleven (11) non-Participants that purchase connectivity to BOX. Those non-Participants resell that connectivity or market data to approximately twenty-seven (27) customers, some of whom are agency broker-dealers that have tens of customers of their own. Some of those twenty-seven (27) customers also purchase connectivity directly from BOX. Accordingly, indirect connectivity is a viable alternative that is already being used by non-Participants of BOX, constraining the price that BOX is able to charge for connectivity.

Prior to charging the proposed connectivity fees to market participants, the Exchange distributed an Informational Circular to all subscribers detailing the fees.[25] The circular stated that Participants connected as of the last trading day of each calendar month would be charged the applicable connectivity fee for that month. In addition to the Circular, the Exchange reached out to certain non-Participants[26] connected to BOX to ensure they knew of the upcoming connectivity fees and allow them the opportunity to disconnect any old connections before being charged. Finally, the Exchange instituted a grace period where Participants could contact the Exchange and make modifications to their connections (*i.e.* disconnect, add, downsize, etc.) prior to being charged the new connectivity fees. This grace period was in effect until August 7, 2018.

The Exchange is comprised of 51 BOX Participants. Of those 51 Participants, 24 Participants have purchased 10 Gb or non-10 Gb connections or some combination of multiple various connections.[27] The remaining Participants who have not purchased any connectivity to BOX are still able to trade on BOX indirectly through other Participants or non-Participant service bureaus that are connected. These remaining Participants who have not purchased connectivity are not forced or compelled to purchase connectivity, and they retain all of the other benefits of membership with the Exchange. Accordingly, Participants and non-Participants have the choice to purchase connectivity and are not compelled to do so in any way.

The Exchange believes that the proposed fees are fair, equitable and not unreasonably discriminatory because

[25] *See* IC–2018–15.

[26] These included past Participants who had terminated their membership with BOX and were no longer receiving BOX circulars, as well as third party network providers who were not on the Exchange's distribution list. The Exchange reached out to these firms individually to alert them of the upcoming fee change and give them the opportunity to disconnect any old connections to the BOX system.

[27] Currently, there are a total of 119 physical connections to BOX: 70 10 Gb connections and 49 non-10 Gb connections.

the connectivity pricing is directly related to the relative costs to BOX to provide those respective services and does not impose a barrier to entry to smaller participants. Accordingly, BOX offers various direct connectivity alternatives and various indirect connectivity (via third party) alternatives. BOX recognizes that there are various business models and varying sizes of market participants conducting business on BOX. The decision of which type of connectivity to purchase, or whether to purchase connectivity at all for a particular exchange, is based on the business needs of the firm. To assist prospective Participants or firms considering connecting to BOX, the Exchange provides information about BOX's available connectivity alternatives on the BOX website.[28] Section 2.4 of the BOX Connectivity Guide details the bandwidth requirements depending on the type of traffic each firm requires.

The non-10 Gb direct connectivity alternatives [29] are all comprised of bandwidth of equal to or less than 1 Gb and are purchased by market participants that require less bandwidth. For example, a firm requiring only simple order routing (which requires 128 kbps of bandwidth) would be satisfied with a non-10 Gb connection. Additionally, non-10 Gb connections can fully support both the sending of orders and the consumption of BOX's HSVF Data Feed.[30] By definition, non-10 Gb connections utilize less bandwidth and consume less resources from the network. Additionally, non-10 Gb connections and their interface modules cost considerably less than 10 Gb connections. Accordingly, because these connections consume the least resources of the Exchange and are the least costly for the Exchange to provide, the non-10 Gb connections are at a lower price point than the 10 Gb connections.[31]

In contrast, market participants that purchase 10 Gb connections utilize the most bandwidth and consume the most resources from the network.[32] The 10 Gb connection offers optimized connectivity with lower latency for latency sensitive participants and is faster in round trip time for connection oriented traffic to BOX than the non-10 Gb connection. In other words, 10 Gb connections carry ten times more gigabits than the non-10 Gb connection so information travelling over a 10 Gb connection will generally get to the destination faster than if it travelled over a non-10 Gb connection. As discussed herein, this lower latency is achieved through more advanced network equipment, such as advanced hardware and switching components, which translates to increased costs to BOX. A 10 Gb connection uses at least ten times the network infrastructure as the non-10 Gb connections as BOX has to scale the systems by the amount and size of all connections regardless of how they are used.[33] Accordingly, the Exchange believes that the allocation of the proposed fees ($1,000 per non-10 Gb connection and $5,000 per 10 Gb connection) are reasonable based on the resources consumed by the respective type of connection—lower resource consuming market participants pay the least, and highest resource consuming market participants pay the most, particularly since higher resource consumption translates to higher costs to BOX.[34]

Separately, the Exchange is not aware of any reason why market participants could not simply drop their connections and cease being BOX Participants if the Exchange were to establish unreasonable and uncompetitive price increases for its connectivity alternatives. Market participants choose to connect to a particular exchange and because it is a choice, BOX must set reasonable connectivity pricing, otherwise prospective participants would not connect and existing participants would disconnect or connect through a third-party reseller of connectivity. No options market participant is required by rule, regulation, or competitive forces to be a BOX Participant.[35] As evidence of the fact that market participants can and do disconnect from exchanges based on connectivity pricing, see the R2G Services LLC (''R2G'') letter based on BOX's proposed rule changes to increase its connectivity fees. The R2G letter stated, ''[w]hen BOX instituted a $10,000/month price increase for connectivity; we had no choice but to terminate connectivity into them as well as terminate our market data relationship. The cost benefit analysis just didn't make any sense for us at those new levels.'' [36] Accordingly, this example shows that if an exchange sets too high of a fee for connectivity and/or market data services for its relevant marketplace, market participants can choose to disconnect from the exchange. The Exchange notes that no other Participant or non-Participant disconnected from the exchange as a result of the connectivity fees.

Several market participants choose not to be BOX Participants and choose not to access BOX, and several market participants also access BOX indirectly through another market participant. If all market participants were required to be Participants of each exchange and connect directly to the exchange, all exchanges would have over 200 Participants, in line with Cboe's total membership.

---

[28] *See* BOX Connectivity Guide at *https://boxoptions.com/assets/NET-BX-001E-BOX-Network-Connection-Specifications-v2.7.pdf.*

[29] Non-10 Gb connectivity alternatives are comprised of protocol types that are at or under 1 Gb bandwidth. The protocol types are: Gigabit Ethernet, Ethernet, Fast Ethernet, Fiber Channel, OC–3, Singlemode Fiber, ISDN, POTS and T1.

[30] BOX's HSVF Data Feed does not require a 10 Gb physical connection. However, to receive the five best limits on the HSVF, a 10 Gb connection is required. On MIAX, the 1 Gb connection cannot support the consumption of the top of market data feed or the depth data feed product—both require a 10 Gb connection.

[31] Based on one trading day in January 2020, Participants with 10 Gb connections accounted for approximately 85% of message traffic over the network where Participants with non-10 Gb connections accounted for approximately 15% of message traffic over the network. As discussed herein, non-10 Gb connections consume less resources from the network and are therefore priced lower than the 10 Gb connection.

[32] Supporting a 10 Gb connection requires larger internal uplinks, firewalls and sniffer devices, all of which cost considerably more to maintain than support for non-10 Gb connections. Specifically, in order to support 10 Gb connections, BOX must obtain switches that offer 40Gb or more of uplink speed which cost more than the 1 Gb alternatives. In addition, BOX must obtain the appropriate connectors to support the 40Gb switches. These connectors are also more expensive than the 1 Gb alternatives. It is important to note that, as evidenced above, offering 10 Gb connections has downstream cost impacts as BOX needs to ensure that there is sufficient bandwidth internally in order to support multiple 10 Gb connections for Participants and non-Participants accessing the BOX system. The Exchange also notes that in addition to the higher cost of the internal 40Gb switches and appropriate connectors to support these connections, there are higher third party support contract costs in order to implement and maintain these technology components for the benefit of Participants and non-Participants who access the BOX system.

[33] The Exchange's network infrastructure requirements are based on the premise of all connections operating at full capacity.

[34] The IEX Comment Letter questioned if there were cost differentials between 10 Gb and non-10 Gb connections, stating that ''the hardware components to support a 10 Gb connection are essentially the same as those for a non-10 Gb connection . . . there may be marginally higher maintenance costs in the way of replacements or upgrades for a 10 Gb option, but IEX believes the difference in exchange cost for a 10 Gb connection will certainly be less than twice that of a higher latency connection.'' As described above, this is not true for BOX.

[35] Cboe Exchange Inc. has over 200 members, Nasdaq ISE, LLC has approximately 100 members, and NYSE American LLC has over 80 members. In comparison, the BOX has 51 Participants.

[36] The Exchange notes that R2G was a non-Participant service provider who connected to BOX at no cost and then sold BOX connectivity and market data to its customers. The $10,000 charge referenced in the R2G Letter was for two (2) 10 Gb connections.

The Exchange believes that its proposal is consistent with Section 6(b)(4) of the Act because the proposed fees allow the BOX to recover a portion of the costs incurred by BOX associated with maintaining and enhancing a state-of-the-art exchange network infrastructure in the US options industry. Additionally, there are significant costs associated with various projects and initiatives to improve overall network performance and stability, as well as costs paid to the third-party data centers for space rental, power used, etc.

The Exchange notes that unlike its competitors, BOX does not own its own data center and therefore cannot control data center costs. While some of the data center expenses are fixed, much of the expenses are not fixed, and thus increases as the number of physical connections increase. For example, new non-10 Gb and 10 Gb connections require the purchase of additional hardware to support those connections. Further, as the total number of all connections increase, BOX needs to increase their data center footprint and consume more power, resulting in increased costs charged by their third-party data center provider.

Further, as discussed herein, because the costs of operating a data center are significant and not economically feasible for BOX, BOX does not operate its own data centers, and instead contracts with a third-party data center provider. The Exchange notes that larger, dominant exchange operators own/operate their data centers, which offers them greater control over their data center costs. Because those exchanges own and operate their data centers as profit centers, BOX is subject to additional costs. Connectivity fees, which are charged for accessing the BOX's data center network infrastructure, are directly related to the network and offset such costs.

As detailed in the Exchange's and BOX Market's [37] 2018 audited financial statements which are publicly available as part of the Exchange's Form 1 Amendment BOX only has two sources of revenue that it can control: transaction fees and non-transactions fees.[38] Accordingly, BOX must cover all of its expenses from these two sources of revenue.

The Proposed Fees are fair and reasonable because they will not result in excessive pricing or supracompetitive profit, when comparing the total annual expense of the Exchange and BOX associated with providing the network connectivity services versus the total projected annual revenue of the Exchange [39] and BOX associated with providing the network connectivity services.

The Exchange conducted an extensive review of the Exchange and BOX expenses to determine whether such expenses relate to the provision of network connectivity services, and, if such expense did so relate, what portion of such expense actually supports the provision of network connectivity services, and thus bears a relationship that is, ''in nature and closeness,'' directly related to network connectivity services. The sum of all such portions of expenses represents the total actual baseline cost of the Exchange and BOX to provide network connectivity services.

For 2018, the annual expense for BOX and the Exchange associated with providing the network connectivity services was approximately $8.9 million. This amount is comprised of both direct and indirect expenses. The financial information below is meant to provide greater detail and clarity concerning BOX's cost allocations as they pertain to expenses for network connectivity services; and further describe the nature and closeness of the relationship between the identified costs and connectivity services where possible.

The direct expense (which relates to the network infrastructure, associated data center processing equipment required to support various connections, network monitoring systems and associated software required to support the various forms of connectivity) was approximately $6.4 million.[40] The Exchange notes the $6.4 million direct expense is only a portion of the overall technology costs for BOX and the Exchange. The $6.4 million direct expense does not include technology items such as the Exchange and BOX technological improvements and upkeep to the BOX trading and matching system,[41] third party technology security expenses for the BOX trading and matching system, technology license contract costs for the BOX trading and matching system, and third party billing expenses associated with the BOX trading and matching system. Further, the direct expense of $6.4 million does not include the indirect expenses detailed below. A more detailed breakdown of the direct annual operational expense in 2018 includes the following:

- Over $2.8 million for space rental, power usage, connections, etc. at the Exchanges data centers; [42]
- Over $1.1 million for data center support and management of third party vendors; [43]

[37] BOX Exchange LLC (''Exchange'') and BOX Options Market LLC (''BOX'') are two different entities. The Exchange is a national securities exchange registered with the SEC under Section 6 of the Securities Exchange Act of 1934. The Exchange fulfills the regulatory functions and responsibilities and oversees BOX, the equity options market. Expenses associated with network connectivity services are born by both the Exchange and BOX. A summary of the Form 1 Statement of Income and Expense for both the Exchange and BOX is included as an Exhibit 3 of this filing. The Exchange notes that the Non-Transaction Fees for BOX Options Market LLC are now broken down further into three additional categories: Access Fees, Market Data Fees, and Participant Fees.

[38] Options Price Authority Reporting (''OPRA'') income is not controlled by BOX.

[39] Revenues for the Exchange are limited to the Options Regulatory Fee (''ORF'') and fines and disgorgements.

[40] Direct connectivity expenses are a portion of the following line items in the BOX and Exchange Form 1 Financial Statements: Technical and Operational, Other and Communications and Data Processing. The Exchange notes that these direct expenses include all expenses associated with the Exchanges' data centers. BOX's infrastructure design does not distinguish network connectivity expenses from other data center expenses. In other words, network connectivity is intertwined with the overall infrastructure of the BOX system.

[41] In determining the $6.4 million direct cost for network connectivity, the Exchange did not include any expenses related to business development initiatives. For example, the technological cost for adding complex order functionality to certain order types would not be included in the technological improvement costs outlined in the direct expense for network connectivity. The total cost for technological improvements in 2018, including business development initiatives and other initiatives not related to network connectivity was $3.86 million.

[42] This cost can be found in three line items in the Statement of Income of the BOX and Exchange Form 1 documents: ''Professional Services: Other,'' ''Professional Services: Technical and Operational''; and ''Communications and data processing.'' The Exchange notes that the $2.8 million figure includes, but is not limited to, the fees paid to: Equinix and 365 Services LLC, the data centers that host the Exchange's network infrastructure, Secure Financial Transaction Infrastructure (''SFTI''), which supports connectivity and fees for the entire US options industry, various other service providers (including Cogent, Lightower and Activ Financial Systems, Inc) which provide content, connectivity services, and infrastructure services for critical components of options connectivity; and various other hardware and software providers which support the production environment in which Participants and non-Participants connect to the network to trade, receive market data, etc. The Exchange believes that without the technology services of the all providers discussed above, the Exchange would not be able to operate and support the BOX network and provide network connectivity services to Participants and non-Participants. The Exchange believes that including the costs of these services is reasonable as they represent the Exchange's cost to operate and support the BOX network and ultimately provide optimal network connectivity to market participants.

[43] These costs include annual service and support contracts with a large number of third party vendors to support the data centers and trading platform. These costs appear in the ''Professional Services: Technical and Operational'' line item of the Statement of Income of the BOX and Exchange Form 1 documents.

- Over $700,000 in technological improvements to the data center infrastructure; [44]
- Over $1.4 million for resources for technical and operational services for the Exchange's data centers; [45] and
- $400,000 in market data connectivity fees.[46]

The indirect expense (which includes expense from such areas as trading operations, software development, business development, information technology, marketing, human resources, legal and regulatory, finance and accounting) that the Exchange and BOX allocate to the maintenance and support of network connectivity services was approximately $2.5 million.[47] Included in this indirect expense total are the following:

- Over $1 million in employee compensation and benefits for full-time employees that support network connectivity services; [48]
- Over $1 million in software and hardware depreciation; [49]
- Over $100,000 in office space and rent to support employees related to network connectivity; [50] and
- Over $200,000 in miscellaneous data, communications, external IT, and regulatory audit costs relate to expenses that support general connectivity for trading and personnel support.[51]

Total projected annualized revenue associated with selling the network connectivity services (reflecting the proposed fees on a fully-annualized basis, using July 2019 data) for BOX is projected to be approximately $4.6 million. This projected revenue amount of $4.6 million represents approximately 13% of total net revenue of BOX and Exchange for 2018 of approximately $35.5 million. The Exchange believes that an indirect expense allocation of 10% of total expense (less direct expense) to network connectivity services is fair and reasonable, as total projected network connectivity revenue represents approximately 13% of total net revenue for 2018. That is, direct expense of $6.4 million plus indirect expense of $2.5 million fairly reflects the total annual expense associated with providing the network connectivity services, both from the perspective of similar revenue and expense percentages (connectivity to total), as well as matching connectivity resources to connectivity expenses. The Exchange believes that this is a conservative allocation of indirect expense. Accordingly, the total projected connectivity revenue for BOX, reflective of the proposed fees, on an annualized basis, of $4.6 million, is almost half of the total annual actual BOX and Exchange connectivity expense (direct and indirect) for 2018 of $8.9 million. Further, even the direct expense associated with providing network connectivity ($6.4 million) exceeds expected revenue from connectivity.

The Exchange projects comparable network connectivity revenue and expense for 2020 for BOX. Accordingly, the Proposed Fees are fair and reasonable because they do not result in excessive pricing or supracompetitive profit, when comparing the actual network connectivity costs to the Exchange and BOX versus the projected network connectivity annual revenue. Additional information on overall revenue and expense can be found in the Exchange's and BOX's 2018 audited financial results, which is publicly available as part of the Exchange's Form 1 filed with the Commission.

For the avoidance of doubt, none of the expenses included herein relating to the provision of network connectivity services relate to the provision of any other services offered by BOX. Stated differently, no expense amount of the Exchange or BOX is allocated twice.

The Exchange again notes that other exchanges have similar connectivity alternatives for their participants, including similar low-latency connectivity. For example, Nasdaq PHLX LLC (''Phlx''), NYSE Arca, Inc. (''Arca''), NYSE American LLC (''NYSE American'') and Nasdaq ISE, LLC (''ISE'') all offer a 1 Gb, 10 Gb and 10 Gb low latency ethernet connectivity alternatives to each of their participants.[52] The Exchange further notes that Phlx, ISE, Arca and NYSE American each charge higher rates for such similar connectivity to primary and secondary facilities.[53]

The financials above show that BOX has incurred substantial costs associated with maintaining and enhancing the BOX network. These costs, coupled with BOX's historically low transaction fees, place BOX at a competitive disadvantage against other options exchanges who charge connectivity fees to market participants. BOX has no choice but to begin charging Participants and non-Participants fees for connecting directly to the network which BOX has taken considerable measures to maintain and enhance for the benefit of those Participants and non-Participants in order to remain competitive with the other options exchanges in the industry.

Finally, the Exchange believes redefining the HSVF Connection Fee as a Port Fee is reasonable, equitable and not unfairly discriminatory. This classification is more accurate because an HSVF subscription is not enabled

[44] This cost is represented on the BOX's Financial Statement document under the ''Computer equipment and software and leasehold improvements'' line item. The associated amortization in 2018 was excluded from the indirect depreciation outlined herein.

[45] These costs are included in the ''Professional Services: Technical and Operational'' line item of the Statement of Income of the BOX and Exchange Form 1 documents.

[46] A portion can be tied to the ''Communications and data processing'' line item of the BOX and Exchange Statement of Income. The remaining portion is in the ''Professional Services: Other'' line item of the BOX and the Exchange Statement of Income. Of note, regarding market data connectivity fees, this is the cost associated with BOX consuming connectivity/content from the equities markets in order to operate the Exchange, causing BOX to effectively pay its competitors for this connectivity.

[47] Indirect expenses for connectivity are a portion of the following line items in the BOX and Exchange Form 1 Financial Statements: Employee, facilities, and other, Depreciation and Amortization, Consulting and Financial and Administrative. The Exchange notes that these indirect expenses represent approximately 10% of the total annual expenses for BOX and the Exchange in 2018.

[48] This cost includes employees in network operations, trading operations, development, system operations, business, etc., as well as staff in general corporate departments (such as legal, regulatory, and finance) that support those employees and functions. BOX's employee compensation and benefits expense relating to providing network connectivity services was a portion of the total expense for employee compensation and benefits that is stated in the Employee, facilities, and other line item in the 2018 Financial Statements for BOX and the Exchange.

[49] This cost includes depreciation and amortization of hardware and software used to provide network connectivity services, including equipment, servers, cabling, purchased software and internally developed software used in the production environment to support the provision of network connectivity for trading. BOX's depreciation and amortization expense relating to providing network connectivity services was a portion of the total expense for depreciation and amortization that is stated in the 2018 Financial Statements for BOX and the Exchange.

[50] This cost includes occupancy costs for leased office space for staff that support the provision of network connectivity services. BOX and Exchange's combined occupancy expense relating to providing network connectivity services is a portion of the total expense for occupancy that is stated in the Employee, facilities, and other line item in the 2018 Financial Statements for BOX and the Exchange.

[51] The combined miscellaneous expense relating to trading connectivity and personnel support was a portion of multiple line items in the 2018 Financial Statements for BOX and the Exchange.

[52] *See* Phlx and ISE Rules, General Equity and Options Rules, General 8, Section 1(b). Phlx and ISE each charge a monthly fee of $2,500 for each 1 Gb connection, $10,000 for each 10 Gb connection and $15,000 for each 10 Gb Ultra connection, which the equivalent of the Exchange's 10 Gb ULL connection. *See also* NYSE American Fee Schedule, Section V.B, and Arca Fees and Charges, Co-Location Fees. NYSE American and Arca each charge a monthly fee of $5,000 for each 1 Gb circuit, $14,000 for each 10 Gb circuit and $22,000 for each 10 Gb LX circuit, which the equivalent of the Exchange's 10 Gb ULL connection.

[53] *Id.*

through a physical connection to the Exchange. Although market participant must be credentialed by BOX to receive the HSVF, anyone can become credentialed by submitting the required documentation.[54] The Exchange does not propose to alter the amount of the existing HSVF fee; subscribers to the HSVF will continue to pay $1,500 per month. As with the Connectivity Fees, BOX's HSVF Port Fee is in line with industry practice.[55]

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

Intra-Market Competition

The Exchange does not believe that the proposed rule change would place certain market participants at the Exchange at a relative disadvantage compared to other market participants or affect the ability of such market participants to compete. In particular, the Exchange has received no official complaints from Participants that purchase the Exchange's connectivity that the Exchange's fees or the Proposed Fees are negatively impacting or would negatively impact their abilities to compete with other market participants or that they are placed at a disadvantage.[56] The Exchange believes that the Proposed Fees do not place certain market participants at a relative disadvantage to other market participants because the connectivity pricing is associated with relative usage of the various market participants and does not impose a barrier to entry to smaller participants. As described above, the less expensive non-10 Gb direct connection is generally purchased by market participants that utilize less bandwidth. The market participants that purchase 10 Gb connections utilize the most bandwidth, and those are the participants that consume the most resources from the network. Accordingly, the Proposed Fees do not favor certain categories of market participants in a manner that would impose a burden on competition; rather, the allocation of the Proposed Fees reflect the network resources consumed by the various size of market participants—lowest bandwidth consuming members pay the least, and highest bandwidth consuming members pays the most, particularly since higher bandwidth consumption translates to higher costs to BOX.

Inter-Market Competition

The Exchange believes the Proposed Fees do not place an undue burden on competition on other SROs that is not necessary or appropriate. In particular, options market participants are not forced to connect to (and purchase market data from) all options exchanges, as shown by the number of Participants of BOX as compared to the much greater number of members at other options exchanges (as described above). Not only does BOX have less than half the number of Participants as certain other options exchanges, but there are also a number of the Exchange's Participants that do not connect directly to BOX. Additionally, the Exchange notes other exchanges have similar connectivity alternatives for their participants, including similar low-latency connectivity, but with much higher rates to connect.[57] The Exchange is also unaware of any assertion that its existing fee levels or the Proposed Fees would somehow unduly impair its competition with other options exchanges. To the contrary, if the fees charged are deemed too high by market participants, they can simply disconnect.

Unilateral action by the Exchange in establishing fees for services provided to its Participants and others using its facilities will not have an impact on competition. As a small exchange in the already highly competitive environment for options trading, the Exchange does not have the market power necessary to set prices for services that are unreasonable or unfairly discriminatory in violation of the Exchange Act. The Exchange's proposed fees, as described herein, are comparable to and generally lower than fees charged by other options exchanges for the same or similar services. Lastly, the Exchange believes the proposed change will not impose a burden on intramarket competition as the proposed fees are applicable to all Participants and others using its facilities that connect to BOX.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Exchange Act[58] and Rule 19b–4(f)(2) thereunder,[59] because it establishes or changes a due, or fee.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend the rule change if it appears to the Commission that the action is necessary or appropriate in the public interest, for the protection of investors, or would otherwise further the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–BOX–2020–03 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–BOX–2020–03. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the

[54] *See Trading Interface Specification,* BOX Options, *https://boxoptions.com/technology/trading-interface-specifications/.*

[55] See Cboe Data Services, LLC (CDS) Fee Schedule § VI (charging $500 per month for up to five users to access the Enhanced Controlled Data Distribution Program).

[56] The Exchange notes that it did receive one complaint from a non-Participant third party that, prior to the proposed fees, received connectivity for free and resold it to other market participants. This non-Participant ceased connectivity to the Exchange in January 2019.

[57] *See supra* note 20.

[59] 17 CFR 240.19b–4(f)(2).

Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BOX–2020–03, and should be submitted on or before March 10, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[60]

J. Matthew DeLesDernier,

Assistant Secretary.

[FR Doc. 2020–03091 Filed 2–14–20; 8:45 am]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–88158; File No. SR–CFE–2020–001]

Self-Regulatory Organizations; Cboe Futures Exchange, LLC; Notice of Filing of a Proposed Rule Change Regarding Quoting Functionality

February 11, 2020.

Pursuant to Section 19(b)(7) of the Securities Exchange Act of 1934 (''Act''),[1] notice is hereby given that on January 29, 2020 Cboe Futures Exchange, LLC (''CFE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change described in Items I, II, and III below, which Items have been prepared by CFE. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons. CFE also has filed this proposed rule change with the Commodity Futures Trading Commission (''CFTC''). CFE filed a written certification with the CFTC under Section 5c(c) of the Commodity Exchange Act (''CEA'')[2] on January 29, 2020.

I. Self-Regulatory Organization's Description of the Proposed Rule Change

The Exchange proposes to specify the information that is required to be included within a Bulk Message and within a Quote in connection with the implementation of quoting functionality on CFE's trading system (''CFE System'').

The scope of this filing is limited solely to the application of the rule amendments to security futures that may be traded on CFE. Although no security futures are currently listed for trading on CFE, CFE may list security futures for trading in the future.

CFE is making the rule amendments included in this proposed rule change in conjunction with other rule amendments being made by CFE in connection with its implementation of quoting functionality that are not required to be submitted to the Commission pursuant to Section 19(b)(7) of the Act[3] and thus are not included as part of this rule change.

The rule amendments included as part of this proposed rule change are to apply to all products traded on CFE, including both non-security futures and any security futures that may be listed for trading on CFE. CFE is submitting these rule amendments to the Commission under Section 19(b)(7) of the Act[4] because they relate to reporting requirements that would apply with respect to any security futures that may be traded on CFE.

The text of the proposed rule change is attached as Exhibit 4 to the filing but is not attached to the publication of this notice.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, CFE included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. CFE has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

CFE Trading Privilege Holders (''TPHs'') currently utilize match capacity allocations to submit Orders to the CFE System. These match capacity allocations may be used for the submission of single Orders to the CFE System utilizing either the Financial Information Exchange (''FIX'') or Binary Order Entry (''BOE'') protocol. A single Order refers to an Order that is submitted to the CFE System through a message type that may include one Order in each message. Going forward, these match capacity allocations will be referred to as order match capacity allocations.

In connection with the implementation of quoting functionality on the CFE System, CFE will provide all TPHs with the option to use order match capacity allocations and/or quoting match capacity allocations. A quoting match capacity allocation is an additional type of match capacity allocation that will provide the ability to submit single Orders and Bulk Messages to the CFE System utilizing the BOE protocol. A Bulk Message is a new message type that may be utilized to submit multiple Quotes to the CFE System in a single message. A Quote refers to the entry, modification, or cancellation of a bid or offer for a CFE Contract through a Bulk Message. A Quote will be treated the same as an Order, and the term ''Order'' encompasses a Quote, unless the Exchange rules specify otherwise.

CFE Rule 403 (Order Entry and Maintenance of Front-End Audit Trail Information) currently requires that Orders contain specified information and that Orders that do not contain this information are rejected or canceled back to the sender. CFE is proposing to modify Rule 403 to provide that these existing provisions apply to single Orders, to set forth the information that is required to be included within a Bulk Message and within a Quote, and to provide that Bulk Messages and Quotes that do not contain the required information will be rejected or canceled back to the sender.

Specifically, CFE is proposing to amend Rule 403 in the following ways:

Rule 403(a) currently provides, in pertinent part, that each Order must contain the following information: (i) Whether such Order is a buy or sell Order; (ii) Order type; (iii) price or premium (if the Order is not a Market Order); (iv) quantity; (v) Contract

[60] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(7).

[2] 7 U.S.C. 7a–2(c).

[3] 15 U.S.C. 78s(b)(7).

[4] 15 U.S.C. 78s(b)(7).

identifier or product and contract expiration(s); (vi) Client Order ID; (vii) Executing Firm ID (''EFID''); (viii) Order Entry Operator ID; (ix) Clearing Corporation origin code (C for Customer or F for Firm); (x) Customer Type Indicator code; (xi) manual Order indicator; (xii) account designation (which is the account number of the account of the party for which the Order was placed, except that a different account designation may be included in the case of a bunched Order or in the case of an Order for which there will be a post-trade allocation of the resulting trade(s) to a different clearing member); (xiii) in the case of Orders for Options, either Contract identifier or each of strike price, type of option (put or call) and expiration; and (xiv) such additional information as may be prescribed from time to time by the Exchange. CFE is proposing to move the above provisions from current Rule 403(a) to new Rule 403(b) and to provide in new Rule 403(b) that the above provisions will apply to single Orders.

CFE is proposing to add new Rule 403(c) to provide that each Bulk Message must contain the following information: (i) Quote Update ID; (ii) EFID; (iii) Order Entry Operator ID; (iv) Clearing Corporation origin code (C for Customer or F for Firm); (iv) Customer Type Indicator code; (v) manual Order indicator; (vi) account designation (which shall be the account number of the account of the party for which the Quotes in the Bulk Message were placed, except that a different account designation may be included in the case of a Quote that is a bunched Order or in the case of a Quote for which there will be a post-trade allocation of the resulting trade(s) to a different clearing member); (vii) at least one Quote; and (vii) such additional information as may be prescribed from time to time by the Exchange.

CFE is proposing to add new Rule 403(d) to provide that each Quote must contain the following information: (i) Whether the Quote is to buy or sell; (ii) price or premium; (iii) quantity; (iv) Contract identifier; and (v) such additional information as may be prescribed from time to time by the Exchange.

Rule 403(a) currently provides that any Order that does not contain required information in a form and manner prescribed by the Exchange will be rejected or canceled back to the sender by the CFE System. CFE is proposing to delete that provision from Rule 403(a) and to add an equivalent provision to new Rule 403(e) that will apply to single Orders, Bulk Messages, and Quotes. Specifically, CFE proposes that new Rule 403(e) provide that any single Order, Bulk Message, or Quote that does not contain required information in a form and manner prescribed by the Exchange will be rejected or canceled back to the sender by the CFE System.

Finally, CFE is proposing to change the paragraph lettering of current Rule 403(b) to Rule 403(f) and to change the paragraph lettering of current Rule 403(c) to Rule 403(g) without changing the text of either provision.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[5] in general, and furthers the objectives of Sections 6(b)(1)[6] and 6(b)(5)[7] in particular in that it is designed:

- To enable the Exchange to enforce compliance by its TPHs and persons associated with its TPHs with the provisions of the rules of the Exchange,
- to prevent fraudulent and manipulative acts and practices,
- to promote just and equitable principles of trade,
- to foster cooperation and coordination with persons engaged in facilitating transactions in securities,
- to remove impediments to and perfect the mechanism of a free and open market and a national market system,
- and in general, to protect investors and the public interest.

The Exchange believes that the proposed rule change serves to enhance CFE's market by contributing to CFE's ability to implement quoting functionality by requiring the provision of information that the CFE System needs in order to process Bulk Messages and Quotes submitted through that quoting functionality.

The Exchange also believes that the proposed rule change serves to strengthen CFE's ability to carry out its responsibilities as a self-regulatory organization. First, the proposed rule change provides guidance to TPHs regarding the type of information that must be included within Bulk Messages and Quotes. Second, the proposed rule change contributes to enhancing the effectiveness of CFE's audit trail program by helping to assure that required information is included within Bulk Messages and Quotes. Third, the proposed rule change furthers CFE's ability to enforce compliance with CFE rules since the Exchange plans to utilize this audit trail information in connection with its surveillance of CFE's market and in connection with reviewing trading activity on CFE's market for rule compliance.

B. Self-Regulatory Organization's Statement on Burden on Competition

CFE does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act, in that the proposed rule change will enhance CFE's ability to carry out its responsibilities as a self-regulatory organization. The Exchange believes that the proposed rule change is equitable and not unfairly discriminatory in that the rule amendments included in the proposed rule change would apply equally to all TPHs.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The proposed rule change will become operative on February 12, 2020. At any time within 60 days of the date of effectiveness of the proposed rule change, the Commission, after consultation with the CFTC, may summarily abrogate the proposed rule change and require that the proposed rule change be refiled in accordance with the provisions of Section 19(b)(1) of the Act.[8]

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–CFE–2020–001 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange

[8] 15 U.S.C. 78s(b)(1).

Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–CFE–2020–001. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–CFE–2020–001, and should be submitted on or before March 10, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[9]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–88162; File No. SR–NSCC–2019–801]

Self-Regulatory Organizations; National Securities Clearing Corporation; Notice of No Objection To Advance Notice To Enhance National Securities Clearing Corporation's Haircut-Based Volatility Charge Applicable to Municipal Bonds

February 11, 2020.

On December 13, 2019, National Securities Clearing Corporation (''NSCC'') filed with the Securities and Exchange Commission (''Commission'') advance notice SR–NSCC–2019–801 (''Advance Notice'') pursuant to Section 806(e)(1) of Title VIII of the Dodd-Frank Wall Street Reform and Consumer Protection Act, entitled Payment, Clearing and Settlement Supervision Act of 2010 (''Clearing Supervision Act'') [1] and Rule 19b–4(n)(1)(i) [2] under the Securities Exchange Act of 1934 (''Exchange Act'' [3] to revise NSCC's methodology for calculating margin amounts applicable to municipal bonds. The Advance Notice was published for public comment in the **Federal Register** on January 14, 2020,[4] and the Commission has received no comments regarding the changes proposed in the Advance Notice.[5] This publication serves as notice of no objection to the Advance Notice.

