## DEPARTMENT OF COMMERCE

### Census Bureau

#### Agency Information Collection Activities; Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act.

*Agency:* U.S. Census Bureau.

*Title:* Survey of State Government Research and Development.

*OMB Control Number:* 0607-0933.

*Form Number(s):* Survey Frame Review Module; SRD-1 (State Agency Form).

*Type of Request:* Revision of a currently approved collection.

*Number of Respondents:* State Governors—52, State Coordinators—52, Department/Agency respondents—700.

*Average Hours per Response:* State Governors—5 minutes, State Coordinators—1 hour, Department/Agency respondents—3 hours (previously 2 hours).

*Burden Hours:* 2,156. (The burden requested is higher than the figure included in the presubmission notice because we only determined the amount of burden increase for Agency respondents after cognitive testing was done.)

*Needs and Uses:* The Census Bureau is requesting clearance to conduct the Survey of State Government Research and Development (SGRD) for the 2020–2022 survey years with the revisions outlined in this document. The Census Bureau conducts this survey on behalf of the National Science Foundation's (NSF) National Center for Science and Engineering Statistics (NCSES). The NSF Act of 1950 includes a statutory charge to "provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources and to provide a source of information for policy formulation by other agencies in the Federal Government." This mandate was further codified in the America COMPETES Reauthorization Act of 2010 § 505, which requires NSF's National Center for Science & Engineering Statistics to "collect, acquire, analyze, report, and disseminate . . . statistical data on (A) research and development trends . . ." NCSES also provides the official U.S. statistics on R&D to the Organization for Economic Cooperation and Development (OECD). OECD measures R&D through R&D personnel data and R&D expenditures. Under the aegis of this legislative mandate, NCSES and its predecessors have sponsored surveys of research and development (R&D) since 1953, including the SGRD since 2006. This survey has helped to expand the scope of R&D collections to include state governments, where previously there had been no regularly established collection efforts, and thus a gap in the national portfolio of R&D statistics.

NCSES sponsors surveys of R&D activities of Federal agencies, higher education institutions, and private industries. The results of these surveys provide a consistent information base for both federal and state government officials, industry professionals, and researchers to use in formulating public policy and planning in science and technology. These surveys allow for the analysis of current and historical trends of R&D in the U.S. and in international comparisons of R&D with other countries. The data collected from the SGRD fills a void that previously existed
