SUPPLEMENTARY INFORMATION: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission’s burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, section 5 of the Paperwork Reduction Act (44 U.S.C. 3510(c)(4)), the FCC seeks specific comment on how it might “further reduce the information collection burden for small business concerns with fewer than 25 employees.”

OMB Control No.: 3060–0865.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities, individuals or households, Not-for-profit institutions, and State, Local or Tribal Government.

Number of Respondents and Responses: 84,048 respondents; 84,050 responses.

Estimated Time per Response: .166 hours (10 minutes)—4 hours.

Frequency of Response: Recordkeeping and third-party disclosure requirements; on occasion reporting requirement.

Obtained To Respond: Required to obtain or retain benefits. The statutory authority for this collection is contained in 47 U.S.C. 154(i) and 309(j).

Total Annual Burden: 116,306 hours.

Annual Cost Burden: No cost.

Privacy Act Impact Assessment: Yes.

Nature and Extent of Confidentiality: This information collection contains personally identifiable information (PII). The FCC has a system of records notice (SORN), FCC/WTB–1, “Wireless Services Licensing Records,” to cover the collection, maintenance, use(s), and destruction of this PII, which respondents may provide to the FCC as part of the information collection requirement(s). This SORN was published in the Federal Register on April 5, 2006 (71 FR 17234).

Needs and Uses: The Commission will submit this information collection to the Office of Management and Budget (OMB) as an extension after this 60-day comment period to obtain the full three-year clearance from them.

The purpose of this information collection is to continually streamline and simplify processes for wireless applicants and licensees, who previously used a myriad of forms for various wireless services and types of requests, in order to provide the Commission information that has been collected in separate databases, each for a different group of services. Such processes have resulted in unreliable reporting, duplicate filings for the same licensees/applicants, and higher cost burdens to licensees/applicants. By streamlining the Universal Licensing System (ULS), the Commission eliminates the filing of duplicative applications for wireless carriers; increases the accuracy and reliability of licensing information; and enables all wireless applicants and licensees to file all licensing-related applications and other filings electronically, thus increasing the speed and efficiency of the application process. The ULS also benefits wireless applicants/licensees by reducing the cost of preparing applications, and speeds up the licensing process in that the Commission can introduce new entrants more quickly into this already competitive industry. Finally, ULS enhances the availability of licensing information to the public, which has access to all publicly available wireless licensing information online, including maps depicting a licensee’s geographic service area.

SUPPLEMENTARY INFORMATION:

A. Need for and Use of the Information Collection

The NSMO is a recurring quarterly survey of individuals who have recently obtained a loan secured by a first mortgage on single-family residential property. The survey questionnaire is sent to a representative sample of approximately 6,000 recent mortgage borrowers each calendar quarter and consists of 96 multiple choice and short answer questions designed to obtain information about borrowers’ experiences in choosing and in taking out a mortgage. The questionnaire may be completed either on paper (in English only) or electronically online (in English and Spanish can be accessed online at: http://www.fhfa.gov/Homeownersbuyer/Pages/National-Survey-of-Mortgage-Originations.aspx). FHFA is also seeking clearance to pretest future iterations of the survey questionnaire and related materials from time to time through the use of focus groups. A copy of the survey questionnaire sent out in the first quarter of 2020 appears at the end of this notice.

The NSMO is a component of the “National Mortgage Database” (NMDB) Program which is a joint effort of FHFA and the Consumer Financial Protection Bureau (CFPB). The NMDB Program is designed to satisfy the Congressionally-mandated requirements of sections 1324(c)(1) of the Federal Housing Enterprises Financial Safety and Soundness Act. Section 1324(c)(2) requires that FHFA conduct a monthly survey to collect data on the characteristics of individual prime and subprime mortgages, and on the borrowers and properties associated with those mortgages, in order to enable it to prepare a detailed annual report on the mortgage market activities of the Federal National Mortgage Association (Fannie Mae) and the Federal Home Loan Mortgage Corporation (Freddie Mac) for review by the appropriate Congressional oversight committees. Section 1324(c)(2) also authorizes and requires FHFA to compile a database of otherwise unavailable residential mortgage market information and to make that information available to the public in a timely fashion.