I. The Advance Notice

The proposals reflected in the Advance Notice would revise NSCC's Rules and Procedures (''Rules'') [6] to change the methodology NSCC uses for calculating the haircut-based margin charge applicable to municipal bonds.

A. Background

NSCC provides clearing, settlement, risk management, central counterparty services, and a guarantee of completion for virtually all broker-to-broker trades involving equity securities, corporate and municipal debt securities, and certain other securities. NSCC manages its credit exposure to its members by determining an appropriate Required Fund Deposit (*i.e.,* margin) for each member.[7] The aggregate of all NSCC members' Required Fund Deposits (together with certain other deposits required under the Rules) constitute NSCC's Clearing Fund, which NSCC would access should a defaulting member's own Required Fund Deposit be insufficient to satisfy losses to NSCC caused by the liquidation of the defaulting member's portfolio.[8] NSCC collects each member's Required Fund Deposit to mitigate potential losses to NSCC associated with the liquidation of the member's portfolio in the event of the member's default.[9]

Each member's Required Fund Deposit consists of a number of applicable components, which are calculated to address specific risks that the member's portfolio presents to NSCC.[10] Generally, the largest component of a member's Required Fund Deposit is the volatility component.[11] The volatility component is designed to calculate the potential losses on a portfolio over a given period of time assumed necessary to liquidate the portfolio, within a 99% confidence level.

The methodology for calculating the volatility component of the Required Fund Deposit depends on the type of security.[12] Specifically, for certain

[2] 17 CFR 240.19b–4(n)(1)(i).

[3] 15 U.S.C. 78a *et seq.*

[4] Securities Exchange Act Release No. 87911 (January 8, 2020), 85 FR 2197 (January 14, 2020) (File No. SR–NSCC–2019–801) (''Notice of Filing''). On December 13, 2019, NSCC also filed a related proposed rule change (SR–NSCC–2019–004) with the Commission pursuant to Section 19(b)(1) of the Exchange Act and Rule 19b–4 thereunder (''Proposed Rule Change''). *See* 15 U.S.C. 78s(b)(1) and 17 CFR 240.19b–4 respectively. In the Proposed Rule Change, which was published in the **Federal Register** on January 2, 2020, NSCC seeks approval of proposed changes to its rules necessary to implement the Advance Notice. Securities Exchange Act Release No. 87858 (December 26, 2019), 85 FR 149 (January 2, 2020). The comment period for the related Proposed Rule Change filing closed on January 23, 2020, and the Commission received no comments.

[5] As the proposal contained in the Advance Notice was also filed as a proposed rule change, all public comments received on the proposal are considered regardless of whether the comments are submitted on the proposed rule change or the Advance Notice.

[6] Capitalized terms not defined herein are defined in the Rules, *available at http://dtcc.com/~/media/Files/Downloads/legal/rules/nscc_rules.pdf.*

[7] *See* Rule 4 (Clearing Fund) and Procedure XV (Clearing Fund Formula and Other Matters) of the Rules (''Procedure XV''), *supra* note 6.

[8] *See id.*

[9] The Rules identify when NSCC may cease to act for a member and the types of actions NSCC may take. For example, NSCC may suspend a firm's membership with NSCC or prohibit or limit a member's access to NSCC's services in the event that member defaults on a financial or other obligation to NSCC. *See* Rule 46 (Restrictions on Access to Services) of the Rules, *supra* note 6.

[10] Procedure XV, *supra* note 6.

[11] *See id.*

[12] For most securities (*e.g.,* equity securities), NSCC calculates the volatility component as the greater of (1) the larger of two separate calculations that utilize a parametric Value at Risk (''VaR'') model, (2) a gap risk measure calculation based on the largest non-index position in a portfolio that exceeds a concentration threshold, which addresses concentration risk that can be present in a member's portfolio, and (3) a portfolio margin floor calculation based on the market values of the long

securities, including municipal bonds, NSCC calculates a haircut-based volatility component by multiplying the absolute value of a member's positions in such securities by a certain percentage designated by NSCC.[13]

NSCC's current methodology for designating the percentages used in calculating the haircut-based volatility component for municipal bonds involves distinguishing between municipal bonds based on tenor (*i.e.,* remaining time to maturity), municipal sector (*e.g.,* general obligation, transportation, healthcare, etc.), and credit rating.[14] Pursuant to that methodology, NSCC assigns each tenor-based group a percentage.[15] For municipal bonds rated higher than BBB+, the tenor-based percentage is the percentage NSCC uses to calculate the haircut-based volatility component.[16] However, for municipal bonds rated BBB+ or lower, NSCC multiplies the tenor-based percentage by a sector-based risk factor, resulting in a larger percentage for the haircut.[17] The additional sector-based risk factors account for the variable risks between municipal sectors associated with the various industries in which the bonds are issued and the sources of bond repayment.[18]

In all cases, the percentage used to calculate the municipal bond haircut-based volatility component is not less than 2%, regardless of a municipal bond's credit rating.[19]

B. New Changes to NSCC's Methodology for Calculating Municipal Bond Haircut Percentages

NSCC states that it regularly assesses its margining methodologies to evaluate whether margin levels are commensurate with the particular risk attributes of the various products, portfolios, and markets that NSCC serves.[20] NSCC further states that based on recent impact studies, the margin levels generated from municipal bonds using the current methodology exceed the levels necessary to mitigate the risk associated with those securities.[21] In the Advance Notice, NSCC proposes to change the methodology for calculating the municipal bond haircut-based volatility component so that the amount of margin NSCC collects is more commensurate with the risk attributes of those securities.

As proposed in the Advance Notice, NSCC would retain the current provision that in all cases the percentage used to calculate the municipal bond haircut-based volatility component is not less than 2%, regardless of a municipal bond's credit rating. NSCC would also continue to distinguish between municipal bonds based on tenor, credit rating, and municipal sector. However, NSCC would calculate the haircut percentages for various groups of municipal bonds based on the historical returns of one or more benchmark indices over a look-back period not shorter than 10 years, using a minimum 99% calibration percentile.

The proposal would change the manner in which NSCC addresses the risk presented by lower-rated municipal bonds. Instead of the current methodology's approach which applies a sector-based straight risk factor to the tenor-based haircut, resulting in a larger haircut percentage, the proposed approach would allow the calculation to be more precisely tailored to the risks presented by particular municipal bonds. Specifically, the new approach would base the haircut percentage on the historical returns of one or more benchmark indices, such as tenor-based indices, municipal bond sector-based indices, and high-yield indices, over a look-back period of at least ten years and would no longer use a sector-based straight risk factor for lower-rated municipal bonds. This approach should allow NSCC to more accurately calculate margin amounts appropriate for the risks presented by such municipal bonds by allowing NSCC to take into account a broader range of risk characteristics associated with municipal bonds. NSCC notes that, based on recent impact studies comparing the current and proposed methodologies, the proposed methodology would manage NSCC's applicable risks well above the 99% confidence level, although it would generate lower overall margin amounts.[22]

Under the proposal in the Advance Notice, NSCC states that for municipal bonds rated higher than BBB+, NSCC would use a tenor-based index as the applicable benchmark index.[23] Specifically, NSCC would use the percentage derived from the tenor-based index as the haircut for the purpose of calculating the volatility component for municipal bonds rated higher than BBB+.[24] For municipal bonds rated BBB+ or lower (or not rated), NSCC states that it would use a percentage that is the highest of: (1) The applicable tenor-based index, (2) municipal bond sector-based indices, and (3) a high-yield index. [25] For all municipal bonds, when deriving the haircut percentage from the applicable indices, NSCC would use a look-back period of a 10 year rolling window plus a 1-year ''worst case scenario'' stress period.[26] NSCC would identify the largest 3-day price return movement (reflected as a percentage) within the 99th percentile of all 3-day price return movements during the look-back period. Additionally, NSCC proposes to re-calibrate the municipal bond haircut percentages no less frequently than annually.

As proposed in the Advance Notice, NSCC would have the ability to modify certain aspects of the application of the proposed methodology consistent with NSCC's applicable governance procedures and based on NSCC's determination that such modifications are necessary to manage the applicable risks above the 99% confidence level. Specifically, based on NSCC's regular review of its margin methodologies, NSCC would be able to modify: The frequency of re-calibrating the municipal bond haircut percentages; applicable benchmark indices and the applicable period for the price return

and short positions in the portfolio, which addresses risks that might not be adequately addressed with the other volatility component calculations. *See id.; see also* Securities Exchange Act Release No. 82780 (February 26, 2018), 83 FR 9035 (March 2, 2018) (File No. SR–NSCC–2017–808); Securities Exchange Act Release No. 82781 (February 26, 2018), 83 FR 9042 (March 2, 2018) (File No. SR–NSCC–2017–020).

[13] Procedure XV, *supra* note 6.

[14] Notice of Filing, *supra* note 4 at 2198.

[15] *See id.*

[16] For example, a $10MM short position in a municipal bond rated above BBB+ with 3 years to maturity is subject to the 2–5 years tenor-based group haircut of 5%, which applies to the absolute market value of the positions, resulting in a haircut-based volatility component of $500,000. Notice of Filing, *supra* note 4 at 2198.

[17] For example, a $10MM short position in a healthcare sector municipal bond rated BBB+ or lower with 3 years to maturity is subject to the 2–5 years tenor-based group haircut (5%) multiplied by the sector-based factor of 1.2, resulting in a 6% haircut-based volatility component of $600,000. Notice of Filing, *supra* note 4 at 2198.

[18] *See id.*

[19] Procedure XV, *supra* note 6.

[20] Notice of Filing, *supra* note 4 at 2198.

[21] As part of the Advance Notice, NSCC filed Exhibit 3—NSCC Impact Studies, comparing the current and proposed methodologies. Pursuant to 17 CFR 240.24b–2, NSCC requested confidential treatment of Exhibit 3.

[22] Notice of Filing, *supra* note 4 at 2199.

[23] *Id.*

[24] *Id.*

[25] *Id.*

[26] NSCC believes that a 10-year window plus 1-year stress period would capture relevant data and cover sufficient market data without diluting the ''tail'' with an abundance of data. NSCC believes this look-back period is typically long enough to capture at least two recent market cycles, whereas a longer look-back period might ''flatten'' out the results because recent volatile periods might be offset by non-volatile periods, making the more recent volatility appear less significant. Notice of Filing, *supra* note 4 at 2199.

used in the calculations; and the look-back period. NSCC states that any such modifications would be subject to the governance procedures applicable to all of NSCC's margin methodologies, as set forth in NSCC's Clearing Agency Model Risk Management Framework, which the Commission has approved.[27]

Finally, NSCC proposes a method to address extraordinary circumstances in which a certain municipality or issuer may present unique risks not otherwise captured by the proposed methodology's use of a percentage derived from the maximum of the applicable tenor-based index, municipal bond sector-based indices, and high-yield indices.[28] In such scenarios, NSCC proposes to have the ability to use the highest percentage generated for any municipal bond group when calculating the haircut-based volatility component for municipal bonds issued by the municipality or issuer presenting such unique risks.

II. Discussion and Commission Findings

Although the Clearing Supervision Act does not specify a standard of review for an advance notice, the stated purpose of the Clearing Supervision Act is instructive: to mitigate systemic risk in the financial system and promote financial stability by, among other things, promoting uniform risk management standards for SIFMUs and strengthening the liquidity of SIFMUs.[29]

Section 805(a)(2) of the Clearing Supervision Act authorizes the Commission to prescribe regulations containing risk management standards for the payment, clearing, and settlement activities of designated clearing entities engaged in designated activities for which the Commission is the supervisory agency.[30] Section 805(b) of the Clearing Supervision Act provides the following objectives and principles for the Commission's risk management standards prescribed under Section 805(a):[31]

- To promote robust risk management;
- to promote safety and soundness;
- to reduce systemic risks; and
- to support the stability of the broader financial system.

Section 805(c) provides, in addition, that the Commission's risk management standards may address such areas as risk management and default policies and procedures, among others areas.[32]

The Commission has adopted risk management standards under Section 805(a)(2) of the Clearing Supervision Act and Section 17A of the Exchange Act (the ''Clearing Agency Rules'').[33] The Clearing Agency Rules require, among other things, each covered clearing agency to establish, implement, maintain, and enforce written policies and procedures that are reasonably designed to meet certain minimum requirements for its operations and risk management practices on an ongoing basis.[34] As such, it is appropriate for the Commission to review advance notices against the Clearing Agency Rules and the objectives and principles of these risk management standards as described in Section 805(b) of the Clearing Supervision Act. As discussed below, the Commission believes the proposal in the Advance Notice is consistent with the objectives and principles described in Section 805(b) of the Clearing Supervision Act,[35] and in the Clearing Agency Rules, in particular Rules 17Ad–22(e)(4) and (e)(6).[36]

A. Consistency With Section 805(b) of the Clearing Supervision Act

The Commission believes that the Advance Notice is consistent with the stated objectives and principles of Section 805(b) of the Clearing Supervision Act.

As described above in Section I.A., NSCC's current methodology calculates municipal bond haircut percentages using tenor-based percentages and sector-based risk factors. NSCC states that the current methodology generates margin amounts greater than necessary to mitigate NSCC's risks associated with municipal bonds. NSCC proposes to replace the current methodology with one that would calculate the haircut percentages based on the historical returns of one or more benchmark indices over a look-back period of not shorter than 10 years, using a minimum 99% calibration percentile. These changes would result in margin amounts that are more commensurate with the risk attributes of municipal bonds, while still managing NSCC's applicable risks well above the 99% confidence level.[37] Accordingly, the Commission believes that the proposed methodology for calculating municipal bond haircut percentages would be consistent with promoting robust risk management because the proposed methodology would enable NSCC to more precisely manage the relevant risks than the current methodology.

Further, by helping to ensure that NSCC collects margin amounts sufficient to manage NSCC's risks associated with municipal bonds, the proposed methodology would help limit NSCC's exposure in the event of a default of a member with positions in municipal bonds. Accordingly, the Commission believes that the proposed methodology would be consistent with promoting safety and soundness at NSCC.

Finally, as noted above, NSCC states that based on recent impact studies, while the proposed methodology would fully manage NSCC's applicable risks well above the 99% confidence level, it would reduce margin requirements for every NSCC member holding positions in municipal bonds.[38] The changes proposed in the Advance Notice would therefore result in lower capital demands on such members, who could benefit from having the ability to use their liquid resources for other purposes, including handling market stress events, which could, in turn, have beneficial implications for the stability of the broader financial system. Accordingly, the Division believes that the proposed methodology would be consistent with supporting the stability of the financial system and reducing systemic risks.

As described above in Section I.B., NSCC proposes to re-calibrate the municipal bond haircut percentages no less frequently than annually. Regular re-calibration of the municipal bond haircut percentages is necessary to ensure that the relevant calculations and resulting margin levels take into account any changes over time to the risk attributes of municipal bonds. The Commission believes that the proposal to re-calibrate the municipal bond haircut percentages no less frequently than annually would be consistent with robust risk management because it

[27] *Id.; See also* Securities Exchange Act Release No. 81485 (August 25, 2017), 82 FR 41433 (August 31, 2017) (File No. SR–NSCC–2017–008); Securities Exchange Act Release No. 84458 (October 19, 2018), 83 FR 53925 (October 25, 2018) (File No. SR–NSCC–2018–009).

[28] For example, the market price risk for issues of a municipality facing technical default following a natural disaster may not be fully captured by the proposed methodology due to the liquidity profile of municipal securities.

[33] 17 CFR 240.17Ad–22. *See* Securities Exchange Act Release No. 68080 (October 22, 2012), 77 FR 66220 (November 2, 2012) (S7–08–11). *See also* Securities Exchange Act Release No. 78961 (September 28, 2016), 81 FR 70786 (October 13, 2016) (S7–03–14) (''Covered Clearing Agency Standards''). The Commission established an effective date of December 12, 2016 and a compliance date of April 11, 2017 for the Covered Clearing Agency Standards. NSCC is a ''covered clearing agency'' as defined in Rule 17Ad–22(a)(5).

[34] 17 CFR 240.17Ad–22.

[35] 12 U.S.C. 5464(b).

[36] 17 CFR 240.17Ad–22(e)(4) and (e)(6).

[38] *Id.;* Proposed Rule Change, *supra* note 4 at 154.

would require NSCC to regularly review the municipal bond haircut percentages to ensure that margin levels remain commensurate with the particular risk attributes of municipal bonds. Additionally, by helping to ensure that NSCC continues to collect margin amounts sufficient to manage the risks associated with municipal bonds, NSCC's proposal to re-calibrate the municipal bond haircut percentages no less frequently than annually would help limit NSCC's exposure in the event of a default of a member with positions in municipal bonds. Accordingly, the Commission believes that NSCC's proposal to re-calibrate the municipal bond haircut percentages no less frequently than annually would be consistent with promoting safety and soundness at NSCC, which in turn would support the stability of the broader financial system and reduce systemic risks.

As described above in Section I.B., a certain municipality or issuer may present unique risks to NSCC not otherwise captured by the proposed methodology's use of a percentage derived from the maximum of the applicable tenor-based index, municipal bond sector-based indices, and high-yield indices. In such scenarios, NSCC proposes to have the ability to use the highest percentage generated for any municipal bond group when calculating the haircut-based volatility component for municipal bonds issued by the municipality or issuer presenting such unique risks. The Commission believes the proposed discretion allowing NSCC to apply the highest percentage to municipal bonds issued by a municipality or issuer presenting unique risks would be consistent with robust risk management by helping to ensure that NSCC collects sufficient margin amounts with respect to such securities. Additionally, by helping to ensure that NSCC collects sufficient margin amounts with respect to municipal bonds issued by a municipality or issuer presenting such unique risks, the proposed discretion could help limit NSCC's exposure in the event of a default of a member with positions in such municipal bonds. Accordingly, the Commission believes that the proposed discretion allowing NSCC to apply the highest percentage to municipal bonds issued by a municipality or issuer presenting unique risks would be consistent with promoting safety and soundness at NSCC, which in turn would support the stability of the broader financial system and reduce systemic risks.

B. Consistency With Rule 17Ad–22(e)(4)(i)

Rule 17Ad–22(e)(4)(i) requires that NSCC establish, implement, maintain and enforce written policies and procedures reasonably designed to effectively identify, measure, monitor, and manage its credit exposures to participants and those arising from its payment, clearing, and settlement processes, including by maintaining sufficient financial resources to cover its credit exposure to each participant fully with a high degree of confidence.[39]

As described above in Section I.B., NSCC proposes to replace the current methodology for calculating municipal bond haircut percentages with a methodology that would utilize the historical returns of one or more benchmark indices over a look-back period of not shorter than 10 years, using a minimum 99% calibration percentile. These changes would result in more precisely determined margin amounts, while still managing NSCC's applicable risks well above the 99% confidence level.[40] Accordingly, the Commission believes that the proposed methodology is consistent with Rule 17Ad–22(e)(4)(i) because it should enable NSCC to effectively identify, measure, monitor, and manage its credit exposures to members with positions in municipal bonds, including by maintaining sufficient financial resources to cover NSCC's credit exposure to such members fully with a high degree of confidence.[41]

As described above in Section I.B., NSCC proposes to re-calibrate the municipal bond haircut percentages no less frequently than annually. The proposal would require NSCC to regularly review the municipal bond haircut percentages, thereby helping to ensure that the haircut percentages and resulting margin levels take into account any changes over time to the risk attributes of municipal bonds. Accordingly, the Commission believes that the proposal to re-calibrate the municipal bond haircut percentages no less frequently than annually is consistent with Rule 17Ad–22(e)(4)(i) because it should allow NSCC to effectively identify, measure, monitor, and manage its credit exposures to members with positions in municipal bonds, including by maintaining sufficient financial resources to cover NSCC's credit exposure to such members fully with a high degree of confidence.[42]

As described above in Section I.B., NSCC proposes to have the ability to use the highest percentage generated for any municipal bond group when calculating the haircut-based volatility component for municipal bonds issued by a municipality or issuer presenting unique risks not otherwise captured by the calculations in the proposed methodology. Such discretion should help ensure that NSCC collects sufficient margin amounts with respect to those securities. Accordingly, the Commission believes that the proposed ability to apply the highest percentage to such municipal bonds is consistent with Rule 17Ad–22(e)(4)(i) because it should better enable NSCC to effectively identify, measure, monitor, and manage its credit exposures to members with positions in such municipal bonds, including by maintaining sufficient financial resources to cover NSCC's credit exposure to such members fully with a high degree of confidence.[43]

C. Consistency With Rules 17Ad–22(e)(6)(i) and (v)

Rule 17Ad–22(e)(6)(i) requires that NSCC establish, implement, maintain and enforce written policies and procedures reasonably designed to cover its credit exposures to its participants by establishing a risk-based margin system that, at a minimum, considers, and produces margin levels commensurate with, the risks and particular attributes of each relevant product, portfolio, and market.[44] Rule 17Ad–22(e)(6)(v) requires that NSCC establish, implement, maintain and enforce written policies and procedures reasonably designed to cover its credit exposures to its participants by establishing a risk-based margin system that, at a minimum, uses an appropriate method for measuring credit exposure that accounts for relevant product risk factors and portfolio effects across products.[45]

As described above in Section I.B., NSCC proposes to replace the current methodology for calculating municipal bond haircut percentages with a methodology that would utilize the historical returns of one or more benchmark indices over a look-back period of not shorter than 10 years, using a minimum 99% calibration percentile. NSCC designed the proposed methodology to generate margin amounts that are more commensurate with the risk attributes of municipal bonds than the current methodology. Accordingly, the Commission believes

[39] 17 CFR 240.17Ad–22(e)(4)(i).

[40] Notice of Filing, *supra* note 4 at 2199.

[41] *Id.*

[42] *Id.*

[43] *Id.*

[44] 17 CFR 240.17Ad–22(e)(6)(i).

[45] 17 CFR 240.17Ad–22(e)(6)(v).

that the proposed methodology is consistent with Rules 17Ad–22(e)(6)(i) and (v) because it is designed to establish a risk-based margin system that (1) considers and produces relevant margin levels commensurate with the risks and particular attributes of municipal bonds, and (2) uses an appropriate method for measuring credit exposure that accounts for municipal bond risk factors and portfolio effects.[46]

As described above in Section I.B., NSCC proposes to re-calibrate the municipal bond haircut percentages no less frequently than annually. The proposal would require NSCC to regularly review the municipal bond haircut percentages, thereby helping to ensure that the haircut percentages and resulting margin levels take into account any changes over time to the risk attributes of municipal bonds. Accordingly, the Commission believes that the proposal to re-calibrate the municipal bond haircut percentages no less frequently than annually is consistent with Rules 17Ad–22(e)(6)(i) and (v) because it would contribute to a risk-based margin system designed to (1) consider and produce relevant margin levels commensurate with the risks and particular attributes of municipal bonds, and (2) use an appropriate method for measuring credit exposure that accounts for municipal bond risk factors and portfolio effects.[47]

As described above in Section I.B., NSCC proposes to have the ability to use the highest percentage generated for any municipal bond group when calculating the haircut-based volatility component for municipal bonds issued by a municipality or issuer presenting unique risks not otherwise captured by the calculations in the proposed methodology. This discretion should help ensure that NSCC collects sufficient margin amounts with respect to those securities. Accordingly, the Commission believes that the proposed discretion to apply the highest percentage to such municipal bonds is consistent with Rules 17Ad–22(e)(6)(i) and (v) because it would contribute to a risk-based margin system designed to (1) consider and produce relevant margin levels commensurate with the risks and particular attributes of municipal bonds, and (2) use an appropriate method for measuring credit exposure that accounts for municipal bond risk factors and portfolio effects.[48]

[46] 17 CFR 240.17Ad–22(e)(6)(i) and (v).

[47] *Id.*

[48] 17 CFR 240.17Ad–22(e)(6)(i) and (v).

III. Conclusion

It is therefore noticed, pursuant to Section 806(e)(1)(I) of the Clearing Supervision Act, that the Commission *does not object* to Advance Notice (SR–NSCC–2019–801) and that NSCC is *authorized* to implement the proposed change as of the date of this notice or the date of an order by the Commission approving proposed rule change SR–NSCC–2019–004, whichever is later.

By the Commission.

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–88165; File No. SR–NYSE–2020–08]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Its Price List

February 11, 2020.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the ''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on January 31, 2020, New York Stock Exchange LLC (''NYSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its Price List to eliminate the Step Up Tier 2 Adding Credit. The Exchange proposes to implement the fee changes effective February 3, 2020. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Price List to eliminate the Step Up Tier 2 Adding Credit.

The proposed change responds to the current competitive environment where order flow providers have a choice of where to direct liquidity-providing orders by offering further incentives for member organizations to send additional displayed liquidity to the Exchange.

The Exchange proposes to implement the fee changes effective February 3, 2020.

Competitive Environment

The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [4]

As the Commission itself recognized, the market for trading services in NMS stocks has become ''more fragmented and competitive.'' [5] Indeed, equity trading is currently dispersed across 13 exchanges,[6] 31 alternative trading

[5] *See* Securities Exchange Act Release No. 51808, 84 FR 5202, 5253 (February 20, 2019) (File No. S7–05–18) (Transaction Fee Pilot for NMS Stocks Final Rule) (''Transaction Fee Pilot'').

[6] *See* Cboe Global Markets, U.S. Equities Market Volume Summary, available at *http://markets.cboe.com/us/equities/market_share/. See*

systems,[7] and numerous broker-dealer internalizers and wholesalers, all competing for order flow. Based on publicly-available information, no single exchange has more than 18% market share (whether including or excluding auction volume).[8] Therefore, no exchange possesses significant pricing power in the execution of equity order flow. More specifically, the Exchange's market share of trading in Tapes A, B and C securities combined is less than 15%.

The Exchange believes that the ever-shifting market share among the exchanges from month to month demonstrates that market participants can move order flow, or discontinue or reduce use of certain categories of products, in response to fee changes. With respect to non-marketable order flow that would provide displayed liquidity on an Exchange, member organizations can choose from any one of the 13 currently operating registered exchanges to route such order flow. Accordingly, competitive forces constrain exchange transaction fees that relate to orders that would provide liquidity on an exchange.

In response to this competitive environment, the Exchange has established incentives for its member organizations who submit orders that provide liquidity on the Exchange. The proposed fee change is designed to eliminate a pricing tier intended to incentivize member organizations to step up their liquidity-providing orders on the Exchange on all tapes that has not encouraged member organizations to increase their activity on the Exchange.

Proposed Rule Change

Under the current Step Up Tier 2 Adding Credit, a member organization that sends orders, except Mid-Point Liquidity Orders (''MPL'') and Non-Displayed Limit Orders, that add liquidity (''Adding ADV'') in Tape A securities would receive a credit of $0.0029 if:

- The member organization quotes at least 15% of the National Best Bid or Offer (''NBBO'') in 300 or more Tape A securities on a monthly basis, and
- the member organization's Adding ADV as a percentage of NYSE consolidated average daily volume (''CADV''), excluding any orders by a Designated Market Maker (''DMM''), that is at least two times more than the member organization's July 2019 Adding ADV as a percentage of NYSE CADV, and
- the member organization's Adding ADV as a percentage of NYSE CADV, excluding any liquidity added by a DMM, exceeds that member organization's Adding ADV in July 2019 taken as a percentage of NYSE CADV by at least 1.05% of NYSE CADV over that Member Organization's July 2019 Adding ADV as a percentage of NYSE CADV.

In addition, a member organization that meets these requirements, and thus qualifies for the $0.0029 credit in Tape A securities, would be eligible to receive an additional $0.00005 per share if trades in Tapes B and C securities against the member organization's orders that add liquidity, excluding orders as a Supplemental Liquidity Provider (''SLP''), equal to at least 0.20% of Tape B and Tape C CADV combined.

The Exchange proposes to eliminate this tier in its entirety. Current Step Up Tier 3 Adding Credit would become the new Step Up Tier 2 Adding Credit. The requirements for qualifying for the current Step Up Tier 3 Adding Credit would remain unchanged.

The Exchange proposes eliminating the tier because it has not encouraged member organizations to increase their activity in order to qualify for the tier as significantly as the Exchange had anticipated. The Exchange does not know how much order flow member organizations choose to route to other exchanges or to off-exchange venues. The Exchange has nonetheless observed that, historically, few members have received this credit, with little associated volume, and it has not served to meaningfully increase activity on the Exchange or improve market quality. Indeed, no member organization currently qualifies for the credit. The Exchange therefore proposes to eliminate it.

The proposed change is not otherwise intended to address other issues, and the Exchange is not aware of any significant problems that market participants would have in complying with the proposed changes.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[9] in general, and furthers the objectives of Sections 6(b)(4) and (5) of the Act,[10] in particular, because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The Proposed Change is Reasonable

As discussed above, the Exchange operates in a highly fragmented and competitive market. The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [11]

The Exchange believes that the ever-shifting market share among the exchanges from month to month demonstrates that market participants can move order flow, or discontinue or reduce use of certain categories of products, in response to fee changes. With respect to non-marketable orders which provide liquidity on an Exchange, member organizations can choose from any one of the 13 currently operating registered exchanges to route such order flow. Accordingly, competitive forces constrain exchange transaction fees that relate to orders that would provide displayed liquidity on an exchange. Stated otherwise, changes to exchange transaction fees can have a direct effect on the ability of an exchange to compete for order flow.

Given the competitive environment, the proposal to eliminate the Step Up Tier 2 Adding Credit is reasonable. Currently, no member organization qualifies for the credit. Member organizations have not increased their activity significantly as the Exchange anticipated they would in order to qualify for the credit, related volume is low, and it has not served to meaningfully increase volume or market quality.

The Proposal is an Equitable Allocation of Fees

The Exchange believes the proposal equitably allocates its fees among its market participants by fostering

generally https://www.sec.gov/fast-answers/divisionsmarketregmrexchangesshtml.html.

[7] *See* FINRA ATS Transparency Data, *available at https://otctransparency.finra.org/otctransparency/AtsIssueData.* A list of alternative trading systems registered with the Commission is *available at https://www.sec.gov/foia/docs/atslist.htm.*

[10] 15 U.S.C. 78f(b)(4) & (5).

[11] *See* Regulation NMS, 70 FR at 37499.

liquidity provision and stability in the marketplace.

The Exchange believes that eliminating the step up tier constitutes an equitable allocation of fees because it would apply equally to all similarly situated member organizations that submit orders to the NYSE, and that all such member organizations would continue to be subject to the same fee structure, and access to the Exchange's market would continue to be offered on fair and nondiscriminatory terms. As noted, the credit has not prompted a meaningful increase in volume or market quality. No member organization currently qualifies for the credit, and no member organization would accordingly be affected by its elimination.

The Proposal Is Not Unfairly Discriminatory

The Exchange believes that the proposal is not unfairly discriminatory. In the prevailing competitive environment, member organizations are free to disfavor the Exchange's pricing if they believe that alternatives offer them better value.

The proposal is not unfairly discriminatory because it neither targets nor will it have a disparate impact on any particular category of market participant. The proposal does not permit unfair discrimination because elimination of the tier would apply to all similarly situated member organizations and other market participants, who would all be eligible for the remaining step up credits on an equal basis. As noted, no member organization currently qualifies for the credit and thus no member organizations operating on the Exchange would be disadvantaged by its elimination. In addition, elimination of the credit would allow the Exchange to consider new, more effective incentives to attract order flow to the Exchange.

Finally, the Exchange believes that it is subject to significant competitive forces, as described below in the Exchange's statement regarding the burden on competition.

For the foregoing reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[12] the Exchange believes that the proposed rule change would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Instead, as discussed above, the Exchange believes that the proposed changes would encourage the submission of additional liquidity to a public exchange, thereby promoting market depth, price discovery and transparency and enhancing order execution opportunities for member organizations. As a result, the Exchange believes that the proposed change furthers the Commission's goal in adopting Regulation NMS of fostering integrated competition among orders, which promotes ''more efficient pricing of individual stocks for all types of orders, large and small.'' [13]

Intramarket Competition. The Exchange believes that the proposed elimination of the step up credit will not place any undue burden on competition. The credit has not served its intended purpose of incentivizing a broader population of member organizations to increase their participation on the Exchange. Elimination of the credit would impact no member organizations because no member organization currently qualifies for it. Moreover, member organizations may seek to mitigate the effects of the loss of the credit by qualifying for the remaining step up credits the Exchange offers that would remain available to all market participants. Accordingly, the proposed change would not impose a disparate burden on competition among market participants on the Exchange.

Intermarket Competition. The Exchange operates in a highly competitive market in which market participants can readily choose to send their orders to other exchange and off-exchange venues if they deem fee levels at those other venues to be more favorable. As previously noted, the Exchange's market share of trading in Tapes A, B and C securities combined is under 15%. In such an environment, the Exchange must continually adjust its fees and rebates to remain competitive with other exchanges and with off-exchange venues. Because competitors are free to modify their own fees and credits in response, and because market participants may readily adjust their order routing practices, the Exchange does not believe its proposed fee change can impose any burden on intermarket competition. The Exchange's proposal to eliminate the step up tier credit will not meaningfully impact intermarket competition. As discussed above, no member organization currently qualifies for the credit. The Exchange also believes that the proposed change is designed to provide the public and investors with a Price List that is clear and consistent, thereby reducing burdens on the marketplace and facilitating investor protection.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A) [14] of the Act and subparagraph (f)(2) of Rule 19b–4 [15] thereunder, because it establishes a due, fee, or other charge imposed by the Exchange.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [16] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSE–2020–08 on the subject line.

