

I. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution or Use

This action is not a “significant energy action” because it is not likely to have a significant adverse effect on the supply, distribution or use of energy. This action merely allows states the option to reflect in their SIPs a reduction in minimum reporting frequency specified for certain categories of stationary sources regulated under the CAA.

J. National Technology Transfer and Advancement Act (NTTAA)

This rulemaking does not involve technical standards.

K. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

The EPA believes that this action does not have disproportionately high and adverse human health or environmental effects on minority populations, low-income populations and/or indigenous populations as specified in Executive Order 12898 (59 FR 7629, February 16, 1994).

This action merely allows states the option to reflect in their SIPs a reduction in minimum reporting frequency specified for certain categories of stationary sources regulated under the CAA, which will have no effect on any obligation to comply with emission limitations in SIPs.

The statutory authority for this action is provided by CAA section 101 *et seq.* (42 U.S.C. 7401 *et seq.*).
