The ABS primary collection method is via an electronic instrument. Those selected for the survey receive an initial letter informing the respondents of their requirement to complete the survey as well as instructions on accessing the survey. The 2020 ABS initial mailing is scheduled for July 2020. Responses will be due approximately 30 days from initial mailing. Respondents will also receive a due date reminder approximately one week before responses are due. The Census Bureau plans to conduct two follow-up mailings and an optional third follow-up if deemed necessary based on check-in. Nonrespondents may receive a certified mailing for the second and third follow-up mailings. The Census Bureau may also plan to conduct an email follow-up to select nonrespondents reminding them to submit their report in the electronic instrument. The optional third follow-up may include a paper questionnaire to assist with collecting data from select nonrespondents. Closeout of mail operations is scheduled for December 2020 but may be extended to allow ample time to receive returned forms if necessary. Response data will be processed as they are received. Upon the close of the collection period, data processing will continue, and records will be edited, reviewed, tabulated, and released publicly.

The ABS uses the collection year in the survey name rather than a single reference year. The ABS include questions from multiple reference periods; therefore, the 2019 survey data is referred to as the 2020 ABS (rather than the 2019 ABS).

Statistics from the ABS will be used by government program officials, industry organization leaders, economic and social analysts, business entrepreneurs, and domestic and foreign researchers in academia, business, and government. Estimates produced on owner demographic data may be used to assess business assistance needs, allocate available program resources, and create a framework for planning, directing, and assessing programs that promote the activities of disadvantaged groups; to assess minority-owned

businesses by industry and area and to educate industry associations, corporations, and government entities; to analyze business operations in comparison to similar firms, compute market share, and assess business growth and future prospects. Estimates produced on research and development and innovation may be used to compare R&D costs across industries, determine where R&D activity is conducted geographically, and identify the types of businesses with R&D; to contribute to the Bureau of Economic Analysis (BEA) system of national accounts; to increase investments in research and development, strengthen education, and encourage entrepreneurship; and to compare business innovation in the United States to other countries, including those in the European Union.

Additional examples of data use include:

- The Small Business Administration (SBA) and the Minority Business Development Agency (MBDA) to assess business assistance needs and allocate available program resources.
- Local government commissions on small and disadvantaged businesses to establish and evaluate contract procurement practices.
- Federal, state and local government agencies as a framework for planning, directing and assessing programs that promote the activities of disadvantaged groups.
- The National Women’s Business Council to assess the state of women’s business ownership for policymakers, researchers, and the public at large.
- Consultants and researchers to analyze long-term economic and demographic shifts, and differences in ownership and performance among geographic areas.
- Individual business owners to analyze their operations in comparison to similar firms, compute their market share, and assess their growth and future prospects.

New questions on the 2020 ABS collect data on globalization and the relationship between domestic and foreign activities.

Affected Public: Business or other for-profit.

Frequency: Annually.

Respondent’s Obligation: Mandatory.
Legal Authority: Title 13, United States Code, Sections 8(b), 131, and 182; Title 42, United States Code, Section 1861–76 (National Science Foundation Act of 1950, as amended); and Section 505 within the America COMPETES Reauthorization Act of 2010 authorize this collection. Sections 224 and 225 of Title 13, United States Code, require response from sampled firms.

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to OIRA_Submission@omb.eop.gov or fax to (202) 395–5806.
