Discussion: Contrary to some commenters' understanding, neither the proposed rules, nor the final regulations, requires a formal complaint as a condition for any person to report sexual harassment to trigger a recipient's obligation to respond promptly and meaningfully. Like the proposed rules, the final regulations obligate a recipient to respond [563] in a manner that is not clearly unreasonable in light of the known circumstances, whenever a recipient has actual knowledge of sexual harassment in the recipient's education program or activity, against a person in the United States.[564] The requirement that a recipient must investigate allegations in a formal complaint does not change the fact that a recipient must respond, every time the recipient has actual knowledge, in a way that is not deliberately indifferent—even in the absence of a formal complaint.[565] The requirement that a recipient must investigate allegations in a formal complaint provides clarity to complainants, respondents, and recipients as to when a recipient's response must *also* consist of investigating allegations. Under the final regulations, a Title IX Coordinator has discretion to sign a formal complaint that initiates a grievance process; thus, if a non-deliberately indifferent response to actual knowledge of sexual harassment necessitates investigating allegations, the recipient (via the Title IX Coordinator) has the authority to take that action. As discussed in the ''Adoption and Adaption of the Supreme Court's Framework to Address Sexual Harassment,'' the conditions triggering a recipient's response obligations (*i.e.,* actionable sexual harassment, and actual knowledge) are built on the foundation of the same concepts used in the *Gebser/Davis* framework. Similarly, the deliberate indifference standard is built on the same concept used in the *Gebser/Davis* framework, but these final regulations tailor that standard to require the recipient to take actions in response to every instance of actual knowledge of sexual harassment, including specific obligations that are not required under the *Gebser/Davis* framework. These final regulations clarify that a recipient's response obligations must always include offering supportive measures to the complainant, and must also include initiating a grievance process against the respondent when the complainant files, or the Title IX Coordinator signs, a formal complaint. The formal complaint definition, and the requirement that recipients must investigate formal complaints, therefore comport with the *Gebser/Davis* framework used in private Title IX lawsuits and do not increase recipients' vulnerability to legal challenges.

While we adopt the *Gebser/Davis* framework, we adapt that framework by requiring recipients to take certain steps as part of every non-deliberately indifferent response to actual knowledge of sexual harassment, irrespective of whether a formal complaint is filed.[566] We have revised § 106.44(a) to specify that a recipient's prompt, non-deliberately indifferent response must include offering supportive measures to each complainant (*i.e.,* a person who is alleged to be the victim), and specifically having the Title IX Coordinator contact the complainant to discuss the availability of supportive measures with or without the filing of a formal complaint, consider the complainant's wishes regarding supportive measures, and explain to the complainant the process for filing a formal complaint.

We agree with commenters who asserted that requiring a complainant to sign formal documentation describing allegations of sexual harassment in order to report and receive supportive measures would place an unreasonable burden on survivors, and the final regulations obligate recipients to respond promptly and meaningfully—including by offering supportive measures—whenever the recipient has actual knowledge that a person has been allegedly victimized by sexual harassment in the recipient's education program or activity, regardless of whether the complainant or Title IX Coordinator initiates a grievance process by filing or signing a formal complaint. The manner by which a recipient receives actual knowledge need not be a written statement, much less a formal complaint; actual knowledge may be conveyed on a recipient via ''notice'' from any person—not only from the complainant (*i.e.,* person alleged to be the victim)—regardless of whether the person who reports does so anonymously.[567] The final regulations

[563] The final regulations revise § 106.44(a) to require a recipient to respond ''promptly.''

[564] Revised § 106.44(a) specifies that a recipient's response must include offering supportive measures to a complainant (*i.e.,* the person alleged to be the victim of conduct that could constitute sexual harassment), and requires the Title IX Coordinator promptly to contact the complainant to discuss the availability of supportive measures with or without the filing of a formal complaint, consider the complainant's wishes, and explain to the complainant the option of filing a formal complaint.

[565] Section 106.44(b)(1) (stating that with or without a formal complaint, a recipient must comply with all the response obligations described in § 106.44(a)).

[566] Section 106.44(b)(1) clarifies that whether or not a formal complaint requiring investigation has also been filed, the recipient must provide the prompt, non-deliberately indifferent response described in § 106.44(a), which includes offering supportive measures to the complainant.

[567] Section 106.30 (defining ''actual knowledge''). Where a person reports anonymously (regardless of

thus effectuate the purpose of Title IX's non-discrimination mandate by requiring recipients to respond to information about sexual harassment in the recipient's education program or activity, from whatever source that information comes,[568] while reserving the specific obligation to respond by investigating and adjudicating allegations to situations where the complainant (*i.e.,* the person alleged to be the victim) or Title IX Coordinator has decided to file a formal complaint. The formal complaint definition thus ensures that complainants retain more autonomy and control over when the complainant's reported victimization leads to a formal grievance process, and recipients are not forced to expend resources investigating situations over the wishes of a complainant, unless the Title IX Coordinator has determined that such an investigation is necessary. We agree with commenters that not every complainant wants a recipient to respond to reported sexual harassment by initiating a grievance process; some complainants want an investigation, others do not, and some do not initially desire an investigation but later decide they do want to file formal ''charges.'' The final regulations ensure that every complainant is informed of the option and process for filing a formal complaint, yet never require a complainant to file a formal complaint in order to receive supportive measures. We believe that by respecting complainants' autonomy the final regulations will not chill reporting of sexual harassment, but instead will provide complainants with clearer options and greater control over the process.[569]

Contrary to some commenters' understanding, the final regulations do not create two separate systems of ''prompt and equitable grievance procedures'' for how a recipient responds to sexual harassment based on whether the recipient receives a formal complaint or informal complaint. Rather, the final regulations obligate the recipient to respond to every known allegation of sexual harassment (regardless of how, or from whom, the recipient receives notice) promptly and non-deliberately indifferently, and obligate the recipient to respond by initiating a grievance process when the recipient receives a formal complaint of sexual harassment. If commenters referred to an ''informal complaint of sexual harassment'' to describe a report or disclosure of sexual harassment that is not a ''formal complaint'' as defined in § 106.30, the final regulations require recipients to respond promptly and non-deliberately indifferently (including by offering the complainant supportive measures) to such a report or disclosure, but the recipient need not initiate investigation or adjudication procedures unless the recipient receives a ''formal complaint of sexual harassment.'' Furthermore, § 106.44(a) precludes recipients from responding to reports, disclosures, or notice of alleged sexual harassment by imposing disciplinary sanctions on a respondent without first following a grievance process that complies with § 106.45. The ''prompt and equitable'' grievance procedures to which commenters referred still must be adopted, published, and used by a recipient to address complaints of *non-sexual harassment* sex discrimination, under § 106.8(c), while recipients must respond to formal complaints of sexual harassment by following a grievance process that complies with § 106.45.

Changes: None.

Burden on Complainants To File a Formal Complaint

Comments: Commenters argued that requiring a formal complaint in order to begin an investigation places an unfair burden on victims who want an investigation but should not have to comply with specific paperwork and procedures, or because requiring a victim to put their name in writing and flesh out the details of a harrowing experience in a written narrative may be retraumatizing. Commenters argued that many institutions follow a principle that a victim should only have to make a single statement about an incident, and therefore a victim's written or oral disclosure to a police officer, or to any responsible campus employee, should be sufficient to trigger an investigation. Commenters asserted that some State protocols for sexual assault investigations (for example, in New Hampshire) caution against collecting written statements from victims.

Commenters argued that making victims sign a document with a statement of facts is inappropriate due to the potential effect of such a document on any future litigation. Commenters argued that it is unfair to make victims sign a written statement to start an investigation because the written statement could be wrongfully used to discredit a victim during the investigation if the victim's later statements show any inconsistencies with the formal complaint, and victims in the immediate aftermath of sexual violence may have trouble focusing or recalling details, due to trauma.[570] One commenter proposed a detailed alternate process for starting investigations, under which the complainant would orally describe an incident to a compliance team, the compliance team would inform the complainant of the option for signing a written statement initiating an investigation, and the complainant would have 72 hours to decide whether to sign such a written statement.

whether the person is the complainant (*i.e.,* the person alleged to be the victim) or a third party), the nature of the recipient's non-deliberately indifferent response may depend on whether the report contains information identifying the alleged victim; for example, § 106.44(a) requires a recipient to respond to actual knowledge by offering the complainant supportive measures, but a recipient may not be capable of taking that action if the person who reported refuses to identify the complainant. A recipient's response is judged on whether the response is clearly unreasonable in light of the known circumstances, which includes what information the recipient received about the identity of the complainant.

[568] To ensure that a recipient's educational community has clear, accessible reporting options, and understands that any person may report sexual harassment to trigger the recipient's obligation to offer supportive measures and explain the option of filing a formal complaint to a person allegedly victimized by sexual harassment, we have revised § 106.8 to: State that any person may report, using contact information that a recipient must list for the Title IX Coordinator; state that reports may be made in person, by mail, phone, or email, or by any other method that results in a Title IX Coordinator receiving the person's written or verbal report; and require recipients to post the Title IX Coordinator's contact information on the recipient's website. We have also revised § 106.30 (defining ''actual knowledge'') to provide that notice of sexual harassment allegations to any elementary or secondary school employee triggers the school's response obligations.

[569] Denying a survivor control over how a disclosure of sexual assault is handled by the survivor's school can also constitute a harmful form of institutional betrayal, and the final regulations desire to mitigate such harm by giving the complainant a clear, accessible *option* to file, or not file, a formal complaint (while receiving supportive measures either way) and by protecting the complainant's right to participate, or choose not to participate, in a grievance process whether the grievance process is initiated by the complainant or by the Title IX Coordinator. *See, e.g.,* Merle H. Weiner, *Legal Counsel for Survivors of Campus Sexual Violence,* 29 Yale J. of L. & Feminism 123, 140–141 (2017) (identifying one type of institutional betrayal as the harm that occurs when ''the survivor thinks she [or he] is speaking to a confidential resource, but then finds out the advocate cannot keep their conversations private''); Carly Parnitzke Smith & Jennifer J. Freyd, *Dangerous Safe Havens: Institutional Betrayal Exacerbates Sexual Trauma,* 26 J. of Traumatic Stress 1, 120 (2013) (describing ''institutional betrayal'' as when an important institution, or a segment of it, acts in a way that betrays its member's trust). Where a Title IX Coordinator signs a formal complaint knowing the complainant did not wish to do so, the recipient must respect the complainant's wishes regarding whether to participate or not in the grievance process. § 106.71 (prohibiting retaliation).

[570] Commenters cited: Russell W. Strand, *The Forensic Experiential Trauma Interview (FETI), https://responsesystemspanel.whs.mil/Public/docs/meetings/20130627/01_Victim_Overview/Rumburg_FETI_Interview.pdf.*

Commenters argued that any report of a sexual assault, to any school or college employee, whether oral or written, formal or informal, should be sufficient to start an investigation because otherwise a significant number of sexual assaults will go un-investigated, and because schools could ignore openly hostile environments just because no one filed a formal document. Commenters argued there are many ways schools can investigate a report without involving the victim, so victims should never be forced to file complaints but schools should still investigate all credible reports. Commenters argued that the burden of starting an investigation should be on the school, not on the survivor to jump through the hoop of filing a formal complaint. Commenters argued that in order to maintain a safe, non-discriminatory learning environment, institutions must not be confined by the formalities of signatures on a complaint before they are able to move forward with an investigation. Commenters argued that if schools can ignore known sexual harassment just because no one has filed a formal complaint, institutions of higher education will have even less incentive to try to stop sex abuse scandals by their employees. Commenters argued that it is expecting a student to undergo too much risk to file a written complaint against a faculty member who is sexually abusing the student, so more students will fall prey to serial abuse by faculty.

Commenters argued that the § 106.30 definition of ''formal complaint'' would preclude third parties (such as teachers, witnesses, or school employees other than the Title IX Coordinator) from filing complaints to initiate grievance procedures, representing a departure from past Department guidance and reducing schools' efforts to redress offending behavior. Other commenters supported restricting third parties from filing formal complaints because confiding in a resident advisor or professor should not trigger an obligation for that employee to file a formal complaint on the victim's behalf. Some commenters argued that no investigation should be initiated without the consent of the victim because the victim should be the one with the power to initiate a formal process, and victims should be given the opportunity to be educated on the law, process, and rights of victims.

Commenters argued that the burden of filing a formal complaint would fall especially hard on K–12 students because the proposed safe harbor in § 106.44(b)(2) only ensured that students in higher education would receive supportive measures in the absence of a formal complaint, so younger students, who may not even be capable of writing down a description of sexual harassment, would get no help at all.

Discussion: The Department appreciates commenters' concerns that requiring complainants who wish to initiate an investigation to sign a written document may seem like an unnecessary ''paperwork'' procedure, or that a victim may find it retraumatizing to write out details of a sexual harassment experience. However, absent a written document signed by the complainant alleging sexual harassment against a respondent and requesting an investigation,[571] the Department believes that complainants and recipients may face confusion about whether an investigation is initiated because the complainant desires it, because the Title IX Coordinator believes it necessary, both, or neither. We reiterate that when a recipient has actual knowledge of sexual harassment, the recipient must offer supportive measures to the complainant whether or not a formal complaint is ever filed. However, a complainant's decision to initiate a grievance process should be clear, to avoid situations where a recipient involves a complainant in a grievance process when that was neither what the complainant wanted nor what the Title IX Coordinator believed was necessary. A grievance process is a weighty, serious process with consequences that affect the complainant, the respondent, and the recipient. Clarity as to the nature and scope of the investigation necessitates that a formal complaint initiating the grievance process contain allegations of sexual harassment against the respondent, so the recipient may then prepare the written notice of allegations to be sent to both parties (under § 106.45(b)(2)), which advises both parties of essential details of allegations under investigation, and of important rights available to both parties under the grievance process.

The Department acknowledges the principle, followed by some institutions and State protocols, that avoids asking victims for written statements or avoids asking victims to recount allegations more than once. We reiterate that a complainant may report (once, and verbally) in order to require a recipient to respond promptly by offering supportive measures. Reports of sexual harassment (whether made by the alleged victim themselves or by any third party) do not need to be in writing, much less in the form of a signed document.[572] The final regulations desire to ensure that every complainant receives this prompt, supportive response regardless of whether a grievance process is ever initiated. The formal complaint requirement ensures that a grievance process is the result of an intentional decision on the part of either the complainant or the Title IX Coordinator. A complainant (or a third party) may report sexual harassment to a school for a different purpose than desiring an investigation. Thus, if an investigation is an action the complainant desires, the complainant must file a written document requesting an investigation. No written document is required to put a school on notice (*i.e.,* convey actual knowledge) of sexual harassment triggering the recipient's response obligations under § 106.44(a).

The § 106.30 definition of ''formal complaint'' requires a document ''alleging sexual harassment against a respondent,'' but contains no requirement as to a detailed statement of facts. Whether or not statements made during a Title IX grievance process might be used in subsequent litigation, clarity, predictability, and fairness in the Title IX process require both parties, and the recipient, to understand that allegations of sexual harassment have been made against the respondent before initiating a grievance process. We reiterate that no written statement is required in order to receive supportive measures,[573] and that there is no time limit on a complainant's decision to file a formal complaint, so the decision to sign and file a formal complaint need not occur in the immediate aftermath of sexual violence when a survivor may have the greatest difficulty focusing, recalling details, or making decisions. A complainant may disclose or report immediately (if the complainant desires) to receive supportive measures and receive information about the option for filing a formal complaint, and that disclosure or report may be verbal, in writing, or by any other means of giving

[571] As discussed herein, the final regulations broaden the meaning of a ''document filed by a complainant'' to include a document or electronic submission (such as an email, or use of an online portal provided for this purpose by the recipient) that contains the complainant's physical or digital signature, or otherwise indicates that the complainant is the person filing the formal complaint.

[572] Section 106.8(a).

[573] We have revised § 106.8(a) to specify that any person may report sexual harassment using the Title IX Coordinator's contact information (including during non-business hours by using the listed telephone number or email address) ''or by any other means that results in the Title IX Coordinator receiving the person's verbal or written report.''

notice.[574] But such a disclosure or report may be entirely separate from a complainant's later decision to pursue a grievance process by filing a formal complaint. We disagree with a commenter's suggestion to require a complainant to decide within 72 hours whether to file a formal complaint; even with the detailed steps in such a process suggested by the commenter, for reasons explained above it does not further Title IX's non-discrimination mandate to impose a time limit on a complainant's decision to file a formal complaint.

The Department disagrees that every report of a sexual assault to any recipient employee should be sufficient to start an investigation. We believe that every allegation of sexual harassment of which the recipient becomes aware [575] must be responded to, promptly and meaningfully, including by offering supportive measures to the person alleged to be the victim of conduct that could constitute sexual harassment.[576] However, we believe that complainants should retain as much control as possible [577] over whether a school's response includes involving the complainant in a grievance process. When a complainant believes that investigation and adjudication of allegations is in the complainant's best interest, the complainant should be able to require the recipient to initiate a grievance process.[578] When a Title IX Coordinator believes that with or without the complainant's desire to participate in a grievance process, a non-deliberately indifferent response to the allegations requires an investigation, the Title IX Coordinator should have the discretion to initiate a grievance process. Not investigating every report of sexual harassment will not allow schools to ignore complainants or ignore ''openly hostile environments,'' because § 106.44(a) requires the recipient to respond promptly in a manner that is not unreasonable in light of the known circumstances, to every instance of alleged sexual harassment in the recipient's education program or activity of which the recipient becomes aware, including offering supportive measures to the complainant with or without a grievance process. Part of whether a decision not to investigate is ''clearly unreasonable'' may include a Title IX Coordinator's communication with the complainant to understand the complainant's desires with respect to a grievance process against the respondent. When a Title IX Coordinator determines that an investigation is necessary even where the complainant (*i.e.,* the person alleged to be the victim) does not want such an investigation, the grievance process can proceed without the complainant's participation; however, the complainant will still be treated as a party in such a grievance process. The grievance process will therefore impact the complainant even if the complainant refuses to participate. The Department desires to respect a complainant's autonomy as much as possible and thus, if a grievance process is initiated against the wishes of the complainant, that decision should be reached thoughtfully and intentionally by the Title IX Coordinator, not as an automatic result that occurs any time a recipient has notice that a complainant was allegedly victimized by sexual harassment. We do not believe this places ''the burden'' of starting an investigation on the complainant. Rather, the final regulations enable a complainant, or the Title IX Coordinator, to initiate an investigation. The final regulations appropriately leave recipients flexibility to investigate allegations even where the complainant does not wish to file a formal complaint where initiating a grievance process is not clearly unreasonable in light of the known circumstances (including the circumstances under which a complainant does not desire an investigation to take place), so that recipients may, for example, pursue a grievance process against a potential serial sexual perpetrator. The recipient is required to document its reasons why its response to sexual harassment was not deliberately indifferent, under § 106.45(b)(10), thereby emphasizing the need for a decision to initiate a grievance process over the wishes of a complainant to be intentionally, carefully made taking into account the circumstances of each situation.

The § 106.30 definition of ''formal complaint'' does preclude third parties from filing formal complaints.[579] For the reasons discussed above, we believe that respecting a complainant's autonomy to the greatest degree possible means that an investigation against a complainant's wishes or without a complainant's willingness to participate, should happen only when the Title IX Coordinator has determined that the investigation is necessary under the particular circumstances.[580] We reiterate that any person may disclose or report a sexual harassment incident, whether that person is the complainant (*i.e.,* the individual who is alleged to be the victim) or any third party, such as a teacher, witness, parent, or school employee.[581] When the disclosure or report gives notice of sexual harassment allegations to a Title IX Coordinator,[582] an official with authority to institute corrective measures on the recipient's behalf, or any elementary and secondary school employee,[583] the recipient must respond promptly in a non-deliberately indifferent manner. Thus, even if neither the complainant nor the Title IX Coordinator decides to file a formal complaint, the recipient must still respond to the reported sexual harassment incident by offering supportive measures to the complainant and informing the complainant of the option of filing a formal complaint.[584]

[574] *See* § 106.30 defining ''actual knowledge'' to mean ''notice'' to the Title IX Coordinator, to any official with authority to take corrective action, or to any elementary or secondary school employee, where ''notice'' includes (but is not limited to) a report of sexual harassment to the Title IX Coordinator as described in § 106.8(a).

[575] As discussed above, a recipient is charged with actual knowledge of sexual harassment when notice is given to a Title IX Coordinator, an official with authority to take corrective action, or any elementary or secondary school employee. § 106.30 (defining ''actual knowledge'').

[576] Section 106.44(a) § 106.30 (defining ''complainant'').

[577] A complainant's control over a school's response may be circumscribed by a recipient's obligations under laws other than these final regulations; for example, State laws mandating schools to report suspected child sexual abuse to law enforcement or child welfare authorities. However, these final regulations protect a complainant against being intimidated, threatened, coerced, or discriminated against for participating, or refusing to participate, in a Title IX grievance process. § 106.71.

[578] Section 106.6(g) (acknowledging that where a parent or guardian has the legal right to act on a complainant's behalf, the parent or guardian may file a formal complaint on behalf of the complainant).

[579] *Cf.* § 106.6(g).

[580] *See* Michelle L. Meloy & Susan L. Miller, *The Victimization of Women: Law, Policies, and Politics* 147–48 (Oxford University Press 2010) (anti-violence policies must embrace ''notions of victim empowerment for self-protection by allowing victims to drop criminal charges''). The Title IX equivalent of this premise is that the Department should not require schools to investigate in the absence of a complainant's consent. The formal complaint definition in § 106.30 ensures that schools *must* investigate when the complainant desires that action (*see also* § 106.44(b)(1)), and ensures that a school only overrides a complainant's desire for the school *not* to investigate if the Title IX Coordinator has determined on behalf of the recipient that an investigation is needed, and in such circumstances the final regulations protect the complainant's right to refuse to participate in the grievance process. § 106.71.

[581] Section 106.8(a) (expressly stating that any person may report sexual harassment using the listed contact information for the Title IX Coordinator, whether or not the person reporting is the person alleged to be the victim of conduct that could constitute sexual harassment).

[582] Section 106.30 (defining ''actual knowledge'' and expressly stating that ''notice'' includes a report to the Title IX Coordinator as described in § 106.8(a)).

[583] Section 106.30 (defining ''actual knowledge'').

[584] Sections 106.44(a), 106.44(b)(1).

We disagree that no formal complaint should ever be filed without the consent of the victim, because some circumstances may require a recipient (via the Title IX Coordinator) to initiate an investigation and adjudication of sexual harassment allegations in order to protect the recipient's educational community or otherwise avoid being deliberately indifferent to known sexual harassment. However, we have added § 106.71 to prohibit retaliation against any person exercising rights under Title IX, including the right not to participate in a Title IX grievance process, so that a complainant is protected from being coerced, intimated, threatened, or otherwise discriminated against based on the complainant's refusal to participate in a grievance process. We agree that complainants should be given the opportunity to be informed of the law, process, and victims' rights, and the final regulations require recipients to notify students, employees, and parents of elementary and secondary school students (among others) of the recipient's Title IX non-discrimination policy, contact information for the Title IX Coordinator, how to report sexual harassment, and the recipient's grievance process for formal complaints of sexual harassment.[585] The final regulations further require recipients to offer supportive measures to a complainant, discuss with each individual complainant the availability of supportive measures with or without the filing of a formal complaint, and explain to the complainant the process for filing a formal complaint.[586]

In response to commenters' concerns that elementary and secondary school students might not receive supportive measures in the absence of a formal complaint because the supportive measures safe harbor in proposed § 106.44(b)(2) applied only to postsecondary institutions, we have removed the safe harbor in proposed § 106.44(b)(2), and revised § 106.44(a) to require all recipients to offer supportive measures to every complainant, obviating the need for a ''safe harbor'' that results from providing supportive measures. As to all recipients, the final regulations enable the complainant (*i.e.,* the individual who is alleged to be the victim) or the Title IX Coordinator, to file a formal complainant that initiates a grievance process. As discussed below in this section of the preamble, the final regulations also acknowledge the legal right of a parent to act on behalf of their child, addressing the concern that children are expected to write or sign a formal complaint.

Changes: We have removed the supportive measures safe harbor in proposed § 106.44(b)(2) and have revised § 106.44(a) to require all recipients to offer supportive measures to each complainant irrespective of whether a formal complaint is ever filed. We have added § 106.6(g) acknowledging the legal rights of parents or guardians to act on behalf of a complainant, respondent, or other individual, including but not limited to the filing of a formal complaint. We have added § 106.71 to prohibit retaliation against any person exercising rights under Title IX, including the right not to participate in a Title IX grievance process.

Anonymous Reporting and Anonymous Filing of Formal Complaints

Comments: Commenters requested clarification as to whether the proposed rules discouraged or prohibited anonymous reporting; some commenters asserted that anonymous reports may disclose valid information about openly hostile environments on campus that should be investigated even though the reporting party is anonymous. Commenters argued that disallowing confidential and anonymous reporting would deter reporting because research shows that concern about confidentiality is one reason why victims of sexual crimes do not report.[587] Commenters argued that requiring a signed statement may act as a deterrent to reporting, citing to a report finding that several police departments have permitted victims to report anonymously in an effort to allow a victim more options and control over whether to participate in an investigation, and that police find it advantageous because they can learn more about crimes committed in the area, and anonymous reporting may allow them to track a predator who commits multiple offenses.[588] Commenters argued that prohibiting victims from filing formal complaints anonymously would conflict with State law (such as in Illinois, and Texas) where institutions are required to provide an option for anonymous reporting and State law (such as Texas) that requires electronic reporting to be an option.

Discussion: The Department appreciates the opportunity to clarify that the final regulations do not prohibit recipients from implementing anonymous (sometimes called ''blind'') reporting options. Anonymous or blind reporting options that have been implemented by law enforcement agencies, for example, may enable the police to gain more information about crimes and may assist in identifying patterns of repeat offenders, while providing victims with ''another option for healing—an option that falls in between not reporting the crime, and being involved in a full criminal investigation.'' [589] As commenters noted, anonymous reports sometimes disclose valid information about sexual harassment on campus. Under the final regulations, when a recipient has actual knowledge of alleged sexual harassment in the recipient's education program or activity the final regulations require a recipient to respond in a manner that is not clearly unreasonable in light of the known circumstances. A recipient has actual knowledge whenever notice of sexual harassment is given to the Title IX Coordinator, an official with authority to institute corrective measures, or any elementary and secondary school employee.[590] The final regulations do not restrict the form that ''notice'' might take, so notice conveyed by an anonymous report may convey actual knowledge to the recipient and trigger a recipient's response obligations. A recipient's non-deliberately indifferent response must include offering supportive measures to a complainant (*i.e.,* person alleged to be the victim of sexual harassment).[591] A recipient's ability to offer supportive measures to a complainant, or to consider whether to initiate a grievance process against a respondent, will be affected by whether the report disclosed the identity of the complainant or respondent. In order for a recipient to provide supportive measures to a complainant, it is not possible for the complainant to remain anonymous because at least one school official (*e.g.,* the Title IX Coordinator) will need to know the complainant's identity in order to offer and implement any supportive measures. Section 106.30 defining ''supportive measures'' directs the recipient to maintain as confidential any supportive measures provided to

[585] Section 106.8.

[586] Section 106.44(a).

[590] Section 106.30 (defining ''actual knowledge'').

[591] Section 106.44(a).

either a complainant or a respondent, to the extent that maintaining confidentiality does not impair the recipient's ability to provide the supportive measures. A complainant (or third party) who desires to report sexual harassment without disclosing the complainant's identity to anyone may do so, but the recipient will be unable to provide supportive measures in response to that report without knowing the complainant's identity. If a complainant desires supportive measures, the recipient can, and should, keep the complainant's identity confidential (including from the respondent), unless disclosing the complainant's identity is necessary to provide supportive measures for the complainant (*e.g.,* where a no-contact order is appropriate and the respondent would need to know the identity of the complainant in order to comply with the no-contact order, or campus security is informed about the no-contact order in order to help enforce its terms).

Separate and apart from whether a grievance process is initiated, the final regulations require recipients to respond non-deliberately indifferently even where sexual harassment allegations were conveyed to the recipient via an anonymous report (made by the complainant themselves, or by a third party), including offering the complainant supportive measures if the anonymous report identified a complainant (*i.e.,* person alleged to be a victim of sexual harassment). Nothing in the final regulations precludes a recipient from implementing reporting systems that facilitate or encourage an anonymous or blind reporting option. Thus, recipients who are obligated under State laws to offer anonymous reporting options may not face any conflict with obligations under the final regulations. The final regulations do not preclude recipients from offering electronic reporting systems, so recipients obligated to do so under State laws may not face any conflict with obligations under the final regulations. To ensure that complainants (and third parties, because any person may report sexual harassment) have clear, accessible reporting options, we have revised § 106.8(a) to expressly state that any person may report sexual harassment using the Title IX Coordinator's listed contact information, and such a report may be made at any time (including during non-business hours) by using the listed telephone number or email address (or by mail to the listed office address) for the Title IX Coordinator. Recipients may additionally offer other types of electronic reporting systems.

A formal complaint initiates a grievance process (*i.e.,* an investigation and adjudication of allegations of sexual harassment). A complainant (*i.e.,* a person alleged to be the victim of sexual harassment) cannot file a formal complaint anonymously because § 106.30 defines a formal complaint to mean a document or electronic submission (such as an email or using an online portal provided for this purpose by the recipient) that contains the complainant's physical or digital signature or otherwise indicates that the complainant is the person filing the formal complaint. The final regulations require a recipient to send written notice of the allegations to both parties upon receiving a formal complaint. The written notice of allegations under § 106.45(b)(2) must include certain details about the allegations, including the identity of the parties, if known.

Where a complainant desires to initiate a grievance process, the complainant cannot remain anonymous or prevent the complainant's identity from being disclosed to the respondent (via the written notice of allegations). Fundamental fairness and due process principles require that a respondent knows the details of the allegations made against the respondent, to the extent the details are known, to provide adequate opportunity for the respondent to respond. The Department does not believe this results in unfairness to a complainant. Bringing claims, charges, or complaints in civil or criminal proceedings generally requires disclosure of a person's identity for purposes of the proceeding. Even where court rules permit a plaintiff or victim to remain anonymous or pseudonymous, the anonymity relates to identification of the plaintiff or victim in court records that may be disclosed *to the public,* not to keeping the identity of the plaintiff or victim unknown *to the defendant.*[592] The final regulations ensure that a complainant may obtain supportive measures while keeping the complainant's identity confidential from the respondent (to the extent possible while implementing the supportive measure), but in order for a grievance process to accurately resolve allegations that a respondent has perpetrated sexual harassment against a complainant, the complainant's identity must be disclosed to the respondent, if the complainant's identity is known. However, the identities of complainants (and respondents, and witnesses) should be kept confidential from anyone not involved in the grievance process, except as permitted by FERPA, required by law, or as necessary to conduct the grievance process, and the final regulations add § 106.71 to impose that expectation on recipients.[593]

When a formal complaint is signed by a Title IX Coordinator rather than filed by a complainant, the written notice of allegations in § 106.45(b)(2) requires the recipient to send both parties details about the allegations, including the identity of the parties *if known,* and thus, if the complainant's identity is known it must be disclosed in the written notice of allegations. However, if the complainant's identity is unknown (for example, where a third party has reported that a complainant was victimized by sexual harassment but does not reveal the complainant's identity, or a complainant has reported anonymously), then the grievance process may proceed if the Title IX Coordinator determines it is necessary to sign a formal complaint, even though the written notice of allegations does not include the complainant's identity.[594]

[592] *See, e.g.,* Jayne S. Ressler, #*WorstPlaintiffEver: Popular Public Shaming and Pseudonymous Plaintiffs,* 84 Tenn. L. Rev. 779, 828 (2017) (arguing that Federal and State courts should adopt broader rules allowing plaintiffs to file civil lawsuits anonymously or pseudonymously, and emphasizing that this anonymity relates to whether a plaintiff is named in court records that may be viewed by the public, but does not affect the *defendant's* knowledge of the identity of the plaintiff) (''The plaintiff's anonymity would extend only to court filings and any other documents that would be released to the public. In other words, the defendant would have the same information about the plaintiff had the plaintiff filed the case under her own name.'').

[593] Section 106.71(a) (prohibiting retaliation and providing in relevant part that the recipient must keep confidential the identity of any individual who has made a report or complaint of sex discrimination, including any individual who has made a report or filed a formal complaint of sexual harassment, any complainant, any individual who has been reported to be the perpetrator of sex discrimination, any respondent, and any witness except as may be permitted by FERPA, or required by law, or to the extent necessary to carry out the purposes of 34 CFR part 106, including the conduct of any investigation, hearing, or judicial proceeding arising thereunder).

[594] If the complainant's identity is discovered during the investigation, the recipient would need to send supplemental notice of allegations to the parties and treat the complainant as a party throughout the grievance process. *See* § 106.45(b)(2)(ii). Without a complainant (*i.e.,* a person alleged to be the victim of sexual harassment) at some point being identified during an investigation, a recipient may find itself unable to meet the recipient's burden to gather evidence sufficient to reach a determination regarding responsibility. For example, without knowing a complainant's identity a recipient may not be able to gather evidence necessary to establish elements of conduct defined as ''sexual harassment'' under § 106.30, such as whether alleged conduct was unwelcome, or without the consent of the victim. In such a situation, the final regulations provide for

Continued

The Department agrees with commenters that concerns about confidentiality often affect a victim's willingness to report sexual assault. The final regulations aim to give complainants as much control as possible over: Whether and how to report that the complainant has been victimized by sexual harassment; whether, or what kinds, of supportive measures may help the complainant maintain equal access to education; and whether to initiate a grievance process against the respondent. Each of the foregoing decisions can be made by a complainant with awareness of the implications for the complainant's anonymity or confidentiality. The final regulations ensure that complainants have any or all of the following options: the ability to report anonymously (though a recipient will be unable to provide supportive measures without knowing the complainant's identity); the ability to report and receive supportive measures while keeping the complainant's identity confidential from the respondent (unless the respondent must know the complainant's identity in order for the recipient to implement a supportive measure); and the right to file a formal complaint against the respondent, realizing that doing so means the respondent will know the complainant's identity, yet as to people outside the grievance process the complainant's identity must be kept confidential except as permitted by FERPA, required by law, or as necessary to conduct the grievance process.

Changes: We have added § 106.71(a) requiring recipients to keep confidential the identity of any individual who has made a report or complaint of sex discrimination, including any individual who has made a report or filed a formal complaint of sexual harassment, any complainant, any individual who has been reported to be the perpetrator of sex discrimination, any respondent, and any witness, except as permitted by FERPA, required by law, or as necessary to carry out the purposes of 34 CFR part 106 to conduct any investigation, hearing, or judicial proceeding arising thereunder, which includes a grievance process.

discretionary dismissal of the formal complaint, or allegations therein. § 106.45(b)(3)(ii). A recipient's decision (made via the Title IX Coordinator) to initiate a grievance process over the wishes of a complainant, or where the complainant does not wish to participate, or where the complainant's identity is unknown, is evaluated under the deliberate indifference standard set forth in § 106.44(a).

Officials Other Than the Title IX Coordinator Filing a Formal Complaint

Comments: Commenters asked for clarification as to whether ''officials with authority to institute corrective measures on behalf of the recipient'' are authorized to file a formal complaint, or whether the Title IX Coordinator is the sole employee authorized to file a formal complaint. Commenters requested that § 106.30 be modified so that the complainant, the Title IX Coordinator, or ''any institutional administrator'' can file a formal complaint; commenters argued that there are many administrators who have a significant interest in ensuring that the recipient investigates potential violations of school policy. Commenters requested clarification as to whether by filing a formal complaint, the Title IX Coordinator becomes a party in the investigation, and if this means that the Title IX Coordinator must be given the rights that the grievance procedures give to complainants, or if not, then commenters wondered who would be treated as the complainant in cases where the victim did not sign the formal complaint. Commenters argued that a Title IX Coordinator who signs a formal complaint initiating grievance procedures against a respondent is no longer neutral or impartial, is biased, and/or has a conflict of interest, especially where the Title IX Coordinator will also be the investigator.

Discussion: We appreciate the opportunity to clarify that the final regulations do not permit a formal complaint to be filed or signed by any person other than the complainant (*i.e.,* the person alleged to be the victim of sexual harassment or the alleged victim's parent or guardian on the alleged victim's behalf, as appropriate) or the Title IX Coordinator. While it is true that school administrators other than the Title IX Coordinator may have significant interests in ensuring that the recipient investigate potential violations of school policy, for reasons explained above, the decision to initiate a grievance process in situations where the complainant does not want an investigation or where the complainant intends not to participate should be made thoughtfully and intentionally, taking into account the circumstances of the situation including the reasons why the complainant wants or does not want the recipient to investigate. The Title IX Coordinator is trained with special responsibilities that involve interacting with complainants, making the Title IX Coordinator the appropriate person to decide to initiate a grievance process on behalf of the recipient. Other school administrators may report sexual harassment incidents to the Title IX Coordinator, and may express to the Title IX Coordinator reasons why the administrator believes that an investigation is warranted, but the decision to initiate a grievance process is one that the Title IX Coordinator must make.[595]

The Department does not view a Title IX's Coordinator decision to sign a formal complaint as being adverse to the respondent. A Title IX Coordinator's decision to sign a formal complaint is made on behalf of the recipient (for instance, as part of the recipient's obligation not to be deliberately indifferent to known allegations of sexual harassment), not in support of the complainant or in opposition to the respondent or as an indication of whether the allegations are credible, have merit, or whether there is evidence sufficient to determine responsibility. To clarify this, we have removed the phrase ''or on whose behalf the Title IX Coordinator has filed a formal complaint'' from the proposed rules' definition of ''complainant'' in § 106.30. We have also revised the § 106.30 definition of ''formal complaint'' to state that when the Title IX Coordinator signs a formal complaint, the Title IX Coordinator does not become a complainant, or otherwise a party, to a grievance process, and must still serve free from bias or conflict of interest for or against any party.

In order to ensure that a recipient has discretion to investigate and adjudicate allegations of sexual harassment even without the participation of a complainant, in situations where a grievance process is warranted, the final regulations leave that decision in the discretion of the recipient's Title IX Coordinator. However, deciding that allegations warrant an investigation does not necessarily show bias or prejudgment of the facts for or against the complainant or respondent. The

[595] This does not preclude recipient employees or administrators other than the Title IX Coordinator from implementing supportive measures for the complainant (or for a respondent). The final regulations, § 106.30 defining ''supportive measures,'' require that the Title IX Coordinator is *responsible* for the effective implementation of supportive measures; however, this does not preclude other recipient employees or administrators from implementing supportive measures for a complainant (or a respondent) and in fact, effective implementation of most supportive measures requires the Title IX Coordinator to coordinate with administrators, employees, and offices outside the Title IX office (for example, notifying campus security of the terms of a no-contact order, or working with the school registrar to appropriately reflect a complainant's withdrawal from a class, or communicating with a professor that a complainant needs to re-take an exam).

definition of conduct that could constitute sexual harassment, and the conditions necessitating a recipient's response to sexual harassment allegations, are sufficiently clear that a Title IX Coordinator may determine that a fair, impartial investigation is objectively warranted as part of a recipient's non-deliberately indifferent response, without prejudging whether alleged facts are true or not. Even where the Title IX Coordinator is also the investigator,[596] the Title IX Coordinator must be trained to serve impartially,[597] and the Title IX Coordinator does not lose impartiality solely due to signing a formal complaint on the recipient's behalf.

Changes: We have revised the § 106.30 definition of ''formal complaint'' to mean a document ''filed by a complainant or signed by the Title IX Coordinator'' and clarified that when a Title IX Coordinator signs a formal complaint, the Title IX Coordinator is not a complainant or otherwise a party during the grievance process, and the Title IX Coordinator must comply with these final regulations including the obligation in § 106.45(b)(1)(iii) to be free from bias or conflict of interest. We have also revised the definition of ''complainant'' in § 106.30 to remove the phrase ''or on whose behalf the Title IX Coordinator has filed a formal complaint.''

Complexity of a Document Labeled ''Formal Complaint''

Comments: Commenters argued that the document initiating a grievance process should be labeled something other than a ''formal complaint'' because calling it a formal complaint makes it sound as though the survivor is complaining, or whining, about having been assaulted.

Commenters argued that requiring signed complaints is one aspect of the proposed rules that would make the Title IX campus system too much like the legal system, and survivors already feel deterred from pursuing justice through criminal and legal systems. Commenters argued that the § 106.30 definition of formal complaint was so legalistic that lawyers would have to get involved in every Title IX matter.

Commenters argued that students may think they have triggered a grievance procedure by reporting to the Title IX Coordinator only to find out that no investigation has begun because the student did not file a document meeting the requirements of a ''formal complaint.'' Commenters argued that requiring a complainant to sign a written document with specific language about ''requesting initiation of a grievance procedure'' would result in some complainants believing they had filed a formal complaint when the exact paperwork was not filled out or signed correctly. Commenters asked whether a recipient would be deliberately indifferent if the recipient failed to tell a complainant who intended to file a formal complaint that the document filed failed to meet the requirements in § 106.30 and thus no grievance procedures had begun. Commenters requested clarification as to how a Title IX Coordinator should treat an ''informal complaint'' that did not meet the precise definition of a formal complaint. Commenters argued that the definition of ''formal complaint'' means that a recipient could dismiss a meritorious complaint, or refuse to investigate, solely for immaterial technical reasons, such as the document not being signed or failing to include specific language ''requesting initiation'' of the grievance procedures. Commenters argued that the definition of ''formal complaint'' would provide an arbitrary bureaucratic loophole that would excuse recipients for their willful indifference when paperwork is not completed perfectly.

Commenters argued that the § 106.30 definition of ''formal complaint'' would make it difficult or impossible for some students to file a formal complaint. Commenters stated, for example, that young children may not have learned how to write. Commenters stated that, for example, individuals with certain disabilities may have difficulty communicating in writing. Commenters suggested that the definition be modified so that a formal complaint is ''signed (or affirmed via another effective communication modality)'' because otherwise, a student with a disability—especially with a communication disability or disorder—may be unable to file. Commenters suggested the definition be expanded to accommodate the needs of individuals with disabilities by accepting different communication modalities including oral, manual, AAC (augmentative and alternative communication) techniques, and assistive technologies.

Discussion: The final regulations continue to use the phrase ''formal complaint'' to describe the document that initiates a grievance process resolving sexual harassment allegations. The word ''complaint'' is commonly used in proceedings designed to resolve disputed allegations, and the word is used neutrally to describe that the person has brought allegations or charges of some kind, not pejoratively to imply that a person is unjustifiably ''complaining'' or ''whining.'' [598]

''Formal complaint'' is a specific term used in these final regulations to describe a document that initiates a grievance process against a respondent alleging Title IX sexual harassment. A grievance process that is consistent, transparent, and fair is necessarily a formal process, and parties should be apprised that initiating a grievance process is a serious matter. This does not necessitate involvement of lawyers or convert a recipient's Title IX grievance process into a court proceeding. However, we agree with commenters that the way that a formal complaint was described in proposed § 106.30 [599] was more restrictive than necessary and did not take into account the common use of electronic or digital transmissions. We have revised and simplified the definition of a ''formal complaint'' to mean ''a document filed by the complainant or signed by the Title IX Coordinator alleging sexual harassment against a respondent and requesting that the recipient investigate the allegation of sexual harassment.''

The § 106.30 definition of a formal complaint describes the purpose of the document, not requirements for specific language that can be used as a bureaucratic loophole for a recipient to avoid initiating a grievance process. The purpose of the formal complaint is to clarify that the complainant (or Title IX Coordinator) believes that the recipient should investigate allegations of sexual harassment against a respondent. The Department does not assume that recipients will treat complainants attempting to file a formal complaint differently from students who attempt to file similar school paperwork; for example, when a form is missing a signature, recipients generally inquire with the student to correct the paperwork. Recipients are under an obligation under § 106.44(a) to respond promptly in a way that is not clearly unreasonable in light of the known circumstances and this obligation

[596] Section 106.45(b)(7) specifies that the decision-maker must be a different person from the Title IX Coordinator or investigator, but the final regulations do not preclude a Title IX Coordinator from also serving as the investigator.

[597] Section 106.45(b)(1)(iii).

[598] For example, OCR refers to a ''complainant'' as a person who files a ''complaint'' with OCR alleging a civil rights law violation. *E.g.,* U.S. Dep't. of Education, Office for Civil Rights, *How the Office for Civil Rights Handles Complaints* (Nov. 2018), *https://www2.ed.gov/about/offices/list/ocr/complaints-how.html.*

[599] Proposed § 106.30 defined ''formal complaint'' as ''a document signed by a complainant or by the Title IX Coordinator alleging sexual harassment against a respondent and requesting initiation of the recipient's grievance procedures consistent with § 106.45.''

extends to the circumstances under which a recipient processes a formal complaint (or a document or communication that purports to be a formal complaint). Under the final regulations, recipients also must document the basis for the recipient's conclusion that the recipient's response was not deliberately indifferent;[600] this provides an additional safeguard against a recipient intentionally treating imperfect paperwork as grounds for refusing to take action upon receipt of a document that purports to be a formal complaint.

We appreciate commenters' concerns that some students may be incapable of signing a document (for example, young students who have not learned how to write, or students with certain disabilities). To address these concerns, we have revised the § 106.30 definition of ''formal complaint'' to describe a ''document signed by a complainant'' as ''a document or electronic submission (such as by electronic mail or through an online portal provided for this purpose by the recipient) that contains the complainant's physical or digital signature, or otherwise indicates that the complainant is the person filing the formal complaint.'' We have also added § 106.6(g) recognizing the legal rights of parents and guardians to act on behalf of complainants, including with respect to filing a formal complaint of sexual harassment.

Changes: We have revised the § 106.30 definition of ''formal complaint'' to describe a document, filed by a complainant or signed by a Title IX Coordinator, alleging sexual harassment, against a respondent, and requesting that the recipient investigate the allegation of sexual harassment. We have also revised the § 106.30 definition of ''formal complaint'' to explain that the phrase ''document filed by a complainant'' refers to a document or electronic submission (such as an email or through an online portal provided for this purpose by the recipient) that contains the complainant's physical or digital signature, or otherwise indicates that the complainant is the person filing the formal complaint.

Parents' and Guardians' Rights To File a Formal Complaint

Comments: Commenters asserted that the proposed rules did not acknowledge that parents can file formal complaints on behalf of minor students and that the proposed rules therefore expect, for example, a third grade student to write down and sign a complaint document before getting help after experiencing sexual harassment. Commenters asserted that the formal complaint definition would leave minor students who may be incapable of writing and signing a document unprotected unless the Title IX Coordinator chooses to file a formal complaint on the student's behalf. Commenters argued that it is inappropriate to require a minor to sign any document because minors lack the legal capacity to bind themselves by signature. Commenters wondered what schools must do if a parent later disagrees with their child's decision to file a formal complaint or if the minor's parent is not consulted prior to filing. Other commenters wondered how a school must handle a situation where the parent, but not the child, wishes to file a formal complaint. Commenters wondered if the proposed rules would allow a Title IX Coordinator to help a complainant fill out the contents of a formal complaint.

Discussion: To address commenters' concerns that the proposed rules did not contemplate the circumstances under which a parent might have the right to file a formal complaint on their child's behalf, we have added § 106.6(g), which acknowledges the legal rights of parents and guardians to act on behalf of a complainant, respondent, or other individual with respect to exercise of rights under Title IX, including but not limited to the filing of a formal complaint. Thus, if a parent has the legal right to act on behalf of their child, the parent may act on the student's behalf by, for example, signing a formal complaint alleging that their child was sexually harassed and asking the recipient to investigate. The parent does not, in that circumstance, become the complainant (because ''complainant'' is defined as an individual *who is alleged to be the victim* of sexual harassment)[601] but the final regulations clarify that a parent's (or guardian's) legal right to act on behalf of the complainant (or respondent) is not altered by these final regulations. The extent to which a recipient must abide by the wishes of a parent, especially in circumstances where the student is expressing a different wish from what the student's parent wants, depends on the scope of the parent's legal right to act on the student's behalf.

Nothing in these final regulations precludes a Title IX Coordinator from assisting a complainant (or parent) from filling out a document intended to serve as a formal complaint; however, a Title IX Coordinator must take care not to offer such assistance to pressure the complainant (or parent) to file a formal complaint as opposed to simply assisting the complainant (or parent) administratively to carry out the complainant's (or parent's) desired intent to file a formal complaint. No person may intimidate, threaten, or coerce any person for the purpose of interfering with a person's rights under Title IX, which includes the right *not* to participate in a grievance process.[602]

Changes: We have added § 106.6(g) to the final regulations, acknowledging the legal rights of parents or guardians to act on behalf of a complainant, respondent, or other individual. We have added § 106.71 prohibiting retaliation and specifically protecting any individual's right to participate, or not participate, in a grievance process.

Methods of Reporting and Methods of Filing a Formal Complaint

Comments: Some commenters believed that the proposed rules would require students to report in person to a Title IX Coordinator (which, commenters asserted, is challenging for many students including those in schools that have satellite campuses and a single Title IX Coordinator located on a different campus). Commenters argued that a student who goes through the inconvenience of locating the Title IX Coordinator to make an in-person report, and then later decides to pursue a formal process, would need to once again go meet the Title IX Coordinator in-person to file a formal complaint. These commenters argued that the narrow, formal definition of ''formal complaint'' proposed in § 106.30 would impose unnecessary barriers for complainants and result in fewer formal complaints being filed. Commenters argued that requiring complainants to file formal complaints only with the Title IX Coordinator—who may be a school official with whom the complainant has no relationship—will make survivors less comfortable with the reporting process, when already only about ten percent of campus sexual assaults are reported.[603]

Commenters argued that a formal complaint should be allowed to be filed by telephone, email, or in-person, at the complainant's discretion. Commenters wondered whether Title IX Coordinators

[600] Section 106.45(b)(10)(ii).

[601] Section 106.30 (defining ''complainant'' to mean an individual ''an individual *who is alleged to be the victim* of conduct that could constitute sexual harassment'') (emphasis added).

[602] Section 106.71 (prohibiting retaliation and specifically protecting any individual's right to participate or to choose not to participate in a grievance process).

[603] Commenters cited: U.S. Dep't. of Justice, Office of Justice Programs, National Institute of Justice, *Research Report: The Sexual Victimization of College Women* (2000).

have the discretion to help a complainant fill out a formal complaint; whether a Title IX Coordinator could write out a complainant's verbal report and have the complainant sign the document; and whether the complainant's signature could be an electronic signature. Commenters argued that without clarifying that the complainant may sign electronically, the proposed rules would make it impossible for complainants who are not physically present on campus (for example, due to studying abroad, or being enrolled in an online course) to file formal complaints. Other commenters expressed concern that electronic reporting systems would not be allowed under the proposed regulations. Commenters stated that many recipients (both elementary and secondary schools, and postsecondary institutions) use exclusively online, electronic submission systems; commenters suggested that § 106.30 should specify that a formal complaint may be ''submitted'' or ''filed'' (but not ''signed'') to clarify that electronic submission systems can be used for the Title IX Coordinator to receive a formal complaint.

Discussion: Neither the proposed rules, nor the final regulations, required students to report in person to a Title IX Coordinator. However, to address commenters' concerns in this regard and to clarify that reporting to a Title IX Coordinator, and filing a formal complaint with the Title IX Coordinator, should be as accessible as possible for complainants, we have revised the § 106.30 definition of ''formal complaint'' to explain that a formal complaint may be filed with the Title IX Coordinator in person, by mail, or by electronic mail by using the contact information required to be listed for the Title IX Coordinator under § 106.8(a), and by any additional method designated by the recipient. A formal complaint cannot be filed by telephone, because a formal complaint consists of a written document (or electronic submission, such as an email or use of an online portal provided by the recipient for the purpose of accepting formal complaints); however, ''any additional method designated by the recipient'' may include an online submission system, and the final regulations now expressly reference the option for recipients to offer online portals for submission of formal complaints. The Department has also revised § 106.8(b) to specify that the contact information required to be listed for the Title IX Coordinator under § 106.8(a) must be prominently displayed on the recipient's website (if the recipient has a website) and in any of the recipient's handbooks or catalogs. As discussed above, neither the proposed rules, nor the final regulations, restrict the form in which notice (*e.g.,* a report of alleged sexual harassment) is given to the Title IX Coordinator, an official with authority to institute corrective measures, or an elementary or secondary school employee. Such notice may be given to the Title IX Coordinator via the same contact information listed for the Title IX Coordinator in § 106.8(a) (including in person or by mail at the Title IX Coordinator's office address, by telephone, or by email), or by other means of communicating with the Title IX Coordinator.[604] The final regulations thus ensure that complainants have multiple clear, accessible methods for reporting (*e.g.,* in person, telephone, mail, electronic mail) and multiple methods for filing formal complaints (*e.g.,* in person, mail, electronic mail, any online portal provided by the recipient to allow electronic submissions of formal complaints), to reduce the inconvenience of ''locating'' the Title IX Coordinator in order to report or to file a formal complaint.[605]

We understand commenters' concerns that a student may not have a preexisting relationship with a Title IX Coordinator; however, we reiterate that filing a formal complaint is not necessary in order to report and receive supportive measures. The revisions to § 106.30 defining ''formal complaint'' give complainants the options of filing a formal complaint in person, by mail, by email, and ''any additional method designated by the recipient'' so that the recipient has discretion to designate other methods for a formal complaint to be filed; further, a ''document filed by a complainant'' is stated to mean a mean a document or electronic submission (such as by electronic mail or through an online portal provided for this purpose by the recipient) that contains the complainant's physical or digital signature or otherwise indicates that the complainant is the person filing the formal complaint. The final regulations therefore authorize a recipient to utilize electronic submission systems, both for reporting and for filing formal complaints. The final regulations do not preclude a Title IX Coordinator from helping a complainant fill out a formal complaint, so long as what the complainant files is a document or electronic submission that contains the complainant's physical or digital signature, or otherwise indicates that the complainant is the person filing the formal complaint.

Changes: We have revised the § 106.30 definition of ''formal complaint'' to specify that a formal complaint may be filed with the Title IX Coordinator in person, by mail, or by electronic mail, by using the contact information required to be listed for the Title IX Coordinator under § 106.8(a), and by any additional method designated by the recipient. We have further revised this provision to state that ''document filed by a complainant'' means a document or electronic submission (such as by electronic mail or through an online portal provided for this purpose by the recipient) that contains the complainant's digital or physical signature, or otherwise indicates that the complainant is the person filing the formal complaint.

Miscellaneous Concerns About the Formal Complaint Definition

Comments: Commenters wondered whether a complainant can file a formal complaint after having graduated. Commenters wondered whether a formal complaint could be filed against an unknown or unidentified respondent; commenters opined that the formal grievance procedures in § 106.45 seemed ''elaborate'' for circumstances where the perpetrator was not identified and thus there would be no possibility of punishment through a grievance proceeding. Commenters suggested that complainants should be allowed to make a formal complaint about systemic culture of harassment on a campus, not only against an individual respondent.

[604] Section 106.8(a) (expressly stating that any person may report sexual harassment by using any of the listed contact information for the Title IX Coordinator or by any other means that results in the Title IX Coordinator receiving the person's verbal or written report, and such a report may be made ''at any time (including during non-business hours) by using the telephone number or electronic mail address, or by mail to the office address, listed for the Title IX Coordinator.'').

[605] We also reiterate that *any person* may report sexual harassment triggering the recipient's response obligations, although only a complainant (or Title IX Coordinator) may initiate a grievance process by filing or signing a formal complaint. We have revised § 106.8(a) to emphasize the fact that any person may report sexual harassment, whether or not the person reporting is the person alleged to be the victim of conduct that could constitute sexual harassment, and we have also revised § 106.30, defining ''actual knowledge,'' to state that ''notice'' constituting actual knowledge includes, but is not limited to, a report to the Title IX Coordinator as described in § 106.8(a). We have further revised § 106.8 to require recipients to notify all students, employees, parents and guardians of elementary and secondary school students, and others of the Title IX Coordinator's contact information, including prominently displaying that contact information on the recipient's website. These provisions ensure that all persons (not only complainants themselves) have a clear, accessible method of reporting sexual harassment.

Discussion: The Department appreciates commenters' questions regarding whether a complainant may file a formal complaint after the complainant has graduated. The definition of ''complainant'' is any individual alleged to be the victim of conduct that could constitute sexual harassment; there is no requirement that the complainant must be a student, employee, or other designated relationship with the recipient in order to be treated as a ''complainant'' entitled to a prompt, non-deliberately indifferent response from the recipient. To clarify the circumstances under which a complainant may file a formal complaint (thereby requiring the recipient to investigate sexual harassment allegations) we have revised the § 106.30 definition of ''formal complaint'' to state that a complainant must be participating in, or attempting to participate in, the recipient's education program or activity at the time of filing a formal complaint. A complainant who has graduated may still be ''attempting to participate'' in the recipient's education program or activity; for example, where the complainant has graduated from one program but intends to apply to a different program, or where the graduated complainant intends to remain involved with a recipient's alumni programs and activities. Similarly, a complainant who is on a leave of absence may be ''participating or attempting to participate'' in the recipient's education program or activity; for example, such a complainant may still be enrolled as a student even while on leave of absence, or may intend to re-apply after a leave of absence and thus is still ''attempting to participate'' even while on a leave of absence. By way of further example, a complainant who has left school because of sexual harassment, but expresses a desire to re-enroll if the recipient appropriately responds to the sexual harassment, is ''attempting to participate'' in the recipient's education program or activity. Because a complainant is entitled under these final regulations to a prompt response that must include offering supportive measures, the Department's intention is that recipients will promptly implement individualized services designed to restore or preserve the complainant's equal access to education,[606] regardless of whether a complainant files a formal complaint, so that if a complainant later decides to file a formal complaint, the complainant has already been receiving supportive measures that help a complainant maintain educational access.

The § 106.30 definition of ''formal complaint'' states that a formal complaint is a document that alleges sexual harassment ''against a respondent,'' but the final regulations do not require a complainant to identify the respondent in a formal complaint. However, § 106.44(a) prohibits a recipient from imposing disciplinary sanctions on a respondent without first following a grievance process that complies with § 106.45.[607] Section 106.45(b)(2) requires the recipient to send the parties written notice of allegations including the identities of the parties, if known, ''upon receipt of a formal complaint.'' Thus, a recipient in receipt of a complainant's formal complaint, where the complainant has refused to identify the respondent, will be unable to comply with the § 106.45 grievance process and will not be permitted to impose disciplinary sanctions against a respondent. In such a circumstance, the recipient still must promptly respond by offering supportive measures to the complainant, pursuant to §§ 106.44(a) and 106.44(b)(1).

Nothing in the final regulations precludes a recipient from responding to a complainant's request to investigate sexual harassment that allegedly has created a hostile environment on campus; however, a recipient cannot impose disciplinary sanctions against a respondent accused of sexual harassment unless the recipient first follows a grievance process that complies with § 106.45. A complaint filed by a complainant would not constitute a formal complaint triggering a recipient's obligation to investigate unless it is a document alleging sexual harassment against a respondent, and the recipient would not be able to impose disciplinary sanctions against a respondent unless the respondent's identity is known so that the recipient follows a grievance process that complies with § 106.45. A recipient must investigate a complainant's formal complaint even if the complainant does not know the respondent's identity, because an investigation might reveal the respondent's identity, at which time the recipient would be obligated to send both parties written notice of the allegations under § 106.45(b)(2) and fulfill all other requirements of the § 106.45 grievance process.

Changes: We have revised § 106.30 defining ''formal complaint'' to provide that at the time of filing a formal complaint, a complainant must be participating in or attempting to participate in the education program or activity of the recipient with which the formal complaint is filed.

Postsecondary Institution

Comments: Some commenters assumed that the Department's use of the term ''institution of higher education'' in the NPRM means an institution as defined in the Department's regulations implementing Title IV of the Higher Education Act of 1965, as amended, (''HEA'') and thus concluded that the Department must undergo negotiated rulemaking in order to promulgate these final regulations.

Discussion: The Department's use of the term ''institution of higher education'' in the NPRM did not refer to ''institution of higher education'' as defined in the Department's regulations implementing Title IV of the HEA. As explained in more detail elsewhere in this preamble including the ''Executive Orders and Other Requirements'' subsection of the ''Miscellaneous'' section of this preamble, the Department is promulgating these regulations under Title IX and not under the HEA. Accordingly, the Department is not subject to the requirement of negotiated rulemaking under Title IV of the HEA.

To make it exceedingly clear that these final regulations do not refer to ''institutions of higher education'' in the context of the HEA, the Department revised the final regulations to refer to ''postsecondary institutions'' instead of ''institutions of higher education.'' The Department derives its definition of ''postsecondary institution'' from the existing definitions in Part 106 of Title 34 of the Code of Federal Regulations. The definition of ''educational institution'' in § 106.2(k) is a definition that applies to Part 106 of Title 34 of the Code of Federal Regulations. Section 106.2(k) defines an educational institution in relevant part as an applicant or recipient of the type defined by paragraph (l), (m), (n), or (o) of § 106.2. Paragraphs (l), (m), (n), and (o) of § 106.2 define an institution of graduate higher education, an institution of undergraduate higher education, an institution of professional education, and an institution of vocational education, respectively. Accordingly, the Department defines a postsecondary institution as an institution of higher education as defined in § 106.2(l), an institution of undergraduate higher education as defined in § 106.2(m), an institution of professional education as defined in § 106.2(n), and an institution of vocational education as defined in

[606] Section 106.44(a); § 106.30 (defining ''supportive measures'').

[607] *See also* § 106.45(b)(1)(i).

§ 106.2(o). In this manner, the Department defines the subset of educational institutions as defined in § 106.2(k) that constitute postsecondary institutions as defined in § 106.30. The remainder of the entities described as educational institutions in § 106.2(k) constitute elementary and secondary schools as explained in the section above on the definition of ''elementary and secondary school.'' The definition of ''postsecondary institution'' applies only to §§ 106.44 and 106.45 of these final regulations.

Changes: The Department revises § 106.30 to define a ''postsecondary institution'' as used in §§ 106.44 and 106.45 to mean an institution of higher education as defined in § 106.2(l), an institution of undergraduate higher education as defined in § 106.2(m), an institution of professional education as defined in § 106.2(n), and an institution of vocational education as defined in § 106.2(o), and replaces ''institutions of higher education'' with ''postsecondary institutions'' throughout the final regulations.

Respondent

Comments: At least one commenter appreciated that the Department clarified in its proposed definition that only a person in their individual capacity could be subjected to a Title IX investigation rather than an entire organization. Several commenters suggested that the Department alter the language from ''respondent'' to ''responding party.'' Other commenters recommended adding the word ''accused'' instead of the word ''reported'' in an effort to eliminate bias from the proceedings. One commenter asserted that the word ''reported'' implies that only a mere accusation exists and the commenter argued that a mere accusation should not make a person a respondent. One commenter requested that the Department clarify that a respondent need not be a student, but may be a faculty or staff member. Another commenter asked for clarification regarding what constitutes a person ''reported to be a perpetrator'' since schools' obligations to the parties are only triggered when someone actually becomes a respondent or complainant.

Discussion: We acknowledge commenters' concerns with the language in the § 106.30 definition of ''respondent.'' However, the Department declines to alter the term ''respondent'' to ''responding party'' because the two terms do not vary in a significant way and the term ''respondent'' is just as neutral as the proposed modification, without introducing potential confusion from use of ''responding party'' when throughout the final regulations the word ''party'' is used to refer to either a complainant or a respondent. The Department also disagrees with the specific concern that using the language ''reported'' as opposed to ''accused'' to define the respondent, has the potential to bias the proceedings. The Department believes that the term ''reported'' carries a less negative connotation than the term ''accused'' without disadvantaging the complainant. We also acknowledge the suggestion that the final regulations clarify that a respondent can be a student, a faculty member, or other employee of the recipient, and the suggestion that the Department clarify whether a formal complaint is required for a party to become a ''respondent.'' The Department believes that § 106.30 contains sufficiently clear, broad language indicating that any ''individual'' can be a respondent, whether such individual is a student, faculty member, another employee of the recipient, or other person with or without any affiliation with the recipient. The Department intentionally does not limit a ''respondent'' to include only individuals against whom a formal complaint has been filed, because even where a grievance process is not initiated, the recipient still has general response obligations under § 106.44(a) that may affect the person alleged to have committed sexual harassment (*i.e.,* the respondent). While the terms ''complainant'' and ''respondent'' are commonly used when a formal proceeding is pending, in an effort to eliminate confusion and to promote consistency throughout the final regulations, the Department uses the terms ''complainant'' and ''respondent'' to identify the parties in situations where a formal complaint has not been filed as well as where a grievance process is pending.

Changes: None.

Sexual Harassment

Overall Support and Opposition for the § 106.30 Sexual Harassment Definition

Comments: Many commenters expressed support for the § 106.30 definition of sexual harassment. One commenter commended the Department's § 106.30 definition because it makes clear that Title IX governs misconduct by colleges, not students, and addresses the real problem of sexual harassment while acknowledging that not all forms of unwanted sexual behavior—inappropriate and problematic as they may be—rise to the level of a Title IX violation on the part of colleges and universities. One commenter expressed strong support for shifting Title IX regulations to provide a clear, rational, understandable definition of what, precisely, constitutes sexual harassment and assault as opposed to current vague guidelines. One commenter stated that although some misinformed commenters and advocates have claimed the proposed rules would not require a school to respond to allegations of rape, the third prong of the § 106.30 definition clearly prohibits criminal sexual conduct itemized in incorporated regulation 34 CFR 668.46(a) including a single instance of rape. This commenter further expressed support for the second prong of the definition, which is limited to unwelcome conduct that is ''severe, pervasive, and objectively offensive,'' which, the commenter stated, has proven to be the most controversial prong yet has three advantages: (1) It provides greater clarity and consistency for colleges and universities; (2) it minimizes the risk that federal definitions of sexual harassment will violate academic freedom and the free speech rights of members of the campus community; and (3) it recognizes that the Department's job is not to write new law. This commenter argued that if stakeholders desire a more expansive definition of sexual harassment, they should direct their concerns to Congress, and stated that the proposed rules clearly leave schools with the discretion to use their own, broader definitions of misconduct that do not fall within the school's Title IX obligations.

Several commenters supported the § 106.30 definition because they asserted that it would protect free speech and academic freedom while still requiring recipients to respond to sexual harassment that constitutes sex discrimination. One commenter argued that Title IX grants the Department authority to impose procedural requirements on schools to effectuate the purpose of Title IX but not to redefine what discrimination is, and when it comes to peer harassment particularly, application of broad definitions modeled on Title VII (which, the commenter asserted, does not require denial of equal access or severity), rather than Title IX's narrower definition, has led to numerous infringements on student and faculty speech and expression. This commenter stated that based on the Department's experience observing how a broader definition has been applied, the Department reasonably may wish to adopt a narrower, clearer definition of

harassment to avoid free speech problems, citing a Supreme Court case for the proposition that courts will not allow agencies to adopt regulations broadly interpreting a statute in a manner that raises potential constitutional problems.[608] This commenter argued that the Department cannot ban all unwelcome verbal conduct (*i.e.,* speech), or even seriously offensive speech, and that correcting an overly broad definition of harassment is an appropriate exercise of an agency's authority. The commenter argued that a broad definition may result in an agency finding liability that a court later reverses or subjecting a recipient to a lengthy, speech-chilling investigation that courts later view as a free speech violation;[609] thus, an agency needs to define harassment narrowly to avoid free speech problems *ex ante* rather than try to rely on ad-hoc First Amendment exceptions to a broad definition.

Several commenters supported the § 106.30 definition, arguing that the proposed rules correctly defined the harassment a college must respond to as severe, pervasive conduct that denies equal access to an education—not conduct or speech that is merely ''unwelcome,'' as other commenters would like. One commenter argued that students and faculty must be able to discuss sexual issues, even if that offends some people who hear it, and the fact that speech is deeply offensive to a listener is not a sufficient reason to suppress it.[610] One commenter asserted that, contrary to the suggestion of other commenters who have argued that individual instances of unwelcome speech should be suppressed to prevent any possibility of a hostile environment later developing, such a prophylactic rule to prevent harassment would be a sweeping rule, grossly overbroad in violation of the First Amendment.[611] The commenter further argued that this First Amendment rule fully applies to colleges because the Supreme Court rejected the idea that ''First Amendment protections should apply with less force on college campuses than in the community at large. Quite to the contrary, 'the vigilant protection of constitutional freedoms is nowhere more vital than in the community of American schools.' '' [612] Thus, the commenter asserted, even vulgar or indecent college speech is protected.[613] This commenter argued that because the First Amendment does not permit broad prophylactic rules against harassing speech, for a college to punish speech that is not severe and pervasive is a violation of the First Amendment.[614] The commenter further argued that even if speech is severe *or* pervasive, and thus could otherwise violate Federal employment laws like Title VII, faculty speech that offends co-workers may be protected under academic freedom when it does not target a specific employee based on race or gender[615] and the Supreme Court intentionally has adopted a narrower definition of harassment under Title IX than under Title VII, requiring that conduct be both severe and pervasive enough to deny equal educational access, as opposed to merely fostering a hostile environment through severe or pervasive conduct.[616] By contrast to the second prong of the § 106.30 definition, the commenter argued that the Department does have authority to require schools to process claims of groping-based assaults, even if the groping did not by itself deny educational access, as a prophylactic rule to prevent such conduct from recurring and spreading, and potentially causing more harm to the victim that culminates in denial of educational access; according to this commenter, the difference is that because ignoring even a misdemeanor sexual assault creates a high risk that such conduct will persist or spread to the point of denying access and prophylactic rules are constitutionally acceptable when applied to conduct (such as sexual assault), not speech.

One commenter asserted that we live in a hypersensitive age in which disagreeable views are considered an assault on students' emotional safety or health, even though such disagreement is protected by the First Amendment.[617] This commenter agreed with the proposed rules' requirement that speech must interfere with educational ''access'' and not merely create a hostile environment because from a First Amendment perspective, under schools' hostile learning environment harassment codes, students and campus newspapers have been charged with racial or sexual harassment for expressing commonplace views about racial or sexual subjects, such as criticizing feminism, affirmative action, sexual harassment regulations, homosexuality, gay marriage, or transgender rights, or discussing the alleged racism of the criminal justice system.[618] The commenter argued that to prevent speech on campus about racial or sexual subjects from being unnecessarily chilled or suppressed, a more limited definition of sexual harassment is necessary than the expansive hostile environment concept.[619] Another commenter stated that courts have struck down campus racial and gender harassment codes that banned speech that created a hostile environment, but did not cause more tangible harm to students.[620] This commenter argued that if a regulation or campus code bans hostile environments created from verbal conduct, without requiring more tangible harm, people can and will file complaints, and bring lawsuits, over constitutionally protected speech that offended them and that including a vague First Amendment exception in such codes or regulations is not enough to protect free speech because when liability or punishment is imposed, the decision-maker doing so will just claim that the penalty is not based on the content of the speech and that any First Amendment exception does not apply. The commenter argued that to protect free speech, the very definition of harassment must include a

requirement that verbal conduct deny access to an education.

The commenter argued that the § 106.30 definition of harassment properly requires that verbal conduct be severe, not just pervasive or persistent as prior Department guidance suggested. The commenter asserted that just because offensive ideas are pervasive or persistent on a college campus does not strip the ideas of First Amendment protection and thus, only severe verbal conduct, such as fighting words, threats, and intentional infliction of severe emotional distress, should be prohibited. One commenter similarly argued that the same result is appropriate in the elementary and secondary school context, arguing that the Supreme Court's *Davis* decision expressly required that conduct be severe and pervasive for Title IX liability, unlike workplace conduct under Title VII, and that the Court did so precisely because of the inevitability that elementary and secondary school students frequently behave in ways that would be unacceptable among adult workers.[621] The commenter surmised that the *Davis* Court also likely did so to address free speech concerns raised by amici, who discussed serious problems with using the broader workplace severe or pervasive standard for college students' speech. According to this commenter, college students have broader free speech rights than employees do, and the harassment definition as to their verbal conduct thus needs to be narrower under Title IX than under Title VII. Similarly, another commenter asserted that colleges are not like workplaces where it may be natural to ban offensive speech to maximize efficiency or prevent a hostile or offensive environment; rather, colleges exist for the purpose of exchanging ideas and pursuing the truth even if words and ideas offend listeners.[622] Thus, the commenter asserted, schools should not be required to punish speakers unless their speech interferes with access to an education; according to this commenter, discussion of unpleasant sexual realities and unpopular viewpoints should not be silenced.

One commenter asserted that the *Davis* standard, incorporated into the second prong of the § 106.30 definition, allows schools to prohibit sexual violence, to discipline those who commit it, and to remedy its effects and also allows schools to punish students when they determine that a student has engaged in expression (without accompanying physical or other conduct) that is discriminatory based on sex and that interferes with a student's access to education because of its severity, pervasiveness, and objective offensiveness.[623] This commenter stated it is precisely because expression, and not just physical conduct, may be restricted or punished as harassment that the Supreme Court carefully crafted the *Davis* standard for Title IX, reiterating it multiple times in its majority opinion and distinguishing it from the employment standard applied under Title VII.

One commenter asserted that, to the extent the proposed regulations appear to be a departure from a legally sound approach, as some critics have alleged, that is only because the Departments of Education and Justice have, in recent years, insisted upon an unconstitutionally broad definition of sexual harassment unsupported by statutes, regulations, or case law while the new proposed definition is in fact a welcome return to consistency with the law itself. This commenter further noted that while *Davis* sets forth constitutional guidelines for what may and may not be punished under Title IX, it does not preclude recipients from addressing conduct that does not meet that standard, in non-punitive ways including for example providing the complainant with supportive measures, responding to the conduct in question with institutional speech, or offering programming designed to foster a welcoming campus climate more generally.

One commenter supported the § 106.30 definition based on belief that the Federal government should not make a solution to problems of interpersonal relations (and sometimes intimate relations) a precondition to the receipt of Federal funds because schools do not hold a ''magic bullet'' to prevent all student relationships from going bad, and university resources should not be diverted to respond to civil rights investigations or litigation based on just a student's post-hoc, subjective feelings of being harassed or disrespected. Another commenter believed the new definition would stop schools from acting as the ''sex police.'' This commenter argued that schools have interpreted the current, extremely broad, definition to include asking too many times for sex; nine second stares; fist bumps; and wake up kisses, effectively requiring schools to police the sex lives of students. One commenter supported the § 106.30 definition asserting that harassment definitions should not assume weaknesses or vulnerabilities that the genders have spent decades trying to erase. Other commenters supported the definition believing it would benefit those truly sexually harassed or assaulted and put a stop to false accusations after regretful hookups. One commenter asserted that a clear definition of sexual harassment actionable under Title IX is crucial to ensure that no woman feels ignored or mistreated by a particular investigator or administrator and thus making the definition consistent with Supreme Court precedent is an important advancement for women.

Discussion: The Department appreciates commenters' support for the § 106.30 definition of sexual harassment. The Department agrees that the final regulations utilize a sexual harassment definition appropriate for furthering Title IX's non-discrimination mandate while acknowledging the unique importance of First Amendment freedoms in the educational context. As described in the ''Adoption and Adaption of the Supreme Court's Framework to Address Sexual Harassment'' section of this preamble, the NPRM proposed a three-pronged definition of sexual harassment recognizing *quid pro quo* harassment by any recipient employee (first prong), unwelcome conduct on the basis of sex that is so severe, pervasive, and objectively offensive that it effectively denies a person equal access to education (second prong), and sexual assault (third prong).

Overall, as revised in these final regulations, this three-part definition in § 106.30 adopts the Supreme Court's formulation of actionable sexual harassment, yet adapts the formulation

[621] Commenters cited: *Davis,* 526 U.S. 629, 652 (1999).

[622] Commenters cited: *Dambrot* v. *Cent. Mich. Univ.,* 55 F.3d 1177 (6th Cir. 1995) (holding hostile environment harassment code was unconstitutionally vague and overbroad and was not a valid prohibition of fighting words).

[623] Commenters further argued that there is no doubt that First Amendment interests are implicated when expression on public college campuses is regulated; as the Supreme Court has established, ''If there is a bedrock principle underlying the First Amendment, it is that the government may not prohibit the expression of an idea simply because society finds the idea itself offensive or disagreeable.'' *Texas* v. *Johnson,* 491 U.S. 397, 414 (1989). The Supreme Court has also rejected the idea that ''because of the acknowledged need for order, First Amendment protections should apply with less force on college campuses than in the community at large. Quite to the contrary, 'the vigilant protection of constitutional freedoms is nowhere more vital than in the community of American schools.' '' *Healy* v. *James,* 408 U.S. 169, 180 (1972) (internal citations omitted). Further, these protections apply even to highly offensive speech on campus: ''[T]he mere dissemination of ideas—no matter how offensive to good taste—on a state university campus may not be shut off in the name alone of 'conventions of decency.' '' *Papish* v. *Bd. of Curators,* 410 U.S. 667, 670 (1973) (internal citations omitted).

for administrative enforcement in furtherance of Title IX's broad non-discrimination mandate by adding other categories (*quid pro quo;* sexual assault and three other Clery Act/VAWA offenses [624]) that, unlike the *Davis* formulation, do not require elements of severity, pervasiveness, or objective offensiveness. The Department assumes that a victim of *quid pro quo* sexual harassment or the sex offenses included in the Clery Act, as amended by VAWA, has been effectively denied equal access to education. The § 106.30 definition captures categories of misconduct likely to impede educational access while avoiding a chill on free speech and academic freedom. The Department agrees with commenters noting that the Department has a responsibility to enforce Title IX while not interfering with principles of free speech and academic freedom, which apply in elementary and secondary schools as well as postsecondary institutions in a manner that differs from the workplace context where Title VII prohibits sex discrimination.

The Department agrees that the Supreme Court carefully and deliberately crafted the *Davis* standard for when a recipient must respond to sexual harassment in recognition that school environments are unlike workplace environments. Precisely because expressive speech, and not just physical conduct, may be restricted or punished as harassment, it is important to define actionable sexual harassment under Title IX in a manner consistent with respect for First Amendment rights, and principles of free speech and academic freedom, in education programs and activities. Likewise, the Department agrees with the commenter who noted the distinction between a standard for when speech is actionable versus a standard for when physical conduct is actionable; the former requires a narrowly tailored formulation that refrains from effectively applying, or encouraging recipients to apply, prior restraints on speech and expression, while the latter raises no constitutional concerns with respect to application of broader prohibitions. Thus, *quid pro quo* harassment [625] and the four Clery Act/VAWA offenses constitute *per se* actionable sexual harassment, while the ''catch-all'' *Davis* formulation that covers purely verbal harassment also requires a level of severity, pervasiveness, and objective offensiveness. The ''catch-all'' *Davis* formulation is a narrowly tailored standard to ensure that speech and expression are prohibited only when their seriousness and impact avoid First Amendment concerns.

The Department does not intend, through these final regulations, to encourage or discourage recipients from governing the sex and dating lives of students, or to opine on whether or not recipients have become the ''sex police;'' whether such a trend is positive or negative is outside the purview of these final regulations. The Department's definition of sexual harassment is designed to hold recipients accountable for meaningful, fair responses to sexual harassment that violates a person's civil right to be free from sex discrimination, not to dictate a recipient's role in the sex or dating lives of its students. The Department emphasizes that any person can be a victim, and any person can be a perpetrator, of sexual harassment, and like the Title IX statute itself, these final regulations are drafted to be neutral toward the sex of each party.[626]

Changes: We have revised the § 106.30 definition of sexual harassment in four ways: First, by moving the clause ''on the basis of sex'' from the second prong to the introductory sentence of the entire definition to align with Title IX's focus on discrimination ''on the basis of sex'' for all conduct that constitutes sexual harassment; second, by specifying that the *Davis* elements in the second prong (severe, pervasive, objectively offensive, denial of equal access) are determined under a reasonable person standard; third, by adding the other three Clery Act/VAWA sex offenses (dating violence, domestic violence, and stalking) to the sexual assault reference in the third prong; and fourth, by referencing the Clery Act and VAWA statutes rather than the Clery Act regulations.

Comments: Many commenters opposed the § 106.30 definition of sexual harassment, with some commenters arguing that the definition is unfair, would make schools unsafe and vulnerable and retraumatize survivors, is misogynistic, and promotes a hostile environment. Commenters also stated that it would negatively impact all students, especially LGBTQ students including transgender and non-binary people who are already more reluctant to report for fear of facing bias. Many commenters directed the Department to information and data about prevalence, impact, and other dynamics of sexual harassment that is addressed in the ''General Support and Opposition'' section of this preamble, arguing that the ''narrowed'' or ''stringent'' definition of sexual harassment in the NPRM would increase the prevalence, impact, and costs of sexual harassment on all victims and decrease or chill reporting of sexual harassment including disproportionately negative consequences for particular demographic populations. Many commenters asserted that the proposed definition fails to encompass the wide range of types of sexual harassment that students frequently face. Many commenters argued that requiring schools to only investigate the most serious cases gives a green light to all kinds of inappropriate behavior that should also be investigated. A few commenters contended that screening out harassment claims that do not meet certain thresholds contributes to a society-wide problem where from a young age girls are told in subtle and less subtle ways to be good, nice, and quiet, that girls don't matter as much as boys, and that speaking up to say something against a boy will not be taken seriously.

One commenter asserted that *Alexander* v. *Yale* established that sexual harassment and assault in schools is not only a crime, but also impedes equitable access to education.[627] Several commenters asserted that any act of rape or assault denies the victim the ability to successfully participate in college and that a person who is raped or assaulted is traumatized, which affects all aspects of college participation and academic performance. Many commenters contended that if enacted, the proposed rules would raise a question for a victim: Was my rape/assault bad enough

[624] These final regulations expressly include four Clery Act/VAWA offenses as sexual harassment as defined in § 106.30: Sexual assault, dating violence, domestic violence, and stalking.

[625] While *quid pro quo* harassment by a recipient's employee involves speech, the speech is, by definition, designed to compel conduct; thus, the Department believes that a broad prohibition against an employee conditioning an educational benefit on participation in unwelcome sexual conduct does not present constitutional concerns with respect to protection of speech and expression. *See, e.g., Saxe* v. *State Coll. Area Sch. Dist.,* 240 F.3d 200, 207 (3d Cir. 2001) (''government may constitutionally prohibit speech whose *non-expressive* qualities promote discrimination. For example, a supervisor's statement 'sleep with me or you're fired' may be proscribed not on the ground of any expressive idea that the statement communicates, but rather because it facilitates the threat of discriminatory conduct. Despite the purely verbal quality of such a threat, it surely is no more 'speech' for First Amendment purposes than the robber's demand 'your money or your life.' '') (emphasis in original).

[626] *Compare* 20 U.S.C. 1681(a) (''*No person* in the United States shall, on the basis of sex, be excluded . . .'') (emphasis added) *with* § 106.30 (defining ''complainant'' to mean ''*an individual* who is alleged to be the victim . . .'') (emphasis added).

[627] Commenters cited: *Alexander* v. *Yale Univ.,* 459 F. Supp. 1 (D. Conn. 1977).

or severe enough to warrant someone listening to me?

Several commenters asserted that by narrowing the definition of sexual harassment, the proposed rules would invalidate the adverse experiences to which victims have been subjected. One commenter argued that while there is no silver bullet to fixing the problem of sexual assault and harassment, narrowing what actions are deemed assault in the realm of Title IX will muddy the waters even further; the commenter argued that what people perceive as vague is necessary to ensure victims are being treated fairly. Several commenters asserted that as all victims of harassment are unique, so are forms of harassment unique and should remain widely defined.

Several commenters argued that the definitions of sexual harassment need to be developed further to include cultural differences in sexual harassment and discrimination. Other commenters asserted that the § 106.30 definition of sexual harassment is very limiting compared to what students on campus really feel and experience; further, students may understand an experience differently based on race, sex, and cultural factors leading to misunderstanding as to what sexual assault or sexual harassment is or is not. A few commenters argued that sexual violence or sexual violation would be a better term to use than sexual harassment. At least one commenter asserted that accused students sometimes do not recognize their behavior as violent and wondered how that reality plays into Title IX reform. At least one commenter characterized the use of qualifiers like severe and pervasive in the sexual harassment definition as creating a fact-bound focus on the behavior of the victim, an unfair result given that much of the conduct complained about may also be criminal.

Discussion: The Department disagrees that the three-pronged definition of sexual harassment in § 106.30 is unfair, misogynistic, will make schools unsafe, leave students vulnerable, retraumatize survivors, promote a hostile environment, or disadvantage LGBTQ students. As described above, the definition is rooted in Supreme Court Title IX precedent and principles of free speech and academic freedom, applies equally to all persons regardless of sexual orientation or gender identity, provides clear expectations for when schools legally must respond to sexual harassment, and leaves schools discretion to address misconduct that does not meet the Title IX definition. The Department appreciates the data and information commenters referred to regarding the prevalence and impact of sexual harassment on students (and employees) of all ages and characteristics. Precisely because sexual harassment affects so many students in such detrimental ways, the Department has chosen, for the first time, to exercise its authority under Title IX to codify regulations that mandate school responses to assist survivors in the aftermath of sexual harassment.

The Department does not disagree with commenters' characterizations of the *Davis* standard as ''narrow'' or even ''stringent,'' but we contend that as a whole, the range of conduct prohibited under Title IX is adequate to ensure that abuse of authority (*i.e., quid pro quo*), physical violence, and sexual touching without consent (*i.e.,* the four Clery Act/VAWA offenses) trigger a school's obligation to respond without scrutiny into the severity or impact of the conduct, while verbal and expressive conduct crosses into Title IX sex discrimination (in the form of sexual harassment) when such conduct is so serious that it effectively denies a person equal access to education. As a whole, the definition of sexual harassment in § 106.30 is significantly broader than the *Davis* standard alone,[628] and in certain ways broader than the judicial standards applied to workplace sexual harassment under Title VII.[629] The final regulations provide students, employees, and recipients clear direction that when incidents of *quid pro quo* harassment or Clery Act/VAWA offenses are reported to the recipient, the recipient must respond without inquiring into the severity or pervasiveness of such conduct. The Department understands commenters' concerns that the *Davis* standard's elements (severity, pervasiveness, and objective offensiveness) will exclude from Title IX incidents of verbal harassment that do not meet those elements. However, the Department does not agree that this standard for verbal harassment (and physical conduct that does not constitute a Clery Act/VAWA offense included in these final regulations) will discourage students or employees from reporting harassment, fail to require recipient responses to a wide range of sexual harassment frequently faced by students, or send the message that girls do not matter as much as boys. The Department believes that State and local educators desire a safe, learning-conducive environment for students and employees, and that recipients will evaluate incidents under the *Davis* standard from the perspective of a reasonable person in the shoes of the complainant, such that the ages, abilities, and relative positions of authority of the individuals involved in an incident will be taken into account. To reinforce this, the final regulations revise the second prong of the sexual harassment definition to specify that the *Davis* elements are ''determined by a reasonable person'' to be so severe, pervasive, and objectively offensive that a person is effectively denied equal access to education. The Department does not dispute commenters' characterization that only serious situations will be actionable under this definition, but following the Supreme Court's reasoning in *Davis,* that stricture is appropriate in educational environments where younger students are still learning social skills and older students benefit from robust exchange of ideas, opinions, and beliefs.

Contrary to commenters' assertions, neither the *Davis* standard nor the sexual harassment definition holistically gives a green light to inappropriate behavior. Rather, the three-pronged definition of sexual harassment in § 106.30 provides clear requirements for recipients to respond to sexual harassment that constitutes sex discrimination prohibited under Title IX, while leaving recipients flexibility to address other forms of misconduct to the degree, and in the manner, best suited to each recipient's unique educational environment.

The Department agrees with commenters that for decades, sexual harassment has been a recognized form of sex discrimination that impedes equal access to education, and that rape and assault traumatize victims in ways that negatively affect participation in educational programs and activities. For this reason, contrary to the misunderstanding of many commenters, the Department intentionally included sexual assault as a *per se* type of sexual harassment rather than leaving sexual assault to be evaluated for severity or

[628] This is because the *Davis* standard, alone, evaluates even physical assaults and violence through the lens of whether an incident is severe, pervasive, and objectively offensive so as to deny a person equal access; however, under these final regulations these elements do not apply to sex-based incidents of *quid pro quo* harassment, sexual assault, dating violence, domestic violence, or stalking.

[629] Under Title VII, sexual harassment (including *quid pro quo,* hostile environment, and even sexual assault) must be shown to alter the conditions of employment. *See Meritor Sav. Bank* v. *Vinson,* 477 U.S. 57, 67 (1986). Under these final regulations, *quid pro quo* harassment, sexual assault, dating violence, domestic violence, and stalking do not require a showing of alteration of the educational environment. As previously stated, the Department assumes that a victim of *quid pro quo* sexual harassment or the criminal sex offenses included in the Clery Act, as amended by VAWA, has been effectively denied equal access to education.

pervasiveness under the *Davis* standard. No student or employee traumatized by sexual assault needs to wonder whether a rape or sexual assault was ''bad enough'' or severe enough to report and expect a meaningful response from the survivor's school, college, or university. Far from narrowing what constitutes sexual assault, the Department incorporates the offense of sexual assault used in the Clery Act, which broadly defines sexual assault to include all the sex offenses listed by the FBI's Uniform Crime Reporting system. The Department agrees that all victims of harassment are unique, and that harassment can take a myriad of unique forms. For this reason, the Department defines sexual harassment to include the four Clery Act/VAWA offenses, leaves the concept of *quid pro quo* harassment broad and applicable to any recipient employee, and does not limit the endless variety of verbal or other conduct that could meet the *Davis* standard. While understanding that sexual harassment causes unique harm to victims distinct from the harm caused by other misconduct, the final regulations define sexual harassment similar to the way in which fraud is understood in the legal system, where ''Fraud is a generic term, which embraces all the multifarious means which human ingenuity can devise and which are resorted to by one individual to gain an advantage over another by false suggestions or by the suppression of the truth.'' [630] Similarly, sexual harassment under § 106.30 is a broad term that encompasses the ''multifarious means which human ingenuity can devise'' to foist unwelcome sex-based conduct on a victim jeopardizing educational pursuits. Thus, the Department agrees with commenters that some level of open-endedness is necessary to ensure that relevant misconduct is captured. The Department believes that the § 106.30 definition provides standards that are clear enough so that victims, perpetrators, and recipients understand the type of conduct that will be treated as sex discrimination under Title IX, and open-ended enough to not artificially foreclose behaviors that may constitute actionable sexual harassment.

The Department understands commenters' concerns that cultural differences can impact the way that sexual harassment is experienced. Cultural and other personal factors can affect sexual harassment and sexual violence dynamics, and the Department believes the definition of sexual harassment must remain applicable to all persons, regardless of cultural or other identity characteristics. To the extent that cultural or other personal factors affect a person's understanding about what constitutes sexual harassment, the Department notes that with one exception,[631] no type of sexual harassment depends on the intent or purpose of the perpetrator or victim. Thus, if a perpetrator commits misconduct that meets one or more of the three prongs, any misunderstanding due to cultural or other differences does not negate the commission of a sexual harassment violation. Similarly, a respondent's lack of comprehension that conduct constituting sexual harassment violates the bodily or emotional autonomy and dignity of a victim does not excuse the misconduct, though genuine lack of understanding may (in a recipient's discretion) factor into the sanction decision affecting a particular respondent, or a recipient's willingness to facilitate informal resolution of a formal complaint of sexual harassment.

While the Department appreciates commenters' suggestions that ''sexual violence'' or ''sexual violations'' would be preferred terms in place of ''sexual harassment,'' for clarity and ease of common understanding, the Department uses ''sexual harassment'' as the Supreme Court used that term when acknowledging that sexual harassment can constitute a form of sex discrimination covered by Title IX.

The Department disagrees that the *Davis* standard inappropriately or unfairly creates a fact-bound focus on the *victim's* behavior; rather, elements of severity, pervasiveness, and objective offensiveness focus factually on the nature of the misconduct itself—not on the victim's response to the misconduct. To reinforce and clarify that position, we have revised § 106.30 defining ''sexual harassment'' to expressly state that the *Davis* elements of severity, pervasiveness, objective offensiveness, and effective denial of equal access, are evaluated from the perspective of a ''reasonable person,'' so that the complainant's individualized reaction to sexual harassment is not the focus when a recipient is identifying and responding to Title IX sexual harassment incidents or allegations.

Changes: We have revised the § 106.30 definition of sexual harassment by specifying that the elements in the *Davis* standard (severe, pervasive, objectively offensive, and denial of equal access) are determined under a reasonable person standard.

Comments: Several commenters asserted that the § 106.30 definition ignores a multitude of objectionable actions thereby excusing large swaths of harassing activity from scrutiny under Title IX. Other commenters objected to the § 106.30 definition on the ground that there are a wide variety of circumstances in which unwelcome conduct on the basis of sex would violate Title IX, but which would fall outside the proposed definition of sexual harassment; several such commenters argued that the net effect of the proposed definition would be to exempt from enforcement by the Department several distinct categories of Title IX violations, and under Title IX the Department has no authority to create such exemptions.

A few commenters asserted that some sexual predators engage in grooming behaviors intended to sexualize an abuser's relationships with children gradually while building a sense of trust with intended victims.[632] Commenters asserted that grooming behaviors can include behaviors such as making inappropriate jokes, sharing pornographic photos or videos, inappropriately entering locker rooms when students are undressing, singling out children for gifts, trips or special tasks, and finding times and places to be alone with children. Commenters argued that under the proposed rules, these behaviors might not meet the definition of sexual harassment, yet responding to such behaviors is essential to preventing child sexual abuse.

Some commenters expressed concern that the § 106.30 definition discounts certain types of sex-based harassment that, although ostensibly ''less severe,'' nonetheless adversely affect survivors' participation in educational programs. A few such commenters categorized types of sex-based harassment [633] as: (i)

[630] *Stapleton* v. *Holt,* 250 P.2d 451, 453–54 (Okla. 1952).

[631] The one exception is the offense of ''fondling,'' included in the Clery Act under the term ''sexual assault.'' Under the Clery Act (referring to the FBI's Uniform Crime Reporting system), fondling is a sex offense that means the ''touching of the private body parts of another person *for the purpose of sexual gratification,* without the consent of the victim[.]'' *E.g.,* U.S. Dep't. of Education, Office of Postsecondary Education, *The Handbook for Campus Safety and Security Reporting* 3–6 (2016), *https://www2.ed.gov/admins/lead/safety/handbook.pdf.* (emphasis added).

Berdahl, *Harassment based on sex: Protecting social status in the context of gender hierarchy,* 32 Acad. of Mgmt. Rev. 641 (2007); Emily Leskinen *et al., Gender harassment: Broadening our understanding of sex-based*

''Sexual assault'' defined as involving any unwelcome sexual contact, which the commenters stated is covered by the proposed rules' definition of harassment; (ii) ''sex-based harassment'' as an umbrella term to mean behavior that derogates, demeans, or humiliates an individual based on that individual's sex but does not involve physical contact, and which comes in three forms: ''Sexual coercion'' or *quid pro quo* involving bribes or threats that make an important outcome contingent on the victim's sexual cooperation; ''unwanted sexual attention'' involving expressions of romantic or sexual interest that are unwelcome, unreciprocated, and offensive to the recipient; and ''gender harassment'' encompassing verbal and nonverbal behaviors not aimed at sexual cooperation but that convey insulting, hostile, and degrading attitudes about one sex (though devoid of sexual content). These commenters asserted that while sexual coercion remains covered under the § 106.30 definition (under the first prong regarding *quid pro quo* harassment), unwanted sexual attention is covered only if it is so severe, pervasive, and objectively offensive that it effectively denies a person equal access to education, and gender harassment is not covered at all by the regulatory definition even though it is the most common type of sex-based harassment in academia as well as the workplace. These commenters also asserted that research shows that gender harassment that is either severe or occurs frequently over a period of time can result in the same level of negative professional, academic, and psychological outcomes as isolated incidents of sexual coercion.[634] These commenters concluded that the only way to truly combat sexual harassment is to enact policies that address and prevent the most common form of sexual harassment (*i.e.,* gender harassment).

Several commenters expressed concern that the proposed rules do not expressly address how technology has changed in the decades since Title IX was enacted (*e.g.,* email, the internet) and asserted that the final regulations must squarely address cyber-harassment on the basis of sex, which commenters stated is a severe and growing trend for students.[635] In addition to asking that online or cyber-harassment be explicitly referenced, several of these commenters also asserted that the appropriate standard for judging whether cyber-harassment must be responded to is whether such harassment meets the description of harassment set forth in the Department's 2001 Guidance.

Several commenters asserted that school boards in elementary and secondary schools will encounter confusion among the proposed Title IX sexual harassment regulatory definition, State laws governing bullying, abuse, or crimes that mandate reports to law enforcement or child welfare agencies, and school discipline violations, each of which has its own procedures that must be followed. Similarly, several commenters asserted that postsecondary institutions will encounter confusion due to differences between the § 106.30 definition of sexual harassment and various State laws that define sexual harassment or sexual misconduct more broadly; these commenters referenced laws in states such as California, New York, New Jersey, Illinois, and others.

At least one commenter asserted that the requirement that any of the conduct defined as sexual harassment under § 106.30 must be ''on the basis of sex'' lacks guidance as to how that element must be applied; one commenter wondered if this element means that a complainant must try to prove the respondent's state of mind when most respondents would simply deny acting on the basis of the victim's sex and insist that the action was based on romance, anger, emotion, etc., or whether a complainant would need to provide statistics to show a disparate impact on people of the victim's sex in order to show that the respondent's conduct was ''on the basis of sex.''

At least one commenter urged the Department to seek input from stakeholders, including education leaders, on what types of technical assistance would be most helpful to school districts seeking to implement the regulatory definition.

Discussion: The Department acknowledges that not every instance of subjectively unwelcome conduct is captured under the three-pronged definition of sexual harassment in § 106.30. However, the Department believes that the conduct captured as actionable under Title IX constitutes precisely the sex-based conduct that the Supreme Court has indicated amounts to sex discrimination under Title IX, as well as physical conduct that might not meet the *Davis* definition (*e.g.,* a single instance of rape, or a single instance of *quid pro quo* harassment). The Department disagrees that it is exempting categories of Title IX violations from coverage under Title IX; to the contrary, the § 106.30 definition ensures that sex discrimination in the form of sexual harassment clearly falls under recipients' Title IX obligations to operate education programs and activities free from sex discrimination.

The Department appreciates commenters' concerns regarding grooming behaviors, which can facilitate sexual abuse. While the sexual harassment definition does not identify ''grooming behaviors'' as a distinct category of misconduct, some of the conduct identified by commenters and experts as constituting grooming behaviors may constitute § 106.30 sexual harassment, and behaviors that do not constitute sexual harassment may still be recognized as suspect or inappropriate and addressed by recipients outside Title IX obligations.

Similarly, the Department understands commenters' and experts' assertions that unwelcome conduct that is not ''severe'' can still adversely impact students and employees. The 2018 comprehensive report on ''Sexual Harassment of Women'' by the National Academies of Sciences, Engineering, and Medicine (NASEM) [636] helpfully synthesizes decades of sexual harassment research and analysis to classify sex-based harassment as either sexual assault, or any of three types of sex-based harassment (sexual coercion, unwanted sexual attention, or gender harassment). The Department agrees with commenters' assertions that sexual

harassment at work, 35 Law & Hum. Behavior 1 (2011); National Academies of Science, Engineering, and Medicine, *Sexual Harassment of Women: Climate, Culture, and Consequences in Academic Sciences, Engineering, and Medicine* (Frasier F. Benya *et al.* eds., 2018).

[634] Commenters cited: National Academies of Science, Engineering, and Medicine, *Sexual Harassment of Women: Climate, Culture, and Consequences in Academic Sciences, Engineering, and Medicine* 69 (Frasier F. Benya *et al.* eds., 2018). Commenters further noted that sexual minorities experience gender harassment at more than double the rates of heterosexuals. *Id.* at 46.

[635] Commenters cited: American Association of University Women, *Crossing the Line: Sexual Harassment at School* (2011), for the proposition that: In the 2010–2011 school year, 36 percent of girls, 24 percent of boys, and 30 percent of all students who took the survey in grades seven through 12 experienced sexual harassment online; 18 percent of these students did not want to go to school, 13 percent found it hard to study, 17 percent had trouble sleeping, and eight percent wanted to stay home from school. Commenters also asserted that college students, too, face online sexual harassment, and in support of this assertion, some commenters cited to: David Goldman, *Campus Uproar Over Yik Yak App After Sex, Harassment, Murder, CNN.com* (May 7, 2015), *https://money.cnn.com/2015/05/07/technology/yik-yak-university-of-mary-washington/index.html.*

[636] Commenters cited: National Academies of Science, Engineering, and Medicine, *Sexual Harassment of Women: Climate, Culture, and Consequences in Academic Sciences, Engineering, and Medicine* (Frasier F. Benya *et al.* eds., 2018).

assault and sexual coercion[637] are covered under the regulatory definition, and agrees that unwanted sexual attention is covered if such conduct meets the second prong (the *Davis* standard), but the Department disagrees with commenters' assertion that what NASEM and others label as ''gender harassment'' is not covered under § 106.30. What the Department understands NASEM and commenters to mean by gender harassment is verbal and nonverbal behaviors, devoid of sexual content, that convey insulting, hostile, degrading attitudes about a particular sex. The language of the second prong of the § 106.30 definition describes conduct on the basis of sex that is unwelcome, determined by a reasonable person to be so severe, pervasive, and objectively offensive that it effectively denies a person equal access to education. That description encompasses what commenters label as ''gender harassment'' (as well as what commenters label ''unwanted sexual attention'') where the verbal or other conduct meets the *Davis* elements. Thus, the § 106.30 definition appropriately covers what NASEM and commenters describe as the most common type of sex-based harassment in academia and the workplace, as well as other types of sexual harassment identified by such commenters and experts. The Department appreciates the efforts made by NASEM and others to analyze the prevalence of sexual harassment within academia and to recommend approaches to reduce that prevalence, and believes that these final regulations appropriately regulate sexual harassment as a form of Title IX sex discrimination, while respecting the Department's legal obligations to enforce the civil rights statute as passed by Congress, and apply statutory interpretations consistent with First Amendment and other constitutional protections. The Department understands that research demonstrates that the negative impact of persistent (though not severe) harassment may be similar to the impact of a single instance of severe harassment. However, guided by the Supreme Court's *Davis* opinion, the Department believes that unwelcome conduct (that does not constitute *quid pro quo* harassment or a Clery Act/VAWA offense included in § 106.30) rises to a civil rights violation where the seriousness (determined by a reasonable person to be so severe, pervasive, objectively offensive, that it negatively impacts equal access) jeopardizes educational opportunities. While non-severe instances of unwelcome harassment may negatively impact a person, and recipients retain authority to address such instances, Title IX is focused on sex discrimination that jeopardizes educational access.

The Department understands that technology has evolved in the decades since Title IX was enacted, and that the means for perpetrating sexual harassment in modern society may include use of electronic, digital, and similar methods. The § 106.30 sexual harassment definition does not make sexual harassment dependent on the method by which the harassment is carried out; use of email, the internet, or other technologies may constitute sexual harassment as much as use of in-person, postal mail, handwritten, or other communications. For reasons described throughout this section of the preamble, and in the ''Adoption and Adaption of the Supreme Court's Framework to Address Sexual Harassment'' section of this preamble, the Department believes that the § 106.30 definition is superior to the definition of sexual harassment in the 2001 Guidance.

The Department acknowledges that a myriad of State and Federal laws overlap in addressing misconduct, some of which may be criminal, violative of State civil rights laws, or safety-related (such as anti-bullying legislation), and that elementary and secondary schools, as well as postsecondary institutions, face challenges in meeting obligations under various laws, as well as recipients' own policies. The Department notes that a recipient's agreement to accept Federal financial assistance obligates the recipient to comply with Title IX with respect to education programs or activities, and that compliance with Title IX does not obviate the need for a recipient also to comply with other laws. The Department does not view a difference between how ''sexual harassment'' is defined under these final regulations and a different or broader definition of sexual harassment under various State laws as creating undue confusion for recipients or a conflict as to how recipients must comply with Title IX and other laws. While Federal Title IX regulations require a recipient to respond to sexual harassment as defined in § 106.30, a recipient may also need to respond to misconduct that does not meet that definition, pursuant to a State law. The Department more thoroughly discusses the interaction between these final regulations and State laws in the ''Section 106.6(h) Preemptive Effect'' subsection of the ''Clarifying Amendments to Existing Regulations'' section.

The Department appreciates commenters' concerns about how to apply the prerequisite element that sexual harassment is conduct ''on the basis of sex.'' The Department notes that the Title IX statute prohibits exclusion, denial of benefits, and subjection to discrimination ''on the basis of sex,'' and the Department cannot remove that qualifier in describing conduct prohibited under Title IX because Congress intended for Title IX to provide individuals with effective protections against discriminatory practices[638] ''on the basis of sex.''[639] Discriminatory practices on other bases or protected characteristics are not part of Title IX's non-discrimination mandate. To clarify that all the conduct defined as sexual harassment must be ''on the basis of sex,'' the final regulations revise § 106.30 by removing that phrase from the second prong, and inserting it into the introductory sentence that now begins ''Sexual harassment means conduct on the basis of sex that satisfies one or more of the following'' and then goes on to list the three prongs of the definition.

The Department appreciates the opportunity to clarify that whether conduct is ''on the basis of sex'' does not require probing the subjective motive of the respondent (*e.g.,* whether a respondent subjectively targeted a complainant because of the complainant's or the respondent's actual or perceived sex, as opposed to because of anger or romantic feelings). Where conduct is sexual in nature, or where conduct references one sex or another, that suffices to constitute conduct ''on the basis of sex.'' In *Gebser* and again in *Davis,* the Supreme Court accepted sexual harassment as a form of sex discrimination without inquiring into the subjective motive of the perpetrator (a teacher in *Gebser* and a student in *Davis*).[640] The Department follows the

[637] Commenters referred to ''sexual coercion'' as *quid pro quo* harassment.

[638] *See Cannon* v. *Univ. of Chicago,* 441 U.S. 677, 704 (1979).

[639] 20 U.S.C. 1681(a).

[640] *See, e.g., Davis,* 526 U.S. at 643 (assuming without analysis that sexual harassment constitutes sex discrimination, in stating that *Gebser* recognized that ''whether viewed as discrimination or subjecting students to discrimination, Title IX unquestionably . . . placed on [the Board] the duty not to permit teacher-student harassment in its schools'') (internal quotation marks and citation omitted); *id.* at 650 (''having previously determined that 'sexual harassment' is 'discrimination' in the school context under Title IX, we are constrained to conclude that student-on-student sexual harassment, if sufficiently severe, can likewise rise to the level of discrimination actionable under the statute.''); *id.* at 650–51 (equating physical threats directed at female students, not of a sexual nature, with sexual harassment and thereby sex

Supreme Court's approach in interpreting conduct ''on the basis of sex'' to include conduct of a sexual nature, or conduct referencing or aimed at a particular sex.[641]

The Department appreciates a commenter's recommendation to seek input from stakeholders on what types of technical assistance would be most helpful to school districts in implementing the final regulations, and the Department will act on that recommendation by seeking such input from school districts and other recipients with respect to robust technical assistance to help recipients implement the § 106.30 definition and other provisions of the final regulations.

Changes: We have revised § 106.30 defining ''sexual harassment'' by moving the phrase ''on the basis of sex'' from the second prong to the introductory sentence applying to all three prongs of the definition of sexual harassment, such that any of the conduct defined as ''sexual harassment'' must be ''on the basis of sex.''

Prong (1) Quid Pro Quo

Comments: At least two commenters questioned whether the *quid pro quo* prong of the § 106.30 definition would apply only if the employee's conditioning of an educational benefit was express (as opposed to implied, or reasonably perceived by the victim as a threat to withhold a benefit), and if this prong required a subjective intent on the part of the recipient's employee to deny the aid or benefit even if such intent was not communicated when the harassment occurred. One such commenter asserted that it is important for potential harassers and potential victims to understand what conduct is prohibited and thus the final regulations need to specify whether the *quid pro quo* nature of the harassment must be expressly communicated, or may be implied by the circumstances; this commenter stated that even courts do not require that a harasser explicitly articulate all the terms and conditions of the ''bargain of exchange'' being proposed in a *quid pro quo* harassment situation.

At least one commenter asserted that the final regulations need to clarify that ''consenting'' to unwelcome sexual conduct, or avoiding potential adverse consequences without providing the requested sexual favors, does not mean that *quid pro quo* harassment did not occur.

One commenter believed that *quid pro quo* harassment needs to also be severe, pervasive, and objectively offensive.

A few commenters asserted that the *quid pro quo* prong of the sexual harassment definition should be expanded to include more persons than just ''employees'' of the recipient, because students may also hold positions of authority over other students (for example, team captains, club presidents, graduate assistants, resident advisors) and non-employees often have regular, recipient-approved contact with students and function as agents of the recipient (for example, people supervising internships or clinical experiences, employees of vendors or contracted service providers, volunteers who regularly participate in programs or activities, or board of trustees members who serve as unpaid volunteers). One such commenter argued that the *quid pro quo* prong is too narrow because all people (not just employees) providing any services as part of a recipient's business should not condition services on sexual favors but also should not perpetrate any unwelcome sexual conduct or create a hostile environment.

One commenter urged the Department to clarify that in the elementary and secondary school context, even a consensual, welcome sexual relationship between a student and teacher counts as sexual harassment because such a relationship is an abuse of the teacher's power over the student; the commenter asserted that the teacher-student relationship in *Gebser* may have been consensual but was still sexual harassment.

Discussion: The Department appreciates the opportunity to clarify that the first prong of the § 106.30 definition, describing *quid pro quo* harassment, applies whether the ''bargain'' proposed by the recipient's employee is communicated expressly or impliedly. Making educational benefits or opportunities contingent on a person's participation in unwelcome conduct on the basis of sex strikes at the heart of Title IX's mandate that education programs and activities remain free from sex discrimination; thus, the Department interprets the *quid pro quo* harassment description broadly to encompass situations where the *quid pro quo* nature of the incident is implied from the circumstances.[642] For the same reason, the Department declines to require that *quid pro quo* harassment be severe and pervasive; abuse of authority in the form of even a single instance of *quid pro quo* harassment (where the conduct is not ''pervasive'') is inherently offensive and serious enough to jeopardize equal educational access,[643] and although

discrimination by stating: ''The most obvious example of student-on-student sexual harassment . . . would thus involve the overt, physical deprivation of access to school resources. Consider, for example, a case in which male students physically threaten their female peers every day, successfully preventing the female students from using a particular school resource—an athletic field or a computer lab, for instance.'').

[641] This approach finds analytic support in works such as Kathleen M. Franke, *What's Wrong with Sexual Harassment?,* 49 Stan. L. Rev. 691, 771–72 (1997), noting that ''to date, the Supreme Court has been disinclined to do more than summarily conclude that sexual harassment is a form of sex discrimination'' under Title VII and supporting an approach to ''because of sex'' that focuses on the conduct, not the perpetrator's motive, but arguing that a theoretical justification for why sexual harassment constitutes sex discrimination that justifies such ''evidentiary short cuts'' should rely on recognition that sexual harassment is a ''tool or instrument of gender regulation,'' undertaken ''in the service of hetero-patriarchal norms'' that are ''punitive in nature [and] produce gendered subjects: Feminine women as sex objects and masculine men as sex subjects'' making sexual harassment a form of sex discrimination ''precisely because its use and effect police hetero-patriarchal gender norms[.]'' With a theoretical understanding of why sexual harassment might constitute sex discrimination as a backdrop, sex discrimination can be inferred in individual cases from the existence of sexual harassment, justifiably obviating a need to require ''proof'' that a particular plaintiff experienced sexual harassment on the basis of, or because of, the plaintiff's and/or defendant's sex, instead keeping the focus of each case on the misconduct itself. *Id.*

[642] As the *Davis* Court recognized, the relationship between a teacher and student makes it even more likely than with peer harassment that sexual harassment threatens the equal educational access guaranteed by Title IX. *See Davis,* 526 U.S. at 653 (''The fact that it was a teacher who engaged in harassment in *Franklin* and *Gebser* is relevant. The relationship between the harasser and the victim necessarily affects the extent to which the misconduct can be said to breach Title IX's guarantee of equal access to educational benefits and to have a systemic effect on a program or activity. Peer harassment, in particular, is less likely to satisfy these requirements than is teacher-student harassment.'').

[643] Similarly, where *quid pro quo* harassment may not be ''severe'' (for example, where the unwelcome sexual conduct consists of rubbing student's back or other conduct that may not meet the ''severity'' element and would not constitute sexual assault but does consist of unwelcome conduct of a sexual nature), *quid pro quo* harassment is inherently serious enough to jeopardize equal educational access. Thus, *quid pro quo* harassment constitutes sexual harassment under § 106.30, without being evaluated for severity, pervasiveness, and objective offensiveness. Determining whether unwelcome sexual conduct is proposed, suggested, or directed at a complainant, by a recipient's employee, as part of the employee ''conditioning'' an educational benefit on participation in the unwelcome conduct, does not require the employee to expressly tell the complainant that such a bargain is being proposed, and the age and position of the complainant is relevant to this determination. For example, elementary and secondary school students are generally expected to submit to the instructions and directions of teachers, such that if a teacher makes a student feel uncomfortable through sex-based or other sexual conduct (*e.g.,* back rubs or touching students' shoulders or thighs), it is likely that elementary and secondary school students will interpret that conduct as implying that the student

Continued

such harassment may involve verbal conduct there is no risk of chilling protected speech or academic freedom by broadly prohibiting *quid pro quo* harassment because such verbal conduct by definition is aimed at compelling a person to submit to unwelcome conduct as a condition of maintaining educational benefits.[644] The Department notes that when a complainant acquiesces to unwelcome conduct in a *quid pro quo* context to avoid potential negative consequences, such ''consent'' does not necessarily mean that the sexual conduct was not ''unwelcome'' or that prohibited *quid pro quo* harassment did not occur.[645]

The Department believes that the *quid pro quo* harassment description is appropriately and sufficiently broad because it applies to all of a recipient's employees, so that it includes situations where, for instance, a teacher, faculty member, or coach holds authority and control over a student's success or failure in a class or extracurricular activity, and the Department declines to expand the description to include non-employee students, volunteers, or others not deemed to be a recipient's employee. The Department understands commenters' concerns that non-employees are sometimes in positions sanctioned by the recipient to exercise control over students (or employees) or to distribute benefits on behalf of the recipient. However, the Department is persuaded by the Supreme Court's rationale in *Gebser* that Title IX and Title VII differ with respect to statutory reliance on agency principles.[646] The Department believes that the § 106.30 *quid pro quo* harassment prong reasonably holds recipients responsible for the conduct of the recipient's employees without expanding that liability to all agents of a recipient. However, the unwelcome conduct of a non-employee individual may constitute sexual harassment under the second or third prongs of the § 106.30 definition.

In response to a commenter's request that the final regulations state that sexual conduct between a teacher and student counts as sexual harassment even where the conduct is consensual and welcome from the student's viewpoint, the third prong of the § 106.30 definition refers to ''sexual assault'' as described in the Clery Act, which in turn references sex offenses under the FBI's Uniform Crime Reporting system, including statutory rape (that is, sex with a person who is under the statutory age of consent).[647] With respect to students who are underage in their jurisdiction, a sexual relationship like that in *Gebser* between a teacher and student[648] would therefore count as sexual harassment under § 106.30, regardless of whether the victim nominally consented or welcomed the sexual activity. Furthermore, the Department interprets ''unwelcome'' as used in the first and second prongs of the § 106.30 definition of sexual harassment as a subjective element; thus, even if a complainant in a *quid pro quo* situation pretended to welcome the conduct (for instance, due to fear of negative consequences for objecting to the employee's suggestions or advances in the moment), the complainant's subjective statement that the complainant found the conduct to be unwelcome suffices to meet the ''unwelcome'' element.

Changes: None.

Prong (2) Davis Standard

Davis Standard Generally

Comments: Several commenters supported the second prong of the § 106.30 definition of sexual harassment, which is derived from the Supreme Court's *Davis* opinion. One commenter stated that previous Department guidance changed the ''and'' to ''or'' in the ''severe, pervasive, and objectively offensive'' formulation and asserted that this resulted in over-enforcement and sparked criticism from experts and law professors, including the Association of Title IX Administrators (ATIXA).[649] This commenter argued that while victim advocates have argued that the *Davis* standard should apply only to private lawsuits against schools, it seems illogical to subject schools to two separate standards of responsibility concerning the same conduct, and the *Davis* standard does not let schools ''off the hook.''

On the contrary, many commenters opposed the second prong of the § 106.30 definition because it uses a standard designed to award money damages in private litigation, not administrative enforcement designed to promote equal educational opportunity. Some commenters argued that *Gebser* does not actually define sexual harassment and that *Davis* cited to the Supreme Court's *Meritor* opinion indicating intent to utilize the same definition for sexual harassment under Title IX as the Court has used under Title VII. One commenter argued that the *Davis* Court inaccurately paraphrased the *Meritor* decision when stating ''and'' instead of ''or'' (in

must submit to the conduct in order to maintain educational benefits (*e.g.,* not getting in trouble, or continuing to please the teacher and earn good grades). This approach to sexual harassment by a recipient's employees is in line with the *Gebser*/*Davis* framework, where the Supreme Court noted that any sexual harassment by a teacher or school employee likely deprives a student of equal educational opportunities. *See Davis,* 526 U.S. at 653. In situations where an employee did not intend to commit *quid pro quo* harassment (for instance, where the teacher did not realize that what the teacher believed were friendly back rubs had sexual overtones and made students feel uncomfortable), the recipient may take the specific factual circumstances into account in deciding what remedies are appropriate for the complainants and what disciplinary sanctions are appropriate for the respondent.

[644] *Quid pro quo* harassment should be interpreted broadly in part because although a teacher, coach, or other employee perpetrating a *quid pro quo* conditioning of benefits may use speech in proposing or inflicting such a Hobson's choice on a student, that speech is incidental to the conduct (sex discriminatory abuse of authority) and a broad rule prohibiting such conduct raises no constitutional concerns. *See, e.g., Saxe* v. *State Coll. Area Sch. Dist.,* 240 F.3d 200, 207 (3d Cir. 2001) (''government may constitutionally prohibit speech whose *non-expressive* qualities promote discrimination. For example, a supervisor's statement 'sleep with me or you're fired' may be proscribed not on the ground of any expressive idea that the statement communicates, but rather because it facilitates the threat of discriminatory conduct. Despite the purely verbal quality of such a threat, it surely is no more 'speech' for First Amendment purposes than the robber's demand 'your money or your life.' '') (emphasis in original).

[645] The approach in these final regulations to *quid pro quo* harassment is consistent with the 2001 Guidance at 5 (stating that *quid pro quo* harassment does not depend on whether ''the student resists and suffers the threatened harm or submits and avoids the threatened harm'' and that a prohibited *quid pro quo* bargain may occur ''explicitly or implicitly'').

[646] *Gebser,* 524 U.S. at 283 (''Moreover, *Meritor*'s rationale for concluding that agency principles guide the liability inquiry under Title VII rests on an aspect of that statute not found in Title IX: Title VII, in which the prohibition against employment discrimination runs against 'an employer,' *42 U.S.C. 2000e–2(a),* explicitly defines 'employer' to include 'any agent,' *§ 2000e(b).* . . . Title IX contains no comparable reference to an educational institution's 'agents,' and so does not expressly call for application of agency principles.'').

[647] 20 U.S.C. 1092(f)(6)(A)(v).

[648] *Gebser,* 524 U.S. at 278 (describing the relationship between the teacher and student in that case as involving sexual intercourse).

Gerson & Jeannie Suk Gersen, *The Sex Bureaucracy,* 104 Cal. L. Rev. 881 (2016); National Center for Higher Education Risk Management (NCHERM), *The 2017 NCHERM Group Whitepaper: Due Process and the Sex Police* 2, 15 (2017) (''Some pockets in higher education have twisted the 2011 Office for Civil Rights (OCR) Dear Colleague Letter (DCL) and Title IX into a license to subvert due process and to become the sex police. . . . [T]his Whitepaper [and another ATIXA publication] push back strongly against both of those trends in terms of best practices.'').

''severe, pervasive, and objectively offensive''), and asserted there is nothing in the *Davis* opinion that indicates that the Court intended to apply a higher standard for hostile environment harassment under Title IX than under Title VII.

At least one commenter asserted that if students cannot receive different recourse from the Department than they can in Federal courts, then students will find civil litigation to be a better avenue which will lead to costly redirection of school resources toward defending Title IX litigation, a result exacerbated by the fact that the final regulations expressly prohibit awards of money damages in Department enforcement actions while money damages are available in private lawsuits.

At least one commenter argued that with regard to student-on-student harassment, the Supreme Court in *Davis* did not modify *Gebser* by *defining* ''sexual harassment'' in some limited way; rather, *Davis* addressed the amount and type of sexual harassment (as that phrase is commonly understood) which, if engaged in by a student harasser, would constitute ''discrimination'' and thus violate Title IX. At least one commenter argued that the NPRM failed to recognize the difference between the anti-discrimination clause and the anti-exclusion clause of the Title IX statute [650] by incorrectly assigning the purpose of the anti-discrimination clause to the anti-exclusion clause. One such commenter argued that the purpose of the anti-discrimination clause is to forbid gender-based adverse action under a covered program or activity, regardless of whether that action has any impact on the victim's access to that program or activity while the purpose of the anti-exclusion clause is to protect access to a program or activity, regardless of whether the misconduct potentially affecting access occurs under, or outside, that program or activity.

One commenter argued that the NPRM's definition of hostile environment sexual harassment does not allow for the central method of analysis that both courts and existing Department guidance have instructed schools to use in evaluating sexual harassment complaints: Balancing relevant factors in recognition of the totality of the circumstances. The commenter asserted that this holistic approach is crucial for recipients to fulfill their Title IX responsibilities to prevent the discriminatory conduct's occurrence and end it when it does occur. At least one commenter similarly argued that the ''severe and pervasive'' prong of the definition creates ambiguity from lack of guidance on how to apply the standard and without such guidance schools will screen out situations that should be addressed.

A few commenters noted that the second prong of the § 106.30 definition appropriately requires actionable harassment to be severe, pervasive, and objectively offensive yet leaves recipients flexibility to address misconduct that does not meet that standard through codes of conduct outside the Title IX context.

Discussion: The Department appreciates commenters' support for the *Davis* definition of actionable sexual harassment embodied in the second prong of the § 106.30 definition. The Department agrees that adopting the *Davis* standard for harassment that does not constitute *quid pro quo* harassment or a Clery Act/VAWA offense, included in § 106.30, appropriately holds recipients responsible for addressing serious, unwelcome sex-based conduct that deprives a person of equal access to education, while avoiding constitutional concerns raised by subjecting speech and expression to the chilling effect of prior restraints. The Department agrees that aligning the Title IX sexual harassment definition in administrative enforcement and private litigation contexts provides clear, consistent expectations for recipients without letting recipients ''off the hook.'' The Department chooses to adopt in these final regulations the *Davis* standard defining actionable sexual harassment, as one of three parts of a sexual harassment definition. This approach provides consistency with the Title IX rubric for judicial and administrative enforcement and gives a recipient flexibility and discretion to address sexual harassment while ensuring that complainants can rely on their school, college, or university to meaningfully respond to a sexual harassment incident.

The Department understands the argument of many commenters that adoption of the *Gebser/Davis* framework is not legally required and therefore the Department should adopt a broader approach to administrative enforcement than that applied by the Supreme Court in private Title IX lawsuits. The Supreme Court did not restrict its *Gebser/Davis* approach to private lawsuits for money damages, and the Department believes that the Supreme Court's framework provides the appropriate starting point for administrative enforcement of Title IX, with adaptions of that framework to hold recipients responsible for more than what the *Gebser/Davis* framework alone would require.[651]

The Department disagrees with a commenter who asserted that the *Davis* Court mistakenly or inaccurately ''paraphrased'' the *Meritor* description of actionable workplace harassment; rather, the Department believes that the *Davis* Court intentionally and accurately acknowledged the ''severe or pervasive'' formulation in *Meritor* yet determined that the ''severe and pervasive'' standard was more appropriate in the educational context. The Department notes that the *Davis* Court repeated the ''severe and pervasive'' formulation five times [652] showing that the Court noted differences between an educational and workplace environment that warranted a different standard under Title IX than under Title VII.[653]

The Department disagrees with the commenter who asserted that the Department's adoption of *Davis* standards will lead to increased litigation against recipients because students will see no difference between recourse from the Department and recourse available in private litigation. While one of the three prongs of the § 106.30 sexual harassment definition is adopted from *Davis,* the other two prongs differ from the *Davis* standard; moreover, the other parts of the *Gebser/Davis* framework adopted by the Department in the final regulations adapt that framework in a way that broadens the scope of a complainant's rights vis-à-vis a recipient (for example, the actual knowledge condition in the final regulations is defined broadly to include notice to any Title IX Coordinator and any elementary or secondary school employee, in addition to officials with authority to take corrective action; the deliberate indifference standard expressly requires a recipient to offer supportive measures to a complainant and for a Title IX Coordinator to discuss supportive measures with a complainant, with or without the filing of a formal complaint and to explain to a complainant the process for filing a formal complaint).

[650] Title IX, codified at 20 U.S.C. 1681(a): ''No person in the United States shall, on the basis of sex, be excluded from participation in, denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance[.]''

[651] For further discussion, see the ''Adoption and Adaption of the Supreme Court's Framework to Address Sexual Harassment'' section of this preamble.

[652] *Davis,* 526 U.S. at 633, 650, 651, 652, 654.

[653] *Id.* at 651 (''Courts, moreover, must bear in mind that schools are unlike the adult workplace and that children may regularly interact in a manner that would be unacceptable among adults. . . . Indeed, at least early on, students are still learning how to interact appropriately with their peers.'').

Therefore, while rooted in the Supreme Court's framework, the final regulations appropriately impose requirements on recipients that benefit complainants, which Federal courts applying the *Davis* framework do not impose.[654] We have also revised § 106.3(a) to remove reference to whether the Department will or will not seek money damages as part of remedial action required of a recipient for Title IX violations; for further discussion, see the ''Section 106.3(a) Remedial Action'' subsection of the ''Clarifying Amendments to Existing Regulations'' section of this preamble.

The Department agrees with a commenter's characterization of *Davis* as not so much redefining sexual harassment as describing the amount and type of sexual harassment that constitutes sex discrimination under Title IX. Likewise, while the Department refers to a ''definition'' of sexual harassment in § 106.30, the Department notes that the provision describes what amount and type of sexual harassment is actionable under Title IX; that is, what conditions activate a recipient's legal obligation to respond.

The Department disagrees with commenters who argued that the *Davis* standard in the second prong of § 106.30 fails to recognize the difference between the anti-discrimination clause and the anti-exclusion clause of Title IX. In *Davis,* the Supreme Court acknowledged that Title IX contains three separate clauses (anti-exclusion, denial of benefits, anti-discrimination), yet with respect to actionable sexual harassment under Title IX the *Davis* Court repeatedly used the formulation of sexual harassment that is ''severe, pervasive, and objectively offensive,'' at one point seeming to equate it with the denial of benefits clause and at others seeming to equate it with the ''subjected to discrimination'' clause.[655] Regardless of which of the three Title IX statutory clauses the *Davis* Court attached to its sexual harassment standard, the Court emphasized several times that the harassment must ''deprive the victims of access to the educational opportunities or benefits provided by the school'' [656] or must have ''effectively denied equal access to an institution's resources and opportunities'' [657] or ''that it denies its victims the equal access to education that Title IX is designed to protect.'' [658] The Supreme Court's understanding of sexual harassment as prohibited conduct under Title IX requires sexual harassment to meet a seriousness standard involving denial of equal access to education, regardless of whether the sexual harassment is viewed as causing denial of benefits, exclusion from participation, or subjection to discrimination.

The Department disagrees that the § 106.30 definition of sexual harassment precludes or disallows a totality of the circumstances analysis to evaluate whether alleged conduct does or does not meet the definition. The *Davis* Court noted that evaluation of whether conduct rises to actionable sexual harassment depends on a constellation of factors including the ages and numbers of parties involved,[659] and nothing in the final regulations disallows or disapproves of that common sense approach to determinations of severity, pervasiveness, and objective offensiveness. To reinforce this, the final regulations include language in the second prong of the § 106.30 definition stating that the *Davis* elements are determined under a reasonable person standard. The Department does not believe that recipients will ''screen out'' situations that should be addressed due to lack of guidance on how to apply the ''severe and pervasive'' elements; the Department is confident that recipients' desire to provide students with a safe, non-discriminatory learning environment will lead recipients to evaluate sexual harassment incidents using common sense and taking circumstances into consideration, including the ages, disability status, positions of authority of involved parties, and other factors.

The Department appreciates commenters who stated, accurately, that the final regulations leave recipients flexibility to address misconduct that does not meet the § 106.30 definition of sexual harassment, through a recipient's own code of conduct that might impose behavioral expectations on students and faculty distinct from Title IX's non-discrimination mandate, and we have revised § 106.45(b)(3) to clarify that even when a recipient must dismiss a formal complaint because the alleged conduct does not meet the definition of sexual harassment in § 106.30, such dismissal is only for purposes of Title IX and does not preclude the recipient from responding to the allegations under the recipient's own code of conduct.

Changes: We have revised the § 106.30 definition of sexual harassment by specifying that the elements in the *Davis* standard (severe, pervasive, objectively offensive, and denial of equal access) are determined under a reasonable person standard. We have revised § 106.45(b)(3)(i) to clarify that dismissal of a formal complaint because the alleged conduct does not constitute sexual harassment as defined in § 106.30 is a dismissal for purposes of Title IX but does not preclude the recipient from responding to the allegations under the recipient's own code of conduct. We have also revised § 106.3(a) to remove reference to whether the Department will or will not seek money damages as part of remedial action required of a recipient for Title IX violations.

Comments: Many commenters argued that the definition for Title IX sexual harassment should be aligned with the definition for Title VII, under which employers are liable for harassment that is sufficiently severe *or* pervasive to alter the conditions of employment.[660] Some commenters argued that under the proposed rules, schools would be held to a lower standard under Title IX to protect students (some of whom are minors) than the standard of protection for employees under Title VII. Some such commenters asserted that everyone

---

[654] Consistent with constitutional due process and fundamental fairness, these final regulations also ensure that a recipient's supportive response to a complainant treats respondents equitably by refraining from punishing or disciplining a respondent without following a grievance process that complies with § 106.45. § 106.44(a); § 106.45(b)(1)(i); § 106.30 (defining ''supportive measures'' as non-punitive, non-disciplinary, not unreasonably burdensome to the other party); *see also* the ''Role of Due Process in the Grievance Process'' section of this preamble.

[655] 526 U.S. at 650 (''The statute's other prohibitions, moreover, help give content to the term 'discrimination' in this context. Students are not only protected from discrimination, but also specifically shielded from being 'excluded from participation in' or 'denied the benefits of' any 'education program or activity receiving Federal financial assistance.' 20 U.S.C. 1681(a). The statute makes clear that, whatever else it prohibits, students must not be denied access to educational benefits and opportunities on the basis of gender. We thus conclude that funding recipients are properly held liable in damages only where they are deliberately indifferent to sexual harassment, of which they have actual knowledge, that is so severe, pervasive, and objectively offensive that it can be said to deprive the victims of access to the educational opportunities or benefits provided by the school.''); *id.* at 644–45 (holding that a recipient is liable where its ''deliberate indifference 'subjects' its students to harassment—''That is, the deliberate indifference must, at a minimum, 'cause [students] to undergo' harassment or 'make them liable or vulnerable' to it.'') (internal citations omitted).

[656] *Id.* at 650.

[657] *Id.* at 651.

[658] *Id.* at 652.

[659] *Id.* at 651.

[660] Commenters cited: *Meritor Sav. Bank* v. *Vinson,* 477 U.S. 57, 67 (1986) (holding under Title VII ''For sexual harassment to be actionable, it must be sufficiently severe or pervasive to alter the conditions of [the victim's] employment and create an abusive working environment.'') (internal quotation marks and citation omitted; brackets in original) (emphasis added); U.S. Equal Emp. Opportunity Comm'n, *Enforcement Guidance on Vicarious Employer Liability for Unlawful Harassment by Supervisors* (Jun. 18, 1999).

on campus benefits from a culture in which sexual assault and harassment are deterred as they would be in a work environment and that Title IX, which applies to students, must not be weaker than Title VII.[661] Several commenters argued that the Title VII standard protects against visual and graphic displays, slurs, comments, and an array of other activities that are severe *or* pervasive on the basis of sex, while the NPRM would deny students the same protections by requiring conduct be both severe *and* pervasive.

Other commenters argued that college students must be able to succeed in college without being told that sexual assault and harassment is just something they must endure so they can finally get jobs at companies that do protect them from assault and harassment. Some commenters further argued that colleges and universities do a severe disservice to would-be harassers and assaulters by creating an environment where, unlike their future work environments, harassment and assault are tolerated. A few commenters asserted that because students can simultaneously be both students and employees it is necessary for the prohibited conduct to be the same under both Title VII and Title IX.

Many commenters asserted that the hostile environment standard expressed in the 2001 Guidance or the withdrawn 2011 Dear Colleague Letter should be adopted in the final regulations, such that sexual harassment is ''unwelcome conduct of a sexual nature'' and such harassment is actionable when the conduct is ''sufficiently serious that it interferes with or limits a student's ability to participate in or benefit from the school's programs.'' Some commenters asserted that the ''looser'' definition from Department guidance provides greater protection for victims compared to the subjectivity and gray areas created by ill-fitting terminology used in the § 106.30 definition. Many commenters argued that ''unwelcome conduct of a sexual nature'' is a simple definition of harassment that avoids the self-doubt and discouragement victims may feel if victims are required under the proposed rules to wonder if the harassment they experience fits the § 106.30 definition. Some commenters argued that the § 106.30 definition makes it too easy to dismiss cases as not severe enough when any case of unwelcome sexual conduct should be clearly prohibited out of common sense and fairness.

Some commenters asserted that the Department's guidance definition is more in line with the reality of the type of misconduct that occurs most often. Other commenters pointed to the ''Factors Used to Evaluate Hostile Environment Sexual Harassment'' section of the 2001 Guidance[662] outlining a variety of factors used to determine if a hostile environment has been created and argued that schools should continue to use these factors to evaluate conduct in order to draw common sense conclusions about what conduct is actionable.

Discussion: The Department acknowledges, as has the Supreme Court, that both Title VII and Title IX prohibit sex discrimination. Significant differences in these statutes, however, lead to different standards for actionable harassment in the workplace, and in schools, colleges, and universities. The Department disagrees with commenters who asserted that an identical standard for prohibited conduct in the workplace and in an educational environment is the appropriate outcome. In the elementary and secondary school context, students and recipients benefit from an approach to non-discrimination law that distinguishes between school and workplace settings.[663] In the higher education context, as some commenters noted, students and faculty must be able to discuss sexual issues even if that offends some people who hear the discussion.[664] Similarly, as a commenter stated, the Supreme Court rejected the idea that ''First Amendment protections should apply with less force on college campuses than in the community at large. Quite to the contrary, 'the vigilant protection of constitutional freedoms is nowhere more vital than in the community of American schools.' '' [665] Thus, even vulgar or indecent college speech is protected.[666] The *Davis* standard ensures that speech and expressive conduct is not peremptorily chilled or restricted, yet may be punishable when the speech becomes serious enough to lose protected status under the First Amendment.[667] The rationale for preventing a hostile workplace environment free from any severe or pervasive sexual harassment that alters conditions of employment does not raise the foregoing concerns (*i.e.,* allowing for the social and developmental growth of young students learning how to interact with peers in the elementary and secondary school context; fostering robust exchange of speech, ideas, and beliefs in a college setting). Thus, the Department does not believe that aligning the definitions of sexual harassment under Title VII and Title IX furthers the purpose of Title IX or benefits students and employees participating in education programs or activities.[668]

The *Davis* standard embodied in the second prong of the § 106.30 definition differs from the third prong prohibiting sexual assault (and in the final regulations, dating violence, domestic violence, and stalking) because the latter conduct is not required to be evaluated for severity, pervasiveness, offensiveness, or causing a denial of equal access; rather, the latter conduct is assumed to deny equal access to education and its prohibition raises no constitutional concerns. In this manner, the final regulations obligate recipients to respond to single instances of sexual assault and sex-related violence more broadly than employers' response obligations under Title VII, where even physical conduct must be severe or pervasive and alter the conditions of

[661] Commenters cited: *Ellison* v. *Brady,* 924 F.2d 872 (9th Cir. 1991) for the proposition that if an employer is aware of and allows the continuation of sexual harassment creating a hostile work environment, it is a violation of Title VII.

[662] Commenters cited: 2001 Guidance at 5–7 (listing factors including: The degree to which the conduct affected one or more students' education; the type, frequency, and duration of the conduct; the identity of the relationship between the alleged harasser and the subject or subjects of the harassment; the number of individuals involved; the age and sex of the alleged harasser and the subject or subjects of the harassment; the size of the school, location of the incidents, and context in which they occurred; other incidents at the school; and incidents of gender-based, but nonsexual harassment).

[663] *See Davis,* 526 U.S. at 650 (''Courts, moreover, must bear in mind that schools are unlike the adult workplace and that children may regularly interact in a manner that would be unacceptable among adults. . . . Indeed, at least early on, students are still learning how to interact appropriately with their peers.'').

[664] *See Snyder* v. *Phelps,* 562 U.S. 443 (2011).

[665] *Healy* v. *James,* 408 U.S. 169, 180 (1972) (internal citation omitted).

[666] *Papish* v. *Bd. of Curators,* 410 U.S. 667 (1973).

[667] The Department notes that requiring severity, pervasiveness, objective offensiveness, and resulting denial of equal access to education for a victim, matches the seriousness of conduct and consequences of other types of speech unprotected by the First Amendment, such as fighting words, threats, and defamation.

[668] *See* Azhar Majeed, *The Misapplication of Peer Harassment Law on College and University Campuses and the Loss of Student Speech Rights,* 35 Journal of Coll. & Univ. L. 385, 449 (2009) (arguing that restrictions on workplace speech ''ultimately do not take away from the workplace's essential functions—to achieve the desired results, make the client happy, and get the job done'' and free expression in the workplace ''is typically not necessary for that purpose'' such that workplaces are often ''highly regulated environments'' while ''[o]n the other hand, freedom of speech and unfettered discussion are so essential to a college or university that compromising them fundamentally alters the campus environment to the detriment of everyone in the community'' such that free speech and academic freedom are necessary preconditions to a university's success.).

employment, to be actionable.[669] The Department therefore disagrees that the final regulations provide students less protection against sexual assault than employees receive in a workplace, or that sexual assault is tolerated to a greater extent under these Title IX regulations than under Title VII.

For reasons discussed above and in the ''Adoption and Adaption of the Supreme Court Framework to Address Sexual Harassment'' section of this preamble, the Department believes that the *Davis* definition in § 106.30 provides a definition for non-*quid pro quo,* non-Clery Act/VAWA offense sexual harassment better aligned with the purpose of Title IX than the definition of hostile environment harassment in the 2001 Guidance or the withdrawn 2011 Dear Colleague Letter. The *Davis* Court carefully crafted its formulation of actionable sexual harassment under Title IX for private lawsuits under Title IX, and the Department is persuaded by the Supreme Court's reasoning that administrative enforcement of Title IX is similarly best served by requiring a recipient to respond to sexual harassment that is so severe, pervasive, and objectively offensive that it effectively denies a person equal access to education. The Department believes that rooting a definition of sexual harassment in the Supreme Court's interpretation of Title IX provides more clarity without unnecessarily chilling speech and expressive conduct; these advantages are lacking in the looser definitions used in Department guidance. The *Davis* definition in § 106.30 utilizes the phrase unwelcome conduct on the basis of sex, which is broader than the ''unwelcome conduct of a sexual nature'' phrase used in Department guidance.[670] The other elements in § 106.30 (severe, pervasive, and objectively offensive) provide a standard of evaluation more precise than the ''sufficiently serious'' description in Department guidance, yet serve a similar purpose—ensuring that conduct addressed as a Title IX civil rights issue represents serious conduct unprotected by the First Amendment or principles of free speech and academic freedom. As discussed further below, the ''effectively denies a person equal access'' element in § 106.30 has the advantage of being adopted from the Supreme Court's interpretation of Title IX, yet does not act as a more stringent element than the ''interferes with or limits a student's ability to participate in or benefit from the school's programs'' language found in Department guidance. The Department does not believe that recipients will err on the side of ignoring reports of conduct that might be considered severe and pervasive, and believes that a prohibition on *any* unwelcome sexual conduct would sweep up speech and expression protected by the First Amendment, and require schools to intervene in situations that do not present a threat to equal educational access. Because the § 106.30 definition provides precise standards for evaluating actionable harassment focused on whether sexual harassment has deprived a person of equal educational access, the Department believes it is unnecessary to list the factors from the 2001 Guidance that purport to evaluate whether a hostile environment has been created.

Changes: None.

Comments: Many commenters believed that the second prong of the § 106.30 definition means that rape and sexual assault incidents will be scrutinized for severity and set a ''pain scale'' for sexual assault such that only severe sexual assault will be recognized under Title IX, or that a definition that requires a school to intervene only if sexual violence is ''severe, pervasive, and objectively offensive'' means that someone would need to be repeatedly, violently raped before the school would act to support the survivor.

Many commenters criticized the second prong of the § 106.30 definition by asserting that, under that standard, only the most severe harassment situations will be investigated, which will reduce and chill reporting of sexual harassment when sexual harassment is already underreported. Many such commenters argued that victims will be afraid to report because the school will scrutinize whether the harassment suffered was ''bad enough'' and that instead the Department needs to err on the side of caution by including more, not less, conduct as reportable harassment. Many commenters similarly argued that many victims are already unsure of whether their experience qualifies as serious enough to report and therefore narrowing the definition will only discourage victims from reporting unwanted sexual conduct. Many commenters argued that a broad definition of sexual harassment is needed because research shows that students are unlikely to report when their experience does not match common beliefs about what rape is, and because even ''less severe'' forms of harassment may also lead to negative outcomes and increase a victim's risk of further victimization. Similarly, some commenters noted that research shows that victims already minimize their experiences[671] and knowing that school administrators will be judging their report for whether it is really serious, really pervasive, and really objectively offensive, will result in more victims feeling dissuaded from reporting due to uncertainty about whether their report will meet the definition or not.

Several commenters argued that the Federal government should stand by a zero-tolerance policy against sexual harassment, and that applying a narrow definition means that some forms of harassment are acceptable, contrary to Title IX's bar on sex discrimination. Several commenters argued that the § 106.30 definition will allow abusers to do everything just short of the narrowed standard while keeping their victims in a hostile environment, further silencing victims.

A few commenters stated that if a student believes conduct ''makes me feel uncomfortable,'' that should be sufficient to require the school to respond. At least one commenter suggested that the final regulations provide guidance on what misconduct is actionable by using behavioral measures such as the Sexual

[669] *E.g., Meritor,* 477 U.S. at 67 (''not all workplace conduct that may be described as harassment affects a term, condition, or privilege of employment within the meaning of Title VII'') (internal quotation marks and citation omitted); *Brooks* v. *City of San Mateo,* 229 F.3d 917, 927 (9th Cir. 2000) (where the plaintiff alleged a sexual assault in the form of fondling plaintiff's breast: ''The harassment here was an entirely isolated incident. It had no precursors, and it was never repeated. In no sense can it be said that the city imposed upon Brooks the onerous terms of employment for which Title VII offers a remedy.''). Under the final regulations, a single instance of sexual assault (which includes fondling) requires a recipient's prompt response, including offering the complainant supportive measures and informing the complainant of the option of filing a formal complaint. § 106.30 (defining ''sexual harassment'' to include ''sexual assault''); § 106.44(a).

[670] As noted by some commenters, sex-based harassment includes unwelcome conduct of a sexual nature but also includes unwelcome conduct devoid of sexual content that targets a particular sex. The final regulations use the phrase ''sexual harassment'' to encompass both unwelcome conduct of a sexual nature, and other forms of unwelcome conduct ''on the basis of sex.'' § 106.30 (defining ''sexual harassment'').

[671] Commenters cited: The Association of American Universities, *Report on the AAU Campus Climate Survey on Sexual Assault and Sexual Misconduct* iv (Westat 2015) (''More than 50 percent of the victims of even the most serious incidents (*e.g.,* forced penetration) say they do not report the event because they do not consider it 'serious enough.' '').

Experiences Survey[672] or the Sexual Experiences Questionnaire.[673]

At least one commenter argued that the language of offensiveness and severity clouds the necessary understanding of unequal power relations and negates a culture of consent. Several commenters asserted that a definition of sexual harassment that holds up only the dramatic and extreme as worthy of investigation would do little to change rape culture. Many commenters argued that while individual acts are rarely pervasive, individual acts across a society can result in pervasiveness throughout society so that what seem like one-off or minor incidents, or ''normal'' sexual gestures and conventions, actually do create a pervasive rape culture because they are rooted in patriarchy (for example, a culture that accepts statements like ''these women come to parties to get laid''), misunderstanding or ignorance of consent (for example, ''she didn't say no'' despite several cues of discomfort and unwillingness), and lack of support from authority figures (for example, reactions from school personnel like ''boys will be boys,'' or ''this is just college campus culture''). Some commenters argued that to achieve a drop in cases of sexual misconduct, even seemingly minor incidents that make women feel threatened need to be taken seriously.

Similarly, a few commenters argued that the threat of potential violence against women permeates American society and interferes with educational equity. At least one commenter argued that young women already are affected in many ways by the constant presence of potential violence, such that women feel that they cannot be alone with another student for study group purposes, with a teaching assistant to get extra help, or with a professor during office hours. This commenter further stated that young women already do not feel safe attending an academic function if it means walking to her car in the dark, or collaborating online for fear of enduring cyber harassment. A few commenters argued that a narrow definition of harassment ignores the scope of gender-based violence in our society and does nothing to address patterns of harassment as opposed to just an individual case that moves through a formal process.

A few commenters asserted by adding the ''and'' between ''severe, pervasive and objectively offensive'' survivors will be forced to quantify their suffering to fit into an imaginary scale determined according to a pass or fail rubric and artificially create categories of legitimate and illegitimate misconduct, when misconduct that is either severe or pervasive or objectively offensive should be more than enough to warrant stopping the misconduct. Many commenters opined that the § 106.30 definition sets an arbitrary and unnecessarily high threshold for when conduct would even constitute harassment. Many commenters viewed the § 106.30 definition as raising the burden of proof on victims to an unnecessary degree, making their reporting process more strenuous and exhausting, and requiring survivors to prove their abuse is worthy of attention. Other commenters noted that the burden is on recipients to show the severity of the reported conduct yet asserted that survivors will still feel pressured to present their complaint in a certain way in order to be perceived as credible enough. A few commenters asserted that this raises concerns especially for people with disabilities, who may react to and communicate about trauma differently. At least one commenter stated that to the extent that the § 106.30 definition is in response to the perception that students and Title IX Coordinators have been pursuing a lot of formal complaints over low-level harassment, such a perception is inaccurate.

Many commenters argued that what is severe, pervasive, and objectively offensive leaves too much room for interpretation and will be subject to the biases of Title IX Coordinators and other school administrators. Another commenter expressed concern that schools would have too much discretion to decide whether conduct was severe, pervasive, and offensive and this will lead to arbitrary decisions to turn away reporting parties. Several commenters asserted that permitting administrators to judge the severity, pervasiveness, and offensiveness of reported conduct will foster a culture of institutional betrayal because some institutions will choose to investigate misconduct while others will not. A few commenters asserted that courts have found some unwanted sexual behavior (for example, a supervisor forcibly kissing an employee) is not severe *and* pervasive even though such behavior may constitute criminal assault or battery under State laws and that a definition of sexual harassment must at least cover misconduct that would be considered criminal.

Several commenters argued that a narrow definition would contribute to the overall effect of the proposed rules to eliminate most sexual harassment from coverage under Title IX, to the point of absurdity. Several commenters asserted that research shows that narrow definitions of sexual assault indicate that reports will decrease while underlying violence does not decrease.[674] At least one commenter argued that the proposed rules seek to use a single definition of sexual harassment in all settings, from prekindergarten all the way up to graduate school, and this lack of a nuanced approach fails to take into account the vast developmental differences between children, young adults, and college and graduate students. One commenter stated that especially for community college students, whose connections to a physical campus and its resources can be limited, a narrower definition of sexual harassment with ''severe and pervasive'' rather than ''severe or pervasive'' could make it harder for reporting parties to prove their victimization.

One commenter asserted that conduct that may not be considered severe in an isolated instance can qualify as severe when that conduct is pervasive, because ''severe'' and ''pervasive'' should not always entail two separate inquiries. One commenter suggested that the second prong of § 106.30 be changed to mirror the Title IX statute, by using the phrase ''causes a person to be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity.''

Discussion: The Department appreciates the opportunity to clarify that sexual assault (which includes rape) is referenced in the third prong of the § 106.30 definition of ''sexual harassment,'' while the *Davis* standard (with the elements of severe, pervasive, and objectively offensive) is the second prong. This means that any report of sexual assault (including rape) is not subject to the *Davis* elements of whether the incident was ''severe, pervasive, and objectively offensive.'' Thus, contrary to commenters' concerns, the final regulations do not require rape or sexual assault incidents to be ''scrutinized for severity,'' rated on a pain scale, or leave students to be repeatedly or violently

raped before a recipient must intervene. The Department intentionally did not want to leave students (or employees) wondering if a single act of sexual assault might not meet the *Davis* standard, and therefore included sexual assault (and, in the final regulations, dating violence, domestic violence, and stalking) as a stand-alone type of sexual harassment that does not need to demonstrate severity, pervasiveness, objective offensiveness, or denial of equal access to education, because denial of equal access is assumed. Complainants can feel confident turning to their school, college, or university to report and receive supportive measures in the wake of a sexual assault, without wondering whether sexual assault is ''bad enough'' to report. The Department understands that research shows that rape victims often do not report due to misconceptions about what rape is (*e.g.,* a misconception that rape must involve violence inflicted by a stranger), and that rape victims may minimize their own experience and not report sexual assault, for a number of reasons.[675] The definition of sexual assault referenced in § 106.30 broadly defines sexual assault to include all forcible and nonforcible sex offenses described in the FBI's Uniform Crime Reporting system. Those offenses do not require an element of physical force or violence, but rather turn on lack of consent of the victim. The Department believes that these definitions form a sufficiently broad definition of sexual assault that reflects the range of sexually violative experiences that traumatize victims and deny equal access to education. The Department believes that by utilizing a broad definition of sexual assault, these final regulations will contribute to greater understanding on the part of victims and perpetrators as to the type of conduct that constitutes sexual assault. The FBI's Uniform Crime Reporting system similarly does not exclude from sexual assault perpetration by a person known to the victim (whether as an acquaintance, romantic date, or intimate partner relationship), and the final regulations' express inclusion of dating violence and domestic violence reinforces the reality that sex-based violence is often perpetrated by persons known to the victim rather than by strangers.

As to unwelcome conduct that is not *quid pro quo* harassment, and is not a Clery Act/VAWA offense included in § 106.30, the *Davis* standard embodied in the second prong of the § 106.30 definition applies. The Department understands commenters' concerns that this means that only ''the most severe'' harassment situations will be investigated and that complainants will feel deterred from reporting non-sexual assault harassment due to wondering if the harassment is ''bad enough'' to be covered under Title IX. The Department understands that research shows that even ''less severe'' forms of sexual harassment may cause negative outcomes for those who experience it. The Department believes, however, that severity and pervasiveness are needed elements to ensure that Title IX's non-discrimination mandate does not punish verbal conduct in a manner that chills and restricts speech and academic freedom, and that recipients are not held responsible for controlling every stray, offensive remark that passes between members of the recipient's community. The Department does not believe that evaluating verbal harassment situations for severity, pervasiveness, and objective offensiveness will chill reporting of unwelcome conduct, because recipients retain discretion to respond to reported situations not covered under Title IX. Thus, recipients may encourage students (and employees) to report any unwanted conduct and determine whether a recipient must respond under Title IX, or chooses to respond under a non-Title IX policy.

The Department believes that the Supreme Court's *Gebser* and *Davis* opinions provide the appropriate principles to guide the Department with respect to appropriate interpretation and enforcement of Title IX as a non-sex discrimination statute. Title IX is not an anti-sexual harassment statute; Title IX prohibits sex discrimination in education programs or activities. The Supreme Court has held that sexual harassment may constitute sex discrimination under Title IX, but only when the sexual harassment is so severe, pervasive, and objectively offensive that it effectively denies a person's equal access to education. Title IX does not represent a ''zero tolerance'' policy banning sexual harassment as such, but does exist to provide effective protections to individuals against discriminatory practices, within the parameters set forth under the Title IX statute (20 U.S.C. 1681 *et seq.*) and Supreme Court case law. While the Supreme Court interpreted the level of harassment differently under Title VII than under Title IX, neither Federal non-sex discrimination civil rights law represents a ''zero-tolerance'' policy banning all sexual harassment.[676] Rather, interpretations of both Title VII and Title IX focus on sexual harassment that constitutes sex discrimination interfering with equal participation in a workplace or educational environment, respectively. Contrary to the concerns of commenters, the fact that not every instance of sexual harassment violates Title VII or Title IX does not mean that sexual harassment not covered under one of those laws is ''acceptable'' or encourages perpetration of sexual harassment.[677] The Department does not believe that parameters around what constitutes actionable sexual harassment under a Federal civil rights statute creates an environment where abusers ''do everything just short of the narrowed standard'' to torment and silence victims. A course of unwelcome conduct directed at a victim to keep the victim fearful or silenced likely crosses over into ''severe, pervasive, and objectively offensive'' conduct actionable under Title IX. Whether or not misconduct is actionable under Title IX, it may be actionable under another part of a recipient's code of conduct (*e.g.,* anti-bullying). These final regulations only prescribe a recipient's mandatory response to conduct that

[675] The Association of American Universities, *Report on the AAU Campus Climate Survey on Sexual Assault and Sexual Misconduct* iv (Westat 2015) (''More than 50 percent of the victims of even the most serious incidents (*e.g.,* forced penetration) say they do not report the event because they do not consider it ''serious enough.'').

[676] *E.g., Chesier* v. *On Q Financial Inc.,* 382 F. Supp. 3d 918, 925–26 (D. Ariz. 2019) (reviewing Title VII cases involving single instances of sexual harassment determined not to be sufficiently severe enough to affect a term of employment under Title VII) (''not all workplace conduct that may be described as 'harassment' affects a term, condition, or privilege of employment within the meaning of Title VII. . . . For sexual harassment to be actionable, it must be *sufficiently severe or pervasive* to alter the conditions of [the victim's] employment and create an abusive working environment.'') (citing to *Meritor,* 477 U.S. at 67) (emphasis and brackets in original); Julie Davies, *Assessing Institutional Responsibility for Sexual Harassment in Education,* 77 Tulane L. Rev. 387, 398, 407 (2002) (''Although the Court adopted different standards for institutional liability under Titles VII and IX, several themes serve as leitmotifs, running through the cases regardless of the technical differences. Neither Title VII nor Title IX is construed as a federal civility statute; the Court does not want entities to be obliged to litigate cases where plaintiffs have been subjected to 'minor' annoyances and insults.'') (internal citation omitted).

[677] *See, e.g., Brooks* v. *City of San Mateo,* 229 F.3d 917, 927 (9th Cir. 2000) (''Our holding in no way condones [the supervisor's] actions. Quite the opposite: The conduct of which [the plaintiff] complains was highly reprehensible. But, while [the supervisor] clearly harassed [the plaintiff] as she tried to do her job, not all workplace conduct that may be described as harassment affects a term, condition, or privilege of employment within the meaning of Title VII. The harassment here was an entirely isolated incident. It had no precursors, and it was never repeated. In no sense can it be said that the city imposed upon [the plaintiff] the onerous terms of employment for which Title VII offers a remedy.'') (internal quotation marks and citation omitted).

does meet the § 106.30 definition of sexual harassment; these final regulations do not preclude a recipient from addressing other types of misconduct.

For the same reasons that Title IX does not stand as a zero-tolerance ban on all sexual harassment, Title IX does not stand as a Federal civil rights law to prevent all conduct that ''makes me feel uncomfortable.'' The Supreme Court noted in *Davis* that school children regularly engage in ''insults, banter, teasing, shoving, pushing, and gender-specific conduct that is upsetting to the students subjected to it'' yet a school is liable under Title IX for responding to such behavior only when the conduct is ''so severe, pervasive, and objectively offensive that it denies its victims the equal access to education that Title IX is designed to protect.'' [678] Though not specifically in the Title IX context, the Supreme Court has noted that speech and expression do not lose First Amendment protections on college campuses, and in fact, colleges and universities represent environments where it is especially important to encourage free exchange of ideas, viewpoints, opinions, and beliefs.[679] The Department believes that the *Davis* formulation, applied to unwelcome conduct that is not *quid pro quo* harassment and not a Clery Act/VAWA offense included in § 106.30, appropriately safeguards free speech and academic freedom,[680] while requiring recipients to respond even to verbal conduct so serious that it loses First Amendment protection and denies equal access to the recipient's educational benefits.

While the Department appreciates a commenter's suggestion to describe prohibited conduct by references to terms used in the Sexual Experiences Survey or the Sexual Experiences Questionnaire,[681] for the above reasons the Department believes that the better formulation of prohibited conduct under Title IX is captured in § 106.30, prohibiting conduct on the basis of sex that is either *quid pro quo* harassment, unwelcome conduct so severe, pervasive, and objectively offensive that it effectively denies a person equal access to education, or sexual assault, dating violence, domestic violence, or stalking under the Clery Act and VAWA.

The Department understands commenters' concerns that the § 106.30 definition of sexual harassment, and the *Davis* standard in the second prong particularly, does not sufficiently acknowledge unequal power relations and societal factors that contribute to perpetuation of violence against women, and commenters' arguments that in order to reduce the prevalence of sexual misconduct across society even minor-seeming incidents should be taken seriously. The Department believes that the Supreme Court's recognition of sexual harassment as a form of sex discrimination [682] represents an important acknowledgement that sexual harassment often is not a matter of private, individualized misbehavior but is representative of sex-based notions and attitudes that contribute to systemic sex discrimination. However, the Department heeds the Supreme Court's interpretation of sexual harassment as sex discrimination under Title IX, premised on conditions that hold recipients liable for how to respond to sexual harassment. The § 106.30 definition of sexual harassment adopts the Supreme Court's *Davis* definition, adapted under the Department's administrative enforcement authority to provide broader protections for students (*i.e.,* by ensuring that *quid pro quo* harassment and Clery Act/VAWA

[678] *Davis,* 526 U.S. at 650–51; *see also* Azhar Majeed, *The Misapplication of Peer Harassment Law on College and University Campuses and the Loss of Student Speech Rights,* 35 Journal of Coll. & Univ. L. 385, 399 (2009) (''misapplication of harassment law . . . has contributed to a sense among students that there is a general 'right' not to be offended'—a false notion that ill serves students as they transition from the relatively insulated college or university setting to the larger society. Colleges and universities too often address the problems of sexual and racial harassment by targeting any expression which may be perceived by another as offensive or undesirable.'') (citing Alan Charles Kors & Harvey A. Silverglate, *The Shadow University: The Betrayal of Liberty on America's Campuses* (Free Press 1998) (''At almost every college and university, students deemed members of 'historically oppressed groups' . . . are informed during orientations that their campuses are teeming with illegal or intolerable violations of their 'right' not to be offended.'')).

[679] *Healy* v. *James,* 408 U.S. 169, 180–81 (1972) (''At the outset we note that state colleges and universities are not enclaves immune from the sweep of the First Amendment. 'It can hardly be argued that either students or teachers shed their constitutional rights to freedom of speech or expression at the schoolhouse gate.' *Tinker* v. *Des Moines Indep. Cmty. Sch. Dist.,* 393 U.S. 503, 506 (1969). Of course, as Mr. Justice Fortas made clear in *Tinker,* First Amendment rights must always be applied 'in light of the special characteristics of the . . . environment in the particular case.' *Ibid.* And, where state-operated educational institutions are involved, this Court has long recognized 'the need for affirming the comprehensive authority of the States and of school officials, consistent with fundamental constitutional safeguards, to prescribe and control conduct in the schools.' *Id.,* at 507. Yet, the precedents of this Court leave no room for the view that, because of the acknowledged need for order, First Amendment protections should apply with less force on college campuses than in the community at large. Quite to the contrary, '(t)he vigilant protection of constitutional freedoms is nowhere more vital than in the community of American schools.' The college classroom with its surrounding environs is peculiarly the 'marketplace of ideas,' and we break no new constitutional ground in reaffirming this Nation's dedication to safeguarding academic freedom.'') (internal citations omitted).

[680] As noted in the ''Role of Due Process in the Grievance Process'' section of this preamble, the Department is aware that Title IX applies to all recipients operating education programs or activities regardless of a recipient's status as a public institution with obligations to students and employees under the U.S. Constitution or as a private institution not subject to the U.S. Constitution. However, the principles of free speech, and of academic freedom, are crucial in the context of both public and private institutions. *E.g.,* Kelly Sarabynal, 39 Journal of L. & Educ. 145, 145, 181–82 (2010) (noting that ''The vast majority of [public and private] universities in the United States promote themselves as institutions of free speech and thought, construing censorship as antipathetic to their search for knowledge'') and observing that where public universities restrict speech (for example, through anti-harassment or anti-hate speech codes) the First Amendment ''solves the conflict between a university's policies promising free speech and its speech-restrictive policies by rendering the speech-restrictive policies unconstitutional'' and arguing that as to private universities, First Amendment principles embodied in a private university's policies should be enforced contractually against the university so that private liberal arts and research universities are held ''to their official promises of free speech'' which leaves private institutions control over changing their official promises of free speech if they so choose, for instance if the private institution expects students to ''abide by the dictates of the university's ideology''). The Department is obligated to interpret and enforce Federal laws consistent with the U.S. Constitution. *E.g., Edward J. DeBartolo Corp.* v. *Fla. Gulf Coast Bldg. and Constr. Trades Council,* 485 U.S. 568, 574–575 (1988) (refusing to give deference to an agency's interpretation of a statute where the interpretation raised First Amendment concerns); 2001 Guidance at 22. While the Department has recognized the importance of responding to sexual harassment under Title IX while protecting free speech and academic freedom since 2001, as explained in the ''Adoption and Adaption of the Supreme Court Framework to Address Sexual Harassment'' section of this preamble, protection of free speech and academic freedom was weakened by the Department's use of wording that differed from the *Davis* definition of what constitutes actionable sexual harassment under Title IX and for reasons discussed in this section of the preamble, these final regulations return to the *Davis* definition verbatim, while also protecting against even single instances of *quid pro quo* harassment and Clery/VAWA offenses, which are not entitled to First Amendment protection.

[681] Mary Koss & Cheryl J. Oros, *Sexual Experiences Survey: A research instrument investigating sexual aggression and victimization,* 50 Journal of Consulting & Clinical Psychol. 3 (1982) (discussing survey questions designed to assess experiences with sexual harassment consisting of a series of questions about whether a respondent has encountered specific examples of sexual behavior); Louise Fitzgerald *et al., Measuring sexual harassment: Theoretical and psychometric advances,* 17 Basic & Applied Social Psychol. 4 (1995).

[682] *E.g., Meritor,* 477 U.S. at 64 (''Without question, when a supervisor sexually harasses a subordinate because of the subordinate's sex, that supervisor 'discriminate[s]' on the basis of sex.''); *Gebser,* 524 U.S. at 283 (reference in *Franklin* to *Meritor* ''was made with regard to the general proposition that sexual harassment can constitute discrimination on the basis of sex under Title IX, . . . an issue not in dispute here.'') (internal citations omitted).

offenses included in § 106.30 count as sexual harassment without meeting the *Davis* standard). Similarly, the Department believes that by clearly defining sexual harassment to include sexual assault, dating violence, domestic violence, and stalking, affected parties will understand that no instance of sexual violence is tolerated under Title IX and may reduce the fear commenters described being felt by some young women participating in educational activities that involve proximity with fellow students or professors.

The Department does not believe that the § 106.30 definition creates categories of ''legitimate'' sexual misconduct or makes victims prove that their abuse is worthy of attention. The three-pronged definition of sexual harassment in § 106.30 captures physical and verbal conduct serious enough to warrant the label ''abuse,'' and thereby assures complainants that sex-based abuse is worthy of attention and intervention by a complainant's school, college, or university. The Department appreciates the opportunity to clarify that the burden of describing or proving elements of the § 106.30 definition does not fall on complainants; there is no magic language needed to ''present'' a report or formal complaint in a particular way to trigger a recipient's response obligations. Rather, the burden is on recipients to evaluate reports of sexual harassment in a common sense manner with respect to whether the facts of an incident constitute one (or more) of the three types of misconduct described in § 106.30. This includes taking into account a complainant's age, disability status, and other factors that may affect how an individual complainant describes or communicates about a situation involving unwelcome sex-based conduct.

The Department disagrees with commenters' contention that § 106.30 gives school officials too much discretion to decide whether conduct was severe, pervasive, and objectively offensive or that these elements will lead to arbitrary decisions to turn away reporting parties based on biases of school administrators, fostering a culture of institutional betrayal, or that the § 106.30 definition eliminates ''most'' sexual harassment from coverage under Title IX, or that this definition is problematic because not all unwanted sexual behavior is severe and pervasive. Elements of severity, pervasiveness, and objective offensiveness must be evaluated in light of the known circumstances and depend on the facts of each situation, but must be determined from the perspective of a reasonable person standing in the shoes of the complainant. The final regulations revise the second prong of the § 106.30 definition to state that the *Davis* elements must be determined under a reasonable person standard. Title IX Coordinators are specifically required under the final regulations to serve impartially, without bias for or against complainants or respondents generally or for or against an individual complainant or respondent.[683] A recipient that responds to a report of sexual harassment in a manner that is clearly unreasonable in light of the known circumstances violates the final regulations,[684] incentivizing Title IX Coordinators and other recipient officials to carefully, thoughtfully, and reasonably evaluate each complainant's report or formal complaint.

The Department appreciates commenters' contention that recipients' Title IX offices have not been processing great quantities of ''low-level'' harassment cases; however, if that is accurate, then the § 106.30 definition simply will continue to ensure that sexual harassment is adequately addressed under Title IX, for the benefit of victims of sexual harassment. Far from excluding ''most'' sexual harassment from Title IX coverage, the definition of sexual harassment in § 106.30 requires recipients to respond to three separate broadly-defined categories of sexual harassment. While not all unwanted sexual conduct is both severe and pervasive, as explained above, the Supreme Court has long acknowledged that not all misconduct amounts to sex discrimination prohibited by Federal civil rights laws like Title VII and Title IX, even where the misconduct amounts to a criminal violation under State law.[685] Where a Federal civil rights law does not find sexual harassment to also constitute prohibited sex discrimination, this does not mean the conduct is acceptable or does not constitute a different violation, such as assault or battery, under non-sex discrimination laws. The Department does not believe that the § 106.30 definition of sexual assault is a ''narrow'' definition, as it includes all forcible and nonforcible sex offenses described in the FBI's Uniform Crime Reporting system and thus this definition will not discourage reporting of sexual assault.

The Department disagrees that it is inappropriate to use a uniform definition of sexual harassment in elementary and secondary school and postsecondary institution contexts. No person, of any age or educational level, should endure *quid pro quo* harassment, severe, pervasive, objectively offensive unwelcome conduct, or a Clery Act/VAWA offense included in § 106.30, without recourse from their school, college, or university. The § 106.30 definition applies equally in every educational setting, yet the definition may be applied in a common sense manner that takes into account the ages and developmental abilities of the involved parties.

The Department disagrees with a commenter's contention that community college students will find it more difficult to report sexual harassment because such students have less of a connection to a physical campus. Under § 106.8 of the final regulations, contact information for the Title IX Coordinator, including an office address, telephone number, and email address, must be posted on the recipient's website, and that provision expressly states that any person may report sexual harassment by using the Title IX Coordinator's contact information. We believe this will simplify the process for community college students, as well as other complainants, to make a report to the recipient's Title IX Coordinator.

The Department disagrees with a commenter's assertion that pervasiveness necessarily transforms harassment into also being severe, because these elements are separate inquiries; however, the Department reiterates that a course of conduct reported as sexual harassment must be evaluated in the context of the particular factual circumstances, under a reasonable person standard, when determining whether the conduct is both severe and pervasive. The Department appreciates a commenter's suggestion to revise the second prong of the § 106.30 definition by stating that severe, pervasive, objectively offensive conduct counts when it ''causes a person to be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity'' instead of ''effectively denies a

[683] Section 106.45(b)(1)(iii).

[684] Section 106.44(a).

[685] *See, e.g., Brooks* v. *City of San Mateo,* 229 F.3d 917, 924, 927 (9th Cir. 2000) (Plaintiff alleged a workplace sexual assault in the form of a supervisor fondling plaintiff's breast, which is ''egregious'' and the perpetrator ''spent time in jail'' for the assault, yet the Court held that ''[t]he harassment here was an entirely isolated incident. It had no precursors, and it was never repeated. In no sense can it be said that the city imposed upon [the plaintiff] the onerous terms of employment for which Title VII offers a remedy.''); *see also Davis,* 526 U.S. at 634 (noting that the peer harasser in that case was charged with, and pled guilty to, sexual battery, yet still evaluating the harassment by whether it amounted to severe, pervasive, objectively offensive conduct).

person equal access to the recipient's education program or activity'' to more closely mirror the language in the Title IX statute. However, as discussed above, the Department notes that when considering sexual harassment as a form of sex discrimination under Title IX, the Supreme Court in *Davis* repeatedly used the ''denial of equal access'' phrase to describe when sexual harassment is actionable, implying that this is the equivalent of a violation of Title IX's prohibition on exclusion from participation, denial of benefits, and/or subjection to discrimination.[686] We believe this element as articulated by the *Davis* Court thus represents the full scope and intent of the Title IX statute.

Changes: We have revised the § 106.30 definition of sexual harassment by specifying that the elements in the *Davis* definition of sexual harassment (severe, pervasive, objectively offensive, and denial of equal access) are determined under a reasonable person standard.

Comments: Several commenters described State laws under which a recipient is required to respond to a broader range of misconduct than what meets the *Davis* standard, and stated that the NPRM places recipients in a ''Catch-22'' by requiring recipients to dismiss cases that do not meet the narrower § 106.30 definition; one such commenter urged the Department to either broaden the definition of sexual harassment or remove the mandatory dismissal provision in § 106.45(b)(3). A few commenters requested clarification on whether a school may choose to include a wider range of misconduct than conduct that meets this definition. Many commenters urged the Department not to prevent recipients from addressing misconduct that does not meet the § 106.30 definition because State laws and institutional policies often require recipients to respond. A few commenters asserted that even if the final regulations allow recipients to choose to address misconduct that does not meet the § 106.30 definition, this creates two different processes and standards (one for ''Title IX sexual harassment'' and one for other sexual misconduct) which will lead to confusion and inefficiency. At least one commenter stated that the Title IX equitable process should be used for all sexual misconduct violations such that the final regulations should allow recipients to use that process for Title IX, VAWA, Clery Act, and State law sex and gender offenses under a single campus policy and process. At least one commenter recommended that the Department clarify that the final regulations establish minimum Federal standards for responses to sex discrimination and that recipients retain discretion to exceed those minimum standards.

Discussion: The Department is aware that various State laws define actionable sexual harassment differently than the § 106.30 definition, and that the NPRM's mandatory dismissal provision created confusion among commenters as to whether the NPRM purported to forbid a recipient from addressing conduct that does not constitute sexual harassment under § 106.30. In response to commenters' concerns, the final regulations revise § 106.45(b)(3)(i)[687] to clearly state that dismissal for Title IX purposes does not preclude action under another provision of the recipient's code of conduct. Thus, if a recipient is required under State law or the recipient's own policies to investigate sexual or other misconduct that does not meet the § 106.30 definition, the final regulations clarify that a recipient may do so. Similarly, if a recipient wishes to use a grievance process that complies with § 106.45 to resolve allegations of misconduct that do not constitute sexual harassment under § 106.30, nothing in the final regulations precludes a recipient from doing so. Alternatively, a recipient may respond to non-Title IX misconduct under disciplinary procedures that do not comply with § 106.45. The final regulations leave recipients flexibility in this regard, and prescribe a particular grievance process only where allegations concern sexual harassment covered by Title IX. The Department does not agree that this results in inefficiency or confusion, because so long as a recipient complies with these final regulations for Title IX purposes, a recipient retains discretion as to how to address non-Title IX misconduct. Because the final regulations extend the § 106.30 definition to include all four Clery Act/VAWA offenses (sexual assault, dating violence, domestic violence, stalking), the Title IX grievance process will apply to formal complaints alleging the Clery Act/VAWA offenses included in § 106.30, and recipients may choose to use the same process for State-law offenses, too.

The Department appreciates a commenter's suggestion to clarify (and does so here) that the final regulations establish Federal standards for responding to sex discrimination in the form of sexual harassment, and recipients retain discretion to respond to more conduct than what these final regulations require.

Changes: The final regulations revise § 106.45(b)(3)(i) to clearly state that dismissal for Title IX purposes does not preclude action under another provision of the recipient's code of conduct.

Comments: Many commenters opposed the second prong of the § 106.30 sexual harassment definition by giving examples of harassing conduct that might not be covered. One such commenter stated that the ''severe and pervasive'' standard will conflict with elementary and secondary school anti-bullying policies, asserting that, for example, a classmate repeatedly taunting a girl about her breasts may not be considered both severe and pervasive enough to fall under the proposed rules, whereas a similarly-described scenario was clearly covered under the 2001 Guidance (at p. 6).

A few commenters raised examples such as snapping a girl's bra, casual jokes and comments of a sexual nature, or unwelcome emails with sexual content, which commenters asserted can be ignored under § 106.30 because the unwanted behavior might be considered not severe even though it is pervasive, leaving victims in a state of anxiety and negatively impacting victims' ability to access education.

One commenter asserted that under § 106.30, a professor whispering sexual

[686] *Davis,* 526 U.S. at 650 (''The statute's other prohibitions, moreover, help give content to the term 'discrimination' in this context. Students are not only protected from discrimination, but also specifically shielded from being 'excluded from participation in' or 'denied the benefits of' any 'education program or activity receiving Federal financial assistance.' 20 U.S.C. 1681(a). The statute makes clear that, whatever else it prohibits, students must not be denied access to educational benefits and opportunities on the basis of gender. We thus conclude that funding recipients are properly held liable in damages only where they are deliberately indifferent to sexual harassment, of which they have actual knowledge, that is so severe, pervasive, and objectively offensive that it can be said to deprive the victims of access to the educational opportunities or benefits provided by the school.''); *id.* at 644–45 (holding that a recipient is liable where its ''deliberate indifference 'subjects' its students to harassment—''[t]hat is, the deliberate indifference must, at a minimum, 'cause [students] to undergo' harassment or 'make them liable or vulnerable' to it.''); *id.* at 650–652 (expressing the denial of access element in different ways as ''depriv[ing] the victims of access to the educational opportunities or benefits provided by the school,'' ''effectively den[ying] equal access to an institution's resources and opportunities,'' and ''den[ying] its victims the equal access to education that Title IX is designed to protect.'').