Paper Comments

- Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSE–2020–08. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–88173; File No. SR–NASDAQ–2020–006]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Remove Listing Rule and Other Amendments

February 11, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 29, 2020, The Nasdaq Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend The Nasdaq Options Market LLC (''NOM'') Rules at Options 1, Section 1 (Definitions), Options 2, Section 4 (Obligations of Market Makers), Section 5 (Market Maker Quotations), Options 3, Section 2 (Units of Trading and Meaning if Premium Quotes and Orders), Options 3, Section 3 (Minimum Increments), Options 3, Section 8 (Opening and Halt Cross), Options 3, Section 19 (Mass Cancellation of Trading Interest), Options 4, Section 5 (Series of Options Contracts Open for Trading), Options 4A, Section 2 (Definitions), Section 3 (Designation of a Broad-Based Index), Section 6 (Position Limits for Broad-Based Index Options), Section 11 (Trading Sessions), Section 12 (Terms of Index Options Contracts), Section 14 (Disclaimers), Options 5, Section 2 (Order Protection), Section 4 (Order Routing), Options 6C Exercises and Deliveries, and Options 7 (Pricing Schedule). The Exchange also proposes to relocate current rule text to new Options 2, Section 6 entitled ''Market Maker Orders'' and reserve certain rules within the Rulebook. The text of the proposed rule change is available on the Exchange's website at *http://nasdaq.cchwallstreet.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend NOM's Rules at Options 1, Section 1 (Definitions), Options 2, Section 4 (Obligations of Market Makers), Section 5 (Market Maker Quotations), Options 3, Section 2 (Units of Trading and Meaning if Premium Quotes and Orders), Options 3, Section 3 (Minimum Increments), Options 3, Section 8 (Opening and Halt Cross), Options 3, Section 19 (Mass Cancellation of Trading Interest), Options 4, Section 5 (Series of Options Contracts Open for Trading), Options 4A, Section 2 (Definitions), Section 3 (Designation of a Broad-Based Index), Section 6 (Position Limits for Broad-Based Index Options), Section 11 (Trading Sessions), Section 12 (Terms of Index Options Contracts), Section 14 (Disclaimers), Options 5, Section 2 (Order Protection), Section 4 (Order Routing), Options 6C Exercises and Deliveries, and Options 7 (Pricing Schedule). The Exchange also proposes to relocate current rule text to new Options 2, Section 6 entitled ''Market Maker Orders'' and reserve certain rules within the Rulebook. Each change is described below.

Rulebook Harmonization

The Exchange recently harmonized its Rulebook in connection with other Nasdaq affiliated markets. The Exchange proposes to reserve certain rules within the Nasdaq Rulebook to represent the presence of rules in similar locations in other Nasdaq affiliated Rulebooks (*e.g.,* Nasdaq Phlx LLC).[3]

The Exchange proposes to reserve Sections 17–22 within General 2, Organization and Administration. The Exchange proposes to reserve Sections 11–14 within Options 2, Options Market Participants. The Exchange proposes to reserve Sections 17–21 within Options 4A, Options Index Rules. The Exchange proposes to reserve new section Options 4B. The Exchange proposes to reserve Sections 8–13 within Options 6, Options Trade Administration. The Exchange proposes to reserve Section 7 within Options 6C, which is currently titled ''Exercises and Deliveries.'' The Exchange proposes to retitle Options 6C as ''Margins'' to harmonize the title to the other Nasdaq affiliated markets. The Exchange proposes to reserve Section 24 within Options 9, Business Conduct.

[17] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* SR–Phlx–2020–03 (not yet published).

Definitions

The Exchange proposes to add the definition of an ''Away Best Bid or Offer'' or ''ABBO'' within Options 1, Section 1(a)(1). This term is utilized throughout the Rulebook. Defining this term will bring greater transparency to the Rulebook. The Exchange proposes to renumber the remaining definitions and also update corresponding cross-references within Options 7, Section 1.

The Exchange proposes to remove the definitions of ''class of options'' and ''series of options'' as they are duplicative of the definitions for ''class'' and ''series.'' The Exchange proposes to remove the terms ''System Book Feed'' and ''System Securities'' from the Options 1, Section 1. The term ''System Book Feed'' is not utilized in the Rulebook currently. The term ''System Securities'' is only utilized within the definition of the term ''System'' at current Options 1, Section 1(a)(60) and within Options 3, Section 8, Opening and Halt Cross.'' The term is simply replaced by referring to option series. The Exchange believes that replacing the term with the term ''option series'' will make the Rulebook clear.

Finally, the Exchange is removing the phrase '', or the United States dollar'' from the definition of ''foreign currency'' within current Options 1, Section 1(a)(20). This reference is not needed in this string cite because the United States dollar is a medium of exchange as noted in the introductory phrase to the string cite.

Relocation of Options 2 Rules

The Exchange proposes to relocate Options 2, Section 4(d) and Section 5(e) to Options 2, Section 6, which is currently reserved. Specifically, the Exchange proposes to relocate these sections into Options 6(a) and (b), respectively. Proposed Options 2, Section 6 would be titled ''Market Maker Orders.'' This relocation will harmonize the location of these rule to other Nasdaq affiliated markets.

Removal of Various Listings

Mini Options

The Exchange has not listed Mini Options in several years and is proposing to delete its listing rules and other ancillary trading rules related to the listing of Mini Options. The Exchange notes that it has no open interest in Mini Options.

Specifically, the Exchange proposes to amend Options 3, Section 2 (Units of Trading and Meaning of Premium Quotes and Orders), Options 3, Section 3 (Minimum Increments) and Options 4, Section 5 (Series of Options Contracts Open for Trading) at Supplementary Material .15) to remove references to the handling of Mini Options in the System. The Exchange also proposes to remove pricing for Mini Options within Options 7, Section 2 (Nasdaq Options Market—Fees and Rebates). The Exchange is also amending Supplementary Material .01 to Options 4A, Section 2.

In the event that the Exchange desires to list Mini Options in the future, it would file a rule change with the Commission to adopt rules to list Mini Options.

U.S. Dollar-Settled Foreign Currency Options

The Exchange has not listed U.S. Dollar-Settled Foreign Currency Options (''FCOs'') in several years and is proposing to delete its listing rules and other ancillary trading rules related to the listing of FCOs. The Exchange notes that it has no open interest in FCOs.

Specifically, the Exchange proposes to amend Supplementary Material .16 to Options 4, Section 5 (Series of Options Contracts Open for Trading) to remove references to the handling of FCOs in the System.

In the event that the Exchange desires to list FCOs in the future, it would file a rule change with the Commission to adopt rules to list FCOs.

Mini-Nasdaq-100 Index

The Exchange has not listed Mini-Nasdaq-100 Index options or ''MNX'' or ''Mini-NDX'' in several years and is proposing to delete its listing rules and other ancillary trading rules related to the listing of Mini-Nasdaq-100 Index options. The Exchange notes that it has no open interest in Mini-Nasdaq-100 Index options.

Specifically, the Exchange proposes to amend Supplementary Material .05 to Options 4, Section 5 (Series of Options Contracts Open for Trading) and Options 4A, Section 12 (Terms of Index Options Contracts) to remove references to the handling of Mini-Nasdaq-100 Index options in the System.

In the event that the Exchange desires to list Mini-Nasdaq-100 Index options in the future, it would file a rule change with the Commission to adopt rules to list Mini-Nasdaq-100 Index options.

MSCI EM Index and MSCI EAFE Index

The Exchange has not listed the MSCI EM Index or MSCI EAFE Index in several years and is proposing to delete its listing rules and other ancillary trading rules related to the listing of the MSCI EM Index and MSCI EAFE Index. The Exchange notes that it has no open interest in the MSCI EM Index and MSCI EAFE Index.

Specifically, the Exchange proposes to amend Supplementary Material .01 to Options 4A, Section 2 (Definitions), Section 3 (Designation of a Broad-Based Index), Section 6 (Position Limits for Broad-Based Index Options), Section 11(Trading Sessions) Section 12 (Terms of Index Options Contracts), Section 14 (Disclaimers) to remove references to the handling of the MSCI EM Index and MSCI EAFE Index in the System.

The Exchange proposes to add rule text within Options 4A, Section 12(a)(6) which indicates, ''There are currently no P.M.-settled index options approved for trading on NOM.''

In the event that the Exchange desires to list the MSCI EM Index and/or MSCI EAFE Index in the future, it would file a rule change with the Commission to adopt rules to list the MSCI EM Index and/or MSCI EAFE Index.

Minimum Increments

The Exchange proposes to amend Options 3, Section 3 to relocate Section 3(a)(3) into a new Supplementary Material .01 and title the section, ''Penny Pilot Program.'' The Exchange also proposes to amend a typographical error in Options 3, Section 3(a)(3) to replace ''QQQQs'' with ''QQQs.'' The other changes relate to the removal of Mini Options as explained herein.

Mass Cancellation of Trading Interest

The Exchange proposes to amend the description of Options 3, Section 19 titled ''Mass Cancellation of Trading Interest.'' The proposed amended rule would state, '' An Options Participant may cancel any bids, offers, and orders in any series of options by requesting NOM Market Operations [4] staff to effect such cancellation as per the instructions of the Options Participant.'' The Exchange is not amending the System with respect to this rule change. The proposed amended language merely makes clear that an Options Participant may contact NOM Market Operations and request the Exchange to cancel any bid, offer or order in any series of options. This is a voluntary service that is offered to market participants. The Exchange, would cancel such bid, offer or order pursuant to the Member's instruction. This proposed new rule would conform to rules of other Nasdaq affiliated markets.[5]

[4] The request to Market Operations is a manual request which is made telephonically.

[5] *See* Nasdaq Phlx LLC (''Phlx''), Nasdaq ISE, LLC (''ISE''), Nasdaq GEMX, LLC (''GEMX'') and Nasdaq MRX, LLC (''MRX'') Options 3, Section 19.

Order Routing

Phlx recently amended Options 5, Section 4.[6] The Exchange proposes to make similar amendments to the NOM Rule. The amendments clarity and correct the rule text to represent current System functionality. Currently, Options 5, Section 4(a)(iii)(A), relating to DNR Orders, states,

> Any incoming order interacting with such a resting DNR Order will execute at the ABBO price, unless (1) the ABBO is improved to a price which crosses the DNR displayed price, in which case the incoming order will execute at the previous ABBO price; (2) the ABBO is improved to a price which locks the DNR's displayed price, in which case the incoming order will execute at the DNR's displayed price. Should the best away market move to an inferior price level, the DNR Order will automatically re-price from its one MPV inferior to the original away best bid/offer price to one MPV away from the new away best bid/offer price or its original limit price.

The Exchange proposes to make non-substantive amendments to this rule text within Options 5, Section 4(a)(iii)(A), relating to DNR Orders, to align the rule text with Phlx Rule 1093. The Exchange proposes to instead provide:

> Any incoming order interacting with such a resting DNR Order will execute at the ABBO price, unless (1) the ABBO is improved to a price which crosses the DNR Order's already displayed price, in which case the incoming order will execute at the previous ABBO price as the away market crossed a displayed price; or (2) the ABBO is improved to a price which locks the DNR Order's displayed price, in which case the incoming order will execute at the DNR Order's displayed price. Should the best away market move to an inferior price level, the DNR Order will automatically re-price from its one MPV inferior to the original ABBO and display one MPV away from the new ABBO or its original limit price.

This proposed new text intends to make clear that if the Exchange's System is executing an incoming order against a resting DNR Order which is displayed, it would not consider an updated ABBO which crossed the displayed DNR Order. The System would not take into account the away market order or quote which crossed the DNR Order's displayed price. The Exchange is not trading-through an away market in this scenario, rather an away market is crossing NOM's displayed market and therefore that market has the obligation not to trade-through NOM's displayed price. A similar change is being made to the last sentence of Options 5, Section 4(a)(iii)(B)(4) for SEEK Orders and the last sentence Options 5, Section 4(a)(iii)(C)(4) for SRCH Orders. By way of example, consider the following sequence of events in the System:

9:45:00:00:00—MIAX Quote 0.95×1.20
9:45:00:00:10—OPRA updates MIAX BBO 0.95×1.20
9:45:00:00:20—NOM Local BBO Quote 1.00×1.15
9:45:00:00:30—OPRA disseminates NOM BBO updates: 1.00×1.15
9:45:00:00:35: CBOE Quote 1.00×1.12
9:45:00:00:45—OPRA disseminates CBOE BBO 1.00×1.12
9:45:00:00:50—DNR Order: Buy 5 @1.15 (exposes @ABBO of 1.12, displays 1 MPV from ABBO @1.11)
9:45:00:00:51—OPRA disseminates NOM BBO updates: 1.11×1.15 (1.11 being the DNR Order displaying 1 MPV from ABBO)
9:45:00:00:60—MIAX Quote updates to 1.00×1.10 (1.10 crosses the displayed DNR Order price, violating locked/crossed market rules; henceforth, we need not protect this price)
9:45:00:00:65—OPRA disseminates MIAX BBO 1.00×1.10
9:45:00:00:75—NOM Market Maker Order to Sell 5 @1.09
9:45:00:00:76—Market Maker Order immediately executes against DNR Order 5 contracts @1.12 (1.12 being the 'previous' ABBO price disseminated by CBOE before the receipt of the DNR Order that was subsequently and illegally crossed by MIAX's 2nd quote)
9:45:00:00:77—OPRA disseminates NOM BBO updates: 1.10×1.15 (reverts back to BBO set by NOM Local Quote since the DNR Order has executed)

The remainder of the changes to Options 5, Section 4(a)(iii)(A) are non-substantive changes designed to bring clarity to the rule text. By way of example, the Exchange proposes to add the word ''Order'' after ''DNR,'' change the words ''away best bid/offer price'' to the acronym ''ABBO'' and add the words ''display'' and ''already'' to the rule text to make clear that the intent of the sentence.

The Exchange proposes to amend Options 5, Section 4(a)(iii)(B)(4) to amend the sentence which provides, ''If there exists a locked ABBO when the SEEK Order is entered onto the Order Book, the SEEK Order will display at the locked ABBO price.'' The Exchange is amending this sentence to provide, ''If there exists a locked ABBO when the SEEK Order is entered onto the Order Book, the SEEK Order will be entered at the ABBO price and displayed one MPV inferior to the ABBO.'' This is true of both SEEK and SRCH Orders. Where there exists a locked ABBO when the SEEK Order or SRCH Order is entered onto the Order Book, the SEEK Order or SRCH Order will be entered into the Order Book at the ABBO price and displayed one MPV inferior to the ABBO. The Exchange is proposing to add additional rule text to Options 5, Section 4(a)(iii)(B)(4). This amendment corrects the current rule text.

The Exchange also proposes to remove the sentence, ''When checking the Order Book, the System will seek to execute at the price at which it would send the order to an away market.'' The Exchange proposes to remove this sentence because the price at which the order would route in explained in greater detail within Options 5, Section 4(a)(iii)(B)(4). Also, this sentence is confusing because the price at which an order would execute is dependent on the scenario within which an order would route. Removing this sentence will remove any confusion related to the price at which the order would route. The Exchange also proposes to remove the same sentence concerning SRCH Orders within Options 5, Section 4(a)(iii)(C)(4).

Other Amendments

The Exchange proposes to correct the lettering within General 9, Section 1, General Standards. The Exchange proposes to correct a typographical error within Options 4A, Section 12. Specifically, the reference to Options 4, Section 6 should have referenced Options 4, Section 5 instead. The Exchange proposes to remove a reference to paragraph (c) within Options 5, Section 2, as there is no paragraph (c) within the Rule. The Exchange also proposes to update rulebook citations within Options 7, Pricing Schedule to reflect the proposed changes to Options 1, Section 1 (Definitions).

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[7] in general, and furthers the objectives of Section 6(b)(5) of the Act,[8] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

[6] *See* Securities Exchange Act Release No. 87811 (December 20, 2019), 84 FR 72017 (December 30, 2019) (SR–Phlx–2019–56).

[7] 15 U.S.C. 78f(b).

[8] 15 U.S.C. 78f(b)(5).

Rulebook Harmonization

The Exchange's proposal to reserve various sections of the Rules in order to harmonize its Rulebook with other Nasdaq affiliated markets is not a substantive amendment.

Definitions

The Exchange's proposal to add the definition of an ''Away Best Bid or Offer'' or ''ABBO'' within Options 1, Section 1(a)(1) is consistent with the Act because these amendments will add transparency to the Rulebook. The Exchange's proposal to remove the terms ''class of options,'' ''series of options,'' ''System Book Feed'' and ''System Securities'' from the Options 1, Section 1 is also consistent with the Act. The term ''System Book Feed'' is not utilized in the Rulebook currently and therefore this term does not need to be defined. The term ''System Securities'' is only utilized within the definition of the term ''System'' at current Options 1, Section 1(a)(60) and within Options 3, Section 8, Opening and Halt Cross.'' Replacing the term with the term ''option series'' will make the Rulebook clear.

Relocation of Options 2 Rules

The proposal to relocate Options 2, Section 4(d) and Section 5(e) to Section 6 into Options 6(a) and (b), respectively is consistent with the Act. This amendment is not substantive.

Removal of Various Listings

Mini Options

The Exchange's proposal to removal references to the listing and handling of Mini Options is consistent with the Act because Mini Options have not been listed in several years. Also, the Exchange notes that it has no open interest in Mini Options. In the event that the Exchange desires to list Mini Options in the future, it would file a rule change with the Commission to adopt rules to list Mini Options.

U.S. Dollar-Settled Foreign Currency Options

The Exchange's proposal to removal references to the listing and handling of FCOs is consistent with the Act because FCOs have not been listed in several years. Also, the Exchange notes that it has no open interest in FCOs. In the event that the Exchange desires to list FCOs in the future, it would file a rule change with the Commission to adopt rules to list FCOs.

Mini-Nasdaq-100 Index

The Exchange's proposal to removal references to the listing and handling Mini-Nasdaq-100 Index options is consistent with the Act because Mini-Nasdaq-100 Index options have not been listed in several years. Also, the Exchange notes that it has no open interest in Mini-Nasdaq-100 Index options. In the event that the Exchange desires to list Mini-Nasdaq-100 Index options in the future, it would file a rule change with the Commission to adopt rules to list Mini-Nasdaq-100 Index options.

MSCI EM Index and MSCI EAFE Index

The Exchange's proposal to removal references to the listing and handling of MSCI EM Index and MSCI EAFE Index options is consistent with the Act because MSCI EM Index and MSCI EAFE Index options have not been listed in several years. Also, the Exchange notes that it has no open interest in MSCI EM Index and MSCI EAFE Index options. In the event that the Exchange desires to list MSCI EM Index and MSCI EAFE Index options in the future, it would file a rule change with the Commission to adopt rules to list MSCI EM Index and MSCI EAFE Index options.

Minimum Increments

The Exchange's proposal to relocate parts of Options 3, Section 3 into a new Supplementary Material .01 and add a title for the Penny Pilot Program is consistent with the Act. This amendment will bring greater transparency to the Exchange's Rules.

Mass Cancellation of Trading Interest

The Exchange's proposal to amend the rule text of Mass Cancellation of Trading Interest rule within Options 3, Section 19 is consistent with the Act because the Exchange desires to conform the rule text to other Nasdaq affiliated markets.[9] Permitting Participants to contact Market Operations as a manual alternative to automated functionality, which similarly allows Participants to cancel interest, provides Participants experiencing their own system issues with a means to manage risk. Today, Participants are able to cancel interest, in an automated fashion through protocols [10] and the Kill Switch.[11] This is a voluntary services offered to all Participants.

This amended rule reflects the Exchange's current practice of allowing Participants to contact NOM Market Operations and request the Exchange to cancel any bid, offer or order in any series of options. The Exchange would continue to permit Participants to contact market operations and manually request cancellation of interest. The proposed amended language will make clear that an Options Participant may contact NOM Market Operations and request the Exchange to cancel any bid, offer or order in any series of options. The Exchange would continue to cancel such bid, offer or order pursuant to the Participant's instruction.

This service, which permits Participants to cancel interest, does not diminish a Market Maker's obligation with respect to providing two-sided quotations and this rule is not inconsistent with other firm quote obligations of the Market Maker. Upon the request of a Participant, NOM Market Operations will continue to manually input a mass cancellation message into the System consistent with the Participant's instruction to cancel trading interest. Once the mass cancellation message is entered into the System by NOM Market Operations, the message will be accepted by the System in the order of receipt in the queue such that the interest that was already accepted into the System will be processed prior to the mass cancellation message. In addition, mass cancellation messages entered into the System by NOM Market Operations are handled by the System through the same queuing mechanism that a quote or order message is handled by the System. The Exchange notes its processing of a mass cancellation message inputted by NOM Market Operations and handled by the System is consistent with firm quote and order handling rules.

Order Routing

The Exchange's proposal to amend the sentence within Options 5, Section 4(a)(iii)(A) related to DNR Orders is consistent with the Act. The Exchange proposes to amend this rule text to clarify the current rule text. Specifically, the Exchange proposes to state, ''Any incoming order interacting with such a resting DNR Order will execute at the ABBO price, unless (1) the ABBO is improved to a price which crosses the DNR Order's already displayed price, in which case the incoming order will execute at the previous ABBO price as the away market crossed a displayed price; or (2) the ABBO is improved to a price which locks the DNR Order's displayed price, in which case the incoming order will execute at the DNR Order's displayed price.'' The System would not take into account the away market order or quote which crossed the DNR's displayed price. The Exchange is

[9] *See* note 5 above.

[10] *See* Options 3 at Supplementary Material .03 to Section 7.

[11] *See* Options 3, Section 17.

not trading-through an away market in this scenario, rather an away market is crossing NOM's displayed market and therefore that market has the obligation not to trade-through NOMs displayed price. Similar amendments were made to Options 5, Section 4(a)(iii)(B)(4) and Section 4(a)(iii)(C)(4). The remainder of the changes to this paragraph are clarifying non-substantive amendments.

The Exchange's proposal to remove the following sentence from Options 5, Section 4(a)(iii)(B)(4) and Section 4(a)(iii)(C)(4), ''When checking the Order Book, the System will seek to execute at the price at which it would send the order to an away market,'' is consistent with the Act because this sentence is vague. The price at which an order would execute is dependent on the scenario within which an order would route. Removing this sentence will remove any confusion related to the price at which the order would route. The proposed rule would also add additional detail about the scenarios under which an order would route away.

With respect to SEEK Orders within Options 5, Section 4(a)(iii)(B) as well as SRCH Orders within Options 5, Section 4(a)(iii)(C) the amendments are consistent with the Act as they protect investors and the general public by amending current incorrect rule text. If there exists a locked ABBO when the SEEK Order or SRCH Order is entered onto the Order Book, the SEEK Order or SRCH Order will be entered at the ABBO price and displayed one MPV inferior to the ABBO. The amendments to Options 5, Section 4 represent current System functionality. This new rule text will provide Participants with clarity as to the manner in which the System handles locked market conditions during routing. The proposed rule text is similar to rule text within Phlx Rule 1093.

Other Amendments

The Exchange's proposal to correct certain typographical errors and update rulebook citations are not substantive.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Rulebook Harmonization

The Exchange's proposal to reserve various rules in connection with a larger Rulebook harmonization do not impose an undue burden on competition because these amendments are non-substantive.

Definitions

The Exchange's proposal to add the definition of an ''Away Best Bid or Offer'' or ''ABBO'' within Options 1, Section 1(a)(1) and remove the terms ''class of options,'' ''series of options,'' ''System Book Feed'' and ''System Securities'' from the Options 1, Section 1 do not impose an undue burden on competition because these amendments will add transparency to the Rulebook.

Relocation of Options 2 Rules

The proposal to relocate Options 2, Section 4(d) and Section 5(e) to Section 6, into Options 6(a) and (b) does not burden competition as this amendment is not substantive.

Removal of Various Listings

Mini Options

The Exchange's proposal to removal references to the listing and handling of Mini Options do not impose an undue burden on competition. Mini Options have not been listed in several years. Also, the Exchange notes that it has no open interest in Mini Options.

U.S. Dollar-Settled Foreign Currency Options

The Exchange's proposal to remove references to the listing of U.S. Dollar-Settled Foreign Currency Options (''FCOs'') does not impose an undue burden on competition. FCOs have not been listed in several years. The Exchange notes that it has no open interest in FCOs.

Mini-Nasdaq-100 Index

The Exchange's proposal to removal references to the listing and handling of Mini-Nasdaq-100 Index options does not impose an undue burden on competition. Mini-Nasdaq-100 Index options have not been listed in several years. Also, the Exchange notes that it has no open interest in Mini-Nasdaq-100 Index options.

MSCI EM Index and MSCI EAFE Index

The Exchange's proposal to removal references to the listing and handling of MSCI EM Index and the MSCI EAFE Index does not impose an undue burden on competition. Neither the MSCI EM Index nor the MSCI EAFE Index have been listed in several years. Also, the Exchange notes that it has no open interest in either the MSCI EM Index or the MSCI EAFE.

Minimum Increments

The Exchange's proposal to relocate parts of Options 3, Section 3 into a new Supplementary Material .01 and add a title for the Penny Pilot Program do not impose an undue burden on competition as these amendments are non-substantive.

Mass Cancellation of Trading Interest

The Exchange's proposal to amend the rule text of the Mass Cancellation of Trading Interest rule within Options 3, Section 19 does not impose an undue burden on competition because there is no corresponding change to the manner in which this service will be offered. It will continue to be offered to all Participants.

Order Routing

The Exchange believes that adding greater detail to its rules concerning routing of orders does not impose an undue burden on competition, rather it provides greater transparency as to the potential outcomes when utilizing different routing strategies. Further, the Exchange notes that market participants may elect not to route their orders. The Exchange continues to offer various options to its market participants with respect to routing.

Other Amendments

The Exchange proposes to correct typographical error and update rulebook citations do not impose and undue burden on competition as these amendments are non-substantive.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act[12] and subparagraph (f)(6) of Rule 19b–4 thereunder.[13]

[12] 15 U.S.C. 78s(b)(3)(A)(iii).

[13] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires the Exchange to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as

Continued

A proposed rule change filed under Rule 19b–4(f)(6) [14] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[15] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange requests that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Exchange believes that adoption the term ''ABBO,'' would add greater transparency to its rules, and that removing the rule text related to various options listing which are no longer listed on the Exchange will provide Participants with notice of the unavailability of these listing. The Exchange also states that its amendment to its routing rules protects investors and the general public by providing clarity concerning the current operation of its System. The Exchange believes that the amended rules will provide market participants with greater information for each potential order routing strategy and, in general, provide greater transparency. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission waives the 30-day operative delay and designates the proposed rule change operative upon filing.[16]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NASDAQ–2020–006 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2020–006. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NASDAQ–2020–006 and should be submitted on or beforeMarch 10, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[17]

J. Matthew DeLesDernier,

Assistant Secretary.

DEPARTMENT OF STATE

[Public Notice: 11030]

Defense Trade Advisory Group; Notice of Membership

The U.S. Department of State's Bureau of Political-Military Affairs is accepting membership applications for the Defense Trade Advisory Group (DTAG). The Bureau of Political-Military Affairs is interested in applications from subject matter experts from the United States defense industry, relevant trade and labor associations, or academic and foundation personnel.

The DTAG was established as an advisory committee under the authority of 22 U.S.C. 2656 and the Federal Advisory Committee Act, 5 U.S.C. App. (''FACA''). The purpose of the DTAG is to provide the Bureau of Political-Military Affairs with a formal channel for regular consultation and coordination with U.S. private sector defense exporters and defense trade organizations on issues involving U.S. laws, policies, and regulations for munitions exports. The DTAG advises the Bureau on its support for and regulation of defense trade to help ensure that impediments to legitimate exports are reduced while the foreign policy and national security interests of the United States continue to be protected and advanced in accordance with the Arms Export Control Act (AECA), as amended. Major topics addressed by the DTAG include (a) policy issues on commercial defense trade and technology transfer; (b) regulatory and licensing procedures applicable to defense articles, services, and technical data; (c) technical issues involving the U.S. Munitions List (USML); and (d) questions related to the implementation of the AECA and International Traffic in Arms Regulations (ITAR).

Members are appointed by the Assistant Secretary of State for Political-Military Affairs on the basis of individual qualifications and technical expertise. Past members include representatives of United States defense industry, relevant trade and labor associations, or academic and foundation personnel. In accordance with the DTAG Charter, all DTAG members must be U.S. citizens. DTAG members are expected to represent the views of their organizations, while also demonstrating awareness of Department's mission of ensuring that commercial exports of defense articles and defense services advance U.S. national security and foreign policy objectives. In addition, DTAG members are expected to understand complex

issues related to commercial defense trade and industrial competitiveness and are expected to advise the Bureau on these matters.

DTAG members' responsibilities include:

- Serving a consecutive two-year term, which may be renewed or terminated at the discretion of the Assistant Secretary of State for Political-Military Affairs.
- Making recommendations in accordance with the DTAG Charter and the FACA.
- Making policy and technical recommendations within the scope of the U.S. commercial export control regime as set forth in the AECA, the ITAR, and appropriate directives.

Please note that DTAG members may not be reimbursed for travel, per diem, and other expenses incurred in connection with their duties as DTAG members. How to apply: Applications in response to this notice must contain the following information: (1) Name of applicant; (2) affirmation of U.S. citizenship; (3) organizational affiliation and title, as appropriate; (4) mailing address; (5) work telephone number; (6) email address; (7) resume; and (8) summary of qualifications for DTAG membership.

This information may be provided via two methods:

- Emailed to the following address: *DTAG@State.Gov.* In the subject field, please write, ''*DTAG Membership Application.*''
- Send in hardcopy to the following address: Barbara Eisenbeiss, PM/DDTC, SA–1, 12th Floor, Directorate of Defense Trade Controls, Bureau of Political Military Affairs, U.S. Department of State, Washington, DC 20522–0112. If sent via regular mail, we recommend you call Ms. Eisenbeiss (202–663–2835) to confirm she has received your package.

All applications must be postmarked by March 2, 2020.

Neal F. Kringel,

Alternate Designated Federal Officer, Defense Trade Advisory Group, Department of State.

[FR Doc. 2020–02797 Filed 2–14–20; 8:45 am]

BILLING CODE 4710–25–P

DEPARTMENT OF STATE

[Public Notice: 11032]

Notice of Public Meeting for International Maritime Organization Sub-Committee Meeting

The Department of State will conduct a public meeting at 10:00 a.m. on February 24, 2020, in Room 7K15–01 of the Douglas A. Munro Coast Guard Headquarters Building at St. Elizabeth's, 2703 Martin Luther King Jr. Avenue SE, Washington, DC 20593. The primary purpose of the meeting is to prepare for the seventh session of the International Maritime Organization's (IMO) Sub-Committee on Ship Systems and Equipment to be held at the IMO Headquarters, United Kingdom, March 2–6, 2020.

The agenda items to be considered include:

—Adoption of the Agenda
—Decisions of other IMO bodies
—New requirements for ventilation of survival craft
—Consequential work related to the new Code for ships operating in polar waters
—Revision of SOLAS chapter III and the LSA Code
—Review SOLAS chapter II–2 and associated codes to minimize the incidence and consequences of fires on ro-ro spaces and special category spaces of new and existing ro-ro passenger ships
—Amendments to MSC.1/Circ.1315
—Amendments to chapter 9 of the FSS Code for fault isolation requirements for cargo ships and passenger ship cabin balconies fitted with individually identifiable fire detector systems
—Requirements for onboard lifting appliances and anchor handling winches
—Safety objectives and functional requirements of the Guidelines on alternative design and arrangements for SOLAS chapters II–1 and III
—Development of guidelines for cold ironing of ships and consideration of amendments to SOLAS chapters II–1 and II–2
—Amendments to paragraph 4.4.7.6.17 of the LSA Code concerning single fall and hook systems with on-load release capability
—Revision of the Standardized Life-Saving Appliance Evaluation and Test Report Forms (MSC/Circ.980 and addenda)
—Revision of the Code of safety for diving systems (resolution A.831(19)) and the Guidelines and specifications for hyperbaric evacuation systems (resolution A.692(17))
—Amendments to SOLAS chapter III, LSA Code and resolution MSC.81(70) to remove the applicability of the requirements to launch free-fall lifeboats with the ship making headway at speeds up to 5 knots in calm water
—Unified interpretation of provisions of IMO safety, security and environment-related conventions
—Revision of the Guidelines for the maintenance and inspections of fixed carbon dioxide fire-extinguishing systems (MSC.1/Circ.1318)
—Biennial status report and provisional agenda for SSE 8
—Election of Chair and Vice-Chair for 2021
—Any other business

Members of the public may attend this meeting up to the seating capacity of the room. Upon request to the meeting coordinator, members of the public may also participate via teleconference, up to the capacity of the teleconference phone line. To facilitate the building security process, receive the call-in information, and to request reasonable accommodation, those who plan to attend should contact the meeting coordinator, LT Brock Hashimoto, by email at *Brock.J.Hashimoto@uscg.mil,* by phone at (202) 372–1426, or in writing at 2703 Martin Luther King Jr. Ave. SE, Stop 7509, Washington, DC 20593–7509 not later than February 14, 2020, 7 business days prior to the meeting. Requests made after February 14, 2020 might not be able to be accommodated. Please note that due to security considerations, two valid, government issued photo identifications must be presented to gain entrance to the Coast Guard Headquarters building. It is recommended that attendees arrive no later than 30 minutes ahead of the scheduled meeting for the security screening process. The Headquarters building is accessible by taxi, public transportation, and privately owned conveyance (upon request). In the case of inclement weather where the U.S. Government is closed or delayed, a public meeting may be conducted virtually. The meeting coordinator will confirm whether the virtual public meeting will be utilized and notify registered guests accordingly. Members of the public can find out whether the U.S. Government is delayed or closed by visiting *www.opm.gov/status/.*

Jeremy M. Greenwood,

Coast Guard Liaison Officer, Office of Ocean and Polar Affairs, Department of State.

UNIFIED CARRIER REGISTRATION PLAN

Sunshine Act Meeting Notice; Unified Carrier Registration Plan Board Subcommittee Meeting

TIME AND DATE: February 20, 2020, from Noon to 3:00 p.m., Eastern time.

PLACE: This meeting will be accessible via conference call. Any interested person may call 1–866–210–1669,

passcode 5253902#, to listen and participate in this meeting.

STATUS: This meeting will be open to the public.

MATTERS TO BE CONSIDERED: The Unified Carrier Registration Plan Education and Training Subcommittee (the ''Subcommittee'') will continue its work in developing and implementing the Unified Carrier Registration Plan and Agreement. The subject matter of this meeting will include:

Proposed Agenda

I. Call to Order—Subcommittee Chair

The Subcommittee Chair will welcome attendees, call the meeting to order, call roll for the Subcommittee, confirm whether a quorum is present, and facilitate self-introductions.

II. Verification of Publication of Meeting Notice—Executive Director

The UCR Executive Director will verify the publication of the meeting notice on the UCR website and in the **Federal Register**.

III. Review and Approval of Subcommittee Agenda and Setting of Ground Rules—Subcommittee Chair

For Discussion and Possible Subcommittee Action

The Subcommittee Agenda will be reviewed and the Subcommittee will consider adoption.

Ground Rules

➢ Subcommittee action only to be taken in designated areas on agenda.

