Annex

Item No. vii

(vii) Sensitivity of Technology:

1. The AGM-84L Harpoon Air Launched Block II missile system is classified CONFIDENTIAL. The Harpoon missile is a non-nuclear tactical weapon system currently in service in the U.S. Navy and in 29 other foreign nations. It provides a day, night, and adverse weather, standoff air-to-surface capability and is an effective Anti-Surface Warfare missile. The AGM-84L incorporates components, software, and technical design information that are considered sensitive. These elements are essential to the ability of the Harpoon missile to selectively engage hostile targets under a wide range of operations, tactical and environmental conditions. The version being sold to Morocco is a Non-Coastal Target Suppression land attack weapon. The following components being conveyed by the proposed sale that are considered sensitive and are classified CONFIDENTIAL include:
   a. The Radar Seeker
   b. The GPS/INS System
   c. Operational Flight Program Software
   d. Missile operational characteristics and performance data

2. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

A determination has been made that Morocco can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

4. All defense articles and services listed in this transmittal are authorized for release and export to the Government of Morocco.