As a means of fulfilling those and other statutory requirements, as well as to support policymaking and research regarding the residential mortgage markets, FHFA and CFPB jointly established the NMDB Program in 2012. The Program is designed to provide comprehensive information about the U.S. mortgage market and has three primary components: (1) The NMDB; (2) the NSMO; and (3) the American Survey of Mortgage Borrowers (ASMB).

The NMDB is a de-identified loan-level database of closed-end first-lien residential mortgage loans that is representative of the market as a whole, contains detailed loan-level information on the terms and performance of the mortgages and the characteristics of the associated borrowers and properties, is continually updated, has an historical component dating back to 1998, and provides a sampling frame for surveys to collect additional information. The core data in the NMDB are drawn from a random 1-in-20 sample of all closed-end first-lien mortgage files outstanding at any time between January 1998 and the present in the files of Experian, one of the three national credit repositories. A random 1-in-20 sample of mortgages newly reported to Experian is added each quarter.

The NMDB draws additional information on mortgages in the NMDB datasets from other existing sources, including the Home Mortgage Disclosure Act (HMDA) data that are maintained by the Federal Financial Institutions Examination Council (FFIEC), property valuation models, and data files maintained by Fannie Mae and Freddie Mac and by federal agencies. FHFA also obtains data from the ASMB, which solicits information on borrowers’ experience with maintaining their existing mortgages, including their experience maintaining mortgages under financial stress, their experience in soliciting financial assistance, their success in accessing federally-sponsored programs designed to assist them, and, where applicable, any challenges they may have had in obtaining a mortgage loan.

While the ASMB focuses on borrowers’ experience with maintaining existing mortgages, the NSMO solicits information on newly-originated mortgages and the borrowers’ experiences with the mortgage origination process. It was developed to complement the NMDB by providing critical and timely information—not available from existing sources—on the range of nontraditional and subprime mortgage products being offered, the methods by which these mortgages are being marketed, and the characteristics of borrowers for these types of loans. In particular, the survey questionnaire is designed to elicit directly from mortgage borrowers information on the characteristics of the borrowers and on their experiences in finding and obtaining a mortgage loan, including: Their mortgage shopping behavior; their mortgage closing experiences; their expectations regarding house price appreciation; and critical financial and other life events affecting their households, such as unemployment, large medical expenses, or divorce. The survey questions do not focus on the terms of the borrowers’ mortgage loans because these fields are available in the Experian data. However, the NSMO collects a limited amount of information on each respondent’s mortgage to verify that the Experian records and survey responses pertain to the same mortgage.

Each wave of the NSMO is sent to the primary borrowers on about 6,000 mortgage loans, which are drawn from a simple random sample of the 80,000 to 100,000 newly originated mortgage loans that are added to the National Mortgage Database from the Experian files each quarter (at present, this represents an approximately 1-in-15 sample of loans added to the National Mortgage Database and an approximately 1-in-300 sample of all mortgage loan originations). By contract with FHFA, the conduct of the NSMO is administered through Experian, which has subcontracted the survey administration through a competitive process to Westat, a nationally recognized survey vendor. Westat also carries out the pre-testing of the survey materials.

B. Need For and Use of the Information Collection

FHFA views the NMDB Program as a whole, including the NSMO, as the monthly “survey” that is required by...
section 1324 of the Safety and Soundness Act. Core inputs to the NMDB, such as a regular refresh of the Experian data, occur monthly, though NSMO itself does not. In combination with the other information obtained through the NSMO, it is used to prepare the report to Congress on the mortgage market activities of Fannie Mae and Freddie Mac that FHFA is required to submit under section 1324, as well as for research and analysis by FHFA and CFPB in support of their regulatory and supervisory responsibilities related to the residential mortgage markets. The NSMO is especially critical in ensuring that the NMDB contains uniquely comprehensive information on the range of nontraditional and subprime mortgage products being offered, and particularly the creditworthiness—of borrowers for these types of loans. Datasets collected through the NSMO for public use are available online. The information provides a resource for research and analysis by federal agencies, by Fannie Mae and Freddie Mac, and by academics and other interested parties outside of the government.

