[Docket No. USCG—2016–1084]

**RIN 1625–ZA39**

**Navigation and Vessel Inspection Circular (NVIC) 01–20; Guidelines for Addressing Cyber Risks at Maritime Transportation Security Act (MTSA) Regulated Facilities**

**AGENCY:** Coast Guard, DHS.

**ACTION:** Notice of availability.

**SUMMARY:** The Coast Guard announces the availability of Navigation and Vessel Inspection Circular (NVIC) 01–20, titled Guidelines for Addressing Cyber Risks at Maritime Transportation Security Act (MTSA) Regulated Facilities. This NVIC clarifies the existing MTSA requirements related to computer system and network vulnerabilities of MTSA-regulated facilities. It also provides owners and operators of the facilities with guidance on how to analyze these vulnerabilities in their required Facility Security Assessment (FSA) and address them in the Facility Security Plan (FSP).

**FOR FURTHER INFORMATION CONTACT:** If you have questions on this notice, call or email, CDR Brandon Link, U.S. Coast Guard; telephone 202–372–1107, email Brandon.M.Link@uscg.mil.

**SUPPLEMENTARY INFORMATION:**

**Discussion**

As discussed in the United States Coast Guard Cyber Security Strategy, released in June 2015,1 and the draft NVIC,2 published for public comment on July 12, 2017 (82 FR 32189), cyber security is one of the most serious economic and national security challenges for the maritime industry and our nation. Maritime facility safety and security systems, such as security monitoring, fire detection, and general alarm installations increasingly rely on computer systems and networks. While these computer systems and networks create benefits, they are inherently vulnerable and introduce new vulnerabilities.

There are many resources, technical standards, and recommended practices available to the maritime industry that can help with identifying vulnerabilities to facility computer systems and networks and subsequently incorporating those vulnerabilities into FSPs. However, recent Coast Guard experience suggests the maritime industry may not be aware of or utilizing these resources. Therefore, this NVIC recommends how MTSA-regulated facilities can address and mitigate cyber security risks while ensuring the continued operational capability of the nation’s Marine Transportation System (MTS).

2 The Coast Guard assigns NVICs based on the year and order in which they are issued in the final form. The draft version of this NVIC was assigned NVIC number 05–17. However, since the final version of the NVIC will be issued in the year 2020, we have assigned it a new number 01–20.
