National Agricultural Statistics Service (NASS)

Title: Agricultural Resource Management and Chemical Use Surveys—Substantive Change.

OMB Control Number: 0535–0218.

Summary of Collection: General authority for these data collection activities is granted under U.S. Code Title 7, Section 2204 which specifies that “The Secretary of Agriculture shall procure and preserve all information concerning agriculture which he can obtain . . . by the collection of statistics . . .”. The primary objective of the National Agricultural Statistics Service (NASS) is to provide data users with timely and reliable agricultural production and economic statistics, as well as environmental and specialty agricultural related statistics. To accomplish this objective, NASS relies on the use of diverse surveys that show changes within the farming industry over time.

Using the Agricultural Resource Management Survey (ARMS) and the Vegetable Chemical Use Survey, NASS collects environmental data which includes cropping practices, fertilizer applications, pesticide usage for weeds, insects, fungus, mold, etc., and the use of various pest management practices. Through cooperative agreements with the Economic Research Service and the Office of Pest Management Policy NASS collects additional data to aid in their research. The additional questions that will be added to the questionnaires that were not in the original approval will address topics such as seed treatments, GPS enabled equipment, nutrient management, crop insurance, environmental regulations, organic production practices, etc. Complete listings of the questions added and

deleted have been added as supplemental documents to this submission.

This substantive change will not change the sample sizes of any of the surveys only the content of the ARMS II surveys for rice, corn and soybeans, the Vegetable Chemical Use Survey and the Cropping Practices Survey (done under a cooperative agreement with Mississippi State University). A detailed listing of the changes are attached to the docket submission. Based on the ARMS II and the Fruit Chemical Use surveys conducted in 2019, in which the field enumerators were asked to record beginning and ending times for personal interviews the changes in average burden per questionnaire a 10 to 15 minute increase was added to the questionnaires. This resulted in a net increase in respondent burden of 442 hours above the currently approved annual average total.

Need and Use of the Information: The Office of Pest Management Policy (OPMP), the Economic Research Service (ERS), and the Mississippi State University Extension Service (MSUES) will be able to better address changes in the farming practices and chemicals used on these crops that have occurred since the original approval of this docket.

Description of Respondents: Farms.

Number of Respondents: 16,815.

Frequency of Responses: Reporting: Once.

Total Burden Hours: 13,610.

Departmental Information Collection Clearance Officer.
