

5 U.S.C. 553(b) are impracticable and contrary to the public interest and, where applicable, under 5 U.S.C 553(d), good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Air Traffic Control, Airports, Incorporation by reference, Navigation (Air).

Issued in Washington, DC, on February 7, 2020.

Rick Domingo,

Executive Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Title 14, Code of Federal Regulations, Part 97 (14 CFR part 97) is amended by establishing, amending, suspending, or removing Standard Instrument Approach Procedures and/or Takeoff Minimums and Obstacle Departure Procedures effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

■ 1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44701, 44719, 44721–44722.

■ 2. Part 97 is amended to read as follows:

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 97

[Docket No. 31297; Amdt. No. 3892]

Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule amends, suspends, or removes Standard Instrument Approach Procedures (SIAPs) and associated Takeoff Minimums and Obstacle Departure Procedures for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, adding new obstacles, or changing air traffic requirements. These changes are designed to provide for the safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: This rule is effective February 24, 2020. The compliance date for each SIAP, associated Takeoff Minimums, and ODP is specified in the amendatory provisions.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of February 24, 2020.

ADDRESSES: Availability of matter incorporated by reference in the amendment is as follows:

For Examination

1. U.S. Department of Transportation, Docket Ops-M30, 1200 New Jersey Avenue SE, West Bldg., Ground Floor, Washington, DC 20590–0001;
2. The FAA Air Traffic Organization Service Area in which the affected airport is located;
3. The office of Aeronautical Navigation Products, 6500 South

MacArthur Blvd., Oklahoma City, OK 73169 or,
 4. The National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email fedreg.legal@nara.gov or go to: <https://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Availability

All SIAPs and Takeoff Minimums and ODPs are available online free of charge. Visit the National Flight Data Center online at nfdc.faa.gov to register. Additionally, individual SIAP and Takeoff Minimums and ODP copies may be obtained from the FAA Air Traffic Organization Service Area in which the affected airport is located.

FOR FURTHER INFORMATION CONTACT:

Thomas J. Nichols, Flight Procedures and Airspace Group, Flight Technologies and Procedures Division, Flight Standards Service, Federal Aviation Administration. Mailing Address: FAA Mike Monroney Aeronautical Center, Flight Procedures and Airspace Group, 6500 South MacArthur Blvd., Registry Bldg. 29, Room 104, Oklahoma City, OK 73169. Telephone: (405) 954-4164.

SUPPLEMENTARY INFORMATION: This rule amends Title 14, Code of Federal Regulations, Part 97 (14 CFR part 97) by amending the referenced SIAPs. The complete regulatory description of each SIAP is listed on the appropriate FAA Form 8260, as modified by the National Flight Data Center (NFDC)/Permanent Notice to Airmen (P-NOTAM), and is incorporated by reference under 5 U.S.C. 552(a), 1 CFR part 51, and 14 CFR 97.20. The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained on FAA form documents is unnecessary. This amendment provides the affected CFR sections, and specifies the SIAPs and Takeoff Minimums and ODPs with their

applicable effective dates. This amendment also identifies the airport and its location, the procedure and the amendment number.

Availability and Summary of Material Incorporated by Reference

The material incorporated by reference is publicly available as listed in the **ADDRESSES** section.

The material incorporated by reference describes SIAPs, Takeoff Minimums and ODPs as identified in the amendatory language for part 97 of this final rule.

The Rule

This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP and Takeoff Minimums and ODP as amended in the transmittal. For safety and timeliness of change considerations, this amendment incorporates only specific changes contained for each SIAP and Takeoff Minimums and ODP as modified by FDC permanent NOTAMs.

The SIAPs and Takeoff Minimums and ODPs, as modified by FDC permanent NOTAM, and contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Procedures (TERPS). In developing these changes to SIAPs and Takeoff Minimums and ODPs, the TERPS criteria were applied only to specific conditions existing at the affected airports. All SIAP amendments in this rule have been previously issued by the FAA in a FDC NOTAM as an emergency action of immediate flight safety relating directly to published aeronautical charts.

The circumstances that created the need for these SIAP and Takeoff Minimums and ODP amendments require making them effective in less than 30 days.

Because of the close and immediate relationship between these SIAPs, Takeoff Minimums and ODPs, and safety in air commerce, I find that notice and public procedure under 5 U.S.C. 553(b) are impracticable and contrary to the public interest and, where applicable, under 5 U.S.C. 553(d), good cause exists for making these SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which

frequent and routine amendments are necessary to keep them operationally current. It, therefore— (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Rick Domingo,
Executive Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Title 14, Code of Federal Regulations, Part 97, (14 CFR part 97), is amended by amending Standard Instrument Approach Procedures and Takeoff Minimums and ODPs, effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

■ 1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44701, 44719, 44721-44722.

§§ 97.23, 97.25, 97.27, 97.29, 97.31, 97.33 and 97.35 [Amended]

■ 2. Part 97 is amended to read as follows:

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, Identified as follows:

[Docket No. 200204-0044]

RIN 0694-AH93

Amendments to Country Groups for Russia and Yemen Under the Export Administration Regulations

AGENCY: Bureau of Industry and Security, Commerce.

ACTION: Final rule.