FHFA is also seeking OMB approval to continue to conduct cognitive pre-testing of the survey materials. The Agency uses information collected through that process to assist in drafting and modifying the survey questions and instructions, as well as the related communications, to read in the way that will be most readily understood by the survey respondents and that will be most likely to elicit usable responses. Such information is also used to help the Agency decide on how best to organize and format the survey questionnaires.

The OMB control number for this information collection is 2590–0012. The current clearance for the information collection expires on April 30, 2020.

C. Burden Estimate

FHFA has analyzed the hour burden on members of the public associated with: (1) Conducting the survey (12,000 hours); and (2) pre-testing the survey materials (30 hours) and estimates the total annual hour burden imposed on the public by this information collection to be 12,030 hours. The estimate for each phase of the collection was calculated as follows:

(1) Conducting the Survey

FHFA estimates that the NSMO questionnaire will be sent to 24,000 recipients annually (6,000 recipients per quarterly survey × 4 calendar quarters). Although, based on historical experience, the Agency expects that only 20 to 30 percent of those surveys will be returned, it has assumed that all of the surveys will be returned for purposes of this burden calculation. Based on the reported experience of respondents to prior NSMO questionnaires, FHFA estimates that it will take each respondent 30 minutes to complete the survey, including the gathering of necessary materials to respond to the questions. This results in a total annual burden estimate of 12,000 hours for the survey phase of this collection (24,000 respondents × 30 minutes per respondent-12,000 hours annually).

(2) Pre-Testing the Materials

FHFA estimates that it will pre-test the survey materials with 30 cognitive testing participants annually. The estimated participation time for each participant is one hour, resulting in a total annual burden estimate of 30 hours for the pre-testing phase of the collection (30 participants × 1 hour per participant = 30 hours annually).

D. Comment Request

In accordance with the requirements of 5 CFR 1320.8(d), FHFA published an initial notice and request for public comments regarding this information collection in the Federal Register on December 10, 2019. The 60-day comment period closed on February 10, 2020. FHFA received no comments.

FHFA requests written comments on the following: (1) Whether the collection of information is necessary for the proper performance of FHFA functions, including whether the information has practical utility; (2) The accuracy of FHFA’s estimates of the burdens of the collection of information; (3) Ways to enhance the quality, utility, and clarity of the information collected; and (4) Ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Improving Mortgage Experiences in America

National Survey of Mortgage Originations

We are conducting this survey of people who have taken out or co-signed for a mortgage loan to purchase a housing property, or to refinance or modify an existing loan.

Learning directly from borrowers like you about your mortgage experiences will help us improve lending practices and the mortgage process for future borrowers like you. It is important to get the perspective of all borrowers for making government policies.

You can mail back the paper survey in the enclosed business reply envelope or complete the survey online. The online version may be easier to complete, because it skips any questions that do not apply to you based on your responses. Online responses are also processed more quickly making it less likely that you will receive reminders to complete this survey. We appreciate your help either way.

ABOUT THE SPONSORS: The Federal Housing Finance Agency and the Consumer Financial Protection Bureau are working together to sponsor this survey. We are doing this because both agencies are concerned with improving the safety of the U.S. housing finance system and making sure all consumers have better access to mortgages. Thanks so much for helping us assist future borrowers.

You can find more information on our websites - www.fnfa.gov/nsmo and www.consumerfinance.gov
Your answers to this survey will help us as we improve the safety of the U.S. housing finance system and help to ensure that people have access to funds needed to build or improve housing.

We look forward to hearing from you.

Privacy Act Notice: In accordance with the Privacy Act, as amended (5 U.S.C. § 552a), the following notice is provided. The information requested on this Survey is collected pursuant to 12 U.S.C. 4544 for the purposes of gathering information for the National Mortgage Database. Routine uses which may be made of the collected information can be found in the Federal Housing Finance Agency’s System of Records Notice (SORN) FHFA-21 National Mortgage Database. Providing the requested information is voluntary. Submission of the survey authorizes FHFA to collect the information provided and to disclose it as set forth in the referenced SORN.

Paperwork Reduction Act Statement: Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act, unless that collection of information displays a currently valid OMB Control Number.