[687] Section 106.45(b)(3)(i) (''The recipient must investigate the allegations in a formal complaint. If the conduct alleged by the complainant would not constitute sexual harassment as defined in § 106.30 even if proved, did not occur in the recipient's education program or activity, or did not occur against a person in the United States, then the recipient must dismiss the formal complaint with regard to that conduct *for purposes of sexual harassment under title IX or this part; such a dismissal does not preclude action under another provision of the recipient's code of conduct.*'') (emphasis added).

comments to a female student would be ''severe'' but since it happened once it would not be ''pervasive'' so even if the female student felt alarmed and uncomfortable and dropped that class, the recipient would not be obligated to respond. The same commenter asserted that the following example would not be sexual harassment under § 106.30 because the conduct would be pervasive but not severe: A graduate assistant emails an undergraduate student multiple times per week for two months, commenting each time in detail about what the student wears and how she looks, making the student feel uncomfortable about the unwanted attention to the point where she drops the class.

One commenter described attending a holiday party for graduate students where a fellow student wore a shirt with the words ''I'm just here for the gang bang'' and while the offensive shirt did not prevent the commenter from continuing an education it made the commenter feel unsafe and showed how deep-seated toxic rape culture is on college campuses; the commenter contended that narrowing the definition of harassment will only perpetuate this culture.

One commenter recounted the experience of a friend who was drugged at a dorm party; the commenter contended that because the boys who drugged the girl did not also rape her, the situation would not even be investigated under the new Title IX rules even though an incident of boys drugging a girl creates a dangerous, ongoing threat on campus.

One commenter urged the Department to authorize recipients to create lists of situations that constitute *per se* harassment, for example where a recipient receives multiple reports of students having their towels tugged away while walking to the dorm bathrooms, or reports of students lifting the skirts or dresses of other students. The commenter asserted that creating lists of such *per se* violations will create more consistent application of the harassment definition within recipient communities and address problematic situations that occur frequently at some institutions.

Discussion: In response to commenters who presented examples of misconduct that they believe may not be covered under the *Davis* standard in the second prong of the § 106.30 definition, the Department reiterates that whether or not an incident of unwanted sex-based conduct meets the *Davis* elements is a fact-based inquiry, dependent on the circumstances of the particular incident. However, the Department does not agree with some commenters who speculated that certain examples would *not* meet the *Davis* standard, and encourages recipients to use common sense in evaluating conduct under a reasonable person standard, by taking into account the ages and abilities of the individuals involved in an incident or course of conduct.

Furthermore, the Department reiterates that the *Davis* standard is only one of three categories of conduct on the basis of sex prohibited under § 106.30, and incidents that do not meet the *Davis* standard may therefore still constitute sexual harassment under § 106.30 (for example, as fondling, stalking, or *quid pro quo* harassment). The Department also reiterates that inappropriate or illegal behavior may be addressed by a recipient even if the conduct clearly does not meet the *Davis* standard or otherwise constitute sexual harassment under § 106.30, either under a recipient's own code of conduct or under criminal laws in a recipient's jurisdiction (*e.g.,* with respect to a commenter's example of drugging at a dorm party).

The Department understands commenters' concerns that anything less than the broadest possible definition of actionable harassment may result in some situations that make a person feel unsafe or uncomfortable without legal recourse under Title IX; however, for the reasons described above, the Department chooses to adopt the Supreme Court's approach to interpreting Title IX, which requires schools to respond to sexual harassment that jeopardizes the equal access to education promised by Title IX. Whether or not a college student wearing a t-shirt with an offensive slogan constitutes sexual harassment under Title IX, other students negatively impacted by the t-shirt are free to opine that such expression is inappropriate, and recipients remain free to utilize institutional speech to promote their values about respectful expressive activity.

The Department notes that nothing in the final regulations prevents a recipient from publishing a list of situations that a recipient has found to meet the § 106.30 definition of sexual harassment, to advise potential victims and potential perpetrators that particular conduct has been found to violate Title IX, or to create a similar list of situations that a recipient finds to be in violation of the recipient's own code of conduct even if the conduct does not violate Title IX.

Changes: None.

Comments: At least one commenter urged the Department to expressly include verbal sexual coercion in the § 106.30 definition of sexual harassment, noting that studies indicate that college women are likely to experience verbal sexual coercion as a tactic of sexual assault on a continuum ranging from non-forceful verbal tactics to incapacitation to physical force, and that studies indicate that verbal sexual coercion is the most common sexual assault tactic.[688]

One commenter insisted that the second prong of the § 106.30 definition of sexual harassment is too broad and contended that the Department should adopt the minority view in the *Davis* case, or alternatively change the second prong to ''unwelcome physical conduct on the basis of sex that is so severe, and objectively offensive'' (eliminating the word pervasive because a single act of a physical nature could trigger the statute while excluding purely verbal conduct from the definition).

At least one commenter suggested that the second prong should be subject to a general requirement of objective reasonableness; the commenter asserted that objective offensiveness is no substitute for requiring all the elements of the hostile environment claim be not only subjectively valid but also objectively reasonable. The commenter asserted that the stakes are high: Many complaints come to Title IX offices from students who sincerely believe that they have experienced sexual harassment, meeting any subjective test, but which cannot survive reasonableness scrutiny and thus objective reasonableness under all the circumstances is a necessary guard against arbitrary enforcement.

At least one commenter stated that subjective factors must be taken into consideration to decide if conduct is severe and pervasive because how severe the experience is to a particular victim depends on factors such as the status of the offender, the power the offender holds over the victim's life, the victim's prior history of trauma, or whether the victim has a support system for dealing with the trauma.

Discussion: The Department appreciates commenters' concerns that verbal sexual coercion is the most common sexual assault tactic, but declines to list verbal coercion as an element of sexual harassment or sexual assault. As explained in the ''Consent'' subsection of the ''Section 106.30 Definitions'' section of this preamble, the Department leaves flexibility to

[688] Commenters cited: Brandie Pugh & Patricia Becker, *Exploring Definitions and Prevalence of Verbal Sexual Coercion and its Relationship to Consent to Unwanted Sex: Implications for Affirmative Consent Standards on College Campuses,* 8 Behavioral Sci. 8 (2018).

recipients to define consent as well as terms commonly used to describe the absence or negation of consent (*e.g.,* incapacity, coercion, threat of force), in recognition that many recipients are under State laws requiring particular definitions of consent, and that other recipients desire flexibility to use definitions of consent and related terms that reflect the unique values of a recipient's educational community.

The Department disagrees with commenters who argued that the *Davis* standard is too broad and that the Department should adopt the dissenting viewpoint from the *Davis* decision. For reasons explained in the ''Adoption and Adaption of the Supreme Court Framework to Address Sexual Harassment'' section of this preamble, the Department believes that the Supreme Court appropriately described the conditions under which sexual harassment constitutes sex discrimination under Title IX, and the Department's goal through these final regulations is to impose requirements for recipients to provide meaningful, supportive responses fair to all parties when allegations of sexual harassment are brought to a recipient's attention. Similarly, the Department declines a commenter's recommendation to restrict the *Davis* standard solely to ''physical'' conduct because the Supreme Court has acknowledged that not all speech is protected by the First Amendment, and that verbal harassment can constitute sex discrimination requiring a response when it is so severe, pervasive, and objectively offensive that it denies a person equal access to education.

The Department is persuaded by commenters' recommendation that the second prong of the § 106.30 definition must be applied under a general reasonableness standard. We have revised § 106.30 to state that sexual harassment includes ''unwelcome conduct'' on the basis of sex ''determined by a reasonable person'' to be so severe, pervasive, and objectively offensive that it effectively denies a person equal educational access. We interpret the *Davis* standard formulated in § 106.30 as subjective with respect to the unwelcomeness of the conduct (*i.e.,* whether the complainant viewed the conduct as unwelcome), but as to elements of severity, pervasiveness, objective offensiveness, and denial of equal access, determinations are made by a reasonable person in the shoes of the complainant.[689] The Department believes this approach appropriately safeguards against arbitrary application, while taking into account the unique circumstances of each sexual harassment allegation.

Changes: We have revised the § 106.30 definition of sexual harassment by specifying that the elements in the *Davis* standard (severe, pervasive, objectively offensive, and denial of equal access) are determined under a reasonable person standard.

Comments: Many commenters opposed the § 106.30 definition on the ground that a narrow definition fails to stop harassing behavior before it escalates into more serious violations. Some commenters urged the Department to consider statistics regarding violent offenders who could be identified by examining their history of harassment that escalated over time into violence. Other commenters emphasized that sexual harassment is often a first stop on a continuum of violence and schools have a unique opportunity and duty to intervene early. At least one commenter asserted that the definition should be more in line with academic definitions of sexual harassment.[690] At least one commenter analogized to laws against drunk driving, asserting that such laws do not distinguish between instances where a driver is marginally above the legal intoxication limit from those where a driver is significantly above the limit; the commenter argued that just as all driving while intoxicated situations are dangerous, all harassment regardless of severity is dangerous. Another commenter likened the § 106.30 approach to choosing not to address a rodent infestation until the problem escalates and becomes costlier to redress.

A few commenters argued that waiting until sexually predatory behavior becomes extremely serious risks women's lives, pointing to instances where women reporting domestic violence have been turned away by police due to individual incidents seeming ''non-severe'' and then been killed by their violent partners.[691]

Many commenters stated that a victim turned away while trying to report a less severe instance of harassment will be unlikely to try and report a second time when the harassing conduct has escalated into a more severe situation.

Discussion: The Department understands commenters' concerns that sometimes harassing behavior escalates into more serious harassment, up to and even including violence and homicide, and that commenters therefore advocate using a very broad definition of sexual harassment that captures even seemingly ''low level'' harassment. The Department is persuaded that every instance of dating violence, domestic violence, and stalking should be considered sexual harassment under Title IX and has therefore revised § 106.30 to include these offenses in addition to sexual assault. However, for the reasons described above, the Department chooses to follow the Supreme Court's framework recognizing that Title IX is a non-sex discrimination statute and not a prohibition on all harassing conduct, and declines to define actionable sexual harassment as broadly as some academic researchers define harassment. The Department further believes that § 106.30 appropriately recognizes certain forms of harassment as *per se* sex discrimination (*i.e., quid pro quo* and Clery Act/VAWA offenses included in § 106.30), while adopting the *Davis* definition for other types of harassment such that free speech and academic freedom [692] are not chilled or curtailed

[689] *See Davis,* 526 U.S. at 653–54 (applying the severe, pervasive, objectively offensive, denial of access standard to the facts at issue under an objective) (''Petitioner alleges that her daughter was the victim of repeated acts of sexual harassment by G.F. over a 5-month period, and there are allegations in support of the conclusion that G.F.'s misconduct was severe, pervasive, and objectively offensive. The harassment was not only verbal; it included numerous acts of objectively offensive touching, and, indeed, G.F. ultimately pleaded guilty to criminal sexual misconduct. . . . Further, petitioner contends that the harassment had a concrete, negative effect on her daughter's ability to receive an education.'').

[691] Commenter cited: Elizabeth Bruenig, *What Do We Owe Her Now?,* The Washington Post (Sept. 21, 2018); Lindsay Gibbs, *College track star warned police about her ex-boyfriend 6 times in the 10 days before he killed her,* ThinkProgress (Dec. 18, 2018), *https://thinkprogress.org/mccluskey-university-of-utah-warned-police-about-ex-boyfriend-6-times-bc08aed0fad5/*; Sirin Kale, *Teen Killed By Abusive Ex Even After Reporting Him to Police Five Times,* Vice (Jan. 15, 2019), *https://broadly.vice.com/en_us/article/59vnbx/teen-killed-by-abusive-ex-even-after-reporting-him-to-police-five-times.*

[692] The Supreme Court has recognized academic freedom as protected under the First Amendment. *See, e.g., Keyishian* v. *Bd. of Regents of Univ. of State of N.Y.,* 385 U.S. 589, 603 (1967) (''Our Nation is deeply committed to safeguarding academic freedom, which is of transcendent value to all of us and not merely to the teachers concerned. That freedom is therefore a special concern of the First Amendment, which does not tolerate laws that cast a pall of orthodoxy over the classroom. The vigilant protection of constitutional freedoms is nowhere more vital than in the community of American schools. . . . The classroom is peculiarly the marketplace of ideas. The Nation's future depends upon leaders trained through wide exposure to that robust exchange of ideas which discovers truth out of a multitude of tongues, (rather) than through any kind of authoritative selection.'') (internal quotation marks and citations omitted).

by an overly broad definition of sexual harassment.[693] The Department believes that as a whole, the § 106.30 definition appropriately requires recipient intervention into situations that form a course of escalating conduct, without requiring recipients to intervene in situations that might—but have not yet—risen to a serious level. By adding dating violence, domestic violence, and stalking to the third prong of the § 106.30 definition, it is even more likely that conduct with potential to escalate into violence or even homicide will be reported and addressed before such escalation occurs.

The Department contends that, similar to laws setting a legal limit over which a person's blood alcohol level constitutes illegal driving while intoxicated,[694] the § 106.30 definition as a whole sets a threshold over which a person's unwelcome conduct constitutes sexual harassment. While some harassment does not meet the threshold, serious incidents that jeopardize equal educational access exceed the threshold and are actionable. In addition, the § 106.30 definition includes single instances of *quid pro quo* harassment and Clery Act/VAWA offenses, requiring recipients to address serious problems before such problems have repeated or multiplied and become more difficult to address. Similarly, the Department disagrees that § 106.30 makes complainants wait until sexually predatory behavior becomes extremely serious, because the definition as a whole captures serious conduct (not just ''extremely'' serious conduct) that Title IX prohibits.

The Department understands commenters' concerns that if a complainant reports a sexual harassment incident that does not meet the § 106.30 definition, that complainant may feel discouraged from reporting a second time if the sexual harassment escalates to meet the § 106.30 definition. However, complainants and recipients have long been familiar with the concept that sexual harassment must meet a certain threshold to be considered actionable under Federal non-discrimination laws.[695] The final regulations follow the same approach, and the Department does not believe that having a threshold for when harassment is actionable will chill reporting. The Department also reiterates that recipients retain discretion to respond to misconduct not covered by Title IX.

Changes: None.

Comments: Several commenters argued that adopting a narrower definition of sexual harassment makes it easier for sexist, misogynistic, and homophobic microaggressions, including sexist hostility and crude behavior, to continue unchecked. Commenters argued that making the definition of sexual harassment less inclusive tacitly condones microaggressions, making campuses less safe and decreasing diversity because more students from underrepresented groups will perform worse in school or leave school entirely.

A few commenters recommended that the definition include microaggressions. Some commenters asserted that microaggressions can cause the same negative impact on victims as more severe harassment does.[696] Other commenters asserted that using a ''severe, pervasive, and objectively offensive'' standard fails to consider personal, cultural, and religious differences in determining what constitutes sexual harassment, ignoring the fact that especially for individuals in marginalized identity groups, microaggressions may not seem pervasive or severe to an outsider but accumulate to make marginalized students feel unwelcome and unable to continue their education. One commenter suggested that rather than narrow the definition of harassment, it should be expanded to include what one professor has called ''creepiness.'' [697] A few commenters asserted that cat-calling and other microaggressions may constitute more subtle forms of sexual harassment yet cause very real harms to victims [698] and the final regulations should protect more students from harmful violations of bodily and mental autonomy and dignity. At least one commenter argued that research indicates that gendered microaggressions, while not extreme, increase the likelihood of high-severity sexual violence [699] and that unaddressed subtly aggressive behavior leads to more extreme sexual harassment.[700]

One commenter suggested that recipients will save money by investigating all survivor complaints, including of microaggressions, rather than waiting until harassment is severe and pervasive, because trauma from sexual harassment is analogous to chronic traumatic encephalopathy (CTE) in contact sports—it is not necessarily one big trauma that causes CTE but many repeated and seemingly asymptomatic injuries that accumulate over time causing CTE. Commenters argued that schools should be required, or at least allowed, to intervene in cases less severe than the § 106.30 definition.

Discussion: The Department appreciates commenters' concerns about the harm that can result from microaggressions, cat-calling, and hostile, crude, or ''creepy'' behaviors that can make students feel unwelcome,

unsafe, disrespected, insulted, and discouraged from participating in a community or in programs or activities. However, the Supreme Court has cautioned that while Title VII and Title IX both prohibit sex discrimination, neither of these Federal civil rights laws is designed to become a general civility code.[701] The Supreme Court interpreted Title IX's non-discrimination mandate to prohibit sexual harassment that rises to a level of severity, pervasiveness, and objective offensiveness such that it denies equal access to education.[702] The *Davis* Court acknowledged that while misbehavior that does not meet that standard may be ''upsetting to the students subjected to it,'' [703] Title IX liability attaches only to sexual harassment that does meet the *Davis* standard. The Department declines to prohibit microaggressions as such, but notes that what commenters and researchers consider microaggressions [704] could form part of a course of conduct reaching severity, pervasiveness, and objective offensiveness under § 106.30, though a fact-specific evaluation of specific conduct is required. As to a commenter's likening of microaggressions to ''asymptomatic'' injuries that in the aggregate cause CTE from playing contact sports, actionable sexual harassment under Title IX involves conduct that is unwelcome and so severe, pervasive, and objectively offensive that it effectively denies a person equal access to the recipient's education program or activity. Where harm results from behavior that does not meet the § 106.30 definition of sexual harassment, nothing in these final regulations precludes recipients from addressing such behavior under a recipient's own student or employee conduct code.

As noted above, the fact that not every harassing or offensive remark is prohibited under Title IX in no way condones or encourages crude, insulting, demeaning behavior, which recipients may address through a variety of actions; as a commenter pointed out, a recipient's response could include providing a complainant with supportive measures, responding to the conduct in question with institutional speech, or offering programming designed to foster a more welcoming campus climate generally, including with respect to marginalized identity groups. We have revised § 106.45(b)(3) in the final regulations to clarify that mandatory dismissal of a formal complaint due to the allegations not meeting the § 106.30 definition of sexual harassment does not preclude a recipient from acting on the allegations through non-Title IX codes of conduct. The final regulations also permit a recipient to provide supportive measures to a complainant even where the conduct alleged does not meet the § 106.30 definition of sexual harassment.

Changes: We have revised § 106.45(b)(3) to clarify that mandatory dismissal of a formal complaint because the allegations do not constitute sexual harassment as defined in § 106.30 does not preclude a recipient from addressing the allegations through the recipient's code of conduct.

Comments: Several commenters argued that concern for protecting free speech and academic freedom does not require or justify using the *Davis* definition of sexual harassment in the second prong of the § 106.30 definition because harassment is not protected speech if it creates a hostile environment.[705] Commenters asserted that schools have the authority to regulate harassing speech,[706] that there is no conflict between the First Amendment and Title IX's protection against sexually harassing speech, and that the Department has no evidence that a broader definition of harassment over the last 20 years has infringed on constitutionally protected speech or academic freedom. On the other hand, at least one commenter argued that verbal conduct creating a hostile environment may still be constitutionally protected speech.[707]

Discussion: The Supreme Court has not squarely addressed the intersection between First Amendment protection of speech and academic freedom, and non-sex discrimination Federal civil rights laws that include sexual harassment as a form of sex discrimination (*i.e.,* Title VII and Title IX).[708] With respect to sex discriminatory conduct in the form of admissions or hiring and firing decisions, for example, prohibiting such conduct does not implicate constitutional concerns even when the conduct is accompanied by speech,[709] and similarly, when sex discrimination occurs in the form of non-verbal sexually harassing conduct, or speech used to harass in a *quid pro quo* manner, stalk, or threaten violence

[701] *Faragher* v. *City of Boca Raton,* 524 U.S. 775, 788 (1998) (''These standards for judging hostility are sufficiently demanding to ensure that Title VII does not become a 'general civility code.' . . . Properly applied, they will filter out complaints attacking the ordinary tribulations of the workplace, such as the sporadic use of abusive language, gender-related jokes, and occasional teasing.'') (internal quotation marks and citations omitted); *Davis,* 526 U.S. at 684 (Kennedy, J., dissenting) (''the majority seeks, in effect, to put an end to student misbehavior by transforming Title IX into a Federal Student Civility Code.''); *id.* at 652 (refuting dissenting justices' arguments that the majority opinion permits too much liability under Title IX or turns Title IX into a general civility code, by emphasizing that it is not enough to show that a student has been teased, called offensive names, or taunted, because liability attaches only to sexual harassment that is severe and pervasive); Julie Davies, *Assessing Institutional Responsibility for Sexual Harassment in Education,* 77 Tulane L. Rev. 387, 398, 407 (2002) (''Although the Court adopted different standards for institutional liability under Titles VII and IX, several themes serve as leitmotifs, running through the cases regardless of the technical differences. Neither Title VII nor Title IX is construed as a federal civility statute; the Court does not want entities to be obliged to litigate cases where plaintiffs have been subjected to 'minor' annoyances and insults.'') [706] Commenters cited: *Tinker* v. *Des Moines Indep. Cmty. Sch. Dist.,* 393 U.S. 503, 513–14 (1969) (holding school officials can regulate student speech if they reasonably forecast ''substantial disruption of or material interference with school activities'' or if the speech involves ''invasion of the rights of others'').

[707] Commenters cited: *White* v. *Lee,* 227 F.3d 1214, 1236–37 (9th Cir. 2000) (refusing to extend labor law precedents allowing restrictions on workplace speech to non-workplace contexts such as discriminatory speech about housing projects); *UWM Post, Inc.* v. *Bd. of Regents of Univ. of Wis. Sys.,* 774 F. Supp. 1163 (E.D. Wis. 1991) (holding student speech that created a hostile environment was protected even though workplace speech creating a hostile environment is banned by Title VII).

[708] *Saxe* v. *State College Area Sch. Dist.,* 240 F.3d 200, 204, 207 (3d Cir. 2001) (''There is no categorical 'harassment exception' to the First Amendment's free speech clause.'') (''Although the Supreme Court has written extensively on the scope of workplace harassment, it has never squarely addressed whether harassment, when it takes the form of pure speech, is exempt from First Amendment protection'') (''Loosely worded anti-harassment laws may pose some of the same problems as the St. Paul hate speech ordinance [struck down by the Supreme Court as unconstitutional in *R.A.V.* v. *City of St. Paul,* 505 U.S. 377 (1992)]: they may regulate deeply offensive and potentially disruptive categories of speech based, at least in part, on subject matter and viewpoint.'').

[709] *E.g.,* John F. Wirenius, *Actions as Words, Words as Actions: Sexual Harassment Law, the First Amendment and Verbal Acts,* 28 Whittier L. Rev. 905 (2007) (identifying a First Amendment issue only with respect to hostile environment sexual harassment, as opposed to discriminatory conduct in the form of discrete employment decisions and *quid pro quo* sexual harassment).

against a victim, no First Amendment problem exists.[710] However, with respect to speech and expression, tension exists between First Amendment protections and the government's interest in ensuring workplace and educational environments free from sex discrimination when the speech is unwelcome on the basis of sex.[711]

In striking down a city ordinance banning bias-motivated disorderly conduct, the Supreme Court in *R.A.V.* v. *City of St. Paul* emphasized that the First Amendment generally prevents the government from proscribing speech or expressive conduct ''because of disapproval of the ideas expressed. Content-based regulations are presumptively invalid.'' [712] The Supreme Court explained that even categories of speech that can be regulated consistent with the First Amendment (for example, obscenity and defamation) cannot do so in a content-discriminatory manner (for instance, by prohibiting only defamation that criticizes the government).[713] The Supreme Court further explained that while ''fighting words'' can permissibly be proscribed under First Amendment doctrine, such a conclusion is based on the nature of fighting words to provoke injury and violence,[714] not merely the impact on the listener to be insulted or offended, and government still cannot regulate ''based on hostility—or favoritism—towards the underlying message expressed.'' [715] Side-stepping the direct question of how the First Amendment prohibition against content-based regulations applies to hostile environment sexual harassment claims based on speech rather than acts, the *R.A.V.* Court stated that ''sexually-based 'fighting words'' could ''produce a violation of Title VII's general prohibition against sexual discrimination in employment *practices*'' because ''[w]here the government does not target *conduct* on the basis of its expressive conduct, *acts* are not shielded from regulation merely because they express a discriminatory idea or philosophy.'' [716] The *R.A.V.* Court struck down the city ordinance at issue, even though it was intended to protect persons in historically marginalized groups from victimization, in part because the ''secondary effect'' of whether a particular listener or audience is offended by speech does not justify restricting the speech.[717] In striking down the ordinance, the Supreme Court noted that city officials retained the ability to communicate their hostility for certain biases—but not ''through the means of imposing unique limitations upon speakers who (however benightedly) disagree.'' [718]

Seven years after deciding *R.A.V.* under the First Amendment, the Supreme Court decided *Davis* under Title IX. While the *Davis* Court did not raise the issue of First Amendment intersection with anti-sexual harassment regulation,[719] it focused on the sexually harassing *conduct* of the peer-perpetrator in that case,[720] indicating that the Supreme Court recognizes that proscribing conduct, as opposed to speech, raises no constitutional concerns, and that even when anti-harassment rules are applied to verbal harassment, requiring the harassment to be so severe, pervasive, and objectively offensive that it effectively denies a person equal access to education avoids putting recipients in the untenable position of protecting a recipient from legal liability arising from how the recipient responds to sexual harassment only by unconstitutionally restricting its students' (or employees') rights to freedom of speech and expression.

The legal commentary and Supreme Court precedent often cited by

[710] *Id.; Wisconsin* v. *Mitchell,* 508 U.S. 476, 484 (1993) (citing Supreme Court cases in support of the view that a variety of conduct can be prohibited even where the person engaging in the conduct uses speech or expresses an idea, such that the First Amendment provides no protection for physical assault, violence, threat of violence, or other special harms distinct from communicative impact); *United States* v. *Osinger,* 753 F.3d 939, 953 (9th Cir. 2014) (''Because the sole immediate object of [the defendant's] speech was to facilitate his commission of the interstate stalking offense, that speech isn't entitled to constitutional protection.'') (internal quotation marks and citation omitted).

[711] Andrea Meryl Kirshenbaum, *Hostile Environment Sexual Harassment Law and the First Amendment: Can the Two Peacefully Coexist?,* 12 Tex. J. of Women & the L. 67, 68–70 (2002) (''Although the Supreme Court has never directly addressed this issue, the tension between the First Amendment and hostile environment sexual harassment law is evidenced by an increase in litigation involving these issues in courts throughout the nation.'' . . . ''the clash between the First Amendment and the hostile environment sexual harassment doctrine is acute.''); Peter Caldwell, *Hostile Environment Sexual Harassment & First Amendment Content-Neutrality: Putting the Supreme Court on the Right Path,* 23 Hofstra Lab. & Emp. L. J. 373 (2006) (''Where pure expression is involved, Title VII steers into the territory of the First Amendment. It is no use to deny or minimize this problem because, when Title VII is applied to sexual harassment claims founded solely on verbal insults, pictorial or literary matter, the statute imposes content-based, viewpoint-discriminatory restrictions on speech.''); John F. Wirenius, *Actions as Words, Words as Actions: Sexual Harassment Law, the First Amendment and Verbal Acts,* 28 Whittier L. Rev. 905 (2007) (''For nearly two decades, a debate has smoldered over the perceived tension between the law of sexual harassment and the First Amendment's guarantee of freedom of speech. As the protection against sexual harassment in the workplace spread beyond overt discrimination in discrete employment decisions and *quid pro quo* sexual harassment to include the less readily quantified 'hostile work environment,' free speech advocates became less sanguine about the compatibility between the protections against workplace discrimination and the First Amendment, especially its proscription of viewpoint discrimination.''). The same tension exists with respect to the First Amendment, and verbal and expressive unwelcome conduct on the basis of sex under Title IX, and the Department aims to ensure through a carefully crafted definition of actionable sexual harassment that ''discrete'' sex offenses ''and *quid pro quo* sexual harassment'' are *per se* sexual harassment under Title IX because no First Amendment issues are raised, while verbal and expressive conduct is evaluated under the *Davis* standard so that prohibiting sexual harassment under Title IX is consistent with the First Amendment.

[717] *Id.* at 394.

[718] *Id.* at 395–96.

[719] The majority opinion did not address First Amendment concerns, although the dissent raised the issue. *Davis,* 526 U.S. at 667–68 (Kennedy, J., dissenting) (''A university's power to discipline its students for speech that may constitute sexual harassment is also circumscribed by the First Amendment. A number of federal courts have already confronted difficult problems raised by university speech codes designed to deal with peer sexual and racial harassment. *See, e.g., Dambrot* v. *Cent. Michigan Univ.,* 55 F.3d 1177 (6th Cir. 1995) (striking down university discriminatory harassment policy because it was overbroad, vague, and not a valid prohibition on fighting words); *UWM Post, Inc.* v. *Bd. of Regents of Univ. of Wisconsin Sys.,* 774 F.Supp. 1163 (E.D. Wis. 1991) (striking down university speech code that prohibited, *inter alia,* 'discriminatory comments' directed at an individual that 'intentionally . . . demean' the 'sex . . . of the individual' and 'create an intimidating, hostile or demeaning environment for education, university related work, or other university-authorized activity'); *Doe* v. *Univ. of Mich.,* 721 F. Supp. 852 (E.D. Mich. 1989) (similar); *Iota XI Chapter of Sigma Chi Fraternity* v. *George Mason Univ.,* 993 F.2d 386 (4th Cir. 1993) (overturning on First Amendment grounds university's sanctions on a fraternity for conducting an 'ugly woman contest' with 'racist and sexist' overtones) The difficulties associated with speech codes simply underscore the limited nature of a university's control over student behavior that may be viewed as sexual harassment.''). Presumably, the majority believed that ensuring that even verbal harassment that meets the severe, pervasive, and objectively offensive standard avoids this constitutional problem; the majority expressed a similar rationale in response to the dissent's contention that the majority opinion permitted too much liability against recipients. *Davis,* 526 U.S. at 651–53.

[720] *Davis,* 526 U.S. at 653 (''Petitioner alleges that her daughter was the victim of repeated acts of sexual harassment by G. F. over a 5-month period, and there are allegations in support of the conclusion that G. F.'s misconduct was severe, pervasive, and objectively offensive. *The harassment was not only verbal; it included numerous acts of objectively offensive touching,* and, indeed, G. F. ultimately pleaded guilty to criminal sexual misconduct.'') (emphasis added).

commenters [721] arguing that the *Davis* definition of sexual harassment is not necessary for protection of First Amendment freedoms because harassment is unprotected if it creates a hostile environment, and because schools have authority to regulate harassing speech, do not support a conclusion that a categorical ''harassment exception'' exists under First Amendment law and do not justify applying a standard lower than the *Davis* standard for speech-based harassment in the educational context. For example, the statement in a legal commentary frequently cited by commenters that ''[t]here is no legitimate First Amendment or academic freedom protection afforded to unwelcome sexual conduct that creates a hostile educational environment'' contains no citations to legal authority.[722] Likewise, commenters citing *Tinker* v. *Des Moines Indep. Comm. Sch. Dist.* for the proposition that school officials can regulate student speech if they reasonably forecast ''substantial disruption of or material interference with school activities'' or if the speech involves ''invasion of the rights of others'' fail to acknowledge: (i) In *Tinker* the Supreme Court struck down the school decision in that case forbidding students from wearing armbands expressing opposition to war because that expressive conduct was akin to pure speech warranting First Amendment protection; [723] (ii) the *Tinker* Court insisted that the ''substantial disruption'' or ''interference with school activities'' exceptions only apply where school officials have more than unspecified fear of disruption or interference; [724] and (iii) the precise scope of *Tinker's* ''interference with the rights of others'' language is unclear, but is comparable to the *Davis* standard.[725] By requiring threshold levels of serious interference with work or education environments before sexual harassment is actionable, the Supreme Court standards under *Meritor* [726] (for the workplace) and *Davis* [727] (for schools, colleges, and universities) prevent these non-discrimination laws from infringing on speech and academic freedom,[728] precisely because non-discrimination laws are not ''categorically immune from First Amendment challenge when they are applied to prohibit speech solely on the basis of its expressive content.'' [729]

The First Amendment plays a crucial role in ensuring that the American government remains responsive to the will of the people and effects peaceful change by fostering free, robust exchange of ideas,[730] including those relating to sex-based equality and dignity.[731] There is no doubt that words can wound, and speech can feel like an ''assault, seriously harm[ing] a private individual'' with effects that often

[721] *E.g., Tinker* v. *Des Moines Indep. Cmty. Sch. Dist.,* 393 U.S. 503, 513–14 (1969); Joanna L. Grossman & Deborah L. Brake, *A Sharp Backward Turn: Department of Education Proposes to Protect Schools, Not Students, in Cases of Sexual Violence,* Verdict (Nov. 29, 2018).

Brake, *A Sharp Backward Turn: Department of Education Proposes to Protect Schools, Not Students, in Cases of Sexual Violence,* Verdict (Nov. 29, 2018) (stating, without citation to legal authority, the proposition that ''There is no legitimate First Amendment or academic freedom protection afforded to unwelcome sexual conduct that creates a hostile environment'').

[723] *Tinker,* 393 U.S. at 505–06 (''the wearing of armbands in the circumstances of this case was entirely divorced from actually or potentially disruptive conduct by those participating in it. It was closely akin to 'pure speech' which, we have repeatedly held, is entitled to comprehensive protection under the First Amendment.'').

[724] *Id.* at 508 (''undifferentiated fear or apprehension of disturbance is not enough to overcome the right to freedom of expression'').

[725] *B.H. ex rel. Hawk* v. *Easton Area Sch. Dist.,* 725 F.3d 293 (3d Cir. 2013) (''As we have repeatedly noted, the precise scope of *Tinker*'s 'interference with the rights of others' language is unclear.'') (internal quotation marks and citation omitted); *cf.* Brett A. Sokolow *et al., The Intersection of Free Speech and Harassment Rules,* 38 Hum. Rights 19 (2011) (''The *Tinker* standard is comparable to the *Davis* standard, which places the threshold for harassment at the point where conduct 'bars the victim's access to an educational opportunity,' in that speech can be restricted only when the educational process is substantially impeded. In other words, when reviewing school policies, and the implementation thereof, it is critical to ensure students are being disciplined as a result of the objective impact of their speech, and not solely based on its content and/or the feelings of those to whom that speech is targeted.'').

[726] *Meritor,* 477 U.S. at 67; *see also* John F. Wirenius, *Actions as Words, Words as Actions: Sexual Harassment Law, the First Amendment and Verbal Acts,* 28 Whittier L. Rev. 905, 908 (2007) (arguing that the hostile work environment doctrine, properly understood with its critical threshold requirement that harassing speech be severe or pervasive enough to create an objectively hostile or abusive work environment, converts harassing speech into ''verbal conduct'' that may be regulated under Title VII consistent with the First Amendment). Similarly, when harassing speech is severe, pervasive, and objectively offensive enough to create deprivation of equal educational access it may be regulated under Title IX consistent with the First Amendment.

[727] *Davis,* 526 U.S. at 651 (''Rather, a plaintiff must establish sexual harassment of students that is so severe, pervasive, and objectively offensive, and that so undermines and detracts from the victims' educational experience, that the victim-students are effectively denied equal access to an institution's resources and opportunities.''); Brett A. Sokolow, *et al., The Intersection of Free Speech and Harassment Rules,* 38 Hum. Rights 19 (2011) (cautioning that institutional anti-harassment policies must not prevent students from exercising rights of speech and expression, a result that the *Davis* standard makes clear).

[728] *E.g.,* Brett A. Sokolow *et al., The Intersection of Free Speech and Harassment Rules,* 38 Hum. Rights 19, 20 (2011) (''[S]chool regulations and actions that impact speech must be content and viewpoint neutral and must be narrowly tailored to fit the circumstances. These regulations must be clear enough for a person of ordinary intelligence to understand, or courts will find them unconstitutionally void for vagueness. They cannot overreach by covering both protected and unprotected speech or courts will find them unconstitutionally overbroad. The regulation cannot act to preemptively prevent students from exercising their right to freely express themselves because the courts will find the prior restraint of speech presumptively unconstitutional.'') (''In some ways, activist courts, agencies, and educational messages about civility and tolerance may have given a false impression that any sexist, ageist, racist, and so forth, remark is tantamount to harassment. As a society, we now use the term 'harassment' to mean being bothered, generically. We must distinguish generic harassment from discriminatory harassment. The standard laid out in *Davis* . . . makes this clear: To be considered discriminatory harassment, the conduct in question must be 'so severe, pervasive, *and* objectively offensive that it effectively bars the victim's access to an educational opportunity or benefit.' '') (emphasis in original).

[729] *Saxe,* 240 F.3d at 209.

[730] *See Terminiello* v. *City of Chicago,* 337 U.S. 1, 4 (1949) (''The vitality of civil and political institutions in our society depends on free discussion. . . . [I]t is only through free debate and free exchange of ideas that government remains responsive to the will of the people and peaceful change is effected. The right to speak freely and to promote diversity of ideas and programs is therefore one of the chief distinctions that sets us apart from totalitarian regimes. Accordingly a function of free speech under our system of government is to invite dispute. It may indeed best serve its high purpose when it induces a condition of unrest, creates dissatisfaction with conditions as they are, or even stirs people to anger. Speech is often provocative and challenging. It may strike at prejudices and preconceptions and have profound unsettling effects as it presses for acceptance of an idea. That is why freedom of speech, though not absolute . . . is nevertheless protected against censorship or punishment, unless shown likely to produce a clear and present danger of a serious substantive evil that rises far above public inconvenience, annoyance, or unrest.'') (internal citations omitted).

[731] Azhar Majeed, *The Misapplication of Peer Harassment Law on College and University Campuses and the Loss of Student Speech Rights,* 35 Journal of Coll. & Univ. L. 385, 397 (2009) (''In drafting and applying their harassment policies, colleges and universities frequently target protected speech merely because the expression in question is alleged to be sexist, prejudicial, or demeaning. . . . This approach ignores the fact that even explicitly sexist or racist speech is entitled to protection, and all the more so where it espouses views on important issues of social policy. Few people would disagree, for example, that the subjects of relations between the sexes, women's rights, and the pursuit of economic and social equality are all important matters of public concern and debate. Therefore, speech relating to such topics, regardless of whether it takes a favorable or negative view of women, is highly germane to the debate of public matters and social policy. In the marketplace of ideas, these expressions should not be suppressed merely to avoid offense or discomfort.'') (citing *Am. Booksellers Ass'n* v. *Hudnut,* 771 F.2d 323 (7th Cir. 1985) (holding invalid under the First Amendment a statute that prohibited pornography depicting the subordination of women because the statute was a content-based restriction—that is, it applied not to all sexual depictions but to depictions of women in a disfavored manner).

linger.[732] Nonetheless, serious risks attach to soliciting the coercive power of government to enforce even laudable social norms such as respect and civility.[733] Even low-value speech warrants constitutional protection, in part because government should not be the arbiter of valuable versus worthless expression.[734] This principle holds true for elementary and secondary schools as well as postsecondary institutions.[735] Schools, colleges, and universities, and their students and employees, who find speech offensive, have numerous avenues to confront offensive speech without ''the means of imposing unique limitations upon speakers who (however benightedly) disagree.''[736]

The Department believes that the tension between student and faculty freedom of speech, and regulation of speech to prohibit sexual harassment, is best addressed through rules that prohibit harassing and assaultive physical conduct, while ensuring that harassment in the form of speech and expression is evaluated for severity, pervasiveness, objective offensiveness, and denial of equal access to education. This is the approach taken in the § 106.30 definition of sexual harassment, under which *quid pro quo* harassment and Clery Act/VAWA offenses receive *per se* treatment as actionable sexual harassment, while other forms of harassment must meet the *Davis* standard. This approach balances the ''often competing demands of the First Amendment's express guarantee of free speech and the Fourteenth Amendment's implicit promise of dignity and equality.'' [737]

Contrary to commenters' assertions, evidence that broadly and loosely worded anti-harassment policies have infringed on constitutionally protected speech and academic freedom is widely available.[738] The fact that broadly-

[732] *Snyder* v. *Phelps,* 562 U.S. 443, 461 (2011) (Breyer, J., concurring); s*ee also Davis,* 526 U.S. at 651–52 (acknowledging that gender-based banter, insults, and teasing can be upsetting to those on the receiving end).

[733] Catherine J. Ross, *Assaultive Words and Constitutional Norms,* 66 Journal of Legal Educ. 739, 744 (2017) (''Recently, students have been in the vanguard, demanding that offensive speech be silenced. Students ask to be protected from hurtful words, sentiments, even gestures, and inadvertent facial clues or rolling eyes that communicate dismissal. They seek the coercive power of authority to enforce laudable social norms—respect, dignity, and equality regardless of race, ethnicity, gender, gender identity, and so forth. Meritorious as these proclaimed goals are, the rules and penalties some students lobby for would suppress the expressive rights of others including students, faculty, and invited guests, a particularly disturbing prospect at an institution devoted to the academic enterprise.'').

[734] *Id.* at 749–50 (2017) (''Many people question whether rude epithets, crude jokes, and disparaging statements are the kind of expression that merits First Amendment protection. The Supreme Court has long held the Constitution protects the right to speak 'foolishly and without moderation.' You might maintain that racist, misogynist and other vile speech makes no contribution at all to the exchange of ideas—but the Speech Clause protects even so-called low-worth expression, in large part because no public authority can be trusted to distinguish valuable from worthless expression. The government cannot ban hateful expression, no matter how hurtful.'') (citing *Cohen* v. *California,* 403 U.S. 15, 25–26 (1971)). Furthermore, permitting censorship of speech in an effort to be on the right side of history with respect to racial or sexual equality ignores the role that commitment to the First Amendment has played in achieving milestones for racial and sexual equality. *See, e.g.,* Nadine Strossen, *Regulating Racist Speech on Campus: A Modest Proposal?,* 1990 Duke L. J. 484, 536–37 (1990) (''History demonstrates that if the freedom of speech is weakened for one person, group, or message, then it is no longer there for others. The free speech victories that civil libertarians have won in the context of defending the right to express racist and other anti-civil libertarian messages have been used to protect speech proclaiming anti-racist and pro-civil libertarian messages. For example, in 1949, the ACLU defended the right of Father Terminiello, a suspended Catholic priest, to give a racist speech in Chicago. The Supreme Court agreed with that position in a decision that became a landmark in free speech history. Time and again during the 1960s and 1970s, the ACLU and other civil rights groups were able to defend free speech rights for civil rights demonstrators by relying on the *Terminiello* decision [*Terminiello* v. *City of Chicago,* 337 U.S. 1 (1949)].'') (internal citations omitted); *see also* Anthony D. Romero, *Equality, Justice and the First Amendment, American Civil Liberties Union* (ACLU) (Aug. 15, 2017), *https://www.aclu.org/blog/free-speech/equality-justice-and-first-amendment* (explaining that the ACLU's nearly century-long history defending freedom of speech ''including speech we abhor'' is due to belief that ''our democracy will be better and stronger for engaging and hearing divergent views. Racism and bigotry will not be eradicated if we merely force them underground. Equality and justice will only be achieved if society looks such bigotry squarely in the eyes and renounces it. . . . There is another reason that we have defended the free speech rights of Nazis and the Ku Klux Klan. . . . We simply never want government to be in a position to favor or disfavor particular viewpoints.'').

[735] *See* Catherine J. Ross, *Assaultive Words and Constitutional Norms,* 66 Journal of Legal Educ. 739, 754–55 (2017) (''Constitutional doctrine asks our youngest students to use the traditional constitutional responses to vile speech: Walk away, don't listen, or respond with 'more and better speech.' These general First Amendment principles apply with at least as much vigor to college campuses, where most students are adults, not schoolchildren, the guiding ethos of higher education supplements constitutional mandates, and students are not compelled to attend. Looking at what the Constitution requires in grades K–12 reveals a lot about what we should expect the adults enrolled in college to have the capacity to withstand. Since our constitutional framework expects this degree of coping from children beginning in elementary school, it is not asking too much of college students to handle offensive sentiments by using the standard First Amendment tools: Walk away, throw the pamphlet in the trash, get off the screen or, even better, tackle objectionable speech with more and better speech.'') (discussing and citing *Nuxoll* v. *Indian Prairie Sch. Dist. # 204,* 523 F.3d 668, 672 (7th Cir. 2008); *Saxe* v. *State Coll. Area Sch. Dist.,* 240 F.3d 200, 202 (3d Cir. 2001); *Nixon* v. *N. Local Sch. Dist. Bd. of Educ.,* 383 F. Supp. 2d 965, 967 (S.D. Ohio 2005)).

[736] *R.A.V.,* 505 U.S. at 395–96. As a commenter observed, recipients retain the ability and discretion to respond to offensive speech by a student (or employee) by providing the complainant with supportive measures, responding to the offensive speech with institutional speech, or offering programming designed to foster a welcoming campus climate more generally.

[737] Catherine J. Ross, *Assaultive Words and Constitutional Norms,* 66 Journal of Legal Educ. 739, 739 (2017) (''Campuses are rocked by racially and sexually offensive speech and counter speech. Offensive speech and counter speech, including demonstrations and calls for policies that shield the vulnerable and repercussions for offenders, are both protected by the Constitution. Yet some college administrations regulate this protected speech. Expression on both sides of a cultural and political divide brings to the fore a conflict that has been simmering in legal commentary for about two decades: The tension between the often competing demands of the First Amendment's express guarantee of free speech and the Fourteenth Amendment's implicit promise of dignity and equality. This clash between two fundamental principles seems to have been exacerbated recently by a renewed focus on identity politics both on campus and in national and international affairs.'').

[738] *E.g.,* Azhar Majeed, *The Misapplication of Peer Harassment Law on College and University Campuses and the Loss of Student Speech Rights,* 35 Journal of Coll. & Univ. L. 385, 391–92 (2009) (discussing examples of universities punishing protected speech including: A student-employee charged with racial harassment merely for reading a book entitled *Notre Dame vs. The Klan;* finding a professor guilty of racial harassment for explaining in a Latin American Politics class that the term ''wetbacks'' is commonly used as a derogatory reference to Mexican immigrants; investigating a criminal law professor for a sexually hostile environment where the professor's exam presented a hypothetical case in which a woman seeking an abortion felt thankful after she was attacked because the physical attack resulted in the death of her fetus; finding a student guilty of sexual harassment for posting flyers joking that freshman women could lose weight by using the stairs); *see also* Nadine Strossen, Law Professor and former ACLU President, 2015 Richard S. Salant Lecture on Freedom of the Press at Harvard University (Nov. 5, 2015), *https://shorensteincenter.org/nadine-strossen-free-expression-an-endangered-species-on-campus-transcript/* (identifying the free speech and academic freedom problems with ''the overbroad, unjustified concept of illegal sexual harassment as extending to speech with any sexual content that anyone finds offensive,'' opining that the current college climate exalts a misplaced concept of ''safety'' by insisting that ''safety seeks protection from exposure to ideas that make one uncomfortable . . . . [W]hen it comes to safety, our students are being doubly disserved. Too often, denied safety from physical violence, which is critical for their education, but too often granted safety from ideas, which is antithetical to their education,'' and detailing numerous examples ''of campus censorship in the guise of punishing sexual harassment'' including: Subjecting a professor to investigation for writing an essay critical of current sexual harassment policies; punishing a professor who, during a lecture, paraphrased Machiavelli's comments about raping the goddess Fortuna; finding a professor guilty of sexual harassment for teaching about sexual topics in a graduate-level course called ''Drugs and Sin in American Life;'' suspending a professor for showing a documentary that examined the adult film industry; punishing a professor for having students play roles in a scripted skit about prostitution in a course on deviance; punishing a professor for requiring a class to write essays defining pornography; firing an early

worded anti-harassment policies have been applied to protected speech ''leads many potential speakers to conclude that it is better to stay silent and not risk the consequences of being charged with harassment. . . . This halts much campus discussion and debate, taking away from the campus's function as a true marketplace of ideas.'' [739] Where speech and expression are not given sufficient ''breathing room,'' the ''safety valve'' function of speech is diminished.[740] Furthermore, even seemingly low-value speech can have a ''downstream effect of leading to constructive discussion and debate which would not have taken place otherwise.'' [741] For these reasons, the § 106.30 definition of sexual harassment is designed to capture non-speech conduct broadly (based on an assumption of the education-denying effects of such conduct), while applying the *Davis* standard to verbal conduct so that the critical purposes of both Title IX and the First Amendment can be met.

Changes: None.

So Severe

Comments: Some commenters asserted that the ''so severe'' element of the second prong of the § 106.30 definition means that recipients must ignore many harassment incidents that result in academic, economic, and psychological harm and suffering including depression and post-traumatic stress disorder, whereas the better approach is to treat any level of harassment as seriously as the most severe level. Some commenters asserted that schools should never try to tell a survivor what was or was not severe because the survivor is the only person who can determine what was severe. Other commenters wondered what threshold determines an incident as ''severe,'' whether severity refers to the mental impact on the victim or the physical nature of the unwelcome conduct (or both), and how a victim is expected to prove severity.

Discussion: For reasons discussed above, the Department believes that severity is a necessary element to balance protection from sexual harassment with protection of freedom of speech and expression. The Department interprets the *Davis* standard formulated in § 106.30 as subjective with respect to the unwelcomeness of the conduct (*i.e.,* whether the complainant viewed the conduct as unwelcome), and the final regulations clarify that the elements of severity, pervasiveness, objective offensiveness, and resulting denial of equal access are determined under a reasonable person standard.[742] In this way, evaluation of whether harassment is ''severe'' appropriately takes into account the circumstances facing a particular complainant, such as the complainant's age, disability status, sex, and other characteristics. This evaluation does not burden a complainant to ''prove severity,'' because a complainant need only describe what occurred and the recipient must then consider whether the described occurrence was severe from the perspective of a reasonable person in the complainant's position.

Changes: None.

And Pervasive

Comments: Many commenters believed that the ''pervasive'' element of the second prong of the § 106.30 definition means that students would be forced to endure repeated, escalating levels of harassment before seeking help from schools, and that by the time schools must intervene it might be too late because victims will already have suffered emotional harm and derailed educational futures (*e.g.,* ineligibility for an advanced placement course or rejection from admission to a dream college after grades dropped due to harassment that was not deemed pervasive). Several commenters asserted that every instance of discrimination deserves investigation, or else patterns of harassment will not be discovered because each single instance will be dismissed as not ''pervasive.'' Some such commenters argued that without an investigation, a school will not know whether a single instance of an inappropriate remark or joke is truly an isolated incident or part of a pattern. A few commenters argued that especially in elementary and secondary schools, students whose reports are turned away for not being ''pervasive'' will be very unlikely to report again when the conduct repeats and does become pervasive.

Several commenters described scenarios that they asserted would not be covered as sexual harassment under § 106.30 because they fail to meet the pervasive element even though such scenarios present severe, objectively offensive, threatening, humiliating, harm-inducing consequences on victims, including: A professor blocking a teaching assistant's exit from a small office while badgering the assistant with sexual insults; a teacher inappropriately touching a student while making sexually explicit comments during an after-school meeting; students posting videos of ''revenge porn'' on social media.

Discussion: The Department reiterates that *quid pro quo* harassment and Clery Act/VAWA offenses (sexual assault, dating violence, domestic violence, and stalking) constitute sexual harassment under § 106.30 without any evaluation for pervasiveness. Thus, students do not have to endure repeated incidents of such abuse without recourse from a recipient. The Department further reiterates that recipients retain discretion to provide supportive measures to any complainant even

---

childhood education professor who had received multiple teaching awards, for occasionally using vulgar language and humor about sex in her lectures about human sexuality).

L. 385, 397 (2009) (''Of course, sexual and racial harassment policies, regardless of the terms in which they are drafted, are oftentimes applied against protected speech, which again leads many potential speakers to conclude that it is better to stay silent and not risk the consequences of being charged with harassment. . . . The unfortunate result, then, is that students have a strong incentive to refrain from saying anything provocative, inflammatory, or bold and to instead cautiously stick to that which is mundane or conventional. This halts much campus discussion and debate, taking away from the campus's function as a true marketplace of ideas.''); *id.* at 432–34 (discussing several Federal court cases striking down university anti-harassment codes as applied to constitutionally protected speech, including *Cohen* v. *San Bernardino Valley Coll.,* 92 F.3d 968 (9th Cir. 1996); *Iota Xi Chapter of Sigma Chi Fraternity* v. *George Mason Univ.,* 993 F.2d 386 (4th Cir. 1993); *Silva* v. *Univ. of N.H.,* 888 F. Supp. 293 (D. N.H. 1994)).

[740] Azhar Majeed, *The Misapplication of Peer Harassment Law on College and University Campuses and the Loss of Student Speech Rights,* 35 Journal of Coll. & Univ. L. 385, 398–99 (2009) (''Furthermore, one of the benefits of providing breathing room for such expression is that it allows the speaker to espouse his or her views through constructive dialogue rather than act out of frustration by committing acts of violence or hate crimes. This outlet has been labeled the 'safety valve' function of speech.'').

[741] *Id.* (''By exposing the real ugliness of prejudice, ignorance and hate, such speech can reach and convince people in ways that polite conversation never could. Moreover, ignorant or misguided speech, though seemingly possessing little value or merit on its own, often has the 'downstream' effect of leading to constructive discussion and debate which would not have taken place otherwise. Consequently, the initial expression greatly benefits the marketplace of ideas and enriches students' understanding of important issues by increasing the potential for real and meaningful debate on campus.'').

[742] *See Davis,* 526 U.S. at 653–54 (applying the severe, pervasive, objectively offensive, denial of access standard to the facts at issue under an objective approach) (''Petitioner alleges that her daughter was the victim of repeated acts of sexual harassment by G. F. over a 5-month period, and there are allegations in support of the conclusion that G. F.'s misconduct was severe, pervasive, and objectively offensive. The harassment was not only verbal; it included numerous acts of objectively offensive touching, and, indeed, G. F. ultimately pleaded guilty to criminal sexual misconduct. . . . Further, petitioner contends that the harassment had a concrete, negative effect on her daughter's ability to receive an education.'').

where the harassment is not pervasive. The Department disagrees that an investigation into every offensive comment or joke is necessary in order to discern whether the isolated comment is part of a pervasive pattern of harassment. For reasons discussed above, chilling speech and expression by investigating each instance of unwelcome speech is not a constitutionally permissible way of ensuring that unlawful harassment is not occurring. The Department appreciates commenters' concerns that if a complainant receives no support after reporting one incident (that does not rise to the level of actionable harassment under Title IX) the complainant may feel deterred from reporting again if the harassment escalates and meets the *Davis* standard. This is one reason why the Department emphasizes that recipients remain free to provide supportive measures even where alleged conduct does not meet the § 106.30 definition of sexual harassment, and to utilize institutional speech and provide general programming to foster a respectful educational environment, none of which requires punishing or chilling protected speech.

With respect to the scenarios presented by commenters as examples of harassment that may not meet the *Davis* standard because of lack of pervasiveness, the Department declines to make definitive statements about examples, due to the necessarily fact-specific nature of the analysis. However, we note that sexual harassment by a teacher or professor toward a student or subordinate may constitute *quid pro quo* harassment, which does not need to meet a pervasiveness element. The *Davis* standard as applied in § 106.30 is broad, encompassing any unwelcome conduct on the basis of sex that a reasonable person would find so severe, pervasive, and objectively offensive that a person is effectively denied equal educational access. Disseminating ''revenge porn,'' or conspiring to sexually harass people (such as fraternity members telling new pledges to ''score''), or other unwelcome conduct that harms and humiliates a person on the basis of sex may meet the elements of the *Davis* standard including pervasiveness, particularly where the unwelcome sex-based conduct involves widespread dissemination of offensive material or multiple people agreeing to potentially victimize others and taking steps in furtherance of the agreement. Finally, a single instance of unwelcome physical conduct may meet definitions of assault or battery prohibited by other laws, even if the incident does not meet one of the three prongs of the § 106.30 definition of sexual harassment.

Changes: None.

Objectively Offensive

Comments: Several commenters argued that the ''objectively offensive'' element of the second prong of the § 106.30 definition will mean different things to different school officials, and result in similar incidents being investigated by some schools and not by others. Several commenters asserted that ''objectively offensive'' creates an unnecessary and inappropriate scrutiny of victims and their experiences, creating barriers to reporting and making campuses less safe, contributing to victim-blaming, perpetuating myths and misconceptions about sexual violence, and minimizing the harm caused by sexual harassment.

Several commenters asserted that nothing is ''objectively'' offensive because what is offensive is based on how conduct subjectively makes a person feel yet ''objective'' means not influenced by personal feelings; these commenters argued that therefore the term ''objectively offensive'' is an oxymoron. At least one commenter argued that research shows that individuals experience sex-based misconduct differently, depending on prior life experiences, previous victimization, and other factors.[743]

Commenters similarly opined that offensiveness depends on the impact of the conduct, not the intent of the perpetrator. One commenter opined that cat-calling may not sound objectively threatening, yet knowing that cat-calling and similar objectification of women may contribute to physical violence against women [744] might cause a woman targeted by cat-calling to feel unsafe.

At least one commenter argued that what is ''objectively offensive'' tends to be interpreted as what white, privileged men would find to be offensive, lending itself to a ''boys will be boys'' attitude that excuses a lot of behavior that offends women and marginalized individuals. One commenter recommended that the Department issue guidance for what factors to consider so that unconscious bias does not impact evaluation of what conduct is ''offensive.'' One commenter claimed that the § 106.30 definition fails to account for the intersectional dynamics (race, gender, sexual orientation, culture, etc.) that may impact the severity and objective offensiveness of an act. This commenter argued that since the purpose of having an investigation is to decide whether conduct was in fact severe, pervasive, and objectively offensive it makes little sense to require schools to dismiss claims at the outset when the rape culture pyramid explains how small microaggressions and supposedly ''less severe'' offenses fuel a culture for severe behaviors to become normalized. This commenter recommended that ''objectively offensive'' should be defined and understood with a high bar for sensitive, respectful language and conduct towards all in the community.

At least one commenter argued that because violence against women is often normalized,[745] and perpetrators of even heinous sexual crimes rationalize their behaviors through victim blaming,[746] these social realities make it very difficult for any act of sexual violence or harassment to be deemed ''objectively offensive'' even when the acts are disruptive or traumatic to the victim. At least one commenter asserted that the § 106.30 definition eliminates the possibility of recipients focusing on unique or personally harmful situations; for example, when private or ''inside'' jokes do not seem offensive to outsiders but have a harmful connotation for the victim.

Several commenters noted that under case law, what is objectively offensive is analyzed from the perspective of a reasonable person standing in the shoes of the complainant, using an approach that rejects disaggregation of allegations and instead looks at the aggregate or cumulative impact of conduct.[747] One commenter urged the Department to clarify that whether conduct is ''severe, pervasive, and objectively offensive'' depends on evaluation by a reasonable person and the hypothetical ''reasonable person'' must consider both male and female views of what is ''offensive.''

At least one commenter argued that the ''objectively offensive'' element undermines a longstanding analytic requirement that recipients evaluate

conduct from both objective and subjective viewpoints (*e.g.,* 2001 Guidance at p. 5).

Discussion: The Department agrees with commenters who note that whether harassing conduct is ''objectively offensive'' must be evaluated under a reasonable person standard, as a reasonable person in the complainant's position,[748] though the Department declines to require a commenter's suggestion that the ''reasonable person'' standard must consider offensiveness from both male and female perspectives because the latter suggestion would invite application of sex stereotypes. The final regulations revise the second prong of the § 106.30 definition to expressly state that the *Davis* elements are determined under a reasonable person standard.

The Department disagrees that ''objectively offensive'' is oxymoronic; the objective nature of the inquiry simply means that evaluation is made by a reasonable person considering whether, standing in the shoes of the complainant, the conduct would be offensive. The reasonable person standard appropriately takes into account whether a reasonable person, in the position of the particular complainant, would find the conduct offensive, thus the standard should not result in victims being blamed or excluded from receiving support regardless of whether the school officials evaluating the conduct share the same race, sex, age, or other characteristics as the complainant. It would be inappropriate for a Title IX Coordinator to evaluate conduct for objective offensiveness by shrugging off unwelcome conduct as simply ''boys being boys'' or make similar assumptions based on bias or prejudice. To take that approach would risk evidencing sex-based bias in contravention of § 106.45(a) or bias for or against a complainant or respondent in violation of § 106.45(b)(1)(iii), in addition to indicating improper evaluation of the *Davis* elements under a reasonable person standard. For reasons discussed under § 106.45(b)(1)(iii), the Department leaves recipients flexibility to decide the content of the training required for Title IX personnel under that provision, and nothing in the final regulations precludes a recipient from addressing implicit or unconscious bias as part of such training.

The Department disagrees that this standard inappropriately results in different schools making different decisions about what is objectively offensive. The Department believes that a benefit of the *Davis* standard as formulated in the second prong of § 106.30 is that whether harassment is actionable turns on both subjectivity (*i.e.,* whether the conduct is unwelcome, according to the complainant) and objectivity (*i.e.,* ''objectively offensive'') with the *Davis* elements determined under a reasonable person standard, thereby retaining a similar ''both subjective and objective'' analytic approach that commenters point out is used in the 2001 Guidance.[749] The fact-specific nature of evaluating sexual harassment does mean that different people may reach different conclusions about similar conduct, but this is not unreasonable because the specific facts and circumstances of each incident and the parties involved may require different conclusions. The *Davis* standard does not require an ''intent'' element; unwelcome conduct so severe, pervasive, and objectively offensive that it denies a person equal educational opportunity is actionable sexual harassment regardless of the respondent's intent to cause harm.

The Department disagrees that the objectively offensive element results in unnecessary scrutiny of victims' experiences that will create reporting barriers, make campuses less safe, lead to victim-blaming, or perpetuate sexual violence myths and misconceptions. The *Davis* standard ensures that all students, employees, and recipients understand that unwelcome conduct on the basis of sex is actionable under Title IX when a reasonable person in the complainant's position would find the conduct severe, pervasive, and objectively offensive such that it effectively denies equal access to the recipient's education program or activity.

For reasons explained above, the Department appreciates commenters' concerns that even conduct characterized by commenters as low-level harassment (such as cat-calling and microaggressions) can be harmful, and that some situations have escalated from minor incidents into violence and even homicide against women. This is why, in response to commenters, we have revised final § 106.30 to include as *per se* sexual harassment every incident of the Clery Act/VAWA offenses of dating violence, domestic violence, and stalking (in addition to sexual assault, which was referenced in the NPRM and remains part of the final regulations). In this way, the § 106.30 definition stands firmly against sex-based physical conduct, including violence and threats of violence, while ensuring that verbal and expressive conduct is punishable as Title IX sex discrimination only when the conduct crosses a line from protected speech into sexual harassment that denies a person equal access to education. For the same reasons, the § 106.30 definition pushes back against an historical, societal problem of normalizing violence against women. By not imposing an ''intent'' element into the sexual harassment definition, § 106.30 makes clear that sexual harassment under any part of the § 106.30 definition cannot be excused by trying to blame the victim or rationalize the perpetrator's behavior, tactics pointed to by commenters (and supported by research) as common reasons why victims (particularly women) have often faced dismissiveness, shame, or ridicule when reporting sex-based violence to authorities.

Changes: We have revised the second prong of the § 106.30 definition to expressly state that the *Davis* elements are determined under a reasonable person standard.

Effectively Denies Equal Access

Comments: Many commenters objected to the element in the second prong of the § 106.30 definition that conduct ''effectively denies a person equal access'' as a confusing, stringent, unduly restrictive standard that will harm survivors, benefit perpetrators, and send the message to assailants that non-physical sexual harassment is acceptable. At least one commenter stated that requiring conduct to rise to the level of denying a person equal access to the recipient's education program or activity is inconsistent with the language of Title IX because it is a higher bar than the statute's provision (20 U.S.C. 1681) that ''no person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected

[748] *See Davis,* 526 U.S. at 653–54 (applying the severe, pervasive, objectively offensive, denial of access standard to the facts at issue under an objective approach) (''there are allegations in support of the conclusion that G. F.'s misconduct was severe, pervasive, and objectively offensive. The harassment was not only verbal; it included numerous acts of objectively offensive touching''); *see also Oncale* v. *Sundowner Offshore Serv., Inc.,* 523 U.S. 75, 81 (1998) (''We have emphasized, moreover, that the objective severity of harassment should be judged from the perspective of a reasonable person in the plaintiff's position, considering all the circumstances.'') (internal quotation marks and citations omitted.).

[749] 2001 Guidance at 5 (conduct should be evaluated from both a subjective and objective perspective); *id.* at fn. 39 (citing case law for the proposition that whether conduct is severe, or objectively offensive, must be judged from the perspective of a reasonable person in the complainant's position, such as *Harris* v. *Forklift Sys., Inc.,* 510 U.S. 17, 20–22 (1993) (requiring subjective and objective creation of a hostile work environment)).

to discrimination under any educational program or activity receiving federal financial assistance.'' Several commenters asserted that waiting until a complainant's access to education has been denied means that students must wait for help until harassing or violent behaviors cause victims to reach a breaking point, making a mockery of institutional responsibility and the values of an educational community.

Many commenters believed that the ''effectively denies equal access'' element supports a culture that conveys acceptance of sexual harassment of women as long as the victims continue showing up to school, leaving girls and women in situations that are difficult and discouraging without recourse until they have lost access altogether. Many commenters believed that in order to file a Title IX complaint meeting this element, a victim would need to drop out of school entirely, fail a class, have a panic attack, be unable to function, or otherwise provide evidence of denial of access. Commenters argued that this standard makes no sense because help should be given to complainants before access has been denied, and will lead to more victims dropping out of school. One commenter relayed a personal story of sexual assault and stated that the commenter felt deterred from reporting the incident because the commenter was unsure whether, under the NPRM, the university would consider the incident significant enough to respond, despite the fact that the commenter knew of witnesses who could attest to the incident, and the commenter had to switch out of a class to avoid crossing paths with the perpetrator.

Many commenters believed that this element has a perverse effect of leaving students who demonstrate resilience by managing to attend classes and participate in educational activities despite being subjected to harassment and abuse without protection from the harassment they suffer. A few commenters opposed this element because it places the focus on a survivor's response to trauma instead of on the unwelcome conduct itself, when everyone responds differently to trauma. One commenter recounted an experience of reporting sexual violence to the police and being told that they did not appear ''traumatized enough'' to be credible; the commenter argued that this element of the § 106.30 definition leaves too much subjectivity with school officials to interpret a victim's reaction to trauma.[750]

One commenter supported the proposed rules because for the first time the Department is regulating sexual harassment as a form of sex discrimination under Title IX, and sexual assault as a form of sexual harassment, but expressed concern that many commenters interpret the ''effectively denies equal access'' element as requiring students to drop out of school before action can be taken, amounting to a ''constructive expulsion'' requirement that is much more strict than what Title IX requires. Many commenters expressed the belief that this element means harassment is not actionable unless a complainant has been effectively driven off campus, and most of these commenters urged the Department to use ''denies or limits'' or simply ''limits'' instead of ''effectively denies'' to clarify that unwelcome conduct is actionable when it limits (not only when it has already denied) equal access to education. Many such commenters noted that the 2001 Guidance used ''deny or limit'' to recognize that students should not be denied a remedy for sexual harassment because they continue to come to class or participate in athletic practice no matter at what personal or emotional cost. At least one commenter stated that the 2001 Guidance only prohibits conduct that is sufficiently serious to deny or limit a student's educational benefits or opportunities from both a subjective and objective perspective, so if the purpose of the proposed definition is to minimize its misapplication to low-level situations that remain protected by the First Amendment (for public institutions) and principles of academic freedom (for private institutions), that could be accomplished simply through clarification of the 2001 Guidance rather than adopting the *Davis* definition.

Several commenters wondered how a victim is supposed to prove effective denial, and stated that such a hurdle only perpetuates the harmful concept of ''the perfect victim'' that already causes too many victims to question whether their experience has been ''bad enough'' to be considered valid and worthy of intervention. One commenter asserted that knowledge about high functioning depression is growing more common, but a victim who is attending classes and does not appear significantly affected might believe they cannot even report sexual harassment and must continue suffering in silence. One commenter wondered if this element would mean that a third grade student sexually harassed by a sixth grade student who still attends school but expresses anxiety to their parent every day, begins bed-wetting, or cries themselves to sleep at night, has experienced ''effective denial'' or not. The same commenter further wondered if a ninth grader joining the wrestling team who gets sexually hazed by teammates has been ''effectively denied'' access if he quits the team but still carries on with other school activities. Another commenter stated that ''deny access'' would seem to allow for a professor to make inappropriate gender related jokes, making students of that gender feel uncomfortable in the class and potentially perform poorer, although they still attend class, so thus they are not ''denied,'' but rather just ''negatively impacted.''

One commenter argued that this element mirrors the statutory language of ''excluded from participation,'' but neglects the other two clauses (denial of benefits and subjected to discrimination) in the Title IX statute. This commenter stated that while this higher standard might be appropriate under the Supreme Court's rubric for Title IX private lawsuits, the Department should not reduce its own administrative authority because sexual harassment can, and does, deny people educational benefits and opportunities even without excluding them entirely from access to education. This commenter argued that if Congress intended for the denial of benefits clause to be as narrow as the exclusion from participation clause, Congress would not have bothered using the two phrases separately; rules of statutory construction mean that Congress does not use words accidentally or without meaning. The commenter argued that a plain interpretation of the Title IX statute means that a lower level of denial of benefits could violate Title IX as much as a higher level of exclusion from participation. The commenter asserted that this does not mean that a very minor limitation of access would meet the standard, but some limitations (short of ''denial'') should meet the standard and must be covered by Title IX.

One commenter expressed concern over the varied interpretations of ''access'' to educational activities among Federal courts, noting that some interpret it narrowly (*i.e.,* the ability of a student to enter in or begin an educational activity) while others interpret it more broadly (*i.e.,* the ability to enter into an educational activity free from discriminatory experiences). Another commenter requested clarification that the Department

[750] Commenters cited: Rebecca Campbell, *Survivors' Help-Seeking Experiences With the Legal and Medical Systems,* 20 Violence & Victims 1 (2005), for the proposition that trauma cannot be identified or understood by looking at someone and everyone responds to trauma in a different manner.

interprets the ''effective denial of equal access'' element as not just physical inability to attend classes but also where a complainant experiences negative impacts on learning opportunities. Some commenters expressed concern that recipients will be confused about whether they are obligated to intervene if a student skips class to avoid a harasser, has difficulty focusing in class because of harassment, or suffers a decline in their grade point average (GPA) due to harassment, since these consequences have not yet cut off the student's ''access'' to education.

A few commenters expressed concern that this element could have detrimental effects on international students because they rely on student visas that require them to meet a certain academic performance, so waiting until academic performance has suffered may be too late to help the international student because the student may already have lost their student visa. At least one commenter argued that this element is inappropriate in the elementary and secondary school context because the time-limited nature of education during the developmental years means that requiring inaction until a student has already lost educational access impedes basic civil rights.

One commenter wondered if a recipient exercising disciplinary power over student misconduct that does not affect the complainant's access to its program or activity, but declining to do so for sexual harassment, would be making a gender-based exception that constitutes sex discrimination in violation of Title IX.

Several commenters urged the Department to adopt an alternative approach adapted from workplace sexual harassment law, under which unwelcome conduct is actionable where it creates an environment reasonably perceived (and actually perceived) as hostile and abusive, altering work conditions, without requiring any showing of a tangible adverse action or psychological harm.[751] One such commenter urged the Department to adopt this ''tried and tested formula'' because the harm done to a survivor's educational access and performance should be just one factor in determining whether harassing conduct creates an environment which would be reasonably perceived as hostile, and no single factor should be dispositive but rather based on the totality of all the circumstances.[752] One commenter suggested replacing ''effectively denies a person's equal access'' with ''effectively bars a person's access to an educational opportunity or benefit'' because the former sets too high a standard while the ''effectively bars'' phrase is used in *Davis*.[753]

A few commenters argued that eliminating hostile environment in its entirety from analyses of sexual harassment leaves victims without recourse and reflects the Department's ignorance of the realities of sexual violence because conduct considered benign when examined in isolation can be oppressive and limiting when considered in the context of sexual trauma. One such commenter argued that the decision to eliminate the concept of ''hostile environment'' without anything in its place is a callous decision that fundamentally contradicts the purpose of Title IX. This commenter contended that harassment in the form of cat-calling, for instance, creates a hostile environment even without interfering with access to education, and should not be tolerated.

One commenter stated that the NPRM is inconsistent because at some points, the Department writes that schools must intervene in harassment that ''effectively denies a person *equal* access to the recipient's education program or activity,'' but at other points, the Department omits the critical word ''equal'' before ''access.''

Discussion: The Department understands commenters' concerns that the ''effectively denies a person equal access'' element sets too high a bar for a sexual harassment complainant to seek assistance from their school, college, or university. The Department reiterates that this element does not apply to the first or third prongs of the § 106.30 definition (*quid pro quo* harassment and Clery Act/VAWA offenses, none of which need a demonstrated denial of equal access in any particular situation because the Department agrees with commenters that such acts inherently jeopardize equal educational access).

The Department appreciates the opportunity to clarify that, contrary to many commenters' fears and concerns, this element does *not* require that a complainant has already suffered loss of education before being able to report sexual harassment. This element of the *Davis* standard formulated in § 106.30 requires that a person's ''equal'' access to education has been denied, not that a person's total or entire educational access has been denied. This element identifies severe, pervasive, objectively offensive unwelcome conduct that deprives the complainant of *equal* access, measured against the access of a person who has not been subjected to the sexual harassment. Therefore, we do not intend for this element to mean that more victims will withdraw from classes or drop out of school, or that only victims who do so will have recourse from their schools.

This element is adopted from the Supreme Court's approach in *Davis,* where the Supreme Court specifically held that Title IX's prohibition against exclusion from participation, denial of benefits, and subjection to discrimination applies to situations ranging from complete, physical exclusion from a classroom to denial of *equal* access.[754] In line with this approach, the § 106.30 definition does not apply only when a complainant has been entirely, physically excluded from educational opportunities but to any situation where the sexual harassment ''so undermines and detracts from the victims' educational experience, that the victim-students are effectively denied equal access to an institution's resources and opportunities.'' [755] Neither the Supreme Court, nor the final regulations in § 106.30, requires showing that a complainant dropped out of school, failed a class, had a panic attack, or otherwise reached a ''breaking point'' in order to report and receive a recipient's supportive response to sexual harassment. The Department acknowledges that individuals react to sexual harassment in a wide variety of ways, and does not interpret the *Davis* standard to require certain manifestations of trauma or a ''constructive expulsion.'' Evaluating whether a reasonable person in the

[751] Commenters cited: *Harris,* 510 U.S. at 22.

[752] Commenters cited: *Harris,* 510 U.S. at 22–23 (''This is not, and by its nature cannot be, a mathematically precise test . . . But we can say that whether an environment is 'hostile' or 'abusive' can be determined only by looking at all the circumstances . . . no single factor is required.'').

[753] Commenters cited: *Davis,* 526 U.S. at 640 (''that such an action will lie only for harassment that is so severe, pervasive, and objectively offensive that it effectively bars the victim's access to an educational opportunity or benefit'').

[754] *See Davis,* 526 U.S. at 651 (''*It is not necessary, however, to show physical exclusion* to demonstrate that students have been deprived by the actions of another student or students of an educational opportunity on the basis of sex. Rather, a plaintiff must establish sexual harassment of students that is so severe, pervasive, and objectively offensive, and that so undermines and detracts from the victims' educational experience, that the victim-students are effectively denied *equal access* to an institution's resources and opportunities.'') (emphasis added).

[755] *See id.* at 650–652 (describing the denial of access element variously as: ''depriv[ing] the victims of access to the educational opportunities or benefits provided by the school,'' ''effectively den[ying] *equal access* to an institution's resources and opportunities'' and ''den[ying] its victims the *equal access* to education that Title IX is designed to protect.'') (emphasis added).

complainant's position would deem the alleged harassment to deny a person ''equal access'' to education protects complainants against school officials inappropriately judging how a complainant has reacted to the sexual harassment. The § 106.30 definition neither requires nor permits school officials to impose notions of what a ''perfect victim'' does or says, nor may a recipient refuse to respond to sexual harassment because a complainant is ''high-functioning'' or not showing particular symptoms following a sexual harassment incident.

School officials turning away a complainant by deciding the complainant was ''not traumatized enough'' would be impermissible under the final regulations because § 106.30 does not require evidence of concrete manifestations of the harassment. Instead, this provision assumes the negative educational impact of *quid pro quo* harassment and Clery Act/VAWA offenses included in § 106.30 and evaluates other sexual harassment based on whether a reasonable person in the complainant's position would be effectively denied *equal* access to education compared to a similarly situated person who is not suffering the alleged sexual harassment. Thus, contrary to commenters' concerns, victims do not need to suffer in silence, and do not need to worry about what types of symptoms of trauma will be ''bad enough'' to ensure that a recipient responds to their report. Commenters' examples of a third grader who starts bed-wetting or crying at night due to sexual harassment, or a high school wrestler who quits the team but carries on with other school activities following sexual harassment, likely constitute examples of denial to those complainants of ''equal'' access to educational opportunities even without constituting a total exclusion or denial of an education, and the Department reiterates that no specific type of reaction to the alleged sexual harassment is necessary to conclude that severe, pervasive, objectively offensive sexual harassment has denied a complainant ''equal access.''

For reasons described above, the Department believes that adoption and adaption of the *Davis* standard better serves both the purposes of Title IX's non-discrimination mandate and constitutional protections of free speech and academic freedom, and thus the final regulations retain the *Davis* formulation of effective denial of equal access rather than the language used in Department guidance documents. While commenters correctly assert that the Department is not required to use the *Davis* standard, for the reasons explained in the ''Adoption and Adaption of the Supreme Court's Framework to Address Sexual Harassment'' section of this preamble, the Department is persuaded that the Supreme Court's Title IX cases provide the appropriate backdrop for Title IX enforcement, and the Department has intentionally adapted that framework for administrative enforcement to provide additional protections to complainants (and respondents) not required in private Title IX litigation. With respect to the denial of equal access element, neither the *Davis* Court nor the Department's final regulations require complete exclusion from an education, but rather denial of ''equal'' access. Signs of enduring *unequal* educational access due to severe, pervasive, and objectively offensive sexual harassment may include, as commenters suggest, skipping class to avoid a harasser, a decline in a student's grade point average, or having difficulty concentrating in class; however, no concrete injury is required to conclude that serious harassment would deprive a reasonable person in the complainant's position of the ability to access the recipient's education program or activity on an equal basis with persons who are not suffering such harassment. This clarification addresses the concerns of some commenters that a rule requiring total denial of access would harm international students whose student visas may be in jeopardy if their academic performance suffers, and the similar concerns from commenters that waiting to help until an elementary school student has dropped out of school would irreparably damage the student's educational pathways. For the same reasons, § 106.30 does not raise the issue identified by a commenter as to whether a school would be violating Title IX by requiring a student to suffer total exclusion before responding to sexual harassment as compared to other types of misconduct.

For reasons described above, the Department is persuaded by Supreme Court reasoning that different standards for actionable harassment are appropriate under Title IX (for educational environments) and Title VII (for the workplace). However, neither law requires ''tangible adverse action or psychological harm'' before the sexual harassment may be actionable, as a commenter feared would be required under these final regulations.

The Department agrees that the Supreme Court used a variety of phrasing through the majority opinion to describe the ''denial of equal access'' element. However, the Department does not agree with the commenter who suggested that using ''effectively bars access to an educational opportunity or benefit '' instead of ''effectively denies equal access to an education program or activity'' yields a broader or better formulation, and in fact, the Department believes that under the *Davis* Court's reasoning, denial of ''equal access'' to a recipient's education program or activity reflects a broad standard that appropriately captures situations of unequal access due to sex discrimination, in conformity with Title IX's non-discrimination mandate, and § 106.30 reflects this standard by using the phrase ''effectively denies a person equal access.''

The Department disputes that § 106.30 eliminates the concept of hostile environment ''without anything in its place.'' While the concept of a hostile environment originated under Title VII to describe sexual harassment creating a hostile or abusive workplace environment altering the conditions of a complainant's job, when interpreting Title IX the Supreme Court carefully applied a standard tailored to address the particular discriminatory ill addressed by Title IX: Denying a person ''the equal access to education that Title IX is designed to protect.'' [756] Contrary to the contention of some commenters that all unwelcome conduct must be covered by Title IX even if it does not interfere with education, Title IX is concerned with sex discrimination in an education program or activity, but as discussed above, does not stand as a Federal civility code that requires schools, colleges, and universities to prohibit every instance of unwelcome or undesirable behavior. The Department acknowledges that the 2001 Guidance and 2017 Q&A use the phrase ''hostile environment'' to describe sexual harassment that is not *quid pro quo* harassment [757] and that these final regulations depart from those guidance documents by describing sexual harassment as actionable when it effectively denies a person equal access to education rather than when the sexual harassment creates a hostile

[756] *Id.* at 652 (holding schools liable where the sexual harassment ''denies its victims the equal access to education that Title IX is designed to protect.'').

[757] 2001 Guidance at 5 (''By contrast, sexual harassment can occur that does not explicitly or implicitly condition a decision or benefit on submission to sexual conduct. Harassment of this type is generally referred to as hostile environment harassment.''); 2017 Q&A at 1. The withdrawn 2011 Dear Colleague Letter and withdrawn 2014 Q&A similarly relied on a hostile environment theory of sexual harassment. 2011 Dear Colleague Letter at 15; 2014 Q&A at 1.

environment. While the two concepts may overlap, for reasons discussed above, the denial of equal access to education element is more precisely tailored to serve the purpose of Title IX (which bars discrimination in education programs or activities) than the hostile environment concept, which originated to describe the kind of hostile or abusive *workplace* environment sexual harassment may create under Title VII.[758] Under these final regulations, where sexual harassment effectively denies a person ''equal access'' to education, recipients must offer the complainant supportive measures (designed to restore or preserve the complainant's equal educational access) [759] and, where a fair grievance process finds the respondent to be responsible for sexually harassing the complainant, the recipient must effectively implement remedies designed to restore or preserve the complainant's equal educational access.[760]

The Department appreciates commenters' pointing out that the NPRM inconsistently used the phrases ''equal access'' and ''access'' and has revised the final regulations to ensure that all provisions referencing denial of access, or preservation or restoration of access, include the important modifier ''equal.'' This will ensure that the appropriate interpretation of this element is better understood by students, employees, and recipients: That Title IX is concerned with ''equal access,'' not just total denial of access.

Changes: We have revised several provisions to ensure the word ''equal'' appears before ''access'' (*e.g.,* ''effectively denies equal access'' or ''restore or preserve equal access'') to mirror the use of ''equal access'' in § 106.30 defining ''sexual harassment,'' so that the terminology and interpretation is consistent throughout the final regulations.

Prong (3) Sexual Assault, Dating Violence, Domestic Violence, Stalking

Comments: Some commenters approved of the third prong of the § 106.30 definition's reference to the Clery Act's definition of sexual assault as part of the overall definition of ''sexual harassment.''

Many commenters supported the reference to ''sexual assault'' but contended that the third prong of the definition should also reference the other VAWA crimes included in the Clery Act regulations, namely, dating violence, domestic violence, and stalking. A few commenters requested clarification as to whether dating violence, domestic violence, and stalking would only count as sexual harassment under § 106.30 if such crimes met the second prong (severe, pervasive, and objectively offensive), and expressed concern that a single instance of an offense such as dating violence or domestic violence might fail to be included because it would not be considered ''pervasive.'' A few commenters asserted that the proposed regulations would leave dating violence, domestic violence, and stalking in an educational civil rights gray area. Many commenters urged the Department to bring the third prong of the § 106.30 definition into line with the Clery Act, as amended by VAWA, by expressly including dating violence, domestic violence, and stalking.

Several commenters argued that dating violence, domestic violence, and stalking are just as serious as sexual harassment and sexual assault.[761] A few commenters recounted working with victims where domestic violence or stalking escalated beyond the point of limiting educational access even tragically ending up in homicides. A few commenters noted that dating violence was recently added as a reportable crime under the Clery Act in part because 90 percent of all campus rapes occur via date rapes,[762] and dating violence should be included in the § 106.30 definition.

Some commenters asserted that domestic violence is prevalent among youth, and that the highest rate of dating violence and domestic violence against females occurs between the ages of 16–24,[763] precisely when victims are likely to be in high school and college, needing Title IX protections. Commenters argued that if a school fails to properly respond to a student's domestic violence situation, the student's health and school performance may suffer and even lead to the victim dropping out of school, and that a significant number of female homicide victims of college age were killed by an intimate partner.[764]

Many commenters asserted that stalking presents a unique risk to the health and safety of college students due to the significant connection between stalking and intimate partner violence [765] insofar as stalking often occurs in the context of dating violence and sexual violence. Many commenters asserted that stalking is very common on college campuses and within the college population; persons aged 18–24

[758] To the extent that the Supreme Court in *Davis* cited to Title VII cases as authority for its formulation of the ''effectively denied equal access'' element for actionable sexual harassment under Title IX, we believe that such citations indicate that the Title IX focus on ''effectively denied equal access'' element is the educational equivalent of the workplace doctrine of ''hostile environment.'' *E.g., Davis,* 526 U.S. at 651 (''Rather, a plaintiff must establish sexual harassment of students that is so severe, pervasive, and objectively offensive, and that so undermines and detracts from the victims' educational experience, that the victim-students are effectively denied equal access to an institution's resources and opportunities. *Cf. Meritor Sav. Bank, FSB* v. *Vinson, 477 U.S. at 67.*''); *id.* (''Whether gender-oriented conduct rises to the level of actionable 'harassment' thus 'depends on a constellation of surrounding circumstances, expectations, and relationships,' *Oncale* v. *Sundowner Offshore Services, Inc.,* 523 U.S. 75, 82, 140 L. Ed. 2d 201, 118 S. Ct. 998 (1998).''). Even though these final regulations do not rely on a ''hostile environment'' theory of sexual harassment, a recipient may choose to deliver special training to a class, disseminate information, or take other steps that are designed to clearly communicate the message that the school does not tolerate harassment and will be responsive to any student who reports sexual harassment, as described in the 2001 Guidance, so that no person is effectively denied equal access to education. 2001 Guidance at 16.

[759] Section 106.44(a) (requiring that with or without a grievance process, the recipient's response to sexual harassment must include promptly offering supportive measures to the complainant); § 106.30 (defining ''supportive measures'' as individualized services provided without fee or charge to complainants or respondents, designed to restore or preserve equal access to education without unreasonably burdening the other party).

[760] Section 106.45(b)(1)(i) (requiring the recipient to provide remedies to a complainant where a respondent is found responsible following a grievance process that complies with § 106.45 and stating that remedies may consist of individualized services similar to those that meet the definition in § 106.30 of supportive measures except that remedies (unlike supportive measures) may be punitive or disciplinary against the respondent, and need not avoid burdening the respondent)); § 106.45(b)(7)(iv) (stating that the Title IX Coordinator is responsible for the effective implementation of remedies).

(the average age of most college students) experience the highest rates of stalking victimization of any age group;[766] and college-aged women are stalked at higher rates than the general population and that one study showed that over 13 percent of college women had experienced stalking in the academic year prior to the study.[767] One commenter cited a study that showed that in ten percent of stalking situations the victim reported that the stalker committed, or attempted, forced sexual contact.[768] At least one commenter cited research showing that sexual assault perpetrators often employed classic stalking strategies (*e.g.,* surveillance and information-gathering) to select victims.[769] A few commenters provided examples of the kind of stalking behaviors that commonly victimize college students, including following a victim to and from classes, repeatedly contacting a student despite requests to cease communication, and threats of self-harm if a student does not pay attention to the stalker. Several commenters expressed concern that without express recognition of stalking as a sexual harassment violation, the discrete incidents involved in a typical stalking pattern might not meet the *Davis* standard and thus would not be reportable under Title IX. One commenter elaborated on an example of typical stalking behavior that would fall through the cracks of effective response under the proposed rules, where the stalking behavior is pervasive but arguably not serious (when each incident is considered separately) and the complainant declines a no-contact order because the locations where the complainant encounters the respondent are places the complainant needs to access to pursue the complainant's own educational activities. This commenter argued that failure to address sex-based stalking may have dire consequences; the commenter stated that several tragic homicides of female students[770] were preceded by this fairly standard stalking-turned-violent pattern.

Discussion: The Department appreciates commenters' support for including ''sexual assault'' referenced in the Clery Act as an independent category of sexual harassment in § 106.30 and we are persuaded by the many commenters who asserted that the other Clery Act/VAWA sex-based offenses (dating violence, domestic violence, and stalking) also should be included in the same category as sexual assault. Commenters correctly pointed out that without specific inclusion of dating violence, domestic violence, and stalking in the third prong of § 106.30, those offenses would need to meet the *Davis* standard set forth in the second prong of the § 106.30 definition. While the NPRM assumed that many such instances would meet the elements of severity and pervasiveness (as well as objective offensiveness and denial of equal access), commenters reasonably expressed concerns that these offenses may not always meet the *Davis* standard.[771] The Department agrees with commenters who urged that because these offenses concern non-expressive, often violent conduct, even single instances should not be subjected to scrutiny under the *Davis* standard. Dating violence, domestic violence, and stalking are inherently serious sex-based offenses[772] that risk equal educational access, and failing to provide redress for even a single incident does, as commenters assert, present unnecessary risk of allowing sex-based violence to escalate. The Department is persuaded by commenters' arguments and data showing that dating violence, domestic violence, and stalking are prevalent, serious problems affecting students, especially college-age students. The Department believes that a broad rule prohibiting those offenses appropriately falls under Title IX's non-discrimination mandate without raising any First Amendment concerns. The Department therefore revises the final regulations to include dating violence, domestic violence, and stalking as defined in the Clery Act and VAWA.

Changes: We have revised the third prong of the final § 106.30 definition of sexual harassment to add, after sexual assault, dating violence, domestic violence, and stalking as defined in VAWA.

Comments: One commenter objected to the reference to ''sexual assault'' in the third prong of the § 106.30 definition by asserting that the definition seemed to be just for the purpose of having sexual assault in the proposed regulations without any intent to enforce it. A few commenters believed that the third prong's reference to ''sexual assault'' will not prevent sexual assault even though reported numbers of rapes might decline, because certain situations would no longer be considered rape.

A few commenters objected to the reference to the Clery Act definition of ''sexual assault,'' asserting that the definition of ''sexual assault'' is too narrow because it fails to capture sex-based acts such as administration of a date rape drug, attempted rape, a respondent forcing a complainant to touch the respondent's genitals, the touching of a complainant's non-private body part (*e.g.,* face) with the respondent's genitals, or an unwanted and unconsented-to kiss on the cheek (even if coupled with forcing apart the complainant's legs).

One commenter believed the definition of sexual assault is too narrow because it does not include a vast number of ''ambiguous'' sexual assaults; the commenter argued that coercive sexual violence often includes a layer of guilt-inducing ambiguity that may arise from explicit or implied threats used by the perpetrator as a means of compelling nominal (but not genuine) consent. One commenter stated that from December of 2017 to December of 2018, 2,887 people in the United States Googled the question ''was I raped?'' and according to the same data from Google Trends, in the same time span, 2,311 people Googled ''rape definition'' and over the last five years, 10,781 and 12,129 people have searched for the question and definition respectively. This commenter argued that these numbers reflect a lack of certainty surrounding what constitutes rape and demonstrate the need for clarity and better education rather than a vague reference to ''sexual assault.'' Another commenter stated that sexual assault cases often fit within a certain ''gray area'' often centered on consent issues, and that most sexual violence situations are not black and white; the

[768] Commenters cited: *Id.*

[769] Commenters cited: David Lisak & Paul Miller, *Repeat Rape and Multiple Offending Among Undetected Rapists,* 17 Violence & Victims 1 (2002).

[770] Commenters described three such homicide situations: The 2010 murder of University of Virginia fourth-year student, Yeardley Love, by her boyfriend who was also a fourth-year student; the 2018 murder of University of Utah student Lauren McCluskey, by her ex-boyfriend; the 2018 murder of 16 year old Texas high schooler Shana Fisher—the first victim of the 17 year old shooter who killed ten students, beginning with Shana who had recently rejected him romantically.

[771] As commenters noted, dating violence and domestic violence may fail to meet the *Davis* standard because although a single instance is severe it may not be pervasive, while a course of conduct constituting stalking could fail to meet the *Davis* standard because the behaviors, while pervasive, may not independently seem severe.

[772] Stalking may not always be ''on the basis of sex'' (for example when a student stalks an athlete due to celebrity worship rather than sex), but when stalking is ''on the basis of sex'' (for example, when the stalker desires to date the victim) stalking constitutes ''sexual harassment'' under § 106.30. Stalking that does not constitute sexual harassment because it is not ''on the basis of sex'' may be prohibited and addressed under a recipient's non-Title IX codes of conduct.

commenter opined that Title IX should be available to help complainants whose experience is ''a little grayer'' because otherwise people will continue to pressure and coerce partners into having sex that is not truly consensual, creating more and more trauma.

At least one commenter asserted that historically, courts have considered conduct that meets any reasonable definition of criminal sexual assault, including rape, as sex-based harm under Title IX,[773] and thus a separate reference to ''sexual assault'' in the § 106.30 definition is unnecessary and only serves to blur the distinction between school-based administrative processes and criminal justice standards. Several other commenters, by contrast, pointed to at least one Federal court opinion holding that a rape failed to meet the ''severe and pervasive'' standard in private litigation under Title IX.[774]

At least one commenter expressed concern that using the Clery Act's definition of sexual assault (which includes ''fondling'' under the term ''sexual assault'') would encompass ''butt slaps'' (as ''fondling'') yet this misbehavior occurs with such frequency especially in elementary and secondary schools that school districts will be overwhelmed with needing to investigate those incidents under the strictures of the Title IX grievance process. Another commenter expressed concern that including sexual assault (particularly fondling) in the third prong of the § 106.30 definition is too broad, and wondered whether this definition could encompass innocent play by small children, such as ''playing doctor.'' This commenter argued that where the conduct at issue does not bother the participants it cannot create a subjectively hostile environment or interfere with equal access to an education, regardless of lack of consent based on being under the age of majority.[775]

One commenter argued that because the Clery Act definition of ''sexual assault'' includes incest and statutory rape, such a definition will encompass incidents that are consensual when Title IX should be focused on discriminatory conduct, which should be restricted to nonconsensual or unwanted conduct; the commenter asserted that where a half-brother and half-sister, or a 13 year old and an 18 year old, engage in consensual sexual activity the Title IX process should not be used to intervene, even if such conduct may constitute criminal offenses that can be addressed through a criminal justice system. Another commenter argued that the inclusion of statutory rape sweeps up sexual conduct by underage students no matter how consensual, welcome, and reciprocated the conduct might be, and asserted that this over-inclusion threatens to turn Title IX into enforcement of high school and first-year college students through repressive administrative monitoring of youth sexuality in instances that are not severe, not pervasive, and do not impede educational access.

One commenter described a particular institution of higher education's sexual misconduct policy as defining sexual assault broadly to include ''any other intentional unwanted bodily contact of a sexual nature,'' a standard the commenter argued is ambiguous and overbroad; the commenter argued that the final regulations should clarify that schools cannot apply a definition of ''sexual assault'' that equates all unwanted touching (such as a kiss on the cheek) with groping or penetration because it is unfair to treat kissing without verbal consent the same as a sex crime and, in the long run, makes it less likely that women will be taken seriously when sex crimes occur. This commenter also asserted that vague, overbroad definitions of sexual assault disproportionately harm students of color.[776]

Some commenters believed that the final regulations should include sexual assault in the definition but should use a definition of sexual assault different from the proposed rules' reference to ''sexual assault'' under the Clery Act regulations. One commenter believed that laypersons reading the regulation should not have to refer to yet another Federal regulation in order to know the definition of ''sexual assault.'' Another commenter stated that by including a cross-reference to the Clery Act regulation, this Title IX regulation could have its definition of sexual assault changed due to regulatory changes under the Clery Act, and that sexual assault should be explicitly defined rather than relying on a cross-reference to a different regulation. One commenter, supportive of the three-prong definition of sexual harassment in § 106.30, suggested that the provision should include a full definition of sexual assault to better clarify prohibited conduct rather than a cross-reference to the Clery Act.

A few other commenters asserted that the Clery Act definition of sexual assault poses problems; they argued that reference to the Clery Act regulations should be replaced by inserting a definition of sexual assault directly into § 106.30. One such commenter argued that the Clery Act definition of sexual assault is biased against men because under the definitions of rape and fondling, a male who performs oral sex on a female victim likely commits ''rape'' while a female who performs oral sex on a male victim at most commits ''fondling,'' but not the more serious-sounding offense of rape.

One commenter proposed an alternate definition of sexual assault that would define sexual assault by reference to crimes under each State law as classified under the FBI Uniform Crime

[773] Commenters cited: *Soper* v. *Hoben,* 195 F.3d 845, 855 (6th Cir. 1999) (assertion that victim was raped, sexually abused, and harassed obviously qualifies as severe, pervasive, and objectively offensive sexual harassment).

[774] Commenters cited: *Ross* v. *Corp. of Mercer Univ.,* 506 F. Supp. 2d 1325, 1358 (M.D. Ga. 2007) (finding that a single instance of rape was not pervasive under the *Davis* standard).

[775] Commenters cited: *Newman* v. *Federal Express,* 266 F.3d 401 (6th Cir. 2001) (racial harassment claim fails when victim is not seriously offended); *Jadon* v. *French,* 911 P.2d 20, 30–31 (Alaska 1996) (conduct that does not seriously offend the victim does not create a subjectively hostile environment and thus is not sexually harassing). Conduct must be not just ''unwelcome,'' *Meritor Sav. Bank* v. *Vinson,* 477 U.S. 57, 67–68 (1986), but also subjectively hostile and annoying to constitute sexual harassment. This commenter argued that ''sexual assault'' must include both subjective unwelcomeness and objective interference with access to education to be actionable and also cited: *Gordon* v. *England,* 612 F. App'x 330 (6th Cir. 2015) (''extreme groping'' did not create an objectively hostile environment, by itself, and thus did not violate Title VII); *Brooks* v. *City of San Mateo,* 229 F.3d 917 (9th Cir. 2000) (holding misdemeanor sexual assault involving touching of breast did not create objectively hostile environment, by itself, and thus did not violate Title VII).

[776] Commenters cited: Ben Trachtenberg, *How University Title IX Enforcement and Other Discipline Processes (Probably) Discriminate Against Minority Students,* 18 Nev. L. J. 107 (2017); Emily Yoffe, *The Question of Race in Campus Sexual-Assault Cases: Is the system biased against men of color?, The Atlantic* (September 2017) (noting that male students of color are ''vastly overrepresented'' in the cases Yoffe has tracked and arguing that as ''the definition of sexual assault used by colleges has become broader and blurrier, it certainly seems possible that unconscious biases might tip some women toward viewing a regretted encounter with a man of a different race as an assault. And as the standards for proving assault have been lowered, it seems likely that those same biases, coupled with the lack of resources common among minority students on campus, might systematically disadvantage men of color in adjudication, whether or not the encounter was interracial.''); Janet Halley, *Trading the Megaphone for the Gavel in Title IX Enforcement,* 128 Harv. L. Rev. Forum 103, 106–08 (2015) (''American racial history is laced with vendetta-like scandals in which black men are accused of sexually assaulting white women'' followed by revelations ''that the accused men were not wrongdoers after all . . . . morning-after remorse can make sex that seemed like a good idea at the time look really alarming in retrospect; and the general social disadvantage that black men continue to carry in our culture can make it easier for everyone in the adjudicative process to put the blame on them . . . . Case after Harvard case that has come to my attention . . . has involved black male respondents.'').

Reporting Program's (''FBI UCR'') National Incident-Based Reporting System (NIBRS). This commenter asserted that this alternative definition of sexual assault would better serve the Department's purpose because it does not require the Department to issue new definitions for Title IX purposes of the degree of family connectedness for incest, the statutory age of consent for statutory rape, consent and incapacity for consent for rape, and other elements in the listed sex offenses. This commenter further asserted that the commenter's alternative definition would not use the definition of rape in the FBI UCR's Summary Reporting System (SRS), because the FBI has announced that it is retiring the SRS on January 1, 2021 and will collect crime data only through NIBRS thereafter.

Another commenter asserted that the reference in § 106.30 to 34 CFR 668.46(a) for a definition of sexual assault fails to provide meaningful guidance on what conduct recipients must include under Title IX, because the Clery Act regulation relies on the FBI UCR, which is a reporting system designed to aggregate crime data across the Nation, not intended to provide guidance about what conduct is acceptable or unacceptable for enforcement purposes. Under the Clery Act regulation, this commenter points out that ''rape'' and ''fondling'' do not define what consent (or lack of consent) means, and ''fondling'' does not identify which body parts are considered ''private.'' This commenter argued that the need for clarity about what constitutes sexual assault is too important to leave recipients to muddle through vague definitions, and proposed that the third prong of § 106.30 use the following alternative definition of sexual assault: the penetration or touching of another's genitalia, buttocks, anus, breasts, or mouth without consent; a person acts without consent when, in the context of all the circumstances, the person should reasonably be aware of a substantial risk that the other person is not voluntarily and willingly engaging in the conduct at the time of the conduct; sexual assault must effectively deny a person equal access to the recipient's education program or activity.

Discussion: The Department emphasizes that including sexual assault as a form of sexual harassment is not an empty reference; the Department will enforce each part of the § 106.30 definition, including requiring recipients to respond to sexual assault, vigorously for the benefit of all persons in a recipient's education program or activity. The Department believes that the Clery Act's reference to sexual assault is appropriately broad and thus does not agree with the commenter's contention that the sexual assault reference excludes acts that should be considered rape or sexual assault.

The Department acknowledges commenters' concerns that not every act related to or potentially involved in a sexual assault would meet the Clery Act definition of sexual assault. With respect to violative acts such as commenters' examples of administration of a date rape drug, touching a non-private body part with the perpetrator's private body part, and so forth, such acts constitute criminal acts and/or torts under State laws and likely constitute separate offenses under recipients' own codes of conduct. Therefore, such egregious acts can be addressed even if they do not constitute sexual harassment under Title IX. With respect to an attempted rape, we define ''sexual assault'' in § 106.30 by reference to the Clery Act,[777] which in turn defines sexual assault by reference to the FBI UCR,[778] and the FBI has stated that the offense of rape includes attempts to commit rape.[779]

The Department disputes a commenter's contention that the sexual assault definition in § 106.30 lacks sufficient precision to capture sexual assault that occurs under what the commenter called ''guilt-inducing ambiguity'' or ''gray areas'' often centered around whether the complainant genuinely consented or only consented due to coercion. For reasons explained in the ''Consent'' subsection of the ''Section 106.30 Definitions'' section of this preamble, the Department intentionally leaves recipients flexibility and discretion to craft their own definitions of consent (and related terms often used to describe the absence or negation of consent, such as coercion). The Department believes that a recipient should select a definition of sexual consent that best serves the unique needs, values, and environment of the recipient's own educational community. So long as a recipient is required to respond to sexual assault (including offenses such as rape, statutory rape, and fondling, which depend on lack of the victim's consent), the Department believes that recipients should retain flexibility in this regard. The Department has revised the final regulations to state that it will not require recipients to adopt a particular definition of consent.[780] With respect to the commenter's point regarding a lack of certainty about what constitutes rape, the Department believes that including sexual assault in these Title IX regulations will contribute to greater societal understanding of what sexual assault is and why every person should be protected against it.

Because Federal courts applying the *Davis* standard have reached different conclusions about whether a single rape has constituted ''severe and pervasive'' sexual harassment sufficient to be covered under Title IX, we are including single instances of sexual assault as actionable under the § 106.30 definition. We believe that sexual assault inherently creates the kind of serious, sex-based impediment to equal access to education that Title IX is designed to prohibit, and decline to require ''denial of equal access'' as a separate element of sexual assault.

The Department understands the concerns of some commenters that including ''fondling'' under the term sexual assault poses a perceived challenge for recipients, particularly elementary and secondary schools, where, for instance, ''butt slaps'' may be a common occurrence. The Department appreciates the opportunity to clarify that under the Clery Act, fondling is a sex offense defined (by way of reference to the FBI UCR) as the touching of a person's private body parts without the consent of the victim *for purposes of sexual gratification.* This ''purpose'' requirement separates the sex offense of fondling from the touching described by commenters as ''children playing doctor'' or inadvertent contact with a person's buttocks due to jostling in a crowded elevator, and so forth. Where the touching of a person's private body part occurs *for the purpose of sexual gratification,* that offense warrants inclusion as a sexual assault, and if the ''butt slaps'' described by one commenter as occurring frequently in elementary and secondary schools do constitute fondling, then those elementary and secondary schools must respond to knowledge of those sex offenses for the protection of students. The definition of fondling, properly understood, appropriately guides schools, colleges, and universities to consider fondling as a sex offense under Title IX, while distinguishing touching

[777] Section 106.30 (defining ''sexual harassment'' to include ''Sexual assault'' as ''defined in 20 U.S.C. 1092(f)(6)(A)(v)'').

[778] 20 U.S.C. 1092(f)(6)(A)(v) (''The term 'sexual assault' means an offense classified as a forcible or nonforcible sex offense under the uniform crime reporting system of the Federal Bureau of Investigation.'').

[779] U.S. Dep't. of Justice, Federal Bureau of Investigation, *UCR Offense Definitions* (with respect to rape, ''Attempts or assaults to commit rape are also included''), *https://ucrdatatool.gov/offenses.cfm.*

[780] Section 106.30 (entry for ''consent'').

that does not involve the requisite ''purpose of sexual gratification'' element, which still may be addressed by a recipient outside a Title IX process. The Department notes that recipients may find useful guidance in State law criminal court decisions that often recognize the principle that, with respect to juveniles, a sexualized purpose should not be ascribed to a respondent without examining the circumstances of the incident (such as the age and maturity of the parties).[781] The Department declines to create an exception for fondling that occurs where both parties engage in the conduct willingly even though they are underage, because of an underage party's inability to give legal consent to sexual activity, and as discussed above the ''for the purposes of sexual gratification'' element of fondling protects against treating innocuous, non-sexualized touching between children as sexual harassment under Title IX.

For similar reasons, the Department declines to exclude incest and statutory rape from the definition of sexual assault. The Department understands commenters' concerns, but will not override the established circumstances under which consent cannot legally be given (*e.g.,* where a party is under the age of majority) or under which sexual activity is prohibited based on familial connectedness (*e.g.,* incest). The Department notes that where sexual activity is not unwelcome, but still meets a definition of sexual assault in § 106.30, the final regulations provide flexibility for how such situations may be handled under Title IX. For instance, not every such situation will result in a formal complaint requiring the recipient to investigate and adjudicate the incident;[782] the recipient has the discretion to facilitate an informal resolution after a formal complaint is filed;[783] the final regulations remove the NPRM's previous mandate that a Title IX Coordinator must file a formal complaint upon receipt of multiple reports against the same respondent;[784] the final regulations allow a recipient to dismiss a formal complaint where the complainant informs the Title IX Coordinator in writing that the complainant wishes to withdraw the formal complaint;[785] and the final regulations do not require or prescribe disciplinary sanctions.[786] Thus, the final regulations provide numerous avenues to avoid situations where a recipient is placed in a position of feeling compelled to drag parties through a grievance process where no party found the underlying incident unwelcome, offensive, or impeding access to education, and recipients should not feel incentivized by the final regulations to become repressive monitors of youth sexuality.[787]

The Department understands a commenter's concern that some recipients have defined sexual misconduct very broadly, including labeling a wide range of physical contact made without verbal consent as ''sexual assault.'' For reasons described above and in the ''Consent'' subsection of the ''Section 106.30 Definitions'' section of this preamble, the Department declines to require recipients to adopt particular definitions of consent, and declines to prohibit recipients from addressing conduct that does not meet the § 106.30 definition of sexual harassment under non-Title IX codes of conduct. The Department believes that recipients should retain flexibility to set standards of conduct for their own educational communities that go beyond conduct prohibited under Title IX (or, in the case of defining consent, setting standards for that element of sexual assault). The Department notes that many commenters submitted information and data showing that conduct ''less serious'' than that constituting § 106.30 sexual harassment can still have negative impacts on victims, and can escalate into actionable harassment or assault when left unaddressed[788] and therefore recipients should retain discretion to decide how to address student and employee misconduct that is not actionable under Title IX. The Department shares commenters' concerns that vague, ambiguously-worded sexual misconduct policies have resulted in some respondents being punished unfairly. The Department is equally concerned that complainants, too, have often been denied opportunity to understand and participate in Title IX grievance processes to vindicate instances of sexual violation. These concerns underlie the § 106.45 grievance process prescribed in the final regulations, for the benefit of each complainant and each respondent, regardless of race or other demographic characteristics. Thus, even if a recipient chooses a definition of ''consent'' that results in a broad range of conduct prohibited as sexual assault, the recipient's students and employees will be aware of the breadth of conduct encompassed and benefit from robust procedural protections to further each party's respective views and positions with respect to particular allegations.

The Department appreciates commenters' concerns about including sexual assault by reference to the Clery

[781] *See, e.g., In re* K.C., 226 N.C. App. 452, 457 (N.C. App. 2013) (''On the question of sexual purpose, however, this Court has previously held—in the context of a charge of indecent liberties between children—that such a purpose does not exist without some evidence of the child's maturity, intent, experience, or other factor indicating his purpose in acting[.] . . . Otherwise, sexual ambitions must not be assigned to a child's actions. . . . The element of purpose may not be inferred solely from the act itself. . . . Rather, factors like age disparity, control by the juvenile, the location and secretive nature of the juvenile's actions, and the attitude of the juvenile should be taken into account. . . . The mere act of touching is not enough to show purpose.'') (internal quotation marks and citations omitted).

[782] Section 106.30 (defining ''formal complaint'' to mean a document ''filed by a complainant or signed by a Title IX Coordinator'' and defining ''complainant'' to mean ''an individual who is alleged to be the victim of conduct that could constitute sexual harassment''). Situations where an individual does not view themselves as a ''victim'' likely will not result in the filing of a formal complaint triggering a § 106.45 grievance process.

[783] Section 106.45(b)(9) (permitting a recipient to facilitate informal resolution, with the voluntary written consent of both parties, of any formal complaint except those alleging that an employee sexually harassed a student).

[784] *See* the ''Proposed § 106.44(b)(2) Reports by Multiple Complainants of Conduct by Same Respondent [removed in final regulations]'' subsection of the ''Recipient's Response in Specific Circumstances'' section of this preamble.

[785] Section 106.45(b)(3)(ii).

[786] *See* the ''Deliberate Indifference'' subsection of the ''Adoption and Adaptation of the Supreme Court's Framework to Address Sexual Harassment'' section of this preamble, noting that the final regulations intentionally refrain from second guessing recipients' decisions with respect to imposition of disciplinary sanctions following an accurate, reliable determination reached by following a § 106.45 grievance process. This leaves recipients flexibility to decide appropriate sanctions in situations where behavior constituted sexual harassment under § 106.30 yet did not subjectively offend or distress the complainant.

[787] *See* the ''Formal Complaint'' subsection of the ''Section 106.3 Definitions'' section of this preamble, discussing the reasons why these final regulations permit a formal complaint (which triggers a recipient's grievance process) to be filed only by a complainant (*i.e.,* the alleged victim) or by the Title IX Coordinator, and explaining that a Title IX Coordinator's decision to override a complainant's wishes by initiating a grievance process when the complainant does not desire that action will be evaluated by whether the Title IX Coordinator's decision was clearly unreasonable in light of the known circumstances (that is, under the general deliberate indifference standard described in § 106.44(a)).

Benya *et al.* eds., 2018).

Act regulations at 34 CFR 668.46(a). Postsecondary institutions are already familiar with the Clery Act[789] and the Department's implementing regulations, and although the Clery Act does not apply to elementary and secondary schools, requiring schools, colleges, and universities to reference the same range of sex offenses under both the Clery Act and Title IX will harmonize compliance obligations under both statutes (for postsecondary institutions) while providing elementary and secondary school recipients with a preexisting Federal reference to sex offenses rather than a new definition created by the Department solely for Title IX purposes. In response to commenters' concerns that reference to the Clery Act regulations leaves these final regulations subject to changes to the Clery Act regulations, the final regulations now reference sexual assault by citing to the Clery Act statute (and as to dating violence, domestic violence, and stalking, the VAWA statute[790]), rather than to the Clery Act regulations. The Clery Act statute references sex offenses as defined in the FBI UCR,[791] a national crime reporting program designed to standardize crime statistics across jurisdictions. At the same time, this modification preserves the benefit of harmonizing Clery Act and Title IX obligations that arise from a recipient's awareness of sex offenses.

The Department disagrees that the Clery Act's definition of sexual assault is biased or discriminatory against men. Although under the FBI UCR definitions it is possible that, for example, oral sex performed on an unconscious woman may be designated as a different offense than oral sex performed on an unconscious man, the difference is not discriminatory or unfairly biased against men, because any such difference results from differentiation between a penetrative versus non-penetrative act, yet under the FBI UCR both offenses fall under the term sexual assault, and further, penetrative acts against both men and women (and touching the genitalia of men, and of women) all fall under FBI UCR sex offenses. While conduct might be classified differently based on whether the victim was male or female, such offenses would fall under the term sexual assault. All the sex offenses designated under the Clery Act as sexual assault represent serious violations of a person's bodily and emotional autonomy, regardless of whether a particular sexual assault is categorized as rape, fondling, or other forcible or non-forcible sex offense under the FBI UCR.

For similar reasons, the Department declines to adopt the alternative definitions of sexual assault proposed by commenters. The Department believes that, with the final regulations' modification to reference the Clery Act and VAWA statutes rather than solely the Clery Act regulations, ''sexual assault'' under § 106.30 is appropriately broad, capturing all conduct falling under forcible and non-forcible sex offenses determined by reference to the FBI UCR, while facilitating postsecondary institution recipients' understanding of their obligations under both the Clery Act and Title IX and providing an appropriate reference for elementary and secondary schools to protect students from sex offenses under Title IX.

The Department disagrees that the definitions of rape and fondling in the FBI UCR are too narrow. The violative sex acts covered by offenses described in the FBI UCR were designed to cover a broad range of sexual misconduct regardless of how different jurisdictions have defined such offenses under State criminal laws,[792] an approach that lends itself to the purpose of these final regulations, which is to ensure that recipients across all jurisdictions include a variety of sex offenses as discrimination under Title IX.

The Department disagrees that including statutory rape and incest makes the sexual assault category too broad, and declines to adopt the specific alternative definitions of sexual assault proposed by commenters. The Department believes that, in response to commenters' concerns, the final regulations appropriately capture a broad range of sex offenses referenced in the Clery Act and VAWA (which refer to the FBI UCR without specifying whether to look to the SRS or NIBRS, foreclosing any problem resulting from the FBI's transition from the SRS to the NIBRS system) while leaving recipients the discretion to select particular definitions of consent (and what constitutes a lack of consent) that best reflect each recipient's values and community standards and adopt a broader or narrower definition of, *e.g.,* fondling by specifying which body parts are considered ''private'' or whether the touching must occur underneath or over a victim's clothing. Regardless of how narrowly or broadly a recipient defines ''consent'' with respect to the FBI UCR's categories of forcible and nonforcible sex offenses, the Department believes that any such offenses would constitute conduct jeopardizing equal access to education in violation of Title IX without raising constitutional concerns, and that the § 106.45 grievance process gives complainants and respondents opportunity to fairly resolve factual allegations of such conduct.

Changes: The third prong of the § 106.30 definition of sexual harassment now references ''sexual assault'' per the Clery Act at 20 U.S.C. 1092(f)(6)(A)(v) (instead of referencing the Clery Act regulations at 34 CFR 668.46); and adds reference to VAWA to include ''dating violence'' as defined in 34 U.S.C. 12291(a)(10), ''domestic violence'' as defined in 34 U.S.C. 12291(a)(8), and ''stalking'' as defined in 34 U.S.C. 12291(a)(30).

Gender-Based Harassment

Comments: A number of commenters discussed issues related to gender-based harassment, sexual orientation, and gender identity.

[789] The Clery Act applies to institutions of higher education that receive Federal student financial aid under Title IV of the Higher Education Act of 1965, as amended; *see* discussion under the ''Clery Act'' subsection of the ''Miscellaneous'' section of this preamble.

[790] VAWA at 34 U.S.C. 12291(a)(10), (a)(8), and (a)(30), defines dating violence, domestic violence, and stalking, respectively.

[791] The Clery Act, 20 U.S.C. 1092(f)(6)(A)(v) defines ''sexual assault'' to mean an ''offense classified as a forcible or nonforcible sex offense under the uniform crime reporting system of the Federal Bureau of Investigation.'' The FBI UCR, in turn, consists of two crime reporting systems: The Summary Reporting System (SRS) and the National Incident-Based Reporting System (NIBRS). U.S. Dep't. of Justice, Criminal Justice Information Services, *SRS to NIBRS: The Path to Better UCR Data* (Mar. 28, 2017). The current Clery Act regulations, 34 CFR 668.46(a), direct recipients to look to the SRS for a definition of rape and to NIBRS for a definition of fondling, statutory rape, and incest as the offenses falling under ''sexual assault.'' The FBI has announced it will retire the SRS and transition to using only the NIBRS in January 2021. Federal Bureau of Investigation, Criminal Justice Information Services, Uniform Crime Reporting (UCR) Program, *National Incident-Based Reporting System* (NIBRS), *https://www.fbi.gov/services/cjis/ucr/nibrs.* NIBRS' forcible and nonforcible sex offenses consist of: Rape, sodomy, and sexual assault with an object (as well as fondling, statutory rape, and incest, as noted above). Thus, reference to the Clery Act will continue to cover the same range of sex offenses under the FBI UCR regardless of whether or when the FBI phases out the SRS.

[792] In explaining one of the two systems used in the FBI UCR, the FBI has stated: ''The definitions used in the NIBRS [National Incident-Based Reporting System] must be generic in order not to exclude varying state statutes relating to the same type of crime. Accordingly, the offense definitions in the NIBRS are based on common-law definitions found in *Black's Law Dictionary,* as well as those used in the *Uniform Crime Reporting Handbook* and the NCIC Uniform Offense Classifications. Since most state statutes are also based on common-law definitions, even though they may vary as to the specifics, most should fit into the corresponding NIBRS offense classifications.'' U.S. Dep't. of Justice, Uniform Crime Reporting System, *National Incident-Based Reporting System* (2011), *https://ucr.fbi.gov/nibrs/2011/resources/nibrs-offense-definitions.*

Some commenters expressed the general view that LGBTQ individuals need to be protected and were concerned that the proposed rules would make campuses even more unsafe for LGBTQ students and have a negative impact on addressing issues of gender-based discrimination and harassment.

Several commenters stated the LGBTQ community experiences sexual violence at much higher rates.

Some commenters expressed specific concerns about the impact of the proposed rules, including the definition of sexual harassment, on transgender individuals.

A few commenters also stated that transgender students should be treated consistent with their gender identity. Some commenters specifically asked the Department to maintain protections presumably found in the withdrawn Letter from James A. Ferg-Cadima, Acting Deputy Assistant Secretary for Policy, Office for Civil Rights at the Department of Education regarding transgender students' access to facilities such as restrooms dated January 7, 2015, and ''Dear Colleague Letter on Transgender Students'' jointly issued by the Civil Rights Division of the Department of Justice and the Office for Civil Rights of the Department of Education, dated May 13, 2016.[793]

Some commenters expressed concern that the proposed rules promote heterosexuality as the normal or preferred sexual orientation and therefore fail to recognize and capture the identities and experiences of the LGBTQ community and recommended that the Department explicitly state that Title IX protections apply to members of the LGBTQ community.

One commenter believed that all public school districts should adopt and enforce policies stating that harassment for any reason, including on the basis of gender identity, will not be tolerated and that appropriate disciplinary measures will be taken and urged the Department to add language to the proposed rules making clear that such harassment is within the meaning of Title IX.

Some commenters urged the Department to include specific language referring to sexual harassment based on gender identity, including transgender and gender-nonconforming identities or expressions and expressed concern about the lack of such language in the proposed rules. Some of these commenters noted that some courts have interpreted Title IX, Title VII, and similar statutes to prohibit discrimination on the basis of gender identity and sexual orientation because discrimination on either of these bases of discrimination is discrimination on the basis of sex. One commenter acknowledged that contrary case law exists, but asserted Title IX clearly prohibits discrimination on the basis of sex stereotyping which underlies discrimination, harassment, and assaults against LGBTQ people.[794]

On the other hand, one commenter stated that Title IX is about sex and not gender identity and urged the Department to make clear that biology, not gender identity, determines the definition of men and women.

Another commenter asserted that the Department's use of the phrase ''on the basis of sex'' in defining sexual harassment is limiting. This commenter asserted that the phrase ''on the basis of sex'' minimizes and confines experiences of gender discrimination and gender-based violence to a binary understanding by aligning it with sex assigned at birth.

Another commenter urged the Department to keep transgender males out of female sports categories as it is unfair to women and girls in competitions.

One commenter stated that OCR has long understood that gender-based discrimination, even where discrimination is not sexual in nature, might also fall under Title IX by creating a hostile environment for students. The commenter expressed concern that the term gender only appears once in a footnote in the proposed rules and asked how students' gender presentation, gender identity, and sexual orientation can be considered under the proposed rules and whether the Department made a conscious decision not to include gender and sexual orientation.

Another commenter asked the Department to clarify whether gender-based harassment is still covered under Title IX and whether incidents of sexual exploitation are to be included in these grievance procedures.

Other commenters were generally concerned that the proposed rules would discourage participation of women and gender nonconforming students in academia. One commenter asserted that the single greatest danger to women's health is men. The commenter reminded the Department that Title IX helps protect women (as well as those who have been harassed or assaulted) and asked the Department not to endanger women.

Another commenter recommended that the Department add language stating that sexual harassment is bi-directional (male-to-female and female-to-male).

Discussion: The Department appreciates the concerns of the commenters. Prior to this rulemaking, the Department's regulations did not expressly address sexual harassment. We believe that sexual harassment is an important issue, meriting regulations with the force and effect of law rather than mere guidance documents, which cannot create legally binding obligations.[795]

Title IX, 20 U.S.C. 1681(a), expressly prohibits discrimination ''on the basis of sex,'' which is why the Department incorporates the phrase ''on the basis of sex'' in the definition of sexual harassment in § 106.30. The word ''sex'' is undefined in the Title IX statute. The Department did not propose a definition of ''sex'' in the NPRM and declines to do so in these final regulations.

The focus of these regulations remains prohibited conduct. For example, the first prong of the Department's definition of sexual harassment concerns an employee of the recipient conditioning the provision of an educational aid, benefit, or service on an individual's participation in unwelcome sexual conduct, which is commonly referred to as *quid pro quo* sexual harassment. Any individual may experience *quid pro quo* sexual harassment. The second prong of the § 106.30 definition of sexual harassment involves unwelcome conduct on the basis of sex determined by a reasonable person to be so severe, pervasive, and objectively offensive that it effectively denies a person equal access to the recipient's education program or activity; any individual may experience this form of harassment, as well. The third prong of the sexual harassment definition in these final regulations is sexual assault, dating violence, domestic violence, or stalking on the basis of sex as defined in the Clery Act and VAWA, respectively, and again, any individual may be sexually assaulted or experience dating violence, domestic violence, or stalking on the basis of sex. Thus, any individual—irrespective of sexual orientation or gender identity—

[793] *See* U.S. Department of Education & U.S. Department of Justice, Dear Colleague Letter (Feb. 22, 2017) (withdrawing letters), *https://www2.ed.gov/about/offices/list/ocr/letters/colleague-201702-title-ix.pdf.*

[794] Commenters cited, *e.g.: R.G. & G.R. [795] *Perez* v. *Mortgage Bankers Ass'n,* 525 U.S. 92, 96–97 (2015).

may be victimized by the type of conduct defined as sexual harassment to which a recipient must respond under these final regulations.

Title IX and its implementing regulations include provisions that presuppose sex as a binary classification, and provisions in the Department's current regulations, which the Department did not propose to revise in this rulemaking, reflect this presupposition. For example, 20 U.S.C. 1681(a)(2), which concerns educational institutions commencing planned changes in admissions, refers to ''an institution which admits only students of one sex to being an institution which admits students of both sexes.'' Similarly, 20 U.S.C. 1681(a)(6)(B) refers to ''men's'' and ''women's'' associations as well as organizations for ''boys'' and ''girls'' in the context of organizations ''the membership of which has traditionally been limited to persons of one sex.'' Likewise, 20 U.S.C. 1681(a)(7)(A) refers to ''boys''' and ''girls''' conferences. Title IX does not prohibit an educational institution ''from maintaining separate living facilities for the different sexes'' pursuant to 20 U.S.C. 1686. Additionally, the Department's current Title IX regulations expressly permit sex-specific housing in 34 CFR 106.32 (''[h]ousing provided by a recipient to students of one sex, when compared to that provided to students of the other sex''), separate intimate facilities on the basis of sex in 34 CFR 106.33 (''separate toilet, locker room, and shower facilities on the basis of sex'' with references to ''one sex'' and ''the other sex''), separate physical education classes on the basis of sex in 34 CFR 106.34 (''[t]his section does not prohibit separation of students by sex within physical education classes or activities during participation in wrestling, boxing, rugby, ice hockey, football, basketball, and other sports the purpose or major activity of which involves bodily contact''), separate human sexuality classes on the basis of sex in 34 CFR 106.34 (''[c]lasses or portions of classes in elementary and secondary schools that deal primarily with human sexuality may be conducted in separate sessions for boys and girls''), and separate teams on the basis of sex for contact sports in 34 CFR 106.41 (''a recipient may operate or sponsor separate teams for members of each sex where selection for such teams is based upon competitive skill or the activity involved is a contact sport''). In promulgating regulations to implement Title IX, the Department expressly acknowledged physiological differences between the male and female sexes. For example, the Department's justification for not allowing schools to use ''a single standard of measuring skill or progress in physical education classes . . . [if doing so] has an adverse effect on members of one sex'' [796] was that ''if progress is measured by determining whether an individual can perform twenty-five push-ups, the standard may be virtually out-of-reach for many more women than men because of the difference in strength between average persons of each sex.'' [797]

The Department declines to take commenters' suggestions to include a definition of the word ''sex'' in these final regulations because defining sex is not necessary to effectuate these final regulations and has consequences that extend outside the scope of this rulemaking. These final regulations primarily address a form of sex discrimination—sexual harassment—that does not depend on whether the definition of ''sex'' involves solely the person's biological characteristics (as at least one commenter urged) or whether a person's ''sex'' is defined to include a person's gender identity (as other commenters urged). Anyone may experience sexual harassment, irrespective of gender identity or sexual orientation. As explained above, the Department acknowledged physiological differences based on biological sex in promulgating regulations to implement Title IX with respect to physical education. Defining ''sex'' will have an effect on Title IX regulations that are outside the scope of this rulemaking, such as regulations regarding discrimination (*e.g.,* different treatment) on the basis of sex in athletics. The scope of matters addressed by the final regulations is defined by the subjects presented in the NPRM, and the NPRM did not propose to define sex. The Department declines to address that matter in these final regulations. The Department will continue to look to the Title IX statute and the Department's Title IX implementing regulations with respect to the meaning of the word ''sex'' for Title IX purposes.

To address a commenter's assertion that Title IX prohibits sex stereotyping that underlies discrimination against LGBTQ individuals, the Department notes that some of the cases the commenter cited are cases under Title VII and are on appeal before the Supreme Court of the United States. The most recent position of the United States in these cases is (1) that the ordinary public meaning of ''sex'' at the time of Title VII's passage was biological sex and thus the appropriate construction of the word ''sex'' does not extend to a person's sexual orientation or transgender status, and (2) that discrimination based on transgender status does not constitute sex stereotyping but a transgender plaintiff may use sex stereotyping as evidence to prove a sex discrimination claim if members of one sex (*e.g.,* males) are treated less favorably than members of the other sex (*e.g.,* females).[798] Although the U.S. Attorney General and U.S. Solicitor General interpret the word ''sex'' solely within the context of Title VII, the current position of the United States may be relevant as to the public meaning of the word ''sex'' in other contexts as well. As explained above, the Department does not define ''sex'' in these final regulations. These final regulations focus on prohibited conduct, irrespective of a person's sexual orientation or gender identity. Whether a person has been subjected to the conduct defined in § 106.30 as sexual harassment does not necessarily require reliance on a sex stereotyping theory. Nothing in these final regulations, or the way that sexual harassment is defined in § 106.30, precludes a theory of sex stereotyping from underlying unwelcome conduct on the basis of sex that constitutes sexual harassment as defined in § 106.30.

With respect to sexual harassment as a form of sex discrimination in these final regulations, the Department's position in these final regulations

[796] 34 CFR 106.43.

[797] U.S. Dep't. of Health, Education, and Welfare, General Administration, Nondiscrimination on the Basis of Sex in Education Programs and Activities Receiving or Benefiting from Federal Financial Assistance, 40 FR 24128, 24132 (June 4, 1975). Through that rulemaking, the Department promulgated § 86.34(d), which is substantially similar to the Department's current regulation 34 CFR 106.43.

[798] *See* Brief of Respondent Equal Employment Opportunity Commission at 16, 22–27, 50–53, *R.G. & G.R. remains similar to its position in the 2001 Guidance, which provides:

Although Title IX does not prohibit discrimination on the basis of sexual orientation, sexual harassment directed at gay or lesbian students that is sufficiently serious to limit or deny a student's ability to participate in or benefit from the school's program constitutes sexual harassment prohibited by Title IX under the circumstances described in this guidance. For example, if a male student or a group of male students target a gay student for physical sexual advances, serious enough to deny or limit the victim's ability to participate in or benefit from the school's program, the school would need to respond promptly and effectively, as described in this guidance, just as it would if the victim were heterosexual. On the other hand, if students heckle another student with comments based on the student's sexual orientation (*e.g.,* ''gay students are not welcome at this table in the cafeteria''), but their actions do not involve conduct of a sexual nature, their actions would not be sexual harassment covered by Title IX.[799]

. . . [G]ender-based harassment, which may include acts of verbal, nonverbal, or physical aggression, intimidation, or hostility based on sex or sex-stereotyping, but not involving conduct of a sexual nature, is also a form of sex discrimination to which a school must respond[.] For example, the repeated sabotaging of female graduate students' laboratory experiments by male students in the class could be the basis of a violation of Title IX.

These final regulations provide a definition of sexual harassment that differs in some respects from the definition of sexual harassment in the 2001 Guidance, as explained in more detail in the ''Adoption and Adaption of the Supreme Court's Framework to Address Sexual Harassment'' section, the ''Sexual Harassment'' subsection in the ''Section 106.30 Definitions'' section, and throughout this preamble. These final regulations include sexual harassment as unwelcome conduct on the basis of sex that a reasonable person would determine is so severe, pervasive, and objectively offensive that it denies a person equal educational access; this includes but is not limited to unwelcome conduct of a sexual nature, and may consist of unwelcome conduct based on sex or sex stereotyping. The Department will not tolerate sexual harassment as defined in § 106.30 against any student, including LGBTQ students.

[799] 2001 Guidance at 3.

For similar reasons to those discussed above, the Department declines to address discrimination on the basis of gender identity or other issues raised in the Department's 2015 letter regarding transgender students' access to facilities such as restrooms and the 2016 ''Dear Colleague Letter on Transgender Students.''

These final regulations concern sexual harassment and not the participation of individuals, including transgender individuals, in sports or other competitive activities. We do not believe these final regulations serve to discourage the participation of women in a recipient's education programs and activities, including sports or other competitive activities.

These final regulations address sexual exploitation to the extent that sexual exploitation constitutes sexual harassment as defined in § 106.30, and the grievance process in § 106.45 applies to all formal complaints alleging sexual harassment.

Sexual harassment is not limited to being bi-directional (male-to-female and female-to-male). As explained above, these final regulations focus on prohibited conduct, irrespective of the identity of the complainant and respondent. As explained above, any person may experience sexual harassment as a form of sex discrimination, irrespective of the identity of the complainant or respondent.

Changes: None.

Comments: One commenter urged the Department to require that all policies, information, education, training, reporting options, and adjudication processes be accessible and fair and balanced to all students regardless of race, ethnicity, disability, sexual orientation, or other potentially disenfranchising characteristics. One commenter recommended that the Department remove ''sex discrimination issues'' from the summary section of the preamble because the scope is too narrow and inconsistent with the spirit of Title IX and discrimination in higher education extends beyond sex discrimination. This commenter also stated that the proposed rules refer to recipients' responsibilities related to actionable harassment under Title IX, but the commenter suggested that the term discrimination would be more appropriate because sex- and gender-based harassment is only one form of discrimination that Title IX prohibits. One commenter stated that if the scope of the proposed rules must be limited to sexual harassment, this scope should be clearly stated in the preamble to not give the impression that other forms of discrimination included in Title IX do not require due process.

Discussion: Title IX expressly prohibits discrimination on the basis of sex and not race, disability, or other protected characteristics, and the Department does not have the legal authority to promulgate regulations addressing discrimination on the basis of protected characteristics, other than sex, under Title IX. The Department enforces other statutes such as Title VI, which prohibits discrimination on the basis of race, color, and national origin. The Department's other regulations specifically address discrimination based on these and other protected characteristics.

These final regulations require that all policies, information, education, training, reporting options, and adjudication processes be accessible and fair for all students. For example, any complainant will be offered supportive measures, even if that person does not wish to file a formal complaint under § 106.44(a). Any respondent will receive the due process protections in the § 106.45 grievance process before the imposition of any disciplinary sanctions for sexual harassment under § 106.44(a). Additionally, the recipient's non-discrimination statement, designation of a Title IX Coordinator, policy, grievance procedures, and training materials should be readily accessible to all students pursuant to § 106.8 and § 106.45(b)(10)(i)(D).

For the reasons previously explained, the Department does not define sex in these final regulations, as these final regulations focus on prohibited conduct, namely sexual harassment as a form of sex discrimination. As previously explained, the Department's definition of sexual harassment applies for the protection of any person who experiences sexual harassment, regardless of sexual orientation or gender identity.

Although these final regulations constitute the Department's first promulgation of regulations that address sexual harassment, these final regulations also make revisions to pre-existing regulations and regulations such as regulations in subpart A and subpart B of Part 106 that generally address sex discrimination but do not specifically address sexual harassment. For example, the Department revises § 106.8, which concerns the designation of a Title IX Coordinator who will address all forms of discrimination on the basis of sex and not just sexual harassment. The Department clarifies in § 106.8(c) that a recipient must adopt and publish grievance procedures that provide for the prompt and equitable

resolution of student and employee complaints, alleging any action that would be prohibited by Part 106 of Title 34 of the Code of Federal Regulations, and also a grievance process that complies with § 106.45 for formal complaints of sexual harassment as defined in § 106.30. Section 106.8(c) thus clarifies that a recipient does not need to apply or use the grievance process in § 106.45 for complaints alleging sex discrimination that does not constitute sexual harassment.

Changes: None.

Supportive Measures

Overall Support and Opposition

Comments: Many commenters supported the definition of ''supportive measures'' in § 106.30 because the provision states that supportive measures may be offered to complainants and respondents; commenters asserted that supportive measures should be offered on an equal basis to all parties, except to the extent public safety concerns would require different treatment, stressing that respondents deal with their own strife as a result of going through the Title IX process. These commenters viewed the § 106.30 definition of supportive measures as appropriately requiring measures that do not disproportionately punish, discipline, or unreasonably burden either party. Many commenters appreciated that the § 106.30 definition of supportive measures included a list illustrating the range of services that could be offered to both parties, and several of these commenters specifically expressed strong support for mutual no-contact orders as opposed to one-way no-contact orders.

Many commenters opposed the § 106.30 definition of supportive measures because, while neither party should be presumed to be at fault before an investigation had been completed commenters argued that this provision will cause an overall decrease in the availability of support services and accommodations to victims. Commenters argued that the requirement that supportive measures be ''non-disciplinary, non-punitive,'' ''designed [but not required] to restore access,'' and not unreasonably burdensome to the non-requesting party, significantly limits the universe of supportive measures schools could offer to victims by prohibiting any measure reasonably construed as negative towards a respondent. These commenters believed the supportive measures definition was too respondent-focused and effectively prioritized the education of respondents over complainants. Several commenters identified the clause ''designed to effectively restore or preserve'' and questioned how OCR would review and determine whether a supportive measure met this requirement. One commenter asserted that supportive measures designed to restore ''access,'' as opposed to *equal* access, contradicted the proposed definition of ''sexual harassment'' in § 106.30 as well as the Supreme Court's holding in *Davis* because restoring *some* access is an incomplete remedy for a denial of *equal* access.

Several commenters requested clarification that colleges and universities have flexibility and discretion to approve or disapprove requested supportive measures, including one-way no-contact orders, according to the unique considerations of each situation. Another commenter argued that § 106.30 should be modified to expressly state that schedule and housing adjustments, or removing a respondent from playing on a sports team, do not constitute an unreasonable burden on the respondent when those measures do not separate the respondent from academic pursuits. Commenters argued that § 106.30 should clarify what kind of burdens will be considered ''unreasonable.'' Commenters urged the Department to modify the definition of supportive measures to require that all such measures be proportional to the alleged harm and the least burdensome measures that will protect safety, preserve equal educational access, and deter sexual harassment.

Many commenters suggested that the final regulations should require schools to implement a process through which the parties can seek and administrators can consider appropriate supportive measures, and at least one commenter suggested that a hearing similar to a preliminary injunction hearing under Federal Rule of Civil Procedure 65 should be used, particularly in cases where one party seeks the other party's removal from certain facilities, programs, or activities. At least one commenter asked the Department to specify that any interim measures must be lifted if the respondent is found not responsible.

Many commenters requested clarification as to what types of supportive measures are allowable in the elementary and secondary school context or requested that the Department expand the supportive measures safe harbor and definition to apply in the elementary and secondary school context. Other commenters asserted that there may be a greater need for supportive measures in cases involving international students, women in career preparatory classes such as construction, manufacturing, and wielding, and lower-income students, for whom dropping out of school could have more drastic and long-lasting consequences.

Many commenters requested that the Department reconsider or clarify the requirement in § 106.30 that the Title IX Coordinator is responsible for effective implementation of supportive measures, arguing that Title IX Coordinators cannot fulfill all the duties assigned to them under the proposed rules (especially if a recipient has only designated one individual as a Title IX Coordinator) and asserting that the responsibility to implement supportive measures could be easily delegated to other offices on campus.

Discussion: The Department appreciates commenters' support for the § 106.30 definition of supportive measures, and we acknowledge commenters' arguments that the language employed in the proposed definition of the term ''supportive measures'' is too respondent-focused or lessens the availability of measures to assist victims. The Department disagrees that this provision prioritizes the needs of one party over the other. For example, the § 106.30 definition states that the individualized services can be offered ''to the complainant or respondent'' [800] free of charge, that the services shall not ''unreasonably'' burden either party, and may include services to protect the safety ''of all parties'' as well as the recipient's educational environment, or to deter sexual harassment. The Department disagrees that the requirements for supportive measures to be non-disciplinary, non-punitive, and not unreasonably burdensome to the other party indicate a preference for respondents over complainants or prioritize the education of respondents over that of complainants. These requirements protect complainants and respondents from the other party's request for supportive measures that would unreasonably interfere with either party's educational pursuits. The

[800] We emphasize that a ''complainant'' is any individual who has been alleged to be the victim of conduct that could constitute sexual harassment, and a ''respondent'' is any individual who has been reported to be the perpetrator of conduct that could constitute sexual harassment, so a person may be a complainant or a respondent regardless of whether a formal complaint has been filed or a grievance process is pending (and irrespective of who reported the alleged sexual harassment—the alleged victim themselves, or a third party). *See* § 106.30 defining ''complainant'' and defining ''respondent.''

plain language of the § 106.30 definition does not state that a supportive measure provided to one party cannot impose *any* burden on the other party; rather, this provision specifies that the supportive measures cannot impose an *unreasonable* burden on the other party. Thus, the § 106.30 definition of supportive measures permits a wide range of individualized services intended to meet any of the purposes stated in that provision (restoring or preserving equal access to education, protecting safety, deterring sexual harassment).

We do not believe that it would be appropriate to specify, list, or describe which measures do or might constitute ''unreasonable'' burdens because that would detract from recipients' flexibility to make those determinations by taking into the account the specific facts and circumstances and unique needs of the parties in individual situations.[801] For similar reasons, we decline to require that supportive measures be ''proportional to the harm alleged'' and constitute the ''least burdensome measures'' possible, because we believe that the § 106.30 definition appropriately allows recipients to select and implement supportive measures that meet one or more of the stated purposes (*e.g.,* restoring or preserving equal access; protecting safety; deterring sexual harassment) within the stated parameters (*e.g.,* without being disciplinary or punitive, without unreasonably burdening the other party). The ''alleged harm'' in a situation alleging conduct constituting sexual harassment as defined in § 106.30 is serious harm and the definition of supportive measures already accounts for the seriousness of alleged sexual harassment while effectively ensuring that supportive measures are not unfair to a respondent; even if a supportive measure implemented by a recipient arguably was not the ''least burdensome measure'' possible, in order to qualify as a supportive measure under § 106.30 the measure cannot punish, discipline, or unreasonably burden the respondent.

To the extent that commenters are advocating for wider latitude for recipients to impose *interim* suspensions or expulsions of respondents, the Department believes that without a fair, reliable process the recipient cannot know whether it has interim-expelled a person who is actually responsible or not. Where a respondent poses an immediate threat to the physical health or safety of the complainant (or anyone else), § 106.44(c) allows emergency removals of respondents prior to the conclusion of a grievance process (or even where no grievance process is pending), thus protecting the safety of a recipient's community where an immediate threat exist. The Department believes that the § 106.30 definition of ''supportive measures'' in combination with other provisions in the final regulations results in effective options for a recipient to support and protect the safety of a complainant while ensuring that respondents are not prematurely punished.[802]

In response to commenters' concerns that omission of the word ''equal'' before ''access'' in the § 106.30 definition of supportive measures creates confusion about whether the purpose of supportive measures is intended to remediate the same denial of ''equal access'' referenced in the § 106.30 definition of sexual harassment, we have added the word ''equal'' before ''access'' in the definition of supportive measures, and into § 106.45(b)(1)(i) where similar language is used to refer to remedies. The Department appreciates the opportunity to clarify that whether or not a recipient has implemented a supportive measure ''designed to effectively restore or preserve'' equal access is a fact-specific inquiry that depends on the particular circumstances surrounding a sexual harassment incident. Section 106.44(a) requires a recipient to offer supportive measures to every complainant irrespective of whether a formal complaint is filed, and if a recipient does not provide a complainant with supportive measures, then the recipient must document the reasons why such a response was not clearly unreasonable in light of the known circumstances under § 106.45(b)(10)(ii).[803]

In order to ensure that the definition of supportive measures in § 106.30 is read broadly we have also revised the wording of this provision to more clearly state that supportive measures must be designed to restore or preserve equal access to education without unreasonably burdening the other party, which may include measures designed to protect the safety of parties or the educational environment, or deter sexual harassment. The Department did not wish for the prior language to be understood restrictively to foreclose, for example, a supportive measure in the form of an extension of an exam deadline which helped preserve a complainant's equal access to education and did not unreasonably burden the respondent but could not necessarily be considered designed to protect safety or deter sexual harassment.

The Department was persuaded by the many commenters who requested that the Department expand provisions that incentivize and encourage supportive measures. As previously noted, we have revised § 106.44(a) to require recipients to offer supportive measures to complainants. As explained in the ''Proposed § 106.44(b)(3) Supportive Measures Safe Harbor in Absence of a Formal Complaint [removed in final regulations]'' subsection of the ''Recipient's Response in Specific Circumstances'' subsection of the ''Section 106.44 Recipient's Response to Sexual Harassment, Generally'' section of this preamble, we have eliminated the proposed safe harbor regarding supportive measures altogether and, thus, we do not extend this safe harbor to elementary and secondary schools. As all recipients (including elementary and secondary school recipients) are now required to offer complainants supportive measures as part of their non-deliberately indifference response under § 106.44(a), the proposed safe harbor regarding supportive measures is unnecessary. The Department agrees that the need to offer supportive measures in the absence of, or during the pendency of, an investigation is equally as important in elementary and secondary schools as in postsecondary institutions. The final regulations revise the § 106.30 definition of supportive measures to use the word ''recipient'' instead of ''institution'' to clarify that this definition applies to all recipients, not only to postsecondary institutions.

[801] The recipient must document the facts or circumstances that render certain supportive measures appropriate or inappropriate. Under § 106.45(b)(10)(ii), a recipient must create and maintain for a period of seven years records of any actions, including any supportive measures, taken in response to a report or formal complaint of sexual harassment and must document the basis for its conclusion that its response was not deliberately indifferent. Specifically, that provision states that if a recipient does not provide a complainant with supportive measures, then the recipient must document the reasons why such a response was not clearly unreasonable in light of the known circumstances. Thus, if a recipient determines that a particular supportive measure was not appropriate even though requested by a complainant, the recipient must document why the recipient's response to the complainant was not deliberately indifferent.

[802] Section 106.44(c) (governing the emergency removal of a respondent who poses an immediate threat to any person's physical health or safety); § 106.44(d) (permitting the placement of non-student employees on administrative leave during a pending grievance process).

[803] *See* discussion in the ''Section 106.44(a) Deliberate Indifference Standard'' subsection of the ''Section 106.44 Recipient's Response to Sexual Harassment, Generally'' section of this preamble.

To preserve discretion for recipients, the Department declines to impose additional suggested changes that would further restrict or prescribe the supportive measures a recipient may or must offer, including requiring supportive measures that ''do'' restore or preserve equal access rather than supportive measures ''designed'' to restore or preserve equal access. Requiring supportive measures to be ''designed'' for that purpose rather than insisting that such measures actually accomplish that purpose protects recipients against unfair imposition of liability where, despite a recipient's implementation of measures intended to help a party retain equal access to education, underlying trauma from a sexual harassment incident still results in a party's inability to participate in an education program or activity. To the extent that commenters desire for the final regulations to specify that certain populations (such as international students) may have a greater need for supportive measures, the Department declines to revise this provision in that regard because the determination of appropriate supportive measures in a given situation must be based on the facts and circumstances of that situation. Supportive measures must be offered to every complainant as a part of a recipient's response obligations under § 106.44(a).

The Department declines to include an explicit statement that schedule and housing adjustments, or removals from sports teams or extracurricular activities, do not unreasonably burden the respondent as long as the respondent is not separated from the respondent's academic pursuits, because determinations about whether an action ''unreasonably burdens'' a party are fact-specific. The unreasonableness of a burden on a party must take into account the nature of the educational programs, activities, opportunities, and benefits in which the party is participating, not solely those educational programs that are ''academic'' in nature. On the other hand, the Department appreciates the opportunity to clarify that, contrary to some commenters' concerns, schedule and housing adjustments do not necessarily constitute an ''unreasonable'' burden on a respondent, and thus the § 106.30 definition of supportive measures continues to require that recipients consider each set of unique circumstances to determine what individualized services will meet the purposes, and conditions, set forth in the definition of supportive measures.[804] Removal from sports teams (and similar exclusions from school-related activities) also require a fact-specific analysis, but whether the burden is ''unreasonable'' does not depend on whether the respondent still has access to academic programs; whether a supportive measure meets the § 106.30 definition also includes analyzing whether a respondent's access to the array of educational opportunities and benefits offered by the recipient is unreasonably burdened. Changing a class schedule, for example, may more often be deemed an acceptable, reasonable burden than restricting a respondent from participating on a sports team, holding a student government position, participating in an extracurricular activity, and so forth.

The final regulations require a recipient to refrain from imposing disciplinary sanctions or other actions that are not supportive measures, against a respondent, without following the § 106.45 grievance process, and also require the recipient's grievance process to describe the range, or list, the disciplinary sanctions that a recipient might impose following a determination of responsibility, and describe the range of supportive measures available to complainants and respondents.[805] The possible disciplinary sanctions described or listed by the recipient in its own grievance process therefore constitute actions that the recipient itself considers ''disciplinary'' and thus would not constitute ''supportive measures'' as defined in § 106.30. If a recipient has listed ineligibility to play on a sports team or hold a student government position, for example, as a possible disciplinary sanction that may be imposed following a determination of responsibility, then the recipient may not take that action against a respondent without first following the § 106.45 grievance process. If, on the other hand, the recipient's grievance process does not describe or list a specific action as a possible disciplinary sanction that the recipient may impose following a determination of responsibility, then whether such an action (for example, ineligibility to play on a sports team or hold a student government position) may be taken as a supportive measure for a complainant is determined by whether that the action is not disciplinary or punitive and does not unreasonably burden the respondent. Certain actions, such as suspension or expulsion from enrollment, or termination from employment, are inherently disciplinary, punitive, and/or unreasonably burdensome and so will not constitute a ''supportive measure'' whether or not the recipient has described or listed the action in its grievance process pursuant to § 106.45(b)(1)(vi).

The Department reiterates that a recipient may remove a respondent from all or part of a recipient's education program or activity in an emergency situation pursuant to § 106.44(c) (with or without a grievance process pending) and may place a non-student employee respondent on administrative leave during a grievance process, pursuant to § 106.44(d).[806] Further, a recipient is obligated to conclude a grievance process within a reasonably prompt time frame, thus limiting the duration of time for which supportive measures are serving to maintain a status quo balancing the rights of both parties to equal educational access in an interim period while a grievance process is pending.

With respect to supportive measures in the elementary and secondary school context, many common actions by school personnel designed to quickly intervene and correct behavior are not punitive or disciplinary and thus would not violate the § 106.30 definition of supportive measures or the provision in § 106.44(a) that prevents a recipient from taking disciplinary actions or other measures that are ''not supportive measures'' against a respondent without first following a grievance process that complies with § 106.45. For example, educational conversations, sending students to the principal's office, or changing student seating or class assignments do not inherently constitute punitive or disciplinary actions and the final regulations therefore do not preclude teachers or school officials from taking such actions to maintain order, protect student safety, and counsel students about inappropriate behavior. By contrast, as discussed above, expulsions and suspensions would constitute disciplinary sanctions (and/or constitute punitive or unreasonably burdensome

[804] The 2001 Guidance at 16 takes a similar approach to the final regulations' approach to supportive measures, by stating that it ''may be appropriate for a school to take interim measures during the investigation of a complaint'' and for instance, ''the school may decide to place the students immediately in separate classes or in different housing arrangements on a campus, pending the results of the school's investigation'' or where the alleged harasser is a teacher ''allowing the student to transfer to a different class may be appropriate.''

[805] Section 106.44(a); § 106.45(b)(1)(i); § 106.45(b)(1)(vi); § 106.45(b)(1)(ix).

[806] For further discussion see the ''Additional Rules Governing Recipients' Responses to Sexual Harassment'' subsection of the ''Section 106.44 Recipient's Response to Sexual Harassment, Generally'' section of this preamble.

actions) that could not be imposed without following a grievance process that complies with § 106.45. The Department emphasizes that these final regulations apply to conduct that constitutes sexual harassment as defined in § 106.30, and not to every instance of student misbehavior.

These final regulations do not expressly require a recipient to continue providing supportive measures upon a finding of non-responsibility, and the Department declines to require recipients to lift, remove, or cease supportive measures for complainants or respondents upon a finding of non-responsibility. Recipients retain discretion as to whether to continue supportive measures after a determination of non-responsibility. A determination of non-responsibility does not necessarily mean that the complainant's allegations were false or unfounded but rather could mean that there was not sufficient evidence to find the respondent responsible. A recipient may choose to continue providing supportive measures to a complainant or a respondent after a determination of non-responsibility. This is not unfair to either party because by definition, ''supportive measures'' do not punish or unreasonably burden the other party, whether the other party is the complainant or respondent. There may be circumstances where the parties want supportive measures to remain in place or be altered rather than removed following a determination of non-responsibility, and the final regulations leave recipients flexibility to implement or continue supportive measures for one or both parties in such a situation.

The Department also declines to add an additional requirement that schools implement a process by which supportive measures are requested by the parties and granted by recipients, because we wish to leave recipients flexibility to develop processes consistent with each recipient's administrative structure rather than dictate to every recipient how to process requests for supportive measures. Although we do not dictate a particular process, these final regulations specify in § 106.44(a) that the Title IX Coordinator must promptly contact the complainant to discuss the availability of supportive measures as defined in § 106.30, consider the complainant's wishes with respect to supportive measures, inform the complainant of the availability of supportive measures with or without the filing of a formal complaint, and explain to the complainant the process for filing a formal complaint. Complainants will know about the possible supportive measures available to them [807] and will have the opportunity to express what they would like in the form of supportive measures, and the Title IX Coordinator will take into account the complainant's wishes in determining which supportive measures to offer. The final regulations do prescribe that a recipient's Title IX Coordinator must remain responsible for coordinating the effective implementation of supportive measures, so that the burden of arranging and enforcing the supportive measures in a given circumstance remains on the recipient, not on any party. We acknowledge commenters' concerns that these final regulations place many responsibilities on a Title IX Coordinator, and a recipient has discretion to designate more than one employee as a Title IX Coordinator if needed in order to fulfill the recipient's Title IX obligations.[808]

With respect for a process to remove a respondent from a recipient's education program or activity, these final regulations provide an emergency removal process in § 106.44(c) if there is an immediate threat to the physical health or safety of any students or other individuals arising from the allegations of sexual harassment. A recipient must provide a respondent with notice and an opportunity to challenge the emergency removal decision immediately following the removal. Additionally, the grievance process in § 106.45 provides robust due process protections for both parties, and before imposition of any disciplinary sanctions or other actions that are not supportive measures as defined in § 106.30, against a respondent, a recipient must follow a grievance process that complies with § 106.45.

We acknowledge commenters' concerns regarding the provision in the § 106.30 definition supportive measures that the Title IX Coordinator must coordinate the effective implementation of supportive measures. However, we believe it is important that students know they can work with the Title IX Coordinator to select and implement supportive measures rather than leave the burden on students to work with various other school administrators or offices. The Department recognizes that many supportive measures involve implementation through various offices or departments within a school. When supportive measures are part of a school's Title IX obligations, the Title IX Coordinator must serve as the point of contact for the affected students to ensure that the supportive measures are effectively implemented so that the burden of navigating paperwork or other administrative requirements within the recipient's own system does not fall on the student receiving the supportive measures. The Department recognizes that beyond coordinating and serving as the student's point of contact, the Title IX Coordinator will often rely on other campus offices to actually provide the supportive measures sought, and the Department encourages recipients to consider the variety of ways in which the recipient can best serve the affected student(s) through coordination with other offices while ensuring that the burden of effectively implementing supportive measures remains on the Title IX Coordinator and not on students.

Changes: We have revised the definition for supportive measures in § 106.30 to refer to ''recipients'' instead of ''institutions'' which clarifies that the definition of supportive measures is applicable in the context of elementary and secondary schools as well as in the context of postsecondary institutions. We have added ''equal'' before ''access'' in the description of supportive measures designed to restore or preserve equal access to the recipient's education program or activity. We have revised the second sentence of this provision to clarify that supportive measures must be designed to restore or preserve equal access and must not unreasonably burden the other party, which may include measures also designed to protect safety or the recipient's educational environment, or deter sexual harassment.

No-Contact Orders

Comments: Several commenters focused on the list of possible supportive measures included in the definition of supportive measures in § 106.30 and viewed the express inclusion of mutual no-contact orders as a general prohibition on one-way no-contact orders, and asked the Department to clarify whether one-way no-contact orders were prohibited. Other commenters assumed one-way no-contact orders were prohibited, and expressed concern that by disallowing one-way no-contact orders, the onus would be placed on the victim to take extreme measures to provide for their own accommodations and prevent victims from getting the support they needed, or would discourage victims

[807] Section 106.45(b)(1)(ix) requires the recipient's grievance process to describe the range of supportive measures available to complainants and respondents. Additionally, the Title IX Coordinator must contact an individual complainant to discuss the availability of supportive measures, under § 106.44(a).

[808] *See* discussion in the ''Section 106.8(a) Designation of Coordinator'' subsection of the ''Clarifying Amendments to Existing Regulations'' section of this preamble.

from reporting in the first place. Many commenters asserted that a victim would be forced to face or interact with their alleged harasser in class, in dorms, or elsewhere on campus if one-way no-contact orders were prohibited. Other commenters argued that a victim would have to win an administrative proceeding in order to be granted a one-way no-contact order. Many commenters called for the Department to remove the ''mutual restrictions on contact'' provision from the list entirely because it is not a victim-focused supportive measure. Additionally, some commenters expressed the belief that mutual no-contact orders are not enforceable because it is hard to determine which party has the burden to comply with the no-contact order if both parties are present in the same location. A few commenters believed that mutual no-contact orders would constitute unlawful retaliation against the victim since such an order would necessarily restrict the victim's own participation in programs or activities as well as the participation of the respondent. Some commenters argued that mutual no-contact orders were contrary to the public policies underlying VAWA and various State laws, and that mutual no-contact orders are analogous to reciprocal protective or restraining orders, which have been invalidated by at least one State Supreme Court.[809]

Other commenters asked the Department to expand the list in the § 106.30 definition of supportive measures to include a greater variety of allowable supportive measures. Some commenters argued that the list of possible supportive measures only included prospective measures (that might preserve access going forward) as opposed to remedial measures (that might restore access that had already been lost), and argued that the Department should explicitly mention measures aimed at restoring equal access, such as opportunities to repeat a class or retake an exam or attaching an addendum to a transcript to explain a low grade.

Discussion: We acknowledge commenters' concerns related to the inclusion of mutual no-contact orders on the non-exhaustive list of possible supportive measures in § 106.30, but the Department declines to exclude this example from the list of supportive measures. The list of possible supportive measures included in the § 106.30 definition is illustrative, not exhaustive. The inclusion of ''mutual restrictions on contact between the parties'' on the illustrative list of possible supportive measures in § 106.30 does not mean that one-way no-contact orders are never appropriate. A fact-specific inquiry is required into whether a carefully crafted no-contact order restricting the actions of only one party would meet the § 106.30 definition of supportive measures. For example, if a recipient issues a one-way no-contact order to help enforce a restraining order, preliminary injunction, or other order of protection issued by a court, or if a one-way no-contact order does not unreasonably burden the other party, then a one-way no-contact order may be appropriate. The Department also reiterates that sexual harassment allegations presenting a risk to the physical health or safety of a person may justify emergency removal of a respondent in accordance with the § 106.44(c) emergency removal provision, which could include a no-trespass or other no-contact order issued against a respondent.

The inclusion of mutual no-contact orders on an illustrative list does not mean the final regulations require complainants to face their respondents on campus, in classrooms, or in dorms. Rather, the express inclusion of mutual no-contact orders suggests that recipients can offer measures—tempered by the requirements that they are not punitive, disciplinary, or unreasonably burdensome to the other party—to limit the interactions, communications, or contact, between the parties. The final regulations do not require recipients to initiate administrative proceedings (*i.e.,* a grievance process) in order to determine and implement appropriate supportive measures. Contrary to the arguments of commenters, the Department believes that mutual no-contact may constitute reasonable restrictions imposed on both parties, because under certain circumstances such a measure serves the purposes of protecting each party's right to pursue educational opportunities, protecting the safety of all parties, and deterring sexual harassment. The Department believes that ''mutual restrictions on contact between the parties'' may in many circumstances provide benefits to the complainant, for example, where such a mutual no-contact order serves the interest of protecting safety or deterring sexual harassment by forbidding communication between the parties, which might not require either party to change dorm rooms or even re-arrange class schedules. Further restrictions, such as avoiding physical proximity between the parties, will require a fact-specific analysis to determine the scope of a no-contact order that may be appropriate under § 106.30; for example, where both parties are athletes and sometimes practice on the same field, consideration must be given to the scope of a no-contact order that deters sexual harassment, without unreasonably burdening the other party, with the goal of restricting contact between the parties without requiring either party to forgo educational activities. It may be unreasonably burdensome to prevent respondents from attending extra-curricular activities that a recipient offers as a result of a one-way no contact order prior to being determined responsible; similarly, it may be unreasonably burdensome to restrict a complainant from accessing campus locations in order to prevent contact with the respondent. In some circumstances, for example, a complainant might be offered a supportive measure consisting of a mutual no-contact order restricting either party from *communicating* with the other (which measure likely would not unreasonably burden either party). If, however, the complainant wishes to avoid all physical sightings of a respondent and not only an order prohibiting communications, if appropriate the complainant may receive a supportive measure in the form of an alternate housing assignment (without fee or cost to the complainant). The Department does not view such a supportive measure in such a circumstance as unreasonably burdening the complainant, because alternate supportive measures also would have prevented sexual harassment (by prohibiting all communication between the parties). Under § 106.44(a), a Title IX Coordinator must consider a complainant's wishes with respect to supportive measures, and if a complainant would like a different housing arrangement as part of a supportive measure, then a Title IX Coordinator should consider offering such a supportive measure.

The Department does not believe that ''mutual restrictions on contact between the parties'' could constitute unlawful retaliation by restricting the complainant's own participation in certain programs or activities of the recipient as well as that of the respondent. Such a supportive measure would simply treat both parties equally, and ''restrictions on contact'' could be limited in scope to prohibiting communications between the parties,

[809] Commenters cited: *Bays* v. *Bays,* 779 So.2d 754 (La. 2001).

which may not affect the complainant's ability to participate in classes or activities. The Department notes that the § 106.30 definition's requirements that supportive measures be non-disciplinary and non-punitive apply equally to protect complainants against a recipient taking action that punishes or sanctions a complainant. In response to commenters' concerns about complainants being unfairly punished in the wake of reporting sexual harassment, the Department added § 106.71 prohibiting retaliation. Actions taken by a recipient under the guise of ''supportive measures'' that actually have the purpose and effect of penalizing the complainant for the purpose of discouraging the complainant from exercising rights under Title IX would constitute unlawful retaliation.

We also acknowledge the various other suggested modifications to the list of supportive measures offered by commenters, but we decline to expand this list. The Department encourages recipients to broadly consider what measures they can reasonably offer to individual students to ensure continued equal access to a recipient's education program and activities for a complainant, irrespective of whether a complainant files a formal complaint, and for a respondent, when a formal complaint is filed. The Department has provided a list to illustrate the range of possible supportive measures, but the list of supportive measures is not intended to be exhaustive. Nothing in § 106.30 precludes recipients from considering and providing supportive measures not listed in the definition, including measures designed to retrospectively ''restore'' or prospectively ''preserve'' a complainant's equal educational access. We note that the § 106.30 already includes the example of ''course-related adjustments'' which could encompass several suggested measures identified by commenters, such as opportunities to retake classes or exams, or adjusting an academic transcript.

Changes: None.

Other Language/Terminology Comments

Comments: One commenter expressed concern that the terms ''survivor'' and ''victim'' used in the NPRM to describe a person who merely alleges something has happened to them are prejudicial and anti-male. Other commenters asserted that the Department's proposed regulations are biased in favor of males partly due to the use of neutral terms such as ''complainant'' and ''respondent'' instead of ''survivor'' or ''perpetrator.'' One commenter suggested that, instead of using the term ''complainant,'' the final regulations should refer to ''student survivors'' or ''those who face harassment.'' The commenter further recommended that the final regulations use the term ''perpetrator'' instead of ''respondent,'' saying that the use of the term ''respondent'' is confusing, and fails to account for perpetrators who are never formally investigated, and therefore are never in a formal respondent role (*i.e.,* because they have not responded to anything).

Discussion: The Department disagrees that the use of the term survivor or victim in the NPRM is biased, anti-male, or pro-male. The term ''survivor'' was used five times in the preamble to refer generally to individuals who have been victims of sexual harassment. The Department listened to advocates for these individuals, as we listened to other stakeholders. The use of the term survivor or victim in that context takes no position on the veracity of any particular complainant or respondent, or complainants or respondents in general. The final regulations are intended to be objective and do not use the term ''survivor'' or ''victim'' in the regulatory text, instead using the more neutral terms ''complainant'' and ''respondent.'' The final regulations are intended to be fair, unbiased, and impartial toward both complainants and respondents. When a determination of responsibility is reached against a respondent, the Department's interest is in requiring remedies for the complainant, to further the goal of Title IX by providing remedies to victims of sexual harassment aiming to restore their equal educational access. Although the final regulations do not need to use the word ''victim,'' once a reliable outcome has determined that a complainant was victimized by sexual harassment, the final regulations mandate that remedies be provided to that complainant precisely because after such a determination has been made, that complainant has been fairly, reliably shown to have been the victim of sexual harassment.

Changes: None.

Comments: One commenter expressed concern that the terms used in the NPRM reveal a clear preference in protecting the interests of a school and effectively limiting a school's liability rather than protecting the equal right for all students to have access to higher education free from discrimination.

Discussion: The Department does not have, nor does the terminology in the final regulations reflect, any preference for protecting the interests of a school or effectively limiting a school's liability rather than protecting the equal right of all students to have access to higher education free from discrimination. Although the Department is not required to adopt the deliberate indifference standard articulated by the Supreme Court, we are persuaded by the policy rationales relied on by it and believes it is the best policy approach. As the Court reasoned in *Davis,* a recipient acts with deliberate indifference only when it responds to sexual harassment in a manner that is ''clearly unreasonable in light of the known circumstances.'' [810] The Department believes this standard holds recipients accountable without depriving them of legitimate and necessary flexibility to make disciplinary decisions and to provide supportive measures that might be necessary in response to sexual harassment. Moreover, the Department believes that teachers and local school leaders with unique knowledge of the school climate and student body are best positioned to make disciplinary decisions; thus, unless the recipient's response to sexual harassment is clearly unreasonable in light of known circumstances, the Department will not second guess such decisions. In addition, the final regulations impose obligations on recipients that go beyond the deliberate indifference standard as set forth in *Davis;* for example, by requiring that recipients' non-deliberately indifferent response must include offering supportive measures to a complainant under § 106.44(a). Additionally, as explained in more detail in the ''Section 106.44(b) Proposed 'Safe Harbors,' generally'' subsection in the ''Recipient's Response in Specific Circumstances'' section, these final regulations do not include any of the proposed safe harbors in the NPRM for recipients.

Changes: None.

Comments: One commenter opposed the use of criminal terms since many of the terms that relate to the findings have legal definitions in criminal law, for which due process protections already exist, and the use of such language suggests that colleges do not want the overall Title IX process to be an educational experience and not a criminal justice proceeding.

Discussion: The Department disagrees with the commenter's contention. The Department has in no way implied that these proceedings are criminal in nature and the final regulations use terms such as ''complainant'' and ''respondent,'' ''decision-maker'' and ''determination

[810] *Davis* v. *Monroe Cnty. Bd. of Educ.,* 526 U.S. 629, 648–49 (1999).

regarding responsibility'' to describe features of the grievance process, language intentionally adopted to avoid reference to terms used in civil courts or criminal proceedings (*e.g.,* plaintiff, defendant, prosecutor, judge, verdict). In this way, the final regulations acknowledge that the resolution of allegations of Title IX sexual harassment in an education program or activity serves a different purpose and occurs in a different context from a civil or criminal court. As explained in the ''Role of Due Process in the Grievance Process'' section of this preamble, the § 106.45 grievance process is rooted in principles of due process to create a process fair to all parties and likely to result in reliable outcomes, and while the Department believes that the grievance process is consistent with constitutional due process, the § 106.45 grievance process is independent from constitutional due process because it is designed to effectuate the purposes of Title IX as a civil rights statute. The Department understands the concerns expressed by some commenters that colleges want the overall Title IX process to be an educational experience and that the outcome is administrative and believes the final regulations prescribe a consistent grievance process appropriate for administratively resolving allegations of sexual harassment in an education program or activity.

Changes: None.

Comments: One commenter suggested using the word ''discrimination'' instead of ''harassment'' in places where the NPRM describes actionable behavior because harassment does not have to occur for there to be discrimination.

Discussion: The Department declines to adopt the word ''discrimination'' instead of ''harassment'' in these final regulations. The Department's Title IX regulations already address sex discrimination, and these final regulations intend to address sexual harassment as a particular form of sex discrimination under Title IX. Complaints of sex discrimination that do not constitute sexual harassment may be made to a recipient for handling under the prompt and equitable grievance procedures that recipients must adopt under § 106.8(c). When the sex discrimination complained of constitutes sexual harassment as defined in § 106.30, these final regulations govern how recipients must respond to that form of sex discrimination.

Changes: None.

Comments: One commenter expressed concern that the NPRM used the term ''guilt,'' which equates school conduct processes to the court system and seems contrary to the NPRM's goals of distinguishing between school conduct processes and the judicial system. The commenter argued that instead, the final regulations should use the terms ''found responsible'' and ''not responsible,'' and should only draw comparisons with civil, rather than criminal, case law.

Discussion: The Department disagrees with the concern that the NPRM inappropriately used the term ''guilt.'' The word ''guilt'' appears only in two instances in the NPRM, and neither of those occurrences is in the text of the proposed regulations. In the first instance, the NPRM notes that ''Secretary DeVos stated that in endeavoring to find a 'better way forward' that works for all students, 'non-negotiable principles' include the right of every survivor to be taken seriously and the right of every person accused to know that guilt is not predetermined.'' [811] Second, the NPRM states that ''[a] fundamental notion of a fair proceeding is that a legal system does not prejudge a person's guilt or liability.'' [812] In both contexts, the NPRM was using the term guilt generally to refer to culpability for an offense. The Department also declines to revise the final regulations to use the terms ''found responsible'' and ''not responsible'' because it has already utilized similar language; for example, § 106.45(b)(1)(vi) uses ''determination of responsibility'' in the context of finding a respondent responsible and § 106.45(b)(7) employs the term ''determination regarding responsibility'' in the context of a determination that could either find the respondent responsible or non-responsible. The NPRM uses the same or similar terms.[813]

Changes: None.

Comments: Several commenters suggested that the term ''equitable'' should be used instead of ''equal'' because the two terms have different meanings, and Title IX focuses on educational equity. Without citing a specific provision, one commenter argued that ''equal'' would assume that if a translator were provided for one party, a translator must be provided for the other party.

Discussion: The Department understands commenters' concerns that ''equal'' and ''equitable'' have different implications, and the final regulations use both terms with such a distinction in mind. Where parties are given ''equal'' opportunity, for example, both parties must be treated the same. By contrast, where parties must be treated ''equitably,'' the final regulations explain what equitable means for a complainant and for a respondent. The Department disagrees that the use of ''equal'' in these final regulations is inappropriate. The equal opportunity for both parties to receive a disability accommodation does not mean that both parties *must* receive a disability accommodation or that they must receive the *same* disability accommodation. Similarly, both parties may not need a translator, and a recipient need not provide a translator for a party who does not need one, even if it provides a translator for the party who needs one.

Changes: None.

Comments: One commenter suggested using the term ''education program or activity'' instead of ''schools'' to be more consistent with statute and case law. The commenter asserted that use of the word ''schools'' may limit the ability to investigate issues that arise during sporting activities, afterschool programs, on field trips, etc.

Discussion: Although the Department declines to remove reference to ''schools,'' the Department provides a definition for ''elementary and secondary schools'' as well as ''postsecondary institutions'' in § 106.30. The Department believes that it is important to distinguish between these types of recipients as the type of hearing that a recipient must provide under § 106.45(b)(6) may be different if the recipient is an elementary or secondary school as opposed to a postsecondary institution.

To address the commenter's concerns, the Department notes that § 106.2(h) provides a definition of ''program or activity'' as all of the operations of elementary and secondary schools and postsecondary institutions. Additionally, the Department has revised § 106.44(a) to specify that for purposes of §§ 106.30, 106.44, and 106.45, an education program or activity includes locations, events, or circumstances over which the recipient exercised substantial control over both the respondent and the context in which the harassment occurs. This definition aligns with the Supreme Court's opinion in *Davis* [814] and clarifies when sporting activities, afterschool programs, or field trips constitute part of the recipient's education program or activity. The Department also revised § 106.44(a) to state that for purposes of §§ 106.30, 106.44, and 106.45, an ''education program or activity'' also includes any

[811] 83 FR 61464.

[812] 83 FR 61473.

[813] *See, e.g.,* 83 FR 61466, 61470.

[814] *Davis,* 526 U.S. at 645.

building owned or controlled by a student organization that is officially recognized by a postsecondary institution. The revisions to § 106.44(a) to help better define ''education program or activity'' are explained more fully in the ''Section 106.44(a) 'education program or activity' '' subsection of the ''Section 106.44 Recipient's Response to Sexual Harassment, Generally'' section.

Changes: The Department has revised § 106.44(a) to specify that an education program or activity includes locations, events, or circumstances over which the recipient exercised substantial control over both the respondent and the context in which the harassment occurs, and also includes any building owned or controlled by a student organization that is officially recognized by a postsecondary institution.

Comments: One commenter expressed concern that the NPRM's use of the term ''students'' is too narrow in light of the language of Title IX and current Title IX regulations, as well as the Supreme Court's repeated determinations that Title IX encompasses all individuals participating in education programs and activities. Another commenter suggested that the term ''student'' in the NPRM should be replaced with ''person'' consistent with statute and case law and because the term ''student'' may be restrictive because it does not encompass employees, volunteers, parents, and community members. One commenter expressed concern that the definition of ''student'' as a person who has gained admission is problematic because institutions of higher education, particularly those who do not have open enrollment, typically consider an applicant a student once they have submitted a deposit, indicating their acceptance of an admission offer and commitment to attend.

Discussion: The Department disagrees with the commenters who opposed the use of the term ''students.'' Title IX provides that a recipient of Federal funding may not discriminate on the basis of sex in the education program or activity that it operates and extends protections to any ''person.'' The final regulations similarly use ''person'' or ''individual'' to ensure that the Title IX non-discrimination mandate applies to anyone in a recipient's education program or activity. For example, § 106.30 defines sexual harassment as conduct that deprives ''a person'' of equal access; § 106.30 defines a ''complainant'' as an ''individual'' who is alleged to be the victim of sexual harassment. Where the final regulations use the phrase ''students and employees'' or ''students,'' such terms are used not to narrow the application of Title IX's non-discrimination mandate but to require particular actions by the recipient reasonably intended to benefit students, employees, or both; for example, § 106.8(a) requires recipients to notify ''students and employees'' of contact information for the Title IX Coordinator. Where the final regulations intend to include ''applicants for admission'' in addition to ''students'' the phrase ''applicants for admission'' is used; for example, § 106.8(b)(2)(ii) precludes recipients from using publications that state that the recipient treats applicants for admission (or employment), students, or employees differently on the basis of sex (unless permitted under Title IX). Both Title IX and existing Title IX regulations use the term ''student'' ubiquitously.[815] The existing Title IX regulations, in 34 CFR 106.2(r), define ''student'' as ''a person who has gained admission.'' ''Admission'', as defined in 34 CFR 106.2(q), ''means selection for part-time, full-time, special, associate, transfer, exchange, or any other enrollment, membership, or matriculation in or at an education program or activity operated by a recipient.'' The Department disagrees with the commenter's concern that the definition of ''student'' as a person who has gained admission is problematic. The Department does not believe the term ''student'' should be changed to reflect other persons who are not enrolled in the recipient's education program or activity. The term ''student'' as defined in 34 CFR 106.2(r) aligns with the definition of ''formal complaint'' in § 106.30 that provides at the time of filing a formal complaint, a complainant must be participating in or attempting to participate in the education program or activity of the recipient with which the formal complaint is filed.[816] A student who has applied for admission and has been admitted is attempting to participate in the education program or activity of the recipient.

Changes: None.

Comments: One commenter expressed concern that equating ''trauma-informed'' and ''impartial'' is a false equivalency that threatens to undermine the quality and efficacy of the Title IX process. The commenter argued that ''trauma-informed'' refers to a body of research, practice, and theory that teaches professionals who interact with victims to recognize that all individuals process trauma differently, to understand different responses to trauma, and to recognize ways in which we can avoid further traumatization of involved parties through sensitive questioning, mindfulness-based practices, and avoiding potentially triggering situations such as unnecessarily repetitive questioning. Further, equating these two terms is dismissive of decades of research and best practices concerning gender and sexual-based violence and harassment prevention and response.

