

assist in financing the evaluation of all reasonable modal and multimodal alternatives and general alignment options for identified transportation needs in a broadly defined travel corridor. The transportation planning process of Alternatives Analysis included an assessment of a wide range of public transportation or multimodal alternatives, which addressed transportation problems within a corridor or subarea; provided ample information that enabled the Secretary to make the findings of project justification and local financial commitment; supported the selection of a locally preferred alternative; and enabled the local Metropolitan Planning Organization to adopt the locally preferred alternative as part of the long-range transportation plan. The Alternative Analysis Program was repealed by Congress under the Moving Ahead for Progress in the 21st Century Act (MAP-21). However, funds previously authorized for programs repealed by MAP-21 remain available for their originally authorized purposes until the period of availability expires, the funds are fully expended, the funds are rescinded by Congress, or the funds are otherwise reallocated. To meet program oversight responsibilities, FTA must continue to collect information until the period of availability expires, the funds are fully expended, the funds are rescinded by Congress, or the funds are otherwise reallocated.

Respondents: States, Metropolitan Planning Organizations, and Local Governmental Authorities.
Estimated Annual Burden on Respondents: 15 hours for each of the 20 respondents.
Estimated Total Annual Burden: 200 hours.
Frequency: Annual.
