that the proposed changes would encourage the submission of additional liquidity to a public exchange, thereby promoting market depth, price discovery and transparency and enhancing order execution opportunities for ETP Holders. As a result, the Exchange believes that the proposed change furthers the Commission’s goal in adopting Regulation NMS of fostering integrated competition among orders, which promotes “more efficient pricing of individual stocks for all types of orders, large and small.”

Intramarket Competition. The proposed changes are designed to attract additional order flow to the Exchange. The Exchange believes that the proposed changes would continue to incentivize market participants to direct order flow to the Exchange. Greater liquidity benefits all market participants on the Exchange by providing more trading opportunities and encourages member organizations to send orders, thereby contributing to robust levels of liquidity, which benefits all market participants on the Exchange. The proposed credits would be available to all similarly-situated market participants, and, as such, the proposed change would not impose a disparate burden on competition among market participants on the Exchange.

Intermarket Competition. The Exchange operates in a highly competitive market in which market participants can readily choose to send their orders to other exchange and off-exchange venues if they deem fee levels at those other venues to be more favorable. As noted, the Exchange’s market share of trading in Tapes A, B and C securities combined is less than 1%. In such an environment, the Exchange must continually adjust its fees and rebates to remain competitive with other exchanges and with off-exchange venues. Because competitors are free to modify their own fees and credits in response, and because market participants may readily adjust their order routing practices, the Exchange does not believe its proposed fee change can impose any burden on intermarket competition.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A)24 of the Act and subparagraph (f)(2) of Rule 19b–425 thereunder, because it establishes a due, fee, or other charge imposed by the Exchange.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)26 of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

• Use the Commission’s internet comment form (http://www.sec.gov/rules/sro.shtml); or

• Send an email to rule-comments@sec.gov. Please include File Number SR–NYSEAMER–2020–07 on the subject line.

Paper Comments

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEAMER–2020–07 and should be submitted on or before March 16, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.

Jill M. Peterson,
Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

Self-Regulatory Organizations; Municipal Securities Rulemaking Board; Order Granting Approval of a Proposed Rule Change To Amend the Information Facility of the MSRB’s Electronic Municipal Market Access (EMMA) System

I. Introduction

On November 19, 2019, the Municipal Securities Rulemaking Board (the “MSRB” or “Board”) filed with the Securities and Exchange Commission (the “SEC” or “Commission”), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”)1 and Rule 19b–4 thereunder,2 a proposed rule change to amend the information facility of the MSRB’s Electronic Municipal Market Access (“EMMA”)3 system (the “EMMA IF”) to provide for (1) the automated calculation and static display of the number of days between

23 Regulation NMS, 70 FR at 37498–99.

3 EMMA is a registered trademark of the MSRB.
(i) the annual fiscal period end date for an issuer or obligated person and (ii) the date an annual financial disclosure is submitted to the EMMA system for such annual fiscal period (the “Submission Calculator”) and (2) the reconfiguration of certain information shown on the EMMA public website (emma.msrb.org) (the “EMMA Portal”) to more prominently display an issuer’s or obligated person’s annual financial disclosures and related information (the “proposed rule change”). The proposed rule change was published for comment in the Federal Register on November 27, 2019.4

The Commission received five comment letters on the proposed rule change.5 On February 6, 2020, the MSRB responded to those comments.6 This order approves the proposed rule change.

II. Description of Proposed Rule Change

As described further below and in the Notice of Filing, the MSRB proposes to amend the EMMA IF to provide for (1) the Submission Calculator and (2) the reconfiguration of certain information shown on the EMMA Portal to more prominently display an issuer’s or obligated person’s annual financial disclosures and related information.7 The MSRB has stated that it believes the proposed rule change would further promote transparency and efficiency in the municipal securities market without imposing significant additional burdens on brokers, dealers, and municipal securities dealers (collectively, “dealers”), municipal issuers, or obligated persons.8

A. Submission Calculator

The proposed rule change would amend the EMMA IF to provide for the Submission Calculator. The MSRB states that the Submission Calculator would automatically calculate and statically display the elapsed number of days between (1) the end date of the annual fiscal period covered by an annual financial disclosure (the “Fiscal Period End Date”) for an issuer or obligated person, as such date is entered by a submitter through the process of publishing an annual financial disclosure on the EMMA Portal, and (2) the time and date of the submission of the annual financial disclosure to the EMMA system (the “Posted Date”) of an annual financial disclosure submitted to the EMMA system for such annual fiscal period, both of which dates are currently visible on the EMMA Portal.9 The MSRB notes that the Submission Calculator would be based on the existing information required to be provided by a submitter, calculating the number of days elapsed based solely on the entry of the Fiscal Period End Date and the Posted Date for an annual financial disclosure.10 The day of the Posted Date would be included in the calculation, as further described in the Notice of Filing, and this number of days elapsed would be displayed on the EMMA Portal at the individual security details level.11 Importantly, the MSRB notes that it would not evaluate the substantive content of the documents and information submitted, and the Submission Calculator would not analyze the relevant content to evaluate an issuer’s or obligated person’s compliance with the terms of an applicable continuing disclosure agreement or any applicable law, regulation, or other legal obligation.12 The MSRB states that, consistent with the EMMA system’s current functionality, if a submitter enters an erroneous Fiscal Period End Date for an annual financial disclosure, the Submission Calculator would perform its calculation based on the erroneous Fiscal Period End Date entered by the submitter.13

