A. Program Description

1. Overview

The PIDP was established under 46 U.S.C. 50302, which authorizes the Department of Transportation (DOT) to establish a port and intermodal improvement program for improving the safety, efficiency or reliability of the movement of goods through ports and intermodal connections to ports. To carry out a project under this program, the Department may provide grants for port and intermodal infrastructure-related projects. The Further Consolidated Appropriations Act, 2020 (Pub. L. 116-94) appropriated \$225 million to the PIDP to make discretionary grants to improve the safety, efficiency, or reliability of the movement of goods into, out of, around, or within coastal seaports, inland river ports, or Great Lakes ports.

The efficient movement of goods through ports and their intermodal connections depends on rural transportation networks. Consistent with the R.O.U.T.E.S. Initiative, the Department may consider how projects will address the challenges faced by rural areas under the PIDP.

2. Merit Criteria

This section of the notice describes the following three merit criteria that the Department intends to use to select FY 2020 PIDP awards:

(a) Effect on the Movement of Goods

Ports play a critical role in the movement of freight and goods throughout the country. As primary entry and exit points for imports and exports, ports are essential drivers of our economic growth and productivity. The international competitiveness of the United States' domestic industries, such as agriculture and energy, depends on safe and efficient cargo movements through our nation's coastal and inland ports, as well as their intermodal connectors. To prioritize investment in projects that support goods movement, the Department will evaluate the extent to which the project will improve the safety, efficiency, or reliability of the movement of goods through a port or intermodal connection to a port.

(b) Leverage of Federal Funding

The Department is committed to supporting the President's call for more infrastructure investment. That goal will not be achieved through Federal investment alone, but rather requires