Discussion: The Department disagrees that the final regulations equate ''trauma-informed'' and ''impartial'' in a manner that undermines the quality and efficacy of the Title IX process. It appears that the commenter prefers the Department to adopt a trauma-informed approach as a best practice. The Department understands from personal anecdotes and research studies that sexual violence is a traumatic experience for survivors. The Department is aware that the neurobiology of trauma and the impact of trauma on a survivor's neurobiological functioning is a developing field of study with application to the way in which investigators of sexual violence offenses interact with victims in criminal justice systems and campus sexual misconduct proceedings.[817] The final regulations require impartiality on the part of Title IX personnel (*i.e.,* Title IX Coordinators, investigators, decision-makers, and persons who facilitate informal resolutions) [818] to reinforce the truth-seeking purpose of a grievance process. The Department wishes to emphasize that treating all parties with dignity, respect, and sensitivity without bias, prejudice, or stereotypes infecting interactions with parties fosters impartiality and truth-seeking. While the final regulations do not use the term ''trauma-informed,'' nothing in the final regulations precludes a recipient from applying trauma-informed techniques, practices, or approaches so long as such practices are consistent with the requirements of § 106.45(b)(1)(iii) and other requirements in § 106.45.

Changes: None.

Comments: One commenter requested clarification of the numerous provisions of the proposed regulations that refer to

[815] *E.g.,* 20 U.S.C. 1681(a)(2); 34 CFR 106.36.

[816] *See* the ''Formal Complaint'' subsection in the ''Section 106.30 Definitions'' section of this preamble.

[817] *E.g.,* Jeffrey J. Nolan, *Fair, Equitable Trauma-Informed Investigation Training* (Holland & Knight updated July 19, 2019) (white paper summarizing trauma-informed approaches to sexual misconduct investigations, identifying scientific and media support and opposition to such approaches, and cautioning institutions to apply trauma-informed approaches carefully to ensure impartial investigations).

[818]

specific time frames, such as ten ''days.'' The commenter suggested that the Department clarify whether these are ''calendar'' days or ''working'' days.

Discussion: The Department appreciates the commenter's request for clarification as to how to calculate ''days'' with respect to various time frames referenced in the proposed regulations and appreciates the opportunity to clarify that because the Department does not require a specific method for calculating ''days,'' recipients retain the flexibility to adopt the method that works best for the recipient's operations; for example, a recipient could use calendar days, school days, or business days, or a method the recipient already uses in other aspects of its operations.

Changes: None.

Comments: One commenter asserted that it is unclear whether § 106.6(d) intended to cover recipients that are not government actors. The commenter suggested adding ''whether or not that recipient is a government actor'' after ''recipient.''

Discussion: As explained in the ''Role of Due Process in the Grievance Process'' section of this preamble, the Department recognizes that some recipients are State actors with responsibilities to provide due process of law and other rights to students and employees under the U.S. Constitution, while other recipients are private institutions that do not have constitutional obligations to their students and employees. The final regulations apply to all recipients covered by Title IX because fair, reliable procedures that best promote the purposes of Title IX are as important in public schools, colleges, and universities as in private ones. The grievance process prescribed in the final regulations is important for effective enforcement of Title IX and is thus consistent with, but independent of, constitutional due process. Where enforcement of Title IX's non-discrimination mandate is likely to present potential intersections with a public recipient's obligation to respect the constitutional rights of students and employees, the final regulations caution recipients that nothing in these final regulations requires a recipient to restrict constitutional rights.[819] Similarly, the Department, as an agency of the Federal government, cannot require private recipients to restrict constitutional rights. The Department will not require private recipients to abide by restrictions in the U.S. Constitution that do not apply to them. The Department, as a Federal agency, however, must interpret and enforce Title IX in a manner that does not require or cause any recipient, whether public or private, to restrict or otherwise abridge any person's constitutional rights.

Changes: None.

Comments: One commenter encouraged the Department to explicitly state that Title IX and the Title IX regulations do not apply to schools that do not receive Federal financial assistance to help protect their autonomy and Constitutional rights, which would promote diversity in education by protecting the autonomy and freedom of private and religious schools to thrive according to their stated mission and purpose. The commenter stated that their schools are committed to providing safe and equal learning opportunities for each student that they serve and noted that such language has been included in reauthorizations of the Elementary and Secondary Education Act (ESEA) and that the Every Student Succeeds Act, the most recent reauthorization passed in 2015, contains Section 8506 which specifically states, ''Nothing in this Act shall be construed to affect any private school that does not receive funds or services under this Act'' [20 U.S.C. 7886(a)].''

Discussion: The Department does not believe it is necessary to further explain in the final regulations that Title IX applies only to recipients of Federal financial assistance; the text of Title IX, 20 U.S.C. 1681, clearly states that the Title IX non-discrimination mandate applies to education programs or activities that receive Federal financial assistance, and expressly exempts educational institutions controlled by religious organizations from compliance with Title IX to the extent that compliance with Title IX is inconsistent with the religious tenets of the religious organization even if the educational institution does receive Federal financial assistance.[820] Existing Title IX regulations already sufficiently mirror that Title IX statutory language by defining ''recipient'' [821] and affirming the Title IX exemption for educational institutions controlled by religious organizations.[822]

Changes: None.

Comments: One commenter stated that the proposed regulations were not easy to understand because the ''Summary'' section of the NPRM contained too little information. The commenter asserted that although the proposed regulations were intended to protect young people, young people would not be able to understand them. Another commenter opposed the NPRM because, the commenter asserted, the details were perplexing, vague, and did not tell in sufficient detail, how the proposed rules would be implemented in terms of the behavior, conditions, and situations involved. Another commenter expressed concern that the ''sloppy and biased language'' in the NPRM needed to be corrected, pointing specifically to the summary comments at 83 FR 61462 and elsewhere in the NPRM.

Discussion: The Department acknowledges the concern from the commenter that the proposed regulations are not easy enough to understand. However, the purpose of the NPRM is to provide a basic overview of the Department's proposed actions and reasons for the proposals. The Department believes that the NPRM accomplished this purpose by providing not only a summary section but also a background section and specific discussions of each proposed provision.

The Department acknowledges the concern of the commenter that opposed the NPRM because the commenter believed the language was too vague and does not provide sufficient detail as to how the proposed rules would be implemented in specific situations. The Department believes that both the NPRM, and now these final regulations, strike an appropriate balance between containing sufficient details as to a recipient's legal obligations without improperly purporting to specify outcomes for all scenarios and situations many of which will turn on particular facts and circumstances. The Department wishes to emphasize that when determining how to comply with these final regulations, recipients have flexibility to employ age-appropriate methods, exercise common sense and good judgment, and take into account the needs of the parties involved.

The Department disagrees that any of the language in the proposed rules or final regulations is biased, and notes that the Department's choice of language throughout the text of the final regulations is neutral, impartial, and unbiased with respect to complainants and respondents.

Changes: None.

Comments: One commenter expressed concern that the final regulations should not emphasize the view that schools are

[819] *E.g.,* § 106.6(d); § 106.44(a) (stating that the Department may not deem a recipient to have satisfied the recipient's duty to not be deliberately indifferent based on the recipient's restriction of rights protected under the U.S. Constitution, including the First Amendment, Fifth Amendment, and Fourteenth Amendment).

[820] 20 U.S.C. 1681(a); 20 U.S.C. 1681(a)(3).

[821] 34 CFR 106.2(i) (defining ''recipient'').

[822] 34 CFR 106.12(a).

in a unique position to make disciplinary decisions based on school climate because all decisions, including disciplinary decisions, should be made congruent with the intent and spirit of the proposed rules. Stating that schools are in a unique position regarding decision making invites many forms of prejudice and renders decisions less reliable.

Discussion: The Department disagrees with the position that the final regulations should not emphasize the view that schools are in a unique position to make disciplinary decisions based on school climate. The Department disagrees with the commenter's conclusory assertion that by acknowledging schools are in a unique position to make such decisions that the Department invites prejudice that renders decisions less reliable. As the Supreme Court reasoned in *Davis,* Title IX must be interpreted in a manner that leaves flexibility in schools' disciplinary decisions and that does not place courts in the position of second guessing the disciplinary decisions made by school administrators.[823] As a matter of policy, the Department believes that these same principles should govern administrative enforcement of Title IX.

Changes: None.

Comments: One commenter suggested including a full list of stakeholders who were interviewed and involved in the process of developing the NPRM to establish credibility (with aliases provided to protect the privacy of individual participants), as well as the meeting minutes included as an appendix.

Discussion: The Department does not believe it is necessary to publish a full list of stakeholders who were interviewed and involved in the process of developing the NPRM to establish credibility or publish meeting minutes included as an appendix. The Department noted in the NPRM that it conducted listening sessions and discussions with stakeholders expressing a variety of positions for and against the status quo, including advocates for survivors of sexual violence; advocates for accused students; organizations representing schools and colleges; scholars and experts in law, psychology, and neuroscience; and numerous individuals who have experienced school-level Title IX proceedings as a complainant or respondent; school and college administrators; child and sex abuse prosecutors.[824] The Department believes this level of detail is sufficient to support the Department's contention that the Department conducted wide outreach in developing the NPRM.

Changes: None.

Comments: One commenter suggested including an index of terms that define legal terminology, including ''respondeat superior, ''reasonableness standard,'' ''deliberate indifference standard,'' ''constructive notice,'' and so forth because the use of legal terminology throughout these regulations without accompanying layperson's commentary or clear definition of the terminology applied throughout the proposed revisions confuse and divert attention from the actual meaning of the proposed rules.

Discussion: The Department does not believe it is necessary to include an index of terms that define legal terminology. The Department has defined key terms as necessary in § 106.30, and § 106.2 also provides relevant definitions. The remainder of the language used in the final regulations should be interpreted both in the context of the final regulations and in accordance with its ordinary public meaning.

The Department agrees that the term ''respondeat superior'' is a legal term of art that may be confusing in light of the final regulations' frequent use of the word ''respondent'' which looks very similar to the word ''respondeat'' as used in the phrase ''respondeat superior'' in the § 106.30 definition of ''actual knowledge.'' To address this concern, the Department has revised the definition of ''actual knowledge'' in § 106.30 to use the term ''vicarious liability'' instead of ''respondeat superior.'' Although ''vicarious liability'' is a legal term, ''vicarious liability'' more readily conveys the concept of being liable for the actions or omissions of another, without causing unnecessary confusion with the word ''respondent.''

Changes: Partly in response to commenters' concerns that the phrase ''respondeat superior'' was not recognizable as a legal term or was too easily confused with use of the word ''respondent'' throughout the final regulations, we have revised the definition of ''actual knowledge'' in § 106.30 by replacing term ''respondeat superior'' with ''vicarious liability.''

Comments: One commenter suggested including support and context for the Department's contention in the NPRM that the proposed rules will give sexual harassment complainants greater confidence to report and expect their school to respond in a meaningful way by separating a recipient's obligation to respond to a report of sexual harassment from the recipient's obligation to investigate formal complaints of sexual harassment; the commenter argued that the NPRM thus implies that either complainants do not currently have a clear understanding of their Title IX rights and a school's obligation to respond or that complainants are under the misconception that all complaints are considered formal complaints under the current Title IX guidance and regulations.

Discussion: The Department's past guidance required recipients to *always* investigate any report of sexual harassment, even when the complainant only wanted supportive measures and did not want an investigation, which necessarily results in some intrusion into the complainant's privacy.[825] This guidance combined a recipient's obligation to respond to a report of sexual harassment with the recipient's obligation to investigate formal complaints of sexual harassment. This guidance also did not distinguish between an investigation which resulted in the imposition of disciplinary sanctions and an inquiry into a report of sexual harassment.[826] The Department's past guidance did not specifically provide both parties the opportunity to know about an investigation and participate in such an investigation, when the investigation may lead to the imposition of disciplinary sanctions against the respondent and the provision of remedies. Through §§ 106.44 and 106.45, these final regulations clarify when a recipient has the affirmative obligation to conduct an investigation that may lead to the imposition of disciplinary sanctions, requires the recipient to notify both parties of such an investigation, and requires the recipient to provide both parties the opportunity to participate in the process. Irrespective of whether a recipient conducts an investigation under § 106.45, a recipient may inquire about a report of sexual harassment and must offer supportive measures in response to such a report under § 106.44(a). If a recipient does not provide a complainant with supportive measures, then the recipient must document the reasons why such a response as not clearly unreasonable in light of the known circumstances under § 106.45(b)(10)(ii).

Under the Department's past guidance, some students did not know that reporting sexual harassment always would lead to an investigation, even

[823] *Davis,* 626 U.S. at 648.

[824] 83 FR 61463–64.

[825] 2001 Guidance at 13, 15, 18; 2011 Dear Colleague Letter at 4.

[826] 2001 Guidance at 13, 15, 18.

when the student did not want the recipient to investigate. A rigid requirement such as an investigation in every circumstance may chill reporting of sexual harassment, which is in part why these final regulations separate the recipient's obligation to respond to a report of sexual harassment from the obligation to investigate a formal complaint of sexual harassment. Under these final regulations, a student may receive supportive measures irrespective of whether the student files a formal complaint, which results in an investigation. In this manner, these final regulations encourage students to report sexual harassment while allowing them to exercise some control over their report. If students would like supportive measures but do not wish to initiate an investigation under § 106.45, they may make a report of sexual harassment. If students would like supportive measures and also would like the recipient to initiate an investigation under § 106.45, they may file a formal complaint.

The Department disagrees with the premise that separating a recipient's obligation to respond to each known report of sexual harassment from the recipient's obligation to investigate formal complaints of sexual harassment implies that all complainants suffer misconceptions; rather, the Department believes that distinguishing between a recipient's obligation to respond to a report, on the one hand, and a recipient's obligation to investigate a formal complaint on the other hands, provides clarity that benefits complainants, respondents, and recipients.

Changes: None.

Comments: One commenter suggested adding prevention and community educational programming as a possible option schools can utilize as one of the remedies provided following a formal complaint, as well as adding a requirement of educational outreach and prevention programming elsewhere within the final regulations.

Discussion: The Department declines to list prevention and community educational programming as a possible option schools can utilize as a remedy after the conclusion of a grievance process, or to add a requirement of educational outreach and prevention programming elsewhere within the final regulations. The Department notes that nothing in the final regulations prevents recipients from undertaking such efforts. With respect to remedies, the final regulations require a recipient to provide remedies to a complainant where a respondent has been found responsible, and notes that such remedies may include the type of individualized services non-exhaustively listed in the § 106.30 definition of ''supportive measures.'' Whether or not the commenter's understanding of prevention and community education programming would be part of an appropriate remedy for a complainant, designed to restore or preserve the complainant's equal access to education, is a fact-specific matter to be considered by the recipient. With respect to a general requirement that recipients provide prevention and community education programming, the final regulations are focused on governing a recipient's response to sexual harassment incidents, leaving additional education and prevention efforts within a recipient's discretion.

Changes: None.

Section 106.44 Recipient's Response to Sexual Harassment, Generally

Section 106.44(a) ''Actual Knowledge''

The Recipient's Self-Interest

Comments: Many commenters expressed concerns about the actual knowledge requirement in § 106.44(a), citing examples of instances in which schools sought to avoid addressing sexual harassment and assault, including high-profile sexual abuse scandals at universities where some university employees failed to report abuse that was reported to them. One commenter asserted that schools discourage sexual harassment and assault reports because the number of reported instances of sexual violence at an institution is publicly available (which harms or is perceived to harm the recipient's reputation), and alleged perpetrators are often prominent members of college communities, including star athletes, fraternity members, leading actors, and promising filmmakers. Commenters argued that, by using an actual knowledge requirement that fails to make employees mandatory reporters, schools will continue to ignore cases of sexual violence and will investigate fewer harassment complaints, resulting in less justice and fewer services for victims of sexual harassment.

Discussion: The Department incorporates here its discussion under the ''Actual Knowledge'' subsection of the ''Section 106.30 Definitions'' section of this preamble. As discussed in that section, and in the ''Adoption and Adaption of the Supreme Court's Framework to Address Sexual Harassment'' section of this preamble, we believe that the final regulations appropriately hold recipients liable for responding to every allegation of sexual harassment of which the recipient is aware, ensure that elementary and secondary school students may report to any school employee, and respect the autonomy of complainants at postsecondary institutions to choose whether, and when, the complainant desires to report sexual harassment. No recipient may yield to institutional self-interest by ignoring known allegations of sexual harassment without violating the recipient's obligation to promptly respond as set forth in § 106.44(a).

Changes: None.

Burdening the Complainant

Comments: Numerous commenters argued that § 106.44(a) will have the effect of shifting the burden of each report onto the complainant, who, in addition to dealing with the harm to their mental health from harassment or assault, must also bear the responsibility of locating and reporting to the correct administrator. Several commenters also voiced concern that § 106.44(a) makes it more difficult for victims to know how or to whom to report harassment. Other commenters argued that complainants would be at a loss in instances where the school has not educated students and staff as to who the Title IX Coordinator is, where that person can be found, and what that person's responsibilities are. Several commenters asked what a complainant should do if a complainant has had a negative experience previously with the Title IX Coordinator, because the complainant would have no one else to whom to turn in order to report or file a formal complaint.

Many commenters asserted that § 106.44(a) would chill reports of sexual harassment and assault. Several commenters stated that 59.3 percent of survivors in one study confided in informal support sources while across several studies, fewer than one-third of victims reported to formal sources.[827] One commenter asserted that research has consistently reflected that survivors of campus sexual assault are more likely to disclose to someone with whom they have an existing relationship rather than a campus administrator. Commenters argued that fewer reports would reach the Title IX Coordinator, since the Title IX Coordinator lacks a preexisting personal relationship with survivors. Several commenters asserted that most school personnel do not know who the Title IX Coordinator is, and that these employees will therefore be unable to

[827] Commenters cited: Charlotte Pierce-Baker, *Surviving the silence: Black women's stories of rape* (W.W. Norton 1998); Patricia A. Washington, *Disclosure Patterns of Black Female Sexual Assault Survivors,* 7 Violence Against Women 11 (2001).

help complainants find the Title IX Coordinator.

Discussion: The Department incorporates here its discussion under the ''Actual Knowledge'' subsection of the ''Section 106.30 Definitions'' section of this preamble. As discussed in that section, and in the ''Adoption and Adaption of the Supreme Court's Framework to Address Sexual Harassment'' section of this preamble, we believe that the definition of actual knowledge in these final regulations has been revised to appropriately trigger a recipient's response obligations by notice to any elementary and secondary school employee, to any recipient's Title IX Coordinator, and to any official with authority to institute corrective measures on the recipient's behalf. The Department believes that respecting a complainant's autonomy is an important, desirable goal and that allowing complainants to discuss or disclose a sexual harassment experience with employees of postsecondary institutions without such confidential conversations automatically triggering the involvement of the recipient's Title IX office will give complainants in postsecondary institutions greater control and autonomy over the reporting process. The final regulations place the burden on recipients to ensure that all students and employees (as well as parents of elementary and secondary school students, and others) are notified of contact information for the Title IX Coordinator, so that when a complainant chooses to report, the complainant may easily locate the Title IX Coordinator's office location, telephone number, and email address, and report using any of those methods, or any other means resulting in the Title IX Coordinator receiving the person's verbal or written report. Nothing in the final regulations precludes a recipient, including a postsecondary institution, from instructing any or all of its employees to report sexual harassment disclosures and reports to the Title IX Coordinator, if the recipient believes that such a universal mandatory reporting system best serves the recipient's student and employee population. However, universal mandatory reporting systems have led to the unintended consequence of reducing options for complainants at postsecondary institutions to discuss sexual harassment experiences confidentially with trusted employees,[828] and the final regulations therefore do not impose a universal mandatory reporting system in the postsecondary institution context.

Changes: None.

Elementary and Secondary Schools

Comments: Many commenters stated that the actual knowledge requirement is inappropriate for elementary and secondary school students because, from a young child's perspective, there is no distinction between a teacher, teacher's aide, bus driver, cafeteria worker, school resource officer, or maintenance staff person; to a young child, they are all grown-ups. Commenters asserted that this is particularly true for adults such as bus drivers and school resource officers, who can take corrective measures (kicking a student off the bus, for example) but not necessarily ''on behalf of'' the school. Several commenters stated that often a peer seeking help for a friend brings an issue of sexual harassment or assault to the attention of teachers or other school personnel, and commenters asserted that these allegations should be formally addressed by the school. Numerous commenters asserted that all school employees, not just teachers, should be responsible employees. By ensuring that a student can confide in counselors, aides, and coaches, commenters believed that students would be more likely to speak up and receive benefits to which they are entitled under Title IX. Commenters asserted that the proposed rules would conflict with other mandatory reporting requirements; for example, State laws requiring all school staff to notify law enforcement or child welfare agencies of child abuse. Another commenter stated that, by limiting the definition of complainant to only ''the victim,'' the proposed regulations would not allow for parents to file complaints on behalf of their children, and would not contemplate a witness to sexual harassment making a complaint. One commenter asserted that the actual knowledge requirement may be in tension with the Every Student Succeeds Act (ESSA); the commenter asserted that under ESSA, a school district with probable cause to believe a teacher engaged in sexual misconduct is prohibited from helping that teacher from getting a new job yet, the commenter argued, under the proposed rules the school district would not need to take any action to address the teacher's sexual misconduct absent a formal complaint.

Discussion: The Department incorporates here its discussion under the ''Actual Knowledge'' subsection of the ''Section 106.30 Definitions'' section of this preamble. As discussed in that section, and in the ''Adoption and Adaption of the Supreme Court's Framework to Address Sexual Harassment'' section of this preamble, we believe that the final regulations appropriately hold recipients liable for responding to every allegation of sexual harassment of which the recipient is aware, ensure that elementary and secondary school students may report to any school employee, and ensure that every recipient's educational community understands that *any person* may report sexual harassment (whether they are the victim, or a witness, or any other third party), triggering the recipient's obligation to promptly respond. As discussed in the ''Complainant'' subsection of the ''Section 106.30 Definitions'' section of this preamble, we have revised the definition of ''complainant'' to remove the inference that the alleged victim themselves must be the same person who reports the sexual harassment. Upon notice that any person has allegedly been victimized by conduct that could constitute sexual harassment as defined in § 106.30, a recipient must respond, including by promptly offering supporting measures to the alleged victim (*i.e.,* the complainant).

The final regulations do not contravene or alter any Federal, State, or local requirements regarding other mandatory reporting obligations that school employees have. Those obligations are distinct from the obligations in these final regulations.

The Department acknowledges that the Elementary and Secondary Education Act of 1965 (ESEA), as amended by the Every Student Succeeds Act (ESSA), may require a recipient subject to ESEA to take certain steps with respect to an employee who has been accused of sexual misconduct when a recipient has probable cause to believe the employee engaged in sexual misconduct.[829] We do not believe that the actual knowledge requirement in these final regulations is in tension with ESSA. The final regulations define actual knowledge to include notice of *allegations* of sexual harassment; a recipient cannot wait to respond to sexual harassment allegations until the recipient has *probable cause* that the sexual harassment occurred. Under revised § 106.44(a) the recipient's prompt response to allegations of sexual

[828] *E.g.,* Carmel Deamicis, *Which Matters More: Reporting Assault or Respecting a Victim's Wishes?,* The Atlantic (May 20, 2013); Allie Grasgreen, *Mandatory Reporting Perils, Inside Higher Ed* (Aug. 30, 2013).

[829] *E.g., https://www2.ed.gov/policy/elsec/leg/essa/section8546dearcolleagueletter.pdf.*

harassment must include offering the complainant supportive measures irrespective of whether the complainant files, or the Title IX Coordinator signs, a formal complaint. A recipient's obligations under ESSA may factor into a Title IX Coordinator's decision to sign a formal complaint initiating a grievance process against an employee-respondent, even when the complainant (*i.e.,* the alleged victim) does not wish to file a formal complaint, if, for example, the recipient wishes to investigate allegations in order to determine whether the recipient has probable cause of employee sexual misconduct that affect the recipient's ESSA obligations.

Changes: None.

Confusion for Employees

Comments: Numerous commenters expressed concern that resident assistants or resident advisors, professors, and coaches may not know how to respond to complainants appropriately if the proposed rules allow postsecondary institution employees to have discretion over whether to report sexual harassment to the Title IX Coordinator. Several commenters asked the Department to specify that all schools should be responsible for educating all employees about a variety of procedures for handling sexual harassment and violence. Another commenter suggested that deans, directors, department heads, or any supervisory employees should be held individually liable for having actual knowledge of a report of sexual misconduct. One commenter asserted that a greater number of employees should be required to inform students of their right to file a formal complaint and to obtain supportive measures. One commenter stated that schools following the proposed rules might be sued for inadequate reporting policies, since a recipient's failure to tell its employees to respond appropriately to disclosures arguably amounts to an intentional decision not to respond to third-party discrimination.

Discussion: The Department incorporates here its discussion under the ''Actual Knowledge'' subsection of the ''Section 106.30 Definitions'' section of this preamble. As discussed in that section, and in the ''Adoption and Adaption of the Supreme Court's Framework to Address Sexual Harassment'' section of this preamble, the Department agrees with commenters' concerns that a wider pool of trusted adults in elementary and secondary schools should trigger a recipient's obligations, and, thus, the final regulations expand the definition of actual knowledge to include notice to *any* employee of an elementary and secondary school. However, for reasons discussed in the aforementioned sections of this preamble, the Department disagrees that the pool of postsecondary institution employees to whom notice charges the recipient with actual knowledge needs to be expanded beyond the Title IX Coordinator and officials with authority to institute corrective measures on the recipient's behalf.

The Department disagrees that these final regulations increase liability for recipients with respect to inadequate reporting policies. These final regulations require recipients to respond to sexual harassment, or allegations of sexual harassment, when the recipient has actual knowledge, defined in part to include notice to an official with authority to institute corrective measures on behalf of the recipient. This requirement, and definition, are also used by Federal courts in applying the *Gebser/Davis* framework in private Title IX lawsuits.[830] These final regulations go beyond the *Gebser/Davis* framework by requiring recipients to have in place clear, accessible reporting options, and requiring recipients to notify its educational community of those reporting options. The recipient's educational community must be notified about how to report sexual harassment in person, by mail, telephone, or email, and the final regulations specify that any person may report sexual harassment (whether the person reporting is the alleged victim themselves or any third party).

Changes: None.

Intersection Between Actual Knowledge and Deliberate Indifference

Comments: One commenter asked, if a recipient has actual knowledge that a student or employee has been subjected to unwelcome conduct on the basis of sex, but the recipient does not know whether the misconduct effectively denied the victim equal access to the recipient's education program or activity, whether the recipient must respond under §§ 106.44(a) and 106.44(b)(2), to at least seek out the missing information and if not, whether the respondent has an obligation to inform the complainant of the nature of the missing and needed additional information regarding denial of equal access.

Discussion: The Department acknowledges the commenter's question about how much detail is needed in order for the recipient to have actual knowledge triggering the recipient's obligation to provide a non-deliberately indifferent response, and whether a recipient with partial information about a sexual harassment allegation has a responsibility to notify the complainant that additional information is needed to further evaluate or respond to the allegation. In response, the Department notes that the definition of ''complainant'' under § 106.30 is an individual who is alleged to be the victim of *conduct that could constitute sexual harassment;* thus, the recipient need not have received notice of facts that definitively indicate whether a reasonable person would determine that the complainant's equal access has been effectively denied in order for the recipient to be required to respond promptly in a non-deliberately indifferent manner under § 106.44(a). The definition of ''actual knowledge,'' in § 106.30, also reflects this concept as actual knowledge means notice of sexual harassment or *allegations* of sexual harassment.

These final regulations, and § 106.44(a) in particular, incorporate principles similar to the principles in the Department's 2001 Guidance with respect to a recipient's response to a student's or parent's report of sexual harassment or sexual harassment allegations, or a recipient's response to direct observation by a responsible employee of conduct that could constitute sexual harassment. The Department's 2001 Guidance states:

> If a student or the parent of an elementary or secondary student provides information or complains about sexual harassment of the student, the school should initially discuss what actions the student or parent is seeking in response to the harassment. The school should explain the avenues for informal and formal action, including a description of the grievance procedure that is available for sexual harassment complaints and an explanation of how the procedure works. If a responsible school employee has directly observed sexual harassment of a student, the school should contact the student who was harassed (or the parent, depending upon the age of the student), explain that the school is responsible for taking steps to correct the harassment, and provide the same information described in the previous sentence.[831]

Like the 2001 Guidance, these final regulations in § 106.6(g) recognize that a parent or guardian may have the legal right to act on behalf of a ''complainant,'' ''respondent,'' ''party,'' or other individual. Section 106.44(a) also requires that the Title IX Coordinator promptly contact the

[830] *E.g., Gebser* v. *Lago Vista Indep. Sch. Dist.,* 524 U.S. 274, 290 (1998).

[831] 2001 Guidance at 15.

complainant to discuss the availability of supportive measures as defined in § 106.30, consider the complainant's wishes with respect to supportive measures, inform the complainant of the availability of supportive measures with or without the filing of a formal complaint, and explain the process for filing a formal complaint. Thus, if a parent or guardian has a legal right to act on behalf of a student, the parent or guardian has the right to act on behalf of a Title IX complainant, including with respect to discussing supportive measures, or deciding to file a formal complaint.

Changes: None.

Modeling Reporting on the Military System

Comments: Commenters argued that the reporting system used in the U.S. military to address sexual assault should be modified for use in Title IX reporting systems in order to best serve civil rights purposes. Commenters described the military reporting system as providing sexual assault victims with a two-track reporting system, under which a victim can choose a ''restricted'' or ''unrestricted'' report. Commenters described the military system's ''restricted'' report option as allowing the victim to report confidentially, for the purpose of receiving services, and no investigation is commenced unless the victim chooses an ''unrestricted'' reporting path whereby the victim's identity is not confidential and charges are initiated against the alleged perpetrator. Commenters asserted that giving victims these options for reporting helps address the well-known and well-researched fact that sexual assault is underreported throughout society, including in military and school environments, and that many survivors of sexual violence exercise the ''victim's veto'' whereby no investigation takes place, and no services are given to a victim, because the victim chooses not to report their experience in any official manner. Commenters asserted that the withdrawn 2014 Q&A essentially created this two-track model,[832] which best serves the needs of complainants, and argued that it best fits the purpose of civil rights protections, especially as compared to the traditional law enforcement model, under which a victim's only option is to report to police, and then police officers and prosecutors have sole discretion whether to investigate and whether to prosecute, and the victim has little or no control over those decisions, leading many victims to exercise the ''victim's veto'' and never report at all.[833]

Commenters described the approach of the withdrawn 2014 Q&A as giving survivors two choices of how to report, so survivors essentially would make the decision whether to initiate an investigation. Commenters asserted that the withdrawn 2014 Q&A ensured that if a survivor made an official report to a responsible employee or to the Title IX Coordinator the school must investigate unless the survivor explicitly requested that there be no investigation and the Title IX Coordinator granted that request after weighing multiple factors. On the other hand, commenters asserted, under that guidance a survivor could choose a ''confidential path'' and access services and accommodations for healing, without initiating an investigation unless or until the survivor changed their mind and officially reported to a responsible employee or to the Title IX Coordinator (which, commenters stated, is the equivalent in the military system as turning a restricted report into an unrestricted report, which is commonplace). Commenters urged the Department to reinstate the withdrawn 2014 Q&A, rather than keep the provisions in the proposed rules, regarding how complainants must report and what happens after a complainant reports.

Discussion: The Department is aware of the two-track reporting system used in the U.S. military,[834] and agrees that giving victims control over whether to report for purposes of receiving supportive services only, or also for the purpose of launching an official investigation into the alleged sexual assault, is beneficial to sexual assault victims. These final regulations share similarities with the military's two-track reporting system; the Department desires to respect the autonomy of each alleged victim to report for the purpose of receiving supportive measures, and to decide whether or not to also request an investigation into the allegations of sexual harassment. As commenters observed, the withdrawn 2014 Q&A's approach to what happens when an alleged victim reports sexual harassment also shares similarities with the two-track reporting system used in the military. These final regulations, too, are similar in some ways to the approach taken in the withdrawn 2014 Q&A. However, the Department believes that the additional precision, and obligatory nature, of these final regulations results in an approach superior to simply reinstating prior guidance.

Under the final regulations, any person may report[835] that any individual has allegedly been victimized by conduct that could constitute sexual harassment,[836] and the recipient must respond promptly, including by offering supportive measures to the complainant (*i.e.,* the alleged victim) and telling the complainant about the *option* of also filing a formal complaint that starts an investigation.[837] The only persons who can initiate an investigation are the complainant themselves, or the Title IX Coordinator.[838] Thus, if a complainant wants a report to remain confidential (in the sense of the complainant's identity

[832] Commenters cited: 2014 Q&A at 21, 22, 24.

[833] Commenters cited, *e.g.:* Tamara F. Lawson, *A Shift Towards Gender Equality in Prosecutions: Realizing Legitimate Enforcement of Crimes Committed Against Women in Municipal and International Criminal Law,* 33 S. Ill. Univ. L. J. 181, 188–90 (2008) (in instances of sexual violence, police and prosecutors decide to advance very few cases through the criminal system); Kimberly A. Lonsway & Joanne Archambault, *The ''Justice Gap'' for Sexual Assault Cases: Future Directions for Research and Reform,* 18 Violence Against Women 145, 147 (2012) (finding that only five to 20 percent of victims will report a sexual assault to law enforcement); Douglas Evan Beloof, *The Third Model of Criminal Process: The Victim Participation Model,* 1999 Utah L. Rev. 289, 306 (1999) (arguing that the ''victim's veto'' occurs when the victim does not even report the wrongdoing); Kimberly A. Lonsway & Joanne Archambault, *The ''Justice Gap'' for Sexual Assault Cases: Future Directions for Research and Reform,* 18 Violence Against Women 145, 159 (2012) (explaining that factors such as ''poor evidence gathering by police (especially victim interviews), intimidating defense tactics, incompetent prosecutors, and inappropriate decision making by jurors'' result in low sexual assault conviction rates). Commenters asserted this leads to more victims deciding not to report at all.

[834] *E.g.,* U.S. Dep't. of Defense, Sexual Assault Prevention and Response, ''Reporting Options,'' *https://sapr.mil/reporting-options* (''Sexual assault is the most underreported crime in our society and in the Military. While the Department of Defense [DoD] prefers that sexual assault incidents are reported to the command to activate both victims' services and law enforcement actions, it recognizes that some victims desire only healthcare and advocacy services and do not want command or law enforcement involvement. The Department believes its first priority is for victims to be treated with dignity and respect and to receive the medical treatment, mental health counseling, and the advocacy services that they deserve. Under DoD's Sexual Assault Prevention and Response (SAPR) Policy, Service members . . . have two reporting options—Restricted Reporting and Unrestricted Reporting. Under Unrestricted Reporting, both the command and law enforcement are notified. With Restricted (Confidential) Reporting, the adult sexual assault victim can access healthcare, advocacy services, and legal services without the notification to command or law enforcement.'').

[835] Section 106.8(a) (''any person'' may report sexual harassment regardless of whether the person reporting is the alleged victim themselves, or any third party).

[836] Section 106.30 (defining ''complainant'' to mean an individual who is alleged to be the victim of conduct that could constitute sexual harassment).

[837] Section 106.44(a).

[838] Section 106.30 (defining ''formal complaint'' as a document filed by a complainant or signed by a Title IX Coordinator).

not being disclosed to the alleged perpetrator, and not launching an investigation), the complainant may receive supportive measures without an investigation being conducted—unless the Title IX Coordinator, after having considered the complainant's wishes, decides that it would be clearly unreasonable for the school *not* to investigate the complainant's allegations. On the other hand, if the complainant chooses to file a formal complaint, the school *must* initiate a grievance process and investigate the complainant's allegations.[839] These final regulations preserve the benefits of allowing third party *reporting* while still giving the complainant as much control as reasonably possible over whether the school investigates, because under the final regulations a third party can report—and trigger the Title IX Coordinator's obligation to reach out to the complainant and offer supportive measures—but the third party cannot trigger an investigation.[840] Further, the final regulations allow a complainant to initially report for the purpose of receiving supportive measures, and to later decide to file a formal complaint.

Changes: None.

Section 106.44(a) ''Education Program or Activity''

General Support and Opposition for ''Education Program or Activity'' as a Jurisdictional Condition

Comments: Several commenters expressed support for the NPRM's approach to the ''education program or activity'' condition, stating that it is consistent with the Title IX statute and case law. Commenters asserted that the Department has appropriately recognized that whether misconduct occurs on campus or off campus is not dispositive, and that courts have similarly applied a multi-factor test to deciding whether conduct occurred in an education program or activity. One commenter cited Federal cases suggesting that sexually hostile conduct itself, and not just its consequences, must occur on campus or at a school-sponsored or supervised event for Title IX to apply.[841] One commenter expressed support for the NPRM's approach to education program or activity because it is consistent with the Department's past practice. The commenter cited Departmental determination letters involving institutions of higher education in 2004 and 2008 that stated recipients do not have a Title IX duty to address alleged misconduct that occurs off campus and that does not involve the recipient's programs or activities. A few commenters expressed support for the NPRM's approach to education program or activity, asserting that it imposes reasonable limits on recipient responsibility. One commenter asserted that schools are not the sex police and that expecting schools to have jurisdiction over activity in off-campus apartments, at a parent's house, a local bar, or nearby hotel, is unrealistic. One commenter expressed support for the NPRM's approach to including ''education program or activity'' as a condition triggering a recipient's response obligations, but urged the Department to go further and explicitly exclude from Title IX allegations made by or against someone who has no relationship with the recipient, and allegations involving students but occurring in a time or place totally unrelated to school activities such as during summer vacation hundreds of miles away from campus.

Other commenters asserted that the NPRM's approach to education program or activity was unclear. Commenters stated that the NPRM's preamble mentioned several factors, such as recipient ownership of the premises, endorsement, oversight, supervision, and disciplinary power, but argued that this multi-factor test may be confusing and make it difficult for students and schools to understand their Title IX rights and obligations. One commenter argued that the practical application of the Department's approach to misconduct that has both on-campus and off-campus elements would be challenging; for example, the commenter stated, if a sexual misconduct complaint involved a series of actions occurring on campus and off campus then the recipient may have to sift through evidence to identify and ignore events not ''in'' a program or activity.

Many commenters expressed concern that the NPRM's approach to the education program or activity condition would increase danger to students and others. Commenters cited studies and scholarly articles suggesting that sexual assault can cause lasting psychological damage to victims, including increasing suicide rates and substantially impacting victims' academic career, retention, graduation, and grade point average, regardless of whether the sexual assault occurred off campus or on campus.[842] Commenters argued that not addressing off-campus misconduct may chill reporting, make it harder for the community to know the nature of threats facing them, and even discourage young women from attending college. Commenters expressed concern that the NPRM would cause victims to leave school, asserting that over one-third of sexual harassment or assault victims drop out of school.[843] Commenters argued that because a significant number of sexual assaults occur off campus,[844] not requiring schools to respond to those assaults will only lead to more college students dropping out. Several commenters emphasized that the reality is that off-campus life is often an essential part of the educational experience, such as off-campus travel for conferences and networking events, and that off-campus living for students is quite common.[845] Commenters argued that the Department should not give a free pass to perpetrators whose abusive conduct occurs off campus. Commenters expressed concern that repeat offenders could systematically target victims, knowing they will get away with it.

Commenters raised concerns about off-campus Greek life as hotbeds of sexual misconduct not covered by the NPRM, arguing that students are more

[844] Commenters cited: EduRisk by United Educators, *Confronting Campus Sexual Assault: An Examination of Higher Education Claims* at 6 (2015) (''In 41 percent of claims, the victim and perpetrator attended the same off-campus party before going back to campus, where the sexual assault occurred. These off-campus parties included institution-recognized sorority and fraternity houses, athletic team houses, and students' off-campus residences.''); U.S. Dep't. of Justice, Bureau of Justice Statistics, *Rape and Sexual Assault Victimization Among College-Age Females, 1995–2013* at 6 (2014) (95 percent of sexual assaults of female students ages 18–24 occur outside of school).

[845] Commenters cited: American Association of University Women, *Crossing the Line: Sexual Harassment at School* (2011); Rochelle Sharp, *How Much Does Living Off Campus Cost? Who Knows?,* The New York Times (Aug. 5, 2016) (87 percent of college students and even more elementary and secondary school students reside off campus).

likely to experience sexual assault if in a fraternity or sorority, and that men in fraternities are more likely than other male students to be perpetrators of sexual misconduct.[846] Commenters expressed concern that recipients might interpret the NPRM as preventing them from addressing sexual misconduct in fraternities, sororities, and social clubs the recipient does not recognize,[847] or perversely encourage recipients not to recognize Greek letter associations, but that the Department should encourage such relationships because they often entail mandatory insurance, risk management standards, and training requirements to reduce incidents of sexual misconduct.

Commenters asserted that the NPRM especially increases risks to community college and vocational school students because such students generally live off campus, to students of color and other already marginalized students who may not be able to afford to live on campus, to elementary and secondary school students with disabilities who may be separated from their peers and removed to off-site services, and to LGBTQ students because it may be harder for them to find adequate outside support services. One commenter argued that the Department's exclusion of off-campus assaults will hinder Federal background check processes, potentially harming our national security and exposing co-workers to danger. Another commenter stated that the corporate world does not exclude out-of-office misconduct from company codes of conduct, and so the Department should not set young people up to fail by not showing them early in life that misconduct is unacceptable and will lead to consequences.

Commenters argued that Federal courts have been supportive of universities applying student codes of conduct to misconduct occurring off campus and outside the school's programs or activities.[848] Commenters argued that courts have recognized that an assailant's mere presence on campus creates a hostile environment for sexual harassment victims, exposing recipients to Title IX liability under a deliberate indifference standard if the recipient fails to redress the hostile environment even where the underlying sexual harassment or assault occurred off campus and outside the recipient's education program or activity. Commenters asserted that the proposed rules would leave recipients vulnerable to private Title IX lawsuits because recipients would not need to address the continuing effects of sexual assault that occurred outside the recipient's program or activity under the Department's regulations yet a Federal court may hold otherwise.[849] Commenters argued that Federal courts have determined that regardless of where a sexual assault occurred, where both parties are in the same education program or activity a recipient should be held liable under a deliberate indifference standard based on the recipient's response to the alleged incident, even if the incident happened under circumstances outside the recipient's control.[850] Commenters argued that courts have allowed Title IX private causes of action for sexual misconduct to proceed even where some or all of alleged misconduct occurred in a location outside the recipient's control so long as there was ''some nexus between the out-of-school conduct and the school'' [851] and that the proposed rules should take the same approach. Commenters argued that the Supreme Court's *Gebser* decision involved sexual activity between a teacher and student where the sexual activity did not take place on school grounds, yet the Supreme Court did not consider that sexual harassment to be outside the purview of Title IX.[852]

Commenters argued that the 2001 Guidance and 2017 Q&A require recipients to address sexual harassment that occurs off campus where the underlying sexual harassment or assault causes the complainant to experience a hostile environment on campus, and urged the Department to ensure that the final regulations impose similar obligations for recipients to address the continuing effects of sexual harassment that occurs off campus.

Another commenter contended that the NPRM conflicts with recent Department actions under the Trump Administration, such as cutting off partial funding to the Chicago Public School system for failing to address two reports of off-campus sexual assault.

Discussion: The Department appreciates the general support for our approach to including the concept of a recipient's ''education program or activity'' in these final regulations. The ''education program or activity'' language in the Title IX statute [853] provides context for the scope of Title IX's non-discrimination mandate, which ensures that Federal funds are not used to support discriminatory practices in education programs or activities.[854]

In *Davis,* the Supreme Court framed the question in that case as whether a recipient of Federal financial assistance may be liable for damages under Title IX, for failure to respond to peer-on-peer sexual harassment in the recipient's program or activity.[855] The Supreme Court in *Davis* continued to reference the statutory ''program or activity'' language throughout its decision [856] and refuted dissenting justices' arguments that the majority's approach permitted too much liability against recipients in part by reasoning: ''Moreover, because the harassment must occur 'under' 'the operations of' a funding recipient, *see* 20 U.S.C. 1681(a); § 1687 (defining 'program or activity'), the harassment must take place in a context subject to

the school district's control. . . . These factors combine to limit a recipient's damages liability to circumstances wherein the recipient exercises substantial control over both the harasser and the context in which the known harassment occurs.'' [857]

The Department's regulatory authority must emanate from Federal law.[858] Congress, in enacting Title IX, has conferred on the Department the authority to regulate under Federal law. The appropriate place to start is the statutory text of Title IX, for ''[u]nless otherwise defined, statutory terms are generally interpreted in accordance with their ordinary meaning.'' [859] Title IX's text, 20 U.S.C. 1681(a) (emphasis added), states: ''No person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under *any education program or activity* receiving Federal financial assistance[.]'' The Department's authority to regulate sexual harassment as a form of sex discrimination pursuant to Title IX is clear; the Supreme Court has held that sexual harassment is a form of sex discrimination, and has confirmed that Congress has directed the Department, as a Federal agency that disburses funding to education programs or activities, to establish requirements to effectuate Title IX's non-discrimination mandate.[860] The Department's authority to regulate sexual harassment depends on whether sexual harassment occurs in ''any education program or activity'' because the Department's regulatory authority is co-extensive with the scope of the Title IX statute. Title IX does not authorize the Department to regulate sex discrimination occurring *anywhere* but only to regulate sex discrimination in education programs or activities.[861] Congress, in the Title IX statute, provided definitions of ''program or activity'' that are reflected in the Department's current Title IX regulations.[862]

The Supreme Court has applied the ''program or activity'' language in the Title IX statute in the context of judicial enforcement of Title IX. The Department does not believe that the Supreme Court's application of ''program or activity'' in the context of sexual harassment as a form of sex discrimination is an unreasonable interpretation of the Title IX statute, because the Supreme Court applied the language of the statute including the definitions of ''program or activity'' provided in the statute. The Department thus concludes that we should align these final regulations with the Supreme Court's approach to ''education program or activity'' in the context of Title IX sexual harassment.[863] By contrast, as explained in the ''Adoption and Adaption of the Supreme Court's Framework to Address Sexual Harassment,'' the three parts of the *Gebser/Davis* framework (*i.e.,* definition of sexual harassment, actual knowledge, deliberate indifference) do *not* appear in the text of the Title IX statute, and the Department believes that it may promulgate regulatory requirements that differ in significant ways from the *Gebser/Davis* framework, to best effectuate the purposes of Title IX's non-discrimination mandate in the context of administrative enforcement, and we have done so in these final regulations.

The Department acknowledges the concerns of many commenters who argued that with respect to sexual harassment, whether the alleged conduct occurred in the recipient's education program or activity might have been understood too narrowly under the NPRM (*e.g.,* to exclude all off-campus conduct) or at least created potential confusion for complainants and recipients. In response to commenters' concerns, the Department believes that providing additional clarification as to the scope of a recipient's education program or activity for purposes of Title IX sexual harassment is necessary, and, therefore, adds to § 106.44(a) in the final regulations language similar to language used by the Court in *Davis:* For purposes of § 106.30, § 106.44, and § 106.45, the phrase ''education program or activity'' includes ''locations, events, or circumstances over which the recipient exercised substantial control over both the respondent and the context in which the harassment occurs'' and also includes ''any building owned or controlled by a student organization that is officially recognized by a postsecondary institution.'' The Title IX statute [864] and existing Title IX regulations,[865] already contain detailed definitions of ''program or activity'' that, among other aspects of such definitions, include ''all of the operations of'' a postsecondary institution or local education agency. The Department will interpret ''program or activity'' in these final regulations in accordance with the Title IX statutory (20 U.S.C. 1687) and regulatory definitions (34 CFR 106.2(h)), guided by the Supreme Court's language applied specifically for use in sexual harassment situations under Title IX regarding circumstances over which a recipient has control and (for postsecondary institutions) buildings owned or controlled by student organizations if the student organization is officially recognized by the postsecondary institution.[866]

While ''all of the operations of'' a recipient (per existing statutory and regulatory provisions), and the additional ''substantial control'' language in these final regulations, clearly include all incidents of sexual harassment occurring on a recipient's campus, the statutory and regulatory definitions of program or activity along with the revised language in § 106.44(a) clarify that a recipient's Title IX obligations extend to sexual harassment incidents that occur off campus if any of three conditions are met: If the off-campus incident occurs as part of the recipient's ''operations'' pursuant to 20 U.S.C. 1687 and 34 CFR 106.2(h); if the recipient exercised substantial control over the respondent and the context of alleged sexual harassment that occurred off campus pursuant to § 106.44(a); or if a sexual harassment incident occurs at

[862] 20 U.S.C. 1687; 34 CFR 106.2(h).

[863] The Supreme Court's analysis of the ''program or activity'' statutory language was in the context of judicial enforcement, but the Department does not believe a different analysis is necessary or advisable for administrative enforcement, where the Department—like the Supreme Court—is constrained to interpret and apply the text of the statute including the definitions of ''program or activity'' provided in the statute. Consistent with this position, and as discussed throughout this preamble, we have revised § 106.44(a) to clarify that ''education program or activity'' for purposes of these sexual harassment regulations includes circumstances wherein the recipient exercises substantial control over both the harasser and the context of the harassment—the same conclusion reached by the *Davis* Court when it applied the ''program or activity'' statutory language to the context of a school's response to sexual harassment. *Davis,* 526 U.S. at 645.

[864] 20 U.S.C. 1687.

[865] 34 CFR 106.2(h); 34 CFR 106.2(i) (defining ''recipient''); 34 CFR 106.31(a) (referring to ''any academic, extracurricular, research, occupational training, or other education program or activity operated by a recipient which receives Federal financial assistance'').

[866] Section 106.44(a) (adding ''For purposes of this section, § 106.30, and § 106.45, 'education program or activity' includes locations, events, or circumstances over which the recipient exercised substantial control over both the respondent and the context in which the harassment occurs, and also includes any building owned or controlled by a student organization that is officially recognized by a postsecondary institution.'').

an off-campus building owned or controlled by a student organization officially recognized by a postsecondary institution pursuant to § 106.44(a).

The NPRM cited to Federal court opinions that have considered whether sexual harassment occurred in a recipient's education program or activity by examining factors such as whether the recipient funded, promoted, or sponsored the event or circumstance where the alleged harassment occurred. While it may be helpful or useful for recipients to consider factors applied by Federal courts to determine the scope of a recipient's program or activity, no single factor is determinative to conclude whether a recipient exercised substantial control over the respondent and the context in which the harassment occurred, or whether an incident occurred as part of ''all of the operations of'' a school, college, or university.

The revised language in § 106.44(a) also specifically addresses commenters' concerns about recognized student organizations that own and control buildings such as some fraternities and sororities operating from off-campus locations where sexual harassment and assault may occur with frequency. The revised language further addresses commenters' questions regarding whether postsecondary institutions' Title IX obligations are triggered when sexual harassment occurs in an off-campus location not owned by the postsecondary institution but that is in use by a student organization that the institution chooses to officially recognize such as a fraternity or sorority. The revisions to § 106.44(a) clarify that where a postsecondary institution has officially recognized a student organization, the recipient's Title IX obligations apply to sexual harassment that occurs in buildings owned or controlled by such a student organization, irrespective of whether the building is on campus or off campus, and irrespective of whether the recipient exercised substantial control over the respondent and the context of the harassment outside the fact of officially recognizing the fraternity or sorority that owns or controls the building. The Department makes this revision to promulgate a bright line rule that decisively responds to commenters and provides clarity with respect to recipient-recognized student organizations that own or control off-campus buildings. Official recognition of a student organization, alone, does not conclusively determine whether all the events and actions of the students in the organization become a part of a recipient's education program or activity; however, the Department believes that a reasonable, bright line rule is that official recognition of a student organization brings buildings owned or controlled by the organization under the auspices of the postsecondary institution recipient and thus within the scope of the recipient's Title IX obligations. As part of the process for official recognition, a postsecondary institution may require a student organization that owns or controls a building to agree to abide by the recipient's Title IX policy and procedures under these final regulations, including as to any misconduct that occurs in the building owned or controlled by a student organization. Accordingly, postsecondary institutions may not ignore sexual harassment that occurs in buildings owned or controlled by recognized student organizations. The Department acknowledges that even though postsecondary institutions may not always control what occurs in an off campus building owned or controlled by a recognized student organization, such student organizations and the events in their buildings often become an integral part of campus life. The Department also acknowledges that a postsecondary institution may be limited in its ability to gather evidence during an investigation if the incident occurs off campus on private property that a student organization (but not the institution) owns or controls. A postsecondary institution, however, may still investigate a formal complaint arising from sexual harassment occurring in a building owned or controlled by a recognized student organization (whether the building is on campus or off campus), for instance by interviewing students who were allegedly involved in the incident and who are a part of the officially recognized student organization. Thus, under the final regulations (*e.g.,* § 106.44(b)(1)) a postsecondary institution must investigate formal complaints alleging sexual harassment that occurred in a fraternity or sorority building (located on campus, or off campus) owned by the fraternity or sorority, if the postsecondary institution has officially recognized that Greek life organization. Further, under § 106.44(a) the recipient must offer supportive measures to a complainant alleged to be the victim of sexual harassment occurring at a building owned or controlled by an officially recognized student organization. Where a postsecondary institution has officially recognized a student organization, and sexual harassment occurs in an off campus location *not* owned or controlled by the student organization yet involving members of the officially recognized student organization, the recipient's Title IX obligations will depend on whether the recipient exercised substantial control over the respondent and the context of the harassment, or whether the circumstances may otherwise be determined to have been part of the ''operations of'' the recipient.

We note that the revision in § 106.44(a) referencing a ''building owned or controlled by a student organization that is officially recognized by a postsecondary institution'' is not the same as, and should not be confused with, the Clery Act's use of the term ''noncampus building or property,'' even though that phrase is defined under the Clery Act in part by reference to student organizations officially recognized by an institution.[867] For example, ''education program or activity'' in these final regulations includes buildings within the confines of the campus on land owned by the institution that the institution may rent to a recognized student organization.[868] As discussed in the ''Clery Act'' subsection of the ''Miscellaneous'' section of this preamble, the Clery Act and Title IX serve distinct purposes, and Clery Act geography is not co-extensive with the scope of a recipient's education program or activity under Title IX.

With respect to commenters who suggested that the final regulations should not apply to sexual misconduct by or against an individual with no relationship to the recipient, the Department believes that the framework adopted in the final regulations appropriately effectuates the broad non-discrimination mandate of Title IX (which protects any ''person'' from discrimination in an education program or activity) while also ensuring that

[867] *See* 20 U.S.C. 1092(f)(6)(iii) (defining ''noncampus building or property'' in part as ''any building or property owned or controlled by a student organization recognized by the institution''). The Clery Act regulations, 34 CFR 668.46(a), include ''noncampus building or property'' as part of an institution's Clery geography and define ''noncampus building or property'' as ''[a]ny building or property owned or controlled by a student organization that is officially recognized by the institution; or [a]ny building or property owned or controlled by an institution that is used in direct support of, or in relation to, the institution's educational purposes, is frequently used by students, and is not within the same reasonably contiguous geographic area of the institution.'').

[868] *But see* U.S. Dep't. of Education, Office of Postsecondary Education, *The Handbook for Campus Safety and Security Reporting,* 2–18 to 2–19 (2016), *https://www2.ed.gov/admins/lead/safety/handbook.pdf.*

recipients are responsible for addressing sexual harassment occurring in an educational institution's ''operations,'' or when the recipient has control over the situation, or where a postsecondary institution has recognized a student organization thereby lending the recipient's implicit extension of responsibility over circumstances involving sexual harassment that occurs in buildings owned or controlled by such a student organization. Like the ''no person'' language in the Title IX statute, the final regulations place no restriction on the identity of a complainant (§ 106.30 defines complainant to mean ''an individual who is alleged to be the victim of conduct that could constitute sexual harassment''), obligating a recipient to respond to such a complainant regardless of the complainant's relationship to the recipient. Similarly, reflecting that the Title IX statute does not limit commission of prohibited discrimination only to certain individuals affiliated with a recipient, the final regulations define a respondent to mean ''an individual who has been reported to be the perpetrator of conduct that could constitute sexual harassment'' without restricting a respondent to being a person enrolled or employed by the recipient or who has any other affiliation or connection with the recipient.

However, the final regulations do require that in order to file a formal complaint, the complainant must be ''participating in or attempting to participate in'' the recipient's education program or activity at the time the formal complaint is filed.[869] This prevents recipients from being legally obligated to investigate allegations made by complainants who have no relationship with the recipient, yet still protects those complainants by requiring the recipient to respond promptly in a non-deliberately indifferent manner. For similar reasons, the final regulations provide in § 106.45(b)(3)(ii) that a recipient *may* in its discretion dismiss a formal complaint if the respondent is no longer enrolled or employed by the recipient, recognizing that a recipient's general obligation to provide a complainant with a prompt, non-deliberately indifferent response might not include completing a grievance process in a situation where the recipient lacks any disciplinary authority over the respondent.

In response to commenters' concerns that practical application of the ''education program or activity'' condition might be challenging in situations that, for example, involve some conduct occurring in the recipient's education program or activity and some conduct occurring outside the recipient's education program or activity, the Department reiterates that ''off campus'' does not automatically mean that the incident occurred outside the recipient's education program or activity. The Department agrees that recipients are obliged to think through the scope of each recipient's own education program or activity in light of the statutory and regulatory definitions of ''program or activity'' (20 U.S.C. 1687 and 34 CFR 106.2(h)) and the statement in § 106.44(a) that ''education program or activity'' includes locations, events, or circumstances over which the recipient exercised substantial control over both the respondent and the context in which the harassment occurs as well as buildings owned or controlled by student organizations officially recognized by a postsecondary institution.

To ensure that recipients adequately consider the resulting coverage of Title IX to each recipient's particular circumstances, the final regulations require that every Title IX Coordinator, investigator, decision-maker, and person who facilitates an informal resolution process, must be trained on (among other things) ''the scope of the recipient's education program or activity.'' [870] We have also revised § 106.45(b)(10)(i)(D) so that materials used to train Title IX personnel must be posted on a recipient's website. These revisions ensure that a recipient's students and employees, and the public, understand the scope of the recipient's education program or activity for purposes of Title IX. Under Title IX, recipients must operate education programs or activities free from sex discrimination, and the Department will enforce these final regulations vigorously with respect to a recipient's obligation to respond to sexual harassment that occurs in the recipient's education program or activity.

In situations involving some allegations of conduct that occurred in an education program or activity, and some allegations of conduct that did not, the recipient must investigate the allegations of conduct that occurred in the recipient's education program or activity, and nothing in the final regulations precludes the recipient from choosing to also address allegations of conduct outside the recipient's education program or activity.[871] For example, if a student is sexually assaulted outside of an education program or activity but subsequently suffers Title IX sexual harassment in an education program or activity, then these final regulations apply to the latter act of sexual harassment, and the recipient may choose to address the prior assault through its own code of conduct. Nothing in the final regulations prohibits a recipient from resolving allegations of conduct outside the recipient's education program or activity by applying the same grievance process required under § 106.45 for formal complaints of Title IX sexual harassment, even though such a process would not be required under Title IX or these final regulations. Thus, a recipient is not required by these final regulations to inefficiently extricate conduct occurring outside an education program or activity from conduct occurring in an education program or activity arising from the same facts or circumstances in order to meet the recipient's obligations with respect to the latter.

The Department appreciates the various concerns raised by many commenters regarding the extent to which students reside or spend time off campus and how the application of the ''education program or activity'' condition may affect students who experience sexual harassment and sexual assault in off-campus situations, including community college students, vocational school students, and students who belong to marginalized demographic groups. The Department reiterates that the final regulations do not impose a geographic test or draw a distinction between on-campus misconduct and off-campus misconduct. As discussed above, whether conduct occurs in a recipient's education program or activity does not necessarily depend on the geographic location of the incident. Instead, ''education program or activity'' relies on statutory and regulatory definitions of ''program or activity,'' [872] on the statement adapted from the Supreme Court's language in *Davis* added to

[869] A complainant may be ''attempting to participate'' in the recipient's education program or activity, for example, where the complainant has applied for admission, or where the complainant has withdrawn but indicates a desire to re-enroll if the recipient appropriately responds to sexual harassment allegations.

[870] Section 106.45(b)(1)(iii).

[871] Section 106.45(b)(3) (revised in the final regulations to expressly state that although a recipient must dismiss allegations about conduct that did not occur in the recipient's education program or activity, such a mandatory dismissal is ''for purposes of sexual harassment under title IX or this part; such a dismissal does not preclude action under another provision of the recipient's code of conduct.'').

[872] *E.g.,* 20 U.S.C. 1687; 34 CFR 106.2(h).

§ 106.44(a) that education program or activity includes locations, events, or circumstances over which the recipient exercised substantial control over the respondent and over the context in which the sexual harassment occurred, and includes on-campus and off-campus buildings owned or controlled by a student organization officially recognized by a postsecondary institution. If a sexual assault occurs against a student outside of an education program or activity, and the student later experiences Title IX sexual harassment in an education program or activity, then a recipient with actual knowledge of such sexual harassment in the recipient's education program or activity must respond pursuant to § 106.44(a).

The final regulations' approach reduces confusion for recipients and students as to the scope of Title IX's protective coverage and recognizes the Department's administrative role in enforcing this important civil rights law according to the statute's plain terms. Furthermore, as noted previously, nothing in the final regulations prevents recipients from initiating a student conduct proceeding or offering supportive measures to students affected by sexual harassment that occurs outside the recipient's education program or activity. Title IX is not the exclusive remedy for sexual misconduct or traumatic events that affect students. As to misconduct that falls outside the ambit of Title IX, nothing in the final regulations precludes recipients from vigorously addressing misconduct (sexual or otherwise) that occurs outside the scope of Title IX or from offering supportive measures to students and individuals impacted by misconduct or trauma even when Title IX and its implementing regulations do not require such actions.[873] The Department emphasizes that sexual misconduct is unacceptable regardless of the circumstances in which it occurs, and recognizing jurisdictional limitations on the purview of a statute does not equate to condoning any form of sexual misconduct.

The Department believes a commenter's concern regarding the negative effect of the final regulations on the Federal background check process and our national security to be speculative. The final regulations would not categorically exclude off-campus assaults. As discussed previously, the final regulations applies to off-campus sexual harassment that occurs under ''the operations of'' the recipient, or where the recipient exercised substantial control over the respondent and the context in which the sexual harassment occurred, or in a building owned or controlled by a student organization officially recognized by a postsecondary institution. This commenter appears to have made a series of assumptions that may not be true, including that a significant number of off-campus assaults not covered by the final regulations would involve perpetrators subjected to a Federal background check in the future, and that a significant number of background checks would fail to uncover relevant information about sexual misconduct solely because the perpetrator's misconduct was not covered under Title IX. Again, the Department emphasizes that nothing in the final regulations prevents recipients from addressing sexual misconduct that occurs outside their education programs or activities, nor do the final regulations discourage or prevent a victim from reporting sexual misconduct to law enforcement or from filing a civil lawsuit; therefore, numerous avenues exist through which misconduct not covered under Title IX would be revealed during a Federal background check of the perpetrator.

With respect to a commenter's assertion that the final regulations may perversely incentivize recipients to not recognize fraternities and sororities, the Department believes this conclusion would require assuming that recipients will make decisions affecting the quality of life of their students based solely on whether or not recipient recognition of a student organization such as a fraternity or sorority would result in sexual harassment that occurs at locations affiliated with that organization falling under Title IX's scope. The Department does not make such an assumption, believing instead that recipients take many factors into account in deciding whether, and under what conditions, a recipient wishes to officially recognize a student organization. Whether or not these final regulations alter postsecondary institutions' decisions about recognizing Greek life organizations, the Department has determined that the scope of Title IX extends to the entirety of a recipient's education program and activity, and with respect to postsecondary institutions, the Department is persuaded by commenters' contentions that when a postsecondary institution chooses to officially recognize a student organization, the recipient has implied to its students and employees that locations owned by such a student organization are under the imprimatur of the recipient, whether or not the recipient otherwise exercises substantial control over such a location.

The Department believes there is a fundamental distinction between Title IX, and workplace policies that may exist in the corporate world. Title IX has clear jurisdictional application to education programs or activities, and the Department does not have authority to extend Title IX's application. By contrast, corporations may have more flexibility in crafting their own rules and policies to reflect their values and the needs of their employees and customers. Further, Title VII does not necessarily deem actionable all sexual harassment committed by employees regardless of the location or context of the harassment.[874] These final regulations tether sexual harassment to a recipient's education program or activity in a similar manner to the way courts tether sexual harassment to a workplace under an employer's control.[875] Regardless of any differences between analyses under Title VII and Title IX, we emphasize that recipients retain discretion under the final regulations to address sexual misconduct that falls outside the recipient's education program or activity through their own disciplinary system and by offering supportive

[873] As discussed in the ''Directed Question 5: Individuals with Disabilities'' subsection of the ''Directed Questions'' section of this preamble, nothing in these final regulations affects a recipient's obligations to comply with all applicable disability laws, such as the ADA. Thus, for example, if a recipient's student (or employee) has a disability caused or exacerbated by, or arising from, sexual harassment, a recipient must comply with applicable disability laws (including with respect to providing reasonable accommodations) irrespective of whether the sexual harassment that caused or exacerbated the individual's disability constitutes Title IX sexual harassment to which the recipient must respond under these final regulations.

[874] *See, e.g., Lapka* v. *Chertoff,* 517 F.3d 974, 982–83 (7th Cir. 2008).

[875] The Department adds to § 106.44(a) the statement that ''education program or activity'' includes locations, events, or circumstances over which the recipient exercised substantial control over both the respondent and the context in which the harassment occurs. This helps clarify that even if a situation arises off campus, it may still be part of the recipient's education program or activity if the recipient exercised substantial control over the context and the alleged harasser. While such situations may be fact specific, recipients must consider whether, for example, a sexual harassment incident between two students that occurs in an off-campus apartment (*i.e.,* not a dorm room provided by the recipient) is a situation over which the recipient exercised substantial control; if so, the recipient must respond when it has actual knowledge of sexual harassment or allegations of sexual harassment that occurred there. At the same time, the Title IX statute and existing regulations broadly define a recipient's ''program or activity'' to include (as to schools) ''all of the operations'' of the school, such that situations that arise on campus are already part of a school's education program or activity. 20 U.S.C. 1687.

measures to complainants reporting such misconduct.

The Department acknowledges commenters' citations to Federal court opinions for the proposition that a recipient may be deliberately indifferent to sexual harassment that occurred outside the recipient's control where the complainant has to interact with the respondent in the recipient's education program or activity, or where the effects of the underlying sexual assault create a hostile environment in the complainant's workplace or educational environment. However, with the changes to the final regulations made in response to commenters' concerns, the Department believes that we have clarified that sexual harassment incidents occurring off campus may fall under Title IX. The statutory and regulatory definitions of ''program or activity'' and the statements regarding ''substantial control'' and ''buildings owned or controlled by'' student organizations officially recognized by postsecondary institutions in § 106.44(a) do not state or imply that off-campus incidents necessarily fall outside a recipient's education program or activity. Moreover, complainants can request supportive measures or an investigation into allegations of conduct that do not meet Title IX jurisdictional conditions, under a recipient's own code of conduct.[876]

Some of the situations in Federal cases cited to by commenters may have reached similar outcomes under the final regulations. For example, in *Doe* v. *East Haven Board of Education,*[877] the Second Circuit held that the plaintiff sufficiently alleged sexual harassment to which the school was deliberately indifferent where the harassment consisted of on-campus taunts and name-calling directed at the plaintiff after she had reported being raped off campus by two high-school boys. The final regulations would similarly analyze whether sexual harassment (*i.e.,* unwelcome conduct on the basis of sex so severe, pervasive, and objectively offensive that it effectively deprives a complainant of equal access to education) *in the recipient's program or activity* triggered a recipient's response obligations regardless of whether such sexual harassment stemmed from the complainant's allegations of having suffered sexual assault (*e.g.,* rape) *outside* the recipient's program or activity. Further, whether or not the off-campus rape in that case was in, or outside, the school's education program or activity, would depend on the factual circumstances, because as explained above, not all off-campus sexual harassment is excluded from Title IX coverage.

Contrary to commenters' assertions, the Supreme Court in *Gebser* did not dispense with the program or activity limitation or declare that where the harassment occurred did not matter. The facts at issue in the *Gebser* case involved teacher-on-student harassment that consisted of both in-class sexual comments directed at the plaintiff as well as a sexual relationship that began when the respondent-teacher visited the plaintiff's home ostensibly to give her a book.[878] The Supreme Court in *Gebser* emphasized that a school district needs to be aware of discrimination (in the form of sexual harassment) ''in its programs'' and emphasized that a *teacher's* sexual abuse of a student ''undermines the basic purposes of the educational system'' [879] thereby implicitly recognizing that a teacher's sexual harassment of a student is likely to constitute sexual harassment ''in the program'' of the school even if the harassment occurs off campus. Nothing in the final regulations contradicts this premise or conclusion; § 106.44(a) clarifies that a recipient's education program or activity includes circumstances over which a recipient has substantial control over the context of the harassment and the respondent, and a teacher employed by a recipient who visits a student's home ostensibly to give the student a book but in reality to instigate sexual activity with the student could constitute sexual harassment ''in the program'' of the recipient such that a recipient with actual knowledge of that harassment would be obligated under the final regulations to respond. Similarly, the Supreme Court in *Davis* viewed the perpetrator's status as a teacher in *Gebser* as relevant to concluding that the sexual harassment was happening ''under'' the recipient's education program or activity.[880] We reiterate that the final regulations do not distinguish between sexual harassment occurring ''on campus'' versus ''off campus'' but rather state that Title IX covers sexual harassment that occurs in a recipient's education program or activity. The final regulations follow the *Gebser/Davis* approach to Title IX's statutory reference to discrimination in an education program or activity; sexual harassment by a teacher as opposed to harassment by a fellow student may, as indicated in *Gebser* and *Davis,* affect whether the sexual harassment occurred ''under any education program or activity.'' [881] This is a matter that recipients must consider when training Title IX personnel on the ''scope of the

[876] The Department also notes that § 106.45(b)(8) in the final regulations permits complainants and respondents equally to appeal a recipient's determination that allegations were subject to mandatory dismissal under § 106.45(b)(3)(i).

[877] 200 F. App'x 46, 48 (2d Cir. 2006); *Lapka* v. *Chertoff,* 517 F.3d 974, 982–83 (7th Cir. 2008) (the Seventh Circuit reasoned that the plaintiff sufficiently alleged workplace harassment even though the alleged rape occurred while the plaintiff and assailant were socializing after hours in a private hotel room, because the bar was part of the training facility where the plaintiff and assailant were required to attend work-related training sessions and thus were on ''official duty'' while at that facility, including the bar located in the facility, ''so the event could be said to have grown out of the workplace environment'' and the plaintiff and assailant were trainees expected to eat and drink at the facility and ''return to dormitories and hotel rooms provided by'' the employer such that ''[e]mployees in these situations can be expected to band together for society and socialize as a matter of course'' justifying the Court's conclusion that the plaintiff had alleged sexual harassment (rape) that arose in the context of a workplace environment and to which the employer had an obligation to respond). Although *Lapka* was a case under Title VII, the final regulations would similarly analyze whether sexual harassment occurred in the school's program or activity by inquiring whether the school exercised substantial control over the context of the harassment and the alleged harasser.

[878] *Gebser,* 524 U.S. at 277–78.

[879] *Gebser,* 524 U.S. at 286 (''As a general matter, it does not appear that Congress contemplated unlimited recovery in damages against a funding recipient where the recipient is unaware of *discrimination in its programs.*'') (emphasis added); *id.* at 289 (reasoning that a school's liability in a private lawsuit should give the school opportunity to know of the violation and correct it voluntarily similarly to the way the Title IX statute directs administrative agencies to give a school that opportunity to voluntarily correct violations, and the Court stated ''Presumably, a central purpose of requiring notice of the violation 'to the appropriate person' and an opportunity for voluntary compliance before administrative enforcement proceedings can commence is to avoid diverting education funding from beneficial uses where a recipient was unaware of *discrimination in its programs* and is willing to institute prompt corrective measures.'') (emphasis added); *id.* at 290 (''we hold that a damages remedy will not lie under Title IX unless an official who at a minimum has authority to address the alleged discrimination and to institute corrective measures on the recipient's behalf has actual knowledge of *discrimination in the recipient's programs* and fails adequately to respond.'') (emphasis added); *id.* at 292 (''No one questions that a student suffers extraordinary harm *when subjected to sexual harassment and abuse by a teacher,* and that *the teacher's conduct is reprehensible and undermines the basic purposes of the educational system.*'') (emphasis added).

[880] *Davis,* 526 U.S. at 652–53 (''Moreover, the provision that the discrimination occur 'under any education program or activity' suggests that the behavior be serious enough to have the systemic effect of denying the victim equal access to an educational program or activity. . . . The fact that it was a teacher who engaged in harassment in *Franklin* and *Gebser* is relevant. The relationship between the harasser and the victim necessarily affects the extent to which the misconduct can be said to breach Title IX's guarantee of equal access to educational benefits and to have a systemic effect on a program or activity.'').

[881] *Id.* at 652.

recipient's education program or activity'' pursuant to § 106.45(b)(1)(iii).

Both the 2001 Guidance and 2017 Q&A recognize the statutory language of ''education program or activity'' as a limitation on sexual harassment to which a recipient must respond. For example, the 2001 Guidance notes that ''Title IX applies to all public and private educational institutions that receive Federal funds'' and states that the ''education program or activity of a school includes all of the school's operations'' which means ''that Title IX protects students in connection with all of the academic, educational, extra-curricular, athletic, and other programs of the school, whether they take place in the facilities of the school, on a school bus, at a class or training program sponsored by the school at another location, or elsewhere.'' [882] Similarly, the 2017 Q&A expressly acknowledges that a recipient's obligation to respond to sexual harassment is confined to harassment that occurs in the recipient's education program or activity, citing statutory and regulatory definitions of ''recipient,'' ''operations,'' and ''program or activity.'' [883] The final regulations similarly rely on preexisting statutory and regulatory definitions of a recipient's ''program or activity'' and add a statement that ''education program or activity'' includes circumstances over which the recipient exercised substantial control. The withdrawn 2011 Dear Colleague Letter departed from the Department's longstanding acknowledgement that a recipient's response obligations are conditioned on sexual harassment that occurs in the recipient's education program or activity; [884] these final regulations return to the Department's approach in the 2001 Guidance, which mirrors the Supreme Court's approach to ''education program or activity'' as a jurisdictional condition that promotes a recipient's obligation under Title IX to provide education programs or activities free from sex discrimination. Like the 2001 Guidance, the final regulations approach the ''education program or activity'' condition as extending to circumstances over which recipients have substantial control, and not only to incidents that occur ''on campus.'' We reiterate that nothing in the final regulations precludes a recipient from offering supportive measures to a complainant who reports sexual harassment that occurred outside the recipient's education program or activity, and any sexual harassment that does occur in an education program or activity must be responded to even if it relates to, or happens subsequent to, sexual harassment that occurred outside the education program or activity.

Although the 2001 Guidance and 2017 Q&A frame actionable sexual harassment as harassment that creates a ''hostile environment,'' [885] the final regulations utilize the more precise interpretation of Title IX's scope articulated by the Supreme Court in *Davis:* That a recipient must respond to sexual harassment that is so severe, pervasive, and objectively offensive that it effectively denies a person equal access to education.[886] The use of the phrase ''hostile environment'' in the 2001 Guidance and 2017 Q&A does not mean that those guidance documents ignored the ''education program or activity'' limitation referenced in the Title IX statute; whether framed as a ''hostile environment'' (as in Department guidance) or as ''effective denial of a person's equal access'' to education (as in these final regulations), sexual harassment is a form of sex discrimination actionable under Title IX when it occurs in an education program or activity.

Because the final regulations do not exclude ''off campus'' sexual harassment from coverage under Title IX and instead take the approach utilized in the 2001 Guidance and applied by the Supreme Court in *Davis,* under which off campus sexual harassment may be in the scope of a recipient's education program or activity, the Department disagrees that these final regulations conflict with the Department's recent enforcement action with respect to holding Chicago Public Schools accountable for failure to appropriately respond to certain off-campus sexual assaults.

Changes: Section 106.44(a) is revised to state that ''education program or activity'' includes locations, events, or circumstances over which the recipient exercised substantial control over both the respondent and the context in which the harassment occurs, and also includes any building owned or controlled by a student organization that is officially recognized by a postsecondary institution. Section 106.45(b)(1)(iii) is revised to include training for Title IX Coordinators, investigators, decision-makers, and persons who facilitate informal resolutions on ''the scope of the recipient's education program or activity.'' Section 106.45(b)(3)(i) is revised to expressly provide that a mandatory dismissal of allegations in a formal complaint about conduct not occurring in the recipient's education program or activity is ''for purposes of title IX or [34 CFR part 106]; such a dismissal does not preclude action under another provision of the recipient's code of conduct.'' Section 106.45(b)(10)(i)(D) is revised to require recipients to post materials used to train Title IX personnel on the recipient's website, or if the recipient does not have a website, to make such materials available for inspection and review by members of the public.

Online Sexual Harassment

Comments: One commenter cited case law for the proposition that Title IX does not cover online or digital

[882] 2001 Guidance at 2–3 (internal quotation marks omitted) (citing to 20 U.S.C. 1687, codification of the amendment to Title IX regarding scope of jurisdiction, enacted by the Civil Rights Restoration Act of 1987, and to 65 FR 68049 (November 13, 2000), the Department's amendment of the Title IX regulations to incorporate the statutory definition of ''program or activity.'').

[883] 2017 Q&A at 1, fn. 3.

[884] 2011 Dear Colleague Letter at 4 (''Schools may have an obligation to respond to student-on-student sexual harassment that initially occurred off school grounds, outside a school's education program or activity. If a student files a complaint with the school, *regardless of where the conduct occurred,* the school must process the complaint in accordance with its established procedures. Because students often experience the continuing effects of off-campus sexual harassment in the educational setting, schools should consider the effects of the off-campus conduct when evaluating whether there is a hostile environment on campus. For example, if a student alleges that he or she was sexually assaulted by another student off school grounds, and that upon returning to school he or she was taunted and harassed by other students who are the alleged perpetrator's friends, the school should take the earlier sexual assault into account in determining whether there is a sexually hostile environment. The school also should take steps to protect a student who was assaulted off campus from further sexual harassment or retaliation from the perpetrator and his or her associates.'') (emphasis added); *see also* the withdrawn 2014 Q&A at 29–30.

[885] 2001 Guidance at 3; 2017 Q&A at 1. Although footnote 3 of the 2017 Q&A states that ''[s]chools are responsible for redressing a hostile environment that occurs on campus even if it relates to off-campus activities,'' this statement was intended to convey that a recipient may not ignore sexual harassment that occurs *in its program or activity* just because the parties involved may also have experienced an incident of sexual harassment *outside its program or activity. See also Doe* v. *East Haven Bd. of Educ.,* 200 F. App'x 46, 48 (2d Cir. 2006) (holding that plaintiff sufficiently alleged sexual harassment to which the school was deliberately indifferent where the harassment consisted of on-campus, sexualized taunts and name-calling directed at the plaintiff after she had reported being raped by two high-school boys outside the school's program or activity).

[886] *See also* the ''Sexual Harassment'' subsection of the ''Section 106.30 Definitions'' section of this preamble for further discussion of the ''effective denial of equal access'' element in the final regulations' definition of sexual harassment and the relationship between that element and the concept of hostile environment.

conduct.[887] Other commenters cited cases holding that recipients may be liable under Title IX for failing to adequately address online harassment.[888] A few commenters argued that the NPRM's approach to education program or activity is inconsistent with the Department's past practice and guidance documents, such as guidance issued in 2010 which acknowledged that cell phone and internet communications may constitute actionable harassment. Many commenters were concerned the NPRM would exclude online sexual harassment due to the education program or activity condition in § 106.44(a), and cited studies showing the prevalence and effects of online harassment and cyber-bullying on victims.[889] Commenters argued that it was unclear to what extent the NPRM would cover online harassment and suggested that the Department more broadly define ''program or activity'' to include student interactions that are enabled by recipients, such as online harassment between students using internet access provided by the recipient. Commenters argued that the final regulations should explicitly address cyber-bullying and electronic speech. Some commenters suggested that excluding online misconduct may conflict with State law; for example, commenters stated that New Jersey law includes harassment occurring online.

Discussion: The Department appreciates commenters' concerns about whether Title IX applies to sexual harassment that occurs electronically or online. We emphasize that the education program or activity jurisdictional condition is a fact-specific inquiry applying existing statutory and regulatory definitions of ''program or activity'' to the situation; however, for recipients who are postsecondary institutions or elementary and secondary schools as those terms are used in the final regulations, the statutory and regulatory definitions of ''program or activity'' encompass ''all of the operations of'' such recipients, and such ''operations'' may certainly include computer and internet networks, digital platforms, and computer hardware or software owned or operated by, or used in the operations of, the recipient.[890] Furthermore, the final regulations revise § 106.44(a) to specify that an education program or activity includes circumstances over which the recipient exercised substantial control over both the respondent and the context in which the harassment occurred, such that the factual circumstances of online harassment must be analyzed to determine if it occurred in an education program or activity. For example, a student using a personal device to perpetrate online sexual harassment during class time may constitute a circumstance over which the recipient exercises substantial control.

Contrary to the claims made by some commenters, the approach to ''education program or activity'' contained in the final regulations, and in particular its potential application to online harassment, would not necessarily conflict with the Department's previous 2010 Dear Colleague Letter addressing bullying and harassment. The Department's 2010 guidance made a passing reference that harassing conduct may include ''use of cell phones or the internet,'' and the Department's position has not changed in this regard.[891] These final regulations apply to sexual harassment perpetrated through use of cell phones or the internet if sexual harassment occurred in the recipient's education program or activity. As explained in the ''Adoption and Adaption of the Supreme Court's Framework to Address Sexual Harassment'' section of this preamble, these final regulations adopt and adapt the *Gebser/Davis* framework of actual knowledge and deliberate indifference, in contrast to the rubric in the 2010 Dear Colleague Letter on bullying and harassment; however, these final regulations appropriately address electronic, digital, or online sexual harassment by not making sexually harassing conduct contingent on the *method* by which the conduct is perpetrated. Additionally, even if a recipient is not required to address certain misconduct under these final regulations, these final regulations expressly allow a recipient to address such misconduct under its own code of conduct.[892] Accordingly, there may not be any conflict between these final regulations with respect to State laws that explicitly cover online harassment.

Changes: None.

Consistency With Title IX Statutory Text

Comments: Some commenters opposed the NPRM's approach to ''education program or activity'' by arguing that it conflicts with Title IX's statutory text. Commenters contended that the NPRM is an unambiguously incorrect interpretation of Title IX under the deference doctrine articulated by the Supreme Court in *Chevron U.S.A., Inc.* v. *Natural Resources Defense Council, Inc.,*[893] and will thus be given no judicial deference. One such commenter asserted that the Title IX statute has three distinctive protective categories, such that no person on the basis of sex can be: (1) Excluded from participation in; (2) denied the benefits of; or (3) subjected to discrimination under any education program or activity. The commenter argued that the first clause includes off-campus conduct, such as male students on a public street blocking female students from accessing campus. This commenter argued that the third clause prohibits discrimination ''under,'' and not ''in'' or ''within,'' a recipient's education program or activity and is violated whenever women or girls are subjected to more adverse conditions than males. This commenter asserted that the Title IX statutory text does not depend on where the underlying conduct occurs, but rather focuses on the subsequent hostile educational environment that such misconduct can cause.

Another commenter argued that requiring recipients to treat off-campus sexual misconduct differently from on-campus sexual misconduct can itself violate Title IX.

Discussion: The Department acknowledges the analysis offered by at least one commenter that the Title IX statute, by its own text, has three distinct protective categories and the commenter's argument that the ''subjected to discrimination'' prong is violated whenever females are subjected to more adverse conditions than males. As explained below, the Department elects to adopt the analysis applied by the Supreme Court rather than the analysis provided by the commenter.

In *Davis,* the Supreme Court acknowledged that Title IX protects students from ''discrimination'' and from being ''excluded from participation in'' or ''denied the benefits of'' any education program or activity receiving

[892] *E.g.,* § 106.45(b)(3)(i).

[893] 467 U.S. 837 (1984).

Federal financial assistance.[894] The *Davis* Court characterized sexual harassment as a form of sex *discrimination* under Title IX,[895] and reasoned that whether a recipient is liable for sexual harassment thus turns on whether the recipient can be said to have ''subjected'' students to sex discrimination in the form of sexual harassment.[896] The *Davis* Court further reasoned, ''Moreover, because the harassment must occur 'under' 'the operations of' a funding recipient, *see* 20 U.S.C. 1681(a); § 1687 (defining 'program or activity'), the harassment must take place in a context subject to the school district's control. . . . These factors combine to limit a recipient's damages liability to circumstances wherein the recipient exercises substantial control over both the harasser and the context in which the known harassment occurs.'' [897]

Adopting the Supreme Court's analysis of the appropriate application of the Title IX statute's ''program or activity'' language in the context of sexual harassment, the final regulations treat sexual harassment as a form of sex discrimination under Title IX and hold recipients accountable for responding to sexual harassment that took place in a context under the recipient's control. In interpreting ''education program or activity'' in the final regulations, the Department will look to the definitions of ''program or activity'' provided by Title IX [898] and existing Title IX regulations,[899] and has revised § 106.44(a) of the final regulations to clarify that ''education program or activity'' includes locations, events, or circumstances over which the recipient exercised substantial control over both the respondent and the context in which the harassment occurs, as well as on-campus and off-campus buildings owned or controlled by student organizations officially recognized by postsecondary institutions. The Department notes that the commenter's hypothetical, concerning male students on a public street blocking female students from accessing campus, would require a fact-specific analysis but could constitute sexual harassment in the recipient's education program or activity if such an incident occurred in a location, event, or circumstance over which the recipient exercised substantial control.

Contrary to the claims made by some commenters, and as discussed above, the final regulations would not necessarily require recipients to treat off-campus misconduct differently from on-campus misconduct. Title IX does not create, nor did Congress intend for it to create, open-ended liability for recipients in addressing sexual harassment. Rather, the statute imposed an important jurisdictional limitation through its reference to education programs or activities. Recipients are responsible under Title IX for addressing sex discrimination, including sexual harassment, in their ''education program or activity,'' but a recipient's education program or activity may extend to locations, events, and circumstances ''off campus.''

Changes: We have revised § 106.44(a) to state that for purposes of §§ 106.30, 106.44, and 106.45, ''education program or activity'' includes locations, events, or circumstances over which the respondent had substantial control over both the respondent and the context in which the sexual harassment occurred, and also includes buildings owned or controlled by student organizations that are officially recognized by a postsecondary institution.

Constitutional Equal Protection

Comments: One commenter contended that the NPRM's approach to ''education program or activity'' may violate the Fourteenth Amendment because experiencing off-campus or online sexual victimization detrimentally affects student-survivors' education, and the Fourteenth Amendment guarantees these students equal protection, yet, the commenter argued, the NPRM would leave these students outside Title IX's reach and deprived of equal protection.

Discussion: We disagree with the contention that the application in the final regulations of ''education program or activity'' as a jurisdictional condition may violate the Equal Protection Clause of the Fourteenth Amendment. The Department reiterates that the ''education program or activity'' limitation in the final regulations does not create or apply a geographic test, does not draw a line between ''off campus'' and ''on campus,'' and does not create a distinction between sexual harassment occurring in person versus online. Moreover, under these final regulations, any individual alleged to be a victim of conduct that could constitute sexual harassment is a ''complainant'' [900] to whom the recipient must respond in a prompt, non-deliberately indifferent manner; in that manner, all students are treated equally without distinction under the final regulations based on, for example, where a student resides or spends time. The distinction of which some commenters are critical, then, is not a distinction drawn among groups or types of students, but rather is a distinction drawn (for reasons explained previously) between incidents that are, or are not, under the control of the recipient. The Department further notes that even if commenters correctly characterize the distinction as being made between some students (who suffer harassment in an education program or activity) and other students (who suffer harassment outside an education program or activity), the applicable level of scrutiny under the Equal Protection Clause to any differential treatment under such circumstances would be the rational basis test.[901] A heightened level of scrutiny would apply where a suspect or quasi-suspect classification is involved, such as race or sex.[902] But, as here, where no such suspect or quasi-suspect classification is involved, the final regulations may treat students differently due to the circumstances in which the misconduct occurred, and the rational basis test applies. Under the rational basis test, a law or governmental action is valid under the Equal Protection Clause so long as it is rationally related to a legitimate government interest.[903] With Title IX,

Continued

Congress made a rational determination that recipients should be held liable for misconduct over which they had some level of control. The statute's reference to ''education program or activity'' reflects this important limitation. To expose recipients to liability for misconduct wholly unrelated to circumstances over which they have control would contravene congressional intent and lead to potentially unlimited exposure to loss of Federal funds. The Department believes that the use of ''education program or activity'' in § 106.44(a) appropriately reflects both statutory text and congressional intent, and furthers the legitimate government interest of ensuring liability is not open-ended and has reasonable jurisdictional limitations.

Changes: None.

Institutional Autonomy and Litigation Risk

Comments: A number of commenters stated that the Department's approach to ''education program or activity'' would undermine recipient autonomy and expose recipients to litigation risk. Commenters argued that recipients should have the right to determine the standards of behavior to which their students must adhere, both on campus and off campus, and that the NPRM would infringe on institutional academic prerogatives and independence. Commenters expressed concern that the NPRM would make recipients vulnerable to litigation from students seeking damages for off-campus assaults, including because recipients could be accused of arbitrarily deciding which cases to investigate and which cases to declare outside their jurisdiction.

Discussion: We acknowledge the importance of recipient discretion and flexibility to determine the recipient's own standards of conduct. However, Congress created a clear mandate in Title IX and vested the Department with the authority to administratively enforce Title IX to effectuate the statute's twin purposes: To ''avoid the use of Federal resources to support discriminatory practices'' and to ''provide individual citizens effective protection against those practices.'' [904] Importantly, nothing in the final regulations prohibits recipients from using their own disciplinary processes to address misconduct occurring outside their education program or activity.[905] Indeed, this flexibility for recipients to address sexual misconduct that falls outside the scope of Title IX, including sexual misconduct that is outside the recipient's education program or activity, permits recipients to reduce the litigation risk perceived by some commenters. As discussed above, and contrary to the claims made by many commenters, the final regulations do not distinguish between on-campus misconduct and off-campus misconduct. Off-campus sexual harassment is not categorically excluded from Title IX coverage. Recipients' decisions to investigate formal complaints regarding allegations of sexual harassment cannot be arbitrary under the final regulations; rather, a recipient *must* investigate a formal complaint where the alleged sexual harassment (meeting the definition in § 106.30) occurred in the recipient's education program or activity, against a person in the United States.

Changes: None.

Requests for Clarification

Comments: Commenters raised questions regarding the Department's approach to the ''education program or activity'' condition. Commenters requested clarity as to events that begin off campus but have effects on campus, such as interaction among students, faculty, and staff outside formal professional or academic activities. These commenters were concerned that, in such circumstances, it may be challenging for an institution to clearly and consistently identify what conduct has occurred strictly within its education program and which conduct is beyond its educational program. One commenter sought clarification as to what, if any, are the Department's expectations for a recipient's conduct processes that address off-campus sexual misconduct. This commenter asserted that Title IX prohibits discrimination ''under'' an education program or activity, but that § 106.44(a) and proposed § 106.44(b)(4) referred to sexual harassment ''in'' an education program or activity, while proposed § 106.45(b)(3) referred to sexual harassment ''within'' a program or activity. The commenter inquired as to whether ''in'' differs from ''within'' in those proposed sections, and whether those terms mean something different than ''under'' used in the Title IX statute, and if so what are the differences in meaning. The commenter asserted that Title IX prohibits ''discrimination'' under an education program or activity and that § 106.44(a) and proposed § 106.44(b)(2) refer to ''sexual harassment'' in an education program or activity, and asked if recipients would be required to respond where sexual harassment occurred outside an education program or activity but resulted in discrimination under the education program or activity. This commenter stated that under Title IX an individual may not be ''excluded'' from a federally-assisted program or activity on the basis of sex, and asked whether recipients must address sexual harassment that did not occur ''in'' its education program or activity but nevertheless effectively excluded the victim from equal access to it.

Discussion: The Department appreciates the questions raised by commenters regarding the application of ''education program or activity'' in § 106.44(a) of the final regulations. The final regulations do not impose requirements on a recipient's code of conduct processes addressing misconduct occurring outside the recipient's education program or activity, and do not govern the recipient's decisions to address or not address such misconduct. The Department's regulatory authority is limited to the scope of Title IX: Ensuring that recipients of Federal funding operate education programs or activities free from sex discrimination. For the final regulations to apply, sexual harassment (a form of sex discrimination) must occur in the recipient's education program or activity. As explained previously, nothing in the final regulations precludes a recipient from offering supportive measures to a complainant who reports sexual harassment that occurred outside the recipient's education program or activity, and any sexual harassment or sex discrimination that does occur in an education program or activity must be responded to even if it relates to, or happens subsequent to, sexual harassment that occurred outside the education program or activity.

Whether sexual harassment occurs in a recipient's education program or activity is a fact-specific inquiry. The key questions are whether the recipient exercised substantial control over the respondent and the context in which the incident occurred. There is no bright-

policy, statutory classification that neither proceeds along suspect lines nor infringes fundamental constitutional rights must be upheld against equal protection challenge if there is any reasonably conceivable state of facts that could provide rational basis for classification).

[904] *Cannon* v. *Univ. of Chicago,* 441 U.S. 677, 704 (1979).

[905] In response to many commenters' concerns that § 106.45(b)(3) was understood to prevent recipients from addressing misconduct that occurred outside an education program or activity, the Department has revised § 106.45(b)(3)(i) in the final regulations to expressly state that mandatory dismissal due to the alleged conduct occurring outside an education program or activity is only a dismissal for purposes of Title IX and does not preclude the recipient from addressing the conduct through other codes of conduct.

line geographic test, and off-campus sexual misconduct is not categorically excluded from Title IX protection under the final regulations.[906] Recognizing that recipients need to carefully consider this matter, the Department revised § 106.45(b)(1)(iii) to require training for Title IX Coordinators, investigators, decision-makers, and persons who facilitate informal resolution processes on ''the scope of the recipient's education program or activity.''

In response to a commenter's question regarding the NPRM's use of the terms ''in,'' ''within,'' and ''under'' an education program or activity, and whether those terms are intended to have different meanings, the Department has replaced ''within'' with ''in'' throughout the final regulations, thus making all provisions consistent with the reference to ''in'' contained in § 106.44(a). We also wish to clarify that the final regulations' use of the term ''in'' is meant to be interchangeable with the Title IX statute's use of ''under''; the Department gives the same meaning to these prepositions, and notes that the Supreme Court in *Davis* referenced harassment ''under'' the operations of (*i.e.,* the program or activity of) a recipient and harassment that occurred ''in'' a context subject to the recipient's control seemingly interchangeably.[907]

Changes: The final regulations consistently use ''in'' an education program or activity rather than ''within.''

Section 106.44(a) ''Against a Person in the U.S.''

Impact on Study Abroad Participants

Comments: Several commenters asserted that the NPRM would endanger students studying abroad, because the final regulations apply only to sexual harassment that occurs against a person in the United States. Commenters argued that when recipients offer students study abroad opportunities, recipients should still have responsibility to ensure student safety and well-being. Commenters acknowledged that Congress may not have contemplated studying abroad or recipients having satellite campuses across the globe when drafting Title IX in the 1970s. However, commenters argued that international experiences are increasingly common and critical components of education today, particularly in higher education, and that some schools require students in certain academic programs to study abroad. Commenters noted that even the Federal government, on the U.S. State Department website, encourages students to have international exposure to compete in a globalized society. Commenters argued that it would be absurd for the Federal government to encourage international exposure for students and not protect them in the process because studying abroad is necessary for some majors and to prepare for certain careers. Commenters cited studies suggesting study abroad increases the risk for sexual misconduct against female students and showing how students had to alter their career paths in the aftermath of sexual misconduct experienced abroad.[908] One commenter stated that harassment abroad, such as by institution-employed chaperones, can derail victims' ability to complete their education at their home institution in the United States. This commenter stated that for the Department to interpret Title IX as providing no recourse for such students is impossible to imagine. Commenters asserted that the NPRM tells bad actors they can get away with sexual misconduct in foreign programs. Commenters asserted that study abroad students are already uniquely vulnerable and less likely to report to foreign local authorities because, for example, they may be unfamiliar with the foreign legal system, they share housing with the perpetrators, and there may be language barriers, fear of retaliation or social isolation, and fewer available support services. Commenters further argued that because crime occurring overseas cannot be prosecuted in the U.S, filing a Title IX report with the recipient might be the survivor's only option. Commenters contended that the NPRM may have the effect of discouraging students from studying abroad and learning about foreign cultures and languages which would run contrary to the fundamental purpose of education to foster curiosity and discovery.

Discussion: We acknowledge the concerns raised by many commenters that the final regulations would not extend Title IX protections to incidents of sexual misconduct occurring against persons outside the United States, and the impact that this jurisdictional limitation might have on the safety of students participating in study abroad programs. However, by its plain text, the Title IX statute does not have extraterritorial application. Indeed, Title IX states that ''*[n]o person in the United States* shall, on the basis of sex be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance[.]'' [909] The Department believes a plain meaning interpretation of a statute is most consistent with fundamental rule of law principles, ensures predictability, and gives effect to the intent of Congress. Courts have recognized a canon of statutory construction that ''Congress ordinarily intends its statutes to have domestic, not extraterritorial, application.'' [910] This canon rests on presumptions that Congress is mainly concerned with domestic conditions and seeks to avoid unintended conflicts between our laws and the laws of other nations.[911] If Congress intended Title IX to have extraterritorial application, then it could have made that intention explicit in the text when it was passed in 1972, and Congress could amend Title IX to apply to a recipient's education programs or activities located outside the United States if Congress so chooses. The Federal government's encouragement of international experiences, such as study abroad, is not determinative of Title IX's intended scope. The U.S. Supreme Court most recently acknowledged the presumption against extraterritoriality in *Kiobel* v. *Royal Dutch Petroleum* [912] and *Morrison* v. *National Australian Bank.*[913] In *Morrison,* the Court reiterated the ''longstanding principle of American law that legislation of Congress, unless a contrary intent appears, is meant to apply only within the territorial jurisdiction of the United States.'' [914] The Court concluded that ''[w]hen a statute gives no clear indication of

[906] *See* the ''Clery Act'' subsection of the ''Miscellaneous'' section of this preamble for discussion regarding the distinctive purposes of Clery Act geography versus Title IX coverage of education programs or activities; *see also* revised § 106.44(a) including in an ''education program or activity'' any building owned or controlled by a student organization that is officially recognized by a postsecondary institution.

[914] *Id.* at 255.

extraterritorial application, it has none.'' [915]

Very few Federal cases have addressed whether Title IX applies extraterritorially to allegations of sex discrimination occurring abroad, and Federal district courts have reached different results in these cases.[916] To date, no Federal circuit has addressed this issue. Commenters noted that the court in *King* v. *Board of Control of Eastern Michigan University* [917] applied Title IX to a claim of sexual harassment occurring overseas during a study abroad program; the Federal district court reasoned that study abroad programs are educational operations of the recipient that ''are explicitly covered by Title IX and which necessarily require students to leave U.S. territory in order to pursue their education.'' The court emphasized that Title IX's scope extends to ''any education program or activity'' of a recipient, which presumably would include the recipient's study abroad programs. While the Department agrees that a recipient's study abroad programs may constitute education programs or activities of the recipient, the Department agrees with the rationale applied by a Federal district court in *Phillips* v. *St. George's University* [918] that regardless of whether a study abroad program is part of a recipient's education program or activity, Title IX does not have extraterritorial application. The court in *Phillips* noted that nothing in the Title IX statute's plain language indicates that Congress intended it to apply outside the U.S. and that the plain meaning of ''person in the United States'' suggests that Title IX only applies to persons located in the United States, even when that person is participating in a recipient's education program or activity outside the United States.

Both *Phillips* and *King* were decided before the Supreme Court's *Morrison* and *Kiobel* opinions, and the Department doubts that the rationale applied by the court in *King* would survive analysis under those Supreme Court decisions, which emphasized the importance of the presumption against extraterritoriality of statutes passed by Congress. We find the *Phillips* Court's reasoning to be well-founded, especially in light of the later-decided Supreme Court cases regarding extraterritoriality, and we believe the jurisdictional limitation on extraterritoriality contained in the final regulations is wholly consistent with the text of the Title IX statute and with the presumption against extraterritoriality recognized numerous times by the Supreme Court. We further note that the Supreme Court acknowledges that where Congress intends for its statutes to apply outside the United States, Congress knows how to codify that intent.[919] When Congress has codified such intent in other Federal civil rights laws, Congress has addressed issues that arise with extraterritorial application such as potential conflicts with foreign laws and procedures.[920] Based on the presumption against extraterritoriality reinforced by Supreme Court decisions and the plain language in the Title IX statute limiting protections to persons ''in the United States,'' the Department believes that the Department does not have authority to declare that the presumption against extraterritoriality has been overcome, absent further congressional or Supreme Court direction on this issue.

As a practical matter, we also note that schools may face difficulties interviewing witnesses and gathering evidence in foreign locations where sexual misconduct may have occurred. Recipients may not be in the best position to effectively investigate alleged sexual misconduct in other countries. Such practical considerations weigh in favor of the Department looking to Congress to expressly state whether Congress intends for Title IX to apply in foreign locations.

We emphasize that nothing in these final regulations prevents recipients from initiating a student conduct proceeding or offering supportive measures to address sexual misconduct against a person outside the United States. We have revised § 106.45(b)(3) to explicitly state that even if a recipient must dismiss a formal complaint for Title IX purposes because the alleged sexual harassment did not occur against a person in the U.S., such a dismissal is only for purposes of Title IX, and nothing precludes the recipient from addressing the alleged misconduct through the recipient's own code of conduct. Contrary to claims made by some commenters, it is not true that the final regulations leave students studying abroad with no recourse in the event of sexual harassment or sexual assault. Recipients remain free to adopt disciplinary systems to address sexual misconduct committed outside the United States, to protect their students from such harm, and to offer supportive measures such as mental health counseling or academic adjustments for students impacted by misconduct committed abroad. As such, we believe the final regulations will not discourage students from participating in study abroad programs that may enrich their educational experience.

Changes: None.

Consistency With Federal Law and Departmental Practice

Comments: Some commenters asserted that excluding extraterritorial application of Title IX would conflict with other Federal laws and past practice of the Department. One commenter stated that the NPRM is inconsistent with the Department's own interpretation of the VAWA amendments to the Clery Act, and argued that carving out conduct occurring abroad conflicts with Clery Act language regarding geographical jurisdiction. This commenter argued that if a postsecondary institution has a separate campus abroad or owns or controls a building or property abroad that is used for educational purposes and used by students, the postsecondary institution must disclose the Clery Act crimes that occur there. The commenter suggested it would be illogical to require recipients to make such disclosures and yet not address the same underlying misconduct and that this puts recipients in a precarious position. Other commenters argued that the Department should interpret Title IX as protecting persons enrolled in education programs or activities the recipient conducts or sponsors abroad, as this interpretation would be consistent with application of other Federal civil rights laws, such as Title VI, and that the proposed rules' approach conflicts with the Department's past approach of requiring recipients to address sexual misconduct that could limit participation in education programs or activities overseas.

Discussion: We disagree with the commenters who contended that excluding application of Title IX to sexual misconduct committed outside the United States raises untenable conflict with the past practice of the Department and other Federal laws.

[916] *See* Robert J. Aalberts *et al., Studying is Dangerous? Possible Federal Remedies for Study Abroad Liability,* 41 Journal Of Coll. & Univ. L. 189, 210–13 (2015).

[917] 221 F. Supp. 2d 783 (E.D. Mich. 2002).

[918] No. 07–CV–1555, 2007 WL 3407728 (E.D.N.Y. Nov. 15, 2007).

[919] *E.g., Equal Employment Opportunity Comm'n* v. *Arabian Am. Oil Co.* (*Aramco*), 499 U.S. 244, 258 (1991) (''Congress's awareness of the need to make a clear statement that a statute applies overseas is amply demonstrated by the numerous occasions on which it has expressly legislated the extraterritorial application of a statute.'').

[920] *E.g.,* Older Americans Act Amendments of 1984, Public Law 98–459, 802, 98 Stat. 1767, 1792 (codified at 29 U.S.C. 623, 630 (amending the Age Discrimination Employment Act of 1967 to apply outside the United States)); 29 U.S.C. 623(f) (addressing potential conflicts of laws issues).

With respect to past practice of the Department, OCR has never explicitly addressed in any of its guidance whether Title IX has extraterritorial application. For example, though the withdrawn 2014 Q&A stated that ''[u]nder Title IX, a school must process all complaints of sexual violence, *regardless of where the conduct occurred,* to determine whether the conduct occurred in the context of an education program or activity,'' [921] it included an illustrative list of covered ''[o]ff-campus education programs and activities'' such as activities occurring at fraternity or sorority houses and school-sponsored field trips; none of these examples involved an education program or activity outside the United States.[922] However, to the extent that application of the ''person in the United States'' language in the final regulations departs from past Department guidance or practice, the Department believes that the jurisdictional limitation on extraterritoriality contained in the final regulations is reasonable and wholly consistent with the plain text of the Title IX statute and with the presumption against extraterritoriality recognized numerous times by the U.S. Supreme Court.

With respect to other Federal law, we acknowledge that certain misconduct committed overseas is reportable under the Clery Act where, for example, the misconduct occurs in a foreign location that a U.S. institution owns and controls. However, the two laws (Title IX and the Clery Act) do not have the same scope or purpose,[923] even though the two laws often intersect for postsecondary institution recipients who are also subject to the Clery Act. The Department does not perceive a conflict between a recipient's obligation to comply with reporting obligations under the Clery Act and response obligations under Title IX. As discussed above, both the text of the Title IX statute and case law on the topic of extraterritoriality make it clear that Title IX does not apply to sex discrimination against a person outside the United States.

With respect to Title VI, this statute, like Title IX, expressly limits its application to domestic discrimination with its opening words ''No person in the United States . . .'' and commenters provided no example of a Federal court or Department application of Title VI to conduct occurring outside the United States. Nonetheless, the final regulations are focused on administrative enforcement of Title IX, and for reasons discussed previously, the Department does not believe that the statutory text or judicial interpretations of Title IX overcome the presumption against extraterritoriality that applies to statutes passed by Congress.

Changes: None.

Constitutional Equal Protection

Comments: One commenter asserted that excluding extraterritorial application of Title IX may raise Constitutional issues under the Fourteenth Amendment Equal Protection Clause. This commenter argued that experiencing sexual victimization in study abroad programs detrimentally affects the student-survivor's education, and the Fourteenth Amendment guarantees these students equal protection, yet the NPRM would leave these students outside the scope of Title IX protection and deprive them of equal protection.

Discussion: We disagree with the contention that excluding extraterritorial application of Title IX may violate the Fourteenth Amendment Equal Protection Clause. As an initial matter, the applicable level of scrutiny under the Equal Protection Clause to any differential treatment of students under the § 106.44(a) ''against a person in the United States'' limitation would be the rational basis test. A heightened level of scrutiny would apply where a suspect or quasi-suspect classification is involved, such as race or sex. But, as here, where no such suspect or quasi-suspect classification is involved and the final regulations may treat students differently due to the geographic location of misconduct occurring outside the United States, the rational basis test applies. Under the rational basis test, a law or governmental action is valid under the Equal Protection Clause so long as it is rationally related to a legitimate government interest.[924] With respect to Title IX, Congress made a rational determination that recipients should only be held liable for misconduct that occurs within the United States. The statute's explicit reference to ''[n]o person in the United States'' in 20 U.S.C. 1681(a) reflects this jurisdictional limitation. To hold recipient responsible for misconduct that took place outside the country could be unrealistically demanding and lead to open-ended liability, and if Congress intended that result, then Congress could have expressly stated its intent for Title IX to apply overseas when enacting Title IX, and can amend Title IX to so state. The Department believes that the reference to ''against a person in the United States,'' in § 106.44(a), appropriately reflects both the plain meaning of the statutory text and congressional intent that Title IX is focused on eradicating sex discrimination in domestic education programs or activities. The Department reiterates that recipients remain free under the final regulations to use their own disciplinary codes to address sexual harassment committed abroad and to extend supportive measures to students affected by sexual misconduct outside the United States.

Changes: None.

Impact on International or Foreign Exchange Students in the U.S.

Comments: A few commenters asserted the proposed rules' limitation with respect to persons ''in the United States'' may be detrimental to survivors who are international students whose visa status depends on academic performance. One commenter expressed concern that § 106.44(a) would exclude foreign exchange students in the U.S. from Title IX coverage, arguing that the Department should not treat foreign exchange students as undeserving of the same protection as students born in the United States.

Discussion: The jurisdictional limitation that sexual harassment occurred against ''a person in the United States'' is not a limitation that protects only U.S. citizens; international students or foreign students studying in the United States are entitled to the same protections under Title IX as any other individuals. Title IX states that ''[n]o person in the United States'' shall be subject to discrimination based on sex. It is well-settled that the word ''person'' in this context includes citizens and non-citizens alike. Title IX protects every individual in the U.S. against discrimination on the basis of sex in education programs or activities receiving Federal financial assistance, regardless of citizenship or legal residency.

Changes: None.

Section 106.44(a) Deliberate Indifference Standard

Comments: Many commenters were supportive of the deliberate indifference standard and several argued that it is a sufficient standard to hold institutions

[921] *See* 2014 Q&A at 29.

[922] *Id.*

[923] *See* ''Background'' subsection in ''Clery Act'' subsection of the ''Miscellaneous'' section of this preamble.

[924] *F.C.C.* v. *Beach Commc'ns, Inc.,* 508 U.S. 307, 313 (1993) (holding that in areas of social and economic policy, statutory classification that neither proceeds along suspect lines nor infringes fundamental constitutional rights must be upheld against equal protection challenge if there is any reasonably conceivable state of facts that could provide rational basis for classification).

accountable for failing to address allegations of sexual misconduct in an appropriate manner. Many commenters favored the deliberate indifference standard because it affords institutions greater discretion to handle Title IX cases in a manner that is most consistent with the institution's educational mission and level of resources.

In contrast, other commenters advocated for the Department to return to the ''reasonableness'' standard because it affords recipients less discretion in their handling of Title IX complaints. These commenters argued that the reasonableness standard strikes the necessary balance between forcing schools to make certain policy changes, such as adopting due process protections in their grievance procedures, and granting deference. Other commenters argued that because the deliberate indifference standard is couched in terms of a safe harbor and coupled with ''highly prescriptive mechanism[s]'' under § 106.44 and § 106.45 it actually provides recipients with very little to no discretion in practice.

Many commenters expressed the general concern that lowering the ''reasonableness'' standard to the ''deliberate indifference'' standard allows schools to investigate fewer allegations, punish fewer bad actors, and would shield schools from administrative accountability even in cases where schools mishandle complaints, fail to provide effective support, and wrongly determine against the weight of the evidence that the accused was not responsible for the misconduct. One commenter compared the deliberate indifference standard in the proposed rules to the application of the deliberate indifference standard in the prison context under the Eighth Amendment,[925] arguing that if finalized the deliberate indifference standard would apply more stringently in the Title IX context and provide greater institutional protection to schools because it would be difficult to imagine any scenario where an institution could be found deliberately indifferent.

Some commenters argued that the deliberate indifference standard is only appropriate in actions for private remedies rather than public remedies, and asserted that the 2001 Guidance acknowledged this difference. Some commenters contended that the deliberate indifference standard is wholly inappropriate in the context of administrative enforcement, arguing that because the Department only demands equitable remedies of schools, in the form of policy changes, schools do not require the additional protection afforded by the deliberate indifference standard that applies in private lawsuits for money damages against schools. Other commenters noted that the deliberate indifference standard has not been adopted in the context of any of the other civil rights statutes OCR is charged with enforcing.

Various commenters indicated that more clarity is needed with respect to what the deliberate indifference standard requires of recipients in the absence of a formal complaint of sexual harassment. Some commenters requested that the Department include a definition for deliberate indifference. Many commenters critiqued the language used to convey the standard, expressing the concern that a school's response could be indifferent or unreasonable and not be in violation of Title IX so long as they were not *deliberately* indifferent or *clearly* unreasonable. Some commenters expressed the concern that the word ''deliberate'' implies an intentionality element, asserting that intent is difficult to prove. Other commenters believed the standard was too vaguely worded, provided too much deference to the institutions, and would always be interpreted in favor of the schools. Some commenters argued that the deliberate indifference standard would effectively deny the complainant any meaningful process because an institution could dismiss a complaint after determining that the alleged conduct does not fall within its interpretation of the sexual harassment definition.

Some suggested the Department revise the proposed rules to impose a different standard on schools in circumstances where the schools are responding to allegations against someone in a position of authority, pointing to the misconduct of Larry Nassar at Michigan State University.

Discussion: The Department appreciates the commenters' support of the deliberate indifference standard and agrees that the deliberate indifference standard affords recipients an appropriate amount of discretion to address sexual misconduct in our Nation's schools while holding recipients accountable if their response is clearly unreasonable in light of the known circumstances. The Department, however, also recognizes that too much discretion can result in unintended confusion and uncertainty for both complainants who deserve a meaningful response and careful consideration of their reports, and for respondents who should be punished only after they are determined to be responsible through a fair process. Since the implementing regulations were first issued in 1975, the Department has observed, and many stakeholders, including complainants and respondents, have informed the Department through public comment, that complainants and respondents have experienced various pitfalls and implementation problems from a lack of clarity with respect to recipients' obligations under Title IX. As stated in the proposed regulations, the lack of clear regulatory standards has contributed to processes that have not been fair to the parties involved, have lacked appropriate procedural protections, and have undermined confidence in the reliability of the outcomes of investigations of sexual harassment complaints. For the reasons stated in the ''Adoption and Adaption of the Supreme Court's Framework to Address Sexual Harassment'' section of this preamble, the Department will maintain the deliberate indifference standard in the final regulations, with revisions to § 106.44(a) that specify certain actions a recipient must take in order to not be deliberately indifferent.

In response to commenters' concerns that the deliberate indifference standard leaves recipients too much leeway to decide on an appropriate response, the Department revises § 106.44(a) to include specific actions that a recipient must take as part of its non-deliberately indifferent response. Section 106.44(a) requires that a recipient's response treat complainants and respondents equitably by offering supportive measures as defined in § 106.30 to a complainant, and by following a grievance process that complies with § 106.45 before the imposition of any disciplinary sanctions or other actions that are not supportive measures as defined in § 106.30, against a respondent.[926] As commenters have stated, many complainants would like supportive measures and do not necessarily wish to pursue a formal complaint and grievance process, although they should be informed of the process for filing a formal complaint. The Department wishes to respect the autonomy and wishes of a complainant throughout these final regulations, and recipients should also respect a complainant's wishes to the degree

[925] Commenter cited: *Farmer* v. *Brennan,* 511 U.S. 825 (1994).

[926] For discussion of what is intended by refraining from imposing disciplinary sanctions and other actions that are ''not supportive measures'' against a respondent, see the ''Supportive Measures'' subsection of the ''Section 106.30 Definitions'' section of this preamble. We use the same language to describe refraining from punishing a respondent with following the § 106.45 grievance process, in § 106.45(b)(1)(i).

possible. Respondents also should not be punished for allegations of sexual harassment until after a grievance process that complies with § 106.45, as such a grievance process provides notice of the allegations to both complainants and respondents as well as a meaningful opportunity for both complainants and respondents to be heard. Additionally, the Title IX Coordinator must promptly contact the complainant to discuss the availability of supportive measures as defined in § 106.30, consider the complainant's wishes with respect to supportive measures, inform the complainant of the availability of supportive measures with or without the filing of a formal complaint, and explain to the complainant the process for filing a formal complaint. A recipient should engage in a meaningful dialogue with the complainant to determine which supportive measures may restore or preserve equal access to the recipient's education program or activity without unreasonably burdening the other party, including measures designed to protect the safety of all parties or the recipient's educational environment, or deter sexual harassment. A recipient must offer each complainant supportive measures, and a recipient will have sufficiently fulfilled its obligation to offer supportive measures as long as the offer is not clearly unreasonable in light of the known circumstances, and so long as the Title IX Coordinator has contacted the complainant to engage in the interactive process also described in revised § 106.44(a). The Department acknowledges that there may be specific instances in which it is impossible or impractical to provide supportive measures. For example, the recipient may have received an anonymous report or a report from a third party and cannot reasonably determine the identity of the complainant to promptly contact the complainant. Similarly, if a complainant refuses the supportive measures that a recipient offers (and the supportive measures offered are not clearly unreasonable in light of the known circumstances) and instead insists that the recipient take punitive action against the respondent without a formal complaint and grievance process under § 106.45, the Department will not deem the recipient's response to be clearly unreasonable in light of the known circumstances. If a recipient does not provide a complainant with supportive measures, then the recipient must document the reasons why such a response is not clearly unreasonable in light of the known circumstances, pursuant to revised § 106.45(b)(10)(ii). Offering supportive measures to every complainant and documenting why *not* providing supportive measures is *not* clearly unreasonable in light of the known circumstances are some of the actions required under these final regulations but not expressly required under case law describing the deliberate indifference standard. These actions are required as part of the Department's administrative enforcement of the deliberate indifference standard.

Although we acknowledge the concerns of commenters urging the Department to abandon the deliberate indifference standard and return to the reasonableness standard, the Department disagrees for various reasons. As more fully explained in the ''Deliberate Indifference'' subsection of the ''Adoption and Adaption of the Supreme Court's Framework to Address Sexual Harassment'' section, the Department departs from its prior guidance that set forth a standard more like reasonableness, or even strict liability, instead of deliberate indifference. The Department's past guidance and enforcement practices have taken the position that a recipient's response to sexual harassment should be judged under a standard that expected the recipient's response to effectively stop harassment and prevent its recurrence.[927] This approach did not provide recipients adequate flexibility to make decisions affecting their students. For example, the Department's guidance required recipients to always investigate any report of sexual harassment, even when the complainant only wanted supportive measures and did not want an investigation.[928] Such a rigid requirement to investigate every report of sexual harassment in every circumstance intrudes into complainants' privacy without concern for complainants' autonomy and wishes and, thus, may chill reporting of sexual harassment. Additionally, the Department's past guidance did not distinguish between an investigation that leads to the imposition of discipline and an inquiry to learn more about a report of sexual harassment.[929] Deliberate indifference provides appropriate flexibility for recipients while holding recipients accountable for meaningful responses to sexual harassment that prioritize complainants' wishes.[930]

The Department disagrees that these final regulations are highly or overly prescriptive such that recipients have no discretion. Recipients retain discretion to determine which supportive measures to offer and must document why providing supportive measures is not clearly unreasonably in light of the known circumstances, if the recipient does not provide any supportive measures. The Department will not second guess the supportive measures that a recipient offers as long as these supportive measures are not clearly unreasonable in light of the known circumstances. Similarly, the Department believes that the grievance process prescribed by § 106.45 creates a standardized framework for resolving formal complaints of sexual harassment under Title IX while leaving recipients discretion to adopt rules and practices not required under § 106.45.[931] The Department notes that these final regulations do not include the safe harbor provisions proposed in the NPRM, and the Department explains its decision for not including these safe harbors in the ''Recipient's Response in Specific Circumstances'' section of this preamble.

Contrary to some commenters' concerns, the deliberate indifference standard does not relieve recipients of their obligation to respond to every known allegation of sexual harassment. The deliberate indifference standard would also not allow recipients to investigate fewer allegations of sexual harassment or punish fewer respondents after a finding of responsibility. Rather, under these final regulations, recipients are specifically required to investigate allegations in a formal complaint (and must explain to each complainant the option of filing a formal complaint), and must provide a complainant with

[927] 2001 Guidance at iv, vi.

[928] 2001 Guidance at 13, 15, 18; 2011 Dear Colleague Letter at 4.

[929] 2001 Guidance at 13, 15, 18; 2011 Dear Colleague Letter at 4.

[930] The final regulations specify that a recipient's non-deliberately indifferent response must include investigating and adjudicating sexual harassment allegations, when a formal complaint is filed by a complainant or signed by the recipient's Title IX Coordinator. § 106.44(b)(1); § 106.30 (defining ''formal complaint''); § 106.45(b)(3)(i).

[931] The revised introductory sentence in § 106.45(b) provides that any provisions, rules, or practices other than those required by this section that a recipient adopts as part of its grievance process for handling formal complaints of sexual harassment as defined in § 106.30, must apply equally to both parties. The final regulations grant flexibility to recipients in other respects; *see* the discussion in the ''Other Language/Terminology Comments'' subsection of the ''Section 106.30 Definitions'' section of this preamble (noting that recipients may decide whether to calculate time frames using calendar days, school days, or other method); § 106.45(b)(6)(i) (allowing, but not requiring, live hearings to be held virtually through use of technology); § 106.45(b)(5)(vi) (removing the requirement that evidence gathered in the investigation be provided to the parties using a file-sharing platform); §§ 106.45(b)(1)(vii), 106.45(b)(7)(i) (giving recipients a choice between using the preponderance of the evidence standard or the clear and convincing evidence standard).

remedies any time a respondent is found responsible for sexual harassment pursuant to § 106.45(b)(1)(i). Even where a formal investigation is not required (because neither the complainant nor the Title IX Coordinator has filed or signed a formal complaint, or because a complainant is not participating in or attempting to participate in the recipient's education program or activity at the time of filing), the deliberate indifference standard requires that a recipient's response is not clearly unreasonable in light of known circumstances. Contrary to commenters' arguments, this standard requires more than for a recipient to respond in some minimal or ineffective way because minimal and ineffective responses would inevitably qualify as ''clearly unreasonable'' and because as revised, § 106.44(a) imposes specific, mandatory obligations on a recipient with respect to a recipient's response to each complainant. Given that the deliberate indifference standard involves an analysis of whether a response was clearly unreasonable in light of the known circumstances, there are many different factual circumstances under which a recipient's response may be deemed deliberately indifferent.

Section 106.44(a) requires a recipient to respond promptly where the recipient has actual knowledge of sexual harassment; a recipient may have actual knowledge of sexual harassment even where no person has reported or filed a formal complaint about the sexual harassment. For example, employees in an elementary or secondary school may observe sexualized insults scrawled on school hallways, and even where no student has reported the incident, the school employees' notice of conduct that could constitute sexual harassment as defined in § 106.30 (*i.e.,* unwelcome conduct that a reasonable person would conclude is so severe, pervasive, and objectively offensive that it effectively denies a person equal access to education) charges the recipient with actual knowledge, and the recipient must respond in a manner that is not clearly unreasonable in light of the known circumstances, which could include the recipient removing the sexually harassing insults and communicating to the student body that sexual harassment is unacceptable. By way of further example, if a Title IX Coordinator were to receive multiple reports of sexual harassment against the same respondent, as part of a non-deliberately indifferent response the Title IX Coordinator may sign a formal complaint to initiate a grievance process against the respondent, even where no person who alleges to be the victim wishes to file a formal complaint. The deliberate indifference standard does not permit recipients to ignore or respond inadequately to sexual harassment of which the recipient has become aware, but the deliberate indifference standard appropriately recognizes that a recipient's prompt response will differ based on the unique factual circumstances presented in each instance of sexual harassment.

In response to comments that the *Gebser/Davis* liability standard (*i.e.,* deliberate indifference) is and should be used only for monetary damages in private litigation, the Department notes that courts have used the *Gebser/Davis* standard in considering and awarding injunctive relief.[932] Additionally, in *Gebser,* the Supreme Court acknowledged that the Department of Education has the authority to ''promulgate and enforce requirements that effectuate [Title IX's] non-discrimination mandate.'' [933] In promulgating these final regulations, the Department is choosing to do just that. The Department is not required to adopt identical standards for all civil rights laws under the Department's enforcement authority, and after carefully considering the rationale relied upon by the Supreme Court in the context of sexual harassment under Title IX, the Department adopts the deliberate indifference standard articulated by the Supreme Court, tailored for administrative enforcement of recipients' responses to sexual harassment. The Department believes it would be beneficial for recipients and students alike if the administrative standards governing recipients' responses to sexual harassment were aligned with the standards developed by the Supreme Court in private actions, while ensuring that through administrative enforcement the Department holds recipients accountable for taking specific actions that the *Gebser/Davis* framework does not require.[934]

The Department also believes that the language used to describe the deliberate indifference standard is sufficiently clear. The Department defines the standard according to the conventional understanding of the standard, that is, to be deliberately indifferent means to have acted in a way that is ''clearly unreasonable in light of the known circumstances'' consistent with the formulation of the deliberate indifference standard offered by the Supreme Court in *Davis.*[935] The Department appreciates the opportunity to clarify that the term ''deliberate'' as used in the standard does not require an element of subjective intent to harm, or bad faith, or similar mental state, on the part of a recipient's officials, administrators, or employees. Rather, the final regulations clearly state in § 106.44(a) that a recipient with actual knowledge of sexual harassment against a person in the United States occurring in its education program or activity *must* respond in a manner that is ''not clearly unreasonable,'' including by taking certain specific steps such as offering supportive measures to a complainant. Accordingly, the Department will hold a recipient responsible for compliance regardless of whether acting in a clearly unreasonable way, in light of the known circumstances, is the result of malice, incompetence, ignorance, or other mental state of the recipient's officials, administrators, or employees. As adapted for administrative enforcement, the deliberate indifference standard sufficiently ensures that a recipient takes steps to address student safety and provides equal access to the recipient's education program or activity while preserving a recipient's discretion to address the unique facts and circumstances presented by any particular situation (for example, a

[932] *Fitzgerald* v. *Barnstable Sch. Dist.,* 555 U.S. 246, 255 (2009) (''In addition, this Court has recognized an implied private right of action . . . In a suit brought pursuant to this private right, *both injunctive relief and damages are available.*'') (internal citations omitted; emphasis added); *Hill* v. *Cundiff,* 797 F.3d 948, 972–73 (11th Cir. 2015) (reversing summary judgment against plaintiff's claims for injunctive relief because a jury could find that the alleged conduct was ''severe, pervasive, and objectively offensive'' under *Davis*); *B.H. ex rel. Hawk* v. *Easton Area Sch. Dist.,* 725 F.3d 293, 322–23 (3d Cir. 2013) (upholding preliminary injunction against school for banning students from wearing bracelets because the school failed to show that the ''bracelets would breed an environment of pervasive and severe harassment'' under *Davis*); *Haidak* v. *Univ. of Mass. at Amherst,* 299 F. Supp. 3d 242, 270 (D. Mass. 2018) (denying plaintiff's request for a preliminary injunction because he failed to show that the school was deliberately indifferent to an environment of severe and pervasive discriminatory conduct under *Davis*), *aff'd in part, vacated in part, remanded by Haidak* v. *Univ. of Mass.-Amherst,* 933 F.3d 56 (1st Cir. 2019).

[933] *Gebser* v. *Lago Vista Indep. Sch. Dist.,* 524 U.S. 274, 292 (1998).

[934] *E.g.,* § 106.44(a) specifically requires that a recipient's mandatory response to each report of sexual harassment must include promptly offering supportive measures to the complainant, and must avoid imposing disciplinary sanctions against a respondent without following the § 106.45 grievance process; § 106.44(b)(1) requires a recipient to investigate sexual harassment allegations made in a formal complaint; § 106.45 prescribes specific procedural protections for complainants, and respondents, when a recipient investigates and adjudicates formal complaints.

[935] *Davis* v. *Monroe Cnty. Bd. of Educ.,* 526 U.S. 629, 648–49 (1999); § 106.44(a).

recipient's offer of supportive measures as required in § 106.44(a) will be evaluated based on whether the recipient offered supportive measures to the complainant that, under the facts and circumstances presented in an individual complainant's situation, were in fact designed to restore or preserve the complainant's equal educational access).

The Department is persuaded by commenters' suggestions that the Department should impose stricter, more specific obligations on recipients' responses to sexual harassment or sexual harassment allegations, including allegations against employees in positions of authority. Rather than abandoning the deliberate indifference liability standard, the Department adapts that standard for administrative enforcement in ways that preserve the benefits of aligning judicial and administrative enforcement rubrics, preserve the benefit of the ''not clearly unreasonable in light of the known circumstances'' standard's deference to unique factual circumstances, yet imposes mandatory obligations on every recipient to respond in specific ways to each complainant alleged to be victimized by sexual harassment. Adopting the Supreme Court's formulation of the deliberate indifference standard, while adapting that standard to specify what a recipient *must* do every time the recipient knows of sexual harassment (or allegations of sexual harassment), addresses commenters' concerns that the deliberate indifference standard as presented in the NPRM did not impose strict enough requirements on a recipient to ensure the recipient responds supportively and fairly to sexual harassment in its education programs or activities.

In the interest of providing greater clarity, consistency, and transparency as to a recipient's obligations under Title IX and what students can expect, the Department does not want to overcomplicate the regulatory scheme in the final regulations by establishing separate standards for when a recipient is handling complaints involving different classes of respondents (for example, allegations against students, versus allegations against employees). The Department believes that expecting a recipient to respond in a manner that is not clearly unreasonable in light of the known circumstances appropriately requires a recipient to take into account whether the respondent holds a position of authority.

Changes: The Department revised § 106.44(a) to provide that a recipient's response must be prompt, and must treat complainants and respondents equitably by offering supportive measures as defined in § 106.30 to a complainant, and by following a grievance process that complies with § 106.45 before the imposition of any disciplinary sanctions or other actions that are not supportive measures as defined in § 106.30, against a respondent. Section § 106.44(a) is also revised to provide that the Title IX Coordinator must promptly contact the complainant to discuss the availability of supportive measures as defined in § 106.30, consider the complainant's wishes with respect to supportive measures, inform the complainant of the availability of supportive measures with or without the filing of a formal complaint, and explain to the complainant the process for filing a formal complaint.

Recipient's Response in Specific Circumstances

Section 106.44(b) Proposed ''Safe Harbors,'' Generally

Comments: Some commenters praised the safe harbor provisions generally for giving colleges and universities the discretion to respond to sexual harassment complaints outside the formal grievance process. Some commenters also praised the safe harbor provisions for identifying specific circumstances under which a recipient can conform its response to legal requirements and avoid a finding of deliberate indifference.

Some commenters, although supportive of the safe harbors generally, requested that the Department clarify how the safe harbors would work.

Many commenters disagreed with the Department's use of the term ''safe harbor'' in the NPRM, because the provisions that provided a ''safe harbor'' also include mandatory requirements. These commenters argued that a safe harbor is conventionally understood as a provision that a regulated party can take advantage of to shield itself from administrative action, as opposed to something a regulated party is required to do. Commenters asserted that ''safe harbors'' are options rather than obligations and pointed to the mandatory language contained in proposed § 106.44(b)(2) under which the Title IX Coordinator would have been required to file a formal complaint upon receiving multiple reports against a respondent,[936] as fundamentally inconsistent with the idea of a safe harbor.

Some commenters criticized the safe harbor provisions as rules intended to immunize recipients from a finding of deliberate indifference but requiring no more than a minimal response to allegations of sexual harassment, contrary to Title IX's express intent. Commenters argued that the safe harbor provisions, combined with the deliberate indifference standard, curtail the Department's ability to independently and comprehensively review a recipient's response to sexual harassment allegations, amounting to an abdication of the Department's role to enforce Title IX.

Discussion: The Department appreciates comments in support of the two proposed safe harbors. Upon further consideration, the Department decided not to include the two proposed safe harbors in these final regulations.

One of the proposed safe harbor provisions provided that if the recipient followed a grievance process (including implementing any appropriate remedy as required) that complies with § 106.45 in response to a formal complaint, the recipient's response to the formal complaint would not be deliberately indifferent and would not otherwise constitute discrimination under Title IX. The proposed provision was meant to provide an assurance that the recipient's response (only as to the formal complaint) would not be deemed deliberately indifferent as long as a recipient complies with § 106.45. This proposed safe harbor left open the possibility that other aspects of the recipient's response may be deliberately indifferent. The Department understands commenters' concerns that this safe harbor provision may have been confusing or misleading by somehow suggesting that compliance with § 106.45 is not required, or by suggesting that compliance with § 106.45 would have excused a recipient from providing a non-deliberately indifferent response with respect to matters other than conducting a grievance process. The Department is not including this proposed safe harbor provision in the final regulations to make it clear that recipients are always required to comply with § 106.45 in response to a formal complaint, and are always required to comply with all the obligations specified in § 106.44(a), with or without a formal complaint being filed. Indeed, the Department retains the

[936] Proposed § 106.44(b)(2) has been removed in the final regulations; see discussion under the ''§ Proposed 106.44(b)(2) Reports by Multiple Complainants of Conduct by Same Respondent [removed in final regulations]'' subsection of the ''Recipient's Response in Specific Circumstances'' subsection of the ''Section 106.44 Recipient's Response to Sexual Harassment, Generally'' section of this preamble.

mandate in § 106.45(b)(1) and revises this mandate for clarity to state: ''In response to a formal complaint, a recipient must follow a grievance process that complies with § 106.45.'' The Department did not intend to leave the impression that it was immunizing recipients with respect to their obligations to address sexual harassment. These final regulations require a meaningful response to allegations of sexual harassment of which a recipient has notice, when the sexual harassment occurs in a recipient's education program or activity against a person in the United States.

The second proposed safe harbor provided that a recipient would not be deliberately indifferent when in the absence of a formal complaint the recipient offers and implements supportive measures designed to effectively restore or preserve the complainant's access to the recipient's education program or activity, and the recipient also informs the complainant in writing of the right to file a formal complaint. This safe harbor is now unworkable and unnecessary in light of other revisions made to the proposed regulations, specifically a recipient's obligations in § 106.44(a) and § 106.45(b)(10)(ii). Under § 106.44(a), a recipient's response must treat complainants and respondents equitably by offering the complainant supportive measures as defined in § 106.30, and a Title IX Coordinator must promptly contact the complainant to discuss the availability of supportive measures, consider the complainant's wishes with respect to supportive measures, inform the complainant of the availability of supportive measures with or without the filing of a formal complaint, and explain to the complainant the process for filing a formal complaint. The Department revised § 106.45(b)(1) to add a mandate that with or without a formal complaint, a recipient must comply with § 106.44(a), emphasizing that recipients must offer supportive measures to a complainant regardless of whether a complainant chooses to file a formal complaint, and recipients must investigate any formal complaint that a complaint does choose to file. Additionally, under § 106.45(b)(10)(ii), if a recipient does not provide a complainant with supportive measures, then the recipient must document why such a response was not clearly unreasonable in light of the known circumstances. As recipients are now required to offer supportive measures to a complainant (not only incentivized to do so by the proposed safe harbor) and to document why not providing a complainant with supportive measures was not clearly unreasonable in light of the known circumstances, the final regulations removes safe harbors and instead, the Department will enforce the mandates and requirements in the final regulations, including those specified in §§ 106.44(a) and 106.44(b).

Despite the absence of these safe harbor provisions, recipients still have discretion with respect to how to respond to sexual harassment allegations in a way that takes into account factual circumstances. The final regulations, like the proposed regulations, require a recipient to begin the § 106.45 grievance process in response to a formal complaint. A recipient retains significant discretion under these final regulations, yet must meet specific, mandatory obligations that ensure a recipient responds supportively and fairly to every allegation of Title IX sexual harassment. For example, a recipient may decide which supportive measures to offer a complainant, whether to offer an informal resolution process under § 106.45(b)(9), whether to allow all parties, witnesses, and other participants to appear at the live hearing virtually under § 106.45(b)(6)(i), and whether to take action under another provision of the recipient's code of conduct even if the recipient must dismiss allegations in a formal complaint under § 106.45(b)(3)(i), among other areas of discretion.

These final regulations also provide sufficient clarity as to how a recipient must respond to sexual harassment, rendering the proposed safe harbors unnecessary. For example, § 106.44(a) specifically addresses how a recipient's response must treat complainants and respondents equitably by offering supportive measures as defined in § 106.30 to a complainant, and by following a grievance process that complies with § 106.45 before the imposition of any disciplinary sanctions or other actions that are not supportive measures against a respondent. Section § 106.44(b)(1) also clearly mandates that in response to a formal complaint a recipient must follow a grievance process that complies with § 106.45, and with or without a formal complaint, a recipient must comply with § 106.44(a). The Department clearly addresses specific circumstances throughout these final regulations. For example, the Department addresses when a recipient must or may dismiss a formal complaint under § 106.45(b)(3) for purposes of sexual harassment under Title IX or this part, when a recipient may consolidate formal complaints as to allegations of sexual harassment under § 106.45(b)(4), and when an informal resolution process may be offered under § 106.45(b)(9), among other matters.

The elimination of the safe harbor provisions proposed in the NPRM alleviates and addresses the concerns of commenters who opposed these safe harbor provisions.

Changes: The Department does not include the two safe harbor provisions from the NPRM, in proposed § 106.44(b)(1) and proposed § 106.44(b)(3).

Section 106.44(b)(1) Mandate To Investigate Formal Complaints and Safe Harbor

Comments: Several commenters supported § 106.44(b)(1), asserting that this provision places control in the hands of the victims, and prevents victims from having to participate in a grievance process against their will. Other commenters opposed this provision, arguing that it relieves institutions of the obligation to address sexual harassment claims of which they have actual knowledge by discouraging institutions from investigating allegations in the absence of a formal complaint.

Many commenters expressed concern that institutions will merely ''check'' the procedural ''boxes'' outlined in § 106.45 without regard for the substantive outcomes of formal grievance processes. Many commenters asserted that this proposed safe harbor would only benefits respondents, and would provide no benefit to complainants. Other commenters asserted that if a recipient fails to follow procedural requirements in § 106.45, the safe harbor in § 106.44(b)(1) would only hold recipients to the standard of deliberate indifference, which commenters argued was too low a standard to ensure that recipients comply with the § 106.45 grievance process.

Many commenters argued that the safe harbor in § 106.44(b)(1) provided too little flexibility for institutions to develop their own grievance process. Some commenters expressed concern that a recipient would not have the flexibility to forgo a grievance process in a situation where the recipient determined that the allegations contained in a formal complaint were without merit, frivolous, or that the allegations had already been investigated. Some commenters asked the Department to clarify whether satisfying § 106.45 is the only way, or one of many ways, to comply with the proposed rules and receive the safe harbor protections of § 106.44(b)(1).

Another commenter suggested that the Department add a timeliness requirement to § 106.44(b)(1) so that a formal complaint must be filed within a certain time frame, in order to avoid prejudice or bias against a respondent.

Discussion: As explained in the ''Section 106.44(b) Proposed 'Safe harbors,' generally,'' subsection of the ''Recipient's Response in Specific Circumstances'' section of this preamble, these final regulations do not include the safe harbor provision that if the recipient follows a grievance process (including implementing any appropriate remedy as required) that complies with § 106.45 in response to a formal complaint, the recipient's response to the formal complaint is not deliberately indifferent and does not otherwise constitute discrimination under Title IX. The Department understands commenters' concerns that this safe harbor provision may have been confusing or misleading by somehow suggesting that full compliance with § 106.45 is not required—that is, by suggesting that a recipient must only follow § 106.45 in a way that is not deliberately indifferent. The Department is not including this proposed safe harbor provision in the final regulations to make it clear that recipients are always required to fully comply with § 106.45 in response to a formal complaint. Indeed, the Department retains the mandate in § 106.45(b)(1) and revises this mandate for clarity to state: ''In response to a formal complaint, a recipient must follow a grievance process that complies with § 106.45.'' The Department also recognizes, as many commenters stated, that a complainant may not wish to initiate or participate in a grievance process for a variety of reasons, including fear of re-traumatization, and the Department affirms the autonomy of complainants by making it clear that a recipient *must* investigate and adjudicate when a complainant has filed a formal complaint. At the same time, the final regulations ensure that complainants must be offered supportive measures with or without filing a formal complaint, thus respecting the autonomy of complainants who do not wish to initiate or participate in a grievance process by ensuring that such complainants receive a supportive response from the recipient regardless of also choosing to file a formal complaint. For this reason, the Department revised § 106.44(b)(1) to expressly state: ''With or without a formal complaint, a recipient must comply with § 106.44(a).'' Section 106.44(a) requires a recipient to offer a complainant supportive measures as part of its prompt, non-deliberately indifferent response, whether or not the complainant chooses to file a formal complaint.

The Department disagrees that these final regulations discourage recipients from investigating allegations. As explained previously, a recipient *must* investigate a complainant's allegations when the complainant chooses to file a formal complaint, and a recipient *may* choose to initiate a grievance process to investigate the complainant's allegations even when the complainant chooses not to file a formal complaint, if the Title IX Coordinator signs a formal complaint, after having considered the complainant's wishes and evaluated whether an investigation is not clearly unreasonable in light of the specific circumstances. A recipient, however, cannot impose any disciplinary sanctions or other actions that are not supportive measures against a respondent until after the recipient follows a grievance process that complies with § 106.45. The recipient's Title IX Coordinator may always sign a formal complaint, as defined in § 106.30, to initiate an investigation. The formal complaint triggers the grievance process in § 106.45, which provides notice to both parties of the investigation and provides them an equal opportunity to participate and respond to the allegations of sexual harassment. These final regulations protect both complainants and respondents from the repercussions of an investigation that they do not know about and cannot participate in, and the complainant as well as the respondent may choose whether to participate in the grievance process.[937]

By eliminating § 106.44(b)(1), the Department makes it clear that recipients will not be able to merely ''check boxes'' or escape liability just for having a process that appears ''on paper'' to comply with § 106.45. We appreciate the opportunity to clarify that the Department will evaluate a recipient's compliance with § 106.45 without regard to whether the recipient was ''deliberately indifferent'' in failing to comply with those provisions. In other words, the Department may find that the recipient violated any of the requirements in § 106.45, whether or not the recipient believes that failure to comply was ''not clearly unreasonable.'' As explained throughout this preamble, including in the ''Role of Due Process in the Grievance Process'' section of this preamble, the Department has selected all the provisions of the § 106.45 grievance process as those provisions needed to improve the fairness, reliability, predictability, and legitimacy of Title IX grievance processes, and expects recipients to comply with the entirety of § 106.45. For example, the Department may find that a recipient violated § 106.45(b)(2) if the recipient did not provide the requisite written notice of allegations to both parties, even if the recipient believes that the recipient had a good reason for refusing to send that initial written notice. Similarly, a recipient may violate § 106.45(b)(5)(ii) if the recipient does not provide an equal opportunity for the parties to present witnesses, including fact and expert witnesses, and other inculpatory and exculpatory evidence as part of the investigation, even if the recipient believes that refusing to do so was not clearly unreasonable.

The Department disagrees that the grievance process prescribed by § 106.45 favors respondents or provides no benefits to complainants. For reasons explained throughout this preamble, including in the ''Role of Due Process in the Grievance Process'' section and the ''General Support and Opposition to the § 106.45 Grievance Process'' section of this preamble, the Department believes that the § 106.45 grievance process gives complainants and respondents clear, strong procedural rights and protections that foster a fair process leading to reliable outcomes. For example, a complainant whose allegations of sexual harassment in a formal complaint are dismissed may appeal such a dismissal on specific grounds under § 106.45(b)(8)(i). The grievance process in § 106.45 provides consistency, predictability, and transparency as to a recipient's obligations and what students can expect when a formal complaint is filed. As many commenters appreciated, under the final regulations, if the complainant decides to file a formal complaint, this will trigger a grievance process that includes the procedural safeguards set forth in § 106.45.

The Department understands commenters' arguments that § 106.44(b)(1) does not afford recipients flexibility to select a grievance process that the recipient prefers over the process prescribed in § 106.45. For reasons described in the ''Role of Due Process in the Grievance Process'' section of this preamble, and in the ''General Support and Opposition to the

[937] Section 106.71 (added in the final regulations, prohibiting retaliation against any individual for exercising rights under Title IX, including an individual's right to participate, or to choose not to participate, in a Title IX grievance process). *See* the ''Retaliation'' section of this preamble for further discussion.

§ 106.45 Grievance Process'' section of this preamble, the Department believes that the grievance process prescribed by § 106.45 creates a standardized framework for resolving formal complaints of sexual harassment under Title IX while leaving recipients discretion to adopt rules and practices not required under § 106.45.[938] We reiterate that the § 106.45 grievance process applies only to formal complaints alleging sexual harassment as defined in § 106.30, that occurred in the recipient's education program or activity against a person in the United States. These final regulations do not dictate what kind of process a recipient should or must use to resolve allegations of other types of misconduct. Because a recipient's response to Title IX sexual harassment is part of a recipient's obligation to protect every student's Federal civil right to participate in education programs and activities free from sex discrimination a recipient's response is not simply a matter of the recipient's own codes of conduct or policies; a recipient's response is a matter of fulfilling obligations under a Federal civil rights law. The Department has carefully crafted a standardized grievance process for resolving allegations of Title IX sexual harassment so that every student (and employee) receives the benefit of transparent, predictable, consistent resolution of formal complaints that allege sex discrimination in the form of sexual harassment under Title IX.

The Department acknowledges commenters' concerns that recipients do not have the discretion to forgo a formal grievance process in a situation where the recipient determined the allegations were without merit, frivolous, or had already been investigated, but we decline to grant that kind of discretion because the Department believes that, where a complainant chooses to file a formal complaint and initiate a recipient's formal grievance process, that formal complaint should be taken seriously and not prejudged or subjected to cursory or conclusory evaluation by a recipient's administrators. The purpose of the § 106.45 grievance process is to resolve allegations of sexual harassment impartially, without conflicts of interest or bias, and to objectively examine relevant evidence before reaching a determination regarding responsibility. Permitting a recipient to deem allegations meritless or frivolous without following the § 106.45 grievance process would defeat the Department's purpose in providing both parties with a consistent, transparent, fair process, would not increase the reliability of outcomes, and would increase the risk that victims of sexual harassment will not be provided remedies. The Department notes that the final regulations give recipients discretion to offer informal resolution processes to resolve formal complaints (§ 106.45(b)(9)) and permit discretionary dismissal of a formal complaint (or allegations therein) by a recipient under limited circumstances (§ 106.45(b)(3)(ii)).[939]

We have also considered commenters' suggestion that the Department add a requirement limiting the amount of time a complainant has for filing a formal complaint, but the Department declines to revise the final regulations to include a statute of limitations or similar time limit.[940] However, we have revised § 106.30 defining ''formal complaint'' to specify that at the time of filing a formal complaint, the complainant must be participating in or attempting to participate in the recipient's education program or activity. In addition, § 106.45(b)(3)(ii) allows a discretionary dismissal of a formal complaint where the complainant wishes to withdraw the formal complaint (if the complainant notifies the Title IX Coordinator, in writing, of this wish), where the respondent is no longer enrolled or employed by the recipient, or where specific circumstances prevent the recipient from meeting the recipient's burden of collecting evidence sufficient to reach a determination regarding responsibility. The length of time elapsed between an incident of alleged sexual harassment, and the filing of a formal complaint, may, in specific circumstances, prevent a recipient from collecting enough evidence to reach a determination, justifying a discretionary dismissal under § 106.45(b)(3)(ii).

Changes: The Department does not include the safe harbor provision regarding the § 106.45 grievance process that was proposed in § 106.44(b)(1) in the NPRM. Section 106.44(b)(1) in the final regulations retains the mandate to follow a grievance process that complies with § 106.45 in response to a formal complaint, and adds a mandate that the recipient must comply with § 106.44(a) with or without a formal complaint.

Proposed § 106.44(b)(2) Reports by Multiple Complainants of Conduct by Same Respondent [Removed in Final Regulations]

Comments: A number of commenters expressed opposition to proposed § 106.44(b)(2), which would have required Title IX Coordinators to file a formal complaint upon receiving reports from multiple complainants that a respondent engaged in conduct that could constitute sexual harassment. Commenters opposed this proposed provision due to concerns that the provision could place the safety of victims at risk by requiring a grievance process against a respondent over the wishes of the complainant and could place victims in harm's way without the victim's knowledge or input because nothing in the proposed provision required the Title IX Coordinator to first alert or warn the victim that the Title IX Coordinator would file a formal complaint. Commenters argued that this proposed provision implied that Title IX Coordinators could not file a formal complaint unless a respondent was a repeat offender.

A number of commenters expressed concern that the proposed provision would pose a particular risk in cases dealing with dating violence, domestic violence, or stalking. Commenters argued that survivors often choose not to report intimate partner violence or stalking to authorities for a multitude of reasons, one of which is fear that the perpetrator will retaliate or escalate the violence.

A number of commenters expressed concern that the mandatory filing requirement in proposed § 106.44(b)(2) would violate survivor autonomy. Commenters argued that the proposed provision would violate autonomy principles embedded elsewhere in the proposed rules. Commenters argued the

[938] The revised introductory sentence in § 106.45(b) provides that any provisions, rules, or practices other than those required by § 106.45 that a recipient adopts as part of its grievance process for handling formal complaints of sexual harassment as defined in § 106.30, must apply equally to both parties. The final regulations grant flexibility to recipients in other respects. The discussion in the ''Other Language/Terminology Comments'' subsection of the ''Section 106.30 Definitions'' section of this preamble notes that recipients may decide whether to calculate time frames using calendar days, school days, or other method. *See also* § 106.45(b)(6)(i) (allowing, but not requiring, live hearings to be held virtually through use of technology); § 106.45(b)(5)(vi) (removing the requirement that evidence in the investigation be provided to the parties using a file-sharing platform); § 106.45(b)(7)(i) (giving recipients a choice between using the preponderance of the evidence standard or the clear and convincing evidence standard).

[939] *See* the ''Dismissal and Consolidation of Formal Complaints'' section of this preamble. We note that one of the bases for discretionary dismissal of a formal complaint (or allegations therein) is where specific circumstances prevent the recipient from gathering evidence sufficient to reach a determination. When a formal complaint contains allegations that are precisely the same as allegations the recipient has already investigated and adjudicated, that circumstance could justify the recipient exercising discretion to dismiss those allegations, under § 106.45(b)(3)(ii).

[940] For further discussion, see the ''Formal Complaint'' subsection of the ''Section 106.30 Definitions'' section of this preamble.

Department's contradictory statements regarding the importance of survivor autonomy were arbitrary and capricious. Commenters argued that requiring schools to trigger formal grievance procedures when the school has received multiple reports of harassment by the same perpetrator would violate survivor autonomy and discourage reporting. One commenter asserted that the proposed provision would retraumatize victims by forcing an investigation when no victim wants to testify against the perpetrator. One commenter asserted that this provision would exacerbate survivors' feelings of powerlessness. Commenters asserted that students should be able to discuss a situation without the Title IX office initiating a formal process without the complainant's permission. Commenters stated that sometimes a student may want advice, or want supportive measures, without desiring a formal process.

A number of commenters expressed concern that requiring Title IX Coordinators to file formal complaints against the wishes of complainants will lead to violations of confidentiality of survivors who already do not want to come forward, and may not come forward at all if there is a risk that the school will violate their wishes by investigating. Commenters argued that victims who report but do not wish to pursue a formal complaint would be forced into potentially dangerous situations unknowingly, since nothing in the proposed rules imposed a duty on the institution to offer safety measures or accommodations. Other commenters asserted that litigation arising out of Title IX proceedings is common, and that requiring a recipient to pursue a grievance proceeding against a respondent invites the respondent to then name the complainant as a party to subsequent litigation even when the complainant did not want to initiate an investigation in the first place.

A number of commenters expressed concern that deeming the Title IX Coordinator as a complainant (by requiring them to file a formal complaint) creates a significant conflict of interest by placing the Title IX Coordinator in an adversarial position against the respondent. Other commenters argued that asking the Title IX Coordinator to sign and file a formal complaint in cases where complainants are unwilling to participate would make it impossible for the Title IX Coordinator to maintain the appearance of neutrality, even if they are in fact unbiased in all other ways. Other commenters expressed concern that if the person who reported the incident is reluctant to come forward, it would place the Title IX Coordinator, who should be an impartial resource, into a role of advocating for a specific person's report.

A number of commenters argued that the proposed provision would chill reporting of sexual harassment because victims would fear being drawn involuntarily into a formal process. Commenters suggested that, if institutions file formal complaints without the willing, informed participation of the victim, some requirements, including the cross-examination requirement, should be adjusted, to protect victims who did not consent to participate in a grievance process from negative consequences that commenters argued may possibly result from participating in a grievance process, especially a live hearing. Commenters argued that these consequences might include fear of re-traumatization from being cross-examined, questions perceived as invasions of privacy, and lawsuits filed by respondents based on testimony given during a Title IX hearing.

Commenters argued that this provision would depart from best practices for helping victims. Commenters asserted that in order to effectively address sex discrimination, educational institutions must be able to cultivate relationships of trust with community members with regard to reporting systems, and that this proposed provision would mean that recipients would violate the wishes of reporting parties, thereby betraying and violating their trust. Commenters asserted that the ability of a complainant to seek supportive measures without risking public exposure is foundational to creating conditions under which community members are more willing to avail themselves of institutional support, including formal grievance proceedings. Commenters expressed concern that, in the absence of supportive measures, many survivors cannot keep up with the demands of rigorous schoolwork while dealing with the impacts of trauma, and this proposed provision would leave complainants in a position of never knowing whether the complainant's report of sexual harassment would result in a formal process, because the complainant would have no way of knowing whether another complainant's report would trigger proposed § 106.44(b)(2).

Commenters expressed concern that proposed § 106.44(b)(2) would conflict with or be in tension with the requirement in § 106.45(b)(6)(i) that schools disregard statements provided by witnesses or parties who do not submit to cross-examination at a hearing, because if alleged victims are unwilling to participate in the process and be subject to cross-examination, then the adjudicator is not permitted to consider the complainant's statements, rendering the filing of a formal complaint by a Title IX Coordinator potentially futile. Commenters argued that there was a conflict between proposed § 106.44(b)(2) and the proposed requirement in § 106.45(b)(3) that a recipient must dismiss a complaint if the alleged harassment did not occur within the recipient's education program or activity; commenters questioned how the recipient should respond when multiple reports are made against the same respondent, but one or more of the reported incidents did not take place within the education program or activity of the school and suggested that to solve this conflict, recipients should make a good faith investigation into all reports of sexual harassment, regardless of the location of the incident, when one or more parties involved in the report are under the ''purview'' of the recipient.

A number of commenters argued that proposed § 106.44(b)(2) would not meet its stated goal of protecting students because the provision would not be limited only to stopping serial predators. Commenters argued that the proposed provision would incentivize schools to bring weak cases against serial perpetrators that may allow the predators to escape responsibility. Commenters expressed concern if schools are forced to move forward without the participation of complainants in every case where there are multiple reports of sexual harassment against the same respondent, then this may lead to dismissals or inaccurate findings of non-responsibility. Other commenters expressed concern that this proposed provision was designed to help recipients, not protect victims. Commenters argued the proposed provision was a designed-to-fail framework that would protect a recipient from a claim by another victim who is attacked by the same perpetrator, since all the recipient would be required to do is show that it made a *pro forma* attempt to comply with its obligations, to qualify for the safe harbor. Other commenters expressed concern that a recipient impermissibly motivated by sex stereotypes could exploit this proposed provision to engage in discriminatory practices that would otherwise constitute a violation of Title IX.

Commenters argued that this proposed provision could put a recipient in the untenable situation of being required to apply the formal grievance processes to a situation the recipient does not believe it can adequately investigate or that the recipient reasonably believes can be addressed through other appropriate means. A number of commenters expressed concern that this proposed provision would remove the Title IX Coordinator's discretion; commenters asserted that instead, Title IX Coordinators should evaluate what the appropriate response is, whether it be a formal investigation or putting the respondent on notice of the behavior complained about. Commenters argued that, consistent with the 2001 Guidance, recipients should continue to have discretion in determining whether or how to address multiple reports involving a single respondent in cases where complainants wish to remain anonymous or for other reasons are unwilling to participate in formal proceedings.

A number of commenters argued that proposed § 106.44(b)(2) would alter and harm the valuable function of the Title IX Coordinator. Other commenters expressed concern that this proposed provision would complicate the role of the Title IX Coordinator because if the Title IX Coordinator receives a report from a resident advisor or faculty member (rather than from the victim themselves), and then subsequently receives a report from a victim alleging a similar incident involving the same perpetrator, the Title IX Coordinator might be confused about whether or not the proposed provision requires the Title IX Coordinator to file a formal complaint.

One commenter asserted that proposed § 106.44(b)(2) would put schools at risk for liability for monetary damages in private Title IX lawsuits, as well as other State tort actions.

Commenters asserted that sometimes a third party reports an alleged sexual harassment situation, but the alleged victim insists that there was no violation and in cases like that, the recipient should be required to make a report that is not attached to either party's transcript, but that can be referenced if the alleged victim later wishes to file a formal complaint.

Discussion: Despite the intended benefits of proposed § 106.44(b)(2) described in the NPRM, the Department is persuaded by the many commenters who expressed a variety of concerns about requiring the Title IX Coordinator to file a formal complaint after receiving multiple reports about the same respondent. In addition to raising serious concerns about the potential effects on complainants, commenters also described practical problems with proposed § 106.44(b)(2) in relation to the rest of the final regulations. As a result, the Department is removing proposed § 106.44(b)(2) entirely.[941]

The Department is persuaded by commenters who argued that this proposed provision would have removed the Title IX Coordinator's discretion without necessary or sufficient reason to do so. The Department agrees that the Title IX Coordinator should have the flexibility to evaluate and determine an appropriate response under pertinent facts and circumstances. The Department agrees with commenters who argued that institutions should continue to have discretion in determining whether or how to address multiple reports involving a single respondent in cases where complainants wish to remain anonymous or otherwise are unwilling to participate in a formal process. Removing this proposed provision means that Title IX Coordinators retain discretion, but are not required, to sign formal complaints after receiving multiple reports of potential sexual harassment against the same respondent. We believe that this approach properly balances complainant autonomy, campus safety, and recipients' use of resources that would otherwise be required to be used to institute a potentially futile grievance process. The Department was persuaded by commenters' concerns that under the proposed rules, filing a formal complaint might have resulted in a Title IX Coordinator becoming a ''complainant'' during the grievance process, or creating a conflict of interest or lack of neutrality. We have revised the definitions of ''complainant'' and ''formal complaint'' in § 106.30 to clarify that when a Title IX Coordinator chooses to sign a formal complaint, that action is not taken ''on behalf of'' the complainant; the ''complainant'' is the person who is alleged to be the victim of conduct that could constitute sexual harassment. Those revisions further clarify that when a Title IX Coordinator signs a formal complaint, the Title IX Coordinator does not become a complainant or otherwise a party to the grievance process, and must abide by § 106.45(b)(1)(iii), which requires Title IX personnel to be free from conflicts of interest and bias, and serve impartially. We do not believe that signing a formal complaint that initiates a grievance process inherently creates a conflict of interest between the Title IX Coordinator and the respondent; in such a situation, the Title IX Coordinator is not advocating for or against the complainant or respondent, and is not subscribing to the truth of the allegations, but is rather instituting a grievance process (on behalf of the recipient, not on behalf of the complainant) based on reported sexual harassment so that the recipient may factually determine, through a fair and impartial grievance process, whether or not sexual harassment occurred in the recipient's education program or activity.

The Department is persuaded by commenters' concerns that the proposed provision would have created tension with § 106.45(b)(6)(i), which mandates that if a party or witness does not submit to cross-examination at the hearing, the decision-maker must not rely on any statement of that party or witness in reaching a determination regarding responsibility. The Department is persuaded by commenters' arguments that the proposed provision would have incentivized or forced recipients to file futile complaints against respondents with no complaining witness willing to testify at a live hearing. Whether or not proposed § 106.44(b)(2) would have conflicted with § 106.45(b)(3), the proposed provision § 106.44(b)(2) has been removed from the final regulations, and we have revised § 106.45(b)(3) to clarify that a recipient may choose to address allegations of sexual harassment that occurred outside the recipient's education program or activity, through non-Title IX codes of conduct. Where a complainant does not wish to participate in a grievance process, including being cross-examined at a live hearing, the recipient is not permitted to threaten, coerce, intimidate, or discriminate against the complainant in an attempt to secure the complainant's participation.[942] Thus, even if a Title IX Coordinator has signed a formal complaint, the complainant is not obligated to participate in the ensuing grievance process and need not appear at a live hearing or be cross-examined. We have added § 106.71 prohibiting retaliation and expressly protecting any person's right *not* to participate in a Title IX proceeding.

The Department is also persuaded that a chilling effect on victim reporting

[941] The section number, 106.44(b)(2), now refers to the provision discussed in the ''Section 106.44(b)(2) OCR Will Not Re-weigh the Evidence'' subsection of the ''Recipient's Response in Specific Circumstances'' subsection of the ''Section 106.44 Recipient's Response to Sexual Harassment, Generally'' section of this preamble.

[942] Section 106.71(a).

can be avoided by eliminating this proposed provision. The Department is persuaded by commenters' concerns that complainants who are unwilling to file a formal complaint should be able to confidentially seek supportive measures without fear of being drawn into a formal complaint process whenever the Title IX Coordinator receives a second report from another complainant about the same respondent. The Department is persuaded by commenters' arguments that students should be able to discuss a situation with a Title IX Coordinator without the Title IX Coordinator being required to initiate a grievance process against the complainant's wishes, and by commenters' assertions that it is not uncommon for respondents filing private lawsuits against the recipient to include the complainant as a party to such lawsuits, so dragging a complainant into a grievance process against the complainant's wishes exposes the complainant to potential involvement in private litigation as well.

The Department appreciates commenters' suggestions for specific changes and clarifications to proposed § 106.44(b)(2); however, there is no need to consider such changes or clarifications because we are removing this proposed provision from the final regulations.

Changes: The Department has not included proposed § 106.44(b)(2) in the final regulations.

Comments: Some commenters expressed support for proposed § 106.44(b)(2), asserting that it would be valuable for the protection of sexual assault victims on university campuses. Other commenters argued that it is common sense for the Title IX Coordinator to be able to file complaints against bad actors. Some commenters argued that the provision would improve the responsiveness of university Title IX Coordinators to sexual assault or harassment allegations at institutions around the country. Other commenters supported this proposed provision so that Title IX Coordinators would file a complaint against repeat sexual offenders even when no victim was willing to file a formal complaint because this would protect a complainant's confidentiality.

Discussion: For the reasons discussed above, the Department is persuaded that eliminating proposed § 106.44(b)(2) better serves the Department's goals of ensuring that recipients respond adequately to reports of sexual harassment without infringing on complainant autonomy. Elimination of this proposed provision leaves Title IX Coordinators discretion to sign a formal complaint initiating a grievance process, when doing so is not clearly unreasonable in light of the known circumstances, without mandating such a response every time multiple reports against a respondent are received. We note that contrary to some commenters' belief, the proposed provision would not have protected complainants' confidentiality by requiring Title IX Coordinators to file formal complaints, because the recipient would still have been required under § 106.45(b)(2) to send written notice of the allegations to both parties, and the written notice must include the complainant's identity, if known.

Changes: The Department has not included proposed § 106.44(b)(2) in the final regulations.

Comments: Some commenters suggested expanding or modifying proposed § 106.44(b)(2), for example by specifying factors to consider as to whether a pattern of behavior might present a potential threat to the recipient's community. Some commenters suggested specifying that a formal complaint must be filed where threats, serial predation, violence, or weapons were allegedly involved.

Commenters recommended adding a credibility threshold to proposed § 106.44(b)(2) specifying that a Title IX Coordinator would only be required to file a formal complaint upon receiving multiple *credible* reports against the same respondent, so that the Title IX Coordinator would not need to file a formal complaint where reports appeared frivolous or unfounded.

Commenters suggested that the Department adopt the model used by Harvard Law School for its Title IX compliance, which as described by commenters provides that (1) that there be a complainant willing to participate before the recipient will initiate a formal investigation and (2) the only time an action should be pursued without a willing complainant is if there is a serious risk to campus-wide safety and security. Several commenters suggested that, in instances where there are reports by multiple complainants but none are willing to participate in the proceedings, the Department could ensure accountability by requiring the recipient to document its reason for not initiating a formal complaint rather than requiring the recipient to file a formal complaint in every such situation.

Discussion: The Department appreciates commenters' suggestions for specific changes to proposed § 106.44(b)(2); however, we decline to make such changes because we are removing this proposed provision from the final regulations for the reasons described above. The Department declines to adopt in these final regulations the suggestion that patterns of behavior be considered as a factor to determine whether possible future threats to the community warrant filing a formal complaint even where a complainant does not wish to file; however, as discussed above, elimination of proposed § 106.44(b)(2) leaves the Title IX Coordinator discretion to sign a formal complaint where doing so is not clearly unreasonable in light of the known circumstances. The Title IX Coordinator may consider a variety of factors, including a pattern of alleged misconduct by a particular respondent, in deciding whether to sign a formal complaint. By giving the recipient's Title IX Coordinator the discretion to sign a formal complaint in light of the specific facts and circumstances, the Department believes it has reached the appropriate balance between campus safety, survivor autonomy, and respect for the most efficient use of recipients' resources. We also note that under the final regulations, including revised § 106.44(a), a Title IX Coordinator's decision to sign a formal complaint may occur only after the Title IX Coordinator has promptly contacted the complainant (*i.e.,* the person alleged to have been victimized by sexual harassment) to discuss availability of supportive measures, consider the complainant's wishes with respect to supportive measures, and explain to the complainant the process for filing a formal complaint. Thus, the Title IX Coordinator's decision to sign a formal complaint includes taking into account the complainant's wishes regarding how the recipient should respond to the complainant's allegations.

The Department disagrees with the suggestion to expand the proposed provision to cover other circumstances such as alleged use of threats, violence, or weapons, because we are persuaded by commenters that leaving the Title IX Coordinator discretion to sign a formal complaint is preferable to mandating circumstances under which a Title IX Coordinator must sign a formal complaint. The final regulations give the Title IX Coordinator discretion to sign a formal complaint, and the Title IX Coordinator may take circumstances into account such as whether a complainant's allegations involved violence, use of weapons, or similar factors. The Department eliminated proposed § 106.44(b)(2) in part due to concerns expressed by commenters about survivor autonomy and safety; in

some situations, the Title IX Coordinator may believe that signing a formal complaint is not in the best interest of the complainant and is not otherwise necessary for the recipient to respond in a non-deliberately indifferent manner. With the elimination of this provision, however, the Title IX Coordinator still possesses the discretion to sign formal complaints in situations involving threats, serial predation, violence, or weapons. Even in the absence of a formal complaint being filed, a recipient has authority under § 106.44(c) to order emergency removal of a respondent where the situation arising from sexual harassment allegations presents a risk to the physical health or safety of any person. Nothing in the final regulations prevents recipients, Title IX Coordinators, or complainants from contacting law enforcement to address imminent safety concerns.

Because the final regulations do not include this proposed provision, the Department does not further consider the commenter's suggestion to revise the eliminated provision by adding the word ''credible'' before ''reports.'' As discussed previously, the Department has removed this provision to respect complainant autonomy and avoid chilling reporting by mandating that a Title IX Coordinator sign a formal complaint over a complainant's wishes; the commenter's suggestion for modifying this proposed § 106.44(b)(2) would not change the Department's belief that the proposed provision should be removed in its entirety, because narrowing the circumstances under which the Title IX Coordinator would be required to sign a formal complaint over the complainant's wishes would not address the concerns raised by many commenters that persuaded the Department of the need to respect survivor autonomy by giving a Title IX Coordinator discretion (without making it mandatory) to sign a formal complaint. The Department further notes that one of the purposes of the § 106.45 grievance process is to ensure that determinations are reached only after objective evaluation of relevant evidence by impartial decision-makers, and therefore permitting or requiring a Title IX Coordinator to only respond to reports or formal complaints that the Title IX Coordinator deems ''credible'' would defeat the goal of following a grievance process to reach reliable outcomes. Similarly, the commenter's suggestion to require the recipient to document its reason for not initiating a formal complaint following reports by multiple complainants does not alter the Department's conclusion that the better way to respect survivor autonomy and the discretion of a Title IX Coordinator is to remove proposed § 106.44(b)(2) from the final regulations, so that a Title IX Coordinator retains the discretion to sign a formal complaint, but is not mandated to do so. We note that § 106.45(b)(10) does require a recipient to document the reasons for its conclusion that its response to any reported sexual harassment was not deliberately indifferent.

The Department declines to adopt the Harvard Law School model because we believe the final regulations provide the same or similar benefits with respect to requiring a grievance process only where a formal complaint has been filed by a complainant or signed by a Title IX Coordinator. For reasons discussed in the ''Formal Complaint'' subsection of the ''Section 106.30 Definitions'' section of this preamble, third parties are not allowed to file formal complaints.

Changes: None.

Proposed § 106.44(b)(3) Supportive Measures Safe Harbor in Absence of a Formal Complaint [Removed in Final Regulations]

Comments: Many commenters appreciated that the proposed safe harbor regarding supportive measures would provide an incentive for institutions to offer supportive measures for both parties. Several commenters recounted personal stories of accused individuals being removed from classes and dorms before a determination had been made about pending allegations. Many commenters supported § 106.44(b)(2) for not requiring an individual to file a formal complaint in order to obtain supportive measures and for expressly including the requirement that, when offering supportive measures, recipients must notify a complainant of the right to file a formal complaint at a later date if they wish. Many commenters asserted that often, supportive measures are sufficient for both parties to deal with a situation without causing additional trauma to either party.

Some commenters expressed concern that the proposed safe harbor regarding supportive measures would effectively relieve institutions of the responsibility to hold respondents accountable and address sexual harassment on campuses. Many commenters argued that offering ''meager'' supportive measures to a student in lieu of investigating allegations would not satisfy a recipient's obligations under Title IX and asked the Department to clarify that the provision of supportive measures is not always adequate to satisfy the deliberate indifference standard.

Many commenters argued that the proposed safe harbor regarding supportive measures actually created a barrier to providing supportive measures for elementary and secondary school victims because the provision applied only to institutions of higher education, and asked the Department to modify the proposed rules to extend this supportive measures safe harbor to the elementary and secondary school context either by creating a separate safe harbor with nearly identical language or by deleting the phrase ''for institutions of higher education'' in the proposed regulatory text. One commenter asserted that § 106.44(b)(3) is redundant because it merely repeats the standard of § 106.44(a). One commenter argued that, when combined with the Department's proposed definition of sexual harassment, this proposed provision would create a safe harbor for educational institutions to avoid liability.

Other commenters suggested that the Department modify the proposed safe harbor regarding supportive measures to expressly prohibit institutions from coercing a complainant into accepting supportive measures in lieu of filing a formal complaint. At least one commenter suggested adding an outer time limit to a party's right to file a formal complaint ''at a later time,'' asserting that this proposed provision was inconsistent with the recordkeeping requirement in the proposed regulations, which would have allowed a record to be destroyed in three years (this retention period has been revised to seven years in § 106.45(b)(10) of the final regulations).

Discussion: As explained in the ''Section 106.44(b) Proposed 'Safe harbors,' generally,'' subsection of the ''Recipient's Response in Specific Circumstances'' section of this preamble, these final regulations do not include the safe harbor provision that a recipient is not deliberately indifferent when in the absence of a formal complaint the recipient offers and implements supportive measures designed to effectively restore or preserve the complainant's access to the recipient's education program or activity, and the recipient also informs the complainant in writing of the right to file a formal complaint. This safe harbor is now unworkable and unnecessary in light of other revisions made to the proposed regulations, specifically a recipient's obligations in § 106.44(a) and § 106.45(b)(10)(ii). Under § 106.44(a), a recipient's response must treat complainants and

respondents equitably by offering supportive measures as defined in § 106.30, and a Title IX Coordinator must promptly contact the complainant to discuss the availability of supportive measures as defined in § 106.30, consider the complainant's wishes with respect to supportive measures, inform the complainant of the availability of supportive measures with or without the filing of a formal complaint, and explain to the complainant the process for filing a formal complaint. As previously explained, § 106.45(b)(1) now contains an additional mandate that with or without a formal complaint, a recipient must comply with § 106.44(a), which places recipients on notice that it must offer supportive measures to a complainant. Additionally, under § 106.45(b)(10)(ii), if a recipient does not provide a complainant with supportive measures, then the recipient must document why such a response was not clearly unreasonable in light of the known circumstances. As recipients are now required to offer supportive measures to a complainant and to document why not providing a complainant with supportive measures was not clearly unreasonable in light of the known circumstances, the final regulations no longer provides a safe harbor. Recipients cannot receive a safe harbor for offering supportive measures because recipients are now required to offer supportive measures under these final regulations. Accordingly, the Department does not include the proposed safe harbor regarding supportive measures in these final regulations.

With respect to concerns that respondents may suffer disciplinary sanctions or punitive action stemming from pending allegations, the Department notes that § 106.44(a) expressly provides that a recipient's response must treat complainants and respondents equitably by offering supportive measures as defined in § 106.30 to a complainant, and by following a grievance process that complies with § 106.45 before the imposition of any disciplinary sanctions or other actions that are not supportive measures as defined in § 106.30, against a respondent. Additionally, supportive measures in § 106.30 are expressly defined as non-disciplinary, non-punitive individualized services offered as appropriate, as reasonably available, and without fee or charge to the complainant or the respondent. Supportive measures must not have a punitive or disciplinary consequence for either complainants or respondents.

Even without the proposed safe harbor provision regarding supportive measures, the Department believes that these final regulations appropriately draw recipients' attention to the importance of offering supportive measures to all students, including students who do not wish to initiate a recipient's formal grievance process, and thus give complainants greater autonomy to decide if supportive measures, alone, represent the kind of school-level response that will best help the complainant heal after any trauma. The Department in part requires a recipient to offer supportive measures to all complainants under § 106.44(a) because the Department recognizes that, in many cases, a complainant's equal access to education can be effectively restored or preserved through the school's provision of supportive measures. Accordingly, the Department provides an additional mandate in § 106.44(b)(1), that with or without a formal complaint, a recipient must comply with § 106.44(a) (*e.g.,* by offering the complainant supportive measures).

We are persuaded by commenters' assertions that providing supportive measures to a complainant does not always satisfy a recipient's obligation to respond in a non-deliberately indifferent manner to known sexual harassment. In some circumstances and depending on the unique facts, a non-deliberately indifferent response may require the recipient's Title IX Coordinator to sign a formal complaint as defined in § 106.30 so that the recipient initiates the grievance process in § 106.45. The Department acknowledges that a recipient should respect the complainant's autonomy and wishes with respect to a formal complaint and grievance process to the extent possible.

As the proposed safe harbor regarding supportive measures is no longer included in these final regulations, we do not revisit whether excluding elementary and secondary school recipients from this safe harbor was preferable to modifying the proposed safe harbor to also apply to elementary and secondary schools. Revised § 106.44(a) requires every recipient (including elementary and secondary schools) to offer supportive measures to complainants.

The Department understands the concern that a recipient may coerce potential complainants into accepting supportive measures in lieu of a formal grievance process. Partly in response to these concerns, the Department revised § 106.44(a) to require that a Title IX Coordinator promptly contact a complainant not only to discuss supportive measures but also to explain to the complainant the process for filing a formal complaint. Accordingly, a complainant will know how to file a formal complaint, if the complainant wishes to do so. We have also added § 106.71 to expressly forbid a recipient from threatening, intimidating, coercing, or discriminating against any complainant for the purpose of chilling the complainant's exercise of any rights under Title IX, which includes the right to file a formal complaint, and to receive supportive measures even if the complainant chooses not to file a formal complaint.