➢ Please MUTE your phone.

➢ Please do not place the call on HOLD.

IV. Approval of Minutes from January 27, 2020 Meeting—UCR Operations Manager

• Draft minutes from the January 27, 2020 Education and Training Subcommittee meeting in San Antonio, Texas will be reviewed. The Subcommittee will consider action to approve.

V. Proposal for Education Modules—UCR Technology Director

The UCR Technology Director will review a proposal to develop each of the three education modules (Enforcement, UCR 101, and National Registration System), including format and budget. The Subcommittee will discuss and may take action to adopt the proposal within the allotted Fiscal Year 2020 budget for the UCR education program.

VI. Role of Subcommittee in Development of Modules—UCR Technology Director

The UCR Technology Director will lead a discussion on the need for assistance and guidance from the Subcommittee in the development of the modules.

VII. Planning for Education and Training Sessions at NCSTS Summer Meeting—Subcommittee Chair

The Subcommittee Chair will lead a discussion on the logistics and planning involved in the live education and training sessions to be held on June 9, 2020 in Portland, Oregon.

VIII. Other Items—Subcommittee Chair

The Subcommittee Chair will call for any other items the Subcommittee members would like to discuss.

IX. Adjourn—Subcommittee Chair

Chair will adjourn the meeting.

The agenda will be available no later than 5:00 p.m. Eastern time, February 12, 2020 at: *https://plan.ucr.gov.*

CONTACT PERSON FOR MORE INFORMATION: Elizabeth Leaman, Chair, Unified Carrier Registration Plan Board of Directors, (617) 305–3783, *eleaman@board.ucr.gov.*

Alex B. Leath,

Chief Legal Officer, Unified Carrier Registration Plan.

[FR Doc. 2020–03252 Filed 2–13–20; 4:15 pm]

BILLING CODE 4910–YL–P

DEPARTMENT OF VETERANS AFFAIRS

Funding Availability: Homeless Providers Grant and Per Diem Program

AGENCY: VA Homeless Providers Grant and Per Diem (GPD) Program, Veterans Health Administration, Department of Veterans Affairs (VA).

ACTION: Notice of funding availability (NOFA).

SUMMARY: VA is announcing the availability of funds to eligible entities to provide per diem payments for the Transition in Place (TIP) housing model to facilitate housing stabilization for Veterans who are homeless or at risk of becoming homeless under VA's Homeless Providers GPD Program. VA expects to award funding to pay per diem for approximately 450 beds with this NOFA.

DATES: Applications for grants under the GPD Program must be received by the GPD National Program Office by 4:00 p.m. Eastern Time on Wednesday, April 22, 2020. In the interest of fairness to all competing applicants, this deadline is firm as to date and hour. VA will treat any application that is received after the deadline as ineligible for consideration. Applicants should take this practice into account and submit their materials early to avoid the risk of unanticipated delays, computer service outages, or other submission-related problems that might result in ineligibility.

For a Copy of the Application Package: The required documentation for applications is outlined under the Application Documentation Required sections of this NOFA. Questions should be referred to the GPD National Program Office by email at: *GPDgrants@va.gov.* For detailed GPD Program information and requirements, see part 61 of title 38, Code of Federal Regulations (CFR) or 38 CFR part 61.

Submission of Application Package: Applicants must submit applications electronically by following instructions found at: *www.va.gov/homeless/gpd.asp.* Applications may not be mailed, emailed, or sent by fax. Applications must be received by the GPD National Program Office by 4:00 p.m. Eastern Time on the application deadline date. Applications must be submitted as a complete package. Materials arriving separately will not be included in the application package for consideration and may result in the application being rejected or not funded.

Technical Assistance: Information regarding how to obtain technical assistance with the preparation of a grant application is available on the GPD Program website at: *www.va.gov/homeless/gpd.asp.*

FOR FURTHER INFORMATION CONTACT: Jeffery Quarles, Director, GPD Program, (673/GPD), VA National Grant and Per Diem Program Office, 10770 N 46th Street, Suite C–200, Tampa, FL 33617, (813) 979–3570. (This is not a toll-free number); *GPDGrants@va.gov.*

SUPPLEMENTARY INFORMATION: *Funding Opportunity Title:* GPD Per Diem Only Grant Program TIP.

Announcement Type: Initial.

Funding Opportunity Number: VA–GPD–TIP–FY2020.

Catalog of Federal Domestic Assistance Number: 64.024, VA Homeless Providers Grant and Per Diem Program.

I. Funding Opportunity Description

A. *Purpose:* This NOFA announces the availability of per diem funding to 501(c)(3) and 501(c)(19) non-profit organizations, state and local governments, and recognized Indian Tribal governments. Religious or faith-based organizations are eligible, on the same basis as any other organization, to apply to participate in this VA program. Faith-based organizations should refer to 38 CFR 61.64(b) through 61.64(g) for grant compliance requirements. Each

application must include a minimum of 5 TIP beds and up to a maximum of 20 TIP beds, per VA medical center (VAMC) catchment area, per each applicant's Employer Identification Number (EIN). Each applicant may request a maximum amount of per diem not to exceed $1.6 million total costs for the entire 3-year grant period. Applicants may request no more than $80,000 total costs per bed over the entire 3-year grant period based on the average number of beds to be provided as stated in the grant application. If more than one application per VAMC catchment area per applicant's EIN is received by the due date and time, VA will consider only one application. VA reserves the right to select which application to consider based on the submission dates and times or based on other factors.

Note: Applicants do not have to include coverage for the entire VAMC catchment area in the application. The coverage area, however, must not exceed the VAMC catchment area identified in the application. If an applicant does not know their VAMC catchment area, they can contact the local medical facility provided at the following address: *www.va.gov/directory/guide/allstate.asp* and ask to speak with the Homeless Program. Applicants are encouraged to tailor their proposed coverage area to factors such as their own ability and the particular needs of the community.

Applicants agree to meet the applicable requirements of 38 CFR part 61 as a part of the effort to end homelessness among our Nation's Veterans.

B. *Definitions:* Title 38 CFR part 61 contains definitions of terms used in the GPD Program that are applicable to this NOFA.

C. *Eligibility Information:* To be eligible, an applicant must be a 501(c)(3) or 501(c)(19) non-profit organization, state or local government, or recognized Indian Tribal government that meets the requirements in 38 CFR 61.1. Religious or faith-based organizations are eligible, on the same basis as any other organization, to participate in this VA program. Faith-based organizations should refer to 38 CFR 61.64(b) through 61.64(g) for grant compliance requirements.

D. *Cost Sharing or Matching:* None.

E. *Authority:* Funding applied for under this NOFA is authorized by 38 U.S.C. 2011, 2012.

F. *TIP Housing Model Description:*

Note: The model description below has *Required Minimum Performance Metrics/Targets* that are set for the award period (October 1, 2020–September 30, 2023). VA may, at its discretion, update these targets at any point during the award period. If any new targets come into effect, VA will notify grantees in writing.

Transition in Place

Targeted Population—Homeless Veterans who choose a supportive transitional housing environment providing services prior to entering permanent housing.

Model Overview—Provides transitional housing and robust services that facilitate individual stabilization, increased income, and movement of the Veteran to permanent housing in the residence as rapidly as clinically appropriate.

Characteristics & Standards—The TIP housing model offers Veteran residents housing in which supportive services transition out of the residence over time, rather than the resident. This leaves the resident in place at the residence and not forced to find other housing while stabilizing. It is expected that Veterans will transition in place in approximately 6 to 12 months. Applicants should be aware that for an extension beyond 12 months, prior written approval from the GPD Liaison would be required, and extensions would be considered in increments of up to 90 days at a time and generally not to exceed a combined total of up to 24 months per Veteran. This model does not support discharge planning that would have the Veteran transition to the Department of Housing and Urban Development–VA Supportive Housing (HUD–VASH) as the HUD–VASH Program targets a Veteran population in need of specialized case management. Similarly, this grant does not support discharge planning to Supportive Services for Veteran Families (SSVF) Rapid Rehousing.

Scope of services should incorporate tactics to increase the Veteran's income through employment and/or benefits and to secure the permanent housing in the Veteran's name. Services provided and strategies used by the applicant will vary based on the individualized needs of the Veteran and resources available in the community. Housing case management should be flexible in intensity, support client choice, use a strengths-based approach, and focus on housing retention and helping the household to develop, enhance, or re-engage a network of support that will continue with them after they finish TIP. Case managers are expected to work on tenancy support such as how to resolve conflicts, how to understand a lease, options for working through crises and other skills that will assist them in retaining housing when they are no longer in TIP. Applicants specify the staffing levels and range of services to be provided, which are expected to be multidisciplinary and robust.

Applicants identify or convert existing suitable apartment-style housing where homeless Veteran participants would receive intensive, time-limited, supportive services optimally for a period of 6–12 months, but sometimes longer, as described above with prior written approval from the GPD Liaison for extensions in increments of up to 90 days at a time and generally not to exceed a combined total of up to 24 months per Veteran. Upon completion, the Veteran must be able to ''transition in place'' by assuming the lease or other long-term agreement which enables the unit in which he or she resides to be considered the Veteran's permanent housing. Grantees are expected to replace units as they are converted to permanent housing to maintain the average number of bed days as stated in the application during the entire grant period. Once the Veteran assumes the lease or other long-term agreement, VA will no longer provide funding for the unit under this NOFA. For example, each time a Veteran assumes the lease or other long-term agreement for the apartment, the grantee must identify a new unit in which to place another Veteran. By program design, transition to permanent housing should occur as rapidly as possible, and grantees should continually be acquiring and coordinating with VA on the inspection of new units to maintain a steady number of Veterans served.

Applicants applying under this NOFA must own or lease apartments intended as permanent housing for an individual or single family. Apartments must meet the inspection standards outlined at title 38 CFR 61.80 and have the following characteristics:

1. Private access without unauthorized passage through another dwelling unit or private property;

2. Sanitary facilities within the unit;

3. Basic furnishings and living supplies (including, at minimum, a bed, chairs, table, and cookware); and

4. Suitable space and equipment within the unit to store, prepare, and serve food in a sanitary manner (including, at a minimum, a refrigerator, freezer, sink, and stove). *Note:* Microwave ovens, hot plates, or similar items are not suitable substitutes for an operational stove.

Required Minimum Performance Metrics/Targets—VA has established performance metrics/targets for all successful applicants. Discharge to permanent housing is 75 percent.

Employment of individuals at discharge is 55 percent. Negative exits are less than 20 percent. Negative exits are defined as those exits from a GPD program for a violation of program rules, failure to comply with program requirements, or leaving the program without consulting staff. VA may, at its discretion, update these targets at any point during the award period. If any new targets come into effect, VA will notify grantees in writing.

Participant Agreement Information

Lease Guarantors—A Lease Guarantor is a third party (in this case, the grantee) who guarantees to pay the lease costs if the lessee (in this case, the Veteran) defaults. This is not allowed under this program.

Sublease—The sublease is a lease by a lessee (in this case, the grantee) to a third party (in this case, the Veteran) conveying the leased property for a shorter term than that of the lessee, who retains a reversion in the lease. For the sake of clarity, in a sublease TIP housing scenario, the landlord is the lessor, the grantee is the lessee, and the Veteran is the sublessee.

GPD TIP grantees may use subleases during the transitional housing phase if the sublease has been approved by the GPD National Program Office, and the sublease meets the following conditions:

1. Period of sublease must be less than the entire period of the grantee's lease with the landlord.

2. Grantee lease renewal must be taken into consideration when stating the period of the sublease.

3. Sublease must be explicit that the grantee is the lessee, not the Veteran.

4. Sublease must revert back to the grantee lessee without sanctions to the Veteran should the Veteran leave prior to program completion and lease assumption.

5. Sublease may not contain requirements contrary to GPD regulations.

6. Security deposits may not be charged to Veterans. However, grantee lessees may take other available and appropriate legal steps in situations of property destruction.

Lease Assumption—When a third party (in this case the Veteran) assumes a lease, the original lessee does not retain any interest in the lease.

Low Income Housing Tax Credits—Grantees that use tax credit programs may request that Veterans fill out a tax credit application, as there is no prohibition in GPD regulations. The issues that could arise are operational and specific to GPD TIP. The following are two examples.

Example 1. Under the GPD TIP for which the grantee is funded, the Veteran may not ''assume'' a lease until the transitional housing phase is complete. A sublease may be used as long as it meets the requirements above. If the grantee is not leasing from another landlord, it will make a difference. As the relationship changes, the grantee is the lessor and the Veteran becomes the lessee. This is not a sublease. In this case some other form of program agreement may have to be used that meets the elements of items 4, 5, and 6 above and meets tax credit requirements.

Example 2. Income under tax credits is calculated differently than in GPD. The grantee must follow GPD regulations during the transitional phase, and only the Veteran's income may be counted as defined in 38 CFR 61.82. When the Veteran completes the program and then ''assumes'' the lease, the calculation of income will revert to the tax credit requirements. The Veteran should be apprised of this prior to program entry so appropriate planning can be put into place.

II. Award Information

A. *Allocation of funds:* Funding awarded under this NOFA will be for a period of 3 years, beginning on October 1, 2020, and ending on September 30, 2023, dependent upon factors such as funding availability, the recipient meeting the performance goals established in the grant agreement, utilization rates of beds or services, statutory and regulatory requirements, and the results of the VA inspection. Continuation of funding is not guaranteed.

B. *Funding Restrictions:* No part of an award under this NOFA may be used to facilitate capital improvements or to purchase vans or real property. Questions should be directed to VA's GPD National Program Office at the email address listed in the contact section of the NOFA. Applicants may not receive funding to replace funds provided by any Federal, state, or local government agency or program to assist homeless persons.

C. *Funding Limitations:*

1. VA's decisions will be based on factors such as need, geographic dispersion, and availability of funding.

2. Each application must include a minimum of 5 TIP beds and up to a maximum of 20 TIP beds, per VAMC catchment area, per each applicant's EIN.

3. Each applicant may request a maximum amount of per diem not to exceed $1.6 million total costs for the entire 3-year grant period. Applicants may request no more than $80,000 total costs per bed over the entire 3-year grant period based on the average number of beds to be provided as stated in the grant application.

III. Application and Submission Information

A. *To Obtain a Grant Application:* Applicants must submit applications electronically following instructions found at: *www.va.gov/homeless/gpd.asp.* The required documentation for an application submission is outlined below in the Application Documentation Required, section IV of this NOFA. Standard forms, which must be included as part of a complete application package, may be downloaded directly from VA's GPD Program website at: *www.va.gov/homeless/gpd.asp.* Questions should be referred to the GPD National Program Office at: *GPDGrants@va.gov.* For detailed GPD Program information and requirements, see 38 CFR part 61.

B. *Content and Form of Application:* VA is seeking to focus resources to assist Veterans who are homeless or at risk of becoming homeless. If your agency is unclear as to how to apply, contact the GPD National Program Office for clarification prior to submission of any application to ensure it is submitted in the correct format.

Applicants should ensure that they include all required documents in their electronic application submission, carefully follow the format and provide the information requested and described below. Submission of an incorrect, incomplete, or incorrectly formatted application package will result in the application being rejected.

IV. Application Documentation Required

A. *Standard Forms (SF) and budget information:*

1. Application for Federal Assistance (SF–424).

2. Indirect cost information: Applicants that have a negotiated indirect cost rate agreement must provide a copy of the agreement as an attachment to the application if they wish to charge indirect costs to the grant. Applicants without a negotiated indirect cost rate agreement may request the *de minimis* rate for indirect costs if they meet the definitions and requirements of 2 CFR part 200. All other allowable costs will be considered only if they are direct costs.

B. *Eligibility:* State/local government entities must provide as an attachment to the application a copy of any comments or recommendations by approved state and area-wide

clearinghouses pursuant to Executive Order 12372.

C. *System for Award Management (SAM):* Applicants must provide a current Data Universal Numbering System (DUNS) number, Unique Entity Identifier (UEI) and SAM expiration date.

D. *Project Summary:*

1. Name and station number of the VAMC whose catchment area includes the transitional housing location(s) requested in this application. If requesting multiple sites, all sites must fall within the same VAMC catchment area. If requesting multiple sites, applicants should make sure each proposed site is strongly justified and well developed. The quality of each site will impact the overall score of the application.

2. Name(s) and number(s) of the Continuum of Care (CoC) where the transitional housing requested in this application will be located. If requesting sites in multiple CoCs, applicants should make sure sites in each CoC are strongly justified and well developed. The quality of sites in each CoC will impact the overall score of the application.

3. Number of beds for which your agency is requesting per diem in this application. Total request to VA for all beds for the entire 3-year period.

4. Location of housing provided under this application. For fixed sites, identify the address, city, state, zip code + four-digit extension, county, other counties served, congressional district, the number of GPD beds at each location, and gender(s) served. For sites whose locations are not available at the time of application, provide the names of all counties in which services will be provided.

5. Per location, a description of how the facility's participant living space will be configured. Include the square footage of the room or unit, the number of beds in that square footage and other descriptive information (*e.g.,* Single Room Occupancy, 100 square feet, no bunk beds; Apartment(s), 1,500 square feet, 1, 2, or 3 bedroom(s), no bunk beds). Identify any differences between locations, if applicable.

6. Description of whether your agency currently uses the Homeless Management Information System (HMIS) and if so, describe your participation with HMIS. HMIS is a locally-administered Web-based data system used to record and analyze both program and client information at the local CoC level. It is used by other Federal partners, including VA, to measure project performance and participate in benchmarking of the national effort to end homelessness. Currently, using HMIS is optional for GPD grantees. However, it can be a useful tool for program monitoring and also for coordination with community partners. Additionally, many communities use HMIS to conduct Coordinated Entry assessments. Applicants should be connected to Coordinated Entry, the Veteran Master List/By Name List, and Case Conferencing to support referrals to the program.

E. *Applicant Contact Information:*

1. Location of the administrative office where correspondence can be sent to the Executive Director/President/Chief Executive Officer (CEO) (no Post Office Boxes). Include complete address, city, state, zip code + four-digit extension, county, and congressional district.

2. *Organization Primary Contact:* Include the name, title, phone, and email address. Note: GPD views the organization primary contact as assigned to the organization, not a specific grant award, and should be someone who normally signs grant agreements or makes executive decisions for the organization. This is most often the Executive Director, the President, or the CEO. Organizations with multiple awards can only have one Organization Contact.

3. *Grant Contact #1:* Include the name, title, phone, and email address. *Note:* This contact is specific to this grant application and may be a Program Manager, Director, Case Manager, Grant Administrator, or other position overseeing the GPD grant project.

4. Provide as an attachment to the application a complete listing of your agency's officers of the Board of Directors and each person's address, phone, and email address.

F. *Project Abstract:* In approximately 500 words, provide a brief abstract of the proposed project. As applicable, include a discussion of multiple sites, multiple CoCs, and/or other information relevant to an understanding of the overall project.

G. *Detailed Application Design:* This is the portion of the application that describes your proposed program. VA reviewers will focus on how the detailed application design addresses the areas of outreach, project plan, ability, need, and coordination including how supportive services will be coordinated. VA expects applicants awarded under this NOFA will meet the VA performance metrics. With those metrics in mind, and in response to the following sections, please include strategies to meet or exceed VA's national metric targets. Applicants are encouraged to discuss specifics about their case management intervention approaches within each of the questions below, as applicable. Applications that demonstrate intensive approaches to case management that are strengths-based, evidence-based, multidisciplinary, multiphasic, structured, flexible in intensity, and integrated with personal networks and with the VA or mainstream community that will be most responsive to this NOFA. Examples include critical time intervention (CTI), motivational interviewing, progressive engagement/progressive assistance, and other approaches or a combination of approaches. The requirements in this section are consistent with 38 CFR part 61.

(a) *Outreach (see 38 CFR 61.13(c)):* This is the portion of the application where applicants will discuss how the outreach plan is tailored to the project and how services will be provided to Veterans living in places not ordinarily meant for human habitation (*e.g.,* streets, parks, abandoned buildings, automobiles, emergency shelters). Applications will be scored on responses to the following questions:

1. Outreach—In approximately 250 words, describe your agency's plan to conduct outreach, including frequency of outreach, to your selected Veteran population(s) living in places not ordinarily meant for human habitation (*e.g.,* streets, parks, abandoned buildings, automobiles, emergency shelters).

2. Outreach—In approximately 1,000 words, describe where your organization will target and tailor its outreach efforts to identify appropriate Veterans for this program. Additionally, applicants should discuss their plans for orienting Veterans about the program's process and timeline prior to enrollment.

3. Outreach—In approximately 500 words, describe your agency's involvement in the Coordinated Assessment/Entry efforts of the CoC(s) named in Project Summary question IV.D.2. and how this project would be involved in coordinated entry efforts. Describe how your organization's outreach plan fits into each CoC's plan to end homelessness.

(b) *Project Plan (see 38 CFR 61.13(b)):* VA wishes to provide the most appropriate housing based on the needs of the individual Veteran. Applications will be scored on responses to the following questions:

1. Project Plan— In approximately 2,000 words, provide a list of the supportive services offered to help participants achieve residential

stability, increase skill level and/or income, and become involved in making life decisions that will increase self-determination. This list should include a brief description of the service; the minimum frequency that the service will be offered; and the job title, including minimum credentials of the individual(s) who will provide the service. It is expected that these services be available during flexible hours (*e.g.,* accommodating for participants who are employed or have other obligations) and that case management services, to the extent possible, include regular home visits, when appropriate. Applicants are expected to provide intensive services that are strengths-based, evidence-based, multidisciplinary, multiphasic, structured, flexible in intensity, and integrated with personal networks and with the VA or mainstream community. Applicants who are employing a formal approach to services such as CTI, motivational interviewing, progressive engagement/progressive assistance, and other approaches or a combination of approaches, should include descriptions accordingly.

2. Project Plan—In approximately 500 words, describe the specific process and criteria for deciding which Veterans are appropriate for admission.

3. Project Plan—In approximately 500 words, address whether the project will serve mixed gender populations and/or individuals with children. Provide a listing and explanation of any gender-specific services.

4. Project Plan—In approximately 500 words, describe how the safety, security, and privacy of participants will be ensured.

5. Project Plan—In approximately 500 words, provide your agency's Individual Service Plan (ISP) methodology and the core items to be addressed in the ISP. The goal is to ensure that Veterans have the tools they need to maximize their ability to pay rent, to understand landlord/tenant rights and responsibilities, and to be proactive in addressing issues that may have contributed to a loss of housing in the past. Additionally, applicants should describe their plans for various phases of the program including how to identify when it is appropriate to transition and how progress could be completed within a period of 6–12 months. Applicants should be aware that for an extension beyond 12 months, prior written approval from the GPD Liaison is required. Extensions would be considered in increments of up to 90 days at a time and generally not to exceed a combined total of up to 24 months per Veteran.

6. Project Plan—In approximately 500 words, describe how, when, and by whom participants' progress toward meeting their individual goals will be monitored, evaluated, and documented. Include descriptions of how progress notes, case conferencing, and supervision will be documented. Applicants are expected to provide intensive case management that is strengths-based, evidence-based, multidisciplinary, multiphasic, structured, flexible in intensity, and integrated with personal networks and with the VA or mainstream community. This approach to case management usually would involve a team of clinicians, case managers, and if applicable, social worker(s), nurse(s), or other appropriate personnel with skills in community-based service delivery.

7. Project Plan—In approximately 500 words, describe how you will work with Veterans to help them gain skills to assist in retaining housing after TIP support ends. Describe how you will determine when the Veteran is ready to assume the lease or long-term agreement. Additionally, applicants should describe how exceptional cases will be handled (*e.g.,* cases in which Veterans need more or less than the usual time to complete the program).

8. Project Plan—In approximately 500 words, describe how you will ensure that each Veteran receives individualized services to meet permanent housing goals. Indicate how the program plans to meet VA's metrics/targets and meet the goals of the community within which the grantee is working.

9. Project Plan—In approximately 500 words, describe how necessary follow-up services will be provided. For example, the Project Plan should describe how often they will occur and the duration of the follow up.

10. Project Plan—In approximately 500 words, describe how Veteran participants will have a voice and aid in operating and maintaining the housing (*e.g.,* volunteer time, paid positions, community governance meetings, peer support).

11. Project Plan—In approximately 500 words, if your agency plans to use any subrecipient(s) and/or contractor(s) for operating and/or maintaining the housing, describe the responsibilities of the subrecipient(s) and/or contractor(s).

12. Project Plan—In approximately 500 words, describe program policies regarding a clean and sober environment. Include in the description how participant relapse will be handled and how these policies will affect the admission and discharge criteria.

13. Project Plan—In approximately 500 words, provide and describe the type and implementation of the medication control system that will be used in this project (*e.g.,* Medication Management, Medication Monitoring, individual storage). For reference, applicants may review these requirements at: *www.va.gov/homeless/gpd.asp.*

14. Project Plan—In approximately 250 words, describe program polices regarding participant agreements, including any leases and subleases, if used.

15. Project Plan—In approximately 250 words, describe program polices regarding extracurricular fees.

16. Project Plan—In approximately 500 words, describe how you will aid Veterans who seek employment and income maximization goals, such as increased income, increased benefits, reduced expenses, or improved financial management skills. Please note that services such as Supplemental Security Income and Social Security Disability Insurance (SSI/SSDI) Outreach, Access, and Recovery (SOAR) and other income maximization strategies may be used by applicants.

17. Project Plan—In approximately 500 words, address how your agency will facilitate the provision of nutritional meals for the Veterans. Be sure to describe how Veterans with little or no income will be assisted.

18. Project Plan—In approximately 250 words, describe how you will facilitate transportation of the Veteran participants to appointments, employment, and supportive services.

(c) *Ability (see 38 CFR 61.13(d)):* This is the portion of the application where applicants demonstrate their ability to develop, operate, and complete the project with necessary staff and experience regarding the selected population(s). Applications will be scored on responses to the following questions:

1. Ability—Provide as an attachment to the application a table or spreadsheet of the staffing plan for this project (see Example 3). Do not include resumés. Information provided here should be consistent with information provided in project plan question number 6 and with information provided elsewhere in the application.

Example 3:

Job title	Brief (1–2 sentence) description of responsibilities	Educational level	Hours per week allocated to GPD project (40 hours equals full-time)	Amount of annual salary allocated to the GPD project	Amount of salary for the full-time position
Case Manager	Responsible for working with the Veteran to develop and monitor an individual service plan and to adjust the plan, as needed. Coordinates support with other community agencies.	BSW	30 hours	$60,000	$80,000

2. Ability—In approximately 500 words, describe your agency's previous experience assessing and providing for the housing needs of homeless Veterans.

3. Ability—In approximately 500 words, describe your agency's previous experience assessing and providing supportive services to homeless Veterans. Applicants should describe their previous experience, if any, using and receiving training in intensive case management services to homeless Veterans that are strengths-based, evidence-based, multidisciplinary, multiphasic, structured, flexible in intensity, and integrated with personal networks and with the VA or mainstream community. Applicants with previous experience in formal approaches such as CTI, motivational interviewing, progressive engagement/progressive assistance, and other formal approaches, should include descriptions accordingly.

4. Ability—In approximately 500 words, describe your agency's ability to get the project started within 180 days from the potential award date. Describe the start-up activities, the timing involved, and when the project would be expected to be fully functional.

5. Ability—In approximately 500 words, describe your agency's previous experience in assessing supportive service resources and entitlement benefits.

6. Ability—In approximately 500 words, describe your agency's previous experience with evaluating the progress of both individual participants and overall program effectiveness using quality and performance data to make changes. Describe your agency's experience with meeting past performance goals. Do not include past inspection forms or past VA performance reports with the application.

7. Ability—In approximately 250 words, describe whether your agency is accredited and/or licensed to provide clinical services. If yes, describe your agency's accreditation and/or licensure. If applicable, include specific details, such as training completion dates, training titles, and training providers. Some generally accepted accreditations include: (1) Commission on Accreditation of Rehabilitation Facilities in Community Employment Services or in Rapid Rehousing and Homeless Prevention Program; (2) a 4-year accreditation from the Council on Accreditation's accreditation in Housing Stabilization and Community Living Services standards; and (3) a 3-year accreditation in the Joint Commission's Behavioral Health Care: Housing Support Services Standards; among others.

8. Ability—In approximately 500 words, describe the organization's staff development plan to help staff gain and maintain the knowledge, skills, and abilities to provide culturally competent and relevant related services to people impacted by racial inequity. Include details on how staff will participate in specific training activities.

(d) *Need (see 38 CFR 61.13(e)):* This is the portion of the application where applicants demonstrate that the proposed project is necessary. Applications will be scored on responses to the following questions:

1. Need—In approximately 500 words, describe how this project is tailored to the particular needs of the CoC(s) and fit with the strategy of the CoC(s) to end homelessness. Cite reliable data from surveys of homeless populations or other reports or data-gathering mechanisms. Additionally, applicants should describe how caseloads will be kept low (typically 20 or less per case manager) while also meeting the community's need. Note: If multiple CoCs are named in the Project Summary question IV.D.2, your response here should discuss each of those CoCs.

2. Need—In approximately 500 words, describe with whom you consulted outside of your agency to determine the need for the proposed project within the CoC(s). Note: If multiple CoCs are named in the Project Summary question IV.D.2, your response here should discuss each of those CoCs.

(e) Coordination (see 38 CFR 61.13(g)): This is the portion of the application where applicants will demonstrate their involvement in the homeless Veteran continuum. Applications will be scored on responses to the following questions:

1. Coordination—In approximately 500 words, describe how your agency is part of an ongoing community-wide planning process to end Veteran homelessness. Note: If multiple CoCs are named in the Project Summary question IV.D.2, your response here should discuss each of those CoCs.

2. Coordination—In approximately 500 words, describe how your process is designed to share information on available resources and reduce duplication among programs that serve homeless Veterans. Note: If multiple CoCs are named in the Project Summary question IV.D.2, your response here should discuss each of those CoCs. Applicants who wish to provide a letter(s) of coordination from the local CoC(s) must attach a letter at the end of the application. Applicants are strongly encouraged to allow as much time as possible, and no less than 30 days, for a CoC to provide a letter of coordination. All application materials must be submitted together in a single package by the due date and time. Any materials arriving separately or late will not be accepted as part of the application.

3. Coordination—In approximately 500 words, describe how your agency has coordinated GPD services with other programs offered in the CoC(s) named in the Project Summary question IV.D.2.

4. Coordination—In approximately 250 words, describe how your agency consulted directly with the VAMC Director (or the appropriate authorized VAMC representative per the local VAMC's practice) regarding coordination of services for project

participants. Provide your plan to ensure access to health care, case management, and other care services. Applicants who wish to provide a letter of coordination from the local VAMC must attach a letter at the end of the application. Applicants are strongly encouraged to allow as much time as possible (not less than 30 days) for a VAMC to provide a letter of coordination. All application materials must be submitted together in a single package by the due date and time. Any materials arriving separately or late will not be accepted as part of the application.

5. Coordination—Applicants may attach to their application a letter(s) of coordination from their proposed multidisciplinary case management team partner(s) if applicable. Applicants are encouraged to provide a letter(s) of coordination if proposing a team consisting of partners external to the applicant organization (*e.g.,* personnel services hired or contracted through a third party or personnel services leveraged from other resources outside of grant funds). If including a letter(s) of coordination, applicants are strongly encouraged to allow as much time as possible (not less than 30 days) for a partner to provide a letter of coordination. All application materials must be submitted together in a single package by the due date and time. Any materials arriving separately or late will not be accepted as part of the application.

Note: Applicants should not provide self-report letters of coordination on their own internal operations. For example, if applicants are planning to hire a licensed social worker to coordinate care, they do not need to write a letter of coordination for themselves.

V. Application Review Information

A. *Criteria for Grants:* Submission of an incorrect, incomplete, or incorrectly formatted application package will result in the application being rejected at threshold. Applications that meet threshold will be scored according to the rating criteria described in 38 CFR 61.32 to score grant applications. Applications will then be ranked based on that score. The highest-ranking applications with a score of 750 or higher will be considered for funding in rank order as funding allows.

B. *Review and Selection Process:* Review and selection process may be found at 38 CFR 61.13 and 38 CFR 61.32.

C. *Tie Score:* In the event of a tie score between applications, VA will use the score from the Coordination section to determine the ranking, as required by 38 CFR 61.32(b). If further determinations are needed to break a tie, VA will decide at its discretion how to handle selection decisions (*e.g.,* selecting multiple applications for award, awarding for less than requested).

D. *Funding Actions:* Funding is not guaranteed. Conditionally-selected applicants will be asked to submit additional information under 38 CFR 61.32. Applicants will be notified of the deadline to submit such information. If an applicant is unable to meet any conditions for the grant award within the specified time, VA may non-select the applicant and may use the funding for another applicant(s). VA may negotiate bed numbers or other arrangements with conditionally-selected applicants and will incorporate any changes into the grant agreement. Prior to awarding a grant agreement, VA reserves the right to adjust up or down (*e.g.,* funding levels, bed numbers, locations) as needed within the intent of the NOFA based on a variety of factors including the quantity and quality of applications, as well as the availability of funding. VA may elect to award additional applications based on the availability of funds and quality of applications. Upon signature of the grant agreement by the Secretary, or designated representative, final selection will be completed, and the grant funds will be obligated for the funding period.

VI. Award Administration Information

A. *Award Notice:* Although subject to change, the GPD National Program Office expects to announce grant awards in the fourth quarter of Fiscal Year 2020. Awards will be for 3 years. Continuation funding is not guaranteed. VA reserves the right in any year to adjust up or down (*e.g.,* funding levels, bed numbers, locations) as needed within the intent of the NOFA based on a variety of factors including availability of funding and performance. The initial announcement will be made via news release which will be posted on VA's GPD National Program website at: *www.va.gov/homeless/gpd.asp.* Following the initial announcement, the GPD Office will send notification letters to the grant recipients. Applicants who are not selected will be sent a declination letter.

B. *Administrative and National Policy:* VA places great emphasis on responsibility and accountability. VA has procedures in place to monitor services provided to homeless Veterans and outcomes associated with the services provided under this GPD program. All awardees that are selected in response to this NOFA must meet the requirements of the current edition of the Life Safety Code of the National Fire Protection Association as it relates to their specific facility. Applicants should note that all facilities must be protected throughout by an approved automatic sprinkler system unless a facility is specifically exempt under the Life Safety Code. Applicants should consider this when submitting their grant applications, as no funds will be made available for capital improvements under this NOFA.