To illustrate how the Submission Calculator would operate, the MSRB provided several examples in the Notice of Filing, including a single submission of annual financial information, a multi-year series of submissions of annual financial information, sequential submissions of portions of an issuer’s annual financial information for a single fiscal period, and sequential submissions of annual financial information for a single issue of municipal securities with multiple obligated persons.14

B. Changes to the EMMA Display

The proposed rule change would amend the EMMA IF to reconfigure certain information shown on the EMMA Portal to more prominently display an issuer’s or obligated person’s annual financial disclosures and related information.15 More specifically, the MSRB states that the revised EMMA Portal would more prominently display the information reported about an annual financial disclosure for a municipal security, including the Fiscal Period End Date, the Posted Date, and the results of the Submission Calculator.16 The MSRB states that the proposed rule change also would increase the prominence of the links provided by any issuer through its customized homepage to other websites containing relevant information.17 With these changes to the EMMA Portal and the implementation of the Submission Calculator, the MSRB notes that the security details page for a municipal security generally would provide the information shown in Figure 1 below, which is shown as processed with the hypothetical facts and resulting calculation from the first example provided in the Notice of Filing.18

The MSRB states that, although each of these data points, other than the Submission Calculator results shown as the Timing of Disclosure in Figure 1, are currently available on the EMMA Portal, the proposed rule change is intended to improve users’ awareness of this information, and that nothing about this proposed display would be evaluative of an issuer’s or obligated person’s compliance with the applicable terms of a continuing disclosure agreement.\footnote{\textsuperscript{19}} The MSRB further states that proposed rule change would not modify how submitters provide this information to the EMMA system, nor require submitters to input any new data, but it would augment the display of information reported to the EMMA system to make it more apparent to users.\footnote{\textsuperscript{20}}

\section*{III. Summary of Comments Received and MSRB’s Responses to Comments}

As noted previously, the Commission received five comment letters on the proposed rule change, as well as the MSRB Response Letter.

\subsection*{A. Stakeholder Consultation and Education}

Four commenters expressed concerns that, prior to filing the proposed rule change with the Commission, the MSRB did not formally invite market participants to provide input through a public request for comment or through other MSRB-organized stakeholder consultation, such as beta-testing and user focus groups.\footnote{\textsuperscript{23}} with three of such commenters recommending that the proposed rule change be withdrawn until such consultation could occur.\footnote{\textsuperscript{24}} The MSRB stated that although it believes that engaging in such stakeholder outreach can be valuable, the legal standard under the Act for Commission approval of a proposed rule change does not require such engagement prior to the filing of a proposed rule change with the Commission, and therefore the lack of any such engagement should not be a basis for disapproval by the Commission of the proposed rule change.\footnote{\textsuperscript{25}}

The MSRB stated that it appreciates the willingness of commenters to provide constructive feedback on the proposed rule change, and that it would value the opportunity for stakeholders to preview the proposed changes to the EMMA Portal contemplated by the proposed rule change in advance of the date such changes would become visible to the public, as well as for stakeholders to provide input on possible future MSRB education initiatives and market transparency enhancements.\footnote{\textsuperscript{26}} Further, the MSRB stated that, subject to the Commission’s approval of the proposed rule change, the MSRB believes that it can, and intends to, provide the sort of stakeholder consultation requested by the commenters during the period between the publication of the Commission’s approval order and the date the proposed enhancements become visible to the public on the EMMA Portal.\footnote{\textsuperscript{27}}

\subsection*{B. Potential for Erroneous Submissions}

Five commenters raised concerns about the potential for erroneous submissions to EMMA to result in erroneous displays of information in the Submission Calculator.\footnote{\textsuperscript{28}} For example, one such commenter stated, “submission errors, including classification errors and incorrect dates, that are frequent in today’s EMMA system, pose a high risk that a meaningful number of calculations will be based on inaccurate information.” \footnote{\textsuperscript{29}} Another commenter expressed concerns that the Submission Calculator could itself generate errors.\footnote{\textsuperscript{30}}

