The human remains were removed from Belle Glade Mound (8PB41) in Palm Beach County, FL.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3) and 43 CFR 10.11(d). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by the Office of the State Archaeologist Bioarchaeology Program professional staff in consultation with representatives of the Miccosukee Tribe of Indians; Seminole Tribe of Florida (previously listed as the Seminole Tribe of Florida (Dania, Big Cypress, Brighton, Hollywood & Tampa Reservations)); and The Seminole Nation of Oklahoma (hereafter referred to as "The Tribes").

History and Description of the Remains

In 1933–1934, human remains representing, at minimum, 35 individuals were removed from Belle Glade Mound (8PB41) in Palm Beach County, FL. The human remains were excavated as part of the Federal Relief Projects. Originally, all of the skeletal remains from this excavation were housed at the Smithsonian Institution in Washington, DC. In 1973, a portion of the Belle Glade material culture was

deaccessioned and transferred to the Iowa State University Archaeological Laboratory (ISUAL). The transferred human remains were given accession numbers 8–1 to 8–12, 8–14, 8–16 to 8–18, 8–20, 8–22 to 8–44, 8–46 to 8–51, 8–57, 8–59 to 8–81, 8–83, 8–85, 8–87, 8–89 to 8–91, 8–93, 8–95 to 105, 8–107 to 8–114, 8–116 to 8–134, and 8–136. In 1994, the ISUAL transferred the human remains to the Office of the State Archaeologist Bioarchaeology Program. At least 25 adults, including two possible males and five possible females, are represented by the human remains. Additionally, long bones representing 10 juveniles ranging in age from six months to 13.5 years are present (Burial Project 753). No known individuals were identified. No associated funerary objects are present.

Belle Glade mound is the type site for the Belle Glade culture in Florida, which may have spanned the period from 1000 B.C. to A.D. 1700. Currently, the cultural affiliation of human remains from Belle Glade sites cannot be determined.