C. *Payment:* Per diem will be paid in a method that is in accordance with VA and other Federal fiscal requirements. The per diem payment will be at a rate not to exceed 1.5 times the current VA State Home Program per diem rate for domiciliary care as set by the Secretary under 38 United States Code (U.S.C.) section 2012 and 38 U.S.C. 1741(a)(1). The per diem payment calculation may be found at 38 CFR 61.33. Awardees will be subject to requirements of this NOFA, GPD regulations, 2 CFR part 200, and other Federal grant requirements. A full copy of the regulations governing the GPD Program is available at the GPD website at: *www.va.gov/homeless/gpd.asp.* Awardees will be required to support their request for payments with adequate fiscal documentation as to project income and expenses. Awardees that have a negotiated indirect cost rate agreement must provide GPD with an updated copy annually or when available.

D. *Reporting:*

1. Upon execution of a grant agreement with VA, grantees will have a liaison appointed from a nearby VAMC to provide oversight and monitor services provided to homeless Veterans in the program.

2. Monitoring will include, at a minimum, a quarterly review of each per diem program's progress toward meeting VA's performance metrics, helping Veterans attain housing stability, adequate income support, and self-sufficiency as identified in the application. Monitoring may also include a review of the agency's income and expenses as they relate to this project to ensure payment is accurate and to ensure compliance with program requirements. The grantee will be expected to demonstrate adherence to the grantee's proposed program concept, as described in the grantee's application. All grantees are subject to audits conducted by VA or its representative.

3. Each funded program will participate in VA's national program monitoring and evaluation as these procedures will be used to determine successful accomplishment of housing,

employment, and self-sufficiency outcomes for each per diem-funded program. Note: The model description above has *Required Minimum Performance Metrics/Targets* that are set for the award period (October 1, 2020–September 30, 2023). VA may, at its discretion, update these targets at any point during the award period. If any new targets come into effect, VA will notify grantees in writing.

4. It is expected that Veterans will transition in place in approximately 6 to 12 months. Grantees should be aware that for an extension beyond 12 months, prior written approval from the GPD Liaison would be required. Extensions would be considered in increments of up to 90 days at a time and generally not to exceed a combined total of up to 24 months per Veteran.

Signing Authority

The Secretary of Veterans Affairs, or designee, approved this document and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs. Pamela Powers, Chief of Staff, Department of Veterans Affairs, approved this document on February 12, 2020, for publication.

Luvenia Potts,

Regulation Development Coordinator, Office of Regulation Policy & Management, Office of the Secretary, Department of Veterans Affairs.

BILLING CODE 8320–01–P

DEPARTMENT OF VETERANS AFFAIRS

Advisory Committee on the Readjustment of Veterans, Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act that a meeting of the Department of Veterans Advisory Committee on the Readjustment of Veterans will be held on Monday, March 16–Wednesday, March 18, 2020, at 811 Vermont Avenue (The Lafayette Building), Conference Room 3172/3174, Washington, DC 20420. The meeting sessions will begin and end as follows:

Date	Time
March 16, 2020	9:00 a.m. to 5:00 p.m. EST.
March 17, 2020	9:00 a.m. to 5:00 p.m. EST.
March 18, 2020	9:00 a.m. to 12:00 p.m. EST.

The meetings sessions are open to the public.

The Committee, comprised of 12 subject matter experts, advises the Secretary, through the VA Readjustment Counseling Service, on the provision by VA of benefits and services to assist Veterans in the readjustment to civilian life. In carrying out this duty, the Committee assembles, reviews, and assesses information relating to the needs of Veterans readjusting to civilian life and the effectiveness of VA services in assisting Veterans in that readjustment, specifically taking into account the needs of Veterans who served in combat theaters of operation.

On March 16, 2020, the agenda will include a training session regarding the roles and responsibilities of the individuals as Committee members, a review of the legislation which gave birth to the Committee, historical perspective, and welcoming remarks from VA officials on new and ongoing VA initiatives and priorities regarding this specific population of interest. On March 17, 2020, the agenda will include a report from the subcommittee on work accomplished in the past year, and additional remarks by VA officials on ongoing VA initiatives and priorities. On March 18, 2020, the morning will include planning session for the work to be accomplished during the course of the year.

No time will be allotted for receiving oral comments from the public; however, the public can submit written statements for the Committee's review to Ms. Sherry Moravy, Designated Federal Officer, Readjustment Counseling Service (10RCS), Department of Veterans Affairs, 1717 H Street NW, Washington, DC 20420, or by email at *VHA10RCSAction@va.gov.* Any member of the public wishing to attend the meeting or seeking additional information should contact Ms. Moravy at the phone number (734) 222–4319 or email address noted above.

Dated: February 11, 2020.

Jelessa M. Burney,

Federal Advisory Committee Management Officer.

Medicare and Medicaid Programs; Contract Year 2021 and 2022 Policy and Technical Changes to the Medicare Advantage Program, Medicare Prescription Drug Benefit Program, Medicaid Program, Medicare Cost Plan Program, and Programs of All-Inclusive Care for the Elderly

AGENCY: Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services (HHS).

ACTION: Proposed rule.

SUMMARY: This proposed rule would revise regulations for the Medicare Advantage (Part C) program, Medicare Prescription Drug Benefit (Part D) program, Medicaid program, Medicare Cost Plan program, and Programs of All-Inclusive Care for the Elderly to implement certain sections of the Bipartisan Budget Act of 2018, the Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment for Patients and Communities Act, and the 21st Century Cures Act. This proposed rule would also enhance the Part C and D programs, codify several existing CMS policies, and implement other technical changes.

DATES: To be assured consideration, comments must be received at one of the addresses provided below, no later than 5 p.m. on April 6, 2020.

ADDRESSES: In commenting, please refer to file code CMS–4190–P. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission. Comments, including mass comment submissions, must be submitted in one of the following three ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to *http://www.regulations.gov.* Follow the ''Submit a comment'' instructions.

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–4190–P, P.O. Box 8013, Baltimore, MD 21244–8013.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–4190–P, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT:
Theresa Wachter, (410) 786–1157, or Cali Diehl, (410) 786–4053—General Questions.
Kimberlee Levin, (410) 786–2549—Part C Issues.

I. Executive Summary

A. Executive Summary

1. Purpose

The primary purpose of this proposed rule is to implement certain sections of the following federal laws related to the Medicare Advantage (MA or Part C) and Prescription Drug Benefit (Part D) programs:

- The Bipartisan Budget Act of 2018 (hereinafter referred to as the BBA of 2018)
- The Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment (SUPPORT) for Patients and Communities Act (hereinafter referred to as the SUPPORT Act)
- The 21st Century Cures Act (hereinafter referred to as the Cures Act)

The rule would also include a number of changes to strengthen and improve the Part C and D programs, codify in regulation several CMS interpretive policies previously adopted through the annual Call Letter and other sub-regulatory guidance documents, and implement other technical changes for contract year 2021 and 2022. In the fall of 2017, CMS launched the Patients over Paperwork initiative. The key focus of this initiative is to reduce ''red tape'' that depletes resources from our healthcare system and wastes the time clinicians and other healthcare workers need to perform their primary mission—caring for patients.

In keeping with the success of this program, CMS continues to review its regulatory requirements and sub-regulatory policies to examine opportunities to prioritize the well-being of patients over the CMS requirements on the healthcare industry. In particular, the Patients over Paperwork initiative charges CMS to analyze the impact of existing requirements and remove unnecessary burdens. As part of this, CMS is streamlining and clarifying certain patient protections and codifying important sub-regulatory guidance in the Code of Federal Regulations. This provides an opportunity for the public to review and comment on proposed requirements and provides transparency into CMS's rules and guidance.

2. Summary of the Major Provisions

a. Mandatory Drug Management Programs (DMPs) (§ 423.153)

Section 704 of the Comprehensive Addiction and Recovery Act of 2016 (hereinafter referred to as CARA) included provisions permitting Part D sponsors to establish drug management programs (DMPs) for beneficiaries at-risk for misuse or abuse of frequently abused drugs (FADs). Under the DMPs in place today, Part D sponsors engage in case management of potential at-risk beneficiaries (PARBs) through contact with their prescribers to determine whether the beneficiary is at-risk for prescription drug misuse or abuse. If a beneficiary is determined to be at-risk, after notifying the beneficiary in writing, the sponsor may limit their access to coverage of opioids and/or benzodiazepines to a selected prescriber and/or network pharmacy(ies) and/or through a beneficiary-specific point-of-sale (POS) claim edit.

While the majority of Part D sponsors have already voluntarily implemented DMPs, CMS is proposing the requirement of mandatory implementation of DMPs by Part D sponsors, for plan years beginning on or after January 1, 2022, as required under section 2004 of the SUPPORT Act.

b. Beneficiaries With History of Opioid-Related Overdose Included in Drug Management Programs (DMPs) (§ 423.100)

A past overdose is the risk factor most predictive for another overdose or suicide-related event.[1] In light of this fact, in section 2006 of the SUPPORT Act, Congress required CMS to include Part D beneficiaries with a history of opioid-related overdose (as defined by the Secretary) as PARBs under a Part D plan's DMP. CMS is also required under this section to notify the sponsor of such identifications. In line with this requirement, we are proposing to modify the definition of ''potential at-risk beneficiary'' at § 423.100 to include a Part D eligible individual who is identified as having a history of opioid-related overdose, as we propose to define it. Inclusion of beneficiaries with a history of opioid-related overdose as PARBs in DMPs will allow Part D plan sponsors and providers to work together to closely assess these beneficiaries' opioid use and determine whether any additional action is warranted.

c. Automatic Escalation to External Review Under a Medicare Part D Drug Management Program (DMP) for At-Risk Beneficiaries (§§ 423.153, 423.590, and 423.600)

CMS is proposing that, if on reconsideration a Part D sponsor affirms its denial of a DMP appeal, the case shall be automatically forwarded to the independent outside entity for review and resolution. We are proposing that a plan sponsor must forward the case to the independent outside entity by the expiration of the adjudication timeframe applicable to the plan level appeal. Finally, we are proposing conforming

[1] Bohnert KM, Ilgen MA, Louzon S, McCarthy JF, Katz IR. Substance use disorders and the risk of suicide mortality among men and women in the US Veterans Health Administration. Addiction. 2017 Jul;112(7):1193–1201. doi: 10.1111/add.13774.

revisions to the notices that are sent to beneficiaries.

d. Suspension of Pharmacy Payments Pending Investigations of Credible Allegations of Fraud and Program Integrity Transparency Measures (§§ 405.370, 422.500, 422.503, 423.4, 423.504, and 455.2)

CMS proposes to undertake rulemaking to implement the provisions outlined in sections 2008 and 6063 of the SUPPORT Act, which are summarized in the following sections (1) and (2). Implementing these provisions will allow CMS, MA organizations and Medicare Part D plan sponsors (including MA organizations offering MA–PD plans) to share data and information regarding bad actors, take swift action based on such data and information, and achieve enhanced outcomes in our efforts to fight the opioid crisis. In addition, this regulation will provide the means for more effective referrals to law enforcement based on plan sponsor reporting, ultimately resulting in reduced beneficiary harm and greater savings for the Medicare program.

(1) Section 2008 of the SUPPORT Act

Title XVIII of the Social Security Act (the Act) provides authority for CMS to suspend payments to Medicare fee-for-service (FFS) providers and suppliers pending an investigation of a credible allegation of fraud, unless a good cause exception applies. While Part D plan sponsors currently have the discretion to suspend payments to pharmacies in the plans' networks, section 2008 requires that plan sponsors' payment suspensions based on credible allegations of fraud be implemented in the same manner as CMS implements such payment suspensions. Under this provision, plan sponsors are required to notify the Secretary of the imposition of a payment suspension that is based on a credible allegation of fraud and may do so using a secure website portal. The reporting requirement applicable to plan sponsors will only apply to suspended payments based on credible allegations of fraud as required by section 2008 and will not extend to other payment suspensions for which plan sponsors already have authority. Section 2008 also clarifies that a fraud hotline tip, without further evidence, is not considered a credible fraud allegation for payment suspension purposes.

(2) Section 6063 of the SUPPORT Act

Section 6063 requires the Secretary to establish a secure internet website portal to enable the sharing of data among MA plans, prescription drug plans, and the Secretary, and referrals of ''substantiated or suspicious activities'' of a provider of services (including a prescriber) or a supplier related to fraud, waste, or abuse to initiate or assist with investigations conducted by eligible entities with a contract under section 1893 of the Act, such as a Medicare program integrity contractor. The Secretary is also required to use the portal to disseminate information to all MA plans and prescription drug plans on providers and suppliers that were referred to CMS for fraud, waste, and abuse in the last 12 months; were excluded or the subject of a payment suspension; are currently revoked from Medicare; or, for such plans that refer substantiated or suspicious activities to CMS, whether the related providers or suppliers were subject to administrative action for similar activities. The Secretary is required to define what constitutes substantiated or suspicious activities. Section 6063 specifies that a fraud hotline tip without further evidence shall not be treated as sufficient evidence for substantiated fraud, waste, or abuse.

Section 6063 also requires the Secretary to disseminate quarterly reports to MA plans and prescription drug plans on fraud, waste, and abuse schemes and suspicious activity trends reported through the portal. The Secretary's reports are to maintain the anonymity of information submitted by plans and to include administrative actions, opioid overprescribing information, and other data the Secretary, in consultation with stakeholders, determines important.

Beginning with plan year 2021, section 6063 also requires Part D plan sponsors to submit to the Secretary information on investigations, credible evidence of suspicious activities of providers or suppliers related to fraud, and other actions taken by the plans related to inappropriate opioid prescribing. The Secretary is required to issue regulations that define the term inappropriate prescribing with respect to opioids, identify a method to determine if providers are inappropriately prescribing, and identify the information plan sponsors are required to submit.

e. Medicare Advantage (MA) Plan Options for End-Stage Renal Disease (ESRD) Beneficiaries (§§ 422.50, 422.52, and 422.110)

The Cures Act (Pub. L. 114–255) amended sections 1851, 1852, and 1853 of the Act to expand enrollment options for individuals with end stage renal disease (ESRD) and make associated payment and coverage changes to the MA and original Medicare programs. Specifically, since the beginning of the MA program, individuals with ESRD have not been able to enroll in MA plans subject to limited exceptions. Section 17006(a) of the Cures Act removed this prohibition effective for plan years beginning on or after January 1, 2021. We are proposing to codify this change with revisions to §§ 422.50(a)(2), 422.52, and 422.110.

f. Medicare Fee-for-Service (FFS) Coverage of Costs for Kidney Acquisitions for Medicare Advantage (MA) Beneficiaries (§ 422.322)

With this new enrollment option, the Cures Act also made several payment changes in the MA and original Medicare FFS programs. Section 17006(c) of the Cures Act amended section 1852(a)(1)(B)(i) of the Act to exclude from the Medicare benefits an MA plan is required to cover for an MA enrollee coverage for organ acquisitions for kidney transplants, including as covered under section 1881(d) of the Act. Effective January 1, 2021, these costs will be covered under the original Medicare FFS program. Section 17006(c)(2) of the Cures Act also amended section 1851(i) of the Act, providing that CMS may pay an entity other than the MA organization that offers the plan in which the individual is enrolled for expenses for organ acquisitions for kidney transplants described in section 1852(a)(1)(B)(i) of the Act. We propose changes to our regulation at § 422.322 to align with these new statutory requirements.

g. Exclusion of Kidney Acquisition Costs From Medicare Advantage (MA) Benchmarks (§§ 422.258 and 422.306)

Since the original Medicare FFS program will cover costs of organ acquisitions for kidney transplants for individuals in an MA plan, section 17006(b) of the Cures Act also amended section 1853 of the Act to exclude these costs from the MA benchmarks used in determining payment to MA plans. Specifically, the Secretary, effective January 1, 2021, is required to exclude the estimate of standardized costs for payments for organ acquisitions for kidney transplants from MA benchmarks and capitation rates. We propose changes to our regulations at §§ 422.258(d) and 422.306 to align with these new statutory requirements.

h. Medicare Advantage (MA) and Part D Prescription Drug Program Quality Rating System (§§ 422.162, 422.164, 422.166, 422.252, 423.182, 423.184, and 423.186)

In the Medicare Program; Contract Year 2019 Policy and Technical Changes to the Medicare Advantage, Medicare Cost Plan, Medicare Fee-for-Service, the Medicare Prescription Drug Benefit Programs, and the PACE Program Final Rule (hereinafter referred to as the April 2018 final rule), we codified the methodology for the Star Ratings system for the MA and Part D programs, respectively, at §§ 422.160 through 422.166 and §§ 423.180 through 423.186. We will propose through rulemaking any changes to the methodology for calculating the ratings, the addition of new measures, and substantive measure changes.

At this time, in addition to routine measure updates and technical clarifications, we are proposing to further increase the weight of patient experience/complaints and access measures from a weight of 2 to 4. We are also proposing to directly remove outliers prior to calculating the cut points to further increase the predictability and stability of the Star Ratings system. We are also proposing to clarify some of the current rules around assigning Quality Bonus Payment (QBP) ratings and to codify existing policy for assigning QBP ratings for new contracts under existing parent organizations. Unless otherwise stated, data would be collected and performance measured using these proposed rules and regulations for the 2021 measurement period and the 2023 Star Ratings.

i. Permitting a Second, ''Preferred'', Specialty Tier in Part D (§§ 423.104, 423.560, and 423.578)

We are proposing to allow Part D sponsors to establish up to two specialty tiers and design an exceptions process that exempts drugs on these tiers from tiering exceptions to non-specialty tiers. We propose that Part D sponsors would have the flexibility to determine which Part D drugs are placed on either specialty tier, subject to the ingredient cost threshold established according to the methodology we are proposing and the requirements of the CMS formulary review and approval process under § 423.120(b)(2). To maintain Part D enrollee protections, we are proposing to codify a maximum allowable cost sharing that would apply to the higher cost-sharing specialty tier. Further, we propose to require that if there are two specialty tiers, one must be a ''preferred'' tier that offers lower cost sharing than the proposed maximum allowable specialty tier cost sharing.

We note that we are not proposing any revisions to § 423.578(c)(3)(ii), which requires Part D sponsors to provide coverage for a drug for which a tiering exception was approved at the cost sharing that applies to the preferred alternative. Because we propose that the exemption from tiering exceptions for specialty tier drugs would apply only to tiering exceptions to non-specialty tiers, our proposal would require Part D sponsors to permit tiering exception requests for drugs on the higher-cost specialty tier to the lower-cost specialty tier.

To improve transparency, we propose to codify current methodologies for cost sharing and calculations relative to the specialty tier, with some modifications. First, we propose to codify a maximum allowable cost sharing permitted for the specialty tiers of between 25 percent and 33 percent, depending on whether the plan includes a deductible, as described further in section V.F.4. of this proposed rule. We also propose to determine the specialty-tier cost threshold—meaning whether the drug has costs high enough to qualify for specialty tier placement—based on a 30-day equivalent supply. Additionally, we propose to base the determination of the specialty-tier cost threshold on the ingredient cost reported on the prescription drug event (PDE). We also propose to maintain a specialty-tier cost threshold for both specialty tiers that is set at level that, in general, reflects drugs with monthly ingredient costs that are in the top one percent, as described further in section V.F.6. of this proposed rule. Finally, we propose to adjust the threshold, in an increment of not less than ten percent, rounded to the nearest $10, when an annual analysis of PDE data shows that an adjustment is necessary to recalibrate the threshold so that it only reflects drugs with the top one percent of monthly ingredient costs. We propose to determine annually whether the adjustment would be triggered and announce the specialty-tier cost threshold annually.

j. Beneficiary Real Time Benefit Tool (RTBT) (§ 423.128)

This rule proposes to require that Part D plan sponsors implement, no later than January 1, 2022, a beneficiary real-time benefit tool (RTBT). This tool would allow enrollees to view a plan-defined subset of the information included in the prescriber RTBT system, which will include accurate, timely, and clinically appropriate patient-specific real-time formulary and benefit information (including cost, formulary alternatives and utilization management requirements). Plans would be permitted to use existing secure patient portals to fulfill this requirement, to develop a new portal, or use a computer application. Plans would be required to make this information available to enrollees who call the plans' customer service call center.

In order to encourage enrollees to use the beneficiary RTBT, we propose to allow plans to offer rewards and incentives (RI) to their enrollees who log onto the beneficiary RTBT or seek to access this information via the plan's customer service call center.

k. Medical Loss Ratio (MLR) (§§ 422.2420, 422.2440, and 423.2440)

We are proposing to amend the MA medical loss ratio (MLR) regulation at § 422.2420 so that the incurred claims portion of the MLR numerator includes all amounts that an MA organization pays (including under capitation contracts) for covered services. Currently, incurred claims in the MLR numerator include direct claims paid to providers for covered services furnished to all enrollees under an MA contract. This proposal would include in the incurred claims portion of the MLR numerator amounts paid for covered services to individuals or entities that do not meet the definition of ''provider'' as defined at § 422.2.

We are also proposing to codify in the regulations at §§ 422.2440 and 423.2440 the definitions of partial, full, and non-credibility and the credibility factors that CMS published in the Medicare Program; Medical Loss Ratio Requirements for the Medicare Advantage and the Medicare Prescription Drug Benefit Programs Final Rule (78 FR 31284) (hereinafter referred to as the May 2013 Medicare MLR final rule). We believe that it is more consistent with the policy and principles articulated in Executive Order 13892 on Promoting the Rule of Law Through Transparency and Fairness in Civil Administrative Enforcement and Adjudication (October 9, 2019) that we define and publish the definitions of partial, full, and non-credibility and the credibility factors in the **Federal Register**, and that we codify these definitions and factors in the Code of Federal Regulations, as opposed to using the annual Advance Notice and Rate Announcement process, as specified in current §§ 422.2440 and 423.2440.

Additionally, we are proposing to amend § 422.2440 to provide for the application of a deductible factor to the

MLR calculation for MA medical savings account (MSA) contracts that receive a credibility adjustment. The proposed deductible factor would serve as a multiplier on the applicable credibility adjustment. This additional adjustment for MA MSAs is intended to recognize that the variability of claims experience is greater under health insurance policies with higher deductibles than under policies with lower deductibles, with high cost or outlier claims representing a larger portion of the overall claims experience of plans with high deductibles. The proposed deductible factor would reduce the risk that an MSA contract will fail to meet the MLR requirement as a result of random variations in claims experience. We are proposing to adopt the same deductible factors that apply under the commercial MLR regulations at 45 CFR part 158.

l. Medicare Advantage (MA) and Cost Plan Network Adequacy (§§ 417.416 and 422.116)

We are proposing to strengthen network adequacy rules for MA plans by codifying our existing network adequacy methodology and standards (with some modifications); we are also seeking comment on refining standards related to telehealth, maximum time and distance standards, and whether there are additional changes we should consider to improve MA plan access in all county types, such as to address the effect of Certificate of Need (CON) requirements, or whether there more specific changes we should consider to increase plan choice in more rural counties. The authorization of additional telehealth benefits pursuant to the BBA of 2018 incentivizes new ways for beneficiaries to access health care beginning in 2020. As a result, CMS has been examining its network adequacy standards overall to determine how contracted telehealth providers should be considered when evaluating the adequacy of an MA plan network. We propose to allow MA plans to receive a 10 percent credit towards the percentage of beneficiaries residing within published time and distance standards when they contract with telehealth providers in the following provider specialty types: dermatology, psychiatry, cardiology, otolaryngology and neurology. We also are soliciting comment regarding whether we should expand this credit to other specialty provider types, such as nephrology for home dialysis and if this percentage ''credit'' should vary by county type.

Additionally, in order to expand access to MA plans where network development can be challenging, we propose to modify the current network adequacy standards by codifying a reduced standard for the percentage of beneficiaries that must reside within the maximum time and distance standards in non-urban counties (Micro, Rural, and Counties with Extreme Access Considerations (CEAC) county type designations) for an MA plan to comply with the network adequacy standards. We also solicit comment about whether and how much of a percentage reduction would likely be required to incentivize MA penetration and whether the reduction should apply to all county types, or just non-urban counties.

m. Special Election Periods (SEPs) for Exceptional Conditions (§§ 422.62 and 423.38)

Sections 1851(e)(4) and 1860D–1(b)(3) of the Act establish special election periods (SEPs) during which, if certain circumstances exist, an individual may request enrollment in, or disenrollment from, MA and Part D plans. The Secretary also has the authority to create SEPs for individuals who meet other exceptional conditions. We are proposing to codify a number of SEPs that we have adopted and implemented through subregulatory guidance as exceptional circumstances SEPs. Codifying our current policy for these SEPs will provide transparency and stability to the MA and Part D programs by ensuring that the SEPs are known and changed only through additional rulemaking. Among the proposed SEPs are the SEP for Individuals Affected by a FEMA-Declared Weather-Related Emergency or Major Disaster, the SEP for Employer/Union Group Health Plan (EGHP) elections, and the SEP for Individuals Who Disenroll in Connection with a CMS Sanction. We are also proposing to establish two additional SEPs for exceptional circumstances: the SEP for Individuals Enrolled in a Plan Placed in Receivership and the SEP for Individuals Enrolled in a Plan that has been identified by CMS as a Consistent Poor Performer.

n. Service Delivery Request Processes Under PACE (§§ 460.104 and 460.121)

Currently, PACE participants or their designated representatives may request to initiate, eliminate or continue a service, and in response, the PACE organization must process this request under the requirements at § 460.104(d)(2). These requests are commonly referred to by CMS and the industry as ''service delivery requests.'' In response to feedback from PACE organizations and advocacy groups, and based on our experience monitoring PACE organizations' compliance with our current requirements, we are proposing to move the requirements for processing service delivery requests from § 460.104(d)(2) and add them to a new § 460.121 in order to increase transparency for participants and reduce confusion for PACE organizations. We are also proposing to modify these provisions in order to reduce unnecessary burden on PACE organizations and eliminate unnecessary barriers for participants who have requested services that a PACE organization would be able to immediately approve. Specifically, we are proposing to more clearly define what constitutes a service delivery request, and provide transparent requirements for how those requests would be processed by the PACE organization, including who can make a request, how a request can be made, and the timeframe for processing a service delivery request. We are also proposing to allow the interdisciplinary team (IDT) to bypass the full processing of a service delivery request under the new proposed requirements under § 460.121 when the request can be approved in full by an IDT member at the time it is made. For all other service delivery requests that are brought to the IDT, we are proposing to maintain the requirement that an in-person reassessment must be conducted prior to a service delivery request being denied, but we are proposing to eliminate the requirement that a reassessment (either in-person or through remote technology) be conducted when a service delivery request can be approved. Lastly, we are proposing to add participant protections; specifically, we are proposing to increase notification requirements in order to ensure participants understand why their request was denied, and we are proposing to add reassessment criteria in order to ensure reassessments are meaningful to the service delivery request, and that the IDT takes them into consideration when rendering a decision.

o. Beneficiaries With Sickle Cell Disease (SCD) (§ 423.100)

Beneficiaries with active cancer-related pain, residing in a long-term care facility, or receiving hospice, palliative, or end-of-life care currently meet the definition of ''exempt individuals'' with respect to DMPs in § 423.100. Section 1860D–4(c)(5)(C)(ii)(III) of the Act provides the Secretary with the authority to elect to treat other beneficiaries as exempted from DMPs.

Due to concerns of misapplication of opioid restrictions in the sickle cell disease (SCD) patient population, CMS is proposing that, starting in plan year 2021, beneficiaries with SCD are classified as exempt individuals.

3. Summary of Costs and Benefits

BILLING CODE 4120–01–P

Provision	Description	Impact
a. Mandatory Drug Management Programs (DMPs) (§ 423.153)	This provision would codify the SUPPORT Act requirement making it mandatory that Part D sponsors implement DMPs, starting in plan year 2022.	There are costs of about $0.1 million a year with a 10-year total cost of $0.8 million.
b. Beneficiaries with History of Opioid-Related Overdose Included in Drug Management Programs (DMPs) (§ 423.100)	This provision would require that CMS identify beneficiaries enrolled in Medicare Part D with a history of opioid-related overdose (as defined by the Secretary) and include such individuals as PARBs for prescription drug abuse under sponsors' DMPs.	Part D enrollees with a history of opioid-related overdose have higher than average drug costs. CMS estimates that Part D DMPs could save 5 percent in costs per year. After the first year, the reduction in drug utilization would result in an annual savings of $7.7 million to the Medicare Trust Fund resulting from reduced drug spending by beneficiaries. The costs for case management and related paperwork is estimated at $10.1 million annually after the first year.
c. Automatic Escalation to External Review under a Medicare Part D Drug Management Program (DMP) for At-Risk Beneficiaries (§§ 423.153, 423.590, and 423.600)	CMS is proposing that if a Part D sponsor denies a DMP appeal, the case shall be automatically forwarded to the independent outside entity for review and resolution. We are proposing that a plan sponsor must forward the case to the independent outside entity by the expiration of the adjudication timeframe applicable to the plan level appeal. Finally, we are proposing conforming revisions to the notices that are sent to beneficiaries.	We estimate there will be about 28,600 appeals per year, of which 0.08 percent will be denied and automatically escalated to the independent review entity (IRE). Therefore, there are only about 23 cases (0.08 percent * 28,600) affected by this provision. Since most IRE cases are judged by a physician at a wage of $202.46, and typically an IRE will take at most 1 hour to review, the total burden is negligible (about $4,656.58 (23 cases * $202.46 * 1 hour)).

d. Suspension of Pharmacy Payments Pending Investigations of Credible Allegations of Fraud and Program Integrity Transparency Measures (§§ 405.370, 422.500, 422.503, 423.4, 423.504, and 455.2)	CMS is proposing to implement two sections of the SUPPORT Act, which will-- (1) require Part D plan sponsors to notify the Secretary of the imposition of a payment suspension on pharmacies that is based on a credible allegation of fraud, impose such payment suspensions consistent with the manner in which CMS implements payment suspensions in fee-for service Medicare, and report such information using a secure website portal; (2) define inappropriate prescribing with respect to opioids; (3) require plan sponsors to submit to the Secretary information on investigations and other actions related to inappropriate opioid prescribing; (4) define "substantiated or suspicious activities" related to fraud, waste, or abuse; and (5) establish a secure portal which would enable the sharing of data and referrals of "substantiated or suspicious activities" related to fraud, waste, or abuse among plan sponsors, CMS, and CMS's program integrity contractors..	While we believe there may be savings generated through actions taken by plans that will conduct their own due diligence from the reporting and sharing of administrative actions between CMS and plans sponsors, as well as additional law enforcement actions, we cannot estimate the impact at this time. The reporting requirements will cost about $9.5 million a year after the first year.
e. Medicare Advantage (MA) Plan Options for End-Stage Renal Disease (ESRD) Beneficiaries (§§ 422.50, 422.52, and 422.110)	CMS is proposing to codify requirements under section 17006 of the Cures Act. Effective for the plan year beginning January 1, 2021, CMS proposes to remove the prohibition for beneficiaries with ESRD from enrolling in an MA plan.	Since there are no new provisions regarding enrollment of beneficiaries with ESRD, or kidney acquisition costs, in this regulation that are not in the Act; there are no impacts to report as resulting solely from this provision.
f. Medicare Fee-for-Service (FFS) Coverage of Costs for Kidney Acquisitions for Medicare Advantage (MA) Beneficiaries (§ 422.322)	CMS is proposing to codify requirements under section 17006 of the Cures Act. Effective for the plan year beginning January 1, 2021, CMS proposes that MA organizations will no longer be responsible for costs for organ acquisitions for kidney transplants for their beneficiaries. Instead, CMS proposes to require that Medicare FFS cover the kidney acquisition costs for MA beneficiaries, effective 2021.	To estimate the impact, we used a pre-statute baseline. This analysis shows that FFS coverage of kidney acquisition costs for MA beneficiaries results in net costs to the Medicare Trust Funds ranging from $212 million in 2021 to $981 million in 2030.
g. Exclusion of Kidney Acquisition Costs from Medicare Advantage (MA) Benchmarks (§§ 422.258 and 422.306)	CMS is proposing to codify requirements under section 17006 of the Cures Act. Effective for the plan year beginning January 1, 2021, CMS proposes to remove costs for organ acquisitions for kidney transplants from the calculation of MA benchmarks and annual capitation rates.	To estimate the impact, we used a pre-statute baseline. This analysis shows that excluding kidney acquisition costs from MA benchmarks results in net savings estimated to range from $594 million in 2021 to $1,346 million in 2030.

h. Medicare Advantage (MA) and Part D Prescription Drug Program Quality Rating System (§§ 422.162, 422.164, 422.166, 422.252, 423.182, 423.184, and 423.186)	We are proposing routine measure updates and an increase in the weight of patient experience/complaints and access measures. We are also proposing some technical clarifications of the current rules for the QBP ratings methodology. We also propose the use of Tukey outlier deletion, which is a standard statistical methodology for removing outliers, to increase the stability and predictability of the star measure cut points.	Updating the patient experience/complaints and access measures weight would create a cost which is offset by using the Tukey outlier deletion. The net savings to the Medicare Trust Fund is $368.1 million in 2024; this will grow over time reaching $999.4 million by 2030. The net reduction in spending to the Medicare Trust Fund over 10 years is $4.9 billion.
i. Permitting a Second, "Preferred", Specialty Tier in Part D (§§ 423.104, 423.560, and 423.578)	CMS is proposing to (1) allow Part D sponsors to establish a second, "preferred," specialty tier at a lower cost-sharing threshold than the current specialty tier; (2) codify the existing maximum cost sharing for the highest specialty tier; (3) codify a methodology to determine annually the specialty tier cost threshold using ingredient cost and increase the threshold when certain conditions are met; (4) require sponsors to permit tiering exceptions between the two specialty tiers; and (5) permit sponsors to determine which drugs go on either tier.	Permitting Part D sponsors to establish a second, "preferred", specialty tier is unlikely to have a material impact on Part D costs.
j. Beneficiary Real Time Benefit Tool (RTBT) (§ 423.128)	CMS is proposing to require that each Part D plan implement a beneficiary real time benefit tool. This tool should allow enrollees to view a plan-defined subset of the information included in the prescriber RTBT system which includes accurate, timely, and clinically appropriate patient-specific real-time formulary and benefit information (including cost, formulary alternatives and utilization management requirements) by January 1, 2022.	Adoption of a beneficiary RTBT will be an additional cost and burden on Part D sponsors. Based on our estimates, we believe this will cost Part D plans about $3.9 million for all plans in the first year based on the costs for them to reprogram their computer systems. Additionally, the voluntary provision of rewards by Part D sponsors to enrollees using RTBT will have an impact of $0.7 million in the first year, in order to implement the program, and $0.4 million in subsequent years in order to maintain the program.

k. Medical Loss Ratio (MLR) (§§ 422.2420, 422.2440, and 423.2440)	We are proposing to amend our MA MLR regulations. There are three proposals. (1) We are proposing to allow MA organizations to include in the MLR numerator as "incurred claims" all amounts paid for covered services, including amounts paid to individuals or entities that do not meet the definition of "provider" as defined at § 422.2. (2) We are also proposing to codify our definitions of partial, full, and non-credibility and credibility factors that CMS published in the May 2013 Medicare MLR final rule (78 FR 31296). (3) For MA MSA contracts receiving a credibility adjustment, we are proposing to apply a deductible factor to the MLR calculation in order to recognize that the variability of claims experience is greater under health insurance policies with higher deductibles than under policies with lower deductibles.	(1) Our proposed amendment to change the type of expenditures that can be included in "incurred claims" will have neutral dollar impact on the Medicare Trust Fund. These provisions will result in a transfer of funds from the Treasury, through the Medicare Trust Fund, to MA organizations. This transfer would take the form of a reduction in the remittance amounts withheld from MA capitated payments. The amount of this transfer is $35 to $55 million a year, resulting in plans obtaining $455 million over 10 years. (2) Codifying the definitions of partial, full, and non-credibility and the credibility factors, as proposed, is unlikely to have any impact on the Medicare Trust Fund. (3) Our proposal to add a deductible factor to the MLR calculation for MA MSA contracts is estimated to result in a gradually increasing cost to the Medicare Trust Fund of $1 to $6 million per year, and will result in a $43.2 million cost over 10 years.
l. Medicare Advantage (MA) and Cost Plan Network Adequacy (§§ 417.416 and 422.116)	CMS is proposing to (1) strengthen network adequacy rules for MA and cost plans and make them more transparent to plans by codifying our existing network adequacy methodology and standards, with some modifications; (2) allow MA plans to receive a 10 percent credit towards the percentage of beneficiaries residing within published time and distance standards when they contract with certain telehealth providers; and (3) reduce the required percentage of beneficiaries residing within maximum time and distance standards in certain county types (Micro, Rural, and CEAC).	Changes to network standards are unlikely to have any impact on the Medicare Trust Fund.

m. Special Election Periods (SEPs) for Exceptional Conditions (§§ 422.62 and 423.38)	We are proposing to codify a number of SEPs that we have adopted and implemented through subregulatory guidance as exceptional circumstances SEPs. We are also proposing to establish two new SEPs for exceptional circumstances: the SEP for Individuals Enrolled in a Plan Placed in Receivership and the SEP for Individuals Enrolled in a Plan that has been identified by CMS as a Consistent Poor Performer.	This provision codifies existing practice since MA organizations and Part D plan sponsors are currently assessing applicants' eligibility for election periods as part of existing enrollment processes. Consequently, the provision will not have added impact.
n. Service Delivery Request Processes under PACE (§§ 460.104 and 460.121)	CMS is proposing to revise the process by which PACE organizations address service delivery requests. Currently the IDT must determine the appropriate member(s) of the IDT to conduct a reassessment, perform a reassessment, and render a decision on each service delivery request. However, our experience shows that approximately 40 percent of all requests could be immediately approved in full by an IDT member. We are therefore removing the obligation for a request to be brought to the IDT or for a reassessment to be conducted when a member of the IDT receives and can approve a service delivery request in full at the time it is made. We are also proposing to remove the requirement to conduct a reassessment in response to a service delivery request except when a request would be partially or fully denied.	The proposed revisions create efficiencies which are estimated to create cost savings of $18.7 million in the first year and gradually increase to $23.9 million in 2030. The net savings over 10 years is $216.3 million dollars. The savings are true savings to PACE organizations as a result of reduced administrative burden.
o. Beneficiaries with Sickle Cell Disease (SCD) (§ 423.100)	CMS is proposing that beneficiaries with SCD are classified as exempted from DMPs starting in plan year 2021.	We estimate this provision will affect under 70 beneficiaries and therefore the impact is negligible.

