

person to become registered in EPA's RCRAInfo system as a "Site Manager" for their respective sites, and have all other personnel become registered in the same way as "Preparers" are registered. These personnel would receive a username and password using the current registration process and would then request access to their site(s), as appropriate, but would not need to undergo further identity proofing. Generator and transporter personnel that are registered could then log in with their username/password and could create and edit electronic manifests for their sites. Electronic signatures under this method for generators and transporters would consist of, after logging in to their account, clicking a button to electronically sign.

A third method is for generators and transporters to use digitized signature pads that have been approved by the Agency under its CROMERR program. This method would require generators and transporters to possess units that allow them to capture a physical signature electronically, for example, using a stylus.

The Agency intends to provide more detail regarding these methods in its meeting materials, which will be published in the docket for the meeting.
