SUPPLEMENTARY INFORMATION: The Secretary of Commerce and the Advisor to the President overseeing the Office of Economic Initiatives serve as the co-chairs of the Advisory Board. In addition to the co-chairs, the Advisory Board comprises 25 members that represent various sectors of the economy. The Board advises the National Council for the American Worker.

The March meeting will include updates on implementation of recommendations from the previous meetings and discussions of new recommendations under each of the four main goals of the Advisory Board:

- *Develop a Campaign to Promote Multiple Pathways to Career Success.* Companies, workers, parents, and policymakers have traditionally assumed that a university degree is the best, or only, path to a middle-class career. Employers and job seekers should be aware of multiple career pathways and skill development opportunities outside of traditional 4-year degrees.

- *Increase Data Transparency to Better Match American Workers with American Jobs.* High-quality, transparent, and timely data can significantly improve the ability of employers, students, job seekers, education providers, and policymakers to make informed choices about education and employment—especially for matching education and training programs to in-demand jobs and the skills needed to fill them.

- *Modernize Candidate Recruitment and Training Practices.* Employers often struggle to fill job vacancies, yet their hiring practices may actually reduce the pool of qualified job applicants. To acquire a talented workforce, employers must better identify the skills needed for specific jobs and communicate those needs to education providers, job seekers, and students.

- *Measure and Encourage Employer-led Training Investments.* The size, scope, and impacts of education and skills training investments are still not fully understood. There is a lack of consistent data on company balance sheets and in federal statistics. Business and policy makers need to know how much is spent on training, the types of workers receiving training, and the long-term value of the money and time spent in classroom and on-the-job training.

Sabrina L. Montes,

Designated Federal Official, American Workforce Policy Advisory Board, Bureau of Economic Analysis.

[B-08-2020]

Foreign-Trade Zone (FTZ) 277—Glendale, Arizona; Notification of Proposed Production Activity; Andersen Regional Manufacturing, Inc. (Windows for Residential and Commercial Buildings); Goodyear, Arizona

Andersen Regional Manufacturing, Inc. (Andersen Regional) submitted a

notification of proposed production activity to the FTZ Board for its facility in Goodyear, Arizona. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on January 23, 2020.

The Andersen Regional facility is located within FTZ 277. The facility will be used for production of windows for residential and commercial buildings. Pursuant to 15 CFR 400.14(b), FTZ activity would be limited to the specific foreign-status materials/components and finished product described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Production under FTZ procedures could exempt Andersen Regional from customs duty payments on the foreign-status materials/components used in export production. On its domestic sales, for the foreign-status materials/components noted below, Andersen Regional would be able to choose the duty rates during customs entry procedures that apply to windows for residential and commercial buildings (duty rate 5.3%). Andersen Regional would be able to avoid duty on foreign-status components which become scrap/waste. Customs duties also could possibly be deferred or reduced on foreign-status production equipment.

The components and materials sourced from abroad include: Stainless steel and carbon steel screws; die cast zinc and injection molded polypropylene lock covers; aluminum extruded reinforcement bars; carbon steel gusset plates; stainless steel jamb clips; injection molded PVC and brass roller assemblies; injection molded glass reinforced nylon sash cams; injection molded polypropylene shipping protection caps; and, zinc plated steel washers (duty rate ranges from 3.5 to 6.2%). The request indicates that certain materials/components are subject to special duties under Section 301 of the Trade Act of 1974 (Section 301), depending on the country of origin. The applicable Section 301 decisions require subject merchandise to be admitted to FTZs in privileged foreign status (19 CFR 146.41).

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary and sent to: ftz@trade.gov. The closing period for their receipt is March 30, 2020.

A copy of the notification will be available for public inspection in the "Reading Room" section of the Board's website, which is accessible via www.trade.gov/ftz.

Certain Steel Nails From the People's Republic of China: Notice of Court Decision Not in Harmony With the Final Results of Antidumping Duty Administrative Review and Notice of Amended Final Results

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On October 18, 2019, the United States Court of International Trade (CIT) entered final judgment sustaining the final results of redetermination pertaining to the sixth administrative review of the antidumping duty order on certain steel nails (steel nails) from the People's Republic of China (China). The Department of Commerce (Commerce) is notifying the public that the final judgment in this case is not in harmony with the final results of the administrative review covering the period of review (POR) August 1, 2013 through July 31, 2014, and that Commerce is amending the final results with respect to the dumping margin assigned to Shandong Oriental Cherry Hardware Group Co., Ltd. (Oriental Cherry).

Cherry and its affiliated companies as a single entity.³ Commerce also determined that Oriental Cherry's responses were deficient, and that the use of facts otherwise available, pursuant to section 776(a) of the Tariff Act of 1930, as amended (the Act), was necessary.⁴ As a result, Commerce determined that Oriental Cherry was not eligible for separate rate status and treated it as part of the China-wide entity, subject to a dumping margin of 118.04 percent.

On January 2, 2018, the CIT remanded the *Final Results* with respect to our decision to deny Oriental Cherry a separate rate.⁵ The CIT remanded the *Final Results* to Commerce to reevaluate the evidence on the record regarding Oriental Cherry's eligibility for a separate rate, and to assign a separate rate to Oriental Cherry, if appropriate.

On April 20, 2018, Commerce issued the *First Remand Results*.⁶ On remand, Commerce determined that Oriental Cherry was eligible for a separate rate, because the record supported the finding that Oriental Cherry demonstrated an absence of *de jure* and *de facto* government control.⁷ Commerce did not, however, determine a rate using any of the production and sales information that Oriental Cherry had placed on the record in response to its questionnaires. Rather, Commerce further explained its findings from the *Final Results*, continuing to find that such information was missing from the record and that Oriental Cherry did not cooperate to the best of its ability to provide such information, and, thus, assigned Oriental Cherry the rate of 118.04 percent as the total adverse facts available (AFA) rate pursuant to section 776(b) of the Act, *i.e.*, the highest rate on the record of this proceeding.⁸

On June 12, 2019, the CIT remanded the *First Remand Results*. The CIT held that Commerce's application of total

Duty Administrative Review; 2013-2014, 81 FR 14092 (March 16, 2016) (*Final Results*), and accompanying Issues and Decision Memorandum (IDM), amended by *Certain Steel Nails from the People's Republic of China: Final Results of Antidumping Duty Administrative Review; 2013-2014*, 81 FR 19136 (April 4, 2016).