SUMMARY: In this final rule, the Bureau of Industry and Security (BIS) amends the Export Administration Regulations (EAR) to revise the Country Group designations for the Russian Federation (Russia) and Yemen based on national security and foreign policy concerns, including proliferation-related concerns. This action is intended to facilitate and support accountability in connection with exports and reexports of items to these destinations under the EAR, and is part of a larger effort to restructure and re-align the Country Groups based on the aforementioned interests.

DATES: This rule is effective February 24, 2020.

FOR FURTHER INFORMATION CONTACT: Jodi.Kouts, Director, Chemical and Biological Controls Division, at email Jodi.Kouts@bis.doc.gov or by phone at (202) 482-6109.

SUPPLEMENTARY INFORMATION:

Background

The Bureau of Industry and Security (BIS) is currently undertaking a comprehensive review of all Country Groups in the Export Administration Regulations (EAR) to ensure that they appropriately reflect current U.S. national security and foreign policy, including nonproliferation interests.

The foundation of this rule derives from the structure and purposes of the Commerce Country Chart found in Supplement No. 1 to part 738 and the Country Groups found in Supplement No. 1 to part 740 of the EAR. The Country Chart contains licensing requirements based on the destination to which items listed on the Commerce Control List (CCL) (Supplement No. 1 to part 774) will be exported or reexported and their corresponding “Reason for Control,” which is found in the CCL entry. An “X” in the cell where the “reason for control” column intersects

with the row of the destination indicates a license requirement. Licenses are required to export and reexport items under the EAR for multilateral reasons (*i.e.*, chemical and biological (CB), nuclear nonproliferation (NP), national security (NS), and missile technology (MT)); and for unilateral reasons (*i.e.*, region stability (RS), crime control (CC) and anti-terrorism (AT)), as well as to implement controls for firearms convention (FC) and United Nations Security Council purposes. Controls for United Nations Security Council purposes are identified by the abbreviation “UN” in the applicable CCL entries. The “UN” reason for control is described in § 746. 2(b) of the EAR.

In combination with the CCL—the list of items classified and set-out as Export Control Classification Numbers (ECCNs) and arranged by categories—the Country Chart allows an exporter to determine whether a license is required for the export or reexport of an item on the CCL to the destinations on the Chart, unless otherwise specified in the particular ECCN entry on the CCL. The lists of Country Groups (A, B, D and E) set out countries with respect to relative risk and record of like-minded export controls, and importantly, as a basis for the availability of exceptions from license requirements described in part 740 (License Exceptions) of the EAR, provided the conditions for the use of the License Exception are met. Country Groups may also be used when describing license review policy.

The two lists—the Commerce Country Chart and Country Groups—were developed for separate purposes and allow for systematic licensing determinations. Country Groups are not reviewed unless a license is required by the Country Chart for exports and reexports of items listed in the CCL, unless, as mentioned above, otherwise indicated in the ECCN entry on the CCL.

Continuing to apply the structure and purposes of the Country Chart and Country Groups in furtherance of U.S. national security and foreign policy, including nonproliferation interests, this rule is part of BIS’s review of Country Groups. BIS has determined the current Country Group designations for Russia and Yemen should be changed to address U.S. national security, foreign policy, including proliferation concerns as further described below.

Specifically, this rule removes Russia from more favorable treatment under Country Groups A:2 and A:4 and adds it to Country Groups D:2 and D:4 based on nuclear and missile technology proliferation concerns, respectively. BIS also amends the licensing policy for

related items to reflect a presumption of denial consistent with the Country Group changes. Separately, this rule removes Yemen from more favorable treatment under Country Group B and adds it to Country Group D:1 to reflect national security concerns.

As a result of these Country Group changes, certain license exceptions are no longer available for Russia and Yemen, and licenses are now required for those destinations in connection with exports, reexports, and transfers (in-country) of certain controlled items. In addition, certain transactions may be subject to more stringent licensing review policies or additional prohibitions as outlined in other parts of the EAR. With these actions, BIS seeks to ensure accountability for exports and reexports of items to these destinations. This rule is the first action related to the larger effort to re-structure and re-align the Country Groups set forth in Supplement No. 1 to Part 740 of the EAR.

Specific Amendments

Russia: Country Groups A and D

In this rule, BIS removes Russia from Country Groups A:2 (Missile Technology Control Regime) and A:4 (Nuclear Suppliers Group) to address U.S. concerns about diversion of U.S.-origin items to or from Russia for prohibited end uses and end users. This rule removes the “X” from Column “[A:2]” and the “X” from Column “[A:4]” in Supplement No. 1 to Part 740 for “Russia.” In relation to the changes to Country Groups A:2 and A:4 for Russia, this rule also adds Russia to Country Groups of concern D:2 (Nuclear) and D:4 (Missile Technology). This rule adds an “X” in Column “[D:2]” and an “X” in Column “[D:4]” in Supplement No. 1 to Part 740 for “Russia.” Consistent with adding “Russia” to Country Group “[D:2],” this rule adds an “X” in Column “NP 1” for “Russia” in Supplement No. 1 to Part 738—Commerce Country Chart. Finally, BIS revises the licensing policy for items to Russia to a policy of presumption of denial when the items are controlled for reasons described under § 742.2 (Proliferation of chemical and biological weapons), § 742.3 (Nuclear nonproliferation), or § 742.5 (Missile technology) of the EAR. However, with regard to NP and MT controls, applications for exports and reexports of items, which include commodities, software and technology, to Russia in support of U.S.-Russia civil space cooperation activities or commercial space launches will be reviewed on a case-by-case basis.