BILLING CODE 4120–01–C

II. Implementation of Certain Provisions of the Bipartisan Budget Act of 2018

A. Special Supplemental Benefits for the Chronically Ill (SSBCI) (§ 422.102)

The BBA of 2018 (Pub. L. 115–123) was signed into law on February 9, 2018. The law included new authorities concerning supplemental benefits that may be offered to chronically ill enrollees in Medicare Advantage (MA) plans, specifically amending section 1852(a)(3) of the Act to add a new subparagraph (D) authorizing a new category of supplemental benefits that may be offered by MA plans. We discussed this new authority in the April 2018 final rule (83 FR 16481 through 16483).[2] We propose to codify the existing guidance (April 2019 Health Plan Management System (HPMS) Memo [3] and the 2020 Call Letter) [4] and parameters for these special supplemental benefits for chronically ill enrollees at § 422.102(f) to implement section 1852(a)(3)(D) of the Act.

Specifically, the BBA of 2018 amended section 1852(a)(3) of the Act to: (1) Authorize MA plans to provide additional supplemental benefits that have a reasonable expectation of improving or maintaining the health or overall function of the chronically ill enrollee to chronically ill enrollees; (2) permit those additional supplemental benefits to be not primarily health related; (3) define ''chronically ill enrollee'' to limit eligibility for these additional supplemental benefits; and (4) authorize CMS to waive uniformity requirements in connection with this for eligible chronically ill enrollees. We refer to these benefits hereafter as Special Supplemental Benefits for the Chronically Ill (SSBCI). The heading for new subparagraph (D) of section 1852(a)(3) of the Act, as added by the BBA, states, ''Expanding supplemental benefits to meet the needs of chronically ill enrollees.'' Consistent with this text, this new category of supplemental benefits is intended to enable MA plans to better tailor benefit offerings, address gaps in care, and improve health outcomes for the chronically ill population. Section 1852(a)(3)(D)(ii) of the Act, as amended, defines a chronically ill enrollee as an individual who—

- Has one or more comorbid and medically complex chronic conditions that is life threatening or significantly limits the overall health or function of the enrollee;
- Has a high risk of hospitalization or other adverse health outcomes; and
- Requires intensive care coordination.

Thus, with respect to SSBCI benefits, we propose at § 422.102(f)(1)(i), to codify this definition of a chronically ill enrollee. Section 1859(f)(9) of the Act requires us to convene a panel of

[2] *https://www.govinfo.gov/content/pkg/FR-2018-04-16/pdf/2018-07179.pdf.*

[3] *https://www.cms.gov/Medicare/Health-Plans/HealthPlansGenInfo/Downloads/Supplemental_Benefits_Chronically_Ill_HPMS_042419.pdf.*

[4] *https://www.cms.gov/Medicare/Health-Plans/MedicareAdvtgSpecRateStats/Downloads/Announcement2020.pdf.*

clinical advisors to establish and update a list of conditions that meet the definition of a severe or disabling chronic condition under section 1859(b)(6)(B)(iii) of the Act, which provides how having such a condition is an eligibility criterion for a chronic care special needs plan. The standard for severe or disabling chronic condition under section 1859(b)(6)(B)(iii) of the Act is substantially similar to the criterion used in defining ''chronically ill enrollee'' for purposes of SSBCI eligibility. Under our proposal, MA plans may consider any enrollee with a condition identified on this list to meet the statutory criterion of having one or more comorbid and medically complex chronic conditions that is life threatening or significantly limits the overall health or function of the enrollee. Further, an MA plan may consider any chronic condition not identified on this list if that condition is life threatening or significantly limits the overall health or function of the enrollee. CMS wishes to allow plans the flexibility to continue to innovate around providing care for their specific plan populations. This includes targeted chronic conditions. We recognize that there may be some conditions and/or a subset of conditions in a plan population that may meet the statutory definition of a chronic condition, but may not be present on the list. We encourage plans to identify needs within their unique plan population and do not wish to prevent a plan from addressing a condition or need in their population that may not be on the list. To reflect this policy, we are proposing at § 422.102(f)(1)(i)(B), regulation text indicating our intent to publish a non-exhaustive list of medically complex chronic conditions as determined by the panel as described in section 1859(b)(6)(B)(iii) to be life threatening or significantly limit the overall health or function of an individual.

MA plans are not required to submit to CMS the processes used to identify chronically ill enrollees that meet the three pronged definition of chronically ill enrollee. However, all three criteria must be met for an enrollee to be eligible for the SSBCI authorized under section 1852(a)(3)(D) of the Act. In subregulatory guidance (April 2019 HPMS Memo and the 2020 Call Letter), CMS noted that we expect MA plans to document their determinations about an enrollee's eligibility for SSBCI based on the statutory definition. We propose to codify this as a requirement at § 422.102(f)(3)(ii). In addition, we are also proposing at § 422.102(f)(3)(ii) to require plans to make information and documentation (for example, copies of the internal policies used to make the determinations, etc.) related to determining enrollee eligibility as a chronically ill enrollee available to CMS upon request.

We are proposing at paragraph (f)(1)(ii) the definition of SSBCI. In addition to limiting the class of enrollees who may be eligible to receive the new SSBCI benefits to the chronically ill, section 1852(a)(3)(D) of the Act requires that the specific supplemental benefit provided under this authority have a reasonable expectation of improving or maintaining the health or overall function of the enrollee. We propose to codify this statutory requirement as part of the definition of SSBCI at § 422.102(f)(1)(ii). Because SSBCI are supplemental benefits, they must also comply with the criteria for supplemental benefits that we are proposing to codify at § 422.100(c)(2)(ii), which is discussed in detail in section VI.F. of this proposed rule. We considered whether the regulation for SSBCI should explicitly reference the requirements in § 422.100(c)(2)(ii) to make this clear and solicit comment on this point. Traditionally, CMS has defined supplemental benefits as benefits that: (1) Are primarily health related; (2) require the MA plan to incur a non-zero medical cost; and (3) are not covered under Medicare Parts A, B or D. In light of the authority in section 1852(a)(3)(D) of the Act for SSBCI, we are proposing to modify some aspects of this longstanding policy in this context. First, as the statute provides that SSBCI may be not primarily health related, we are proposing specific text on this point in both §§ 422.100(c)(2)(ii) and 422.102(f)(1)(ii). Second, we are proposing to clarify in § 422.100(c)(2)(ii)(B) that the MA organization incur a non-zero direct medical cost for all supplemental benefits applies in the context of SSBCI that are not primarily health related; in such cases, the MA organization must incur a non-zero direct non-administrative cost for the SSBCI. MA rules require plans to incur a non-zero direct medical cost for supplemental benefits. In the case of SSBCI, we are clarifying that such incurred cost should be a non-administrative cost for providing the benefit even if it is not necessarily a cost paid to a medical provider or facility because SSBCI benefits are not necessarily primarily health related. In all other respects not specifically addressed as part of our proposal, SSBCI would be treated like other supplemental benefits.

Under section 1852(a)(3)(D)(ii)(I) of the Act, SSBCI benefits may include items or services that are not primarily health related. As discussed in detail in section VI.F. of this proposed rule, a primarily health related benefit is an item or service that is used to diagnose, compensate for physical impairments, acts to ameliorate the functional/psychological impact of injuries or health conditions, or reduces avoidable emergency and healthcare utilization. Therefore, at § 422.102(f)(1)(ii), we propose to codify as part of the definition of SSBCI that these benefits may be non-primarily health related SSBCI benefits, including a cross-reference to where we propose to codify the definition of primarily health related; however, in all cases, an SSBCI must have, with respect to a chronically ill enrollee, a reasonable expectation of improving or maintaining the health or overall function of the enrollee. By including it in the definition, we are implementing the statutory authority for MA plans to offer both primarily health and non-primarily health related SSBCI. In the 2019 HPMS memo, we provided examples of non-primarily health related SSBCI benefits. Those examples included: Meals (beyond a limited basis), food and produce, transportation for non-medical needs, pest control, indoor air quality and equipment and services, access to community or plan-sponsored programs and events to address enrollee social needs, (such as non-fitness club memberships, community or social clubs, park passes, etc.), complementary therapies (offered alongside traditional medical treatment), services supporting self-direction (for example. financial literacy classes, technology education, and language classes), structural home modifications, and general supports for living (for example. plan-sponsored housing consultations and/or subsidies for rent or assisted living communities or subsidies for utilities such as gas, electric, and water). We intend this guidance to be equally applicable to our proposed regulation.

Another provision of our proposed rule flows from the statutory authority for SSBCI to be not primarily health related. Unlike with traditional supplemental benefits, MA plans might not incur direct medical costs in furnishing or covering SSBCI. In the 2020 Call Letter, we issued guidance that so long as an MA plan incurs a non-zero non-administrative cost in connection with SSBCI, the benefits would be considered to meet this standard. As supplemental benefits, SSBCI may also take the same form as

traditional supplemental benefits. For example, reductions in cost sharing for benefits under the original Medicare fee-for-service program are an allowable supplemental benefit, as reflected in the definitions of mandatory supplemental benefit in § 422.2. Thus, SSBCI can be in the form of—

- Reduced cost sharing for Medicare covered benefits (such as to improve utilization of high-value services that meet the definition of SSBCI);
- Reduced cost sharing for primarily health related supplemental benefits;
- Additional primarily health related supplemental benefits; or
- Additional non-primarily health related supplemental benefits.

Eligibility for SSBCI must be determined based on identifying the enrollee as a chronically ill enrollee, using the statutory definition, and if the item or service has a reasonable expectation of improving or maintaining the health or overall function of the enrollee. In the April 2019 HPMS memo CMS clarified that MA plans can provide non-primarily health related supplemental benefits that address chronically ill enrollees' social determinants of health so long as the benefits maintain or improve the health or function of that chronically ill enrollee. MA plans may consider social determinants when determining eligibility for an SSBCI of health as a factor to help identify chronically ill enrollees whose health could be improved or maintained with SSBCI. However, MA plans may not use social determinants of health as the sole basis for determining eligibility for SSBCI. We propose to codify the ability of an MA plan to consider social determinants (for example, food and housing insecurity) when determining whether an SSBCI benefit is likely to improve or maintain the health of a chronically ill enrollee as described at § 422.102(f)(2)(iii).

Generally, § 422.100(d) and other regulations require all MA plan benefits to be offered uniformly to all enrollees residing in the service area of the plan. As explained in the April 2018 final rule (83 FR 16480 through 16485), MA plans may also provide access to services (or specific cost sharing or deductibles for specific benefits) that are tied to a disease state in a manner that ensures that similarly situated individuals are treated uniformly. Section 1852(a)(3)(D)(ii)(II) of the Act authorizes CMS to waive the uniformity requirements generally applicable to benefits covered by MA plans with respect to SSBCI, effective in CY 2020. As discussed in the April 2018 final rule (83 FR 16481 and 16482), this gives CMS the authority to allow MA plans to offer chronically ill enrollees supplemental benefits that are not uniform across the entire population of chronically ill enrollees in the MA plan and may vary SSBCI offered to the chronically ill as a specific SSBCI relates to the individual enrollee's specific medical condition and needs. We are proposing to codify the authority for this waiver at § 422.102(f)(2)(ii) such that upon approval by CMS, an MA plan may offer non-uniform SSBCI. In both the CY 2020 call letter and the April 2019 HPMS memo, we explained how we expect MA plans to have written policies based on objective criteria (for example, health risk assessments, review of claims data, etc.) for determining SSBCI eligibility to receive a particular SSBCI benefit, to document these criteria, and to make this information available to CMS upon request. We are also proposing to codify requirements at § 422.102(f)(3)(iii) and (iv) for MA plans that offer SSBCI to have written policies based on objective criteria, document those criteria, to document each determination that an enrollee is eligible to receive an SSBCI and make this information available to CMS upon request. We believe that objective criteria are necessary to address potential beneficiary appeals, complaints, and/or general oversight activities performed by CMS. We are also proposing, at § 422.102(f)(3)(i), to require plans to have written policies for determining enrollee eligibility and must document its determination that an enrollee is a chronically ill enrollee based on the statutory definition codified in paragraph (f)(1)(i) of this section. And we are proposing to require plans to make information and documentation related to determining enrollee eligibility available to CMS upon request at § 422.102(f)(3)(ii). We also clarify here that the determination on the benefits an enrollee is entitled to receive under an MA plan's SSBCI is an organization determination that is subject to the requirements of part 422, subpart M, including the issuance of denial notices to enrollees.

This provision codifies already existing guidance and practices and therefore is not expected to have additional impact above current operating expenses. Additionally, this provision amends definitions and therefore does not impose any collection of information requirements.

B. Improvements to Care Management Requirements for Special Needs Plans (SNPs) (§ 422.101)

Special needs plans (SNPs) are MA plans that are specifically designed to provide targeted care and limit enrollment to special needs individuals. Section 50311 of the BBA of 2018 modified the requirements for C–SNPs in section 1859(f)(5) of the Act. Specifically, the amendments included the following:

- That the interdisciplinary team include a team of providers with demonstrated expertise, including training in an applicable specialty, in treating individuals similar to the targeted population of the C–SNP.
- That the C–SNP comply with requirements developed by CMS to provide face-to-face encounters with enrollees not less frequently than on an annual basis.
- That, as part of the mandatory model of care (MOC), the results of the initial assessment and annual reassessment required for each enrollee be addressed in the individual's individualized care plan.
- That, as part of the annual evaluation and approval of the MOC, CMS take into account whether the plan fulfilled the previous year's goals (as required under the model of care).
- That CMS establish a minimum benchmark for each element of the MOC and only approve a C–SNP's MOC if each element of the model of care meets such minimum benchmark applicable under the preceding sentence.

We are proposing to amend and add new regulations at § 422.101(f) to implement the BBA of 2018 amendments to section 1859(f) of the Act and extend them to all SNP types. Specifically, we propose to add new regulations, to be codified at § 422.101(f), to account for two new requirements governing SNP enrollee care management and three new requirements governing SNP model of care submissions.

The history of special needs plans in the MA program is nearly as long as the program itself. The Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (hereinafter referred to as the MMA) (Pub. L. 108–173) authorized CMS to contract with MA coordinated care plans that are specifically designed to provide targeted care to individuals with special needs. Originally SNPs were statutorily authorized for a limited period, but after several extensions of that authority, section 50311(a) of the BBA of 2018 permanently authorized SNPs. Under section 1859(f)(1) of the Act, SNPs are able to restrict enrollment to Medicare beneficiaries who are: (1) Institutionalized individuals, who are currently defined in § 422.2 as those residing or expecting to reside for 90 days or longer in a long-term care facility; (2) individuals entitled to

medical assistance under a state plan under Title XIX; or (3) other individuals with certain severe or disabling chronic conditions who would benefit from enrollment in a SNP. As of July 2019, 321 SNP contracts with 734 SNP plans have at least 11 members.[5] These figures included 208 Dual Eligible SNP contracts (D–SNPs) with 480 D–SNP plans with at least 11 members, 57 Institutional SNP contracts (I–SNPs) with 125 I–SNP plans with at least 11 members, and 56 Chronic or Disabling Condition SNP contracts (C–SNPs) with 129 C–SNP plans with at least 11 members. For more discussion of the history of SNPs, please see Chapter 16b of the Medicare Managed Care Manual (MMCM).[6] This proposed rule would implement the provisions of the BBA of 2018 and establish new care management requirements at § 422.101(f) for all SNPs, including minimum benchmarks for SNP models of care.

Section 1859(f) of the Act and the current implementing regulations specify several requirements for SNPs. MA organizations that would like to offer a SNP are required to engage in an application process to demonstrate that they meet SNP specific requirements, including the requirement in § 422.101(f) that MA organizations offering a SNP implement an evidence based model of care (MOC) to be evaluated by the National Committee for Quality Assurance (NCQA); the requirement in § 422.107 that D–SNPs have a contract with the state Medicaid agencies in the states in which they operate; and the requirement in § 422.152(g) that SNPs conduct quality improvement programs. SNP applicants follow the same process in accordance with the same timeline as applicants seeking to contract to offer other MA plans.

Section 164 of the Medicare Improvements for Patients and Providers Act (hereinafter referred to as MIPPA) (Pub. L. 110–275) added care management requirements for all SNPs effective January 1, 2010, as set forth in section 1859(f)(5) of the Act (42 U.S.C. 1395w–28(f)). The new mandate required dual-eligible, institutional, and chronic condition SNPs to implement care management requirements which have two explicit components: An evidence-based model of care and a series of care management services. While the revisions made in the Medicare Program; Revisions to the Medicare Advantage and Prescription Drug Benefit Programs interim final rule with comment (73 FR 54226), hereinafter referred to as the September 2008 final rule, simply reflected the substance of the new MIPPA provisions, the Medicare Program; Revisions to the Medicare Advantage and Prescription Drug Benefit Programs proposed rule, hereinafter referred to as the May 2008 proposed rule (73 FR 28555), proposed other, related provisions which were finalized in the Medicare Program; Medicare Advantage and Prescription Drug Benefit Programs: Negotiated Pricing and Remaining Revisions final rule (hereinafter referred to as the January 2009 final rule) (74 FR 1493).

CMS had previously provided guidance and instructions in the 2008 and 2009 Call Letters,[7] [8] ''Special Needs Plan Solicitation,'' in order to more clearly establish and clarify delivery of care standards for SNPs and to codify standards. In the May 2008 proposed rule, CMS proposed that SNPs have networks with clinical expertise specific to the special needs population of the plan; use performance measures to evaluate models of care; and be able to coordinate and deliver care targeted to the frail/disabled, and those near the end of life based on appropriate protocols. Section 164 of the MIPPA subsequently added care management requirements for all SNPs as directed in section 1859(f)(5) of the Act (42 U.S.C. 1395w–28(f)), outlining new model of care requirements that include—(1) an appropriate network of providers and specialists to meet the specialized needs of the SNP target population; (2) a comprehensive initial health risk assessment and annual reassessments; (3) an individualized plan of care having goals and measurable outcomes; and (4) an interdisciplinary team to manage care. The MIPPA laid a statutory foundation for much of our regulatory standards for the model of care.

MOCs are a vital quality improvement tool and integral component for ensuring that the unique needs of each beneficiary enrolled in a SNP are identified and addressed. Section 3205 of the Patient Protection and Affordable Care Act of 2010 (hereinafter referred to as the Affordable Care Act) (Pub. L. 111–148) amended section 1859(f) of the Act to require that, starting in 2012, all SNPs be approved by NCQA based on standards developed by the Secretary. As provided under §§ 422.4(a)(iv), 422.101(f), and 422.152(g), the NCQA approval process is based on evaluation and approval of the SNP MOC, as per CMS guidance. Therefore, all SNPs must submit their MOCs to CMS for NCQA evaluation.

The MOC is organized to promote clarity and enhance the focus on care coordination, care transition, care needs and activities. The NCQA scoring approval process is based on scoring each of the clinical and non-clinical elements of the MOC as part of the SNP application.

The MOC narrative must include the following four elements:

- Description of the SNP Population.
- Care Coordination.
- SNP Provider Network.
- MOC Quality Measurement & Performance Improvement.

Each of the four elements is comprised of a set of required subcomponents, or factors, such as an identification and comprehensive description of the SNP-specific population. These subcomponents are reviewed and scored by NCQA and contribute to the overall score for that element. A full list of elements and factors, as well as CMS subregulatory guidance pertaining to MOC submission requirements and structure, can be found in Chapter 5 of the MMCM.

We propose to revise § 422.101(f) to implement certain new requirements added to section 1859(f)(5)(B) of the Act by the BBA of 2018 and to extend them to all SNP types. Specifically, we propose to revise § 422.101(f) to impose the new requirements governing SNP enrollee care management and SNP MOC submissions. Section 50311(c) of the BBA of 2018 amends section 1859(f)(5) of the Act to explicitly require improvements in care management and the establishment of a minimum benchmark for each element of the SNP model of care of a plan specific to C–SNP MOC submissions. We are proposing that these requirements be extended to all SNP plan types for several reasons. First, these additional requirements are consistent with current regulations and sub-regulatory guidance CMS provides to all SNPs regarding care management and MOC compliance. Second, we believe that these proposed

regulations are important safeguards to preserve the quality of care for all special needs individuals, including those enrolled in D–SNPs and I–SNPs and not just those enrolled in C–SNPs. Given the prevalence of medically complex chronic conditions among I–SNP and D–SNP enrollees, we believe the proper application of these new care improvement requirements would improve care for enrollees with complex chronic conditions. Further, we believe that the application of multiple, different MOC standards would be operationally complex and burdensome for MA organizations that sponsor multiple SNP plan types, for instance, a D–SNP and a C–SNP. We welcome comment of the extension of the new care management and MOC requirements for C–SNPs to the care management and MOC requirements for all SNP types.

1. The Interdisciplinary Team in the Management of Care

First, we propose to implement the requirement in section 1859(f)(5)(B)(i) of the Act addressing the interdisciplinary team in an amendment to § 422.101(f)(1)(iii) that would, in addition to implementing the statutory requirement for C–SNPs, extend the requirement to all SNPs. Currently, § 422.101(f)(1)(iii) requires each SNP to use an interdisciplinary team in the management of care but does not include much detail about that requirement. We propose to amend paragraph (f)(1)(iii) to require that each MA organization offering a SNP plan must provide each enrollee with an interdisciplinary team in the management of care that includes a team of providers with demonstrated expertise and training, and, as applicable, training in a defined role appropriate to their licensure in treating individuals similar to the targeted population of the plan.

As we noted in the January 2009 final rule, MIPPA required SNPs to conduct initial and annual comprehensive health risk assessments, develop and implement an individualized plan of care, and implement an interdisciplinary team for each beneficiary. We believe that combination of MIPPA's statutory elements and our regulatory prescription for the SNP model of care establishes the standardized architecture for effective care management while giving plans the flexibility to design the unique services and benefits that enable them to meet the identified needs of their target population. We believe this proposal, which amends paragraph (f)(1)(iii) and applies additional requirements pertaining to demonstrated expertise and training of interdisciplinary team providers to all SNPs, is consistent with the MIPPA requirements and the January 2009 final rule that provided the original authority regarding the use of interdisciplinary teams. All SNPs must have an interdisciplinary team to coordinate the delivery of services and benefits. However, one SNP may choose to contract with an interdisciplinary team to deliver care in community health clinics and another SNP may hire its team to deliver care in the home setting. Under the current rule, and our proposal, all SNPs must coordinate the delivery of services and benefits through integrated systems of communication among plan personnel, providers, and beneficiaries. However, one SNP may coordinate care through a telephonic connection among all stakeholders and a second SNP may coordinate care through an electronic system using Web-based records and electronic mail accessed exclusively by the plan, network providers, and beneficiaries. All SNPs must coordinate the delivery of specialized benefits and services that meet the needs of their most vulnerable beneficiaries. However, D–SNPs may need to coordinate Medicaid services while an institutional SNP may need to facilitate hospice care for its beneficiaries near the end of life. These examples demonstrate the variety of ways SNPs currently implement their systems of care, and we believe plans can and should provide enrollees with a team of providers with expertise and training that are appropriate for each individual enrollee.

Ultimately, we believe plans are in the best position to identify an interdisciplinary team with the appropriate expertise and training necessary to meet the clinical needs for each enrollee based on the medical and behavioral health conditions of their member population. We solicit comment on this proposed implementation of section 1859(f)(5)(B)(i) of the Act. We welcome feedback on how plans can meet the requirements for both demonstrated expertise and training in an applicable specialty.

2. Face-to-Face Annual Encounters

Second, we propose to implement the requirement in section 1859(f)(5)(B)(ii) of the Act requiring compliance with requirements (developed by CMS) to provide a face-to-face encounter with each enrollee. We are proposing that the face-to-face encounter be between each enrollee and a member of the enrollee's interdisciplinary team or the plan's case management and coordination staff on at least an annual basis, beginning within the first 12 months of enrollment, as feasible and with the individual's consent. A face-for-face encounter must be either in person or through a visual, real-time, interactive telehealth encounter. We propose to implement this requirement in a new paragraph (f)(1)(iv) of § 422.101 that would extend the requirement to all SNPs. We propose to require the MA organization to provide an annual face-to-face visit, that is in-person or by remote technology, to occur starting within the first 12 months of enrollment within the plan. For instance, a plan enrolling a beneficiary on October 1 would need to facilitate an in-person meeting by September 30th of the following year. Under our proposal, a visit to or by a member of an individual's interdisciplinary team or the plan's case management and coordination staff that perform clinical functions, such as direct beneficiary care, would meet this requirement. Examples of what these encounters may entail, though not limited to, include a member of an individual's interdisciplinary team or the plan's case management and coordination staff engaging with the enrollee to manage, treat and oversee (or coordinate) their health care, including preventive care included in the individualized care plan (ICP). Additional examples of such activities may include annual wellness visits and/or physicals, health risk assessment (HRA) completion, care plan review, health related education, and care coordination activities, but these are not the only activities that satisfy the proposed regulatory requirement. Encounters may also address any concerns related to physical, mental/behavioral health, and overall health status, including functional status. We anticipate that, consistent with good clinical practice, concerns are addressed and any appropriate referrals, follow-up, and care coordination activities provided or scheduled as necessary as a result of these face-to-face encounters. Plans should implement this requirement in a manner that honors any enrollee's decision not to participate in any qualifying encounter as noted previously.

Consistent with the authority for MA plans to offer additional telehealth benefits, under § 422.135 as finalized in the Medicare and Medicaid Programs; Policy and Technical Changes to the Medicare Advantage, Medicare Prescription Drug Benefit, Programs of All-Inclusive Care for the Elderly (PACE), Medicaid Fee-For-Service, and

Medicaid Managed Care Programs for Years 2020 and 2021 Final Rule (hereinafter referred to as the April 2019 final rule), we are proposing that the face-to-face encounters required for all SNPs under this new rule may include visual, real-time, interactive telehealth encounters. As we noted in the April 2019 final rule, we believe MA additional telehealth benefits will increase access to patient-centered care by giving enrollees more control to determine when, where, and how they access benefits. We are seeking comment on proposed § 422.101(f)(1)(iv) and the suggested criteria for what constitutes a face-to-face encounter.

3. Health Risk Assessments and the SNP Enrollee's Individualized Care Plan

Third, we are proposing to codify the requirement in section 1859(f)(5)(B)(iii) of the Act that, as part of the C–SNP model of care, the results of the initial assessment and annual reassessment required for each enrollee be addressed in the individual's individualized care plan. As with the other provisions in section 1859(f)(5)(B) of the Act, we are proposing to extend this requirement to the model of care for all SNPs in revisions to § 422.101(f)(1)(i). Currently, MA organizations offering SNPs must conduct a comprehensive initial health risk assessment of the individual's physical, psychosocial, and functional needs as well as annual HRA, using a comprehensive risk assessment tool that CMS may review during oversight activities. We propose to revise § 422.101(f)(1)(i) by adding that the MA organization must ensure that results from the initial assessment and annual reassessment conducted for each individual enrolled in the plan are addressed in the individual's individualized care plan required under § 422.101(f)(1)(ii) are addressed in the individual's individualized care plan required under § 422.101(f)(1)(ii).

We believe that the HRA plays a critical role in coordinating the care of SNP enrollees. Section 1859(f)(5)(A) of the Act requires SNPs to conduct initial and annual comprehensive HRA, develop and implement an individualized plan of care, and implement an interdisciplinary team for each beneficiary. As noted in the January 2009 final rule, we believe that the combination of these statutory elements and our regulatory prescription for the SNP model of care establishes the standardized architecture for effective care management. We believe extending the requirement for the individualized care plan to address the results of the initial assessment and annual reassessment care to I–SNPs and D–SNPs, instead of limiting the requirement to C–SNPs, would further increase the effectiveness of the ICP and increase quality outcomes. We welcome comment concerning the amended regulation at § 422.101(f)(1)(i).

4. SNP Fulfillment of the Previous Year's MOC Goals

Fourth, we are proposing to codify the requirement in section 1859(f)(5)(B)(iv) of the Act that the evaluation and approval of the model of care take into account whether the plan fulfilled the previous MOC's goals and to extend this evaluation component to all SNP models of care, rather than limiting it to C–SNPs. We propose a new regulation at § 422.101(f)(3)(ii) that as part of the evaluation and approval of the SNP model of care, NCQA must evaluate whether goals were fulfilled from the previous model of care and plans must provide relevant information pertaining to the MOC's goals as well as appropriate data pertaining to the fulfillment of the previous MOC's goals. If the SNP model of care did not fulfill the previous MOC's goals, the plan must indicate in the MOC submission how it will achieve or revise the goals for the plan's next MOC. We are also proposing to move an existing regulation at § 422.101(f)(2)(vi) that requires all SNPs must submit their MOC to CMS for NCQA evaluation and approval in accordance with CMS guidance to a new paragraph at § 422.101(f)(3). The proposed paragraph at (f)(3)(i) would contain the same language as § 422.101(f)(2)(vi).

We intend that NCQA would determine whether each SNP, as part of the evaluation and MOC approval process, provided adequate information to evaluate the regulation under § 422.101(f)(3)(ii) as well as whether the SNP met goals from the previous MOC submission. It is implicit in the evaluation of the MOC and the requirement for the SNP to submit relevant information that the information submitted by the SNP must be adequate for NCQA to use to evaluate whether the goals from the prior MOC have been fulfilled. We solicit comment whether more explicit requirements on this point should be part of the regulation text.

The proposed regulation at § 422.101(f)(3)(ii) aligns with our current guidance on the MOC submission and review process regarding SNP fulfillment of goals. Currently, all SNPs are required to identify and clearly define measureable goals and health outcomes as part of their model of care under MOC 4, Element B: Measureable Goals and Health Outcomes for the MOC as defined in Chapter 5 of the MMCM. CMS believes that it is critical for all SNPs to use the results of the quality performance indicators and measures to support ongoing improvement of the MOC, and that all SNPs should continuously assess and evaluate plan quality outcomes. MOC 4, Element B currently contains the following parameters:

- Identify and define the measurable goals and health outcomes used to improve the health care needs of SNP beneficiaries.
- Identify specific beneficiary health outcome measures used to measure overall SNP population health outcomes at the plan level.
- Describe how the SNP establishes methods to assess and track the MOC's impact on SNP beneficiaries' health outcomes.
- Describe the processes and procedures the SNP will use to determine if health outcome goals are met.
- Describe the steps the SNP will take if goals are not met in the expected timeframe.

For SNPs submitting their initial MOC, NCQA will evaluate the information under MOC 4 Element B as the setting of clearly definable and measurable goals and health outcomes in their MOC for the upcoming MOC period of performance. For the following submission year, the plan will be evaluated on whether the measurable goals and health outcomes set in the initial MOC were achieved.

