<sup>1</sup> There are no capital costs or operating and maintenance costs associated with this collection of information.

We based our estimates in tables 1 and 2 on our experience with the MUMS indexing program and the requests for eligibility for indexing and for addition to the index, as well as the periodic drug experience reports submitted during the past 3 years.

Our estimated burden for the information collection reflects an overall increase of 351 reporting hours and a corresponding increase of 85 responses. We attribute this adjustment, generally, to an increase in the number of submissions we received over the last few years. We also reduced our burden hour estimate for drug experience

reports and distributor statements under § 516.165 from 8 hours per submission to 5 hours per submission based on our experience with this type of reporting.
