

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: The information collection from respondents shall be treated as presumptively confidential upon filing. The Commission will limit direct access to DIRS reports to select Commission staff and, with protections at least as strong as required by the Freedom of Information Act (FOIA), with select federal and potentially state agency partners, including the Department of Homeland Security (DHS). The Commission will not publish the individual submissions but may publish this information on an aggregated basis in daily communications status reports. The Commission will also work with respondents to ensure that any concerns regarding the confidentiality of their DIRS filings are resolved in a manner consistent with Commission rules.

Needs and Uses: The Commission launched DIRS in 2007 pursuant to its mandate to promote the safety of life and property through the use of wire and radio communication as required by the Communications Act of 1934, as amended. DIRS is a voluntary, efficient and web-based system that communications companies may use to report their infrastructure status during times of crisis (e.g., related to a disaster). DIRS uses a number of template forms tailored to different communications sectors (i.e., wireless, wireline, broadcast, and cable) to facilitate the entry of this information. To use DIRS, a company first inputs its emergency contact information. After this, they submit information using the template form appropriate for their communications sector. OMB initially approved the DIRS information collection in 2007 under OMB Control Number 3060–1003, and OMB has approved multiple revisions and extensions of the collection since that time. (See OMB Control No. 3060–1003; 07/21/2007; 06/08/2012; 07/02/2015; 07/17/2018.)

The Commission is now revising the DIRS information collection to provide for one new form tailored to satellite communications providers and to update its previous burden estimates. First, the new form has the same general scope as existing forms, already approved by OMB, but is tailored to satellite providers' networks. Since OMB's 2007 approval, satellite providers have been expressly authorized to participate in DIRS, but DIRS does not currently include a tailored form for them to do so. Collecting this information from satellite providers via DIRS is necessary to meet the Commission's goals of

restoring communications quickly and ensuring that emergency and defense personnel have access to effective communications during disaster events, thus helping fulfill the Commission's public safety mandate.

Second, as a part of the Commission's response to the 2017 hurricane season, the Commission adopted the *PR and USVI Funds Order* to improve Puerto Rico and the U.S. Virgin Island's communications networks' resiliency and recovery efforts, amongst other purposes. (*PR and USVI Funds Order*, FCC 19–95, para. 1–9). The *PR and USVI Funds Order* requires Support Recipients to report in DIRS. The Commission requests a revision of the currently approved collection to include mandatory DIRS reporting for Support Recipients. Mandatory DIRS reporting will allow the Commission to track networking hardening efforts and increase Support Recipients' accountability, which the Commission expects will improve network hardening efforts and make networks more resilient in future. The *PR and USVI Funds Order* does not otherwise alter DIRS.
