Stevens Act. The regulations implementing the FMPs, including those that have recordkeeping and reporting requirements, are located at 50 CFR part 622.

The recordkeeping and reporting requirements at 50 CFR part 622 form the basis for this collection of information. The NMFS Southeast Region requests information from fishery participants. This information, upon receipt, results in an increasingly more efficient and accurate database for management and monitoring of the Federal fisheries in the Caribbean, Gulf, and South Atlantic.

The SERO Permits Office proposes to extend and to revise the collection-of-information approved under OMB Control Number 0648–0205. NMFS proposes to revise the Federal permit applications for Vessels Fishing in the EEZ (Vessel EEZ), Change of Information Form, Vessel Fishing in the Colombian Treaty Waters, Duplicate Federal Fishery Permits, Operator Card or Decal, Aquacultured Live Rock (new permit), Aquacultured Live Rock (permit renewal), Harvest of Aquacultured Live Rock in the EEZ, Southeast Region Issued Operator Card, Consolidate Gulf of Mexico Reef Fish permits, Vessels Fishing for Wreckfish in the South Atlantic States (Wreckfish), and the Annual Dealer permit.

The proposed revisions to the specified application forms are administrative and would update outdated URLs, telephone numbers, and office hours. NMFS estimates that the proposed revisions would not change the annual number of respondents or responses, or annual costs to affected permit applicants from estimates in the currently approved collection. Across the application forms, NMFS estimates these revisions would not increase the overall time burden.

The SERO Permits Office also proposes to modify the limited access permits by updating the form field name related to the selling price of the permit, along with removing the section related to the permit’s selling price. NMFS does not anticipate these revisions will materially change the time burden to the applicants.

The SERO Permits Office also proposes to modify the Vessel EEZ application to include a checkbox and language related to the compliance of regulatory requirements. NMFS does not anticipate these revisions to the form will materially change the time burden to the applicants.

**Affected Public:** Businesses or other for-profit organizations, and individuals or households.

**Frequency:** Annual and periodic.

**Respondent’s Obligation:** Mandatory.

**Legal Authority:** 16 U.S.C. 1801 et seq.

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view the Department of Commerce collections currently under review by OMB. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function and entering either the title of the collection or the OMB Control Number 0648–0205.

**Fisheries of the Gulf of Mexico and the South Atlantic; Southeast Data, Assessment, and Review (SEDAR); Public Meeting; Correction**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of a correction of a public meeting.

**SUMMARY:** The meeting for the SEDAR 68 Data Plenary Webinar II for Gulf of Mexico and Atlantic scamp grouper has been revised. The SEDAR 68 assessment process of Gulf of Mexico and Atlantic scamp will consist of a series of data and assessment webinars, and a Review Workshop. See **SUPPLEMENTARY INFORMATION.**

**DATES:** The SEDAR 68 Data Plenary Webinar II will be held May 26, 2020, from 1 p.m. to 5 p.m.

**ADDRESSES:**

**Meeting address:** The meeting will be held via webinar. The webinar is open to members of the public. Those interested in participating should contact Julie A. Neer at SEDAR (see FOR **FURTHER INFORMATION CONTACT** to request an invitation providing webinar access information. Please request webinar invitations at least 24 hours in advance of each webinar.

**SEDAR address:** 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405.

**FOR FURTHER INFORMATION CONTACT:** Julie A. Neer, SEDAR Coordinator; (843) 571–4366; email: julie.neer@sfnc.net.

**SUPPLEMENTARY INFORMATION:** The original meeting notice published in the **Federal Register** on May 7, 2020 (85 FR 27210). The webinar was originally scheduled from 2 p.m. to 4 p.m. It will now be held from 1 p.m. to 5 p.m. This change is a result of the pandemic impacts to the stock assessment schedule in the southeast region. The Southeast Fisheries Science Center (SEFSC) has determined it will hold further work on SEDAR 68 after this webinar. As such there is a need to bring existing work to a logical stopping point so extra time is needed on this webinar.

The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a multi-step process including: (1) Data/Assessment Workshop, and (2) a series of webinars. The product of the Data/Assessment Workshop is a report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. It is also calculates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, HMS Management Division, and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion in the Data Webinars are as follows:

1. An assessment data set and associated documentation will be developed during the webinar.
2. Participants will evaluate proposed data and select appropriate sources for providing information on life history characteristics, catch statistics, discard estimates, length and age composition, and fishery dependent and fishery independent measures of stock abundance.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(e) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office (see ADDRESSES) at least 5 business days prior to each workshop.

