**II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change**

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

*A. Self-Regulatory Organization’s Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change*

1. Purpose

The Exchange proposes to amend Rule 928NY (Risk Limitation Mechanism) (the “Rule”) to reflect modifications to the operation of the trade and trigger counters as well as the applicable time periods for determining if a risk setting is triggered in the event of a trading halt or for transactions at the open in regards to the Risk Limitation Mechanism. The Exchange also proposes to relocate certain text from Rule 928NY to Rule 970NY (Firm Quotes).

Risk Limitation Mechanism

Rule 928NY sets forth the risk-limitation mechanism (the “Mechanism”), which is designed to help Market Makers and ATP Holders (collectively “ATP Holders” for the purpose of this filing) better manage risk related to quoting and submitting orders during periods of increased and significant trading activity.<sup>4</sup> Specifically, the Mechanism calculates for quotes and orders, respectively: The number of trades executed by the Market Maker or ATP Holder in a particular options class; the volume of contracts traded by the Market Maker or ATP Holder in a particular options class; or the aggregate percentage of the

<sup>4</sup> Market Makers are included in the definition of ATP Holders and therefore, unless the Exchange is discussing the quoting activity of Market Makers, the Exchange does not distinguish Market Makers from ATP Holders when discussing the risk limitation mechanisms. See Rule 900.2NY(5) (defining ATP Holder as “a natural person, sole proprietorship, partnership, corporation, limited liability company or other organization, in good standing, that has been issued an ATP,” and requires that “[a]n ATP Holder must be a registered broker or dealer pursuant to Section 15 of the Securities Exchange Act of 1934”). See also Rule 900.2NY(38) (providing that a Market Maker is “an ATP Holder that acts as a Market Maker pursuant to Rule 920NY”).

Market Maker’s quoted size or ATP Holder’s order size(s) executed in a particular options class.<sup>5</sup> To determine whether the Mechanism is triggered (*i.e.*, the risk setting breached), the Exchange maintains separate trade counters that are incremented every time a trade is executed; that aggregate the number of contracts traded during each such execution; and that calculate applicable percentages depending on the risk setting at issue.<sup>6</sup> A breach of the Mechanism occurs if the number of increments to the trade counter, within a time period specified by the Exchange, exceeds the threshold set by the ATP Holder. Under the current Rule, the applicable time period will not be less than 100 milliseconds.<sup>7</sup>

Proposed Clarification to Time Period for Triggering of Risk Limitation Mechanism

Currently, the timer elapses at the conclusion of the time period specified by the Exchange, unless a breach occurs sooner than the timer expiration. The Exchange proposes to modify this functionality such that the time period is rolling (as opposed to static) and is activated each time a trade counter is incremented such that the Exchange “looks back” at other trades that occurred within the time period specified by the Exchange to see if a breach has occurred (See examples at the end of this section). The Exchange believes this modification will enhance the operation of the timer—and hence the risk protection. The Exchange proposes to modify the Rule to ensure that it is consistent with this proposed functionality change.

First, the Exchange proposes to modify the Rule regarding the applicable time period during which the increments of the trade counters are tallied, including, to account for the occurrence of trading halts or transactions occurring at the open of trading in a series. Specifically, the Exchange proposes to modify Commentary .03 to Rule 928NY to provide that the minimum time period determined by the Exchange would be “inclusive of the duration of any trading halt occurring within that time”; however, “[f]or transactions occurring at the open per Rule 952NY, the applicable time period is the lesser of (i) the time between the opening of a series and the initial transaction or (ii) the time period

<sup>5</sup> See Rule 928NY(b)–(d) (setting forth the three risk limitation mechanisms available).

<sup>6</sup> See Rule 928NY(a).

<sup>7</sup> See Commentary .03 to Rule 928NY.