The Department agrees that the safe harbor, as proposed, is redundant, especially in light of the revisions to § 106.44(a), requiring a recipient to offer supportive measures to a complainant. As this safe harbor is not included in these final regulations, this safe harbor does not provide a way for a recipient to avoid responsibility.

For reasons discussed above, the Department declines to revise the final regulations to include a statute of limitations or similar time limit on filing a formal complaint but as discussed in the ''Formal Complaint'' subsection of the ''Section 106.30 Definitions'' section of this preamble, the Department has revised the final regulations to provide that at the time of filing a formal complaint, the complainant must be participating in or attempting to participate in the recipient's education program or activity. This provides a reasonable condition on a complainant's ability to require a recipient to investigate, based on the complainant's connection to the recipient's education program or activity rather than by imposing a statute of limitations or similar time-based deadline. A complainant may be ''attempting to participate'' in the recipient's education program or activity in a broad variety of circumstances that do not depend on a complainant being, for instance, enrolled as a student or employed as an employee. A complainant may be ''attempting to participate,'' for example, where the complainant has withdrawn from the school due to alleged sexual harassment and expresses a desire to re-enroll if the recipient responds appropriately to the sexual harassment allegations, or if the complainant has graduated but would like to participate in alumni events at the school, or if the complainant is on a leave of absence to seek counseling to recover from trauma. In addition, the Department has also revised the final regulations to provide in § 106.45(b)(3)(ii) that a recipient has the discretion to dismiss a formal complaint

against a respondent who is no longer enrolled or employed by the recipient. While these provisions are not an express limit on the amount of time a complainant has to file a formal complaint, the Department believes these provisions help address commenters' concerns about being forced to expend resources investigating situations where one or both parties have no affiliation with the recipient, without arbitrarily or unreasonably imposing a deadline on complainants, in recognition that complainants sometimes do not report or desire to pursue a formal process in the immediate aftermath of a sexual harassment incident.

Changes: The Department does not include the safe harbor provision proposed in the NPRM as § 106.44(b)(3). The Department adds a mandate to § 106.44(b)(1) that the recipient must comply with § 106.44(a), with or without a formal complaint.

Section 106.44(b)(2) OCR Will Not Re-Weigh the Evidence

Comments: Some commenters appreciated that the proposed rules contained an express guarantee that an institution will not be deemed deliberately indifferent solely because the Assistant Secretary would have reached a different determination regarding responsibility based on an independent weighing of the evidence. Some commenters expressed concerns that § 106.44(b)(2) would result in a lack of accountability or oversight for how schools or colleges handle sexual harassment complaints. Other commenters contended that this provision would unjustifiably reduce the Department's oversight unless a school's actions are clearly unreasonable. Some commenters asserted that the provision would improperly defer to a school district's determination, which commenters argued is not always the appropriate way to ensure Title IX accountability. A number of commenters felt that § 106.44(b)(2) would spur more civil lawsuits to hold schools accountable, because the Department would no longer be holding schools accountable.

Several commenters argued that the proposed provision would negatively impact OCR's ability to investigate non-compliance under Title IX, which would dangerously lower the bar of compliance and signal that a bare, minimal response to sexual harassment would suffice. Other commenters warned that the provision would limit OCR's ability to evaluate a school's response to sexual harassment, which would effectively narrow over 20 years of Title IX enforcement standards. Several commenters expressed their belief that OCR plays a key role as an independent, impartial investigator. For example, one commenter argued that OCR, as an independent entity, is more qualified than a school to perform an impartial investigation because the school has its own financial interests at stake and is thus less likely to identify inaccuracies in its own procedures. Another commenter asserted that OCR's independent weighing of evidence is a relevant factor because it may allow OCR to identify patterns or practices of shielding respondents or favoring complainants; the commenter argued that OCR should, after a thorough investigation, have discretion to decide if a school's determination regarding responsibility was discriminatory.

Some commenters expressed concern that proposed § 106.44(b)(2) was one-sided in a way that favored only respondents, because the language in the proposed provision would give deference to the school's determinations only where a respondent has been found not responsible. Commenters argued that as proposed, § 106.44(b)(2) would require OCR investigators to close investigations even if OCR found gross or malicious procedural violations affecting the determination reached by the school, as long as the school had determined the respondent to be not responsible. Another commenter expressed concern that a deferential procedural review by OCR may incentivize schools to find in favor of respondents so as to avoid OCR scrutiny; commenters argued that this would be perceived as biased against complainants, may chill reporting of sexual harassment at the school level, and would discourage complainants from filing OCR complaints alleging procedural defects that led to erroneous findings of non-responsibility.

Another commenter asserted that proposed § 106.44(b)(2) was inconsistent with Equal Employment Opportunity Commission (EEOC) practices with respect to employee sexual harassment claims; the commenter stated that the EEOC never defers to an employer's conclusion but conducts its own investigation and makes an independent assessment of the facts so that employers do not avoid liability merely by conducting exculpatory internal investigations. The commenter also asserted that applying § 106.44(b)(2) to employee sexual harassment claims would conflict with U.S. Department of Justice equal employment opportunity coordination regulations' requirement that a referring agency must give due weight to an EEOC determination of reasonable cause to believe that Title VII has been violated,[943] which OCR could not give if it instead gave conclusive weight to a recipient's contrary factual determination.

Conversely, some commenters expressed support for § 106.44(b)(2). Commenters asserted that this provision, combined with other provisions in the proposed rules, would assist colleges and universities in ensuring an impartial, transparent, and fair process for both complainants and respondents, while also providing institutions flexibility reflecting their unique attributes (*e.g.,* size, student population, location, mission). Several commenters expressed support for OCR not ''second guessing'' a school's response to incidents of sexual harassment. One commenter asserted that the provision was reasonable because OCR should not intrude into a school's decision making based on OCR's own weighing of the evidence.

One commenter expressed confusion as to whether OCR would defer to schools' determinations about sex discrimination not involving sexual harassment, or in instances when a person who filed a complaint with a recipient could have filed directly with OCR. Another commenter suggested clarifying that further scrutiny by OCR is not barred by this provision and may be called for if a responsibility determination seems to hold little basis.

Discussion: We appreciate commenters' concerns about, and support of, § 106.44(b)(2). The intent of this provision is to convey that the Department will not overturn the outcome of a Title IX grievance process solely based on whether the Department might have weighed the evidence in the case differently from how the recipient's decision-maker weighed the evidence.

This provision does not limit OCR's ability to evaluate a school's response to sexual harassment, and it does not narrow Title IX enforcement standards; OCR retains its full ability, and responsibility, to oversee recipients' adherence to the requirements of Title IX, including requirements imposed under these final regulations. The Department agrees with commenters who stated that OCR has special qualifications that enable OCR to perform independent, impartial investigations into whether recipients have violated Title IX and Title IX regulations. The Department will continue to vigorously enforce

[943] 28 CFR 42.610(a).

recipients' Title IX obligations.[944] The Department believes that the § 106.45 grievance process prescribes fair procedures likely to result in reliable outcomes; however, when a recipient does not comply with the requirements of § 106.45, nothing in § 106.44(b)(2) precludes the Department from holding the recipient accountable for violating these final regulations. Refraining from second guessing the determination reached by a recipient's decision-maker solely because the evidence could have been weighed differently does not prevent OCR from identifying and correcting any violations the recipient may have committed during the Title IX grievance process. The deference given to the recipient's determination regarding responsibility in § 106.44(b)(2) does not preclude OCR from overturning a determination regarding responsibility where setting aside the recipient's determination is necessary to remedy a recipient's violations of these final regulations. Rather, § 106.44(b)(2) promotes finality for parties and recipients by stating that OCR will not overturn determinations just because OCR would have weighed the evidence in the case differently. To clarify this point, we have revised § 106.44(b)(2) to use the phrase ''solely because'' instead of ''merely because.'' Nothing about § 106.44(b)(2) prevents OCR from taking into account the determination regarding responsibility as *one of* the factors OCR considers in deciding whether a recipient has complied with these final regulations, and whether any violations of these final regulations may require setting aside the determination regarding responsibility in order to remediate a recipient's violations.

If a recipient has not complied with any provision of the final regulations, nothing in § 106.44(b)(2) prevents OCR from holding the recipient accountable for non-compliance. The intent of the provision is to assure recipients that because the § 106.45 grievance process contains robust procedural and substantive requirements designed to produce reliable outcomes, OCR will not substitute its judgment for that of the recipient's decision-maker with respect to weighing the relevant evidence at issue in a particular case.

We believe that this limited deference also serves the interests of complainants and respondents in resolving sexual harassment allegations, by limiting the circumstances under which a ''final'' determination reached by the recipient may be subject to being setting aside and requiring the parties to go through a grievance process for a second time. As an example, if a decision-maker evaluates the relevant evidence in a case and judges one witness to be more credible than another witness, or finds one item of relevant evidence to be more persuasive than another item of relevant evidence, § 106.44(b)(2) provides that OCR will not set aside the determination regarding responsibility solely because OCR would have found the other witness more credible or the other item of evidence more persuasive. It does not mean that OCR would refrain from holding the recipient accountable for violations of the decision-maker's obligations, for instance to avoid basing credibility determinations on a party's status as a complainant, respondent, or witness.[945] This provision does not meant that OCR would refrain from, for instance, independently determining that evidence deemed relevant by the decision-maker was in fact irrelevant and should not have been relied upon.[946] Violations of these final regulations may indeed result in a recipient's determination regarding responsibility being set aside by OCR, but determinations will not be overturned ''solely'' because OCR would have weighed the evidence differently.

Some commenters understood this provision to work in a one-sided way, giving recipients' determinations regarding responsibility deference only where a respondent has been found not responsible; one commenter reached this conclusion based on the provision's reference to ''deliberate indifference'' which is a theory usually only raised by complainants challenging the sufficiency of a recipient's response to sexual harassment. The Department appreciates these commenters' concerns; we intend this provision to apply equally to all outcomes, regardless of whether the determination found a respondent responsible or not responsible. For this reason, the provision uses the phrase ''determination *regarding* responsibility'' (emphasis added) and not determination *of* responsibility.[947] However, to clarify that this provision applies to all determinations of the outcome of a Title IX grievance process regardless of whether the respondent was found responsible or not responsible, we have revised § 106.44(b)(2) by adding ''or otherwise evidence of discrimination under title IX by the recipient'' so that the reference in this provision to ''deliberate indifference'' is not misunderstood to exclude theories of sex discrimination commonly raised by respondents after being found responsible. This additional phrase in § 106.44(b)(2) clarifies that this provision operates neutrally to all determinations regarding responsibility. The Department will not overturn the recipient's finding solely because the Department would have reached a different determination based on an independent weighing of the evidence, irrespective of whether the recipient found in favor of the complainant or the respondent. Whether the recipient found the respondent not responsible (and thus a complainant might allege deliberate indifference) or the recipient found the respondent responsible (and thus a respondent might allege sex discrimination under Title IX on a theory such as selective enforcement or erroneous outcome), this provision would equally apply to give deference to the recipient's determination where the challenge to the determination is solely based on whether the Department might have weighed the evidence differently.

In no manner does this limited deference by the Department restrict the Department's ability to identify patterns or practices of sex discrimination, or to investigate allegations of a recipient committing gross or malicious violations of Title IX or these final regulations. This provision gives a recipient deference *only* as to the decision-maker's weighing of evidence with respect to a determination regarding responsibility. Section 106.44(b)(2) simply clarifies OCR's role and standard of review under these final regulations, by providing that OCR will not conduct *de novo* reviews of determinations absent allegations that the recipient failed in some way to comply with Title IX or these final regulations. The provision is intended to alleviate potential confusion recipients may feel about needing to successfully predict how the Department would make factual

[944] *See* further discussion in the ''Section 106.3(a) Remedial Action'' subsection of the ''Clarifying Amendments to Existing Regulations'' section of this preamble, regarding remedies the Department may pursue in administrative enforcement actions against recipients.

[945] Section 106.45(b)(1)(ii).

[946] *E.g.,* § 106.45(b)(6) (deeming questions and evidence about a complainant's prior sexual history to be irrelevant, with limited exceptions); § 106.45(b)(1)(x) (barring use of privileged information in the grievance process).

[947] We use the phrase ''determination *of* responsibility'' (emphasis added) to describe a finding that the respondent is responsible for perpetrating sexual harassment, and ''determination *regarding* responsibility'' to describe a determination irrespective of whether that determination has found the respondent responsible, or not responsible. *E.g., compare* §§ 106.45(b)(1)(i) and 106.45(b)(1)(vi) *with* §§ 106.45(b)(1)(iv), 106.45(b)(2), 106.45(b)(5)(i), 106.45(b)(5)(vi)–(vii), 106.45(b)(6) through 106.45(b)(10).

determinations ''in the shoes'' of the recipient's decision-maker.

Indeed, it would be impractical and unhelpful, for all parties, if the Department conducted *de novo* reviews of all recipient determinations. Doing so would contravene the Department's goal of providing consistency, predictability, transparency, and reasonably prompt resolution, in Title IX grievance processes. The Department disagrees that § 106.44(b)(2) ''dangerously'' lowers the bar of compliance by signaling that recipients need only provide a ''bare minimum response'' to sexual harassment. The requirements of the final regulations do not constitute a low bar; rather, these final regulations expect—and the Department will hold recipients accountable for—responses to sexual harassment allegations that support complainants and treat both parties fairly by complying with specific, mandatory obligations. For instance, under the final regulations recipients are required to offer supportive measures to every complainant regardless of whether a grievance process is ever initiated.[948] When a recipient does investigate a complainant's sexual harassment allegations, the final regulations prescribe a grievance process that lays out clear, practical steps for processing a formal complaint of Title IX sexual harassment, including requirements that recipients: Treat complainants and respondents equitably by providing remedies for complainants when a respondent is found responsible, and a grievance process prior to imposing disciplinary sanctions or other actions that are not supportive measures, against a respondent; [949] objectively evaluate all relevant evidence and give both parties equal opportunity to present witnesses and evidence; [950] not harbor a bias or conflict of interest against either party; [951] and resolve the allegations under designated, reasonably prompt time frames.[952] The Department will hold recipients accountable to follow these, and all the other, requirements set forth in § 106.45, whether failure to comply affected the complainant, the respondent, or both parties.

The Department does not agree that § 106.44(b)(2) will lead to increased litigation. The final regulations require recipients to protect complainants' equal educational access, while at the same time providing both parties due process protections throughout any grievance process, and § 106.44(b)(2) does not impair the Department's ability to hold recipients accountable for meeting these obligations. The Department does not believe that courts are inclined through private lawsuits to second guess a recipient's determinations regarding responsibility absent allegations that the recipient arrived at a determination due to discrimination, bias, procedural irregularity, deprivation of constitutionally guaranteed due process protections, or other defect that affected the outcome; in other words, the limited deference in § 106.44(b)(2) is no greater than the deference courts generally also give to recipients' determinations.[953] As discussed in the ''Litigation Risk'' subsection of the ''Miscellaneous'' section of this preamble, the Department believes that these final regulations may have the effect of reducing litigation arising out of recipients' responses to sexual harassment.

These final regulations do not apply to the EEOC and do not dictate how the EEOC will administer Title VII or its implementing regulations. If the Assistant Secretary refers a complaint filed with OCR to the EEOC under Title VII or 28 CFR 42.605, then the EEOC will make a determination under its own regulations and not the Department's regulations. Even if the Department is required to give due weight to the EEOC's determination regarding Title VII under 28 CFR 42.610(a), the Department does not have authority to administer or enforce Title VII. There may be incidents of sexual harassment that implicate both Title VII and Title IX, and this Department will continue to administer Title IX and its implementing regulations and to defer to the EEOC to administer Title VII and its implementing regulations. Nothing in these final regulations precludes the Department from giving due weight to the EEOC's determination regarding Title VII under 28 CFR 42.610(a).[954] The Department recognizes that employers must fulfill their obligations under Title VII and also under Title IX. There is no inherent conflict between Title VII and Title IX, and the Department will construe Title IX and its implementing regulations in a manner to avoid an actual conflict between an employer's obligations under Title VII and Title IX.

The Department wishes to clarify that § 106.44(b)(2) applies only to determinations regarding responsibility reached in a § 106.45 grievance process, which in turn applies only to formal complaints (defined in § 106.30 to mean allegations of sexual harassment); the § 106.45 grievance process does not apply to complaints about other types of sex discrimination. Complaints about sex discrimination that is not sexual harassment may be filed with the recipient for processing under the prompt and equitable grievance procedures that recipients must adopt under § 106.8. We appreciate the opportunity to clarify that no regulation or Department practice precludes a person from filing a complaint with OCR, whether or not the person also could have filed, or did file, a complaint with the school.

Changes: Section 106.44(b)(2) is revised to reference not only deliberate indifference but also other sex discrimination under Title IX, and to replace the word ''merely'' with ''solely'' in the phrase describing situations in which the Assistant Secretary would have reached a different determination based on an independent weighing of the evidence.

[948] Section 106.44(a).

[949] Section 106.45(b)(1)(i).

[950] Section 106.45(b)(1)(ii); § 106.45(b)(5)(ii).

[951] Section 106.45(b)(1)(iii).

[952] Section 106.45(b)(1)(v).

[953] *E.g., Wood* v. *Strickland,* 420 U.S. 308, 326 (1975), *overruled on other grounds by Harlow* v. *Fitzgerald,* 457 U.S. 800 (1982) (absent ''errors in the exercise of school officials' discretion'' that ''rise to the level of violations of specific constitutional guarantees''—as would reaching a determination in the complete ''absence of evidence'' which would be arbitrary and capricious—42 U.S.C. 1983 ''does not extend that right to relitigate in federal court evidentiary questions arising in school disciplinary proceedings''); *Nicholas B.* v. *Sch. Comm. of Worcester,* 412 Mass. 20, 23–24 (1992) (rejecting a student's claim that the student is ''entitled to an independent judicial determination of the facts'' concerning the school's finding that the student committed battery'') (holding that ''In deciding whether the discipline imposed was lawful, no *de novo* judicial fact-finding is required'' and rejecting the contention that the State legislature, in enacting the State Civil Rights Act ''intended a *de novo* review of the factual determinations of a school committee in an action challenging school discipline'') (citing *Wood,* 420 U.S. at 326). The Department's view of restraint from conducting *de novo* review of recipient determinations regarding responsibility is consistent with judicial views recognizing that this type of limited restraint in no way impairs the ability of the courts to effectuate the purposes of Federal and State civil rights statutes. Similarly, § 106.44(b)(2) in no way impairs the Department's ability to effectuate the purposes of Title IX.

[954] 28 CFR 42.610(c) also states: ''If the referring agency determines that the recipient has not violated any applicable civil rights provision(s) which the agency has a responsibility to enforce, the agency shall notify the complainant, the recipient, and the Assistant Attorney General and the Chairman of the EEOC in writing of the basis of that determination.'' Accordingly, these regulations contemplate that each agency enforces the civil rights provisions that the agency has the responsibility to enforce.

Additional Rules Governing Recipients' Responses to Sexual Harassment

Section 106.44(c) Emergency Removal

Overall Support and Opposition to Emergency Removals

Comments: Some commenters believed that § 106.44(c) provides due process protections for respondents while protecting campus safety. Some commenters supported this provision because it allows educational institutions to respond to situations of immediate danger, while protecting respondents from unfair or unnecessary removals. At least one commenter appreciated the latitude granted to educational institutions under § 106.44(c) to determine how to address safety emergencies arising from allegations of sexual harassment. Some commenters asserted that this provision appropriately reflects many schools' existing behavior risk assessment procedures. Several commenters supported § 106.44(c) and recounted personal stories of how a respondent was removed from classes, or from school, and the negative impact the removal had on that student's professional, academic, or extracurricular life because the removal seemed to presume the ''guilt'' of the respondent without allegations ever being proved.

Some commenters wanted to omit the emergency removal provision entirely, arguing that if administrators at the postsecondary level have the power to preemptively suspend or expel a student, on the pretext of an emergency, then every sexual misconduct situation could be deemed an emergency and respondents would never receive the due process protections of the § 106.45 grievance process. One commenter suggested that instead of permitting removals, all allegations of sexual harassment should simply go through a more rapid investigation so that the respondent may remain in school and victims are protected, while any falsely accused respondent is quickly exonerated. Some commenters requested that this removal power be limited because of the negative consequences of involuntary removal; one commenter suggested the provision be modified so that the removal must be ''narrowly tailored'' and ''no more extensive than is strictly necessary'' to mitigate the health or safety risk. One commenter asserted that this provision should also require that interim emergency removals be based on objective evidence and on current medical knowledge where appropriate, made by a licensed, qualified evaluator.

Some commenters asserted that emergency removals should not be used just because sexual harassment or assault has been alleged, and that § 106.44(c) should more clearly define what counts as an emergency. Some commenters argued that emergency removals should be allowed if the sexual harassment allegation involves rape, but no emergency removal should be allowed if the sexual harassment allegation involves offensive speech.

Commenters argued that § 106.44(c) is unclear as to what constitutes an immediate threat to health or safety. Several commenters argued that emergency removals should be restricted to instances where there is ''an immediate threat to safety'' (not health), while other commenters argued this provision must be limited to ''physical'' threats to health or safety. Commenters argued that a ''threat to health or safety'' is too nebulous a concept to justify immediate removal from campus. According to one commenter, even speaking on campus in favor of the NPRM could be construed by schools or student activists as a threat to the emotional or mental ''health or safety'' of survivors, even though discussion of public policy is core political speech protected by the First Amendment.

One commenter stated that the use of the plural ''students and employees'' in § 106.44(c) may preclude an institution from taking emergency action when the immediate threat is to a *single* student or employee. Commenters argued that postsecondary institutions need the flexibility to address immediate threats to the safety of one student or employee in the same manner as threats to multiple students or employees. Some commenters asserted that § 106.44(c) would unreasonably limit a postsecondary institution's ability to protect persons and property, or to protect against potential disruption of the educational environment, and argued that an institution should have the discretion to invoke an emergency removal under circumstances beyond those listed in § 106.44(c). Commenters argued that § 106.44(c) is too limiting because it does not allow recipients to pursue an emergency removal where the respondent poses a threat of illegal conduct that is not about a health or safety emergency; commenters contended this will subject the complainant or others to ongoing illegal conduct just because it does not constitute a threat to health or safety. Commenters argued that in addition to a health or safety threat, this provision should consider the need to restore or preserve equal access to education as justification for emergency removals. One commenter asserted that a legitimate reason to institute an emergency removal of a respondent is a threat that the respondent may obstruct the collection of relevant information regarding the sexual harassment allegations at issue.

One commenter cited New York Education Law Article 129–B as an example of a detailed framework under which campus officials may conduct an individualized threat assessment, order an interim suspension, and provide due process; commenters asserted that courts hold that the due process required for an interim suspension does not need to consist of a full hearing.[955] Another commenter argued that this provision would constitute an unprecedented Federal preemption of Oregon's existing State and local student discipline rules, which establish the due process requirements for emergency removals from school. Commenters argued that § 106.44(c) would create a higher level of due process for emergency removals in situations that involve alleged sexual harassment than for any other behavioral violation, and that the proposed rules are unclear whether this heightened procedural requirement is triggered only when a complainant alleges sexual harassment as defined in § 106.30, or is also triggered in any case where a complainant alleges sexual harassment that meets a State law definition or school code of conduct that may define sexual harassment more broadly than conduct meeting the § 106.30 definition.

Some commenters suggested that § 106.44(c) be modified to require periodic review of any emergency removal decision, to promote transparency and eliminate the possibility of leaving a respondent on interim suspension indefinitely. Commenters argued that immediate removal is very traumatic, and respondents who have been removed have a significant potential to react by harming themselves or others thus recipients should reduce these risks by ensuring a safe exit plan with adequate support for the respondent in place.

Commenters asserted that the goal should be to preserve educational opportunities for all parties involved to the extent possible, so § 106.44(c) should require recipients to provide alternative academic accommodations for respondents who are removed. Some

[955] Commenters cited: *Haidak* v. *Univ. of Mass. at Amherst,* 299 F. Supp. 3d 242, 265–66 (D. Mass. 2018), *aff'd in part, vacated in part, remanded by Haidak* v. *Univ. of Mass.-Amherst,* 933 F.3d 56 (1st Cir. 2019).

commenters suggested that this provision should address a respondent's access to a recipient's program or activity, post-removal. Because emergency removal is not premised on a finding of responsibility and occurs *ex parte,* commenters argued that the recipient should be required to provide a respondent with alternative access to the respondent's academic classes during the period of removal and that failure to do so would be sex discrimination against the respondent. Some commenters argued that as to a respondent who is removed on an emergency basis and later found to be not responsible, the final regulations should require the recipient to mitigate the damage caused by the removal, for example, by allowing the respondent to retake classes or exams missed during the removal. One commenter suggested that a recipient should secure the personal property of the removed person (such as the respondent's vehicle) and be responsible for any loss or damage occurring to personal property during a removal.

Other commenters asserted that an individualized risk assessment should be required after every report of sexual assault. Commenters argued that because insurance statistics show a high degree of recidivism among college rapists, and because Title IX is also supposed to deter discrimination based on sex, schools should be required to consider the safety of other students on their campus if they know there is a possible sexual assailant in their midst.

One commenter suggested that licensing board procedures provide the best model for campus procedures because they offer the closest parallel to the types of behavior evaluated and issues at stake for respondents such as reputation, future livelihood, and future opportunities; the commenter asserted that court precedents hold that both public and private recipients must follow principles of fundamental due process and fundamental fairness in disciplinary processes,[956] and professional licensing board procedures adequately protect due process. One commenter applauded the Department for proposing to provide greater due process protections than what current procedures typically provide; however, this commenter asserted that Native American students attending institutions funded by the Bureau of Indian Affairs receive strong due process protections, including greater due process with respect to emergency removals than what § 106.44(c) provides, and the commenter contended that the stronger due process protections should be extended to non-Native American institutions.[957] According to this commenter, unlike Native American students attending schools funded by the Bureau of Indian Affairs, non-Native American students are at risk for permanent removal from campus with potentially devastating consequences.

One commenter asserted that § 106.44(c) should explicitly require the recipient to comply with the Clery Act, notify appropriate authorities, and provide any necessary safety interventions. Another commenter stated that recipients should be required to publicly report the annual number of emergency removals the recipient conducts under § 106.44(c).

Some commenters asserted that recipients need to do more than simply remove a respondent from its education program or activity. Commenters argued that trauma from sexual assault may cause a complainant to withdraw from an education program or activity, including due to fear of seeing the respondent, suggested that more resources should be made available to complainants, and asserted that the final regulations should specify best practices addressing how a recipient should respond to immediate threats.

Discussion: We appreciate commenters' support for the emergency removal provision in § 106.44(c). Revised in ways explained below, § 106.44(c) provides that in situations where a respondent poses an immediate threat to the physical health and safety of any individual before an investigation into sexual harassment allegations concludes (or where no grievance process is pending), a recipient may remove the respondent from the recipient's education programs or activities. A recipient may need to undertake an emergency removal in order to fulfill its duty not to be deliberately indifferent under § 106.44(a) and protect the safety of the recipient's community, and § 106.44(c) permits recipients to remove respondents in emergency situations that arise out of allegations of conduct that could constitute sexual harassment as defined in § 106.30. Emergency removal may be undertaken in addition to implementing supportive measures designed to restore or preserve a complainant's equal access to education.[958] While we recognize that emergency removal may have serious consequences for a respondent, we decline to remove this provision because where a genuine emergency exists, recipients need the authority to remove a respondent while providing notice and opportunity for the respondent to challenge that decision.

The Department does not believe that rushing all allegations of sexual harassment or sexual assault through expedited grievance procedures adequately promotes a fair grievance process, and forbidding an emergency removal until conclusion of a grievance process (no matter how expedited such a process reasonably could be) might impair a recipient's ability to quickly respond to an emergency situation. The § 106.45 grievance process is designed to provide both parties with a prompt, fair investigation and adjudication likely to reach an accurate determination regarding the responsibility of the respondent for perpetrating sexual harassment. Emergency removal under § 106.44(c) is not a substitute for reaching a determination as to a respondent's responsibility for the sexual harassment allegations; rather, emergency removal is for the purpose of addressing imminent threats posed to any person's physical health or safety, which might arise out of the sexual harassment allegations. Upon reaching a determination that a respondent is responsible for sexual harassment, the final regulations do not restrict a recipient's discretion to impose a disciplinary sanction against the respondent, including suspension, expulsion, or other removal from the recipient's education program or activity. Section 106.44(c) allows recipients to address emergency situations, whether or not a grievance process is underway, provided that the recipient first undertakes an individualized safety and risk analysis and provides the respondent notice and opportunity to challenge the removal decision. We do not believe it is necessary to restrict a recipient's emergency removal authority to removal decisions that are ''narrowly tailored'' to address the risk because § 106.44(c) adequately requires that the threat ''justifies'' the removal. If the high threshold for removal under § 106.44(c) exists (*i.e.,* an individualized safety and risk analysis determines the respondent poses an immediate threat to any person's physical health or safety), then

[957] Commenters cited: 25 CFR 42.1–42.10.

[958] Section 106.44(a) requires a recipient to offer supportive measures to every complainant, including by having the Title IX Coordinator engage with the complainant in an interactive process that takes into account the complainant's wishes regarding available supportive measures.

we believe the recipient should have discretion to determine the appropriate scope and conditions of removal of the respondent from the recipient's education program or activity. Similarly, we decline to require recipients to follow more prescriptive requirements to undertake an emergency removal (such as requiring that the assessment be based on objective evidence, current medical knowledge, or performed by a licensed evaluator). While such detailed requirements might apply to a recipient's risk assessments under other laws, for the purposes of these final regulations under Title IX, the Department desires to leave as much flexibility as possible for recipients to address any immediate threat to the physical health or safety of any student or other individual. Nothing in these final regulations precludes a recipient from adopting a policy or practice of relying on objective evidence, current medical knowledge, or a licensed evaluator when considering emergency removals under § 106.44(c).

We agree that emergency removal is not appropriate in every situation where sexual harassment has been alleged, but only in situations where an individualized safety and risk analysis determines that an immediate threat to the physical health or safety of any student or other individual justifies the removal, where the threat arises out of allegations of sexual harassment as defined in § 106.30. Because all the conduct that could constitute sexual harassment as defined in § 106.30 is serious conduct that jeopardizes a complainant's equal access to education, we decline to limit emergency removals only to instances where a complainant has alleged sexual assault or rape, or to prohibit emergency removals where the sexual harassment allegations involve verbal harassment. A threat posed by a respondent is not necessarily measured solely by the allegations made by the complainant; we have revised § 106.44(c) to add the phrase ''arising from the allegations of sexual harassment'' to clarify that the threat justifying a removal could consist of facts and circumstances ''arising from'' the sexual harassment allegations (and ''sexual harassment'' is a defined term, under § 106.30). For example, if a respondent threatens physical violence against the complainant in response to the complainant's allegations that the respondent verbally sexually harassed the complainant, the immediate threat to the complainant's physical safety posed by the respondent may ''arise from'' the sexual harassment allegations. As a further example, if a respondent reacts to being accused of sexual harassment by threatening physical self-harm, an immediate threat to the respondent's physical safety may ''arise from'' the allegations of sexual harassment and could justify an emergency removal. The ''arising from'' revision also clarifies that recipients do not need to rely on, or meet the requirements of, § 106.44(c) to address emergency situations that do not arise from sexual harassment allegations under Title IX (for example, where a student has brought a weapon to school unrelated to any sexual harassment allegations).

We are persuaded by commenters that § 106.44(c) should be clarified. The final regulations revise this provision to state that the risk posed by the respondent must be to the ''physical'' health or safety, of ''any student or other individual,'' arising from the allegations of sexual harassment. These revisions help ensure that this provision applies to genuine emergencies involving the physical health or safety of one or more individuals (including the respondent, complainant, or any other individual) and not only multiple students or employees. We agree with commenters who asserted that adding the word ''physical'' before ''health or safety'' will help ensure that the emergency removal provision is not used inappropriately to prematurely punish respondents by relying on a person's mental or emotional ''health or safety'' to justify an emergency removal, as the emotional and mental well-being of complainants may be addressed by recipients via supportive measures as defined in § 106.30. The revision to § 106.44(c) adding the word ''physical'' before ''health and safety'' and changing ''students or employees'' to ''any student or other individual'' also addresses commenters' concerns that the proposed rules were not specific enough about what kind of threat justifies an emergency removal; the latter revision clarifies that the threat might be to the physical health or safety of one or more persons, including the complainant, the respondent themselves, or any other individual. We decline to remove ''health'' from the ''physical health or safety'' phrase in this provision because an emergency situation could arise from a threat to the physical health, or the physical safety, of a person, and because ''health or safety'' is a relatively recognized term used to describe emergency circumstances.[959]

We decline to add further bases that could justify an emergency removal under § 106.44(c). We recognize the importance of the need to restore or preserve equal access to education, but disagree that it should be a justification for emergency removal; supportive measures are intended to address restoration and preservation of equal educational access, while § 106.44(c) is intended to apply to genuine emergencies that justify essentially punishing a respondent (by separating the respondent from educational opportunities and benefits) arising out of sexual harassment allegations without having fairly, reliably determined whether the respondent is responsible for the alleged sexual harassment. As explained above, we have revised § 106.44(c) to apply only where the immediate threat to a person's physical health or safety arises from the allegations of sexual harassment; this clarifies that where a respondent poses a threat of illegal conduct (perhaps not constituting a threat to physical health or safety) that does not arise from the sexual harassment allegations, this provision does not apply. Nothing in these final regulations precludes a recipient from addressing a respondent's commission of illegal conduct under the recipient's own code of conduct, or pursuant to other laws, where such illegal conduct does not constitute sexual harassment as defined in § 106.30 or is not ''arising from the sexual harassment allegations.'' We disagree that a recipient's assessment that a respondent poses a threat of obstructing the sexual harassment investigation, or destroying relevant evidence, justifies an emergency removal under this provision, because this provision is intended to ensure that recipients have authority and discretion to address health or safety emergencies arising out of sexual harassment allegations, not to address all forms of misconduct that a respondent might commit during a grievance process.

The Department appreciates commenters' concerns that State or local law may present other considerations or impose other requirements before an emergency removal can occur. To the extent that other applicable laws establish additional relevant standards for emergency removals, recipients

[959] *E.g.,* 20 U.S.C. 1232g(b)(1)(I) (allowing disclosure, without prior written consent, of personally identifiable information from a student's education records ''subject to regulations of the Secretary, in connection with an emergency, appropriate persons if the knowledge of such information is necessary to protect the health or safety of the student or other persons''); 34 CFR 99.31(a)(10) and 34 CFR 99.36 (regulations implementing FERPA).

should also heed such standards. To the greatest degree possible, State and local law ought to be reconciled with the final regulations, but to the extent there is a direct conflict, the final regulations prevail.[960] While commenters correctly note that a ''full hearing'' is not a constitutional due process requirement in all interim suspension situations, § 106.44(c) does not impose a requirement to hold a ''full hearing'' and in fact, does not impose any pre-deprivation due process requirements; the opportunity for a respondent to challenge an emergency removal decision need only occur post-deprivation. For reasons described in the ''Role of Due Process in the Grievance Process'' section of this preamble, the Department has determined that postsecondary institutions must hold live hearings to reach determinations regarding responsibility for sexual harassment. However, because § 106.44(c) is intended to give recipients authority to respond quickly to emergencies, and does not substitute for a determination regarding the responsibility of the respondent for the sexual harassment allegations at issue, recipients need only provide respondents the basic features of due process (notice and opportunity), and may do so after removal rather than before a removal occurs. An emergency removal under § 106.44(c) does not authorize a recipient to impose an interim suspension or expulsion on a respondent *because* the respondent has been accused of sexual harassment. Rather, this provision authorizes a recipient to remove a respondent from the recipient's education program or activity (whether or not the recipient labels such a removal as an interim suspension or expulsion, or uses any different label to describe the removal) when an individualized safety and risk analysis determines that an imminent threat to the physical health or safety of any person, *arising from* sexual harassment allegations, justifies removal.

Section 106.44(c) expressly acknowledges that recipients may be obligated under applicable disability laws to conduct emergency removals differently with respect to individuals with disabilities, and these final regulations do not alter a recipient's obligation to adhere to the IDEA, Section 504, or the ADA. Due to a recipient's obligations under applicable State laws or disability laws, uniformity with respect to how a recipient addresses all cases involving immediate threats to physical health and safety may not be possible. However, the Department believes that § 106.44(c) appropriately balances the need for schools to remove a respondent posing an immediate threat to the physical health or safety of any person, with the need to ensure that such an ability is not used inappropriately, for instance to bypass the prohibition in § 106.44(a) and § 106.45(b)(1)(i) against imposition of disciplinary sanctions or other actions that are not supportive measures against a respondent without first following the § 106.45 grievance process. The Department does not believe that a lower threshold for an emergency removal appropriately balances these interests, even if this means that emergency removals arising from allegations of sexual harassment must meet a higher standard than when a threat arises from conduct allegations unrelated to Title IX sexual harassment. In response to commenters' reasonable concerns about the potential for confusion, we have added the phrase ''arising from the allegations of sexual harassment'' (and ''sexual harassment'' is a defined term under § 106.30) into this provision to clarify that this emergency removal provision only governs situations that arise under Title IX, and not under State or other laws that might apply to other emergency situations.

The Department does not see a need to add language stating that the emergency removal must be periodically reviewed. Emergency removal is not a substitute for the § 106.45 grievance process, and § 106.45(b)(1)(v) requires reasonably prompt time frames for that grievance process. We acknowledge that a recipient could remove a respondent under § 106.44(c) without a formal complaint having triggered the § 106.45 grievance process; in such situations, the requirements in § 106.44(c) giving the respondent notice and opportunity to be heard post-removal suffice to protect a respondent from a removal without a fair process for challenging that outcome, and the Department does not believe it is necessary to require periodic review of the removal decision. We decline to impose layers of complexity onto the emergency removal process, leaving procedures in recipients' discretion; in many cases, recipients will develop a ''safe exit plan'' as part of implementing an emergency removal, and accommodate students who have been removed on an emergency basis with alternative means to continue academic coursework during a removal period or provide for a respondent to re-take classes upon a return from an emergency removal, or secure personal property left on a recipient's campus when a respondent is removed. We disagree that a recipient's failure to refusal to take any of the foregoing steps necessarily constitutes sex discrimination under Title IX, although a recipient would violate Title IX by, for example, applying different policies to female respondents than to male respondents removed on an emergency basis. Nothing in the final regulations prevents students who have been removed from asserting rights under State law or contract against the recipient arising from a removal under this provision.

We decline to require an individualized safety and risk analysis upon every reported sexual assault, because the § 106.45 grievance process is designed to bring all relevant evidence concerning sexual harassment allegations to the decision-maker's attention so that a determination regarding responsibility is reached fairly and reliably. A recipient is obligated under § 106.44(a) to provide a complainant with a non-deliberately indifferent response to a sexual assault report, which includes offering supportive measures designed to protect the complainant's safety, and if a recipient does not provide a complainant with supportive measures, then the recipient must document the reasons why such a response was not clearly unreasonable in light of the known circumstances pursuant to § 106.45(b)(10)(ii). Emergency removals under § 106.44(c) remain an option for recipients to respond to situations where an individualized safety and risk analysis determines that a respondent poses an immediate threat to health or safety.

The Department appreciates commenters' assertions that § 106.44(c) should provide more due process protections, similar to those applied in professional licensing board cases or under Federal laws that apply to schools funded by the Bureau of Indian Affairs; however, we believe that § 106.44(c) appropriately balances a recipient's need to protect individuals from emergency threats, with providing adequate due process to the respondent under such emergency circumstances. Notice and an opportunity to be heard constitute the fundamental features of procedural due process, and the Department does not wish to prescribe specific procedures that a recipient must apply in emergency situations. Accordingly, the Department does not

[960] *See* discussion under the ''Section 106.6(h) Preemptive Effect'' subsection of the ''Clarifying Amendments to Existing Regulations'' section of this preamble; *see also* discussion under the ''Spending Clause'' subsection of the ''Miscellaneous'' section of this preamble.

wish to adopt the same due process protections that commenters asserted are applied in professional licensing revocation proceedings, or that are provided to Native American students in schools funded by the Bureau of Indian Affairs. The Department acknowledges that schools receiving funding from the Bureau of Indian Affairs must provide even greater due process protections than what these final regulations require, but these greater due process protections do not conflict with these final regulations. These final regulations govern a variety of recipients, including elementary and secondary schools and postsecondary institutions, but also recipients that are not educational institutions; for example, some libraries and museums are recipients of Federal financial assistance operating education programs or activities. These final regulations provide the appropriate amount of due process for a wide variety of recipients of Federal financial assistance with respect to a recipient's response to emergency situations.

As discussed in the ''Clery Act'' subsection of the ''Miscellaneous'' section of this preamble, postsecondary institutions subject to these Title IX regulations may also be subject to the Clery Act. We decline to state in § 106.44(c) that recipients must also comply with the Clery Act because we do not wish to create confusion about whether § 106.44(c) applies only to postsecondary institutions (because the Clery Act does not apply to elementary and secondary schools). We decline to require recipients to notify authorities, provide safety interventions, or annually report the number of emergency removals conducted under § 106.44(c), because we do not wish to prescribe requirements on recipients beyond what we have determined is necessary to fulfill the purpose of this provision: Granting recipients authority and discretion to appropriately respond to emergency situations arising from sexual harassment allegations. Nothing in these final regulations precludes a recipient from notifying authorities, providing safety interventions, or reporting the number of emergency removals, to comply with other laws requiring such steps or based on a recipient's desire to take such steps. For similar reasons, we decline to require recipients to adopt ''best practices'' for responding to threats. We note that these final regulations require recipients to offer supportive measures to every complainant, and do not preclude a recipient from providing resources to complainants or respondents.

Changes: We have revised § 106.44(c) so that a respondent removed on an emergency basis must pose an immediate threat to the ''physical'' health or safety (adding the word ''physical'') of ''any student or other individual'' (replacing the phrase ''students or employees''). We have also revised the proposed language to clarify that the justification for emergency removal must arise from allegations of sexual harassment under Title IX.

Intersection With the IDEA, Section 504, and ADA

Comments: Some commenters applauded the ''saving clause'' in § 106.44(c) acknowledging that the respondent may have rights under the IDEA, Section 504, or the ADA. Several commenters asserted that § 106.44(c) would create uncertainty regarding the interplay between Title IX and relevant disabilities laws, which would further exacerbate the uncertainty regarding involuntary removal of students who pose a threat to themselves. Other commenters stated that the result of this provision would likely be different handling of Title IX cases for students with disabilities versus students without disabilities because of the requirements of the IDEA, Section 504, and the ADA. Some commenters believed this provision (and the proposed rules overall) appear to give consideration to the rights and needs of respondents with disabilities, without similar consideration for the rights of complainants or witnesses with disabilities. Commenters asserted that § 106.44(c) is subject to problematic interpretation because by expressly referencing the IDEA, Section 504, and the ADA this provision might wrongly encourage schools to remove students with disabilities because of implicit bias against students with disabilities, especially students with intellectual disabilities.

One commenter suggested that § 106.44(c) should track the definition of ''direct threat'' used in the Equal Employment Opportunity Commission's (EEOC) regulations, upheld by the Supreme Court,[961] and as outlined in ADA regulations [962] because this would give recipients and respondents a clearer standard and reduce the chances that removal decisions will be based on generalizations, ignorance, fear, patronizing attitudes, or stereotypes regarding individuals with disabilities.

Some commenters argued that this provision conflicts with the IDEA, Section 504, and the ADA, and that removals are not as simple as conducting a mere risk assessment, because the IDEA governs emergency removal of students in elementary school who are receiving special education and related services.[963] Commenters asserted that under the IDEA, a school administrator cannot make a unilateral risk assessment, and placement decisions cannot be made by an administrator alone; rather, commenters argued, these decisions must be made by a team that includes the parent and relevant members of the IEP (Individualized Education Program) Team and if the conduct in question was a manifestation of a disability, the recipient cannot make a unilateral threat assessment and remove a child from school, absent extreme circumstances. These commenters further argued that sometimes certain behaviors are the result or manifestation of a disability, despite being sexually offensive, *e.g.,* a student with Tourette's syndrome blurting out sexually offensive language. Commenters argued that under disability laws schools cannot remove those students from school without complying with the IDEA, Section 504, and the ADA. One commenter recommended that § 106.44(c) require, at a minimum, training for Title IX administrators on the intersection among Title IX and applicable disability laws. In the college setting, the commenter further recommended that Title IX Coordinators not be permitted to impose supportive measures that involve removal without feedback from administrators from the institution's office of disability services, provided that the student is registered with the pertinent office. If a student has an Individualized Education Plan (IEP) in secondary school, commenters recommended that the administration immediately call for a team meeting to determine the next steps.

Other commenters asserted that any language under § 106.44(c) must make clear that the free appropriate public education (FAPE) to which students

[961] Commenters cited: *Chevron U.S.A. Inc.* v. *Echazabal,* 536 U.S. 73 (2002).

[962] Commenters cited: 28 CFR 35.139(b) (''In determining whether an individual poses a direct threat to the health or safety of others, a public entity must make an individualized assessment, based on reasonable judgment that relies on current medical knowledge or on the best available objective evidence, to ascertain: the nature, duration, and severity of the risk; the probability that the potential injury will actually occur; and whether reasonable modifications of policies, practices, or procedures or the provision of auxiliary aids or services will mitigate the risk.'').

[963] Commenters cited: *Glen by & through Glen* v. *Charlotte-Mecklenburg Sch. Bd. of Educ.,* 903 F. Supp. 918, 935 (W.D.N.C. 1995) (''[W]here student poses an immediate threat, [the school] may temporarily suspend up to 10 school days.'').

with disabilities are entitled must continue, even in circumstances when emergency removal is deemed necessary under Title IX. Given this, one commenter recommended that the language in § 106.44(c) clarify that this provision does not supersede rights under disability laws.

Some commenters, while expressing overall support for § 106.44(c), requested additional guidance on the intersection of Title IX, the IDEA, and the ADA, and how elementary and secondary schools would implement § 106.44(c). The commenters asserted that the final regulations should be explicit that regardless of a student's IEP or ''504 plan'' under the IDEA or Section 504, the student is not allowed to engage in threatening or harmful behavior and that this would be similar to the response a campus might have to any other serious violation, such as bringing a firearm to class. Commenters also argued that the final regulations should clarify that separation of elementary and secondary school students with disabilities from classroom settings should be rare and only when done in compliance with the IDEA. Commenters argued that recipients must be made aware that a student with a disability does not have to be eligible for a free appropriate public education (FAPE) in order for § 106.44(c) to apply, and that recipients must not be misled into thinking there are different standards for elementary and secondary school and postsecondary education environments when it comes to equal access to educational opportunities.

Other commenters argued that § 106.44(c) may violate compulsory educational laws by removing elementary-age students from school on an emergency basis. When an elementary school student is removed under § 106.44(c), commenters wondered whether the school is supposed to have a designated site for housing or educating removed students during the investigation.

Discussion: Section 106.44(c) states that this provision does not modify any rights under the IDEA, Section 504, or the ADA. In the final regulations, we removed reference to certain titles of the ADA and refer instead to the ''Americans with Disabilities Act'' so that application of any portion of the ADA requires a recipient to meet ADA obligations while also complying with these final regulations. We disagree that this provision will create ambiguity or otherwise supersede rights that students have under these disability statutes. Additionally, we do not believe that expressly acknowledging recipients' obligations under disability laws incentivizes recipients to remove respondents with disabilities; rather, reference in this provision to those disability laws will help protect respondents from emergency removals that do not also protect the respondents' rights under applicable disability laws. With respect to implicit bias against students with disabilities, recipients must be careful to ensure that all emergency removal proceedings are impartial, without bias or conflicts of interest [964] and the final regulations do not preclude a recipient from providing training to employees, including Title IX personnel, regarding a recipient's obligations under both Title IX and applicable disability laws. Any different treatment between students without disabilities and students with disabilities with respect to emergency removals, may occur due to a recipient's need to comply with the IDEA, Section 504, the ADA, or other disability laws, but would not be permissible due to bias or stereotypes against individuals with disabilities.

As explained in the ''Directed Question 5: Individuals with Disabilities'' subsection of the ''Directed Questions'' section of this preamble, recipients have an obligation to comply with applicable disability laws with respect to complainants as well as respondents (and any other individual involved in a Title IX matter, such as a witness), and the reference to disability laws in § 106.44(c) does not obviate recipients' responsibilities to comply with disability laws with respect to other applications of these final regulations.

The Department appreciates commenters' suggestion to mirror the ''direct threat'' language utilized in ADA regulations; however, we have instead revised § 106.44(c) to refer to the physical health or safety of ''any student or other individual'' because this language better aligns this provision with the FERPA health and safety emergency exception, and avoids the confusion caused by the ''direct threat'' language under ADA regulations because those regulations refer to a ''direct threat to the health or safety *of others*'' [965] which does not clearly encompass a threat to the respondent themselves (*e.g.,* where a respondent threatens self-harm). By revising § 106.44(c) to refer to a threat to the physical health or safety ''of any student or other individual'' this provision does encompass a respondent's threat of self-harm (when the threat arises from the allegations of sexual harassment), and is aligned with the language used in FERPA's health or safety exception.[966] We note that recipients still need to comply with applicable disability laws, including the ADA, in making emergency removal decisions.

The Department appreciates commenters' varied concerns that complying with these final regulations, and with disability laws, may pose challenges for recipients, including specific challenges for elementary and secondary schools, and postsecondary institutions, because of the intersection among the IDEA, Section 504, the ADA, and how to conduct an emergency removal under these final regulations under Title IX. The Department will offer technical assistance to recipients regarding compliance with laws under the Department's enforcement authority. However, the Department does not believe that recipients' obligations under multiple civil rights laws requires changing the emergency removal provision in § 106.44(c) because this is an important provision to ensure that recipients have flexibility to balance the need to address emergency situations with fair treatment of a respondent who has not yet been proved responsible for sexual harassment. The Department does not believe that applicable disability laws, or other State laws, render a recipient unable to comply with all relevant legal obligations. For instance, with respect to compulsory education laws, nothing in § 106.44(c) relieves a recipient from complying

[964] Section 106.45(b)(1)(iii) requires all Title IX Coordinators (and investigators, decision-makers, and persons who facilitate informal resolution processes) to be free from conflicts of interest or bias against complainants and respondents generally or against an individual complainant or respondent, and requires training for such personnel that includes (among other things) how to serve impartially. A ''respondent'' under § 106.30 means any individual who has been reported to be the perpetrator of conduct that could constitute sexual harassment; thus, a Title IX Coordinator interacting with a respondent undergoing an emergency removal must serve impartially, without conflict of interest or bias.

[965] 28 CFR 35.139(b) (''In determining whether an individual *poses a direct threat to the health or safety of others,* a public entity must make an individualized assessment, based on reasonable judgment that relies on current medical knowledge or on the best available objective evidence, to ascertain: The nature, duration, and severity of the risk; the probability that the potential injury will actually occur; and whether reasonable modifications of policies, practices, or procedures or the provision of auxiliary aids or services will mitigate the risk.'') (emphasis added).

[966] *E.g.,* 20 U.S.C. 1232g(b)(1)(I) (allowing disclosure, without prior written consent, of personally identifiable information from a student's education records ''subject to regulations of the Secretary, in connection with an emergency, appropriate persons if the knowledge of such information is necessary to protect the health or safety of the student or other persons''); *see also* regulations implementing FERPA, 34 CFR 99.31(a)(10) and 99.36.

with State laws requiring that students under a certain age receive government-provided education services. As a further example, nothing in § 106.44(c) prevents a recipient from involving a student's IEP team before making an emergency removal decision, and § 106.44(c) does not require a recipient to remove a respondent where the recipient has determined that the threat posed by the respondent, arising from the sexual harassment allegations, is a manifestation of a disability such that the recipient's discretion to remove the respondent is constrained by IDEA requirements.

Changes: We have replaced the phrase ''students or employees'' with the phrase ''any student or other individual'' in § 106.44(c) and removed specification of certain titles of the ADA, instead referencing the whole of the ADA.

Post-Removal Challenges

Comments: Some commenters supported § 106.44(c) giving respondents notice and opportunity to challenge the removal immediately after the removal, because during a removal a respondent might lose a significant amount of instructional time while waiting for a grievance proceeding to conclude, and being out of school can harm the academic success and emotional health of the removed student. Other commenters asserted that respondents should not be excluded from a recipient's education program or activity until conclusion of a grievance process, and a post-removal challenge after the fact is insufficient to assure due process for respondents, especially because § 106.44(c) does not specify requirements for the time frame or procedures used for a challenging the removal decision.

Some commenters argued that the ability of a removed respondent to challenge the removal would pose an unnecessary increased risk to the safety of the community, especially because § 106.44(c) already requires the recipient to determine the removal was justified by an individualized safety and risk analysis. Commenters argued that a school's emergency removal decision should stand until a threat assessment team has met and given a recommendation to affirm or overrule the decision.

Some commenters asserted that § 106.44(c) is ambiguous about the right to a post-removal challenge and argued that the failure to provide more clarity is problematic because it is unclear if the ''immediate'' challenge must occur minutes, hours, one day, or several days after the removal. Commenters argued that a plain language interpretation of ''immediately'' may require the challenge to occur minutes after the suspension, but this could jeopardize the safety of the complainant and the community, because the very point of an interim suspension is to remove a known risk from campus. Other commenters argued that requiring an ''immediate'' post-removal challenge could undermine the respondent's due process rights, because the respondent might not be physically present on campus when the interim suspension (*e.g.,* removal) is issued. Some commenters argued that there should be a delay between when the removal occurred and when the opportunity to challenge occurs, because students and employees are often afraid of providing information to college administrations due to legitimate, reasonable fear for their own safety. Commenters requested that this provision be modified to give the respondent a challenge opportunity ''as soon as reasonably practicable'' rather than ''immediately.'' Commenters asked whether providing a challenge opportunity ''immediately'' must, or could, be the same as the ''prompt'' time frames required under § 106.45.

Discussion: The Department appreciates commenters' support of the post-removal challenge opportunity provided in § 106.44(c). The Department disagrees with commenters who suggested that no challenge to removals ought to be possible, and believes that § 106.44(c) appropriately balances the interests involved in emergency situations. We do not believe that prescribing procedures for the post-removal challenge is necessary or desirable, because this provision ensures that respondents receive the essential due process requirements of notice and opportunity to be heard while leaving recipients flexibility to use procedures that a recipient deems most appropriate.[967] These final regulations aim to improve the perception and reality of the fairness and accuracy by which a recipient resolves allegations of sexual harassment, and therefore the § 106.45 grievance process prescribes a consistent framework and specific procedures for resolving formal complaints of sexual harassment. By contrast, § 106.44(c) is not designed to resolve the underlying allegations of sexual harassment against a respondent, but rather to ensure that recipients have the authority and discretion to appropriately handle emergency situations that may arise from allegations of sexual harassment. As discussed above, the final regulations revise the language in § 106.44(c) to add the phrase ''arising from the allegations of sexual harassment,'' which clarifies that the facts or circumstances that justify a removal might not be the same as the sexual harassment allegations but might ''arise from'' those allegations.

The Department disagrees that a post-removal challenge is unnecessary because the individualized safety and risk analysis already determined that removal was justified; the purpose of a true emergency removal is to authorize a recipient to respond to immediate threats even without providing the respondent with pre-deprivation notice and opportunity to be heard because this permits a recipient to protect the one or more persons whose physical health or safety may be in jeopardy. The respondent's first opportunity to challenge the removal (*e.g.,* by presenting the recipient with facts that might contradict the existence of an immediate threat to physical health or safety) might be after the recipient already reached its determination that removal is justified, and due process principles (whether constitutional due process of law, or fundamental fairness) require that the respondent be given notice and opportunity to be heard.[968] Section 106.44(c) does not preclude a recipient from convening a threat assessment team to review the recipient's emergency removal determination, but § 106.44(c) still requires the recipient to give the respondent post-removal notice and opportunity to challenge the removal decision.

The Department expects the emergency removal process to be used in genuine emergency situations, but when it is used, recipients must provide an opportunity for a removed individual to challenge their removal immediately after the removal. The term ''immediately'' will be fact-specific, but is generally understood in the context of a legal process as occurring without delay, as soon as possible, given the circumstances. ''Immediately'' does not require a time frame of ''minutes'' because in the context of a legal proceeding the term immediately is not generally understood to mean an absolute exclusion of any time interval.

[967] *E.g., Goss* v. *Lopez,* 419 U.S. 565, 582–83 (1975) (''Students whose presence poses a continuing danger to persons or property or an ongoing threat of disrupting the academic process may be immediately removed from school. In such cases, the necessary notice and rudimentary hearing should follow as soon as practicable'').

[968] *Goss,* 419 U.S. at 580 (''At the very minimum, therefore, students facing suspension and the consequent interference with a protected property interest must be given some kind of notice and afforded some kind of hearing.'').

''Immediately'' does not imply the same time frame as the ''reasonably prompt'' time frames that govern the grievance process under § 106.45, because ''immediately'' suggests a more pressing, urgent time frame than ''reasonable promptness.'' This is appropriate because § 106.44(c) does not require a recipient to provide the respondent with any pre-deprivation notice or opportunity to be heard, so requiring post-deprivation due process protections ''immediately'' after the deprivation ensures that a respondent's interest in access to education is appropriately balanced against the recipient's interest in quickly addressing an emergency situation posed by a respondent's risk to the physical health or safety of any student or other individual. We decline to require the post-removal notice and challenge to be given ''as soon as reasonably practicable'' instead of ''immediately'' because that would provide the respondent less adequate post-deprivation due process protections.

Changes: None.

No Stated Time Limitation for the Emergency Removal

Comments: Some commenters viewed the absence of a time limitation with respect to how long an emergency removal could be as a source of harm to both respondents and complainants. Commenters asserted that, given how long the grievance process could take, students and employees removed from their education or employment until conclusion of the grievance process could experience considerable negative consequences. Commenters argued that the proposed rules should not encourage emergency removal, particularly not when other, less severe measures could be taken to ensure safety pending an investigation. Commenters proposed limiting an emergency removal to seven days, during which time an institution would determine in writing that an immediate threat to health or safety exists, warranting the emergency action, and if no such determination is reached, the respondent would be reinstated.

Discussion: The final regulations require schools to offer supportive measures to complainants and permit recipients to offer supportive measures to respondents. We decline to require emergency removals in every situation where a formal complaint triggers a grievance process. The grievance process is designed to conclude promptly, and the issue of whether a respondent needs to be removed on an emergency basis should not arise in most cases, since § 106.44(c) applies only where emergency removal is justified by an immediate threat to the physical health or safety of any student or other individual. Revised § 106.44(a), and revised § 106.45(b)(1)(i), prohibit a recipient from imposing against a respondent disciplinary sanctions or other actions that are not supportive measures as defined in § 106.30, without following the § 106.45 grievance process. Emergency removal under § 106.44(c) constitutes an exception to those prohibitions, and should not be undertaken in every situation where sexual harassment has been alleged. Rather, emergency removal is appropriate only when necessary to address imminent threats to a person's physical health or safety arising from the allegations of sexual harassment.

The Department declines to put any temporal limitation on the length of a valid emergency removal, although nothing in the final regulations precludes a recipient from periodically assessing whether an immediate threat to physical health or safety is ongoing or has dissipated.

Changes: None.

''Removal''

Comments: Commenters requested clarification in the following regards: Would removing a respondent from a class, or changing the respondent's class schedule, before a grievance process is completed (or where no formal complaint has initiated a grievance process), require a recipient to undertake emergency removal procedures? Under § 106.44(c) must a recipient remove a respondent from the entirety of recipient's education program or activity, or may a recipient choose to only remove the respondent to the extent the individual poses an emergency in a specific setting, *i.e.,* a certain class, student organization, living space, athletic team, etc.?

Commenters argued that the § 106.30 definition of supportive measures and § 106.44(c) regarding emergency removal could lead to confusion among recipients about what steps they can take to protect a complainant's safety and access to education prior to conclusion of a grievance process, or where no formal complaint has initiated a grievance process. One commenter suggested modifying this provision to expressly permit partial exclusion from programs or activities by adding the phrase ''or any part thereof.''

Commenters argued that § 106.44(c) would make it too difficult to remove a respondent before the completion of a disciplinary proceeding absent an extreme emergency. Commenters suggested that the Department should consider a more nuanced approach that provides schools with a range of options, short of emergency removal, that are proportionate to the alleged misconduct and meet the needs of the victim. Commenters requested that § 106.44(c) be revised to allow an appropriate administrator (such as a dean of students), in consultation with the Title IX Coordinator, discretion to determine the appropriateness of an emergency removal based on a standard that is in the best interest of the institution.

Some commenters argued that even where an emergency threat exists, § 106.44(c) does not provide a time frame in which the recipient must make this emergency removal decision, leaving survivors vulnerable to daily contact with a dangerous respondent. Commenters asserted that recipients should be able to remove a respondent from a dorm or shared classes before conclusion of a disciplinary proceeding, particularly when it is clear that the survivor's education will be harmed otherwise. Commenters asserted that 80 percent of rapes and sexual assaults are committed by someone known to the victim,[969] which means that it is highly likely that the victim and perpetrator share a dormitory, a class, or other aspect of the school environment and that § 106.44(c) (combined with the § 106.30 definition of ''supportive measures'') leaves victims in continual contact with their harasser, thereby prioritizing the education of accused harassers over the education of survivors. Commenters argued that survivors should not have to wait until the end of a grievance process to be protected from seeing a perpetrator in class or on campus, and this provision would pressure survivors to file formal complaints when many survivors do not want a formal process for valid personal reasons, because a formal process would be the only avenue for ensuring that a ''guilty'' respondent will be suspended or expelled. Commenters recommended adding language to clarify that nothing shall prevent elementary and secondary schools from implementing an ''alternate assignment'' during the pendency of an investigation, provided that the same is otherwise permitted by law.

One commenter suggested combining the emergency removal and supportive

[969] Commenters cited: U.S. Dep't. of Justice, Office of Justice Programs, Bureau of Justice Statistics, *Special Report: Rape and Sexual Assault Victimization Among College-Age Females, 1995–2013* (2014).

measures provisions into a single ''interim measures'' provision.

Discussion: The Department believes the § 106.30 definition of supportive measures, and § 106.44(c) governing emergency removals, in the context of the revised requirements in § 106.44(a) and § 106.45(b)(1)(i) (requiring recipients to offer supportive measures to complainants while not imposing against respondents disciplinary sanctions or other actions that are not ''supportive measures'') provide a wide range and variety of options for a recipient to preserve equal educational access, protect the safety of all parties, deter sexual harassment, and respond to emergency situations.

Under § 106.30, a supportive measure must not be punitive or disciplinary, but may burden a respondent as long as the burden is not unreasonable. As discussed in the ''Supportive Measures'' subsection of the ''Section 106.30 Definitions'' section of this preamble, whether a certain measure unreasonably burdens a respondent requires a fact-specific inquiry. Changing a respondent's class schedule or changing a respondent's housing or dining hall assignment may be a permissible supportive measure depending on the circumstances. By contrast, removing a respondent from the entirety of the recipient's education programs and activities, or removing a respondent from one or more of the recipient's education programs or activities (such as removal from a team, club, or extracurricular activity), likely would constitute an unreasonable burden on the respondent or be deemed disciplinary or punitive, and therefore would not likely qualify as a supportive measure. Until or unless the recipient has followed the § 106.45 grievance process (at which point the recipient may impose any disciplinary sanction or other punitive or adverse consequence of the recipient's choice), removals of the respondent from the recipient's education program or activity [970] need to meet the standards for emergency removals under § 106.44(c).[971] Supportive measures provide one avenue for recipients to protect the safety of parties and permissibly may affect and even burden the respondent, so long as the burden is not unreasonable. Supportive measures may include, for example, mutual or unilateral restrictions on contact between parties or re-arranging class schedules or classroom seating assignments, so complainants need not remain in constant or daily contact with a respondent while an investigation is pending, or even where no grievance process is pending.

Whether an elementary and secondary school recipient may implement an ''alternate assignment'' during the pendency of an investigation (or without a grievance process pending), in circumstances that do not justify an emergency removal, when such action is otherwise permitted by law, depends on whether the alternate assignment constitutes a disciplinary or punitive action or unreasonably burdens the respondent (in which case it would not qualify as a supportive measure as defined in § 106.30).[972] Whether an action ''unreasonably burdens'' a respondent is fact-specific, but should be evaluated in light of the nature and purpose of the benefits, opportunities, programs and activities, of the recipient in which the respondent is participating, and the extent to which an action taken as a supportive measure would result in the respondent forgoing benefits, opportunities, programs, or activities in which the respondent has been participating. An alternate assignment may, of course, be appropriate when an immediate threat justifies an emergency removal of the respondent because under the final regulations, emergency removal may justify total removal from the recipient's education program or activity, so offering the respondent alternate assignment is included within the potential scope of an emergency removal. Under § 106.44(a), the recipient must offer supportive measures to the complainant, and if a particular action—such as alternate assignment—does not, under specific circumstances, meet the definition of a supportive measure, then the recipient must carefully consider other individualized services, reasonably available, designed to restore or preserve the complainant's equal educational access and/or protect safety and deter sexual harassment, that the recipient will offer to the complainant.

We do not believe that the final regulations incentivize complainants to file formal complaints when they otherwise do not wish to do so just to avoid contacting or communicating with a respondent, because supportive measures permit a range of actions that are non-punitive, non-disciplinary, and do not *unreasonably* burden a respondent, such that a recipient often may implement supportive measures that do meet a complainant's desire to avoid contact with the respondent. For example, if a complainant and respondent are both members of the same athletic team, a carefully crafted unilateral no-contact order could restrict a respondent from communicating directly with the complainant so that even when the parties practice on the same field together or attend the same team functions together, the respondent is not permitted to directly communicate with the complainant. Further, the recipient may counsel the respondent about the recipient's anti-sexual harassment policy and anti-retaliation policy, and instruct the team coaches, trainers, and staff to monitor the respondent, to help enforce the no-contact order and deter any sexual harassment or retaliation by the respondent against the complainant. Further, nothing in the final regulations, or in the definition of supportive measures in § 106.30, precludes a recipient from altering the nature of supportive measures provided, if circumstances change. For example, if the Title IX Coordinator initially implements a supportive measure prohibiting the respondent from directly communicating with the complainant, but the parties later each independently decide to take the same lab class, the Title IX Coordinator may, at the complainant's request, reevaluate the circumstances and offer the complainant additional supportive measures, such as requiring the professor teaching the lab class to ensure that the complainant and respondent are not ''teamed up'' or assigned to sit near each other or assigned as to be ''partners,'' during or as part of the lab class.

Commenters correctly observe that the final regulations prohibit suspending or

[970] As discussed in the ''Section 106.44(a) 'education program or activity' '' subsection of the ''Section 106.44 Recipient's Response to Sexual Harassment, Generally'' section of this preamble, the Title IX statute and existing regulations provide definitions of ''program or activity'' that apply to interpretation of a recipient's ''education program or activity'' in these final regulations, and we have clarified in § 106.44(a) that for purposes of responding to sexual harassment a recipient's education program or activity includes circumstances over which the recipient exercised substantial control. 20 U.S.C. 1687; 34 CFR 106.2(h); 34 CFR 106.2(i) (defining ''recipient''); 34 CFR 106.31(a) (referring to ''any academic, extracurricular, research, occupational training, or other education program or activity operated by a recipient which receives Federal financial assistance'').

[971] *Cf.* § 106.44(d) (a non-student employee-respondent may be placed on administrative leave (with or without pay) while a § 106.45 grievance process is pending, without needing to meet the emergency removal standards in § 106.44(c)).

[972] For discussion of alternate assignments when the respondent is a non-student employee, see the ''Section 106.44(d) Administrative Leave'' subsection of the ''Additional Rules Governing Recipients' Responses to Sexual Harassment'' subsection of the ''Section 106.44 Recipient's Response to Sexual Harassment, Generally'' section of this preamble.

expelling a respondent without first following the § 106.45 grievance process, or unless an emergency situation justices removal from the recipient's education program or activity (which removal may, or may not, be labeled a ''suspension'' or ''expulsion'' by the recipient). We do not believe this constitutes unfairness to survivors, or poses a threat to survivors' equal educational access, because there are many actions that meet the definition of supportive measures that may restore or preserve a complainant's equal access, protect a complainant's safety, and/or deter sexual harassment without punishing or unreasonably burdening a respondent. As discussed in the ''Section 106.45(b)(1)(iv) Presumption of Non-Responsibility'' subsection of the ''General Requirements for § 106.45 Grievance Process'' subsection of the ''Section 106.45 Recipient's Response to Formal Complaints'' section of this preamble, refraining from treating people accused of wrongdoing as responsible for the wrongdoing prior to evidence proving the person is responsible is a fundamental tenet of American justice. These final regulations appropriately ensure that respondents are not unfairly, prematurely *treated* as responsible before being proved responsible, with certain reasonable exceptions: Emergency removals, administrative leave for employees, and informal resolution of a formal complaint that resolves the allegations without a full investigation and adjudication but may result in consequences for a respondent including suspension or expulsion. In this way, the final regulations ensure that every complainant is offered supportive measures designed to preserve their equal educational access and protect their safety (even without any proof of the merits of the complainant's allegations) consistent with due process protections and fundamental fairness. As an example, a complainant understandably may desire as a supportive measure the ability to avoid being in the same classroom with a respondent, whether or not the complainant wants to file a formal complaint. A school may conclude that transferring the respondent to a different section of that class (*e.g.,* that meets on a different day or different time than the class section in which the complainant and respondent are enrolled) is a reasonably available supportive measure that preserves the complainant's equal access and protects the complainant's safety or deters sexual harassment, while not constituting an unreasonable burden on the respondent (because the respondent is still able to take that same class and earn the same credits toward graduation, for instance). If, on the other hand, that class in which both parties are enrolled does not have alternative sections that meet at different times, and precluding the respondent from completing that class would delay the respondent's progression toward graduation, then the school may determinate that requiring the respondent to drop that class would constitute an unreasonable burden on the respondent and would not quality as a supportive measure, although granting the complainant an approved withdrawal from that class with permission to take the class in the future, would of course constitute a permissible supportive measure for the recipient to offer the complainant. Alternatively in such a circumstance (where the complainant, like the respondent, cannot withdraw from that class and take it later without delaying progress toward graduation), the school may offer the complainant as a supportive measure, for example, a one-way no contact order that prohibits the respondent from communicating with the complainant and assigns the respondent to sit across the classroom from the complainant. As such an example shows, these final regulations allow, and require, a recipient to carefully consider the specific facts and circumstances unique to each situation to craft supportive measures to help a complainant without prematurely penalizing a respondent.

The Department does not believe it is necessary or appropriate to require a time frame for when a recipient must undertake an emergency removal, because the risk arising from the sexual harassment allegations that may justify a removal may arise at any time; further, § 106.44(a) requires a recipient to respond ''promptly'' to sexual harassment, and if an emergency removal is a necessary part of a recipient's non-deliberately indifferent response then such a response must be prompt. We reiterate that emergency removal is not about reaching factual conclusions about whether the respondent is responsible for the underlying sexual harassment allegations. Emergency removal is about determining whether an immediate threat arising out of the sexual harassment allegations justifies removal of the respondent.

We appreciate the opportunity to clarify that, where the standards for emergency removal are met under § 106.44(c), the recipient has discretion whether to remove the respondent from all the recipient's education programs and activities, or to narrow the removal to certain classes, teams, clubs, organizations, or activities. We decline to add the phrase ''or any part thereof'' to this provision because a ''part of'' a program may not be readily understood, and we believe the authority to exclude *entirely* includes the lesser authority to exclude partially.

Section 106.44(a) and § 106.45(b)(1)(i) forbid a recipient from imposing disciplinary sanctions (or other actions that are not supportive measures) on a respondent without first following a grievance process that complies with § 106.45. We reiterate that a § 106.44(c) emergency removal may be appropriate whether or not a grievance process is underway, and that the purpose of an emergency removal is to protect the physical health or safety of any student or other individual to whom the respondent poses an immediate threat, arising from allegations of sexual harassment, not to impose an interim suspension or expulsion on a respondent, or penalize a respondent by suspending the respondent from, for instance, playing on a sports team or holding a student government position, while a grievance process is pending. The final regulations respect complainants' autonomy and understand that not every complainant wishes to participate in a grievance process, but a complainant's choice not to file a formal complaint or not to participate in a grievance process does not permit a recipient to bypass a grievance process and suspend or expel (or otherwise discipline, penalize, or unreasonably burden) a respondent accused of sexual harassment. An emergency removal under § 106.44(c) separates a respondent from educational opportunities and benefits, and is permissible only when the high threshold of an immediate threat to a person's physical health or safety justifies the removal.

Because the purposes of, and conditions for, ''supportive measures'' as defined in § 106.30 differ from the purposes of, and conditions for, an emergency removal under § 106.44(c), we decline to combine these provisions. Both provisions, and the final regulations as a whole, do not prioritize the educational needs of a respondent over a complainant, or vice versa, but aim to ensure that complainants receive a prompt, supportive response from a recipient, respondents are treated fairly, and recipients retain latitude to address emergency situations that may arise.

Changes: None.

''Individualized Safety and Risk Analysis''

Comments: Many commenters argued that the lack of guidance in § 106.44(c) on the requirements for conducting the ''individualized safety and risk analysis'' is confusing, and should be better defined because it could lead to inconsistent results from school to school, county to county, and State to State. Some commenters expressed overall support for this provision, but argued that the power of removal should not be wielded without careful consideration, and requested clarity about who would undertake the risk analysis (*e.g.,* an internal or external individual on behalf of a recipient). Other commenters stated that § 106.44(c) should list factors to consider in the required safety and risk analysis including: whether violence was alleged (which commenters asserted is rare in cases involving alleged incapacitation), how long the complainant took to file a complaint, whether the complainant has reported the allegations to the police, and whether there are other, less restrictive measures that could be taken. Commenters argued that the risk assessment requirement may prevent the removal of respondents who are in fact dangerous because context and other nuances may not be accounted for in the assessment. One commenter stated that the § 106.44(c) safety and risk analysis requirements are ''good, but sometimes not realistic'' because threat assessment teams do not meet daily, and it is sometimes necessary to decide a removal in a matter of hours. Other commenters stated some recipients have already incorporated this sort of threat assessment into their decision matrix because postsecondary institutions are obligated to take reasonable steps to address dangers or threats to their students.

Some commenters were concerned that institutions lack sufficient resources to properly conduct the required safety and risk analysis, that institutions lack the proper tools to conduct assessments calibrated to the age and developmental issues of the respondent, and that institutions lack the training and knowledge to properly implement such assessments. Commenters asserted that this provision would require institutions to train employees to conduct an individualized safety and risk analysis before removing students on an emergency basis, but that such assessments are rarely within the capacity or expertise of a single employee, and thus may require a committee or task force dedicated for this purpose.

Discussion: Recipients are entitled to use § 106.44(c) to remove a respondent on an emergency basis, only where there is an immediate threat to the physical health or safety of any student or other individual. The ''individualized safety or risk analysis'' requirement ensures that the recipient should not remove a respondent from the recipient's education program or activity pursuant to § 106.44(c) unless there is more than a generalized, hypothetical, or speculative belief that the respondent may pose a risk to someone's physical health or safety. The Department believes that the immediate threat to physical health or safety threshold for justifying a removal sufficiently restricts § 106.44(c) to permitting only emergency removals and believes that further describing what might constitute an emergency would undermine the purpose of this provision, which is to set a high threshold for emergency removal yet ensure that the provision will apply to the variety of circumstances that could present such an emergency. The Department also believes that the final regulations adequately protect respondents, since in cases where the recipient removes a respondent, the recipient must follow appropriate procedures, including bearing the burden of demonstrating that the removal meets the threshold specified by the final regulations, based on a factual, individualized safety and risk analysis. We understand commenters' concerns that the individualized, fact-based nature of an emergency removal assessment may lead to different results from school to school or State to State, but different results may be reasonable based on the unique circumstances presented in individual situations.

Because the safety and risk analysis under § 106.44(c) must be ''individualized,'' the analysis cannot be based on general assumptions about sex, or research that purports to profile characteristics of sex offense perpetrators, or statistical data about the frequency or infrequency of false or unfounded sexual misconduct allegations. The safety and risk analysis must be individualized with respect to the particular respondent and must examine the circumstances ''arising from the allegations of sexual harassment'' giving rise to an immediate threat to a person's physical health or safety. These circumstances may include factors such as whether violence was allegedly involved in the conduct constituting sexual harassment, but could also include circumstances that ''arise from'' the allegations yet do not constitute the alleged conduct itself; for example, a respondent could pose an immediate threat of physical self-harm in reaction to being accused of sexual harassment. For a respondent to be removed on an emergency basis, the school must determine that an immediate threat exists, and that the threat justifies removal. Section 106.44(c) does not limit the factors that a recipient may consider in reaching that determination.

We appreciate commenters' concerns that performing safety and risk analyses may require a recipient to expend resources or train employees, but without an individualized safety and risk analysis a recipient's decision to remove a respondent might be arbitrary, and would fail to apprise the respondent of the basis for the recipient's removal decision so that the respondent has an opportunity to challenge the decision. Procedural due process of law and fundamental fairness require that a respondent deprived of an educational benefit be given notice and opportunity to contest the deprivation;[973] without knowing the individualized reasons why a recipient determined that the respondent posed a threat to someone's physical health or safety, the respondent cannot assess a basis for challenging the recipient's removal decision. Recipients may choose to provide specialized training to employees or convene interdisciplinary threat assessment teams, or be required to take such actions under other laws, and § 106.44(c) leaves recipients flexibility to decide how to conduct an individualized safety and risk analysis, as well as who will conduct the analysis.

Changes: None.

''Provides the Respondent With Notice and an Opportunity To Challenge the Decision Immediately Following the Removal''

Comments: One commenter stated that during any emergency removal hearing, schools should be required to share all available evidence with the respondent, permit that person an opportunity to be heard, and allow the respondent's advisor to cross-examine any witnesses. According to the commenter, if these full procedural rights are not extended, this provision would create a loophole that allows emergency measures to effectively replace a full grievance process. Commenters also argued that a recipient's emergency removal decisions

[973] *See* the ''Role of Due Process in the Grievance Process'' section of this preamble.

would often be hastily made, and that recipients would ignore requirements that a removed student be given the opportunity to review or challenge the decision made by the recipient. Commenters argued that § 106.44(c) should include express language safeguarding students against abusive practices during the challenge procedure. One commenter suggested adding the word ''meaningful'' so the respondent would have ''a meaningful opportunity'' to challenge the removal decision, asserting that certain institutions of higher education in California have not consistently given respondents meaningful opportunities to ''make their case.'' While supportive of § 106.44(c), one commenter suggested modifying this provision to require the recipient to send the respondent written notice of the specific facts that supported the recipient's decision to remove the student, so the respondent can meaningfully challenge the removal decision.

Some commenters asserted that if the respondent has a right to challenge the emergency removal, the recipient must offer an equitable opportunity for the complainant to contest an overturned removal or participate in the respondent's challenge process. Other commenters asked whether § 106.44(c) requires, or allows, a recipient to notify the complainant that a respondent has been removed under this provision, that a respondent is challenging a removal decision, or that a removal decision has been overturned by the recipient after a respondent's challenge.

Commenters argued that § 106.44(c) would also effectively mandate that an institution's employees must be trained to conduct hearings or other undefined post-removal procedures in the event that a respondent exercises the right to challenge the emergency removal. Commenters argued that this burden likely would require a dedicated officer or committee to carry out procedural obligations that did not previously exist, and these burdens were not contemplated at the time of the recipient's acceptance of the Federal funding. Commenters argued that § 106.44(c) would provide rights to at-will employees that are otherwise unavailable, restricting employment actions that are normally within the discretion of an employer.

Commenters requested clarification about the procedures for challenging a removal decision, such as: Whether a respondent's opportunity challenge the emergency removal means the recipient must, or may, use processes under § 106.45 to meet its obligations, including whether evidence must be gathered, witnesses must be interviewed, or a live hearing with cross-examination must be held; whether the recipient, or respondent, will bear the burden of proof that the removal decision was correct or incorrect; whether the recipient must, or may, involve the complainant in the challenge procedure; whether the recipient must, or may, use the investigators and decision-makers that have been trained pursuant to § 106.45 to conduct the post-removal challenge procedure; and whether the determinations about an emergency removal must, or may, influence a determination regarding responsibility during a grievance process under § 106.45.

Discussion: The Department disagrees that § 106.44(c) poses a possible loophole through which recipients may bypass giving respondents the due process protections in the § 106.45 grievance process. The threshold for an emergency removal under § 106.44(c) is adequately high to prevent recipients from using emergency removal as a pretense for imposing interim suspensions and expulsions. We do not believe it is necessary to revise § 106.44(c) to prevent recipients from imposing ''abusive'' procedures on respondents; recipients will be held accountable for reaching removal decisions under the standards of § 106.44(c), giving recipients adequate incentive to give respondents the immediate notice and challenge opportunity following a removal decision. We do not believe that recipients will make emergency removal decisions ''hastily,'' and a respondent who believes a recipient has violated these final regulations may file a complaint with OCR.

The Department does not want to prescribe more than minimal requirements on recipients for purposes of responding to emergency situations. We decline to require written notice to the respondent because minimal due process requires some kind of notice, and compliance with a notice requirement suffices for a recipient's handling of an emergency situation.[974] We decline to add the modifier ''meaningful'' before ''opportunity'' because the basic due process requirement of an opportunity to be heard entails an opportunity that is appropriate under the circumstances, which ensures a meaningful opportunity.[975] While a recipient has discretion (subject to FERPA and other laws restricting the nonconsensual disclosure of personally identifiable information from education records) to notify the complainant of removal decisions regarding a respondent, or post-removal challenges by a respondent, we do not require the complainant to receive notice under § 106.44(c) because not every emergency removal directly relates to the complainant. As discussed above, circumstances that justify removal must be ''arising from the allegations of sexual harassment'' yet may consist of a threat to the physical health or safety of a person other than the complainant (for example, where the respondent has threatened self-harm).[976]

The Department disagrees that § 106.44(c) requires a recipient to go through excessively burdensome procedures prior to removing a respondent on an emergency basis. The seriousness of the consequence of a recipient's decision to removal of a student or employee, without a hearing beforehand, naturally requires the school to meet a high threshold (*i.e.,* an individualized safety and risk assessment shows that the respondent poses an immediate threat to a person's physical health or safety justifying removal). At the same time, § 106.44(c) leaves recipients wide latitude to select the procedures for giving notice and opportunity to challenge a removal.

A recipient owes a general duty under § 106.44(a) to respond to sexual harassment in a manner that is not deliberately indifferent. Where removing an individual on an emergency basis is necessary to avoid acting with deliberate indifference, a recipient must meet the requirements in § 106.44(c). The Department disagrees that § 106.44(c) imposes requirements on recipients that violate the Spending Clause, because recipients understand that compliance with Title IX will

[974] *E.g., Goss,* 419 U.S. at 578–79 (holding that in the public school context ''the interpretation and application of the Due Process Clause are intensely practical matters'' that require at a minimum notice and ''opportunity for hearing appropriate to the nature of the case'') (internal quotation marks and citations omitted).

[975] *Id.*

[976] As discussed in the ''Section 106.6(e) FERPA'' subsection of the ''Clarifying Amendments to Existing Regulations'' section of this preamble, the complainant has a right to know the nature of any disciplinary sanctions imposed on a respondent after the recipient has found the respondent to be responsible for sexual harassment alleged by the complainant, because the disciplinary sanctions are directly related to the allegations made by the complainant. By contrast, emergency removal of a respondent does not involve a recipient's determination that the respondent committed sexual harassment as alleged by the complainant, and information about the emergency removal is not necessarily directly related to the complainant. Thus, FERPA (or other privacy laws) may restrict a recipient's discretion to disclose information relating to the emergency removal.

require dedication of personnel, time, and resources.[977] Because this provision does not prescribe specific post-removal challenge procedures, we do not believe recipients face significant burdens in training personnel to comply with new or unknown requirements; this provision ensures that the essential features of due process of law, or fundamental fairness, are provided to the respondent (*i.e.,* notice and opportunity to be heard), and we believe that recipients are already familiar with these basic requirements of due process (for public institutions) or fair process (for private institutions).

In response to commenters' clarification requests, the post-removal procedure may, but need not, utilize some or all the procedures prescribed in § 106.45, such as providing for collection and presentation of evidence. Nothing in § 106.44(c) or the final regulations precludes a recipient from placing the burden of proof on the respondent to show that the removal decision was incorrect. Section 106.44(c) does not preclude a recipient from using Title IX personnel trained under § 106.45(b)(1)(iii) to make the emergency removal decision or conduct a post-removal challenge proceeding, but if involvement with the emergency removal process results in bias or conflict of interest for or against the complainant or respondent, § 106.45(b)(1)(iii) would preclude such personnel from serving in those roles during a grievance process.[978] Facts and evidence relied on during an emergency removal decision and post-removal challenge procedure may be relevant in a § 106.45 grievance process against the respondent but would need to meet the requirements in § 106.45; for example, a witness who provided information to a postsecondary institution recipient for use in reaching an emergency removal decision would need to appear and be cross-examined at a live hearing under § 106.45(b)(6)(i) in order for the witness's statement to be relied on by the decision-maker.

Changes: None.

How OCR Will Enforce the Provision

Comments: Commenters requested clarification about how OCR would enforce § 106.44(c), including what standard OCR would use in deciding whether a removal was proper; whether OCR would only find a violation if the recipient violates § 106.44(c) with deliberate indifference; whether violating this provision constitutes a violation of Title IX; whether OCR would defer to the determination reached by the recipient even if OCR would have reached a different determination based on the independent weighing of the evidence; whether a harmless error standard would apply to OCR's evaluation of a proper removal decision and only require reversing the recipient's removal decision if OCR thinks the outcome was affected by a recipient's violation of § 106.44(c); and whether OCR, or the recipient, would bear the burden of showing the correctness or incorrectness of the removal decision or the burden of showing that any violation affected the outcome or not.

Discussion: OCR will enforce this provision fully and consistently with other enforcement practices. OCR will not apply a harmless error standard to violations of Title IX, and will fulfill its role to ensure compliance with Title IX and these final regulations regardless of whether a recipient's non-compliance is the result of the recipient's deliberate indifference or other level of intentionality. Recipients whose removal decisions fail to comply with § 106.44(c) may be found by OCR to be in violation of these final regulations. As discussed above, a recipient may need to undertake an emergency removal under § 106.44(c) in order to meet its duty not to be deliberately indifferent to sexual harassment. However, OCR will not second guess the decisions made under a recipient's exercise of discretion so long as those decisions comply with the terms of § 106.44(c). For example, OCR may assess whether a recipient's failure to undertake an individualized risk assessment was deliberately indifferent under § 106.44(a), but OCR will not second guess a recipient's removal decision based on whether OCR would have weighed the evidence of risk differently from how the recipient weighed such evidence. While not every regulatory requirement purports to represent a definition of sex discrimination, Title IX regulations are designed to make it more likely that a recipient does not violate Title IX's non-discrimination mandate, and the Department will vigorously enforce Title IX and these final regulations.

Changes: None.

Section 106.44(d) Administrative Leave

Comments: Some commenters expressed support for § 106.44(d), asserting that this provision appropriately recognizes that cases involving employees as respondents, especially faculty or administrative staff, should have different frameworks than cases involving students.

Some commenters asserted that it is unclear what standard a recipient must satisfy before it may place an employee on administrative leave. Commenters recommended giving discretion to an elementary and secondary school recipient to implement an alternate assignment (such as administrative reassignment to home) for staff during the pendency of an investigation, provided the same is otherwise permitted by law.

Commenters wondered how the Department defines ''administrative leave,'' whether § 106.44(d) applies to paid or unpaid leave, and whether that would depend on how existing recipient employee conduct codes or employment contracts address the issue of paid or unpaid leave. Commenters asked whether an employee-respondent placed on leave may collect back pay from the recipient, if the grievance process determines there was insufficient evidence of misconduct. One commenter argued that administrative leave must include pay and benefits, as well as lodging if the employee-respondent resided in campus housing.

One commenter asserted that treating non-student employees differently than students or student-employees under § 106.44(d) constitutes discrimination. Another commenter questioned why recipients can deny employees paychecks for months until the conclusion of a formal grievance process, but give immediate due process for students to challenge an emergency removal; the commenter asserted that the recipient could simply provide a free semester of college to cover any loss to a student yet the proposed rules do not require a recipient to give back pay to an employee. Some commenters argued that § 106.44(c) emergency removal requirements to undertake an individualized safety and risk analysis and provide notice and an opportunity to challenge should also apply to administrative leave so that employees receive the same due process protections as students. Commenters argued that school investigations can take several months and that being on leave, especially without pay, can be a severe hardship for many employees. Commenters asserted that the Department should explicitly require recipients to secure a removed employee's personal property and be responsible for any damage occurring to

[977] *See* discussion under the ''Spending Clause'' subsection of the ''Miscellaneous'' section of this preamble.

[978] Section 106.45(b)(1)(iii) requires all Title IX Coordinators, investigators, decision-makers, and persons who facilitate an informal resolution to be free from bias or conflicts of interest for or against complainants or respondents generally, or for or against any individual complainant or respondent.

the property before the removed employee can regain custody.

Commenters asserted that § 106.44(d) should apply to student-employee respondents and should be revised to limit the provision to administrative leave ''from the person's employment,'' so that a student-employee respondent could still have access to the recipient's educational programs but the recipient would not be forced to continue an active employment relationship with that respondent during the investigation. For example, commenters argued, a recipient should not be compelled to allow a teaching assistant who has been accused of sexual harassment to continue teaching while the accusations are being investigated.

Commenters argued that § 106.44(d) should reference disability laws that protect employees parallel to the references to disability laws in § 106.44(c).

Discussion: The Department appreciates the support from commenters for § 106.44(d), giving a recipient discretion to place respondents who are employees on administrative leave during the pendency of an investigation.

We acknowledge commenters' concerns that § 106.44(d) does not specify conditions justifying administrative leave; however, we desire to give recipients flexibility to decide when administrative leave is appropriate. If State law allows or requires a school district to place an accused employee on ''reassignment to home'' or alternative assignment, § 106.44(d) does not preclude such action while an investigation under § 106.45 into sexual harassment allegations against the employee is pending.

The Department does not define ''administrative leave'' in this provision, but administrative leave is generally understood as temporary separation from a person's job, often with pay and benefits intact. However, these final regulations do not dictate whether administrative leave during the pendency of an investigation under § 106.45 must be with pay (or benefits) or without pay (or benefits). With respect to the terms of administrative leave, recipients who owe obligations to employees under State laws or contractual arrangements may comply with those obligations without violating § 106.44(d). Similarly, these final regulations do not require back pay to an employee when the pending investigation results in a determination that the employee was not responsible. Further, this provision does not require a recipient to cover the costs of lodging for, or to secure the personal property of, an employee placed on administrative leave, although the final regulations do not preclude a recipient from taking such actions. We note that these final regulations similarly allow—but do not require—a recipient to repay a respondent for expenses incurred as a result of an emergency removal or to take actions to secure personal property during a removal under § 106.44(c) (whether the removed respondent was a student, or an employee). We also note that § 106.6(f) provides that nothing in this part may be read in derogation of an individual's rights, including an employee's rights, under Title VII [979] and that other laws such as Title VII may dictate whether administrative leave should be paid or unpaid and whether a respondent should be repaid for expenses incurred as a result of any of the recipient's actions.

The Department acknowledges that being placed on administrative leave—especially if the leave is without pay—may constitute a hardship for the employee. However, no respondent who is an employee may be kept on administrative leave indefinitely, because § 106.44(d) does not authorize administrative leave unless a § 106.45 grievance process has been initiated, and § 106.45(b)(1)(v) requires the grievance process to be concluded within a designated reasonably prompt time frame. As proposed in the NPRM, § 106.44(d) provided that a recipient may place a non-student employee respondent on administrative leave during the pendency of an investigation; this was intended to refer to an investigation conducted pursuant to the § 106.45 grievance process. To clarify this point, the Department replaces ''an investigation'' with ''a grievance process that complies with § 106.45'' in § 106.44(d) to make it clear that a recipient may place a non-student employee respondent on administrative leave during the pendency of a grievance process that complies with § 106.45. The Department also revised § 106.44(d) to provide that ''nothing in this subpart'' instead of ''nothing in this section'' precludes a recipient from placing a non-student employee respondent on administrative leave to clarify that § 106.44(d) applies to subpart D of Part 106 of Title 34 of the Code of Federal Regulations. This revision makes it clear that nothing in subpart D of Part 106 of Title, which concerns nondiscrimination on the basis of sex in education programs or activities receiving Federal financial assistance and which includes other provisions such as § 106.44 and § 106.45, precludes a recipient from placing a non-student employee respondent on administrative leave during the pendency of a grievance process that complies with § 106.45.

The Department appreciates commenters' suggestions that the same due process protections (notice and opportunity to challenge a removal) that apply to respondents under § 106.44(c) should apply to an employee placed on administrative leave under § 106.44(d). This is unnecessary, because § 106.44(c) applies to an emergency removal of *any* respondent. Any respondent (whether an employee, a student, or other person) who poses an immediate threat to the health or safety of any student or other individual may be removed from the recipient's education program or activity on an emergency basis, where an individualized safety and risk analysis justifies the removal. Thus, respondents who are employees receive the same due process protections with respect to emergency removals (*i.e.,* post-removal notice and opportunity to challenge the removal) as respondents who are students.

The Department also clarifies that pursuant to § 106.44(d), a recipient may place a non-student employee respondent on administrative leave, even if the emergency removal provision in § 106.44(c) does not apply. With respect to student-employee respondents, we explain more fully, below, that these final regulations do not necessarily prohibit a recipient from placing a student-employee respondent on administrative leave if doing so does not violate other regulatory provisions. For example, placing a student-employee respondent on administrative leave with pay may be permissible as a supportive measure, defined in § 106.30, for a complainant (for instance, to maintain the complainant's equal educational access and/or to protect the complainant's safety or deter sexual harassment) as long as that action meets the conditions that a supportive measure is not punitive, disciplinary, or unreasonably burdensome to the respondent. Whether a recipient considers placing a student-employee respondent on administrative leave as part of a non-deliberately indifferent response under § 106.44(a) is a decision that the Department will evaluate based on whether such a response is clearly

[979] For discussion of the revision to language in § 106.6(f) (*i.e.,* stating in these final regulations that nothing in this part may be read in derogation of *an individual's* rights instead of *an employee's* rights, under Title VII), see the ''Section 106.6(f) Title VII and Directed Question 3 (Application to Employees)'' subsection of the ''Clarifying Amendments to Existing Regulations'' section of this preamble.

unreasonable in light of the known circumstances. The Department will interpret these final regulations in a manner that complements an employer's obligations under Title VII, and nothing in these final regulations or in Part 106 of Title 34 of the Code of Federal Regulations may be read in derogation of any individual's rights, including any employee's rights, under Title VII, as explained in more detail in the ''Section 106.6(f) Title VII and Directed Question 3 (Application to Employees)'' subsection of the ''Clarifying Amendments to Existing Regulations'' section of this preamble.

Section 106.44(a) prohibits a recipient from imposing disciplinary sanctions against a respondent without following a grievance process that complies with § 106.45. Administrative leave without pay is generally considered disciplinary, and would likely be prohibited under § 106.44(a) in the absence of the § 106.44(d) administrative leave provision. The Department believes that while an investigation is pending, a recipient should have discretion to place an employee-respondent on any form of administrative leave the recipient deems appropriate, so that the recipient has flexibility to protect students from exposure to a potentially sexually abusive employee. Numerous commenters asserted that educator sexual misconduct is prevalent throughout elementary and secondary schools, and postsecondary institutions.[980] For these reasons, the final regulations permit, but do not require, what may amount to an interim suspension of an employee-respondent (*i.e.,* administrative leave without pay) even though the final regulations prohibit interim suspensions of student-respondents. We reiterate that any respondent may be removed on an emergency basis under § 106.44(c).

We do not believe that employees placed on administrative leave are denied sufficient due process under these circumstances, because in order for § 106.44(d) to apply, a § 106.45 grievance process must be underway, and that grievance process provides the respondent (and complainant) with clear, strong procedural protections designed to reach accurate outcomes, including the right to conclusion of the grievance process within the recipient's designated, reasonably prompt time frame. As previously explained, the Department revised § 106.44(d) to clarify that a recipient may place a non-student respondent on administrative leave during the pendency of a grievance process that complies with § 106.45.

Commenters erroneously asserted that because § 106.44(d) applies only to ''non-student employees,'' a recipient is always precluded from placing an employee-respondent on administrative leave if the employee is also a student. We decline to make § 106.44(d) apply to student-employees or to change this provision to specify that administrative leave is ''from the person's employment.'' Consistent with § 106.6(f), where an employee is not a student, we do not preclude a recipient-employer from placing a non-student employee on administrative leave during the pendency of a grievance process that complies with § 106.45. These final regulations do not prohibit a recipient from placing a student-employee respondent on administrative leave if doing so does not violate other regulatory provisions. As discussed above, placing a student-employee respondent on administrative leave with pay may be permissible as a supportive measure, defined in § 106.30, and may be considered by the recipient as part of the recipient's obligation to respond in a non-deliberately indifferent manner under § 106.44(a). Where a student is also employed by their school, college, or university, it is likely that the student depends on that employment in order to pay tuition, or that the employment is important to the student's academic opportunities. Administrative leave may jeopardize a student-employee's access to educational benefits and opportunities in a way that a non-student employee's access to education is not jeopardized. Accordingly, administrative leave is not always appropriate for student-employees. There may be circumstances that justify administrative leave with pay for student-employees, and the specific facts of a particular matter will dictate whether a recipient's response in placing a student-employee on administrative leave is permissible. For example, if a student-employee respondent works at a school cafeteria where the complainant usually eats, a recipient may determine that placing the student-employee respondent on administrative leave with pay, during the pendency of a grievance process that complies with § 106.45, will not unreasonably burden the student-employee respondent, or the recipient may determine that re-assigning the student-employee respondent to a different position during pendency of a § 106.45 grievance process, will not unreasonably burden the student-employee respondent. If a recipient places a party who is a student-employee on administrative leave with pay as a supportive measure, then such administrative leave must be non-disciplinary, non-punitive, not unreasonably burdensome, and otherwise satisfy the definition of supportive measures in § 106.30. With respect to a student-employee respondent, a recipient also may choose to take measures other than administrative leave that could constitute supportive measures for a complainant, designed to protect safety or deter sexual harassment without unreasonably burdening the respondent. For example, where an employee is also a recipient's student, it is likely that the recipient has the ability to supervise the student-employee to ensure that any continued contact between the student-employee respondent and other students occurs under monitored or supervised conditions (*e.g.,* where the respondent is a teaching assistant), during the pendency of an investigation. If a recipient removes a respondent pursuant to § 106.44(c) after conducting an individualized safety and risk analysis and determining that an immediate threat to the physical health or safety of any students or other individuals justifies removal, then a recipient also may remove a student-employee respondent from any employment opportunity that is part of the recipient's education program or activity.

The Department is persuaded by commenters who asserted that analogous disability protections should expressly apply for employee-respondents under § 106.44(d) as for respondents under the § 106.44(c) emergency removal provision. We have revised § 106.44(d) of the final regulations to state that this provision may not be construed to modify any rights under Section 504 or the ADA.

Changes: We have revised § 106.44(d) to clarify that it will not be construed to modify Section 504 or the ADA.[981] We also revised § 106.44(d) to clarify that nothing in subpart D of Part 106, Title 34 of the Code of Regulations, precludes

[980] *E.g.,* Charol Shakeshaft, *Educator Sexual Misconduct: A Synthesis of Existing Literature* (2004) (prepared for the U.S. Dep't. of Education) (ten percent of children were targets of educator sexual misconduct by the time they graduated from high school); National Academies of Science, Engineering, and Medicine, *Sexual Harassment of Women: Climate, Culture, and Consequences in Academic Sciences, Engineering, and Medicine* 61 (Frasier F. Benya *et al.* eds., 2018) (describing the prevalence of faculty-on-student sexual harassment at the postsecondary level).

[981] As discussed in the ''Section 106.6(f) Title VII and Directed Question 3 (Application to Employees)'' subsection of the ''Clarifying Amendments to Existing Regulations'' section of this preamble, we revised the reference to ''this section'' to ''this subpart'' in § 106.44(d).

a recipient from placing a non-student employee respondent on administrative leave during the pendency of a grievance process that complies with § 106.45.

Section 106.45 Recipient's Response to Formal Complaints

General Requirements for § 106.45 Grievance Process

Section 106.45(a) Treatment of Complainants or Respondents Can Violate Title IX

Comments: Commenters including students, professors, campus administrators, and attorneys, expressed appreciation and support for § 106.45(a). Some commenters asserted that § 106.45(a) is a welcome addition because in recent years, Federal judges have expressed concerns about how university treatment of respondents (or complainants) might run afoul of Title IX and contradict Title IX's promise of gender equity. Some commenters noted that although Federal courts have not assumed that all unfair procedures depriving respondents of a fair process necessarily equate to sex discrimination,[982] numerous Federal courts have identified plausible claims of an institutions' sex discrimination against respondents, and commenters cited Federal cases [983] where courts noted sex discrimination may exist where an institution failed to investigate evidence that the complainant might also have committed sexual misconduct in the same case, credited only female witnesses, ignored exonerating evidence because of preconceived notions about how males and females behave, used gender-biased training materials that portray only men as sexual predators or only women as victims, or denied the respondent necessary statistical information to test allegations of gender bias.

Other commenters gave examples of how they have observed sex-driven unfair treatment against respondents in campus Title IX proceedings. A few commenters pointed out that when a sexual harassment grievance process favors females over males in an attempt to be equitable to victims, the result is often that male victims of sexual harassment are not treated equitably; some commenters cited to statistics showing that similar percentages of men (5.3 percent) and women (5.6 percent) experience sexual violence other than rape each year,[984] that about 14 percent of reported rape cases involve men or boys, one in six reported sexual assaults is against a boy, one in 25 reported sexual assaults is against a man,[985] and that a survey of 27 colleges and universities revealed that 40.9 percent of undergraduate heterosexual males had experienced sexual harassment, intimate partner violence, or stalking, compared to 60.5 percent of undergraduate heterosexual females.[986] Some commenters opined that the Department's withdrawn 2011 Dear Colleague Letter contributed to more instances of universities applying grievance procedures in a sex-discriminatory manner (usually against respondents, who, commenters argued, are overwhelmingly male). At least one commenter supportive of § 106.45(a) cited a white paper by NCHERM cautioning colleges and universities to avoid applying grievance procedures in an unfair, biased manner (whether favoring complainants, or favoring the accused) and urging institutions to have balanced processes.[987] Several commenters, including attorneys and organizations with experience representing accused students, supported § 106.45(a) because although the provision only clarifies what is already the intent of the law, the provision is necessary to counter institutional bias in favor of female accusers and against male accused students, as both are entitled to equally fair procedures untainted by gender bias; one such commenter referred to § 106.45(a) as an ''essential corrective'' to gender bias that permeates campus sexual misconduct proceedings, and another believed that the provision will encourage schools to be more careful in how they treat both sides.

Discussion: The Department appreciates commenters' support for § 106.45(a) and acknowledges that many commenters have observed through personal experiences navigating campus sexual misconduct proceedings that some recipients have applied grievance procedures in a manner that shows discrimination against respondents on the basis of sex. We note that other commenters have recounted personal experiences navigating campus sexual misconduct proceedings perceived to be biased against complainants on the basis of sex. To the extent that such discriminatory practices occur, § 106.45(a) advises recipients against sex discriminatory practices during the grievance process and to avoid different treatment favoring or disfavoring any party on the basis of sex. However, to clarify that § 106.45(a) applies as much to complainants as to respondents, the final regulations revise the language in this provision but retain the provision's statement that how a recipient treats a complainant, or a respondent, ''may'' constitute sex discrimination under Title IX. The Department emphasizes that any person regardless of sex may be a victim or perpetrator of sexual harassment and that different treatment due to sex-based stereotypes about how men or women behave with respect to sexual violence violates Title IX's non-discrimination mandate.

Changes: The final regulations revise § 106.45(a) to state more clearly that treatment of a complainant or respondent may constitute sex discrimination in violation of Title IX.

Comments: Some commenters opposed § 106.45(a), claiming that this provision would harbor perpetrators by permitting them to claim a Title IX violation even if the recipient merely opens an investigation into their conduct, and would revictimize and retraumatize survivors. Some commenters argued that this provision operates from a premise of false equivalency since the respondent is not involved in the process on the basis of their sex but rather on the basis of their

[987] Commenters cited: National Center for Higher Education Risk Management (NCHERM), *White Paper: Due Process and the Sex Police* 14–15 (2017) (''There are always unintended consequences to showing favoritism. If a college is known to be biased toward responding parties, this can chill the willingness of victims/survivors to report. If a college is known to be biased toward reporting parties, a victim/survivor's sense of safety or justice based on the campus outcome in the short run may be quickly compromised by a court order or lawsuit reinstating the responding party, giving her a Pyrrhic victory, at best. What is needed for all of our students is a balanced process that centers on their respective rights while showing favoritism to neither. Not only is that best, it is required by law.'').

alleged behavior whereas the complainant alleges to have suffered Title IX sexual harassment (discrimination on the basis of sex). Some commenters argued that a recipient's treatment of the respondent does not constitute discrimination on the basis of sex under Title IX unless sex bias was a factor and therefore the Department lacks authority to issue a regulation that equates unfair treatment of a respondent with sex discrimination. Other commenters contended that Title IX [988] does not include the grievance process prescribed in these final regulations and does not address the conduct of school officials implementing a grievance process, and that the Department has no authority to create new individual rights under Title IX. At least one commenter argued that the purpose of § 106.45(a) appears to be justifying the entirety of the Department's prescribed grievance process (which the commenter argued is characterized by rape exceptionalism with many provisions designed to benefit only respondents) by wrongfully characterizing procedural protections for respondents as needed to avoid sex discrimination. Another commenter argued that § 106.45(a) turns Title IX on its head by making respondents accused of sexual harassment into a protected class, enabling respondents to make a sex discrimination claim for any deviation from the § 106.45 grievance process requirements while complainants would need to show deliberate indifference to claim sex discrimination.

Some commenters asserted that this provision hamstrings recipients excessively and that the provision is fundamentally unfair to survivors. Some commenters argued that the provision grants respondents the right to sue for sex discrimination under Title IX and contended that fear of respondent litigation causes recipients to deprive complainants of due process and fair procedures by, for example, giving respondents access to information or accommodations not given to the complainant or to deliberately mislead the complainant about the investigation. One commenter characterized § 106.45(a) as giving an ''unsubstantiated right of action for respondents under Title IX'' that will cause ''risk-averse universities to fail to investigate properly, and that schools and university legal counsel will be incentivized to never find in a survivor's favor, even when the facts clearly indicate that sexual violence occurred,'' leading to more complainants suing recipients privately under Title IX just to force institutions to treat complainants equally. This concern was echoed by a few commenters who argued that this provision would cause institutions to ignore reports and refuse to punish perpetrators for fear of respondent lawsuits.

Other commenters characterized § 106.45(a) as purporting to consider the treatment of the respondent as equally violating Title IX as the alleged behavior (sexual violence) prompting the Title IX case in the first place, while another commenter believed this provision meant that unfair treatment of a respondent constituted sexual harassment. A few commenters argued that § 106.45(a) unnecessarily risks incentivizing institutions to treat survivors unfairly, because respondents already have legal theories (such as violation of due process and breach of contract) with which to challenge unfair discipline, and Federal courts [989] have appropriately made it difficult for respondents to successfully challenge unfair discipline as sex discrimination, either on an erroneous outcome or selective enforcement theory—a result that would be undermined by § 106.45(a) giving respondents new rights to pursue unfair discipline claims under the auspices of Title IX.

One commenter, a Title IX Coordinator, stated that § 106.45(a) seems unnecessary because typically both parties are members of the recipient's community and the recipient should not discriminate against any member of its community. One commenter opposed § 106.45(a) because it tells male students they have been victimized and gives male students more incentive to gratify themselves at the expense of a woman's education. One commenter argued that if stating that a recipient's treatment of a party in sexual harassment proceedings ''may'' constitute sex discrimination is sufficient to justify the Department regulating extensive grievance procedures in sexual harassment cases, there is no end to the Department's authority, on the same reasoning, to regulate any other type of interaction between a school and its students or employees, since any action taken by a recipient ''may'' constitute sex discrimination.

Some commenters suggested modifications in language including to specify that a recipient's response to a complaint may constitute sex discrimination where: The recipient deprives a respondent of access to education based on sex stereotypes or by using procedures that discriminate on the basis of sex; the recipient acts with deliberate indifference; by a reasonable and objective standard, the ''treatment'' is sufficiently severe or pervasive so as to interfere with a student's educational opportunities and/or create a hostile work environment; there is evidence of discriminatory application of Title IX or acts of retaliation; the recipient uses investigatory or other acts to mistreat (or not adequately treat well) the respondent. Another commenter asserted that § 106.45(a) should specify that programs funded by the U.S. Department of Justice's Office on Violence Against Women (OVW) must comply with these final regulations. Another commenter argued that § 106.45 should consider that when in doubt, the recipient may err on side of releasing information in order to avoid liability under these final regulations.

Discussion: The Department disagrees with commenters who believed that § 106.45(a) would harbor perpetrators and revictimize or retraumatize survivors by permitting respondents to claim a Title IX violation based on a recipient's opening of an investigation into alleged sexual harassment. This provision does not declare that actions toward a respondent (or complainant) *do* constitute sex discrimination in violation of Title IX, but states only that treatment of a respondent (or treatment of a complainant) *may* constitute sex discrimination. Title IX prohibits sex discrimination against all individuals on the basis of the protected characteristic (sex), and § 106.45(a) advises recipients to be aware that taking action with respect to either party in a grievance process resolving allegations of sexual harassment may not be done in a sex discriminatory manner. This provision operates to protect complainants and respondents equally, irrespective of sex, by emphasizing to recipients that although a grievance process takes place in the context of resolving allegations of one type of sex discrimination (sexual harassment), a recipient must take care not to treat a party differently on the basis of the party's sex because to do so

would inject further sex discrimination into the situation. For example, a recipient's decision to investigate sexual harassment complaints brought by women but not by men may constitute sex discrimination in the context of a sexual harassment grievance process; similarly, a recipient's practice of imposing a sanction of expulsion on female respondents found responsible for sexual harassment, but suspension on male respondents found responsible, may constitute sex discrimination.

The Department acknowledges that the text of the Title IX statute does not specify grievance procedures for resolving allegations of sexual harassment. However, at the time Title IX was enacted in 1972, Federal courts had not yet addressed sexual harassment as a form of sex discrimination, but the Supreme Court's *Gebser/Davis* framework explicitly interpreted Title IX's non-discrimination mandate to include sexual harassment as a form of sex discrimination. Since 1975 the Department's Title IX regulations have required recipients to adopt and publish ''grievance procedures'' for the prompt and equitable resolution of complaints that recipients are committing sex discrimination against students or employees.[990] The Department's authority to enforce such regulations has been acknowledged by the Supreme Court.[991] The Department has determined that current regulatory reference to ''grievance procedures'' that are ''prompt and equitable'' does not adequately prescribe a consistent, fair, reliable grievance process for resolving allegations of Title IX sexual harassment; in accordance with the Department's regulatory authority under Title IX, the final regulations now set forth a grievance process for resolving formal complaints raising allegations of sexual harassment.

The Department disagrees that § 106.45(a) turns Title IX on its head or creates a new protected class (respondents); this provision focuses on the central purpose of Title IX, to provide protections from sex-discriminatory practices to all persons, acknowledging that the ways in which complainants and respondents are treated must not be affected by the sex of a person even though the underlying allegations involve allegations of a type of sex discrimination (sexual harassment) that make it tempting for recipients to intentionally or unintentionally allow sex-based biases, stereotypes, and generalizations to influence how procedures are applied. Partly in response to commenters' misapprehension that § 106.45(a) allows respondents—but not complainants—to claim sex discrimination whenever a requirement in § 106.45 is not met, the final regulations permit either party equally to appeal a determination regarding responsibility on the basis of procedural irregularity.[992] Similarly, either party believing a recipient failed to follow the § 106.45 grievance process could file a complaint with OCR that could result in the Department requiring the recipient to come into compliance with § 106.45, regardless of whether the violation of § 106.45 also amounted to deliberate indifference (as to a complainant) or otherwise constituted sex discrimination (as to a respondent). A violation of § 106.45 need not, and might not necessarily, constitute sex discrimination, whether the violation disfavored a complainant or a respondent. Thus, § 106.45(a) does not create a special protection for respondents or special burden for complainants with respect to allegations that a recipient failed to comply with the § 106.45 grievance process.

For similar reasons, the Department disagrees that § 106.45(a) in any way ''hamstrings'' recipients into catering to respondents' interests or permits recipients to ignore complainants or treat complainants unfavorably out of fear of being sued by respondents. Rather, § 106.45(a) reminds recipients that Title IX requires recipients to avoid bias, prejudice, or stereotypes based on sex whether the recipient's intent is to favor or disfavor complainants or respondents. As to commenters' concerns that out of fear of respondent lawsuits recipients will, for example, give respondents access to information or accommodations not given to the complainant or deliberately mislead the complainant about the investigation, the Department notes that such actions likely will either violate specific provisions of § 106.45 (*e.g.,* § 106.45(b)(5)(vi) requires the parties to have equal opportunity to inspect and review evidence) or constitute the very treatment against a complainant that § 106.45(a) cautions against. For reasons discussed in the ''General Support and Opposition for the § 106.45 Grievance Process'' section of this preamble, the Department disputes that the § 106.45 grievance process is premised on rape exceptionalism. The prescribed grievance process is tailored to resolve allegations of sexual harassment that constitute sex discrimination under a Federal civil rights law, not to adjudicate criminal charges; the fact that resolution of sexual harassment under Title IX requires, in the Department's judgment, a consistent, predictable grievance process in no way implies that a ''special'' process is needed due to rape myths or sex-based generalizations (such as, ''women lie about rape''). The § 106.45 grievance process does not prioritize respondent's rights over those of complainants. Rather, § 106.45 contains important procedural protections that apply equally to both parties with three exceptions: One provision that treats complainants and respondents equitably instead of equally (by recognizing a complainant's interest in a recipient providing remedies, and a respondent's interest in disciplinary sanctions imposed only after a recipient follows a fair process);[993] one provision that applies only to respondents (a presumption of non-responsibility until conclusion of a fair process);[994] and one provision that applies only to complainants (protection from questions and evidence regarding sexual history).[995]

The Department is aware that in private lawsuits brought under Title IX, Federal courts have been reluctant to equate unfair treatment of a respondent during a sexual misconduct disciplinary proceeding with sex discrimination unless the respondent can show that the unfair treatment was motivated by the party's sex. Contrary to commenters' assertions, § 106.45(a) does not assume that any unfair treatment constitutes sex discrimination, but does caution recipients that treatment of any party could constitute sex discrimination. In this way, § 106.45(a) shields parties (both complainants and respondents) from recipient actions during the grievance process that are impermissibly motivated by sex-based bias or stereotypes in violation of Title IX's non-discrimination mandate. However, as discussed above, this does not mean that every violation of § 106.45 necessarily equates to sex discrimination. The Department disagrees that § 106.45(a) purports to consider treatment of a respondent during a grievance process as the same type of behavior that prompted the respondent to become a respondent in the first place (*e.g.,* alleged sexual misconduct), or that this provision equates unfair discipline with sexual harassment. The Department appreciates the opportunity to clarify

[990] 34 CFR 106.8(b).

[995] Section 106.45(b)(6)(i)–(ii).

that when a respondent is treated differently based on sex during a grievance process designed to resolve allegations that the respondent perpetrated sexual harassment, the sex-based treatment of the respondent violates Title IX's non-discrimination mandate in a different way than sexual harassment does when sexual harassment constitutes sex discrimination under Title IX. Title IX prohibits different treatment on the basis of sex, which § 106.45(a) acknowledges may occur against respondents or complainants in violation of Title IX. Title IX also requires recipients to respond appropriately to allegations of sexual harassment, because sexual harassment constitutes a particular form of sex discrimination. The Department also appreciates the opportunity to clarify that the Department does not draw an equivalency among different types of sex discrimination prohibited under Title IX, and recognizes that when sex discrimination takes the form of sexual harassment victims often face trauma and negative impacts unique to that particular form of sex discrimination; indeed, it is this recognition that has prompted the Department to promulgate legally binding regulations governing recipients' response to sexual harassment rather than continuing to rely on guidance documents that lack the force and effect of law.

The Department disagrees with commenters who argued that § 106.45(a) is unnecessary because respondents already have non-Title IX legal theories on which to challenge unfair discipline and have erroneous outcome and selective enforcement theories with which to challenge unfair discipline under Title IX. While it is true that respondents have relied on such theories to pursue private lawsuits, similarly complainants already have a judicially implied private right of action under Title IX to sue a recipient for being deliberately indifferent to a complainant victimized by sexual harassment. The existence of private rights of action under Title IX, or under other laws, does not obviate the importance of the Department using its statutory authorization to effectuate the purposes of Title IX through administrative enforcement by promulgating regulations designed to provide individuals with effective protections against discriminatory practices. Indeed, in the final regulations some requirements intended to protect against sex discrimination apply only to the benefit of complainants (*e.g.,* § 106.44(a) has been revised to require as part of a non-deliberately indifferent response that recipients notify complainants of the availability of supportive measures with or without the filing of a formal complaint, offer supportive measures to the complainant, and explain to complainants the process for filing a formal complaint) while other provisions aim to ensure protections against sex discrimination for both complainants and respondents (*e.g.,* § 106.45(a)). The Department has administrative authority to enforce such provisions, whether or not Federal courts would impose the same requirements under a complainant's or respondent's private Title IX lawsuit.

The Department agrees with the commenter who asserted that recipients should not discriminate against any member of the recipient's community but maintains that § 106.45(a) is not rendered unnecessary by that belief. The Department disagrees that § 106.45(a) conveys to male students that being treated unfairly in the grievance process gives license to perpetrate sexual misconduct against women; while a recipient must treat a respondent in a manner free from sex discrimination and impose discipline only after following a fair grievance process, those restrictions in no way encourage or incentivize perpetration of sexual misconduct and in fact help ensure that sexual misconduct, where reliably determined to have occurred, is addressed through remedies for victims and disciplinary sanctions for perpetrators.

The Department understands the commenter's concern that § 106.45(a) could be misunderstood to justify the Department regulating any facet of a recipient's interaction with students and employees because in any circumstance a recipient ''may'' act in a sex-biased manner. The Department appreciates the opportunity to clarify that § 106.45(a) is necessary in the context of sexual harassment because allegations of such conduct present an inherent risk of sex-based biases, stereotypes, and generalizations permeating the way parties are treated, such that a consistent, fair process applied without sex bias to any party is needed.

The Department's authority to promulgate regulations under Title IX encompasses regulations to effectuate the purpose of Title IX, and as commenters acknowledged, one of the two main purposes of Title IX is providing individuals with protections against discriminatory practices.[996] Implementation of a grievance process for resolution of sexual harassment lies within the Department's statutory authority to regulate under Title IX,[997] and § 106.45(a) is a provision designed to protect all individuals involved in a sexual harassment situation from sex discriminatory practices in the context of a grievance process to resolve formal complaints of sexual harassment. Thus, § 106.45, and paragraph (a) in particular, does not create new individual rights but rather prescribes procedures designed to protect the rights granted all persons under Title IX to be free from sex discrimination with respect to participation in education programs or activities.

The Department notes that nothing about § 106.45(a) creates or grants respondents (or complainants) rights to file private lawsuits, whether under Title IX or otherwise. Title IX does not contain an express private right of action, but the Supreme Court has judicially implied such a right.[998] In *Gebser,* the Supreme Court declined to allow petitioner to seek damages in a private suit under Title IX for the school's alleged failure to have a grievance procedure as required under Department regulations because ''failure to promulgate a grievance procedure does not itself constitute 'discrimination' under Title IX.'' [999] The Court continued, ''Of course, the Department of Education could enforce the requirement administratively: Agencies generally have authority to promulgate and enforce requirements that effectuate the statute's non-discrimination mandate, 20 U.S.C. 1682, even if those requirements do not purport to represent a definition of discrimination under the statute.'' [1000] Thus, the Department's exercise of administrative enforcement authority does not grant new rights to respondents (or complainants) who pursue remedies against recipients in private lawsuits under Title IX.

The Department appreciates commenters' suggestions for modifications to this provision, but declines to add modifiers or qualifiers that would further describe how and when a recipient's treatment of a complainant or respondent might constitute sex discrimination. In the interest of retaining the broad intent of Title IX's non-discrimination mandate, § 106.45(a) in the final regulations begins the entirety of a Title IX sexual harassment grievance process under

[996] *Cannon* v. *Univ. of Chicago,* 441 U.S. 677, 704 (1979).

§ 106.45 by advising recipients to avoid treatment of any party in a manner that discriminates on the basis of sex. The § 106.45 grievance process leaves recipients with significant discretion to adopt procedures that are not required or prohibited by § 106.45, including, for example, rules designed to conduct hearings in an orderly manner respectful to all parties. Section 106.45(a) emphasizes to recipients that such rules or practices that a recipient chooses to adopt must be applied without different treatment on the basis of sex. To reinforce the importance of treating complainants and respondents equally in a grievance process, the final regulations also revise the introductory sentence of § 106.45(b) to indicate that any grievance process rules a recipient chooses to adopt (that are not already required under § 106.45) must treat the parties equally. Together with § 106.45(a), this modification emphasizes, for the benefit of any person involved in a Title IX grievance process, that recipients must treat both parties equally and without regard to sex.

The Department declines to specify what programs (including those funded by OVW grants) must comply with this provision; questions about application of Title IX to individual recipients may be submitted to the recipient's Title IX Coordinator, the Assistant Secretary, or both, under § 106.8(b)(1). The Department disagrees with the commenter who suggested that § 106.45(a) will cause a recipient to err on the side of releasing information or increase a recipient's fear of retaliation; however, in response to many comments concerning confidentiality and retaliation, the final regulations include § 106.71 prohibiting retaliation and specifying that the recipient must keep confidential the identity of any individual who has made a report or complaint of sex discrimination, including any individual who has made a report or filed a formal complaint of sexual harassment, any complainant, any individual who has been reported to be the perpetrator of sex discrimination, any respondent, and any witness, except as may be permitted by FERPA, required by law, or as necessary to conduct the grievance process, and providing that complaints alleging retaliation may be filed according to the prompt and equitable grievance procedures for sex discrimination that recipients must adopt under § 106.8(c).

Changes: We are adding § 106.71, prohibiting retaliation and specifying that the recipient must keep confidential the identity of any individual who has made a report or complaint of sex discrimination, including any individual who has made a report or filed a formal complaint of sexual harassment, any complainant, any individual who has been reported to be the perpetrator of sex discrimination, any respondent, and any witness, except as may be permitted by the FERPA statute or regulations, 20 U.S.C. 1232g and 34 CFR part 99, or required by law, or to carry out the purposes of 34 CFR part 106, and providing that complaints alleging retaliation may be filed according to the grievance procedures for sex discrimination that recipients must adopt under § 106.8(c). We are revising § 106.45(b)(8) regarding appeals, to expressly permit both parties equally to appeal a determination regarding responsibility on the basis of procedural irregularity. We are revising the introductory sentence of § 106.45(b) to state that any rules a recipient chooses to adopt (that are not required under § 106.45) must apply equally to both parties.

Section 106.45(b)(1)(i) Equitable Treatment of Complainants and Respondents

Comments: Many commenters expressed support for § 106.45(b)(1)(i). Some commenters asserted that this provision rectifies sex discrimination against males that has occurred in recipients' Title IX campus proceedings.[1001] Other commenters stated that this provision advances Title IX's goal of due process-type fundamental fairness to both complainants and respondents alike by balancing the scales. One commenter supported this provision because, in the commenter's view, too many institutions view allegations as ''self-proving.'' At least one commenter approved of this provision as being consistent with existing § 106.8 requiring ''prompt and equitable'' resolution of sex discrimination complaints. Another commenter asserted that § 106.45(b)(1)(i) is consistent with our Nation's fundamental values that persons accused of serious misconduct should receive notice and a fair hearing before unbiased decision makers, and a presumption of innocence. Another commenter supported this provision because everyone on campus benefits from fundamentally fair proceedings. One commenter called this provision a ''welcome change'' because, in the commenter's view, accused students at institutions of higher education have had a difficult time restoring their reputations after the institution removes the accused student before a fair determination of the truth of the allegations.

Discussion: The Department appreciates commenters' support for this provision. The Department agrees that a fair process benefits both parties, and recipients, by leading to reliable outcomes and increasing the confidence that parties and the public have regarding Title IX proceedings in schools, colleges, and universities. The Department also agrees with the commenter who noted that this provision is consistent with the principle underlying existing § 106.8 wherein recipients have long been required to have ''prompt and equitable'' grievance procedures for handling sex discrimination complaints. The purpose of § 106.45(b)(1)(i) is to emphasize the importance of treating complainants and respondents equitably in the specific context of Title IX sexual harassment, by drawing a recipient's attention to the need to provide remedies to complainants and avoid punishing respondents prior to conclusion of a fair process. As discussed in the ''Role of Due Process in the Grievance Process'' section of this preamble, the § 106.45 grievance process generally treats both parties equally, and § 106.45(b)(1)(i) is one of the few exceptions to strict equality where equitable treatment of the parties requires recognizing that a complainant's interests differ from those of a respondent with respect to the purpose of the grievance process. This is intended to provide both parties with a fair, truth-seeking process that reasonably takes into account differences between a party's status as a complainant, versus as a respondent. Thus, with respect to remedies and disciplinary sanctions, strictly equal treatment of the parties does not make sense, and to treat the parties equitably, a complainant must be provided with remedies where the outcome shows the complainant to have been victimized by sexual harassment; similarly, a respondent must be sanctioned only after a fair process has determined whether or not the respondent has perpetrated sexual harassment.

Changes: None.

Comments: Some commenters objected to § 106.45(b)(1)(i) on the ground that it reinforces the approach of the overall grievance process that commenters believed requires a complainant to undergo a protracted, often traumatic investigation

[1001] Commenters cited, for example: Jeannie Suk Gersen, *The Transformation of Sexual-Harassment Law Will Be Double-Faced,* The New Yorker (Dec. 20, 2017); American Association of University Women Educational Foundation, *Drawing the Line: Sexual Harassment on Campus* (2005).

necessitating continuous interrogation of the complainant, all while forcing the complainant to continue seeing the respondent on campus because the respondent is protected from removal until completion of the grievance process; some of these commenters asserted that this will chill reporting.

Some commenters opposed this provision on the ground that it aims to treat victims and perpetrators as equals, which is inappropriate because a victim has suffered harm inflicted by a perpetrator, placing them in inherently unequal positions of power; some of these commenters expressed particular concern that this dynamic perpetuates the status quo where teachers accused of harassing students are believed because of their position of authority.

Some commenters claimed that by being gender-neutral this provision makes campuses and Title IX proceedings an unsafe space for victims and is biased against women because it reflects obsolete and unfounded assumptions about sexual harassment and sexual violence and perpetuates harm against women and vulnerable populations. At least one such commenter urged the Department to instead adopt a feminist model that supports the healing of survivors of gender-based violence, prevents revictimization following assault, and seeks to restore power and control the survivor has lost.[1002]

Discussion: The Department believes that § 106.45(b)(1)(i) reflects the critical way in which that a recipient must, throughout a grievance process, treat the parties equitably. The Department disagrees that the final regulations require complainants to undergo protracted, traumatic investigations or necessarily require complainants to interact with respondents on campus while a process is pending. The final regulations require a recipient to offer supportive measures to a complainant with or without the filing of a formal complaint triggering the grievance process.[1003] The final regulations have removed proposed § 106.44(b)(2) and revised the § 106.30 definition of ''complainant'' such that in combination, those revisions ensure that the final regulations do not require a Title IX Coordinator to initiate a grievance process over the wishes of a complainant, and never require a complainant to become a party or to participate in a grievance process.[1004] In these ways, the final regulations respect the autonomy of survivors to choose whether to participate in a grievance process, while ensuring that regardless of that choice, survivors are entitled to supportive measures. Although supportive measures must be non-punitive and non-disciplinary (to any party) and cannot unreasonably burden the other party,[1005] supportive measures do allow complainants options with respect to changes in class schedules or housing re-assignments even while a grievance process is still pending, or where no formal complaint has initiated a grievance process. Moreover, § 106.44(c) permits a recipient to remove a respondent from the recipient's education program or activity without undergoing a grievance process, where an individualized risk assessment shows the respondent poses a threat to any person's physical health or safety, so long as the respondent is afforded post-removal notice and opportunity to challenge the removal decision. The final regulations thus effectuate the purpose of Title IX to provide protection for complainants, while ensuring that a fair process is used to generate a factually reliable resolution of sexual harassment allegations before a respondent is sanctioned based on such allegations. To clarify that the § 106.30 definition of ''supportive measures'' gives recipients wide latitude to take actions to support a complainant, even while having to refrain from imposing disciplinary sanctions against the respondent, we have added to § 106.45(b)(1)(i) the phrase ''or other actions that are not supportive measures as defined in § 106.30.'' [1006] Even where supportive measures, emergency removal where appropriate, the right of both parties to be accompanied by an advisor of choice,[1007] and other provisions intended to ease the stress of a formal process may result in a complainant finding the process traumatizing,[1008] the Department maintains that allegations of sexual harassment must be resolved accurately in order to ensure that recipients remedy sex discrimination occurring in education programs or activities.

The Department disagrees that treating parties equally throughout the grievance process, and recognizing specific ways in which complainants and respondents must be treated equitably under § 106.45(b)(1)(i), inappropriately attempts to place victims and perpetrators on equal footing without recognizing that victims are suffering from a perpetrator's conduct. The Department recognizes that a variety of power dynamics can affect perpetration and victimization in the sexual violence context, including differences in the sex, age, or positions of authority of the parties. The Department believes that a fair process provides procedural tools to parties that can counteract situations where a power imbalance led to the alleged incident. By providing both parties with strong, clear procedural rights—including the right to an advisor of choice to assist a party in navigating the process—a party perceived as being in a weaker position has the same rights as the party perceived as having greater power (perhaps due to sex, age, or a position of authority over the other party), and the process is more likely to generate accurate determinations about what occurred between the parties.

The Department disagrees with commenters who criticized this provision (and the overall approach of the final regulations) for being gender-neutral. Title IX's non-discrimination mandate benefits ''persons'' without regard to sex.[1009] The Department believes that Title IX's non-discrimination mandate is served by an approach that is neutral with respect to sex. The Department notes that applying a sex-neutral framework does not imply

[1002] Commenters cited: Tara N. Richards *et al., A feminist analysis of campus sexual assault policies: Results from a national sample,* 66 Family Relations 1 (2017) (criticizing gender-neutral policy approaches because ''In gender-neutral advocacy, policies and practices are uniformly applied and do not take gender dynamics into consideration, thus increasing the risk of victim-blaming attitudes and adherence to myths about rape and other forms of gendered violence'').

[1003] Section 106.44(a) (further requiring the Title IX Coordinator to contact each complainant to discuss the availability of supportive measures with or without a formal complaint, consider the complainant's wishes regarding supportive measures, and explain to the complainant the process for filing a formal complaint).

[1004] Section 106.71 (prohibiting retaliation for the purpose of interfering with any right under Title IX, including the right to refuse to participate in a Title IX proceeding).

[1005] Section 106.30 (defining ''supportive measures'').

[1006] Section 106.45(b)(1)(i), stating that equitable treatment of the parties means following a § 106.45 grievance process before imposing disciplinary sanctions or other actions that are not ''supportive measures'' as defined in § 106.30, and remedies for a complainant whenever a respondent is determined to be responsible, is mirrored in § 106.44(a), which requires equitable treatment of respondents in the same manner and (because no grievance process is required for a recipient's response obligations under § 106.44 to be triggered) equitable treatment of complainants by offering supportive measures.

[1007] Section 106.45(b)(5)(iv).

[1008] *E.g.,* § 106.45(b)(6)(i) (either party has the right to undergo a live hearing and cross-examination in a separate room, and this provision deems irrelevant any questions or evidence regarding a complainant's sexual predisposition (without exception) and any questions or evidence about a complainant's sexual behavior with two exceptions).

[1009] 20 U.S.C. 1681(a) (''No person in the United States shall, on the basis of sex . . .'').

that recipients cannot gain understanding about the dynamics of sexual violence including particular impacts of sexual violence on women or other demographic groups—but such background knowledge and information cannot be applied in a way that injects bias or lack of impartiality into a process designed to resolve particular allegations of sexual harassment. Contrary to some commenters' concerns, sex-neutrality in the grievance process helps prevent the very kind of victim-blaming and rape myths that have improperly affected responses to females, and does so in a manner that also prevents improper injection of sex-bias against males. A sex-neutral approach is also the only approach that appropriately prohibits generalizations about ''women as victims'' and ''men as perpetrators'' from improperly affecting an objective evaluation of the facts surrounding each particular allegation and emphasizes for students and recipients the fact that with respect to sexual harassment, any person can be a victim and any person can be a perpetrator, regardless of sex.

Changes: We have revised § 106.45(b)(1)(i) to include the phrase ''or other actions that are not supportive measures as defined in § 106.30'' in addition to disciplinary sanctions, to describe equitable treatment of a respondent during a grievance process.

Comments: Some commenters characterized this provision as a ''weak'' attempt to restore or preserve a complainant's access to education without sufficiently acknowledging that often, sexual harassment causes a complete or total denial of access for the victim (for example, where a victim drops out of school entirely).[1010] Some commenters viewed this provision's description of remedies for a complainant as too narrow because such remedies must be ''designed to restore or preserve access'' to the recipient's education program or activity. At least one commenter understood the phrase ''designed to restore or preserve access'' to forbid a recipient from imposing a disciplinary sanction on a respondent unless the sanction itself is designed to restore or preserve access to education. At least one commenter suggested adding the word ''equal'' before ''access'' in this provision to align this provision with the ''equal access'' language used in § 106.30 defining sexual harassment. A few commenters urged the Department to add a list of possible remedies for complainants including counseling, supportive services, and training for staff. At least one commenter suggested that remedies for a complainant must actually restore or preserve the complainant's access to education and so proposed deleting ''designed to'' from this provision.

Discussion: The Department believes that § 106.45(b)(1)(i) provides a strong, clear requirement for the benefit of victims of sexual harassment: Where a § 106.45 grievance process results in a determination that the respondent in fact committed sexual harassment against the complainant, the complainant must be given remedies. The Department understands that research shows that sexual harassment victims drop out of school more often than other students, and in an effort to prevent that loss of access to education, this provision mandates that recipients provide remedies. In response to commenters concerned that the description of remedies is too narrow or unclear, the final regulations revise this provision. This provision now uses the phrase ''equal access'' rather than simply ''access,'' in response to commenters who pointed out that ''equal access'' is the phrase used in § 106.30 defining sexual harassment. Further, the final regulations substitute ''determination of responsibility'' for ''finding of responsibility,'' out of caution that this provision's use of ''finding'' instead of ''determination'' (when the latter is used elsewhere throughout the proposed rules) caused a commenter's confusion between remedies for a complainant (which are designed to restore the complainant's equal access to education) versus disciplinary sanctions against a respondent (which are not designed to restore a respondent's access to education). Moreover, the final regulations revise § 106.45(b)(1)(i) to state that remedies may consist of the same individualized services listed illustratively in § 106.30 as ''supportive measures'' but remedies need not meet the limitations of supportive measures (*i.e.,* unlike supportive measures, remedies may in fact burden the respondent, or be punitive or disciplinary in nature). The Department believes that this additional language in the final regulations obviates the need to repeat a non-exhaustive list of possible remedies and gives recipients and complainants additional clarity about the kind of remedies available to help restore or preserve equal educational access for victims of sexual harassment.

The Department declines to remove ''designed to'' from this provision. Sexual harassment can cause severe trauma to victims, and while Title IX obligates a recipient to respond appropriately when students or employees are victimized with measures aimed at ensuring a victim's equal access, the Department does not believe it is reasonable to hold recipients accountable for situations where despite a recipient's reasonably designed and implemented remedies, a victim still suffers loss of access (for example, by dropping out) due to the underlying trauma. We have also added § 106.45(b)(7)(iv) requiring Title IX Coordinators to be responsible for the ''effective implementation'' of remedies to clarify that the burden of effectively implementing the remedies designed to restore or preserve the complainant's equal access to education rests on the recipient and must not fall on the complainant.

The Department acknowledges that the 2001 Guidance discussed corrective action in terms of both remedying effects of the harassment on the victim and measures that end the harassment and prevent its recurrence.[1011] For reasons described in the ''Deliberate Indifference'' subsection of the ''Adoption and Adaption of the Supreme Court's Framework to Address Sexual Harassment'' section of this preamble, the Department believes that remedies designed to restore and preserve equal access to the recipient's education programs or activities is the appropriate focus of these final regulations, and a recipient's selection and implementation of remedies will be evaluated by what is not clearly unreasonable in light of the known circumstances.[1012] The Department is persuaded by the Supreme Court's rationale in *Davis* that courts (and administrative agencies) should not second guess a school's disciplinary decisions, and the Department desires to avoid creating regulatory rules that effectively dictate particular disciplinary sanctions that obligate recipients to attempt to guarantee that sexual harassment does not recur, instead focusing on whether a recipient is effectively implementing remedies to complainants where respondents are

[1010] Many commenters cited: Cecilia Mengo & Beverly M. Black, *Violence Victimization on a College Campus: Impact on GPA and School Dropout,* 18 Journal of Coll. Student Retention: Research, Theory & Practice 2, 234, 244 (2015), for the proposition that survivors drop out of school at higher rates than non-survivors.

[1011] 2001 Guidance at 10 (stating that where the school has determined that sexual harassed occurred, ''The recipient is, therefore, also responsible for remedying any effects of the harassment on the victim, as well as for ending the harassment and preventing its recurrence.'').

[1012] Recipients must also document their reasons for concluding that the recipient's response to sexual harassment was not deliberately indifferent, under § 106.45(b)(10).

found responsible for sexual harassment.

Changes: The final regulations revise § 106.45(b)(1)(i) to use the phrase ''equal access'' instead of ''access,'' substitute ''determination of responsibility'' for ''finding of responsibility,'' and state that remedies may include the same individualized services described in § 106.30 defining ''supportive measures'' but unlike supportive measures, remedies need not avoid burdening the respondent and can be punitive or disciplinary. We have also added § 106.45(b)(7)(iv) requiring Title IX Coordinators to be responsible for the ''effective implementation'' of remedies.

Comments: Some commenters objected to § 106.45(b)(1)(i) for referencing ''due process protections'' owed to respondents, claiming that respondents have no right to due process in campus administrative proceedings, or that courts do not require the specific due process protections that the proposed rules require. Some commenters criticized this provision for referring to due process protections for respondents because the reference implies that due process protections are not important for complainants and thereby discounts and downplays the needs of victims. At least one commenter recommended modifying this provision to specify that equitable treatment of both parties requires due process protections for both parties. Other commenters urged the Department not to use ''due process'' or ''due process protections'' in the final regulations and to instead refer to a ''fair process'' for all parties; similarly, at least one commenter asked for clarification whether by using the phrase ''due process protections'' the Department intended to reference constitutional due process or only those protections set forth in the proposed regulations.

Some commenters contended that § 106.45(b)(1)(i) is contradicted by other provisions in the proposed rules; for example, commenters characterized the § 106.44(c) emergency removal provision as contrary to the requirement for equitable treatment of a respondent in § 106.45(b)(1)(i) because the emergency removal section permits schools to remove respondents without due process protections. Other commenters pointed to the requirement in proposed § 106.44(b)(2) that Title IX Coordinators must file a formal complaint upon receiving multiple reports against the same respondent as inequitable to respondents in contravention of § 106.45(b)(1)(i) because a respondent should not have to undergo a grievance process without a cooperating complainant. Other commenters pointed to the presumption of non-responsibility in § 106.45(b)(1)(iv) as ''inequitable'' to complainants in contradiction with § 106.45(b)(1)(i); other commenters characterized the live hearing and cross-examination requirements of § 106.45(b)(6)(i) as inequitable treatment of complainants.

At least one commenter asked the Department to answer whether being sensitive to the trauma experienced by victims would violate this provision by being inequitable to respondents. At least one commenter requested that as part of treating the parties equitably, this provision should require a Title IX Coordinator to offer, and keep lists available that describe, various off-campus supportive resources available to both complainants and respondents, including resources oriented toward survivors and those oriented toward accused students. One commenter asserted that this provision should include a statement that equitable treatment of a respondent must include remedies for a respondent where a complainant is found to have brought a false allegation.

Discussion: The Department appreciates commenters' varied concerns about use of the phrase ''due process protections'' in § 106.45(b)(1)(i) and perceived tension between this provision and other provisions in the proposed rules. The Department agrees with commenters that ''due process protections'' caused unnecessary confusion about whether the proposed rules intended to reference due process of law under the U.S. Constitution, or only those protections embodied in the proposed rules. In response to such comments, the final regulations replace ''due process protections'' with ''a grievance process that complies with § 106.45'' throughout the final regulations, including in this provision, § 106.45(b)(1)(i). As explained in the ''Role of Due Process in the Grievance Process'' section of this preamble, while the Department believes that the § 106.45 grievance process is consistent with constitutional due process obligations, these final regulations apply to all recipients including private institutions that do not owe constitutional protections to their students and employees, and making this terminology change throughout the final regulations helps clarify that position.

The Department disagrees that § 106.45(b)(1)(i) implies that the protections in the grievance process do not also benefit complainants, or should not be given to complainants. The grievance process is of equal benefit to complainants and respondents and each provision has been selected for the purpose of creating a fair process likely to result in reliable outcomes resolving sexual harassment allegations. The equitable distinction in § 106.45(b)(1)(i) recognizes the significance of remedies for complainants and disciplinary sanctions for respondents, but does not alter the benefit of the § 106.45 grievance process providing procedural rights and protections for both parties.

The Department understands commenters' views that certain other provisions in the final regulations are ''inequitable'' for either complainants or respondents. For reasons explained in this preamble with respect to each particular provision, the Department believes that each provision in the final regulations contributes to effectuating Title IX's non-discrimination mandate while providing a fair process for both parties. Section 106.45(b)(1)(i) was not intended to create a standard of ''equitableness'' under which other provisions of the proposed rules should be measured. In response to commenters' apparent perception that § 106.45(b)(1)(i) created a general equitability requirement that applied to the proposed rules or created conflict between this provision and other parts of the proposed rules, the final regulations revise § 106.45(b)(1)(i) to more clearly express its intent—that equitable treatment of a complainant means providing remedies, and equitable treatment of a respondent means imposing disciplinary sanctions only after following the grievance process.[1013]

Being sensitive to the trauma a complainant may have experienced does not violate § 106.45(b)(1)(i) or any other provision of the grievance process, so long as what the commenter means by ''being sensitive'' does not lead a Title IX Coordinator, investigator, or decision-maker to lose impartiality, prejudge the facts at issue, or demonstrate bias for or against any party.[1014] The Department declines to require recipients to list off-campus supportive resources for complainants, respondents, or both, though the final regulations do not prohibit a recipient from choosing to do this. The Department believes that

[1013] The Department notes that similar language is included in the final regulations in § 106.44(a) such that a recipient's response in the absence of a formal complaint must treat complainants equitably by offering supportive measures and must treat respondents equitably by imposing sanctions only after following a grievance process that complies with § 106.45.

[1014] Section 106.45(b)(1)(iii).

§ 106.45(b)(1)(ix), requiring recipients to describe the range of supportive measures available to complainants and respondents, is sufficient to serve the Department's interest in ensuring that parties are aware of the availability of supportive measures. The Department declines to require remedies for respondents in situations where a complainant is found to have brought a false allegation. These final regulations are focused on sexual harassment allegations, including remedies for victims of sexual harassment, and not on remedies for other kinds of misconduct.[1015]

Changes: Section 106.45(b)(1)(i) is revised by replacing ''due process protections'' with ''a grievance process that complies with § 106.45'' and by stating that treating complainants equitably means providing remedies where a respondent has been determined to be responsible, and treating respondents equitably means imposing disciplinary sanctions or other actions that are not supportive measures as defined in § 106.30 only after following the § 106.45 grievance process.

Section 106.45(b)(1)(ii) Objective Evaluation of All Relevant Evidence

Comments: Numerous commenters supported § 106.45(b)(1)(ii) asserting that it ensures fairness, accuracy, due process, and impartiality to all parties. Several commenters shared personal experiences with Title IX investigations in which they witnessed the recipient ignoring, discounting, burying, or destroying exculpatory evidence. Similarly, other commenters stated that they have observed inculpatory evidence being ignored or discounted particularly when a respondent is a star athlete or otherwise prominent within the recipient's educational community.

Other commenters expressed concerns about requiring an objective evaluation of relevant evidence. Some commenters asserted that it would be challenging to get such evidence in sexual assault cases, because sexual assault often happens without witnesses who can corroborate stories. One commenter contended that getting objective evidence every time would be a ''near-impossible task,'' while another felt it is ''unrealistic'' to expect tangible evidence in all cases. Some commenters argued that such a high standard would likely chill reporting. One commenter was concerned that an objective evaluation of *all* relevant evidence could lead to respondents extending investigations indefinitely since almost anything could be relevant and new evidence or witnesses might surface regularly.

Some commenters expressed support for this provision's preclusion of making credibility determinations based on party status because it is inappropriate to make presumptions about trustworthiness based on whether a person is a complainant or respondent. Other commenters opposed this part of § 106.45(b)(1)(ii) and suggested modifying the provision to require that credibility determinations not be based ''solely'' on a person's status, but argued that fact-finders could base credibility determinations in part on a person's status as a complainant or respondent. These commenters opposed any categorical bar to the fact-finder's considerations when determining credibility, and questioned whether this provision is in significant tension with the presumption of non-responsibility in § 106.45(b)(1)(iv). Commenters asserted that § 106.45(b)(1)(ii)'s requirement is problematic for adjudicators because it directs them to ignore central factors in credibility determinations, such as what interests a party has at stake. Commenters argued that courts, law enforcement, and other investigators have always considered a party's status as a defendant or plaintiff when determining how to weigh evidence and testimony. Commenters argued that recipients should be permitted to consider a party's status when considering the totality of the circumstances to reach credibility determinations.

A number of commenters proposed modifications related to training that commenters believed would improve implementation of this provision and promote objectivity and competence, such as training about applying rules of evidence, how to collect and evaluate evidence, and how to determine if evidence is credible, relevant, or reliable.

Many commenters suggested types of evidence that should be considered, specific investigative processes, or other evidentiary requirements. Commenters proposed, for example, that the final regulations should require consideration of letters, videos, photos, emails, texts, phone calls, social media, mental health history, drug, alcohol, and medication use, and rape kits. Commenters also proposed requiring a variety of investigative techniques, including asking the Department to require recipients to take immediate action to collect and test all evidence, including permitting recipients to interview community members and other witnesses (*e.g.,* roommates, dorm residents, classmates, fraternity members). Commenters also asked whether the recipient may consider evidence of the respondent's lack of credibility, other bad acts, and misrepresentation of key facts. Some commenters asked whether the proposed rules would allow respondents to introduce lie detector test results and impact statements. Some commenters wanted the final regulations to require investigators to identify any data gaps in investigative report noting unavailable information (*e.g.,* unable to interview eyewitnesses or to visit the scene of an incident) and all attempts to fill those data gaps, as well as requiring hearing boards to explain the specific evidentiary basis for each finding. Other commenters asserted that the final regulations should require all evidence to be shared with the parties to ensure fairness, and that an investigator should not get to decide what is relevant.

Commenters requested that the Department clarify how to evaluate whether evidence is relevant. Commenters asked how recipients should make credibility determinations, and whether it would be permissible to admit character and reputation evidence, including past sexual history or testimony based on hearsay. One commenter asserted that requiring an ''objective evaluation'' leaves questions about what this term will mean in practice, noting that similar provisions in the VAWA negotiated rulemaking in 2012 raised concerns that the subjectivity (at least in defining bias) would be an overreach into campus administrative decisions.

Some commenters suggested specific modifications to the wording of the proposed provision. For example, individual commenters suggested that the Department: Replace ''objective'' with ''impartial' for consistency with VAWA; add language emphasizing that the recipient's determination must be unbiased since recipient bias has been a significant problem in Title IX investigations; add that objective evaluation be ''based on rules of evidence under applicable State law;'' add that schools shall resolve doubts ''in favor of considering evidence to be relevant and exculpatory'' to address the danger that recipients will narrowly construe what constitutes exculpatory evidence; and add that unsubstantiated

[1015] The Department notes that the final regulations add § 106.71 prohibiting retaliation, and paragraph (b)(2) of that section cautions recipients that a determination regarding responsibility, alone, is not sufficient to conclude that a party has made a materially false statement in bad faith. The Department leaves recipients with discretion to address false statements (by any party) under the recipient's own code of conduct.

theories of trauma cannot be relied on to conclude that a particular complainant suffered from trauma or be used to explain away a complainant's inconsistencies. One commenter asserted that underweighting relevant testimony simply because someone is a friend to a party in a case will make it materially harder to prove an assault and will not promote equitable treatment for all parties; this commenter mistakenly believed that the proposed rules used the phrase ''arbiters should underweight character feedback from biased witnesses'' and wanted that language changed.

Discussion: The Department appreciates commenters' support of this provision and acknowledges other commenters' concerns about § 106.45(b)(1)(ii). While the gathering and evaluation of available evidence will take time and effort on the part of the recipient, the Department views any difficulties associated with the provision's evidence requirement to be outweighed by the due process benefits the provision will bring to both parties during the grievance process. The recipient's investigation and adjudication of the allegations must be based on an objective evaluation of the evidence available in a particular case; the type and extent of evidence available will differ based on the facts of each incident. The Department understands that in some situations, there may be little or no evidence other than the statements of the parties themselves, and this provision applies to those situations. As some commenters have observed, Title IX campus proceedings often involve allegations with competing plausible narratives and no eyewitnesses, and such situations still must be evaluated by objectively evaluating the relevant evidence, regardless of whether that available, relevant evidence consists of the parties' own statements, statements of witnesses, or other evidence. This provision does not require ''objective'' evidence (as in, corroborating evidence); this provision requires that the recipient objectively evaluate the relevant evidence that is available in a particular case. The Department disagrees that this provision could permit endlessly delayed proceedings while parties or the recipient search for ''all'' relevant evidence; § 106.45(b)(1)(v) requires recipients to conclude the grievance process within designated reasonable time frames and thus ''all'' the evidence is tempered by what a thorough investigation effort can gather within a reasonably prompt time frame.

The Department agrees with commenters who noted the inappropriateness of investigators and decision-makers drawing conclusions about credibility based on a party's status as a complainant or respondent. While the Department appreciates the concerns by commenters advocating that the final regulations should permit status-based inferences as to a person's credibility, the Department believes that to do so would invite bias and partiality. To that end, we disagree with commenters who opposed categorical bars on the factors that investigators or decision-makers may consider, and who want to partially judge a person's credibility based on the person's status as a complainant, respondent, or witness. A process that permitted credibility inferences or conclusions to be based on party status would inevitably prejudge the facts at issue rather than determine facts based on the objective evaluation of evidence, and this would decrease the likelihood that the outcome reached would be accurate.

The Department disagrees that § 106.45(b)(1)(ii) conflicts with the presumption of non-responsibility; in fact, § 106.45(b)(1)(ii) helps to ensure that the presumption is not improperly applied by recipients. Section 106.45(b)(1)(iv) affords respondents a presumption of non-responsibility until the conclusion of the grievance process. Section 106.45(b)(1)(ii) applies throughout the grievance process, including with respect to application of the presumption, to ensure that the presumption of non-responsibility is not interpreted to mean that a respondent is considered truthful, or that the respondent's statements are credible or not credible, based on the respondent's status as a respondent. Treating the respondent as not responsible until the conclusion of the grievance process does not mean considering the respondent truthful or credible; rather, that presumption buttresses the requirement that investigators and decision-makers serve impartially without prejudging the facts at issue.[1016] Determinations of credibility, including of the respondent, must be based on objective evaluation of relevant evidence—not on inferences based on party status. Both the presumption of non-responsibility and this provision are designed to promote a fair process by which an impartial fact-finder determines whether the respondent is responsible for perpetrating sexual harassment. Every determination regarding responsibility must be based on evidence, not assumptions about respondents or complainants. The Department disagrees that disregarding party status poses problems for investigators or adjudicators or directs them to ignore central factors in reaching credibility determinations. Title IX personnel are not prevented from understanding and taking into account each party's interests and the ''stakes'' at issue for each party, yet what is at stake does not, by itself, reflect on the party's truthfulness.

In response to commenters' concerns about how to determine ''relevance'' in the context of these final regulations, we have revised § 106.45(b)(1)(iii) specifically to require training on issues of relevance (including application of the ''rape shield'' protections in § 106.45(b)(6)). Thus, these final regulations require Title IX personnel to be well trained in how to conduct a grievance process; within the requirements stated in § 106.45(b)(1)(iii) recipients have flexibility to adopt additional training requirements concerning evidence collection or evaluation.

Similarly, the Department declines to adopt commenters' suggestions that the final regulations explicitly allow or disallow certain types of evidence or utilize specific investigative techniques. The Department believes that the final regulations reach the appropriate balance between prescribing sufficiently detailed procedures to foster a consistently applied grievance process, while deferring to recipients to tailor rules that best fit each recipient's unique needs. While the proposed rules do not speak to admissibility of hearsay,[1017] prior bad acts, character evidence, polygraph (lie detector) results, standards for authentication of evidence, or similar issues concerning evidence, the final regulations require recipients to gather and evaluate relevant evidence,[1018] with the understanding that this includes both inculpatory and exculpatory evidence, and the final regulations deem questions and evidence about a complainant's prior sexual behavior to be irrelevant

[1016] For further discussion on the purpose and function of the presumption of non-responsibility, see the ''Section 106.45(b)(1)(iv) Presumption of Non-Responsibility'' subsection of the ''General Requirements for § 106.45 Grievance Process'' subsection of the ''Section 106.45 Recipient's Response to Formal Complaints'' section of this preamble.

[1017] While not addressed to hearsay evidence as such, § 106.45(b)(6)(i), which requires postsecondary institutions to hold live hearings to adjudicate formal complaints of sexual harassment, states that the decision-maker must not rely on the statement of a party or witness who does not submit to cross-examination, resulting in exclusion of statements that remain untested by cross-examination.

[1018] The final regulations do not define relevance, and the ordinary meaning of the word should be understood and applied.

with two exceptions [1019] and preclude use of any information protected by a legally recognized privilege (*e.g.,* attorney-client).[1020] Within these evidentiary parameters recipients retain the flexibility to adopt rules that govern how the recipient's investigator and decision-maker evaluate evidence and conduct the grievance process (so long as such rules apply equally to both parties).[1021] Relevance is the standard that these final regulations require, and any evidentiary rules that a recipient chooses must respect this standard of relevance. For example, a recipient may not adopt a rule excluding relevant evidence because such relevant evidence may be unduly prejudicial, concern prior bad acts, or constitute character evidence. A recipient may adopt rules of order or decorum to forbid badgering a witness, and may fairly deem repetition of the same question to be irrelevant.

The Department disagrees that requiring an ''objective evaluation'' leaves questions about what this will mean in practice; the final regulations contain sufficient clarity concerning objectivity, while leaving recipients discretion to apply the grievance process in a manner that best fits the recipient's needs. Similarly, the Department is not persuaded that the final regulations permit inappropriate subjectivity as to defining bias or constitute overreach into campus administrative proceedings. A commenter raising that concern noted that the same issue was raised during negotiated rulemaking under VAWA; however, the Department believes that these final regulations prohibit bias with adequate specificity (*i.e.,* bias against complainants or respondents generally, or against an individual complainant or respondent) yet reserve adequate flexibility for recipients to apply the prohibition against bias without unduly overreaching into a recipient's internal administrative affairs. To the extent that the commenter was arguing that prohibiting bias is itself an overreach into campus administrative decisions, the Department does not agree. The text of Title IX prohibits recipients from engaging in discrimination on the basis of sex. Biased decision making increases the risk of erroneous outcomes because bias, rather than evidence, dictates the conclusion. Sex-based bias is a specific risk in the context of sexual harassment allegations, where the underlying conduct at issue inherently raises issues related to sex, making these proceedings susceptible to improper sex-based bias that prevents reliable outcomes. Other forms of bias on the part of individuals in charge of investigating and adjudicating allegations also lessen the likelihood that outcomes are reliable and viewed as legitimate; because Title IX's non-discrimination mandate requires that recipients accurately identify (and remedy) sexual harassment occurring in education programs or activities, these final regulations prohibit bias on the part of Title IX personnel (in § 106.45(b)(1)(iii)) and require objective evaluation of evidence (in § 106.45(b)(1)(ii)).

Rather than require recipients to take ''immediate action'' to collect all evidence, the final regulations require the recipient to investigate the allegations in a formal complaint [1022] yet permit recipients flexibility to conduct the investigation, under the constraint that the investigation (and adjudication) must be completed within the recipient's designated, reasonably prompt time frames.[1023]

While the final regulations do not require hearing boards (as opposed to a single individual acting as the decision-maker), the final regulations do not preclude the recipient from using a hearing board to function as a decision-maker, such that more than one individual serves as a decision-maker, each of whom must fulfill the obligations under § 106.45(b)(1)(iii). Whether or not the determination regarding responsibility is made by a single decision-maker or by multiple decision-makers serving as a hearing board, § 106.45(b)(7)(ii) requires that decision-makers lay out the evidentiary basis for conclusions reached in the case, in a written determination regarding responsibility. Prior to the time that a determination regarding responsibility will be reached, § 106.45(b)(5)(vi) requires the recipient to make all evidence directly related to the allegations available to the parties for their inspection and review, and § 106.45(b)(5)(vii) requires that recipients create an investigative report that fairly summarizes all relevant evidence. The final regulations add language in § 106.45(b)(5)(vi) stating that evidence subject to inspection and review must include inculpatory and exculpatory evidence whether obtained from a party or from another source. The Department does not believe it is necessary to require investigators to identify data gaps in the investigative report, because the parties' right to inspect and review evidence, and review and respond to the investigative report, adequately provide opportunity to identify any perceived data gaps and challenge such deficiencies.

The Department disagrees that an investigator should not get to decide what is relevant, and the final regulations give the parties ample opportunity to challenge relevancy determinations. The investigator is obligated to gather evidence directly related to the allegations whether or not the recipient intends to rely on such evidence (for instance, where evidence is directly related to the allegations but the recipient's investigator does not believe the evidence to be credible and thus does not intend to rely on it). The parties may then inspect and review the evidence directly related to the allegations.[1024] The investigator must take into consideration the parties' responses and then determine what evidence is relevant and summarize the relevant evidence in the investigative report.[1025] The parties then have equal opportunity to review the investigative report; if a party disagrees with an investigator's determination about relevance, the party can make that

[1019] Section 106.45(b)(6) contains rape shield protections, providing that questions and evidence about the complainant's sexual predisposition or prior sexual behavior are not relevant, unless such questions and evidence about the complainant's prior sexual behavior are offered to prove that someone other than the respondent committed the conduct alleged by the complainant, or if the questions and evidence concern specific incidents of the complainant's prior sexual behavior with respect to the respondent and are offered to prove consent.

[1020] Section 106.45(b)(1)(x) (precluding a recipient from using information or evidence protected by a legally recognized privilege unless the holder of the privilege has waived the privilege).

[1021] Of course, the manner in which a recipient adopted or applied such a rule or practice concerning evaluation of evidence could constitute sex discrimination, a situation that § 106.45(a) cautions recipients against, and the entirety of a recipient's grievance process must be conducted impartially, free from conflicts of interest or bias for or against complainants or respondents. Further, the introductory sentence of § 106.45(b) has been revised in the final regulations to ensure that a recipient's self-selected rules must apply equally to both parties. The Department notes that the universe of evidence given to the parties for inspection and review under § 106.45(b)(5)(vi) must consist of all evidence directly related to the allegations; determinations as to whether evidence is ''relevant'' are made when finalizing the investigative report, pursuant to § 106.45(b)(5)(vii) (requiring creation of an investigative report that ''fairly summarizes all relevant evidence''). Only ''relevant'' evidence can be subject to the decision-maker's objective evaluation in reaching a determination, and relevant evidence must be considered, subject to the rape shield and legally recognized privilege exceptions contained in the final regulations. This does not preclude, for instance, a recipient adopting a rule or providing training to a decision-maker regarding how to assign weight to a given type of relevant evidence, so long as such a rule applies equally to both parties.

[1022] Section 106.45(b)(5).

[1023] Section 106.45(b)(1)(v).

[1024] Section 106.45(b)(5)(vi).

[1025] Section 106.45(b)(5)(vii).

argument in the party's written response to the investigative report under § 106.45(b)(5)(vii) and to the decision-maker at any hearing held; either way the decision-maker is obligated to objectively evaluate all relevant evidence and the parties have the opportunity to argue about what is relevant (and about the persuasiveness of relevant evidence). The final regulations also provide the parties equal appeal rights including on the ground of procedural irregularity,[1026] which could include a recipient's failure to objectively evaluate all relevant evidence, including inculpatory and exculpatory evidence. Furthermore, § 106.45(b)(1)(iii) requires the recipient's investigator and decision-maker to be well-trained to conduct a grievance process compliant with § 106.45 including determining ''relevance'' within the parameters of the final regulations.

While the Department appreciates commenters' desire for more oversight as to how a recipient defines or ''counts'' exculpatory evidence, based on commenters' observations that recipients have not consistently understood the need to consider exculpatory evidence as relevant, the Department believes that the final regulations adequately address this concern by specifying that relevant evidence must include both inculpatory and exculpatory evidence, ensuring the parties have opportunities to challenge relevance determinations, and requiring Title IX personnel to be trained to serve impartially including specific training for investigators and decision-makers on issues of relevance.

While some commenters wished to alter the wording of the provision in numerous ways, for the reasons explained above the Department believes that § 106.45(b)(1)(ii) appropriately serves the Department's goal of providing clear parameters for evaluation of evidence while leaving flexibility for recipients within those parameters. The Department thus declines to remove the word ''objective,'' require recipients to adopt any jurisdiction's rules of evidence, or add rules or presumptions that would require particular types of evidence to be relevant.

Changes: In the final regulations we add § 106.45(b)(1)(x), precluding the recipient from using evidence that would result in disclosure of information protected by a legally recognized privilege. The final regulations add language in § 106.45(b)(5)(vi) stating that evidence subject to inspection and review must include inculpatory and exculpatory evidence whether obtained from a party or from another source. We have also revised § 106.45(b)(1)(iii) to specifically require investigators and decision-makers to receive training on issues of relevance.

Section 106.45(b)(1)(iii) Impartiality and Mandatory Training of Title IX Personnel; Directed Question 4 (Training)

Comments: Many commenters expressed support for § 106.45(b)(1)(iii) and, in response to the NPRM's directed question about training, stated that the training provided for in this provision is adequate. Several commenters believed this provision provides recipients with appropriate flexibility to decide the amount and type of training recipients must provide to individuals involved with Title IX proceedings. At least one commenter, on behalf of a college, noted that the college already provides for investigators free from bias or conflict of interest. Several commenters supported this provision because its prohibition on bias, conflicts of interest, and training materials that rely on sex stereotypes will lead to impartial investigations and adjudications. One commenter asserted that the proposed regulations help reduce bias by ensuring that training programs are fair and neutral and noted that social scientists and legal academics have argued that training programs can help adjudicatory bodies make better decisions.[1027]

Many commenters supported § 106.45(b)(1)(iii) because of personal experiences with Title IX campus proceedings involving perceived bias or conflicts of interest that commenters believed rendered the investigation or adjudication unfair. One commenter supported this provision because the commenter believed it will counteract the ideological propaganda having to do with sex and gender that has been disseminated throughout institutions of higher education. Another commenter believed this provision will help remedy widespread sex bias against male students at colleges and universities. One commenter favored this provision because the topics considered in a Title IX process are sensitive and personal, improper handling of cases can potentially retraumatize survivors or lead to unfair outcomes for both survivors and the accused, and mandatory training should lead to better results for all involved. One commenter analyzed how and why unconscious biases and sex-based stereotypes are pernicious especially in university disciplinary hearings, can constitute Title IX violations, and lead to biased outcomes. This commenter argued that bias can subvert procedural protections, which are necessary to render fair outcomes, and biased adjudicators cannot properly carry out their duties. One commenter supported this provision's restriction against sex stereotyping in training materials for Title IX personnel, arguing that while appropriate training can reduce bias, improper trainings can leave biases unchecked or exacerbate underlying biases. The commenter argued that numerous examples exist showing that recipients' training documents given to adjudicators in university sexual misconduct processes have demonstrated bias especially against respondents, making it impossible for decision-makers to be impartial and unbiased.[1028]

Another commenter supported § 106.45(b)(1)(iii) combined with the other provisions in § 106.45 because while nothing can completely eliminate gender or racial bias from the system, bias can be reduced by expanding the evidence considered by decision-makers, a function served by a full investigation and hearings with cross-examination. The commenter argued that decisions are most biased when they rely on less evidence and more hunches because hunches are easily tainted by subconscious racial or gender

[1026] Section 106.45(b)(8).

Rev. 771 (1986) (advocating that jurors be instructed in Bayesian probabilities); James J. Gobert, *In Search of the Impartial Jury,* 79 J. Crim. L. & Criminology 269, 326 (1988) (suggesting that juries receive ''impartiality training''); Jennifer A. Richeson & Richard J. Nussbaum, *The Impact of Multiculturalism Versus Color-Blindness on Racial Bias,* 40 J. of Experimental Social Psychol. 417 (2004) (explaining how diversity training can lead to less implicit bias); Justin D. Levinson, *Forgotten Racial Equality: Implicit Bias, Decisionmaking, and Misremembering,* Duke L. J. 345 (2007) (arguing for diversity training).

[1028] Commenters asserted that as of 2014, Harvard Law School's disciplinary board training contained slides to this effect and that one Harvard Law School professor stated that these slides were ''100% aimed to convince [adjudicators] to believe complainants, precisely *when* they seem unreliable and incoherent'' *citing to* Emily Yoffe, *The Bad Science Behind Campus Response to Sexual Assault,* The Atlantic (Sept. 8, 2017). Commenters further stated that at Ohio State University, for instance, decision-makers were told that a ''victim centered approach can lead to safer campus communities.'' *Doe* v. *Ohio State Univ.,* No. 2:15–CV–2830, 2016 WL 692547, at *3 (S.D. Ohio, Feb. 22, 2016). Commenters further stated that same Ohio State University training guide, for example, told decision-makers that ''[s]ex offenders are overwhelmingly white males.'' *Id.; see also Doe* v. *Univ. of Pa.,* 270 F. Supp. 3d 799, 823 (E.D. Pa. 2017).

bias.[1029] The commenter asserted that the obligation of the law under Title IX is to treat each person as an individual, not as a member of a class subject to prejudgment and prejudice on the basis of sex, and nowhere is the problem of sex bias more pronounced than in the area of perception, prejudgment, and prejudice in the matter of incidences of violence between members of the opposite sex. The commenter supported the Department's proposed rules, including this provision, based on the Department's authority and obligation to issue regulations that end the discrimination based on sex that exists in Title IX programs themselves.[1030]

One commenter supported this provision but noted that the Supreme Court has recognized that as a practical matter it is difficult if not impossible for an adjudicator ''to free himself from the influence'' of circumstances that would give rise to bias, and the private nature of motives ''underscore the need for objective rules'' for determining when an adjudicator is biased.[1031] This commenter asserted recipients thus need to have objective rules for determining bias. A few commenters supporting this provision recommended that the Department, or recipients on their own, establish a clear process or mechanism for reporting conflicts of interest or demanding recusal for bias during the investigative process.

Several commenters supported this provision but urged the Department to make the training materials referred to in § 106.45(b)(1)(iii) publicly available because transparency is the most effective means to eradicate the problems with biased Title IX proceedings, which problems are often rooted in biased training materials. These commenters argued that when recipients know that their training materials are subject to scrutiny, recipients will be more careful to ensure that Title IX personnel are being trained to be impartial. One commenter asserted that a lot of training is conducted via webinars and that public disclosure of training materials must include audio and video of the training as well as documents or slideshow presentations used during the training.

Discussion: The Department appreciates commenters' support for § 106.45(b)(1)(iii), and the commenters who provided feedback in response to the Department's directed question as to whether this provision adequately addresses training implicated under the proposed rules. The Department agrees with commenters who noted that prohibiting conflicts of interest and bias, including racial bias, on the part of people administering a grievance process is an essential part of providing both parties a fair process and increasing the accuracy and reliability of determinations reached in grievance processes. Recognizing that commenters recounted instances of experience with perceived conflicts of interest and bias that resulted in unfair treatment and biased outcomes, the Department believes that this provision provides a necessary safeguard to improve the impartiality, reliability, and legitimacy of Title IX proceedings.[1032] The Department agrees with a commenter who asserted that recipients should have objective rules for determining when an adjudicator (or Title IX Coordinator, investigator, or person who facilitates an informal resolution process) is biased, and the Department leaves recipients discretion to decide how best to implement the prohibition on conflicts of interest and bias, including whether a recipient wishes to provide a process for parties to assert claims of conflict of interest of bias during the investigation. The Department notes that § 106.45(b)(8) in the final regulations requires recipients to allow both parties equal right to appeal including on the basis that the Title IX Coordinator, investigator, or decision-maker had a conflict of interest or bias that affected the outcome. The Department is persuaded by the numerous commenters who urged the Department to require training materials to be available for public inspection, to create transparency and better effectuate the requirements of § 106.45(b)(1)(iii). The final regulations impose that requirement in § 106.45(b)(10).

Additionally, the Department will not tolerate discrimination on the basis of race, color, or national origin, which is prohibited under Title VI. If any recipient discriminates against any person involved in a Title IX proceeding on the basis of that person's race, color, or national origin, then the Department will address such discrimination under Title VI and its implementing regulations, in addition to such discrimination potentially constituting bias prohibited under § 106.45(b)(1)(iii) of these final regulations.

Changes: The final regulations revise § 106.45(b)(10)(i)(D) to require that training materials referred to in § 106.45(b)(1)(iii) must be made publicly available on a recipient's website, or if the recipient does not have a website such materials must be made available upon request for inspection by members of the public.

Comments: Several commenters expressed skepticism that any recipient employees can be objective, fair, unbiased, or free from conflicts of interest because a recipient's employees share the recipient's interest in protecting the recipient's reputation or furthering a recipient's financial interests. Some commenters asserted this leads to recipient employees being unwilling to treat complainants fairly while others asserted this leads to recipient employees being unwilling to treat respondents fairly. A few commenters asserted that this problem of inherent conflicts of interest between recipient employees and complainants means that the only way to avoid conflicts of interest is to require recipients to use an external, impartial arbiter or require investigations to be done by people unaffiliated with any students in the school, and one commenter argued that because all paid staff members are biased (in favor of the recipient), the solution is to allow complainants and respondents to pick the persons who run the grievance proceedings similar to jury selection. One commenter suggested that to counter institutional bias, which the commenter argued was on display in notorious cover-up situations at prestigious universities where employees committed sexual abuse, the proposed rules should specifically require training on conflicts of interest caused by employees' misplaced loyalty to the recipient. Another commenter stated that schools must be required to

[1029] In support of the proposition that most decisions after a full trial are not based on using race as a proxy but rather on the evidence at trial, resulting in racially fair decisions, while racial bias is rampant in low-stakes, low-evidence decision making where people make decisions on little evidence, the commenter cited Stephen P. Klein, *et al., Race and Imprisonment Decisions in California,* 247 Science 812 (1990). More than one commenter cited to *Driving While Black in Maryland,* American Civil Liberties Union (ACLU) (Feb. 2, 2010) *https://www.aclu.org/cases/driving-while-black-maryland*, for similar propositions.

[1030] Commenters asserted that services for male victims of opposite sex violence are nearly non-existent at educational institutions and in society at large because of an ingrained ''man as perpetrator/woman as victim'' stereotype, which stereotype has always been false, shown by CDC data revealing the prevalence of male victims of sexual violence: Centers for Disease Control and Prevention, National Center for Injury Prevention and Control, *The National Intimate Partner and Sexual Violence Survey (NISVS): 2015 Data Brief* Tables 9, 11 (2018).

[1031] Commenters cited: *Caperton* v. *A. T. Massey Coal Co.,* 556 U.S. 868, 883 (2009) (holding that a judge cannot hear a case centered on the financial interests of someone who substantially supported the judge's election campaign).

[1032] The 2001 Guidance at 21 contained a similar training recommendation: ''Finally, the school must make sure that all designated employees [referring to designated Title IX Coordinators] have adequate training as to what conduct constitutes sexual harassment and are able to explain how the grievance procedure operates.''

purchase liability insurance covering exposure arising from the handling of sexual harassment claims, to ensure that they do not have a secret conflict of interest that might cause them to put a finger on the scale one way or the other in the course of investigating or adjudicating a Title IX complaint.

Several commenters indicated that this provision seems reasonable but requested clarity as to what might in practice constitute a conflict of interest under § 106.45(b)(1)(iii), with one commenter noting that this issue often arises when a school district hires their legal counsel, insurance carrier, or risk pool to complete an investigation or respond to a formal complaint. Another commenter requested more information on what would constitute ''general bias'' for or against complainants or respondents under this provision, expressing concern that without any framework for evaluating whether a particular administrator is tainted by such bias this provision is amorphous and will add confusion and grounds for attack at smaller institutions where many student affairs administrators fill several different roles. Another commenter asked for clarification that school employees serving in the Title IX process should be presumed to be unbiased notwithstanding having previously investigated a matter involving one or more of particular parties, or else this provision could be quite costly by requiring a school district to hire outside investigators every time an investigator deals with a party more than once.

Several commenters recommended countering inherent institutional conflicts of interest on the part of recipient employees by revising the final regulations to avoid any commingling of administrative and adjudicative roles. Several commenters offered the specific recommendation that the Title IX Coordinator must not be an employment supervisor of the decision-maker in the school's administrative hierarchy and if investigators are independent contractors, the Title IX Coordinator should not have a role in hiring or firing such investigators. The same commenters recommended bolstering neutrality and independence by removing the role of counseling complainants from the office that coordinates the grievance process and requiring that investigators have some degree of institutional independence. One commenter asserted that if the Department intends to prohibit any overlap in responsibilities among the Title IX Coordinator, investigator, or decision-maker, the Department must make that intention clear.