Plans submitting an initial model of care must provide relevant information pertaining to the MOC's goals for review and approval under this paragraph. We propose specific regulation text on this point at § 422.101(f)(3)(ii)(B). We seek comment on the new regulation at § 422.101(f)(3)(ii).

5. Establishing a Minimum Benchmark for Each Element of the SNP Model of Care

Finally, we propose new regulation text at § 422.101(f)(3)(iii) to impose the requirement for benchmarks to be met for a MOC to be approved. Section 1859(f)(5)(B)(v) of the Act requires that the Secretary establish a minimum benchmark for each element of the C–SNP model of care, and that the MOC can only be approved if each element meets a minimum benchmark. We propose in § 422.101(f)(3)(iii) to implement these benchmarks for all SNP models of care. Given that medically complex conditions are found in enrollees across all SNP types and

that implementation to C–SNPs alone would be operationally challenging for plans offering multiple SNP types, we believe it is appropriate to extend this requirement to all SNPs. Each SNP model of care would be evaluated based on a minimum benchmark for each of the four elements. Currently, each subfactor of a MOC element is valued at 0–4 points with the score of each element based on the number of factors met for that specific element; the aggregate total of all possible points across all elements equals 60, which is then converted to percentage scores based on the number of total points received. We propose that each element of the MOC must meet a minimum benchmark of 50 percent of total points as allotted, and a plan's MOC would only be approved if each element of the model of care meets the applicable minimum benchmark.

We welcome comment on the proposed § 422.101(f)(3)(iii). Specifically, we are seeking comment to our proposed benchmark and scoring criteria as they impact the evaluation of SNP models of care.

C. Coverage Gap Discount Program Updates (§§ 423.100 and 423.2305)

We propose to amend our regulations at §§ 423.100 (definition of applicable drug) and 423.2305 (determination of coverage gap discount) to reflect recent changes to the relevant statutory provisions. Sections 53113 and 53116 of the BBA of 2018 amended section 1860D–14A of the Act to (a) increase the coverage gap discount for applicable drugs from 50 to 70 percent of the negotiated price beginning in plan year 2019, and (b) revise the definition of an applicable drug to include biosimilar biological products, also beginning in plan year 2019.

Specifically, section 53116 of the BBA of 2018 revised the definition of ''discounted price,'' meaning the price provided to the beneficiary, in section 1860D–14A(g)(4)(A) of the Act to mean, for a plan year after 2018, 30 percent of the negotiated price. This means that the coverage gap discount is 70 percent, rather than 50 percent. To make our regulations consistent with this change, we propose to amend the definition of ''applicable discount'' in § 423.2305 to provide that, with respect to a plan year after plan year 2018, the applicable discount is 70 percent of the portion of the negotiated price (as defined in § 423.2305) of the applicable drug of a manufacturer that falls within the coverage gap and that remains after such negotiated price is reduced by any supplemental benefits that are available.

Section 53113 of the BBA of 2018 amended section 1860D–14A(g)(2)(A) of the Act to specify that biologic products licensed under subsection (k) (that is, biosimilar and interchangeable biological products) are excluded from the coverage gap discount program only with respect to plan years before 2019. Therefore, we are proposing to revise the definition of applicable drug at § 423.100 to specify that such biological products are excluded only for plan years before 2019. Accordingly, biosimilar products are included in the Discount Program beginning for plan year 2019.

D. Part D Income Related Monthly Adjustment Amount (IRMAA) Calculation Update for Part D Premium Amounts (§ 423.286)

Section 3308 of the Affordable Care Act amended section 1860D–13(a) of the Act and imposed an income-related monthly adjustment amount for Medicare Part D (hereinafter referred to as Part D–IRMAA) for beneficiaries whose modified adjusted gross income (MAGI) exceeds the same income threshold amount tiers established under section 1839(i) of the Act with respect to the Medicare Part B income-related monthly adjustment amount (Part B–IRMAA). The Part D–IRMAA is an amount that a beneficiary pays in addition to the monthly plan premium for Medicare prescription drug coverage under the Part D plan in which the beneficiary is enrolled when the beneficiary's MAGI is above the specified threshold.

The Part D–IRMAA income tiers mirror those established for the Part B–IRMAA. As specified in section 1839(i) of the Act, when the Part B–IRMAA went into effect in 2007, individuals and joint tax filers enrolled in Medicare Part B whose modified adjusted gross income exceeded $80,000 and $160,000, respectively, were assessed the Part B–IRMAA on a sliding scale. As specified in section 1839(i)(5) of the Act, each dollar amount within the income threshold tiers shall be adjusted annually based on the Consumer Price Index (CPI). As a result of the annual adjustment, for calendar year 2010, the income threshold amounts had increased to reflect the four income threshold amount tiers for individuals and joint tax filers whose modified adjusted gross income exceeded $85,000 and $170,000, respectively. (We note that section 3402 of the Affordable Care Act froze the income thresholds for 2011 through 2019 at the level established for 2010.)

Consistent with section 3308 of the Affordable Care Act, the Part D–IRMAA is calculated using the Part D national base beneficiary premium (BBP) and the applicable premium percentage (P) as follows: $BBP \times [(P - 25.5 \text{ percent})/25.5 \text{ percent}]$. The premium percentage used in the calculation will depend on the level of the Part D enrollee's modified adjusted gross income.

Section 3308 of the Affordable Care Act requires CMS to provide the Social Security Administration (SSA) with the national base beneficiary premium amount used to calculate the Part D–IRMAA no later than September 15 of each year, starting in 2010. Also effective in 2010, CMS must provide SSA no later than October 15 of each year, with: (1) The modified adjusted gross income threshold ranges; (2) the applicable percentages established for Part D–IRMAA in accordance with section 1839 of the Act; (3) the corresponding monthly adjustment amounts; and (4) any other information SSA deems necessary to carry out Part D–IRMAA.

To determine a beneficiary's IRMAA, SSA considers the beneficiary's MAGI, together with their tax filing status, to determine the percentage of the: (1) Unsubsidized Medicare Part B premium the beneficiary must pay; and (2) cost of basic Medicare prescription drug coverage that the beneficiary must pay.

Since the implementation of the Part D–IRMAA in 2011, subsequent revisions to the statute have modified the associated income tiers used in IRMAA calculations:

- Section 402 of the Medicare Access and CHIP Reauthorization Act (MACRA) of 2015, revised the income thresholds for the Part B- and Part D–IRMAA income groups such that beneficiaries with incomes greater than $85,000 but not more than $107,000 were required to pay 35 percent of Part B and Part D program costs; beneficiaries with incomes greater than $107,000 but not more than $133,500 would pay 50 percent of Part B and Part D program costs; beneficiaries with incomes greater than $133,500 but not more than $160,000 would pay 65 percent of Part B and Part D program costs; while beneficiaries with incomes greater than $160,000 were required to pay 80 percent of Part B and Part D program costs.
- Section 53114 of the BBA of 2018 revised the MAGI ranges again such that, beginning in 2019, beneficiaries with incomes greater than $500,000 ($750,000 for joint tax filers) are required to pay 85 percent of program costs (an increase from 80 percent).

We are proposing to revise § 423.286(d)(4)(ii) for consistency with the changes made by section 53114 of

the BBA of 2018 and to make other technical changes to ensure that the calculations used in the methodology for updating Part D–IRMAA are described correctly. We propose to remove the language ''the product of the quotient obtained by dividing the applicable premium percentage specified in § 418.2120 (35, 50, 65, or 80 percent) that is based on the level of the Part D enrollee's modified adjusted gross income for the calendar year reduced by 25.5 percent and the base beneficiary premium as determined under paragraph (c) of this section'' and replace it with the product of the standard base beneficiary premium, as determined under paragraph (c) of this section, and the ratio of the applicable premium percentage specified in 20 CFR 418.2120, reduced by 25.5 percent; divided by 25.5 percent (that is, premium percentage − 25.5)/25.5).

We are not scoring this provision in the Regulatory Impact Analysis section since it codifies existing guidance. We believe all stakeholders are already following the current guidance. We are also not scoring this provision in the Collection of Information section since we believe all information impacts of this provision have already been accounted for under OMB control number 0938–0964 (CMS–10141), but seek comment on this assumption.

E. Contracting Standards for Dual Eligible Special Needs Plan (D–SNP) Look-Alikes (§ 422.514)

Special needs plans (SNPs) are MA plans created by the MMA that are specifically designed to provide targeted care and limit enrollment to special needs individuals. Under section 1859 of the Act, SNPs are able to restrict enrollment to: (1) Institutionalized individuals, who are currently defined in § 422.2 as those residing or expecting to reside for 90 days or longer in a long term care facility; (2) individuals entitled to medical assistance under a State Plan under Title XIX; or (3) other individuals with certain severe or disabling chronic conditions who would benefit from enrollment in a SNP. As of July 2019, there are 321 SNP contracts with 734 SNP plans that have at least 11 members, including all of the following:

- 480 dual eligible SNPs (D–SNPs).
- 125 institutional SNPs (I–SNPs).
- 129 chronic or disabling condition SNPs (C–SNPs).[9]

Beneficiaries who are dually eligible for both Medicare and Medicaid can face significant challenges in navigating the two programs, which include separate or overlapping benefits and administrative processes. Fragmentation between the two programs can result in a lack of coordination for care delivery, potentially resulting in—(1) missed opportunities to provide appropriate, high-quality care and improve health outcomes; and (2) undesirable outcomes, such as avoidable hospitalizations and poor beneficiary experiences. Advancing policies and programs that integrate care for dually eligible individuals is one way in which we seek to address such fragmentation. Under plans that offer integrated care, dually eligible individuals receive the full array of Medicaid and Medicare benefits through a single delivery system, thereby improving care coordination, quality of care, and beneficiary satisfaction, and reducing administrative burden. Some studies have shown that highly integrated managed care programs perform well on quality of care indicators and enrollee satisfaction.[10]

D–SNPs are intended to integrate or coordinate care for this population more effectively than standard MA plans or the original Medicare fee-for-service program by focusing enrollment and care management on dually eligible individuals. As of July 2019, approximately 2.6 million dually eligible individuals (1 of every 5 dually eligible individuals) were enrolled in 480 D–SNPs.

Federal statute and implementing regulations have established several requirements for D–SNPs in addition to those that apply to all MA plans, including all of the following:

- *Health risk assessment.* Section 164 of MIPPA amended section 1859(f) of the Act to require all SNPs to conduct an initial assessment and an annual reassessment of an enrollee's physical, psychosocial, and functional needs. Implementing regulations are codified at § 422.101(f)(1)(i).
- *Model of care.* Section 164 of MIPPA amended section 1859(f) of the Act to require all SNPs to have in place an evidence-based model of care with appropriate networks of providers and specialists. Implementing regulations are codified at § 422.101(f).
- *Comprehensive written statement.* Section 164 of MIPPA amended section 1859(f) of the Act to require D–SNPs to provide each prospective enrollee, prior to enrollment, with a comprehensive written statement that describes the benefits and cost-sharing protections to which the beneficiary is entitled under Medicaid and which of those Medicaid benefits are covered by the D–SNP. Implementing regulations are codified at § 422.111(b)(2)(iii).
- *State Medicaid agency contract.* Section 164 of MIPPA also amended section 1859(f) of the Act to require that D–SNPs contract with the state Medicaid agency to provide benefits, or arrange for the provision of Medicaid benefits, which may include long-term care services consistent with state policy, to which an individual is entitled. Notwithstanding this requirement for D–SNPs, section 164(c)(4) of MIPPA stipulated that a state is in no way obligated to contract with a D–SNP, which therefore provides states with significant control over the availability of D–SNPs. Implementing regulations are codified at § 422.107.

These requirements promote coordination of care. Additionally, the state Medicaid agency contracting requirement allows states the flexibility to require greater integration of Medicare and Medicaid benefits from the D–SNPs in their markets. For example, to develop products that integrate Medicare and Medicaid coverage, several states—including Arizona, Hawaii, Idaho, Massachusetts, Minnesota, New Jersey, and Tennessee—operate Medicaid managed care programs for dually eligible individuals in which the state requires that the Medicaid managed care organizations (MCOs) serving dually eligible individuals offer a companion D–SNP product. These states also require specific care coordination or data sharing activities in their contracts with D–SNPs.[11]

[11] See Verdier, J., Kruse, A., Sweetland Lester, R., Philip, A.M., and Chelminsky, D. *State Contracting*

More recently, section 50311(b) of the BBA of 2018 amended section 1859 of the Act to add new requirements for D–SNPs, beginning in 2021. These requirements, along with clarifications to existing regulations, were codified in the April 2019 final rule (84 FR 15680 through 15844).

• *Minimum integration standards.* As required under section 1859(f)(8)(D)(i) of the Act, as added by the BBA of 2018, all D–SNPs must meet certain new minimum criteria for integration of Medicare and Medicaid benefits for 2021 and subsequent years. To achieve the minimum integration standards, we codified in the April 2019 final rule that a D–SNP must: (1) Be a fully integrated dual eligible (FIDE) SNP; (2) be a highly integrated dual eligible (HIDE) SNP; or (3) have a contract with the state to notify the state, or the state's designee, of high-risk individuals' hospital and skilled nursing facility admissions. Section 1859(f)(8)(D)(ii) of the Act provides that for the years 2021 through 2025, if the Secretary determines that a D–SNP fails to meet one of these integration standards, the Secretary may prevent the D–SNP from enrolling new members. These provisions are codified in amendments to §§ 422.2, 422.107(d), and 422.752(d) that are effective January 1, 2021.

• *Medicaid coordination:* We interpreted the meaning of the requirement in section 1859(f)(3)(D) of the Act, originally codified at § 422.107(b), that the MA organization has responsibility under the contract for providing benefits or arranging for benefits to be provided for individuals entitled to Medicaid as requiring a D–SNP, at a minimum, to coordinate the delivery of Medicare and Medicaid benefits. This requirement is reflected in an amendment to the D–SNP definition at § 422.2, effective January 1, 2020. In addition, an amendment to § 422.562(a)(5), also effective January 1, 2020, requires all D–SNPs to make assistance available to individuals filing a grievance or appeal for Medicaid services.

• *Unified appeals and grievances.* Sections 1859(f)(8)(B) and (C) of the Act require development of unified grievance and appeals processes for D–SNPs, to the extent feasible, to be applicable beginning 2021. We finalized definitions at § 422.561 and implementing regulations, effective January 1, 2021, at §§ 422.560, 422.562, 422.566, 422.629 through 422.634, 438.210, 438.400, and 438.402 in the April 2019 final rule. For 2021 and subsequent years, integrated D–SNPs with exclusively aligned enrollment, termed ''applicable integrated plans,'' must establish integrated grievance and appeals systems using integrated timeframes, notices, and processes. New rules under § 422.632, also effective January 1, 2021, require continuation of benefits pending appeal for enrollees in applicable integrated plans.

The pattern of federal legislation, CMS rulemaking, and state use of D–SNP contracting requirements has incrementally created new requirements for D–SNPs that have generally promoted additional beneficiary protections, coordination of care, and integration of Medicare and Medicaid coverage for dually eligible individuals. While many of these requirements impose additional burdens for D–SNPs, they have not impeded enrollment growth in these plans. Total D–SNP enrollment has more than doubled from one million in 2010 to 2.6 million in 2019.[12] Participation of MA organizations is robust, and most markets are stable and competitive.

In its June 2018 and 2019 reports to Congress, the Medicare Payment Advisory Commission (MedPAC) describes the emergence of ''D–SNP look-alike'' plans that have similar levels of dual eligible enrollment as D–SNPs. For example, MedPAC analysis of 2016 data in select California counties found that, as a percentage of total enrollment, dually eligible individuals accounted for 97 percent of enrollment in D–SNPs and 95 percent in D–SNP look-alikes—compared to 10 percent in other MA plans. Analysis of 2017 enrollment nationally showed multiple D–SNP look-alikes in which dually eligible individuals account for more than 95 percent of total enrollment.[13] Although section 1859(b)(6) of the Act establishes D–SNPs as the only type of MA plan that can exclusively enroll dually eligible individuals, the data show that D–SNP look-alikes have levels of dual eligible enrollment that are virtually indistinguishable from those of D–SNPs and far above those of the typical MA plan.

We believe the low enrollment of non-dually eligible individuals in D–SNP look-alikes results from benefits and cost-sharing that, like the benefits and cost-sharing offered by D–SNPs, are designed to attract only dually eligible individuals. In contrast to non-SNP MA plans, both D–SNPs and D–SNP look-alikes allocate a lower percentage of MA rebate dollars received under the bidding process at § 422.266 to reducing Medicare cost-sharing and a higher percentage of rebate dollars to supplemental medical benefits such as dental, hearing, and vision services. With such a benefit design, many D–SNP look-alikes technically require members to pay higher cost sharing on Parts A and B services than most MA plans require, which we believe dissuades most non-dually eligible Medicare beneficiaries from enrolling. However, because most dually eligible individuals are Qualified Medicare Beneficiaries (QMBs) who are not required to pay Medicare cost sharing, we believe they are not dissuaded from enrolling in these non-D–SNPs by the relatively higher cost sharing. A similar dynamic exists for Part D premiums and high deductibles, both of which are covered by the Part D low-income subsidy that dually eligible individuals receive. We believe that such benefit designs are unattractive for Medicare beneficiaries who are not dually eligible individuals because they would need to cover these costs out-of-pocket. Despite the similarities with D–SNPs in terms of levels of dual eligible enrollment and benefits and cost-sharing design, D–SNP look-alikes are regulated as non-SNP MA plans and are not subject to the federal regulatory and state contracting requirements applicable to D–SNPs.

D–SNP look-alikes first emerged in certain California markets in 2013, after the state placed enrollment restrictions on D–SNPs in areas served by Medicare-Medicaid Plans (MMPs) participating in the Financial Alignment Initiative. Enrollment in D–SNP look-alikes has increased substantially since that time. In these California markets, MedPAC found that D–SNP look-alike enrollment grew from around 5,000 in 2013 to over 95,000 in 2017.[14] MedPAC also explored enrollment trends more broadly, identifying 31 non-SNP

plans [15] operating in 2017 in which dually eligible individuals comprised 80 percent or more of total plan enrollment. These 31 plans, which operated in 10 states (mostly in California and Florida), included approximately 151,000 enrollees. MedPAC estimated that in 2019 enrollment would increase to 193,000 beneficiaries in 54 D–SNP look-alikes across 13 states.[16]

It is not clear that D–SNP look-alikes are essential to the implementation of the Medicare Advantage program or to access to coverage or care for Medicare beneficiaries. Unlike the non-SNP MA plans in which many dually eligible individuals enroll, D–SNP look-alikes do, however, have the near-exclusive levels of dual eligible enrollment that the statute envisions only for D–SNPs that must meet additional Medicare and Medicaid coordination and integration requirements. Most D–SNP look-like enrollment is in markets that feature numerous other plan choices for beneficiaries. Only about 1.2 percent of dually eligible enrollees in traditional MA plans (that is, non-SNP MA plans) are in plans with 80 percent or higher dually eligible enrollment. The data also show that traditional MA plans that are not D–SNP look-alikes can attract dually eligible enrollment; 97 percent of dually eligible individuals enrolled in non-SNP MA plans are in a plan with dual eligible enrollment of 30 percent or less.[17]

The proliferation and growth of D–SNP look-alikes raises multiple areas of concern as follows:

- *Effective implementation of BBA of 2018 requirements.* As discussed earlier in this proposed rule, beginning in contract year 2021, all D–SNPs must meet new minimum criteria for Medicare and Medicaid integration. D–SNP look-alikes hinder meaningful implementation of these statutory requirements. By creating and offering these D–SNP look-alikes that target the same dually eligible individuals who are intended to benefit from integrated D–SNPs, MA organizations are circumventing the new integration requirements.
- *Meaningful integration.* Several states use the state Medicaid agency contracting requirements for D–SNPs at § 422.107 to promote greater Medicare-Medicaid integration. In such states, the state and D–SNP establish specific care coordination protocols, data sharing processes, and other activities to promote better beneficiary experiences. Proliferation of D–SNP look-alikes, for which the same state contracting requirement does not apply, impedes states from using their contracting authority under section 1859 of the Act to ensure that plans predominantly serving dually eligible individuals are working toward those goals. In its comments to CMS for the April 2019 final rule, the Medicaid and CHIP Payment and Access Commission (MACPAC) expressed concern that the growth of D–SNP look-alikes may undermine efforts to promote increased integration through D–SNPs and urged CMS to continue to monitor the growth of look-alikes and determine if further action is needed.[18] As we noted earlier, studies have shown that highly integrated managed care programs perform well on quality of care indicators and enrollee satisfaction.
- *Care coordination requirements.* To better serve the dually eligible population, MIPPA and implementing regulations require D–SNPs to provide periodic health risk assessments, develop individualized care plans for their members, and develop and seek CMS approval for their models of care. These requirements do not apply to D–SNP look-alikes. As a result, nothing requires the D–SNP look-alikes to deliver the types of care coordination that Congress established as statutory requirements for plans that are designed for dually eligible individuals.
- *Beneficiary confusion.* The prevalence of the D–SNP look-alikes has led to instances of misleading marketing by brokers and agents that misrepresent to dually eligible individuals the characteristics of such look-alike plans, especially where the plans have marketed themselves as being special Medicaid-focused plans. We continue to learn of these marketing practices from our own review of broker materials, investigating complaints we have received, and reports from advocacy organizations.[19] Confusing and misleading marketing efforts may violate § 422.2268(a)(1) and (2) which this proposed rule proposes to redesignate as § 422.2262(a)(1)(i) and (iii) which prohibits MA organizations from providing information that is inaccurate or misleading and from engaging in activities that could mislead or confuse Medicare beneficiaries or misrepresent the MA organization. For that reason, and as discussed elsewhere in this proposed rule, we propose at § 422.2262(a)(1)(xvi) to codify previous subregulatory guidance from the Medicare Communications and Marketing Guidelines prohibiting MA organizations, with respect to their non-D–SNP plans, from marketing their plan as if it were a D–SNP, implying that their plan is designed for dually eligible individuals, targeting their marketing efforts exclusively to dually eligible individuals, or claiming a relationship with the state Medicaid agency, unless a contract to coordinate Medicaid services for that plan is in place.

We sought comments on the impact of D–SNP look-alikes in Medicare and Medicaid in the 2020 Draft Call Letter.[20] Specifically, we sought comment on topics related to the extent to which D–SNP look-alikes impact informed consumer choice; competition and innovation; the provision of high-quality coordinated care that addresses the full spectrum of dually eligible individuals' care and service needs; state Medicaid policy and operations; financial incentives; provider burden; and development and sustainability of products for dually eligible individuals through which an enrollee can receive all Medicare and Medicaid services from one organization.

As discussed in the 2020 Final Call Letter, we received comments from a range of stakeholders, including states, beneficiary advocates, and MA organizations and Medicaid MCOs.[21] Overall, the comments reinforced our concern that the proliferation of D–SNP look-alikes impedes progress toward developing products that meaningfully integrate Medicare and Medicaid benefits for dually eligible individuals. Commenters believed that D–SNP look-alikes allow MA organizations to circumvent enrollment restrictions and federal regulatory and state contracting requirements for D–SNPs and MMPs, undercutting efforts to lower costs and improve the quality of care.

As we noted in the 2020 Final Call Letter, commenters highlighted three areas that warranted further investigation and analysis and potential rulemaking: Benefit design and

[15] MedPAC also excluded employer group waiver plans (EGWPs) and a select group of medical savings account (MSA) plans.

[21] Ibid.

nondiscrimination; beneficiary education, marketing, and broker compensation; and enhanced requirements for MA plans with high proportions of dually eligible enrollees. Some stakeholders suggested that benefit design used by D–SNP look-alikes appears to violate the prohibition at § 422.100(f)(2) against benefit designs that are discriminatory and against steering subsets of beneficiaries to specific plans, since their design targets dually eligible individuals.

We also received broad support for efforts to ensure that MA organizations do not market D–SNP look-alikes as plans that coordinate Medicaid benefits, as particularly suited to dually eligible individuals, or as uniquely subject to rules that protect dually eligible individuals from cost sharing or for which Medicaid pays the full amount of plan cost sharing. Lastly, several commenters recommended that CMS require MA plans with high proportions of dually eligible individuals to meet D–SNP regulatory requirements, including the requirement to contract with the state Medicaid agency.

To address these concerns, we are proposing at § 422.514(d) that CMS not enter into or renew a contract for a D–SNP look-alike in any state where there is a D–SNP or any other plan authorized by CMS to exclusively enroll dually eligible individuals. We also propose to establish procedures for transitioning enrollees from D–SNP look-likes to other MA plans in new regulation text at § 422.514(e). The proposed new contracting standards would effectively ensure all MA plans that predominantly serve dually eligible individuals integrate delivery of Medicare and Medicaid services and coordinate care consistent with the statutory and regulatory requirements for D–SNPs wherever it is feasible to do so.

Under our authority to adopt standards implementing the Part C statute and to add contract terms in sections 1856(b) and 1857(e)(1) of the Act, we are proposing to establish contracting standards for MA organizations based on their projected dually eligible enrollment in plan bids or on the proportion of dually eligible enrollees actually enrolled in the plan. A high rate of enrollment by dually eligible individuals in a non-D–SNP would allow us to identify non-SNP MA plans that are intended to predominantly enroll dually eligible individuals (that is, D–SNP look-alikes). We propose exceptions to these contracting standards for all SNPs. We believe that our proposal is an effective way to ensure that MA organizations do not undermine the statutory requirements established for D–SNPs by designing non-SNP MA plans to predominantly enroll dually eligible individuals. We believe that failure to adopt these exceptions could compromise the statutory and regulatory framework for D–SNPs. Any MA organization, by designing its benefits and outreach strategy to target dually eligible enrollment, practices that the enrollment patterns of D–SNP look-alikes show MA organizations are readily adopting, can offer an MA plan with high rates—in some cases almost 100 percent—of dually eligible enrollment without implementing any of the care management or Medicaid coordination activities that federal law requires of D–SNPs. States' ability to set contract terms for D–SNPs, including terms that limit contracted D–SNPs to entities that deliver integrated Medicare and Medicaid benefits, as provided under section 1859 of the Act, is likewise subverted by D–SNP look-alikes. Our proposal is especially critical as we approach implementation of new D–SNP requirements included in the BBA of 2018.

To prevent the undermining of the statutory and regulatory framework for D–SNPs, we therefore propose to establish a new regulation precluding CMS from entering into or renewing a contract for an MA plan that an MA organization offers, or proposes to offer, with enrollment of dually eligible individuals that exceeds specific enrollment thresholds. This proposed regulation would apply in any state where there is a D–SNP or any other plan authorized by CMS to exclusively enroll dually eligible individuals. Section 1856(b)(1) of the Act provides the Secretary with the authority to establish in regulation other standards not otherwise specified in statute that are both consistent with Part C statutory requirements and necessary to carry out the MA program. Our proposed regulations would ensure applicability and compliance with the statutory framework for D–SNPs. Additionally, section 1857(e)(1) of the Act authorizes the Secretary to establish MA organization contract terms and conditions that are necessary and appropriate and not inconsistent with other Part C statutory requirements. We believe that our proposed contract terms prohibiting the offering of D–SNP look-alikes is not inconsistent with the Part C statute and is necessary and appropriate to retain the integrity of the D–SNP statutory framework. Under the statute, only D–SNPs can primarily enroll dually eligible individuals, and D–SNPs must meet certain requirements. Our proposal would ensure that a non-SNP MA plan that, in practice, enrolls primarily dually eligible individuals under the conditions outlined in our proposal does not skirt the specific statutory and regulatory requirements designed to meet the specific needs of dually eligible individuals.

We propose not to enter into or renew MA contracts for an MA plan for an upcoming plan year when that MA plan is identified as exceeding specific enrollment thresholds for dually eligible individuals. However, MA organizations with plans identified as exceeding the enrollment threshold that also have approved D–SNPs for the following plan year would be permitted to transition dually eligible enrollees from D–SNP look-alikes to D–SNPs for which the individuals are eligible. We would permit this transition process to minimize disruptions to beneficiary coverage and allow enrollees in these D–SNP look-alikes to benefit from the statutory and regulatory care coordination and Medicaid integration requirements. We describe the specific changes we are proposing to § 422.514 as follows.

We propose changing the title of § 422.514 by removing the word ''minimum'' because the changes we propose to § 422.514 reflect an additional type of enrollment requirement beyond the minimum enrollment requirements currently articulated in § 422.514. We also propose to change the title of paragraph (a) from ''Basic rule'' to ''Minimum enrollment rules'' for clarity due to the proposed change to the scope of § 422.514.

We propose a new paragraph (d) to establish new contract requirements related to dual eligible enrollment. The proposed requirement at paragraph (d) would apply for an MA plan that is not a special needs plan for special needs individuals as defined in § 422.2. We propose applying this requirement only to non-SNP plans to allow for the predominant dually eligible enrollment that characterizes D–SNPs, I–SNPs, and some C–SNPs by virtue of the populations that the statute expressly permits each type of SNP to exclusively enroll. For D–SNPs, the rationale for the exception is obvious—these MA plans enroll dually eligible individuals by statute. I–SNPs, by virtue of enrolling institutionalized individuals, or community-residing individuals who, but for the long-term services and supports they receive, otherwise reside in a long-term care institution, typically have high proportions of dually eligible individuals who qualify to receive

Medicaid long-term care benefits. In July 2017, 92 percent of I–SNP enrollees were dually eligible individuals.[22] Certain C–SNPs also have a relatively high proportion of dually eligible individuals because the chronic conditions these plans target are more prevalent among dually eligible individuals. For example, in July 2017, dually eligible individual enrollment in one end-stage renal disease (ESRD) C–SNP was 49 percent of total enrollment, in one HIV/AIDS C–SNP was 68 percent of total enrollment, and in one chronic and disabling mental health conditions C–SNP was 83 percent of total enrollment.[23] We would not want our proposed requirements to limit C–SNP enrollment by dually eligible individuals who could benefit from a plan that employs a specialized model of care, periodic health risk assessments, and other techniques that result in specialized, comprehensive care for individuals with certain chronic conditions.

The proposed requirement at paragraph (d) would be limited to states where there is a D–SNP or any other plan authorized by CMS to exclusively enroll dually eligible individuals, such as MMPs. We propose this limitation because it is only in such states that the implementation of D–SNP requirements necessitates our proposed new contracting requirements. That is, in a state with no D–SNPs or comparable managed care plans like MMPs, the D–SNP requirements have not had any relevance historically. There are no plans contracted with the state to implement the D–SNP requirements or otherwise integrate Medicare and Medicaid services, and therefore the operation of a D–SNP look-alike would not have any material impact on the full implementation of federal D–SNP requirements. In such states, the existence of D–SNP look-alikes is not impeding state or federal implementation of any requirements for enhanced care coordination and Medicaid integration by providing a vehicle for MA organizations to avoid compliance with those requirements that are imposed on D–SNPs or comparable managed care plans like MMPs. Therefore, we do not believe it is critical for our proposed requirements in paragraph (d) to apply in such states.

As of July 2019, eight states do not have any D–SNPs. We believe there are two main reasons for the absence of D–SNPs in these states. First, the rural nature of some states makes it challenging for any MA plan, including a D–SNP, to operate because of the sparse Medicare population and the difficulty in establishing networks. Second, some state Medicaid agencies have decided not to contract with any D–SNPs, either because the agency is not pursuing integration of Medicare and Medicaid through managed care, or is pursuing integrated care through MMPs.

We believe the proposed limitation on the states where the proposed dual eligible enrollment requirement would apply would continue to protect states' ability to contract with plans—including for Medicaid behavioral health services and long-term supports and services—in a manner that promotes integration and coordination of benefits and a more seamless experience for dually eligible individuals in such plans. Based on the type of plan, states use different contracting mechanisms to establish such requirements. In particular, states establish three-way contracts with MMPs, state Medicaid agency contracts with D–SNPs, and other contracts with Medicaid MCOs affiliated with D–SNPs for the delivery of Medicaid benefits. Each type of contract between the state and plan can effectively establish integration and coordination of benefits requirements.

However, we recognize that the limitation would allow, in certain states, D–SNP look-alikes that do not meet the minimum D–SNP requirements for data sharing or care coordination. We seek comment on whether the absence of these data sharing and care coordination requirements for D–SNP look-alikes in states where they could continue to operate under our proposed rule disadvantages the dually eligible individuals in D–SNP look-alikes and whether we should extend the proposed requirement at paragraph (d) to all states.

We propose to add new paragraphs (d)(1) and (2) that would require that CMS not enter into or renew a contract, for plan year 2022 or subsequent years, for an MA plan that is a non-SNP plan that either:

- Projects in its bid submitted under § 422.254 that 80 percent or more of the plan's total enrollment are enrollees entitled to medical assistance under a state plan under Title XIX, or
- Has actual enrollment, as determined by CMS using the January enrollment of the current year, consisting of 80 percent or more of enrollees who are entitled to medical assistance under a state plan under Title XIX, unless the MA plan has been active for less than one year and has enrollment of 200 or fewer individuals at the time of such determination.

We believe that using either enrollment scenario is necessary to ensure that both new D–SNP look-alikes are not offered and that current, or existing, D–SNP look-alikes are not continued.

Proposed paragraph (d)(2), which would allow us to identify D–SNP look-alikes based on actual enrollment, would limit the prohibition to MA plans that have been active for one or more years and with enrollment equal to or greater than 200 individuals at the time of CMS' determination under proposed paragraph (d)(2). This limitation on our proposed contract requirement during a plan's first year is important because an early enrollment pattern may not be representative of the enrollment profile the plan will experience at a point of greater maturity.

To provide an example of how CMS would implement proposed paragraph (d)(2) in the first year, CMS would review MA plan enrollment data for January 2021 to determine if actual enrollment consists of 80 percent or more of enrollees who are entitled to medical assistance under a state plan under Title XIX. CMS would not enter into or renew the contract for contract year 2022 for an MA plan that exceeds the 80 percent threshold unless the MA plan has been active for less than one year and has January 2021 enrollment of 200 or fewer individuals.

