

commercial IFQ and individual transferable quota (ITQ) programs in the Southeast Region under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), 16 U.S.C. 1801 *et seq.* The IFQ programs for red snapper, and groupers and tilefishes occur in Federal waters of the Gulf of Mexico (Gulf), and the ITQ program for wreckfish occurs in Federal waters of the South Atlantic.

The NMFS Southeast Regional Office proposes to revise parts of the information collection approved under OMB Control Number 0648–0551. This collection of information tracks the transfer and use of IFQ and ITQ shares, and IFQ allocation and landings necessary to operate, administer, and review management of the IFQ and ITQ programs. Regulations for the IFQ and ITQ programs are located at 50 CFR part 622.

For the Gulf IFQ Programs, the revisions would modify pages within the Catch Share Online System. The Transfer Shares page allows IFQ shareholders to transfer shares online to other IFQ shareholders. Similarly, the Transfer Allocation page allows IFQ shareholders to transfer allocation online to other IFQ shareholders. Beginning in 2020, IFQ shareholders can use IFQ shares as collateral in the Federal Fisheries Finance Program to obtain a loan that can be used for fishing related expenses. However, to accommodate the finance program, the Transfer Shares and Transfer Allocation pages must be modified to allow IFQ shareholders to indicate if their shares are being held as part of a lien. The Landing Transaction page allows IFQ dealers to submit landing transactions online to record landings of IFQ species. NMFS would revise the Landing Transaction page to allow for better data collection and monitoring of landings in conjunction with the NMFS Southeast Fisheries Science Center.

If implemented by NMFS, these administrative revisions would not change the estimated time or cost per response. NMFS estimates that it would still require approximately 3 minutes to complete the Transfer Shares or Transfer Allocation pages per occurrence, and 6 minutes to complete the Landing Transaction page per occurrence.

Agency: National Telecommunications and Information Administration.

Title: 911 Grant Program Annual Performance Report.

OMB Control Number: 0660-0041.

Form Number(s): None.

Type of Request: Revision of a current information collection.

Number of Respondents: 36.

Average Hours per Response: 60 hours.

(ICO), a joint effort between the National Highway Traffic Safety Administration (NHTSA) and the National Telecommunications and Information Administration (NTIA). It delineated the responsibilities of the ICO to include a joint program to establish and facilitate coordination and communication between Federal, State, and local emergency communications systems, emergency personnel, public safety organizations, telecommunications carriers, and telecommunications equipment manufacturers and vendors involved in the implementation of 911 services.

The NG911 Advancement Act provided funding for grants to be used for the implementation and operation of 911 services, E911 services, migration to an IP-enabled emergency network, and adoption and operation of NG911 services and applications; the implementation of IP-enabled emergency services and applications enabled by NG911 services, including the establishment of IP backbone networks and the application layer software infrastructure needed to interconnect the multitude of emergency response organizations; and training public safety personnel, including call-takers, first responders, and other individuals and organizations who are part of the emergency response chain in 911 services.