Note: The times and sequence specified in this agenda are subject to change.

Authority: 16 U.S.C. 1801 et seq.

Tracey L. Thompson,
Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XP011]

Pacific Island Fisheries; Marine Conservation Plan for the Pacific Insular Area for the Northern Mariana Islands; Western Pacific Sustainable Fisheries Fund

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of agency decision.

SUMMARY: NMFS announces approval of a Marine Conservation Plan (MCP) for the Northern Mariana Islands.

DATES: This agency decision is effective from August 4, 2020, through August 3, 2023.

FOR FURTHER INFORMATION CONTACT: Lynn Rassel, Sustainable Fisheries, NMFS Pacific Islands Regional Office, 808–725–5184.

SUPPLEMENTARY INFORMATION: Section 204(e) of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) authorizes the Secretary of State, with the concurrence of the Secretary of Commerce (Secretary), and in consultation with the Council, to negotiate and enter into a Pacific Insular Area fishery agreement (PIAFA). A PIAFA would allow foreign fishing within the U.S. Exclusive Economic Zone (EEZ) adjacent to American Samoa, Guam, or the Northern Mariana Islands. The Governor of the Pacific Insular Area to which the PIAFA applies must request the PIAFA. The Secretary of State may negotiate and enter the PIAFA after consultation with, and concurrence of, the applicable Governor.

Before entering into a PIAFA, the applicable Governor, with concurrence of the Council, must develop and submit to the Secretary a 3-year MCP providing details on uses for any funds collected by the Secretary under the PIAFA. NMFS is the designee of the Secretary for MCP review and approval. The Magnuson-Stevens Act requires payments received under a PIAFA to be deposited into the United States Treasury and then conveyed to the Treasury of the Pacific Insular Area for which funds were collected.

In the case of violations by foreign fishing vessels in the EEZ around any Pacific Insular Area, amounts received by the Secretary attributable to fines and penalties imposed under the Magnuson-Stevens Act, including sums collected from the forfeiture and disposition or sale of property seized subject to its authority, shall be deposited into the Treasury of the Pacific Insular Area adjacent to the EEZ in which the violation occurred, after direct costs of the enforcement action are subtracted. The Pacific Insular Area government may use funds deposited into the Treasury of the Pacific Insular Area for fisheries enforcement and for implementation of an MCP.

Federal regulations at 50 CFR 665.819 authorize NMFS to specify catch limits for longline-caught bigeye tuna for U.S. territories. NMFS may also authorize each territory to allocate a portion of that limit to U.S. longline fishing vessels that are permitted to fish under the Fishery Ecosystem Plan for Pelagic Fisheries of the Western Pacific (FEP). Payments collected under specified fishing agreements are deposited into the Western Pacific Sustainable Fisheries Fund, and any funds attributable to a particular territory may be used only for implementation of that territory’s MCP. An MCP must be consistent with the Council’s FEPs, must identify conservation and management objectives (including criteria for determining when such objectives have been met), and must prioritize planned marine conservation projects.

At its 181st meeting held March 9–12, 2020, the Council reviewed and concurred with the MCP. On March 25, 2020, the Governor of the Commonwealth of the Northern Mariana Islands submitted the MCP to NMFS for review and approval. The MCP contains the following seven conservation and management objectives:

1. Improve fisheries data collection and reporting;
2. Conduct resource assessment, monitoring, and research to gain a better understanding of marine resources and fisheries;
3. Conduct enforcement training and monitoring activities to promote compliance with Federal and local mandates;
4. Promote responsible domestic fisheries development to provide long-term economic growth, stability, and local food production;
5. Conduct education and outreach, enhance public participation, and build local capacity;
6. Promote an ecosystem approach to fisheries management, climate change adaptation and mitigation, and regional cooperation; and
7. Recognize the importance of island cultures and traditional fishing practices in managing fishery resources, and foster opportunities for participation.

Please refer to the MCP for projects and activities designed to meet each objective, the evaluative criteria, and priority rankings.

This notice announces that NMFS has reviewed the MCP, and has determined that it satisfies the requirements of the Magnuson-Stevens Act. Accordingly, NMFS has approved the MCP for the 3-year period from August 4, 2020, through August 3, 2023. This MCP supersedes the one approved previously for August 4, 2017, through August 3, 2020 (82 FR 37198, August 9, 2017).