Many commenters requested clarification as to whether this provision's prohibition against conflicts of interest and bias would be interpreted to bar anyone from being a Title IX Coordinator, investigator, or decision-maker if the person currently or in their past has ever advocated for victims' rights or otherwise worked in sexual violence prevention fields. Several commenters argued against such an interpretation because individuals with that kind of experience are often highly knowledgeable about sexual violence and able to serve impartially, while several other commenters argued that Title IX-related personnel are a self-selected group likely to include victim advocates, self-identified victims, and those associated with women's studies and thus come to a Title IX role with biases against men, respondents, or both. One commenter asserted that while the choice of a professor's field of study may or may not indicate bias, the fact that a university relies on volunteers to staff Title IX hearing panels is highly questionable because self-selection creates the likelihood that those who ''want'' to serve on a Title IX hearing board have preconceived ideas and views about whether male students are guilty, regardless of the actual facts and circumstances, and thus the final regulations should require the recipient to select decision-makers based on random selection from its entire faculty and administrators. One commenter shared an example of bias on the part of the single administrator tasked with ruling on the commenter's client's appeal of a responsibility finding, where the appeal decision-maker had recently retweeted a survivor advocacy organization's tweet ''To survivors everywhere, we believe you,'' yet the recipient overruled a bias objection stating that nothing suggested that such a tweet meant the appeal decision-maker was biased against that particular respondent. This commenter proposed adding language explaining that a ''reasonable person'' standard will be applied to determine bias, along with cautionary language that a history of working or advocating on one side or another of this issue might constitute bias. One commenter asserted that Federal courts of appeal, including the Sixth Circuit, agree that ''being a feminist, being affiliated with a gender-studies program, or researching sexual assault does not support a reasonable inference than an individual is biased against men.'' [1033] This commenter believed that the proposed rules offered no clarity on whether the Department would consider bias claims based on being a feminist or working in the sexual assault field to be ''frivolous'' or would be taken seriously.

Several commenters urged the Department to expand this provision to prohibit ''perceived'' conflicts of interest or ''the appearance'' of bias in line with standards that require judges not to have even the appearance of bias or impropriety; other commenters urged the Department to apply a presumption that campus decision-makers are free of bias, noting that courts require proof that a conduct official had an ''actual'' bias against the party because of the party's sex, and the proposed rules seem to reverse this judicial presumption, opening the door to numerous claims that undermine the presumption of honesty in campus proceedings. One commenter suggested a more clearly defined standard by specifying that Title IX personnel not have a personal bias or prejudice for or against complainants or respondents generally, and not have an interest, relationship, or other consideration that may compromise or have the appearance of compromising the individual's judgment with respect to any individual complainant or respondent. One commenter suggested that this provision should require ''nondiscriminatory'' investigations and adjudications instead of being ''not biased.'' One commenter believed that student leaders should take more responsibility for addressing sexual misconduct and might do a better job than bureaucrats can; the commenter asserted that the final regulations should not prohibit recipients from relying on students to investigate and adjudicate sexual misconduct cases.

Discussion: The Department understands commenters' concerns that the final regulations work within a framework where a recipient's own employees are permitted to serve as Title IX personnel,[1034] and the potential conflicts of interest this creates. The final regulations leave recipients flexibility to use their own employees, or to outsource Title IX investigation and adjudication functions, and the Department encourages recipients to pursue alternatives to the inherent difficulties that arise when a recipient's own employees are expected to perform these functions free from conflicts of

[1033] Commenter cited: *Doe* v. *Miami Univ.,* 882 F.3d 579, 593 fn. 6 (6th Cir. 2018).

[1034] References in this preamble to ''Title IX personnel'' mean Title IX Coordinators, investigators, decision-makers, and persons who facilitate informal resolution processes.

interest and bias. The Department notes that several commenters favorably described regional center models that could involve recipients coordinating with each other to outsource Title IX grievance proceedings to experts free from potential conflicts of interest stemming from affiliation with the recipient. The Department declines to require recipients to use outside, unaffiliated Title IX personnel because the Department does not conclude that such prescription is necessary to effectuate the purposes of the final regulations; although recipients may face challenges with respect to ensuring that personnel serve free from conflicts of interest and bias, recipients can comply with the final regulations by using the recipient's own employees. Unless prescription is necessary to achieve compliance with the final regulations, the Department does not wish to interfere with recipients' discretion to conduct a recipient's own internal, administrative affairs. The Department is also sensitive to the reality that prescriptions regarding employment relationships likely will result in many recipients being compelled to hire additional personnel in order to comply with these final regulations, and the Department wishes to prescribe only those measures necessary for compliance, without unnecessarily diverting recipients' resources into hiring personnel and away from other priorities important to recipients and the students they serve. For these reasons, the Department declines to define certain employment relationships or administrative hierarchy arrangements as *per se* prohibited conflicts of interest under § 106.45(b)(1)(iii).[1035] The Department is cognizant that the Department's authority under Title IX extends to regulation of recipients themselves, and not to the individual personnel serving as Title IX Coordinators, investigators, decision-makers, or persons who facilitate an informal resolution process. Thus, the Department will hold a recipient accountable for the end result of using Title IX personnel free from conflicts of interest and bias, regardless of the employment or supervisory relationships among various Title IX personnel. To the extent that recipients wish to adopt best practices to better ensure that conflicts of interest do not cause violations of the final regulations, recipients have discretion to adopt practices suggested by commenters, such as ensuring that investigators have institutional independence or deciding that Title IX Coordinators should have no role in the hiring or firing of investigators.

For similar reasons, the Department declines to state whether particular professional experiences or affiliations do or do not constitute *per se* violations of § 106.45(b)(1)(iii). The Department acknowledges the concerns expressed both by commenters concerned that certain professional qualifications (*e.g.,* a history of working in the field of sexual violence) may indicate bias, and by commenters concerned that excluding certain professionals out of fear of bias would improperly exclude experienced, knowledgeable individuals who are capable of serving impartially. Whether bias exists requires examination of the particular facts of a situation and the Department encourages recipients to apply an objective (whether a reasonable person would believe bias exists), common sense approach to evaluating whether a particular person serving in a Title IX role is biased, exercising caution not to apply generalizations that might unreasonably conclude that bias exists (for example, assuming that all self-professed feminists, or self-described survivors, are biased against men, or that a male is incapable of being sensitive to women, or that prior work as a victim advocate, or as a defense attorney, renders the person biased for or against complainants or respondents), bearing in mind that the very training required by § 106.45(b)(1)(iii) is intended to provide Title IX personnel with the tools needed to serve impartially and without bias such that the prior professional experience of a person whom a recipient would like to have in a Title IX role need not disqualify the person from obtaining the requisite training to serve impartially in a Title IX role.

In response to commenters' concerns that the prohibition against conflicts of interest and bias is unclear, the Department revises this provision to mandate training in ''how to serve impartially, including by avoiding prejudgment of the facts at issue, conflicts of interest, and bias'' in place of the proposed language for training to ''protect the safety of students, ensure due process protections for all parties, and promote accountability.'' This shift in language is intended to reinforce that recipients have significant control, and flexibility, to prevent conflicts of interest and bias by carefully selecting training content focused on impartiality and avoiding prejudgment of the facts at issue, conflicts of interest, and bias.

The Department disagrees with the commenter who suggested replacing ''bias'' in this provision with ''non-discrimination.'' Based on anecdotal evidence from commenters asserting specific instances that ostensibly reveal a recipient's Title IX personnel exhibiting bias for or against men, women, complainants, or respondents, the Department believes that bias, especially sex-based bias, is a particular risk in Title IX proceedings and aims specifically to reduce and prevent bias from influencing how a recipient responds to sexual harassment including through required training for Title IX personnel.[1036]

The Department declines to narrow or widen this provision by specifying whether conflicts of interest or bias must be ''actual'' or ''perceived,'' and declines to adopt an ''appearance of bias'' standard. As noted above, the topic of sexual harassment inherently involves issues revolving around sex and sexual dynamics such that a standard of ''appearance of'' or ''perceived'' bias might lead to conclusions that most people are biased in one direction or another by virtue of being male, being female, supporting women's rights or supporting men's rights, or having had personal, negative experiences with men or with women. The Department believes that keeping this provision focused on ''bias'' paired with an expectation of impartiality helps appropriately focus on bias that impedes impartiality. The Department cautions parties and recipients from concluding bias, or possible bias, based solely on the outcomes of grievance processes decided under the final regulations; for example, the mere fact that a certain number of outcomes result in determinations of responsibility, or non-responsibility, does not necessarily indicate or imply bias on the part of Title IX personnel. The entire purpose of the § 106.45 grievance process is to increase the reliability and accuracy of outcomes in Title IX proceedings, and the number of particular outcomes, alone, thus does not raise an inference of bias because the final regulations

[1035] Although the decision-maker must be different from any individual serving as a Title IX Coordinator or investigator, pursuant to § 106.45(b)(7)(i), the final regulations do not preclude a Title IX Coordinator from also serving as the investigator, and the final regulations do not prescribe any particular administrative ''chain of reporting'' restrictions or declare any such administrative arrangements to be *per se* conflicts of interest prohibited under § 106.45(b)(1)(iii).

[1036] *E.g.,* Justin D. Levinson, *Forgotten Racial Equality: Implicit Bias, Decisionmaking, and Misremembering,* 57 Duke L. J. 345 (2007) (arguing for diversity training); Jennifer A. Richeson & Richard J. Nussbaum, *The Impact of Multiculturalism Versus Color-Blindness on Racial Bias,* 40 J. of Experimental Social Psychol. 417 (2004) (explaining how diversity training can lead to less implicit bias).

help ensure that each individual case is decided on its merits.

The Department notes that the final regulations do not preclude a recipient from allowing student leaders to serve in Title IX roles so long as the recipient can meet all requirements in § 106.45 and these final regulations,[1037] and leaves it to a recipient's judgment to decide under what circumstances, if any, a recipient wants to involve student leaders in Title IX roles.

Changes: Section 106.45(b)(1)(iii) is revised to specify that the required training include ''how to serve impartially, including by avoiding prejudgment of the facts at issue, conflicts of interest, and bias'' in place of the proposed language ''that protect the safety of students, ensure due process protections for all parties, and promote accountability.'' [1038]

Comments: One commenter asked whether the training on the definition of sexual harassment referenced in § 106.45(b)(1)(iii) means the definition in § 106.30, a definition used by the recipient (that might be broader than in § 106.30), or both. One commenter wondered why this provision removes vital sexual harassment training of school personnel but gave no explanation for drawing this conclusion. Several commenters noted that § 106.45(b)(1)(iii) does not state the frequency for the required training and wondered if it must be annual, while several others requested more clarity about what would be considered adequate training especially for a decision-maker expected to conduct a live hearing with cross-examination, and further explanation of what kinds of training materials foster impartial determinations. One commenter stated that § 106.45(b)(1)(iii) does not provide for a standardized level of training or offer financial assistance for training personnel. One commenter agreed with the proposed rules' effort to diagnose severe training gaps in the Title IX system but because this provision mandates training ''conceptually'' without specifying what the training must include, the commenter asserted that the inevitable result will be more Dear Colleague Letters and guidance from the Department, which the Department should avoid by taking time to include more specific training requirements in these final regulations.

Many commenters expressed views about this provision's prohibition against the use of ''sex stereotypes'' in training materials. Some commenters urged the Department to include a definition of ''sex stereotypes,'' asserting that without clarity this provision is a legal morass exposing recipients to liability. One commenter asserted that ''bias'' lacks a definitive legal meaning and should be replaced by ''non-discriminatory.'' Some commenters argued that without a definition, this provision could be interpreted to forbid recipients from relying on research and evidence-based practices that instruct personnel to reject notions of ''regret sex'' and women lying about sexual assault. Other commenters requested clarity that stereotypes of men as sexually aggressive or likely to perpetrate sexual assault and references to ''toxic masculinity'' are prohibited under this provision. One commenter argued that the First Amendment likely prohibits the Department from dictating that training materials be free from sex stereotypes or that if the Department no longer perceives the First Amendment as a barrier to the Federal government prohibiting sex stereotyping materials then the Department should repeal 34 CFR 106.42 and replace it with a prohibition against reliance on sex stereotyping that extends to all training or educational materials used by a recipient for any purpose. This commenter also requested clarification as to whether § 106.45(b)(1)(iii) would prohibit reliance on peer-reviewed journal articles that state, for example,[1039] that trauma victims often recall only some vivid details from their ordeal and that memories may be impaired with amnesia or gaps or contain false details following extreme cases of negative emotions, such as rape trauma. Another commenter expressed concern that this provision might result in information provided by sexual violence experts being forbidden, resulting in respondents' lawyers' opinions replacing peer-reviewed, scientific data. One commenter urged the Department to interpret this provision to require training around bias that exists against complainants and to clarify that the ''Start by Believing'' approach promoted by End Violence Against Women International should be part of these training requirements because that approach trains investigators to start by believing the survivor to avoid incorporating personal bias and victim-blaming myths that might bias the investigation against the survivor. The commenter asserted that understanding the dynamics of sexual trauma is necessary in order to treat both complainants and respondents fairly without bias. Another commenter asserted that ''start by believing'' is not appropriate for investigations but is appropriate for counseling and thus, the final regulations should require that for counseling purposes personnel must ''start by believing'' a complainant or a respondent seeking counseling.

One commenter suggested this provision be modified to require training to have a working understanding of impartiality. One commenter contended that training materials should never be allowed to refer to the AAU/Westat Report [1040] for the statistic that one-in-four women are raped on college campuses because there are so many methodological problems with that report that using it constitutes sex discrimination under Title IX. One commenter argued that § 106.45(b)(1)(iii) must not be applied to exclude the application of proven profiles and indicators of certain predictive behaviors because that is a tried and tested practice in professional law enforcement and should be utilized according to best practices of trained investigators in any quest for the truth.

Discussion: The Department appreciates a commenter asking whether the training on the definition of sexual harassment in this provision was intended to refer to the definition of sexual harassment in § 106.30; to clarify that was the intent of this provision, § 106.45(b)(1)(iii) has been revised to so state. The Department disagrees that this provision removes vital training regarding a recipient's responses to sexual harassment; rather, this provision prescribes mandatory training for Title IX personnel that promotes the purpose of a Title IX process and compliance with these final regulations, and leaves recipients free to adopt additional education and training content that a recipient believes serves the needs of the recipient's community. Commenters correctly noted that the final regulations do not impose an annual or other frequency condition on the mandatory training required in § 106.45(b)(1)(iii). The Department interprets this provision as requiring that any Title IX

[1037] For example, § 106.8(a) specifies that the Title IX Coordinator must be an ''employee'' designated and authorized by the recipient to coordinate the recipient's efforts to comply with Title IX obligations. No such requirement of employee status applies to, for instance, serving as a decision-maker on a hearing panel.

[1038] Because revised § 106.45(b)(8) now requires recipients to offer appeals, § 106.45(b)(1)(iii) has also been revised to include training on conducting appeals.

[1039] Commenters cited: Katrin Hohl & Martin Conway, *Memory as Evidence: How Normal Features of Victim Memory Lead to the Attrition of Rape Complaints,* 17 Criminology & Criminal Justice 3 (2017).

[1040] Commenters cited: The Association of American Universities, *Report on the AAU Campus Climate Survey on Sexual Assault and Sexual Misconduct* (Westat 2015).

Coordinator, investigator, decision-maker, or person who facilitates an informal resolution process will, when serving in such a role, be trained to serve in that role. The Department wishes to leave recipients flexibility to decide to what extent additional training is needed to ensure that Title IX personnel are trained when they serve [1041] so that recipients efficiently allocate their resources among Title IX compliance obligations and other important needs of their educational communities. The Department disagrees with a commenter concerned that failing to be more prescriptive about the content of training in these final regulations necessarily will result in the Department issuing Dear Colleague Letters imposing training content requirements in the future. The Department is committed to imposing legally binding requirements by following applicable rulemaking processes.

The Department is persuaded by commenters' concerns that it is beneficial for § 106.45(b)(1)(iii) to emphasize the need for decision-makers to receive training in how to conduct hearings, and we have revised this provision to specify that decision-makers receive training in how to conduct a grievance process including how to use technology that will be used by a recipient to conduct a live hearing, and on issues of the relevance of questions and evidence (including how to determine the relevance or irrelevance of a complainant's prior sexual history), and that investigators receive training on issues of relevance in order to prepare an investigative report that fairly summarizes relevant evidence.

The Department appreciates the many commenters who requested a definition of ''sex stereotypes'' and asked that such a definition include, or exclude, particular generalizations and notions about women or about men. For reasons similar to those discussed above with respect to defining ''bias'' on the part of Title IX personnel, the Department declines to list or define what notions do or do not constitute sex stereotypes on which training materials must not rely. The Department disagrees that a broad prohibition against sex stereotypes is a legal morass exposing recipients to liability, any more than Title IX's broad prohibition against ''sex discrimination'' does so. It is not feasible to catalog the variety of notions expressing generalizations and stereotypes about the sexes that might constitute sex stereotypes, and the Department's interest in ensuring impartial Title IX proceedings that avoid prejudgment of the facts at issue necessitates a broad prohibition on sex stereotypes so that decisions are made on the basis of individualized facts and not on stereotypical notions of what ''men'' or ''women'' do or do not do. To reinforce this necessity, the final regulations use ''must'' instead of ''may'' to state that training materials ''must'' not rely on sex stereotypes.

Contrary to the concerns of some commenters, a prohibition against reliance on sex stereotypes does not forbid training content that references evidence-based information or peer-reviewed scientific research into sexual violence dynamics, including the impact of trauma on sexual assault victims. Rather, § 106.45(b)(1)(iii) cautions recipients not to use training materials that ''rely'' on sex stereotypes in training Title IX personnel on how to serve in those roles impartially and without prejudgment of the facts at issue, meaning that research and data concerning sexual violence dynamics may be valuable and useful, but cannot be relied on to apply generalizations to particular allegations of sexual harassment. Commenters provided numerous examples of training materials containing phrases that may, or may not, violate the final regulations, but a fact-specific evaluation of the training materials and their use by the recipient would be needed to reach a conclusion regarding whether such materials comply with § 106.45(b)(1)(iii). We have revised § 106.45(b)(10) to require recipients to post on a recipient's website the training materials referred to in § 106.45(b)(1)(iii) so that a recipient's approach to training Title IX personnel may be transparently viewed by the recipient's educational community and the public, including for the purpose of holding a recipient accountable for using training materials that comply with these final regulations.

The Department does not believe that placing parameters around the training materials specifically needed to comply with Title IX regulations violates the First Amendment rights of recipients because the final regulations do not interfere with the right of recipients to control the recipient's own curricula and academic instruction materials. The Department is not proactively scouring recipients' curricula to spot instances of sex stereotyping; rather, the Department is placing reasonable conditions on materials specifically used by recipients to carry out recipients' obligations under these final regulations.

For reasons explained above, the Department does not wish to be more prescriptive than necessary to achieve the purposes of these final regulations, and respects the discretion of recipients to choose how best to serve the needs of each recipient's community with respect to the content of training provided to Title IX personnel so long as the training meets the requirements in these final regulations. Thus, the Department declines to require recipients to adopt the ''Start by Believing'' approach promoted by End Violence Against Women, and cautions that a training approach that encourages Title IX personnel to ''believe'' one party or the other would fail to comply with the requirement that Title IX personnel be trained to serve impartially, and violate § 106.45(b)(1)(ii) precluding credibility determinations based on a party's status as a complainant or respondent. The Department takes no position on whether ''start by believing'' should be an approach adopted by non-Title IX personnel affiliated with a recipient, such as counselors who provide services to complainants or respondents. The Department wishes to emphasize that parties should be treated with equal dignity and respect by Title IX personnel, but doing so does not mean that either party is automatically ''believed.'' The credibility of any party, as well as ultimate conclusions about responsibility for sexual harassment, must not be prejudged and must be based on objective evaluation of the relevant evidence in a particular case; for this reason, the Department cautions against training materials that promote the application of ''profiles'' or ''predictive behaviors'' to particular cases. The Department declines to predetermine whether particular studies or reports do or do not violate § 106.45(b)(1)(iii) or opine on the validity of particular reports, but encourages recipients to examine the information utilized in training of Title IX personnel to ensure compliance with this provision.

Changes: Section 106.45(b)(1)(iii) clarifies that the training on the definition of sexual harassment means

[1041] Some commenters questioned whether advisors provided to a party by a postsecondary institution recipient pursuant to § 106.45(b)(6)(i) must be free from conflicts of interest and bias and must be trained. The final regulations impose no prohibition of conflict of interest or bias for such advisors, nor any training requirement for such advisors, in order to leave recipients as much flexibility as possible to comply with the requirement to provide those advisors. The Department believes that advisors in such a role do not need to be unbiased or lack conflicts of interest precisely because the role of such advisor is to conduct cross-examination on behalf of one party, and recipients can determine to what extent a recipient wishes to provide training for advisors whom a recipient may need to provide to a party to conduct cross-examination.

the definition in § 106.30,[1042] requires Title IX personnel to be trained on how to conduct a grievance process, requires investigators and decision-makers to be trained on issues of relevance (including when questions and evidence about a complainant's sexual predisposition or prior sexual behavior are not relevant), requires decision-makers to be trained on technology to be used at any live hearing, and changes ''may'' to ''must'' in the directive that training materials not rely on sex stereotypes.

Comments: Several commenters suggested that § 106.45(b)(1)(iii) be expanded to include training for Title IX personnel on a variety of subjects. At least one commenter urged the Department to adopt the training language from the withdrawn 2014 Q&A.[1043] Without referencing the 2014 Q&A a few commenters suggested that training address similar topics such as: The neurobiology of trauma, counterintuitive responses to sexual violence, false reporting, barriers to reporting, incapacitation versus intoxication and blackout behaviors, assessing credibility in the context of trauma, Title IX compliance as it intersects with the Clery Act, FERPA, child protective services legislation, disability laws, and other laws that may intersect with Title IX, healthy sexuality and consent including affirmative consent, risk factors for sexual violence victimization, bystander intervention, rates of prevalence, addressing bias using an anti-oppression framework, effective interviewing of survivors such as forensic experiential models, cultural competency to address specific issues that affect marginalized survivors (*e.g.,* LGBTQ individuals, persons with disabilities, persons of color, or persons who are undocumented or economically disadvantaged).

One commenter stated that training should ensure that Title IX personnel are first ''mentored'' by someone with experience before working directly with survivors. One commenter suggested the Department create an aspirational list of training components. One commenter asked the Department to define ''training materials'' as limited to material the recipient itself designates as essential for performing the applicable Title IX role, so as not to sweep up a range of professional continuing education presentations into the ambit of § 106.45(b)(1)(iii) just because such professional training seminars might mention something relevant to Title IX.

Discussion: For the reasons explained above, the Department has determined that § 106.45(b)(1)(iii) in the final regulations strikes the appropriate balance between mandating training topics the Department believe are necessary to promote a recipient's compliance with these final regulations while leaving as much flexibility as possible to recipients to choose the content and substance of training topics in addition to the topics mandated by this provision. Thus, the Department declines to expand this provision to mandate that training address the topics suggested by commenters. As discussed in this preamble under the § 106.44(a) ''education program or activity'' condition, the final regulations revise the training requirements in § 106.45(b)(1)(iii) to require training of Title IX personnel on the ''scope of the recipient's education program or activity.'' The Department makes this change in response to commenters concerned that the ''education program or activity'' condition was misunderstood too narrowly, for example as excluding all sexual harassment incidents that occur off campus. This revision to the training requirements in § 106.45(b)(1)(iii) helps to ensure that recipients do not inadvertently fail to treat as Title IX matters sexual harassment incidents that occur in the recipient's education program or activity. As explained above in this section of the preamble, we have also revised this provision to: Add training on appeals and informal resolution processes in addition to hearings (as applicable); specify that Title IX personnel must be trained on the definition of sexual harassment in § 106.30 and on how to serve impartially without prejudgment of the facts at issue and how to avoid bias and conflicts of interest; specify that investigators and decision-makers must be trained on issues of relevance; and specify that decision-makers receive training on how to use technology at live hearings. As explained below in this section of the preamble, we also revise § 106.45(b)(1)(iii) to include ''person who facilitates an informal resolution process'' to the list of Title IX personnel who must receive training.

The Department declines to require that Title IX personnel be ''mentored'' before working with parties, or to create an aspirational list of training components. The Department's intent with respect to this provision is to provide flexibility for each recipient to design or select training components that best serve the recipient's unique needs and educational environment, while prescribing those training topics necessary for a recipient to comply with these final regulations. The Department appreciates the commenter's request for clarification that the training materials subject to these final regulations should be only those training materials specifically designated by the recipient as essential to performing Title IX personnel functions. In order to reasonably gauge compliance with the final regulations, the Department instead reserves the right to examine training materials whether or not a recipient has not specifically designated the material as essential to performing a Title IX role.

Changes: The final regulations revise this provision to include training on the scope of a recipient's education program or activity; add training on appeals and informal resolution processes in addition to hearings (as applicable); specify that Title IX personnel must be trained on the definition of sexual harassment in § 106.30 and on how to serve impartially without prejudgment of the facts at issue and how to avoid bias and conflicts of interest; specify that investigators and decision-makers must be trained on issues of relevance; specify that decision-makers receive training on how to use technology at live hearings; and add ''person who facilitates an informal resolution process'' to the list of Title IX personnel who must receive training.

Comments: Many commenters expressed views about whether § 106.45(b)(1)(iii) should be applied to include or exclude training materials promoting ''trauma-informed'' practices, techniques, and approaches. One commenter believed that using ''impartial'' instead of ''trauma-informed'' is offensive to rape victims, for whom trauma necessitates a cognitive interview that takes the effects of trauma into account, while another

[1042] As discussed in the ''Section 106.44(a) 'education program or activity' '' subsection of the ''Section 106.44 Recipient's Response to Sexual Harassment, Generally'' section of this preamble, the training requirements for Title IX personnel in § 106.45(b)(1)(iii) now also include training on the scope of the recipient's education program or activity.

[1043] Commenters cited: 2014 Q&A at 40 (''Training should include information on working with and interviewing persons subjected to sexual violence; information on particular types of conduct that would constitute sexual violence, including same-sex sexual violence; the proper standard of review for sexual violence complaints (preponderance of the evidence standard); information on consent and the role drugs or alcohol can play in the ability to consent; the importance of accountability for individuals found to have committed sexual violence; the need for remedial actions for the perpetrator, complainant, and school community; how to determine credibility; how to evaluate evidence and weigh it in an impartial manner; how to conduct investigations; confidentiality; the effects of trauma, including neurobiological change; and cultural awareness training regarding how sexual violence may impact students differently depending on their cultural backgrounds.'').

commenter believed training must require trauma-informed best practices. A few commenters believed that the provision should address the use of trauma-informed theories by cautioning against misuse of victim-centered approaches for any purpose other than interviewing or counseling; these commenters distinguished between remaining ''impartial,'' one the one hand, while still using trauma-informed methods when questioning a complainant so that the investigator does not expect a trauma victim to provide details in chronological order, on the other hand. Several commenters asserted that trauma-informed and believe-the-victim approaches must be prohibited in the interview process because those approaches compromise objectivity, create presumptions of guilt, and result in exclusion of relevant (often exculpatory) evidence. At least one commenter suggested that FETI (forensic experimental trauma interview) techniques should be required. One commenter stated that several states including New York, California, and Illinois mandate trauma-informed training [1044] for campus officials who respond to sexual assault and asserted that the proposed rules are unclear about whether the Department's position is that trauma-informed practices constitute a form of sex discrimination,[1045] thus inviting further litigation on this issue.

Discussion: The Department understands from personal anecdotes and research studies that sexual violence is a traumatic experience for survivors. The Department is aware that the neurobiology of trauma and the impact of trauma on a survivor's neurobiological functioning is a developing field of study with application to the way in which investigators of sexual violence offenses interact with victims in criminal justice systems and campus sexual misconduct proceedings. The Department appreciates the views of commenters urging that trauma-informed practices be mandatory, and those urging that such practices be forbidden, and the commenters noting that trauma-informed practices are required in some States, and noting there is a difference between applying such practices in different contexts (*i.e.,* interview and questioning techniques, providing counseling services, or when making investigatory decisions about relevant evidence and credibility or adjudicatory decisions about responsibility). For reasons explained above, the Department believes that § 106.45(b)(1)(iii) appropriately forbids conflicts of interest and bias, mandates training on topics necessary to promote recipients' compliance with these final regulations (including how to serve impartially), and precludes training materials that rely on sex stereotypes. Recipients have flexibility to choose how to meet those requirements in a way that best serves the needs, and reflects the values, of a recipient's community including selecting best practices that exceed (though must be consistent with) the legal requirements imposed by these final regulations. The Department notes that although there is no fixed definition of ''trauma-informed'' practices with respect to all the contexts to which such practices may apply in an educational setting, practitioners and experts believe that application of such practices is possible—albeit challenging—to apply in a truly impartial, non-biased manner.[1046]

Changes: None.

Comments: One commenter suggested expanding the persons who must be trained to include counselors, diversity and inclusion departments, deans of students, ombudspersons, and restorative justice committees. A few commenters suggested that training about Title IX rights and Title IX procedures should be mandatory for all students and all staff, including teachers and faculty so that everyone affiliated with a recipient knows the definition of sexual harassment and the complaint procedures. A few commenters noted that the proposed rules lacked any training requirements for staff that work on informal resolution processes and urged the Department to set minimum standards for training of those individuals so that all students are served by individuals with high levels of training whether they go through a formal or informal process.

Discussion: The intent of § 106.45(b)(1)(iii) is to ensure that Title IX personnel directly involved in carrying out the recipient's Title IX response duties are trained in a manner that promotes a recipient's compliance with these final regulations. The Department appreciates commenters suggesting that additional school personnel, or students, need training about Title IX, but the Department leaves such decisions to recipients' discretion. The Department appreciates commenters who noted that the proposed rules contemplated the recipient facilitating informal resolution processes yet omitted such a role from the listed personnel who must receive training under § 106.45(b)(1)(iii), resulting in parties interacting with well-trained personnel during a formal process but perhaps with untrained personnel during an informal process. The commenters' concerns are well-founded, and the final regulations include ''any person who facilitates an informal resolution process'' wherever reference had been made to ''Title IX Coordinators, investigators, and decision-makers.''

Changes: Section 106.45(b)(1)(iii) is revised to include ''any person who facilitates an informal resolution process'' in addition to Title IX Coordinators, investigators, and decision-makers, as a person whom the recipient must ensure is free from conflicts of interest and bias, and receives the training specified in this provision.

Comments: At least one commenter requested more information about who is expected to provide the training required under § 106.45(b)(1)(iii), for example whether training presenters must have experience with administrative proceedings in order to provide qualified training to others. One commenter with extensive experience as a sexual assault investigator proposed that the Federal Law Enforcement Training Center (FLETC) should be

[1044] Commenters cited a white paper by Jeffrey J. Nolan, *Promoting Fairness in Trauma-Informed Investigation Training,* NACUA Notes, vol. 16, no. 5, p. 3 (Feb. 8, 2018), now updated as: Jeffrey J. Nolan, *Fair, Equitable Trauma-Informed Investigation Training* (Holland & Knight updated July 19, 2019).

[1045] The commenter asserted that Federal courts tend to reject this proposition, citing for example *Doe* v. *Univ. of Or.,* No. 6:17–CV–01103, 2018 WL 1474531 (D. Or. Mar. 26, 2018).

[1046] *E.g.,* Jeffrey J. Nolan, *Fair, Equitable Trauma-Informed Investigation Training* 14–15 (Holland & Knight updated July 19, 2019) (concluding that ''All parties can benefit if trauma-informed training is provided in a manner that is fair, equitable, nuanced, and adapted appropriately to the context of college and university investigations and disciplinary proceedings, and that does 'not rely on sex stereotypes.' Given the complexity of these issues and the importance of training as a matter of substance and potential litigation risk, institutions should strive to ensure that their training programs are truly fair and trauma-informed.''); ''Recommendations of the Post-SB 169 Working Group,'' 3 (Nov. 14, 2018) (report by a task force convened by former Governor of California Jerry Brown to make recommendations about how California institutions of higher education should address allegations of sexual misconduct) (trauma-informed ''approaches have different meanings in different contexts. Trauma-informed training should be provided to investigators so they can avoid re-traumatizing complainants during the investigation. This is distinct from a trauma-informed approach to evaluating the testimony of parties or witnesses. The use of trauma-informed approaches to evaluating evidence can lead adjudicators to overlook significant inconsistencies on the part of complainants in a manner that is incompatible with due process protections for the respondent. Investigators and adjudicators should consider and balance noteworthy inconsistencies (rather than ignoring them altogether) and must use approaches to trauma and memory that are well grounded in current scientific findings.'').

mandated to create a Title IX focused training program to which recipients would send Title IX investigators within a certain time frame after being hired; the commenter stated that FLETC already has instructors, resources, and qualified, experienced professionals that provide accredited training to sexual assault investigators, so expanding FLETC training to be specific to Title IX proceedings would create consistent knowledge and best practices across all institutions.

Discussion: For reasons explained above, the Department believes that the mandated training requirements in § 106.45(b)(1)(iii) are sufficient to effectuate the purposes of these final regulations, without unduly restricting recipients' flexibility to design and select training that best serves each recipient's unique needs. For similar reasons, the Department declines to prescribe whether training presenters must possess certain qualifications and will enforce § 106.45(b)(1)(iii) based on whether a recipient trains Title IX personnel in conformity with this provision rather than on the qualifications or expertise of the trainers. The Department appreciates the commenter's suggestion regarding FLETC creating a Title IX-specific training program. While adoption of that suggestion is outside the scope of these final regulations because it is not within the Department's regulatory authority under Title IX to direct FLETC to expand its programming,[1047] the Department encourages recipients to pursue training from sources that rely on qualified, experienced professionals likely to result in best practices for effective, impartial investigations. The Department does not certify, endorse, or otherwise approve or disapprove of particular organizations (whether for-profit or non-profit) or individuals that provide Title IX-related training and consulting services to recipients. Whether or not a recipient has complied with § 106.45(b)(1)(iii) is not determined by the source of the training materials or training presentations utilized by a recipient.

Changes: None.

Section 106.45(b)(1)(iv) Presumption of Non-Responsibility

Purpose of the Presumption

Comments: Many commenters supported § 106.45(b)(1)(iv), requiring a recipient's grievance process to apply a presumption that a respondent is not responsible until conclusion of a grievance process (referred to in this section as the ''presumption''), because such a presumption means that recipients will adjudicate based on evidence rather than beliefs or assumptions. Commenters referred to the presumption as the equivalent of a ''presumption of innocence'' which, commenters asserted, is crucial for determining the truth of what happened when one party levies an accusation against another party. Commenters shared personal experiences with campus Title IX proceedings in which the commenters believed that the process unfairly placed the respondent in a position of having to try to prove non-responsibility rather than being treated as not responsible unless evidence proved otherwise. Commenters who agreed with the presumption asserted that, especially under a preponderance of the evidence standard, it is important that an accused student be presumed innocent, to stress for decision-makers that if they believe the complainant and respondent are equally truthful, the required finding must be not-responsible. Commenters asserted that lawsuits filed against universities by respondents accused of sexual misconduct have revealed that universities often do not presume the respondent innocent [1048] and that this may lead schools to place the burden of proof on respondents.[1049] Commenters asserted that § 106.45(b)(1)(iv) will clarify that respondents do not have the burden of proving their innocence.

Several commenters who supported the presumption cited an article arguing that believing complainants is the beginning and the end of a search for the truth.[1050] Several commenters asserted that the mantra of ''Believe Survivors'' encourages a presumption of guilt against respondents. Other commenters opined that a person can both believe complainants and presume the respondent is innocent during an investigation.

Commenters argued that the presumption of non-responsibility is essential to affording respondents an opportunity to defend themselves. Commenters supportive of the presumption shared personal stories in which they or their family members were respondents in Title IX grievance hearings and as respondents and felt as though the recipient placed the burden of proving innocence on the respondent's shoulders and made it seem that the accusations had been prejudged as truthful; others shared experiences of interim suspensions imposed prior to any facts or evidence leading to a conclusion of ''guilt.'' Commenters argued that it is imperative that accusations are not equated with ''guilt.'' One commenter described living in countries that were behind the Iron Curtain, where to be accused was the same as to be proven guilty without evidence.

Commenters who opposed the presumption argued that the purpose of the presumption is to favor respondents over complainants. Commenters asserted that the presumption is evidence of the Department's animus towards complainants. Commenters asserted that the presumption codifies a unique status for sexual harassment and assault complainants, explicitly requiring that schools treat them with heightened skepticism. Additionally, several commenters argued that the Department proposed the presumption because the Department seeks to perpetuate the myth of false reporting in Federal policy and desires to protect the reputation and interests of the accused. Commenters argued that the presumption gives special, greater rights to the respondent, creating a procedural bias against complainants that violates complainants' rights to an impartial grievance procedure under Title IX and the Clery Act.

Many commenters argued that the presumption of non-responsibility is a presumption that the alleged harassment did not occur. Commenters questioned how the recipient can adequately listen to the complainant if the recipient is required to presume that no harassment occurred. Commenters argued that the presumption creates a hostile environment for complainants by implying that the complainant is dishonest. Commenters argued that the presumption will increase negative social reactions to complainants, such as minimization and victim-blaming, and predicted that these negative reactions will create adverse health effects for complainants including post-traumatic stress disorder symptoms.

Commenters opposed the requirement in the proposed rules for the recipient to expressly state the presumption of non-responsibility in its first communication with the complainant, arguing that this provision seems ''deliberately cruel'' towards complainants.

Commenters argued that the presumption would encourage schools to ignore or punish historically

[1047] FLETC is part of the Department of Homeland Security. U.S. Dep't. of Homeland Security, *Federal Law Enforcement Training Centers, https://www.fletc.gov/.*

[1048] Commenters cited: *Doe* v. *Univ. of Cincinnati, aff'd sub nom. Doe* v. *Cummins,* 662 F. App'x 437, 447 (6th Cir. 2016).

[1049] Commenters cited: *Wells* v. *Xavier Univ.,* 7 F. Supp. 3d 746 (S.D. Ohio 2014).

[1050] Commenters cited: Emily Yoffe, *The problem with #BelieveSurvivors,* The Atlantic (Oct. 3, 2018).

marginalized groups that report sexual harassment by implying such complainants are ''lying'' about sexual harassment, and that complainants will feel chilled from reporting out of belief that they will be retaliated against (*i.e.,* by being punished for ''lying'') when they do report.[1051]

Commenters asserted that in a criminal proceeding, there is an imbalance of power between the accused person and the government prosecuting the accused, and therefore the U.S. Constitution gives the criminal defendant a presumption of innocence; commenters argued that this dynamic is absent in a Title IX proceeding where the complainant does not represent the power of the government prosecuting a criminal defendant, and thus a Title IX respondent should not enjoy the presumption given to a criminal defendant.

Discussion: The Department appreciates commenters' support for § 106.45(b)(1)(iv) and acknowledges the many commenters who shared personal experiences as respondents in Title IX proceedings where the investigation process made the commenter feel like the burden was on the respondent to prove non-responsibility rather than being presumed not responsible unless evidence showed otherwise.

The Department disagrees with commenters who believed that the purpose of the presumption of non-responsibility is to favor respondents at the expense of complainants or that a presumption of non-responsibility demonstrates animus or hostility toward complainants. The Department does not seek to ''perpetuate the myth of false reporting in Federal policy,'' nor does it desire ''to protect the reputation and interests of the accused'' at the expense of victims as some commenters claimed. To the contrary, we seek to establish a fair grievance process for all parties, and the presumption does not affect or diminish the strong procedural rights granted to complainants throughout the grievance process.

The Department acknowledges that these final regulations apply only to allegations of Title IX sexual harassment, and as such these final regulations do not impose a presumption of non-responsibility in other types of student misconduct proceedings. This does not indicate that the allegations in formal complaints of sexual harassment are more suspect or warrant more skepticism than allegations of other types of misconduct. The Department believes that the notion of presuming a student not responsible until facts show otherwise represents a basic concept of fairness, but these regulations address only recipients' responses to Title IX sexual harassment and do not dictate whether a similar presumption should be applied to other forms of student misconduct.

While the Department acknowledges that Title IX proceedings are not criminal in nature and do not require application of constitutional protections granted to criminal defendants, the Department believes that a presumption of non-responsibility is critical to ensuring a fair proceeding in the Title IX sexual harassment context, rooted in the same principle that underlies the constitutional presumption of innocence afforded to criminal defendants.[1052] In the noncriminal context of a Title IX grievance process, the presumption reinforces the final regulations' prohibition against a recipient treating a respondent as responsible until conclusion of a grievance process [1053] and reinforces correct application of the standard of evidence selected by the recipient for use in the recipient's Title IX sexual harassment grievance process. These aspects of the presumption improve the fairness of the process and increase party and public confidence in such outcomes,[1054] thereby leading to greater compliance with rules against sexual misconduct.[1055] Without expressly stating a presumption of non-responsibility, a perception that recipients may prejudge respondents as responsible will continue to negatively affect party and public confidence in Title IX proceedings.[1056]

[1051] Commenters cited, *e.g.,* Tyler Kingkade, *When Colleges Threaten To Punish Students Who Report Sexual Violence,* The Huffington Post (Sept. 9, 2015).

[1052] *See* François Quintard-Morénas, *The Presumption of Innocence in the French and Anglo-American Legal Traditions,* 58 Am. J. of Comparative L. 107, 110 (2010) (''Because one can be accused of a crime without being a criminal, an elementary principle of justice requires that plaintiffs prove their allegations and that the accused be considered innocent in the interval between accusation and judgment.'').

[1053] Sections 106.44(a), 106.45(b)(1)(i) (recipients may not impose disciplinary sanctions on a respondent, or otherwise take actions against the respondent that do not constitute supportive measures as defined in § 106.30, without following a grievance process that complies with § 106.45). The final regulations expressly allow exceptions to this principle, where in certain circumstances a respondent may be treated adversely even though responsibility has not been determined at the conclusion of a grievance process. *See* § 106.30 (defining ''supportive measures'' under which a supportive measure must not ''unreasonably burden'' the other party, so reasonably burdening a respondent to accomplish the aim of a supportive measure is permissible); § 106.44(c) (a respondent may be removed from education programs or activities where the respondent poses an immediate threat to the physical health or safety of one or more individuals, and while a post-removal opportunity to challenge the removal must be given to the respondent, such an emergency removal may occur prior to conclusion of a grievance process or where no grievance process is pending at all); § 106.44(d) (allowing a recipient to place a (non-student) employee on administrative leaving while an investigation under § 106.45 is pending). The Department notes that in an essay cited by commenters, the author criticizes the presumption of non-responsibility in the NPRM, arguing that if the presumption is intended only to mean that the burden of proof remains on the recipient (and not on the respondent) then the presumption is ''unobjectionable as a matter of substance, although a seeming invitation to confusion'' because recipients may wrongly believe that a presumption of non-responsibility implies that the recipient must apply the criminal burden of proof (beyond a reasonable doubt). Michael C. Dorf, *What Does a Presumption of Non-Responsibility Mean in a Civil Context,* Dorf On Law (Nov. 28, 2018), *http://www.dorfonlaw.org/2018/11/what-does-presumption-of-non.html.* The author recognized that the second purpose of the presumption seemed to be treating the respondent as not responsible throughout a grievance process and believed that to be ''quite a bad idea'' because in daily life we make decisions based on someone being accused of a crime even before a conviction. The author correctly noted that one purpose of the presumption is to reinforce that the burden of proof remains on the recipient and not on the respondent (or complainant). The Department clarifies that contrary to the author's concerns, and for reasons discussed in the ''Section 106.45(b)(7)(i) Standard of Evidence and Directed Question 6'' subsection of the ''Determinations Regarding Responsibility'' subsection of the ''Section 106.45 Recipient's Response to Formal Complaints'' section of this preamble, recipients may *not* apply the criminal standard of beyond a reasonable doubt. Further, while the author of that essay correctly identified a second purpose of the presumption as ensuring that recipients do not treat the respondent as responsible until the respondent is proved responsible, as explained above in this footnote that principle is subject to exceptions.

[1054] Rinat Kitai, *Presuming Innocence,* 55 Oklahoma L. Rev. 257, 272 (2002) (the ''presumption of innocence is based mainly on grounds of public policy relating to political morality and human dignity. The presumption of innocence is a normative principle, directing state authorities as to the proper way of treating a person who has not yet been convicted. This principle is not tied to empirical data about the incidence of criminal offenses or the probability of innocence in certain circumstances.''); Dale A. Nance, *Civility and the Burden of Proof,* 17 Harv. J. of L. & Pub. Pol'y 647, 689 (1994) (''we should not forget that the moral order that the law endorses carries with it certain obligations concerning its application, one of which is *the obligation to presume compliance with legal duties, at least to the extent they represent a consensus about serious moral duties.* . . . Even if that principle has lost its constitutional luster, the very fact that it has attained such status, off and on over the years, is evidence of the weight the law accords it. A presumption of innocence applies quite generally, though not of course with perfect uniformity, in both civil and criminal cases.'') (emphasis added).

[1055] *E.g.,* Rebecca Holland-Blumoff, *Fairness Beyond the Adversary System: Procedural Justice Norms for Legal Negotiation,* 85 Fordham L. Rev. 2081, 2084 (2017) (''A fair process provided by a third party leads to higher perceptions of legitimacy; in turn, legitimacy leads to increased compliance with the law'') (internal citation omitted).

[1056] For example, the Foundation for Individual Rights in Education (FIRE) published a 2017 report, *Spotlight on Due Process, https://www.thefire.org/*

On the other hand, nothing about this presumption deprives complainants of the robust procedural protections granted to both parties under § 106.45, or the protections granted only to complainants in § 106.44(a) (including the right to be offered supportive measures with or without filing a formal complaint). The presumption does not imply that the alleged harassment did not occur; the presumption ensures that recipients do not take action against a respondent *as though* the harassment occurred prior to the allegations being proved,[1057] and the final regulations require a recipient's Title IX personnel to interact with both the complainant and respondent in an impartial manner throughout the grievance process without prejudgment of the facts at issue,[1058] and without drawing inferences about credibility based on a party's status as a complainant or respondent.[1059] The presumption therefore serves rather than frustrates the goal of an impartial process. The Department expects that a fair grievance process will lend greater legitimacy to the resolution of complainants' allegations, which will improve the environment for complainants rather than perpetuate a hostile environment or increase negative social reactions to complainants, such as disbelief and blame. The presumption of non-responsibility does not interfere with a complainant's right under § 106.44(a) to receive supportive measures offered by the recipient; this obligation imposed on recipients does not depend at all on waiting for evidence to show a respondent's responsibility. Section 106.44(a) is intended to assure complainants of a prompt, supportive response from their school, college, or university notwithstanding the recipient's obligation not to treat the respondent as responsible for sexual harassment until the conclusion of a grievance process.

While the recipient must include a statement of the presumption in the initial written notice sent to both parties after a formal complaint has been filed,[1060] the Department does not believe that this communication from the recipient is ''deliberately cruel'' to complainants; rather, both parties benefit from understanding that the purpose of a grievance process is to reach reliable decisions based on evidence instead of equating allegations with the outcome, especially where the recipient's own code of conduct penalizes a party for making false statements during a grievance proceeding. The final regulations place the burden of proof solely on a recipient[1061]—not on a complainant or respondent—and therefore the presumption does not operate to burden or disfavor a complainant. Under § 106.44(a) and the § 106.30 definition of ''supportive measures,'' recipients must offer complainants supportive measures designed to restore or preserve complainants' equal educational access (with or without a grievance process pending), and the final regulations' prohibition against a recipient punishing a respondent without following a fair grievance process, including application of a presumption of non-responsibility until conclusion of the grievance process, does not diminish the supportive, meaningful response that a recipient is obligated to offer complainants.[1062]

The Department disagrees that the presumption would encourage schools to ignore or punish historically marginalized groups that report sexual harassment, for ''lying'' about it. The Department requires a recipient to respond promptly to actual knowledge of sexual harassment in its education program or activity against a person in the United States, including by offering supportive measures to the complainant. Thus, ignoring sexual harassment violates these final regulations and places the recipient's Federal funding in jeopardy. The presumption does not imply that a respondent is truthful or that a complainant is lying, and a recipient cannot use the presumption as an excuse not to respond to a complainant as required under § 106.44(a), or not to objectively evaluate all relevant evidence in reaching a determination regarding responsibility. Finally, § 106.71(b)(2) cautions recipients that it may constitute retaliation to punish a complainant (or any party) for making false statements unless the recipient determines that the party made materially false statements in bad faith and that determination is not based solely on the outcome of the case.

The Department acknowledges that Title IX grievance processes are very different from criminal proceedings and that the presumption of innocence afforded to criminal defendants is not a constitutional requirement in Title IX proceedings, but believes that a presumption of non-responsibility is needed in Title IX proceedings. While commenters correctly noted that a complainant does not wield the power of the government prosecuting a criminal charge, the purposes served by the presumption of non-responsibility still apply: Ensuring that the burden of proof remains on the recipient (not on the respondent or complainant) and that the standard of evidence is correctly applied, and ensuring the recipient does not treat the respondent as responsible until conclusion of the grievance process. The procedural requirements of § 106.45 equalize the rights of complainants and respondents to participate in the investigation and adjudication by presenting each party's own view of the evidence and desire for the case outcome, while leaving the burden of gathering evidence and the burden of proof on the recipient.

Changes: We have added § 106.71(a) to the final regulations, prohibiting retaliation against any person exercising rights under Title IX. In addition, § 106.71(b)(2) clarifies that charging an individual with a code of conduct violation for making a materially false statement in bad faith in the course of a grievance process does not constitute retaliation, but a determination regarding responsibility, alone, is not sufficient to conclude that an individual made a materially false statement in bad faith.

Students of Color, LGBTQ Students, and Individuals With Disabilities

Comments: Multiple commenters asserted that, because of the presumption of non-responsibility, schools may be more likely to ignore or punish survivors who are women and girls of color, pregnant and parenting students, and LGBTQ students because

resources/spotlight/due-process-reports/due-process-report-2017/, finding that ''Nearly three-quarters (73.6%) of America's top 53 universities do not even guarantee students that they will be presumed innocent until proven guilty.'' The Department recognizes that a presumption of non-liability does not formally apply in Federal civil lawsuits the way that a presumption of innocence applies to criminal defendants; however, civil court procedures do generally place the burden of proof on the plaintiff to prove the defendant's civil liability, which echoes the principle that civil defendants generally are not liable until proved otherwise.

[1057] Under § 106.45(b)(9), a recipient may choose to facilitate an informal resolution process (except as to allegations that an employee sexually harassed a student) and an informal resolution may result in the parties, and the recipient, agreeing on a resolution of the allegations of a formal complaint that involves punishing or disciplining a respondent. This result comports with the prescription in § 106.44(a) and § 106.45(b)(1)(i) that a recipient may not discipline a respondent without following a grievance process that complies with § 106.45, because § 106.45 expressly authorizes a recipient to pursue an informal resolution process (with the informed, written, voluntary consent of both parties).

[1058] Section 106.45(b)(1)(iii).

[1059] Section 106.45(b)(1)(ii).

[1060] Section 106.45(b)(2)(i)(B).

[1061] Section 106.45(b)(5)(i).

[1062] Nothing in the final regulations precludes a recipient from continuing to provide supportive measures to assist any party regardless of the outcome of a case.

of harmful stereotypes. Commenters argued that the presumption would especially harm Asian Pacific Islander women who, because of social taboos about sexual activity prevalent in Asian cultures, are significantly less likely to report instances of sexual assault and will feel further deterred by a presumption favoring the respondent. Commenters argued that Black women and girls are more likely to be punished by schools who stereotype them as the aggressor when they defend themselves against their harassers or when they respond to trauma.

Several commenters argued that the presumption would harm students with disabilities because they are more likely to be victims of sexual assault and may be particularly vulnerable to unfair treatment due to the presumption of non-responsibility, and because students with disabilities are less likely to be believed when they report these experiences and often have greater difficulty describing the harassment they experience.[1063] One commenter opposed § 106.45(b)(1)(iv) because the provision does not address sexual harassment and assault cases involving students with disabilities.

Other commenters who agreed with the proposed rules, including the presumption, recounted personal stories in which family members and friends who are Black males were falsely accused of sexual assault yet the recipient seemed to treat the respondent as guilty unless proven innocent. One commenter asserted that the sexual assault grievance process has become a tool for white administrators to punish Black males as young as five years old. The commenter wished to see what they called an outdated Jim Crow-era system replaced with a system that is fair to all.

Other commenters supported this provision based on personal stories about students with disabilities whom commenters believed had been falsely accused of sexual misconduct, including students with autism who found the Title IX grievance process traumatic.

Discussion: The Department understands commenters' concerns that students of color, LGBTQ students, students with disabilities, and other students will be adversely affected by the presumption of non-responsibility. The Department does not believe that the presumption will adversely affect the rights of any complainant, including complainants of demographic groups who may suffer sexual harassment at greater rates than members of other demographic groups. The Department believes that a presumption that protects respondents from being treated as responsible until conclusion of a grievance process furthers the recipient's obligation to fairly resolve allegations of sexual harassment and increases the likelihood that every outcome will carry greater legitimacy.

Further, students of color, LGBTQ students, and students with disabilities may be respondents in Title IX grievance processes, in which situation the presumption of non-responsibility reinforces the recipient's obligation not to prejudge responsibility, countering negative stereotypes that may affect such respondents.

The presumption of non-responsibility in § 106.45(b)(1)(iv) does not contribute to negative stereotypes that commenters characterize as causing people to disbelieve students of color, pregnant or parenting students, LGBTQ students, or students with disabilities (or conversely, to rush to assume the responsibility of such students based on similar negative stereotypes). The presumption protects respondents against being treated as responsible until conclusion of the grievance process but this does not entail disbelieving complainants. Any person may be a complainant or a respondent, and the final regulations require all Title IX personnel to serve impartially, without prejudging the facts at issue, and without bias toward complainants or respondents generally or toward an individual complainant or respondent.

Changes: None.

The Complainant's Right to Due Process Protections

Comments: Commenters argued that the presumption of non-responsibility is a deprivation of the complainant's own due process rights, and argued that the complainant will be forced to proceed blindly, at a severe information deficit, while being forced to overcome the presumption. Other commenters argued that merely stating that the recipient will bear the burden of proof does not in practical terms make it so, and a presumption that the respondent is not responsible in reality shifts the burden of proof onto the complainant. Many commenters asserted that the respondent should bear the burden to prove the respondent is innocent.

One commenter, citing *John Doe* v. *University of Cincinnati,*[1064] noted that a court in the Southern District of Ohio found no violation of due process where the respondent argued that the recipient failed to grant the respondent a presumption of non-responsibility. Another commenter asserted that the U.S. Supreme Court has already balanced the competing interests and determined what process is due and it does not require a presumption of non-responsibility, because in *Mathews* v. *Eldridge* [1065] the U.S. Supreme Court considered (1) the private interest that will be affected; (2) the risk of an erroneous deprivation of such interest through procedures used, and the probable value, if any, of additional procedural safeguards; and (3) the government's interest, yet did not specify that a presumption favoring any party was required.

Many commenters argued that the presumption will make many women feel it is not worth it to report their assaulters to authorities because survivors already often do not report their sexual assaults due to fear of being disbelieved and the presumption will only heighten the perception that the recipient believes respondents and disbelieves complainants.[1066] One commenter asserted that, out of every 1,000 rapes, only 230 are reported to police, and just five result in conviction,[1067] and argued that a presumption in favor of respondents will lead to even fewer perpetrators of rape being held accountable.

Discussion: The presumption of non-responsibility does not hold complainants to a higher standard of evidence, shift the burden of proof onto complainants, require complainants to ''overcome'' the presumption or proceed ''blindly'' through an investigation, or deny complainants due process. Rather, the presumption simply requires that the recipient not treat the respondent as responsible until the recipient has objectively evaluated the evidence, and reinforces application of the standard of evidence the recipient has already selected (which may be the preponderance of the evidence standard, or the clear and convincing evidence standard).[1068] The final regulations require the burden of proof

[1068] Section 106.45(b)(1)(vii).

to remain on the recipient,[1069] and the recipient must reach a determination of responsibility against the respondent if the evidence meets the applicable standard of evidence. The complainant therefore does not bear any burden of proof and does not have to ''overcome'' the presumption. The presumption does not negate the strong procedural protections given to complainants throughout the grievance process, and these due process protections ensure that complainants have a meaningful opportunity (equal to that of respondents) to put forward the complainant's own evidence and arguments about the evidence, even though the burden of proof remains on the recipient.

The Department declines to place the burden of proof on respondents to prove non-responsibility because the purpose of Title IX is to ensure that the recipient, not the parties, bears responsibility to draw accurate conclusions about whether sexual harassment has occurred in the recipient's education program or activity. Title IX obligates *recipients,* not individual students or employees, to operate education programs or activities free from sex discrimination, so it is the recipient's burden to gather relevant evidence and carry the burden of proof.

While the Department acknowledges the Federal district court decision cited by a commenter for the proposition that courts do not require a presumption of non-responsibility in Title IX proceedings, neither the Federal district court, nor the Sixth Circuit on appeal of that case, disapproved of a recipient applying a presumption of non-responsibility in a Title IX case or suggested that such a presumption would be constitutionally problematic; rather, the district court's opinion held that the recipient's alleged failure to provide such a presumption (even if true) would not amount to a due process deprivation under the U.S. Constitution.[1070] On appeal, the Sixth Circuit did not address the presumption of non-responsibility issue at all, and noted that it appeared the recipient placed the burden of proof on the itself (not on either party), a practice that was constitutionally sound [1071] and a requirement the final regulations impose on recipients in § 106.45(b)(5)(i).

Additionally, the Department is not persuaded by the commenter's citation to *Mathews* v. *Eldridge,* a U.S. Supreme Court case which set forth a three-part balancing test for determining the amount of process due to meet the basic requirements of providing notice and meaningful opportunity to be heard in particular situations and held that an evidentiary hearing is not required prior to the Social Security Administration's termination of social security benefits (in part because the basic due process requirements of notice and meaningful opportunity to be heard were met when an evidentiary hearing *was* available before a termination decision became final).[1072] The *Mathews* Court did not address the issue of whether a presumption is appropriate in an administrative proceeding and is inapposite on that particular point. As noted in the ''Role of Due Process in the Grievance Process'' section of this preamble, the Department believes that the § 106.45 grievance process is consistent with constitutional due process requirements and serves important policy purposes with respect to the fairness, accuracy, and perception of legitimacy of Title IX grievance processes.

Changes: None.

False Allegations

Comments: Many commenters cited statistics that most people who report sexual assault are telling the truth, so a presumption of non-responsibility does not reflect reality. Several commenters urged the Department not to require recipients to presume that the respondent is not responsible, since they say that statistics show that most respondents are guilty. Numerous commenters asserted that the rate of false reporting of sexual assault is between two to ten percent.[1073] Other commenters asserted that 95 percent of sexual assault reports to the police are true.[1074] Commenters asserted that since data collection began in 1989, there are only 52 cases where men have been exonerated after being falsely convicted of sexual assault while in the same period, 790 men were exonerated for murder.[1075]

Commenters argued that all false accusations, wrongful expulsions, suspensions, punishments, and undue burdens levied against respondents still do not add up to the overwhelming numbers of victims, so any provision that makes it harder for victims to prevail only serves to harm a greater number (of victims) in an attempt to protect a very small number (of falsely accused respondents), leading to greater unequal access to education for victims. Commenters argued that very few respondents who are found guilty are expelled, and therefore respondents are usually not in danger of losing their access to educational opportunities, so a wrongful result adverse to a respondent is not as consequential as a wrongful result adverse to a complainant.

Other commenters argued that a presumption against responsibility is not needed because it is easy to identify patterns of individuals who file false accusations, because almost all false accusers have ''a history of bizarre fabrications or criminal fraud.'' [1076] Commenters stated that false accusations are unusually dramatic, involving gang rape, a gun or a knife, or violent attacks from strangers resulting in severe injuries.

Other commenters supported the presumption by asserting that false allegations do occur, and with more regularity than other commenters claim. Commenters cited the incidence of numerous lawsuits filed by students claiming they had been falsely accused,[1077] arguing that the prevalence of these lawsuits shows that many respondents, mostly young men, have been falsely accused and suspended or

[1069] Section 106.45(b)(5)(i).

[1070] *Doe* v. *Univ. of Cincinnati,* 173 F. Supp. 3d 586, 604 (S.D. Ohio 2016), *aff'd sub nom. Doe* v. *Cummins,* 662 F. App'x 437, 447 (6th Cir. 2016) (''Nevertheless, even assuming that the [recipient] placed the burden of proof on Plaintiffs as they claim, they have not stated a due process violation. As Defendants correctly argue in their brief, ''[o]utside the criminal law area, where special concerns attend, the locus of the burden of persuasion is normally not an issue of Federal constitutional moment.''). This does not imply that a presumption of non-responsibility would be problematic under a constitutional analysis.

[1071] *Cummins,* 662 F. App'x at 449 (noting that the recipient appeared to place the burden of proof on the recipient rather than on either the complainant or respondent and stating ''Allocating the burden of proof in this manner—in addition to having other procedural mechanisms in place that counterbalance the lower standard used . . . is constitutionally sound and does not give rise to a due-process violation.''). The final regulations similarly allocate the burden of proof on the recipient (and not on either party). § 106.45(b)(5)(i).

[1072] *See Mathews* v. *Eldridge,* 424 U.S. 319, 335, 349 (1976) (holding that determining the adequacy of due process procedures involves a balancing test that considers the private interest affected, the risk of erroneous deprivation and benefit of additional procedures, and the government's interest including the burden and cost of providing additional procedures).

expelled from school under procedures that lacked fairness and reliability, often resulting in a respondent *de facto* being required to try to prove innocence. Commenters referred to high-profile campus sexual assault situations that commenters argued demonstrate the fact that false rape accusations do occur and damage respondents caught in systems that prejudge them without any benefit of being presumed innocent. Commenters argued that the frequency of false accusations is not as low as other commenters have claimed because studies examining the rate of false accusations only count accusations proven to be false, and do not count accusations dismissed for lack of evidence. One commenter shared details of the commenter's own research finding that 53 percent of sexual assault allegations were false, which the commenter argued is much higher than the ''2–10%'' statistic relied on by many victim advocates; [1078] the commenter argued that the 53 percent number is more accurate because it counted ''not responsible'' determinations as ''false accusations.''

One commenter asserted that high-conflict divorce proceedings take into account the reality that spite plays a role in some parties' negotiations and litigation strategies, but many people seem to believe sexual harassment allegations are almost entirely free of such distorting motives.

Discussion: The Department is not persuaded by commenters who argued that we should remove the presumption of non-responsibility from the final regulations because of studies showing that many, or even the vast majority, of allegations of sexual assault are true. Statistical findings can be instructive but not dispositive, and statistics cannot by themselves justify or rationalize procedural protections in a process designed to determine the truth of particular allegations involving specific individuals.[1079] Even if only two to ten percent of rape allegations are false or unfounded, the Department believes that statistical generalizations must not compel conclusions about the truth of particular allegations because without careful assessment of the facts of each particular situation it is not be possible to know whether the respondent is one of the 90 to 98 percent who statistically are ''guilty'' or among the two to ten percent who are statistically ''innocent.'' [1080]

Similarly, whether respondents are expelled at low rates or high rates, the final regulations are concerned with ensuring that the determination regarding responsibility is reliable and perceived as legitimate. For reasons described elsewhere in this preamble, the Department does not require any particular disciplinary sanctions against respondents, because these Title IX regulations are focused on requiring remedies for victims, leaving disciplinary decisions to recipients' discretion. For similar reasons, the Department declines to adopt a premise that most false allegations are ''easy to identify'' because even if research has identified certain patterns, common features, or motives for false allegations, it is not possible to assess the veracity of a complainant's specific allegations, or an individual complainant's motive, based on generalizations. Therefore, procedural rules designed for fairness and accuracy cannot be based on statistics or studies about what kind of allegations tend to be false. The Department disagrees that all determinations of non-responsibility are fairly characterized as involving a false or unfounded allegation; as numerous commenters have pointed out, an allegation may be true and lack sufficient evidence to meet a standard of evidence proving responsibility, or an allegation may be inaccurate but not intentionally falsified. The final regulations add § 106.71(b) cautioning recipients that punishing a party ostensibly for making false statements during a grievance process may constitute unlawful retaliation unless the recipient has concluded that a party made a bad faith materially false statement and that conclusion is not based solely on the determination regarding responsibility. This provision acknowledges the reality that a complainant's allegations may not have been false even where the ultimate determination is that the respondent is not responsible and/or that the complainant may not have acted subjectively in bad faith (and conversely, that a respondent may not have made false, or subjectively bad faith, denials even where the respondent is found responsible).

The presumption of non-responsibility is not designed to protect ''a few'' falsely accused respondents at the expense of ''the many'' sexual harassment victims; the presumption is designed to improve the accuracy and legitimacy of the outcome in *each individual* formal complaint of sexual harassment to prevent injustice to any complainant or any respondent.

Changes: Section 106.71(b) states that charging an individual with a code of conduct violation for making a bad faith materially false statement during a grievance process is not retaliation so long as that conclusion is not based solely on the determination regarding responsibility.

Inaccurate Findings of Non-Responsibility

Comments: Commenters argued that, in a misguided attempt to shield falsely accused people, the presumption of non-responsibility will allow assailants to go unpunished, which will further traumatize and disempower victims. Commenters argued that the presumption would allow more sexual harassment perpetrators to escape responsibility because it can be difficult to prove sexual assault, and evidence is frequently scant or based heavily on testimony alone so overcoming a presumption is yet another unfair obstacle for survivors to receive justice.

Commenters argued that, for those schools that employ a clear and convincing evidence standard, complainants will be more likely to lose the case, a result compounded by the presumption of non-responsibility. Commenters argued that abusive people will be found not responsible more often, making campuses less safe and increasing the number of sexual assaults on campuses. Another commenter argued that the presumption ensures that only the most egregious cases of sexual assault will be punished, which is unjust for many women.

Some commenters disagreed with the presumption, asserting that it requires fact-finding doctrines used in criminal law proceedings. Commenters expressed concern that, if schools handle complaints of sexual assault the same way law enforcement handles them, most complaints will not be pursued. One commenter asserted that 69 percent of survivors have experienced police officers discouraging them from filing a report and one-third of survivors have

[1080] *See* Alex Stein, *An Essay on Uncertainty and Fact-Finding in Civil Litigation, with Special Reference to Contract Cases,* 48 Univ. of Toronto L. J. 299, 301 (1998) (''Allowing verdicts to be based upon bare statistical evidence, rather than on case-specific proof, is generally regarded as problematic. Adjudication involves individuals and their individual affairs, which need to be translated into individual rights and duties. This is not the case with bare statistical evidence. As the famous saying goes, for statistics there are no individuals and for individuals, no statistics.'').

experienced police refusing to take their reports.[1081]

Commenters argued that the presumption is in tension with § 106.45(b)(1)(ii), which states that ''credibility determinations may not be based on a person's status as a complainant'' or ''respondent.''

One commenter asserted that the presumption would not work for medical schools, because medical students frequently experience sexual harassment or assault from patients or visitors, and medical schools do not have the authority to compel them to participate in investigatory interviews or live hearings.[1082]

Discussion: As applied under these final regulations, in the context of a Title IX grievance process, the presumption does not operate to let ''guilty'' respondents go free. While the presumption is based on a similar principle animating the presumption of innocence in criminal law, the § 106.45 grievance process generally, including the presumption under § 106.45(b)(1)(iv), does not mirror criminal law protections or mimic criminal courts. As discussed below, the presumption of non-responsibility reinforces that the burden of proof remains on the recipient, not on either party, and reinforces application of the standard of evidence, which under the final regulations must be lower than the criminal standard of beyond a reasonable doubt.

The Department disagrees that the final regulations require schools to handle reports or formal complaints of sexual assault the same way law enforcement handles them. Recipients are prohibited from showing deliberate indifference towards sexual harassment complainants, including by offering supporting measures to complainants irrespective of whether a formal complaint is ever filed, and under these final regulations recipients are obligated to investigate formal complaints, unlike law enforcement where officers and prosecutors generally have discretion to decline to investigate and prosecute. Further, law enforcement and criminal prosecutors gather evidence under a burden to prove guilt beyond a reasonable doubt, but the final regulations place a burden on recipients to meet a burden of proof that shows a respondent responsible measured against a lower standard of evidence.[1083]

The Department is unpersuaded by commenters who asserted that the presumption will make campuses more dangerous because it will chill reporting or prevent recipients from punishing and expelling offenders from campuses because § 106.45 is too similar to criminal procedures. A presumption of non-responsibility need not chill or deter reporting of sexual harassment, because reporting under the final regulations leaves complainants autonomy over whether to seek supportive measures or also participate in a grievance process, and because a fair process with procedures rooted in principles of due process provides assurance that the outcome of a grievance process (when a complainant or Title IX Coordinator decides to initiate a grievance process) is reliable and viewed as legitimate.

Refraining from treating a respondent as responsible until conclusion of the grievance process does not make it more difficult to hold a respondent responsible or prevent implementation of supportive measures for a complainant. To the extent that commenters are advocating for latitude for recipients to impose *interim* suspensions or expulsions, the Department believes that without a fair, reliable process the recipient cannot know whether it has interim-expelled a respondent who is actually responsible for the allegations, or a respondent who is not responsible. However, the Department reiterates that § 106.44(c) allows emergency removals of respondents prior to conclusion of a grievance process (or even where no grievance process is pending), thus protecting the safety of a recipient's community where an immediate threat exists.

Because the standard of evidence is lower in the Title IX grievance process (recipients must select and apply either the preponderance of the evidence standard or the clear and convincing evidence standard) than in a criminal proceeding (beyond a reasonable doubt), the presumption in § 106.45(b)(1)(iv) does not convert the standard of evidence to the criminal standard (beyond a reasonable doubt). Under the § 106.45 grievance process, the § 106.45(b)(1)(iv) presumption ensures that recipients correctly apply the standard of evidence selected by each recipient, but no recipient is permitted to select the criminal ''beyond a reasonable doubt'' standard.[1084] Thus, the presumption helps to ensure that the recipient does not treat a respondent as responsible until conclusion of the grievance process, and to reinforce a recipient's proper application of the standard of evidence the recipient has selected [1085] without converting the Title IX grievance process to a criminal court proceeding. The presumption does not make it more difficult to hold a respondent responsible, because the presumption reinforces, but does not change, the burden of proof that rests on the recipient and the obligation to appropriately apply the recipient's selected standard of evidence in reaching a determination regarding responsibility to decide if the recipient's burden of proof has been met. The presumption will not result in assailants going unpunished; a perpetrator of sexual harassment proved responsible for the alleged conduct may be punished at the recipient's discretion, and these final regulations require the recipient to effectively implement remedies for the complainant where a respondent is found to be responsible.[1086]

The structure of the fact-finding process, including the presumption, prevents recipients from acting on an assumption that a particular complainant is (or is not) truthful; similarly, recipients may not look to the presumption as an excuse to ''believe'' or find credible, the respondent and to

[1081] Commenters cited: Rebecca Campbell, *Survivors' Help-Seeking Experiences with the Legal and Medical Systems,* 20 Violence & Victims 1 (2005).

[1082] Commenters cited: Charlotte Grinberg, *'These Things Sometimes Happen': Speaking Up About Harassment,* 37 Health Affairs 6 (2018).

[1083] Section 106.45(b)(1)(vii) (requiring recipients to select and apply to all Title IX sexual harassment cases a standard of evidence that is either the preponderance of the evidence standard, or the clear and convincing evidence standard).

[1084] Section 106.45(b)(1)(vii); § 106.45(b)(7)(i); *see also* discussion in the ''Section 106.45(b)(7)(i) Standard of Evidence and Directed Question 6'' subsection of the ''Determinations Regarding Responsibility'' subsection of the ''Section 106.45 Recipient's Response to Formal Complaints'' section of this preamble.

[1085] Because the Department has determined that the preponderance of the evidence standard is the lowest possible standard of evidence that a recipient may select for a § 106.45 grievance process, the presumption of non-responsibility's function of ensuring proper application of the standard of evidence is particularly important where a recipient has selected the preponderance of the evidence standard, to ensure that in cases where the evidence is in equipoise (*i.e.,* ''50/50'') the result is a determination of non-responsibility. *E.g.,* Vern R. Walker, *Preponderance, Probability, and Warranted Factfinding,* 62 Brooklyn L. Rev. 1075, 1076 (1996) (noting that the traditional formulation of the preponderance of the evidence standard by courts and legal scholars is that the party with the burden of persuasion must prove that a proposition is more probably true than false meaning a probability of truth greater than 50 percent); Neil B. Cohen, *The Gatekeeping Role in Civil Litigation and the Abdication of Legal Values in Favor of Scientific Values,* 33 Seton Hall L. Rev. 943, 954–56 (2003) (noting that the preponderance of the evidence standard applied in civil litigation results in the plaintiff losing the case where the plaintiff's and defendant's positions are ''in equipoise'' *i.e.,* where the evidence presented makes the case ''too close to call'').

[1086] Section 106.45(b)(1)(i); § 106.45(b)(7)(iv).

do so would violate § 106.45(b)(1)(ii). Thus, the Department disagrees with commenters who argue that the presumption contradicts § 106.45(b)(1)(ii) which requires that recipients may not make credibility determinations based on a party's status as a complainant or respondent. The presumption in § 106.45(b)(1)(iv) reinforces the obligation in § 106.45(b)(1)(ii) to refrain from drawing inferences about credibility based on a party's status as a complainant or respondent.

Nothing in the final regulations, including the presumption of non-responsibility, prevents recipients who are medical schools from offering supportive measures to medical students who allege that hospital patients or visitors are sexually harassing them. Section 106.30 defining ''supportive measures'' provides that the recipient may offer such measures either before or after the filing of a formal complaint or where no formal complaint has been filed, for the purpose of restoring the complainant's access to the education program without unreasonably burdening the respondent. The Department cannot comment more specifically as to what supportive measures might be reasonably available to preserve a medical student's equal access and avoid unreasonably burdening a respondent who is a patient or visitor, because each case requires the recipient's independent review and judgment. Where the respondent is a patient or visitor to the recipient's campus or facility and the recipient thus lacks an employment or enrollment relationship with the respondent, a recipient has discretion under § 106.45(b)(3)(ii) to dismiss a formal complaint where the respondent is not enrolled or employed by the recipient; or, also in the recipient's discretion, the recipient may investigate and adjudicate a formal complaint against such a respondent and, for example, issue a no-trespass order following a determination regarding responsibility. Regardless of how a recipient exercises its discretion with respect to formal complaints against respondents over whom a recipient lacks disciplinary authority, medical schools may still comply with the requirements in these final regulations to respond to sexual harassment that occurs in the recipient's education program or activity.

Changes: None.

Recipients Should Apply Dual Presumptions or No Presumption

Comments: Commenters stated that § 106.45(b)(1)(iv) equates to a presumption that the complainant is lying, or a presumption that the alleged harassment never occurred. Commenters asserted if presumptions exist, the provision should direct the recipient to presume, in addition to the respondent's presumption of non-responsibility, that the complainant is credible and making a good faith complaint. One commenter asserted that the Department should provide training to address bias against complainants.

Commenters argued that, because the grievance process is not a criminal proceeding, there should be no presumption in favor of either party. Commenters argued that investigators should have no presumption—either in favor or against either party—when performing their fact-finding duties. Commenters argued that it is unfair to complainants to start an investigation with a presumption of the respondent's innocence, just as it would be unfair to the respondent to start with a presumption of guilt. Commenters argued that in civil and administrative proceedings, both parties start on equal footing in the process with a blank slate in front of the decision-maker, and there is no reason why Title IX proceedings should not treat the parties equally in this manner. Commenters argued that while criminal proceedings give defendants a presumption of innocence, State and Federal victims' rights laws balance even that presumption of innocence to ensure victims are treated fairly. Commenters argued that a civil case requires that the victim and perpetrator appear as equals [1087] and argued that a Title IX investigation should treat both parties equally regarding credibility, with no presumption of innocence or presumption of guilt. One commenter argued that the presumption makes no sense in an educational environment because the complainant and respondent are tied together because of their relationship to the institution, which is different from the relationship between defendants and the government in criminal matters, and the § 106.45(b)(1)(iv) presumption will negatively impact every complainant's education because the complainant will be assumed to be lying just by filing a complaint.

Commenters asserted that currently there is no presumption of non-responsibility for respondents in other student misconduct proceedings, such as theft, cheating, plagiarism, and even physical assault. Commenters argued that if the Department believes such a presumption is important in sexual misconduct cases, then it should require the presumption in all student misconduct cases for the sake of uniformity.

Discussion: The Department declines to adopt commenters' recommendations that recipients should presume that complainants are credible. If the presumption of non-responsibility meant assuming that the respondent is credible, then the Department would agree that such a presumption would be unfair to complainants and should be balanced by an equal presumption of credibility for complainants (or, more reasonably, no presumptions at all). However, the presumption of non-responsibility is *not* a presumption about the respondent's credibility, believability, or truthfulness, and § 106.45(b)(1)(ii) requires recipients not to make credibility determinations based on a party's status as complainant or respondent. A critical feature of a fair grievance process is that Title IX personnel refrain from drawing conclusions or making assumptions about either party's credibility or truthfulness until conclusion of the grievance process; therefore, the Department declines to impose a presumption that either party (or both parties) are credible or truthful. Because the presumption of non-responsibility is not a presumption that a respondent is credible, there is no need for a presumption specific to complainants to balance or counteract the presumption of non-responsibility.[1088] The

[1087] Commenters cited: The National Center for Victims of Crime, ''Criminal and Civil Justice,'' *http://victimsofcrime.org/media/reporting-on-child-sexual-abuse/criminal-and-civil-justice*, for this proposition.

[1088] A presumption specific to a complainant that corresponds to the presumption of a respondent's non-responsibility might, hypothetically, be a presumption that the complainant is not responsible—but such a presumption simply does not apply to a complainant, because a complainant by definition is not alleged to be responsible for misconduct. Alternatively, a presumption specific to a complainant analogous to the presumption of non-responsibility might be that the complainant must be treated as a victim of the respondent's conduct until conclusion of the grievance process (because, as explained above, the presumption of non-responsibility operates to treat a respondent as ''not a perpetrator'' until conclusion of the grievance process, subject to the § 106.44(c) and § 106.44(d) exceptions for emergency removals and administrative leave for employee-respondents). However, the Department does not believe such a presumption would operate to protect complainants in any manner not already provided for in the final regulations. Section 106.44(a) already requires the recipient essentially to treat a complainant as a victim in need of services in the aftermath of suffering sexual harassment (by offering supportive measures and engaging in an interactive discussion with the complainant to arrive at helpful supportive measures to preserve the complainant's equal educational access) even before, or without, a fact-finding process that has determined that the respondent victimized the complainant. Moreover, the grievance process effectively requires a complainant to be treated as a victim in two specific

presumption of non-responsibility does not assume, or allow recipients to act as though, complainants are lying; under the final regulations, recipients must not prejudge the facts at issue, must not draw inferences about credibility based on a party's status as a complainant or respondent, and must objectively evaluate all relevant evidence to reach a determination regarding responsibility.

The procedural rights granted to both parties under § 106.45 ensure that complainants and respondents have equal opportunities to meaningfully participate in putting forth their views about the allegations and their desired case outcome, an essential requirement for due process even in a civil (noncriminal) setting.[1089] The Department disagrees that in civil (as opposed to criminal) trials the plaintiff and defendant ''appear as equals'' in every regard, because even in civil trials the burden of proof generally rests on the plaintiff to prove allegations, not on the defendant to prove non-liability.[1090] Thus, while parties in civil litigation (and under § 106.45) have equal rights to participate in the process (for example, by gathering and presenting evidence), a burden of proof must still be met. The final regulations ensure that *neither* party bears the burden of proof (which remains on the recipient) yet give both parties equal procedural rights throughout the grievance process. The presumption does not create inequality between the complainant and respondent; the presumption reinforces the recipient's burden of proof and correct application of the standard of evidence, neither of which burdens or disadvantages the complainant.

The Department notes that § 106.45(b)(1)(iii) not only requires Title IX personnel to serve without bias for or against complainants or respondents, but also requires training for Title IX personnel, expressly to avoid bias for or against complainants or respondents generally or for or against an individual complainant or respondent. Recipients have discretion as to the content and approaches of such training so long as the requirements of § 106.45(b)(1)(iii) are met.

A presumption of non-responsibility reinforces placement of the burden of proof, proper application of the standard of evidence, and fair treatment of an accused person prior to adjudication of responsibility. These features of a fair grievance process may be beneficial to the legitimacy and reliability of outcomes of non-sexual harassment student misconduct proceedings. However, these final regulations focus only on effectuating Title IX's non-discrimination mandate by improving the perception and reality that recipients' Title IX proceedings reach fair, accurate outcomes; these regulations do not impose requirements on recipients for grievance proceedings other than for Title IX sexual harassment.

Changes: None.

The Adversarial Nature of the Grievance Process

Comments: Commenters asserted that universities already treat both parties equitably and the presumption in § 106.45(b)(1)(iv) escalates the adversarial nature of Title IX proceedings; commenters argued this will raise the financial and emotional toll the grievance process will have on both complainants and respondents. Commenters argued that the proposed regulations ask a university to act as a judicial system, placing an undue burden on the educational system and imposing an unprecedented amount of control over a school's—especially a private school's—ability to develop and implement disciplinary processes in a way that best serves its community and upholds its values, which often include using codes of conduct to educate students rather than be punitive. One commenter opposed the presumption because recipients already train staff and faculty to serve neutrally, bearing in mind the educational context in student misconduct cases, because the student is paying to be in an educational environment, not a prison system. One commenter warned that the presumption of non-responsibility would create an ''inaccessibility to justice.''

Other commenters supported the presumption of non-responsibility, arguing that Title IX proceedings are often highly contested, yet school proceedings are biased against the accused; commenters cited articles showing that over 150 lawsuits have been filed arising from fundamental unfairness in schools' Title IX proceedings.[1091] Commenters argued that a presumption of non-responsibility is essential because recipients have denied respondents the right to know the allegations against them or the identity of the person accusing them, and that respondents have been repeatedly denied the ability to question the complainant, submit exculpatory evidence, or have their witnesses interviewed by the recipient. Commenters argued that respondents have sued recipients for expelling them or finding them responsible without first giving them procedural protections, and that some courts have agreed that some recipients committed due process or fairness violations. One commenter shared information from a university's website promoting adherence to the public awareness campaign ''Start by Believing,'' [1092] which the commenter argued shows the university's bias against accused students. Commenters argued that college environments are highly politicized and college

provisions that apply for complainants' benefit: § 106.45(b)(6)(i)–(ii) provides rape shield protection for complainants—but not respondents—against questions and evidence inquiring into the complainant's prior sexual behavior; and § 106.45(b)(6)(i) allows either party to request that a live hearing (including cross-examination) occurs in separate rooms. While the latter provision applies on its face to both parties, the provision is responsive to public comment informing the Department that complainants already traumatized by sexual violence likely will be traumatized by coming face-to-face with the respondent; no such concerns about the traumatic effect of personal confrontation were raised on behalf of respondents. Thus, where appropriate, the grievance process takes into account the unique needs of complainants, in ways that the Department believes serve Title IX's non-discrimination mandate by protecting complainants *as though* every complainant has been victimized, without unfairness to the respondent. A presumption of non-responsibility does not deprive a complainant of the protections given solely to complainants under § 106.44(a) and § 106.45, nor deprive a complainant of the benefits of the robust procedural rights given equally to both parties during the grievance process.

[1089] *E.g.,* Niki Kuckes, *Civil Due Process, Criminal Due Process,* 25 Yale Law & Pol. Rev. 1, 10–11 (2006) (due process in civil settings ''places central importance on the participation of the affected party in decision-making. Ex parte procedures are the exception, while participatory procedures are the rule. Notice and an opportunity to be heard is, obviously, the principle without which a participatory model of justice cannot work effectively. Unless a party is notified that there is a controversy, it cannot participate in decision-making; unless a party has the opportunity for a hearing, it cannot present its side of the controversy; and unless the decision-maker hears from both parties, there cannot be a meaningful ruling. This is the adversary system's vision of justice.'').

[1090] *E.g.,* Dale A. Nance, *Civility and the Burden of Proof,* 17 Harv. J. of L. & Pub. Pol'y 647, 659 (1994) (in civil litigation ''it remains true that the burden is placed, in the vast majority of contexts, on the person or institution claiming that someone has breached a duty serious enough to warrant legal recognition.''). We reiterate that the final regulations, § 106.45(b)(1)(i), place the burden squarely on the recipient—not on the complainant—to prove that a respondent has committed sexual harassment.

[1091] Commenters cited: Foundation for Individual Rights in Education (FIRE), *Report: As changes to Title IX enforcement loom, America's top universities overwhelmingly fail to guarantee fair hearings for students* (Dec. 18, 2018); *see also* T. Rees Shapiro, *Expelled for sex assault, young men are filing more lawsuits to clear their names,* The Washington Post (Apr. 28, 2017).

administrators and faculty are not objective fact-finders, and a presumption of non-responsibility helps counteract that lack of objectivity.

Discussion: The Department disagrees that the presumption of non-responsibility increases the adversarial nature of Title IX proceedings; Title IX proceedings are often inherently adversarial, due to the need to resolve contested factual allegations. The Department understands commenters' concerns that an adversarial process may take an emotional toll on participants, and the final regulations encourage provision of supportive measures to both parties and give both parties an equal right to select an advisor of choice to assist the parties during a grievance process. The presumption of non-responsibility does not magnify the adversarial nature of the grievance process; rather, the presumption reinforces the recipient's burden of proof, proper application of the standard of evidence, and how a respondent is treated pending the outcome of the grievance process. The Department disagrees that the presumption will lead to ''inaccessibility'' of justice; rather, complainants will benefit from increased legitimacy of recipient determinations when respondents are found responsible, while respondents will benefit from assurance that a recipient cannot treat the respondent as though responsibility has been determined until the conclusion of a fair grievance process. The § 106.45 grievance process, and the final regulations as a whole, impose an obligation on recipients to remain impartial toward parties whose views about the allegations are adverse to each other. To the extent that commenters' concerns about an adversarial process reflect concern that financial inequities can affect the process (for example, where one party can afford to hire an attorney to further the party's interests and the other party cannot afford an attorney), the final regulations permit, but do not require, advisors to be attorneys, allow recipients to limit the active participation of advisors significantly, with the exception of conducting cross-examination at a live hearing in postsecondary institutions,[1093] and do not preclude recipients from offering both parties legal representation.[1094] This approach reflects the reality that recipients are not courts, yet do need to apply a fair, truth-seeking process to resolve factual allegations of Title IX sexual harassment.

The Department recognizes that some recipients expressed concerns that the presumption of non-responsibility, in conjunction with other provisions in § 106.45, requires educational institutions to mimic courts of law. The Department acknowledges, and the final regulations reflect, that recipients' purpose is to educate, not to act as courts. The § 106.45 grievance process is designed for implementation by non-lawyer recipient officials, and the final regulations do not intrude on a recipient's discretion to use disciplinary sanctions as educational tools of behavior modification rather than, or in addition to, punitive measures. However, to effectuate Title IX's non-discrimination mandate, recipients must accurately resolve allegations of sexual harassment in order to identify and address sex discrimination in the recipient's education program or activity. The Department believes the presumption of non-responsibility is important to ensure that recipients do not treat respondents as responsible until conclusion of the grievance process and to reinforce the recipient's burden of proof and proper application of the standard of evidence, and these features will improve the legitimacy and reliability of the outcomes of recipients' Title IX grievance processes.

Changes: None.

Supportive Measures

Comments: Several commenters sought clarification as to whether the presumption in § 106.45(b)(1)(iv) would preclude a recipient from taking interim or emergency actions as dictated by individual circumstances when needed to ensure safety. For example, if a respondent is presumed not to be responsible for stalking a complainant until the end of the grievance process, commenters asked how a recipient could take effective measures to ensure that the respondent will not stalk the complainant prior to the conclusion of the grievance proceeding. Commenters asserted that the presumption appeared to require the recipient to remove the complainant from dorms and classes rather than the respondent, and that the presumption would curtail the ability of recipients to remove harassers and abusers from dorms and classes, which will lead to more sexual assaults because research indicates that most perpetrators are repeat offenders.[1095] Commenters argued that the presumption may discourage schools from providing crucial supportive measures to complainants to avoid being perceived as punishing respondents.[1096]

Commenters argued that the proposed rules not only give respondents a presumption of innocence but also require recipients to provide supportive measures to respondents, constituting unprecedented concern with the well-being of accused harassers above the interests of victims.

Discussion: The § 106.30 definition of ''supportive measures'' permits recipients to provide either party, or both parties, individualized services, without fee or charge, before or after filing a formal complainant, or where no formal complaint has been filed. Section 106.44(a) *obligates* a recipient to offer supportive measures to every complainant, by engaging in an interactive process by which the Title IX Coordinator contacts the complainant, discusses available supportive measures, considers the complainant's wishes with respect to supportive measures, and explains to the complainant the option for filing a formal complaint. Title IX Coordinators are responsible for the effective implementation of supportive measures, and under revised § 106.45(b)(10) if a recipient's response to sexual harassment does *not* include providing supportive measures to a complainant the recipient must specifically document why that response was not clearly unreasonable in light of the known circumstances (for example, because the complainant did not wish to receive supportive measures or refused to discuss supportive measures with the Title IX Coordinator when the Title IX Coordinator contacted the complainant to have such a discussion). Thus, unless a complainant does not desire supportive measures (*i.e.,* refuses the offer of supportive measures),

[1093] Section 106.45(b)(5)(iv); § 106.45(b)(6)(i).

[1094] The Department realizes that only a fraction of postsecondary institutions currently offer to provide both parties in a grievance proceeding with legal representation, but such an option remains available to recipients who choose to address disparity with respect to the financial ability of parties to hire legal representation in the recipient's educational community. *E.g.,* Kristen N. Jozkowski & Jacquelyn D. Wiersma-Mosley, *The Greek System: How Gender Inequality and Class Privilege Perpetuate Rape Culture,* 66 Fam. Relations 1 (2017) (noting that only about three percent of colleges and universities provide victims with legal representation and arguing that colleges and universities should provide free legal representation to both complainants and respondents in campus sexual assault proceedings).

[1095] Commenters cited: David Lisak & Paul Miller, *Repeat Rape and Multiple Offending Among Undetected Rapists,* 17 Violence & Victims 1 (2002), for the proposition that a majority of ''undetected rapists'' were repeat rapists and undetected repeat rapists committed an average of 5.8 rapes each.

[1096] Commenters cited: Michael C. Dorf, *What Does a Presumption of Non-Responsibility Mean in a Civil Context,* Dorf On Law (Nov. 28, 2018), *http://www.dorfonlaw.org/2018/11/what-does-presumption-of-non.html.*

complainants must receive supportive measures designed to restore or preserve the complainant's equal educational access, regardless of whether a grievance process is ever initiated. There is no corresponding obligation to offer supportive measures to respondents; rather, recipients may provide supportive measures to respondents and under § 106.45(b)(1)(ix) the recipient's grievance process must describe the range of supportive measures available to complainants and respondents.

The presumption of non-responsibility, which operates throughout a grievance process, does not prohibit the recipient from providing a complainant with supportive measures, but does reinforce the provision in the § 106.30 definition of ''supportive measures'' that supportive measures are designed to restore or preserve equal access to education ''without unreasonably burdening the other party'' including measures designed to protect a complainant's safety or deter sexual harassment (which includes stalking), but supportive measures cannot be punitive or disciplinary. This does not bar all measures that place *any* burden on a respondent, but only those that ''unreasonably burden'' a respondent (or a complainant). Thus, changing a respondent's class schedule, or forbidding the respondent from communicating with the complainant, may be an appropriate supportive measure for a complainant if such measures do not ''unreasonably burden'' the respondent, and such measures do not violate the presumption of non-responsibility.

To the extent that commenters' concern is that current Department guidance affords recipients more discretion to impose interim measures that in fact do constitute disciplinary actions against the respondent (for example, interim suspensions), the Department has reconsidered that approach and, based on public comments on the NPRM, concluded that the non-discrimination mandate of Title IX is better served by the framework in the final regulations than the approach taken in guidance documents. With respect to disciplinary or punitive actions taken prior to an adjudication factually establishing a respondent's responsibility for sexual harassment, the final regulations circumscribe a recipient's discretion to treat a respondent as though accusations are true before the accusations have been proved.[1097] When applied in the context of these final regulations, the presumption of non-responsibility's reinforcement of the notion that a person accused should not be treated as though accusations are true until the accusations have been proved increases the legitimacy of a recipient's response to sexual harassment, while preserving every complainant's right to supportive measures designed to maintain a complainant's equal educational access and protect a complainant's safety. This approach directly effectuates Title IX's non-discrimination mandate by improving the fairness and accuracy of a recipient's response to sexual harassment occurring in the recipient's education programs or activities.

The Department understands commenters' concerns that restricting a recipient's ability to impose interim discipline poses a risk that perpetrators may repeat an offense because they remain on campus while a grievance process is pending; however, even in situations that do not constitute the kind of immediate threat justifying an emergency removal under § 106.44(c), there are supportive measures short of disciplinary actions that a recipient may take to protect the safety of parties and deter sexual harassment, such as a no-contact order prohibiting communication with the complainant, supervising the respondent, and informing the respondent of the recipient's policy against sexual harassment.[1098]

[1097] The final regulations prohibit a recipient from taking disciplinary action, or other action that does not meet the definition of a supportive measure, against a respondent without following a grievance process that complies with § 106.45. § 106.44(a); § 106.45(b)(1). Through an informal resolution process (which is authorized under § 106.45) a recipient may impose disciplinary sanctions against a respondent without concluding an investigation or adjudication. § 106.45(b)(9). An exception to the requirement not to impose punitive or disciplinary action until conclusion of a grievance process is § 106.44(c), permitting a recipient to remove a respondent from an education program or activity in an emergency situation whether or not a grievance process has been concluded or is even pending. Supportive measures designed to restore or preserve a complainant's equal access to education, protect parties' safety, and/or deter sexual harassment, may be imposed even where such measures burden a respondent, so long as the burden is not unreasonable. § 106.30 (defining ''supportive measures''). Thus, the final regulations are premised on the principle that a recipient must not treat a respondent as responsible prior to an adjudication finding the respondent responsible, yet that principle is not absolute and leave recipients with the ability (and, judged under the deliberate indifference standard, the obligation) to protect and support complainants and respond to emergency threat situations, without unduly, prematurely punishing a respondent based on accusations that have not been factually proved.

[1098] *E.g., Williams* v. *Bd. of Regents of Univ. Sys. of Ga.,* 477 F.3d 1282, 1296 (11th Cir. 2007) (pointing to the recipient's failure to supervise the respondent or inform the respondent of the recipient's expectations of behavior under the recipient's sexual harassment policy as evidence of the recipient's deliberate indifference that subjected the complainant to sexual harassment).

Changes: None.

Miscellaneous Concerns

Comments: At least one commenter asked the Department to add at the end of the presumption provision the language ''. . . respondent is not responsible for the alleged conduct until a determination regarding responsibility is made at the conclusion of the grievance process *or any subsequent litigation.*'' Commenters asked the Department to provide the respondent with a right to remain silent, since the respondent's statements during any investigation or hearing could be used against the respondent at a criminal trial. One commenter recommended inserting the following language: ''The recipient bears the burden of demonstrating that the respondent is responsible for the alleged conduct and may not infer responsibility based solely on the respondent declining to present testimony, evidence, or witnesses in response to a formal complaint.''

Another commenter urged the Department to add to § 106.45(b)(1)(iv) a sentence declaring that it is the obligation of the recipient to prove every element of every alleged offense before the accused student may be found responsible and punished for committing an alleged offense.

Discussion: The Department does not attempt to regulate procedures that apply in private lawsuits and so declines commenters' request that the Department require a recipient to abide by a presumption of non-responsibility until conclusion of ''any subsequent litigation.'' The recipient's obligation is to conclude a grievance process by reaching a determination regarding responsibility when presented with a formal complaint of sexual harassment under Title IX, whether or not litigation arises from the same allegations.

Section 106.6(d) provides that these regulations do not require a recipient to restrict any rights that would otherwise be protected from government action under the U.S. Constitution, which includes the Fifth Amendment right against self-incrimination. To ensure that the determination regarding responsibility is reached in a manner that does not require violation of that constitutional right, we revised § 106.45(b)(6)(i) in the final regulations to provide that a decision-maker cannot draw any inferences about the determination regarding responsibility

based on a party's failure to appear at the hearing or answer cross-examination or other questions. While this applies equally to respondents and complainants, this modification addresses commenters' concerns that a respondent should not be found responsible solely because the respondent refused to provide self-incriminating statements. The Department declines to change § 106.45(b)(1)(iv) to add language about the recipient's burden to prove each element of an offense, because § 106.45(b)(5)(i) places the burden of proof on the recipient.

Changes: We revised § 106.45(b)(6)(i) of the final regulations to provide that a decision-maker cannot draw any inferences about the determination regarding responsibility based on a party's failure to appear at the hearing or answer cross-examination or other questions.

Section 106.45(b)(1)(v) Reasonably Prompt Time Frames

Support

Comments: A number of commenters expressed support for this section. Some did not expand upon the reasons for their support. Others, primarily some college and university commenters, expressed particular support for eliminating the 60-day time frame contained in withdrawn Department guidance. Some commenters identified concerns with a 60-day time frame, such as asserting that: It does not reflect the complex nature of these cases, such as multiple parties, various witnesses, time to obtain evidence, and school breaks; it is arbitrary and hard to adhere to while providing due process for all; it interferes with the time parties need to provide evidence and to make their case; it has not been required by courts; and it increases the risks of decisions based on conjecture or gender or racial stereotypes. Other commenters contended that eliminating such a constrained timeline would be beneficial, by for instance allowing for more thorough investigations, collection of more evidence, and added accommodation of disabilities.

A number of the supportive commenters also noted support more generally for the NPRM's flexibility regarding the time to conclude Title IX investigations and extensions for good cause. Some emphasized that prompt resolution is important, but contended that various factors may delay proceedings (such as police investigations, witness availability, school breaks, faculty sabbaticals) and asserted that fairness demands thoroughness. According to these commenters, § 106.45(b)(1)(v) appropriately accounts for schools' unique attributes (for example, their size, population, location, or mission), recognizes that complex matters may not lend themselves to set deadlines, and acknowledges that delays may sometimes be necessary, especially with a concurrent criminal investigation. Likewise, some commenters expressed support for good cause extensions for a related criminal proceeding in the belief that students should not be forced to choose between participating in campus proceedings and giving up their right to silence in criminal proceedings.

Discussion: The Department appreciates the commenters' support for § 106.45(b)(1)(v) under which a recipient's grievance process must include reasonably prompt time frames for concluding the grievance process, including appeals and any informal resolution processes, with temporary delays and limited extensions of time frames permitted only for good cause. The Department agrees with commenters that this provision appropriately requires prompt resolution of a grievance process while leaving recipients flexibility to designate reasonable time frames and address situations that justify short-term delays or extensions. This is the same recommendation made in the 2001 Guidance, which advised recipients that grievance procedures should include ''Designated and reasonably prompt time frames for the major stages of the complaint process.'' [1099]

Changes: None.

Opposition—Lack of Specified Time Limit

Comments: Many commenters expressed opposition to § 106.45(b)(1)(v) because of concerns about the absence of specific time frames for completing investigations and adjudications, including appeals. Commenters asserted that schools could delay investigations indefinitely or for unspecified periods of time and that students might wait months or years for resolution of their complaint. Commenters identified a number of other drawbacks they felt would result from uncertain, indefinite time frames with possible delays. Commenters asserted that this provision would: Make it less likely that survivors will report, less likely parties will receive justice, and more likely that students will lose faith in the reporting process; eliminate the mechanism for discovering and correcting harassment as early and effectively as possible; result in inconsistent resolution time frames at different schools; and only further delay the already lengthy process to reach resolution of sexual misconduct cases (for example, long unexplained delays even under the prior guidance with a 60-day time frame). Some commenters noted other concerns about the proposed time frames and potential delays or extensions.

Commenters asserted that indefinite time frames and probable delays would create uncertainty and a longer process that would harm survivors' well-being, safety, and education, and subject them to unreasonable physical, mental, time, and cost demands. Some felt that the proposal would: Deny due process; exacerbate survivors' emotional distress; heighten the chances survivors would drop their cases or drop out of school as investigations drag on; increase risks of self-harm or suicide as delays might take too long for schools to provide prompt supports; prolong the period of survivors' exposure to their attackers; and add costs for counseling services or medical assistance, which would especially burden low-income students. Other commenters emphasized their belief that the indefinite time frames and delays would harm the mental health and education of both complainants and respondents, by adding uncertainty and stress for lengthy periods without resolution, exoneration, or closure. Other commenters expressed concerns about increasing safety risks to all students by allowing a hostile environment to continue unchecked, and assailants to harass, assault, or retaliate against their victims or others during the long waiting period. One commenter expressed concern that the NPRM would permit delays even when a respondent poses a clear threat to the campus community.

Some commenters contended that delays or extensions may result in: Information, memory, and witnesses being lost; less, lost, or corrupted evidence, including fewer witnesses who may no longer be available or on campus (for example, students or short-term staff); and parties who have left school or graduated impairing schools from investigating or resolving concerns. Other commenters believed that a lengthier process and delays would: Signal that schools do not care about the safety or education of victims; make it more likely that a victim will be identified or lose confidentiality; force survivors to rely on supportive measures for longer than they may be adequate or effective; allow a respondent's refusal to cooperate to

[1099] 2001 Guidance at 20.

delay a case indefinitely; permit recipients to place respondents on administrative leave to further delay an investigation; and particularly harm schools' short-term staff or contractors. A few commenters asserted that delays have increased in resolving Title IX cases since the Department withdrew the 2011 Dear Colleague Letter, and at least one commenter expressed concern that the Department failed to offer data that a 60-day time frame had compromised accuracy and fairness.

Discussion: The Department disagrees that this provision allows recipients to conduct grievance processes without specified time frames, or allows indefinite delays. This provision specifically requires a recipient's grievance process to include reasonably prompt time frames; thus, a recipient must resolve each formal complaint of sexual harassment according to the time frames the recipient has committed to in its grievance process. Any delays or extensions of the recipient's designated time frames must be ''temporary'' and ''limited'' and ''for good cause'' and the recipient must notify the parties of the reason for any such short-term delay or extension. This provision thus does not allow for open-ended or indefinite grievance processes.

Under existing regulations at 34 CFR 106.8(b), in effect since 1975, recipients have been required to ''adopt and publish grievance procedures providing for prompt and equitable resolution of student and employee complaints alleging'' sex discrimination. The final regulations require more of recipients than do existing regulations, because § 106.45(b)(1)(v) requires recipients to include ''reasonably prompt time frames'' in the recipient's grievance process, rather than simply ''providing for prompt'' resolution. Further, the final regulations specify that the time frames designated by the recipient must account for conclusion of the entire grievance process, including appeals and any informal resolutions processes. Thus, no avenue for handling a formal complaint of sexual harassment is subject to an open-ended time frame.

Any time frame included by the recipient must be ''reasonably prompt,'' where the reasonableness of the time frame is evaluated in the context of the recipient's operation of an education program or activity. The Department believes that conclusion of the grievance process must be reasonably prompt, because students (or employees) should not have to wait longer than necessary to know the resolution of a formal complaint of sexual harassment; any grievance process is difficult for both parties, and participating in such a process likely detracts from students' ability to focus on participating in the recipient's education program or activity. Furthermore, victims of sexual harassment are entitled to remedies to restore or preserve equal access to education, and while supportive measures should be implemented as appropriate designed to achieve the same ends while a grievance process is pending, remedies *after* a respondent is found responsible may consist of measures not permissible as supportive measures. Thus, prompt resolution of a formal complaint of sexual harassment is necessary to further Title IX's non-discrimination mandate. At the same time, grievance processes must be fair and lead to reliable outcomes, so that sexual harassment in a recipient's education program or activity is accurately identified and remedied. The final regulations prescribe procedures and protections throughout the § 106.45 grievance process that the Department has concluded are necessary to ensure fairness and accuracy. The Department believes that each recipient is in the best position to balance promptness with fairness and accuracy based on the recipient's unique attributes and the recipient's experience with its own student disciplinary proceedings, and thus requires recipients to include ''reasonably prompt time frames'' for conclusion of a grievance process that complies with these final regulations.

The Department acknowledges that withdrawn Department guidance referred to a 60-day time frame for sexual harassment complaints. For recipients who determine that 60 days represents a reasonable time frame under which that recipient can conclude a grievance process that complies with § 106.45, a recipient has discretion to include that time frame under the final regulations. For recipients who determine that a shorter or longer period of time represents the time frame under which the recipient can conclude a grievance process, the recipient has discretion to include that time frame. The Department emphasizes that what a recipient selects as a ''reasonable'' time frame is judged in the context of the recipient's obligation to provide students and employees with education programs and activities free from sex discrimination, so that the recipient's selection of time frames must reflect the goal of resolving a grievance process as quickly as possible while complying with the procedures set forth in § 106.45 that aim to ensure fairness and accuracy. Because the final regulations allow short-term delays and extensions for good cause, recipients need not base designated time frames on, for example, the most complex, time-consuming investigation that a formal complaint of sexual harassment *might* present. Rather, the recipient may select time frames under which the recipient is confident it can conclude the grievance process in most situations, knowing that case-specific complexities may be accounted for with factually justified short-term delays and extensions.

Commenters correctly noted that this provision allows different recipients to select different designated time frames and thus a grievance process may take longer at one school than at another. The Department believes that each recipient's commitment to a designated, reasonable time frame known to its students and employees,[1100] where each recipient has determined what time frame to designate by considering its own unique educational community and operations, is more effective than imposing a fixed time frame across all recipients because it results in each recipient being held accountable for complying with time frames the recipient has selected (and made known to its educational community), while ensuring that *all* recipients select time frames that are reasonably prompt.

The non-exhaustive list in § 106.45(b)(1)(v) of factors that may constitute good cause for short-term delays or extensions of the recipient's designated time frames relate to the fundamental fairness of the proceedings. Delays caused solely by administrative needs, for example, would be insufficient to satisfy this standard.[1101] Furthermore, even where good cause exists, the final regulations make clear that recipients may only delay the grievance process on a temporary basis for a limited time. A respondent (or other party, advisor, or witness) would not be able to indefinitely delay a Title IX proceeding by refusing to cooperate. While recipients must attempt to accommodate the schedules of parties and witnesses throughout the grievance

[1100] Section 106.45(b)(1)(v) (requiring a recipient's grievance process to designate reasonably prompt time frames); § 106.8 (requiring recipients to notify students and employees (and others) of its non-discrimination policy and its grievance process for resolution of formal complaints of sexual harassment).

[1101] The Department notes that temporary delay of a hearing caused by a recipient's need to provide an advisor to conduct cross-examination on behalf of a party at a hearing as required under § 106.45(b)(6)(i) *may* constitute good cause rather than mere administrative convenience, although a recipient aware of that potential obligation ought to take affirmative steps to ascertain whether a party will require an advisor provided by the recipient or not, in advance of the hearing, so as not to delay the proceedings.

process in order to provide parties with a meaningful opportunity to exercise the rights granted to parties under these final regulations, it is the recipient's obligation to meet its own designated time frames, and the final regulations provide that a grievance process can proceed to conclusion even in the absence of a party or witness.

The Department understands commenters' concerns that the longer a grievance process is pending, the more risk there is of loss of information, evidence, and availability of witnesses. These concerns are addressed through requiring that a grievance process is concluded within a ''reasonably prompt'' time frame, yet in a manner that applies procedures designed to ensure fairness and accuracy. Administrative leave under § 106.44(d) of the final regulations would not preclude an investigation from proceeding; regardless of whether a party has been voluntarily or involuntarily separated from the recipient's campus, the recipient can provide for the party to return to participate in the grievance process, including with safety measures in place for the other parties and witnesses. Under § 106.45(b)(6)(i) a postsecondary institution has discretion to hold a live hearing virtually, or to allow any participant to participate remotely, using technology. Where a party refuses to participate, the recipient may still proceed with the grievance process (though the recipient must still send to a party who has chosen not to participate notices required under § 106.45; for instance, a written notice of the date, time, and location of a live hearing).

The Department disagrees that § 106.45(b)(1)(v) will jeopardize the safety of complainants or the educational environment, or that complainants will feel deterred from filing formal complainants because the grievance process might drag on indefinitely. As noted above, supportive measures designed to protect safety and deter sexual harassment are available during the pendency of the grievance process.[1102] Furthermore, under § 106.44(c) recipients may remove a respondent on an emergency basis without awaiting conclusion of a grievance process. As also noted above, the final regulations do not permit any recipient's grievance process to go on indefinitely.

[1102] Section 106.30 (defining ''supportive measures''); § 106.44(a) (requiring recipients to offer supportive measures to complainants, with or without the filing of a formal complaint).

With respect to a commenter's assertion that the Department did not provide data to show that the 60-day time frame has compromised accuracy and fairness, commenters on behalf of complainants and respondents have noted that the grievance process often takes too long, which may indicate that a 60-day time frame was not a reasonable expectation for recipients to conclude a fair process, and some comments on behalf of recipients expressed that many of the cases that go through a Title IX proceeding present complex facts that require more than 60 days for a recipient to conclude a fair process. For recipients who determine that 60 days (or less) is a reasonable time frame under which to conclude a fair process, recipients may designate such a time frame as part of their § 106.45 grievance process.

Changes: To ensure that reasonably prompt time frames are included for every stage of a grievance process, we have revised § 106.45(b)(1)(v) of the final regulations to apply the reasonably prompt time frame requirement to informal resolution processes, if recipients choose to offer them, and we have removed the phrase ''if the recipient offers an appeal'' because under the final regulations, § 106.45(b)(8), appeals are mandatory, not optional.

Effects on Recipients

Comments: Other commenters expressed opposition to § 106.45(b)(1)(v) because they believed it would weaken schools' accountability and incentives for prioritizing sexual harassment complaints and would increase the chances that reports are brushed under the rug or not promptly and appropriately handled. Some commenters noted concerns that the provision is too vague to be clear, effective, and enforceable, and would give schools too much leeway to decide what is reasonably prompt. Other commenters expressed concern that schools already have incentives to delay, such as to protect their reputations or resources, and so might drag out investigations until one or both parties graduate, a survivor drops the case, or until after a season ends or a major game is played, in cases involving athletes. A number of commenters called for set time frames for clearer expectations and accountability. One commenter felt that a set time frame would also leave schools less vulnerable to lawsuits or complaints.

Discussion: The Department does not believe that this provision perversely incentivizes recipients to sweep allegations of sexual harassment under the rug, gives recipients the freedom to simply indefinitely delay proceedings against the interests of fairness and justice, or increases the risk of litigation against recipients. The Department believes that § 106.45(b)(1)(v) strikes an appropriate balance between imposing clear constraints on recipients in the interests of achieving Title IX's purpose, and ensuring they have adequate flexibility and discretion to select reasonably prompt time frames in a manner that each recipient can apply within its own unique educational environment. We also believe that moving away from a strict timeline that does not permit short-term extensions will help to address pitfalls and implementation problems that commenters have recounted in recipients' Title IX proceedings under the previous guidance, where some recipients felt pressure to resolve their grievance processes within 60 days regardless of the circumstances of the situation. The Department believes that recipients are in the best position to balance the interests of promptness, and fairness and accuracy, within the confines of such a decision resulting in ''reasonably prompt'' conclusion of grievance processes. This provision does not permit a recipient to conduct a grievance process without a ''set'' time frame; to the contrary, this provision requires a recipient to designate and include in its grievance process what its set time frame will be, for each phase of the grievance process (including appeals and any informal resolution process). Permitting recipients to set their own reasonably prompt time frames increases the likelihood that recipients will meet the time frames they have designated and thereby more often meet the expectations of students and employees as to how long a recipient's grievance process will take. Requiring recipients to notify the parties whenever the recipient applies a short-term delay or extension will further promote predictability and transparency of recipients' grievance process. Prescribing that any delay or extension must be for good cause, and must be temporary and limited in duration, ensures that no grievance process is open-ended and that parties receive a reasonably prompt resolution of each formal complaint.

Changes: None.

Concerns Regarding Concurrent Law Enforcement Activity

Comments: Some commenters opposed to this provision emphasized concerns about permitting delay for concurrent ongoing criminal investigations. Commenters asserted

that criminal investigations can and often do take months or years because of rape kit backlogs or lengthy DNA analyses, and expressed concern about allowing schools to delay action for unspecified and lengthy periods. These commenters felt this would force students to wait months or longer for resolution as they suffer serious emotional and academic harm when they need timely responses and support to continue in school and to heal from their trauma. Some commenters felt that it would deny due process in school Title IX proceedings, ignore schools' independent Title IX obligations to remedy sex-based harassment, and allow perpetrators to evade responsibility or consequences or to perpetrate again. A number of commenters were concerned that schools delaying or suspending investigations at the request of law enforcement or prosecutors creates a safety risk to the survivor and to other students, by allowing assailants to harass or assault survivors or others during the waiting period. Commenters also asserted that Title IX and criminal justice proceedings have different purposes, considerations, rules of evidence, burdens of proof, and outcomes, and felt as a result that their determinations are separate and independent from each other. Some of these commenters also argued that schools should prioritize and not delay a complainant's educational access and can provide supportive measures that are not available from the police.

A number of commenters emphasized concerns about problematic incentives and consequences that they believed would result from permitting delays for concurrent ongoing criminal investigations. For example, some commenters felt that such a provision would incentivize survivors not to report to law enforcement, since it would delay resolution of their Title IX case, thereby increasing safety risks to both survivors and school communities. Other commenters believed this provision would force survivors who pursue a police investigation to wait a long time for it to end before receiving accommodations from their school or to drop their criminal case to get measures only schools can provide. At least one commenter expressed concern that students would be forced to bring civil cases to protect themselves during a criminal investigation. Many others asserted that it would force elementary and secondary school students to wait months or even longer for any resolution to their complaints as most school employees are legally required to report child sexual abuse to the police as mandatory reporters. A number of these commenters expressed concern that this might impede elementary and secondary schools from implementing critical safety measures for child victims until a criminal investigation is completed.

Discussion: We acknowledge the concerns raised by some commenters specifically relating to recipients' flexibility under § 106.45(b)(1)(v) to temporarily delay the grievance process due to concurrent law enforcement activity. The Department acknowledges that the criminal justice system and the Title IX grievance process serve distinct purposes. However, the two systems sometimes overlap with respect to allegations of conduct that constitutes sex discrimination under Title IX and criminal offenses under State or other laws. By acknowledging that concurrent law enforcement activity *may* constitute good cause for short-term delays or extensions of a recipient's designated time frames, this provision helps recipients navigate situations where a recipient is expected to meet its Title IX obligations while intersecting with criminal investigations that involve the same facts and parties. For example, if a concurrent law enforcement investigation uncovers evidence that the police plan to release on a specific time frame and that evidence would likely be material to the recipient's determination regarding responsibility, then the recipient may have good cause for a temporary delay or limited extension of its grievance process in order to allow that evidence to be included as part of the Title IX investigation. Because the final regulations only permit ''temporary'' delays or ''limited'' extensions of time frames even for good cause such as concurrent law enforcement activity, this provision does not result in protracted or open-ended investigations in situations where law enforcement's evidence collection (*e.g.,* processing rape kits) occurs over a time period that extends more than briefly beyond the recipient's designated time frames.[1103]

In response to commenters concerned that concurrent law enforcement activity is prevalent especially in sexual misconduct situations in elementary and secondary schools (where mandatory child abuse reporting laws often require reporting sexual misconduct to law enforcement), § 106.45(b)(1)(v) benefits recipients and young victims in such situations by allowing circumstance-driven flexibility for schools and law enforcement to coordinate efforts so that sexual abuse against children is effectively addressed both in terms of the purposes of the criminal justice system and Title IX's non-discrimination mandate. While a grievance process is pending, recipients may (and must, if refusing to do so is clearly unreasonable under the circumstances) implement supportive measures designed to ensure a complainant's equal access to education, protect the safety of parties, and deter sexual harassment.

Changes: None.

Consistency With Other Federal Law

Comments: Some commenters raised concerns that allowing temporary delays or limited extensions conflicts with Title IX and Clery Act requirements that schools provide ''prompt'' resolution of complaints. Similarly, some commenters felt that permitting extensions for language assistance or disability accommodations is inconsistent with statutory obligations to provide these in a timely manner under Title VI, the Equal Educational Opportunities Act of 1974 (''EEOA''), ADA, and Section 504. Commenters also expressed concerns that the final regulations would permit delays for far longer than is permitted of employers under Title VII.

Discussion: Section 106.45(b)(1)(v) requires recipients to have good cause for any short-term delays or extensions, with written notice to the parties and an explanation for the delay or extension. Because the overall time frame must be reasonably prompt, and any delay or extension must be temporary or limited, § 106.45(b)(1)(v) poses no conflict with the Clery Act or other laws that require ''prompt'' resolution of processes designed to redress sexual harassment or sex offenses.[1104] Neither does application of short-term delays or extensions violate the ''promptness'' requirement that Title IX regulations have required since 1975; under the final regulations the grievance process still must be concluded in a ''reasonably prompt'' time frame and any delay or extension, even for good cause, may only be brief in length.

Recipients must still satisfy their legal obligation to provide timely auxiliary

[1103] *E.g., Williams* v. *Bd. of Regents of Univ. Sys. of Ga.,* 477 F.3d 1282· 1297 (11th Cir. 2007) (''[T]he pending criminal charges did not affect [the university's] ability to institute its own procedures'' and did not justify university waiting 11 months for outcome of the criminal matter before finishing its own investigation and conducting its own disciplinary proceeding against sexual misconduct respondents).

[1104] For further discussion see the ''Clery Act'' subsection of the ''Miscellaneous'' section of this preamble.

aids and services and reasonable accommodations under the ADA, Section 504, and Title VI, and should reasonably consider other services such as meaningful access to language assistance. With respect to the EEOA, Title VII, or other laws that may impose time frames on the same grievance process that recipients must apply under § 106.45, these final regulations *permit* a recipient to apply short-term delays or extensions for good cause. These final regulations do not *require* a recipient to apply short-term delays or extensions, and thus if a recipient is precluded by another law from extending a time frame the recipient is not required to do so under these final regulations.

Changes: None.

Alternative Proposals

Comments: A number of commenters suggested alternative approaches to address their concerns about the proposed time frames. Commenters also suggested other approaches such as: Eliminating any time frame requirement for recipients; barring delays due to an ongoing criminal investigation; prohibiting extensions for refusal to cooperate, lack of witnesses, or the need for language assistance or accommodation of disabilities; setting a time limit for law enforcement delays that is brief, such as three to ten days; setting a time limit for temporary delays and allowing delays for concurrent law enforcement activity only if requested by external municipal entities to gather evidence and for not more than ten days except when specifically requested and justified; and narrowing delay for law enforcement activity to only when absolutely necessary like when a school cannot proceed without evidence in law enforcement's exclusive domain (for example, a DNA sample to identify an unknown assailant). Other suggestions raised by commenters included: Requiring supportive measures while criminal and school investigations are ongoing; and ensuring schools and criminal justice agencies set protocols for concurrent investigations that are responsive to the complexity of these situations and to each entity's duties and timelines.

Discussion: The Department believes that recipients are in the best position to designate ''reasonably prompt time frames'' that balance the need to conclude Title IX grievance processes promptly with providing the fairness and accuracy that these final regulations require. For reasons discussed above, prompt resolution is important to serve the purpose of Title IX's non-discrimination mandate, and the Department thus declines to remove the requirement that recipients conclude grievance processes promptly. For reasons discussed above, the Department believes that categorically prohibiting delays based on concurrent law enforcement investigations would deprive recipients of flexibility to work effectively and appropriately with law enforcement where the purpose of both the criminal justice system and the Title IX grievance process is to protect victims of sexual misconduct, and this discretion is appropriately balanced by not permitting a recipient to apply a delay or extension (even for good cause) that is not ''temporary'' or ''limited.'' For similar reasons, the Department declines to specify a particular number of days that constitute ''temporary'' delays or ''limited'' extensions of time frames. State laws that do specify such maximum delays may be complied with by recipients without violating these final regulations, because § 106.45(b)(1)(v) allows but does not require a recipient to implement short-term delays even for good cause. The Department also reiterates that nothing in the final regulations precludes recipients from offering supportive measures to one or both parties while the grievance process is temporarily delayed, and revised § 106.44(a) obligates a recipient to offer supportive measures to complainants, with or without a grievance process pending.

The Department declines to allow short-term delays on the basis of working with a concurrent law enforcement effort only where the law enforcement agency specifically requests that the recipient delay, or only where the school and law enforcement agency have a memorandum of understanding or similar cooperative agreement in place. Recipients' obligations under Title IX are independent of recipients' obligations to cooperate or coordinate with law enforcement with respect to investigations or proceedings affecting the recipient's students or employees. These final regulations do not attempt to govern the circumstances where such cooperation or coordination may be required under other laws, or advisable as a best practice, but § 106.45(b)(1)(v) gives recipients flexibility to address situations that overlap with law enforcement activities so that potential victims of sex offenses are better served by both systems while ensuring that a recipient's grievance process is not made dependent on a concurrent law enforcement investigation, and thus a Title IX grievance process will still be concluded promptly even if the law enforcement matter is still ongoing.

Changes: None.

Clarification Requests

Comments: Commenters requested clarifications of certain terms used in this provision, including the terms reasonably prompt, absence of the parties or witnesses, administrative delay, limited extensions, and temporary delay. Commenters also requested clarification as to what does or does not constitute good cause for delay, such as with respect to administrative needs or accommodation of disabilities, as well as when and for how long schools should delay for law enforcement activity. Some commenters asked for more clarity about the limits on extensions, the mechanisms to end delays when the advantages are outweighed by the benefits of resolution, the steps schools must take to protect students regardless of law enforcement activity, and what OCR will assess in determining if a grievance process is prompt. Other commenters asked for a clarification that the list of examples of good cause for delay are not exhaustive, and several commenters requested clarifying that schools can excuse complainants from participating in the process for study abroad or other academic programming involving a significant time away from campus.

Discussion: As clarified above, the Department believes that recipients should retain flexibility to designate time frames that are reasonably prompt, and what is ''reasonable'' is a decision made in the context of a recipient's purpose of providing education programs or activities free from sex discrimination, thus requiring recipients to designate time frames taking into account the importance to students of resolving grievance processes so that students may focus their attention on participating in education programs or activities, and the reality that every academic term (*e.g.,* an academic quarter, semester, trimester, etc.) is important to a student's progress toward advancing a grade level or completing a degree. A recipient must balance the foregoing realities with the need for recipients to conduct grievance processes fairly in a manner that reaches reliable outcomes, meeting the requirements of § 106.45, in deciding what time frames to include as ''reasonably prompt'' in a recipient's grievance process for formal complaints of sexual harassment under Title IX.

This provision's reference to the absence of parties or witnesses has its ordinary meaning, suggesting that the reasons for a party or witness's absence

is a factor in a recipient deciding whether circumstances constitute ''good cause'' for a short-term delay or extension. With respect to administrative delay, we intend that concept to include delays caused by recipient inefficiencies or mismanagement of their own resources, but not necessarily circumstances outside the recipient's control (*e.g.,* if technology relied on to conduct a live hearing is interrupted due to a power outage). We intend delay to have its ordinary meaning; a delay is a postponement of a deadline that would otherwise have applied. We appreciate the opportunity to clarify here that the examples of good cause listed in § 106.45(b)(1)(v) of the final regulations are illustrative, not exhaustive. We defer to recipients' experience and familiarity with the cases recipients investigate to determine whether other factual circumstances present good cause that could justify extending the time frame. Further, we wish to emphasize that any delay or extension contemplated by § 106.45(b)(1)(v) must be on a limited and temporary basis, regardless of the good cause that exists. The Department trusts recipients to make sound determinations regarding the length of a brief delay; we believe recipients are in the best position to make these decisions as they may be closer to the parties and have a deeper understanding of how to balance the interests of promptness, fairness to the parties, and accuracy of adjudications in each case. As noted above, a recipient's response to sexual harassment must include offering supportive measures to a complainant (with or without a grievance process pending). While a recipient is not obligated in every situation to offer supportive measures to a respondent, if refusing to offer supportive measures to a respondent (for instance, where a live hearing date that falls on a respondent's final examination date results in a respondent needing to reschedule the examination) would be clearly unreasonable in light of the known circumstances such a refusal could also violate these final regulations.

Changes: None.

Section 106.45(b)(1)(vi) Describe Range or List of Possible Sanctions and Remedies

Comments: Several commenters support this provision because it furthers due process. One commenter supported § 106.45(b)(1)(vi) because it will increase parties' understanding of the proceedings and decrease the possibility of arbitrary, disproportionate, or inconsistent sanctions. A group of concerned attorneys and educators commented that consistent standards, such as this provision, are necessary to ensure a fair process will benefit everyone. Another commenter expressed support for § 106.45(b)(1)(vi) because it promotes parity between parties; requiring recipients' grievance procedures to contain significant specificity is key because individuals must have a clear understanding of the procedures and possible penalties for wrongdoing. One commenter agreed that full and proper notice to all students, faculty, and other personnel is critical to the effective implementation of Title IX and therefore consistent with due process, so a recipient's grievance procedures must describe the range of possible sanctions and remedies that the recipient may implement following any determination of responsibility.

Discussion: The Department agrees with commenters that it is important to provide to all students, faculty, and other personnel a clear understanding of the possible remedies and sanctions under a recipient's Title IX grievance process. The Department agrees with commenters who asserted that § 106.45(b)(1)(vi) furthers due process protections for both parties and lessens the likelihood of ineffective remedies and arbitrary, disproportionate, or inconsistent disciplinary sanctions. For consistency of terminology, the final regulations use ''disciplinary sanctions'' rather than ''sanctions'' including in this provision, to avoid ambiguity as to whether a ''sanction'' differed from a ''disciplinary sanction.'' Throughout the NPRM and these final regulations, where reference is made to disciplinary sanctions, the provisions are calling attention to the disciplinary nature of the action taken by the recipient, and the phrase ''disciplinary sanctions'' is thus more specific and accurate than the word ''sanctions.'' Because the intent of this provision is to provide clarity for recipients and their educational communities, we have also revised this provision to state that the recipient's grievance process must describe ''or list'' the range of disciplinary sanctions, to clarify that complying with this provision also complies with the Clery Act.[1105]

Changes: We have revised the final regulations to use the phrase ''disciplinary sanctions'' consistently, replacing ''sanctions'' with ''disciplinary sanctions'' in provisions such as § 106.45(b)(1)(vi). We have also revised § 106.45(b)(1)(vi) to state that a recipient may describe the range of possible sanctions and remedies or list the possible disciplinary sanctions and remedies that the recipient may implement following any determination of responsibility.

Comments: A number of commenters opposed § 106.45(b)(1)(vi). One commenter expressed concern that this provision is too restrictive because disciplinary actions are often implemented in a number of creative ways that are specific to each individual case. One commenter expressed concern that the proposed regulations, including this provision, are unconstitutional, since the decisions to be made by the ''decision-maker'' determining responsibility and sanctions against a student are those that must be made by the judicial branch of government acting under Article III of the U.S. Constitution, and not by the executive branch, or by the recipient.

Several commenters expressed concern that recipients should not be required to describe a range of sanctions. One commenter expressed concern that each type of employee at their university has their own grievance procedures and penalties and appeals process, and the university does not have the expertise to know in certain circumstances how a faculty member's tenure would be implicated. One university commented that notice of investigation letters may exacerbate tense situations because the practice will be to describe every possible sanction, including termination, even when the possibility of some sanctions is remote or would contravene good practice.

Several commenters proposed modifications to § 106.45(b)(1)(vi). One commenter urged the Department to offer examples of the types of remedies it would find equitable, and the types of sanctions it would find acceptable, asserting that at a minimum, the Department should make clear that it defers to the educational judgment of schools to take into consideration the myriad factors impacting the elementary and secondary school environment, from age to developmental level and beyond, in implementing the ''equitability'' requirement. One commenter suggested the language be altered due to the importance of ensuring that any sanction imposed be proportional to the offense committed, and noted that this principle reflects our societal understanding of punishment, as reflected in the U.S. Constitution's prohibition on ''cruel and unusual punishment.'' The commenter argued that the proposed language would allow

[1105] For further discussion see the ''Clery Act'' subsection of the ''Miscellaneous'' section of this preamble.

minor violations of university policy to be punished in extreme, disproportionate ways and would also allow for different violations to be punished in the same manner as long as the punishment had been described in the grievance process. One commenter suggested that this provision should be altered to clarify that collective punishment is unacceptable to the extent that it punishes individuals or organizations that did not perpetrate, or were not found responsible for perpetrating, the offense in question.

One commenter suggested that recipients should be required to list any factors that will or will not be considered in issuing a sanction. One commenter suggested the Department should make clear how specific the range of sanctions must be and that recipients be permitted to state, for example, ''suspension of varying lengths'' rather than having to itemize every possible length of a suspension.

Discussion: The Department proposed § 106.45(b)(1)(vi) to provide consistency, predictability, and transparency as to the range of consequences (both in terms of remedies for complainants, and disciplinary sanctions for respondents) students can expect from the outcome of a grievance process. A transparent grievance process benefits all parties because they are more likely to trust in, engage with, and rely upon the process as legitimate. After a respondent has been found responsible for sexual harassment, any disciplinary sanction decision rests within the discretion of the recipient, and the recipient must provide remedies to the complainant designed to restore or preserve the complainant's educational access, as provided for in § 106.45(b)(1)(i). Both parties should be advised of the potential range of remedies and disciplinary sanctions.

The Department disagrees that the decision-maker imposing disciplinary sanctions must be a judge appointed under Article III of the Constitution. As discussed in the ''Adoption and Adaption of the Supreme Court's Framework to Address Sexual Harassment'' section of this preamble, Title IX is a Federal civil rights law, and the Supreme Court has judicially implied a private right of action under Title IX, and in private litigation in Federal courts a Federal judge may impose remedies to effectuate the purposes of Title IX. However, the Title IX statute expressly authorizes Federal agencies, such as the Department, to administratively enforce Title IX and require recipients to take remedial action following violations of Title IX or regulations implementing Title IX. Such administrative enforcement of Title IX does not require the participation or direction of an Article III Federal judge. In these final regulations, the Department has determined that the Department's interest in effectuating Title IX's non-discrimination mandate necessitates setting forth a predictable, fair grievance process for resolving allegations of Title IX sexual harassment and requiring recipients to provide remedies to complainants if a respondent is found responsible. The Department has determined that administrative enforcement of Title IX does not require overriding recipients' discretion to make decisions regarding disciplinary sanctions, and thus these final regulations focus on ensuring that respondents are not punished or disciplined unless a fair process has determined responsibility, but respects the discretion of State and local educators to make disciplinary decisions pursuant to a recipient's own code of conduct.

The Department acknowledges commenters' concerns that each type of employee at their university has their own grievance procedures, penalties, and appeals process as well as concerns about whether tenure may be implicated, but disagrees that this presents a problem under § 106.45(b)(1)(vi). The Department believes that simply providing a *range* of sanctions to respondents is feasible despite the reality of the different grievance procedures and penalties and appeals that may apply depending on whether a recipient's employee is tenured, and the final regulations permit the recipient to either list the possible disciplinary sanctions or describe the range of possible disciplinary sanctions. Describing a range of disciplinary sanctions should not be difficult for recipients, particularly regarding a maximum sanction.

Nothing in the final regulations prevents the recipient from communicating that the described range is required by Federal law under Title IX and that the published range is purely for purposes of notice as to the possibility of a range of remedies and disciplinary sanctions and does not reflect the probability that any particular outcome will occur.

The Department does not believe offering examples of types of appropriate disciplinary sanctions is necessary because as discussed above, whether and what type of sanctions are imposed is a decision left to the sound discretion of recipients. Similarly, these final regulations do not impose a standard of proportionality on disciplinary sanctions. Some commenters raised concerns that disciplinary sanctions against respondents found responsible are too severe, not severe enough, or that student discipline should be an educational process rather than a punitive process. These final regulations permit recipients to evaluate such considerations and make disciplinary decisions that each recipient believes are in the best interest of the recipient's educational environment. Because the recipient's grievance process must describe the range, or list the possible, disciplinary sanctions and remedies, a recipient's students and employees will understand whether the recipient has, for example, decided that certain disciplinary sanctions or certain remedies are not available following a grievance process. This clarity gives potential complainants a sense of what a recipient intends provide in terms of remedies and potential respondents a sense of what a recipient is prepared to impose in terms of disciplinary sanctions, with respect to victimization and perpetration of Title IX sexual harassment.

Because remedies are required under the final regulations, the Department agrees with commenters who suggested more clarity as to what constitute possible remedies. The final regulations revise another provision, § 106.45(b)(1)(i), to specify that remedies designed to restore or preserve equal access to the recipient's education program or activity may include the same individualized services described in § 106.30 ''supportive measures,'' but that remedies need not be non-disciplinary or non-punitive and need not avoid burdening the respondent. The Department believes this level of specificity is sufficient to emphasize that remedies aim to ensure a complainant's equal educational access. As discussed in the ''Adoption and Adaption of the Supreme Court's Framework to Address Sexual Harassment'' section of this preamble, a recipient's choice of remedies will be evaluated under the deliberate indifference standard.

With respect to a recipient punishing an organization or group of individuals following a member of the organization or group being found responsible for sexual harassment, these final regulations require a recipient to respond to sexual harassment incidents in specific ways, including by investigating and adjudicating allegations of sexual harassment made in a formal complaint. The final regulations only contemplate adjudication of allegations against a respondent (defined in § 106.30 as an

''individual,'' not a group or organization). In order for a respondent to face disciplinary sanctions under the final regulations, the respondent must be brought into the grievance process through a formal complaint alleging conduct that could constitute sexual harassment defined in § 106.30.[1106] The final regulations do not address sanctions by a recipient imposed against groups for non-sexual harassment offenses.

By describing the range, or listing the possible disciplinary sanctions, a recipient is notifying its community of the possible consequences of a determination that a respondent is responsible for Title IX sexual harassment; this provision is thus intended to increase the transparency and predictability of the grievance process, but it is not intended to unnecessarily restrict a recipient's ability to tailor disciplinary sanctions to address specific situations. We therefore decline to state that the range or list provided by the recipient under this provision is exclusive. For similar reasons, we decline to require a recipient to state what factors might be considered with respect to decisions regarding disciplinary sanctions or to impose more detailed requirements in this provision than the requirement to describe a range, or list the possible disciplinary sanctions. As described above, in response to commenters' desire for more specificity in this provision, the final regulations revise this provision to permit a recipient to either ''describe the range'' or ''list the possible'' disciplinary sanctions and remedies; this change gives recipients the option to comply with this provision in a more specific manner (*i.e.,* by listing possible disciplinary sanctions and remedies rather than by describing a range).

Changes: The final regulations revise § 106.45(b)(1)(vi) to give recipients the option to either ''describe the range of'' or ''list the possible'' disciplinary sanctions and remedies.

Section 106.45(b)(1)(vii) Describe Standard of Evidence

Comments: A number of commenters expressed support for § 106.45(b)(1)(vii). One commenter stated that fully informing the parties of the standard of evidence as part of the recipients' policies is very important in Title IX procedures, since the respondent and the complainant must understand how such proceedings will unfold. Other commenters expressed support because a consistent standard of evidence is necessary to ensure a fair process. One commenter expressed support because this is a common-sense provision. One commenter supported § 106.45(b)(1)(vii) because it will increase parties' understanding of the proceedings and decrease the possibility of arbitrary, disproportionate, or inconsistent decisions.

Discussion: The Department agrees that fully informing the parties of the standard of evidence that a recipient has determined most appropriate for reaching conclusions about Title IX sexual harassment, by describing that standard of evidence in the recipient's grievance process, is an important element of a fair process. The Department agrees that a standard of evidence selected by each recipient and applied consistently to formal complaints of sexual harassment is necessary to ensure a fair process.[1107]

In response to commenters who noted, under comments directed to § 106.45(b)(7), that the NPRM lacked clarity as to whether a recipient's choice between the preponderance of the evidence standard and the clear and convincing evidence standard was a choice that a recipient could make in each individual case, the Department revised language in § 106.45(b)(7) and correspondingly revised language in § 106.45(b)(1)(vii) to read: ''State whether the standard of evidence to be used to determine responsibility is the preponderance of the evidence standard or the clear and convincing evidence standard, apply the same standard of evidence for formal complaints against students as for formal complaints against employees, including faculty, and apply the same standard of evidence to all formal complaints of sexual harassment[.]'' These revisions clarify that the standard of evidence must be selected, stated, and applied consistently by each recipient to all formal complaints of sexual harassment.

Changes: The final regulations revise § 106.45(b)(1)(vii) to clearly require a recipient's grievance process to state up front which of the two permissible standards of evidence the recipient has selected and then to apply that selected standard to all formal complaints of sexual harassment, including those against employees.

Section 106.45(b)(1)(viii) Procedures and Bases for Appeal

Comments: Some commenters expressed general support for § 106.45(b)(1)(viii), arguing that requiring recipients to specify appeal procedures will promote a fair process that will benefit everyone and ensure parity between the parties. Two commenters recommended that the Department add specific language regarding when a decision may be appealed. One commenter suggested that the Department clarify that the parties are allowed to raise a procedural problem at the hearing without waiting to file an appeal over the procedural breach. Another commenter suggested that the Department add language describing the specific instances in which a complainant or respondent is permitted to appeal. The commenter stated that in instances where the recipient determines the respondent to be responsible for the alleged conduct and implements a remedy designed to restore a complainant's equal access to the recipient's education program or activity, the complainant may appeal the remedy as inadequate to restore the complainant's equal access to the recipient's education program or activity to prevent its reoccurrence, and address its adverse effects on the complainant and others who may have been adversely affected by the sexual harassment. The commenter further stated that in instances where the recipient determines the respondent to be responsible for the alleged conduct, the respondent can appeal the recipient's determination of responsibility. The commenter explained that these should be the only two situations in which an appeal is permitted because allowing a complainant to appeal a recipient's determination of non-responsibility subjects the respondent to administrative double jeopardy and contravenes the principles of basic fairness. The commenter asserted that this is especially troublesome for students from low-income families with little or no access to free legal counsel.

Discussion: The Department appreciates the general support received from commenters for § 106.45(b)(1)(viii), which requires recipients' Title IX

[1106] Emergency removal under § 106.44(c) is an exception that allows punitive action (*i.e.,* removal from education programs or activities) against a respondent without going through a grievance process.

[1107] *E.g.,* Lavinia M. Weizel, *The Process That Is Due: Preponderance of The Evidence as The Standard of Proof For University Adjudications of Student-On-Student Sexual Assault Complaints,* 53 Boston College L. Rev. 1613, 1631 (2012) (explaining that selecting a standard of evidence (also called a standard of proof) ''is important for theoretical and practical reasons'' including that the ''standard of proof imposed in a particular class of cases reflects the value society places on the rights that are in jeopardy'' because ''standards of proof signal to the fact-finder the level of certainty society requires before the state may act to impair an individual's rights'' and whichever standard is selected, ''articulating a specific standard of proof for a particular type of hearing . . . helps to ensure the meaningfulness of the hearing's other procedural safeguards'') (internal citations omitted).

grievance process to include the permissible bases and procedures for complainants and respondents to appeal. The Department is persuaded by commenters that we should clarify the circumstances in which the parties may appeal, and that both parties should have equal appeal rights, and § 106.45(b)(8) of the final regulations require recipients to offer appeals, equally to both parties, on at least the three following bases: (1) Procedural irregularity that affected the outcome; (2) new evidence that was not reasonably available when the determination of responsibility was made that could affect the outcome; or (3) the Title IX Coordinator, investigator, or decision-maker had a conflict of interest or bias that affected the outcome. Nothing in the final regulations precludes a party from raising the existence of procedural defects that occurred during the grievance process during a live hearing, and the final regulations ensure that whether or not a party has observed or objected to a procedural defect during the hearing, the party may still appeal on the basis of procedural irregularity after the determination regarding responsibility has been made. The Department believes that a complainant entitled to remedies should not need to file an appeal to challenge the recipient's selection of remedies; instead, we have revised § 106.45(b)(7)(iv) to require that Title IX Coordinator is responsible for effective implementation of remedies. This permits a complainant to work with the Title IX Coordinator to select and effectively implement remedies designed to restore or preserve the complainant's equal access to education.

Complainants and respondents have different interests in the outcome of a sexual harassment complaint. Complainants ''have a right, and are entitled to expect, that they may attend [school] without fear of sexual assault or harassment'' and to expect recipients to respond promptly to complaints.[1108] For respondents, a ''finding of responsibility for a sexual offense can have a 'lasting impact' on a student's personal life, in addition to [the student's] 'educational and employment opportunities'[.]'' [1109] Although these interests may differ, each represents high-stakes, potentially life-altering consequences deserving of an accurate outcome.[1110]

We disagree with the commenters who argued that the final regulations should prohibit appeals of not responsible determinations because of double jeopardy concerns. The Department emphasizes that the constitutional prohibition on double jeopardy does not apply to Title IX proceedings and the Department does not believe that such a prohibition is needed to ensure fair and accurate resolution of sexual harassment allegations under Title IX. Where a procedural error, newly discovered evidence, or conflict of interest or bias has affected the outcome resulting in an *inaccurate* determination of non-responsibility, the recipient's obligation to redress sexual harassment in its education program or activity may be hindered, but the recipient may correct that inaccurate outcome on appeal and thus accurately identify the nature of sexual harassment in its education program or activity and provide remedies to the victim. Further, and as discussed above, we believe that both respondents and complainants face potentially life-altering consequences from the outcomes of Title IX proceedings. Both parties have a strong interest in accurate determinations regarding responsibility and it is important to protect complainants' right to appeal as well as respondents' right to appeal. We note that the final regulations do not require a party to hire an attorney for any phase of the grievance process, including on appeal.

Changes: We have revised § 106.45(b)(1)(viii) to remove the ''if the recipient offers an appeal'' language because § 106.45(b)(8) of the final regulations make appeals for both parties mandatory, on three bases: Procedural irregularity, newly discovered evidence, and bias or conflict of interest on the part of the Title IX Coordinator, investigator, or decision-maker.

Section 106.45(b)(1)(ix) Describe Range of Supportive Measures

Comments: Several commenters supported § 106.45(b)(1)(ix) requiring recipients to describe the range of supportive measures available to complainants and respondents. Some commenters asserted that this requirement would promote parity between the parties and ensure a fair process that will benefit everyone. One commenter recommended that the Department encourage recipients to retain and maintain the names and contact information for individual groups, and other entities that provide support in these circumstances, including counselors, psychiatrists, law firms, and educational advocates, and make the information available to all parties. Two commenters suggested that the Department add language to the final regulations clarifying that complainants and respondents must be afforded the same level of advocacy and supportive care so that both parties are treated equally. Another commenter was concerned that the requirement would be difficult to meet because supportive measures are often determined on an ad hoc basis and vary from investigation to investigation. To address this concern, the commenter recommended that the Department instead require grievance procedures to address the availability of supportive measures and describe some common examples.

Discussion: The Department agrees that requiring recipients to describe the range of supportive measures available to complainants and respondents is an important part of ensuring that the grievance process is transparent to all members of a recipient's educational community. Section 106.45(b)(1)(ix), particularly, notifies both parties of the kind of individualized services that may be available while a party navigates a grievance process, which many commenters asserted is a stressful and difficult process for complainants and respondents.

The Department clarifies that this provision does not require equality or parity in terms of the supportive measures actually available to, or offered to, complainants and respondents generally, or to a complainant or respondent in a particular case. This provision must be understood in conjunction with the obligation of a recipient to offer supportive measures to complainants (including having the Title IX Coordinator engage in an interactive discussion with the complainant to determine appropriate supportive measures), while no such obligation exists with respect to respondents. By defining supportive measures to mean individualized services that cannot unreasonably burden either party, these final regulations incentivize recipients to make supportive measures available to respondents, but these final regulations require recipients to offer supportive measures to complainants. In revised § 106.44(a), and in § 106.45(b)(1)(i) these final regulations reinforce that equitable treatment of complainants and respondents means

[1108] *Doe* v. *Univ. Of Cincinnati,* 872 F.3d 393, 403 (6th Cir. 2017).

[1109] *Id.* at 400 (internal citations omitted).

[1110] *Id.* at 404 (recognizing that the complainant ''deserves a reliable, accurate outcome as much as'' the respondent).

providing supportive measures and remedies for complainants, and avoiding disciplinary action against respondents unless the recipient follows the § 106.45 grievance process. The Department does not intend, and the final regulations do not require, to impose a requirement of equality or parity with respect to supportive measures provided to complainants and respondents.

The Department declines to require recipients to disseminate to students the names and contact information for organizations that provide support in these circumstances, including counselors, psychiatrists, law firms, educational advocates, and so forth, or make such a list available to all parties, although nothing in these final regulations precludes a recipient from doing so. The specific resources available in the general community surrounding the recipient's campus may change frequently making it difficult for recipients to accurately list currently available resources. The Department believes that by requiring recipients to describe the range of supportive measures made available by a recipient as part of the recipient's grievance process, and defining ''supportive measures'' in § 106.30 (which also includes an illustrative list of possible supportive measures), parties will be adequately advised of the types of individualized services available as they navigate a grievance process. A recipient may choose to create and distribute lists of specific resources in addition to complying with § 106.45(b)(1)(ix).

The Department appreciates the commenter's concern that the requirement would be difficult to meet because supportive measures are often determined on an ad hoc basis and vary from investigation to investigation. However, it is for this reason that the Department is only requiring a recipient's grievance process to describe the *range* of supportive measures available rather than a list of supportive measures available. One commenter requested that the Department provide examples of supportive measures. A non-exhaustive list of types of supportive measures is stated in the definition of ''supportive measures'' in § 106.30. Recipients retain the flexibility to employ age-appropriate methods, exercise common sense and good judgment, and take into account the needs of the parties involved when determining the type of supportive measures appropriate for a particular party in a particular situation, and this flexibility is not inhibited by the requirement to describe the range of available supportive measures in § 106.45(b)(1)(ix).

Changes: None.

Section 106.45(b)(1)(x) Privileged Information

Comments: As discussed in more detail in the ''Hearings'' subsection of the ''Section 106.45 Recipient's Response to Formal Complaints'' section of this preamble, commenters inquired whether the § 106.45 grievance process required cross-examination questions that call for disclosure of attorney-client privileged information to be allowed to be asked during a live hearing held by a postsecondary institution.

Discussion: To ensure that a recipient's grievance process respects information protected by a legally recognized privilege (for example, attorney-client privilege, doctor-patient privilege, spousal privilege, and so forth), the Department has added a provision addressing protection of all privileged information during a grievance process.

Changes: We have added new § 106.45(b)(1)(x) to ensure that information protected by a legally recognized privilege is not used during a grievance process.

Written Notice of Allegations

Section 106.45(b)(2) Written Notice of Allegations

Retaliation

Comments: Many commenters opposed § 106.45(b)(2), arguing that respondents may retaliate against complainants if respondents are given notice of a formal complaint that contains the complainant's identity. Some commenters cited a study which found that the fear of retaliation by the accused or by peers is a barrier for people to report sexual assault.[1111] These commenters also expressed concern that § 106.45(b)(2) does not require the recipient to assure the complainant that, if retaliation occurs, the recipient would take steps to correct the retaliatory actions. Commenters argued that such a requirement would affirm to complainants that they will be safeguarded by recipients in their complaints, and would help encourage complainants to come forward with reports of sexual harassment or assault. Several commenters argued that, because the Department provides for a warning to complainants against false allegations, the provision should also require recipients to warn respondents against retaliation. One commenter suggested that the provision should identify the types of retaliation prohibited, such as threats of civil litigation against the complainant for defamation, or spreading rumors intended to intimidate the complainant from filing a complaint. Another commenter asserted that the provision should notify the parties of the retaliation prohibition that is included in the Title IX regulation, at 34 CFR 106.71 that currently states that the Title VI regulation at 34 CFR 100.7(e) is incorporated by reference into the Title IX regulations. One commenter asked the Department to create an independent Title IX prohibition against retaliation to protect the complainant. Another commenter stated that the Clery Act requires that recipients' sexual misconduct policies include prohibitions of retaliation. A commenter cited *Jackson* v. *Birmingham Board of Education,* 544 U.S. 167 (2005) for the proposition that civil rights cannot be adequately protected if people can be punished for asserting such rights.

Commenters argued that some allegations of sexual assault involve circumstances so serious that providing respondents notice of a complaint would place the complainant at significant risk of further—and potentially escalating levels of—violence. Other commenters argued that respondents may destroy evidence or create false alibis if recipients give respondents detailed notice of the allegations in a formal complaint.

Other commenters expressed strong support for § 106.45(b)(2), arguing that society cannot purport to deliver justice for victims when extra-governmental institutions are permitted to ignore due process and the rule of law. Some commenters opined that only in the most totalitarian systems are people investigated and adjudicated without knowledge of the specific details of the charges before they are expected to present a defense. A number of commenters shared personal stories about respondents being interviewed multiple times by school officials before they were told what allegations had been made against them. Other commenters shared personal stories about recipients interviewing respondents without informing the respondent what precisely the

[1111] Commenters cited: Shelley Hymel & Susan M. Swearer: *Four Decades of Research on School Bullying: An Introduction,* 70 Am. Psychol. 293, 295 (May–June 2015) (youth ''are reluctant to report bullying, given legitimate fears of negative repercussions''); Ganga Vijayasiri, *Reporting Sexual Harassment: The Importance of Organizational Culture and Trust,* 25 Gender Issues 43, 53–54, 56 (2008) (''fear of adverse career consequences, or being blamed for the incident are a major deterrent to reporting'' and this includes peer mistreatment or disapproval).

complainant had alleged or when or where the alleged misconduct had occurred, and then when the respondent expressed uncertainty in recalling certain details in the interview, the recipient later cited the respondent's uncertain memory as evidence of the respondent's guilt. Commenters stated that, in these instances, respondents lost credibility when they were unable to clearly quote facts and events involving unclear allegations on a moment's notice at a surprise interview.

Discussion: The Department is persuaded by commenters' unease over a perceived lack of protection against retaliation and therefore the final regulations add § 106.71, which prohibits any person from intimidating, threatening, coercing, or discriminating against any individual for the purpose of interfering with any right or privilege secured by Title IX including, among other things, making a report or formal complaint of sexual harassment. Recipients may communicate this protection against retaliation to the parties in any manner the recipient chooses. The Department disagrees that the warning about consequences for making false statements (if such a prohibition exists in the recipient's code of conduct) is directed only to complainants; such a warning is for the benefit of both parties so that if the recipient has chosen to make a prohibition against false statements part of the recipient's code of conduct, both parties are on notice that the § 106.45 grievance process potentially implicates that provision of the recipient's code of conduct. Similarly, § 106.71 protects all parties (and witnesses, and other individuals) from retaliation for exercising rights under Title IX, and is not directed solely toward complainants.

The Department understands that some complainants may fear to report sexual harassment or file a formal complaint alleging sexual harassment, because of the possibility of retaliation, and intends that adding § 106.71 prohibiting retaliation will empower complainants to report and file a formal complaint, if and when the complainant desires to do so. Recipients are obligated to offer supportive measures to a complainant (with or without the filing of a formal complaint) and to engage the complainant in an interactive discussion regarding the complainant's wishes with respect to supportive measures.[1112] Recipients must keep confidential the provision of supportive measures to the extent possible to allow implementation of the supportive measures.[1113] Thus, a complainant may discuss with the Title IX Coordinator the type of supportive measures that may be appropriate due to a complainant's concerns about retaliation by the respondent (or others), or fears of continuing or escalating violence by the respondent. A recipient's decision about which supportive measures are offered and implemented for a complainant is judged under the deliberate indifference standard, which by definition takes into account the unique, particular circumstances faced by a complainant. For reasons described below in this section of the preamble, the Department has determined that a grievance process cannot proceed, consistent with due process and fundamental fairness, without the respondent being apprised of the identity of the complainant (as well as other sufficient details of the alleged sexual harassment incident). Thus, a complainant's identity cannot be withheld from the respondent once a formal complaint initiates a grievance process, yet this does not obviate a recipient's ability and responsibility to implement supportive measures designed to protect a complainant's safety, deter sexual harassment, and restore or preserve a complainant's equal educational access.[1114]

The Department believes that providing written notice of the allegations to both parties equally benefits complainants; after a recipient receives a formal complaint, a complainant benefits from seeing and understanding how the recipient has framed the allegations so that the complainant can prepare to participate in the grievance process in ways that best advance the complainant's interests in the case. The Department disagrees that providing written notice of allegations increases the risk that a respondent will destroy evidence or concoct alibis, and even if such a risk existed the Department believes that benefit of providing detailed notice of the allegations outweighs such a risk because a party cannot be fairly expected to respond to allegations without the allegations being described prior to the expected response. Further, if a respondent does respond to a notice of allegations by destroying evidence or inventing an alibi, nothing in the final regulations prevents the recipient from taking such inappropriate conduct into account when reaching a determination regarding responsibility, numerous provisions in § 106.45 provide sufficient ways for the recipient (and complainant) to identify ways in which a respondent has fabricated (or invented, or concocted) untrue information, and such actions may also violate non-Title IX provisions of a recipient's code of conduct.

Changes: The final regulations add § 106.71 prohibiting retaliation by any person, against any person exercising rights under Title IX, and specify that complaints of retaliation may be filed with the recipient for handling under the ''prompt and equitable'' grievance procedures that recipients must adopt and publish for non-sexual harassment sex discrimination complaints by students and employees under § 106.8(c).

Warning Against False Statements

Comments: Several commenters asserted that the requirement in § 106.45(b)(2) that the written notice of allegations sent to both parties must contain information about any prohibition against knowingly submitting false information will chill reports of sexual assault because the provision implies that the Department does not believe allegations of sexual assault. One commenter shared the Department's interest in preserving the truth-seeking nature of the grievance process, but expressed concern that the threat implicit in the proposed admonition will outweigh its value. The commenter asserted that parties' and witnesses' statements rarely neatly align and inconsistencies can stem from passage of time, effects of drugs or alcohol, general unreliability of human perception and memory, and other factors. The commenter asserted that school officials are rarely so certain a party is lying that they should pursue discipline, yet the admonition in § 106.45(b)(2) suggests otherwise. The commenter warned that the resulting fear is likely to discourage participation in the process and inhibit the candor the Department stated it is seeking, and the commenter believed that parties may interpret the statement as their school's endorsement of harmful stereotypes about the prevalence of false sexual misconduct reports.

Many commenters asserted that most women who choose not to come forward do so because of the fear that people will not believe them. Commenters cited research showing that victims rarely make false allegations, and that only

[1112] Section 106.44(a).

[1113] Section 106.30 (defining ''supportive measures'').

[1114] *Id.* (supportive measures must not be punitive or disciplinary). However, a recipient may warn a respondent that retaliation is prohibited and inform the respondent of the consequences of retaliating against the complainant, as part of a supportive measure provided for a complainant, because such a warning is not a punitive or disciplinary action against the respondent.

somewhere between two to ten percent of sexual assault allegations are false.[1115] Commenters asserted that men are more likely to be sexually assaulted themselves than to be falsely accused of committing sexual assault.[1116] Commenters argued that because false allegations are so rare, there is no benefit to including a warning against making false statements and the only purpose of such a warning is to deter complainants from reporting or filing formal complaints.

One commenter suggested that § 106.45(b)(2) should state that, if the recipient finds the respondent not responsible at the conclusion of the proceedings, a determination of not responsible will not, based on the finding alone, result in the complainant being deemed to have made false allegations. The commenter further requested that the written notice include a statement that the recipient presumes that the complainant is bringing a truthful complaint.

One commenter wanted clarification as to how false accusations would be determined. One commenter wished to know whether false accusations are a Title IX offense, and if so, who is authorized to bring a complaint alleging a false accusation. The commenter also wondered if a complainant can be held accountable for making a false report of sexual harassment if the recipient's code of conduct does not have a provision about submitting false statements during a disciplinary proceeding.

Several commenters who favored § 106.45(b)(2) suggested that the provision should subject students who knowingly made false allegations to disciplinary proceedings. Other commenters asked the Department to explain what minimum consequences will apply to students who make false allegations of sexual assault.

Discussion: The Department first notes that § 106.45(b)(2)(i)(B) will only apply to those situations in which the recipient's code of conduct prohibits students from knowingly making false statements or submitting false information during a disciplinary proceeding. If the recipient's code of conduct is silent on the issue of false statements in the grievance process, then the final regulations do not require recipients to include reference to false statements in the § 106.45(b)(2) written notice. If, on the other hand, a recipient's own code of conduct does reference making false statements during a school disciplinary proceeding then the Department believes that both parties deserve to know that their school, college, or university has such a provision that could subject either party to potential school discipline as a result of participation in the Title IX grievance process. Further, this ''warning'' about making false statements applies equally to respondents, as to complainants. Respondents should understand how a recipient intends to handle false statements (*e.g.,* in the form of a respondent's denials of allegations) made during the grievance process.

Because the warning about making false statements occurs at a time when the complainants have already filed a formal complaint, the Department does not foresee that a complainant's decision to report sexual harassment (which need not also involve filing a formal complaint) will be affected by the recipient's notice about whether the recipient's code of conduct prohibits making false statements during a grievance process. The warning about false statements is not a requirement that the complainants' statements ''neatly align'' with the statements of other parties' or witnesses' statements, as one commenter suggested. Nor does the Department agree that the warning enforces harmful stereotypes about the prevalence of false sexual misconduct reports. The warning informs both parties about code of conduct provisions that govern either party's conduct at the grievance process, and only applies if such provisions exist in the recipients' own code of conduct. In response to commenters' concerns and to clarify for recipients, complainants, and respondents that merely making an allegation that a respondent or witness disagrees with (or is otherwise unintentionally inaccurate) constitutes a punishable ''false statement,'' the final regulations include § 106.71 prohibiting retaliation for exercising Title IX rights generally, and specifically stating that while it is not retaliatory when a recipient charges a party with a code of conduct violation for making a bad faith, materially false statement in a Title IX proceeding, such a conclusion cannot be based solely on the determination regarding responsibility. This emphasizes that the mere fact that the outcome was not favorable (which could turn on a decision-maker deciding that the party or a witness was not credible, or did not provide accurate information, or that there was insufficient evidence to meet the recipient's burden of proof) is not sufficient to conclude that the party who ''lost'' the case made a bad faith, materially false statement warranting punishment.

The Department is sympathetic to the difficulties complainants face in bringing a formal complaint. But recognition of the difficulties faced by complainants navigating the grievance process should not overshadow the fact that the respondent also faces significant consequences in the grievance process, nor lessen the need for both parties to be advised by the recipient of the allegations under investigation. The Department appreciates commenters' assertions regarding the relative infrequency of false allegations; however, § 106.45(b)(2) is intended to emphasize the importance of both parties being truthful during the grievance process by giving both parties information about how a particular recipient addresses false statements in the recipient's own code of conduct. Because the statement about false statements referred to in § 106.45(b)(2) is not a statement about the truthfulness of respondents, the Department declines to require any statement in this provision regarding the truthfulness of complainants. Similarly, the statement in the written notice provision regarding the presumption that a respondent is not responsible is not a statement about the credibility or truthfulness of respondents,[1117] and the Department declines to require any statement in the written notice regarding truthfulness of complainants. Regardless of the frequency or infrequency of false or unfounded allegations, every party involved in a formal complaint of sexual harassment deserves a fair process designed to resolve the truth of the particular allegations at issue, without reference to whether similar allegations are ''usually'' (based on statistics or generalizations) true or untrue.

Any determination that a complainant (or respondent) has violated the recipient's code of conduct with respect to making false statements during a grievance process is a fact-specific determination for the recipient to decide; however, as noted above, the

[1115] Commenters cited: David Lisak *et al., False Allegations of Sexual Assault: An Analysis of Ten Years of Reported Cases,* 16 Violence Against Women 12 (2010).

[1116] Commenters cited: Tyler Kingkade, *Males are More Likely to Suffer Sexual Assault Than to be Falsely Accused of it,* The Huffington Post (Dec. 8, 2014).

[1117] As discussed previously in the ''Section 106.45(b)(1)(iv) Presumption of Non-Responsibility'' subsection of the ''General Requirements for § 106.45 Grievance Process'' subsection of the ''Section 106.45 Recipient's Response to Formal Complaints'' section of this preamble, the presumption of non-responsibility is *not* a presumption of credibility or truthfulness for respondents, and § 106.45(b)(1)(ii) expressly prohibits the recipient from drawing any inferences about credibility based on status as a complainant or respondent.

final regulations add § 106.71 advising recipients that it could constitute retaliation to punish a party for false statements if that conclusion is reached solely based on the determination regarding responsibility, thus cautioning recipients to carefully assess whether a particular complainant (or respondent) should face code of conduct charges involving false statements.

The Department declines to follow the recommendations of commenters who argued that § 106.45(b)(2) should include a provision that subjects students who knowingly make false statements to disciplinary proceedings, nor does the Department wish to prescribe what the minimum consequences of making a false statement would be. If the recipient believes that a party violated the recipient's code of conduct during the grievance process, the recipient may investigate the matter under its own code of conduct, but the Department does not require such action.

Changes: The final regulations add § 106.71 prohibiting retaliation for exercising Title IX rights generally, and specifically stating that while it is not retaliatory when a recipient punishes a party for making a bad faith, materially false statement in a Title IX proceeding, such a conclusion cannot be based solely on the determination regarding responsibility.

Investigative Process

Comments: Several commenters with experience conducting criminal investigations asserted that, to get reliable and truthful information, it is important not to warn subjects of a criminal investigation that they are under investigation. The commenters argued that giving parties notice of the details of an alleged incident before the initial interview may give them the ability to affect the outcome of their case by manipulating their own testimony, tampering with evidence, or intimidating witnesses. Several commenters asked the Department to change the notice requirement to align with standard investigation practices that call for unplanned interviews. These commenters suggested that recipients not be required to give parties notice of allegations until the university has decided to proceed with formal charges. Another commenter stated that, although there is general agreement that providing sufficient notice prior to interviews effectuates the rights to an advisor guaranteed by VAWA Section 304, the industry standard is to provide this notice prior to charging, not prior to interviewing.

One commenter who designs policies to address sexual assault on a university campus pointed out that universities lack the power to subpoena witnesses in its investigations. Since the notice provision in § 106.45(b)(2) gives witnesses ample time to craft their testimony before an initial interview, and as the university already lacks the ability to compel witnesses to hand over evidence, the commenter argued that the notice provision will hamper a recipient's ability to gather accurate testimony. To repair this problem, the commenter suggested that the Department instead require recipients to give notice of allegations to interested parties after the university has completed all initial interviews and has decided to proceed with a formal grievance procedure.

One commenter wanted to know how the provision would affect university police investigative techniques. Specifically, the commenter wondered whether university police would be prohibited from interviewing an accused party in a criminal investigation unless the university provided written notice of the interview. Another commenter requested further guidance from the Department on how schools should handle overlapping enforcement entities, especially regarding the notice requirement and whether an interview with law enforcement would violate Title IX if the police officer conducted the interview before the Title IX Coordinator was able to provide notice of allegations to the respondent.

Several commenters expressed concern about the notice provision interfering with the ability of campus officials to perform investigations concurrently with police. Commenters warned that an institution may inadvertently interfere with an ongoing law enforcement investigation if the institution contacts a respondent or witnesses before law enforcement has had a chance to do so. One commenter asked the Department to clarify that institutions may allow for a temporary delay of notice to the respondent at the request of law enforcement after receipt of a complaint, but before initiation of grievance proceedings.

Discussion: While the Department appreciates commenters' concerns about best practices in conducting criminal investigations, the Department reiterates that a § 106.45 grievance process occurs independently of any criminal investigation that may occur concurrently, and the recipient's obligation to inform the parties of the allegations under investigation is a necessary procedural benefit for both parties. Precisely because schools, colleges, and universities are not law enforcement entities but rather educational institutions, the Department does not intend to require recipients to adopt best practices from law enforcement. For purposes of a fair, impartial investigation into allegations in a formal complaint, the Department believes that providing written notice of the allegations to both parties at the beginning of the investigation best serves the important goal of fostering reliable outcomes in Title IX grievance processes.

The Department understands commenters' concerns that investigators (whether law enforcement or not) may believe that catching a respondent by surprise gets at the truth better than giving a respondent notice of the allegations with sufficient time for the respondent to prepare a response, including by making it less likely that a respondent has time or opportunity to destroy evidence or manipulate testimony. However, the Department agrees with commenters supporting § 106.45(b)(2) who asserted that notice of the allegations is an essential feature of a fair process; without knowing the scope and purpose of an interview a respondent will not have a fair opportunity to seek assistance from an advisor of choice and think through the respondent's view of the alleged facts. The Department declines to require written notice only if a recipient decides to proceed with a formal investigation, because the final regulations *require* a recipient to investigate the allegations in a formal complaint.[1118] The § 106.45 grievance process does not recognize, or permit a recipient to recognize, a difference between commencing an investigation upon receipt of a formal complaint, and a separate step of ''charging'' the respondent that, by commenters' descriptions, sometimes involves a recipient interviewing parties or witnesses before deciding whether to ''charge'' a respondent and thereby conduct a full investigation. If an investigation reveals facts requiring or permitting dismissal of the formal complaint pursuant to § 106.45(b)(3), the parties have been informed of the formal complaint, the allegations therein, and then the reasons for the dismissal, such that both parties can exercise their right to appeal the dismissal decision.[1119] While a recipient may take steps that the

[1118] Section 106.44(a); § 106.45(b)(3)(i).

[1119] The final regulations revise § 106.45(b)(8) to expressly grant both parties equal right to appeal a recipient's mandatory or discretionary dismissal decisions.

recipient considers part of an ''investigation'' without having received a formal complaint, the recipient may not impose discipline on a respondent without first complying with a grievance process that complies with § 106.45,[1120] which includes providing a party with written notice of the date, time, location, participants, and purpose of all investigative interviews with a party with sufficient time for the party to prepare to participate.[1121] Thus, even if a recipient is not in ''receipt of a formal complaint'' which triggers the recipient's obligation to send the written notice of allegations in § 106.45(b)(2), the recipient cannot impose disciplinary sanctions on a respondent, or take other actions against a respondent that do not fit the definition of ''supportive measures'' in § 106.30, without following the § 106.45 grievance process.

If a respondent reacts to a notice of allegations by manipulating the respondent's own testimony, or by tampering with evidence, the § 106.45 grievance process provides adequate avenues through which the investigation and adjudication can account for such conduct, so that a respondent's attempt to fabricate or falsify information would be part of the objective evaluation of evidence a decision-maker performs in reaching a determination. For example, if a respondent manufactures a counter-narrative to the allegations, the complainant and the recipient have the opportunity to question the respondent about the respondent's statements and reveal inaccuracies, inconsistencies, or false statements.[1122] Similarly, if a witness crafts or manipulates the witness's own testimony, inaccuracy and untruthfulness can be revealed through questioning of the witness by parties and the recipient. If a respondent reacts to a written notice of allegations by intimidating witnesses, such conduct is prohibited as retaliation under § 106.71.

The Department notes that the § 106.45 grievance process applies only to investigation and adjudication of formal complaints under Title IX, and has no applicability to criminal investigations. Regardless of whether a criminal investigation is conducted by ''campus police'' or other law enforcement officers, the recipient's obligations to comply with § 106.45 apply when a party is interviewed for the purpose of a Title IX grievance process, as opposed to furtherance of a criminal investigation.

The Department recognizes that a recipient's obligation to investigate a formal complaint of sexual harassment may overlap with concurrent law enforcement investigation into the same allegations. Where appropriate, the final regulations acknowledge that potential overlap; for example, by acknowledging concurrent law enforcement activity as ''good cause'' to temporarily delay the § 106.45 grievance process under § 106.45(b)(1)(v). However, the Department emphasizes that a recipient's obligation to investigate and adjudicate promptly and fairly under § 106.45 exists separate and apart from any concurrent law enforcement proceeding, and the recipient therefore must comply with all provisions in § 106.45, including the written notice provision, regardless of whether law enforcement is conducting a concurrent investigation. The Department notes that § 106.45(b)(1)(v) addressing the recipient's designated, reasonably prompt time frames contemplates good cause temporary delays and limited extensions of time frames only *after* the parties have received the initial written notice of allegations under § 106.45(b)(2), such that concurrent law enforcement activity is not good cause to delay sending the written notice itself.[1123]

Changes: None.

Administrative Burden on Schools

Comments: Many commenters urged the Department to give recipients more flexibility in determining the appropriate timing for sending the written notice of allegations under § 106.45(b)(2). Commenters argued that many complaints require an initial investigation to confirm the identity of the involved parties, to clarify any missing information, and to determine whether Title IX or the campus policy applies, and requiring written notice to the parties right away does not make sense when many complaints turn out to lack merit or not allege Title IX or policy violations. Several commenters asked the Department to provide that recipients must give respondents ''prompt written notice'' instead of ''upon receipt of a formal complaint,'' to give recipients a reasonable amount of time before providing the written notice of allegations.

One commenter asked the Department to make the written notice provision more flexible for smaller universities, because college officials often have a close personal connection with students. One commenter argued that the written notice provision would amount to a disturbing constraint on a campus administrator's authority to respond quickly to allegations. The commenter quoted the Department's commentary in the NPRM that ''when determining how to respond to sexual harassment, recipients have flexibility to employ age-appropriate methods, exercise common sense and good judgment, and take into account the needs of the parties involved,'' but the commenter opined that § 106.45(b)(2) runs contrary to this stated intent.

Other commenters noted that many institutions receive more disclosures of inappropriate conduct than formal complaints, and asserted that in many of those cases, the disclosing student is seeking supportive measures and feels satisfied when those personalized supports are put in place (extensions of time, opportunities to change housing, escorts, etc.). Commenters argued that the written notice provision, by alerting the respondent of a report alleging sexual assault before an investigation has taken place, escalates the matter too early.

Another commenter asserted that, at the onset of an investigation, recipients should have the authority to identify allegations under their policy broadly, and then provide an additional, more specific, notice when the investigation process concludes because the proposed regulations appear to require as many written notices to parties as there are changes to the allegations over the course of an investigation, placing an undue burden on recipients with no clear added value to the transparency of the investigation.

Another commenter argued that § 106.45(b)(2) is burdensome to schools because Title IX already requires schools to file annual proactive notice to parties of the school's grievance procedures. Numerous commenters asserted that the administrative burdens placed on schools by the written notice of allegations provision will incentivize schools to try to avoid legal jeopardy rather than try to achieve school safety.

Discussion: The Department disagrees that § 106.45(b)(2) leaves recipients with insufficient flexibility to respond quickly to allegations or contradicts the intent expressed in the NPRM that

[1120] Section 106.44(a); § 106.45(b)(1)(i).

[1121] Section 106.45(b)(5)(v).

[1122] Section 106.45(b)(6)(ii) (providing that whether or not a hearing is held in elementary and secondary schools, the parties have opportunity to submit written questions to the other party, including questions designed to test credibility); § 106.45(b)(6)(i) (providing that during a live hearing held by a postsecondary institution, each party has an opportunity to cross-examine the other party, but only with cross-examination conducted by party advisors).

[1123] Section 106.45(b)(1)(v) (specifying that where a recipient delays or extends a time frame for good cause, the recipient must send written notice to the complainant and the respondent of the delay or extension and the reasons for the action).

recipients should employ age-appropriate methods, exercise common sense and good judgment, and take into account the needs of the parties involved. The Department reiterates that the written notice of allegations provision applies only after a recipient receives a formal complaint; thus, a recipient need not wait until written notice of allegations has been sent in order to, for example, provide supportive measures to the complainant (or the respondent).[1124] For similar reasons, nothing about § 106.45(b)(2) restricts a recipient's flexibility to implement supportive measures designed to restore or preserve the complainant's equal access to education by taking into account the unique needs of the parties and using common sense and good judgment, and the definition of supportive measures emphasizes that supportive measures are ''individualized services'' reasonably available ''before or after the filing of a formal complaint or where no formal complaint has been filed.'' [1125] With respect to the written notice itself, nothing in § 106.45(b)(2) prescribes how the information in the written notice is phrased, such that recipients are free to employ age-appropriate methods, common sense, and good judgment in choosing how to convey the information required to be included in the written notice.

The Department agrees with commenters who noted that many complainants report sexual harassment seeking supportive measures rather than a formal grievance process, and the Department reiterates that § 106.45 only applies after a recipient has received a formal complaint; a recipient need not send written notice of allegations based on reports, disclosures, or other forms of ''notice'' that charges a recipient with actual knowledge that do not consist of receipt of a formal complaint (and a formal complaint may only be filed by a complainant, or signed by the Title IX Coordinator).[1126]

The Department disagrees that a recipient should have discretion to decide to dismiss formal complaints that are unsubstantiated or otherwise fail to meet some threshold of merit. The Department believes that where a complainant has chosen to file a formal complaint, or the Title IX Coordinator has decided to sign a formal complaint, the recipient *must* investigate those allegations; determinations about the merits of the allegations must be reached only by following the fair, impartial grievance process designed to reach accurate outcomes. As noted above, the final regulations revise § 106.45(b)(3) to provide for discretionary dismissals on specified grounds, but those grounds do not include a recipient's premature determination that allegations lack merit.

Whether or not many recipients currently provide written notice prior to conducting an interview as part of a Title IX grievance process, the Department believes written notice of allegations with adequate time to prepare for an interview constitutes a core procedural protection important to a fair process. A fundamental element of constitutional due process of law is effective notice that enables the person charged to participate in the proceeding.[1127] The final regulations promote clarity as to recipient's legal obligations, and promote respect for each complainant's autonomy, by distinguishing between a complainant's report of sexual harassment, on the one hand, and the filing of a formal complaint that has initiated a grievance process against a respondent, on the other hand. While the complainant and recipient may discuss the complainant's report of sexual harassment without notifying the respondent (including discussion to decide on appropriate supportive measures), when the complainant files a formal complaint, the respondent must be notified that the respondent is under investigation for the serious conduct defined as ''sexual harassment'' under § 106.30.

The Department understands commenters' assertions that waiting to provide notice of the allegations until after conducting an initial interview prevents a respondent from manipulating the respondent's own statements, and that some recipients' current practices permit the recipient an opportunity to decide after the initial respondent interview whether or not the recipient intends to proceed with the investigation. However, the Department believes that complainants deserve the clarity of knowing that the filing of a formal complaint *obligates* the recipient to investigate the allegations, and once the respondent is under investigation the respondent must be made aware of the allegations with sufficient time to prepare for an initial interview because ''effective notice'' in time to give the respondent opportunity to tell the respondent's ''version of the events'' helps prevent erroneous outcomes.[1128]

In response to commenters' concerns that the proposed rules did not provide a recipient sufficient leeway to halt investigations that seemed futile, the final regulations revise § 106.45(b)(3)(ii) to provide that a recipient may (in the recipient's discretion) dismiss a formal complaint, or allegations therein, in certain circumstances including where a complainant requests the dismissal (in writing to the Title IX Coordinator), where the respondent is no longer enrolled or employed by the recipient, or where specific circumstances prevent the recipient from meeting the recipient's burden to collect sufficient evidence (for example, where a postsecondary institution complainant has ceased participating in the investigation and the only inculpatory evidence available is the complainant's statement in the formal complaint or as recorded in an interview by the investigator). Similarly, where it turns out that the allegations in a formal complaint do not meet the definition of sexual harassment under § 106.30, or did not occur against a person in the United States, or did not occur in the recipient's education program or activity, § 106.45(b)(3)(i) requires the recipient to dismiss the allegations (though the final regulations clarify that the recipient has discretion to address the allegations through a non-Title IX code of conduct) and notify the parties of the dismissal (which implies that the ''parties'' have already been informed that they are parties via receiving the § 106.45(b)(2) written notice of allegations). However, the fact that

[1124] In fact, revised § 106.44(a) obligates recipients to promptly respond to any notice of Title IX sexual harassment (regardless of whether a complainant or Title IX Coordinator also files a formal complaint) by, among other things, promptly offering the complainant supportive measures. We reiterate that no written or signed document, much less a ''formal complaint'' as defined in § 106.30, is required in order to trigger the recipient's response obligations. To emphasize this, we have revised § 106.30 defining ''actual knowledge'' to expressly state that ''notice'' conveying actual knowledge to the recipient (triggering the recipient's response obligations) includes a report to the Title IX Coordinator as described in § 106.8(a), which in turn states that any person may report sexual harassment to the Title IX Coordinator in person, by mail, phone, or email. Section 106.8(b)(2) also requires the recipient to prominently display that contact information for the Title IX Coordinator on the recipient's website.

