comment submission available to the public in this docket.

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at https://www.regulations.gov as well as enter the comment submissions into ADAMS, and the NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

I. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC is requesting public comment on its intention to request the OMB’s approval for the information collection summarized below.

1. The title of the information collection: Requests to Agreement States for Information.
2. OMB approval number: 3150–0029.
3. Type of submission: Extension.
4. The form number, if applicable: Not applicable.
5. How often the collection is required or requested: One time or as needed.
6. Who will be required or asked to respond: Thirty-nine Agreement States who have signed Section 274(b) Agreements with the NRC.
7. The estimated number of annual responses: 624 (1,872 over the course of the three-year clearance period).
8. The estimated number of annual respondents: 39.
9. The estimated number of hours needed annually to comply with the information collection requirement or request: 4,992 (14,976 over the course of the three-year clearance period).
10. Abstract: The NRC is requesting OMB approval of a plan for a generic collection of information. The need and practicality of the collection can be evaluated, but the details of the specific individual collections will not be known until a later time. The Agreement States will be asked on a one-time or as needed basis to respond to a specific incident, to gather information on licensing and inspection practices or other technical information. The results of such information requests, which are authorized under Section 274(b) of the Atomic Energy Act, will be utilized on part by the NRC in preparing responses to Congressional inquiries.

II. Specific Requests for Comments

The NRC is seeking comments that address the following questions:
1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the estimate of the burden of the information collection accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

Dated at Rockville, Maryland, this 10th day of March 2020.

SUPPLEMENTARY INFORMATION:

I. Discussion

The NRC has terminated License No. SNM–180, held by UTX–A at its Nuclear Engineering Teaching Laboratory (NETL). The NETL used SNM to supplement its training program in the field of nuclear engineering. The licensed materials were to be used in experiments in the NETL at the J.J. Pickle Research Campus in Austin, Texas. The license was most recently renewed on November 13, 2009 and was due for renewal in November 2019. Instead, due to a change in the direction of research activities at the NETL, resulting in the disuse of licensed SNM, UTX–A arranged to ship the licensed SNM to the U.S. Department of Energy (DOE) in Oak Ridge, Tennessee. By letter dated November 15, 2019, the NETL forwarded notification to the NRC that packaging and shipment to DOE had been completed.

UTX–A’s initial license was issued February 27, 1958, and the most recent renewal was issued on November 13, 2009. However, the SNM licensed for use by UTX–A had been in storage and unused prior to the last license renewal. An application to terminate the license was received by the NRC on
November 15, 2019. The NRC staff prepared a safety evaluation report for the termination of SNM–180 and concluded that this license termination complies with the standards and requirements of the Atomic Energy Act of 1954, as amended, section 70.38 of title 10 of the Code of Federal Regulations (10 CFR), and other applicable NRC's rules and regulations as set forth in 10 CFR chapter I. Accordingly, this license termination was issued on January 23, 2020.