We believe focusing on the proportion of dually eligible enrollment, both in bids and actual enrollment, is the best way to identify D–SNP look-alikes because it is the net result of benefit design and marketing strategies and less subject to gaming by plans than other alternatives, as discussed later in this preamble. We propose a threshold for dually eligible enrollment at 80 percent of a non-SNP MA plan's enrollment because it far exceeds the share of dually eligible individuals in any given market and, therefore, would not be the result for any plan that had not intended to achieve high dually eligible enrollment. MedPAC analysis shows that in most MA markets, the proportion of dually eligible individuals as a percentage of total enrollment is clustered in the 10 to 25 percent range and in no county exceeds 50 percent.[24] We believe the proportion of dually eligible enrollment as a percentage of

[22] CMS, Chronic Conditions Data Warehouse, Part D Plan Characteristics File and Master Beneficiary Summary File, Final 2017 MBSF created in January 2019.

[24] *June 2019 MedPAC Report to Congress, Chapter 12* at *http://www.medpac.gov/docs/default-source/reports/jun19_ch12_medpac_reporttocongress_sec.pdf?sfvrsn=0.*

total plan enrollment is therefore a reliable indicator or proxy for identifying a non-SNP MA plan that the MA organization intends to have exclusive or predominantly dually eligible enrollment in without being subject to the D–SNP integration and care coordination requirements. MedPAC data show that our proposed threshold would have minimal impact on total dually eligible enrollment in non-SNP MA plans. Among dually eligible enrollees in traditional MA plans, only about 1.2 percent are in plans in which dually eligible individuals make up 80 percent or more of total plan enrollment. Also, 97 percent of dually eligible individuals enrolled in traditional MA plans are enrolled in a plan with 30 percent or less dually eligible enrollment, which indicates that traditional MA plans do not have to create D–SNP look-alikes to attract dually eligible individuals.[25]

We considered an alternative discussed by MedPAC in its June 2019 report to Congress for identifying traditional MA plans with predominantly dually eligible enrollment: Setting the bar at the higher of 50 percent dually eligible enrollment or the proportion of dually eligible MA-eligible individuals in the plan service area plus 15 percentage points. We also considered setting a lower threshold for dually eligible enrollment at a point between 50 percent and our proposed 80 percent threshold. However, we opted to propose an enrollment threshold of 80 percent or higher as an indicator that the plan is designed to attract disproportionate dually eligible enrollment because it aligns with MedPAC's 2019 research findings, provides a threshold that would be easier for MA organizations to determine prospectively, and would be easier for CMS to implement. We seek comment on whether these alternative enrollment thresholds are preferable.

Under our proposal for paragraph (d)(2), we would annually make the determination whether an MA organization has a non-SNP MA plan with actual enrollment exceeding the established threshold using the plan's enrollment in January of the current year. We intend to make such evaluations and issue the necessary information to affected MA organizations early in the coverage year. Even without a notice from CMS, we expect that each MA organization would be able to independently determine the level of dually eligible enrollment in its MA plan. Upon receiving the notice from CMS that this proposed prohibition on contracting with D–SNP look-alikes is triggered, the MA organization would then have the opportunity to make an informed business decision to: (1) As necessary, apply and contract for a new D–SNP for the forthcoming contract year; (2) create a new MA plan or plans through the annual bid submission process; or (3) terminate the D–SNP look-alike plan and not submit a bid for the following contract year.

In proposed paragraph (e), we propose a process and procedures for transitioning individuals who are enrolled in a D–SNP look-alike to another MA–PD plan (or plans) offered by the MA organization to minimize disruption as a result of the prohibition on contract renewal for existing D–SNP look-alikes. Enrollees in MA plans that an MA organization cannot continue to operate as a result of our proposal may choose new forms of coverage for the following plan year, including a new MA or MA–PD plan or through the original Medicare fee-for-service program. Under our proposal, an MA organization with a non-SNP MA plan determined to meet the enrollment threshold in proposed paragraph (d)(2) could transition enrollees into another MA–PD plan (or plans) offered by the same MA organization, as long as any such MA–PD plan meets certain proposed criteria described in this section. As stated in paragraph (e)(2), this proposed transition process would allow MA enrollees to be transitioned from one MA plan offered by an MA organization to another MA–PD plan (or plans) without having to fill out an election form or otherwise indicate their enrollment choice as typically required, but it would also permit the enrollee to make an affirmative choice for another MA plan of his or her choosing. Enrollees would still have the opportunity to choose their own plan during this transition process because of how the proposed transition process would overlap with the annual coordinated election period.

Proposed paragraph (e)(1) specifies that, for coverage effective January 1 of the next year, the MA organization could only transition individuals from the D–SNP look-alike that is not being renewed into one or more MA plans (including a D–SNP) if such individuals are eligible to enroll in the receiving plan(s) in accordance with §§ 422.50 through 422.53. Thus, the individual would have to reside in the service area of the new plan and otherwise meet eligibility requirements for it. The proposed process would allow, but not require, the MA organization to transition dually eligible enrollees from a D–SNP look-alike into one or more D–SNPs offered under the MA organization, or another MA organization that shares the same parent organization as the MA organization, and therefore allow enrollees to benefit not only from continued coverage under the same parent organization but also from the care coordination and Medicaid benefit integration offered by a D–SNP.

We also propose at paragraphs (e)(1)(i) through (iii) specific criteria for any MA plan to receive enrollment through this transition process. Our policy goal for this process is to ensure that enrollees receive coverage under their new MA plan that is similarly affordable as the plan that would not be permitted for the next year. Under paragraph (e)(1)(i), we propose to allow a terminating D–SNP look-alike to transition enrollment to another non-SNP plan (or plans) only if the resulting total enrollment in each of the MA plans receiving enrollment consists of less than 80 percent dually eligible individuals. SNPs receiving transitioned enrollment would not be subject to the proposed dual eligible enrollment requirement. The percent of dually eligible individuals in the resulting total enrollment would have to be determined prospectively in order for us to make a timely decision on whether to allow for an MA organization to transition enrollment into a non-SNP MA plan or plans. As described at proposed paragraph (e)(3), we would make such determination by adding the cohort of enrollees that the MA organization proposes to enroll into a different non-SNP plan to the April enrollment of the receiving plan and calculating the resulting percent of dually eligible enrollment. We would make this calculation for each non-SNP plan into which the MA organization proposes to transition enrollment. This proposed criterion would ensure that the enrollment transitions under this regulation do not result in another non-SNP MA plan being treated as a D–SNP look-alike under proposed paragraph (d). Proposed paragraph (e)(1)(ii) would require that any plan receiving transitioned enrollment be an MA–PD plan as defined in § 422.2. Proposed paragraph (e)(1)(iii) would require that any MA plan receiving transitioned enrollment from a D–SNP look-alike have a combined Part C and D beneficiary premium of $0 after application of the premium subsidy for

[25] See *June 2018 MedPAC Report to Congress, Chapter 9* at *http://medpac.gov/docs/default-source/reports/jun18_ch9_medpacreport_sec.pdf?sfvrsn=0* and *June 2019 MedPAC Report to Congress, Chapter 12* at *http://www.medpac.gov/docs/default-source/reports/jun19_ch12_medpac_reporttocongress_sec.pdf?sfvrsn=0.*

full subsidy eligible individuals described at § 423.780(a).

As proposed in paragraph (e)(2)(ii), the MA organization would be required to describe changes to MA–PD benefits and provide information about the MA–PD plan into which the individual is enrolled in the Annual Notice of Change that the MA organization must send, consistent with § 422.111(a), (d), and (e) and proposed § 422.2267(e)(3). Consistent with § 422.111(d)(2), enrollees would receive this Annual Notice of Change (ANOC) describing the change in plan enrollment and any differences in plan enrollment at least 15 days prior to the first day of the annual election period. By proposing that this information is provided before the annual election period through this reference to the ANOC, we believe that we are ensuring that each enrollee affected by a transition under this proposal would have the information necessary to decide if they wish to change plans rather than be transitioned to the MA organization's other plan. By timing the notice with the annual open enrollment period, our proposal ensures that affected enrollees retain the opportunity to choose another MA plan or the original Medicare fee-for-service program and a Prescription Drug Plan.

As proposed in paragraph (e)(4), in cases where an MA organization does not transition some or all current enrollees from a D–SNP look-alike plan to one or more of the MA organization's other plans as provided in proposed paragraph (e)(1), it would be required to send affected enrollees a written notice consistent with the non-renewal notice requirements at § 422.506(a)(2). This proposal ensures that affected enrollees who would otherwise be disenrolled to the original Medicare fee-for-service program have an opportunity during the annual open enrollment period to make a different enrollment election.

This proposed transition process is conceptually similar to ''crosswalk exception'' procedures historically allowed by CMS and proposed at § 422.530, as described in section VI.C. of this proposed rule. However, in contrast to the proposed crosswalk exceptions, our proposal would allow the transition process to apply across legal entities offered by MA organizations under the same parent organization, as well as different plan types (for example, non-SNP to SNP). Allowing this type of enrollment transition process would minimize disruptions in coverage for dually eligible individuals enrolled in a D–SNP look-alike (who could be transitioned to a D–SNP or a non-D–SNP) and the small number of Medicare-only individuals enrolled in a D–SNP look-alike plan (who could be transitioned into a non-SNP MA plan operated by the same MA organization). Because this transition process is not the same as the crosswalk process, our proposal codifies it as part of § 422.514.

We considered an alternative that would require transitioning any dually eligible individuals into a D–SNP for which they were eligible if such a plan is offered by the MA organization. We opted for proposing a less prescriptive set of transition rules, recognizing a potentially wide array of transition scenarios, but seek comment on this alternative. In addition, we seek comment on whether additional criteria for the receiving plan are necessary to protect beneficiaries who are affected by this proposed prohibition on renewing MA plans that meet the criteria in proposed § 422.514(d).

We intend for the transition process to take effect in time for D–SNP look-alikes operating in 2020 to utilize the transition process for enrollments to be effective January 1, 2021. This will allow current MA–PD plans that expect to meet the enrollment threshold in proposed paragraph (d)(2) to retain some or all of their current enrollment by transitioning these individuals to other MA–PD plans offered by the same MA organization a year before CMS implements any plan terminations under this proposal. Contract terminations for plans that are specified in proposed paragraph (d)(2) would take effect no earlier than December 31, 2021, because, as specified in the proposed regulation text, such terminations would apply only beginning for plan year 2022. However, the proposed provision at paragraph (e)(1) allowing an MA organization to transition enrollees from a D–SNP look-alike plan into one or more MA–PD plans offered by that MA organization would be effective after the publication of a final rule in 2020. That is, if our proposal is finalized, we would work with plans that expect to have enrollment of dually eligible individuals that exceeds the enrollment threshold in proposed paragraph (d)(2) for Contract Year 2021 to confirm eligibility for the transition process and take necessary operational steps in 2020 to allow transition of enrollees from those plans into new MA–PD plans offered by the same MA organization on January 1, 2021, because CMS would not renew those contracts for 2022.

Overall, our proposal focuses on dually eligible beneficiaries as a percentage of a plan's total enrollment. We considered using alternative criteria instead of, or in addition to, the percentage of projected or actual dually eligible enrollment, to identify non-SNP MA plans designed to exclusively or predominantly enroll dually eligible individuals. In particular, we considered identifying D–SNP look-alikes by the benefit design these plans typically offer—relatively high Parts A and B cost sharing and a high Part D deductible that make the plans unattractive to Medicare-only beneficiaries, supplemental benefits like dental and hearing services and over-the-counter drugs that mimic typical D–SNP offerings, and a premium for Part D coverage that is fully covered by the Part D low-income subsidy. We also considered using the percentage of MA rebate dollars allocated to buy down Parts A and B cost sharing compared to other supplemental benefits—D–SNP look-alikes typically allocate a greater percentage to the latter—as a way to identify D–SNP look-alikes. However, we chose our proposal over these alternatives for multiple reasons. First, we are concerned that further regulating benefit design in this way could inadvertently diminish benefit flexibility that genuinely improves competition and choice, without necessarily being designed to undermine rules applicable to D–SNPs. For example, it is conceivable that future benefit designs would be precluded by any benefit and cost sharing criteria we established to eliminate D–SNP look-alikes, even if those benefit designs would not have drawn a high percentage of dually eligible individuals based on factors that we cannot currently foresee. Second, we determined that MA organizations could likely avoid any new limitations on benefit design through small tweaks to their benefit design or allocation of MA rebate dollars. Most importantly, we determined that the best indicator that a MA organization intends a plan to have exclusive or predominantly dually eligible enrollment is in the enrollment it projects in the bid and in the enrollment it actually achieves. Finally, we believe the criteria to identify D–SNP look-alikes should mirror the principal criterion that distinguishes D–SNPs from other MA plans in statute the ability to have enrollment that exclusively, or predominantly, consists of dual eligible individuals—which enables a D–SNP to integrate and coordinate the delivery of Medicaid services and necessitates the additional care coordination to meet the needs of this vulnerable population. We seek comment on whether these alternative criteria should be used instead of, or in addition to, the criteria we are

proposing for identifying D–SNP look-alikes and applying contracting prohibition.

III. Implementation of Several Opioid Provisions of the Substance Use-Disorder Prevention That Promotes Opioid Recovery and Treatment (SUPPORT) for Patients and Communities Act

A. Mandatory Drug Management Programs (DMPs) (§ 423.153)

1. Summary and Background of DMPs

The SUPPORT Act made changes to the requirements for Part D DMPs to enhance Part D sponsors' ability to reduce the abuse or misuse of opioid medications in their prescription drug benefit plans. CMS is proposing two corresponding changes to the Part D DMP provisions codified in § 423.153(f): (1) Requiring Part D sponsors to adopt DMPs with respect to a plan year on or after January 1, 2022, as required under section 2004 of the SUPPORT Act; and (2) requiring inclusion of Part D beneficiaries with a history of opioid-related overdose in sponsors' DMPs beginning January 1, 2021, as required under section 2006 of the SUPPORT Act. In addition, CMS is proposing an additional category of exempt beneficiaries, for example, those with sickle cell disease, from DMPs and proposing several technical clarifications to the DMP regulations, which are described in subsequent paragraphs.

CARA amended the Act and included new authority for the establishment of DMPs in Medicare Part D, effective on or after January 1, 2019. CMS established through notice and comment rulemaking a framework at § 423.153(f) under which Part D plan sponsors may establish a DMP for beneficiaries at-risk for prescription drug abuse, or ''at-risk beneficiaries'' (ARBs) (defined in § 423.100).

Under the DMPs in place today, CMS identifies ''potential at-risk beneficiaries'' (PARBs) (defined in § 423.100) who meet the clinical guidelines described in § 423.153(f)(16), which we refer to as the minimum Overutilization Management System (OMS) criteria. The OMS reports such beneficiaries to their Part D plans for case management under their DMP. There are also supplemental clinical guidelines, or supplemental OMS criteria, which Part D sponsors can apply themselves to identify additional potential at-risk beneficiaries.

The OMS criteria used to identify PARBs are based on a history of filling opioids from multiple doctors and/or multiple pharmacies. Once PARBs are identified, plan sponsors engage in case management of these beneficiaries through contact with their prescribers to determine whether the beneficiary is at-risk for prescription drug misuse or abuse. If a sponsor determines through case management that a PARB is at-risk, after notifying the beneficiary in writing, the sponsor may limit their access to coverage of opioids and/or benzodiazepines to a selected prescriber and/or network pharmacy(ies) and/or through a beneficiary-specific point-of-sale (POS) claim edit. This process does not apply to ''exempted beneficiaries'' (defined at § 423.100). Exempted beneficiaries currently include those being treated for active cancer-related pain, residing in a long-term care facility, receiving hospice care or receiving palliative or end-of-life care, but we are proposing, in section VIII.N. of this proposed rule, to exempt beneficiaries with sickle cell disease beginning with plan year 2021.

CMS data has shown value from plan sponsors engaging in case management. From 2011 [26] through 2017, there was a 76 percent decrease in the number of Part D potential at-risk beneficiaries (almost 22,500 beneficiaries) who met the applicable OMS criteria under the prior opioid overutilization policy. Part D sponsors also implemented 4,375 beneficiary-specific POS opioid claim edits through 2017. Early analysis of the coverage limitations (for example, pharmacy and prescriber limitations and beneficiary-specific POS claim edits) implemented under DMPs through the second quarter of 2019 continues to show a relatively low application of coverage limitations by Part D sponsors. However, this is not unexpected,[27] as the design of the DMP process is for Part D sponsors to engage in beneficiary-specific casework with the PARB's prescribing physicians to address the unique needs of the beneficiary and coordinate care. Nevertheless, the availability and use of coverage limitations by sponsors remains important, necessary, and appropriate in certain clinical situations.

2. Mandatory Drug Management Programs (DMPs)

Section 2004 of the SUPPORT Act requires that, no later than January 1, 2022, Part D sponsors must have established DMPs. We are proposing to amend regulatory language at § 423.153(f) to reflect this requirement. We note that while implementation of DMPs has been optional since 2019, when Part D sponsors could first adopt them, 85.9 percent of Part D contracts in calendar year 2019 and 87.2 percent for calendar year 2020 adopted DMPs to address opioid overutilization among their enrollees. Thus, of about 49 million beneficiaries who were enrolled in the Medicare Part D program in 2019, about 48.5 million enrollees (99 percent) were covered under Part D contracts that offered a DMP already. Our internal analysis estimates that only 158 additional PARBs will be identified due to making DMPs mandatory by meeting the current minimum OMS criteria.

B. Beneficiaries With History of Opioid-Related Overdose Included in Drug Management Programs (DMPs) (§ 423.100)

Under section 2006 of the SUPPORT Act, CMS is required to identify Part D beneficiaries with a history of opioid-related overdose (as defined by the Secretary), and such individuals must be included as PARBs for prescription drug abuse under a Part D plan's DMP. CMS is also required under this section to notify the sponsor of such identifications. In line with this requirement, we are proposing to modify the definition of ''potential at-risk beneficiary'' at § 423.100 to include a Part D eligible individual who is identified as having a history of opioid-related overdose, as we propose to define it.

We propose to define ''history of opioid-related overdose'' to mean that for the Part D beneficiary, a recent claim has been submitted [28] that contains a principal diagnosis code reflecting an opioid overdose, regardless of the type of opioid and at least one recent PDE for an opioid dispensed to such beneficiary has been submitted.

We propose to operationalize this proposed definition by: (1) Using diagnoses that include both prescription and illicit opioid overdoses; (2) using a 12-month lookback period from the end of each OMS reporting quarter, for record of opioid-related overdose within Medicare fee-for-service (FFS) claims

[26] In developing the Medicare Part D opioid overutilization policy and OMS which began in 2013, we conducted pilots and testing in 2012. Therefore, we use 2011 as the pre-pilot/pre-policy measurement period. DMPs incorporated the OMS criteria and case management approach established in the opioid overutilization policy.

[27] See discussion p. 16690: ICRs Regarding the Implementation of the Comprehensive Addictions and Recovery Act of 2018 (CARA) Provisions (§ 423.153) in the April 2018 final rule (83 FR 16440).

[28] Claim date for meeting lookback period criteria based on the claim dates of service, admission date or date the claim was loaded into CMS's data warehouse.

and Medicare Advantage Encounter data (excluding those not enrolled in a Part D plan, whether an MA–PD or standalone PDP plan); and (3) using a 6-month lookback period from the end of each OMS reporting quarter, for record of a recent Part D opioid PDE. The number of unique beneficiaries identified under this proposal is approximately 18,268.

Our rationale for this proposal is that a past overdose is the risk factor most predictive for another overdose or suicide-related event.[29] We propose using diagnoses that include both prescription and illicit opioid overdoses because an opioid overdose may result from prescription or illicit opioids alone or in combination, and the statute does not distinguish based on type of opioid. Further, in the case of prescription opioids, the diagnosis code does not indicate if the prescription was legally obtained and used by the intended patient. Lastly, we propose to define history of opioid-related overdose to include only those instances where the enrollee also recently filled an opioid prescription under their Part D benefit, because the existence of an opioid PDE means sponsors would have an opioid prescriber with whom to conduct case management, which is an integral part of the DMP process.

Other factors we took into consideration for our proposal: First, as to including both prescription and illicit opioid overdose diagnoses, we considered that the Part D program is a prescription drug benefit program and, therefore, considered defining a history of opioid-related overdose as only including those overdoses involving validly prescribed and taken prescription opioids. However, given the risks associated with opioid-related overdose, we believe the best policy is to include both types of overdoses. Also, we cannot accurately identify whether an illicit or prescription opioid drug or drugs contributed to an overdose, and even if we could, we cannot determine whether a prescription opioid that contributed to the overdose was legally obtained and taken. Thus, our approach also overcomes limitations in the diagnosis data available (described further in this section of this proposed rule). The Alternatives Considered section of the Regulatory Impact Analysis (section X.D.1. of this proposed rule) provides a more in-depth review of the various other approaches considered and the projected numbers of affected enrollees.

Second, we note that the proposed 12-month lookback period of Medicare FFS claims and Medicare Advantage Encounter data to identify enrollees with a history of opioid-related overdose, which aligns with the measurement period used for active cancer diagnosis data in the current OMS criteria, takes into account program size and factors in patterns of beneficiaries who overdose more than once. We think 12 months is the appropriate lookback period to identify the beneficiaries who are at the most risk. When using Medicare fee-for-service inpatient data, we noted that a two-year lookback period (between July 2016 and June 2018) for Medicare beneficiaries who overdosed more than once almost proportionately doubles the number of overdoses compared to a one-year lookback (July 2017 to June 2018); however, 90 percent of the beneficiaries who had more than one opioid-related overdose episode, had a subsequent overdose episode on average within 12 months. In our methodology, we used the calendar month and year of opioid-related overdose events to identify each episode and also found that 95 percent of the beneficiaries had a subsequent overdose episode on average within 14 months and 99 percent of the beneficiaries had a subsequent overdose episode on average within 19 months. Thus, a 12-month lookback period strikes a better balance in identifying beneficiaries who would be at risk of having another opioid-related overdose taking into consideration the drug management program size.

Third, while we considered reporting any enrollees who have a history of opioid-related overdose during the 12-month lookback period, regardless of whether there is an opioid PDE, we believe our proposal to report only those enrollees who also recently filled a Part D opioid prescription should increase the likelihood for the sponsor to conduct successful provider outreach for case management. This aligns with the 6-month measurement period used for opioid PDE records in the current OMS criteria. We solicit feedback on the proposed 12-month lookback period for identifying claims for opioid-related overdose and the proposal to report only those enrollees with at least one Part D opioid PDE within the prior 6 months.

To derive an estimated population of PARBs identified under this proposal, we identified beneficiaries with inpatient, outpatient or professional FFS or encounter data opioid overdose claims based on the principal International Classification of Disease (ICD)-10 diagnosis codes (see Table 1) during the 12-month measurement period from 07/01/2017 to 06/30/2018 and at least one recent Part D opioid PDE from 01/01/2018 to 06/30/2018. We excluded beneficiaries if they were identified as having elected hospice, in a resident facility, had palliative care diagnosis, and/or had a death date during the last 6 months (01/01/2018–06/30/2018). We also excluded beneficiaries if they had active cancer during the 12-month lookback period (07/01/2017–06/30/2018). This is consistent with the measurement period used to identify these attributes in the current OMS criteria. Finally, we excluded beneficiaries who were not Part D enrolled during the last month of the OMS measurement period. Again, the number of unique beneficiaries identified under this proposal is 18,268. To align with our current OMS quarterly reporting frequency, we ran additional simulations using 2018 data and estimated that about 4,500 new beneficiaries with an opioid related overdose would be identified every quarter.

TABLE 1—LIST OF OPIOID-RELATED OVERDOSE CODES INCLUDED IN ANALYSIS

Overdose type	ICD–10 diagnosis codes[30]
Any Opioid	T40.0 (opium), T40.1 (heroin), T40.2 (natural/semisynthetic opioids including hydrocodone and oxycodone), T40.3 (methadone), T40.4 (synthetic opioids other methadone including fentanyl and tramadol) and T40.6 (other and unspecified narcotics).
Prescription Opioid	T40.2 (natural/semisynthetic opioids including hydrocodone and oxycodone), T40.3 (methadone), and T40.6 (other and unspecified narcotics).
Illicit Opioid	T40.1 (heroin) and T40.4 (synthetic opioids other methadone likely illicitly manufactured fentanyl).

[29] Bohnert KM, Ilgen MA, Louzon S, McCarthy JF, Katz IR. Substance use disorders and the risk of suicide mortality among men and women in the US Veterans Health Administration. Addiction. 2017 Jul;112(7):1193–1201. doi: 10.1111/add.13774.

[30] ICD–10 diagnosis codes related to underdosing, adverse effects and assault are excluded.

Table 1 categorizes the diagnoses codes we used to derive our estimate, as well as the other options in section X.D.1. of this proposed rule. As previously noted, there are limitations when using diagnosis data to identify opioid-related overdoses. An additional limitation is that there is an unspecified opioid overdose code, which requires that assumptions be made in order to classify an overdose code as prescription or illicit. We classified code 40.2 (other opioids), as a prescription opioid overdose, but in some cases oxycodone may have been obtained illegally. We classified code 40.4 (other synthetic opioids) as illicit opioid overdose but in some cases fentanyl may have been obtained by prescription. We made these designations in order for our proposal to align with Centers for Disease Control and Prevention's (CDC) practice of defining all fentanyl overdoses (synthetic opioids other than methadone) as likely illicit.[31]

As noted earlier in this proposed rule, Part D sponsors with DMPs must conduct case management for each PARB identified by CMS through OMS which includes sending written information to the beneficiary's prescribers that the beneficiary met the clinical guidelines/OMS criteria and is a PARB. Currently, case management under DMPs generally addresses safety concerns related to opioid prescriptions for Part D beneficiaries involving multiple prescribers/pharmacies. We continue to encourage providers to consult state-based prescription drug monitoring programs before prescribing opioids to reduce the number of beneficiaries meeting the current OMS criteria. However, under this proposal, the nature of the safety concern for the Part D beneficiaries who must be identified and reported to sponsors by OMS is different. Sponsors will communicate with providers about potential safety concerns due to the beneficiary's history of opioid-related overdose, and the provider may or may not already be aware of this history and the beneficiary may or may not be using multiple opioid prescribers/pharmacies. Thus, our proposal is similar to PARBs who are reported by OMS with a benzodiazepine flag, as a particular provider may or may not be aware that a beneficiary is taking benzodiazepines in addition to opioids.

Such communication is an opportunity for sponsors, through their DMPs, to offer information to, and/or discuss with, providers the risk factors relevant to opioid use and a prior overdose history, and to make prescribers aware of the tools available under a DMP to assist them in managing their patient's care, as they consider prescription opioid use of their patient. The provider should also consider prescribing the beneficiary an opioid-reversal agent if they are newly aware of the beneficiary's history of opioid-related overdose and DMPs should notify providers and patients of the coverage of naloxone and its availability through their plan. As with any beneficiary in a DMP, the goal is the best-possible, coordinated, and safe care for each unique patient as determined by their provider(s), and not to stigmatize the patient; nor abruptly taper or discontinue their medications, nor unnecessarily or abruptly remove the patient from a provider's practice.

We solicit comments on whether our proposal needs any additional features to facilitate the case management process for PARBs with a history of opioid related overdose, such as written sponsor-provider communication and/or to address the anticipated effects of this type of sponsor-provider collaboration. We recognize that the model beneficiary notices [32] provided by CMS may need to be revised to incorporate a PARB having a history of opioid-related overdose (noted in section IX.B.3. of this proposed rule).

C. Information on the Safe Disposal of Prescription Drugs (§ 422.111)

Section 6103 of the SUPPORT Act amends section 1852 of the Act by adding a new subsection (n). Section 1852(n)(1) requires MA plans to provide information on the safe disposal of prescription drugs when furnishing an in-home health risk assessment. Section 1852(n)(2) requires us to establish, through rulemaking, criteria that we determine appropriate with respect to information provided to an individual during an in-home health risk assessment to ensure that he or she is sufficiently educated on the safe disposal of prescription drugs that are controlled substances.

In order to implement the requirements of section 1852(n)(1) for MA plans, CMS proposes to revise the § 422.111, Disclosure Requirements, to add a paragraph (j), which would require MA plans that furnish an in-home health risk assessment on or after January 1, 2021, to include both verbal (when possible) and written information on the safe disposal of prescription drugs that are controlled substances in such assessment. Consistent with section 1852(n)(1), we propose that information must include details on drug takeback programs and safe in-home disposal methods.

In educating beneficiaries about the safe disposal of medications that are controlled substances, we propose MA plans would communicate to beneficiaries in writing and, when feasible, verbally. We propose that MA plans must do the following to ensure that the individual is sufficiently educated on the safe disposal of controlled substances: (1) Advise the enrollee that unused medications should be disposed of as soon as possible; (2) advise the enrollee that the US Drug Enforcement Administration allows unused prescription medications to be mailed back to pharmacies or other authorized sites using packages made available at such pharmacies or other authorized sites; (3) advise the enrollee that the preferred method of disposing of controlled substances is to bring them to a drug take back site; (4) identify drug take back sites that are within the enrollee's MA plan service area or that are nearest to the enrollee's residence; and (5) instruct the enrollee on the safe disposal of medications that can be discarded in the household trash or safely flushed. Although we are not proposing to require MA plans to provide more specific instructions with respect to drug disposal, we are proposing that the communication to enrollees provide the following additional guidance: If a drug can be safely disposed of in the enrollee's home, the enrollee should conceal or remove any personal information, including Rx number, on any empty medication containers. If a drug can be discarded in the trash, the enrollee should mix the drugs with an undesirable substance such as dirt or used coffee grounds, place the mixture in a sealed container such as an empty margarine tub, and discard in the trash.

We also propose that the written communication include a web link to the information available on the United States Department of Health and Human Services website identifying methods for the safe disposal of drugs available at the following address: *https://www.hhs.gov/opioids/prevention/safely-dispose-drugs/index.html*. We note that the safe disposal of drugs guidance at this website can be used for all medications not just medications that

[31] Current information reported about overdose deaths in NVSS does not distinguish pharmaceutical fentanyl from illicitly manufactured fentanyl (IMF). Opioid Data Analysis and Resources. Available from: *https://www.cdc.gov/drugoverdose/data/analysis.html.*

[32] Notice documents available at *https://www.cms.gov/Medicare/Prescription-Drug-Coverage/PrescriptionDrugCovContra/Downloads/Part-D-Drug-Management-Program-Notices-.zip.*

are controlled substances. We believe that plan communications consistent with the standard on this website provides enrollees with sufficient information for proper disposal of controlled substances in their community.

D. Beneficiaries' Education on Opioid Risks and Alternative Treatments (§ 423.128)

Sponsors of Part D prescription drug plans, including MA–PDs and standalone PDPs, must disclose certain information about their Part D plans to each enrollee in a clear, accurate, and standardized form at the time of enrollment and at least annually thereafter under section 1860D–4(a)(1)(a) of the Act. Among the drug specific information that sponsors must provide pursuant to section 1860D–4(a)(1)(B) of the Act is information about the plan formulary, pharmacy networks, beneficiary cost-sharing requirements, and the availability of medication therapy management (MTM) and DMPs.

Section 6102 of the SUPPORT Act amended section 1860D–4(a)(1)(B) of the Act to require that, for plan year 2021 and each subsequent plan year, Part D sponsors also must disclose to each enrollee, with respect to the treatment of pain, information about the risks of prolonged opioid use. In addition to this information, with respect to the treatment of pain, MA–PD sponsors must disclose coverage of non-pharmacological therapies, devices, and non-opioid medications under their plans. Sponsors of standalone PDPs must disclose coverage of non-pharmacological therapies, devices, and non-opioid medications under their plans and under Medicare Parts A and B.

Section 6102 of the SUPPORT Act also amended section 1860D–4(a)(1)(C) of the Act to permit Part D sponsors to disclose this opioid risk and alternative treatment coverage information to only a subset of plan enrollees, such as enrollees who have been prescribed an opioid in the previous 2-year period, rather than disclosing the information to each plan enrollee. To implement section 6102, we propose to amend our regulations at § 423.128 to reflect that Part D sponsors may provide such information to a subset of such enrollees, in accordance with section 1860D–4(a)(1)(C), in lieu of providing it to all enrollees.

If a sponsor does not send the information to all enrollees, we have a few suggested subsets of enrollees for sponsors to consider and the estimated number of enrollees in each subset, as shown in Table 2. The estimates are based on 2018 Part D PDE data and do not include the populations that are exempted from Part D opioid policies in 2021, for example, enrollees with active cancer-related pain, in hospice, in a resident facility, or in palliative care. Sponsors may or may not choose to adopt one of the suggestions, and sponsors may or may not exempt the same beneficiaries that are exempted from other Part D opioid policies.

However, we thought that providing some options, along with Part D program-wide data, would be useful to sponsors, as they decide to which enrollees they will disclose the required opioid risk and alternate pain treatment coverage information. We are also interested in comments identifying other possible appropriate subsets of enrollees.

TABLE 2—SUGGESTED SUBSET OPTIONS TO RECEIVE EDUCATION ON OPIOID RISKS AND ALTERNATE TREATMENTS *

Subset	Suggested subset	Number of enrollees in this subset	Percent of total opioid users
1	All Part D Enrollees	46,759,911	N/A
2	Any opioid use in last 2 years	16,134,063	100
3	Any opioid use in past year	11,027,271	100
4	7 days continuous opioid use	7,163,615	65
5	Greater than 30 days continuous opioid use, 7 day or less gap	3,816,731	35
6	Greater than 90 days continuous opioid use, 7 day or less gap	2,698,064	24

* All figures based on 2018 PDE data as of 7/6/2019, except subset 2 which is based on 2017 and 2018 PDE data. Beneficiaries were excluded from the opioid use subsets if they were in hospice, in a resident facility, or had a palliative care diagnosis (07/01/2018–12/31/2018). Beneficiaries were also excluded if they had a cancer diagnosis (01/01/2018–12/31/2018). No exclusions were applied to the all Part D enrollees figure (subset 1).

The first suggested option is for sponsors to disclose the opioid risk and alternate coverage information to all Part D enrollees. This option has the advantage of disseminating the information most widely—to approximately 46,759,911 enrollees—and not trying to determine which enrollees may need the information more than other enrollees. Beneficiaries may receive information about risks and treatment alternatives before they use opioids under this option. However, this option has the disadvantage of being largely over-inclusive, in the sense that a significant number of enrollees will receive information that is not, and may never be, pertinent to them.

The second suggested option is to disclose the opioid information to the subset suggested by the SUPPORT Act, which is enrollees who have been prescribed an opioid in the previous 2-year period, approximately 16,134,063 enrollees. This option has the advantage of targeting enrollees who have actually used opioids, but has the disadvantage of not being as proactive as the first option, while also still including enrollees who may not have used opioids in quite some time; may only have used them for short-term acute use; and may not take them again soon or ever.