[1125] Section 106.30 (defining ''supportive measures'').

[1126] Section 106.30 (defining ''formal complaint'').

[1127] *Goss* v. *Lopez,* 419 U.S. 565, 579 (1975) (''At the very minimum, therefore, students facing suspension and the consequent interference with a protected property interest must be given *some kind of notice* and afforded some kind of hearing. 'Parties whose rights are to be affected are entitled to be heard; and in order that they may enjoy that right *they must first be notified.*' '') (internal citation omitted) (emphasis added); *id.* at 583 (''On the other hand, requiring *effective notice* and informal hearing permitting the student to give his version of the events will provide a meaningful hedge against erroneous action.'') (emphasis added).

[1128] *Goss,* 419 U.S. at 579.

allegations of sexual harassment were raised in a formal complaint warrant notifying the respondent that those allegations had triggered an investigation, even if the allegations are subsequently dismissed, whether the dismissal is mandatory under § 106.45(b)(3)(i) or discretionary under § 106.45(b)(3)(ii). This gives both parties equal opportunity to appeal the recipient's dismissal decision, or to request that dismissed allegations be addressed under non-Title IX codes of conduct.[1129]

The Department believes that requiring subsequent written notice of allegations when the allegations under investigation change appropriately notifies the parties of a change in the scope of the investigation, and does not believe that this benefit would be achieved by only requiring a follow-up written notice after the investigation has concluded. The Department is requiring recipients to inform the parties of the alleged conduct that potentially constitutes sexual harassment under § 106.30, including certain details about the allegations (to the extent such details are known at the time). Although § 106.45(b)(2) requires subsequent written notice to the parties as the recipient discovers additional potential violations, the Department does not agree with the commenter that this requirement adds ''no clear value'' to the transparency of the investigation or that the benefits of such subsequent notice to the parties is outweighed by the administrative burden to the recipient of generating and sending such notices.[1130] If the respondent is facing an additional allegation, the respondent has a right to know what allegations have become part of the investigation for the same reasons the initial written notice of allegations is part of a fair process, and the complainant deserves to know whether additional allegations have (or have not) become part of the scope of the investigation. This information allows both parties to meaningfully participate during the investigation, for example by gathering and presenting inculpatory or exculpatory evidence (including fact and expert witnesses) relevant to each allegation under investigation.

The Department does not believe that requiring recipients to send written notice of the allegations under investigation will incentivize recipients to care less about school safety than about legal liability. While the written notice provision constitutes a legal obligation, the purpose of the provision is to ensure that parties have critical information about the recipient's investigation; in that way, the obligation to send written notice of the allegations forms part of the recipient's response demonstrating concern about the safety of the recipient's educational environment, not simply a legalistic obligation. Measures that a recipient should take specifically to protect the safety of a complainant, respondent, or members of the recipient's community are unaffected by the recipient's obligation to send written notice of the allegations to the parties. For example, a recipient's non-deliberately indifferent response under § 106.44(a) includes offering supportive measures to complainants, and supportive measures as defined in § 106.30 may be designed to protect a complainant's safety or deter sexual harassment. Under § 106.44(c), a respondent who poses an immediate threat to the physical health or safety of any student or other individual may be removed from the recipient's education program or activity on an emergency basis, with or without a grievance process pending.

Although the Department understands recipients' desire for as much flexibility as possible to design disciplinary proceedings that best meet the needs of a recipient's unique educational community, for the reasons discussed previously the Department believes that providing written notice of the allegations under investigation is not a procedural right that should be left to a recipient's discretion. The final regulations leave recipients flexibility to select the method of delivery of the written notices required under § 106.45(b)(2) (including the initial notice and any subsequent notices), and while the initial notice must be sent ''upon receipt'' of a formal complaint, with ''sufficient time'' for a party to prepare for an initial interview, such provisions do not dictate a specific time frame for sending the notice, leaving recipients flexibility to, for instance, inquire of the complainant details about the allegations that should be included in the written notice that may have been omitted in the formal complaint, and draft the written notice, while bearing in the mind that the entire grievance process must conclude under the recipient's own designated time frames.

Changes: We have revised § 106.45(b)(3) to provide recipients with the discretion to dismiss a formal complaint, or allegations therein, where the complainant notifies the Title IX Coordinator in writing that the complainant wishes to withdraw the formal complaint or allegations, where the respondent is no longer enrolled or employed by the recipient, or where specific circumstances prevent a recipient from gathering evidence sufficient to reach a determination regarding responsibility.

Elementary and Secondary Schools

Comments: Several commenters argued that § 106.45(b)(2) would be harmful to students and administrators at elementary and secondary schools because accusations of sexual assault or abuse are often described without specific details or in a way that makes it difficult to determine whether the alleged misconduct falls under Title IX, under the recipient's code of conduct, or neither. Commenters argued that § 106.45(b)(2) would require school administrators to provide multiple written notices, because an initial description of the misconduct might make it seem like the allegations fall under several different codes of conduct. Another commenter stated that requiring that the respondent be given ''sufficient time for a response before any initial interview'' does not consider the possible threat to the learning environment or the developing nature of a minor's memory. Another commenter asserted that courts do not give elementary and secondary school students due process rights, so the written notice of allegations provision should not apply to elementary and secondary school recipients.

[1129] The final regulations revise § 106.45(b)(8) so that parties have the right to appeal any dismissal decision. While some respondents may not desire to appeal a dismissal, other respondents may desire to challenge the recipient's conclusion that, for instance, the conduct alleged did not constitute sexual harassment as defined in § 106.30, because if the conduct constitutes Title IX sexual harassment the recipient is not permitted to discipline the respondent without first following the § 106.45 grievance process, which may provide stronger procedural rights and protections than other disciplinary proceedings a recipient might use if the recipient charges the respondent with a non-Title IX code of conduct violation over the allegations.

[1130] Deciding whether additional procedural safeguards are required under constitutional due process of law involves balancing the ''private'' interests at stake (here, the interests of the parties in a recipient reaching an accurate outcome), the administrative burden and cost to the government (here, the recipient) to provide the additional procedure, and the likelihood that the additional procedure may reduce the risk of erroneous outcome. *Mathews* v. *Eldridge,* 424 U.S. 319, 334 (1976). The Department believes that consideration of these factors weighs in favor of requiring subsequent written notices to the parties when the allegations change during an investigation: The outcome of a case poses serious consequences for both parties; recipients are not unaccustomed to sending written notices to students (and parents of minor students) for a wide range of activities; and ensuring that the parties' participation throughout the grievance process focuses on the actual allegations being investigated by the recipient significantly reduces the risk of erroneous outcomes.

A few commenters advised changing the written notice provision to account for young complainants and respondents, especially students in preschool and elementary and secondary schools by giving the Title IX Coordinator discretion to communicate to parents or parties over the phone rather than strictly in writing.

Commenters argued that, in elementary and secondary schools addressing peer harassment incidents, the written notice of allegations provision fails to take into account the high volume of low-level incidents schools address and how burdensome and expensive this provision would become for students, parents, and administrators. Commenters argued that this provision would escalate situations from relatively informal to extremely formal, which would be alarming for students and parents. One commenter agreed that the accused student must be afforded due process, including notice of the allegations and an opportunity to respond, but disagreed that the written notice provision should apply to elementary and secondary schools, because it is neither necessary nor reasonable for an elementary and secondary school administrator to send the level of detail required by § 106.45(b)(2) in a written notice for all sexual harassment cases. At least one commenter argued that public elementary and secondary schools in the commenter's State do not have ''codes of conduct'' and instead have policies approved by a board of education pursuant to the commenter's State education code. The commenter stated that the language of § 106.45(b)(2) does not fit the elementary and secondary school setting.

Discussion: The Department reiterates that the recipient need not provide the written notice of allegations under § 106.45(b)(2) unless a formal complaint has been filed; this should reduce commenters' concerns that elementary and secondary schools will be inundated with the need to generate written notices whenever any conduct termed ''sexual harassment'' is reported or that elementary and secondary school administrators will need to send out written notices concerning ''vague'' or ''unspecific'' reports of conduct that may or may not constitute sexual harassment. Further, the Department clarifies that when a formal complaint contains allegations of conduct that could constitute not only sexual harassment defined by § 106.30 but also violations of other codes of conduct, the final regulations have revised the language used in § 106.45(b)(2) to remove confusing references to the recipient's code of conduct and focus this provision on the need to send notice of allegations that could constitute sexual harassment as defined in § 106.30. The Department appreciates the opportunity to clarify here that references in the final regulations to a recipient's ''code of conduct'' refer to any set of policies, rules, or similar codes that purport to govern the conduct or behavior of students or employees, whether such policies, rules, or codes have been crafted by the individual school itself, under mandates from a State or local law, pursuant to school board resolutions, or by other means. Furthermore, § 106.45(b)(2) requires the recipient to include in the written notice ''sufficient details *known at the time*'' (emphasis added), such that even if a young student describes a sexual harassment incident in a manner that omits precise, specific details, a recipient may still comply with § 106.45(b)(2)(i), and then send subsequent notices as described in § 106.45(b)(2)(ii) as details about allegations may be discovered during the investigation.

The Department notes that § 106.44(c) and § 106.44(d) allow a recipient to remove a respondent from the recipient's education program on an emergency basis, and place a non-student employee on administrative leave during the pendency of an investigation, alleviating commenters' concerns that giving the respondent sufficient time to respond by sending written notice that a grievance process is underway will allow a threat to remain in the educational environment. The recipient is also obligated to offer the complainant supportive measures, including during the pendency of a grievance process, and thus the Department does not believe that requiring written notice to the parties after a formal complaint has been filed restricts a recipient's ability to provide for the safety of parties and deter sexual harassment.[1131]

The Department agrees with commenters that elementary and secondary school recipients, as well as postsecondary recipients, must appropriately address incidents of sexual harassment in order to avoid subjecting students and employees to sex discrimination in violation of Title IX. The Department notes that the Supreme Court has confirmed that public elementary and secondary school students are entitled to due process under the U.S. Constitution in school disciplinary proceedings.[1132] Although commenters are correct that no Supreme Court decision specifically requires written notice when a formal complaint of sexual misconduct has been filed, the Supreme Court has held that ''effective notice'' constitutes an essential element of due process because it allows the person accused to make sure that their ''version of the events'' is heard,[1133] and the Department reasonably has determined that providing written notice of allegations, containing details of the allegations that are known at the time, after a formal complaint has triggered a recipient's obligation to investigate and adjudicate sexual harassment constitutes an important procedural protection for the benefit of all participants in the grievance process, and increases the likelihood that the recipient will reach an accurate determination regarding responsibility, which is necessary to hold recipients accountable for providing remedies to victims of Title IX sexual harassment.

The Department does not believe that the requirement for parties to receive written notice of the allegations needs to be modified when the parties are young. The final regulations revise § 106.8(b) to include parents on the list of persons to whom recipients send notice and information about the recipient's non-discrimination policy and procedures; the final regulations add § 106.6(g) to expressly state that these regulations do not alter the legal right of parents and guardians to exercise rights on behalf of parties; and nothing in the final regulations precludes a Title IX Coordinator from communicating with a young student's parent about the process (including conveying the same information as contained in a written notice) via telephone or in person so long as the written notice meets the requirements of § 106.45(b)(2).

The Department reiterates that the grievance process is initiated (and thus the written notice requirement applies) only when the complainant has filed, or the Title IX Coordinator has signed, a formal complaint. Thus, the written notice requirement does not ''escalate'' an incident; rather, a complainant's choice (or a Title IX Coordinator's decision) has resulted in a formal complaint triggering a grievance process. Only then is the recipient

[1131] Section 106.30 (defining ''supportive measures'' as individualized services designed to, among other things, protect the safety of all parties and/or deter sexual harassment).

[1132] *Goss,* 419 U.S. at 578–79 (holding that in the educational context ''the interpretation and application of the Due Process Clause are intensely practical matters'' that require at a minimum notice and ''opportunity for hearing appropriate to the nature of the case'') (internal quotation marks and citations omitted).

[1133] *Goss,* 419 U.S. at 583.

required to send the written notice of allegations under § 106.45(b)(2). Where no formal complaint has been filed by a complainant or signed by a Title IX Coordinator, the recipient is not obligated to ''escalate'' the reported incident by, for example, informing the respondent that the respondent has been reported to be a perpetrator of sexual harassment; a recipient is obligated to keep confidential provision of supportive measures to a complainant (which the recipient must offer to complainants), except as necessary to actually implement the supportive measures (for example, the respondent may need to know the identity of a complainant who has reported the respondent to have perpetrated sexual harassment if the appropriate supportive measure is a no-contact order and the respondent needs to know with whom to avoid communicating under the terms of the order).

Because of the seriousness of the allegations in a formal complaint of sexual harassment, and the access to education that is at stake for both parties in a grievance process addressing those allegations, the Department requires the recipient to allow the parties to meaningfully participate in the grievance process. This participation requires written notice of allegations to both parties where there is a formal complaint, including the details specified in this provision. The Department disagrees that pertinent information such as the identity of the parties involved, location and date of the incident, and the nature of the misconduct that could constitute sexual harassment as defined in § 106.30, with ''sufficient details known at the time'' (as § 106.45(b)(2) provides) amounts to an unnecessary or unreasonable amount of detail for recipients to include in a written notice of allegations, including in elementary and secondary schools. The provision's use of the phrases ''known at the time'' and ''if known'' in this provision indicates that the Department understands that not every significant detail will be known in every situation, yet expects the written notice to provide both parties with key information about the alleged incident so that both parties understand the scope of the investigation and can prepare to meaningfully participate by advancing the party's own interests in the outcome of the case. The final regulations also revise § 106.45(b)(2) so that the written notice of allegations also notifies the parties of each party's right to an advisor of choice, further ensuring that parties are prepared to meaningfully participate in a grievance process.

Changes: We have revised § 106.45(b)(2)(ii) to remove references to a recipient's ''code of conduct'' and adds reference to sexual harassment ''as defined in § 106.30'' to reduce confusion among commenters as to whether the written notice requirement applies to allegations that constitute sexual harassment as defined in § 106.30 or to other violations of a recipient's code of conduct. For the same reason, we have revised § 106.45(b)(2)(i) to reference the grievance process ''that complies with § 106.45'' to clarify that the written notice pertains to the grievance process a recipient must follow to comply with Title IX. We have revised § 106.8(a) to include parents and legal guardians of elementary and secondary school students on the list of persons to whom recipients send notice and information about the recipient's non-discrimination policy and procedures. We have added § 106.6(g) to state that nothing in the final regulations alters the legal right of parents or guardians to exercise rights on behalf of a party.

Confidentiality and Anonymity for Complainants

Comments: One commenter suggested that written notice of allegations sent to the parties naming the complainant and listing the details of the allegations could be leaked or forwarded to unrelated third parties, which could damage the respondent's reputation, threaten both parties' access to education, and possibly violate State and Federal health care privacy laws regarding the respondent's or complainant's medical history. Some commenters requested that § 106.45(b)(2) be revised to bar both respondents and complainants from disclosing personally identifiable information except as necessary to prepare a response.

Other commenters believed that § 106.45(b)(2), by sending notice of the formal complaint, exposes complainants to increased scrutiny not applied to students reporting other kinds of student misconduct.

Several commenters wanted the Department to give recipients flexibility to allow complainants to stay anonymous in certain circumstances, and to retain the approach under the 2001 Guidance, which advised that an institution may ''evaluate the confidentiality request'' of a complainant or respondent ''in the context of its responsibility to provide a safe and non-discriminatory environment for all schools,'' [1134] considering factors like the severity of the alleged conduct.

One commenter asserted that there is precedent for including only the initials of parties in the pre-investigation stage of the complaint.[1135] Other commenters argued that respondents do not need to know the complainant's identity to meaningfully participate in the recipient's grievance procedure.

Several commenters argued that it is unfair to complainants to expose the complainant's identity, especially because proposed § 106.44(b)(2) required a Title IX Coordinator to file a formal complaint over the wishes of a complainant where multiple reports had been made against the same respondent. Commenters argued that this could significantly chill a complainant's willingness to report sexual misconduct because the complainant's identity could be revealed to the respondent even when the complainant never even wanted to initiate a grievance process. Commenters wondered whether a Title IX Coordinator must deny requests by complainants to remain anonymous if the Title IX Coordinator elects to file a formal complaint.

Commenters argued that, due to a fear of retaliation, many students are unwilling to report an employee or professor if the student cannot remain anonymous. One commenter stated that, for other types of misconduct allegations, such as theft of property, employees are often questioned without being told who reported them.

Some commenters suggested modifying § 106.45(b)(2) to expressly bar complainants from maintaining anonymity, or to forbid schools from investigating allegations unless complainant agree to identify themselves.

Commenters suggested that § 106.45(b)(2) should be modified to require schools to give the respondent a copy of the complainant's written formal complaint when sending the written notice of allegations, or if the formal complaint was not written then the recipient should send the respondent a verbatim summary of the oral complaint.

Other commenters supported § 106.45(b)(2) and shared personal stories where, as respondents, the commenters could not understand the allegations without knowing the identity of the complainant. For

[1134] Commenters cited: 2001 Guidance at 17.

[1135] Commenter cited: Maricella Miranda, *Victims' names can be withheld in criminal complaints, court rules in Ramsey County case,* Pioneer Press (Aug. 18, 2009).

example, one commenter stated that the recipient attempted to inform the respondent of sexual misconduct allegations while also withholding the identity of the complainant and as a result, the respondent spent much of the investigation believing that the allegations centered around a kiss at a party with one person, only to find out after the identity of the complainant was finally revealed that the allegations were actually made by a different person. Other commenters supported § 106.45(b)(2) because while campus sexual misconduct hearings are not criminal cases, they are proceedings with significant and far-reaching consequences, including possible expulsion making it difficult for a respondent to transfer to any other university, and respondents deserve the basic due process right to know details about the allegations. At least one commenter cited a survey of public perceptions of higher education, including topics such as campus sexual assault and due process; in the survey, 81 percent of people agreed that students accused of sexual assault on college campuses should have the right to know the charges against them before being called to defend themselves, which the commenters argued should include the identity of the complainant.[1136]

Discussion: The Department clarifies that recipients (and, as applicable, parties) must follow relevant State and Federal health care privacy laws throughout the grievance process. Nothing in the notice should divulge the complainant's (or respondent's) medical information or other sensitive information, nor does § 106.45(b)(2) require disclosure of such information. To further respond to commenters' concerns about disclosure of medical information, the final regulations add to § 106.45(b)(5)(i) a prohibition against a recipient accessing or using for a grievance process the medical, psychological, and similar records of any party without the party's voluntary, written consent.[1137] If the party is not an ''eligible student,'' as defined in 34 CFR 99.3, then the recipient must obtain the voluntary, written consent of a ''parent,'' as defined in 34 CFR 99.3.[1138] The Department agrees with commenters that it is unacceptable for any person to leak or disseminate information to retaliate against another person, and the final regulations add § 106.71, which prohibits the recipient or any other person from intimidating, threatening, coercing, or discriminating against any individual for the purpose of interfering with any right or privilege secured by Title IX. As discussed in this preamble at § 106.45(b)(5)(iii), the parties have a right to discuss the allegations under investigations, but this right does not preclude a recipient from warning the parties not to discuss or disseminate the allegations in a manner that constitutes retaliation or unlawful tortious conduct.

The Department understands commenters' concerns that complaints of other forms of student misconduct may not lead to the same grievance process (for example, the recipient sending a written notice of allegations to both parties) as the process required under these final regulations for Title IX sexual harassment. However, for reasons described above, the Department believes that both parties should have the benefit of understanding how the recipient has framed the scope of a sexual harassment investigation upon receipt of a formal complaint, including sufficient details known at the time, to permit the respondent opportunity to respond to the allegations. The Department disagrees that this results in unwarranted ''scrutiny'' of a complainant, and reiterates that written notice of allegations is required only after a formal complaint has been filed; thus, complainants need not be identified by name to a respondent upon a report of sexual harassment, including for the purpose of obtaining supportive measures.[1139] However, a formal complaint alleging sexual harassment triggers a grievance process, and in the interest of fairness that process must commence with both parties receiving written notice of the pertinent details of the incident under investigation. We have removed proposed § 106.44(b)(2) from these final regulations, which provision would have required a Title IX Coordinator to file a formal complaint upon receiving multiple reports against the same respondent. Removal of that proposed provision reduces the likelihood that a complainant's desire *not* to file a formal complaint will be overridden by a Title IX Coordinator's decision to sign a formal complaint.

The Department disagrees that using only the initials of the parties (instead of the full names), or withholding the complainant's identity entirely, or requiring both parties to refrain from disclosing each other's personally identifiable information, sufficiently permits the parties to meaningfully participate in the grievance process. The Department reiterates that the written notice of allegations serves both parties' interests. While complainants may often know the identity of a respondent, in some situations a complainant does not know the respondent's identity, but the written notice of allegations provision ensures that if the recipient knows or discovers the respondent's identity, the complainant is informed of that important fact. Further, the complainant's receipt of written notice under this provision ensures that the complainant understands the way in which the recipient has framed the scope of the investigation so that the complainant can meaningfully participate and advance the complainant's own interests throughout the grievance process.[1140]

The Department notes that the written notice of allegations provision does not require listing personally identifiable information of either party beyond the ''identity'' of the parties; thus, the written notice need not, and should not, for example, contain other personally identifiable information such as dates of birth, social security numbers, or home addresses, and nothing in the final regulations precludes a recipient from directing parties not to disclose such personally identifiable information.

The Department acknowledges that the final regulations require identification of the parties after a formal complaint has triggered a

[1136] Commenters cited: Bucknell Institute for Public Policy, *Perceptions of Higher Education Survey—Topline Results* (2017).

[1137] Section 106.45(b)(5)(i).

[1138] *Id.*

[1139] Under § 106.30 defining ''supportive measures'' recipients must keep confidential the provision of supportive measures to a complainant or respondent to the extent that maintaining confidentiality does not impair the ability of the recipient to provide the supportive measures. Thus, unless a particular supportive measure affects the respondent in a way that requires the respondent to know the identity of the complainant (for example, a mutual no-contact order), the Title IX Coordinator need not, and should not, disclose the complainant's identity to the respondent during the process of selecting and implementing supportive measures for the complainant.

[1140] As discussed throughout this preamble, the final regulations: Acknowledge the right of parents or guardians to exercise legal rights to act on behalf of a complainant (or respondent) in § 106.6(g); give both parties the right to select an advisor of choice and revise § 106.45(b)(2) to require the initial notice of allegations to advise parties of that right, and to notify the parties of the recipient's grievance process which includes a description of the range of supportive measures available to complainants and respondents; and forbid recipients from restricting the ability of the parties to discuss the allegations under investigation, in § 106.45(b)(5)(iii), including for the purpose of emotional or personal support, advice, or advocacy. Thus, these final regulations acknowledge that participation in a grievance process is often a difficult circumstance for any party and aim to provide numerous avenues by which a party may receive support, assistance, and advice tailored to the party's individual needs and wishes throughout the grievance process.

grievance process, in a way that the 2001 Guidance did not.[1141] The Department does not believe that anonymity during a grievance process can lead to fair, reliable outcomes, and thus requires party identities (to the extent they are known) to be included in the written notice of allegations. As noted above, where a formal complaint has not been filed by a complainant or signed by a Title IX Coordinator, the final regulations do not require a recipient to disclose a complainant's identity to a respondent (unless needed in order to provide a particular supportive measure, such as a mutual no-contact order where a respondent would need to know the identity of the person with whom the respondent's communication is restricted). In situations where a complainant's life is in danger from the respondent, such a situation may present the kind of immediate threat to physical health or safety that justifies an emergency removal of a respondent under § 106.44(c). Further, nothing in the final regulations affects a complainant's ability to seek emergency protective orders from a court of law. The final regulations also expressly prohibit retaliation, in § 106.71, and recipients must respond to complaints of retaliation in order to protect complainants whose identity has been disclosed as a result of a formal complaint (or, as also discussed herein, where providing supportive measures to the complainant necessitates the respondent knowing the complainant's identity). Thus, in situations where a complainant fears that disclosure to the respondent of the complainant's identity (or the fact that the complainant has filed a formal complaint) poses a risk of retaliation against the complainant, the Title IX Coordinator must discuss available supportive measures and consider the complainant's wishes regarding supportive measures designed to protect the complainant's safety and deter sexual harassment.

The Department understands commenters' concerns that complainants may not want to report misconduct by an employee if the complainant cannot remain anonymous. The Department reiterates that the written notice of allegations identifying the parties to a sexual harassment incident is required only after a formal complaint has been filed by a complainant or signed by a Title IX Coordinator. Complainants, therefore, need not feel dissuaded from reporting sexual harassment by an employee due to a desire for the complainant's identity to be withheld from the respondent, because unless and until a formal complaint is filed, the final regulations do not require a recipient to disclose the complainant's identity to a respondent, including an employee-respondent (unless the respondent must be informed of the complainant's identity in order for the Title IX Coordinator to effectively implement a particular supportive measure that would necessitate the respondent knowing the complainant's identity, such as a no-contact order). The Department understands that some recipients may choose to question an employee-respondent about misconduct, such as stealing or theft, without disclosing to the employee the identity of the person who reported the theft. The Department notes that the final regulations do not prevent a recipient from questioning an employee-respondent about sexual harassment allegations without disclosing the complainant's identity,[1142] provided that the recipient does not take disciplinary action against the respondent without first applying the § 106.45 grievance process (or unless emergency removal is warranted under § 106.44(c), or administrative leave is permitted under § 106.44(d)).

For the reasons already mentioned, the Department declines to require recipients to maintain the anonymity of complainants once a formal complaint has been filed. The Department also will not require recipients to give respondents a copy of the formal complaint. The written notice of allegations provision already requires the recipient to provide the date, time, alleged conduct, and identity of the complainant, so the information required by § 106.45(b)(2) provides sufficient opportunity for the respondent to participate in the grievance process while protecting the complainant's privacy rights to the extent that, for example, the complainant alleged facts in the formal complaint that are unrelated to Title IX sexual harassment and thus do not relate to the allegations that a recipient investigates in the grievance process.

While the Department does not decide policy matters based on public opinion polls, the Department agrees with commenters that informing the respondent of the ''charges against them'' represents a staple of a fair process that increases party and public confidence in the fairness and accuracy of Title IX proceedings, and believes that § 106.45(b)(2) is an important feature of the § 106.45 grievance process.

Changes: The final regulations add § 106.71 prohibiting retaliation against any person for exercising rights under Title IX or for participating (or refusing to participate) in a Title IX grievance process, and revise § 106.45(b)(5)(i) to prevent recipients from using a party's treatment records without the party's (or party's parent, if applicable) voluntary, written consent.

General Modification Suggestions

Comments: Because anything a respondent says may be used against the respondent in subsequent proceedings at an interview regarding sexual assault, including criminal proceedings, one commenter recommended that § 106.45(b)(2) include a statement that, when the allegation against the respondent would constitute a felony in the State in which the accusation is made, the respondent's silence may not be construed as evidence of guilt or responsibility for the allegation.

Another commenter asked the Department to require the Title IX Coordinator to email both the complainant and the respondent at least once a week to let them know of progress, changes, and updates on their case.

Discussion: To make clear that respondents may remain silent in

[1141] 2001 Guidance at 17 (''The school should inform the student that a confidentiality request may limit the school's ability to respond. The school also should tell the student that Title IX prohibits retaliation and that, if he or she is afraid of reprisals from the alleged harasser, the school will take steps to prevent retaliation and will take strong responsive actions if retaliation occurs. If the student continues to ask that his or her name not be revealed, the school should take all reasonable steps to investigate and respond to the complainant consistent with the student's request as long as doing so does not prevent the school from responding effectively to the harassment and preventing harassment of other students.''); *cf. id.* (stating that constitutional due process of law requires recipients that are public institutions to disclose the complainant's identity to the respondent and in such a situation the recipient should honor the complainant's desire for confidentiality and not proceed to discipline the alleged harasser.). The final regulations require identification of the name of the complainant where a formal complaint has been filed by a complainant or signed by a Title IX Coordinator, not only with respect public institutions but also as to private institutions, because constitutional due process and fundamental fairness require the respondent to know the identity of the alleged victim in order to meaningfully respond to the allegations.

[1142] The Department notes that a recipient's questioning of a respondent (whether a student or employee) about a reported sexual harassment incident, in the absence of a formal complaint, may not be used as part of an investigation or adjudication if a formal complaint is later filed by the complainant or signed by the Title IX Coordinator, because § 106.45(b)(5)(v) requires that a party be given written notice of any interview or meeting relating to the allegations under investigation, and a recipient is precluded from imposing disciplinary sanctions on a respondent without following the § 106.45 grievance process.

circumstances in which answering a question might implicate a respondent's constitutional right to avoid self-incrimination, and to protect other rights of the parties, § 106.6(d)(2) states that nothing in Title IX requires a recipient to deprive a person of any rights that would otherwise be protected from government action under the Due Process Clauses of the Fifth and Fourteenth Amendments of the U.S. Constitution. The final regulations also add to § 106.45(b)(6)(i) a provision that the decision-maker must not draw inferences about the determination regarding responsibility based on a party's failure or refusal to appear at the hearing or answer cross-examination questions.

The Department declines to follow the commenter's recommendation to require the Title IX Coordinator to email both the complainant and the respondent at least once a week to let them know of progress, changes, and updates on their case. The recipient has discretion to be more responsive than the final regulations require, but the final regulations do not require the recipient to contact the parties at least once a week. The Department notes that the final regulations require the recipient to send notice to the parties regarding essential case developments such as where additional allegations become part of the investigation; where allegations or the entire formal complaint have been dismissed; where any short-term delay or time frame extension has been granted for good cause; and after the determination regarding responsibility has been made.

Changes: The final regulations also add to § 106.45(b)(6)(i) a provision that the decision-maker must not draw inferences about the determination regarding responsibility based on a party's failure or refusal to appear at the hearing or answer cross-examination questions.

General Clarification Requests

Comments: Several commenters requested that the Department clarify what ''sufficient time [for the respondent] to prepare a response'' means. Likewise, several commenters asked that the Department clarify when a recipient must provide notice of any additional allegations to the parties, asserting that § 106.45(b)(2) does not define ''upon receipt,'' but that if read literally, that phrase could suggest ''immediately upon receipt,'' which is impossible in light of the detailed information that must be provided in the written notice. One commenter suggested a definitive guideline (*e.g.,* at least five workdays after receipt) should be imposed. Commenters asserted that ascertaining what the allegations are or how they should be phrased is not always obvious ''upon receipt'' of a formal complaint; a degree of fact-finding and/or analysis must be conducted first. One commenter argued that the provision should set forth a reasonable time frame for institutions to evaluate the information provided in a formal complaint before issuing the notice described in 106.45(b)(2)(i). Another commenter asked the Department to explain the consequences to universities of violating § 106.45(b)(2).

Discussion: The Department understands commenters' concerns that sometimes preparing a written notice of the allegations requires time for the recipient to intake a formal complaint and then compile the details required for a written notice. The Department will not interpret this provision to require notice to be provided ''immediately'' (and the provision does not use that word), but rather notice must be provided early enough to allow the respondent ''sufficient time to prepare a response.'' The Department also notes that a recipient's discretion in this regard is constrained by a recipient's obligation to conduct a grievance process within the recipient's designated, reasonably prompt time frames, such that waiting to send the written notice of allegations (even without yet conducting initial interviews with parties) could result in the recipient failing to meet time frames applicable to its grievance process. Whether the recipient provided the respondent ''sufficient time'' under § 106.45(b)(2) is a fact-specific determination. Consequences for failing to comply with the final regulations include enforcement action by the Department requiring the recipient to come into compliance by taking remedial actions the Department deems necessary, consistent with 20 U.S.C. 1682, and potentially placing the recipient's Federal funding at risk.

Changes: None.

Dismissal and Consolidation of Formal Complaints

Section 106.45(b)(3)(i) Mandatory Dismissal of Formal Complaints

Comments: Many commenters supported proposed § 106.45(b)(3) because it obligates recipients to investigate only allegations in a formal complaint, and thus provides the victim with control over whether or not to trigger the formal grievance process by filing a formal complaint. Other commenters appreciated how clear this provision was for recipients to follow. Some commenters sought clarification with respect to the practical application of this provision, such as what standard would schools be held to if they initiate proceedings on their own, but were not required to do so under Title IX. Certain commenters asked whether a respondent could claim that the school failed to comply with the proposed regulations and thus violated respondent's rights if the school used separate proceedings because the respondent's alleged conduct did not satisfy the three requirements in § 106.44(a) and § 106.45(b)(3)(i). Other commenters asked whether a respondent can use the dismissal provision to demand that a school dismiss a complaint against the respondent.

In contrast, several comments recommended that the Department remove any provision requiring dismissal of certain complaints so that recipients retain institutional flexibility to investigate complaints at their own discretion. Many commenters expressed the belief that schools should investigate each and every claim and refrain from making an initial determination (some viewed this initial determination as requiring individuals to make a prima facie case) of whether the alleged conduct satisfied the § 106.30 definition of sexual harassment. At least one commenter believed that schools should not have to dismiss even when a victim is not actually harmed. Another commenter stated that the proposed rules provided no avenue for reviewing or appealing a recipient's determination as to whether the alleged conduct satisfies the definition of sexual harassment. Commenters asserted that the Department has no authority to forbid or preclude schools from investigating non-Title IV matters that affect their institutions, but only the authority to require schools to respond to sexual harassment. Several commenters also urged the Department to transform the provision from a mandatory provision to a permissive provision by replacing ''must'' with ''may.'' Many commenters opposed the dismissal provision believing that the provision required institutions to always dismiss or ignore allegations that occurred off-campus. Several commenters cited the concern that dismissing a large number of off-campus complaints will disincentivize reporting by students altogether, forcing students to go to police departments instead.

Combined with urging the Department to expand the definition of sexual harassment in § 106.30 or alter

the ''education program or activity'' jurisdictional requirement in § 106.44(a) for fear that recipients will be required to dismiss too many complaints, many commenters argued that the mandatory dismissal language in § 106.45(b)(3) effectively foreclosed recipients from addressing sexual harassment that harms students at alarming rates (*e.g.,* harassment that is severe but not pervasive, or sexual assaults of students, by other students, that occur outside the recipient's education program or activity) even voluntarily (or under State laws) under a recipient's non-Title IX codes of conduct.

Some commenters argued that the language in § 106.45(b)(3) was inconsistent with the language of § 106.44(a) because proposed § 106.45(b)(3) omitted reference to conduct that occurred ''against a person in the United States.''

Discussion: We appreciate commenters' support for this provision's requirement that recipients must investigate allegations in a formal complaint, and agree that this provides complainants with autonomy over choosing to file a formal complaint that triggers an investigation. We acknowledge those comments expressing the concern that as proposed, § 106.45(b)(3) effectively required recipients to make an initial determination as to whether the alleged conduct satisfies the definition of sexual harassment in § 106.30 and whether it occurred within the recipient's education program or activity, and to dismiss complaints based on that initial determination, leaving recipients, complainants, and respondents unclear about whether dismissed allegations could be handled under a recipient's non-Title IX code of conduct. As discussed below, we have revised § 106.45(b)(3)(i) to mirror the conditions listed in § 106.44(a) (by adding ''against a person in the United States''), and we have added language to clarify that the mandatory dismissal in this provision is only for Title IX purposes and does not preclude a recipient from responding to allegations under a recipient's non-Title IX codes of conduct.

We are also persuaded by commenters who expressed concern that the proposed rules did not provide an avenue for reviewing or appealing a recipient's initial determination to dismiss allegations under this provision, and we have revised § 106.45(b)(3)(iii) to require the recipient to notify the parties of a dismissal decision, and we have revised § 106.45(b)(8) to give both parties equal right to appeal a dismissal decision.

The § 106.45 grievance process obligates recipients to investigate and adjudicate allegations of sexual harassment for Title IX purposes; the Department does not have authority to require recipients to investigate and adjudicate misconduct that is not covered under Title IX, nor to preclude a recipient from handling misconduct that does not implicate Title IX in the manner the recipient deems fit. In response to commenters' concerns, the final regulations clarify that dismissal is mandatory where the allegations, if true, would not meet the Title IX jurisdictional conditions (*i.e.,* § 106.30 definition of sexual harassment, against a person in the United States, in the recipient's education program or activity), reflecting the same conditions that trigger a recipient's response under § 106.44(a). The criticism of many commenters was well-taken as to the lack of clarity in the proposed rules regarding a recipient's discretion to address allegations subject to the mandatory dismissal through non-Title IX code of conduct processes. The final regulations therefore revise § 106.45(b)(3)(i) to expressly state (emphasis added) that ''the recipient must dismiss the formal complaint with regard to that conduct *for purposes of sexual harassment under title IX or this part; such a dismissal does not preclude action under another provision of the recipient's code of conduct.*'' The Department notes that recipients retain the flexibility to employ supportive measures in response to allegations of conduct that does not fall under Title IX's purview, as well as to investigate such conduct under the recipient's own code of conduct at the recipient's discretion. This clarifies that the Department does not intend to dictate how a recipient responds with respect to conduct that does not meet the conditions specified in § 106.44(a). For similar reasons, the Department does not believe that it has the authority to make dismissal optional by changing ''must dismiss'' to ''may dismiss'' because that change would imply that if a recipient chose not to dismiss allegations about conduct that does not meet the conditions specified in § 106.44(a), the Department would nonetheless hold the recipient accountable for following the prescribed grievance process, but the § 106.45 grievance process is only required for conduct that falls under Title IX. The Department therefore retains the mandatory dismissal language in this provision and adds the clarifying language described above. Thus, these final regulations leave recipients discretion to address allegations of misconduct that do not trigger a recipient's Title IX response obligations due to not meeting the Section 106.30 definition of sexual harassment, not occurring in the recipient's education program or activity, or not occurring against a person in the U.S.

Changes: We are revising § 106.45(b)(3)(i) to add ''against a person in the United States'' to align this provision with the conditions stated in § 106.44(a). We are also revising § 106.45(b)(3)(i) to clarify that a mandatory dismissal under this provision is a dismissal for purposes of Title IX and does not preclude action under another provision of the recipient's code of conduct. We add § 106.45(b)(3)(iii) to require recipients to send the parties written notice of any dismissal decision, and we have revised § 106.45(b)(8) to give both parties equal rights to appeal a recipient's dismissal decisions.

Section 106.45(b)(3)(ii)–(iii) Discretionary Dismissals/Notice of Dismissal

Comments: Some commenters suggested that the Department provide greater flexibility to institutions to decide whether or not a full investigation is merited. For instance, some commenters suggested that in circumstances involving a frivolous accusation, a matter that has already been investigated, complaints by multiple complainants none of whom are willing to participate in the grievance process, or when there has been an unreasonable delay in filing that could prejudice the respondent, the Department should grant institutions greater flexibility to determine whether or not to start or continue a formal investigation. At least one commenter suggested that, if greater flexibility were provided, institutions should also be required to document why they did not choose to conduct a formal investigation. Other commenters requested that the Department expand victims' options for institutional responses to include non-adversarial choices.

Discussion: We are persuaded by the commenters urging the Department to grant recipients greater discretion and flexibility to dismiss formal complaints under certain circumstances. Accordingly, we are revising § 106.45(b)(3) to permit discretionary dismissals. Specifically, the Department is adding § 106.45(b)(3)(ii), which allows (but does not require) recipients to dismiss formal complaints in three specified circumstances: Where a complainant notifies the Title IX

Coordinator in writing that the complainant would like to withdraw the formal complaint or any allegations therein; where the respondent is no longer enrolled or employed by the recipient; or where specific circumstances prevent the recipient from gathering evidence sufficient to reach a determination as to the allegations contained in the formal complaint.

The Department believes that § 106.45(b)(3)(ii) reaffirms the autonomy of complainants and their ability to choose to remove themselves from the formal grievance process at any point, while granting recipients the discretion to proceed with an investigation against a respondent even where the complainant has requested that the formal complaint or allegations be withdrawn (for example, where the recipient has gathered evidence apart from the complainant's statements and desires to reach a determination regarding the respondent's responsibility). By granting recipients the discretion to dismiss in situations where the respondent is no longer a student or employee of the recipient, the Department believes this provision appropriately permits a recipient to make a dismissal decision based on reasons that may include whether a respondent poses an ongoing risk to the recipient's community, whether a determination regarding responsibility provides a benefit to the complainant even where the recipient lacks control over the respondent and would be unable to issue disciplinary sanctions, or other reasons.[1143] The final category of discretionary dismissals addresses situations where specific circumstances prevent a recipient from meeting the recipient's burden to collect evidence sufficient to reach a determination regarding responsibility; for example, where a complainant refuses to participate in the grievance process (but also has not decided to send written notice stating that the complainant wishes to withdraw the formal complaint), or where the respondent is not under the authority of the recipient (for instance because the respondent is a non-student, non-employee individual who came onto campus and allegedly sexually harassed a complaint), and the recipient has no way to gather evidence sufficient to make a determination, this provision permits dismissal. The Department wishes to emphasize that this provision is *not* the equivalent of a recipient deciding that the evidence gathered has not met a probable or reasonable cause threshold or other measure of the quality or weight of the evidence, but rather is intended to apply narrowly to situations where specific circumstances prevent the recipient from meeting its burden in § 106.45(b)(5)(i) to gather sufficient evidence to reach a determination. Accordingly, a recipient should not apply a discretionary dismissal in situations where the recipient does not know whether it can meet the *burden of proof* under § 106.45(b)(5)(i). Decisions about whether the recipient's burden of proof has been carried must be made in accordance with §§ 106.45(b)(6)–(7)—not prematurely made by persons other than the decision-maker, without following those adjudication and written determination requirements.

The Department declines to authorize a discretionary dismissal for ''frivolous'' or ''meritless'' allegations because many commenters have expressed to the Department well-founded concerns that complainants have faced disbelief or skepticism when reporting sexual harassment, and the Department believes that where a complainant has filed a formal complaint, the recipient must be required to investigate the allegations without dismissing based on a conclusion that the allegations are frivolous, meritless, or otherwise unfounded, because the point of the § 106.45 grievance process is to require the recipient to gather and objectively evaluate relevant evidence before reaching conclusions about the merits of the allegations. In making the revisions to § 106.45(b)(3)(ii) authorizing three grounds for a discretionary dismissal of a formal complaint (or allegations therein), the Department believes it is reaching a fair balance between obligating the recipient to fully investigate all allegations that a complainant has presented in a formal complaint, with the recognition that certain circumstances render completion of an investigation futile. Because these three grounds for dismissal are discretionary rather than mandatory, the recipient retains discretion to take into account the unique facts and circumstances of each case before reaching a dismissal decision.

Finally, we are also persuaded by commenters' recommendations that the Department offer the parties an appeal from a recipient's dismissal decisions. The final regulations add § 106.45(b)(3)(iii) requiring that the recipient promptly send the parties written notice so that the parties know when a formal complaint (or allegations therein) has been dismissed (whether under mandatory dismissal, or discretionary dismissal), including the reason for the dismissal. This requirement promotes a fair process by informing both parties of recipient's actions during the grievance process particularly as to a matter as significant as a dismissal of a formal complaint (or allegations therein). Including an explicit notice requirement under this provision is also consistent with the Department's goal of providing greater clarity and transparency as to a recipient's obligations and what the parties to a formal grievance process can expect. The final regulations also revise the appeals provision at § 106.45(b)(8) to allow the parties equal opportunity to appeal any dismissal decision of the recipient.

Changes: The Department is adding § 106.45(b)(3)(ii) to specify three situations where a recipient is permitted but not required to dismiss a formal complaint: Where a complainant notifies the Title IX Coordinator in writing that the complainant would like to withdraw the formal complaint or any allegations therein; where the respondent is no longer enrolled or employed by the recipient; or where specific circumstances prevent the recipient from gathering evidence sufficient to reach a determination as to the allegations contained in the formal complaint. The Department is also adding § 106.45(b)(3)(iii) to require a recipient to notify the parties, in writing, as to any mandatory or discretionary dismissal and reasons for the dismissal. We also revise the appeals provision at § 106.45(b)(8) to allow the parties equal opportunity to appeal any dismissal decision of the recipient.

Section 106.45(b)(4) Consolidation of Formal Complaints

Comments: One commenter suggested revising references to ''both parties'' to ''all parties'' to account for incidents that involve more than two parties. One commenter criticized the proposed rules for seeming to contemplate that sexual harassment incidents only involve a single victim and a single perpetrator and failing to acknowledge that the process may involve multiple groups of people on either side. Another

[1143] The Department notes that the Elementary and Secondary Education Act of 1965 (ESEA), as amended by the Every Student Succeeds Act (ESSA), may require a recipient subject to ESEA to take certain steps with respect to an employee who has been accused of sexual misconduct and that continuing a Title IX sexual harassment investigation even when the accused employee has left the recipient's employ may assist the recipient in knowing whether the recipient does, or does not, have probable cause to believe the employee engaged in sexual misconduct. *E.g., https://www2.ed.gov/policy/elsec/leg/essa/section8546dearcolleagueletter.pdf.*

commenter asked the Department to explain how a single incident involving multiple parties would be handled. A few commenters asserted that some recipients have a practice of not allowing a respondent to pursue a counter-complaint against an original complainant, resulting in what one commenter characterized as an unfair rule that amounts to ''first to file, wins.''

Discussion: In response to commenters' concerns that the proposed rules did not sufficiently provide clarity about situations involving multiple parties, and in response to commenters who asserted that recipients have not always understood how to handle a complaint filed by one party against the other party, the Department adds § 106.45(b)(4), addressing consolidation of formal complaints. The Department believes that recipients and parties will benefit from knowing that recipients have discretion to consolidate formal complaints in situations that arise out of the same facts or circumstances and involve more than one complainant, more than one respondent, or what amount to counter-complaints by one party against the other. Section 106.45(b)(4) further clarifies that where a grievance process involves more than one complainant or respondent, references to the singular ''party,'' ''complainant'' or ''respondent'' include the plural.

Changes: The final regulations add § 106.45(b)(4) to give recipients discretion to consolidate formal complaints of sexual harassment where the allegations of sexual harassment arise out of the same facts or circumstances. Where a grievance process involves more than one complainant or more than one respondent, references in § 106.45 to the singular ''party,'' ''complainant,'' or ''respondent'' include the plural, as applicable.

Investigation

Section 106.45(b)(5)(i) Burdens of Proof and Gathering Evidence Rest on the Recipient

Comments: Some commenters supported this provision based on personal stories involving the recipient placing the burden of proof on a party when the party had no rights to interview witnesses or inspect locations involved in the incident. One commenter supported this provision because it is entirely appropriate that complainants not be assigned the burden of proof or burden of producing evidence since they are seeking equal access to education and it is the school that should provide equal access, and removing these burdens from the shoulders of the respondent is also an important part of the accused's presumption of innocence. One commenter supported placing the burden of proof on the recipient because it is always the school's responsibility to ensure compliance with Title IX.

Some commenters believe that placing the burden of proof on the recipient is tantamount to putting it on the survivor(s) to prove all the elements of the assault, which is an impossible burden and which will deter survivor(s) from reporting and recovering from the assault. One commenter supported placing the burden of gathering evidence on the recipient but not the burden of proof because the recipient is not a party to the proceeding. Some commenters expressed concern that this provision of the final regulations will cause instability in the system because placing the burden of gathering evidence on the recipient suggests an adversarial rather than educational process and opens recipients up to charges that the recipient failed to do enough to gather evidence. Various commenters also contended that this provision of the final regulations is too strict and demanding. Some commenters suggested that Title IX requires only that an institution demonstrate that it did not act with deliberate indifference when it had actual knowledge of sexual harassment or sexual assault—not proving whether each factual allegation in a complaint has merit—and that requiring a recipient to prove each allegation is a burden that Title IX itself has not imposed on recipients.

Some commenters suggested explaining what the recipient can and cannot do in pursuit of gathering evidence, or limiting the recipient's burden to gathering evidence ''reasonably available.'' Other commenters suggested requiring the recipient to investigate all reasonable leads and interview all witnesses identified by the parties.

Discussion: The Department appreciates commenters' support for § 106.45(b)(5)(i). The Department agrees with commenters who asserted that the recipient is responsible for ensuring equal access to education programs and activities and should not place the burden of gathering relevant evidence, or meeting a burden of proof, on either party; Title IX obligates recipients to operate education programs and activities free from sex discrimination, and does not place burdens on students or employees who are seeking to maintain the equal educational access that recipients are obligated to provide. The Department believes that § 106.45(b)(5)(i) is important to providing a fair process to both parties by taking the burden of factually determining which situations require redress of sexual harassment off the shoulders of the parties. At the same time, the final regulations ensure that parties may participate fully and robustly in the investigation process, by gathering evidence, presenting fact and expert witnesses, reviewing the evidence gathered, responding to the investigative report that summarizes relevant evidence, and asking questions of other parties and witnesses before a decision-maker has reached a determination regarding responsibility.

The Department disagrees that § 106.45(b)(5)(i) places a *de facto* burden of proof on the complainant to prove the elements of an alleged assault, and disagrees that this provision is likely to chill reporting. To the contrary, this provision clearly prevents a recipient from placing that burden on a complainant (or a respondent). The Department disagrees that the recipient should bear the burden of producing evidence yet not bear the burden of proof at the adjudication; the Department recognizes that the recipient is not a party to the proceeding, but this does not prevent the recipient from presenting evidence to the decision-maker, who must then objectively evaluate relevant evidence (both inculpatory and exculpatory) and reach a determination regarding responsibility. Nothing about having to carry the burden of proof suggests that the recipient must desire or advocate for meeting (or not meeting) the burden of proof; to the contrary, the final regulations contemplate that the recipient remains objective and impartial throughout the grievance process, as emphasized by requiring a recipient's Title IX personnel involved in a grievance process to serve free from bias and conflicts of interest and to be trained in how to serve impartially and how to conduct a grievance process.[1144] Whether the evidence gathered and presented by the recipient (*i.e.,* gathered by the investigator and with respect to relevant evidence, summarized in an investigative report) does or does not meet the burden of proof, the recipient's obligation is the same: To respond to the determination regarding responsibility by complying with § 106.45 (including effectively implementing remedies for the complainant if the respondent is determined to be responsible).[1145]

[1144] Section 106.45(b)(1)(iii).

[1145] Section 106.45(b)(1)(i); § 106.45(b)(7)(iv).

The Department recognizes that bearing the burden of proof may seem uncomfortable for recipients who do not wish to place themselves ''between'' two members of their community or be viewed as prosecutors adversarial to the respondent. The Department does not believe that this provision makes Title IX proceedings more adversarial; rather, these proceedings are inherently adversarial, often involving competing plausible narratives and high stakes for both parties, and recipients are obligated to identify and address sexual harassment that occurs in the recipient's education program or activity. The final regulations do not require a recipient to take an adversarial posture with respect to either party, and in fact require impartiality. Ultimately, however, the recipient itself must take action in response to the determination regarding responsibility that directly affects both parties, and it is the recipient's burden to impartially gather evidence and present it so that the decision-maker can determine whether the recipient (not either party) has shown that the weight of the evidence reaches or falls short of the standard of evidence selected by the recipient for making determinations. The Department is aware that the final regulations contemplate a recipient fulfilling many obligations that, while performed by several different individuals, are legally attributable to the recipient itself. However, this does not mean that the recipient, having appropriately designated individuals to perform certain roles in fulfillment of the recipient's obligations, cannot meet a burden to gather and collect evidence, present the evidence to a decision-maker, and reach a fair and accurate determination. Thus, the Department disagrees that this provision is too strict or demanding.

The Department agrees that the Supreme Court framework for private Title IX litigation applies a deliberate indifference standard to known sexual harassment (including reports or allegations of sexual harassment). As explained in the ''Adoption and Adaption of the Supreme Court's Framework to Address Sexual Harassment'' section of this preamble, the Department intentionally adopts that framework, and adapts it for administrative enforcement purposes so that these final regulations hold a recipient liable not only when the recipient may be deemed to have intentionally committed sex discrimination (*i.e.,* by being deliberately indifferent to actual knowledge of actionable sexual harassment) but also when a recipient has violated regulatory obligations that, while they may not purport to represent definitions of sex discrimination are required in order to further Title IX's non-discrimination mandate. One of the ways in which the Department adapts that framework is concluding that where a complainant wants a recipient to investigate allegations, the recipient must conduct an investigation and adjudication, and provide remedies to that complainant if the respondent is found responsible. While this response may or may not be required in private Title IX lawsuits, the Department has determined that a consistent, fair grievance process to resolve sexual harassment allegations, under the conditions prescribed in the final regulations, effectuates the purpose of Title IX to provide individuals with effective protections against discriminatory practices.

The Department appreciates commenters' suggestions that this provision be narrowed (*e.g.,* to state that the burden is to gather evidence ''reasonably available'') or broadened (*e.g.,* to require investigation of ''all'' leads or interviews of all witnesses), or to further specify steps a recipient must take to gather evidence. The Department believes that the scope of § 106.45(b)(5)(i) appropriately obligates a recipient to undertake a thorough search for relevant facts and evidence pertaining to a particular case, while operating under the constraints of conducting and concluding the investigation under designated, reasonably prompt time frames and without powers of subpoena. Such conditions limit the extensiveness or comprehensiveness of a recipient's efforts to gather evidence while reasonably expecting the recipient to gather evidence that is available.

Changes: None.

Section 106.45(b)(5)(ii) Equal Opportunity To Present Witnesses and Other Inculpatory/Exculpatory Evidence

Comments: Many commenters supported § 106.45(b)(5)(ii), asserting that it will provide equal opportunity for the parties to present witnesses and other evidence. Commenters stated that this provision will make the grievance process clearer, provide more reliable outcomes, and afford participants important due process protections. One commenter asserted that this provision will create greater uniformity between Title IX regulations and other justice systems in the U.S. designed to deal with similar issues. This commenter also asserted that this provision will reduce the risk of a false positive guilty finding for an innocent student accused of sexual harassment.

At the same time, one commenter expressed concerns that allowing respondents to hear the complainant's evidence and learn the identity of the complainants' witnesses will enable the respondent to intimidate the complainant, intimidate the complainant's witnesses, or spread lies about the complainant. Another commenter argued that previous guidance and regulations already allowed for schools to give each party a chance to present evidence, so the proposed rules are superfluous.

Several commenters recounted personal stories about Title IX Coordinators failing to consider a respondent's exculpatory evidence, including refusing to ask questions the respondent wished to ask the complainant or the complainant's witnesses, and refusing to speak with the respondent's witnesses. One commenter submitted a personal story about the recipient never providing the respondent with the complainant's evidence, which the commenter contended severely hindered the respondent's ability to defend against the complainant's allegations.

One commenter stated approvingly that a provision similar to § 106.45(b)(5)(ii) also appears in the Harvard Law School Sexual and Gender-Based Harassment Policy, under which all parties are afforded due process protections, including the right to present evidence and witnesses at a live hearing before an impartial decision maker. Another commenter suggested that § 106.45(b)(5)(ii) should give the parties an equal opportunity to identify witnesses.

One commenter believed that the provision is consistent with the Sixth Amendment right to confront adverse witnesses, call favorable witnesses, as well as the right to effective assistance of counsel. The commenter argued that some universities have a practice refusing respondents the assistance of counsel, which meant that a young person must defend against trained, seasoned Title IX Coordinators who often serve as the investigator (and sometimes also the decision-maker) in a case. The commenter also cited numerous situations of students being prevented from introducing exculpatory evidence ostensibly on the basis of the complex rules of evidence applied in courtrooms that universities purport to apply to Title IX proceedings, yet universities selectively apply court-based evidentiary rules in ways designed to disadvantage respondents. Commenters asserted that universities

allow hearsay and other evidence into Title IX proceedings under the argument that the hearings are an ''informal'' or an ''educational'' process where more relaxed rules are applied, yet do not carefully apply all the court evidentiary rules that ensure hearsay evidence is reliable before being admissible, and at the same time refuse to allow respondents to cross-examine witnesses who are making non-hearsay statements at a hearing.

One commenter asked the Department to require recipients to provide training materials to parties upon request. The commenter requested that the training materials must explain what evidence may or may not be considered in light of what the commenter believed is bias that most Title IX Coordinators hold in favor of victims.

Discussion: The Department agrees with commenters who asserted that § 106.45(b)(5)(ii) will improve the grievance process for all parties, and appreciates references to the beneficial impact of other laws and policies (including Department guidance) that include similar provisions.[1146] The Department acknowledges the personal experiences shared by commenters describing instances in which recipients have ignored, discounted, or denied opportunities to introduce exculpatory evidence, and the Department also acknowledges that other commenters recounted personal experiences involving recipients ignoring, discounting, or denying opportunity to introduce inculpatory evidence (by, for example, showing evidence to a respondent or respondent's attorney without showing it to the complainant). The Department appreciates that many recipients already require Title IX personnel to allow both parties equal opportunity to present evidence and witnesses, but in light of commenters' anecdotal evidence and for reasons discussed in the ''Role of Due Process in the Grievance Process'' section of this preamble, the reality and perception is that too many recipients fail to consider inculpatory or exculpatory evidence resulting in real and perceived injustices for complainants and respondents. Equal opportunity to present inculpatory evidence and exculpatory evidence, including fact witnesses and expert witnesses, is an important procedural right and protection for both parties, and will improve the reliability and legitimacy of the outcomes recipients reach in Title IX sexual harassment grievance processes.

The Department received numerous comments expressing concern about the potential for retaliation and recounting experiences of retaliation suffered by complainants and respondents. The Department has added § 106.71 in these final regulations, explicitly prohibiting any person from intimidating, threatening, coercing, or discriminating against another individual for the purpose of interfering with any right or privilege secured by Title IX. The retaliation provision also requires that the identities of complainants, respondents, and witnesses must be kept confidential, except as permitted by FERPA, required by law, or to the extent necessary to carry out a Title IX grievance process. Section 106.71 also authorizes parties to file complaints alleging retaliation under § 106.8(c) which requires recipients to adopt and publish grievance procedures that provide for the prompt and equitable resolution of complaints of sex discrimination. The Department believes that this provision will deter retaliation, as well as afford parties and the recipient the opportunity promptly to redress retaliation that does occur.

In response to commenters who asserted that recipients should specify in their materials used to train Title IX personnel what evidence is relevant or admissible, we have revised § 106.45(b)(1)(iii) to require a recipient's investigators and decision-makers to receive training on issues of relevance,[1147] including for a decision-maker training on when questions about a complainant's prior sexual history are deemed ''not relevant'' under § 106.45(b)(6). Section 106.45(b)(1)(iii) continues to require training on how to conduct an investigation and grievance process, such that each aspect of a recipient's procedural rules (including evidentiary rules) that a recipient must adopt in order to comply with these regulations, and any additional rules that are consistent with these final regulations,[1148] must be included in the training for a recipient's Title IX personnel. Further, if a recipient trains Title IX personnel to evaluate, credit, or assign weight to types of relevant, admissible evidence, that topic will be reflected in the recipient's training materials. The Department agrees with commenters who urged the Department to require that the recipients publicize their training materials, because such a requirement will improve the transparency of a recipient's grievance process. Accordingly, the Department requires recipients to make materials used to train a recipient's Title IX personnel publicly available on recipients' websites, under § 106.45(b)(10).

Changes: We are revising § 106.45(b)(5)(ii) to require recipients to provide an equal opportunity for all parties to present both fact and expert witnesses. We are also revising § 106.45(b)(10) to require recipients to make the materials used to train Title IX personnel publicly available on recipients' websites or, if a recipient does not have a website, available upon request for inspection by members of the public. We have also added § 106.71 to the final regulations to expressly prohibit retaliating against any individual for exercising rights under Title IX.

Comments: One commenter requested the Department to modify § 106.45(b)(5)(ii) to expressly allow a party's mental health history to be introduced as evidence. One commenter argued that the respondent should be permitted to admit as evidence instances where the complainant had accused other students of sexual misconduct in the past. One commenter argued that complainants often receive the benefit of certain types of evidence, such as hearsay and victim impact statements, while respondents are denied the use of the same evidence and arguments. The commenter asked the Department to level the playing field by allowing respondents to write their own

[1146] As discussed throughout this preamble, including in the ''Support and Opposition for the Grievance Process in the § 106.45 Grievance Process'' and the ''Role of Due Process in the Grievance Process'' sections of this preamble, the Department has considered grievance procedures in use by particular recipients, prescribed under various State and other Federal laws, recommended by advocacy organizations, and from other sources, and has intentionally crafted the § 106.45 grievance process to contain those procedural rights and protections that best serve Title IX's non-discrimination mandate, comport with constitutional due process and fundamental fairness, and may reasonably be implemented in the context of an educational institution as opposed to courts of law.

[1147] For discussion of these final regulations' requirement that relevant evidence, and only relevant evidence, must be objectively evaluated to reach a determination regarding responsibility, and the specific types of evidence that these final regulations deem irrelevant or excluded from consideration in a grievance process (*e.g.,* a complainant's prior sexual history, any party's medical, psychological, and similar records, any information protected by a legally recognized privilege, and (as to adjudications by postsecondary institutions), party or witness statements that have not been subjected to cross-examination at a live hearing, see the ''Hearings'' subsection of the ''Section 106.45 Recipient's Response to Formal Complaints'' section of this preamble.

[1148] The revised introductory sentence of § 106.45(b) expressly allows recipients to adopt rules that apply to the recipient's grievance process, other than those required under § 106.45, so long as such additional rules apply equally to both parties. For example, a postsecondary institution recipient may adopt reasonable rules of order and decorum to govern the conduct of live hearings.

impact statement and present evidence such as the results of lie detector tests if the hearing allows complainants the use of similar evidence. Another commenter asked the Department to direct recipients to exclude irrelevant evidence.

One commenter suggested that, at the initial complaint stage, complainants should be able to present additional evidence to prevent the recipient from quickly dismissing the complainant's complaint and if the complainant can provide sufficient evidence, then the commenter asked the Department to require the recipient to open a case and investigate the allegations. A few commenters asked the Department to afford both parties the right to present evidence, not just at the investigation stage, but also during the hearings themselves and during the appeal process. One commenter suggested that the Department should require recipients to consider new evidence at the hearing, including evidence of retaliation or additional harassment by the respondent.

Discussion: A recipient's grievance process must objectively evaluate all *relevant* evidence (§ 106.45(b)(1)(ii)). Section 106.45(b)(5)(iii) of these final regulations requires the recipients to refrain from restricting the ability of either party to gather and present *relevant* evidence. Section 106.45(b)(5)(vi) permits both parties equal opportunity to inspect and review all evidence directly related to the allegations. Section 106.45(b)(6)(i)–(ii) directs the decision-maker to allow parties to ask witnesses all *relevant* questions and follow-up questions, and § 106.45(b)(6)(i) expressly states that only *relevant* cross-examination questions may be asked at a live hearing. The requirement for recipients to summarize and evaluate relevant evidence, and specification of certain types of evidence that must be deemed not relevant or are otherwise inadmissible in a grievance process pursuant to § 106.45, appropriately directs recipients to focus investigations and adjudications on evidence pertinent to proving whether facts material to the allegations under investigation are more or less likely to be true (*i.e.,* on what is relevant). At the same time, § 106.45 deems certain evidence and information not relevant or otherwise not subject to use in a grievance process: Information protected by a legally recognized privilege;[1149] evidence about a complainant's prior sexual history;[1150] any party's medical, psychological, and similar records unless the party has given voluntary, written consent;[1151] and (as to adjudications by postsecondary institutions), party or witness statements that have not been subjected to cross-examination at a live hearing.[1152]

These final regulations require objective evaluation of relevant evidence, and contain several provisions specifying types of evidence deemed irrelevant or excluded from consideration in a grievance process; a recipient may not adopt evidentiary rules of admissibility that contravene those evidentiary requirements prescribed under § 106.45. For example, a recipient may not adopt a rule excluding relevant evidence whose probative value is substantially outweighed by the danger of unfair prejudice; although such a rule is part of the Federal Rules of Evidence, the Federal Rules of Evidence constitute a complex, comprehensive set of evidentiary rules and exceptions designed to be applied by judges and lawyers, while Title IX grievance processes are not court trials and are expected to be overseen by layperson officials of a school, college, or university rather than by a judge or lawyer. Similarly, a recipient may not adopt rules excluding certain types of relevant evidence (*e.g.,* lie detector test results, or rape kits) where the type of evidence is not either deemed ''not relevant'' (as is, for instance, evidence concerning a complainant's prior sexual history[1153]) or otherwise barred from use under § 106.45 (as is, for instance, information protected by a legally recognized privilege[1154]). However, the § 106.45 grievance process does not prescribe rules governing how admissible, relevant evidence must be evaluated for weight or credibility by a recipient's decision-maker, and recipients thus have discretion to adopt and apply rules in that regard, so long as such rules do not conflict with § 106.45 and apply equally to both parties.[1155] In response to commenters' concerns that the final regulations do not specify rules about evaluation of evidence, and recognizing that recipients therefore have discretion to adopt rules not otherwise prohibited under § 106.45, the final regulations acknowledge this reality by adding language to the introductory sentence of § 106.45(b): ''Any provisions, rules, or practices other than those required by § 106.45 that a recipient adopts as part of its grievance process for handling formal complaints of sexual harassment, as defined in § 106.30, must apply equally to both parties.'' A recipient may, for example, adopt a rule regarding the weight or credibility (but not the admissibility) that a decision-maker should assign to evidence of a party's prior bad acts, so long as such a rule applied equally to the prior bad acts of complainants and the prior bad acts of respondents. Because a recipient's investigators and decision-makers must be trained specifically with respect to ''issues of relevance,''[1156] any rules adopted by a recipient in this regard should be reflected in the recipient's training materials, which must be publicly available.[1157]

As to a commenter's request that the Department require the recipient to investigate a complaint of sexual harassment or assault if the complainant can supply enough evidence to overcome the recipient's dismissal, the final regulations address mandatory and discretionary dismissals, including expressly giving both parties the right to appeal a recipient's dismissal decision, and one basis of appeal expressly includes where newly discovered evidence may affect the outcome.[1158] Thus, if a recipient dismisses a formal complaint under § 106.45(b)(3)(i) because, for instance, the recipient concludes that the misconduct alleged does not meet the definition of sexual harassment in § 106.30, the complainant can appeal that dismissal, for example by asserting that newly discovered evidence demonstrates that the misconduct in fact does meet the § 106.30 definition of sexual harassment, or alternatively by asserting procedural irregularity on the basis that the alleged conduct in fact does meet the definition of § 106.30 sexual harassment and thus mandatory dismissal was inappropriate under § 106.45(b)(3)(i).

As to commenters' request to allow both parties to introduce new evidence at every stage, including the hearing and on appeal, the final regulations require recipients to allow both parties equally to appeal on certain bases including newly discovered evidence that may affect the outcome of the matter (as well as on the basis of procedural irregularity, or conflict of interest of bias, that may have affected the outcome).[1159] For reasons discussed above, the Department declines to be

more prescriptive than the Department believes is necessary to ensure a consistent, fair grievance process, and thus leaves decisions about other circumstances under which a party may offer or present evidence in the recipient's discretion, so long as a recipient's rules in this regard comply with § 106.45(b)(5)(ii) by giving ''equal opportunity'' to both parties to present witnesses (including fact witnesses and expert witnesses) and other evidence (including inculpatory and exculpatory evidence).

Changes: The Department is revising § 106.45(b)(5)(ii) to add the phrase ''including fact and expert witnesses'' to clarify that the equal opportunity to present witnesses must apply to experts. The final regulations also add language to the introductory sentence of § 106.45(b) stating that rules adopted by a recipient for use in the grievance process must apply equally to both parties. We have also added § 106.45(b)(1)(x) prohibiting use of information protected by a legally recognized privilege. We have also revised § 106.45(b)(5)(i) prohibiting use of a party's medical, psychological, and other treatment records without the party's voluntary, written consent.

Section 106.45(b)(5)(iii) Recipients Must Not Restrict Ability of Either Party To Discuss Allegations or Gather and Present Relevant Evidence

Comments: Some commenters expressed support for § 106.45(b)(5)(iii), noting that First Amendment free speech issues are implicated when schools impose ''gag orders'' on parties' ability to speak about a Title IX situation. A few commenters noted that recipients' application of gag orders ends up preventing parties from collecting evidence by preventing them from talking to possible witnesses, and even from calling parents or friends for support.

Many commenters argued that this provision will harm survivors and chill reporting because survivors often feel severe distress when other students know of the survivor's report, or experience stigma and backlash when other students find out the survivor made a formal complaint, which deters reporting.[1160] Other commenters argued that a provision that permits sensitive information to be disseminated and even published on social media or campus newspapers results in loss of privacy and anonymity that betrays already-traumatized survivors. Other commenters opposed this provision fearing it will negatively affect both parties by leading to gossip, shaming, retaliation, and defamation. Other commenters believed this provision opens the door to witness or evidence tampering and intimidation and/or interference with the investigation. Other commenters asserted that the final regulations should permit each party to identify witnesses but then permit only the recipient to discuss the allegations with the witnesses, because witnesses might be more forthcoming with an investigator than with a party.

Some commenters believed that with regard to elementary and secondary schools, the final regulations should clarify the extent to which this provision applies because common sense suggests that a school administrator, such as a principal, should be able to restrict a student from randomly or maliciously discussing allegations of sexual harassment without impeding the student's ability to participate in the formal complaint process.

Several commenters urged the Department to modify this provision in one or more of the following ways: The parties must be permitted to discuss allegations only with those who have a need to know those allegations; the recipient may limit any communication to solely neutral communication specifically intended to gather witnesses and evidence or participate in the grievance process; the recipient may limit the parties' communication or contact with each other during the investigation and prohibit disparaging communications, if those limits apply equally to both parties; recipients must be permitted to restrict the discussion or dissemination of materials marked as confidential; while parties should be allowed to discuss the general nature of the allegations under investigation, recipients should have the authority to limit parties from discussing specific evidence provided under § 106.45(b)(5)(vi) with anyone other than their advisor; the evidence discussed should be limited to that which is made accessible to the decision-maker(s), which mirrors the requirements in VAWA; the final regulations should provide an initial warning that neither party is to aggravate the problem in any manner; the final regulations should include language permitting the issuance of ''no contact'' orders as a supportive measure; the final regulations should prohibit parties from engaging in retaliatory conduct in violation of institutional policies.

Discussion: The Department appreciates commenters' support for § 106.45(b)(5)(iii). The Department acknowledges the concerns expressed by other commenters concerned about confidentiality and retaliation problems that may arise from application of this provision. This provision contains two related requirements: That a recipient not restrict a party's ability to (i) discuss the allegations under investigation or (ii) gather and present evidence. The two requirements overlap somewhat but serve distinct purposes.

As to this provision's requirement that a recipient not restrict a party's ability to discuss the allegations under investigation, the Department believes that a recipient should not, under the guise of confidentiality concerns, impose prior restraints on students' and employees' ability to discuss (*i.e.,* speak or write about) the allegations under investigation, for example with a parent, friend, or other source of emotional support, or with an advocacy organization. Many commenters have observed that the grievance process is stressful, difficult to navigate, and distressing for both parties, many of whom in the postsecondary institution context are young adults ''on their own'' for the first time, and many of whom in the elementary and secondary school context are minors. The Department does not believe recipients should render parties feeling isolated or alone through the grievance process by restricting parties' ability to seek advice and support outside the recipient's provision of supportive measures. Nor should a party face prior restraint on the party's ability to discuss the allegations under investigation where the party intends to, for example, criticize the recipient's handling of the investigation or approach to Title IX generally. The Department notes that student activism, and employee publication of articles and essays, has spurred many recipients to change or improve Title IX procedures, and often such activism and publications have included discussion by parties to a Title IX grievance process of perceived flaws in the recipient's Title IX policies and procedures. The Department further notes that § 106.45(b)(5)(iii) is not unlimited in scope; by its terms, this provision stops a recipient from restricting parties' ability to discuss ''the allegations under investigation.'' This provision does not, therefore, apply to discussion of information that does not consist of ''the allegations under investigation'' (for example, evidence related to the allegations that has been collected and exchanged between the parties and their

[1160] Commenters cited: Alan M. Gross *et al., An examination of sexual violence against college women,* 12 Violence Against Women 3 (2006).

advisors during the investigation under § 106.45(b)(5)(vi), or the investigative report summarizing relevant evidence sent to the parties and their advisors under § 106.45(b)(5)(vii)).

As to the requirement in § 106.45(b)(5)(iii) that recipients must not restrict parties' ability ''to gather and present evidence,'' the purpose of this provision is to ensure that parties have equal opportunity to participate in serving their own respective interests in affecting the outcome of the case. This provision helps ensure that other procedural rights under § 106.45 are meaningful to the parties; for example, while the parties have equal opportunity to inspect and review evidence gathered by the recipient under § 106.45(b)(5)(vi), this provision helps make that right meaningful by ensuring that no party's ability to gather evidence (*e.g.,* by contacting a potential witness, or taking photographs of the location where the incident occurred) is hampered by the recipient.

Finally, the two requirements of this provision sometimes overlap, such as where a party's ability to ''discuss the allegations under investigation'' is necessary precisely so that the party can ''gather and present evidence,'' for example to seek advice from an advocacy organization or explain to campus security the need to access a building to inspect the location of an alleged incident.

The Department appreciates the opportunity to clarify that this provision in no way immunizes a party from abusing the right to ''discuss the allegations under investigation'' by, for example, discussing those allegations in a manner that exposes the party to liability for defamation or related privacy torts, or in a manner that constitutes unlawful retaliation. In response to many commenters concerned that the proposed rules did not address retaliation, the final regulations add § 106.71 prohibiting retaliation and stating in relevant part (emphasis added): ''No recipient *or other person* may *intimidate, threaten, coerce,* or discriminate against *any individual for the purpose of interfering with any right or privilege* secured by title IX or this part[.]'' [1161] The Department thus believes that § 106.45(b)(5)(iii)—permitting the parties to discuss the allegations under investigation, and to gather and present evidence—furthers the Department's interest in promoting a fair investigation that gives both parties meaningful opportunity to participate in advancing the party's own interests in case, while abuses of a party's ability to discuss the allegations can be addressed through tort law and retaliation prohibitions.

The Department recognizes commenters' concerns that some discussion about the allegations under investigation may fall short of retaliation or tortious conduct, yet still cause harmful effects. For example, discussion and gossip about the allegations may negatively impact a party's social relationships. For the above reasons, the Department believes that the benefits of § 106.45(b)(5)(iii), for both parties, outweigh the harm that could result from this provision. This provision, by its terms, applies only to discussion of ''the allegations under investigation,'' which means that where a complainant reports sexual harassment but no formal complaint is filed, § 106.45(b)(5)(iii) does not apply, leaving recipients discretion to impose non-disclosure or confidentiality requirements on complainants and respondents. Thus, reporting should not be chilled by this provision because it does not apply to a report of sexual harassment but only where a formal complaint is filed. One reason why the final regulations take great care to preserve a complainant's autonomy to file or not file a formal complaint (yet still receive supportive measures either way) is because participating in a grievance process is a weighty and serious matter, and each complainant should have control over whether or not to undertake that process.[1162] Once allegations are made in a formal complaint, a fair grievance process requires that both parties have every opportunity to fully, meaningfully participate by locating evidence that furthers the party's interests and by confiding in others to receive emotional support and for other personally expressive purposes. The Department believes that this provision, by its plain language, limits the scope of what can be discussed, and laws prohibiting tortious speech and invasion of privacy, and retaliation prohibitions, protect all parties against abusive ''discussion'' otherwise permitted by this provision.

The Department has considered carefully the concerns of several commenters who believe this provision will lead to witness tampering or intimidation, or otherwise interfere with a proper investigation. As to witness intimidation, such conduct is prohibited under § 106.71(a). As to whether a party approaching or speaking to a witness could constitute ''tampering,'' the Department believes that generally, a party's communication with a witness or potential witness must be considered part of a party's right to meaningfully participate in furthering the party's interests in the case, and not an ''interference'' with the investigation. However, where a party's conduct toward a witness might constitute ''tampering'' (for instance, by attempting to alter or prevent a witness's testimony), such conduct also is prohibited under § 106.71(a). Some commenters were particularly concerned that a party's communication with a witness could result in the witness telling a different story to the party than the witness is willing to tell an investigator; any such inconsistencies or discrepancies would be taken into account by the parties, investigator, and decision-maker but do not necessarily constitute ''interference'' with the investigation by the party who spoke with the witness. Furthermore, in some situations, a party may not know the identity of witnesses until discussing the situation with others (for example, asking a roommate who was at the party at which the alleged incident occurred so as to discover whether any party attendees witnessed relevant events); thus, the Department declines to require that only recipients (or their investigators) may communicate with witnesses or potential witnesses.

With respect to commenters concerned about applying this provision in elementary and secondary schools, the Department disagrees that this provision forbids a school principal from warning students not to speak ''maliciously'' since malicious discussion intended to interfere with the other party's Title IX rights would constitute prohibited retaliation.

For the reasons discussed above, the Department declines to narrow or modify this provision per commenters' various suggestions. The Department believes that parties, not recipients, should determine who has a ''need to know'' about the allegations in order to provide advice, support, or assistance to a party during a grievance process; for similar reasons, recipients should not

[1161] As discussed in the ''Retaliation'' section of this preamble, § 106.71 takes care to protect the constitutional free speech rights of students and employees at public institutions that must protect constitutional rights. Nonetheless, abuse of speech unprotected by the First Amendment, when such speech amounts to intimidation, threats, or coercion for the purpose of chilling exercise of a person's Title IX rights, is prohibited retaliation.

[1162] As discussed elsewhere in the preamble, including in the ''Formal Complaint'' subsection of the ''Section 106.30 Definitions'' section, the decision to initiate a grievance process against the wishes of a complainant is one that must be undertaken only when the Title IX Coordinator determines that signing a formal complaint initiating a grievance process against a respondent is not clearly unreasonable in light of the known circumstances.

determine what information to label ''confidential.'' Limiting a party's discussions to ''neutral'' communications, or to communications solely for the purpose of gathering evidence, would deprive the parties of the benefits discussed above, such as seeking emotional support and using the party's experience to express viewpoints on the larger issues of sexual violence or Title IX policies and procedures; for the same reasons the Department declines to narrow this provision to allow discussion only with advisors or to require a warning to parties that neither party should ''aggravate the problem.'' This provision does not affect a recipient's discretion to restrict parties from contact or communication with each other through, *e.g.,* mutual no-contact orders that meet the definition of supportive measures in § 106.30. Where ''disparaging communications'' are unprotected under the Constitution and violate tort laws or constitute retaliation, such communications may be prohibited without violating this provision. This provision applies to discussion of ''the allegations under investigation'' and not to the evidence subject to the parties' inspection and review under § 106.45(b)(5)(vi).

Changes: The final regulations add § 106.71 prohibiting retaliation.

Section 106.45(b)(5)(iv) Advisors of Choice

Supporting Presence and Participation of Advisors

Comments: Some commenters supported allowing parties to have an advisor present because of the severe nature of Title IX charges and the potentially life-altering consequences. Commenters argued the proposed regulations would promote due process and give students more control over the proceedings. Other commenters supported allowing students to have an advisor because it will reduce the risk of false findings by allowing students to avail themselves of an advisor's expertise. Some commenters supported this provision believing the proposed regulations will reconcile Title IX proceedings with protections that are offered in analogous proceedings, such as criminal trials.

Discussion: The Department appreciates the general support from commenters regarding § 106.45(b)(5)(iv), which requires recipients to provide all parties with the same opportunities to have advisors present in Title IX proceedings and to also have advisors participate in Title IX proceedings, subject to equal restrictions on advisors' participation, in recipients' discretion. We share commenters' beliefs that this provision will make the grievance process substantially more thorough and fairer and that the resulting outcomes will be more reliable. The Department recognizes the high stakes for all parties involved in sexual misconduct proceedings under Title IX, and that the outcomes of these cases can carry potentially life-altering consequences, and thus believes every party should have the right to seek advice and assistance from an advisor of the party's choice. However, providing parties the right to select an advisor of choice does not align with the constitutional right of criminal defendants to be provided with effective representation. The more rigorous constitutional protection provided to criminal defendants is not necessary or appropriate in the context of administrative proceedings held by an educational institution rather than by a criminal court. To better clarify that parties' right to an advisor of choice differs from the right to legal representation in a criminal proceeding, the final regulations revise § 106.45(b)(5)(iv) to specify that the advisor of choice may be, but is not required to be, an attorney.

Changes: To clarify that a recipient may not limit the choice or presence of an advisor we have added ''or presence'' to § 106.45(b)(5)(iv), and we have added language in this section to clarify that a party's advisor may be, but is not required to be, an attorney.

Fairness Considerations

Comments: Some commenters argued that § 106.45(b)(5)(iv) is not survivor-centered and will tip the scales in favor of wealthy students who can afford counsel.

Discussion: The Department believes that by permitting both parties to receive guidance from an advisor of their choice throughout the Title IX proceedings, the process will be substantially more thorough and fairer and the resulting outcomes will be more reliable. In response to commenters' concerns, the final regulations revise § 106.45(b)(5)(iv) to specify that a party's chosen advisor may be, but is not required to be, an attorney. The Department acknowledges that a party's choice of advisor may be limited by whether the party can afford to hire an advisor or must rely on an advisor to assist the party without fee or charge. The Department wishes to emphasize that the status of any party's advisor (*i.e.,* whether a party's advisor is an attorney or not), the financial resources of any party, and the potential of any party to yield financial benefits to a recipient, must not affect the recipient's compliance with § 106.45. The Department believes that the clear procedural rights provided to both parties during the grievance process give both parties opportunity to advance each party's respective interests in the case, regardless of financial ability. Further, while the final regulations do not require the recipient to pay for parties' advisors, nothing the in the final regulations precludes a recipient from choosing to do so.

Changes: We have added language in § 106.45(b)(5)(iv) to clarify that a party's advisor may be, but is not required to be, an attorney.

Conflicts of Interest, Confidentiality, and Union Issues

Comments: Commenters argued that student-picked advisors will have a conflict of interest and will raise confidentiality issues. Other commenters expressed concern that § 106.45(b)(5)(iv) may conflict with a union's duty of providing fair representation in the grievance process. One commenter stated that Federal labor law and many State labor laws already provide that an employee subject to investigatory interviews may have a union representative present for a meeting that might lead to discipline.

Discussion: The Department acknowledges the concerns raised by commenters regarding potential conflicts of interest and confidentiality issues arising from permitting the presence or participation of advisors of a party's choice in Title IX proceedings, and potential conflict with labor union duties in grievance processes. With respect to potential conflicts of interest, we believe that parties are in the best position to decide which individuals should serve as their advisors. Advisors, for example, may be friends, family members, attorneys, or other individuals with whom the party has a trusted relationship. The Department believes it would be inappropriate for it to second guess this important decision.

With respect to confidentiality, the Department notes that commenters who raised this issue did not explain exactly how parties' confidentiality interests would be compromised by permitting them to have an advisor of choice to attend or participate in Title IX proceedings. As explained more fully in the ''Section 106.6(e) FERPA'' subsection of the ''Clarifying Amendments to Existing Regulations'' section of this preamble, we note that § 106.6(e) of the final regulations makes it clear that the final regulations should be interpreted to be consistent with a recipient's obligations under FERPA. Recipients may require advisors to use

the evidence received for inspection and review under § 106.45(b)(5)(vi) as well as the investigative report under § 106.45(b)(5)(vii) only for purposes of the grievance process under § 106.45 and require them not to further disseminate or disclose these materials. Additionally, these final regulations do not prohibit a recipient from using a non-disclosure agreement that complies with these final regulations and other applicable laws.

Lastly, it is not the intent of the Department to undermine the important role that union advisors may play in grievance proceedings. However, we wish to clarify that in the event of an actual conflict between a union contract or practice and the final regulations, then the final regulations would have preemptive effect.[1163] We note that the final regulations do not preclude a union lawyer from serving as an advisor to a party in a proceeding.

Changes: None.

Modification Requests

Comments: Some commenters argued that § 106.45(b)(5)(iv) conflicts with past guidance from the Department. Other commenters argued that advisors should not be allowed so students can learn to speak for themselves. Some commenters opposed this provision because they believe there should be no limits on attorney participation in grievance procedures. Some commenters argued that recipients should provide each party with an advisor to assist them throughout the grievance process. Some commenters expressed concern that the presence of advisors could complicate the proceedings, for instance, if the advisor was needed to also serve as a witness, if the advisor did not wish to take part in cross-examinations, if taking part in cross-examinations would adversely affect a teacher-student relationship, or if the advisor had limited availability to attend hearings and meetings. Other commenters suggested there should be no limits placed on who can serve as an advisor and that advisors should be allowed to be fully active participants, especially on behalf of students with disabilities or international students who may need active representation by counsel. Other commenters suggested that advisors should be required to be attorneys in order to avoid unauthorized practice of law.

Discussion: With respect to allowing advisors of choice, who may be attorneys, and the participation of such advisors in grievance procedures, these final regulations take a similar approach to Department guidance, with two significant differences. The withdrawn 2011 Dear Colleague Letter stated that recipients could ''choose'' to allow students to be represented by lawyers during grievance procedures and directed that any rules about a lawyer's appearance or participation must apply equally to both parties.[1164] These final regulations better align the Department's approach to advisors of choice for Title IX purposes with the Clery Act as amended by VAWA,[1165] clarifying that in a Title IX grievance process recipients *must* allow parties to select advisors of the parties' choice, who may be, but need not be, attorneys, while continuing to insist that any restrictions on the active participation of advisors during the grievance process must apply equally to both parties. Unlike Department guidance or Clery Act regulations, these final regulations implementing Title IX specify that when live hearings are held by postsecondary institutions, the recipient must permit a party's advisor to conduct cross-examination on behalf of a party.[1166] The Department believes that requiring recipients to allow both parties to have an advisor of their own choosing accompany them throughout the Title IX grievance process, and also to participate within limits set by recipients, is important to ensure fairness for all parties. For discussion of the reasons why cross-examination at a live hearing must be conducted by a party's advisor rather than by parties personally, see the ''Hearings'' subsection of the ''Section 106.45 Recipient's Response to Formal Complaints'' section of this preamble. As discussed above, the Department believes that § 106.45(b)(5)(iv) will help to make the grievance process substantially more thorough and fairer, and the resulting outcomes more reliable. While nothing in the final regulations discourages parties from speaking for themselves during the proceedings, the Department believes it is important that each party have the right to receive advice and assistance navigating the grievance process. As such, we decline to forbid parties from obtaining advisors of choice. Section 106.45(b)(5)(iv) (allowing recipients to place restrictions on active participation by party advisors) and the revised introductory sentence to § 106.45(b) (requiring any rules a recipient adopts for its grievance process other than rules required under § 106.45 to apply equally to both parties) would, for example, permit a recipient to require parties personally to answer questions posed by an investigator during an interview, or personally to make any opening or closing statements the recipient allows at a live hearing, so long as such rules apply equally to both parties. We do not believe that specifying what restrictions on advisor participation may be appropriate is necessary, and we decline to remove the discretion of a recipient to restrict an advisor's participation so as not to unnecessarily limit a recipient's flexibility to conduct a grievance process that both complies with § 106.45 and, in the recipient's judgment, best serves the needs and interests of the recipient and its educational community. The Department therefore disagrees that the final regulations should prohibit recipients from imposing any restrictions on the participation of advisors, including attorneys, in the Title IX grievance process.[1167] These final regulations ensure that a party's advisor of choice must be included in the party's receipt of, for instance, evidence subject to party inspection and review,[1168] and the investigative report,[1169] so that a party's advisor of choice is fully informed throughout the investigation in order to advise and assist the party.

The Department understands the concerns of commenters who raised the question of whether acting as a party's advisor of choice could constitute the practice of law such that parties will feel obligated to hire licensed attorneys

[1163] For further discussion see the ''Section 106.6(h) Preemptive Effect'' subsection of the ''Clarifying Amendments to Existing Regulations'' section of this preamble.

[1164] *E.g.,* 2011 Dear Colleague Letter at 11 (''While OCR does not require schools to permit parties to have lawyers at any stage of the proceedings, if a school chooses to allow the parties to have their lawyers participate in the proceedings, it must do so equally for both parties. Additionally, any school-imposed restrictions on the ability of lawyers to speak or otherwise participate in the proceedings should apply equally.'').

[1165] For discussion of the Clery Act and these final regulations, see the ''Clery Act'' subsection of the ''Miscellaneous'' section of this preamble.

[1166] Section 106.45(b)(6)(i).

[1167] As discussed in the ''Section 106.45(b)(6)(i) Postsecondary Institution Recipients Must Provide Live Hearing with Cross-Examination'' subsection of the ''Hearings'' subsection of the ''Section 106.45 Recipient's Response to Formal Complaints'' section of this preamble, the final regulations make one exception to the provision in § 106.45(b)(5)(iv) that recipients have discretion to restrict the extent to which party advisors may actively participate in the grievance process: Where a postsecondary institution must hold a live hearing with cross-examination, such cross-examination must be conducted by party advisors.

[1168] Section 106.45(b)(5)(vi) (evidence subject to inspection and review must be sent electronically or in hard copy to each party and the party's advisor of choice).

[1169] Section 106.45(b)(5)(vii) (a copy of the investigative report must be sent electronically or in hard copy to each party and the party's advisor of choice).

as advisors of choice, to avoid placing non-attorney advisors (such as a professor, friend, or advocacy organization volunteer) in the untenable position of potentially violating State laws that prohibit the unauthorized practice of law.[1170] While the issues raised by allegations of sexual misconduct may make it preferable or advisable for one or both parties to receive legal advice or obtain legal representation, the Department recognizes school disciplinary proceedings, including the grievance process required under these final regulations, as an administrative setting that does not require either party to be represented by an attorney. The Department believes that the § 106.45 grievance process sets forth clear, transparent procedural rules that enable parties and non-lawyer party advisors effectively to navigate the grievance process. Because the grievance process occurs in an educational setting and does not require court appearances or detailed legal knowledge, the Department believes that assisting a party to a grievance process is best viewed not as practicing law, but rather as providing advocacy services to a complainant or respondent. The Department concludes that with respect to Title IX proceedings the line between assisting a party, and providing legal representation to the party, is a line that has been and will continue to be, an issue taken into consideration by students, recipients, and advocates pursuant to the variety of State unauthorized practice of law statutes.

The Department notes that some commenters argued that the grievance process is complex and frequently intersects with legal proceedings (for example, when a complainant sues the respondent for civil assault or battery, or files a police report that results in a criminal proceeding against the respondent), and that legal representation would benefit both parties to a Title IX proceeding.[1171] The Department leaves recipients flexibility and discretion to determine whether a recipient wishes to provide legal representation to parties in a grievance process, but the final regulations do not restrict the right of each party to select an advisor with whom the party feels most comfortable and believes will best assist the party, and thus clarifies in this provision that the party's advisor of choice may be, but is not required to be, an attorney.

The Department acknowledges commenters' concerns that advisors may also serve as witnesses in Title IX proceedings, or may not wish to conduct cross-examination for a party whom the advisor would otherwise be willing to advise, or may be unavailable to attend all hearings and meetings. Notwithstanding these potential complications that could arise in particular cases, the Department believes it would be inappropriate to restrict the parties' selection of advisors by requiring advisors to be chosen by the recipient, or by precluding a party from selecting an advisor who may also be a witness. The Department notes that the § 106.45(b)(1)(iii) prohibition of Title IX personnel having conflicts of interest or bias does *not* apply to party advisors (including advisors provided to a party by a postsecondary institution as required under § 106.45(b)(6)(i)), and thus, the existence of a possible conflict of interest where an advisor is assisting one party and also expected to give a statement as a witness does not violate the final regulations. Rather, the perceived ''conflict of interest'' created under that situation would be taken into account by the decision-maker in weighing the credibility and persuasiveness of the advisor-witness's testimony. We further note that live hearings with cross-examination conducted by party advisors is required only for postsecondary institutions, and the requirement for a party's advisor to conduct cross-examination on a party's behalf need not be more extensive than simply relaying the party's desired questions to be asked of other parties and witnesses.[1172]

Changes: We have added language in § 106.45(b)(5)(iv) to clarify that a party's advisor may be, but is not required to be, an attorney.

Section 106.45(b)(5)(v) Written Notice of Hearings, Meetings, and Interviews

Comments: Several commenters supported § 106.45(b)(5)(v) because it will promote fairness, due process, and increase the likelihood of reaching an accurate result. One commenter shared a personal story of a family member with a disability who was not allowed to prepare a defense after being accused of sexual harassment. Other commenters supported this provision believing it offers the same protections that would be offered in a criminal trial. Other commenters supported this provision believing it will limit the abuse of power that can be wielded under Title IX investigations.

Discussion: The Department agrees with commenters who supported this provision on the grounds that it will promote fairness, provides both parties with due process protections, and increase the likelihood of reaching an accurate result. The Department believes that written notice of investigative interviews, meetings, and hearings, with time to prepare, permits both parties meaningfully to advance their respective interests during the grievance process, which helps ensure that relevant evidence is gathered and considered in investigating and adjudicating allegations of sexual harassment.

Changes: None.

Comments: Several commenters argued that the proposed regulations, including § 106.45(b)(5)(v), would be burdensome by requiring recipients to provide written notice, placing them under time constraints, adding administrative layers, and that these burdens would be particularly difficult for elementary and secondary schools.

Discussion: The Department acknowledges the concern of commenters that § 106.45(b)(5)(v) will place a burden on recipients, including elementary and secondary schools, but believes the burden associated with providing this notice is outweighed by the due process protections such notice provides. Because the stakes are high for both parties in a grievance process, both parties should receive notice with sufficient time to prepare before participating in interviews, meetings, or hearings associated with the grievance process, and written notice is better calculated to effectively ensure that parties are apprised of the date, time, and nature of interviews, meetings, and hearings than relying solely on notice in the form of oral communications. For example, if a party receives written notice of the date of an interview, and needs to request rescheduling of the

[1170] *E.g.,* Michelle Cotton, *Experiment, Interrupted: Unauthorized Practice of Law Versus Access to Justice,* 5 DePaul J. for Social Justice 179, 188–89 (2012) (''Most States continue to have broad definitions of the practice of law and broad concepts of [unauthorized practice of law] UPL that prevent or inhibit the involvement of nonlawyers in providing assistance to unrepresented persons.''); Derek A. Denckla, *Nonlawyers and the Unauthorized Practice of Law: An Overview of the Legal and Ethical Parameters,* 67 Fordham L. Rev. 2581, 2585–88 (1999) (noting that in every state, nonlawyers are generally prohibited from practicing law, that the definition of unauthorized practice of law (UPL) varies widely from jurisdiction to jurisdiction, and that exceptions to what constitutes UPL often include appearing in administrative proceedings).

[1171] *E.g.,* Merle H. Weiner, *Legal Counsel for Survivors of Campus Sexual Violence,* 29 Yale J. of L. & Feminism 123 (2017) (arguing that campuses should provide student survivors with legal representation, and noting that providing accused students with legal representation is also beneficial).

[1172] For further discussion see the ''Hearings'' subsection of the ''Section 106.45 Recipient's Response to Formal Complaints'' section of this preamble.

date or time of the interview due to a conflict with the party's class schedule, the recipient and parties benefit from having had the originally-scheduled notice confirmed in writing so that any rescheduled date or time is measured accurately against the original schedule. We note that nothing in these final regulations precludes a recipient from also conveying notice via in-person, telephonic, or other means of conveying the notice, in addition to complying with § 106.45(b)(5)(v) by sending written notice.

Changes: We have made non-substantive revisions to § 106.45(b)(5)(v), such as changing ''the'' to ''a'' in the opening clause ''Provide to a party'' and adding a comma after ''invited or expected,'' for clarity.

Comments: Some commenters argued that the procedures required by the proposed regulations are not suited to the campus environment where proceedings should not be adversarial, where notice of hearings might allow accused students time to destroy evidence and prepare alibis, and where it will contribute to underreporting as complainants will feel a loss of control or bullied because the proposed regulations are not informed by a victim-centered perspective.

Discussion: The Department disagrees that § 106.45(b)(5)(v), or the final regulations overall, increase the adversarial nature of sexual misconduct proceedings or incentivize any party to fabricate or destroy evidence. Allegations of sexual harassment often present an inherently adversarial situation, where parties have different recollections and perspectives about the incident at issue. The final regulations do not increase the adversarial nature of such a situation, but the § 106.45 grievance process (including this provision requiring written notice to both parties with time to prepare to participate in interviews and hearings) helps ensure that the adversarial nature of sexual harassment allegations are investigated and adjudicated impartially by the recipient with meaningful participation by the parties whose interests are adverse to each other.[1173] Accordingly, the final regulations require schools to investigate and adjudicate formal complaints of sexual harassment, and to give complainants and respondents a meaningful opportunity to participate in the investigation that increases the likelihood that the recipient will reach an accurate, reliable determination regarding the respondent's responsibility.

The Department does not agree that providing the parties with advance notice of investigative interviews, meetings, and hearings increases the likelihood that any party will concoct alibis or destroy evidence. The final regulations contain provisions that help ensure that false statements (*e.g.,* making up an alibi) or destruction of evidence will be revealed during the investigation and taken into account in reaching a determination. For example, § 106.45(b)(2) requires the initial written notice to the parties to include a statement about whether the recipient's code of conduct prohibits false statements, and § 106.45(b)(5)(vi) gives both parties equal opportunity to inspect and review all evidence gathered by the recipient that is directly related to the allegations, such that if relevant evidence seems to be missing, a party can point that out to the investigator, and if it turns out that relevant evidence was destroyed by a party, the decision-maker can take that into account in assessing the credibility of parties, and the weight of evidence in the case.

The Department disagrees that § 106.45(b)(5)(v) will contribute to underreporting because complainants will feel a loss of control or bullied, or feel chilled from reporting, or that this provision is not informed by a victim-centered perspective. The Department believes this provision provides a fundamental and essential due process protection that equally benefits complainants and respondents by giving both parties advance notice of interviews, meetings, and hearings so that each party can meaningfully participate and assert their respective positions and viewpoints through the grievance process.[1174] This is an important part of ensuring that the grievance process reaches accurate determinations, which in turn ensures that schools, colleges, and universities know when and how to provide remedies to victims of sex discrimination in the form of sexual harassment.

Changes: None.

Comments: Some commenters suggested that recipients should only be required to give respondents notice of charges, not necessarily of interviews, in order to reflect the standards set by VAWA. Some commenters suggested that the final regulations should require an advisor be copied on all correspondence between the institutions and the parties.

Discussion: The Department disagrees with the commenters who suggested that recipients should only be required to give respondents notice of charges, not necessarily of interviews, in order to reflect the standards set by Section 304 of VAWA. The commenter offered no rationale for why the approach under VAWA is superior to the § 106.45(b)(5)(v) requirements in this regard, and the Department believes that parties are entitled to notice of interviews, meetings, and hearings where the party's participation is expected or invited; otherwise, a party may miss critical opportunities to advance the party's interests during the grievance process. To clarify that this provision intends for notice to be given only to the party whose participation is invited or expected, we have made non-substantive revisions to the language of this provision to better convey that intent. Because this provision is consistent with the VAWA provision cited by commenters, even though this provision requires more notice than the VAWA provision, the Department sees no conflict raised for recipients who must comply with both VAWA and Title IX.

We note that the final regulations do require that copies of the evidence subject to the parties' inspection and review, and a copy of the investigative report, must be sent (electronically or in hard copy) to the parties and to the parties' advisors, if any. The Department appreciates commenters' request that advisors be copied on all correspondence between recipients and the parties, but declines to impose such a rule in order to preserve a recipient's discretion under § 106.45(b)(5)(iv) to limit the participation of party advisors, and to preserve a party's right to decide whether or not, for what purposes, and at what times, the party wishes for an advisor of choice to participate with the party. Nothing in the final regulations precludes a recipient from adopting a practice of copying party advisors on all notices sent under § 106.45(b)(5)(v), so long as the recipient complies with the revised introductory sentence of § 106.45(b) by ensuring that such a practice applies equally with respect to both parties.

[1173] *E.g., Pennsylvania* v. *Finley,* 481 U.S. 551, 568 (1987) (''The very premise of our adversarial system . . . is that partisan advocacy on both sides of a case will best promote the ultimate objective that the guilty be convicted and the innocent go free.'') (internal quotation marks and citation omitted); *see also Tolan* v. *Cotton,* 572 U.S. 650, 660 (2014) (''The witnesses on both sides come to this case with their own perceptions, recollections, and even potential biases. It is in part for that reason that genuine disputes are generally resolved by juries in our adversarial system.'').

[1174] *Mathews* v. *Eldridge,* 424 U.S. 319, 333 (1976) (''The fundamental requirement of due process is the opportunity to be heard 'at a meaningful time and in a meaningful manner.' '') (quoting *Armstrong* v. *Manzo,* 380 U.S. 545, 552 (1965)).

Changes: We have revised the language in § 106.45(b)(5)(v) to more clearly convey that notice must be sent to a party when that party's participation is invited or expected with respect to any meeting, interview, or hearing during the grievance process, by changing ''the'' to ''a'' in the clause ''Provide to a party'' in this provision.

Section 106.45(b)(5)(vi) Inspection and Review of Evidence Directly Related to the Allegations, and Directed Question 7

Comments: Many commenters expressed support for § 106.45(b)(5)(vi) and asserted that the proposed regulations seek the equal treatment of complainants and respondents. One commenter asserted that the proposed regulations would remedy sex-biased investigations and included citations to circuit court cases involving male students challenging the Title IX processes at institutions that suspended or expelled the male students for sexual misconduct. A different commenter stated that the proposed regulations would restore fairness and provide full disclosure to both parties so that they can adequately prepare defenses and present additional facts and witnesses. Another commenter concluded that the proposed regulations would ensure justice for complainants and protection for those falsely accused.

A number of commenters shared stories of their personal experiences with recipients withholding information from parties in a Title IX proceeding.

One commenter concluded that both parties having access to all of the evidence will ensure a fair process for both parties. Many commenters remarked that a Title IX investigator should not have unilateral authority to deem certain evidence ''irrelevant.'' Another commenter stated that schools should not hinder evidence reviews with short or limited time windows. One commenter stated that all evidence collected, including evidence collected by law enforcement, should be made available to the respondent.

Some commenters concluded that the electronic view-only format is unreasonable. Other commenters stated that all of the evidence should be provided to the parties to download and review on their own. The commenters remarked that this was necessary, especially in complex cases where review of the evidence would take a significant period of time. Some of these commenters also argued that any effort on the part of a recipient to limit a party's access to the evidence should be viewed as a bad faith effort to negatively impact the proceeding.

While generally supportive of the provision, one commenter argued that the final regulations should require that the investigator incorporate the parties' responses into the final investigative report. Another generally supportive commenter proposed the inclusion of a party's right to call an external investigator. A different commenter supported the adoption of a special master to oversee the adjudicative process.

Some commenters agreed with the ten-day review and comment requirement, determining that it is an appropriate period for allowing the parties to read and provide written responses. Another commenter stated that the exchange of information between the parties will result in expedited hearings.

One supporter of the provision requested that the Department include a provision that would inform the parties of the consequences of submitting false information to the investigator.

A number of commenters opposed § 106.45(b)(5)(vi). One commenter concluded that the proposed regulations, including this provision, were antithetical to the purpose of Title IX. Another commenter called this provision a blunt solution to a nuanced problem that attempts to solve the ''canard'' of false allegations. The commenter added that the Department fails to see the issue through a victim-centered lens, pointing out that the term ''trauma'' is used only once in the NPRM. The same commenter stated that this provision is not informed by best practices for working with trauma survivors.

One commenter argued that the proposed regulations would lead to retaliation and witness tampering. Another commenter stated that § 106.45(b)(5)(vi) would ''revictimize'' complainants. Many commenters stated that this provision will hamstring and compromise investigations, would likely chill the reporting process, is part of the administration's indifference to sexual violence, and will have negative effects on safety and fairness. One commenter concluded that the proposed rules would allow institutions to turn a ''blind eye'' to sexual violence on campus.

One commenter wrote that this provision ''fails to adequately acknowledge the seriousness and complexity of sexual misconduct on college campuses'' and called for a simpler, fairer, and more responsive approach. A different commenter argued that § 106.45(b)(5)(vi) would deter reporting, create difficulties in maintaining student privacy, and make Title IX cases more time-consuming and expensive. According to this commenter, this provision did not account for the potential for reputational damage and that it eliminates key aspects of the discretion that enables institutions to act in the ''best interests of all parties.'' Another commenter concluded that this provision is ''unhelpful and hurtful'' to victims, which, the commenter opined, may be the purpose of the provision.

One commenter stated that the provision allows evidence of past sexual conduct to be presented in an investigation and that such history would be raised to shame complainants.

Another commenter concluded that this provision would result in the respondent being able to coerce new witnesses because the ''regulations allow that.'' The same commenter also stated that the Department's focus on due process is misplaced because there is no due process problem until corrective action is proposed. A different commenter concluded that the provision is a barrier to effective investigation and resolution of Title IX grievances, calling it an ''unacceptable'' and ''untimely'' step. The same commenter proposed eliminating the ten-day period for review of the collected evidence or, conversely, the inclusion of a requirement that each party must have a reasonable opportunity to review the evidence and provide feedback while the investigation is ongoing, but without a set timeline.

One commenter stated that fair notice and an opportunity to respond does not require discovery of all evidence ''directly related'' to the allegations, where the evidence will not be relied upon in making a responsibility determination. Similarly, the commenter argued that requiring recipients to turn over all evidence directly related to the allegations was overbroad and may result, ultimately, in less information being shared by parties during the investigation. Another commenter argued that no rational basis exists for requiring the disclosure of evidence not relied upon in reaching a determination. The commenter added that the provision is extremely confusing and benefits no one.

Many commenters questioned why the Department would allow parties to review evidence upon which the decision-maker does not intend to rely upon in adjudicating the claim. These commenters agreed that only relevant information should be shared with the parties. One of these commenters concluded that the provision ''further legalizes'' the process.

Another commenter argued that, under current judicial precedent, no formal right to discovery exists in a student disciplinary hearing.

One commenter argued in favor of the recipient only sharing information with the parties, allowing them to determine whether the information should be shared with their advisor.

Many commenters supported limitations on the information being shared, including the exclusion or redaction of medical, psychological, financial, sexual history, or other personal and private information that has ''no bearing'' on the investigative report. One commenter argued in favor of permitting schools to release information to the parties based upon the individual circumstances of the case. The commenter stated that this information would unnecessarily violate the privacy of the disclosing parties and would prevent investigators from gathering evidence out of fear that personal information would need to be revealed. The commenter concluded that the result would be ''truly harmful and possibly destructive to anyone who would engage in the formal Title IX process.'' A different commenter concluded that there is no purpose to sharing this information except to intrude into the privacy of the parties. Commenters stated that the final regulations would allow the improper, and potentially widespread, sharing of confidential information and incentivize respondents to ''slip in'' prejudicial information to undermine the process.

A number of commenters concluded that students would be less likely to report sexual harassment and sexual violence if investigations are not conducted properly because there is no incentive for schools to actually investigate. The commenter stated that, if enacted, the proposed rules would harm many students who ''face these problems every day.''

A number of commenters concluded that schools should not be required to disclose irrelevant information and that institutions should be allowed to place ''reasonable restrictions'' on records. Some stated that an exception could be provided for a ''showing of particularized relevance.'' One commenter proposed that schools should not allow access to information they themselves cannot use. Calling the provision ''utterly illogical,'' one commenter stated that sharing irrelevant information would lead to extreme disparity of potential outcomes.

Many commenters opposed the electronic sharing of evidence with the parties. They argued that no system currently exists that limits the user's ability to take pictures of the information on the screen. One commenter was concerned that the proposed regulations do not include a requirement that the viewing of the relevant evidence be supervised and suggested the inclusion of such a provision. Some commenters argued that sharing records electronically could exacerbate gender and socioeconomic inequality and put some students at a disadvantage if they do not have access to a private computer.

A number of commenters proposed sharing the evidence file in hard copy format. Some of these commenters argued in favor of the supervised viewing of evidence files, to protect the party's confidentiality and to prevent parties from taking photographs of the evidence, while others argued for investigators to use their discretion in redacting certain information from the files before sharing with the parties. Some commenters supported redactions for information deemed more prejudicial than probative and for ''inflammatory'' evidence. Many of these commenters expressed concern that the parties should not be allowed to take physical possession of the evidence files. Commenters who favored redactions, also argued that the final regulations unreasonably limit the discretion of investigators. These commenters argued that recipients should have the right to reasonably redact confidential and private information, including the identity of the complainant, if the recipient deems it necessary to do so. One commenter, who favored the hard copy format, argued that students with disabilities may have a difficult time reviewing the files if not submitted in hard copy.

Some commenters remarked that electronic file sharing programs are cost prohibitive, leading some to conclude that such cost would prohibit institutions from paying for advisors for the parties.

Many commenters asserted that the provision could run afoul of State laws, including laws regarding student privacy and the sharing of confidential information, as well as potentially violate State rape shield laws. Some commenters were also concerned about the effect of open-records statutes as a means to publicize investigative files to embarrass the opposing party.

A commenter stated that the proposed regulations fail to state that the report should include all exculpatory and inculpatory evidence, which could prevent an adequate record, jeopardize the parties' ability to make a defense, might diminish the thoroughness with which facts are considered, and unduly raise the risk of bias. Another commenter agreed that crafting a full report before sharing it with the parties is premature and could lead to errors, dissatisfaction, and the appearance of bias.

A number of commenters pointed out that the proposed provision would require recipients to change their current processes, causing a disruption in how they handle Title IX cases on their campuses.

One commenter pointed out that student conduct processes at institutions of higher education are not criminal processes and should not be expected to mirror them. The commenter stated that colleges and universities are not making criminal law decisions, but rather a policy violation determination. In addition, the commenter believed that the best policy would allow students to provide information, respond to information, and ask questions, but in a manner that is appropriate to limit creating an adversarial environment. Similarly, one commenter concluded that the final regulations place a greater burden on recipients than on a criminal prosecutor.

Some commenters opposed enacting a ten-day requirement for review and responses. One commenter suggested that the ten-day timeline was an ''overregulation'' of institutions, suggesting instead that institutions should set their own time frames, so long as they are equitable. A number of commenters argued that institutions should be able to determine appropriate timelines for their own processes. Many commenters questioned whether the Department meant ten calendar days or ten business days. Another commenter suggested shortening the review period from ten to five days. A different commenter stated that the Department should not mandate any time period as, in their opinion, a uniform rule does not fit every circumstance at every school.

One commenter wrote that the final regulation's timeline is more rigid than a similar proceeding in a courtroom, where courts often expedite hearings when time is of the essence.

A commenter asked for clarification as to whether the proposed regulations would require an extra ten days for re-inspection of the supplemented investigative file. The same commenter also asked what, if any, guidelines should be put in place regarding supplementing the record at each stage of the adjudicative process.

One commenter proposed including a non-disclosure agreement as part of the adjudicative process. Another commenter requested that the final

regulations should include a provision to punish institutions that have committed ''wrongs'' against respondents in the past.

One commenter requested a regulatory provision that would provide meaningful consequences for violations of confidentiality, including punishment for recipients that do not implement reasonable privacy safeguards or do not permit reasonable redaction policies.

One commenter requested clarification on how long institutions would be required to retain records associated with a Title IX proceeding. Another commenter requested that the Department provide an electronic platform for the storing of data associated with Title IX investigations.

A number of commenters raised issues with the implementation of the final regulations in the K–12 context. Commenters stated that the majority of changes in the proposed rules were not written with a clear understanding of their application to the K–12 environment and that the proposed rules may actually hamper a school district's ability to maintain a safe school environment. For example, the commenter stated that the extension of the timeline (for example, by imposing a ten-day period for review of evidence) impairs a K–12 recipient's ability to effectuate meaningful change to a student's behavior. In addition, the commenter wrote that a ''battle of responses'' will foster more hostility, not less, where there is a high likelihood that the parties will remain within the same school district. The same commenter suggested that the Department should look to provide, and detail, restorative justice options that align with best practices for effective responses to incidents of sexual harassment and sexual violence. One commenter concluded that sharing the evidence file may be appropriate at the postsecondary level, but is inappropriate at the K–12 level. Another commenter called § 106.45(b)(5)(vi) ''overkill'' in the K–12 context. A different commenter supported leaving the issue of evidence review to local school officials. One commenter stated that the ten days to review and respond was unnecessary and would needlessly lengthen K–12 investigations.

Many commenters raised concerns over the burden caused by the proposed regulations on small institutions. Those commenters pointed out that sharing evidence with parties, waiting the required time period, and creating the investigative report and the parties' responses to it is onerous, has limited benefits as a truth-seeking process, and is too burdensome for institutions with only one staff member in charge of all of these responsibilities. Another commenter similarly asserted that small institutions do not currently have staff capacity to comply with § 106.45(b)(5)(vi)–(vii). A different commenter argued that continuous updates to the parties is ''completely impractical'' and ''unduly burdensome'' on the investigator, especially at small colleges.

Discussion: The Department appreciates commenters' support of § 106.45(b)(5)(vi). We believe that this provision provides complainants and respondents an equal opportunity to inspect and review evidence and provides transparent disclosure of the universe of relevant and potentially relevant evidence, with sufficient time for both parties to meaningfully prepare arguments based on the evidence that further each party's view of the case, or present additional relevant facts and witnesses that the decision-maker should objectively evaluate before reaching a determination regarding responsibility, including the right to contest the relevance of evidence.

The Department is sensitive to commenters' concerns regarding the parties sharing irrelevant information, as well as relevant information that is relevant but also highly sensitive and personal, as part of the investigative process. This concern, however, must be weighed against the demands of due process and fundamental fairness, which require procedures designed to promote accuracy through meaningful participation of the parties. The Department believes that the right to inspect all evidence directly related to the allegations is an important procedural right for both parties, in order for a respondent to present a defense and for a complainant to present reasons why the respondent should be found responsible. This approach balances the recipient's obligation to impartially gather and objectively evaluate all relevant evidence, including inculpatory and exculpatory evidence, with the parties' equal right to participate in furthering each party's own interests by identifying evidence overlooked by the investigator and evidence the investigator erroneously deemed relevant or irrelevant and making arguments to the decision-maker regarding the relevance of evidence and the weight or credibility of relevant evidence. In response to commenters' suggestions, we have added phrasing in § 106.45(b)(5)(vi) to emphasize that the evidence gathered and sent to the parties for inspection and review is evidence ''directly related to the allegations'' which must specifically include ''inculpatory or exculpatory evidence whether obtained from a party or other source.'' Such inculpatory or exculpatory evidence (related to the allegations) may, therefore, be gathered by the investigator from, for example, law enforcement where a criminal investigation is occurring concurrently with the recipient's Title IX grievance process.

While it may be true in some respects that this provision affords parties greater protection than some courts have determined is required under constitutional due process or concepts of fundamental fairness, that does not necessarily mean that protections such as those contained in § 106.45 are not desirable features of a consistent, transparent grievance process that enhances the fairness and truth-seeking function of the process.[1175] In response to commenters' concerns about disclosure of private medical, psychological, and similar treatment records, these final regulations provide in § 106.45(b)(5)(i) that a recipient cannot access, consider, disclose, or otherwise use a party's records that are made or maintained by a physician, psychiatrist, psychologist, or other recognized professional or paraprofessional acting in the professional's or paraprofessional's capacity, or assisting in that capacity, and which are made and maintained in connection with the provision of treatment to the party, unless the recipient obtains the party's voluntary, written consent to do so for a grievance process under § 106.45. If the party is not an ''eligible student,'' as defined in 34 CFR 99.3, then the recipient must obtain the voluntary, written consent of a ''parent,'' as defined in 34 CFR 99.3.[1176] Accordingly, a recipient will not access, consider, disclose, or otherwise use some of the most sensitive documents about a party without the party's (or the parent of the party's) voluntary, written consent, regardless of whether the recipient already has possession of such treatment records, even if the records are relevant. This provision adequately addresses commenter's concerns about sensitive information that may be shared with the other party pursuant to

[1175] For further discussion see the ''Role of Due Process in the Grievance Process'' section of this preamble.

[1176] 34 CFR 99.3 is part of regulations implementing FERPA; for further discussion of the intersection between FERPA and these final regulations, see the ''Section 106.6(e) FERPA'' subsection of the ''Clarifying Amendments to Existing Regulations'' section of this preamble.

§ 106.45(b)(5)(vi). Non-treatment records and information, such as a party's financial or sexual history, must be directly related to the allegations at issue in order to be reviewed by the other party under § 106.45(b)(5)(vi), and all evidence summarized in the investigative report under § 106.45(b)(5)(vii) must be ''relevant'' such that evidence about a complainant's sexual predisposition would never be included in the investigative report and evidence about a complainant's prior sexual behavior would only be included if it meets one of the two narrow exceptions stated in § 106.45(b)(6)(i)–(ii) (deeming all questions and evidence about a complainant's sexual predisposition ''not relevant,'' and all questions and evidence about a complainant's prior sexual behavior ''not relevant'' with two limited exceptions).

The Department declines to define certain terms in this provision such as ''upon request,'' ''relevant,'' or ''evidence directly related to the allegations,'' as these terms should be interpreted using their plain and ordinary meaning. We note that ''directly related'' in § 106.45(b)(5)(vi) aligns with requirements in FERPA, 20 U.S.C. 1232g(a)(4)(A)(i).[1177] We also acknowledge that ''directly related'' may sometimes encompass a broader universe of evidence than evidence that is ''relevant.'' However, the § 106.45 grievance process is geared toward reaching reliable, accurate outcomes in a manner that keeps the burden of collecting and evaluating relevant evidence on the recipient while giving both parties equally strong, meaningful opportunities to present, point out, and contribute relevant evidence, so that ultimately the decision-maker objectively evaluates relevant evidence and understands the parties' respective views and arguments about how and why evidence is persuasive or should lead to the outcome desired by the party. The Department therefore believes it is important that at the phase of the investigation where the parties have the opportunity to review and respond to evidence, the universe of that exchanged evidence should include all evidence (inculpatory and exculpatory) that relates to the allegations under investigation, without the investigator having screened out evidence related to the allegations that the investigator does not believe is relevant. The parties should have the opportunity to argue that evidence directly related to the allegations is in fact relevant (and not otherwise barred from use under § 106.45), and parties will not have a robust opportunity to do this if evidence related to the allegations is withheld from the parties by the investigator. For example, an investigator may discover during the investigation that evidence exists in the form of communications between a party and a third party (such as the party's friend or roommate) wherein the party characterizes the incident under investigation. If the investigator decides that such evidence is irrelevant (perhaps from a belief that communications before or after an incident do not make the facts of the incident itself more or less likely to be true), the other party should be entitled to know of the existence of that evidence so as to argue about whether it is relevant. The investigator would then consider the parties' viewpoints about whether such evidence (directly related to the allegations) is also relevant, and on that basis decide whether to summarize that evidence in the investigative report. A party who believes the investigator reached the wrong conclusion about the relevance of the evidence may argue again to the decision-maker (*i.e.,* as part of the party's response to the investigative report, and/or at a live hearing) about whether the evidence is actually relevant, but the parties would not have that opportunity if the evidence had been screened out by the investigator (that is, deemed irrelevant) without the parties having inspected and reviewed it as part of the exchange of evidence under § 106.45(b)(5)(vi).

In response to commenters' concerns that proposed § 106.45(b)(5)(vi) unduly imposed costly or burdensome restrictions by specifying that the evidence sent to the parties must be ''in an electronic format, such as a file sharing platform, that restricts the parties and advisors from downloading or copying the evidence,'' we have removed reference to a file-sharing platform and revised this provision to state that recipients must send the evidence subject to inspection and review to each party, and the party's advisor (if any), in electronic format or hard copy. Under the final regulations, therefore, recipients are neither required nor prohibited from using a file sharing platform that restricts parties and advisors from downloading or copying the evidence. Recipients may require parties and advisors to refrain from disseminating the evidence (for instance, by requiring parties and advisors to sign a non-disclosure agreement that permits review and use of the evidence only for purposes of the Title IX grievance process), thus providing recipients with discretion as to how to provide evidence to the parties that directly relates to the allegations raised in the formal complaint.

With regard to the sharing of confidential information, a recipient may permit or require the investigator to redact information that is not directly related to the allegations (or that is otherwise barred from use under § 106.45, such as information protected by a legally recognized privilege, or a party's treatment records if the party has not given written consent) contained within documents or other evidence that are directly related to the allegations, before sending the evidence to the parties for inspection and review. Further, as noted above, recipients may impose on the parties and party advisors restrictions or require a non-disclosure agreement not to disseminate any of the evidence subject to inspection and review or use such evidence for any purpose unrelated to the Title IX grievance process, as long as doing so does not violate these final regulations or other applicable laws. We reiterate that redacting ''confidential'' information is not the same as redacting information that is not ''directly related to the allegations'' because information that is confidential, sensitive, or private may still be ''directly related to the allegations'' and thus subject to review by both parties. Similarly, a recipient may permit or require the investigator to redact from the investigative report information that is not relevant, which is contained in documents or evidence that is relevant, because § 106.45(b)(5)(vii) requires the investigative report to summarize only ''relevant evidence.''

Section 106.45(b)(5)(vi) is not a ''blunt solution'' as a commenter suggested. The Department recognizes that Title IX enforcement is, in fact, a nuanced problem, and this recognition has informed the policy formation as well as the drafting and revising of this particular provision. We do not believe, as the commenter thinks, that a concern over false allegations is a ''canard,'' nor does the number of times that a particular word is used in the NPRM suggest that the Department is uninterested in, or unmoved by, best practices in the field. We disagree that § 106.45(b)(5)(vi) fails to acknowledge the ''complexity'' of sexual misconduct on college campuses, because this provision is part of a carefully prescribed grievance process that aims to ensure that the parties have

[1177] For further discussion see the ''Section 106.6(e) FERPA'' subsection of the ''Clarifying Amendments to Existing Regulations'' section of this preamble.

meaningful opportunities to participate in advancing each party's interests in these high-stakes cases. The provision proposed in the NPRM, and revised in these final regulations, not only takes into account the complexity of sexual misconduct on college campuses, but considers, as fundamental fairness demands, the experiences and challenges faced by both complainants and respondents.

The Department is sensitive to commenters' concerns over whether the final regulations might deter the reporting of sexual harassment. The § 106.45 grievance process is designed to improve the reliability and legitimacy of recipients' investigations and adjudications of Title IX sexual harassment allegations, and we believe that providing the parties with strong, clear procedural rights improves the fairness and legitimacy of the grievance process. We recognize that a formal grievance process is challenging, difficult, and stressful to navigate, for both complainants and respondents. It is for this reason that these final regulations ensure that parties are not inhibited from seeking support and assistance from any source (see § 106.45(b)(5)(iii)) and that parties have the right to select an advisor of choice to advise and accompany a party throughout the grievance process (see § 106.45(b)(5)(iv)). More broadly, the Department is persuaded by some commenters' concerns that if a complainant is forced to undergo a grievance process whenever a complainant reports sexual harassment, complainants may decide not to report at all, and by other commenters' concerns that without strong, clear procedural rights, recipients' grievance processes will not reach reliable outcomes in which parties and public have confidence. The final regulations therefore increase the obligations on recipients to respond promptly and supportively to every complainant when the recipient receives notice that the complainant has allegedly been victimized by sexual harassment (without requiring any proof or evidence supporting the allegations) irrespective of the existence of a grievance process, promote respect for a complainant's autonomy over whether or not to file a formal complaint that initiates a grievance process, and protect complainants from retaliation for refusing to participate in a grievance process. We have revised § 106.8, § 106.30, and § 106.44 significantly to achieve these aims and have added § 106.71. For example, § 106.8 emphasizes the need for every complainant and all third parties to have clear, accessible options for how to report sexual harassment to the Title IX Coordinator; the definitions of ''complainant'' and ''formal complaint'' in § 106.30 have been revised to clarify that the choice to initiate a grievance process must remain within the control of a complainant unless the Title IX Coordinator has specific reasons justifying the filing of a formal complaint over the wishes of a complainant; § 106.44(a) now requires a recipient to offer supportive measures to a complainant with or without a formal complaint being filed using an interactive process whereby the Title IX Coordinator must discuss and take into account the complainant's wishes regarding the supportive measures to be provided and explain to the complainant the option of filing a formal complaint; and § 106.71 protects the right of any individual to choose not to participate in a grievance process without facing retaliation. The Department intends for these final regulations to assure complainants that complainants may report sexual harassment and receive supportive measures whether or not the complainant also participates in a grievance process, and to assure complainants and respondents that a grievance process will be fair, consistent with constitutional due process, and give both parties meaningful opportunity to advance the party's own interests regarding the case outcome, in an investigation and adjudication overseen by impartial, unbiased Title IX personnel who do not prejudge the facts at issue and objectively evaluate inculpatory and exculpatory evidence before reaching determinations regarding responsibility.

The Department disagrees with commenters' assertions that the final regulations would allow the recipient (or the respondent) to coerce witnesses, turn a ''blind eye'' to sexual violence, or ''revictimize'' complainants. As discussed above, § 106.71 prohibits retaliation (which includes coercion) against any person for participating *or refusing to participate* in a Title IX proceeding and § 106.44(a) requires recipients to respond to every complainant by offering supportive measures; these requirements ensure that no recipient may turn a blind eye to reported sexual violence. The § 106.45 grievance process, including allowing both parties the opportunity to inspect and review evidence directly related to the allegations, benefits complainants as much as respondents by ensuring that each party is aware of evidence and may then make arguments that further the party's own interests based on the evidence.[1178]

The Department disagrees that due process is not implicated until corrective action is proposed. Due process is not only a concern after corrective or punitive action is taken, but throughout the entire process leading to a recipient's decision to impose corrective or disciplinary action.[1179]

The Department disagrees that § 106.45(b)(5)(vi)–(vii) are a barrier to effective investigations and case resolutions, and believes that to the contrary, these provisions work to guarantee effective investigations and resolutions by allowing the parties full access to the evidence gathered, and to the investigative report that summarizes relevant evidence, so the parties may make corrections, provide appropriate context, and prepare their responses and defenses before a decision-maker reaches a determination regarding responsibility.

We appreciate the commenters who stated that the ten-day time frame provision is appropriate for the parties to review and respond to the evidence directly related to the allegations. We agree that the result of this provision will be expedited hearings because the parties will have had the opportunity to see, review, and consider their responses to evidence prior to showing up at a hearing. However, this provision's purpose is not solely to speed up the process. The Department believes that this provision, in conjunction with the other provisions in § 106.45, balances the need for reasonably prompt resolution of Title IX grievance processes with the need to ensure that these grievance processes are thorough and fair.

The Department understands commenters' concerns that a ten-day time period for the parties to inspect and review evidence (and then a ten-day

[1178] *E.g.,* Monroe H. Freedman, *Our Constitutionalized Adversary System,* 1 Chapman L. Rev. 57, 57 (1998) (''In its simplest terms, an adversary system *resolves disputes by presenting conflicting views of fact and law to an impartial and relatively passive arbiter, who decides which side wins what.* . . . Thus, the adversary system represents far more than a simple model for resolving disputes. Rather, it consists of a core of basic rights that recognize and protect the dignity of the individual in a free society.'') (emphasis added); *see also* David L. Kirn, *Proceduralism and Bureaucracy: Due Process in the School Setting,* 28 Stanford L. Rev. 841, 847–48 (1976) (due process includes the right of parties to participate in the presentation of evidence, which serves the dual interest of improving the reliability of outcomes and the parties' sense of fairness of the proceeding).

[1179] For further discussion see the ''Role of Due Process in the Grievance Process'' section of this preamble.

time period to review and respond to the investigative report) is too long a timeline, but we do not agree that this timeline is an ''overregulation'' or that it is more rigid than a similar proceeding in a criminal court. Instead, the Department finds that the time frame is appropriate for the parties to read and respond to the evidence subject to inspection and review, and then to the investigative report. Recipients may choose whether the ten days should be business days or calendar days (or may use a different calculation of ''days'' that works with the recipient's administrative operations, such as ''school days.'') Although the recipient is required to provide at least ten days for inspection and review, the recipient may give the parties more than ten days to respond, bearing in mind that the recipient must conclude the grievance process within the reasonably prompt time frames to which the recipient must commit under § 106.45(b)(1)(v).

Section 106.45(b)(5)(vi)–(vii) concerning inspection and review of evidence, and review of the investigative report, are not overbroad or likely to lead to information withholding, and do not force the parties to share irrelevant information. These provisions appropriately focus the investigation on evidence ''directly related to the allegations'' and to ''relevant'' evidence in furtherance of each party's interest in permitting pertinent evidence to come to light so that any misunderstandings, confusions, and contradictions can be clarified. As discussed above, the Department has revised § 106.45 to expressly forbid a recipient from using a party's medical, psychological, and similar records without the party's voluntary, written consent, and from using information protected by a legally recognized privilege, and deems ''not relevant'' questions and evidence about a complainant's prior sexual behavior (with two limited exceptions).

We appreciate the commenters' suggestions regarding the inclusion of: A requirement that the viewing of the relevant evidence be supervised; the appointment of a special master; and a provision informing parties of the consequences of submitting false information. Commenters have noted that recipients' restrictions on a party's ability to view the evidence gathered in a case (for example, by requiring the party to sit in a certain room in the recipient's facility, for only a certain length of time, with or without the ability to take notes while reviewing the evidence, and perhaps while supervised by a recipient administrator) have reduced the meaningfulness of the party's opportunity to review evidence and use that review to further the party's interests. We believe it is important for the parties to receive a copy of the evidence subject to inspection and review so that the parties and their advisors may, over the course of a ten-day period, carefully consider the evidence directly related to the allegations, prepare arguments about whether all of that evidence is relevant and whether relevant evidence has been omitted, and consider how the party intends to respond to the evidence. On the other hand, we do not believe that the purposes of the parties' right to inspect and review evidence necessitates or justifies the Department requiring recipient to appoint a ''special master'' to oversee the exchange of evidence. The recipient's investigator will be well-trained in how to conduct an investigation and grievance process and in issues of relevance, under § 106.45(b)(1)(iii). We address warnings about making false statements during a grievance process in § 106.45(b)(2), which requires the written notice of allegations that a recipient sends to both parties upon receipt of a formal complaint to contain a statement about whether the recipient's code of conduct contains a prohibition against making false statements during a grievance process. We do not believe that a further statement about false statements accompanying sending the evidence to the parties under § 106.45(b)(5)(vi) serves a necessary purpose and decline to require it.

We decline to change the requirement that recipients send the evidence to a party's advisor (if the party has one).[1180] If a party has exercised the party's right to select an advisor of the party's choice, it is for the purpose of receiving that advisor's assistance during the grievance process, and we do not believe that a party's ten-day window to review and respond to the evidence should be narrowed by placing the burden on the party to receive the evidence from the recipient and then send the evidence to the party's advisor. However, nothing in these final regulations precludes a party from requesting that the recipient not send the evidence subject to inspection and review to the party's advisor. Similarly, the final regulations do not preclude the recipient from asking the parties to confirm whether or not the party has an advisor prior to sending the evidence under § 106.45(b)(5)(vi).

The Department disagrees that sending the evidence, or investigative report, to the parties (and their advisors, if any) will lead to an ''extreme disparity of potential outcomes.'' The provisions in § 106.45(b)(5)(vi)–(vii) are focused on providing precisely the opposite of the commenter's conclusion: Predictable procedural requirements that respondents and complainants can rely upon to afford them a predictable, fair process.

The Department does not agree that § 106.45(b)(5)(vi)–(vii), or the § 106.45 grievance process as a whole, creates the same rights to discovery afforded to civil litigation parties or criminal defendants. For example, parties to a Title IX grievance process are not granted the right to depose parties or witnesses, nor to invoke a court system's subpoena powers to compel parties or witnesses to appear at hearings, which are common features of procedural rules governing litigation and criminal proceedings. Recognizing that schools, colleges, and universities are educational institutions and not courts of law, the Department has prescribed a grievance process that incorporates procedures rooted in principles of due process and fundamental fairness, to give parties clear, meaningful opportunities to participate in influencing the case outcome that advances each party's interests, without imposing on recipients the expectation that recipients should function as *de facto* courts.

Similarly, the Department does not agree that § 106.45(b)(5)(vi)–(vii) will prolong proceedings, create ancillary disputes, or invade the privacy of parties and witnesses. As various courts have held,[1181] parties are entitled to constitutional due process from public institutions and a fair process from private institutions during Title IX grievance proceedings. In these final regulations, the Department has prescribed a process that provides sufficient due process protections to resolve allegations of sexual harassment in a recipient's education program or activity, in a manner that permits (and requires) a recipient to conclude its grievance process within designated, reasonably prompt time frames, and has taken care to protect party privacy while ensuring that the parties have access to

[1180] We have revised § 106.45(b)(5)(vii) to require the investigative report to be sent to the parties and their advisors (if any), for the same reasons that we decline to remove the requirement to send the evidence subject to inspect and review to the parties and their advisors.

[1181] *E.g., Haidak* v. *Univ. of Mass.-Amherst,* 933 F.3d 56, 69 (1st Cir. 2019); *Doe* v. *Purdue Univ. et al.,* 928 F.3d 652 (7th Cir. 2019); *Doe* v. *Baum,* 903 F.3d 575 (6th Cir. 2018).

information that may affect the outcome of the case.

We appreciate the concerns of many commenters about the burden and costs that § 106.45(b)(5)(vi)–(vii) may impose upon recipients. The Department understands that these provisions have the potential to generate modest burden and costs, but believes that the financial costs and administrative burdens resulting from the provisions are far outweighed by the due process protections ensured by these provisions. We disagree with the assertion that ''sharing evidence with parties'' results in unacceptable burdens on recipients, because reviewing the universe of evidence that is, or may be, relevant represents a critical part of enabling parties to have a meaningful opportunity to be heard, which is an essential component of due process and fundamental fairness. The Department appreciates that many recipients' Title IX offices are inundated and over-worked, but sacrificing procedures important to concepts of due process and fundamental fairness is not an acceptable means of alleviating administrative burdens. We reiterate that where reasonable, we have revised § 106.45(b)(5)(vi)–(vii) to alleviate unnecessary administrative burdens on recipients, for example by removing reference to a file sharing platform and allowing the recipient to send the evidence and investigative report electronically or by hard copy.

The Department also understands that a potentially different set of issues regarding § 106.45(b)(5)(vi)–(vii) may occur where there are multiple formal complaints arising out of a single incident. To expressly authorize recipients to handle cases that arise out of the same incident of sexual harassment involving multiple complainants, multiple respondents, or both, we have added § 106.45(b)(4) to expressly grant discretion to recipients to consolidate formal complaints involving more than one complainant or more than one respondent, where the allegations of sexual harassment arise out of the same facts or circumstances. The Department also provides in § 106.45(b)(4) that where a grievance process involves more than one complainant or more than one respondent, references in § 106.45 to the singular ''party,'' ''complainant,'' or ''respondent'' must include the plural, as applicable. These revisions help clarify that a single grievance process might involve multiple complainants or multiple respondents; we emphasize that in such a situation, each individual party has each right granted to a party under § 106.45 and these final regulations. For example, in a case involving multiple complainants, a recipient would not be permitted to designate one complainant as a ''lead complainant'' and use such a designation to, for instance, only send the evidence to the ''lead complainant'' instead of to each complainant individually.

Parties have the opportunity to provide additional information or context in their written response after reviewing the evidence under § 106.45(b)(5)(vi). The final regulations do not directly address an extension of the timeline for responses, should the parties present additional information after reviewing the evidence. These final regulations provide that the parties must have at least ten days to submit a written response after review and inspection of the evidence directly related to the allegations raised in a formal complaint. A recipient may require all parties to submit any evidence that they would like the investigator to consider prior to when the parties' time to inspect and review evidence begins. Alternatively, a recipient may choose to allow both parties to provide additional evidence in response to their inspection and review of the evidence under § 106.45(b)(5)(vi) and also an opportunity to respond to the other party's additional evidence. Similarly, a recipient has discretion to choose whether to provide a copy of each party's written response to the other party to ensure a fair and transparent process and to allow the parties to adequately prepare for any hearing that is required or provided under the grievance process. A recipient's rules or practices other than those required by § 106.45 that a recipient adopts must apply equally to both parties as required by § 106.45(b). If a recipient chooses not to allow the parties to respond to additional evidence provided by a party in these circumstances, the parties will still receive the investigative report that fairly summarizes relevant evidence under § 106.45(b)(5)(vii) and will receive an opportunity to inspect and review all relevant evidence at any hearing and to refer to such evidence during the hearing, including for purposes of cross-examination at live hearings under § 106.45(b)(5)(vi). If a recipient allows parties to provide additional evidence after reviewing the evidence under § 106.45(b)(5)(vi), any such additional evidence that is summarized in the investigative report will not qualify as new evidence that was reasonably available at the time the determination regarding responsibility was made for purposes of an appeal under § 106.45(b)(8).

The Department agrees with the commenter's concern that the investigative report should contain relevant evidence including exculpatory and inculpatory evidence. Section 106.45(b)(1)(ii) makes clear that the recipient must evaluate relevant evidence including inculpatory and exculpatory evidence. The final regulations add the phrase ''and inculpatory or exculpatory evidence whether obtained from a party or other source'' to § 106.45(b)(5)(vi) with respect to the evidence sent to the parties for inspection and review. Thus, where § 106.45(b)(5)(vii) requires the investigative report to fairly summarize all the relevant evidence, the final regulations make clear that evidence may be relevant whether it is inculpatory or exculpatory.

We do not agree that sharing the investigative report prior to its finalization would lead to errors, dissatisfaction, and the appearance of bias. In fact, those are the very potential problems that sharing the report with the parties seeks to avoid. The parties' responses may address perceived errors that may be corrected, so that the parties have an opportunity to express and note their contentions for or against the investigative report, and sharing the investigative report at the same time, to both parties, helps avoid any appearance of bias.

We appreciate the commenter's questions regarding how the evidence and the investigative report should be shared with the parties. The final regulations revise § 106.45(b)(5)(vi) to state that ''the recipient must send to each party and the party's advisor, if any, the evidence subject to inspection and review in an electronic format or a hard copy.'' Similar language is used in § 106.45(b)(5)(vii) regarding sending the parties, and their advisors, copies of the investigative report, electronically or in hard copy format. The Department reminds recipients that these provisions contain baseline requirements, and additional practices to address privacy concerns, such as digital encryption, that do not run afoul of § 106.45(b)(5)(vi)–(vii), or any other provision of the final regulations, are not precluded by these final regulations. The final regulations do not require recipients to provide individual laptops to parties to review the evidence or investigative report, but a recipient may do so at the recipient's discretion, and the option to send parties hard copies under these provisions gives recipients the flexibility to respond to a party's

inability to access digital or electronic copies.

The Department does not wish to prohibit the investigator from including recommended findings or conclusions in the investigative report. However, the decision-maker is under an independent obligation to objectively evaluate relevant evidence, and thus cannot simply defer to recommendations made by the investigator in the investigative report. As explained in the ''Section 106.45(b)(7)(i) Single Investigator Model Prohibited'' subsection of the ''Determinations Regarding Responsibility'' subsection of the ''Section 106.45 Recipient's Response to Formal Complaints'' section of this preamble, the decision-maker cannot be the same person as the Title IX Coordinator or the investigator and must issue a written determination regarding responsibility, and one of the purposes of that requirement is to ensure that independent evaluation of the evidence gathered is made prior to reaching the determination regarding responsibility.

The Department appreciates commenters' concerns and requests for clarification regarding the application of the final regulations to the elementary and secondary school environment. We disagree that the grievance process timeline impairs an elementary and secondary school recipient's ability to effectuate meaningful change to a student's behavior. There are many actions a recipient may take with respect to a respondent that constitute permissible supportive measures as defined in § 106.30, which may correct or modify a respondent's behavior without being punitive or disciplinary. Educational conversations with students, for example, and impressing on a student the recipient's anti-sexual harassment policy and code of conduct expectations, need not constitute punitive or disciplinary actions that a school is precluded from taking without following a § 106.45 grievance process. Similarly, we disagree that § 106.45 generally, or § 106.45(b)(5)(vi)–(vii) in particular, foster hostility or hamper a school district's ability to maintain a safe school environment. Providing a predictable, fair grievance process before imposing discipline on students may help reduce hostility and tensions in a school environment, and recipients have many options under the § 106.30 definition of supportive measures for taking action to protect party safety and deter sexual harassment before or during any grievance process and regardless of whether a grievance process is ever initiated. We also remind recipients that § 106.44(c) allows a respondent to be removed from education programs or activities on an emergency basis, without pre-removal notice or hearing, and regardless of whether a grievance process is pending regarding the sexual harassment allegations from which the imminent threat posed by the respondent has arisen.

With regard to records retention, the Department addresses this issue under § 106.45(b)(10). We have revised that provision, including by extending the record retention period from three years as proposed in the NPRM, to seven years under these final regulations.

The Department appreciates the commenter's responses to Directed Question 7. After considering the many public comments responsive to this directed question posed in the NPRM, the Department finds that it would be inappropriate to dilute the requirement that there be a direct relationship between the evidence in question and the allegations under investigation. For reasons discussed above, the final regulations require inspection and review of evidence that is directly related to the allegations, including inculpatory and exculpatory evidence obtained from a party or any other source, and require the investigative report to summarize only relevant evidence.

Changes: The Department makes the following changes to 106.45(b)(5)(vi). First, the phrase ''and inculpatory or exculpatory evidence whether obtained from a party or other source,'' is added. Second, we have added ''or a hard copy'' as an option for sending to the parties and their advisors the evidence subject to inspection and review. Lastly, we have removed the phrase ''such as a file sharing platform, that restricts the parties and advisors from downloading or copying the evidence.''

Section 106.45(b)(5)(vii) An Investigative Report That Fairly Summarizes Relevant Evidence

Comments: Many commenters expressed support for § 106.45(b)(5)(vii) and asserted that the provision would work to restore fairness and due process for complainants and respondents. A number of commenters stated that, in their experience, the ten-day period response period is a reasonable and appropriate time frame. One commenter characterized the NPRM as a long overdue correction to the withdrawn 2011 Dear Colleague Letter, which the commenter called a ''wrongful repudiation'' of due process. The commenter also argued for the Department to adopt a particular recipient's policy as a model for procedures that other recipients should employ in addressing inappropriate sexual activity while simultaneously assuring due process protections.

A number of commenters opposed the provision. Many commenters expressed concern over the mandated ten-day period. Commenters asserted that recipients should determine the appropriate timelines for their process, rather than the Department prescribing this timeline. Similarly, another commenter asserted that ''rigid time frames'' substantially lengthen investigation and adjudication processes. One commenter requested clarification as to why the investigative report must be completed and made available ten days prior to a hearing. The commenter was concerned that such a requirement results in an overly burdensome process with negligible benefits. A different commenter expressed concern that if new information arises during the review of the report, the timeline should be extended to avoid exploitative efforts by either party. One commenter questioned how institutions should respond when a party requests additional time to review the report before the hearing.

One commenter requested clarification over when the parties' written responses to the investigative report are due and what the investigator is supposed to do with the parties' responses.

Some commenters argued that the proposed provision is unnecessary because the parties could address and respond to evidence during a hearing. Many commenters stated that sharing the investigative report is burdensome and could obstruct the investigation. A number of commenters pointed out that the proposed provision would require them to change processes, causing a disruption in how they handle Title IX enforcement on their campus. Citing the addition of significant time and resource requirements to their institution's current procedures, one commenter argued that small institutions lack the capacity right now to comply with this requirement. A different commenter concluded that this provision will impose ''shadow costs'' on institutions.

Another commenter proposed deleting § 106.45(b)(5)(vii) entirely because of concerns over what should be included in the investigative report, the potential for one of the parties to demand a time extension if the report contains a recommendation of responsibility, and the issues raised in multiple complainant proceedings. The same commenter recommended that the investigative report include facts, interview statements from the parties, a preliminary credibility analysis, and the

policy applied to the analysis of the alleged behavior. A different commenter suggested that the report only include facts, with no recommended findings or conclusions, stating that summaries can be fraught with ''asymmetrical information delivery'' and may not provide a means for any party to submit corrections. One commenter proposed removing the mandate to share the investigative report with the student's advisor and allowing the student to choose whether they want their advisor to see the report.

One commenter expressed concern that the provision is too vague and leaves many unanswered questions, such as what the final regulations would allow if the parties need to make changes following their review or if additional evidence is located.

A commenter requested a clarification of, or a change to, the language in § 106.45(b)(5)(vi), which refers to ''directly related to the evidence,'' and § 106.45(b)(5)(vii), which refers to ''relevant evidence.''

A commenter stated that, as written, this provision would allow institutions to implement access controls that could limit or deny due process, such as declaring that the report is the property of the institution or creating time limits on viewings. The commenter proposed that the provision should be revised to allow the parties easy access to the report until the final determination is made.

A commenter concluded that provision goes beyond any due process requirement, that they are aware of, to have information in the evidentiary file synthesized into a summary report ten days before the hearing. The commenter also requested clarification as to how the recipient must amend its investigative report in light of the parties' responses.

Many commenters questioned whether the Department meant ten calendar days or ten business days.

Discussion: The Department appreciates commenters' support of § 106.45(b)(5)(vii). We agree that the final regulations seek to provide strong, clear procedural protections to complainants and respondents, including apprising both parties of the evidence the investigator has determined to be relevant, in order to adequately prepare for a hearing (if one is required or otherwise provided) and to submit responses about the investigative report for the decision-maker to consider even where a hearing is not required or otherwise provided.

We appreciate the commenter's proposal to follow policies in place at a particular institution. We acknowledge the efforts of particular institutions and have considered policies in place at various individual institutions, but for reasons described in the ''Role of Due Process in the Grievance Process'' section and throughout this preamble, we do not adopt any particular institution's policies or procedures wholesale. We believe that the provisions outlined in these final regulations provide necessary and appropriate due process and fundamental fairness protections to complainants and respondents.

As some commenters have noted, § 106.45(b)(5)(vii) aligns with the practice of many recipients who have become accustomed to conducting investigations in Title IX sexual harassment proceedings and create an investigative report as part of such an investigation. We believe that a standardized provision regarding an investigative report is important in the context of Title IX proceedings even though such a step may not be required in civil litigation or criminal proceedings and even though specific parts of this provision may differ from recipients' current practices (*i.e.,* ensuring that parties are sent a copy of the investigative report ten days prior to the time that a determination regarding responsibility will be made). The Department believes that the purpose of § 106.45(b)(5)(vii) and the specific requirements in this provision are appropriate because a Title IX grievance process occurs in an educational institution (not in a court of law) and because a recipient of Federal funds agrees, under Title IX, to operate education programs or activities free from sex discrimination. It is thus appropriate to obligate the recipient (and not the parties to disputed sexual harassment allegations) to take reasonable steps calculated to ensure that the burden of gathering evidence remains on the recipient, yet to also ensure that the recipient gives the parties meaningful opportunity to understand what evidence the recipient collects and believes is relevant, so the parties can advance their own interests for consideration by the decision-maker. A valuable part of this process is giving the parties (and advisors who are providing assistance and advice to the parties) adequate time to review, assess, and respond to the investigative report in order to fairly prepare for the live hearing or submit arguments to a decision-maker where a hearing is not required or otherwise provided. Without advance knowledge of the investigative report, the parties will be unable to effectively provide context to the evidence included in the report.

While we are sensitive to recipients' concerns regarding burden, cost, and capacity, the Department believes that the required process in § 106.45(b)(5)(vii) does not present onerous demands on recipients. Concerns over burden and capacity should be weighed, not only against fundamental fairness and due process, but in the context of the phase of an investigation when this requirement is in place: During the period when the investigative report should be compiled anyway (that is, after evidence has been gathered and before a determination will be made). In the context of a grievance process that involves multiple complainants, multiple respondents, or both, a recipient may issue a single investigative report. We have added § 106.45(b)(4) to expressly authorize a recipient, in the recipient's discretion, to consolidate formal complaints when allegations all arise out of the same facts or circumstances.

Section 106.45(b)(5)(vii) is important for fairness as well as efficiency purposes; it assures that the investigative report is completed in an expeditious manner, provides the opportunity to the parties to prepare their arguments and defenses, and serves the goal of ensuring constructive, meaningful, and effective hearings (where required, or otherwise provided) and informed determinations regarding responsibility even where the determination is reached without a hearing. Section 106.45(b)(5)(vii) presents no obstacle to an effective investigation and reliable resolution because it comes after an investigation has finished gathering evidence.

The Department shares commenters' concerns about recipient practices that limit access to the investigative report. Practices or rules that limit a party's (or party's advisor's) access to the investigative report violate § 106.45(b)(5)(vii) because under this provision recipients must send a copy of the investigative report electronically or by hard copy to each party and the party's advisor, if any. While this provision does not require a recipient to use a file sharing platform that restricts the parties and advisors from downloading or copying the evidence, recipients may choose to use a file sharing platform that restricts the parties and advisors from downloading or copying the investigative report under § 106.45(b)(5)(vii) and this would constitute sending the parties a copy ''in an electronic format,'' meeting the requirements of this provision.

The Department appreciates commenters' suggestions as to what elements recipients should include in their investigative reports. The Department takes no position here on such elements beyond what is required in these final regulations; namely, that the investigative report must fairly summarize relevant evidence. We note that the decision-maker must prepare a written determination regarding responsibility that must contain certain specific elements (for instance, a description of procedural steps taken during the investigation) [1182] and so a recipient may wish to instruct the investigator to include such matters in the investigative report, but these final regulations do not prescribe the contents of the investigative report other than specifying its core purpose of summarizing relevant evidence.

The Department does not adopt commenters' suggestions to allow institutions to set their own timelines with respect to the parties' window of time to review the investigative report, but the Department has intentionally given recipients flexibility to designate the recipient's own ''reasonably prompt time frames'' for the conclusion of each phase of the grievance process (including appeals and any informal resolution processes) pursuant to § 106.45(b)(1)(v). While we understand from commenters that some recipients may desire to conclude their grievance process in fewer than 20 days (*i.e.,* the two ten-day timelines prescribed in § 106.45 which, in combination, preclude a recipient from designating a time frame for conclusion of an entire grievance process in fewer than 20 days), the Department believes that 20 or fewer days has not been widely viewed as a reasonable time frame for conducting and concluding a truly fair investigation and adjudication of allegations that carry such high stakes for all parties involved. This belief is buttressed by commenters who appreciated that the Department has withdrawn the expectation set forth in the withdrawn 2011 Dear Colleague Letter for recipients to conclude a grievance process within 60 calendar days.[1183] We reiterate that a formal complaint of Title IX sexual harassment alleges serious misconduct that has jeopardized a person's equal educational access, and the determination regarding responsibility carries grave consequences for each party; the purpose of the § 106.45 grievance process is to reduce the likelihood of positive or negative erroneous outcomes (*i.e.,* inaccurate findings of responsibility and inaccurate findings of non-responsibility). Ensuring that each party, in each case, receives effective notice and meaningful opportunity to be heard necessitates some procedures that involve some passage of time (*e.g.,* time for parties and their advisors to review evidence, and to review the investigator's summary of relevant evidence). The § 106.45 grievance process aims to balance the need for a thorough, fair investigation that permits the parties' meaningful participation, with the need to conclude a grievance process promptly to bring resolution to situations that are difficult for both parties to navigate.

We appreciate the commenter's suggestion that the student should get to choose what the student's advisor can see in the investigative report. We do not believe that this issue requires regulation and we do not wish to create unnecessary complexity in the recipient's obligations with respect to sending the investigative report. A party may always request that the recipient not send the investigative report to the party's advisor, but if the party has already indicated that the party has selected an advisor of choice then we believe the better default practice is for the party's advisor to be sent the investigative report, so that the burden of receiving the report, then forwarding it to the party's advisor, does not rest on the party, which would also result in a *de facto* shortening of the ten-day window in which a party—with assistance from an advisor—may review and prepare responses to the investigator's summary of relevant evidence.

The Department acknowledges the difference between the use of ''directly related to the allegations'' in § 106.45(b)(5)(vi) and ''relevant evidence'' in § 106.45(b)(5)(vii). As discussed above, in the ''Section 106.45(b)(5)(vi) Inspection and Review of Evidence Directly Related to the Allegations, and Directed Question 7'' subsection of the ''Investigation'' subsection of the ''Section 106.45 Recipient's Response to Formal Complaints'' section of this preamble, we acknowledge that ''directly related to the allegations'' may encompass a broader universe of evidence than evidence that is ''relevant,'' and believe that it is most beneficial for the parties' access to evidence to be limited by what is directly related to the allegations, but for the investigator to determine what is relevant after the parties have reviewed that evidence.

Independent of whether this provision would be required to satisfy constitutional due process of law, § 106.45(b)(5)(vii) (giving the parties copies of the investigative report prior to the live hearing or other time of determination) serves an important function in a Title IX grievance process, placing the parties on level footing with regard to accessing information to allow the parties to serve as a check on any decisions that the recipient makes regarding the relevance of evidence and omission of relevant evidence. Allowing the parties to review and respond to the investigative report is important to providing the parties with notice of the evidence the recipient intends to rely on in deciding whether the evidence supports the allegations under investigation. The parties cannot meaningfully respond and put forward their perspectives about the case when they do not know what evidence the investigator considers relevant to the allegations at issue.

These final regulations do not prescribe a process for the inclusion of additional information or for amending or supplementing the investigative report in light of the parties' responses after reviewing the report. However, we are confident that even without explicit regulatory requirements, best practices and respect for fundamental fairness will inform recipients' choices and practices with regard to amending and supplementing the report. Recipients enjoy discretion with respect to whether and how to amend and supplement the investigative report as long as any such rules and practices apply equally to both parties, under the revised introductory sentence of § 106.45(b).

A recipient may give the parties the opportunity to provide additional information or context in their written response to the investigative report, as provided in § 106.45(b)(5)(vii), to remedy any ''asymmetrical information delivery,'' but the Department believes that in combination, § 106.45(b)(5)(vi)–(vii) reduce the likelihood of asymmetrical information delivery because the parties each will have the opportunity to review all the evidence related to the allegations and then all the evidence the investigator decides is relevant. A recipient may require all parties to submit any evidence that they would like the investigator to consider prior to the finalization of the investigative report thereby allowing each party to respond to the evidence in the investigative report sent to the

[1182] Section 106.45(b)(7)(ii).

[1183] 2011 Dear Colleague Letter at 12 (''Based on OCR experience, a typical investigation takes approximately 60 calendar days following receipt of the complaint.''). The Department's experience, therefore, has long been that an adequate investigation into sexual harassment allegations typically takes longer than 20 days.

parties under § 106.45(b)(5)(vii). A recipient also may provide both parties with an opportunity to respond to any additional evidence the other party proposes after reviewing the investigative report. If a recipient allows parties to provide additional evidence in response to the investigative report, any such additional evidence will not qualify as new evidence that was reasonably available at the time the determination regarding responsibility was made for purposes of an appeal under § 106.45(b)(8)(i)(B). Similarly, a recipient has discretion to choose whether to provide a copy of each party's written response to the other party as an additional measure to allow the parties to prepare for the hearing (or to be heard prior to the determination regarding responsibility being made, if no hearing is required or provided). As noted above, any rules or practices other than those required by § 106.45 that a recipient adopts must apply equally to both parties, and a recipient must be mindful that rules it chooses to adopt that extend time frames must take into account the recipient's obligation to conclude the entire grievance process within the recipient's own designated time frame, under § 106.45(b)(1)(v).

To conform with the changes we made to § 106.45(b)(5)(vi), we have revised § 106.45(b)(5)(vii) to include a provision that requires the investigative report to be sent to each party and the party's advisor, if any, in an electronic format or a hard copy. As stated elsewhere in this preamble, the final regulations do not require a specific method for calculating ''days.'' Recipients retain flexibility to adopt the method that best works for the recipient's operations, including calculating ''days'' using calendar days, business days, school days, or so forth.

Changes: The Department has revised § 106.45(b)(5)(vii) by changing the parenthetical to refer to ''this section'' instead of ''§ 106.45'' and adding ''or otherwise provided'' after ''if a hearing is required by this section,'' by requiring the investigative report to be sent to parties and their advisors, if any, and by adding the option of sending a copy in electronic format or hard copy.

Hearings

Cross-Examination Generally

Support for Cross-Examination

Comments: Some commenters expressed support for the proposed rules' requirement in § 106.45(b)(6)(i) that postsecondary institutions allow cross-examination at a live hearing because in a college or university setting, where participants are usually adults, cross-examination is an essential pillar of fair process, and where cases turn exclusively or largely on witness testimony as is often the case in peer-on-peer grievances, cross-examination is especially critical to resolve factual disputes between the parties and give each side the opportunity to test the credibility of adverse witnesses, serving the goal of reaching legitimate and fair results.[1184]

Some commenters supported § 106.45(b)(6)(i) because live hearings with cross-examination are consistent with Supreme Court cases interpreting due process of law,[1185] as well as recent case law in which courts have held that cross-examination must be provided in higher education disciplinary proceedings, particularly when credibility is at issue, to meet standards of fundamental fairness and constitutional due process.[1186] Commenters relied on Sixth Circuit cases in particular[1187] to assert that high-stakes cases involving competing narratives require a mutual test of credibility, and to argue that the cost to a university of providing a live hearing with cross-examination is far outweighed by the benefit of reducing the risk of an erroneous finding of responsibility. Some commenters also pointed to a California appellate court decision[1188] where the court found it ironic that an institution of higher learning, where American history and government are taught, should stray so far from the principles that underlie our democracy, and two other California appellate court decisions[1189] that one commenter characterized together as representing unanimous rulings by nine appellate judges that public and private colleges and universities owe basic due process protections to students in Title IX proceedings. Several commenters argued that the recent Sixth Circuit and California appellate decisions illustrate a trend, or growing judicial consensus, that some kind of cross-examination should be permitted in serious student misconduct cases that turn on credibility.[1190] A few commenters argued that under many State APAs (Administrative Procedure Acts) students in serious misconduct cases have a right to cross-examine an accuser and cited cases from Washington and Oregon as examples.[1191]

Commenters opined that requiring a live hearing with cross-examination for postsecondary institutions is perhaps the single most important change in the proposed rules to ensure that determinations are fair. Commenters referred to cross-examination as a ''game-changer'' because currently many college and university processes require parties to submit written questions in advance, to be asked by a school official, which may or may not occur at a live hearing. Commenters asserted that in numerous instances, college and university administrators have refused to ask some or all of a party's submitted questions, reworded a party's questions in ways that undermined the question's effectiveness, ignored follow-up questions, and simply refused to ask ''hard questions'' of parties even when evidence such as text messages appeared to contradict a party's testimony. Commenters argued that written questions are not an effective substitute for live cross-examination because credibility can be determined only when questions are asked in real time in the presence of parties and decision-makers who can listen and observe how a witness answers questions, and when immediate follow-up questions are permitted. Commenters argued that cross-examination is necessary to allow the decision-maker to

observe each witness answering questions that can bring out contradictions and improbabilities in the witness's testimony. Commenters cited Supreme Court criminal law cases discussing the symbolic and practical value of cross-examination in the context of the Sixth Amendment's Confrontation Clause.[1192]

Some commenters argued that despite other commenters' assumptions that the proposed rules would allow a complainant to be aggressively or abusively questioned by a respondent's advisor, it is unlikely that campus officials will permit an advisor to question a party in an inappropriate manner; for example, commenters asserted, under current policies most universities only allow lawyers or other advisors to be ''potted plants'' in hearings and school officials enforce that potted-plant policy, demonstrating that recipients are capable of controlling advisors. One commenter asserted that universities, which are dedicated to the free flow of information, will figure out an acceptable way for cross-examination to occur so that campus adjudications can meet generally accepted standards of due process. Several commenters asserted that recipients should, and under the proposed rules would be allowed to, adopt measures to prevent irrelevant, badgering questions and ensure respectful treatment of parties and witnesses. Commenters supported requiring cross-examination to be conducted by party advisors because this will mean that the questioning will be left to professionals, or at least to adults better attuned to the nuances of these cases. Commenters asserted that concerns about aggressive attorneys berating complainants are overblown, because attorneys and even non-attorney advisors know better than to alienate the fact-finder, which is what berating a complainant would do. Commenters asserted that the proposed rules reach a balanced solution by allowing cross-examination to determine credibility while disallowing direct student-to-student questioning and permitting questioning to occur with the parties in separate rooms.

Some commenters supported the cross-examination requirement based on belief that confronting an accuser is a part of the fundamental concept of the rule of law that should apply on college campuses. Some commenters believed that cross-examination will change the ''kangaroo court'' nature of campus Title IX proceedings that lacked basic due process protections, and that asking complainants questions about the allegations does not revictimize a complainant. Several commenters expressed support for cross-examination in the context of belief that the withdrawn 2011 Dear Colleague Letter, and/or the #MeToo movement, have tilted too many colleges and universities to be predisposed to believing young men guilty of sexual assault.

Many commenters supported cross-examination because of personal experiences being accused of a Title IX violation without any opportunity to confront the complainant, asserting that lack of cross-examination allowed a complainant's version of events to go unchallenged.

Many commenters supported cross-examination as an important part of the proposed rules' restoration of due process and fairness that distinguishes the United States from dictatorial regimes where to be accused is the same as being proved guilty. Several commenters argued that cross-examination is vital for finding the truth, which should be the goal of any investigation, because cross-examination reveals a witness's faulty memory or false testimony. Commenters asserted that cross-examination allows the parties to make a searching inquiry to uncover facts that may have been omitted, confused, or overstated.

Some commenters believed that cross-examination will reduce the likelihood of false allegations being made or succeeding. One commenter argued that regardless of whether false allegations happen infrequently or frequently, every case must be considered individually using a proper investigation process with cross-examination. One commenter opposed the proposed rules as problematic and offensive to victims, but supported the cross-examination provision because due process is an inherent right in the United States. This commenter also supported cross-examination because victims going through a criminal trial get cross-examined, and even though false allegations are rare, where there is one, it should be taken care of in accordance with due process.

A few commenters supported the cross-examination requirement because full and fair adversarial procedures are likely to reduce bias in decision making. One commenter quoted Supreme Court criminal law decisions for the proposition that the adversarial ''system is premised on the well-tested principle that truth—as well as fairness—is 'best discovered by powerful statements on both sides of the question.' '' [1193] Another commenter asserted that nothing can completely eliminate sex or racial bias in a system but bias can be reduced by expanding the evidence considered by decision-makers, such as by requiring a full investigation and cross-examination.[1194] One commenter asserted that it is within the Department's jurisdiction to create regulations about cross-examination and other procedures that reduce impermissible implicit bias on the basis of sex stereotypes and unconscious sex-bias.[1195]

A few commenters supported cross-examination because both parties need due process including the right to use cross-examination to establish credibility so that each party has their stated facts scrutinized to find the truth. Some commenters asserted that cross-examination ensures a level of fairness that benefits all parties involved in Title IX cases. A few commenters believed the proposed rules, including the cross-examination requirement, provide a fair and equal opportunity for both sides. One commenter argued that cross-examination holds a great benefit to both parties and allows the investigator and other staff on the case to hear both sides of the story; another commenter stated there are two sides to every issue and both sides must be questioned. One

[1192] Commenters cited: *Coy* v. *Iowa,* 487 U.S. 1012, 1017 (1988) (stating that cross-examination has symbolic importance because ''there is something deep in human nature that regards face-to-face confrontation between accused and accuser as essential to a fair trial in a criminal prosecution'') (internal quotation marks and citation omitted); *id.* at 1019 (noting the practical importance of cross-examination because it ''is always more difficult to tell a lie about a person to his [or her] face than behind his [or her] back'') (internal quotation marks and citation omitted); *Mattox* v. *United States,* 156 U.S. 237, 242–43 (1895) (cross-examination provides the trier-of-fact opportunity to judge by the witness's demeanor on the stand and ''the manner in which he gives his testimony whether he is worthy of belief.'').

[1193] Commenters cited: *Penson* v. *Ohio,* 488 U.S. 75, 84 (1988) (quoting Irving R. Kaufman, *Does the Judge Have a Right to Qualified Counsel?,* 61 Am. Bar. Ass'n J. 569, 569 (1975)); *United States* v. *Cronic,* 466 U.S. 648, 656 (1984) (describing the ''crucible of meaningful adversarial testing''); *Cal.* v. *Green,* 399 U.S. 149, 158 (1970) (describing cross-examination as the ''greatest legal engine ever invented for the discovery of truth'') (internal quotation marks and citations omitted). Several commenters paraphrased the ''greatest legal engine ever invented for discovery of truth'' passage without citing to the Supreme Court case or the Wigmore treatise from which it originates.

[1194] Commenters cited: Stephen P. Klein *et al., Race and Imprisonment Decisions in California,* 24 Science 812 (1990) (for the proposition that most decisions after a full trial are not based on using race as a proxy, but rather on evidence at trial, resulting in racially fair decisions).

[1195] Commenters cited: *Maryland* v. *Craig,* 497 U.S. 836, 846 (1990) (quoting *Cal.* v. *Green,* 399 U.S. 149, 158 (1970)) for the proposition that when procedures typical to our adjudicative processes, such as cross-examination, are introduced into university grievance proceedings such procedures allow for the ''discovery of the truth'' in a manner that reduces stereotyping.

commenter supported the cross-examination requirement and stated that current, unfair procedures harm respondents who are women, and who are gay or lesbian, as well as respondents who are men, giving examples such as a young woman the commenter represented who was so drunk she could not have consented to sex and yet was expelled because the male filed with the Title IX office first. Several commenters asserted that cross-examination is as beneficial for the recipient as for the parties because the decision-maker has the opportunity to observe and judge the credibility of parties and witnesses, thereby serving the recipient's interest in reaching accurate determinations.

Another commenter argued that the opportunity to cross-examine witnesses is a procedural protection that should not be controversial given it is a bedrock principle of the American criminal justice system designed to create a more reliable fact finding process. The commenter believed that a reliable process is in the interest of all parties including recipients, because greater reliability will lead to greater acceptance of the legitimacy of the decisions. This commenter also asserted that institutional opposition to basic notions of due process has led to widespread mistrust of the decision-making processes of Title IX offices, evidenced by the prevalence of Federal lawsuits challenging Title IX decisions made by institutions. The commenter argued that institutions must conform their Title IX procedures to basic notions of due process to establish the legitimacy of their decisions.

One commenter argued that it is unfair to a complainant not to be able to cross-examine a respondent or witnesses. At least one commenter argued that cross-examination will provide greater reliability, which should encourage complainants to report harassment and further support Title IX's objective of protecting the educational environment. One commenter argued that giving respondents a full hearing with cross-examination means that victims of ''contemptible rapists'' can exact justice, and that even if answering questions about painful memories is difficult it is worth it to make sure that rape accusations are not approached lightly. Another commenter asserted that claiming that having an accusation examined is too traumatic for a complainant infantilizes complainants. Several commenters argued that even though testifying about traumatic events is difficult and uncomfortable, testimony from any party that is never questioned cannot be evaluated for truthfulness.

Some commenters supported the proposed rules, and cross-examination as the opportunity to test the credibility of claims, because, commenters asserted, women reject the trampling of constitutional rights in the name of women's rights. One commenter supported live hearings and cross-examination conducted through advisors, including attorneys, because students will have an opportunity to learn about how misconduct allegations are factually examined and determined.

Some commenters supported § 106.45(b)(6)(i) but requested that the provision be expanded to expressly give parties the right to also cross-examine any investigator or preparer of an investigative report, because the entire grievance procedure is often based on the findings in the investigative report and it is thus essential that the parties be able to cross-examine the individuals who prepared the report to probe how conclusions were reached and whether the report is credible.

Discussion: The Department appreciates commenters' support for the requirement in § 106.45(b)(6)(i) that postsecondary institutions must hold live hearings with cross-examination conducted by party advisors. The Department agrees with commenters who observed that several appellate courts over the last few years have carefully considered the value of cross-examination in high-stakes student misconduct proceedings in colleges and universities and concluded that part of a meaningful opportunity to be heard includes the ability to challenge the testimony of parties and witnesses. The Department agrees with commenters who noted that this conclusion has been reached by courts both in the context of constitutional due process in public institutions and a fair process in private institutions. The Department agrees with commenters who observed that some States already provide rights to a robust hearing and cross-examination under State APA laws, demonstrating that the notion of live hearings and cross-examination is not new or foreign to many postsecondary institutions. The Department is aware that many postsecondary institutions have created disciplinary systems for sexual misconduct issues that intentionally avoid live hearings and cross-examination, due to concern about retraumatizing sexual assault victims; however, the Department agrees with commenters that in too many instances recipients who have refused to permit parties or their advisors to conduct cross-examination and instead allowed questions to be posed through hearing panels have stifled the value of cross-examination by, for example, refusing to ask relevant questions posed by a party, changing the wording of a party's question, or refusing to allow follow-up questions.

The Department agrees with commenters that cross-examination serves the interests of complainants, respondents, and recipients, by giving the decision-maker the opportunity to observe parties and witnesses answer questions, including those challenging credibility, thus serving the truth-seeking purpose of an adjudication. The Department acknowledges that Title IX grievance processes are not criminal proceedings and thus constitutional protections available to criminal defendants (such as the right to confront one's accuser under the Sixth Amendment) do not apply in the educational context; however, the Department agrees with commenters that cross-examination is a valuable tool for resolving the truth of serious allegations such as those presented in a formal complaint of sexual harassment. The Department emphasizes that cross-examination that may reveal faulty memory, mistaken beliefs, or inaccurate facts about allegations does *not* mean that the party answering questions is necessarily lying or making intentionally false statements. The Department's belief that cross-examination serves a valuable purpose in resolving factual allegations does not reflect a belief that false accusations occur with any particular frequency in the context of sexual misconduct proceedings. However, the degree to which any inaccuracy, inconsistency, or implausibility in a narrative provided by a party or witness should affect a determination regarding responsibility is a matter to be decided by the decision-maker, after having the opportunity to ask questions of parties and witnesses, and to observe how parties and witnesses answer the questions posed by the other party.

The Department agrees with commenters that the truth-seeking function of cross-examination can be achieved while mitigating any re-traumatization of complainants because under the final regulations: Cross-examination is only conducted by party advisors and not directly or personally by the parties themselves; upon any party's request the entire live hearing, including cross-examination, must occur with the parties in separate rooms; questions about a complainant's prior sexual behavior are barred subject to two limited exceptions; a party's medical or psychological records can

only be used with the party's voluntary consent;[1196] recipients are instructed that only relevant questions must be answered and the decision-maker must determine relevance prior to a party or witness answering a cross-examination question; and recipients can oversee cross-examination in a manner that avoids aggressive, abusive questioning of any party or witness.[1197]

The Department agrees with commenters that sex bias is a unique risk in the context of sexual harassment allegations, where the case often turns on plausible, competing factual narratives of an incident involving sexual or sex-based interactions, and application of sex stereotypes and biases may too easily become a part of the decision-making process. The Department agrees with commenters that ensuring fair adversarial procedures lies within the Department's authority to effectuate the purpose of Title IX because such procedures will prevent and reduce sex bias in Title IX grievance processes and better ensure that recipients provide remedies to victims of sexual harassment.

The Department agrees with commenters that cross-examination equally benefits complainants and respondents, and that both parties in a high-stakes proceeding raising contested factual issues deserve equal rights to fully participate in the proceeding. This ensures that the decision-maker observes each party's view, perspective, opinion, belief, and recollection about the incident raised in the formal complaint of sexual harassment. The Department agrees with commenters who note that any person can be a complainant, and any person can be a respondent, regardless of a person's race, sexual orientation, gender identity, or other personal characteristic, and each party, in every case, deserves the opportunity to promote and advocate for the party's unique interests.

The Department agrees with commenters that postsecondary-level adjudications with live hearings and cross-examination will increase the reality and perception by parties and the public that Title IX grievance processes are reaching fair, accurate determinations, and that robust adversarial procedures improve the legitimacy and credibility of a recipient's process, making it more likely that no group of complainants or respondents will experience unfair treatment or unjust outcomes in Title IX proceedings (for example, where formal complaints involve people of color, LGBTQ students, star athletes, renowned faculty, etc.).

The Department agrees with commenters that cross-examination is as powerful a tool for complainants seeking to hold a respondent responsible as it is for a respondent, and that a determination of responsibility reached after a robust hearing benefits victims by removing opportunity for the respondent, the recipient, or the public to doubt the legitimacy of that determination. The Department agrees with commenters that there is no tension between providing strong procedural protections aimed at discovering the truth about allegations in each particular case, and upholding the rights of women (and every person) to participate in education programs or activities free from sex discrimination. The Department appreciates a commenter's belief that observing a live hearing with cross-examination may provide students with opportunity to learn about adjudicatory processes, though the Department notes that the purpose of the § 106.45 grievance process is to reach factually reliable determinations so that sex discrimination in the form of sexual harassment is appropriately remedied by recipients so that no student's educational opportunities are denied due to sex discrimination.

The Department understands commenters' point that often a case is shaped and directed by the evidence gathered and summarized by the investigator in the investigative report, including the investigator's findings, conclusions, and recommendations. The Department emphasizes that the decision-maker must not only be a separate person from any investigator, but the decision-maker is under an obligation to objectively evaluate all relevant evidence both inculpatory and exculpatory, and must therefore independently reach a determination regarding responsibility without giving deference to the investigative report. The Department further notes that § 106.45(b)(6)(i) already contemplates parties' equal right to cross-examine any witness, which could include an investigator, and § 106.45(b)(1)(ii) grants parties equal opportunity to present witnesses including fact and expert witnesses, which may include investigators.

Changes: None.

Retraumatizing Complainants

Comments: Many commenters opposed § 106.45(b)(6)(i) requiring postsecondary institutions to hold live hearings with cross-examination conducted by the parties' advisors. Commenters argued that cross-examination is an adversarial, contentious procedure that will revictimize, retraumatize, and scar survivors of sexual harassment; that cross-examination will exacerbate survivors' PTSD (post-traumatic stress disorder),[1198] RTS (rape trauma syndrome), anxiety, and depression; and cross-examination will interrogate victims like they are the criminals, rub salt in victims' wounds, put rape victims through a second rape, and essentially place the victim on trial when victims are already trying to heal from a horrific experience. Commenters argued that no other form of misconduct gives respondents the right to ''put on trial'' the person accusing the respondent of wrongdoing; one commenter argued that for instance, professors accusing a student of cheating are not ''put on trial,'' a student accusing another student of vandalism is not ''put on trial,'' so singling out sexual misconduct complainants for a procedure designed to intimidate and undermine the complainant's credibility heightens the misperception that the credibility of sexual assault complainants is uniquely suspect. Other commenters acknowledged that some recipients do use cross-examination in non-sexual misconduct hearings because cross-examination can be helpful in getting to the heart of the

[1196] Section 106.45(b)(5)(i) (providing that a party's treatment records can only be used in a grievance process with that party's voluntary, written consent).

[1197] Section 106.45(b) (introductory sentence as revised in the final regulations provides that any provisions, rules, or practices other than those required by § 106.45 that a recipient adopts as part of its grievance process for handling formal complaints of sexual harassment as defined in § 106.30, must apply equally to both parties).

