

prototype testing, pooling, and confirmation testing, and quality assurance procedures and any associated testing. The required records must be maintained for as long as mattress sets based on the prototype are in production and must be retained for 3 years thereafter. Although some larger manufacturers may produce mattresses based on more than 100 prototypes, most mattress manufacturers base their complying production on 15 to 20 prototypes. OMB previously approved the collection of information for 16 CFR parts 1632 and 1633, under control number 3041-0014, with an expiration date of June 30, 2020. The information collection requirements under the part 1632 standard are separate from the testing and recordkeeping requirements under the part 1633 standard.

B. Burden Hours

16 CFR 1632: Staff estimates that there are 344 respondents. It is estimated that each respondent will spend 26 hours for testing and record keeping annually for a total of 8,944 hours (344 establishments × 26 hours = 8,944). The hourly compensation for the time required for record keeping is \$70.17 (for management, professional, and related occupations in goods-producing industries, Bureau of Labor Statistics, September, 2019). The annualized cost to respondents would be approximately \$627,600 (8,944 hours × \$70.17).

16 CFR 1633: The standard requires detailed documentation of prototype identification and testing records, model and prototype specifications, inputs used, name and location of suppliers, and confirmation of test records, if establishments choose to pool a prototype. This documentation is in addition to documentation already conducted by mattress manufacturers in their efforts to meet 16 CFR part 1632. Staff estimates that there are 344 respondents. Based on staff estimates, the recordkeeping requirements are expected to require about 4 hours and 44 minutes per establishment, per qualified prototype. Although some larger manufacturers reportedly are producing mattresses based on more than 100 prototypes, most mattress manufacturers probably base their complying production on 15 to 20 prototypes, according to an industry representative contacted by staff. Assuming that establishments qualify their production with an average of 20 different qualified prototypes, recordkeeping time is about 94.6 hours (4.73 hours × 20 prototypes) per establishment, per year. (Note that pooling among establishments or using

a prototype qualification for longer than 1 year will reduce this estimate). This translates to an estimated annual recordkeeping time cost to all mattress producers of 32,542 hours (94.6 hours × 344 establishments). The hourly compensation for the time required for record keeping is \$70.17 (for management, professional, and related occupations in goods-producing industries, Bureau of Labor Statistics, September, 2019). The annual total estimated costs for recordkeeping are approximately \$2,283,500 (32,542 hours × \$70.17).

The total estimated annual cost to the 344 establishments for the burden hours associated with both 16 CFR part 1632 and 16 CFR part 1633 is approximately \$2.8 million.