The MSRB stated that it appreciates commenters’ concerns about improving the accuracy and completeness of information displayed on the EMMA Portal. The MSRB noted that, as stated in the Notice of Filing, the changes to the EMMA Portal contemplated by the proposed rule change would not alter the process for users to submit annual financial disclosures to EMMA nor change the type of information collected in the publication of such disclosures.\footnote{\textsuperscript{31}} The MSRB further noted that the information that would be used in the proposed changes—including the calculation generated by the Submission Calculator—is presently being input by users and published for public view on the EMMA Portal.\footnote{\textsuperscript{32}} In this sense, the MSRB stated that it believes that commenters’ assertions about the inevitability and frequency of submission errors are more aptly characterized as market behaviors that would be expected to persist regardless of the proposed rule change, rather than outcomes that will specifically result from the proposed rule change.\footnote{\textsuperscript{33}}

Consequently, to the degree that the Submission Calculator and the other proposed enhancements would provide new prominence to the information submitted, the MSRB stated that it believes that submitters would have an additional incentive to properly categorize and describe annual financial disclosures, and the incidences of submissions with erroneous information would be expected to marginally decline from current rates.\footnote{\textsuperscript{34}} Similarly, to the degree that submitters exert greater diligence in completing the disclosure submission process in response to the proposed rule change, the MSRB stated that it believes that any additional burden created by this change in market behavior is exceeded by the benefits of greater market transparency through the improved
availability and understanding of market information displayed on the EMMA Portal. Accordingly, the MSRB concluded, commenters’ assertions about the consequences of erroneous submissions do not change the MSRB’s determinations about the overall benefits of the Submission Calculator.

With respect to comments that the MSRB undertake “greater oversight of the submission process” or otherwise prevent “inconsistent and unclear data,” the MSRB stated that it believes that submitters should retain ultimate responsibility for the accuracy and completeness of the content they submit for publication on the EMMA Portal, including identification of the applicable disclosure category (or categories) of an annual financial disclosure, and comments about the need for improved data quality and greater MSRB oversight of information input by disclosure submitters do not alter the MSRB’s determinations in this regard.

With respect to the potential for the Submission Calculator to malfunction and display incorrect calculations, the MSRB stated that it has established policies and procedures to maintain the performance of the EMMA system.

C. Correction of Submission Mistakes

Two commenters sought clarity regarding whether disclosure submitters will be able to correct submission mistakes. The MSRB stated that the EMMA system currently provides issuers and obligated persons the ability to modify prior continuing disclosure submissions, including by selecting different categories, adding or replacing submitted files, editing dates and descriptive information, adding or removing securities associated with a submission, and changing the contact information for the submission. The MSRB noted that it is already pursuing several user interface and functionality improvements to EMMA independent of the proposed rule change. The MSRB further noted that one commenter had requested several additional technological improvements to EMMA that are unrelated to the Submission Calculator, which the MSRB believes are outside the scope of the proposed rule change.

D. Potential for Investor Confusion

Four commenters expressed concerns about how investors might use the information provided by the Submission Calculator, including whether it could be used erroneously to compare the timing of disclosures for different types of municipal securities or municipal issuers. One commenter stated that, “[t]here is no apples to apples comparison between issuers that can be represented by this calculator,” and that “some issuers could be unfairly judged by investors that information may not be ‘timely’ when in fact it is submitted as quickly as possible—and within the timeframe noted in a [continuing disclosure agreement]—pending the completion of audited financials.” Another commenter similarly expressed a concern about pooled financings and other municipal securities with multiple obligated persons, stating, “we do not understand how such financings with borrowers who may have different fiscal periods will be handled without providing significantly misleading information.” Another commenter stated its view that the Submission Calculator should only perform a calculation on filings marked as audited financial filings, not for unaudited annual financial filings, because there would be an “opportunity for manipulation” of the calculation, and also expressed concern about investors being misled by the display of a calculation based on out-of-date annual financial disclosures. Another commenter suggested that the proposed rule change could alter market behavior by encouraging quick but “inadequate” filings.

The MSRB stated that although it does not disagree with the observations underlying many of these comments, it believes that the comments do not necessarily demonstrate flaws unique to the proposed rule change, but are more generally representative of the variation and complexity of disclosure practices in the municipal securities market. The MSRB further stated its belief that it can, and intends to, mitigate some potential investor confusion by making various investor education resources available on the EMMA Portal in conjunction with the proposed rule change. Moreover, the MSRB stated, it continues to believe that the design of the Submission Calculator adequately accounts for the broad variety of common disclosure practices in the municipal securities market and promotes greater transparency, including by making financial information more readily apparent to investors, market professionals, and the general public through the EMMA Portal.

The MSRB further noted that, as described in the Notice of Filing, the Board evaluated various alternatives to and iterations of the Submission Calculator. After significant deliberation and review of the data currently reported to the EMMA system, the MSRB determined that the Submission Calculator would be superior to other alternatives because it could account for the lack of common uniformity in the reporting of financial information characteristic to the municipal securities market, while also creating no new burdens on issuers and obligated persons submitting information to the EMMA Portal. Nevertheless, in consideration of the comments to the proposed rule change, the MSRB emphasized that it is committed to work with stakeholders on future enhancements to the EMMA Portal.