[1198] Commenters cited: Anke Ehlers & David M. Clark, *A Cognitive Model of Posttraumatic Stress Disorder,* 38 Behavior Research & Therapy 4 (2000); Mary P. Koss, *Blame, Shame, and Community: Justice Responses to Violence Against Women,* 55 Am. Koss *et al., Campus Sexual Misconduct: Restorative Justice Approaches to Enhance Compliance with Title IX Guidance,* 15 Trauma Violence & Abuse 3 (2014); Fiona Mason & Zoe Lodrick, *Psychological Consequences of Sexual Assault,* 27 Best Practice & Research Clinical Obstetrics & Gynecology 1 (2013); National Center on Domestic Violence, Trauma & Mental Health, *Representing Domestic Violence Survivors Who Are Experiencing Trauma and Other Mental Health Challenges: A Handbook for Attorneys* (2011); Kaitlin Chivers-Wilson, *Sexual Assault and Posttraumatic Stress Disorder: A Review of The Biological, Psychological and Sociological Factors and Treatments,* 9 McGill J. of Med.: MJM: An Int'l Forum for the Advancement of Medical Sciences by Students 2 (2006).

allegations; these commenters asserted that Title IX hearings are different due to the subject matter and relationships between the parties and cross-examination is inappropriate in sexual misconduct proceedings.

Commenters argued that fear of undergoing such a retraumatizing experience will chill reporting of sexual harassment and cause more victims to stay in the shadows because survivors will have no non-traumatic options in the wake of sexual violence.[1199] Commenters asserted that coming forward is hard enough for victims because often the trauma has resulted in nightmares, intrusive thoughts, inability to concentrate, and hypervigilance, and the prospect of facing grueling, retraumatizing cross-examination will result in even fewer students coming forward.[1200] Commenters argued that reporting will be especially chilled with respect to claims against faculty members, where a power differential already exists.

Commenters believed cross-examination creates secondary victimization, which commenters referred to as a result of interacting with community service providers who engage in victim-blaming attitudes.[1201] Some commenters believed it is cruel to let victims be cross-examined by the person who committed the assault, or to force a victim to be face-to-face with the perpetrator. Some commenters believed that a public hearing where a victim must be cross-examined would be severely traumatizing.

Commenters asserted that anyone taken advantage of by sexual harassment should be able to voice that experience without fear of a traumatizing court case. Commenters argued that subjecting a victim courageous enough to come forward to the re-traumatization of cross-examination is an invasion of the victim's right to privacy and safety. Commenters asserted that as survivors, they have experienced stress, anxiety, nausea, and fear simply from passing by their attackers, and the thought of being cross-examined near their attacker makes these commenters believe they would not be able to speak at all due to fear, would feel permanently traumatized, would drop out of school, or would even contemplate suicide.[1202] Commenters shared personal experiences feeling traumatized by cross-examination in Title IX proceedings, stating that even where a complainant won the case, the experience of cross-examination was so mentally and emotionally taxing that complainants suffered years of mental health treatment, felt unable to perform academically, or dropped out of school.

Some commenters supported reform of school discipline procedures and agreed that complainants and respondents should be treated the same when it comes to procedural rights including a right of cross-examination, but argued that recipients should be allowed discretion to decide whether, or how, to incorporate cross-examination into Title IX grievance processes so long as the decision applies equally to both parties, and that it is intrusive and myopic for the Department to unilaterally impose procedures onto sexual misconduct processes, especially in a way that, in the commenters' views, tilts the system against victims of sexual harassment.

Discussion: The Department believes that cross-examination as required under § 106.45(b)(6)(i) is a necessary part of a fair, truth-seeking grievance process in postsecondary institutions, and that these final regulations apply safeguards that minimize the traumatic effect on complainants. We have revised § 106.45(b)(6)(i) to clearly state that the entire live hearing (and not only cross-examination) must occur with the parties in separate rooms, at the request of any party; that cross-examination must never be conducted by a party personally; and that only relevant cross-examination questions must be answered and the decision-maker must determine the relevance of a cross-examination question before a party or witness answers. Recipients may adopt rules that govern the conduct and decorum of participants at live hearings so long as such rules comply with these final regulations and apply equally to both parties.[1203] We understand that cross-examination is a difficult and potentially traumatizing experience for any person, perhaps especially a complainant who must answer questions about sexual assault allegations. These final regulations aim to ensure that the truth-seeking value and function of cross-examination applies for the benefit of both parties while minimizing the discomfort or traumatic impact of answering questions about sexual harassment.

While the Department acknowledges that complainants may find a cross-examination procedure emotionally difficult, the Department believes that a complainant can equally benefit from the opportunity to challenge a respondent's consistency, accuracy, memory, and credibility so that the decision-maker can better assess whether a respondent's narrative should be believed. The complainant's advisor will conduct the cross-examination of the respondent and, thus, the complainant will not be retraumatized by having to personally question the respondent. The Department disagrees that cross-examination places a victim (or any party or witness) ''on trial'' or constitutes an interrogation; rather, cross-examination properly conducted simply constitutes a procedure by which each party and witness answers questions posed from a party's unique perspective in an effort to advance the asking party's own interests. The Department disagrees that cross-examination implies that sexual assault complainants are uniquely unreliable; rather, to the extent that cross-examination implies anything about credibility, the Department notes that by giving both parties *equal* cross-examination rights, the final regulations contemplate that a complainant's allegations, and a respondent's denials,

[1199] Many commenters cited to information regarding low rates of reporting of sexual harassment such as the data noted in the ''Reporting Data'' subsection of the ''General Support and Opposition'' section of this preamble, in support of arguments that cross-examination will further reduce rates of reporting. Commenters also cited: Joanne Belknap, *Rape: Too Hard to Report and Too Easy to Discredit Victims,* 16 Violence Against Women 12 (2010); Suzanne B. Goldberg, *Keep Cross-examination Out of College Sexual-Assault Cases, Chronicle of Higher Education* (Jan. 10, 2019).

[1200] Commenters cited: Judith Lewis Herman, *Justice From the Victim's Perspective,* 11 Violence Against Women 5 (2005) for the proposition that cross-examination is inherently retraumatizing and can trigger vivid memories forming one of the ''psychological barriers that discourage victim participation[.]'' Commenters also cited: Gregory Matoesian, *Reproducing Rape: Domination through Talk in the Courtroom* (Univ. of Chicago Press 1993); Michelle J. Anderson, *Women Do Not Report the Violence They Suffer: Violence Against Women and the State Action Doctrine,* 46 Vill. L. Rev. 907, 932, 936–37 (2001); Tom Lininger, *Bearing the Cross,* 74 Fordham L. Rev. 1353, 1357 (2005); Anoosha Rouhanian, *A Call for Change: The Detrimental Impacts of Crawford* v. *Washington on Domestic Violence and Rape Prosecutions,* 37 Boston Coll. J. of L. & Social Justice 1 (2017).

[1201] Commenters cited to information regarding secondary victimization and institutional betrayal such as the data noted in the ''Commonly Cited Sources'' subsection of the ''General Support and Opposition'' section of this preamble, including, for example, Rebecca Campbell, *Survivors' Help-Seeking Experiences With the Legal and Medical Systems,* 20 Violence & Victims 1 (2005). Commenters also cited: Jim Parsons & Tiffany Bergin, *The Impact of Criminal Justice Involvement on Victims Mental Health,* 23 Journal of Traumatic Stress 2 (2010).

[1202] Commenters cited: Amelia Gentleman, *Prosecuting Sexual Assault:* ''*Raped All Over Again,*'' The Guardian (Apr. 13, 2013) for the story of a woman who committed suicide shortly after being cross-examined in a criminal trial in England.

[1203] As revised, the introductory sentence of § 106.45(b) provides: ''Any provisions, rules, or practices other than those required by this section that a recipient adopts as part of its grievance process for handling formal complaints of sexual harassment as defined in § 106.30, must apply equally to both parties.''

equally warrant probes for credibility and truthfulness.

The Department appreciates commenters' observations that some recipients do not use live hearings or cross-examination for any form of misconduct charges while other recipients use hearings and cross-examination for some types of misconduct but not for sexual misconduct. The Department does not opine through these final regulations as to whether cross-examination is beneficial for non-sexual harassment misconduct allegations because the Department's focus in these final regulations are the procedures most likely to reach reliable outcomes in the context of Title IX sexual harassment. The Department agrees with commenters who note that sexual harassment allegations present unique circumstances, but disagrees that the subject matter or relationships between parties involved in sexual harassment allegations make cross-examination less useful than for other types of misconduct allegations. Rather, the Department believes that precisely because the subject matter involves sensitive, personal matters presenting high stakes and long-lasting consequences for both parties, robust procedural rights for both parties are all the more important so that each party may fully, meaningfully put forward the party's viewpoints and beliefs about the allegations and the case outcome.

The Department acknowledges that predictions of harsh, aggressive, victim-blaming cross-examination may dissuade complainants from pursuing a formal complaint out of fear of undergoing questioning that could be perceived as an interrogation. However, recipients retain discretion under the final regulations to educate a recipient's community about what cross-examination during a Title IX grievance process will look like, including developing rules and practices (that apply equally to both parties) [1204] to oversee cross-examination to ensure that questioning is relevant, respectful, and non-abusive. We have revised § 106.45(b)(6)(i) to specifically state that only relevant cross-examination questions must be answered and the decision-maker must determine the relevance of a cross-examination question before the party of witness answers. We have revised § 106.45(b)(1)(iii) to specifically require decision-makers to be trained on conducting live hearings and determining relevance (including the non-relevance of questions and evidence about a complainant's prior sexual history). The Department also notes that recipients must comply with obligations under applicable disability laws, and that the final regulations contemplate that disability accommodations (*e.g.,* a short-term postponement of a hearing date due to a party's need to seek medical treatment for anxiety or depression) may be good cause for a limited extension of the recipient's designated, reasonably prompt time frame for the grievance process.[1205]

The Department understands that victims of sexual violence often experience PTSD and other significant negative impacts, and that participating in a grievance process may exacerbate these impacts. The Department believes that the final regulations appropriately provide a framework under which a recipient must offer supportive measures to each complainant (without waiting for a factual adjudication of the complainant's allegations),[1206] and provide remedies for a complainant where the respondent is found responsible following a fair grievance process.[1207] Complainants can receive supportive measures from a recipient, and each complainant can decide whether, in addition to supportive measures, participating in a grievance process is a step the complainant wants to take.[1208] In this manner, these final regulations respect the complainant's autonomy. The Department therefore disagrees with commenters who asserted that under the final regulations complainants will have ''no non-traumatic options'' and will feel deterred from reporting; complainants can report sexual harassment and receive supportive measures without even filing a formal complaint, much less participating in a grievance process or undergoing cross-examination. This option for reporting exists regardless of the identity of the respondent (*e.g.,* whether the respondent is an employee, faculty member, or student), and therefore all complainants have the same non-traumatic reporting option regardless of any real or perceived power differential between the complainant and respondent.

The Department disagrees that including cross-examination as a procedure in the grievance process constitutes institutional betrayal. Cross-examination does not inherently involve victim-blaming attitudes, and as noted above, recipients retain wide discretion under the final regulations to adopt rules and practices designed to ensure that cross-examination occurs in a respectful, non-abusive manner. Further, the reason cross-examination must be conducted by a party's advisor, and not by the decision-maker or other neutral official, is so that the recipient remains truly neutral throughout the grievance process. To the extent that a party wants the other party questioned in an adversarial manner in order to further the asking party's views and interests, that questioning is conducted by the party's own advisor, and not by the recipient. Thus, no complainant (or respondent) need feel as though the recipient is ''taking sides'' or otherwise engaging in cross-examination to make a complainant feel as though the recipient is blaming or disbelieving the complainant.

The Department appreciates the opportunity to clarify that contrary to the fears of some commenters, § 106.45(b)(6)(i) prohibits any complainant from being questioned directly by the respondent; rather, only party *advisors* can conduct cross-examination. We have revised § 106.45(b)(6)(i) specifically to state that cross-examination must occur ''directly, orally, and in real-time'' by the party's advisor and ''never by a party personally.'' Similarly, § 106.45(b)(6)(i) is revised to require recipients to hold the entire live hearing (and not just cross-examination) with the parties in separate rooms (facilitated by technology) so that the parties need never be face-to-face, upon a party's request. Similarly, the Department notes that the live hearing is not a ''public'' hearing, and the final regulations add § 106.71 that requires recipients to keep party and witness identities confidential except as permitted by law and as needed to conduct an investigation or hearing.

The Department understands commenters' concerns that sexual harassment victims have already suffered the underlying conduct and that participating in a grievance process may be difficult for victims. However, before allegations may be treated as fact (*i.e.,* before a complainant can be

[1204] The introductory sentence of § 106.45(b) expressly permits recipients to adopt rules for the Title IX grievance process so long as such rules are applied equally to both parties.

[1205] Section 106.45(b)(1)(v).

[1206] Section 106.44(a) (recipients must offer supportive measures to a complainant, and the Title IX Coordinator must promptly contact the complainant to discuss the availability of supportive measures, inform the complainant of the availability of supportive measures with or without the filing of a formal complaint, and explain to the complainant the process for filing a formal complaint).

[1207] Section 106.45(b)(1)(i).

[1208] Section 106.71 (prohibiting retaliation for exercise of rights under Title IX and specifically protecting any individual's right to not participate in a grievance process).

deemed a victim of particular conduct by a particular respondent), a fair process must reach an accurate outcome, and in situations that involve contested allegations, procedures designed to discover the truth by permitting opposing parties each to advocate for their own viewpoints and interests are most likely to reach accurate outcomes based on facts and evidence rather than assumptions and bias.

The Department disagrees that adjudication via a live hearing with cross-examination invades a complainant's privacy or risks a complainant's safety. The final regulations revise § 106.45(b)(5) to ensure that recipients do not access or use any party's treatment records without obtaining the party's written consent, thus limiting the type of sensitive, private information that becomes part of a § 106.45 grievance process without a party's consent. Further, § 106.45(b)(5)(vi) limits the exchange of evidence from an investigation only to evidence directly related to the allegations in the formal complaint. Additionally, § 106.45(b)(6)(i) deems questions and evidence regarding a complainant's prior sexual behavior or sexual predisposition to be irrelevant, with specified exceptions, to further protect complainants' privacy, and upon a party's request the entire live hearing must be held with the parties located in separate rooms. The Department disagrees that an adjudication process that includes a live hearing with cross-examination jeopardizes any party's safety, particularly with the privacy and anti-retaliation provisions referenced above, and the Department further notes that safety-related measures remain available under the final regulations including the ability for a recipient to impose no-contact orders on the parties under § 106.30 defining ''supportive measures,'' or to remove a respondent on an emergency basis under § 106.44(c). Further, a complainant also retains the ability to obtain an order of protection (*e.g.,* a restraining order) from a court of law.

The Department understands commenters' concerns about the prospect of cross-examination, and appreciates commenters' personal experiences with the difficulties of cross-examination, but reiterates that cross-examination essentially consists of questions posed from one party's perspective to advance the asking party's views about the allegations at issue, that recipients retain discretion to control the conduct of cross-examination in a manner that ensures that no party is treated abusively or disrespectfully, that only relevant cross-examination questions must be answered, and that either party may demand that the live hearing occur with the parties in separate rooms. Based on comments from many recipients, the Department believes that recipients desire to treat all their students and employees with dignity and respect, and that recipients will therefore conduct hearings in a manner that keeps the focus on respectful questioning regarding the allegations at issue while permitting each party (through advisors) to advocate for the party's own interests before the decision-maker.

The Department appreciates commenters' support for ensuring that both parties have equal rights with respect to cross-examination, but disagrees that § 106.45(b)(6)(i) is intrusive or myopic because, for reasons explained throughout this preamble, the Department has determined that in the context of resolution of Title IX sexual harassment allegations the procedures in § 106.45 constitute those procedures necessary to ensure consistent, predictable application of Title IX rights, and does not believe that cross-examination in the postsecondary context tilts the system against sexual harassment victims. An equal right of cross-examination benefits complainants as well as respondents, by permitting complainants to participate in advocating for their own view of the case so that a decision-maker is more likely to reach an accurate determination, and where a respondent is found responsible the victim will receive remedies designed to restore or preserve equal access to education.

Changes: We have revised § 106.45(b)(6)(i) to state that cross-examination must occur ''directly, orally, and in real-time'' by a party's advisor ''and never by a party personally'' and that upon a party's request the entire live hearing (not only cross-examination) must occur with the parties located in separate rooms (with technology enabling participants to see and hear each other). We have further revised § 106.45(b)(6)(i) to state that only relevant cross-examination questions must be answered, and the decision-maker must determine the relevance of a cross-examination or other question before the party or witness answers the question (and explain any decision to exclude a question as not relevant). The final regulations add § 106.71 prohibiting retaliation and providing in relevant part that the recipient must keep confidential the identity of any individual who has made a report or complaint of sex discrimination, including any individual who has made a report or filed a formal complaint of sexual harassment, any complainant, any individual who has been reported to be the perpetrator of sex discrimination, any respondent, and any witness, except as may be permitted by the FERPA statute or regulations, as required by law, or to carry out the purposes of 34 CFR part 106, including the conduct of any investigation, hearing, or judicial proceeding arising thereunder.

Reducing Truth-Seeking

Comments: Many commenters asserted that cross-examination would mean that complainants are questioned via verbal attacks on the complainant's character rather than sensitively in a respectful manner designed to aid the fact-finding process.[1209] Commenters argued that in criminal cases, it is accepted that the defense counsel's job to put the prosecutor's case in the worst possible light regardless of the truth and to impeach an adverse witness even if the defense attorney believes the witness is telling the truth.[1210]

Commenters argued that cross-examinations are just emotional beatings to twist survivors' perception and memory and lead them to mistakenly admit to or believe in false information, make the survivor feel insecure about what really happened, challenge the legitimacy of the survivor's experience, and therefore lead to an unjust outcome. Commenters argued that cross-examination took the place of torture in our legal system and

[1209] Commenters cited: Abbe Smith, *Representing Rapists: The Cruelty of Cross-Examination and Other Challenges for a Feminist Criminal Defense Lawyer,* 53 Am. Crim. L. Rev. 255, 290 (2016) (noting that a defense attorney recently acknowledged, ''Especially when the defense is fabrication or consent—as it often is in adult rape cases—you have to go *at* the witness. There is no way around this fact. Effective cross-examination means exploiting every uncertainty, inconsistency, and implausibility. More, it means attacking the witness's very character.'') (emphasis in original).

[1210] Commenters cited: *United States* v. *Wade,* 388 U.S. 218, 257–58 (1967) (White, J., dissenting in part and concurring in part) for the proposition that Justice Byron White explained five years before Title IX was enacted that cross-examination ''in many instances has little, if any, relation to the search for the truth.'' Instead, at least in criminal cases, it is accepted that defense counsel's job is ''to put the State's case in the worst possible light, regardless of what he thinks or knows to be the truth'' and to ''cross-examine a prosecution witness, and impeach him if he can, even if he thinks the witness is telling the truth.'' *Id.* Commenters also cited: Louise Ellison, *The Mosaic Art: Cross-Examination and the Vulnerable Witness,* 21 Legal Studies 353, 366, 368–369, 373–375 (2001); John Spencer, ''Conclusions,'' *in Children and Cross-Examination: Time to Change the Rules?* 189 (John Spencer & Michael Lamb eds., Hart Publishing 2012).

remains a brutal exercise.[1211] Commenters stated that when working with victims as clients, victims' number one fear is often cross-examination whether in a civil court or criminal court; while they do not fear the truth, they fear defense lawyers' attempts to confuse them and blame them for not remembering every single part of the story even when it was drug or alcohol induced, and they fear telling their story to near strangers and still not getting the justice and safety they need. Commenters argued that cross-examination is designed to engage in DARVO (deny, attack, reverse victim/offender) strategies that harm victims. Commenters argued that even cases that seem to be ''he said/she said'' often involve more evidence than just the parties' statements,[1212] so cross-examination is unnecessary and may disincentivize recipients from conducting a full investigation that uncovers relevant evidence.

Many commenters believed the negative results of cross-examination would be heightened by the proposed rules' requirement that cross-examination be conducted by a party's advisor, who could be a respondent's angry parent, fraternity brother, roommate, or other person untrained in conducting cross-examination and holding severe bias against the complainant. Some commenters asserted that cross-examination by advisors would turn misconduct hearings into unregulated kangaroo courts where untrained, unskilled non-attorney advisors are ''playing attorney'' yet eliciting little or no useful information. Commenters argued that in court trials, the parties themselves feel constrained to come across to judges and juries as nice, earnest, and sympathetic, while attorneys feel free to ''take the gloves off'' when cross-examining the opposing party and the same dynamic would prevail in college disciplinary hearings.

Some commenters asserted that telling complainants that they will be cross-examined by a lawyer or a respondent's parent, roommate, or fraternity brother will make the complainant feel as though the university the complainant should be able to trust is throwing the complainant to proverbial wolves. One commenter recounted being questioned by a respondent's advisor of choice and asserted that the advisor spoke to the commenter in a disempowering, blaming, and condescending way, fueling the commenter's feelings of being traumatized and harming the commenter's ability to function as a student. Some commenters asserted that allowing questioning to take place through an advisor removes accountability students should have for their own actions and will result in students blaming their advisors for poor conduct during a hearing.

Many commenters opposed the cross-examination requirement because the proposed rules do not guarantee procedural protections that accompany cross-examination in criminal or civil trials, such as the right to representation by counsel, rules of evidence,[1213] and a judge ruling on objections. Commenters argued that cross-examination is only potentially useful for discovering the truth when used by skilled lawyers in courtrooms overseen by experienced judges, and that in the hands of untrained, inexperienced advisors will be only a tool to trap, harass, and blame complainants rather than discern truth about allegations.[1214] Commenters asserted that colleges will not adequately protect parties from inappropriate or irrelevant questions, so that cross-examination will intrude into irrelevant details about victims' private lives, reputations, and trustworthiness. Commenters argued that institutions have no power to hold an attorney in contempt, and attorneys are trained to be very aggressive, and thus institutions will not be able to control overly hostile, abusive party advisors who are attorneys. Commenters stated that school administrators are ill equipped to make nuanced legal determinations about the relevant scope of questions and answers, and that schools will be too nervous to act to control lawyers, who will run the show and not respect even the few limits placed on cross-examination.

Commenters asserted that even in court where judges oversee defense attorneys, survivors describe cross-examination as the most distressing part of their experience within the criminal justice system even when the survivors report feeling reasonably able to give accurate evidence.[1215] Commenters asserted that most rape victims face defense lawyer tactics like interrupting, asking for only yes-no answers, asking illogical questions, grilling on minute details of the incident, and asking irrelevant personal questions.[1216] Commenters argued that cross-examination outside a controlled courtroom setting will subject victims to intrusive, retraumatizing questions designed to humiliate, intimidate, and blame them, with no recourse as a victim would have being questioned in front of a judge, thereby weaponizing university proceedings against victims. At least one commenter argued that even in criminal settings, in-person cross-examination is not always required; under some laws vulnerable witnesses such as children are allowed to pre-record evidence in advance rather than testify live.[1217]

[1211] Commenters cited: David Luban, *Partisanship, Betrayal and Autonomy in the Lawyer-Client Relationship: A Reply to Stephen Ellmann,* 90 Colum. L. Rev. 1004, 1027–28 (1990) (examining the legal ethics of cross-examinations in rape cases, even with rape shield laws in place) (''To make it seem plausible that the victim consented and then turned around and charged rape, the lawyer must play to the jurors' deeply rooted cultural fantasies about feminine sexual voracity and vengefulness. All the while, without seeming like a bully, the advocate must humiliate and browbeat the prosecutrix, knowing that if she blows up she will seem less sympathetic, while if she pulls inside herself emotionally she loses credibility as a victim. Let us abbreviate all of this simply as 'brutal cross-examination.' ''). Commenters also cited: 5 John Henry Wigmore, *Evidence in Trials at Common Law* § 1367 (James H. Chabourn ed., Little Brown 1974) (Wigmore explained that ''in more than one sense'' cross-examination took ''the place in our system which torture occupied in the medieval system of the civilians.'').

Discussion: The Department is aware that the perception, and in some circumstances the reality, of cross-examination in sexual assault cases has felt to victims like an emotional beating under which a skilled defense lawyer tries to twist a survivor's words, question the survivor's experience, or convince a fact-finder to find the defense lawyer's client is innocent by blaming the victim for the sexual assault or discrediting the victim with irrelevant character aspersions. The Department reiterates, however, that the essential function of cross-examination is not to embarrass, blame, humiliate, or emotionally berate a party, but rather to ask questions that probe a party's narrative in order to give the decision-maker the fullest view possible of the evidence relevant to the allegations at issue. The Department disagrees with commenters' assertion that cross-examination is the equivalent of torture; while commenters noted Wigmore's observation that cross-examination has taken the place that torture historically occupied in civil law systems (as opposed to our common law system), such an observation implies that cross-examination differs from torture and is the enlightened, humane manner of testing a witness's testimony. The Department purposefully designed these final regulations to allow recipients to retain flexibility to adopt rules of decorum that prohibit any party advisor or decision-maker from questioning witnesses in an abusive, intimidating, or disrespectful manner.

While the Department understands commenters' concerns that cross-examination has in some situations utilized DARVO strategies, cross-examination does not inherently rely on or necessitate DARVO techniques, and recipients retain discretion to apply rules designed to ensure that cross-examination remains focused on relevant topics conducted in a respectful manner. Recipients are in a better position than the Department to craft rules of decorum best suited to their educational environment. To emphasize that cross-examination must focus only on questions that are relevant to the allegations in dispute, we have revised § 106.45(b)(6)(i) to state that only relevant cross-examination or other questions may be asked of a party or witness, and before a party or witness answers a cross-examination question the decision-maker must determine whether the question is relevant (and explain a decision to exclude a question as not relevant).[1218]

The Department further reiterates that the tool of cross-examination is equally as valuable for complainants as for respondents, because questioning that challenges a respondent's narrative may be as useful for a decision-maker to reach an accurate determination as questioning that challenges a complainant's narrative. The Department agrees with commenters that even so-called ''he said/she said'' cases often involve evidence in addition to the parties' respective narratives, and the § 106.45 grievance process obligates recipients to bear the burden of gathering evidence and to objectively evaluate all relevant evidence, both inculpatory and exculpatory, including the parties' own statements as well as other evidence. The Department disagrees that cross-examination disincentivizes recipients from conducting a full investigation that uncovers all relevant evidence, in part because § 106.45 obligates recipients to gather relevant evidence, and in part because cross-examination occurs at the end of the grievance process such that the parties have already had an opportunity to inspect and review the evidence collected by the recipient.

The Department acknowledges commenters' concerns that under § 106.45(b)(6)(i) cross-examination is conducted by party advisors, and the final regulations do not require a party's advisor of choice to be an attorney, nor may a recipient restrict a party's choice of advisor, resulting in scenarios where a party's advisor may be the party's friend or relative or other person who may not be trained or experienced in conducting cross-examination. Regardless of the identity, status, or profession of a party's advisor of choice, a recipient retains discretion under the final regulations to apply rules at a live hearing that require participants to refrain from engaging in abusive, aggressive behavior. Further, regardless of who serves as a party's advisor, recipients are responsible for ensuring that only relevant cross-examination and other questions are asked, and decision-makers must determine the relevance of each cross-examination question before a party or witness answers. Thus, recipients retain the ability and responsibility to ensure that hearings in a § 106.45 grievance process are in no way ''kangaroo courts'' and instead function as truth-seeking processes.

The Department recognizes that party advisors may be, but are not required to be, attorneys and thus in some proceedings cross-examination on behalf of one or both parties will be conducted by non-lawyers who may be emotionally attached to the party whom they are advising. However, the Department believes that requiring cross-examination to be conducted by party advisors is superior to allowing parties to conduct cross-examination themselves; with respect to complainants and respondents in the context of sexual harassment allegations in an education program or activity, the strictures of the Sixth Amendment do not apply. The Department believes that having advisors as buffers appropriately prevents personal confrontation between the parties while accomplishing the goal of a fair, truth-seeking process. Precisely because a Title IX grievance process is neither a civil nor criminal proceeding in a court of law, the Department clarifies here that conducting cross-examination consists simply of posing questions intended to advance the asking party's perspective with respect to the specific allegations at issue; no legal or other training or expertise can or should be required to ask factual questions in the context of a Title IX grievance process. Thus, the Department disagrees that non-lawyer party advisors will be ''playing attorney.'' The Department notes that a recipient is free to explain to complainants (and respondents) that the recipient is required by these Title IX regulations to provide cross-examination opportunities. The final regulations do not prevent a recipient from adopting rules of decorum for a hearing to ensure respectful questioning, and thus recipients may re-assure parties that the recipient is not throwing a party to the proverbial wolves by conducting a hearing designed to resolve the allegations at issue.

The Department appreciates commenters who described experiences being questioned by party advisors as feeling like the advisor asked questions in a disempowering, blaming, and condescending way; however, the Department notes that such questioning may feel that way to the person being questioned by virtue of the fact that cross-examination is intended to promote the perspective of the opposing party, and this does not necessarily mean that the questioning was irrelevant or abusive. The Department disagrees that allowing questioning to take place through an advisor removes

Proposals, Issues and Challenges, Victoria Univ. of Wellington L. Rev. (July 2, 2012) (forthcoming Victoria University of Wellington Legal Research Paper No. 2/2011).

[1218] We have also revised § 106.45(b)(1)(iii) to specifically require that decision-makers are trained on issues of relevance, including application of the ''rape shield'' protections in § 106.45(b)(6).

accountability students should have for their own actions. Under the final regulations, the parties themselves retain significant control and responsibility for their own decisions; the role of an advisor is to assist and advise the party. The Department does not agree that the final regulations encourage students to blame their advisors for poor conduct during a hearing; the final regulations do not preclude a recipient from enforcing rules of decorum that ensure all participants, including parties and advisors, participate respectfully and non-abusively during a hearing. If a party's advisor of choice refuses to comply with a recipient's rules of decorum (for example, by insisting on yelling at the other party), the recipient may require the party to use a different advisor. Similarly, if an advisor that the recipient provides refuses to comply with a recipient's rules of decorum, the recipient may provide that party with a different advisor to conduct cross-examination on behalf of that party. This incentivizes a party to work with an advisor of choice in a manner that complies with a recipient's rules that govern the conduct of a hearing, and incentivizes recipients to appoint advisors who also will comply with such rules, so that hearings are conducted with respect for all participants.

The Department understands that cross-examination in a Title IX grievance process is not the same as cross-examination in a civil or criminal court, that a § 106.45 grievance process need not be overseen by a judge, and that party advisors need not be attorneys. However, the Department believes that recipients are equipped to oversee and implement a hearing process focused on the relevant facts at issue, including relevant cross-examination questions, without converting classrooms into courtrooms or necessitating that participants be attorneys or judges. To ensure that recipients understand that the individuals serving as a recipient's decision-maker(s) must understand how to conduct a live hearing and how to address relevance issues, we have revised § 106.45(b)(1)(iii) to require decision-makers to receive such training.

The Department agrees with commenters who asserted that postsecondary institutions have already become familiar with the concept of party advisors of choice, that many postsecondary institutions routinely enforce a rule that forbids party advisors from speaking during proceedings (often referred to as a ''potted plant'' rule), and that this practice demonstrates that postsecondary institutions are capable of appropriately controlling party advisors even without the power to hold attorneys in contempt of court. The Department does not believe that determinations about whether certain questions or evidence are relevant or directly related to the allegations at issue requires legal training and that such factual determinations reasonably can be made by layperson recipient officials impartially applying logic and common sense. The Department believes that recipients are capable of, and committed to, controlling a hearing environment to keep the proceeding focused on relevant evidence and ensuring that participants are treated respectfully, such that a recipient's Title IX grievance process will not be ''weaponized'' for or against any party. The Department notes that in criminal proceedings, defendants have a right to self-representation raising the potential for a party to personally conduct cross-examination of witnesses, whereas the final regulations do not grant a right of self-representation and thus avoid the risks of ineffectiveness and trauma for complainants that may arise where a perpetrator personally cross-examines a victim.

The Department acknowledges that even in criminal settings, in-person cross-examination is not always required, and § 106.45(b)(6)(i) has adapted the procedure of cross-examination in a way that avoids importation of criminal law standards, for example by requiring the parties to be in separate rooms (upon either party's request), and disallowing a right of self-representation even if a party would otherwise wish to be self-represented. The Department disagrees, however, that allowing pre-recorded testimony in lieu of answering of questions during a live hearing would sufficiently accomplish the function of cross-examination in the postsecondary context, where the parties' and decision-maker's ability to hear parties' and witness's answers to questions and immediate follow-up questions is the better method of ''airing out'' all viewpoints about the allegations at issue. Pre-recorded testimony does not, for example, allow a party to challenge in real time any inconsistencies and inaccuracies in the other party's testimony by posing follow-up questions.

Changes: None.

Demeanor Evaluation Is Unreliable

Comments: Commenters argued that cross-examination is an opportunity to evaluate the body language and demeanor of a party under questioning for the purpose of assessing credibility [1219] but that while credibility is typically based on a number of factors such as sufficient specific detail, inherent plausibility, internal consistency, corroborative evidence, and demeanor, the most unreliable factor is demeanor. Commenters asserted that research shows how people interpret another person's demeanor is easily misconstrued, what people ''read'' in facial expression and body language is ''highly ambiguous and cannot be interpreted without reference to pre-existing schemas and assumptions,'' [1220] a person's ability to judge truthfulness is not better than 50 percent accuracy, and what people often mistake for signs of deception are often actually indicators of stress-coping mechanisms.[1221] Commenters argued that research shows that cross-examination does not accurately assess credibility or yield accurate testimony, especially for vulnerable witnesses such as sexual abuse victims, individuals with intellectual disabilities, or children, and accuracy of children's testimony may be affected by a child's self-esteem, confidence, and the presence of parents during testimony.[1222] Commenters argued that

Rev. 297, 308 (2005); Jules Epstein, *The Great Engine That Couldn't: Science, Mistaken Identifications, and the Limits of Cross-Examination,* 36 Stetson L. Rev. 3 (2007); Tim Valentine & Katie Maras, *The Effect of Cross-Examination on the Accuracy of Adult Eyewitness Testimony,* 25 Applied Cognitive Psychol. 4 (2011); Jacqueline Wheatcroft & Louise Ellison, *Evidence in Court: Witness Preparation and Cross-Examination Style Effects on Adult Witness Accuracy,* 30 Behavioral Sci. & the L. 6 (2012); Rachel Zajac & Harlene Hayne, *I Don't Think That's What Really Happened: The Effect of Cross-examination on the Accuracy' of Children's Reports,* 9 Journal of Experimental Psychol.: Applied 3 (2003); Fiona Jack & Rachel Zajac, *The Effect of Age and Reminders*

decisions based on observing demeanor could lead to erroneous findings of responsibility when facts do not warrant that outcome, that decision-makers may be more likely to find a respondent responsible after watching an emotional complainant describe an alleged assault, or unfairly view a respondent as not credible just because the respondent seems nervous when the nervousness is due to the serious potential consequences of the hearing. Thus, commenters argued, injecting cross-examination into a Title IX campus adjudication that likely depends on under-trained volunteers to assess credibility, will not improve accuracy of outcomes or increase fairness over the status quo but will make survivors reticent even to report sex discrimination.[1223] Commenters asked what the Department's data-driven basis is for concluding that cross-examination is the most effective procedure for determining truth and credibility. Commenters argued that cross-examination will take an emotional toll on all participants[1224] and that complainants, respondents, and witnesses will all be unwilling to endure it, including because cross-examination could compromise their position in criminal and civil proceedings.

Some commenters argued that cross-examination contemplates a decision-maker observing witnesses to assess credibility based on a witness's demeanor, which increases the danger of racial bias and stereotypes infecting the decision-making process. Commenters argued that Black female students are disadvantaged by cross-examination due to negative, unsupportable stereotypes that Black females are aggressive and sexually promiscuous, and that these students are more likely to be falsely seen as the initiator of sexual harassment or abuse upon cross-examination. Commenters asserted that cross-examination will make male victims scared to report sexual assault perpetrated by a male, for fear of facing a skilled cross-examiner whose aim will be to discredit the male survivor by painting him as an instigator or as having consented to gay sexual activity.

A few commenters argued that cross-examination contradicts the concept of an impartial hearing.

Discussion: The Department agrees with commenters who asserted that cross-examination provides opportunity for a decision-maker to assess credibility based on a number of factors, including evaluation of body language and demeanor, specific details, inherent plausibility, internal consistency, and corroborative evidence. Even if commenters correctly characterize research that casts doubt on the human ability to discern truthfulness by observing body language and demeanor, with respect to determining the credibility of a narrative or statement, as commenters acknowledged, such credibility determinations are not based solely on observing demeanor, but also are based on other factors (*e.g.,* specific details, inherent plausibility, internal consistency, corroborative evidence). Cross-examination brings those important factors to a decision-maker's attention in a way that no other procedural device does; furthermore, while social science research demonstrates the limitations of demeanor as a criterion for judging deception, studies demonstrate that inconsistency is correlated with deception.[1225] Thus, cross-examination remains an important part of truth-seeking in adjudicative proceedings, partly because of the live, in-the-moment nature of the questions and answers, and partly because cross-examination by definition is conducted by someone whose very purpose is to advance one side's perspective. When that happens on behalf of each side, the decision-maker is more likely to see and hear relevant evidence from all viewpoints and have more information with which to reach a determination that better reflects the truth of the allegations.[1226] While commenters contended that some studies cast doubt on the effectiveness of cross-examination in eliciting accurate information, many such studies focus on cross-examination of child victims as

Pol'y, 145, 161 (2017) (''While not all inconsistencies arise from deceit, studies have reliably established a link between consistency in testimony and truth telling. And in general, deceitful witnesses have a harder time maintaining consistency under questioning that builds upon their previous answers.'') (internal citations omitted).

[1226] *Id.* at 158–59 (''Cross-examination highlights the errors of well-intentioned and deceptive witnesses alike. Witnesses can neglect to explain their account fully or make mistakes. When a witness first testifies, her words are 'a selective presentation of aspects of what the witness remembers, organized in a willful or at least a purposeful manner.' Cross-examination breaks down carefully curated narratives: '[it] places in the hands of the cross-examiner some of the means to show the gaps between the truth and the telling of it.' What witnesses think they know may in fact be an illusion constructed by the unholy union between the human's brain fallible nature and outside influences. Probing questioning elicits details that did not appear in the witness's first account. As the witness adds details, his story may change or completely contradict original assertions. Each new detail or differing characterization represents information the fact-finder would not have otherwise received. In so doing, adversarial questioning exposes witness error, or at least the source of possible error. The shortcomings of perception and memory are among the errors that remain hidden without cross-examination. Cross-examination reminds fact-finders that the limitations of perception and memory affect the verisimilitude of all testimony. Without this reminder, fact-finders may place undue weight on witness testimony.'') (internal citations omitted).

opposed to adult victims [1227] and in any event that literature has not persuaded U.S. legal systems to abandon cross-examination, particularly with respect to adults, as the most effective—even if imperfect—tool for pursuing reliable outcomes through exposure of inaccuracy or lack of candor on the part of parties and witnesses.

The Department notes that to the extent that commenters correctly characterize research as indicating that what decision-makers may interpret as signs of deception may in fact be signs of stress, many commenters have pointed out that a grievance process is stressful for both complainants and respondents, and therefore that concern exists for both parties. However, it does not negate the value of cross-examination in bringing to light factors other than demeanor that bear on credibility (such as plausibility and consistency). The final regulations require decision-makers to explain in writing the reasons for determinations regarding responsibility; [1228] if a decision-maker inappropriately applies pre-existing assumptions that amount to bias in the process of evaluating credibility, such bias may provide a basis for a party to appeal.[1229] The Department expects that decision-makers will be well-trained in how to serve impartially, including how to avoid prejudgment of the facts at issue and avoid bias,[1230] and the Department notes that judging credibility is traditionally left in the hands of non-lawyers without specialized training, in the form of jurors who serve as fact-finders in civil and criminal jury trials, because assessing credibility based on factors such as witness demeanor, plausibility, and consistency are functions of common sense rather than legal expertise.

The Department acknowledges that cross-examination may be emotionally difficult for parties and witnesses, especially when the facts at issue concern sensitive, distressing incidents involving sexual conduct. The Department recognizes that not every party or witness will wish to participate, and that recipients have no ability to compel a party or witness to participate. The final regulations protect every individual's right to choose whether to participate by including § 106.71, which expressly forbids retaliating against any person for exercising rights under Title IX including participation or refusal to participate in a Title IX proceeding. Further, § 106.45(b)(6)(i) includes language that directs a decision-maker to reach the determination regarding responsibility based on the evidence remaining even if a party or witness refuses to undergo cross-examination, so that even though the refusing party's statement cannot be considered, the decision-maker may reach a determination based on the remaining evidence so long as no inference is drawn based on the party or witness's absence from the hearing or refusal to answer cross-examination (or other) questions. Thus, even if a party chooses not to appear at the hearing or answer cross-examination questions (whether out of concern about the party's position in a concurrent or potential civil lawsuit or criminal proceeding, or for any other reason), the party's mere absence from the hearing or refusal to answer questions does not affect the determination regarding responsibility in the Title IX grievance process.

The Department acknowledges that in any situation where a complainant has alleged sexual misconduct without the complainant's consent, the possibility exists that the respondent will contend that the sexual conduct was in fact consensual, and that cross-examination in those situations might include questions concerning whether consent was present, resulting in discomfort for complainants in such cases, including for complainants alleging male-on-male sexual violence. However, where a sexual offense turns on the existence of consent and that issue is contested, evidence of consent is relevant and each party's advisor can respectfully ask relevant cross-examination questions about the presence or absence of consent.

The Department disagrees that the cross-examination procedure described in § 106.45(b)(6)(i) contradicts the concept of impartiality of the § 106.45 grievance process. Because these final regulations require each party's advisor, and not the recipient (as the investigator, decision-maker, or other recipient official), to conduct cross-examination, the recipient remains impartial and neutral toward both parties throughout the entirety of the grievance process. By contrast, the parties (through their advisors) are not impartial, are not neutral, and are not objective. Rather, the parties involved in a formal complaint of sexual harassment each have their own viewpoints, beliefs, interests, and desires about the outcome of the grievance process and their participation in the process is for the purpose of furthering their own viewpoints. Cross-examination is conducted by the parties' advisors, who have no obligation to be neutral, while the recipient remains impartial and neutral with respect to both parties by observing the parties' respective advocacy of their own perspectives and interests and reaching a determination regarding responsibility based on objective evaluation of the evidence. Thus, the grievance process remains impartial, even though the parties and their advisors are, by definition, not impartial.

Changes: The final regulations add language to § 106.45(b)(6)(i) stating that if a party or witness does not submit to cross-examination at the hearing, the decision-maker must not rely on any statement of that party or witness in reaching a determination regarding responsibility; provided, however, that the decision-maker cannot draw any inference about the determination regarding responsibility based solely on a party's or witness's absence from the hearing or refusal to answer cross-examination or other questions. The final regulations also add § 106.71 prohibiting retaliation and providing in relevant part that no recipient or other person may intimidate, threaten, coerce, or discriminate against any individual for the purpose of interfering with any right or privilege secured by title IX or part 106 of the Department's regulations, or because the individual has made a report or complaint, testified, assisted, or participated or refused to participate in any manner in an investigation, proceeding, or hearing under this part.

Trauma Responses

Comments: Some commenters argued that cross-examination is inherently unfair for survivors because any adversarial questioning may trigger a trauma response (manifesting as panic attacks, flashbacks, painful memories, dissociation, or even suicidal ideation) and instead survivors must be able to recount their experience in a non-stressful environment where they feel safe, without the stress and pressure of cross-examination that can result in a survivor not being able to give a correct account of what happened or mixing up important facts that can affect the outcome of the case. Commenters argued that trauma shapes memory

[1227] *Id.* at 164–65 (''Experimental studies suggest that cross-examination can mislead witnesses and cause them to change accurate answers to inaccurate answers. Admittedly, there are more studies documenting how cross-examination negatively affects the accuracy of child-victims' testimony, but the literature suggesting similar results for adult victims continues to grow. A number of factors contribute to the likelihood that a witness will revise what was at first accurate testimony. . . . Put simply, in many cases, 'honest witnesses can be misled by cross-examination.' '') (internal citations omitted).

[1228] Section 106.45(b)(7).

[1229] Section 106.45(b)(8).

[1230] Section 106.45(b)(1)(iii).

patterns making details of sexual violence difficult to remember, such that traditional cross-examination may lead to a mistaken conclusion that a trauma victim is lying when in reality the victim is being truthful but is unable to recall or answer questions about events in a detailed, linear, or consistent manner. Commenters argued that cross-examination is designed to point out inconsistencies in a person's testimony often by asking confusing, complex, or leading questions,[1231] and neurobiological effects of trauma affect the brain resulting in fragmented or blocked memories of details of the traumatic event.[1232]

Commenters argued that counterintuitive responses to rape, sexual assault, and other forms of sexual violence are common because trauma impacts the body and brain in ways that impact a person's affect, emotions, behaviors, and memory recall, such that these normal responses to abnormal circumstances can seem perplexing to individuals untrained in sexual violence dynamics and research about the neurobiology of trauma, leading people to unfairly undermine a victim's credibility. Commenters argued that research shows that trauma-informed questioning results in potentially more valuable, reliable information than traditional cross-examination.[1233] Commenters asserted that yelling at someone to recall a specific sequence of events they experienced under traumatic conditions decreases the accuracy of the recall provided.

Commenters asserted that because rape is about power and control, giving a perpetrator more power and control via cross-examination will only intimidate and hurt a victim more.[1234] Commenters argued that while cross-examination is uncomfortable for most people, it can have severe impacts on survivors' mental health [1235] and therefore also on their academic performance. One commenter argued that we would never require our military veterans suffering from PTSD to return from war and sit in a room listening to exploding bombs, so why would we require a rape victim to face interrogation in front of the source of their trauma immediately after the trauma occurred?

Discussion: The Department understands commenters' concerns that survivors of sexual harassment may face trauma-related challenges to answering cross-examination questions about the underlying allegations. The Department is aware that the neurobiology of trauma and the impact of trauma on a survivor's neurobiological functioning is a developing field of study with application to the way in which investigators of sexual violence offenses interact with victims in criminal justice systems and campus sexual misconduct proceedings. Under these final regulations, recipients have discretion to include trauma-informed approaches in the training provided to Title IX Coordinators, investigators, decision-makers, and persons who facilitate informal resolutions so long as the training complies with the requirements of § 106.45(b)(1)(iii) and other requirements in § 106.45, and nothing in the final regulations impedes a recipient's ability to disseminate educational information about trauma to students and employees. As attorneys and consultants with expertise in Title IX grievance proceedings have noted, trauma-informed practices can be implemented as part of an impartial, unbiased system that does not rely on sex stereotypes, but doing so requires taking care not to permit general information about the neurobiology of trauma to lead Title IX personnel to apply generalizations to allegations in specific cases.[1236] Because cross-examination occurs only after the recipient has conducted a thorough investigation, trauma-informed questioning can occur by a recipient's investigator giving the parties opportunity to make statements under trauma-informed approaches prior to being cross-examined by the opposing party's advisor.

With respect to cross-examination, the Department notes that the final regulations do not prevent a recipient from granting breaks during a live hearing to permit a party to recover from a panic attack or flashback, nor do the final regulations require answers to cross-examinations to be in linear or sequential formats. The final regulations do not require that any party, including a complainant, must recall details with certain levels of specificity; rather, a party's answers to cross-examination questions can and should be evaluated by a decision-maker in context, including taking into account that a party may experience stress while trying to answer questions. Because decision-makers must be trained to serve impartially without prejudging the facts at issue, the final regulations protect against a party being unfairly judged due to inability to recount each specific detail of an incident in sequence, whether such inability is due to trauma, the effects of drugs or alcohol, or simple fallibility of human memory. We have also revised § 106.45(b)(6)(i) in a manner that builds in a ''pause'' to the cross-examination process; before a party or witness answers a cross-examination question, the decision-maker must determine if the question is relevant. This helps ensure that content of cross-examination remains focused

How Rape Victims Experience the UK Legal System,* 4 Victims & Offenders 3 (2009); Mark Littleton, ''Sexual Harassment of Students by Faculty Members,'' *in Encyclopedia of Law and Higher Education* 411–12 (Charles J. Russo ed., 2010).

[1236] *See, e.g.,* Jeffrey J. Nolan, *Fair, Equitable Trauma-Informed Investigation Training* (Holland & Knight updated July 19, 2019) (white paper summarizing trauma-informed approaches to sexual misconduct investigations, identifying scientific and media support and opposition to such approaches, and cautioning institutions to apply trauma-informed approaches carefully to ensure impartial investigations); ''Recommendations of the Post-SB 169 Working Group,'' 3 (Nov. 14, 2018) (report by a task force convened by former Governor of California Jerry Brown to make recommendations about how California institutions of higher education should address allegations of sexual misconduct) (trauma-informed ''approaches have different meanings in different contexts. Trauma-informed training should be provided to investigators so they can avoid re-traumatizing complainants during the investigation. This is distinct from a trauma-informed approach to evaluating the testimony of parties or witnesses. The use of trauma-informed approaches to evaluating evidence can lead adjudicators to overlook significant inconsistencies on the part of complainants in a manner that is incompatible with due process protections for the respondent. Investigators and adjudicators should consider and balance noteworthy inconsistencies (rather than ignoring them altogether) and must use approaches to trauma and memory that are well grounded in current scientific findings.''). Because of the lack of a singular definition of ''trauma-informed'' approaches, and the variety of contexts that such approaches might be applied, the Department does not mandate ''trauma-informed'' approaches but recipients have flexibility to employ trauma-informed approaches so long as the recipient also complies with all requirements in these final regulations.

only on relevant questions and that the pace of cross-examination does not place undue pressure on a party or witness to answer immediately.

The Department reiterates that recipients retain the discretion to control the live hearing environment to ensure that no party is ''yelled'' at or asked questions in an abusive or intimidating manner. The Department further reiterates that cross-examination is as valuable a tool for complainants to challenge a respondent's version of events as it is for a respondent to challenge a complainant's narrative. Because cross-examination is conducted only through party advisors, we believe that the cross-examination procedure helps to equalize power and control, because both parties have equal opportunity to ask questions that advocate the party's own perspectives and beliefs about the underlying incident regardless of any power, control, or authority differential that exists between the parties.

The Department agrees that cross-examination is likely an uncomfortable experience for most people, including complainants and respondents; numerous commenters have informed the Department that navigating a grievance process as a complainant or as a respondent has caused individuals to feel stressed, have difficulty focusing on academic performance, and feel anxious and depressed. The final regulations offer both parties protection against feeling forced to participate in a grievance process and equal procedural protections when an individual does participate. To that end, the final regulations require recipients to offer complainants supportive measures regardless of whether a formal complaint is filed [1237] (and encourage supportive measures for respondents as well),[1238] and where a party does participate in a grievance process the party has the right to an advisor of choice.[1239] Additionally, the final regulations add § 106.71 prohibiting retaliation and specifically protecting an individual's right to participate or not participate in a grievance process.

The Department appreciates a commenter's analogy to a military veteran experiencing PTSD; however, the we believe that § 106.45(b)(6)(i) anticipates the potential for re-traumatization of sexual assault victims and mitigates such an effect by ensuring that a complainant (or respondent) can request being in separate rooms for the entire live hearing (including during cross-examination) so that the parties never have to face each other in person, by leaving recipients flexibility to design rules (applied equally to both parties) that ensure that no party is questioned in an abusive or intimidating manner, and by requiring the decision-maker to determine the relevance of each cross-examination question before a party or witness answers. Further, the Department notes that there is no statute of limitations setting a time frame for filing a formal complaint,[1240] and that completing the investigation under § 106.45 requires a reasonable amount of time (for example, the parties must be given an initial written notice of the allegations, the recipient must gather evidence, give the parties ten days to review the evidence, prepare an investigative report, and give the parties ten days to review the investigative report),[1241] and therefore it is unlikely that a complainant would ever be required to ''immediately'' undergo cross-examination following a sexual assault covered by Title IX.

Changes: None.

Reliance on Rape Myths

Comments: Many commenters cited an article [1242] by Sarah Zydervelt *et al.,* (herein, ''Zydervelt 2016'') describing cross-examination of rape victims as often involving detailed, personal, humiliating questions rooted in sex stereotypes and rape myths that tend to blame victims for incidents of sexual violence.[1243] Commenters argued that because cross-examination relies on rape myths, requiring cross-examination contradicts § 106.45(b)(1)(iii) which forbids training materials for Title IX personnel from relying on sex stereotypes.

Commenters argued that the Department's insistence on cross-examination for rape victims when victims of non-sexual crimes do not have to undergo cross-examination demonstrates ''rape exceptionalism,'' an unfounded notion that sexual assault and rape are different kinds of cases because rape victims lie more than victims of other crimes.[1244]

Discussion: The study cited most often by commenters for the proposition that cross-examination relies on questions rooted in sex stereotypes and rape myths, Zydervelt 2016, is a research study in which the authors compared strategies and tactics employed by defense attorneys in criminal trials in Australia and New Zealand during two time periods (from 1950–1959, and from 1996–2011) to analyze whether the strategies and tactics differed in those time periods (the earlier time period representing pre-legal reforms in the area of rape law, and the later time period representing contemporary legal reforms such as defining rape to include marital rape, eliminating the requirement of corroborating evidence and the requirement that the victim showed physical resistance to the sexual attack, and imposing rape shield protections limiting questions about a victim's sexual history and sexual behavior).[1245] Zydervelt 2016 identified four strategies employed by defense attorneys to challenge a rape victim's testimony:

[1237] Section 106.44(a).

[1238] Section 106.30 (defining ''supportive measures'' and expressly indicating that such individualized services may be provided to complainants or respondents); § 106.45(b)(1)(ix) (requiring a recipient's grievance process to describe the range of supportive measures available to complainants and to respondents).

[1239] Section 106.45(b)(5)(iv).

[1240] Section 106.30 (defining ''formal complaint'' and providing that a complainant must be ''participating or attempting to participate'' in the recipient's education program or activity at the time of filing a formal complaint). Even a complainant who has graduated may, for instance, be ''attempting to participate'' in the recipient's education program or activity by, for example, desiring to apply to a graduate program with the recipient, or desiring to remain involved alumni events and organizations.

[1241] *E.g.,* § 106.45(b)(2); § 106.45(b)(5)(i); § 106.45(b)(5)(vi); § 106.45(b)(5)(vii).

[1242] Commenters cited: Sarah Zydervelt, *et al., Lawyers' Strategies for Cross-examining Rape Complainants: Have we Moved Beyond the 1950s?,* 57 British J. of Criminology 3 (2016); Olivia Smith & Tina Skinner, *How Rape Myths Are Used and Challenged in Rape and Sexual Assault Trials,* 26 Social & Legal Studies 4 (2017).

[1243] Many commenters cited to information regarding negative impacts of sexual harassment and harmful effects of institutional betrayal, such as the data noted in the ''Impact Data'' and ''Commonly Cited Sources'' subsections of the ''General Support and Opposition'' section of this preamble, in support of arguments that cross-examination will further reduce rates of reporting.

[1244] Commenters cited: Naomi Mann, *Taming Title IX Tensions,* 20 Univ. Pa. J. of Constitutional L. 631, 666 (2018); Michelle Anderson, *Campus Sexual Assault Adjudication and Resistance to Reform,* 125 Yale L. J. 1940, 2000 (2016) (Title IX is a civil rights mechanism about institutional accountability for providing equal education); *id.* at 1943, 1946–50 (the tendency to treat rape victims as distinct from other crime victims has roots in criminal justice and civil litigation where rules have required victim testimony to be corroborated and victims have carried extra burdens to show they resisted rape); *cf.* Donald Dripps, *After Rape Law: Will the Turn to Consent Normalize the Prosecution of Sexual Assault?,* 41 Akron L. Rev. 957, 957 (2008) (''Rape is an exceptional area of law.'').

Page numbers referenced in this section are to the version of this article located at: *https://www.researchgate.net/profile/Sarah_Zydervelt/publication/295084744_Lawyers%27_Strategies_for_Cross-Examining_Rape_Complainants_Have_we_Moved_Beyond_the_1950s/links/56f35e4208ae95e8b6cb4ceb/Lawyers-Strategies-for-Cross-Examining-Rape-Complainants-Have-we-Moved-Beyond-the-1950s.pdf?origin=publication_detail,* pp. 1–19.

Questions designed to challenge plausibility, consistency, credibility, and reliability. Zydervelt 2016 further identified tactics used to further each of those four strategies;[1246] for example, the most common strategy identified in the study was challenging plausibility, and the most common tactic used in that strategy involved questions about the complainant's behavior immediately before or after the alleged attack.[1247]

Zydervelt 2016 defined ''rape myths'' as ''beliefs about rape that serve to deny, downplay or justify sexually aggressive behavior that men commit against women'' which ''can be descriptive, reflecting how people believe instances of sexual assault typically unfold, or they can be prescriptive, reflecting beliefs about how a victim of sexual assault should react'' and further identified common rape myths as ''the belief that victims invite sexual assault by the way that they dress, their consumption of alcohol, their sexual history or their association with males with whom they are not in a relationship; the belief that many women make false allegations of rape; the belief that genuine assault would be reported to authorities immediately; and the belief that victims would fight back—and therefore sustain injury or damage to clothing—during an assault.'' [1248] Zydervelt 2016 concluded that historically and contemporarily, defense attorneys employ similar strategies and tactics when cross-examining rape victims in criminal trials, and that rape victims still report cross-examination as a distressing and demeaning experience.[1249] Zydervelt 2016 concluded that leveraging rape myths was a common tactic when cross-examining rape victims,[1250] for example, asking questions suggesting that willingly accompanying a defendant alone to a room implied consent to a sexual act, or that a ''real'' victim would not have returned to a party with a defendant if they had just been sexually assaulted.

The authors of Zydervelt 2016 opined in conclusion that the extent to which misconceptions about rape shape cross-examination questions in rape cases likely reflects the extent to which society adheres to particular beliefs about rape.[1251] The study's authors also noted that more research is required to assist policy makers to make informed decisions about how best to address these issues,[1252] and further surmised that because the strategies and tactics used in cross-examination during rape cases remained similar over time, investigators, prosecutors, and advocates could preemptively assist rape victims who need to testify by better preparing the victim to anticipate the kinds of questions that commonly arise during rape cross-examinations.[1253]

The Department understands commenters' concerns that Zydervelt 2016 indicates that misconceptions about rape and sexual assault victims permeate cross-examination strategies and tactics in the criminal justice system. However, this study indicates that to the extent that misconceptions or negative stereotypes about sexual assault affect cross-examination in rape cases, the problem lies with societal beliefs about sexual assault and not with cross-examination as a tool for resolving competing narratives in sexual assault cases. The final regulations require recipients to ensure that decision-makers are well-trained in conducting a grievance process and serving impartially, using materials that avoid sex stereotypes, and specifically on issues of relevance including application of the rape shield protections in § 106.45(b)(6). Further, as noted above, nothing in the final regulations precludes a recipient from including in that training information about the impact of trauma on victims or other aspects of sexual violence dynamics, so long as any such training promotes impartiality and avoidance of prejudgment of the facts at issue, bias, conflicts of interest, and sex stereotypes. Thus, unlike a civil or criminal court system, where jurors who act as fact-finders are not trained, the § 106.45 grievance process requires recipients to use decision-makers who have been trained to avoid bias and sex stereotypes and to focus proceedings on relevant questions and evidence, such that even if a cross-examination question impermissibly relies on bias or sex stereotypes while attempting to challenge a party's plausibility, credibility, reliability, or consistency, it is the trained decision-maker, and not the party advisor asking a question, who determines whether the question is relevant and if it is relevant, then evaluates the question and any resulting testimony in order to reach a determination regarding responsibility. For the same reasons, the Department disagrees that cross-examination violates or contradicts § 106.45(b)(1)(iii), which forbids training materials for Title IX personnel from relying on sex stereotypes; the latter provision serves precisely to ensure that decision-makers do *not* allow sex stereotypes to influence the decision-maker's determination regarding responsibility.

The Department disagrees that the § 106.45 grievance process, including cross-examination at live hearings in postsecondary institutions, reflects adherence to rape exceptionalism or any belief that women (or complainants generally) tend to lie about rape more than other offenses. The Department believes that cross-examination as a tool for testing competing narratives serves an important truth-seeking function in a variety of types of misconduct allegations; these final regulations focus on the procedures designed to prescribe a consistent framework for recipients' handling of formal complaints of sexual harassment so that a determination is likely to be accurate in each particular case, regardless of how infrequently false allegations are made. The Department reiterates that cross-examination provides complainants with the same opportunity through an advisor to question and expose inconsistencies in the respondent's testimony and to reveal any ulterior motives. In this manner, cross-examination levels the playing field by giving a complainant as much procedural control as a respondent, regardless of the fact that exertion of

[1246] *Id.* at 8–10. For the strategy of challenging plausibility, the study identified the following tactics used by defense attorneys during cross-examination questions: Defendant's good character; lack of injury or clothing damage; complainant's behavior immediately before and after offense; lack of resistance; delayed report; continued relationship. For the strategy of challenging credibility, the study identified the following tactics used by defense attorneys during cross-examination questions: Prior relationship with the defendant; sexual history; personal traits; previous sexual assault complaint; ulterior motive. For the strategy of challenging reliability, the study identified the following tactics used by defense attorneys during cross-examination questions: Alcohol/drug intoxication; barriers to perception; memory fallibility. For the strategy of challenging consistency, the study identified the following tactics used by defense attorneys during cross-examination questions: Inconsistency with complainant's own account, with defendant's account, with another witness's account, and with physical evidence.

power and control is often a dynamic present in perpetration of sexual assault.

Changes: None.

Cross-Examination as a Due Process Requirement

Comments: Commenters argued that cross-examination is not necessary because neither the Constitution, nor other Federal law, requires cross-examination in school conduct proceedings.[1254] Commenters characterized recent Sixth Circuit cases, holding that cross-examination must be provided, as anomalous rather than indicative of a judicial trend favoring live cross-examination in college disciplinary proceedings.[1255] Commenters asserted that the Department's cross-examination requirement does not contain the limitations that the Sixth Circuit delineated in *Baum*; namely, that cross-examination is required only for public colleges, in situations where credibility is in dispute and material to the outcome, where potential sanctions are suspension or expulsion, and where the burden on the university is minimal because the university already holds hearings for some types of misconduct.

Commenters argued that Federal case law shows a split in how courts view cross-examination in college disciplinary proceedings with the weight of Federal case law favoring significant limits on cross-examination by requiring, at most, questioning through a panel or submission of written questions rather than traditional, adversarial cross-examination, for both public and private institutions.[1256] Commenters argued that colleges and universities should not be required to ignore judicial precedent simply because the Department currently finds a recent two-to-one decision from the Sixth Circuit (*i.e., Baum*) more persuasive than the many other Federal court decisions that do not require live cross-examination as part of constitutional due process or fundamental fairness, and that principles of federalism, administrative law, and general rule of law demand that the Department refrain from overreaching by imposing this requirement.

Several commenters argued that regardless of how cross-examination is viewed under a constitutional right to due process, private colleges and universities owe contractual obligations to their students and employees, not constitutional ones, and requiring live hearings and cross-examination marks a substantial governmental intrusion into the relationship between private institutions and their students. Several commenters asserted that private institutions should remain free to craft their own adjudication rules so long as such rules are fair and equitable.

Commenters argued that unless lawmakers specifically direct universities to grant cross-examination rights, or the right to counsel, in civil or administrative hearings,[1257] such elevated procedures cannot be expected of universities.

Commenters argued that cross-examination by skilled defense counsel is the most aggressive means of testing a witness's credibility and, by requiring this, the proposed rules seem based on a premise that a complainant's credibility is highly suspect. Commenters asserted that because a university Title IX grievance process is neither a civil lawsuit (where a plaintiff seeks money damages against the defendant) or a criminal trial (where a criminal defendant faces loss of liberty), the highest degree of credibility-testing is neither necessary nor reasonable. Commenters argued that State laws restricting Sixth Amendment rights to confront accusers can be constitutionally permissible due to policy concerns for protecting sexual assault victims from suffering further psychological harms,[1258] and thus similar or greater restrictions can be part of a noncriminal proceeding like a Title IX process.

Commenters argued that fairness, including testing credibility, can be fully achieved without live, adversarial cross-examination, through questioning by a neutral college administrator,[1259] referred to by some commenters as ''indirect cross-examination.'' Commenters similarly argued that allowing parties to submit questions to be asked by a hearing officer or panel is sufficiently reliable without causing trauma to any involved party,[1260] a practice commenters asserted should be adopted from the withdrawn 2011 Dear Colleague Letter. Commenters asserted that this method allows the parties and decision-maker to hear parties and witnesses answer questions in ''real time'' but without the adversarial purpose and tone of cross-examination.

[1260] Commenters cited: The Association of Title IX Administrators (ATIXA), *The 7 Deadly Sins of Title IX Investigations: The 2016 White Paper* (2016).

Commenters asserted a similar version of this practice, used by Harvard Law School and endorsed by the American Bar Association Criminal Justice Section, and by the University of California Post SB 169 Working Group, should be called ''submitted questions'' instead of ''cross-examination'' and would invite both parties to submit questions to the presiding decision-maker who must then ask all the questions unless the questions are irrelevant, excluded by a rule clearly adopted in advance, harassing, or duplicative.

Commenters argued that indirect cross-examination, or submitted questions, is sufficient to meet constitutional due process requirements under the Supreme Court's *Mathews* v. *Eldridge* balancing test [1261] and avoids risks inherent to cross-examination in an educational rather than courtroom setting, namely, that outside a courtroom lawyers or other advisors could engage in hurtful, harmful techniques that may impede educational access for the parties. Commenters argued that a trained fact-finder listening to party advisors ask questions and introduce evidence is a reactionary approach and a proactive approach is preferable, whereby the trained decision-maker elicits appropriate, relevant information from the parties and witnesses. Commenters argued that most postsecondary institutions currently use a trauma-informed method of questioning such as indirect cross-examination or submitted questions,[1262] and that such practices have been upheld by nearly all Federal court decisions considering them.

Commenters argued that because credibility is determined by the decision-maker, and not by parties or witnesses, there should be no right for parties to directly question the other party or witnesses. Commenters stated that if the Department's assumption that live cross-examination is better than submission of questions through a neutral hearing officer rests on concern that the hearing officer might unfairly refuse to ask a party's questions, the proposed rules address that concern by requiring the decision-maker to explain the reasons for exclusion of any questions, so live cross-examination is not a necessity on that basis. One commenter argued that although cross-examination may be the greatest legal engine ever invented for discovery of truth, engines come in different shapes and sizes for a reason, and the effective, appropriate version of the engine of cross-examination in the Title IX context is questioning by neutral hearing officers.

Some commenters proposed that the decision-maker act as a liaison between the parties, such that each party's advisor would ask a question one at a time, live and in full hearing of the other party, and the decision-maker would then decide whether the other party should or should not answer the question; commenters asserted that this version of live cross-examination would better filter out abusive, irrelevant questions while preserving the opportunity of party advisors to ask the cross-examination questions. Commenters argued that some States such as New York have better embodied the settled state of the law by requiring a fair campus adjudicatory process that does not include cross-examination. Commenters asserted that the final regulations should follow the process used by the U.S. Senate during the confirmation hearings for the Honorable Brett Kavanaugh, Associate Justice, Supreme Court of the United States, which process was described by commenters as disallowing any interaction between the accuser and accused, while conducting questioning of each party separately by the Senators and a designated neutral questioner.

Discussion: The Department acknowledges that the Supreme Court has not ruled on what procedures satisfy due process of law under the U.S. Constitution in the specific context of a Title IX sexual harassment grievance process held by a postsecondary institution, and that Federal appellate courts that have considered this particular issue in recent years have taken different approaches. The Department, as an agency of the Federal government, is subject to the U.S. Constitution, including the Fifth Amendment, and cannot interpret Title IX to compel a recipient, whether public or private, to deprive a person of due process rights.[1263] Procedural due process requires, at a minimum, notice and a meaningful opportunity to be heard.[1264] Due process '''is flexible and calls for such procedural protections as the particular situation demands.' '' [1265] ''The fundamental requirement of due process is the opportunity to be heard 'at a meaningful time and in a meaningful manner.' '' [1266]

The Department has determined that the procedures contained in § 106.45 of these final regulations best achieve the purposes of (1) effectuating Title IX's non-discrimination mandate by ensuring fair, reliable outcomes viewed as legitimate in resolution of formal complaints of sexual harassment so that victims receive remedies, (2) reducing and preventing sex bias from affecting outcomes, and (3) ensuring that Title IX regulations are consistent with constitutional due process and fundamental fairness. The procedures in § 106.45 are consistent with constitutional requirements and best serve the foregoing purposes, including the right for both parties to meaningfully be heard by advocating for their own narratives regarding the allegations in a formal complaint of sexual harassment. In recognition that what is a meaningful opportunity to be heard may depend on particular circumstances, the final regulations apply different procedures in different contexts; for example, where an emergency situation presents a threat to physical health or safety, § 106.44(c) permits emergency removal with an opportunity to be heard that occurs after removal. Where a grievance process is initiated to adjudicate the respondent's responsibility for sexual harassment, a live hearing with cross-examination is required in the postsecondary context but not in elementary and secondary schools. These differences appropriately acknowledge that different types of process may be required in different circumstances while prescribing a consistent framework in similar circumstances so that Title IX as a Federal civil rights law protects every person in an education program or activity.

As commenters supportive of cross-examination pointed out, and as commenters opposed to cross-examination acknowledge, the Sixth

Circuit has held that cross-examination, at least conducted through a party's advisor, is necessary to satisfy due process in sexual misconduct cases that turn on party credibility. ''Due process requires cross-examination in circumstances like these because it is the greatest legal engine ever invented for uncovering the truth.'' [1267] The Sixth Circuit reasoned, ''Cross-examination is essential in cases like Doe's because it does *more* than uncover inconsistencies—it takes aim at credibility like no other procedural device.'' [1268] The Sixth Circuit in *Baum* disagreed with the institution's argument that written statements could substitute for cross-examination, explaining that ''[w]ithout the back-and-forth of adversarial questioning, the accused cannot probe the witness's story to test her memory, intelligence, or potential ulterior motives. . . . Nor can the fact-finder observe the witness's demeanor under that questioning. . . . For that reason, written statements cannot substitute for cross-examination. . . . Instead, the university must allow for some form of *live* questioning *in front of* the fact-finder,'' though this requirement can be facilitated through modern technology, for example by allowing a witness to be questioned via Skype.[1269] The Sixth Circuit carefully distinguished this cross-examination requirement from the Sixth Amendment right of a criminal defendant to confront witnesses, reasoning that administrative proceedings need not contain the same protections accorded to the accused in criminal proceedings.[1270] The Sixth Circuit further reasoned that ''[u]niversities have a legitimate interest in avoiding procedures that may subject an alleged victim to further harm or harassment . . . [but] the answer is not to deny cross-examination altogether. Instead, the university could allow the accused student's agent to conduct cross-examination on his behalf. After all, an individual aligned with the accused student can accomplish the benefits of cross-examination—its adversarial nature and the opportunity for follow-up—without subjecting the accuser to the emotional trauma of directly confronting her alleged attacker.'' [1271]

The Department agrees with the Sixth Circuit's reasoning that a Title IX grievance process should strike an appropriate balance between avoiding retraumatizing procedures, and ensuring both parties have the right to question each other in a manner that captures the real-time, adversarial benefits of cross-examination to a truth-seeking process. Section 106.45(b)(6)(i) follows the Sixth Circuit's reasoning by requiring recipients to give both parties opportunity for cross-examination, allowing either party to request that cross-examination (and the entire live hearing) be conducted with the parties in separate rooms, ensuring that only party advisors conduct cross-examination and expressly forbidding personal confrontation between parties, and requiring the decision-maker to determine the relevance of a cross-examination question before a party or witness answers.

Commenters correctly note that the Sixth Circuit's rationale in *Baum* rested on certain limitations or circumstances that justified requiring cross-examination: The *Baum* opinion was in the context of a public university that owes constitutional due process of law to students and employees; cross-examination is of greatest benefit where a sexual misconduct case turns on credibility and involves serious consequences; and a university that already provided hearings for other types of misconduct could not argue that it faced more than a minimal burden to provide a live hearing for sexual misconduct cases. As explained in the ''Role of Due Process in the Grievance Process'' section of this preamble, the Department understands that some recipients are public institutions that owe constitutional protections to students and employees while other recipients are private institutions that do not owe constitutional protections. However, consistent application of a grievance process to accurately resolve allegations of sexual harassment under Title IX is as important in private institutions as public ones, and the Department therefore adopts a § 106.45 grievance process that results in fair, reliable outcomes in all postsecondary institutions with procedures that, while likely to satisfy constitutional due process requirements, remain independent of constitutional requirements.

The Department notes that while commenters are correct that not every formal complaint of sexual harassment subject to § 106.45 turns on party or witness credibility, other commenters noted that most of these complaints do involve plausible, competing narratives of the alleged incident, making party participation in the process vital for a thorough evaluation of the available, relevant evidence.[1272] The final regulations revise § 106.45(b)(6)(i) to clarify that where a party or witness does not appear at a live hearing or refuses to answer cross-examination questions, the decision-maker must disregard statements of that party or witness but must reach a determination without drawing any inferences about the determination regarding responsibility based on the party or witness's failure or refusal to appear or answer questions. Thus, for example, where a complainant refuses to answer cross-examination questions but video evidence exists showing the underlying incident, a decision-maker may still consider the available evidence and make a determination. The Department thus disagrees with commenters who argued that the proposed rules force a party to undergo cross-examination even where the case does not turn on credibility; if the case does not depend on party's or witness's statements but rather on other evidence (*e.g.,* video evidence that does not consist of ''statements'' or to the extent that the video contains non-statement evidence) the decision-maker can still consider that other evidence and reach a determination, and must do so without drawing any inference about the determination based on lack of party or witness testimony. This result thus comports with the Sixth Circuit's rationale in *Baum* that cross-examination is most needed in cases that involve the need to evaluate credibility of parties as opposed to evaluation of non-statement evidence.[1273] Furthermore,

[1270] *See id.* at 583.

[1271] *Id.*

[1272] *See* H. Hunter Bruton, *Cross-Examination, College Sexual-Assault Adjudications, and the Opportunity for Tuning up the Greatest Legal Engine Ever Invented,* 27 Cornell J. of L. & Pub. Pol'y, 145, 180–81 (2017) (''Participation in these cases becomes all the more necessary because the hearing's resolution often depends on weighing the victim's credibility against the accused's credibility. In the vast majority of cases, no one else witnesses the act and no other evidence exists.'') (internal citations omitted).

[1273] *See Baum,* 903 F.3d at 583–84 (despite the university's contention that prior Sixth Circuit precedent, in *Univ. of Cincinnati,* 872 F.3d at 395, 402, meant that a respondent is not entitled to cross-examination where the university's decision did not depend *entirely* on a credibility contest between Roe and Doe, the *Baum* Court clarified that *University of Cincinnati* merely held that cross-examination was unnecessary when the university's decision did not rely on *any testimonial evidence at all* but that case, and Baum, stand for the

§ 106.45(b)(9) permits recipients to facilitate informal resolution processes (thus avoiding the need to hold a live hearing with cross-examination), which may be particularly desirable by the parties and the recipient in situations where the facts about the underlying incident are not contested by the parties and thus resolution does not turn on resolving competing factual narratives.

With respect to the other limitations commenters asserted that the Sixth Circuit noted in its rationale requiring cross-examination (*i.e.,* that it is a procedure justified where serious consequences such as suspension or expulsion are at issue, and where the burden on a university is minimal), the Department notes that the *Baum* Court did not rest its rationale on situations where only suspension or expulsion was at issue, but rather the Sixth Circuit observed that ''[b]eing labeled a sex offender by a university has both an immediate and lasting impact on a student's life'' whereby the student ''may be forced to withdraw from his classes and move out of his university housing. His personal relationships might suffer. . . . And he could face difficulty obtaining educational and employment opportunities down the road, *especially if he is expelled*.'' [1274] The Sixth Circuit thus recognized the high stakes involved with sexual misconduct allegations regardless of whether the sanction is expulsion. Further, the Department doubts that recipients are likely to determine that the type of conduct captured under the § 106.30 definition of sexual harassment would not potentially warrant suspension or expulsion. Additionally, the final regulations revise § 106.45(b)(6)(i) to permit a recipient to hold live hearings virtually, using technology, to ameliorate the administrative burden on colleges and universities that do not already conduct hearings for any type of misconduct allegation.

The Department is aware that after the public comment period on the NPRM closed, the First Circuit decided a Title IX sexual misconduct case in which the First Circuit disagreed with the Sixth Circuit's holding regarding cross-examination.[1275] In *Haidak,* the First Circuit held that a university could satisfy due process requirements by using an inquisitorial rather than adversarial method of cross-examination, by having a neutral school official pose probing questions of parties and witnesses in real-time, designed to ferret out the truth about the allegations at issue.[1276] The First Circuit reasoned that ''[c]onsiderable anecdotal experience suggests that cross-examination in the hands of an experienced trial lawyer is an effective tool'' but cross-examination performed by the respondent personally might devolve into ''acrimony'' rather than a truth-seeking tool that reduces the risk of erroneous outcomes, while cross-examination conducted by lawyers risks university proceedings mimicking court trials.[1277] Also after the public comment period on the NPRM closed, the First Circuit decided a case [1278] under Massachusetts State law involving discipline of a student by a private college for sexual misconduct, in which the student argued that failure of the recipient to provide any form of ''real-time'' cross-examination violated the recipient's contractual obligation of ''basic fairness'' but the First Circuit held that the private college owed no constitutional due process to the student and that State law did not require any form of real-time cross-examination as part of contractual basic fairness.[1279] As noted elsewhere throughout this preamble, while private colleges do not owe constitutional protections to students or employees, the Department is obligated to interpret Title IX consistent with constitutional guarantees, including the Fifth and Fourteenth Amendment guarantees of due process of law, and the Department believes that § 106.45(b)(6)(i) comports with constitutional due process and notions of fundamental fairness while effectuating the non-discrimination mandate of Title IX, even if State laws or a recipient's contract with its students would not impose the same requirements on private colleges.

The Department understands the concerns expressed by commenters, and echoed in the reasoning of the First Circuit in *Haidak,* that cross-examination conducted personally by students may not effectively contribute to the truth-seeking purpose of a live hearing. Thus, the Department has crafted § 106.45(b)(6)(i) to require postsecondary institution recipients to provide parties with an advisor for the purpose of conducting cross-examination, if a party does not have an advisor of choice at the hearing. This provision avoids the possibility of self-representation where a party personally conducts cross-examination of the opposing party and witnesses, and as commenters supporting cross-examination pointed out, this provision ensures that advisors conducting cross-examination will be either professionals (*e.g.,* attorneys or experienced advocates) or at least adults capable of understanding the purpose and scope of cross-examination. Although no Federal circuit court has interpreted constitutional due process to require recipients to provide counsel to parties in a disciplinary proceeding, the Department has the authority to effectuate the purposes of Title IX by prescribing administrative requirements even when those requirements do not purport to represent a definition of discrimination under the Title IX statute. The Department has determined that requiring postsecondary institutions to provide advisors to parties for the purpose of conducting cross-examination best serves Title IX's non-discrimination mandate by ensuring that adversarial cross-examination occurs, thereby ferreting out the truth of sexual harassment allegations, while protecting sexual harassment victims from personal confrontation with a perpetrator. At the same time, these final regulations expressly state that no party's advisor of choice, and no advisor provided to a party by a recipient, needs to be an attorney, furthering the Department's intent that the § 106.45 grievance process is suitable for implementation in an educational institution without trying to mimic a court trial.

The Department agrees with commenters that Federal case law is split on the specific issue of whether constitutional due process, or basic fairness under a contract theory between a private college and student, requires live cross-examination in sexual misconduct proceedings. The Department disagrees that § 106.45(b)(6)(i) represents overreach, violations of federalism, administrative law, or rule of law, and contends instead that the final regulations prescribe a grievance process carefully tailored to be no more prescriptive than necessary to (1) be consistent with constitutional due process and fundamental fairness, even if § 106.45 includes procedures that exceed

---

proposition that if ''credibility is in dispute and material to the outcome, due process requires cross-examination.''); § 106.45(b)(6)(i) is consistent with this *Baum* holding inasmuch as the provision bars reliance on statements from witnesses who do not submit to cross-examination, leaving a decision-maker able to consider non-statement evidence that may exist in a particular case.

minimal guarantees, and (2) address the challenges inherent in resolving sexual harassment allegations so that recipients are effectively held responsible for redressing sex discrimination in the form of sexual harassment in recipients' education programs or activities. As noted elsewhere in this preamble, when a recipient draws conclusions about whether sexual harassment occurred in its education program or activity, the recipient is not merely making an internal, private decision about its own affairs; rather, the recipient is making determinations that implicate the recipient's obligation to comply with a Federal civil rights law that requires a recipient to operate education programs or activities free from sex discrimination. The Department therefore has regulatory authority to prescribe a framework for consistent, reliable determinations regarding responsibility for sexual harassment under Title IX.

The Department appreciates that some State laws already require universities to grant cross-examination rights in administrative hearings that apply to students or employees, but the Department disagrees that a university may be required to utilize the cross-examination procedure only if a State law has specifically directed that result. The fact that some States already require public universities to allow cross-examination demonstrates that the concept is familiar to many recipients. The Department is regulating only as far as necessary to enforce the Federal civil rights law at issue; the final regulations govern only student and employee misconduct that constitutes sex discrimination in the form of sexual harassment under Title IX, and does not purport to require postsecondary institutions to utilize cross-examination in non-Title IX matters. The procedures in § 106.45 are consistent with constitutional requirements and best further the purposes of Title IX, including the right for both parties to meaningfully be heard by advocating for the party's own narratives regarding the allegations in a formal complaint of sexual harassment.

A cross-examination procedure does not imply that the credibility of sexual assault complainants is particularly suspect; rather, wherever allegations of serious misconduct involve contested facts, cross-examination is one of the time-tested procedural devices recognized throughout the U.S. legal system as effective in reaching accurate determinations resolving competing versions of events. The Department notes that § 106.45(b)(6)(i) grants the right of cross-examination equally to complainants and respondents, and cross-examination is as useful and powerful a truth-seeking tool for a complainant's benefit as for a respondent, so that a complainant may direct the decision-maker's attention to implausibility, inconsistency, unreliability, ulterior motives, and lack of credibility in the respondent's statements. While the purpose of the Sixth Amendment's right to confront accusers via cross-examination in a criminal proceeding may be to protect the criminal defendant from deprivation of liberty unless guilt is certain beyond a reasonable doubt,[1280] the Department recognizes, and the final regulations reflect, that the purpose of a Title IX grievance process differs from that of a criminal proceeding. Under § 106.45, cross-examination is not for the protection only of respondents, but is rather a device for the benefit of the recipient and both parties, by assisting the decision-maker in reaching a factually accurate determination regarding responsibility so that deprivations of a Federal civil right may be appropriately remedied.

The Department disagrees with commenters who argued that indirect cross-examination conducted by a neutral college administrator, or a submitted questions procedure, which is permissible for elementary and secondary schools under these final regulations,[1281] can adequately ensure a fair process and reliable outcome in postsecondary institutions. Whether or not such a practice would meet constitutional due process requirements, the Department believes that § 106.45 appropriately and reasonably balances the truth-seeking function of live, real-time, adversarial cross-examination in the postsecondary institution context with protections against personal confrontation between the parties. Thus, regardless of whether the provisions in § 106.45(b)(6)(i) are required under constitutional due process of law, the Department believes that these procedures meet or exceed the due process required under *Mathews,*[1282] and the Department is exercising its regulatory authority under Title IX to adopt measures that the Department has determined best effectuate the purpose of Title IX.[1283] The § 106.45 grievance process requires recipients to remain neutral and impartial throughout the grievance process, including during investigation and adjudication. To require a recipient to step into the shoes of an advocate by asking each party cross-examination questions designed to challenge that party's plausibility, credibility, reliability, motives, and consistency would place the recipient in the untenable position of acting partially (rather than impartially) toward the parties,[1284] or else failing to fully probe the parties' statements for flaws that reflect on the veracity of the party's statements. The Department does not believe that it is acceptable or necessary to place recipients in such a position, because as the Sixth Circuit has outlined, there is an alternative approach that balances the need for adversarial testing of testimony with protection against personal confrontation between the parties. Therefore, § 106.45(b)(6)(i) respects and reinforces the impartiality of the recipient by requiring adversarial questioning to be conducted by party advisors (who by definition need not be impartial because their role is to assist one party and not the other). Precisely because the recipient must provide a neutral, impartial decision-maker, the function of adversarial questioning must be undertaken by persons who owe no duty of impartiality to the parties. Rather, the impartial decision-maker benefits from observing the questions

[1280] *E.g.,* Niki Kuckes, *Civil Due Process, Criminal Due Process,* 25 Yale L. & Pol'y Rev. 1, 14 (2006) (''The body of criminal due process precedents is highly protective of defendants in many regards.'').

[1281] Section 106.45(b)(6)(ii) (expressly providing that recipients that are not postsecondary institutions need not hold a hearing (live or otherwise) but must provide the parties equal opportunity to submit written questions to be asked of the other party and witnesses).

[1282] *Mathews* v. *Eldridge,* 424 U.S. 319, 321 (1976) (setting forth a three-part balancing test for evaluating the sufficiency of due process procedures—the private interest being affected, the risk of erroneous deprivation of that interest through the procedures at issue, and the government's interest, including financial and administrative burden that additional procedures would entail).

[1283] *Cannon* v. *Univ. of Chicago,* 441 U.S. 677, 704 (1979) (noting that the primary congressional purposes behind Title IX were ''to avoid the use of Federal resources to support discriminatory practices'' and to ''provide individual citizens effective protection against those practices.''); *see also Gebser,* 524 U.S. at 291–92 (refusing to allow plaintiff to pursue a claim under Title IX based on the school's failure to comply with the Department's regulatory requirement to adopt and publish prompt and equitable grievance procedures, stating ''And in any event, the failure to promulgate a grievance procedure does not itself constitute 'discrimination' under Title IX. Of course, the Department of Education could enforce the requirement administratively: Agencies generally have authority to promulgate and enforce requirements that effectuate the statute's non-discrimination mandate, 20 U.S.C. 1682, even if those requirements do not purport to represent a definition of discrimination under the statute.'').

[1284] *Doe* v. *Miami Univ.,* 882 F.3d 579, 601 (6th Cir. 2018) (''School officials responsible for deciding to exclude a student from school must be impartial.'') (internal quotation marks and citation omitted).

and answers of each party and witness posed by a party's advisor advocating for that party's particular interests in the case. The Department believes that § 106.45(b)(6)(i) prescribes an approach that is both proactive and reactive, for the benefit of the recipient and both parties; that is, the decision-maker has the right and responsibility to ask questions and elicit information from parties and witnesses on the decision-maker's own initiative to aid the decision-maker in obtaining relevant evidence both inculpatory and exculpatory, and the parties also have equal rights to present evidence in front of the decision-maker so the decision-maker has the benefit of perceiving each party's unique perspectives about the evidence.

The Department notes, with respect to commenters' arguments in favor of the Harvard Law School's submitted questions model, that a decision-maker must exclude irrelevant questions, and nothing in the final regulations precludes a recipient from adopting and enforcing (so long as it is applied clearly, consistently, and equally to the parties [1285]) a rule that deems duplicative questions to be irrelevant, or to impose rules of decorum that require questions to be asked in a respectful manner; however, any such rules adopted by a recipient must ensure that all *relevant* questions and evidence are admitted and considered (though varying weight or credibility may of course be given to particular evidence by the decision-maker). Thus, for example, where the substance of a question is relevant, but the manner in which an advisor attempts to ask the question is harassing, intimidating, or abusive (for example, the advisor yells, screams, or physically ''leans in'' to the witness's personal space), the recipient may appropriately, evenhandedly enforce rules of decorum that require relevant questions to be asked in a respectful, non-abusive manner.

The Department disagrees that the provision in § 106.45(b)(6)(i) requiring the decision-maker to explain any decision that a cross-examination question is irrelevant means that submission of written questions adequately substitutes for real-time, adversarial questioning. For the reasons explained by the Sixth Circuit, written submission of questions is no substitute for live cross-examination.[1286] The Department agrees with the commenter who argued that engines come in different shapes and sizes, so that the engine of cross-examination may appropriately look different in a Title IX grievance process than in a criminal proceeding. In recognition of these different purposes and contexts, § 106.45 does not attempt to incorporate protections constitutionally guaranteed to criminal defendants such as the Sixth Amendment right to confront accusers face to face, the right of self-representation, or the right to effective assistance of counsel.

The Department appreciates commenters' proposal to modify the real-time cross-examination requirement by requiring party advisors to ask questions one at a time, in full hearing of the other party, while the decision-maker decides whether or not the question should be answered, to better screen out irrelevant or abusive questions. We have revised § 106.45(b)(6)(i) to reflect the commenters' suggestion; this provision now provides that ''Only relevant cross-examination and other questions may be asked of a party or witness. Before a complainant, respondent, or witness answers a cross-examination question, the decision-maker must first determine whether the question is relevant and explain any decision to exclude a question as not relevant.'' We agree that such a provision better ensures that cross-examination in the out-of-court setting of a campus Title IX proceeding remains focused only on relevant questions and answers.

The Department appreciates commenters' descriptions of State laws that have prescribed grievance procedures for campus sexual misconduct allegations, and of the process utilized by the U.S. Senate during the confirmation hearings for Justice Kavanaugh. The Department has considered sexual misconduct disciplinary proceeding models in use by various individual recipients, prescribed under State laws, used by the U.S. Senate, and suggested by advocacy organizations, and for the reasons previously stated, the Department has carefully selected those procedures in § 106.45 as procedures rooted in principles of due process and appropriately adapted for application when a formal complaint of sexual harassment requires reaching accurate outcomes in education programs or activities.

Changes: We have revised § 106.45(b)(6)(i) to provide that only relevant cross-examination and other questions may be asked of a party or witness, and before a complainant, respondent, or witness answers a cross-examination question, the decision-maker must first determine whether the question is relevant and explain to the party's advisor asking cross-examination questions any decision to exclude a question as not relevant.

Discourages Participation

Comments: Commenters argued that any process that requires cross-examination will discourage many students, including complainants, respondents, and witnesses, from participating in a Title IX grievance process.[1287] Commenters similarly argued that overseeing cross-examination will discourage recipients' employees, staff, and volunteers from serving as decision-makers or party advisors. At least one commenter argued that undocumented students, and LGBTQ students, will be particularly deterred from reporting sexual assault because cross-examination will make Title IX proceedings more legalistic and undocumented students, and LGBTQ students, are already wary of the criminal justice system.

Discussion: The Department understands commenters' concerns that participation in a formal grievance process may be difficult for participants, including students and employees. The final regulations require recipients to notify students and employees of the recipient's grievance process,[1288] and to train personnel whom the recipient designates to serve as a Title IX Coordinator, investigator, decision-maker, or person who facilitates an

[1285] The introductory sentence to § 106.45(b) provides that any rules a recipient adopts to use in the grievance process, other than those necessary to comply with § 106.45, must apply equally to both parties.

[1286] *E.g., Doe* v. *Baum,* 903 F.3d 575, 582–83 (6th Cir. 2018) (''Without the back-and-forth of adversarial questioning, the accused cannot probe the witness's story to test her memory, intelligence, or potential ulterior motives. . . . Nor can the fact-finder observe the witness's demeanor under that questioning . . . For that reason, written statements cannot substitute for cross-examination. . . . Instead, the university must allow for some form of *live* questioning *in front of* the fact-finder'' though this requirement can be facilitated through modern technology, for example by allowing a witness to be questioned via Skype.'') (internal quotation marks and citations omitted; emphasis in original).

[1287] Commenters cited to information regarding reasons for not reporting such as the data noted in the ''Reporting Data'' subsection of the ''General Support and Opposition'' section of this preamble, in support of arguments that fear of the ordeal of a potential trial already discourages many sexual assault victims from reporting to law enforcement, and making Title IX grievance processes more court-like by requiring cross-examination will have a similar chilling effect on reporting sexual assault to universities.

[1288] Section 106.8(c) (requiring recipients to adopt and publish, and send notice of, the recipient's grievance procedures for complaints of sex discrimination and grievance process for formal complaints of sexual harassment); § 106.45(b)(2) (requiring recipients to send written notice to parties involved in a formal complaint of sexual harassment notice of the recipient's grievance process).

informal resolution.[1289] The final regulations require recipients to allow each party involved in a grievance process to select an advisor of the party's choice, for the purpose of accompanying, advising, and assisting the party with navigating the grievance process. The Department recognizes that the § 106.45 grievance process, including live hearings and cross-examination at postsecondary institutions, constitutes a serious, formal process, and these final regulations ensure that a recipient's educational community is aware of that process and, when involved in the process, each party has the right to assistance from an attorney or non-attorney advisor throughout the process. The final regulations also protect an individual's right to decide not to participate in a grievance process, by including § 106.71 that prohibits retaliation against any person for exercising rights under Title IX, whether by participating or refusing to participate in a Title IX grievance process. While participation in a formal process may be difficult or challenging for a participant, the Department believes that sex discrimination in the form of sexual harassment is a serious matter that warrants a predictable, fair grievance process with strong procedural protections for both parties so that reliable determinations regarding responsibility are reached by the recipient.

While the formality of the § 106.45 grievance process may seem ''legalistic,'' the process is very different from a civil lawsuit or criminal proceeding, such that Title IX grievance processes retain their character as administrative proceedings in an educational environment, focused on resolving allegations that a respondent committed sex discrimination in the form of sexual harassment against a complainant. Recipients retain discretion to communicate with their students and employees (including undocumented students and others who may be wary of the criminal justice system) about the nature of the § 106.45 grievance process and the differences between that process and the criminal justice system, including for example, that the § 106.45 grievance process in a postsecondary institution involves cross-examination by a party's advisor overseen by a trained decision-maker with authority to control the live hearing environment to prevent abusive questioning and make determinations free from bias or sex stereotypes that may constitute evidence of sex discrimination. To make it easier for participants to participate in a live hearing, the final regulations expressly authorize a recipient, in the recipient's discretion, to allow any or all participants to participate in the live hearing virtually.

Changes: The final regulations revise § 106.45(b)(6)(i) to expressly allow a recipient to hold the live hearing virtually, with technology enabling participants to see and hear each other.

Financial Inequities

Comments: Many commenters argued that requiring cross-examination will lead to sharp inequities between parties who can afford to hire an attorney and those who cannot afford an attorney, and the credibility of a victim's case will be contingent on the effectiveness of the advisor doing the cross-examination rather than on the merits of the case. Some commenters asserted that this disparity will disfavor complainants because if there is a pending criminal case, a respondent likely will have a court-appointed attorney while a victim is likely to be left without an attorney. At least one commenter pointed to a study showing that only three percent of universities provide victims with legal support.[1290] Commenters asserted that often it is respondents who bring lawyers while complainants more often bring non-lawyer advocates, so requiring advisors to cross-examine will disadvantage complainants.[1291] Commenters argued that the financial disparity will fall hardest on students of color including children of immigrants, international students, and first-generation students, as they are more likely to come from an economically disadvantaged background and cannot afford expensive lawyers. Commenters expressed concern that LGBTQ students will be at greater financial disadvantage than other students.

Discussion: The Department disagrees that the final regulations create inequity between parties based on the financial ability to hire a lawyer as a party's advisor of choice. The final regulations clarify that a party's advisor may be, but is not required to be, an attorney,[1292] and clarify that where a recipient must provide a party with an advisor to conduct cross-examination at a live hearing that advisor may be of the recipient's choice, must be provided without fee or charge to the party, and may be, but is not required to be, an attorney.[1293] The Department understands that complainants and respondents may believe that hiring an attorney as an advisor may be beneficial for the party and that parties often will have different financial means, but the § 106.45 grievance process is designed to permit both parties to navigate the process with assistance from any advisor of choice. The Department disagrees that cross-examination at a live hearing means that a complainant's case will be contingent on the effectiveness of the complainant's advisor. Because cross-examination questions and answers, as well all relevant evidence, is evaluated by a decision-maker trained to be impartial, the professional qualifications of a party's advisor do not determine the outcome. The Department wishes to emphasize that the status of any party's advisor (*i.e.,* whether a party's advisor is an attorney or not) must not affect the recipient's compliance with § 106.45, including the obligation to objectively evaluate relevant evidence. Thus, determinations regarding responsibility will turn on the merits of each case, and not on the professional qualifications of a party's advisor. Regardless of whether certain demographic groups are more or less financially disadvantaged and thus more or less likely to hire an attorney as an advisor of choice, decision-makers in each case must reach determinations based on the evidence and not solely based on the skill of a party's advisor in conducting cross-examination. The Department also notes that the final regulations require a trained investigator to prepare an investigative report summarizing relevant evidence, and permit the decision-maker on the decision-maker's own initiative to ask questions and elicit testimony from parties and witnesses, as part of the recipient's burden to reach a determination regarding responsibility based on objective evaluation of all relevant evidence including inculpatory and exculpatory evidence. Thus, the skill of a party's advisor is not the only factor in bringing evidence to light for a decision-maker's consideration.

The Department disagrees that respondents are advantaged due to having a court-appointed lawyer for a concurrent criminal case, because a Title IX grievance process is independent from a criminal case and a court-appointed lawyer in a criminal

[1293] Section 106.45(b)(6)(i).

matter would not be court-appointed to represent the criminal defendant in a recipient's Title IX grievance process.

The Department disagrees that LGBTQ students are necessarily at a greater financial disadvantage than other students; however, the final regulations ensure that all students, including LGBTQ students, have an equal opportunity to select an advisor of choice.

Changes: The final regulations revise § 106.45(b)(6)(i) to specify that where a recipient must provide a party with an advisor to conduct cross-examination at a live hearing, that advisor may be of the recipient's choice, must be provided without fee or charge to the party, and may be, but is not required to be, an attorney.

Changes the Nature of the Grievance Process

Comments: Some commenters asserted that cross-examination shifts the burden of adjudication from the recipient onto the parties. Many commenters asserted that extensive training will be necessary for hearing panelists and advisors conducting cross-examination, and recipients will not have the resources, time, and money to make cross-examination workable, leading to chaos.[1294]

Many commenters argued that requiring adversarial cross-examination will fundamentally change the nature of educational disciplinary proceedings, converting them into quasi-legal trials. Commenters argued that requiring postsecondary institutions to hold live hearings with cross-examination deprives institutions of the freedom to structure their processes according to their individual needs, resources, and educational communities and compels institutions to abandon alternative models they have carefully developed over many years, constituting an overly prescriptive mandate that fails to defer to school officials' expertise in developing adjudication models that are fair, humane, in alignment with State and Federal laws, and address a recipient's unique circumstances. Other commenters argued that requiring live hearings with cross-examination fails to recognize Federal court admonitions that universities are ill-equipped to handle the formalities and procedural complexities common to criminal trials, that education is a university's first priority with adjudication of student disputes ''at best, a distant second,'' [1295] and due process does not require a university to ''transform its classrooms into courtrooms.'' [1296]

One commenter argued that the cross-examination requirement could violate court-issued restraining orders prohibiting contact between the parties.

Discussion: The final regulations ensure that the burden of gathering evidence, and the burden of proof, remain on the recipient, not on either party.[1297] While the parties have strong procedural rights to participate and advocate for their own position throughout the § 106.45 grievance process, the right to meaningfully participate does not shift the burden away from the recipient or onto the parties. The Department notes that while decision-makers must be trained to serve impartially and avoid prejudgment of the facts at issue, bias, and conflicts of interest, the final regulations do not require training for advisors of choice. This is because the recipient is responsible for reaching an accurate determination regarding responsibility while remaining impartial, yet a party's ability to rely on assistance from an advisor should not be limited by imposing training requirements on advisors, who by definition need not be impartial because their function is to assist one particular party. While the Department understands that recipients will need to dedicate resources to train Title IX personnel, including decision-makers overseeing live hearings, the benefits of a fair grievance process for resolving formal complaints of sexual harassment under Title IX outweigh the costs of training personnel to implement that fair grievance process. For similar reasons, the benefits of a consistent, predictable grievance process outweigh commenters' concerns that the § 106.45 grievance process leaves too little flexibility for recipients to craft their own processes. As noted elsewhere in this preamble, when resolving factual allegations of sexual harassment under Title IX, recipients are not simply applying a recipient's own code of conduct; rather, recipients are reaching determinations affecting rights of students and employees under a Federal civil rights law. Far from turning classrooms into courtrooms, the § 106.45 grievance process incorporates procedures the Department has determined are most needed in the Title IX sexual harassment context to result in reliable outcomes viewed as legitimate by the parties and the public. Cross-examination in the postsecondary institution context is widely viewed as a critical part of a fair process, and as such giving both parties the right to cross-examination improves the reality and perception that recipients' Title IX grievance processes are fair and legitimate.[1298] Each aspect of the grievance process, while rooted in principles of due process, is adapted for implementation by recipients in the context of education programs or activities, thereby acknowledging that schools, colleges, and universities exist first and foremost to educate, and not to mirror courts of law. Thus, for the benefit of all students including those who are wary of the criminal justice system, a Title IX grievance process remains a separate, distinct forum.

The Department disagrees that the final regulations require recipients to violate court-issued restraining orders. Section 106.45(b)(6)(i) requires recipients to conduct the entire live hearing (not only cross-examination) with the parties located in separate rooms, upon any party's request, and cross-examination must be conducted by a party's advisor and never by the party personally. Further, the final regulations revise § 106.45(b)(6)(i) to expressly allow a recipient to hold the live hearing virtually (including for witness participation), with technology enabling participants to see and hear each other. Thus, where a court-issued restraining order prohibits contact between the parties, the final regulations do not require any in-person proximity between the parties, or any direct communication between the

parties (even virtually, using technology).

Changes: None.

Section 106.45(b)(6)(ii) Should Apply to Postsecondary Institutions

Comments: Several commenters argued that because the Department permits written questioning in elementary and secondary schools, there is no reason to believe that the same process would not be equally effective in postsecondary institutions, especially when students of the same age could be subjected to the two different processes (*e.g.,* a 17 year old high school student, versus a 17 year old college student). One commenter argued that cross-examination is either important in a quest for truth or it is not, and that if elementary and secondary schools have discretion to decide whether cross-examination is beneficial, postsecondary institutions should have the same discretion. One commenter stated that community colleges often enroll high school students in dual enrollment programs, and under the proposed rules a high school student would face a different process depending on whether a sexual assault occurred at their high school or at the community college where they are taking classes.

Commenters argued that the same ''sensitivities associated with age and developmental ability'' relied on by the Department to justify not requiring live hearings and cross-examination in elementary and secondary schools [1299] remain a consideration with young adults in college, especially in cases about personal, intimate details of a sexual nature. Commenters argued that modern neuroscience has established that adolescence, in terms of brain development, extends well beyond the teenage years, and the prefrontal cortex—the part of the brain primarily responsible for executive functioning—typically does not fully develop until the early to mid-twenties,[1300] when many students have already graduated from college and thus until approximately age 25 students do not function as rational adults and rely heavily on their emotions when making decisions.[1301]

Commenters argued that when OCR conducts an investigation into violations of Title IX, schools have no right to question witnesses (or even to know who the witnesses are), and because the Department nevertheless presumably believes the procedures set out in its OCR Case Processing Manual are fair and produce reliable results there is no reason why a recipient needs to include cross-examination of parties and witnesses in a sexual misconduct case in order to have a fair process that reaches reliable results.

Commenters noted that Title IX and student conduct experts oppose the proposed rules' cross-examination requirement and instead favor submission of written questions or asking questions posed by a neutral school official, referencing publications from organizations such as the Association of Title IX Administrators (ATIXA), the Association for Student Conduct Administration (ASCA), and the American Bar Association (ABA) Criminal Justice Section. One commenter described a survey the commenter distributed regarding the proposed rules and stated that out of the 597 people surveyed, 81 percent disapproved of the proposed rules' cross-examination requirement. Another commenter pointed to a different public opinion poll that indicated that 61 percent of those surveyed agreed that students accused of sexual assault on college campuses should have the right to cross-examine their accuser.

One commenter suggested that the final regulations should require the recipient to provide a neutral person to conduct cross-examination of parties and witnesses. One commenter asked whether parties' submission of questions to be asked through a hearing board chair fulfills the proposed rules' cross-examination requirement; whether students may choose to conduct the cross-examination themselves instead of through an advisor; and whether a Title IX Coordinator who filed a formal complaint must then be cross-examined at the hearing.

Discussion: The Department appreciates commenters' support for § 106.45(b)(6)(ii) making hearings optional and requiring submission of written questions by parties directed to other parties and witnesses, in the elementary and secondary school context, and understands commenters' arguments that the same procedures should apply in postsecondary institutions. The Department acknowledges that there is no clear line between the ages of students in elementary and secondary schools versus in postsecondary institutions (*e.g.,* a 17 year old might be in high school, or might be in college, or might be dually enrolled). As discussed in the ''Directed Questions'' section of this preamble, the Department appreciates commenters' arguments for and against differences in provisions based on the age of a student versus differentiating between elementary and secondary schools on the one hand, and postsecondary institutions on the other hand. The Department believes that it is desirable, to the extent feasible, to achieve consistency in application of Title IX rights across all recipients, because all students participating in education programs or activities regardless of age deserve the protections of Title IX's non-discrimination mandate. The Department also believes that with respect to the unique circumstances presented by sex discrimination in the form of sexual harassment, a consistent, predictable framework can be prescribed while also adapting certain procedures for elementary and secondary schools so that the general framework is more reasonable and effective for students in elementary and secondary schools, who tend to be younger than the average college student. Thus, for example, the final regulations revise the definition of actual knowledge to include notice of sexual harassment to any employee in the elementary and secondary school context,[1302] and revise § 106.45(b)(6)(ii) to more clearly state that elementary and secondary school recipients do not need to use a hearing model to adjudicate formal complaints of sexual harassment.

Similarly, with respect to cross-examination, the Department has concluded that the approach utilized for postsecondary institutions, whereby party advisors conduct cross-examination during a live hearing, is not necessarily effective in elementary and secondary schools where most students tend to be under the age of majority and where (especially for very young students) parents or guardians would likely exercise a party's rights.[1303] Therefore, for example, a parent writing out answers to questions about a sexual harassment incident on behalf of a second-grade student is likely to be a more reasonable procedure than

[1302] Section 106.30 (defining ''Actual knowledge'').

[1303] We have added § 106.6(g) to expressly acknowledge the legal rights of parents and guardians to act on behalf of complainants, respondents, and other individuals with respect to exercise of Title IX rights, including but not limited to the filing of a formal complaint. The legal right of a parent or guardian to act on a party's behalf extends throughout the grievance process.

expecting the second-grader to answer questions in real-time during a hearing. Conversely, in the postsecondary institution context where students generally are young adults, such a party can reasonably be expected to answer questions during a live hearing and to benefit from the procedural right to question the other party (through the asking party's advisor). The Department's cross-examination requirement in postsecondary institutions is based on a practical determination that cross-examination is a valuable procedural tool benefiting both parties, whereas in the elementary and secondary school context the parties are likely to be under the age of majority and would not necessarily benefit from cross-examination as a procedural device. The Department notes that current regulations and guidance do not require consistency between the procedures applied in a high school, and in a college, such that a 17 year old in high school, or in college, would face potentially different grievance procedures in these situations; the final regulations do not increase that discrepancy.

The Department acknowledges the research pointed to by commenters indicating that the brains of young adults are still developing until a person is in their early or even mid-twenties. However, the laws of nearly every State recognize a person age 18 or older as capable of legally acting on the person's own behalf[1304] (for example, by entering into binding contracts), and the Department maintains that individuals developmentally capable enough to enroll in college are also capable enough to make decisions about and participate in a grievance process designed to advance the person's rights.[1305]

The Department reiterates that in recognition that young adults may find navigating a grievance process challenging, the final regulations preserve each party's right to select an advisor of choice to assist the party. The Department's concern for each party's ability to receive emotional and personal support though a grievance process is also discussed in this preamble under § 106.45(b)(5)(iii), providing that a recipient cannot restrict a party's ability to discuss the allegations; this applies to a young adult's desire to discuss the allegations with a parent, friend, or advocate to receive emotional, practical, or strategic advice and support, as well as the right to discuss the allegations with a professional (such as a lawyer). The Department believes that a young adult in college is capable of participating in a grievance process, including answering questions at a live hearing, even if the young adult's frontal cortex is still developing, and the Department respects the legal and policy determinations of the vast majority of States that have granted legal rights and responsibilities to young adults age 18 or older. In recognition that sexual misconduct matters involve sensitive, often traumatic issues for victims of any age, the final regulations ensure that any complainant regardless of age can insist that cross-examination (and the entire live hearing) occur with the parties in separate rooms, and revise § 106.45(b)(6)(i) further to grant recipients the discretion to hold the entire live hearing virtually with use of technology so that witnesses also may appear virtually.

The Department appreciates commenters' observations that the Department's OCR investigations utilize procedures that do not include allowing a recipient under investigation for Title IX violations to cross-examine witnesses interviewed by OCR. For the reasons discussed in the ''Role of Due Process in the Grievance Process'' section of this preamble, the Department has determined that the procedures reflected in § 106.45 represent those procedures most likely to result in fair, reliable outcomes in the particular context of a recipient's need to accurately resolve sexual harassment allegations in order to provide remedies to sexual harassment victims—a context and purpose that differs from that of the Department's investigation into a recipient's compliance with Title IX.

The Department acknowledges that various experts in Title IX matters support a process of posing questions through a hearing officer or neutral school official, and that public opinion surveys may show various levels of support or opposition to the idea of cross-examination in college disciplinary proceedings. However, for the reasons discussed above, the Department has determined that in the postsecondary institution context, the tool of cross-examination benefits both parties and contributes to the truth-seeking purpose of the § 106.45 grievance process. The Department appreciates commenters' proposed revision that recipients simply be directed to give the parties opportunity to challenge credibility and require the decision-maker to ''reasonably assess credibility.'' The Department believes that the final regulations accomplish that directive, by giving the parties equal opportunity to challenge credibility (through written questions for non-postsecondary institutions, and through cross-examination for postsecondary institutions) and by obligating the decision-maker to reach a determination regarding responsibility by objectively evaluating all relevant evidence. The Department appreciates a commenter's suggestion that recipients be required to provide a neutral person to conduct cross-examination on behalf of both parties. However, for the reasons discussed above, the Department does not believe that the benefits of adversarial cross-examination can be achieved when conducted by a person ostensibly designated as a ''neutral'' official. This is because the function of cross-examination is precisely *not* to be neutral but rather to point out in front of the neutral decision-maker each party's unique perspective about relevant evidence and desire regarding the outcome of the case.

In response to a commenter's question as to whether requiring written submission of questions at a live hearing would fulfill the cross-examination requirement described in § 106.45(b)(6)(i), the final regulations revise that provision to add the phrase ''directly, orally, and in real time'' to describe how cross-examination must be conducted, to clarify that submission of written questions, even during a live hearing, is not compliant with § 106.45(b)(6)(i). In answer to a commenter's further question, the Department has revised § 106.45(b)(6)(i) to expressly preclude a party from

[1304] *E.g., LawServer.com,* ''Age of Majority,'' *https://www.lawserver.com/law/articles/age-of-majority* (''The age of majority is the legal age established by state law at which a person is no longer considered a child. In most states, a person has reached the age of majority at 18. Two states (Alabama and Nebraska) set the age of majority to be 19 and one, Mississippi, sets the age of majority at 21.''). The legal voting age in the U.S. is age 18. *USA.Gov,* ''Voter Registration Age Requirements By State,'' *https://www.usa.gov/voter-registration-age-requirements.* The age of consent to sexual activity varies across States, from age 16 to age 18. *See https://www.ageofconsent.net/states.* The ages of licensing privileges varies across States, for example with respect to driver's licenses where the age for an unrestricted license ranges from age 16 to age 18. Very Well Family, ''Driving Age By State,'' *https://www.verywellfamily.com/driving-age-by-state-2611172#driving-age-by-state.* Similarly, regarding marriage licenses, the age for marrying without parental consent is age 18 in all states except Mississippi and Nebraska, where the age is 19, and 21, respectively. *FindLaw.com,* ''State-By-State Marriage 'Age Of Consent' Laws,'' *https://family.findlaw.com/marriage/state-by-state-marriage-age-of-consent-laws.html.*

[1305] For example, when a student is 18 years of age or attends an institution of postsecondary education, the rights accorded to, and consent required of, parents under FERPA and its implementing regulations transfer from the parents to the student. 20 U.S.C. 1232g(d); 34 CFR 99.3; 34 CFR 99.5(a)(1).

conducting cross-examination personally; the only method for conducting cross-examination is by a party's advisor.

In response to a commenter's question about whether a Title IX Coordinator must be cross-examined in situations where the Title IX Coordinator filed the formal complaint that triggered the grievance process, the final regulations revise § 106.30 defining ''formal complaint'' to clarify that where a formal complaint is signed by a Title IX Coordinator, the Title IX Coordinator does not become a party and must comply with all provisions in § 106.45, including the training requirement and the avoidance of bias and conflict of interest. Thus, where the Title IX Coordinator signed the formal complaint that initiated the grievance process, neither § 106.45(b)(6)(i) nor other provisions in § 106.45 treat the Title IX Coordinator as a party. Even where the Title IX Coordinator testifies as a witness, the Title IX Coordinator is still expected to serve impartially without prejudgment of the facts at issue. The Department notes that the recipient would not be obligated to provide the Title IX Coordinator with an advisor because that obligation attaches only where *a party* does not have an advisor of choice at a hearing.

Changes: The final regulations add to § 106.45(b)(6)(i) that cross-examination at a live hearing must be conducted directly, orally, and in real time by the party's advisor of choice, notwithstanding the discretion paragraph (b)(5)(iv) to otherwise restrict the extent to which advisors may participate in the proceedings. The final regulations further revise § 106.45(b)(6)(i) to provide that recipients may hold the live hearing virtually, with technology enabling participants to see and hear each other. The final regulations revise the definition of ''formal complaint'' in § 106.30 to clarify that even where a Title IX Coordinator signs a formal complaint, this does not make the Title IX Coordinator a ''party'' in the grievance process.

False Accusations Occur Infrequently

Commenters: Many commenters argued that because false allegations occur infrequently,[1306] it is unnecessary to give the accused extra protections like cross-examination; commenters urged the Department to replace cross-examination with submission of written questions, or asking questions through a neutral school official, to better protect survivors instead of protecting a minority of falsely-accused students. Commenters argued that an adequate regulatory provision would simply say ''The recipient's grievance procedure must include an opportunity for parties to challenge the credibility of witnesses and the other party. The decision-maker must reasonably assess credibility of witnesses and parties'' thus leaving recipients discretion to decide how to meet those requirements.

Discussion: The Department disagrees that cross-examination in the Title IX grievance process is intended only to protect respondents against false allegations; rather, as discussed above, cross-examination in the § 106.45 grievance process is intended to give both parties equal opportunity to meaningfully challenge the plausibility, reliability, credibility, and consistency of the other party and witnesses so that the outcome of each individual case is more likely to be factually accurate, reducing the likelihood of either type of erroneous outcome (*i.e.,* inaccurately finding a respondent to be responsible, or inaccurately finding a respondent to be non-responsible). For that reason, we do not believe the alternate regulatory language suggested by the commenters is sufficient. Despite commenters' assertions, the Department has not designed these final regulations to specifically address false allegations, or in response to any preconceived notions about the frequency of false allegations.

Changes: None.

Excluding Cross-Examination Questions

Comments: Commenters noted that the proposed regulations impose a duty on recipients to objectively evaluate relevant evidence, and deem questions about a complainant's prior sexual behavior to be irrelevant (with two exceptions), but commenters argued that the proposed rules failed to clarify whether recipients have discretion to exclude relevant cross-examination questions on other public policy grounds on which rules of evidence in civil and criminal matters often exclude evidence, for example, party statements made during mediation discussions, out of court statements that constitute hearsay, evidence of a party's general character or prior bad acts, or evidence that is cumulative, duplicative, or unduly prejudicial. Commenters argued that the final regulations should either identify admissibility rules in addition to relevance, or clarify whether decision-makers have the authority to exclude relevant evidence for these kinds of policy reasons (or because State law requires exclusion of types of evidence). Commenters wondered what standards the Department would apply to review whether the recipient's evidentiary rules comply with these final regulations, if recipients do have authority to promulgate rules excluding certain types of evidence. Commenters argued that if relevance is the only allowable admissibility rule then hearings will become even more protracted and unwieldy and decision-makers should thus have discretion to identify appropriate grounds, other than relevance, for excluding evidence.

Discussion: Commenters correctly observed that the proposed rules impose a duty on recipients to objectively evaluate all relevant evidence including inculpatory and exculpatory evidence.[1307] The final regulations revise the language in § 106.45(b)(6)(i)–(ii) to state more clearly that (subject to the two exceptions in those provisions [1308]) questions and evidence about a complainant's prior sexual behavior or predisposition are not relevant, bar the use of information protected by any legally recognized privilege,[1309] and provide that a recipient cannot use a party's treatment records without the party's voluntary, written consent.[1310] (Pursuant to § 106.45(b)(5)(i), if the party is not an ''eligible student,'' as defined in 34 CFR 99.3, then the recipient must obtain the voluntary, written consent of a ''parent,'' as defined in 34 CFR 99.3.) The Department appreciates the opportunity to clarify here that the final regulations do not allow a recipient to impose rules of evidence that result in

[1306] Commenters cited to information regarding infrequency of false allegations such as the data noted in the ''False Allegations'' subsection of the ''General Support and Opposition'' section of this preamble.

[1307] Section 106.45(b)(1)(ii).

[1308] As discussed below, the rape shield language in § 106.45(b)(6)(i)–(ii) bars questions or evidence about a complainant's sexual predisposition (with no exceptions) and about a complainant's prior sexual behavior subject to two exceptions: If offered to prove that someone other than the respondent committed the alleged sexual harassment, or if the question or evidence concerns sexual behavior between the complainant and the respondent and is offered to prove consent.

[1309] Section 106.45(b)(1)(x) (protecting any legally recognized privileged information from disclosure or use during a grievance process). This provision would therefore prohibit cross-examination (or other) questions that seek disclosure of, for example, information protected by attorney-client privilege.

[1310] Section 106.45(b)(5)(i) (stating that the recipient cannot access, consider, disclose, or otherwise use a party's records that are made or maintained by a physician, psychiatrist, psychologist, or other recognized professional or paraprofessional in connection with the provision of treatment to the party, unless the recipient obtains that party's voluntary, written consent to do so for a grievance process. If the party is not an ''eligible student,'' as defined in 34 CFR 99.3 (*i.e.,* FERPA regulations), then the recipient must obtain the voluntary, written consent of a ''parent,'' as defined in 34 CFR 99.3.).

exclusion of relevant evidence; the decision-maker must consider relevant evidence and must not consider irrelevant evidence.

The Department appreciates commenters' concerns that comprehensive rules of evidence adopted in civil and criminal courts throughout the U.S. legal system apply detailed, complex rules to certain types of evidence resulting in exclusion of evidence that is otherwise relevant to further certain public policy values (*e.g.,* exclusion of statements made during settlement negotiations, exclusion of hearsay subject to specifically-defined exceptions, exclusion of character or prior bad act evidence subject to certain exceptions, exclusion of relevant evidence when its probative value is substantially outweighed by risk of prejudice, and other admissibility rules). The Department desires to prescribe a grievance process adapted for an educational environment rather than a courtroom, and declines to impose a comprehensive, detailed set of evidentiary rules for resolution of contested allegations of sexual harassment under Title IX. Rather, the Department has carefully considered the procedures most needed to result in fair, accurate, and legitimate outcomes in Title IX grievance processes. To that end, the Department has determined that recipients must consider relevant evidence with the following conditions: A complainant's prior sexual behavior is irrelevant (unless questions or evidence about prior sexual behavior meet one of two exceptions, as noted above); information protected by any legally recognized privilege cannot be used; no party's treatment records may be used without that party's voluntary, written consent; [1311] and statements not subject to cross-examination in postsecondary institutions cannot be relied on by the decision-maker. The Department notes that where evidence is duplicative of other evidence, a recipient may deem the evidence not relevant.

The Department does not believe that requiring recipients to evaluate relevant evidence results in unfairness or inaccuracy. Unlike court trials where often the trier of fact consists of a jury of laypersons untrained in evidentiary matters, the final regulations require decision-makers to be trained in how to conduct a grievance process and how to serve impartially, and specifically including training in how to determine what questions and evidence are relevant. The fact that decision-makers in a Title IX grievance process must be trained to perform that role means that the same well-trained decision-maker will determine the weight or credibility to be given to each piece of evidence, and the training required under § 106.45(b)(1)(iii) allows recipients flexibility to include substantive training about how to assign weight or credibility to certain types or categories of evidence, so long as any such training promotes impartiality and treats complainants and respondents equally. Thus, for example, where a cross-examination question or piece of evidence is relevant, but concerns a party's character or prior bad acts, under the final regulations the decision-maker cannot exclude or refuse to consider the relevant evidence, but may proceed to objectively evaluate that relevant evidence by analyzing whether that evidence warrants a high or low level of weight or credibility, so long as the decision-maker's evaluation treats both parties equally [1312] by not, for instance, automatically assigning higher weight to exculpatory character evidence than to inculpatory character evidence. While the Department will enforce these final regulations to ensure that recipients comply with the § 106.45 grievance process, including accurately determining whether evidence is relevant, the Department notes that § 106.44(b)(2) assures recipients that, when enforcing these final regulations, the Department will refrain from second guessing a recipient's determination regarding responsibility based solely on whether the Department would have *weighed* the evidence differently. That provision therefore reinforces the approach to the grievance process throughout § 106.45 under which a recipient must objectively evaluate all relevant evidence (inculpatory and exculpatory) but retains discretion, to which the Department will defer, with respect to how persuasive a decision-maker finds particular evidence to be.

Changes: The final regulations revise § 106.45(b)(6)(i)–(ii) to clarify questions and evidence about the complainant's sexual predisposition is never relevant and about a complainant's prior sexual behavior are not relevant with two exceptions: Where the question or evidence about sexual behavior is offered to prove that someone other than the respondent committed the alleged misconduct, or where the question or evidence relates to sexual behavior between the complainant and respondent and is offered to prove consent. The final regulations add § 106.45(b)(1)(x) to prevent disclosure or use during a grievance process of information protected by a legally recognized privilege. The final regulations revise § 106.45(b)(5)(i) to bar a recipient from using a party's treatment records without the party's voluntary, written consent. The final regulations also revise the introductory sentence of § 106.45(b) to provide that any provisions, rules, or practices other than those required by § 106.45 that a recipient adopts as part of its grievance process must apply equally to both parties.

Section 106.45(b)(6)(i) Postsecondary Institution Recipients Must Provide Live Hearing With Cross-Examination

Self-Representation Versus Cross-Examination Conducted by Advisors

Comments: Some commenters opposed § 106.45(b)(6)(i) because that provision restricts cross-examination to being conducted by a party's advisor, foreclosing the option for a respondent (or complainant) to be self-represented and conduct cross-examination personally. Commenters argued that the right of self-representation has a long history under U.S. constitutional law, and that the Supreme Court has held that States cannot force an attorney on an unwilling criminal defendant,[1313] that the Sixth Amendment's right to confront witnesses applies to the accused, not to lawyers,[1314] and that representing oneself affirms the dignity and autonomy of the accused.[1315]

Commenters asserted that the final regulations should be modified so that ''in the event that the advisor assigned by a recipient is unacceptable to the respondent, the respondent must have the right to self-represent in all cross-examinations.''

Some commenters suggested that this provision should be modified to allow students to confer with their advisors and for advisors to actively represent the student during any part of a live hearing. At least one commenter argued

[1311] Pursuant to § 106.45(b)(5)(i), if the party is not an ''eligible student,'' as defined in 34 CFR 99.3 (*i.e.,* FERPA regulations), then the recipient must obtain the voluntary, written consent of a ''parent,'' as defined in 34 CFR 99.3.

[1312] The final regulations revise the introductory sentence of § 106.45(b) to provide: ''Any provisions, rules, or practices other than those required by § 106.45 that a recipient adopts as part of its grievance process for handling formal complaints of sexual harassment as defined in § 106.30, must apply equally to both parties.''

[1313] Commenters cited: *Faretta* v. *Cal.,* 422 U.S. 806, 816 (1974) (the right to represent oneself stems in part from the premise that the defense may be made easier if the accused is permitted to bypass lawyers and conduct the trial himself); *id.* at 834 (even if a lawyer could more aptly represent an accused, the advantage of a lawyer's training and experience can be realized only with the accused's cooperation).

[1314] Commenters cited: *id.* at 819–20.

[1315] Commenters cited: *McKaskle* v. *Wiggins,* 465 U.S. 168, 176–77 (1984).

that students should be allowed to have a confidential advisor, or confidential advocate, allowed to accompany the party to the hearing, in addition to an advisor of choice or assigned advisor for cross-examination purposes.

Some commenters supported the proposed rules' requirement that if a party does not have an advisor of choice at a hearing, the recipient would be required to provide an advisor ''aligned with that party'' to ensure that each party's interest is represented during the hearing. At least one commenter urged the Department to require that such an appointed advisor be ''genuinely aligned'' with the party, because recipient employees appointed as advisors may be loyal to the institution and not to the party, or may hold ideological beliefs that align with complainants or respondents.

Many commenters opposed the provision in § 106.45(b)(6)(i) that requires recipients to provide a party with an advisor to conduct cross-examination if a party does not have an advisor at a live hearing. Commenters particularly objected to the language in the NPRM requiring a recipient-provided advisor to be ''aligned with that party'' because: Recipients will find it impossible to ensure parity between the parties; recipients will face additional litigation risks stemming from the recipient's provision of advisors for parties (such as claims by parties that the recipient provided an incompetent advisor, an advisor not sufficiently ''aligned with the party,'' or ineffective assistance of counsel); the NPRM provided no guidance about how a recipient should determine whether an advisor is ''aligned with'' a party; especially in smaller institutions, a recipient's obligation to appoint an advisor who must conduct cross-examination adverse to another student or employee presents potential conflicts of interest (particularly because appointed advisors are likely to be administrators, professors, or other recipient staff who interact with both parties outside the grievance process) and pitting a recipient's employee against a recipient's student is antithetical to recipients' educational mission.[1316] Commenters argued that requiring recipients to appoint party-aligned advisors contradicts the expectation that the recipient is neutral and impartial toward the parties, and that educational disciplinary processes are not about building a case for or against a party but simply gathering as much information as possible; these commenters stated that § 106.45(b)(6)(i) abandons institutions' processes that are ''built to assemble the voices and experiences of the parties involved, not the voices of third-party advisors.''

Commenters asserted that many recipient employees will not wish to be viewed as providing support or advocacy to one party over another, including in instances where the advisor believes the party to whom the advisor is assigned is lying. Commenters asserted that currently, many recipients provide advisors to parties but such advisors are neutral, advising a party about the grievance process itself but not advocating on behalf of the party or serving as a party's proxy, and commenters argued that instead of requiring assigned advisors to be ''aligned with'' the party the provision should require that assigned advisors be knowledgeable about university processes and able to give neutral advice to the party. Other commenters asserted that this provision should require recipients to give parties advice about selecting advisors but not require recipients to provide advisors to parties. Commenters argued that the final regulations should state that a party's advisor cannot be a person who exercises any administrative or academic authority over the other party. Commenters asserted that party advisors should be required to agree to a code of conduct prohibiting hostile, abusive, or irrelevant questioning.

Some commenters argued that it is vital that both parties have advisors of equal competency during the hearing and thus requested that the final regulations require recipients to appoint attorneys for both parties, or wherever one party has hired an attorney,[1317] or upon the request of a party. Commenters suggested that this provision be modified to allow any party without an advisor of choice at a hearing to select an advisor of the party's choice from a panel of advisors whom the recipient has trained to be familiar with the recipient's grievance process.

Other commenters expressed concern that the requirement for advisors to conduct cross-examination and for recipients to provide advisors for parties who do not have one risks a *de facto* ''arms race'' whereby if a respondent hires an attorney, recipients will feel pressured to hire an attorney for the complainant to ensure equity, and this will be too costly for many recipients. Commenters similarly asserted that recipients will feel compelled to ensure that assigned advisors are attorneys because it will be crucial that a party and an assigned advisor communicate candidly which requires attorney-client privilege so that conversations are non-discoverable in subsequent civil or criminal matters. Commenters argued that it is likely that State bar associations will find that conducting cross-examination constitutes practice of law and thus recipients will end up being required to hire attorneys for parties, and not simply assign non-attorney advisors.[1318] Commenters argued that this amounts to a costly, unfunded mandate that will create a niche market for litigation-attorney advisors.

Commenters argued that a party disappointed about the outcome of the hearing should not be allowed to challenge the adequacy of the advisor provided by the university, either on appeal or in subsequent litigation.

Commenters argued that the Department lacks statutory authorization under Title IX to require recipients to provide advisors to students, and that such a requirement does not serve to further Title IX's non-discrimination mandate.

Commenters requested clarification of this provision to answer questions such as: Who may determine whether an assigned advisor is aligned with the party, and what factors should be used in making that determination? Is the assigned advisor expected to assume the party's version of events is accurate? If one party hires an attorney as an advisor of choice and the recipient must provide

[1316] Commenters cited studies for the proposition that frequent, positive interactions with faculty and staff not only strongly influence academic achievement and scholastic self-concept, but motivation, institutional retention, and persistence towards a degree as well, particularly for students of color; commenters cited, *e.g.,* Meera Komarraju *et al., Role of Student-Faculty Interactions in Developing College Students' Academic Self-Concept, Motivation, and Achievement,* 51 Journal of Coll. Student Development 3 (2010). Commenters cited studies for the proposition that negative interactions between faculty and students significantly damage students' self-esteem, academic performance, mental health, and ultimately, retention and persistence; commenters cited, *e.g.,* Kevin A. Nadal *et al., The Adverse Impact of Racial Microaggressions on College Students' Self-esteem,* 55 Journal of Coll. Student Development 5 (2014).

[1317] Commenters cited: Curtis J. Berger & Vivian Berger, *Academic Discipline: A Guide to Fair Process for the University Student,* 99 Colum. L. Rev. 289, 341 (1999) (discussing the right to counsel in cases involving academic wrongdoing).

[1318] Commenters asserted that, for example, in Ohio where the Sixth Circuit's *Baum* decision applies, rape crisis advocate centers who typically have provided *pro bono* advocates to serve as advisors of choice for complainants have, because of *Baum,* forbidden staff to serve as advisors of choice to prevent claims of unauthorized practice of law, based on opinions of the Ohio Bar Association and the American Bar Association. These commenters asserted that the NPRM would make this result widespread and cut off an avenue of consistent, informed support that should be available to complainants.

an advisor for the other party, must the recipient assign that party an attorney? Can recipients limit the participation of advisors in a hearing, other than conducting cross-examination? May a recipient impose cost or fee limitations on attorneys chosen by parties to make equity and parity more likely? Could a school allow advisors of choice but appoint separate advisors to conduct cross-examination? If a party shows up at a hearing without an advisor, must the recipient stop the hearing to appoint an advisor for the party? May a decision-maker punish a party if the party's advisor breaks rules during the hearing? Can a party decide during a hearing to ''fire'' the assigned advisor? Can a party delay a hearing by refusing to accept a recipient's assigned advisor perhaps by arguing that the advisor is not ''aligned with'' the party? May the party advisors also conduct direct examination of the party they are advising, or only cross-examination of the other parties and witnesses? Must a recipient provide an advisor for a party who is also an employee of the recipient, including at-will employees? May a recipient require certain training and competency assessments for assigned advisors? Some commenters asserted that the final regulations should require training for appointed advisors, including at a minimum how to conduct cross-examination and how to respond to cross-examination conducted by an attorney, so that parties feel adequately represented.

Discussion: The Department understands commenters who argued for a right of self-representation, but the Department has concluded that self-representation by parties in a live hearing in the context of a Title IX adjudication presents substantial risk of diminishing the effectiveness and benefits of cross-examination while increasing the probability that parties will feel traumatized by the prospect and reality of personal confrontation. As explained above, the Department believes that cross-examination is a valuable tool serving the truth-seeking function of a Title IX grievance process. However, the right to cross-examination is not unfettered and the effectiveness of cross-examination depends on the circumstances presented in many Title IX sexual harassment cases whereby a complainant and respondent have alleged and denied commission of traumatic, violative acts. To retain the benefits of cross-examination in this sensitive, high-stakes context, the Department has concluded that restrictions on the right of cross-examination best serve the purposes of a Title IX adjudication.

The context and purpose of a Title IX adjudication differ significantly from that of a criminal trial. The Sixth Amendment rights guaranteed to a criminal defendant are not constitutionally guaranteed to a respondent in a Title IX adjudication,[1319] and the Department does not believe that a right of self-representation would best effectuate the purposes of Title IX. The Department believes that the final regulations appropriately give respondents and complainants equal and meaningful opportunity to select their own advisors of choice and to thereby direct and control the manner by which a party exercises a right of cross-examination. The final regulations thus do not ''force an attorney'' onto a respondent (or complainant). Rather, the final regulations provide as a back-stop that if a party does not (or cannot) take the opportunity to select an advisor of choice, rather than conducting cross-examination personally the recipient will provide the party an advisor for that purpose. A party always retains the right not to participate in a grievance process, but where the party does wish to participate and advance the party's interests in the case outcome, with respect to testing the credibility of testimony via cross-examination, the party must do this by selecting an advisor of choice, or else working with an advisor provided to the party (without fee or charge) by the recipient. The Department notes that the final regulations, § 106.45(b)(5)(iv) and § 106.45(b)(6)(i), make clear that the choice or presence of a party's advisor cannot be limited by the recipient. To meet this obligation a recipient also cannot forbid a party from conferring with the party's advisor, although a recipient has discretion to adopt rules governing the conduct of hearings that could, for example, include rules about the timing and length of breaks requested by parties or advisors and rules forbidding participants from disturbing the hearing by loudly conferring with each other.

With respect to allowing parties to be accompanied by a confidential advisor or advocate in addition to a party's chosen or assigned advisor, the Department notes that § 106.71 states ''The recipient must keep confidential the identity of any individual who has made a report or complaint of sex discrimination, including any individual who has made a report or filed a formal complaint of sexual harassment, any complainant, any individual who has been reported to be the perpetrator of sex discrimination, any respondent, and any witness, except as may be permitted by the FERPA statute or regulations, 20 U.S.C. 1232g and 34 CFR part 99, or as required by law, or to carry out the purposes of [34 CFR part 106], including the conduct of any investigation, hearing, or judicial proceeding arising thereunder'' and this restriction may limit a recipient's ability to authorize the parties to be accompanied at the hearing by persons other than advisors. For example, a person assisting a party with a disability, or a language interpreter, may accompany a party to the hearing without violating § 106.71(a) because such a person's presence at the hearing is required by law and/or necessary to conduct the hearing. The sensitivity and high stakes of a Title IX sexual harassment grievance process weigh in favor of protecting the confidentiality of the identity and parties to the extent feasible (unless otherwise required by law), and the Department thus declines to authorize that parties may be accompanied to a live hearing by persons other than the parties' advisors, or other persons for reasons ''required by law'' as described above.

The Department is persuaded by commenters' concerns that the ''aligned with that party'' language in this provision posed unnecessary confusion and potential problems. As a result, the Department has removed that language from § 106.45(b)(6)(i). Accordingly, the Department declines to adopt a commenter's suggestion to specify that the assigned advisor must be ''genuinely aligned'' with the party. The Department does not believe it is feasible, necessary, or appropriate to ask recipients to screen potential assigned advisors' ideological beliefs or ties of loyalty to the recipient. The Department is persuaded by commenters' concerns that a condition of ''alignment'' with a party exposes recipients to claims by parties that, in the party's subjective view, an assigned advisor was not sufficiently ''aligned with'' the party, and this open-ended potential to accuse recipients of violating these regulations does not serve the Department's interest in prescribing a predictable framework under which recipients understand and comply with their legal obligations. We have revised § 106.45(b)(6)(i) to state: ''If a party does not have an advisor present at the hearing, the recipient must provide without fee or charge to that

[1319] *E.g., I.N.S.* v. *Lopez-Mendoza,* 468 U.S. 1032, 1038 (1984) (''Consistent with the civil nature of the proceeding, various protections that apply in the context of a criminal trial do not apply in a deportation hearing.'').

party an advisor of the recipient's choice, who may be, but is not required to be, an attorney, to conduct cross-examination on behalf of that party.'' This directive addresses many of the commenters' concerns about providing an advisor. By explicitly acknowledging that advisors provided by a recipient may be—but need not be—attorneys, expressly stating that the provided advisor is ''of the recipient's choice,'' and limiting the role of provided advisors to conducting cross-examination on behalf of a party, the final regulations convey the Department's intent that a recipient enjoys wide latitude to fulfill this requirement. Claims by a party, for instance, that a recipient failed to provide ''effective assistance of counsel'' would not be entertained by the Department because this provision does not require that advisors be lawyers providing legal counsel nor does this provision impose an expectation of skill, qualifications, or competence. An advisor's cross-examination ''on behalf of that party'' is satisfied where the advisor poses questions on a party's behalf, which means that an assigned advisor could relay a party's own questions to the other party or witness, and no particular skill or qualification is needed to perform that role. These changes in the final regulations similarly address commenters' concerns that the assigned advisors need be ''adverse'' to or ''pitted against'' members of the recipient's community. While an assigned advisor may have a personal or professional belief in, or dedication to, the position of the party on whose behalf the advisor conducts cross-examination, such a belief or dedication is not a requirement to function as the assigned advisor. Whether a party's cross-examination is conducted by a party's advisor of choice or by the advisor provided to that party by the recipient, the recipient itself remains neutral, including the decision-maker's obligation to serve impartially and objectively evaluate relevant evidence. The Department emphasizes that advisors of choice, and advisors provided to a party by the recipient, are not subject to the requirements of § 106.45(b)(1)(iii) which obligates Title IX personnel (Title IX Coordinators, investigators, decision-makers, and persons who facilitate informal resolutions) to serve impartially without conflicts of interest or bias for or against complainants or respondents generally, or for or against an individual complainant or respondent.

The Department understands commenters' point that educational processes have been designed to let the voices and perspectives of the parties be heard, and not the voices and perspectives of third-party advisors. For reasons described above and in § 106.45(b)(5)(iv), the Department believes that giving each party the opportunity to be assisted and supported by an advisor of choice yields important benefits to both parties participating in a grievance process. The final regulations carefully balance the right of parties to rely on and be assisted by advisors with the interest of an educational institution in focusing the institution's process on the institution's own students and employees rather than on third parties. The final regulations allow recipients to limit the active participation of advisors, with the one exception in § 106.45(b)(6)(i) that an advisor must conduct cross-examination on behalf of a party. As noted above, the Department believes that the risks of allowing personal confrontation between parties in sexual harassment cases outweigh the downsides of allowing advisors to actively participate in the limited role of conducting cross-examination.

The Department understands commenters' assertions that many recipient's employees will not wish to serve as party advisors because they do not want to be viewed as supporting or assisting one party over the other. The Department notes that § 106.45(b)(6)(i) applies only to postsecondary institutions, and institutions of higher education that receive Federal student aid under Title IV of the Higher Education Act of 1965, as amended, already must comply with the Clery Act, which permits parties to have advisors of choice, and commenters have noted that many recipients' practice is to allow parties to choose advisors from among recipient employees, and that some recipients already provide advisors to parties. For the reasons explained above, these final regulations do not change that landscape qualitatively, because even conducting cross-examination ''on behalf of a party'' need not mean more than relaying that party's questions to the other parties and witnesses. That function could therefore equate to serving as a party's proxy, or advocating for a party, or neutrally relaying the party's desired questions; this provision leaves recipients and assigned advisors wide latitude in deciding how to fulfill the role of serving as an assigned advisor. For the same reason, the Department does not believe it is necessary to forbid assigned advisors from being persons who exercise any administrative or academic authority over the other party; assigned advisors are not obligated to avoid conflicts of interest and can fulfill the limited role described in § 106.45(b)(6)(i) regardless of the scope of the advisor's other duties as a recipient's employee.

For reasons described above, the Department retains the requirement for recipients to provide parties with an advisor to conduct cross-examination, instead of merely requiring recipients to advise a party about how to select an advisor. In order to foreclose personal confrontation between the parties during cross-examination while preserving the neutrality of the recipient's decision-maker, that procedure must be conducted by advisors rather than by parties, and where a party does not take the opportunity to select an advisor of the party's choice, that choice falls to the recipient. As noted above, the final regulations do not preclude a recipient from adopting and applying codes of conduct and rules of decorum to ensure that parties and advisors, including assigned advisors, conduct cross-examination questioning in a respectful and non-abusive manner, and the decision-maker remains obligated to ensure that only relevant questions are posed during cross-examination.

The Department understands commenters' desire that both parties have advisors of equal competency during a hearing. However, the Department does not wish to impose burdens and costs on recipients beyond what is necessary to achieve a Title IX grievance process with robust procedural protections leading to a reliable outcome. The Department believes that giving both parties equal *opportunity* to select advisors of choice, who may be, but are not required to be attorneys, and assuring parties who cannot or do not select their own advisor that the party can still accomplish cross-examination at a hearing because the recipient will provide an advisor for that limited purpose, sufficiently achieves the purpose of a Title IX grievance process without imposing additional burdens on recipients to hire attorneys for the parties. Nothing in the final regulations precludes a recipient from offering to provide attorney representation or non-attorney advisors to both parties throughout the entire grievance process or just for a live hearing, though § 106.45(b)(5)(iv) ensures that parties would retain the right to select their own advisor of choice and refuse any such offer by a recipient. To allow recipients to meet their obligations with as much flexibility as possible, the

Department declines to require recipients to pre-screen a panel of assigned advisors from which a party could make a selection at a hearing, or to require provided advisors to receive training from the recipient. The final regulations do not preclude a recipient from taking such steps, in the recipient's discretion, and the final regulations require decision-makers to be trained specifically in issues of relevance. The Department reiterates that a recipient may fulfill its obligation to provide an advisor for a party to conduct cross-examination at a hearing without hiring an attorney to be that party's advisor, and that remains true regardless of whether the other party has hired a lawyer as an advisor of choice. The final regulations do not create an ''arms race'' with respect to the hiring of attorneys by recipients, and recipients remain free to decide whether they wish to incur the cost or burden of providing attorneys when they must provide an advisor to a party at a hearing to conduct cross-examination. This provision does not impose an unfunded mandate on recipients because recipients retain discretion whether to incur the cost of hiring attorney or non-attorney advisors.

The Department does not believe that the final regulations' expectation for an advisor to ''conduct cross-examination on behalf of a party'' constitutes the practice of law; a Title IX adjudication is not a civil or criminal trial so the advisor is not representing a party in a court of law, and the advisor is not required to perform any function beyond relaying a party's desired questions to the other party and witnesses. However, to the extent that a recipient is concerned that State bar associations do, or may, consider party advisors at a live hearing to be practicing law, the recipient retains discretion to select attorneys as assigned party advisors. Whether attorneys become more involved in Title IX adjudications as a result is not the Department's concern; the final regulations focus on those procedural protections necessary to ensure that a Title IX grievance process is designed to reach accurate determinations.

The Department believes that § 106.45(b)(6)(i), as revised in the final regulations, addresses commenters' concerns that parties will challenge the outcome based on the recipient's choice of advisor. This provision clarifies that the choice of advisor where one must be provided by the recipient lies in the recipient's sound discretion, and removes the ''aligned with that party'' criterion so that a party cannot challenge the recipient's choice by claiming the assigned advisor was not sufficiently aligned. Whether or not the recipient complied with this provision is now more objectively determined, *i.e.,* by observing whether the assigned advisor ''conducted cross-examination on behalf of the party'' which in essence only needs to mean relaying the party's desired questions to the other party and witnesses. The Department does not have control over claims made by parties against recipients in private litigation, but clarifies here that this provision does not impose a burden on the recipient to ensure the ''adequacy'' of an assigned advisor, merely that the assigned advisor performs the role described in this provision.

The Department disagrees that this provision exceeds the Department's statutory authority under Title IX. The Department believes this provision furthers Title IX's non-discrimination mandate by contributing to a fair grievance process leading to reliable outcomes, which is necessary in order to ensure that recipients appropriately remedy sexual harassment occurring in education programs or activities. The Department is authorized to promulgate rules and regulations to effectuate the purpose of Title IX, including regulatory requirements that do not, themselves, purport to represent a definition of discrimination. Particular requirements of a grievance process are no different in kind from the regulatory requirements the Supreme Court has expressly acknowledged fall under the Department's regulatory authority. For example, the Department's regulations have long required recipients to have grievance procedures in place even though the absence of grievance procedures does not, itself, constitute discrimination,[1320] because adopting and publishing grievance procedures for the ''prompt and equitable'' resolution of sex discrimination [1321] makes it more likely that a recipient will not engage in sex discrimination and will remedy any discrimination brought to the recipient's attention by a student or employee. Similarly, the Department has carefully considered what procedures appropriately address allegations of sex discrimination in the form of sexual harassment and has determined that the § 106.45 grievance process, including cross-examination conducted through advisors in postsecondary institutions, effectuates Title IX's non-discrimination mandate by making it less likely that a recipient will fail to accurately determine whether a student or employee has been victimized by sexual harassment and needs remedies to restore or preserve equal access to the recipient's education programs or activities.

The Department appreciates commenters' requests for clarification of this provision. Some clarification requests have been answered by the modifications made to this provision, such as removal of the ''aligned with that party'' language and specification that when a recipient must provide an advisor during a hearing the selection of that advisor is ''of the recipient's choice'' and the assigned advisor ''may be, but is not required to be, an attorney.''

As to commenters' additional questions about this provision: The assigned advisor is not required to assume the party's version of events is accurate, but the assigned advisor still must conduct cross-examination on behalf of the party. The only limitation on recipients' discretion to restrict advisors' active participation in proceedings is this provision's requirement that advisors conduct cross-examination, so recipients remain free to apply rules (equally applicable to both parties) restricting advisor participation in non-cross examination aspects of the hearing. Recipients cannot impose a cost or fee limitation on a party's advisor of choice and if required to provide a party with an advisor at a hearing, the recipient may not charge the party any fee. The final regulations require the recipient to keep confidential the identity of any individual who has made a report or complaint of sex discrimination, including any individual who has made a report or filed a formal complaint of sexual harassment, any complainant, any individual who has been reported to be the perpetrator of sex discrimination, any respondent, and any witness, except as may be permitted by the FERPA statute or regulations, 20 U.S.C. 1232g and 34 CFR part 99, or as required by law, or to carry out the purposes of 34 CFR part 106, including the conduct of any hearing. These confidentiality

[1320] *Cannon* v. *Univ. of Chicago,* 441 U.S. 677, 704 (1979) (noting that the primary congressional purposes behind Title IX were ''to avoid the use of Federal resources to support discriminatory practices'' and to ''provide individual citizens effective protection against those practices.''); *see also Gebser,* 524 U.S. at 291–92 (refusing to allow plaintiff to pursue a claim under Title IX based on the school's failure to comply with the Department's regulatory requirement to adopt and publish prompt and equitable grievance procedures, stating ''And in any event, the failure to promulgate a grievance procedure does not itself constitute 'discrimination' under Title IX. Of course, the Department of Education could enforce the requirement administratively: Agencies generally have authority to promulgate and enforce requirements that effectuate the statute's non-discrimination mandate, 20 U.S.C. 1682, even if those requirements do not purport to represent a definition of discrimination under the statute.'').

[1321] 34 CFR 106.9; § 106.8(c).

obligations may affect a recipient's ability to offer parties a recipient-provided advisor to conduct cross-examination *in addition* to allowing the parties' advisors of choice to appear at the hearing. The final regulations do not preclude recipients from adopting a rule that requires parties to inform the recipient in advance of a hearing whether the party intends to bring an advisor of choice to the hearing; but if a party then appears at a hearing without an advisor the recipient would need to stop the hearing as necessary to permit the recipient to assign an advisor to that party to conduct cross-examination. A party cannot ''fire'' an assigned advisor during the hearing, but if the party correctly asserts that the assigned advisor is refusing to ''conduct cross-examination on the party's behalf'' then the recipient is obligated to provide the party an advisor to perform that function, whether that means counseling the assigned advisor to perform that role, or stopping the hearing to assign a different advisor. If a party to whom the recipient assigns an advisor refuses to work with the advisor when the advisor is willing to conduct cross-examination on the party's behalf, then for reasons described above that party has no right of self-representation with respect to conducting cross-examination, and that party would not be able to pose any cross-examination questions. Whether advisors also may conduct direct examination is left to a recipient's discretion (though any rule in this regard must apply equally to both parties). This provision applies to parties who are a recipient's employees, including at-will employees; recipients may not impose training or competency assessments on advisors of choice selected by parties, but nothing in the final regulations prevents a recipient from training and assessing the competency of its own employees whom the recipient may desire to appoint as party advisors.

The Department declines to require training for assigned advisors because the goal of this provision is not to make parties ''feel adequately represented'' but rather to ensure that the parties have the opportunity for their own view of the case to be probed in front of the decision-maker. Whether a party views an advisor of choice as ''representing'' the party during a live hearing or not, this provision only requires recipients to permit advisor participation on the party's behalf *to conduct cross-examination;* not to ''represent'' the party at the live hearing. A recipient may, but is not required to, allow advisors to ''represent'' parties during the entire live hearing (or, for that matter, throughout the entire grievance process).[1322]

The Department notes that nothing in these final regulations infringes on a recipient's ability to enforce its own codes of conduct with respect to conduct other than Title IX sexual harassment, and thus if a party or advisor ''breaks a recipients' rules'' during a hearing the recipient retains authority to respond in accordance with its codes of conduct, so long as the recipient is also complying with all obligations under § 106.45. If a party's advisor of choice refuses to comply with a recipient's rules of decorum (for example, by insisting on yelling at the other party), the recipient may provide that party with an advisor to conduct cross-examination on behalf of that party. If a provided advisor refuses to comply with a recipient's rules of decorum, the recipient may provide that party with a different advisor to conduct cross-examination on behalf of that party. The Department also notes that § 106.71 protects participants in a Title IX grievance process against retaliation so an action taken against any participant in a hearing may not be taken for the purpose of interfering with any right or privilege secured by Title IX or because the individual has participated in any manner in a hearing.

Changes: The Department has revised § 106.45(b)(6)(i) to remove the phrase ''aligned with that party'' and clarify that if a party does not have an advisor present at the live hearing, the recipient must provide without fee or charge to that party an advisor of the recipient's choice, who may be, but is not required to be, an attorney, to conduct cross-examination on behalf of that party.

We have also added § 106.71, prohibiting retaliation and providing in pertinent part that no recipient or other person may intimidate, threaten, coerce, or discriminate against any individual for the purpose of interfering with any right or privilege secured by Title IX or because the individual has made a report or complaint, testified, assisted, or participated or refused to participate in any manner in an investigation, proceeding, or hearing; and the recipient must keep confidential the identity of any individual who has made a report or complaint of sex discrimination, including any individual who has made a report or filed a formal complaint of sexual harassment, any complainant, any individual who has been reported to be the perpetrator of sex discrimination, any respondent, and any witness, except as required by the FERPA statute or regulations, 20 U.S.C. 1232g and 34 CFR part 99, or as required by law, or to carry out the purposes of 34 CFR part 106, including the conduct of any investigation or hearing.

[1322] Section 106.45(b)(5)(iv).

Explain Decision To Exclude Questions

Comments: Some commenters supported the requirement in § 106.45(b)(6)(i) that decision-makers explain to the party's advisor posing a question any decision to exclude a question as not relevant. Commenters asserted that they have observed Title IX proceedings in which recipients refused to allow a party's questions to be asked of the opposing party with no explanation as to how or why the question was not relevant to the allegations. Commenters asserted that this requirement may reveal and prevent bias in proceedings by making the decision-maker explain the rationale for deciding that a question is not relevant.

Other commenters opposed the requirement that decision-makers explain any reason for excluding a question as not relevant, arguing that decision-makers are usually not lawyers or judges and are not legally trained to make complex rulings, so that requiring on-the-spot decisions about relevance will expose recipients to legal liability. Commenters argued that this provision exceeds procedural norms in criminal courts where rules of procedure do not demand that judges provide explanation for rulings. Commenters argued that parties should have the right to appeal wrongful decisions to exclude evidence and thus it is unnecessary to require decision-makers to explain exclusion decisions during the hearing. Commenters wondered whether the parties are allowed to argue with the decision-maker upon hearing a decision-maker's explanation about the relevance of a question and expressed concern that protracted arguments over relevance would lengthen hearings and feel tortuous for students. Commenters expressed concern that the requirement to explain irrelevancy decisions will disincentivize decision-makers from properly excluding questions that violate the rape shield protections.

Commenters proposed that the provision be modified to require decision-makers to explain the decision to exclude questions in writing after the hearing rather than during the hearing. Commenters suggested that the final regulations also give decision-makers the right to screen questions before the hearing so the decision-maker has adequate time to consider whether the questions are relevant. Commenters wondered what type of information a

decision-maker is required to give to meet this provision. Commenters argued this provision is meaningless because if a decision-maker decides a question is irrelevant, presumably the decision-maker believes the question does not tend to prove the matter at issue and thus, telling the decision-maker to state self-evidently during the hearing: ''This question is not relevant because it is not relevant'' adds no value to the proceeding and only allows party advisors to bog down the hearing by demanding that rote explanation.

Discussion: The Department agrees with commenters that a decision-maker's refusal to explain why questions are excluded has caused problems with the accuracy and perception of legitimacy of recipients' Title IX proceedings and thus believes that this provision reasonably prevents those problems and helps ensure that decision-makers are making relevance determinations without bias for or against complainants or respondents.

The Department disagrees that this provision requires legal expertise on the part of a decision-maker. One of the benefits to the final regulations' refusal to import wholesale any set of rules of evidence is that the legal sophistication required to navigate rules of evidence results often from determining the scope of exceptions to admissibility rules. By contrast, the decision-maker's only evidentiary threshold for admissibility or exclusion of questions and evidence is whether the question or evidence is relevant—not whether it would then still be excluded under the myriad of other evidentiary rules and exceptions that apply under, for example, the Federal Rules of Evidence. While this provision does require ''on the spot'' determinations about a question's relevance, the decision-maker must be trained in how to conduct a grievance process, specifically including how to determine relevance within the scope of this provision's rape shield language and the final regulations' protection of privileged information and parties' treatment records. Contrary to some commenters' assertions, judges in civil and criminal trials often do make ''on the spot'' relevance determinations, and while this provision requires the decision-maker to ''explain'' the decision in a way that rules of procedure do not require of judges, the Department believes that this provision will aid parties in having confidence that Title IX decision-makers are appropriately considering all relevant evidence. The final regulations contemplate that decision-makers often will be laypersons, not judges or lawyers. A judge's relevance ruling from the bench needs no in-the-moment explanation because a judge has the legal sophistication to have reached a ruling against the backdrop of the judge's legal knowledge. By contrast, a layperson's determination that a question is not relevant is made by applying logic and common sense, but not against a backdrop of legal expertise. Thus, an explanation of how or why the question was irrelevant to the allegations at issue, or is deemed irrelevant by these final regulations (for example, in the case of sexual predisposition or prior sexual behavior information) provides transparency for the parties to understand a decision-maker's relevance determinations.

Commenters correctly note that parties may appeal erroneous relevance determinations, if they affected the outcome, because § 106.45(b)(8) allows the parties equal appeal rights on grounds that include procedural irregularity that affected the outcome. However, asking the decision-maker to also explain the exclusion of questions during the hearing does not affect the parties' appeal rights and may reduce the number of instances in which a party feels the need to appeal on this basis because the decision-maker will have explained the decision during the hearing. The final regulations do not preclude a recipient from adopting a rule (applied equally to both parties) that does, or does not, give parties or advisors the right to discuss the relevance determination with the decision-maker during the hearing. If a recipient believes that arguments about a relevance determination during a hearing would unnecessarily protract the hearing or become uncomfortable for parties, the recipient may adopt a rule that prevents parties and advisors from challenging the relevance determination (after receiving the decision-maker's explanation) during the hearing.

The Department does not believe this requirement will negatively affect a decision-maker's incentive to properly exclude questions under this provision's rape shield protections. The decision-maker is under an obligation to exclude such questions and evidence, and to only evaluate relevant evidence in reaching a determination. Requiring the decision-maker to explain relevance decisions during the hearing only reinforces the decision-maker's responsibility to accurately determine relevance, including the irrelevance of information barred under the rape shield language. Further, we have revised § 106.45(b)(1)(iii) to require decision-makers (and investigators) to be trained in issues of relevance, including how to apply the rape shield protections in these final regulations.

Requiring the decision-maker to explain decisions about irrelevance also helps reinforce the provision in § 106.45(b)(1)(iii) that a decision-maker must not have a bias for or against complaints or respondents generally or an individual complainant or respondent. Providing a reason for the decision reveals whether the decision-maker is maintaining a neutral, objective position throughout the hearing. The explanation for the decision may reveal any bias for a particular complainant or respondent or a bias for or against complainants or respondents generally.

The Department declines to change § 106.45(b)(6)(i) to require after-hearing explanation of relevance determinations, but nothing in the final regulations precludes a recipient from adopting a rule that the decision-maker will, for example, send to the parties after the hearing any revisions to the decision-maker's explanation that was provided during the hearing. In order to preserve the benefits of live, back-and-forth questioning and follow-up questioning unique to cross-examination, the Department declines to impose a requirement that questions be submitted for screening prior to the hearing (or during the hearing); the final regulations revise this provision to clarify that cross-examination must occur ''directly, orally, and in real time'' during the live hearing, balanced by the express provision that questions asked of parties and witnesses must be relevant, and before a party or witness answers a cross-examination question the decision-maker must determine relevance (and explain a determination of irrelevance).

This provision does not require a decision-maker to give a lengthy or complicated explanation; it is sufficient, for example, for a decision-maker to explain that a question is irrelevant because the question calls for prior sexual behavior information without meeting one of the two exceptions, or because the question asks about a detail that is not probative of any material fact concerning the allegations. No lengthy or complicated exposition is required to satisfy this provision. Accordingly, the Department does not believe this requirement will ''bog down'' the hearing. We have revised this provision by moving the requirement for the decision-maker to explain determinations of irrelevance to be combined with a sentence that did not appear in the NPRM, instructing the decision-maker to determine the relevance of a cross-examination

question before the party or witness answers the question and to explain any decision to exclude a question as not relevant.

Changes: The Department has revised § 106.45(b)(6)(i) to add the phrase ''directly, orally, and in real time'' to describe how cross-examination must be conducted, thereby precluding a requirement that questions be submitted or screened prior to the live hearing. We have further revised this provision by moving the requirement for the decision-maker to explain determinations of irrelevance to be combined with a sentence that did not appear in the NPRM, instructing the decision-maker to determine the relevance of a cross-examination or other question before the party or witness answers the question and to explain any decision to exclude a question as not relevant. We have also revised § 106.45(b)(1)(iii) to require training for decision-makers on issues of relevance, including application of the rape shield protections in § 106.45(b)(6).

No Reliance on Statements of a Party Who Does Not Submit to Cross-Examination

Comments: Some commenters supported the provision in § 106.45(b)(6)(i) prohibiting a decision-maker from relying on statements made by a party or witness who does not submit to cross-examination in a postsecondary institution live hearing, because this requirement ensures that only statements that have been tested for credibility, in the ''crucible'' of cross-examination, will be considered. Commenters asserted that Title IX sexual misconduct cases often concern accusations of a ''he said/she said'' nature where accounts differ between complainant and respondent and corroborating evidence is inconclusive or non-existent, thus making cross-examined party statements critical to reaching a fair determination.

Other commenters supported this provision but argued that one exception should apply: Statements against a party's own interest should remain admissible even where the party refuses to appear or testify. Commenters argued that without this change, this provision incentivizes respondents who have already been convicted criminally not to appear for hearings because the respondent's absence would ensure that any admission, such as part of a plea bargain, could not be considered.

Other commenters opposed the provision that a decision-maker cannot rely on statements of a party or witness who does not submit to cross-examination. Some commenters argued that if a party refuses to submit to cross-examination, the consequence should be dismissal of the proceeding, not exclusion of the refusing party's statements.[1323]

Commenters argued that a respondent may refuse to submit to cross-examination in a Title IX hearing when criminal charges are also pending against the respondent due to concerns about self-incrimination and that this provision should prevent a decision-maker from drawing any adverse inferences against a respondent based on a respondent's refusal to submit to cross-examination because a decision by an accused not to testify has no probative value and is irrelevant to the issue of culpability. Commenters expressed concern that public institutions could be opened up to legal challenges alleging violation of respondents' Fifth Amendment right against self-incrimination because where a respondent answered some questions, but refused to answer other questions due to refusal to self-incriminate, the proposed rules would demand exclusion of all the respondent's statements, even as to the information about which the respondent was subjected to cross-examination. Commenters argued this provision is unfair to respondents because a respondent may not want to appear for a Title IX hearing for fear that oral testimony could be admitted in a future criminal or civil proceeding, yet § 106.45(b)(6)(i) will ''all but require'' the adjudicator to make a finding of responsibility against the respondent if the reporting party testifies, is cross-examined, and is credible. Other commenters argued that it is unfair that a complainant's entire statement would be excluded where a respondent refused to appear and thus the complainant could not be cross-examined by the respondent's advisor.

Commenters argued that this provision makes cross-examination mandatory and forces survivors into a Hobson's choice by requiring the decision-maker to disregard the statement of a complainant who does not agree to be cross-examined. Commenters argued that it is unfair to exclude a complainant's statements from consideration when often a complainant will not wish to submit to cross-examination due to fear of retaliation by a respondent, or chooses not to participate in a grievance process initiated against the complainant's wishes (such as where the Title IX Coordinator signs a formal complaint). Commenters argued that this provision requires exclusion of a complainant's statements even where the complainant's absence from a hearing is because the respondent wrongfully procured the complainant's absence, in contravention of the doctrine of forfeiture by wrongdoing.[1324]

Commenters argued that in criminal cases, the right to cross-examine the prosecution's hearsay declarants only extends to declarants who, at the time of their statement, understood they were giving evidence likely to be used in a later prosecution, and the proposed regulations thus inappropriately exclude a common category of statements gathered in Title IX investigations: Statements to friends and family who are consoling a victim and are not aware that any crime is under investigation.[1325] Commenters argued that excluding a complainant's statement, including the initial formal complaint, just because a survivor does not want to undergo cross-examination is prejudicial and not a trauma-informed practice, when even reporting sexual misconduct requires bravery. Commenters argued that this provision is punitive when survivors are already required to participate in an investigation that can last for months. Commenters argued it is unfair to punish a survivor by denying relief for a meritorious claim just because key witnesses refuse to testify or refuse to submit to cross-examination.

Commenters argued that this provision may make it difficult for schools to address situations where they know of predators operating on their campuses, as victim after victim declines to participate in cross-examination, potentially creating incentives for schools to coerce unwilling victims into participating in traumatizing processes, leading to further breakdown in trust between students and their institutions.

[1323] Commenters cited: *Doe* v. *Univ. of Cincinnati,* 872 F.3d 393, 401–02 (6th Cir. 2017) (''Given the parties' competing claims, and the lack of corroborative evidence to support or refute Roe's allegations, the present case left the [recipient] with a choice between believing an accuser and an accused. Yet, the [recipient] resolved this problem of credibility without assessing Roe's credibility. In fact, it decided plaintiff's fate without seeing or hearing from Roe at all. That is disturbing and, in this case, a denial of due process.'') (internal quotation marks and citations omitted).

[1324] Commenters cited: *Reynolds* v. *United States,* 98 U.S. 145, 158 (1878) for the proposition that forfeiture by wrongdoing is a doctrine that says a respondent gives up his right to confront the witness when he has procured that person's absence, and arguing that the NPRM requires exclusion of a complainant's statements even if the complainant's absence is due to the respondent's wrongdoing.

[1325] Commenters cited: *Crawford* v. *Washington,* 541 U.S. 36 (2004).

Commenters argued that the statements of witnesses should not be excluded due to non-appearance or refusal to submit to cross-examination, because witnesses may be unavailable for legitimate reasons such as studying abroad, illness, graduation, out-of-state residency, class activities, and so forth. Some commenters suggested that for witnesses (but not parties) written statements or telephonic testimony should be sufficient.

Commenters argued that parties and witnesses may be unavailable for a hearing for a variety of reasons unrelated to the reliability of their statements, including death, or disability that occurs after an investigation has begun but before the hearing occurs.

Commenters argued that the Federal Rules of Evidence [1326] allow out-of-court statements to be admitted in certain circumstances and for limited purposes, while § 106.45(b)(6)(i) creates a ''draconian'' rule that excludes even relevant, reliable statements, a result that is particularly unfair in light of the fact that recipients do not have subpoena powers to compel parties and witnesses to attend hearings. Commenters argued that courts do not impose cross-examination as a due process requirement where the legislature has not granted subpoena power to an administrative body because to do so would allow the administrative body to act in a manner contrary to its enabling statute, and public universities do not have subpoena power; thus, commenters argued, the university cannot be foreclosed from relying on hearsay testimony of absent witnesses.[1327] Commenters argued that this provision should be modified so that a recipient may consider all information presented during the investigation and hearing regardless of who appears at the hearing, so that videos, texts, and statements are all evaluated on their own merits. Commenters argued that this provision creates a blanket exclusion of hearsay evidence, yet the Supreme Court has never announced a ''blanket rejection . . . of administrative reliance on hearsay irrespective of reliability and probative value'' and hearsay evidence may constitute substantial evidence supporting an administrative finding.[1328]

Commenters suggested that this provision be modified so that the consequence of a party failing to appear or answer questions is a change of the standard of evidence, not exclusion of the party's statements, so that if a complainant refuses to testify, the standard of evidence is increased to the clear and convincing evidence standard, while if the respondent refuses to testify, the standard of evidence is decreased to the preponderance of the evidence standard.

Commenters requested clarification that where a respondent fails to appear for a hearing, the recipient may still enter a default finding against the respondent and implement protective measures for the complainant.

Commenters argued that the final regulations should allow for evidence not subject to cross-examination (''uncrossed'') to be taken into account ''for what it's worth'' by the decision-maker who may assign appropriate weight to uncrossed statements rather than disregarding them altogether, so as to provide more due process and fundamental fairness to both parties in the search for truth.

Commenters asked for clarification of a number of questions including: Does this provision exclude only statements made during the hearing or to all of a party's statements even those made during the investigation, or prior to a formal complaint being filed? What is the threshold for not submitting to cross-examination (*e.g.,* if a party answers by saying ''I don't want to answer that'' or answers several questions but refuses to answer one particular question, has the party ''submitted to cross-examination'' or not, and does the reason for refusing to answer matter, for instance where a respondent refuses to answer due to self-incrimination concerns, or a complainant refuses to answer due to good faith belief that the question violates rape shield protections and disagrees with the decision-maker's decision to the contrary)? Does exclusion of ''any statement'' include, for example, text messages or email sent by the party especially where one party submitted to cross-examination and the other did not, but the text message exchange was between the two parties? Are decision-makers able to consider information provided in documents during the investigation stage (*e.g.,* police reports, SANE (sexual assault nurse examiner) reports etc.), if certain witnesses referenced in those documents (*e.g.,* police officers and SANE nurses) do not submit to cross-examination or refuse to answer a specific question during cross-examination? If a party or witness refuses to answer a question posed by the decision-maker (not by a party advisor) must the decision-maker exclude the party's statements? Commenters suggested making this provision more precise by replacing ''does not submit to cross-examination'' with ''does not appear for cross-examination.'' Commenters asserted that parties should have the right to ''waive a question'' without the party's entire statement being disregarded.

Discussion: The Department appreciates commenters' support for this provision in § 106.45(b)(6)(i) and agrees that it ensures that in the postsecondary context, only statements that have been tested for credibility will be considered by the decision-maker in reaching a determination regarding responsibility. Where a Title IX sexual harassment allegation does not turn on the credibility of the parties or witnesses, this provision allows the other evidence to be considered even though a party's statements are not relied on due to the party's or witness's non-appearance or refusal to submit to cross-examination. The Department declines to add exceptions to this provision, such as permitting reliance on statements against a party's interest. Determining whether a statement is against a party's interest, and applying the conditions and exceptions that apply in evidentiary codes that utilize such a rule,[1329] would risk complicating a fact-finding process so that a non-attorney decision-maker—even when given training in how to impartially conduct a grievance process—may not be equipped to conduct the adjudication.

The Department declines to change this provision so the consequence of refusal to submit to cross-examination is dismissal of the case rather than non-reliance on the refusing party or witness's statement. Such a change would operate only against complainants' interests because a respondent could choose to refuse cross-examination knowing the result would be dismissal (which, presumably, is a positive result in a respondent's view). This would essentially give respondents the ability to control the outcome of the hearing, running contrary to the purpose

Cir. 1980) (''We have rejected a per se approach that brands evidence as insubstantial solely because it bears the hearsay label. . . . Instead, we evaluate the weight each item of hearsay should receive according to the item's truthfulness, reasonableness, and credibility.'').

[1329] *E.g.,* Fed. R. Evid. 804(a) (describing conditions that constitute ''unavailability'' of a declarant); Fed. R. Evid. 804(b) (listing various exceptions to hearsay exclusion where declarant is unavailable).

of the final regulations in giving both parties equal opportunity to meaningfully be heard before an impartial decision-maker reaches a determination regarding responsibility.

As commenters acknowledged, not all Title IX sexual harassment allegations rely on party testimony; for example, in some situations video evidence of the underlying incident is available, and in such circumstances even if both parties fail to appear or submit to cross-examination the decision-maker would disregard party statements yet proceed to evaluate remaining evidence, including video evidence that does not constitute statements or to the extent that the video contains non-statement evidence. If a party or witness makes a statement in the video, then the decision-maker may not rely on the statement of that party or witness in reaching a determination regarding responsibility. The Department understands commenters' arguments that courts have noted the unfairness of reaching a determination without ever probing or testing the credibility of the complainant.[1330] But § 106.45(b)(6)(i) does not raise such unfairness, because the central unfairness is where a decision-maker ''resolved this problem of credibility'' in favor of the party whose statements remained untested. The nature of such unfairness is not present under the final regulations where, if a party does not appear or submit to cross-examination the party's statement cannot be relied on—this provision does not allow a decision-maker to ''resolve'' credibility in favor of a party whose statements remain untested through cross-examination.

The Department understands commenters concerns that respondents, complainants, and witnesses may be absent from a hearing, or may refuse to submit to cross-examination, for a variety of reasons, including a respondent's self-incrimination concerns regarding a related criminal proceeding, a complainant's reluctance to be cross-examined, or a witness studying abroad, among many other reasons. In response to commenters' concerns, the Department has revised the proposed regulations as follows: (1) We have revised § 106.45(b)(6)(i) to state that where a decision-maker must not rely on an absent or non-cross examined party or witness's statements, the decision-maker cannot draw any inferences about the determination regarding responsibility based on such absence or refusal to be cross-examined; (2) We have revised § 106.45(b)(6)(i) to grant a recipient discretion to hold the entire hearing virtually using technology that enables any or all participants to appear remotely; (3) § 106.71 expressly prohibits retaliation against any party, witness, or other person exercising rights under Title IX, including the right to participate or refuse to participate in a grievance process; (4) § 106.45(b)(3)(ii) grants a recipient discretion to dismiss a formal complaint, or allegations therein, where the complainant notifies the Title IX Coordinator in writing that the complainants wishes to withdraw the allegations, or the respondent is no longer enrolled or employed by the recipient, or specific circumstances prevent the recipient from gathering evidence sufficient to reach a determination. These changes address many of the concerns raised by commenters stemming from reasons why parties or witnesses may not wish to participate and the consequences of non-participation.

It is possible that one party's refusal to submit to cross-examination could result in the other party's statements remaining under consideration by the decision-maker even though the refusing party's statements are excluded (*e.g.,* where one party refuses to submit to cross-examination, yet that party's advisor cross-examines the opposing party, whose statements are then considered by the decision-maker), but the opportunity of the refusing party to conduct cross-examination of the opposing party ensures that the opposing party's statements are not considered unless they have been tested via cross-examination. Because the final regulations preclude a decision-maker from drawing any inferences about the determination regarding responsibility based solely on a party's refusal to be cross-examined, the adjudication can still yield a fair, reliable outcome even where, for example, the refusing party is a respondent exercising a Fifth Amendment right against self-incrimination.

Where one party appears at the hearing and the other party does not, § 106.45(b)(6)(i) still states: ''If a party does not have an advisor present at the hearing, the recipient must provide without fee or charge to that party an advisor of the recipient's choice, who may be, but is not required to be, an attorney, to conduct cross-examination on behalf of that party.'' Thus, a party's advisor may appear and conduct cross-examination even when the party whom they are advising does not appear. Similarly, where one party does not appear and that party's advisor of choice does not appear, a recipient-provided advisor must still cross-examine the other, appearing party ''on behalf of'' the non-appearing party, resulting in consideration of the appearing party's statements but not the non-appearing party's statements (without any inference being drawn based on the non-appearance). Because the statements of the appearing party were tested via cross-examination, a fair, reliable outcome can result in such a situation.

The Department disagrees that this provision leaves complainants (or respondents) in a Hobson's choice. The final regulations address a complainant's fear of retaliation, the inconvenience of appearing at a hearing, and the emotional trauma of personal confrontation between the parties. Further, as noted above, if a complainant still does not wish to appear or be cross-examined, an appointed advisor may conduct cross-examination of the respondent (if the respondent does appear) so that a decision-maker only considers the respondent's statements if the statements have been tested for credibility. Where a grievance process is initiated because the Title IX Coordinator, and not the complainant, signed the formal complaint, the complainant who did not wish to initiate a grievance process remains under no obligation to then participate in the grievance process, and the Department does not believe that exclusion of the complainant's statements in such a scenario is unfair to the complainant, who did not wish to file a formal complaint in the first place yet remains eligible to receive supportive measures protecting the complainant's equal access to education. If the respondent ''wrongfully procures'' a complainant's absence, for example, through intimidation or threats of violence, and the recipient has notice of that misconduct by the respondent (which likely constitutes prohibited retaliation), the recipient must remedy the retaliation, perhaps by rescheduling the

[1330] *See, e.g., Doe* v. *Univ. of Cincinnati,* 872 F.3d 393, 401–02 (6th Cir. 2017) (''Given the parties' competing claims, and the lack of corroborative evidence to support or refute Roe's allegations, the present case left the [recipient] with a choice between believing an accuser and an accused. Yet, the [recipient] resolved this problem of credibility without assessing Roe's credibility. In fact, it decided plaintiff's fate without seeing or hearing from Roe at all. That is disturbing and, in this case, a denial of due process.'') (internal quotation marks and citations omitted); *Doe* v. *Purdue Univ. et al.,* 928 F.3d 652, 664 (7th Cir. 2019) (finding it ''particularly concerning'' that the university concluded the complainant ''was the more credible witness—in fact, that she was credible at all—without ever speaking to her in person. Indeed, they did not even receive a statement written by Jane herself, much less a sworn statement.'').

hearing to occur at a later time when the complainant may appear with safety measures in place.

