which was permitted under a series of EIAs and Environmental Assessments from the initial Plan of Operations in 1986 through the latest EIS in 2015. Coeur Rochester, Inc. is proposing to expand and optimize its current operations. It proposes to expand mining in both of its current pits (the Rochester and Packard pits) and move, relocate, or expand heap leach pads, waste rock dumps, haul roads, access road, water pipeline, and processing facilities. The proposal would increase disturbance by 2,815.4 acres (435.2 acres on private land and 2380.2 acres on public land).

Mining of the Rochester Pit would extend below the groundwater resulting in a permanent pit lake after closure. Additional, potentially acid-generating material would be excavated and would be processed as ore or stored according to its Waste Rock Storage Plan. The plan would also necessitate an upgrade in power distribution lines and a substation. With the proposed expansion, mine life would be extended to 2033, and would be followed by mine closure and reclamation.

The EIS describes and analyzes the proposed Project’s direct, indirect, and cumulative impacts on all affected resources. In addition to the Proposed Action, the following alternatives are also analyzed in the document: Alternative 1, which is an alternate method to manage and store potentially acid-generating material; Alternative 2 which was developed to address and manage pit lake development and water quality; and the No Action Alternative.

A Notice of Availability (NOA) of the Draft EIS for the proposed POA11 Project was published in the Federal Register on October 18, 2019 (FR Doc No: 2019–55979). Two open house public meetings were held during the comment period. The BLM received seven letters with public comments during the 45-day comment period. Six of the letters contained 18 individual substantive comments which included concerns on potential impacts to grazing allotments, storage and management of potentially acid-generating waste rock, mine closure, groundwater quality, pit lake quality, springs, and potential impacts to community wells for the town of Lovelock, Nevada. These comments were considered and addressed in Appendix F (Draft Environmental Impact Statement Public Comments and BLM Responses) of the Final EIS.

Comments on the Draft EIS received from the public and internal BLM review were considered and incorporated, as appropriate, into the Final EIS. Public comments resulted in the addition of clarifying text or corrections, but did not significantly change the proposed action. (Authority: 40 CFR 1501.7)

Jaime C. David, M.D.; Decision and Order

On September 26, 2017, the Acting Assistant Administrator, Diversion Control Division, Drug Enforcement Administration (hereinafter, Government), issued an Order to Show Cause (hereinafter, OSC) to Jaime C. David, M.D. (hereinafter, Registrant) of Apple Valley, California. OSC, at 1. The OSC proposed the revocation of Registrant’s Certificate of Registration No. BD9798818. Id. It alleged that Registrant is without “authority to handle controlled substances in the State of California, the state in which Registrant is registered with the DEA.” Id. (citing 21 U.S.C. 823(f) and 824(a)(3)).

Specifically, the OSC alleged that the Medical Board of California (hereinafter, Board) issued an Order on August 24, 2016 revoking Registrant’s medical license effective September 23, 2016, and that such Order remains in effect. Id. The OSC further alleged that because the Board revoked Registrant’s medical license, Registrant lacks the authority to handle controlled substances in the State of California. Id.

The OSC notified Registrant of the right to request a hearing on the allegations or to submit a written statement, while waiving the right to a hearing, the procedures for electing each option, and the consequences for failing to elect either option. Id. at 2 (citing 21 CFR 1301.43). The OSC also notified Registrant of the opportunity to submit a corrective action plan. Id. at 3 (citing 21 U.S.C. 824(c)(2)(C)).