IV. Discussion and Commission Findings

The Commission has carefully considered the proposed rule change, the comment letters received, and the MSRB Response Letter. The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the MSRB.

The Commission believes that the proposed rule change is consistent with Section 15B(b)(2)(C) of the Act, which provides in part that the MSRB’s rules shall:

be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in municipal securities and municipal financial products, to remove impediments to and perfect the mechanism of a free and open market in municipal securities and municipal financial...
products, and, in general, to protect investors, municipal entities, obligated persons, and the public interest.\textsuperscript{58}

For the reasons set forth below, the Commission believes that the proposed rule change would promote the protection of investors and the public interest, and prevent fraudulent and manipulative acts and practices, and is therefore consistent with Section 15B(b)(2)(C) of the Act.

The Commission has long been concerned with disclosure in both the primary and secondary markets for municipal securities, and has regularly encouraged municipal issuers to provide timely and accurate information to investors and the trading markets.\textsuperscript{59} For example, in the 1994 Interpretive Release, the Commission observed that “[t]he timeliness of financial information is a major factor in its usefulness.”\textsuperscript{60} In the 2008 Adopting Release, through which the Commission designated EMMA as the sole repository for issuer and obligated person continuing disclosures, the Commission noted that its “objective of encouraging greater availability of municipal securities information remains unchanged.”\textsuperscript{61} More recently, the Commission has noted that, among other things, timeliness of disclosures is a major challenge in the secondary market for municipal securities.\textsuperscript{62}

The Commission believes that the changes to the EMMA Portal contemplated by the proposed rule change would promote the protection of investors and the public interest by increasing their awareness and understanding of the type and timing of financial information available in the municipal securities market, which could enable investors to make more informed investment decisions. The Commission believes that the changes to the EMMA Portal contemplated by the proposed rule change also would enable investors and others to more readily locate and access the financial information available on the EMMA Portal and provide issuers and others with additional tools to evaluate an issuer’s disclosure practices.

The Commission further believes that the proposed rule change would promote the prevention of fraudulent and manipulative acts and practices by fostering a better understanding among investors and other market participants of the type and timing of annual financial information available in the municipal securities market by making the type and timing of financial information more readily apparent on the EMMA Portal. In the Commission’s view, the proposed rule change could mitigate certain information asymmetries that may exist in the market and thereby enable investors to make more informed investment decisions and protect themselves from fraud.

In approving the proposed rule change, the Commission has considered the proposed rule change’s impact on efficiency, competition, and capital formation.\textsuperscript{63} Section 15B(b)(2)(C) of the Act\textsuperscript{64} requires that MSRB rules not be designed to impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Commission does not believe that the proposed rule change would impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act, because it would not require issuers and other submitters of information to EMMA to provide any additional information in their submissions. Furthermore, the Commission believes that the potential for increased transparency and awareness regarding the timing of financial information available on the EMMA Portal could improve competition by assisting investors in their analysis of a municipal security’s financial information by clearly and prominently displaying a measure of the timing of that information.

The Commission has reviewed the record for the proposed rule change and notes that the record does not contain any information to indicate that the proposed rule change would have a negative effect on capital formation. The Commission believes that the proposed rule change includes provisions that help promote efficiency. By promoting transparency and awareness of the timing of annual financial information, the proposed rule change could enable more efficient analysis by investors and others of the age of the financial information available about an issuer and its securities.

As noted above, the Commission received five comment letters on the filing. The Commission believes that the MSRB, through its responses, has addressed commenters’ concerns. For the reasons noted above, the Commission believes that the proposed rule change is consistent with the Act.

V. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,\textsuperscript{65} that the proposed rule change (SR–MSRB–2019–13) be, and hereby is, approved.

For the Commission, pursuant to delegated authority.\textsuperscript{66}

Jill M. Peterson,
Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

Self-Regulatory Organizations; Cboe Exchange, Inc.; Notice of Filing of a Proposed Rule Change Relating To Adopt Flexible Exchange Options ("FLEX Options") With a Contract Multiplier of One ("FLEX Micro Options")

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the “Act”),\textsuperscript{1} and Rule 19b–4 thereunder,\textsuperscript{2} notice is hereby given that on February 4, 2020, Cboe Exchange, Inc. (the “Exchange” or “Cboe Options”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

Cboe Exchange, Inc. (the “Exchange” or “Cboe Options”) proposes to adopt flexible exchange options (“FLEX options”) with a contract multiplier of one (“FLEX Micro Options”). The text of the proposed rule change is provided in Exhibit 5.