The Department disagrees that this provision needs to be modified so that a party's statements to family or friends would still be relied upon even when the party does not submit to cross-examination. Even if the family member or friend did appear and submit to cross-examination, where the family member's or friend's testimony consists of recounting the statement of the party, and where the party does not submit to cross-examination, it would be unfair and potentially lead to an erroneous outcome to rely on statements untested via cross-examination.[1331] Further, such a modification would likely operate to incentivize parties to avoid submitting to cross-examination if a family member or friend could essentially testify by recounting the party's own statements. The Department understands that courts of law operate under comprehensive, complex rules of evidence under the auspices of judges legally trained to apply those rules of evidence (which often intersect with other procedural and substantive legal rules, such as rules of procedure, and constitutional rights). Such comprehensive rules of evidence admit hearsay (generally, out-of-court statements offered to prove the truth of the matter asserted) under certain conditions, which differ in criminal and civil trials. Because Title IX grievance processes are not court proceedings, comprehensive rules of evidence do not, and need not, apply. Rather, the Department has prescribed procedures designed to achieve a fair, reliable outcome in the context of sexual harassment in an education program or activity where the conduct alleged constitutes sex discrimination under Title IX. While judges in courts of law are competent to apply comprehensive, complicated rules of evidence, the Department does not believe that expectation is fair to impose on recipients, whose primary function is to provide education, not to resolve disputes between students and employees.

Absent importing comprehensive rules of evidence, the alternative is to apply a bright-line rule that instructs a decision-maker to either consider, or not consider, statements made by a person who does not submit to cross-examination. The Department believes that in the context of sexual harassment allegations under Title IX, a rule of non-reliance on untested statements is more likely to lead to reliable outcomes than a rule of reliance on untested statements. If statements untested by cross-examination may still be considered and relied on, the benefits of cross-examination as a truth-seeking device will largely be lost in the Title IX grievance process. Thus, the Department declines to import a rule of evidence that, for example, allows a witness's statement to be relied on where the statement was made to friends or family without awareness that a crime was under investigation.

The Department notes that the Supreme Court case cited to by some commenters urging a rule that would essentially allow non-testimonial statements to be considered without having been tested by cross-examination, analyzed a judicially-implied hearsay exception in light of the constitutional (Sixth Amendment's Confrontation Clause) right of a criminal defendant to confront witnesses; the Court reasoned that the plain language of the Confrontation Clause refers to ''witnesses,'' that the dictionary definition of a witness is one who ''bears testimony'' and thus the Confrontation Clause generally does not allow testimonial statements—such as formal statements, solemn declarations, or affirmations, intended to prove or establish a fact—to be used against a criminal defendant unless such statements are made by a person subject to cross-examination in court, or where the defendant had a previous opportunity to cross-examine the person making the statement.[1332] The Court reasoned that hearsay exceptions as applied to non-testimonial statements, such as business records, did not raise the core concern of the Confrontation Clause and, thus, rules of evidence permitting admission of non-testimonial statements under specific hearsay exceptions did not raise constitutional problems.[1333] While commenters correctly observe that the Confrontation Clause is concerned with use of *testimonial* statements against criminal defendants, even if use of a non-testimonial statement poses no constitutional problem under the Sixth Amendment, the statement would still need to meet a hearsay exception under applicable rules of evidence in a criminal court. For reasons discussed above, the Department does not wish to impose a complex set of evidentiary rules on recipients, whether patterned after civil or criminal rules. Even though a party's statements that are not subject to cross-examination might be admissible in a civil or criminal trial under rules of evidence that apply in those contexts, the Department has determined that such untested statements, whether testimonial or non-testimonial, should not be relied on in a Title IX grievance process. Reliance on party and witness statements that have not been tested for credibility via cross-examination undermines party and public confidence in the fairness and accuracy of the determinations reached by postsecondary institutions. This provision need not result in failure to consider relevant evidence because parties and witnesses retain the opportunity to have their own statements considered, by submitting to cross-examination.

In cases where a complainant files a formal complaint, and then does not appear or refuses to be cross-examined at the hearing, this provision excludes the complainant's statements, including allegations in a formal complaint. The Department does not believe this is prejudicial or punitive against a complainant because the final regulations provide complainants with opportunities to submit to cross-examination and thus have their statements considered, in ways that lessen the inconvenience and potential trauma of such a procedure. Complainants may request (and the recipient must grant the request) for the live hearing to be held with the parties in separate rooms so as not to come face to face with the respondent; questioning cannot be conducted by the respondent personally; the recipient may allow parties to appear virtually for the live hearing; complainants have the right to an advisor of choice to support and assist the party throughout the grievance process; and recipients may establish rules of decorum to ensure questioning is conducted in a respectful manner. Further, recipients must offer supportive measures to a complainant

[1331] *E.g., Crawford* v. *Washington,* 541 U.S. 36 (2004) (although decided under the Sixth Amendment's Confrontation Clause which only applies to criminal trials, the Supreme Court discussed how the Confrontation Clause stands for the principle that written statements are no substitute for cross-examination of witnesses in front of the trier of fact); *id.* at 49 (noting that cross-examining the witness who simply reads or recounts the statements of another witness in no way accomplishes the purposes and benefits of cross-examination) *id.* at 50, 51, 53 (''Raleigh was, after all, perfectly free to confront those who read Cobham's confession in court'') (referring to the trial of Sir Walter Raleigh as a ''paradigmatic confrontation violation''). Although the Confrontation Clause does not apply in a noncriminal trial, the principle of cross-examining witness before allowing statements to be used is so deeply rooted in American jurisprudence that ensuring that these final regulations reflect that fundamental American notion of justice increases party and public confidence in the legitimacy of Title IX adjudications in postsecondary institutions.

[1332] *Crawford* v. *Washington,* 541 U.S. 36, 50–55 (2004).

[1333] *Id.* at 56.

which may, for example, forbid contact or communication between the parties. The Department believes that without the credibility-testing function of cross-examination, whether the complainant's claim is meritorious cannot be ascertained with sufficient assurance. The Department understands that complainants (and respondents) often will not have control over whether witnesses appear and are cross-examined, because neither the recipient nor the parties have subpoena power to compel appearance of witnesses. Some absences of witnesses can be avoided by a recipient thoughtfully working with witnesses regarding scheduling of a hearing, and taking advantage of the discretion to permit witnesses to testify remotely. Where a witness cannot or will not appear and be cross-examined, that person's statements will not be relied on by the decision-maker, but the Department believes that any determination reached under this provision will be more reliable than a determination reached based on statements that have not been tested for credibility.

The Department notes that the final regulations expressly allow a recipient to remove a respondent on an emergency basis and do not prescribe cross-examination as a necessary procedure during the post-removal opportunity to challenge the removal.[1334] Recipients may also implement supportive measures that restrict students' or employees' contact or communication with others. Recipients thus have avenues for addressing serial predator situations even where no victim chooses to participate in a grievance process. A recipient is prohibited from coercing unwilling victims to participate in a grievance process,[1335] even where the recipient's goal is to investigate a possible predator on campus.

The final regulations grant recipients discretion to allow participants, including witnesses, to appear at a live hearing virtually; however, technology must enable all participants to see and hear other participants, so a telephonic appearance would not be sufficient to comply with § 106.45(b)(6)(i). For reasons discussed above, written statements cannot be relied upon unless the witness submits to cross-examination, and whether a witness's statement is reliable must be determined in light of the credibility-testing function of cross-examination, even where non-appearance is due to death or post-investigation disability. The Department notes that recipients have discretion to apply limited extensions of time frames during the grievance process for good cause, which may include, for example, a temporary postponement of a hearing to accommodate a disability.

The Department understands commenters' concerns that a blanket rule against reliance on party and witness statements made by a person who does not submit to cross-examination is a broader exclusionary rule than found in the Federal Rules of Evidence, under which certain hearsay exceptions permit consideration of statements made by persons who do not testify in court and have not been cross-examined. The Department understands that postsecondary institutions lack subpoena power to compel parties or witnesses to appear and testify at a live hearing. The final regulations do not purport to grant recipients the authority to compel appearance and testimony. However, where a party or witness does not appear and is not cross-examined, the statements of that party or witness cannot be determined reliable, truthful, or credible in a non-courtroom setting like that of an educational institution's proceeding that lacks subpoena powers, comprehensive rules of evidence, and legal professionals. As many commenters noted, recipients are educational institutions that should not be converted into *de facto* courtrooms. The final regulations thus prescribe a process that simplifies evidentiary complexities while ensuring that determinations regarding responsibility result from consideration of relevant, reliable evidence. The Department declines to adopt commenters' suggestion that instead the decision-maker should be permitted to rely on statements that are not subject to cross-examination, if they are reliable; making such a determination without the benefit of extensive rules of evidence would likely result in inconsistent and potentially inaccurate assessments of reliability. Commenters correctly note that courts have not imposed a blanket rule excluding hearsay evidence from use in administrative proceedings. However, cases cited by commenters do not stand for the proposition that every administrative proceeding *must* be permitted to rely on hearsay evidence, even where the agency lacks subpoena power to compel witnesses to appear.[1336]

The Department acknowledges that the evidence gathered during an investigation may be broader than what is ultimately deemed relevant and relied upon in making a determination regarding responsibility, but the procedures in § 106.45 are deliberately selected to ensure that all evidence directly related to the allegations is reviewed and inspected by the parties, that the investigative report summarizes only relevant evidence, and that the determination regarding responsibility relies on relevant evidence. Because party and witness statements so often raise credibility questions in the context of sexual harassment allegations, the decision-maker must consider only those statements that have benefited from the truth-seeking function of cross-examination. The recipient, and the parties, have equal opportunity (and, for the recipient, the obligation) to gather and present relevant evidence including fact and expert witnesses, and face the same limitations inherent in a lack of subpoena power to compel witness testimony. The Department believes that the final regulations, including § 106.45(b)(6)(i), strike the appropriate balance for a postsecondary institution context between ensuring that only relevant and reliable evidence is considered while not over-legalizing the grievance process.

The Department declines to tie reliance on statements that are not subject to cross-examination to the standard of evidence used. For reasons discussed in the ''Section 106.45(b)(7)(i) Standard of Evidence and Directed Question 6'' subsection of the ''Determinations Regarding Responsibility'' subsection of the ''Section 106.45 Recipient's Response to Formal Complaints'' section of this preamble, the Department believes that it is appropriate to leave recipients flexibility to choose between two standards of evidence but has made

[1334] Section 106.44(c).

[1335] Section 106.71 provides: ''No recipient or other person may intimidate, threaten, coerce, or discriminate against any individual for the purpose of interfering with any right or privilege secured by title IX or this part, or because the individual has made a report or complaint, testified, assisted, or participated *or refused to participate* in any manner in an investigation, proceeding, or hearing under this part.'' (emphasis added).

[1336] *E.g., Johnson v. United States,* 628 F.2d 187, 190–91 (D.C. Cir. 1980) (holding that substantial evidence supported U.S. Civil Service Commission's termination determination even though it relied on hearsay statements of three witnesses, where the agency's procedural rules expressly allowed introduction of witness statements and the statements were found to be reliable because they were from disinterested witnesses, consistent with each other, and the defense had seen the witness statements prior to the hearing); *Richardson* v. *Perales,* 402 U.S. 389, 407, 410 (1971) (Social Security Administration hearing regarding disability benefits eligibility did not deprive claimant of due process by relying on written medical consultant reports, where those written reports were relevant and the claimant could have compelled the doctors to appear for cross-examination but did not do so).

changes in the final regulations to clarify that a recipient's choice must then apply to *all* formal complaints of sexual harassment subject to a § 106.45 grievance process. Making the standard of evidence dependent on whether a decision-maker relies on party or witness statements that are not subject to cross-examination would effectively remove a recipient's discretion to select a standard of evidence, and would not achieve the benefits of a recipient implementing a predictable grievance process.

The Department appreciates commenters' requests for clarification of this provision. As noted above, even where a respondent fails to appear for a hearing, the decision-maker may still consider the relevant evidence (excluding statements of the non-appearing party) and reach a determination regarding responsibility, though the final regulations do not refer to this as a ''default judgment.'' If a decision-maker does proceed to reach a determination, no inferences about the determination regarding responsibility may be drawn based on the non-appearance of a party. The Department notes that under § 106.45(b)(3)(ii) a recipient may in its discretion, but is not required to, dismiss a formal complaint where the respondent is no longer enrolled or employed by the recipient or where specific circumstances prevent the recipient from gathering evidence sufficient to reach a determination regarding responsibility (or where a complainant informs the Title IX Coordinator in writing that the complainant wishes to withdraw the formal complaint).

The prohibition on reliance on ''statements'' applies not only to statements made during the hearing, but also to *any* statement of the party or witness who does not submit to cross-examination. ''Statements'' has its ordinary meaning, but would not include evidence (such as videos) that do not constitute a person's intent to make factual assertions, or to the extent that such evidence does not contain a person's statements. Thus, police reports, SANE reports, medical reports, and other documents and records may not be relied on to the extent that they contain the statements of a party or witness who has not submitted to cross-examination. While documentary evidence such as police reports or hospital records may have been gathered during investigation [1337] and, if directly related to the allegations inspected and reviewed by the parties,[1338] and to the extent they are relevant, summarized in the investigative report,[1339] the hearing is the parties' first opportunity to argue to the decision-maker about the credibility and implications of such evidence. Probing the credibility and reliability of *statements* asserted by witnesses contained in such evidence requires the parties to have the opportunity to cross-examine the witnesses making the statements.

The Department appreciates the opportunity to clarify here that to ''submit to cross-examination'' means answering those cross-examination questions that are relevant; the decision-maker is required to make relevance determinations regarding cross-examination in real time during the hearing in part to ensure that parties and witnesses do not feel compelled to answer irrelevant questions for fear of their statements being excluded. If a party or witness disagrees with a decision-maker's determination that a question is relevant, during the hearing, the party or witness's choice is to abide by the decision-maker's determination and answer, or refuse to answer the question, but unless the decision-maker reconsiders the relevance determination prior to reaching the determination regarding responsibility, the decision-maker would not rely on the witness's statements.[1340] The party or witness's reason for refusing to answer a relevant question does not matter. This provision does apply to the situation where evidence involves intertwined statements of both parties (*e.g.,* a text message exchange or email thread) and one party refuses to submit to cross-examination and the other does submit, so that the statements of one party cannot be relied on but statements of the other party may be relied on. If parties do not testify about their own statement and submit to cross-examination, the decision-maker will not have the appropriate context for the statement, which is why the decision-maker cannot consider that party's statements. This provision requires a party or witness to ''submit to cross-examination'' to avoid exclusion of their statements; the same exclusion of statements does not apply to a party or witness's refusal to answer questions posed by the decision-maker. If a party or witness refuses to respond to a decision-maker's questions, the decision-maker is not precluded from relying on that party or witness's statements.[1341] This is because cross-examination (which differs from questions posed by a neutral fact-finder) constitutes a unique opportunity for parties to present a decision-maker with the party's own perspectives about evidence. This adversarial testing of credibility renders the person's statements sufficiently reliable for consideration and fair for consideration by the decision-maker, in the context of a Title IX adjudication often overseen by laypersons rather than judges and lacking comprehensive rules of evidence that otherwise might determine reliability without cross-examination.

The Department disagrees that the phrase ''does not appear for cross-examination'' is clearer or leads to better results than this provision's language, ''does not submit to cross-examination.'' The former would permit a party or witness to appear but not engage in the cross-examination procedure, which would not achieve the benefits of cross-examination discussed above. For similar reasons, the Department declines to allow a party or witness to ''waive'' a question because such a rule would circumvent the benefits and purposes of cross-examination as a truth-seeking tool for postsecondary institutions' Title IX adjudications.

Changes: The Department has revised § 106.45(b)(6)(i) to clarify that although a decision-maker cannot rely on the statement of a party or witness who does not submit to cross-examination, the decision-maker cannot draw any inference about the determination regarding responsibility based solely on a party's or witness's absence from the hearing or refusal to answer cross-examination or other questions. This provision has been further revised to allow recipients discretion to hold live hearings with any or all parties, witnesses, and other participants appearing virtually, with technology enabling participants simultaneously to see and hear each other. The Department has also added § 106.71, prohibiting retaliation against any

[1337] The Department notes that the final regulations add to § 106.45(b)(5)(i) a provision that restricts a recipient from accessing or using a party's treatment records without the party's voluntary, written consent. If the party is not an ''eligible student,'' as defined in 34 CFR 99.3, then the recipient must obtain the voluntary, written consent of a ''parent,'' as defined in 34 CFR 99.3.

[1338] Section 106.45(b)(5)(vi).

[1339] Section 106.45(b)(5)(vii).

[1340] Parties have the equal right to appeal on three bases including procedural irregularity that affects the outcome, so if a party disagrees with a decision-maker's relevance determination, the party has the opportunity to challenge the relevance determination on appeal. § 106.45(b)(8).

[1341] The decision-maker still cannot draw any inference about the determination regarding responsibility based solely on a party's refusal to answer questions posed *by the decision-maker;* the final regulations refer in § 106.45(b)(6)(i) to not drawing inferences based on refusal to answer ''cross-examination *or other* questions'' (emphasis added).

person exercising rights under Title IX including participating or refusing to participate in any grievance process. Section 106.45(b)(3)(ii), added in the final regulations, grants a recipient discretion to dismiss a formal complaint, or allegations therein, where the complainant notifies the Title IX Coordinator in writing that the complainants wishes to withdraw the allegations, or the respondent is no longer enrolled or employed by the recipient, or specific circumstances prevent the recipient from gathering evidence sufficient to reach a determination.

Rape Shield Protections

Comments: Some commenters supported the rape shield protections in § 106.45(b)(6)(i) (prohibiting questions or evidence about a complainant's prior sexual behavior or sexual predisposition, with two exceptions—where evidence of prior sexual behavior is offered to prove someone other than the respondent committed the alleged offense, or where prior sexual behavior evidence is specifically about the complainant and the respondent and is offered to prove consent) because prohibiting asking about a complainant's sexual history will give victims more control when bringing claims, and because these provisions protect victims' privacy.

Some commenters opposed the rape shield protections in § 106.45(b)(6)(i), arguing that the ban on evidence concerning a complainant's sexual history is too broad because evidence of a complainant's sexual history with the respondent should also be allowed to prove motive to fabricate or conceal a sexual interaction, and not only to prove consent. Commenters argued that Fed. R. Evid. 412 allows such evidence if the probative value substantially outweighs the danger of harm to any victim and of unfair prejudice to any party, and because the rape shield language in § 106.45(b)(6)(i) is based on Fed. R. Evid. 412, the final regulations should incorporate that exception as well. Commenters argued that Fed. R. Evid. 412(b)(1)(B) allows sexual history evidence to be offered by a criminal defendant without restriction but Fed. R. Evid. 412(b)(2) provides that in civil cases, sexual history evidence is admissible to prove consent only if its probative value substantially outweighs the danger of harm and unfair prejudice to a victim or any party; commenters argued that because a Title IX grievance process is more analogous to a civil trial than a criminal trial, the rape shield language in § 106.45(b)(6)(i)–(ii) should include the limitation contained in Fed. R. Evid. 412(b)(2).

Commenters argued that the prohibition against questions or evidence about sexual predisposition or sexual history should also apply to respondents so that the questioning focuses on the allegation at issue and does not delve into irrelevant details about a respondent's sexual history. At least one commenter mistakenly understood this provision to allow questions about a complainant's sexual history but not allow the same questions about a respondent's sexual history such that a respondent's propensity to violence or past behaviors speaking to a pattern could not be considered.

Commenters argued that an additional provision of Fed. R. Evid. 412 should be added into the final regulations: Allowance of ''evidence whose exclusion would violate the defendant's constitutional rights.''

Other commenters supported the rape shield language but expressed concern that the protections will be ineffective without comprehensive rules of evidence. Some commenters cited a study that found lawyers in many cases routinely attempt to circumvent rape shield limitations.[1342] Other commenters argued that because the rape shield protections are patterned after Fed. R. Evid. 412, the final regulations should incorporate the explanatory information in the Advisory Committee notes to Fed. R. Evid. 412 [1343] so that parties and decision-makers better understand the parameters of what kind of questioning is off-limits. Commenters argued that without further guidance on how to apply the rape shield limitations, the exceptions contained in this provision may still subject complainants to unwarranted invasions of privacy, character attacks, and sex stereotyping, and suggested that the final regulations specify how recipients should enforce the rape shield protections. Commenters argued that the two exceptions to the rape shield protections should be eliminated because having non-legal professionals try to determine the scope of the exceptions will result in the exceptions swallowing the rape shield protections. Commenters argued that the evidence exchange provision in § 106.45(b)(5)(vi) risks negating the rape shield protections in § 106.45(b)(6)(i)–(ii). Commenters asserted that because the proposed rules fail to define consent, the scope of the rape shield protections is unclear.

Commenters argued that the two rape shield exceptions are too favorable to respondents and unfair to complainants because those exceptions let respondents discuss a complainant's sexual history any time the respondent wants to point the finger at a third party or show consent was present due to consent being present in past sexual interactions, a problem that commenters argued will frequently arise since a significant number of sexual assaults are committed by intimate partners.[1344] Commenters argued that the rape shield exceptions expose a thinly disguised reworking of the rape myth that women in sexual harassment cases are so unreliable that they may be mistaken about who committed the act, and allow slut-shaming (implications that a woman with an extensive sexual history likely consented to sexual activity) to be used as a defense to a sexual assault accusation. Commenters argued that research shows that during sexual assault trials victims are routinely asked about their sexual history to imply the presence of consent, often relying on an incorrect assumption that women with more sexual experience are more likely to make a false allegation.[1345]

Commenters argued that the ''offered to prove consent'' exception should be eliminated because past sexual encounters, even with the respondent, are always irrelevant to issues of consent because valid consent can only ever be given in the particular moment.[1346] Commenters asserted that experts believe that there is no evidentiary theory under which sexual history is relevant to any claim or defense except when establishing a pattern of inappropriate behavior on the part of the harasser.[1347]

[1347] Commenters cited: Linda J. Krieger & Cindi Fox, *Evidentiary Issues in Sexual Harassment*

Commenters argued that this provision violates State laws, such as in New York, that have legislated an affirmative consent standard for campus sexual misconduct. Commenters asserted that this provision should: State that evidence of sexual behavior is never allowed to prove reputation or character (or only allowed if the complainant has placed the complainant's own reputation or character at issue);[1348] require that sexual behavior evidence that ostensibly meets one of the rape shield exceptions be allowed only if a neutral evaluator decides in advance that the evidence meets an exception and that its probative value outweighs potential harm or prejudice to the complainant; and require recipients to inform complainants in advance if such evidence will be allowed.

Commenters objected to use of the phrase ''sexual predisposition'' claiming the phrase harkens back to the past and puts on trial the sexual practices and identity of the complainant, which have no relevance to the adjudication of particular allegations.

Commenters wondered if the rape shield protected complainants during all stages of a grievance process, for example during the collection of evidence phase or during an informal resolution process, or only during a live hearing. Commenters stated that the rape shield provision, though well-intentioned, conflicts with other provisions in § 106.45 such as allowing the parties during investigation to review and respond to evidence gathered by the recipient as well as offer additional evidence during the investigation; these commenters asserted that while greater transparency in the grievance process is warranted and welcome, the unfettered right to introduce and review evidence conflicts with both the rape shield protections in the proposed rules and with some State laws that also prevent admission of prior sexual behavior evidence. Commenters argued that respondents should only be allowed to ask questions, especially about sexual behavior, after presenting an adequate foundation and where the questions do not rely on hearsay or speculation.

Commenters asserted that this provision does not accurately mirror Fed. R. Evid. 412 because the latter allows the evidence where it is ''offered by the defendant to prove consent or if offered by the prosecutor,'' and commenters argued that the final regulations should allow prior sexual behavior evidence ''if offered by the defendant to prove consent or welcomeness, or if offered by the institution or complainant.'' Commenters argued that this modification would appropriately allow testimony to be impeached when welcomeness is at issue in non-sexual assault situations, in addition to where consent is at issue in sexual violence situations, and would give a complainant or the institution equal opportunity to use such evidence where welcomeness or consent is contested. Other commenters argued that the rape shield language appeared not to take into account the full range of sexual harassment because under the second prong of the sexual harassment definition in § 106.30, consent is not an element but rather the issue might be whether the conduct was unwelcome versus invited, but, commenters asserted, even if sexual history was relevant in those situations, the relevance would be outweighed by potential harm to the complainant and so should be excluded.

Commenters argued that this provision's wording in the NPRM, referring to ''cross-examination must exclude evidence of the complainant's sexual behavior or predisposition'' lacked clarity because questions are not evidence, though questions can lead to testimony that is evidence, and the provision was thus ambiguous as to whether the rape shield protections applied solely to ''questions'' or also to ''evidence'' that concerns a complainant's sexual behavior or predisposition. Commenters widely used the phrase ''prior sexual behavior'' or ''prior sexual history'' in reference to the rape shield provision in § 106.45(b)(6)(i). Commenters noted that some State laws, for example Maryland and New York, address the same issue with rules prohibiting ''prior'' sexual history.

Discussion: The Department agrees with commenters that the rape shield protections serve a critically important purpose in a Title IX sexual harassment grievance process: Protecting complainants from being asked about or having evidence considered regarding sexual behavior, with two limited exceptions. The final regulations clarify that such questions, and evidence, are not only excluded at a hearing, but are deemed irrelevant.

The Department disagrees that the rape shield language is too broad. Scenarios described by commenters, where a respondent might wish to prove the complainant had a motive to fabricate or conceal a sexual interaction, do not require admission or consideration of the complainant's sexual behavior. Respondents in that scenario could probe a complainant's motive by, for example, inquiring whether a complainant had a dating or romantic relationship with a person other than the respondent, without delving into a complainant's sexual behavior; sexual behavior evidence would remain irrelevant in such circumstances. Commenters correctly note that the Department adapted the rape shield language in § 106.45(b)(6)(i) from Fed. R. Evid. 412.[1349] As with other determinations about what procedures should be part of a § 106.45 grievance process, the Department carefully considered whether Fed. R. Evid. 412 would be useful in formulating rape shield provisions for application in Title IX adjudications. However, the final regulations do not import wholesale Fed. R. Evid. 412. The Department believes the protections of the rape shield language remain stronger if decision-makers are not given discretion to decide that sexual behavior is admissible where its probative value substantially outweighs the danger of harm to a victim and unfair prejudice to any party. If the Department permitted decision-makers to balance ambiguous factors like ''unfair prejudice'' to make admissibility decisions, the final regulations would convey an expectation that a non-lawyer decision-maker must possess the legal expertise of judges and lawyers. Instead, the Department expects decision-makers to apply a single admissibility rule (relevance), including this provision's specification that sexual behavior is irrelevant with two concrete exceptions. This approach leaves the decision-maker discretion to assign weight and credibility to evidence, but not to deem evidence inadmissible or excluded, except on the ground of relevance (and

[1348] Commenters cited: Seth I. Koslow, *Rape Shield Laws and the Social Media Revolution,* 29 Touro L. Rev. 3, Art. 19 (2013), for the proposition that so many students use social media that those platforms have become a significant means through which a complainant might be said to have placed their reputation in controversy or at issue.

[1349] 83 FR 61476 (regarding § 106.45(b)(6)(i)–(ii), the NPRM stated ''These sections incorporate language from (and are in the spirit of) the rape shield protections found in Federal Rule of Evidence 412, which is intended to safeguard complainants against invasion of privacy, potential embarrassment, and stereotyping. *See* Fed. R. Evid. 412. Advisory Committee's Note. As the Court has explained, rape shield protections are intended to protect complainants 'from being exposed at trial to harassing or irrelevant questions concerning their past sexual behavior.' *Michigan* v. *Lucas,* 500 U.S. 145, 146 (1991).'').

in conformity with other requirements in § 106.45, including the provisions discussed above whereby the decision-maker cannot rely on statements of a party or witness if the party or witness did not submit to cross-examination, a party's treatment records cannot be used without the party's voluntary consent, and information protected by a legally recognized privilege cannot be used).

The Department declines to extend the rape shield language to respondents. The Department does not wish to impose more restrictions on relevance than necessary to further the goals of a Title IX sexual harassment adjudication, and does not believe that a respondent's sexual behavior requires a special provision to adequately protect respondents from questions or evidence that are *irrelevant*. By contrast, in order to counteract historical, societal misperceptions that a *complainant's* sexual history is somehow always relevant to sexual assault allegations, the Department follows the rationale of the Advisory Committee's Note to Fed. R. Evid. 412, and the Supreme Court's observation in *Michigan* v. *Lucas,*[1350] that rape shield protections are intended to protect *complainants* from harassing, irrelevant questions at trial. The Department cautions recipients that some situations will involve counter-claims made between two parties, such that a respondent is also a complainant, and in such situations the recipient must take care to apply the rape shield protections to any party where the party is designated as a ''complainant'' even if the same party is also a ''respondent'' in a consolidated grievance process.[1351] The Department clarifies here that the rape shield language in this provision considers all questions and evidence of a complainant's sexual *predisposition* irrelevant, with no exceptions; questions and evidence about a complainant's prior *sexual behavior* are irrelevant unless they meet one of the two exceptions; and questions and evidence about a *respondent's* sexual predisposition or prior sexual behavior are not subject to any special consideration but rather must be judged like any other question or evidence as relevant or irrelevant to the allegations at issue.

For two reasons, the Department also declines to import the additional provision in Fed. R. Evid. 412 that would allow in evidence ''whose exclusion would violate the defendant's constitutional rights.'' First, this exception to the preclusion of sexual behavior evidence is intended to protect the constitutional rights of *criminal* defendants, and respondents in a Title IX grievance process are not due the same rights as criminal defendants. Second, the Department believes that the procedures in § 106.45, including the use of relevance as the only admissibility criterion, ensure that trained, layperson decision-makers are capable of making relevance determinations and then evaluating relevant evidence with discretion to decide how persuasive certain evidence is to a determination regarding responsibility, whereas imposing a complex set of evidentiary rules would make it less likely that a non-lawyer would feel competent to be a recipient's decision-maker. The final regulations permit a wide universe of evidence that may be ''relevant'' (and thus not subject to exclusion), and the Department believes it is unlikely that a recipient applying the § 106.45 grievance process with its robust procedural protections would be found to have violated any respondent's constitutional rights, whether under due process of law Supreme Court cases like *Mathews* and *Goss,* or the Sixth Circuit's due process decision in *Baum.*[1352] As discussed above, we have revised § 106.45(b)(6)(i) to direct a decision-maker who must not rely on the statement of a party who has not appeared or submitted to cross-examination not to draw any inference about the determination regarding responsibility based on the party's absence or refusal to be cross-examined (or refusal to answer other questions, such as those posed by the decision-maker). This modification provides protection to respondents exercising Fifth Amendment rights against self-incrimination (though it applies equally to protect complainants who choose not to appear or testify).

For reasons discussed above, the Department believes that well-trained decision-makers are fully capable of determining relevance of questions and evidence, including the special consideration given to a complainant's sexual history under this provision. Section 106.45(b)(1)(iii) has been revised to require decision-makers to be trained on issues of relevance, including specifically application of the rape shield protections. Regardless of studies that show that lawyers routinely try to circumvent rape shield protections, the Department expects recipients to ensure that decision-makers accurately determine the relevance and irrelevance of a complainant's sexual history in accordance with these regulations. The Department disagrees that the two exceptions in the rape shield provisions should be eliminated because non-lawyer decision-makers will misapply this provision and end up allowing questions and evidence contrary to this provision. Nothing in the final regulations precludes a recipient from including in its training of decision-makers information about the purpose and scope of rape shield language in Fed. R. Evid. 412, including the Advisory Committee Notes, so long as the training remains focused on applying the rape shield protections as formulated in these final regulations.

The Department disagrees that the evidence exchange provision in § 106.45(b)(5)(vi) negates the rape shield protections in § 106.45(b)(6)(i)–(ii). As noted by the Supreme Court, rape shield protections generally are designed to protect complainants from harassing, irrelevant inquiries into sexual behavior *at trial*.[1353] The final regulations permit exchange of all evidence ''directly related to the allegations in a formal complaint'' during the investigation, but require the investigator to only summarize ''relevant'' evidence in the investigative report (which would exclude sexual history information deemed by these final regulations to be ''not relevant''), and require the decision-maker to objectively evaluate only ''relevant'' evidence during the hearing and when reaching the determination regarding responsibility. To further reinforce the importance of correct application of the rape shield protections, we have revised § 106.45(b)(6)(i) to explicitly state that only relevant questions may be asked, and the decision-maker must determine the relevance of each cross-examination question before a party or witness must answer.

Commenters correctly observe that the final regulations do not define ''consent.'' For reasons explained in the

[1350] 500 U.S. 145, 146 (1991) (''Like most States, Michigan has a 'rape-shield' statute *designed to protect victims* of rape from being exposed at trial to harassing or irrelevant questions concerning their past sexual behavior.'') (emphasis added).

[1351] Section 106.45(b)(4) allows consolidation of formal complaints, in a recipient's discretion, when allegations arise from the same facts or circumstances.

[1352] As acknowledged in § 106.6(d), the Department will not enforce these regulations in a manner that requires any recipient to violate the U.S. Constitution, including the First Amendment, Fifth and Fourteenth Amendment, or any other constitutional provision. The Department believes that the § 106.45 grievance process allows, and expects, recipients to apply the grievance process in a manner that avoids violation of any party's constitutional rights.

[1353] *Michigan* v. *Lucas,* 500 U.S. 145, 146 (1991) (''Like most States, Michigan has a 'rape-shield' statute designed to protect victims of rape from being exposed *at trial* to harassing or irrelevant questions concerning their past sexual behavior.'') (emphasis added).

''Consent'' subsection of the ''Section 106.30 Definitions'' section of this preamble, the final regulations clarify that the Department will not require recipients to adopt a particular definition of consent. This provision in § 106.30 allows recipients flexibility to use a definition of sexual consent that best reflects the recipient's values and/or complies with State laws that require recipients to adopt particular definitions of consent for campus sexual misconduct proceedings. The second of the two exceptions to the rape shield protections refers to ''if offered to prove consent'' and thus the scope of that exception will turn in part on the definition of consent adopted by each recipient. Decision-makers will be trained in how to conduct a grievance process and specifically on how to apply the rape shield protections, which will include the recipient's adopted definition of consent, and thus the decision-maker will understand how to apply the rape shield language in accordance with that definition. Because of the flexibility recipients have under these final regulations to adopt a definition of consent, the Department disagrees that the scope of the second exception to the rape shield protections is too broad or favors respondents. Rather, the scope of the ''offered to prove consent'' exception is determined in part by a recipient's definition of consent, which may be broad or narrow at the recipient's discretion. The Department disagrees that the first exception (''offered to prove that someone other than the respondent'' committed the alleged misconduct) is too broad, because in order for that exception to apply a respondent's contention must be that someone other than the respondent is the person who committed the sexual harassment; commenters have informed the Department that this defense is not common compared to the defense that a sexual interaction occurred but consent was present, a conclusion buttressed by commenters' assertions that a significant number of sexual assaults are committed by intimate partners. When a respondent has evidence that someone else committed the alleged sexual harassment, a respondent must have opportunity to pursue that defense, or else a determination reached by the decision-maker may be an erroneous outcome, mistakenly identifying the nature of sexual harassment occurring in the recipient's education program or activity.[1354]

Neither of the two exceptions to the rape shield protections promote the notion that women, or complainants generally, are unreliable and that they may be mistaken about who committed an assault, or allow slut-shaming as a defense to sexual assault accusations. Rather, the first exception applies to the narrow circumstance where a respondent contends that someone other than the respondent committed the misconduct, and the second applies narrowly to allow sexual behavior questions or evidence *concerning incidents between the complainant and respondent* if offered to prove consent. The second exception does not admit sexual history evidence of a complainant's sexual behavior with someone other than the respondent; thus, ''slut-shaming'' or implication that a woman with an extensive sexual history probably consented to sexual activity with the respondent, is not validated or promoted by this provision. As noted above, the scope of when sexual behavior between the complainant and respondent might be relevant to the presence of consent regarding the particular allegations at issue depends in part on a recipient's definition of consent. Not all definitions of consent, for example, require a verbal expression of consent; some definitions of consent inquire whether based on circumstances the respondent reasonably understood that consent was present (or absent), thus potentially making relevant evidence of past sexual interactions between the complainant and the respondent. The Department reiterates that the rape shield language in this provision does not pertain to the sexual predisposition or sexual behavior of respondents, so evidence of a pattern of inappropriate behavior by an alleged harasser must be judged for relevance as any other evidence must be.

As discussed above, the Department defers to recipients on a definition of consent, and thus recipients subject to State laws imposing particular definitions may comply with those State laws during a § 106.45 grievance process. The recipient's definition of consent will determine the scope of the rape shield exception that refers to ''consent.'' The Department does not believe that the provision needs to expressly state that a complainant's sexual behavior can never be allowed to prove a complainant's reputation or character; rather, this provision already deems irrelevant all questions or evidence of a complainant's prior sexual behavior unless offered to prove that someone other than the respondent committed the alleged offense or if the questions or evidence concern specific sexual behavior between the complainant and respondent and are offered to prove consent. No other use of a complainant's sexual behavior is authorized under this provision.

The Department declines to require questions or evidence that may meet one of the rape shield exceptions to be allowed to be asked or presented at a hearing only if a neutral evaluator first decides that one of the two exceptions applies. As discussed above, the decision-maker will be trained in how to conduct a grievance process, including how to determine relevance and how to apply the rape shield protections, and at the live hearing the decision-maker must determine the relevance of a cross-examination question before a party or witness must answer. As discussed above, the Department declines to import a balancing test that would exclude sexual behavior questions and evidence (even meeting the two exceptions) unless probative value substantially outweighs potential harm or undue prejudice, because that open-ended, complicated standard of admissibility would render the adjudication more difficult for a layperson decision-maker competently to apply. Unlike the two exceptions in this provision, a balancing test of probative value, harm, and prejudice contains no concrete factors for a decision-maker to look to in making the relevance determination.

The Department's use of the phrase ''sexual predisposition'' is mirrored in Fed. R. Evid. 412; far from indicating intent to harken back to the past where sexual practices of a complainant were used against a complainant, the final regulations take a strong position that questions or evidence of a complainant's ''sexual predisposition'' are simply irrelevant, without exception.

The final regulations clarify the rape shield language to state that questions and evidence subject to the rape shield protections are ''not relevant,'' and therefore the rape shield protections apply wherever the issue is whether evidence is relevant or not. As noted above, this means that where § 106.45(b)(5)(vi) requires review and inspection of evidence ''directly related to the allegations'' that universe of evidence is not screened for relevance, but rather is measured by whether it is ''directly related to the allegations.'' However, the investigative report must

[1354] The Department notes that where a decision-maker determines, for example, that the respondent is not responsible for the allegations in the formal complaint, but also determines that the complainant did suffer the alleged sexual harassment but it was perpetrated by someone other than the respondent, the recipient is free to provide supportive measures to the complainant designed to restore or preserve equal access to education.

summarize ''relevant'' evidence, and thus at that point the rape shield protections would apply to preclude inclusion in the investigative report of irrelevant evidence. The Department believes these provisions work consistently and logically as part of the § 106.45 grievance process, under which all evidence is evaluated for whether it is directly related to the allegations, evidence summarized in the investigative report must be relevant, and evidence (and questions) presented in front of, and considered by, the decision-maker must be relevant. The Department declines to require respondents to ''lay a foundation'' before asking questions, or to impose rules excluding questions based on hearsay or speculation. For reasons described above, relevance is the sole gatekeeper evidentiary rule in the final regulations, but decision-makers retain discretion regarding the weight or credibility to assign to particular evidence. Further, for the reasons discussed above, while the final regulations do not address ''hearsay evidence'' as such, § 106.45(b)(6)(i) does preclude a decision-maker from relying on statements of a party or witness who has not submitted to cross-examination at the live hearing.

The Department notes that the rape shield language does not limit the ''if offered to prove consent'' exception to when the question or evidence is offered *by the respondent.* Rather, such questions or evidence could be offered by either party, or by the investigator, or solicited on the decision-maker's own initiative. The Department appreciates commenters' suggestion that the rape shield exception regarding ''to prove consent'' apply to proof of ''welcomeness'' so that it would apply to allegations of sexual harassment that turn on welcomeness and not on consent of the victim. However, as explained in the ''Sexual Harassment'' subsection of the ''Section 106.30 Definitions'' section of this preamble, the Department interprets the ''unwelcome'' element in the first and second prongs of the § 106.30 definition of sexual harassment subjectively; that is, if conduct is unwelcome to the complainant, that is sufficient to support that element of an allegation of sexual harassment. By contrast, the final regulations impose a reasonable person standard on the other elements in the second prong of the § 106.45 definition—whether the unwelcome conduct was so ''severe, pervasive, and objectively offensive'' that it ''effectively denied a person equal access'' to education. The Department therefore declines to extend the rape shield language to encompass situations where the respondent wishes to prove the conduct was ''welcome'' as opposed to ''unwelcome.'' The Department rejects the premise that a respondent may need to use a complainant's sexual behavior to challenge a complainant's subjective interpretation of conduct as unwelcome. Respondents facing allegations under the first or second prong of the § 106.30 definition may defend by, for example, arguing that the unwelcome conduct was not ''conditioning any aid or benefit'' on participation in the unwelcome sexual activity, or that the unwelcome conduct was not ''severe'' or was not ''pervasive,'' etc. A complainant's sexual behavior is simply irrelevant to those defenses. Contrary to commenters' concerns, the rape shield language deems irrelevant *all* questions or evidence of a complainant's sexual behavior *unless* offered to prove consent (and it concerns specific instances of sexual behavior with the respondent); thus, if ''consent'' is not at issue—for example, where the allegations concern solely unwelcome conduct under the first or second prong of the § 106.30 definition—then that exception does not even apply, and the rape shield protections would then bar *all* questions and evidence about a complainant's sexual behavior, with no need to engage in a balancing test of whether the value of the evidence is outweighed by harm or prejudice.

The Department is persuaded by commenters who argued that the NPRM's wording of the rape shield language lacked clarity as to whether ''exclusion'' applied only to questions, or also to evidence. The Department has revised this provision in the final regulations to refer to both questions and evidence, and replace reference to ''exclusion'' with deeming the sexual predisposition and sexual behavior questions or evidence to be ''not relevant'' (subject to the same two exceptions as stated in the NPRM). To conform the final regulations with the intent of the rape shield provision and with commenters' widely understood view of this provision, we have added the word ''prior'' before ''sexual behavior'' in § 106.45(b)(6)(i), and in § 106.45(b)(6)(ii) that contains the same rape shield language.[1355]

Changes: The Department has revised the rape shield language in § 106.45(b)(6)(i)–(ii) to clarify that questions and evidence about the complainant's prior sexual behavior or predisposition are not relevant unless offered to prove that someone other than the respondent committed the offense or if the sexual history evidence concerns specific sexual incidents with the respondent and is offered to prove consent. We have also revised § 106.45(b)(1)(iii) to require decision-makers to be trained on issues of relevance, including application of the rape shield protections in § 106.45(b)(6).

Separate Rooms for Cross-Examination Facilitated by Technology; Directed Question 9

Comments: Some commenters supported the provision in § 106.45(b)(6)(i) that upon request of any party a recipient must permit cross-examination to occur with the parties located in separate rooms with technology facilitating the ability of all participants to see and hear the person answering questions. Commenters asserted that this provision appropriately acknowledges the intimidating nature of cross-examination. Commenters also asserted that this provision reaches a reasonable balance between allowing cross-examination and protecting victims from personal confrontation with a perpetrator. Some commenters supported this provision but expressed concern that the live question-and-answer format, even avoiding face-to-face trauma, will still impose significant trauma for both parties. Commenters stated that many recipients already effectively utilize technology to enable parties to testify at live hearings without being physically present in the same room at the same time, including asking the non-testifying party to wait in a separate room listening by telephone or watching by videoconference while the testifying party is in the same room as the decision-maker, and then the parties switch rooms with safety measures imposed so the parties do not encounter each other during transitions.

[1355] The Department notes that ''prior'' sexual behavior is a phrase widely used by commenters to discuss rape shield protections, and commenters noted that various State laws, such as New York and Maryland, use the word ''prior'' to distinguish a complainant's sexual behavior that is unrelated to the sexual misconduct allegations at issue. The Department emphasizes that ''prior'' does not imply admissibility of questions or evidence about a complainant's sexual behavior that occurred after the alleged sexual harassment incident, but rather must mean anything ''prior'' to conclusion of the grievance process. This aligns with the intent of Fed. R. Evid. 412, which prohibits evidence of a victim's ''other'' sexual behavior; the Advisory Committee Notes on that rule explain that use of the word ''other'' is to ''suggest some flexibility in admitting evidence 'intrinsic' to the alleged sexual misconduct.'' The Department chooses to use the phrase ''prior sexual behavior'' rather than ''other sexual behavior'' because based on public comments, ''prior sexual behavior'' is a widely understood reference to evidence unrelated to the alleged sexual harassment at issue.

At least one commenter opposed this provision, arguing that there is no substitute for direct eye contact and full view of a person's mannerisms and gestures, which will not be as effective using technology, even though face-to-face confrontation may cause trauma to both complainants and respondents.

Some commenters opposed this provision, asserting that complainants should not be forced to be ''live streamed'' and instead should have the right to remain anonymous. Some commenters argued that ''watering down'' the Sixth Amendment right to face-to-face confrontation just to avoid traumatizing victims is not appropriate because the Constitution expects victims to endure the experience of making their accusations directly in front of an accused [1356] and the proposed rules do not even require a threshold showing of the potential for trauma before granting a request to permit virtual testimony.

Other commenters argued that separating the parties does not adequately diminish the intimidating, retraumatizing prospect of a live hearing. Commenters shared personal examples of being cross-examined during Title IX proceedings and feeling traumatized even with the respondent located in a separate room; one commenter described being cross-examined during a hearing with the perpetrator telling each question to a judge, who then asked the question over Skype if the judge approved the question, and the commenter stated that even with technology separating the commenter from the perpetrator, the commenter was still diagnosed a week later with PTSD (post-traumatic stress disorder). Commenters argued that survivors of sexual violence will still be aware that their attacker is witnessing the proceedings and may feel less safe as a result. At least one commenter argued that accommodating a complainant's request to testify from a separate room puts the complainant at a disadvantage because, for example, the respondent might be located in the same room as the decision-maker who would thus have a greater opportunity to ''develop a personal connection'' with the respondent than with the complainant, and advantage the respondent by allowing the respondent to observe the decision-maker's reactions to testimony while the complainant cannot observe those reactions when located in a separate room. At least one commenter argued that remote cross-examination puts survivors at a distinct disadvantage because assessing non-verbal and behavioral evidence of trauma is necessary in sexual violence incidents.

At least one commenter argued that witnesses must also be given the right to request to testify in a separate room. One commenter recounted a case in which a witness had also been raped by the respondent but the recipient did not allow the witness to testify in a separate room and the witness had to frequently leave the room during testimony due to sobbing too hard to speak.

Commenters opposed requiring testimony in separate rooms on the basis that internet functionality on campus is not always reliable, and thus a rule that depends on technology is not realistic. Commenters supported use of technology to facilitate parties being in separate rooms as ''ideal'' but expressed concern that the cost of technology that is both reliable and secure could be prohibitive for some recipients because while software enabling simultaneous viewing of parties in separate rooms may be relatively inexpensive, acquiring additional hardware that may be necessary and expensive, such as audio-visual equipment, monitors, and microphones. Commenters stated that some recipients do not currently have technology set up in the spaces used for Title IX proceedings and acquiring the requisite technology would be costly.[1357] Commenters asserted that complying with this provision may also require acquisition of, or renovations to, facilities that are not currently used for Title IX purposes by the recipient, or specialized technology that meets the needs of individuals with disabilities, resulting in expenditures that will only be used for the limited purpose of Title IX hearings. Commenters requested that the Department provide grant funding for acquiring technology needed to meet this provision.

Other commenters asserted that it is reasonable for separate rooms to be used to ensure complete, comfortable honesty by each party and that numerous low cost, secure presentation videoconferencing technologies are available and already in use by many recipients to ensure that participants can view and hear questions and responses in real time.[1358] Some commenters stated that while this provision would require some monetary investment in technology the requirement was reasonable and beneficial to allow the parties to participate in a hearing from separate rooms.

Discussion: The Department appreciates commenters' support for the provision in § 106.45(b)(6)(i) that requires recipients, upon any party's request, to permit cross-examination to occur with the parties in separate rooms using technology that enables participants to see and hear the person answering questions. Commenters correctly asserted that this provision is a direct acknowledgment of the potential for cross-examination to feel intimidating and retraumatizing in sexual harassment cases. Because the decision-maker cannot know until the conclusion of a fair, reliable grievance process whether a complainant is a victim of sexual harassment perpetrated by the respondent, cross-examination is necessary to test party and witness statements for veracity and accuracy, but the Department has determined that the full value of cross-examination can be achieved while shielding the complainant from being in the physical presence of the respondent. The Department disagrees that only in-person, face-to-face confrontation enables parties and decision-makers to adequately evaluate credibility,[1359] and declines to remove this shielding provision. As discussed above, assessing demeanor is just one of the ways in which cross-examination tests credibility, which includes assessing plausibility, consistency, and reliability; judging truthfulness based solely on demeanor has been shown to be less accurate than, for instance, evaluating credibility based on consistency.[1360] Thus, any minimal reduction in the ability to gauge demeanor by use of technology is outweighed by the

[1356] Commenters cited: *Maryland* v. *Craig,* 497 U.S. 836, 851 (1990) for the proposition that a limited exception to a criminal defendant's Sixth Amendment right to confront witnesses was approved by the Supreme Court in the context of protecting child sex abuse victims by permitting a child victim to testify via closed circuit television.

[1357] At least one commenter cited: *ezTalks.com,* ''How Much Does Video Conferencing Equipment Cost?,'' *https://www.eztalks.com/video-conference/video-conference-equipment-cost.html,* for the proposition that room-based video conferencing could cost $10,000 to $100,000 to set up.

[1358] Commenters listed GoTo Meeting, Skype, Skype for Business, Zoom, and Google Hangouts as examples of existing technology platforms.

Pol'y, 145, 169 (2017) (''For example, studies comparing live-video or videotaped testimony to traditional live-testimony formats show no significant differences across mediums in observers' ability to detect deception.'').

[1360] *E.g.,* Susan A. Bandes, *Remorse, Demeanor, and the Consequences of Misinterpretation: The Limits of Law as a Window into the Soul,* Journal of L., Religion & St. 3, 170, 179 (2014); *cf.* H. Hunter Bruton, *Cross-Examination, College Sexual-Assault Adjudications, and the Opportunity for Tuning up the Greatest Legal Engine Ever Invented,* 27 Cornell J. L. & Pub. Pol'y, 145, 161 (2017).

benefits of shielding victims from testifying in the presence of a perpetrator. The Department disagrees that complainants should have to make a threshold showing that trauma is likely because the Department is persuaded by the many commenters who asserted that facing a perpetrator is inherently traumatic for a victim. Further, the Sixth Amendment's Confrontation Clause protects *criminal* defendants, and the Department is not obligated to ensure that this provision would comply with the Confrontation Clause, which does not apply to a respondent in a noncriminal adjudication under Title IX.

The Department notes that recipients are obligated under § 106.71 to ''keep confidential the identity of any individual who has made a report or complaint of sex discrimination, including any individual who has made a report or filed a formal complaint of sexual harassment, any complainant, any individual who has been reported to be the perpetrator of sex discrimination, any respondent, and any witness'' in a Title IX grievance process except as permitted by FERPA, required by law, or as necessary to conduct the hearing or proceeding; this cautions recipients to ensure that technology used to comply with this provision does not result in ''live streaming'' a party in a manner that exposes the testimony to persons outside those participating in the hearing.

The Department understands commenters' assertions that even with shielding, cross-examination by a respondent's advisor may still be a daunting prospect. The final regulations provide both parties with the right to be supported and assisted by an advisor of choice, and protect the parties' ability to discuss the allegations freely, including for the purpose of seeking out emotional support or strategic advice.[1361] The final regulations do not preclude a recipient from adopting rules (applied equally to complainants and respondents) that govern the taking of breaks and conferences with advisors during a hearing, to further ameliorate the stress and emotional difficulty of answering questions about sensitive, traumatic events. We have also revised § 106.45(b)(6)(i) to provide that upon a party's request the entire live hearing (and not only cross-examination) must occur with the parties located in separate rooms. These measures are intended to balance the need for statements to be tested for credibility so that accurate outcomes are reached, with accommodations for the sensitive nature of the underlying matters at issue.

The Department disagrees that shielding under § 106.45(b)(6)(i) disadvantages complainants (or respondents) and reiterates that both parties' meaningful opportunity to advance their own interests in a case may be achieved by party advisors conducting cross-examination virtually. The Department notes that decision-makers are obligated to serve impartially and thus should not endeavor to ''develop a personal relationship'' with one party over another regardless of whether one party is located in a separate room or not. For the same reasons that judging credibility solely on demeanor presents risks of inaccuracy generally, the Department cautions that judging credibility based on a complainant's demeanor through the lens of whether observed demeanor is ''evidence of trauma'' presents similar risks of inaccuracy.[1362] The Department reiterates that while assessing demeanor is one part of judging credibility, other factors are consistency, plausibility, and reliability. Real-time cross-examination presents an opportunity for parties and decision-makers to test and evaluate credibility based on all these factors.

The Department declines to grant witnesses the right to demand to testify in a separate room, but revises § 106.45(b)(6)(i) to allow a recipient the discretion to permit any participant to appear remotely. Unlike complainants, witnesses usually do not experience the same risk of trauma through cross-examination. Witnesses also are not required to testify and may simply choose not to testify because the determination of responsibility usually does not directly impact, implicate, or affect them. With respect to a witness who claims to also have been sexually assaulted by the respondent, the recipient has discretion to permit the witness to testify remotely, or to hold the entire live hearing virtually.

The Department appreciates commenters' assertions that some recipients already effectively use technology to enable virtual hearings, and other commenters' concerns that acquiring technology may cause a recipient to incur costs. The Department agrees with some commenters who asserted that even where this provision requires a monetary investment in technology, low-cost technology is available and the importance of this shielding provision outweighs the burden of setting up the requisite technology. Although this shielding provision requires that a Title IX live hearing would be held in two ''separate rooms'' the Department is not persuaded that such a requirement necessitates any recipient's capital investment in renovations or acquiring new real property, because the Department is unaware of a recipient whose existing facilities consist of a single room. These final regulations do not address the eligibility or purpose of grant funding for recipients, and the Department thus declines to provide technology grants via these regulations.

Changes: We have revised § 106.45(b)(6)(i) to allow recipients, in their discretion, to hold live hearings virtually or for any participant to appear remotely, using technology to enable participants to see and hear each other, and to require a recipient to grant any party's request for the entire live hearing to be held with the parties located in separate rooms.

Discretion To Hold Live Hearings and Control Conduct of Hearings

Comments: Many commenters supported the requirement in § 106.45(b)(6)(i) that postsecondary institutions hold live hearings at the conclusion of an investigation of a formal complaint, because a live hearing ensures that the decision-maker hears from the parties and witnesses, which gives both parties an opportunity to present their side of the story to the decision-maker and reduces opportunity for biased decision making. Commenters argued that in the college or university

[1361] For further discussion see the ''Section 106.45(b)(5)(iii) Recipients Must Not Restrict Ability of Either Party to Discuss Allegations or Gather and Present Relevant Evidence'' subsection of the ''Investigation'' subsection of the ''Section 106.45 Recipient's Response to Formal Complaints'' section of this preamble.

[1362] *E.g.,* Jeffrey J. Nolan, *Fair, Equitable Trauma-Informed Investigation Training* 10 (Holland & Knight updated July 19, 2019) (while counterintuitive behaviors may be driven by trauma-related hormones or memory issues, counterintuitive behavior may also bear on a witness's credibility, and thus training about whether or how trauma or stress may influence a person's demeanor should be applied equally to interviewing any party or witness); ''Recommendations of the Post-SB 169 Working Group,'' 3 (Nov. 14, 2018) (report by a task force convened by former Governor of California Jerry Brown to make recommendations about how California institutions of higher education should address allegations of sexual misconduct) (trauma-informed ''approaches have different meanings in different contexts. Trauma-informed training should be provided to investigators so they can avoid re-traumatizing complainants during the investigation. This is distinct from a trauma-informed approach to evaluating the testimony of parties or witnesses. The use of trauma-informed approaches to evaluating evidence can lead adjudicators to overlook significant inconsistencies on the part of complainants in a manner that is incompatible with due process protections for the respondent. Investigators and adjudicators should consider and balance noteworthy inconsistencies (rather than ignoring them altogether) and must use approaches to trauma and memory that are well grounded in current scientific findings.'').

setting, where the participants are usually adults, live hearings provide the most transparent mechanism for ensuring all parties have the opportunity to submit, review, contest, and rebut evidence to be considered by the fact-finder in reaching a determination, and this is critical where both parties' interests are at stake and potential sanctions are serious.[1363] Commenters stated that live hearings are the only method by which deciding parties can accurately assess the veracity of both the complainant's and respondent's statements, and where allegations have been tested in a live hearing and the determination finds the respondent to be responsible that outcome is more likely to be reliable and less likely to be overturned on appeal or in litigation. Commenters argued that requiring a live hearing ensures that all parties see the same evidence and testimony as the fact-finder, so that each party can fully rebut or buttress that evidence and testimony to serve the party's own interest. Commenters argued that live hearings also decrease the chance that the bias of a single investigator or fact-finder may warp the process by reaching determinations not by the facts and a desire for a just outcome, but by prejudice, well-intentioned or otherwise.

Many commenters opposed the live hearing requirement. Commenters argued that even though the withdrawn 2011 Dear Colleague Letter caused many recipients to overcorrect their sexual misconduct policies by shirking due process responsibilities,[1364] commenters asserted that recipients should have the option but not the mandate to provide live hearings to preserve recipients' flexibility to design a fair process. Commenters argued that live hearings make campus proceedings so much like court proceedings that the benefit of going through an equitable Title IX process instead of formal court trials will be lost.[1365] Commenters argued that while hearings and cross-examination may be deeply rooted in the legal system, such procedures are not deeply rooted in school disciplinary processes. Commenters also argued that requiring live hearings is going ''a bridge too far'' because recipients are not equipped to conduct court-like hearings.

Commenters argued that requiring an adversarial, high-stakes live hearing ignores many cultures that rely on the inquisitorial system to achieve justice, under which decision makers are vested with the duty of fact finding instead of pitting the parties against each other to offer competing versions of the truth.

Commenters asserted that live hearings add no value to the fact-finding process so long as a full, fair investigation was conducted. Commenters described experiences with particular recipients where the recipient used a live hearing model for a significant period of time but stopped using a live hearing model after experiencing pitfalls that outweighed its usefulness, stating that hearings became a springboard to introduce new evidence and witnesses, embarrassed parties in ways that derailed the hearing, and hearing panels were left needing legal advice on a myriad of issues like evidentiary determinations. Commenters argued that while school employees who are asked to adjudicate are well-intentioned, they lack the legal expertise and immunity available in court proceedings, and an investigative model has been more efficient than a live hearing model, has resulted in fewer contested outcomes, and has led to increased reporting of sexual harassment.

Commenters asserted that a live hearing contains no mechanism to act as a check against bias [1366] and that decision-makers are capable of being impartial and reaching unbiased decisions without the parties and witnesses appearing at a live hearing.

Likening campus disciplinary proceedings to administrative proceedings, commenters argued that courts permit a wide variety of administrative proceedings to utilize less formal procedures and still comport with constitutional due process, for example allowing consideration of hearsay evidence, not requiring a live hearing, and not requiring cross-examination, even when such proceedings implicate liberty and property interests.[1367]

Commenters asserted that sometimes a witness is a friend of a party and must truthfully share information that damages the witness's friendship with the party, and that while a witness might be willing to put truth above friendship by privately talking to an investigator, a witness is less likely to do this when it requires testimony at a live hearing in front of the witness's friend. Commenters argued that the live hearing requirement puts a burden on the parties to pressure or cajole their friends into appearing as witnesses because the recipient has no subpoena power to compel witness participation.

Commenters argued that requiring the formal process of a live hearing demonstrates that the proposed regulations value the potential future of respondents more than the safety and well-being of complainants. Commenters asserted that the formalities of a live hearing with cross-examination ''swing the pendulum'' too far when schools need a refined approach to reach balanced fairness.

Commenters asserted that recipients have spent time and resources developing non-hearing adjudication models and should have the flexibility to continue using such models so long as the procedures are fair and equitable. Commenters asserted that requiring live hearings will force recipients to abandon hybrid investigatory models

[1363] Commenters cited: American Bar Association, ABA Criminal Justice Section Task Force on College Due Process Rights and Victim Protections, *Recommendations for Colleges and Universities in Resolving Allegations of Campus Sexual Misconduct* 3 (2017) (expressing a preference for the ''adjudicatory model,'' defined as ''a hearing in which both parties are entitled to be present, evidence is presented, and the decision-maker(s) determine(s) whether a violation of school policy has occurred'').

that recipients have carefully developed over the last several years.

Commenters argued that where the facts are not contested, or where the respondent has admitted responsibility, or video evidence of the incident in question exists, there is no need to put parties through the ordeal of a live hearing yet the proposed rules would force an institution to hold a live hearing anyway, straining the limited resources of all schools but especially smaller institutions. One commenter argued that if, for example, a respondent video-taped the respondent raping a student and the hearing officer watches the video and hears from the complainant who confirms the incident did happen, and the respondent denies doing it, a live hearing with cross-examination would not be useful in such a scenario.

Commenters suggested that this provision be modified to require the parties to attempt mediation, so that a live hearing is required only if mediation fails. Commenters stated that some recipients use an administrative disposition model where a respondent may accept responsibility based on an investigator's findings and the final regulations should permit the recipient, or the respondent, in that situation to waive the right to a live hearing. Commenters asserted that the final regulations should include a provision allowing the parties to enter into a voluntary resolution agreement (VRA) that includes disciplinary action against the respondent, where the recipient could offer the VRA to both parties in advance of a live hearing, and if the parties accepted the VRA it would become the final outcome, or the parties could reject the VRA and demand a live hearing. Other commenters argued that either party should have the right to waive a live hearing so that a live hearing should only occur if both parties and the recipient agree it is the appropriate method of resolution for a particular case.

Commenters argued that the proposed regulations do not allow universities to follow State APAs (Administrative Procedure Acts), for example in Washington State where a student may appeal a responsibility finding made in an investigation to a live hearing, or in New York where New York Education Law Article 129–B (known as ''Enough is Enough'') allows written submission of questions instead of live cross-examination. Commenters argued that some public universities are already subject to State APAs that impose the kind of live hearings and cross-examination procedures required by these final regulations, and recipients find these procedures to be burdensome, costly, and lengthy.

Commenters quoted a Federal district court memorandum from 1968 setting forth guidelines on how that district court should evaluate claims against tax-funded colleges and universities, where the court memorandum stated the nature and procedures of college discipline should not be required to conform to Federal criminal law processes which are ''far from perfect'' and designed for circumstances unrelated to the academic community.[1368] Commenters argued that most Federal courts adopt that approach, acknowledging that student discipline is part of the education process and is not punitive in the criminal sense; rather, expelled students may suffer damaging effects but do not face imprisonment, fines, disenfranchisement, or probation. Commenters asserted that deference to a college or university's chosen disciplinary system is even more warranted for private institutions that do not owe constitutional due process to students or employees.[1369]

Many commenters argued that the NPRM gave recipients too little flexibility to determine how hearings should be conducted, and that the final regulations should grant recipients discretion to adopt rules to control the conduct and environment of hearings in a manner that is effective and fair to all parties and witnesses. Some commenters suggested that the final regulations should state more broadly that recipients must offer parties reasonable mitigating measures during a live hearing, of which locating the parties in separate rooms is but one example.

Commenters asked for clarification such as: Can recipients limit the hearing to consideration only of evidence previously included in the investigative report? Can recipients impose rules of evidence left unaddressed by the proposed regulations, such as excluding questions that are misleading, assume facts not in evidence, or call for disclosure of attorney-client privileged information, or questions that are cumulative, repetitive, or abusive? Can recipients impose time limits on hearings so that parties and witnesses do not spend multiple days in a hearing rather than fulfilling their academic or work responsibilities? Can a recipient specify who may raise objections to evidence during the hearing?

Commenters asserted that live hearings are administratively time-consuming and will lengthen the grievance process by requiring both parties and their advisors to be on campus simultaneously, which is impractical and often undesirable. Commenters urged the Department to authorize recipients to hold the entire live hearing virtually, with parties in separate locations, using technology so that each party can see and hear all other parties, because some recipients offer mostly online courses such that parties might reside significant distances from any physical campus, or parties may move or be called to military service after a formal complaint has been filed, or the alleged harassment itself may have occurred entirely online and the parties may not reside close to campus. Commenters asserted that since the proposed rules already allow the parties to be located in separate rooms, there is no reason not to also allow a recipient to hold the entire hearing virtually using technology. At least one commenter asserted that even allowing participation virtually would not make this provision fair because the commenter had a case in which a key witness was studying abroad in a country with a large time zone difference making it impossible for the witness to testify even remotely using technology. Commenters argued that coordinating the schedules of parties, advisors, hearing panels, and witnesses to appear for a live hearing will delay proceedings. Other commenters stated that some rural university systems have satellite campuses in remote locations off the road system, with insufficient internet access even to allow videoconferencing, posing significant barriers to complying with a live hearing requirement.

Commenters asserted that all hearings should be recorded and either a transcript or video or audio recording should be provided to each party following the hearing, so the parties have access to it when appealing decisions or possibly for later use in litigation, because too many Title IX proceedings have occurred in secret, behind closed doors, with no record of the proceedings. According to this commenter, universities typically forbid parties from recording hearings and not having such a record can allow a

[1368] Commenters cited: *General Order on Judicial Standards of Procedure and Substance in Review of Student Discipline in Tax Supported Institutions of Higher Education,* ED025805 (1968); *Esteban* v. *Cent. Mo. State Coll.,* 415 F.2d 1077, 1090 (8th Cir. 1969) (''school regulations are not to be measured by the standards which prevail for the criminal law and for criminal procedure.'').

[1369] Commenters cited: William A. Kaplin & Barbara A. Lee, *The Law of Higher Education* § 10.2.3 (5th ed. 2013) (''Private institutions, not being subject to federal constitutional constraints, have even more latitude than public institutions do in promulgating disciplinary rules.'').

grievance board's illegal bias against a party to fester and remain unchecked by the university, regulatory agencies, or the courts.

One commenter asserted that hearings should be closed and attended only by the parties, their advisors, witnesses, and school officials relevant to the hearing, and requested that confidentiality of the hearing be written into the final regulations.

Discussion: The Department appreciates commenters' support for this provision, requiring postsecondary institutions to hold live hearings. The Department agrees that a live hearing gives both parties the most meaningful, transparent opportunity to present their views of the case to the decision-maker, reducing the likelihood of biased decisions, improving the accuracy of outcomes, and increasing party and public confidence in the fairness and reliability of outcomes of Title IX adjudications.

The Department agrees with commenters that hearings and cross-examination of witnesses are deeply rooted concepts in American legal systems, but disagrees that the principles underlying those procedures should be absent from postsecondary institutions' adjudications under Title IX. Administrative law ''seeks to ensure that those whose rights are affected by the decisions of administrative tribunals are given notice of hearings, guaranteed an oral, often public hearing, have a right to be represented, are granted disclosure of the case against them, are able to introduce evidence, call witnesses and cross-examine those testifying against them, have access to reason for decision, and an opportunity to appeal an adverse outcome. . . . The process assumes the value of an adversarial hearing in which impartial adjudicators are exposed to representations from those asserting a claim and those seeking a contrary finding.'' [1370] Furthermore, while not all recipients use a hearing model in student misconduct matters, many do or have in the recent past.[1371]

The Department agrees that postsecondary institutions are not equipped to act as courts of law. The final regulations acknowledge this reality by prescribing a grievance process that intentionally avoids importation of comprehensive rules of procedure (including discovery procedures) and rules of evidence that govern civil or criminal court trials. Instead, the § 106.45 grievance process requires procedures rooted in fundamental concepts of due process and fairness that layperson recipient officials are capable of applying without professional legal training. The Department disagrees that live hearings transform Title IX adjudications into court proceedings; the advantages to reaching determinations about sex discrimination in the form of sexual harassment without going through a civil or criminal trial remain distinct under the final regulations.

The Department disagrees that live hearings add no value to the fairness or accuracy of outcomes even where an investigation was full and fair. Despite some commenters' contention that recipients prefer moving to an investigative model rather than a hearing model, the Department believes that an adversarial adjudication model better serves the interests of fairness, accuracy, and legitimacy that underlie the § 106.45 grievance process.

The adversarial system ''stands with freedom of speech and the right of assembly as a pillar of our constitutional system.'' [1372] Just as the final regulations reflect acute awareness of the importance of freedom of speech and academic freedom, these regulations are equally concerned with reflecting the importance of the adversarial model with respect to adjudications of contested facts. ''Rights like trial by jury and the assistance of counsel—the cluster of rights that comprise constitutional due process of law—are most important when the individual stands alone against the state as an accused criminal. The fundamental characteristics of the adversary system also have a constitutional source, however, in our administration of civil justice'' to redress grievances, resolve conflicts, and vindicate rights.[1373] ''The Supreme Court has held that the Due Process Clauses protect civil litigants who seek recourse in the courts, either as plaintiffs attempting to redress grievances or as defendants trying to maintain their rights.'' [1374] The final regulations recognize the importance of due process principles in a noncriminal context by focusing on procedures that apply equally to complainants and respondents and give both parties equal opportunity to actively pursue the case outcome they desire.

In addition to representing core constitutional values, an adversarial system yields practical benefits. ''[T]he available evidence suggests that the adversary system is the method of dispute resolution that is most effective in determining truth'' and that ''gives the parties the greatest sense of having received justice.'' [1375] ''An adversary presentation seems the only effective means for combating this natural human tendency to judge too swiftly in terms of the familiar that which is not yet fully known.'' [1376] With respect to ''the idea of individual autonomy—that each of us should have the greatest possible involvement in, if not control over, those decisions that affect our lives in significant ways [—] . . . empirical studies that have been done suggest, again, a preference for the adversary system over the inquisitorial.'' [1377]

[1375] *Id.* at 73–74; David L. Kirn, *Proceduralism and Bureaucracy: Due Process in the School Setting,* 28 Stanford L. Rev. 841, 847–49 (1976) (''In the classic due process hearing, the disputants themselves, not the decisionmaker, largely determine what evidence bearing on the issue is to be introduced. The veracity of that evidence is tested through questioning of witnesses, a procedure structured to uncover both lapses of memory and falsehoods, conducted by an advocate skilled in this enterprise. During the course of the hearing, the decisionmaker acts only to contain the colloquy within the bounds of the actual dispute. He is a disinterested and impartial arbiter, constrained to reach a judgment based exclusively on facts presented at the hearing, with respect to which there has been opportunity for rebuttal. His decision is a reasoned one that explicitly resolves disagreements concerning facts and relates a determination in the case before him to the governing rule. Subject to the availability of appeal, that decision is dispositive of the matter. These several elements of the ideal due process hearing are intended primarily to assure that factual determinations have been reliably made, and hence to promote the societal interest in just outcomes.''); *id.* (''Reliability, valued by society, is not the only end held to be promoted by due process. The participants to the dispute are themselves seen as better off. . . . Participation also assures that the individual is not being treated as a passive creature, but rather as a person whose dignitary rights include an interest in influencing what happens to his life. Personal involvement, it is argued, promotes fairness in individual perception as well as fairness in fact.'').

[1377] *Id.* at 87.

Studies conducted to determine ''whether a litigant's acceptance of the fairness of the actual decision is affected by the litigation system used'' have concluded that ''the perception of the fairness of an adversary procedure carries over to create a more favorable reaction to the verdict . . . regardless of the outcome.'' [1378] As to commenters' contention that moving to an investigatory rather than hearing model resulted in increased reporting of sexual harassment, the Department emphasizes that the final regulations ensure that every complainant may report and receive supportive measures *without* undergoing an investigation or adjudication.[1379]

The Department does not dispute that other countries rely on an inquisitorial rather than adversarial model of adjudication, but Title IX is a Federal civil rights statute representing the American value placed on education programs and activities free from sex discrimination, and Title IX must be applied and interpreted in accordance with American law rather than laws and systems that prevail elsewhere.[1380] While commenters cited research studies calling into doubt the truth-seeking effectiveness of the adversarial process and calling for reforms including moving toward inquisitorial models, the adversarial system remains deeply embedded in the U.S. Constitution and in American legal systems and civic values, and ''the research that has been done provides no justification for preferring the inquisitorial search for truth or for undertaking radical changes in our adversary system.'' [1381]

The Department appreciates commenters' concerns that based on experience holding hearings, a hearing model was abandoned by particular recipients in favor of an investigatory model, but the Department disagrees that properly conducted hearings will become a springboard to introduce new evidence, derail hearings by embarrassing the parties, or require hearing panels to seek out extensive legal advice. The Department reiterates that recipients may adopt rules to govern a Title IX grievance process in addition to those required under § 106.45, so long as such rules apply equally to both parties.[1382] Thus, recipients may decide whether or how to place limits on evidence introduced at a hearing that was not gathered and presented prior to the hearing, and rules controlling the conduct of participants to ensure that questioning is done in a respectful manner. The Department reiterates that the procedures in § 106.45 have been selected with awareness that decision-makers in Title IX grievance processes need not be judges or lawyers, and the Department believes that each provision of these final regulations may be complied with and applied by layperson recipient officials.

The Department does not dispute that decision-makers are capable of being impartial and unbiased without the parties appearing at a live hearing, and the final regulations expect that decision-makers will serve impartially without bias. However, adversarial procedures make it even less likely that any bias held by a decision-maker will prevail because the parties' own views about the evidence are presented to the decision-maker, and the decision-maker observes the parties as individuals which makes it more difficult to apply even unconsciously-held stereotypes or generalizations about groups of people.

The Department agrees that a variety of administrative agency proceedings have been declared by courts to comport with constitutional due process utilizing procedures less formal than those that apply in criminal or even civil courts. The Department believes that the procedures embodied in the § 106.45 grievance process meet or exceed constitutional due process of law, while being adapted for application with respect to an education program or activity, and do not mirror civil or criminal trials.

The Department realizes that witnesses with information relevant to sexual harassment allegations that involve the witness's friends or co-students may feel disinclined to provide information during an investigation, and perhaps more so at a live hearing. However, the importance of both parties' opportunity to present and challenge evidence—particularly witness statements—requires that a witness make statements in front of the decision-maker, with both parties' advisors able to cross-examine. This does not permit parties to coerce witnesses into appearing at a hearing. No person should coerce or intimidate any witness into participating in a Title IX proceeding, and § 106.71(a) protects every individual's right not to participate free from retaliation.

The final regulations, and the live hearing requirement in particular, benefit complainants and respondents equally by granting both parties the same rights and specifying the same consequences for lack of participation. The safety of complainants can be addressed in numerous ways consistent with these final regulations, including holding the hearing virtually, having the parties in separate rooms, imposing no-contact orders on the parties, and allowing advisors of choice to accompany parties to the hearing. For the reasons described above, the Department believes that the final regulations balance the pendulum rather than swing the pendulum too far, in terms of balancing the rights of both parties in a contested sexual harassment situation to pursue their respective desires regarding the case outcome.

The Department believes that the time and resources recipients have spent over the past several years developing non-hearing adjudication models can largely be applied to a recipient's obligations under these final regulations. For example, recipients who have developed thorough and fair investigative processes may continue to conduct such investigations. The benefits of a full, fair investigation will continue to be an important part of the § 106.45 grievance process. Even though postsecondary institutions will reach actual determinations regarding responsibility after holding a live hearing, the time and resources dedicated to developing recipients' current systems will largely carry over into compliance with the final regulations.

Where the facts alleged in a formal complaint are not contested, or where the respondent has admitted, or wishes

[1379] Section 106.44(a).

[1380] Monroe H. Freedman, *Our Constitutionalized Adversary System,* 1 Chapman L. Rev. 57, 74 (1998) (observing that sophisticated critics of the adversarial system of criminal and civil litigation ''have turned to the inquisitorial systems of continental European democracies for an alternative to the adversary system. The central characteristic of the inquisitorial model is the active role of the judge, who is given the principal responsibility for searching out the relevant facts. In an adversary system the evidence is presented in dialectical form by opposing lawyers; in an inquisitorial system the evidence is developed in a predominantly unilateral fashion by the judge, and the lawyers' role is minimal.'') (internal citation omitted).

[1381] *Id.* at 80; *Crawford* v. *Washington,* 541 U.S. 36, 43–44 (2004). Although decided under the Sixth Amendment's Confrontation Clause which only applies to criminal trials, the Supreme Court analyzed the history of American legal systems' insistence that adversarial procedures rooted in English common law (as opposed to inquisitorial procedures utilized by civil law countries in Europe) represented fundamental notions of due process of law, and American founders deliberately rejected devices that English common law borrowed from civil law.

[1382] The introductory sentence of revised § 106.45(b) provides: ''For the purpose of addressing formal complaints of sexual harassment, a recipient's grievance process must comply with the requirements of this section. Any provisions, rules, or practices other than those required by this section that a recipient adopts as part of its grievance process for handling formal complaints of sexual harassment as defined in § 106.30, must apply equally to both parties.''

to admit responsibility, or where both parties want to resolve the case without a completed investigation or adjudication, § 106.45(b)(9) allows a recipient to facilitate an informal resolution of the formal complaint that does not necessitate a full investigation or adjudication.[1383] As noted above, even if no party appears for the live hearing such that no party's statements can be relied on by the decision-maker, it is still possible to reach a determination regarding responsibility where non-statement evidence has been gathered and presented to the decision-maker. Commenters' descriptions of an administrative disposition model, or a proposed voluntary resolution agreement, are permissible under the final regulations if applied as part of an informal resolution process in conformity with § 106.45(b)(9), which requires both parties' written, voluntary consent to the informal process. The Department declines to authorize one or both parties, or the recipient, simply to ''waive'' a live hearing, and § 106.45(b)(9) in the final regulations impresses upon recipients that a recipient cannot condition enrollment, employment, or any other right on the waiver of rights under § 106.45, nor may a recipient ever require parties to participate in an informal resolution process. Participating in mediation, which is a form of informal resolution, should remain a decision for each party, individually, to make in a particular case, and the Department will not require the parties to attempt mediation.

The Department appreciates commenters' concerns that State APAs may prescribe grievance procedures that differ from those in a § 106.45 grievance process. To the extent that a recipient is able to comply with both, it must do so, and if compliance with both is not possible these final regulations, which constitute Federal law, preempt conflicting State law.[1384] The Department cautions, however, that preemption may not be necessary where, for example, a State law requires fewer procedures than do these final regulations, such that a recipient complying with § 106.45 is not violating State law but rather providing more or greater procedures than State law requires. To the extent that recipients find hearings under State APAs to be burdensome, the Department contends that the value of hearings outweighs such burdens, a policy judgment ostensibly shared by State legislatures that already require recipients to hold hearings.

The Department generally does not disagree with the general propositions set forth in the Federal district court memorandum cited by commenters to explain that college discipline differs from Federal criminal processes.[1385] The Department observes that the memorandum notes that ''Only where erroneous and unwise actions in the field of education deprive students of federally protected rights or privileges does a federal court have power to intervene in the educational process.'' [1386] These final regulations precisely protect the rights and privileges owed to every person participating in an education program or activity under Title IX, a Federal civil rights law. In so doing, these final regulations reflect that a Title IX grievance process is not a criminal proceeding and defer to all recipients (public and private institutions) to make their own decisions within a consistent, predictable framework.

In response to commenters' concerns that the NPRM was unclear about the extent of recipients' discretion to adopt rules and practices to govern the conduct of hearings (and other aspects of a grievance process) the Department has added to the introductory sentence of § 106.45(b): ''Any provisions, rules, or practices other than those required by § 106.45 that a recipient adopts as part of its grievance process for handling formal complaints of sexual harassment as defined in § 106.30, must apply equally to both parties.'' Under this provision a recipient may, for instance, adopt rules that instruct party advisors to conduct questioning in a respectful, non-abusive manner, decide whether the parties may offer opening or closing statements, specify a process for making objections to the relevance of questions and evidence, place reasonable time limitations on a hearing, and so forth. The Department declines to require recipients to offer ''mitigating measures'' during hearings in addition to the shielding provision in § 106.45(b)(6)(i) that requires a recipient to allow parties to participate in the live hearing in separate rooms upon any party's request. Similarly, recipients may adopt evidentiary rules (that also must apply equally to both parties), but any such rules must comport with all provisions in § 106.45, such as the obligation to summarize all relevant evidence in an investigative report, the obligation to evaluate all relevant evidence both inculpatory and exculpatory, the right of parties to gather and present evidence including fact and expert witnesses, the right to pose relevant cross-examination questions, and the rape shield provisions that deem sexual behavior evidence irrelevant subject to two exceptions. Thus, a recipient's additional evidentiary rules may not, for example, exclude *relevant* cross-examination questions even if the recipient believes the questions assume facts not in evidence or are misleading. In response to commenters' concerns that relevant questions might implicate information protected by attorney-client privilege, the final regulations add § 106.45(b)(1)(x) to bar the grievance process from requiring, allowing, relying on, or otherwise using questions or evidence that constitute, or seek disclosure of, information protected under a legally recognized privilege. This bar on information protected under a legally recognized privilege applies at all stages of the § 106.45 grievance process, including but not limited to the investigator's gathering of evidence, inspection and review of evidence, investigative report, and the hearing. This protection of privileged information also applies to a privilege held by a recipient. Additionally, questions that are duplicative or repetitive may fairly be deemed not relevant and thus excluded.

In response to commenters' concerns that holding live hearings is administratively time-consuming and presents challenges coordinating the schedules of all participants, the Department has revised this provision to allow a recipient discretion to conduct hearings virtually, facilitated by technology so participants simultaneously see and hear each other. The Department appreciates the concerns of commenters that some recipients operate programs or activities that are difficult to access via road systems and are in remote locations where technology is not accessible or reliable. The final regulations permit a recipient to apply temporary delays or limited extensions of time frames to all phases of a grievance process where good cause exists. For example, the need for parties, witnesses, and other hearing participants to secure transportation, or for the recipient to troubleshoot technology to facilitate a

[1383] Section 106.45(b)(9) does not permit recipients to offer or facilitate informal resolution of allegations that an employee sexually harassed a student.

[1384] For further discussion see the ''Section 106.6(h) Preemptive Effect'' subsection of the ''Clarifying Amendments to Existing Regulations'' section of this preamble.

[1385] *General Order on Judicial Standards of Procedure and Substance in Review of Student Discipline in Tax Supported Institutions of Higher Education,* ED025805 (1968).

[1386] *Id.*

virtual hearing, may constitute good cause to postpone a hearing.

The Department is persuaded by commenters' suggestions that all hearings should be recorded or transcribed, and has revised § 106.45(b)(6)(i) to require recipients to create an audio or audiovisual recording, or transcript, of any live hearing and make that recording or transcript available to the parties for inspection and review. As the commenters asserted, such a recording or transcript will help any party who wishes to file an appeal pursuant to § 106.45(b)(8) and also will reinforce the requirement that a decision-maker not have a bias for or against complainants or respondents generally or an individual complainant or respondent as set forth in § 106.45(b)(1)(iii).

The Department appreciates the opportunity to clarify here that hearings under § 106.45(b)(6) are not ''public'' hearings, and § 106.71(a) states that recipients must keep confidential the identity of any individual who has made a report or complaint of sex discrimination, including any individual who has made a report or filed a formal complaint of sexual harassment, any complainant, any individual who has been reported to be the perpetrator of sex discrimination, any respondent, and any witness, except as permitted by the FERPA statute or regulations, 20 U.S.C. 1232g and 34 CFR part 99, or as required by law, or as necessary to conduct the hearing.

Changes: The Department has revised § 106.45(b)(6)(i) to add language authorizing recipients to conduct live hearings virtually, specifically providing that live hearings pursuant to this subsection may be conducted with all parties physically present in the same geographic location, or at the recipient's discretion, any or all parties, witnesses, and other participants may appear at the live hearing virtually, with technology enabling participants simultaneously to see and hear each other. We have also revised this provision so that upon a party's request the parties must be in separate rooms for the live hearing, and not only for cross-examination. We have also revised § 106.45(b)(6)(i) to add a requirement that recipients create an audio or audiovisual recording, or transcript, of any live hearing held and make the recording or transcript available to the parties for inspection and review.

Additionally, we have revised the introductory sentence of § 106.45(b) to provide that any provisions, rules, or practices other than those required by § 106.45 that a recipient adopts as part of its grievance process for handling formal complaints of sexual harassment as defined in § 106.30, must apply equally to both parties.

We have revised § 106.45(b)(9) to provide that a recipient may not require as a condition of enrollment or continuing enrollment, or employment or continuing employment, or enjoyment of any other right, waiver of the right to an investigation and adjudication of formal complaints of sexual harassment consistent with § 106.45. We have also added § 106.71 prohibiting retaliation and stating that recipients must keep confidential the identity of any individual who has made a report or complaint of sex discrimination, including any individual who has made a report or filed a formal complaint of sexual harassment, any complainant, any individual who has been reported to be the perpetrator of sex discrimination, any respondent, and any witness, except as may be permitted by the FERPA statute or regulations, 20 U.S.C. 1232g and 34 CFR part 99, or as required by law, or to carry out the purposes of 34 CFR part 106, including these final regulations.

Finally, we have added § 106.45(b)(1)(x) to bar the grievance process from requiring, allowing, relying on, or otherwise using questions or evidence that constitute, or seek disclosure of, information protected under a legally recognized privilege.

Section 106.45(b)(6)(ii) Elementary and Secondary School Recipients May Require Hearing and Must Have Opportunity To Submit Written Questions

Comments: Many commenters supported § 106.45(b)(6)(ii), making hearings optional for elementary and secondary schools and prescribing a right for parties to submit written questions to other parties and witnesses prior to a determination regarding responsibility whether a hearing is held or not. Commenters asserted that high school students deserve due process protections as much as college students, and believed that this provision provides adequate due process in elementary and secondary schools while taking into account that students in elementary and secondary schools are usually under the age of majority.

Other commenters recounted personal experiences with family members being accused of sexual misconduct as high school students and argued that the required live hearings with cross-examination in § 106.45(b)(6)(ii) should also apply in high schools.

Some commenters asserted that this provision should be modified to require live hearings and cross-examination in elementary and secondary schools, but only for peer-on-peer sexual harassment allegations; commenters argued that this level of due process was more consistent with *Goss* and *Mathews* [1387] and where the allegations involve peers, the parties are on equal footing such that a hearing will effectively reduce risk of erroneous outcomes.

Commenters requested that this provision be modified to expressly state that live hearings are *not* required in elementary and secondary schools, instead of the phrasing that the grievance process ''may require a live hearing.''

Commenters called the written question process in this provision appropriately fair, flexible, and trauma-informed, and consistent with recommendations in the withdrawn 2011 Dear Colleague Letter. Commenters asserted that this provision, more so than § 106.45(b)(6)(i), balances the potential benefits of cross-examination with the drawbacks of a live hearing, including the chilling effect on complainants, the significant cost to recipients, and the potential for errors and poor spur-of-the-moment judgment calls in a setting with critically high stakes. Many commenters approved of this provision and urged the Department to make it apply also to postsecondary institutions in replacement of § 106.45(b)(6)(i) under which live hearings and cross-examination are required.

Some commenters opposed this provision, asserting that even a written form of cross-examination exposes elementary and secondary school students to unnecessarily hostile proceedings and limits the discretion of local educators who are more knowledgeable about their students and school communities, obligating schools to expend valuable resources in an unwarranted manner. Commenters argued that this provision would allow five year old students (or their parents or advisors) to face off against other five year old students about the veracity of allegations with written questions and responses being exchanged. Commenters argued this is inappropriate because it does not take into account how to obtain information from young children or students with disabilities, creates an air of intimidation and potential revictimization, allows confidential information to be shared with ''countless individuals'' whereas an

[1387] Commenters cited: *Goss* v. *Lopez,* 419 U.S. 565 (1975); *Mathews v. Eldridge,* 419 U.S. 565 (1975).

appeal could address concerns about the investigation without sharing FERPA-protected information, and formal discipline proceedings involving potential exclusion of a public school student are already subject to State laws giving sufficient due process protections to an accused student.

Commenters argued that in elementary and secondary schools, a formal investigation process is not always needed or advisable because often State law may require school interventions prior to when exclusionary discipline is considered. Commenters argued that this provision perpetuates America's patriarchal culture that already does not believe survivors, because this provision allows survivors to be questioned when we do not question someone who goes to the police and says they were robbed or someone who reports being hit by a car, so questioning sexual assault victims just gives perpetrators a chance to terrorize the victim again and fails to convey to the victim respect, belief, or justice.

Commenters asserted that this provision essentially provides the non-hearing equivalent of cross-examination via the written submission of questions, but argued this will be difficult for elementary and secondary school officials to implement without significant legal guidance because the purpose of cross-examination is to judge credibility and officials will not know how to accomplish that purpose. Commenters argued it is unclear how many back-and-forth follow-up questions need to be allowed in this ''quasi-cross examination process'' and asserted that this process will result in even greater hesitation among classmates to offer information about the parties involved, because peer pressure looks different among susceptible children and adolescents than with college-age students and already works against ''tattling'' or ''ratting'' on fellow students. Commenters expressed concern that the written ''cross-examination'' procedure will delay the ability of schools to timely respond to sexual harassment complaints, that this procedure is not already in use by schools, and that a cycle of written questions at the end of already overly formal, prescribed procedures will only serve to extend the time frame for completing investigations impairing an elementary and secondary school recipient's ability to effectuate meaningful change to student behavior if the behavior is found to be misconduct.

Commenters opposed this provision and urged the Department to remove the option for live hearings, because even permitting elementary and secondary schools the discretion to hold live hearings adds the possibility of a new layer to the investigative process that could subject a young student to cross-examination, which would intimidate and retraumatize victims.[1388] Commenters argued that research has consistently shown the extreme importance of handling investigations and interviews properly when dealing with childhood sexual abuse situations, that subjecting child victims of sexual abuse to multiple interviews is re-traumatizing and that the interview process should be conducted with an interdisciplinary team and trained mental health professionals utilizing trauma-informed practices, yet § 106.45(b)(6)(ii) would allow school administrators to ignore all of these best practices that are in the interest of protecting young victims,[1389] subjecting abused children to secondary victimization.[1390]

Commenters argued that the Supreme Court has held, even in the criminal law context, that a State's interest in protecting child abuse victims outweighs an accused's constitutional right to face-to-face confrontation of witnesses.[1391] Commenters argued that child sexual abuse is far too common an experience among America's schoolchildren, and teachers, counselors, and principals have no training in, and are not, forensic interviewers, criminal investigators, judges, or evidence technicians, and thus no school district should even be allowed to choose a live hearing model for sexual misconduct allegations. Commenters stated that live hearings place a sharp spotlight on both parties, and students in elementary and secondary schools typically lack the maturity necessary to participate. Commenters argued that live hearings should not even be optional in elementary and secondary schools because it is difficult to imagine any positive effects of a respondent's attorney cross-examining a sixth grader alleging sexual harassment at school or a complainant's attorney cross-examining the alleged perpetrator. Commenters argued that live hearings should only be allowed for elementary and secondary schools if otherwise required under State law. Commenters stated that if live hearings are even an option, school districts will be inundated with requests to hold adversarial live hearings.

Commenters asked for clarity as to which circumstances require an elementary and secondary school recipient to hold a live hearing, who would preside over a hearing, whether the hearing would need to be held on school grounds, and what responsibility the school district would have to mitigate re-traumatization, or whether if a school district opts to hold live hearings all the provisions in § 106.45(b)(6)(i) would then apply.

Commenters inquired whether a vocational school that is neither an elementary or secondary school, nor an institution of higher education, would have to follow § 106.45(b)(6)(i), § 106.45(b)(6)(ii), or some other process for Title IX adjudications.

Commenters suggested that this provision be modified to state that a minor has the right for a parent to help the minor student pose questions and answer questions but that the parent (or advisor) is not allowed to write the questions or answers without input from the minor student; commenters reasoned that it would be unfair if a respondent was an adult capable of strategically posing questions while a minor complainant lacked the developmental ability to do the same. Other commenters argued that written submission of questions by the parties should never be allowed in the elementary and secondary school context because the procedure is likely to devolve into a fight between the parents of the complainant and parents of the respondent, further traumatizing both children involved.

Discussion: The Department appreciates commenters' support for § 106.45(b)(6)(ii) making hearings optional for elementary and secondary schools while providing opportunity for the parties to submit written questions and follow-up questions to other parties and witnesses with or without a hearing. The Department agrees that this provision ensures due process

[1388] Commenters cited the Zydervelt 2016 study discussed in the ''Section 106.45(b)(6)(i) Postsecondary Institution Recipients Must Provide Live Hearings with Cross-Examination'' subsection of the ''Hearings'' subsection of the ''Section 106.45 Recipient's Response to Formal Complaints'' section of this preamble, for the proposition that cross-examination often relies on victim-blaming attitudes, sex stereotypes, and rape myths.

protections and fairness while taking into account that students in elementary and secondary schools are usually under the age of majority. Thus, the Department declines to mandate hearings and cross-examination for elementary and secondary schools, including only as applied to allegations of peer-on-peer harassment, or to high schools. Even where the parties are in a peer age group, parties in elementary and secondary schools generally are not adults with the developmental ability and legal right to pursue their own interests on par with adults. The Department is persuaded by commenters' concerns that the language in this provision should state even more clearly that hearings are optional and not required, and has revised this provision to state that ''the recipient's grievance process may, but need not, provide for a hearing.'' For the reasons explained in the ''Section 106.45(b)(6)(i) Postsecondary Institution Recipients Must Provide Live Hearing with Cross-Examination'' subsection of the ''Hearings'' subsection of the ''Section 106.45 Recipient's Response to Formal Complaints'' section of this preamble, the Department declines to make § 106.45(b)(6)(ii) applicable to postsecondary institutions.

The Department disagrees that the written submission of questions procedure in this provision exposes students to hostile proceedings, unnecessarily limits the discretion of local school officials, or obligates school districts to expend resources in an unwarranted manner. While due process of law is a flexible concept, at a minimum it requires notice and a meaningful opportunity to be heard, and the Department has determined that with respect to sexual harassment allegations under Title IX, both parties deserve procedural protections that translate those due process principles into meaningful rights for parties and increase the likelihood of reliable outcomes. This provision prescribes written submission of questions prior to adjudication, a procedure that benefits the truth-seeking purpose of the process even when the rights of a young student are exercised by a parent or legal guardian.

The final regulations do not preclude a recipient from providing training to an investigator concerning effective interview techniques applicable to children or to individuals with disabilities. Even when a party's rights are being exercised by a parent, each party's interest in the case is best advanced when the parties have the right to review and present evidence; the Department disagrees that the § 106.45 grievance process results in confidential information being shared with ''countless individuals'' or in violation of FERPA.[1392] Section 106.71 directs recipients to keep confidential the identity of any individual who has made a report or complaint of sex discrimination, including any individual who has made a report or filed a formal complaint of sexual harassment, any complainant, any individual who has been reported to be the perpetrator of sex discrimination, any respondent, and any witness, except as may be permitted by the FERPA statute or regulations, 20 U.S.C. 1232g and 34 CFR part 99, or as required by law, or to carry out the purposes of 34 CFR part 106, including these final regulations.

The Department appreciates commenters' concerns that State laws already govern disciplinary proceedings, especially with respect to exclusionary discipline. The Department has determined that the procedural protections in § 106.45 best serve the interests implicated in resolution of allegations of sexual harassment under Title IX, a Federal civil rights law, and discipline for non-Title IX matters does not fall under the purview of these final regulations. To the extent that these final regulations provide the same protections as State laws governing student discipline already provide, these final regulations pose no challenge for recipients; to the extent that a recipient cannot comply with both State law and these final regulations, these final regulations, as Federal law, would control.[1393]

The Department disputes a commenter's contention that only sexual assault survivors are ''questioned'' when they report being assaulted; contrary to the commenter's assertion, robbery victims and hit-and-run victims are also ''questioned'' during criminal or civil proceedings. Similarly, students accused of cheating also are often questioned. Whether or not commenters accurately describe American culture as ''patriarchal,'' the Department believes that these final regulations further the sex-equality mandate of Title IX by ensuring fair, accurate determinations regarding responsibility where sexual harassment is alleged under Title IX, so that sexual harassment victims receive remedies from recipients to promote equal educational access.

The Department disagrees that this provision will require significant legal guidance for school officials to comply. The provision gives each party the opportunity to submit written questions to be asked of other parties and witnesses, including limited follow-up questions. The decision-maker then objectively evaluates the answers to such questions, and any other relevant evidence gathered and presented during the investigation and reaches a determination regarding responsibility. Although observing demeanor is not possible without live cross-examination, a decision-maker may still judge credibility based on, for example, factors of plausibility and consistency in party and witness statements. Specialized legal training is not a prerequisite for evaluating credibility, as evidenced by the fact that many criminal and civil court trials rely on jurors (for whom no legal training is required) to determine the facts of the case including the credibility of witnesses.

This provision requires ''limited follow-up questions'' and leaves recipients discretion to set reasonable limits in that regard. The Department understands commenters' concerns that witnesses face peer pressure in many sexual harassment situations, and that stating factual information may be viewed as ''tattling'' or ''ratting out'' friends or fellow students which may be very uncomfortable for witnesses. Nothing in these final regulations purports to authorize recipients to compel witness participation in a grievance process, and § 106.71(a) protects every individual from retaliation for participating or refusing to participate in a Title IX proceeding.

The Department understands commenters' concerns that the written submission of questions procedure in § 106.45(b)(6)(ii) may be a new procedure in elementary and secondary schools, and the concern that such a procedure may create a ''cycle'' that extends the time frame for concluding a grievance process. To clarify that the written submission of questions procedure need not delay conclusion of the grievance process, we have revised § 106.45(b)(6)(ii) to state that the opportunity for each party to submit written questions to other parties and witnesses must take place after the parties are sent the investigative report, and before the determination regarding responsibility is reached. Because § 106.45(b)(5)(vii) gives the parties ten

[1392] For further discussion see the ''Section 106.6(e) FERPA'' subsection of the ''Clarifying Amendments to Existing Regulations'' section of this preamble.

[1393] For further discussion see the ''Section 106.6(h) Preemptive Effect'' subsection of the ''Clarifying Amendments to Existing Regulations'' section of this preamble.

days [1394] to submit a response to the investigative report, this revision to § 106.45(b)(6)(ii) makes it clear that the written submission of questions procedure may overlap with that ten-day period, so that the written questions procedure need not extend the time frame of the grievance process.

In order to leave school districts as much flexibility as possible while creating a consistent, predictable grievance process framework, the Department declines to foreclose the option of holding hearings (whether ''live'' or otherwise) in elementary and secondary schools. Local school officials, for example, could determine that their educational community is best served by holding live hearings for high school students, for students above a certain age, or not at all.[1395] State law may prescribe hearings for school discipline matters, in which case by leaving hearings optional these final regulations makes a conflict with State laws less likely. Further, the final regulations clarify that this provision applies not only to elementary and secondary schools but also to any other recipient that is not a postsecondary institution, and the nature of such a recipient's operations may lead such a recipient to desire a hearing model for adjudications. For these reasons the final regulations leave hearings optional regardless of whether State law requires hearings. The Department understands commenters' concerns that if hearings are an option, school districts may become ''inundated'' with requests to hold hearings. The Department reiterates that this provision does not require elementary or secondary schools to use hearings (live or otherwise) to adjudicate formal complaints under Title IX, and any choice to do so remains within a recipient's discretion.

As noted above, nothing in the final regulations precludes a recipient from training investigators in best practices for interviewing children, and the final regulations minimize the number of times a young victim might have to be interviewed, by not requiring appearances at live hearings. The Department understands that school officials are not forensic or criminal investigation experts, and recognizes that in many situations, conduct that constitutes sexual harassment as defined in § 106.30 will also constitute sexual abuse resulting in law enforcement investigations. These final regulations contemplate the intersection of a recipient's investigation under Title IX with concurrent law enforcement activity, expressly stating that good cause may exist to temporarily delay the Title IX grievance process to coordinate or cooperate with a concurrent law enforcement investigation. The Department disagrees that these final regulations require schools to disregard best practices with respect to interviewing child sex abuse victims and reiterate that the final regulations do not preclude a recipient from training Title IX personnel in interview techniques sensitive to the unique needs of traumatized children.

If an elementary and secondary school recipient chooses to hold a hearing (live or otherwise), this provision leaves the recipient significant discretion as to how to conduct such a hearing, because § 106.45(b)(6)(i) applies only to postsecondary institutions. The Department desires to leave elementary and secondary schools as much flexibility as possible to apply procedures that fit the needs of the recipient's educational environment. The Department notes that § 106.45(b) requires any rules adopted by a recipient for use in a Title IX grievance process, other than those required under § 106.45, must apply equally to both parties. Within that restriction, elementary and secondary school recipients retain discretion to decide how to conduct hearings if a recipient selects that option.

In response to commenters wondering whether hearings are optional or required for a recipient that is neither a postsecondary institution nor an elementary and secondary school, the Department has revised § 106.30 to define ''postsecondary institution'' and ''elementary and secondary school'' and clarify that § 106.45(b)(6)(ii) applies to elementary and secondary schools and any ''other recipient that is not a postsecondary institution.''

In response to commenters concerned about whether a minor party has the right to have a parent help pose questions and answers under this provision, we have added § 106.6(g) to clarify that nothing in these regulations changes or limits the legal rights of parents or guardians to act on behalf of a party. The Department declines to specify whether a parent writing out questions or answers on behalf of the student-party must consult their child; this matter is addressed by other laws concerning the scope of a parent's legal right to act on behalf of their child. The Department understands commenters' concerns that the written submission of questions procedure may ''devolve into a fight'' between parents of minor parties, but reiterates that recipients retain discretion to adopt rules of decorum that, for example, require questions to be posed in a respectful manner (*e.g.,* without using profanity or irrelevant *ad hominem* attacks). Further, the decision-maker has the obligation to permit only relevant questions to be asked and must explain to the party posing the question any decision to exclude a question as not relevant.

Changes: The Department has revised § 106.45(b)(6)(ii) to clarify that it applies to elementary and secondary schools and to ''other recipients that are not postsecondary institutions,'' and to clarify that ''the recipient's grievance process may, but need not, provide for, a hearing.'' We have further revised § 106.45(b)(6)(ii) to provide that, with or without a hearing, after the recipient has sent the investigative report to the parties pursuant to § 106.45(b)(5)(vii) and before reaching a determination regarding responsibility, the decision-maker(s) must afford each party the opportunity to submit written, relevant questions that a party wants asked of any party or witness, provide each party with the answers, and allow for additional, limited follow-up questions from each party.

We have added definitions of ''elementary and secondary schools'' and ''postsecondary institutions'' in § 106.30. We have also added § 106.6(g) acknowledging that nothing in these final regulations abrogates the legal rights of parents or guardians to act on behalf of party. We have added § 106.71 directing recipients to keep confidential the identity of any individual who has made a report or complaint of sex discrimination, including any individual who has made a report or filed a formal complaint of sexual harassment, any complainant, any individual who has been reported to be the perpetrator of sex discrimination, any respondent, and any witness, except

[1394] As noted in the ''Other Language/Terminology Comments'' subsection of the ''Section 106.30 Definitions'' section of this preamble, the final regulations allow recipients to choose how to calculate ''days'' as used in these final regulations; a recipient may, for instance, calculate a ten-day period by calendar days, school days, business days, or other method.

[1395] The Department notes that this provision states that non-postsecondary institution recipients' grievance processes may, but need not, provide for a hearing. Therefore, the recipient has flexibility to make a hearing available on a case by case basis, for example where the Title IX Coordinator determines a hearing is needed, so long as the grievance process (of which the recipient's students and employees receive notice, pursuant to § 106.8) clearly identifies the circumstances under which a hearing may, or may not, be held. A recipient's discretion in this regard is limited by the introductory sentence in § 106.45(b) that any rules adopted by a recipient must apply equally to both parties. Thus, a recipient's grievance process could not, for example, state that a hearing will be held only if a respondent requests it, or only if a complainant agrees to it, but could state that a hearing will be held only if *both parties* request it or consent to it.

as may be permitted by the FERPA statute or regulations, 20 U.S.C. 1232g and 34 CFR part 99, or as required by law, or to carry out the purposes of 34 CFR part 106, including these final regulations.

Comments: Some commenters supported or opposed the rape shield protections in § 106.45(b)(6)(ii) for the same reasons stated in support of or opposition to the same language in § 106.45(b)(6)(ii); see discussion under the ''Section 106.45(b)(6)(i) Postsecondary Institution Recipients Must Provide Live Hearings with Cross-Examination'' subsection of the ''Hearings'' subsection of the ''Section 106.45 Recipient's Response to Formal Complaints'' section of this preamble.

Some commenters argued that the two exceptions should be eliminated with respect to minors because the sexual behavior of children should never be relevant or asked about or because minors cannot legally consent and thus an exception where ''offered to prove consent'' serves no purpose with respect to minors.

Discussion: The Department's incorporates here its response to commenters' support and opposition for the rape shield language stated in the ''Section 106.45(b)(6)(i) Postsecondary Institution Recipients Must Provide Live Hearings with Cross-Examination'' subsection of the ''Hearings'' subsection of ''Section 106.45 Recipient's Response to Formal Complaints'' section of this preamble.

The Department disagrees that the two exceptions (or even the exception that refers to ''consent'') should be eliminated in this provision because minors cannot legally consent to sexual activity. While this fact may make the issue of ''consent'' irrelevant in certain sexual harassment cases, consent may be relevant in other formal complaints investigated and adjudicated by elementary and secondary school recipients; for example, where the parties are over the age of consent in the relevant jurisdiction, or the age difference between the two minor parties is such that State law decriminalizes consensual sexual activity between the two individuals.[1396] The Department will defer to State law regarding the age when a person has the ability to consent. Further, we have revised this provision in the final regulations to clarify that it applies not only to elementary and secondary schools but also to other recipients that are not postsecondary institutions, and parties associated with such ''other recipients'' may be adults rather than children. The Department thus retains the rape shield language in this provision, including the two exceptions, mirroring the rape shield language used in § 106.45(b)(6)(i).

Changes: For the same reasons as discussed under § 106.45(b)(6)(i), the Department has revised the rape shield language in § 106.45(b)(6)(ii) by clarifying that questions and evidence about the complainant's prior sexual behavior or predisposition are not relevant unless such questions or evidence are offered for one of the two exceptions (offered to prove someone other than the respondent committed the alleged conduct, or offered to prove consent).

Comments: Some commenters supported or opposed the requirement in § 106.45(b)(6)(ii) that decision-makers explain the reason for excluding any question proposed by a party as not relevant, for the same reasons stated in support or opposition for similar language in § 106.45(b)(6)(i); see discussion under the ''Section 106.45(b)(6)(i) Postsecondary Institution Recipients Must Provide Live Hearings with Cross-Examination'' subsection of the ''Hearings'' subsection of the ''Section 106.45 Recipient's Response to Formal Complaints'' section of this preamble.

Some commenters opposed this requirement because it would essentially force an elementary and secondary school administrator to make evidentiary determinations that can be difficult even for lawyers and judges. Commenters opposed this requirement based on personal experience handling questions from minor parties and their parents in Title IX proceedings and observing that many questions posed by parents are irrelevant, so having to explain the relevance of each excluded question would draw out the length of proceedings unnecessarily.

Discussion: The Department incorporates here its response to commenters' support of and opposition to the similar provision in § 106.45(b)(6)(i) under which the decision-maker must explain any decision to exclude questions as not relevant; see the ''Section 106.45(b)(6)(i) Postsecondary Institution Recipients Must Provide Live Hearings with Cross-Examination'' subsection of the ''Hearings'' subsection of the ''Section 106.45 Recipient's Response to Formal Complaints'' section of this preamble.

The Department appreciates commenters' concerns that based on experience with parents exercising rights on behalf of students during Title IX proceedings, parents tend to pose a lot of irrelevant questions. The Department believes the burden of this requirement is outweighed by the right of parties (including when a party's rights are exercised by parents) to meaningfully participate in the grievance process through posing questions to the other party and witnesses, and understanding why a question has been deemed irrelevant is important to ensure that the parties feel confident that their perspectives about the facts and evidence are appropriately taken into account prior to the determination regarding responsibility being reached.

Changes: None.

Determinations Regarding Responsibility

Section 106.45(b)(7)(i) Single Investigator Model Prohibited

Benefits of Ending the Single Investigator Model

Comments: Many commenters supported the NPRM's prohibition on the single investigator model because it would reduce the risk of bias and unfairness. Commenters argued that ending the single investigator model would decentralize power from one individual, allow for checks and balances, reduce the risk of confirmation bias, and increase the overall fairness and reliability of Title IX proceedings. Commenters stated that a strict separation of investigative and decision-making functions is essential because it is unrealistic to expect a person to fairly review their own investigative work. One commenter argued that procedural protections are necessary but not sufficient to render fair outcomes; the commenter stated it is also necessary to prohibit, detect, and eliminate bias. The commenter argued that unbiased adjudicators are a bedrock principle of any disciplinary proceeding, and this principle has been well understood since the founding of this country and development of the common law.[1397] Several commenters

[1396] The age of consent to sexual activity varies across States, from age 16 to age 18, and many States have a ''close in age exemption'' to decriminalize consensual sex between two individuals who are both under the age of consent. Age of Consent.net, *United States Age of Consent Map,* ''What is the legal Age of Consent in the United States?,'' *https://www.ageofconsent.net/states.*

[1397] Commenters cited: The Federalist No. 10 (J. Madison) (''No man is allowed to be a judge in his own cause; because his interest would certainly bias his judgment, and, not improbably, corrupt his integrity.''). At least one commenter cited: *Caperton* v. *A.T. Massey Coal Co., Inc.,* 556 U.S. 868, 867, 877 (2009) (common law recognized the need for unbiased adjudicators, and the U.S. Constitution incorporated and expanded upon the protections at common law against biased adjudicators).

asserted that schools are currently facing significant pressure from the media and general public to achieve ''social justice'' and find respondents guilty. Commenters argued that blending the investigative and adjudicative functions increases the risk of false positives (*i.e.,* inaccurate findings of responsibility).

Several commenters submitted personal stories where investigators under the single investigator model acted improperly, for instance by meeting with complainants but not respondents, failing to promptly notify the respondent of charges, withholding evidence, ignoring exculpatory evidence, ignoring inconsistencies in complainant's testimony, framing language in an inflammatory way against the respondent, relying on triple hearsay favoring the complainant, and entering a suspected personal relationship with the complainant. Commenters stated that improper or biased actions by an investigator might at least be recognized and corrected where the decision-maker is a different person. A few commenters asserted that ending the single investigator model would reinforce a genuine live hearing process with cross-examination. One commenter suggested that the single investigator model precludes effective confrontation of witnesses because even where there is a live hearing the investigator's finding is a ''heavy thumb on the scale.'' Commenters noted that under the single investigator model often there is no live hearing at all where parties can probe each other's credibility, and no opportunity for parties to know what evidence the investigator is considering before rendering an ultimate decision.

Discussion: The Department appreciates the support from commenters for § 106.45(b)(7)(i) of the final regulations which, among other things, would require the decision-maker to be different from any person who served as the Title IX Coordinator or investigator, thus foreclosing recipients from utilizing a ''single investigator'' or ''investigator-only'' model for Title IX grievance processes. The Department believes that fundamental fairness to both parties requires that the intake of a report and formal complaint, the investigation (including party and witness interviews and collection of documentary and other evidence), drafting of an investigative report, and ultimate decision about responsibility should not be left in the hands of a single person (or team of persons each of whom performed all those roles). Rather, after the recipient has conducted its impartial investigation, a separate decision-maker must reach the determination regarding responsibility; that determination can be made by one or more decision-makers (such as a panel), but no decision-maker can be the same person who served as the Title IX Coordinator or investigator.

Commenters correctly noted that separating the investigative and decision-making functions will not only increase the overall fairness of the grievance process but also will increase the reliability of fact-finding and the accuracy of outcomes, as well as improve party and public confidence in outcomes. Combining the investigative and adjudicative functions in a single individual may decrease the accuracy of the determination regarding responsibility, because individuals who perform both roles may have confirmation bias and other prejudices that taint the proceedings, whereas separating those functions helps prevent bias and prejudice from impacting the outcome.

Changes: None.

Consistency With Case Law

Comments: Several commenters contended that ending the single investigator model would be consistent with case law. Commenters cited cases where courts overturned recipient findings against respondents, raised concerns regarding preconceptions and biases that may arise where a single person has the power to investigate, prosecute, and convict, and asserted that a single investigator model can impede effective cross-examination and credibility determinations.[1398] On the other hand, some commenters cited case law to suggest the single investigator model can be fair and appropriate.[1399]

Discussion: The Department appreciates commenters' input on the consistency of the single investigator model with case law. We acknowledge that the Supreme Court has held that a biased decision-maker violates due process but that combining the investigative and adjudicative functions in a *single agency* does not present a constitutional due process problem.[1400] The final regulations comport with that holding, inasmuch as a single recipient is expected to perform the investigative and adjudicative roles in a Title IX grievance process. As noted by commenters, lower courts have reached mixed results as to whether a *single person* performing the investigative and adjudicative functions in a student misconduct process violates due process.[1401]

Notwithstanding whether the single investigator model withstands constitutional scrutiny under due process requirements, the Department believes that combining these functions raises an unnecessary risk of bias that

[1398] Commenters cited: *Doe* v. *Claremont McKenna Coll.,* 25 Cal. App. 5th 1055, 1072–73 (Cal. App. 2018) (all decision makers ''must make credibility determinations, and not simply approve the credibility determinations of the one Committee member who was also the investigator.''); *Doe* v. *Miami Univ.,* 882 F.3d 579, 601, 605 (6th Cir. 2018) (court found ''legitimate concerns'' raised by the investigator's ''alleged dominance on the three-person [decision making] panel,'' because ''she was the only one of the three with conflicting roles.''); *Doe* v. *Brandeis Univ.,* 177 F. Supp. 3d 561, 573 (D. Mass. 2016) (referring to the ''obvious'' ''dangers of combining in a single individual the power to investigate, prosecute, and convict, with little effective power of review''); *Doe* v. *Allee,* 30 Cal. App. 5th 1036, 1068 (Cal. App. 2019) (''As we have explained, in U.S.C.'s system, no in-person hearing is ever held, nor is one required. Instead, the Title IX investigator interviews witnesses, gathers other evidence, and prepares a written report in which the investigator acts as prosecutor and tribunal, making factual findings, deciding credibility, and imposing discipline. The notion that a single individual, acting in these overlapping and conflicting capacities, is capable of effectively implementing an accused student's right of cross-examination by posing prepared questions to witnesses in the course of the investigation ignores the fundamental nature of cross-examination: Adversarial questioning at an in-person hearing at which a neutral fact finder can observe and assess the witness' credibility.'').

[1399] Commenters cited: *Withrow* v. *Larkin,* 421 U.S. 35, 49 (1975) (rejecting the argument that a ''combination of investigative and adjudicative functions necessarily creates an unconstitutional risk of bias''); *Hess* v. *Bd. of Trustees of So. Ill. Univ.,* 839 F.3d 668 (7th Cir. 2016) (bias of decision-maker would violate due process, but combination of investigative and adjudicative functions into a single person does not, by itself, demonstrate that the decision-maker is actually biased); *Pathak* v. *Dep't. of Veterans Affairs,* 274 F.3d 28, 33 (1st Cir. 2001); *Doe* v. *Purdue Univ.,* 281 F. Supp. 3d 754, 779 (N.D. Ind. 2017), *aff'd, Doe* v. *Purdue Univ.,* 928 F.3d 652 (7th Cir. 2019).

[1400] Kenneth Oshita, *Home Court Advantage? The SEC and Administrative Fairness,* 90 S. Cal. L. Rev. 879, 902 (2017) (noting that the Supreme Court established that ''the combination of investigative and adjudicative functions does not, without more, constitute a due process violation'' but continuing, ''Interestingly, the *Withrow* Court recognized that a biased adjudicator is 'constitutionally unacceptable' and that 'our system of law has always endeavored to prevent even the probability of unfairness.' Yet, even recognizing the importance of fairness in this constitutional principle, the Court reasoned that the combination of functions within an agency is constitutionally acceptable.'') (citing *Withrow* v. *Larkin,* 421 U.S. 35, 49 (1975)).

[1401] *E.g.,* Richard H. Underwood, *Administrative Adjudication in Kentucky: Ethics and Unauthorized Practice Considerations,* 29 N. Ky. L. Rev. 359, 361 (2002) (''[T]he case law generally rejects the proposition that a *combination of functions in one agency* necessarily creates an unconstitutional risk of bias, or that such a combination automatically constitutes a denial of due process such as to warrant disqualification of the involved administrative adjudicator. On the other hand, *when functions are combined in a single individual,* the case for disqualification for 'unfairness' or bias is stronger. How can an administrative adjudicator deal fairly with a party or parties if he or she has performed other functions—investigatory or prosecutorial—in the same matter?'') (internal quotation marks and citations omitted; emphasis added).

may unjustly impact one or both parties in a given Title IX proceeding.[1402] Particularly because the stakes are so high in these cases, with potentially life-altering consequences that may flow from a decision in favor of either party, the Department believes that separating investigation from decision making is important to promote the overall fairness of the process.

Changes: None.

Alternative Approaches To Ending Single Investigator Model

Comments: Some commenters asserted that ending the single investigator model is unnecessary to reduce bias and may in fact increase the risk of unfairness. Commenters argued that Title IX investigators are highly-trained professionals who are often most familiar with the evidence and best-positioned to make credibility determinations and render consistent decisions. These commenters suggested that requiring different decision-makers may increase the risk of overlooked details and incorrect outcomes because other persons may not be as close to the evidence as investigators.

Some commenters argued that hybrid models are adequate and can satisfy due process concerns because, for example, hybrid models in use by some recipients use an investigator (or team of investigators) to gather evidence and write up recommendations about responsibility yet allow both parties to review gathered evidence and pose questions to each other, and hold live hearings for the sanctioning and appeals processes, while parties may resort to civil litigation to challenge the school's proceedings. One commenter acknowledged the possibility of bias within the single investigator model and recommended a hybrid system involving investigation by an impartial investigator followed by referral to a student conduct system for live hearing. One commenter proposed that the Department's concern regarding bias with the single investigator model could be addressed through less restrictive means, such as by allowing parties to assert alleged bias before or during an investigation and by offering an appeal to a different decision-maker to consider alleged bias during the investigation. One commenter suggested that the Department allow recipients who use two investigators to also use them as decision-makers. This commenter argued that two investigators are in the best position to review all the evidence and determine responsibility and appropriate sanction; moreover, ensuring two investigators assigned to each case prevents any one person from being decision-maker and allows the second person to serve as an effective check. Other commenters asserted that prohibiting the single investigator model is unnecessary because the Department already carefully safeguarded the selection process for investigators, Title IX Coordinators, and decision-makers by prohibiting bias and conflicts of interest in § 106.45(b)(1)(iii).

Discussion: The Department believes the robust training and impartiality requirements for all individuals serving as Title IX Coordinators, investigators, or decision-makers contained in § 106.45(b)(1)(iii) of the final regulations [1403] will effectively promote the reliability of fact-finding and the overall fairness and accuracy of the grievance process. In addition, the final regulations require that any materials used to train Title IX personnel must not rely on sex stereotypes. We believe these measures will promote consistent outcomes, addressing commenters' concerns about decision-makers not having the same level of training or expertise as investigators. Furthermore, § 106.45(b)(5)(vii) requires the investigator to prepare an investigative report that fairly summarizes all relevant evidence, and therefore the parties and decision-maker will be aware of the evidence gathered during the investigation.

The Department appreciates commenters' suggestion that a ''hybrid'' model could provide many of the same checks against bias and inaccuracy as complete separation of the investigation and adjudication roles. However, the Department believes that formally separating the investigative and adjudicative roles in the Title IX grievance process is important to reduce the risk and perception of bias, increase the reliability of fact-finding, and promote sound bases for responsibility determinations. As such, the Department concludes that adopting the various less restrictive means that commenters suggested to reduce the bias inherent in the single investigator model, such as permitting two investigators to also serve as decision-makers, would not go far enough to promote these important goals. Consistent with the commenters' suggestion, however, the Department also emphasizes that § 106.45(b)(8), in addition to requiring that recipients offer appeals for both parties, explicitly permits either party to assert that the Title IX Coordinator, investigator, or decision-maker had a conflict of interest or bias. These provisions are meant to reinforce each other in increasing the fairness of Title IX proceedings.

Changes: None.

Chilling Reporting and Other Harmful Effects

Comments: Commenters suggested that ending the single investigator model would increase the number of people who must be involved in the Title IX process, and this may increase the risk of untrained and biased people shaming survivors and not believing in them, and also lead to re-traumatization for survivors having to share their stories multiple times. Commenters suggested that ending the single investigator model reinforces the requirement for traumatizing and unnecessary live hearings with cross-examination, which could discourage reporting. Commenters argued that the single investigator model reduces pressure on both parties because the investigator can interact with each party in a less stressful, less adversarial setting.

Commenters asserted that the NPRM's prohibition of the single investigator model could be problematic under Title IX and potentially harmful to parties who want closure, because requiring a separate decision-maker could lengthen the adjudicative process, make it less efficient, and delay resolutions. One commenter argued that ending the single investigator model could frustrate the NPRM's due process goals, by perversely incentivizing recipients to avoid the NPRM's formal grievance process through informal resolution, or incentivize schools to not provide an

[1402] Michael R. Lanzarone, *Professional Discipline: Unfairness and Inefficiency in the Administrative Process,* 51 Fordham L. Rev. 818, 827 (1983) (noting that the ''commingling of investigatory and adjudicatory functions'' is a ''daily occurrence in [professional] disciplinary proceedings. The Supreme Court in [*Withrow* v. *Larkin,* 421 U.S. 35 (1975)], however, concluded that the Constitution tolerates such commingling. *Entirely apart from any specific constitutional infirmities, the question remains whether the basic unfairness of the procedure counsels against its use.*'') (internal citations omitted); *id.* at fn. 60 (''There are dangers in allowing an individual who has investigated misconduct and determined that there is probable cause to suspend a professional's license to sit as a trier of fact in a later de novo hearing. The state board that is responsible for professional discipline may view its role as more of a prosecutor than as a disinterested finder of fact. A board of education may find it difficult to be unbiased when the chief executive of the school district has already recommended dismissal of a tenured teacher. And the danger of bias undoubtedly increases when an individual actually conducts an investigation (as opposed to passing upon another's work) and then sits as the trier of fact to hear and pass upon the credibility of witnesses.'').

[1403] The final regulations revise § 106.45(b)(1)(iii) to include training for persons who facilitate informal resolution processes, in addition to Title IX Coordinators, investigators, and decision-makers.

appeal process due to added compliance costs.

Discussion: The Department does not believe that precluding a single investigator model for investigations and adjudications will discourage reporting, traumatize parties, unreasonably lengthen the grievance process, or incentivize recipients to forgo important due process protections for parties. Rather, the purpose of formally separating the investigative and adjudicative functions is to reduce the risk of bias, increase the reliability of fact-finding, and promote sound bases for determinations of responsibility. The Department acknowledges that without a requirement that the decision-maker be separate from any person that performed the role of Title IX Coordinator and investigator, a complainant potentially could give a statement only once—to the single person or team of people performing all those functions, and that complainants may feel intimidated by needing speak with more than one person during the course of the grievance process. Such a necessity, however, is not different from participation in any typical adjudicative process, whether civil or criminal, where a complainant (or civil plaintiff, or victim-witness in a criminal case) would also need to recount the allegations and answer questions several times during the course of an investigation and adjudication. Because a grievance process must contain consistent procedural protections in order to reach factually accurate outcomes, the final regulations ensure that a complainant retains control over deciding whether to participate in a grievance process [1404] and ensures that a complainant can receive supportive measures to restore or preserve the complainant's equal access to education regardless of whether a grievance process is undertaken.[1405] The final regulations also permit recipients to offer and facilitate informal resolution processes which can resolve allegations without a full investigation and adjudication.[1406]

Contrary to the claims made by some commenters that increasing the number of people who must be involved in the formal grievance process would increase the risk of using untrained personnel and causing unfairness, the Department believes that the robust training and impartiality requirements contained in § 106.45(b)(1)(iii) that apply to all individuals participating as Title IX Coordinators, investigators, decision-makers, or persons facilitating informal resolution processes, reduce these risks. Furthermore, ensuring that the investigative and adjudicative functions are performed by different individuals is critical for effective live cross-examination, as other commenters noted, because under the single investigator model the decision-maker may be biased in favor of the decision-maker's own investigative recommendations and conclusions rather than listening to party and witness statements during a hearing impartially and with an open mind; similarly, if the decision-maker is the same person as the Title IX Coordinator the decision-maker may be influenced by information gleaned from a complainant due to implementation of supportive measures rather than by information relevant to the allegations at issue. Moreover, under the single investigator model often there is no live hearing where parties can probe each other's credibility and as discussed under § 106.45(b)(6)(i), the Department believes that live hearings are a critical part of a fair process in the postsecondary context.

The Department acknowledges concerns that separating the investigative and adjudicative functions may lengthen the adjudicative process in some cases. However, we emphasize that § 106.45(b)(1)(v) of the final regulations requires that the grievance process be completed within a reasonably prompt time frame, including completion of a live hearing (for postsecondary institutions). We do not believe that eliminating the single investigator model will incentivize recipients to offer informal resolution process to avoid the grievance process. We have revised § 106.45(b)(9) so that informal resolutions must be voluntarily agreed to by each party, forbidding recipients from requiring any party to participate in an informal process, and preventing recipients from conditioning enrollment, employment, or any other right on a party's participation in informal resolution. We have also revised § 106.45(b)(8) to require recipients to offer appeals equally to both parties, which also must be subject to a recipient's designated, reasonably prompt time frames; this revision also ensures that recipients cannot rationalize removal of the single investigator model as a reason to refuse to offer an appeal.

Changes: We have revised § 106.45(b)(9) governing informal resolutions, to forbid recipients from requiring parties to participate in informal resolution and to preclude recipients from conditioning enrollment, employment, or enjoyment of rights on a party's participation in informal resolution. We have revised § 106.45(b)(8) governing appeals to require recipients to offer appeals equally to both parties, on three specified bases: Procedural irregularity, newly discovered evidence, or conflict of interest or bias on the part of Title IX personnel.

Respecting the Roles of Title IX Coordinators and Investigators

Comments: A few commenters asserted that excluding Title IX Coordinators and investigators from any decision-making role is inherently insulting to them because it undervalues their training, professionalism, and expertise. One commenter proposed that the Department require separate investigators and decision-makers, but not prohibit Title IX Coordinators from being decision-makers. This commenter reasoned that Title IX Coordinators are highly trained professionals and Title IX subject matter experts who are reliably impartial and that removing their expertise from the equation may increase the risk of bias, unfairness, and inconsistency across cases.

Discussion: The Department appreciates the integrity and professionalism of individuals serving as Title IX Coordinators. However, and as discussed above, given the high stakes involved for all parties in Title IX

[1404] *E.g.,* § 106.30 specifies that only a complainant, or a Title IX Coordinator, can sign or file a formal complainant initiating the grievance process such that even if a report about the complainant's alleged victimization is made to the recipient by a third party, the complainant retains autonomy to decide whether to file a formal complaint; § 106.30 revises the definition of ''complainant'' to remove the phrase ''or on whose behalf the Title IX Coordinator files a formal complaint'' to clarify that even when a Title IX Coordinator does sign a formal complaint initiating a grievance process, that action is not taken ''on behalf of'' the complainant, so that the complainant remains in control of when a formal process is undertaken on the complainant's behalf. The final regulations removed proposed § 106.44(b)(2) that would have required a Title IX Coordinator to file a formal complaint upon receipt of multiple reports against the same respondent, in order to avoid situations where a Title IX Coordinator would have been forced (by the proposed rules) to sign a formal complaint over the wishes of a complainant. The final regulations add § 106.71 prohibiting retaliation and including under prohibited actions those taken to dissuade a complainant from reporting or filing and those taken to punish a complainant (or anyone else) from refusing to participate in a Title IX proceeding.

[1405] *E.g.,* § 106.44(a) requires the Title IX Coordinator promptly to contact each complainant to discuss the availability of supportive measures (with or without a formal complaint being filed), consider the wishes of the complainant with respect to supportive measures, and explain to the complainant the process for filing a formal complaint.

[1406] Section 106.45(b)(9) (permitting informal resolutions of any formal complaint except where the allegations are that an employee has sexually harassed a student).

cases, the Department believes that separating the investigative and adjudicative functions is essential to mitigate the risk of bias and unfairness in the grievance process. The final regulations would not remove the expertise of Title IX Coordinators from the grievance process. Section 106.45(b)(7)(i) does not prevent the Title IX Coordinator from serving as the investigator; rather, this provision only prohibits the decision-maker from being the same person as either the Title IX Coordinator or the investigator. As other commenters have pointed out, the final regulations place significant responsibilities on Title IX Coordinators. Separating the functions of a Title IX Coordinator from those of the decision-maker is no reflection on the ability of Title IX Coordinators to serve impartially and with expertise. Rather, requiring different individuals to serve in those roles acknowledges that the different phases of a report and formal complaint of sexual harassment serve distinct purposes. At each phase, the person responsible for the recipient's response likely will receive information and have communications with one or both parties, for different purposes. For example, the Title IX Coordinator must inform every complainant about the availability of supportive measures and coordinate effective implementation of supportive measures, while the investigator must impartially gather all relevant evidence including party and witness statements, and the decision-maker must assess the relevant evidence, including party and witness credibility, to decide if the recipient has met a burden of proof showing the respondent to be responsible for the alleged sexual harassment. Placing these varied responsibilities in the hands of a single individual (or even team of individuals) risks the person(s) involved improperly relying on information gleaned during one role to affect decisions made while performing a different role. For example, a Title IX Coordinator may have a history of communications with the complainant before any formal complaint has been filed (for instance, due to implementing supportive measures for the complainant), which may influence the Title IX Coordinator's perspective about the complainant's situation before the Title IX Coordinator (if allowed to be the ''decision-maker'') has even spoken with the respondent. Similarly, an investigator may obtain information from a party that is not related to the allegations under investigation during an interview with a party, and if the investigator also serves as the decision-maker, such unrelated information may influence that person's decision making, resulting in a determination that is not based on relevant evidence. Separating the roles of investigation from adjudication therefore protects both parties by making a fact-based determination regarding responsibility based on objective evaluation of relevant evidence more likely.

Changes: None.

Preserving Recipient Autonomy

Comments: Several commenters contended that ending the single investigator model constitutes Federal overreach into recipient decision making. Commenters emphasized that recipients vary widely in size, resources, mission, and composition of students, faculty, and staff, and that imposing a one-size-fits-all approach on them by ending the single investigator model is unwise. Commenters argued that, currently, disciplinary processes are tailored to fit each recipient's unique needs, including the single investigator model where a recipient has deemed that to best fit the recipient's needs. Commenters argued that the Department should not limit school autonomy or dictate how private institutions allocate their staff.

Discussion: The Department respects the importance of granting recipients flexibility and discretion to design and implement policies and procedures that reflect their unique values and the needs of their educational communities. However, this interest must be balanced with other important goals, including increasing the reliability of fact-finding, the overall fairness in the process, and the accuracy of responsibility determinations. Title IX is a Federal civil rights law that requires recipients to operate education programs and activities free from sex discrimination, and when a recipient is presented with allegations of sexual harassment, the Department and the recipient have an interest in ensuring that the recipient applies procedures designed to accurately identify the nature of sexual harassment that has occurred in the recipient's education program or activity. The Department believes that separating the investigative and adjudicative functions most effectively balance the goals of ensuring accurate identification of sexual harassment and respecting recipients' autonomy. The Department notes that the final regulations leave significant flexibility to recipients, including whether the Title IX Coordinator can also serve as the investigator, whether to use a panel of decision-makers or a single decision-maker, and whether to use the recipient's own employees or outsource investigative and adjudicative functions to professionals outside the recipient's employ.

Changes: None.

Consistency With Federal Law and Employment Practices

Comments: Some commenters argued that ending the single investigator model would conflict with Federal and State laws and employment practices. One commenter reasoned that if the respondent is an employee, then the site administrator with line authority may be in best position to investigate due to confidentiality with personnel issues and the Department should not create a conflicting process. Commenters argued that the NPRM's prohibition of the single investigator model is unworkable in the employee context, especially where schools take disciplinary action against at-will employees because at-will employees do not have the same due process rights to their jobs as students do to their education. Commenters asserted that ending the single investigator model could conflict with existing collective bargaining agreements and faculty handbooks. Commenters also asserted that the NPRM's application to the employment context is problematic because workplace harassment is already addressed by Title VII and State non-discrimination laws.

Discussion: The Department acknowledges efficiency interests and the value of a recipient's flexibility and discretion to address sexual misconduct situations involving the recipient's employees, such as by using site administrators to investigate and adjudicate complaints against employee-respondents. However, these interests must be balanced with other important goals, including increasing the reliability of fact-finding, the overall fairness in the process, and the accuracy of responsibility determinations. The Department believes that separating the investigative and adjudicative functions most effectively promotes these goals. As such, the prohibition of the single investigator model contained in § 106.45(b)(7)(i) of the final regulations would apply to all recipients, including elementary and secondary schools and postsecondary institutions, and it would also equally apply to student and employee respondents. For reasons discussed in the ''Section 106.6(f) Title VII and Directed Question 3 (Application to Employees)'' subsection of the ''Clarifying Amendments to Existing Regulations'' section of this preamble, these final regulations apply

to any person, including employees, in an education program or activity receiving Federal financial assistance.

A recipient may use a site administrator to conduct the investigation into a formal complaint of sexual harassment against an employee, as long as the site administrator is not the decision-maker, as set forth in § 106.45(b)(7)(i). In that situation, the recipient must designate someone other than the site administrator to serve as the decision-maker. If the recipient would like the site administrator to serve as the decision-maker, then the recipient must designate someone other than the site administrator to serve as the investigator.

The Department appreciates the concerns raised by several commenters that ending the single investigator model may pose untenable conflict with State laws, the nature of at-will employment relationships where the respondent is an employee, and with existing collective bargaining agreements and faculty handbooks. With respect to potential conflict with State laws regarding the prohibition of the single investigator model contained in § 106.45(b)(7)(i) of the final regulations, the final regulations preclude the decision-maker from being the same person as the Title IX Coordinator or the investigator, but do not preclude the Title IX Coordinator from serving as the investigator. Further, the final regulations do not prescribe which recipient administrators are in the most appropriate position to serve as a Title IX Coordinator, investigator, or decision-maker, and leave recipients discretion in that regard, including whether a recipient prefers to have certain personnel serve in certain Title IX roles when the respondent is an employee. To generally address commenters' questions about preemption, the Department has added § 106.6(h) which provides that to the extent of a conflict between State or local law and Title IX as implemented by §§ 106.30, 106.44, and 106.45, the obligation to comply with §§ 106.30, 106.44, and 106.45 is not obviated or alleviated by any State or local law.

The Department acknowledges that Title VII and Title IX impose different requirements and that some recipients will need to comply with both Title VII and Title IX, as reflected in § 106.6(f) of these final regulations. The Department believes that recipients may comply with different regulations implementing Title VII and Title IX. These final regulations require all recipients with actual knowledge of sexual harassment in an education program or activity of the recipient against a person in the United States, to respond promptly in a manner that is not deliberately indifferent, irrespective of whether the complainant and respondent are students or employees. The grievance process in § 106.45 does not contradict Title VII or its implementing regulations in any manner and at most may provide more process than Title VII requires (such as specifying that a decision-maker must be a different person than the Title IX Coordinator or investigator). These final regulations, however, do not expand Title VII, as these final regulations are promulgated under Title IX. For further discussion of the intersection between Title VII and these final regulations, see the ''Section 106.6(f) Title VII and Directed Question 3 (Application to Employees)'' subsection of the ''Clarifying Amendments to Existing Regulations'' section of this preamble.

With respect to the general at-will employment doctrine, or the fact that recipients often have employment contracts or collective bargaining agreements in place that govern employee misconduct, where Title IX is implicated the Department has determined that the protections and rights set forth in these final regulations represent the most effective ways to promote Title IX's non-discrimination mandate, and recipients of Federal financial assistance agree to comply with Title IX obligations as a condition of receiving Federal funds. Recipients' contractual arrangements with employees must conform to Federal law, as a condition of receipt of Federal funds.

Changes: None.

Limiting the Prohibition of the Single Investigator Model

Comments: Some commenters supported ending the single investigator model but argued against a categorical prohibition. One commenter proposed that the Department only prohibit the single investigator model where the respondent faces the possibility of expulsion or dismissal. This commenter argued that more minor cases, such as sexual harassment claims against respondents for making inappropriate jokes, can be fairly investigated and resolved by a single person without bias. However, the commenter reasoned, where the stakes are higher, such as with a sexual assault allegation and the possibility of dismissal, then a strict separation of the investigative and adjudicative functions is justified. The commenter asserted that this is a logical cost/benefit analysis, especially for smaller recipients. One commenter suggested that the Department should only prohibit the single investigator model for larger schools (such as those with over 3,000 students) or for schools that have greater numbers of Title IX complaints that result in formal investigations (such as ten or more per year). One commenter requested that the Department prohibit the single investigator model but exempt recipients that submit a reasoned written explanation as to why their disciplinary system is fair and necessary. One commenter urged the Department to allow the single investigator model, but only where both parties consent to it. Another commenter emphasized that postsecondary institutions generally have more resources than elementary and secondary school districts, and therefore the Department should initially apply the single investigator prohibition only to postsecondary institutions, and see how effective it is before applying it to elementary and secondary schools.

Discussion: The Department appreciates the logistical concerns raised by some commenters regarding an across-the-board prohibition on the single investigator model contained in the final regulations and the suggestions for alternative approaches. However, the Department believes, as discussed above, that separating requiring investigative and adjudicative roles to be filled by different individuals is critical for reducing the risk of unfairness, increasing the reliability of fact-finding, and enhancing the accuracy of Title IX adjudications. Furthermore, we do not see the propriety in crafting different sets of procedural requirements under Title IX for recipients based on their size, the number of Title IX complaints they typically receive on an annual basis, or the potential severity of the punishment the respondent may receive if determined to be responsible for the alleged sexual harassment. It is unclear what criteria would justify an exemption to the general requirement that the same person cannot investigate and adjudicate a case, particularly because all the conduct described as ''sexual harassment'' under § 106.30 is serious conduct that jeopardizes a victim's equal access to education, and the Department resists attempts to characterize certain forms of sexual harassment defined under § 106.30 as automatically warranting more or less severe sanctions. The Department notes that § 106.45(b)(9) of the final regulations permits informal resolutions as long as both parties voluntarily consent to attempt an informal process.

Informal resolutions under the final regulations would not require more than one person to facilitate the process. In this regard, the Department recognizes the importance of giving recipients flexibility and discretion to satisfy their Title IX obligations in a manner consistent with their unique values and the needs of their educational communities, and the wishes of the parties to each formal complaint.

Changes: None.

Requests for Clarification

Comments: Commenters sought clarification on several issues regarding the NPRM's prohibition of the single investigator model. A few commenters asked whether the NPRM requires that the Title IX Coordinator be different than the investigator and, if so, how a Title IX Coordinator can remain fair and unbiased in situations where the NPRM requires the Title IX Coordinator to file a formal complaint. One commenter inquired as to whether the Title IX Coordinator can make preliminary determinations of responsibility that are then passed along to the decision-maker. Another commenter requested more clarity as to whether the NPRM's prohibition on a Title IX Coordinator serving as decision-maker also applies to appeal decisions. One commenter asked whether the decision-maker and hearing officer presiding over the live hearing can be different individuals. Another commenter asserted that § 106.45(b)(7)(i) has been understood to require different individuals to assume each of three different roles: Decision-maker, investigator, and Title IX Coordinator. This commenter inquired as to what the Title IX Coordinator's role would be regarding investigations under the NPRM.

Discussion: The Department appreciates the questions commenters raised regarding the implications of the prohibition of the single investigator model contained in § 106.45(b)(7)(i) of the final regulations. The Department wishes to clarify that the final regulations require the Title IX Coordinator and investigator to be different individuals from the decision-maker, but nothing in the final regulations requires the Title IX Coordinator to be an individual different from the investigator. Nothing in the final regulations prevents Title IX Coordinators from offering recommendations regarding responsibility to the decision-maker for consideration, but the final regulations require the ultimate determination regarding responsibility to be reached by an individual (*i.e.,* the decision-maker) who did not participate in the case as an investigator or Title IX Coordinator.

The final regulations have removed proposed § 106.44(b)(2) that would have required Title IX Coordinators to file formal complaints upon receiving multiple reports of sexual harassment against the same respondent; however, the final regulations leave Title IX Coordinators with discretion to decide to sign a formal complaint on the recipient's behalf. Although signing a formal complaint initiates a grievance process, for reasons discussed in the ''Formal Complaint'' subsection of the ''Section 106.30 Definitions'' section of this preamble, we do not believe that taking such an action necessarily renders a Title IX Coordinator biased or poses a conflict of interest, and we have revised the § 106.30 definition of ''formal complaint'' to clarify that Title IX Coordinators must comply with § 106.45(b)(1)(iii) even in situations where the Title IX Coordinator decides to sign a formal complaint.

The final regulations revise § 106.45(b)(8) to provide that appeals on specified bases must be offered equally to both parties and that the appeal decision-maker cannot be the same person as the decision-maker who reached the determination regarding responsibility, the Title IX Coordinator, or the investigator. With respect to the roles of a hearing officer and decision-maker, the final regulations leave recipients discretion to decide whether to have a hearing officer (presumably to oversee or conduct a hearing) separate and apart from a decision-maker, and the final regulations do not prevent the same individual serving in both roles. Lastly, regarding the role of the Title IX Coordinator, as discussed above, § 106.8(a) of the final regulations requires recipients to designate and authorize at least one employee to serve as Title IX Coordinator and coordinate the recipient's efforts to comply with the final regulations. Among other things, the Title IX Coordinator is responsible for responding to reports and complaints of sex discrimination (including reports and formal complaints of sexual harassment), informing complainants of the availability of supportive measures and of the process for filing a formal complaint, offering supportive measures to complainants designed to restore or preserve equal access to the recipient's education program or activity, working with respondents to provide supportive measures as appropriate, and coordinating the effective implementation of both supportive measures (to one or both parties) and remedies (to a complainant). As noted previously, the Title IX Coordinator is not precluded from also serving as the investigator, under these final regulations.

Changes: None.

Section 106.45(b)(7)(i) Standard of Evidence and Directed Question 6

Mandating a Higher Standard of Evidence

Comments: Several commenters asserted that the Department should mandate a higher standard of evidence than the preponderance of the evidence standard. Commenters cited cases describing the preponderance of the evidence standard as inadequate in sexual misconduct cases given the seriousness of allegations, the lack of other procedural safeguards found in civil litigation, and the reputational and socioeconomic damage resulting from a finding of sexual misconduct responsibility. Some commenters argued that the Department should mandate, or at least permit, recipients to use the criminal ''beyond a reasonable doubt'' standard in Title IX adjudications.[1407] One commenter suggested that the Department mandate the clear and convincing evidence standard but only where the alleged sexual misconduct is a Clery Act/VAWA offense or where the potential sanction is expulsion or suspension. One commenter asserted that Supreme Court case law requires application of the beyond a reasonable doubt standard in school Title IX proceedings.[1408]

Commenters asserted that the clear and convincing evidence standard would enhance the overall accuracy of the system by reducing false positives as compared to the preponderance of the evidence standard. One commenter argued that requiring the clear and convincing evidence standard is essential to protect academic freedom and free speech because it would be unjust to have a mere 50 percent threshold to punish professors for ''improper'' or controversial speech in their classrooms. One commenter asserted that it is especially important to raise the standard of evidence because

[1407] Commenters cited: Valerie Wilson, *The Problem with Title IX and Why it Matters,* The Princeton Tory (February 19, 2015).

[1408] Commenters cited: James M. Piccozi, *Note, University Disciplinary Process: What's Fair, What's Due, and What You Don't Get,* 96 Yale L. J. 2132, 2138 (1987) (impairment of accused's reputation severely limits the accused student's freedom and can make it virtually impossible to successfully transfer). Commenters also cited: *Jackson* v. *Metro. Edison Co.,* 419 U.S. 345 (1974) for the proposition that State action results where a private party conducts activities exclusively and traditionally reserved to the State, such as adjudication of sexual misconduct.

in the current #MeToo environment women are automatically believed and men are assumed guilty; this commenter argued that sexual misconduct cases often boil down to credibility and such allegations are virtually impossible to disprove.

Discussion: The Department acknowledges the suggestions offered by commenters to mandate a higher standard of evidence than the preponderance of the evidence standard, such as the clear and convincing evidence standard, or the beyond a reasonable doubt standard used in criminal proceedings. In recognition that sexual misconduct cases involve high stakes and potentially life-altering consequences for both parties, and such cases often involve competing, plausible narratives about the truth of allegations, the Department authorizes recipients, in § 106.45(b)(1)(vii) of the final regulations, to select either the preponderance of the evidence standard or the clear and convincing evidence standard to reach determinations regarding responsibility.[1409] Because Title IX proceedings differ in purpose and consequence from criminal proceedings, the Department does not believe the criminal law standard of ''beyond a reasonable doubt'' is appropriate in a noncriminal setting like a Title IX grievance process for various reasons.[1410] Recipients are not courts and do not have the power to impose a criminal punishment such as imprisoning a respondent. Recipients bear the burden of proof under § 106.45(b)(5)(i), but they do not have subpoena power. These final regulations also provide privacy protections for complainants and respondents which prohibits the recipient from accessing, considering, disclosing, or otherwise using a party's treatment records without the party's voluntary, written consent under § 106.45(b)(5)(i), even if these treatment records are relevant to the allegations in a formal complaint. The ''beyond a reasonable doubt'' standard also is rarely used in any civil proceeding.[1411] We therefore decline to permit a recipient to select that standard of evidence, and instead permit a recipient to select either of two standards of evidence, each of which is used in civil matters.[1412] The Department shares commenters' concerns for protecting academic freedom and free speech, and § 106.6(d)(1) emphasizes that nothing in the final regulations requires restriction of rights otherwise protected by the First Amendment. To further reinforce First Amendment rights, § 106.44(a) of the final regulations would explicitly prohibit the Department from deeming recipients' restriction of rights protected under the First Amendment to be evidence that the recipient was not deliberately indifferent, and the conduct constituting actionable harassment under § 106.30 must be either serious misconduct constituting *quid pro quo* harassment or Clery Act/VAWA sex offenses, or meet the *Davis* standard of being severe, pervasive, and objectively offensive denying a person equal educational access.[1413] When a formal complaint alleges conduct constituting ''sexual harassment'' as defined in § 106.30, the Department has concluded that the robust procedural protections granted to both parties in § 106.45 mean that the preponderance of the evidence standard, or the clear and convincing evidence standard, may be used to reach consistently fair, reliable outcomes. Contrary to the claims made by one commenter, the Supreme Court has never required application of the criminal ''beyond a reasonable doubt'' standard in Title IX proceedings, and the Department is not aware of a Federal appellate court decision requiring adoption of the criminal standard of evidence in Title IX proceedings. The Department believes that requiring such a ''beyond a reasonable doubt'' standard of evidence in a noncriminal Title IX proceeding is unnecessary to meet due process of law and fundamental fairness requirements, or increase accuracy of outcomes, in Title IX grievance processes.

Changes: The final regulations revise § 106.45(b)(7)(i) to refer to the revised requirement in § 106.45(b)(1)(vii), such that the a recipient must select between the preponderance of the evidence standard and clear and convincing evidence standard, and apply that selected standard consistently to all formal complaints alleging Title IX sexual harassment regardless of whether the respondent is a student or an employee. We also revise § 106.44(a) of the final regulations to explicitly prohibit the Department from deeming recipients' restriction of rights protected under the First Amendment to be evidence that the recipient was not deliberately indifferent.

Supporting § 106.45(b)(7)(i)

Comments: Some commenters expressed support for the NPRM's approach to the standard of evidence. Commenters asserted that many collective bargaining agreements (CBAs) applicable to school employees mandate the clear and convincing evidence standard and argued that students deserve the same rights and protections since students are the ones paying tuition. One commenter cited a poll about public perceptions of higher education that found 71 percent of people responding to the poll believed, ''[s]tudents accused of sexual assault on college campuses should be punished only if there is clear and convincing evidence that they are guilty of a crime.'' [1414]

Discussion: The Department appreciates the support from commenters regarding the proposed rules' approach to the standard of evidence. For reasons discussed above, the final regulations at § 106.45(b)(1)(vii) and § 106.45(b)(7)(i) continue to permit recipients to select between the preponderance of the evidence standard, or the clear and convincing evidence standard. We acknowledge the poll cited by one

[1409] A preponderance of the evidence standard of evidence is understood to mean concluding that a fact is more likely than not to be true. *E.g., Concrete Pipe & Prod. of Cal., Inc.* v. *Constr. Laborers Pension Tr. for S. Cal.,* 508 U.S. 602, 622 (1993) (a preponderance of the evidence standard ''requires the trier of fact to believe that the existence of a fact is more probable than its nonexistence'') (internal quotation marks and citation omitted). A clear and convincing evidence standard of evidence is understood to mean concluding that a fact is highly probable to be true. *E.g., Sophanthavong* v. *Palmateer,* 378 F.3d 859, 866–67 (9th Cir. 2004) (a clear and convincing evidence standard requires ''sufficient evidence to produce in the ultimate factfinder an abiding conviction that the truth of its factual contentions are [*sic*] highly probable.'') (internal quotation marks and citation omitted).

[1410] *See, e.g., Santosky* v. *Kramer,* 455 U.S. 745, 768 (1982) (noting that the Supreme Court hesitates to apply the ''unique standard'' of beyond a reasonable doubt ''too broadly or casually in noncriminal cases'') (internal quotation marks and citations omitted).

[1411] *Id.*

[1412] *E.g., Addington* v. *Tex.,* 441 U.S. 418, 424 (1979) (holding that the clear and convincing evidence standard was required in civil commitment proceedings) (noting that clear and convincing evidence is an ''intermediate standard'' between preponderance of the evidence and the criminal beyond a reasonable doubt standard and that the clear and convincing evidence standard ''usually employs some combination of the words 'clear,' 'cogent,' 'unequivocal,' and 'convincing' '' and while less commonly used than the preponderance of the evidence standard, the clear and convincing evidence standard is ''no stranger to the civil law'' and is sometimes used in civil cases ''involving allegations of fraud or some other quasi-criminal wrongdoing by the defendant'' where ''the interests at stake are deemed to be more substantial than mere loss of money'' justifying reduction of ''the risk to the defendant of having his [or her] reputation tarnished erroneously.'') (internal quotation marks and citations omitted).

[1413] For discussion of the intersection between the § 106.30 definition of sexual harassment, and the First Amendment, see the ''Sexual Harassment'' subsection of the ''Section 106.30 Definitions'' section of this preamble.

[1414] Commenter cited: Bucknell Institute for Public Policy, *Perceptions of Higher Education Survey—Topline Results* (2017).

commenter finding that the majority of people responding to the poll supported application of the clear and convincing evidence standard to address allegations of sexual assault in the postsecondary context. While the Department does not reach legal or policy decisions on the basis of public polls, we believe that in light of the strong procedural rights granted to both parties under the § 106.45 grievance process, either the preponderance of the evidence standard or the clear and convincing evidence standard may be applied to reach fair, accurate determinations regarding responsibility in Title IX grievance processes, and recipients should be permitted to select either standard.

We acknowledge that many employee CBAs mandate the clear and convincing evidence standard. The Department believes that giving recipients the choice between the preponderance of the evidence standard and the clear and convincing evidence standard, along with the requirement contained in § 106.45(b)(1)(vii) that the same standard of evidence must apply for complaints against students as for complaints against employees and faculty, helps to ensure consistency in recipients' handling of Title IX proceedings. To better ensure that recipients have a true choice between the two standards of evidence, we have removed the NPRM's language from § 106.45(b)(7)(i) that would have allowed selection of the preponderance of the evidence standard only if the recipient also used that standard for non-sexual harassment misconduct that carried similar potential sanctions. The grievance process, including the standard of evidence the recipient will apply, should not vary based on the identity or status of the respondent (*i.e.,* student or employee). However, each recipient is allowed to select one of the two standards of evidence (both of which are used in a variety of civil proceedings) to decide what degree of confidence the recipient's decision-makers must have in the factual correctness of determinations regarding responsibility in Title IX grievance processes.

Changes: The Department has revised § 106.45(b)(7)(i) of the final regulations such that recipients have the choice of either applying the preponderance of the evidence standard or the clear and convincing evidence standard, and § 106.45(b)(1)(vii) requires a recipient to make that choice applicable to all formal complaints of sexual harassment, including those against employees and faculty. We have removed the limitation contained in the NPRM that would have permitted recipients to use the preponderance of the evidence standard only if a recipient used that standard for non-sexual misconduct that has the same maximum disciplinary sanction.

One-Sided Condition on Choice of Evidentiary Standard

Comments: Commenters questioned the NPRM's requirement that if the preponderance of the evidence standard is used in Title IX cases then it must be used in non-Title IX cases with the same maximum punishment. Commenters suggested this would undermine recipient flexibility. Some commenters asserted that the NPRM presented a false choice of an evidentiary standard because the proposed rules imposed a one-way ratchet where schools may use the clear and convincing evidence standard in sexual assault cases and a lower standard in other cases, but not vice versa, thereby disadvantaging complainants in sexual harassment situations but not in other situations. Some commenters asserted that the Department lacks authority under Title IX to impose requirements on non-Title IX related disciplinary proceedings.

One commenter argued that the Department should not interfere with recipient autonomy in determining the appropriate standard of evidence; this commenter suggested that the Department: (1) Limit the preponderance of the evidence standard to recipients who used it before the Department advised them to; (2) limit the preponderance of the evidence standard for sexual misconduct cases to recipients who had the preponderance of the evidence standard for non-sexual cases before the NPRM; or (3) mandate all recipients use the clear and convincing evidence standard, but allow recipients to adopt the preponderance of the evidence standard if done by internal process initiated at least one year after the clear and convincing evidence standard takes effect.

One commenter asserted the NPRM's approach to standard of evidence is a heavy-handed Federal mandate to use the clear and convincing evidence standard, which is inconsistent with the current Administration's deregulatory agenda. This commenter asserted that the Department should not usurp the authority of school boards or micromanage recipients.

Discussion: The Department is persuaded by the concerns raised by commenters that the NPRM's prohibition on recipients using the preponderance of the evidence standard unless they also used that standard for non-sexual misconduct that carries the same maximum punishment constituted a one-way restriction that appeared to many commenters to leave a recipient without a genuine choice between the two standards of evidence. The Department is also persuaded by commenters' objections that the NPRM approach may have had the unintended consequence of pressuring recipients to choose a standard of evidence for non-Title IX misconduct situations, potentially exceeding the Department's authority to effectuate the purpose of Title IX. For these reasons, the Department has simplified its approach to the standard of evidence contained in § 106.45(b)(1)(vii) and referenced in § 106.45(b)(7)(i), such that recipients may select the preponderance of the evidence standard or the clear and convincing evidence standard, without restricting that selection based on what standard of evidence a recipient uses in non-Title IX proceedings. The Department believes this revised approach better ensures that the Department is not inspecting how recipients handle non-Title IX misconduct proceedings.

We acknowledge the alternative approaches to the standard of evidence raised by one commenter that would limit the application of the preponderance of the evidence standard. However, the Department believes that recipients are in the best position to select the standard of evidence that suits their unique values and the needs of their educational community and the Department thus declines to impose restrictions or requirements upon recipients who select the preponderance of the evidence standard. Because the final regulations grant recipients the unrestricted right to choose between the preponderance of the evidence standard and the clear and convincing evidence standard, we disagree that the final regulations reflect a heavy-handed Federal mandate inconsistent with the current Administration's deregulatory agenda.

Changes: The Department has revised § 106.45(b)(7)(i) of the final regulations such that recipients have the choice of either applying the preponderance of the evidence standard or the clear and convincing evidence standard, and § 106.45(b)(1)(vii) requires a recipient to make that choice applicable to all formal complaints of sexual harassment, including those against employees and faculty. We have removed the limitation contained in the NPRM that would have permitted recipients to use the preponderance of the evidence standard only if they used that standard for non-sexual misconduct that has the same maximum disciplinary sanction.

Same Evidentiary Standard in Student and Faculty Cases

Comments: Several commenters expressed support for the NPRM's requirement that the same standard of evidence be used in student and faculty cases. Commenters stated that this is important for fairness; the Department should not permit recipients to disfavor certain groups. A few commenters raised the point that, unlike students, employees and faculty often have superior leverage as a group when negotiating terms with recipients. Commenters stated that the NPRM's approach would level this playing field. One commenter contended that setting the same standard for both students and employees will enhance predictability and consistency. Another commenter asserted that promoting a uniform set of evidentiary standards would reduce recipients' costs to administer their Title IX disciplinary programs and train personnel.

Some commenters believed that the Department was correctly encouraging schools to apply the clear and convincing evidence standard in Title IX cases. They stated that the clear and convincing evidence standard is appropriate given the long-lasting and serious consequences of being deemed responsible for sexual misconduct. Commenters argued that faculty may lose lifelong employment and suffer permanent reputational damage, and the preponderance of the evidence standard is insufficient to protect academic freedom and tenure. One commenter argued that just because the preponderance of the evidence standard is used in civil litigation does not mean it is appropriate for Title IX proceedings; the two systems are fundamentally distinct because the latter does not have procedural protections such as civil access to counsel, discovery, cross-examination, presumption of innocence, juries, or impartiality of decision-makers that may otherwise render the proceeding fair despite a lower evidentiary standard. The commenter asserted that the clear and convincing evidence standard may also mitigate the impact of racial bias that disproportionately affects male students and faculty in sexual harassment cases.

Other commenters opposed the NPRM's requirement that the same standard of evidence apply in student and faculty cases. Commenters emphasized the practical difficulty of recipients changing applicable standards for employee cases, given the reality that many faculty collective bargaining agreements (CBAs) mandate the clear and convincing evidence standard [1415] and that many postsecondary institutions choose to follow American Association of University Professors (AAUP) standards that include a clear and convincing evidence standard for faculty misconduct, even if the recipient's CBA does not mandate that standard.[1416] Commenters asserted that some State laws require recipients to use the clear and convincing evidence standard, especially for tenured faculty discipline cases, which may negate the flexibility that the Department was trying to provide recipients regarding a choice of standard of evidence. Commenters argued that recipients subject to such CBAs or State laws do not have a neutral choice because these recipients may be required to use a clear and convincing evidence standard for employees and the NPRM requires such recipients to also use that standard for students even if recipients would rather use different standards for students than employees. Other commenters stated that some State laws require postsecondary institution recipients to apply a preponderance of the evidence standard to student sexual misconduct disciplinary proceedings yet the proposed regulations may leave such recipients with a potential conflict between continuing to follow their State law by using the preponderance of the evidence standard (in student cases) but violating these final regulations (if the recipient is also bound under a CBA to apply a clear and convincing evidence standard to faculty misconduct and cannot raise the standard of evidence used in student cases without violating State law).

One commenter stated that at the commenter's university, clear and convincing evidence is required to dismiss a faculty member while a preponderance of the evidence is required to punish a student, even for similar misconduct, which ''translates to the school being less inclined to fire a faculty member over an allegation than to punish a student over an allegation.'' This commenter argued that the proposed rules would force schools in that situation to make a choice: Either lower the standard of evidence required to dismiss a faculty member, or raise the standard of evidence for all claims to the standard used for dismissing a faculty member, which would mean either making it easier to prove accusations against a faculty member or making it harder to prove any allegation (against any respondent). The commenter believed that the proposed rules should not force schools to make a choice between making it easier to fire faculty or making it harder to believe sexual assault victims.

One commenter cited studies of faculty sexual harassment cases that showed professors usually have multiple victims, mostly students, and that faculty harassers who experience sanctions are less likely to repeat serious harassment.[1417] This commenter argued that if the proposed rules' approach leads universities to comply by applying the clear and convincing evidence standard across the board for student and faculty sexual misconduct matters, then in effect universities would be forced by Federal regulatory requirements to ''single out'' for unfavorable treatment their faculty and graduate students who are investigated for research misconduct because Federal regulations require research misconduct linked to federally funded research grants to be shown under a preponderance of the evidence standard, while sexual misconduct would be investigated under a clear and convincing evidence standard. The commenter asserted that because a finding of research misconduct carries significant public stigma (such as the respondent's name and case summary posted on government websites and scientific watchdog organization websites), concern for the heightened stigma faced by respondents accused of sexual misconduct is not an appropriate justification for the proposed rules' apparent encouragement of the clear and convincing evidence standard.

Some commenters argued that discipline of students, and discipline of employees, serve fundamentally different goals and applying a one-size-fits-all approach is inappropriate. Commenters asserted that student discipline has a mainly educational purpose, whereas employee discipline is about when to take adverse

employment action. Commenters cited scholarly articles and cases to suggest that students and employees are different constituencies with different interests; for example, universities have obligations to protect student safety that differ from obligations to protect employee safety.[1418] Commenters asserted that the student/recipient relationship is different than the employee/recipient relationship, in part because the student pays tuition to gain educational and developmental services from the school and the school has an affirmative obligation to create an educational environment conducive to that goal. On the other hand, commenters argued, employees provide services to the school, mainly to benefit the students, and are paid by the school for their services, and while all employees have a right to a workplace free from discrimination, the school has no obligation to encourage an employee's social and personal development. Commenters argued that Title IX is about equal educational access, not about making sure that schools treat all classes of respondents the same way. One commenter contended that it is unfair to hold students to the same standard of evidence as employees because students are not parties to the employee union's CBAs and argued that the Department should not bind students to outcomes of negotiations in which the students could not participate. One commenter stated that, unlike students, university employees can lose lifetime employment, a much more serious outcome than being forced to leave one particular university, and this difference justifies using a higher burden of proof in faculty cases.

One commenter asserted that the proposed rules' requirement to use the same standard of evidence for cases with student-respondents as with employee-respondents stems from anti-union bias.

One commenter argued that the proposed choice given to recipients in the NPRM could potentially expose recipients to liability for sex discrimination under 34 CFR 106.51 (''A recipient shall not enter into a contractual or other relationship which directly *or indirectly* has the effect of subjecting employees or students to discrimination . . .'') (emphasis added). This commenter argued that recipients who currently use the preponderance of the evidence standard in sexual harassment cases involving student-respondents, may be forced by the NPRM to raise the standard of evidence to the clear and convincing evidence standard in order to comply with recipients' CBAs, yet that reason for raising the standard of evidence (and, in the commenter's view, disfavoring complainants by raising the standard of evidence) may constitute violation of 34 CFR 106.51 because raising the standard of evidence to match what the recipient uses in a CBA could be viewed as having entered into a CBA (*i.e.,* a contractual or other relationship) that indirectly has the effect of subjecting students to discrimination (*i.e.,* by ''disfavoring'' complainants alleging sexual harassment).

One commenter contended that the inherent power imbalance between faculty and students means that faculty may be viewed as more credible than students, and thus the applicable standard of evidence should not necessarily be identical.

Discussion: The Department appreciates commenters' support for the approach to recipients' selection of a standard of evidence, and agrees that offering a choice between two reasonable standards provides consistency across cases, within each recipient's educational community, regardless of whether the respondent is an employee or a student, while providing recipients flexibility to select the standard that best meets the recipient's unique needs and reflects the recipient's values. The Department disputes commenters' assertion that the Department is encouraging the selection of the clear and convincing evidence standard. As shown by the fact the final regulations respond to commenters' concerns by removing the NPRM's restriction on the use of the preponderance of the evidence standard, the Department's intention is to permit recipients to choose between two standards of evidence, either of which can be applied to Title IX grievance processes to produce fair and reliable outcomes.

The Department acknowledges the concerns raised by some commenters regarding the challenges that may arise from implementing the requirement contained in § 106.45(b)(1)(vii) and § 106.45(b)(7)(i) that the same standard of evidence be used for complaints against students as for complaints against employees and faculty. We recognize the reality that some employee CBAs or State laws mandate application of the clear and convincing evidence standard for employee or faculty misconduct, that some recipients use a lower standard of evidence in cases involving student-respondents than in cases involving employee-respondents, and that it may be challenging for such recipients to decide whether to raise the standard of evidence (for student cases) or lower the standard of evidence (for employee cases) so that all formal complaints of sexual harassment use the same standard of evidence as required under the final regulations. The Department believes that recipients should carry the same burden of proof,[1419] weighing relevant evidence against the same standard of evidence, with respect to any complainant's allegations of Title IX sexual harassment. The Department believes that complainants in a recipient's educational community should face the same process, including the same standard of evidence, in a Title IX grievance process regardless of whether the respondent who allegedly sexually harassed the complainant is a student, employee, or faculty member. The Department believes that either the preponderance of the evidence standard, or the clear and convincing evidence standard, may be applied to allegations of sexual harassment to reach fair, reliable outcomes, and thus the Department permits recipients to select either of those standards of evidence. As shown by the fact that commenters confirmed that many recipients currently use the clear and convincing evidence standard of evidence in employee-respondent sexual misconduct cases while using the preponderance of the evidence standard of evidence standard in student-respondent cases, valid reasons exist as to why a recipient might believe that either one of those standards of evidence reflects the appropriate level of confidence that decision-makers should have in the factual correctness of determinations regarding responsibility in sexual misconduct cases. The final regulations require recipients to give complainants the predictability of knowing that the standard of evidence that applies to a formal complaint of sexual harassment in a particular

[1418] Commenters cited, *e.g.,* Kristen Peters, *Protecting the Millennial College Student,* 16 S. Cal. Rev. of L. & Social Justice 431, 448 (2007) (schools have a qualitatively different relationship with their employees than their students. In the modern university context, courts ''have increasingly recognized a college's duty to provide a safe learning environment both on and off campus.''); *Duarte* v. *State,* 88 Cal. App. 3d 473 (Cal. 1979) (noting that students ''in many substantial respects surrender[]the control of [their] person[s], control of [their] own security to the university''); *Mullins* v. *Pine Manor Coll.,* 449 NE2d 331, 335–36 (Mass. 1983) (holding that ''[p]arents, students, and the general community . . . have a reasonable expectation, fostered in part by colleges themselves, that reasonable care will be exercised to protect resident students from foreseeable harm.'').

[1419] Under the final regulations, § 106.45(b)(5)(i), the burden of proof rests on the recipient, not on the parties.

recipient's grievance process will not vary depending on whether the complainant was sexually harassed by a fellow student, or by a school employee.

The Department acknowledges that employees and faculty members may have greater bargaining power and leverage than students in extracting guarantees of protection under a recipient's grievance procedures, and that some recipients apply a clear and convincing evidence standard for complaints of employee misconduct through CBAs or due to choosing to follow AAUP guidelines. However, the Department does not believe that is necessary or reasonable to draw distinctions among complainants alleging Title IX sexual harassment based on the status of the respondent as a ''student'' versus an ''employee.'' Furthermore, a growing trend within postsecondary institutions is for graduate students to unionize, and such a trend blurs the lines between categories of students and employees, with respect to collective bargaining power.[1420]

Collective bargaining through a union may, as commenters asserted, give employees greater ''bargaining power'' than students have; on the other hand, student activism often succeeds in ''bargaining'' for university action on a variety of matters that affect students. Regardless of the relative strength of ''bargaining power'' of employees and students, the Department believes that a recipient must implement a fair grievance process for all complainants that does not use a different standard of evidence based on whether the complainant alleges sexual harassment against an employee, or against a student. Complainants (especially students) who allege sexual harassment against an employee already face the possibility that the respondent, as an employee, may be in a position of actual or perceived authority over the complainant, and the Department does not wish to encourage recipients to exacerbate that power differential by treating some complainants (*i.e.,* those who allege sexual harassment against a recipient's employee) differently from other complainants (*i.e.,* those who allege sexual harassment against a recipient's student) by requiring the former group of complainants to navigate a grievance process that will apply a higher standard of evidence than complainants in the latter group of complainants.[1421] Complainants should know that their school, college, or university has selected a standard of evidence (representing the ''degree of confidence''[1422] that a recipient requires a decision-maker to have in the factual accuracy of the determination regarding responsibility) that will apply regardless of the identity, status, or position of authority of the respondent.

The Department does not view the potential consequences of being found responsible for sexual harassment as less serious for students than employees; while employees face potential loss of employment, students face potential loss of educational opportunities which may also affect a student's career opportunities. While some employees found responsible for sexual harassment may lose all future career opportunities and some students found responsible may transfer to other institutions, the converse also occurs; some employees found responsible find work elsewhere and some students found responsible find it impossible to transfer to other institutions. The potential consequences of being found responsible, therefore, may be just as serious for a student as for an employee, and differences in the nature of potential consequences does not justify using a different standard of evidence for employee-respondent cases than for student-respondent cases. At the same time, a complainant alleging Title IX sexual harassment faces potential loss of equal educational access if sexual harassment allegations are not resolved accurately, regardless of whether the complainant has been allegedly sexually harassed by a student or by an employee. For respondents (whether students or employees) and for complainants (whether students or employees), it is important for a Title IX grievance process to reach a reliable outcome.[1423]

The Department agrees that recipients have a different relationship with the recipient's students than with the recipient's employees; the Department's approach to the standard of evidence ensures that a recipient does not adjudicate a student-complainant's formal complaint differently based on whether the student-complainant was allegedly sexually harassed by a student, or by an employee. Because the final regulations do not require particular disciplinary sanctions, the final regulations do not preclude a recipient from imposing student discipline as part of an ''educational purpose'' that may differ from the purpose for which a recipient imposes employee discipline. The Department's approach to the standard of evidence is not based on concern that a recipient must treat all classes of respondents the same way, but is based on the Department's concern that all complainants within a recipient's education program or activity are treated the same way, including facing the same standard of evidence when a complainant's sexual harassment allegations are resolved.

Permitting recipients to select between the two standards of evidence allows recipients who face conflicting

[1420] *E.g.,* Leslie Crudele, *Graduate Student Employees or Employee Graduate Students? The National Labor Relations Board and the Unionization of Graduate Student Workers in Postsecondary Education,* 10 William & Mary Bus. L. Rev. 739, 741–42 (2019) (noting that as college enrollment has increased, so has the number of teaching staff, and that as of 2013 the Bureau of Labor Statistics found there were approximately 1.13 million graduate teaching assistants employed at postsecondary institutions); *id.* at 780 (after detailing the history of unionization of graduate students at public and private colleges and universities, concluding that the National Labor Relations Board has most recently laid groundwork for a continuing trend toward graduate student unionization).

[1421] The standard of evidence used for a class of claims reflects a societal judgment about the level of confidence a decision-maker should have before reaching a conclusion in the case. *E.g., In re Winship,* 397 U.S. 358, 370 (1970) (Harlan, J., concurring) (the purpose of a standard of proof is ''to instruct the factfinder concerning the degree of confidence our society thinks he should have in the correctness of factual conclusions for a particular type of adjudication.''). The Department believes that a recipient's selection of a standard of evidence appropriate for resolving sexual harassment formal complaints should reflect the recipient's decision about the level of confidence the recipient believes a decision-maker should have in reaching a conclusion, that all complainants who file formal complaints of sexual harassment with a recipient should have the benefit of understanding the recipient's decision on that issue, and that different ''degrees of confidence'' should not be applied based on a respondent's status as a student or employee because whether the respondent is a student or employee does not necessarily alter the nature of the harm that the alleged conduct inflicted on the complainant or lessen the seriousness of potential consequences for the respondent.

[1422] *Id.*

[1423] For an example of divergent views about the appropriate standard of evidence within a university's faculty members, raising arguments for and against retaining the clear and convincing evidence standard for employees, *see, e.g.,* Matt Butler, *Standard of proof in sexual assault cases debated by professors,* The Review (Nov. 10, 2014) (University of Delaware student newspaper article reporting on a faculty debate about whether the university should lower the standard of evidence used in faculty sexual misconduct cases from the clear and convincing evidence standard to the preponderance of the evidence standard, in light of OCR's insistence that universities must use the preponderance of the evidence standard, reporting that ''some faculty supported the lower burden of proof as a means of creating—in reality and perception—a safer place for students'' but also quoting Kathy Turkel, a women and gender studies professor, as asserting that ''the student environment should be the most important factor'' but ''the lower standards of proof violate due process rights of the professors'' and a ''higher standard of proof'' would ''outweigh the negatives, and it would actually help both the accuser and the accused in cases of sexual assault'' because ''it is due process that protects both complainants and perpetrators in these cases'').

requirements imposed by contracts or laws outside these final regulations the ability to resolve such conflict in whichever way a recipient deems appropriate.[1424] Not all recipients are subject to CBAs that require a different standard of evidence for employee discipline than the recipient uses for student discipline, and not all recipients are subject to State laws that mandate the standard of evidence to be used in student disciplinary cases; such recipients may select a standard of evidence in compliance with these final regulations without the external factors of CBA or State law requirements. For recipients who have CBAs requiring a clear and convincing evidence standard in employee cases but no State law directive requiring a different standard of evidence in student cases, recipients may comply with these final regulations by using the clear and convincing evidence standard in student cases, or by renegotiating their CBAs to use the preponderance of the evidence standard for employee cases.

For recipients who do have CBAs requiring a clear and convincing evidence standard (in employee cases) and State laws requiring a preponderance of the evidence standard (in student cases), such recipients may find it appropriate to comply with these final regulations by renegotiating their CBAs rather than violate State law. We acknowledge commenters' point that renegotiating a CBA is often a time-consuming process; however, a recipient's contractual and employment arrangements must comply with Federal laws,[1425] and recipients of Federal financial assistance understand that a condition placed upon receipt of Federal funds is operation of education programs or activities free from sex discrimination under Title IX, including compliance with regulations implementing Title IX. Some recipients cooperatively worked with their employee unions and renegotiated their CBAs in response to the Department's withdrawn 2011 Dear Colleague Letter so that the recipient would use the preponderance of the evidence standard with respect to employee cases, and student cases.[1426] These final regulations do not require recipients who have already modified their policies and procedures in that manner to make further changes in that regard, because under these final regulations a recipient may select the preponderance of the evidence standard.

These final regulations are focused on the appropriate standard of evidence for use in resolving allegations of Title IX sexual harassment, and not on the appropriate standard of evidence for use in cases of other types of misconduct by students, or employees. This is emphasized by our revision to the final regulations removing the NPRM's approach that tied the preponderance of the evidence standard to the standard of evidence a recipient uses in non-sexual harassment misconduct cases. Whether or not a recipient is required to use a certain standard of evidence under Federal regulations governing non-sexual misconduct violations (for instance, research misconduct by faculty or graduate students), the Department's concern in these final regulations is ensuring that a recipient uses a single, selected standard of evidence for Title IX sexual harassment cases so that complainants alleging sexual harassment face a predictable grievance process regardless of whether the complainant has alleged sexual harassment by a student, employee, or faculty member.

Contrary to commenters' assertions otherwise, the Department does not through these final regulations promote or encourage the clear and convincing evidence standard (or the preponderance of the evidence standard) and while we acknowledge that reputational stigma and potential life-altering consequences facing respondents accused of sexual misconduct may be reasons why a recipient might select a clear and convincing evidence standard, we do not contend that reputational stigma or life-altering consequences are absent in other types of misconduct allegations, such as research misconduct by graduate students or faculty.[1427]

The Department does not believe this approach to a recipient selecting the standard of evidence for use in all Title IX sexual harassment cases harms unions or reflects anti-union bias. If a recipient decides to renegotiate CBA terms in order to comply with Title IX obligations, that result is for the benefit of all students and employees (including complainants and respondents) whose Title IX rights will be more predictable and transparent, reflecting the recipient's judgment as to what level of confidence decision-makers should have in the accuracy of determinations regarding responsibility in sexual harassment cases. The Department does not believe that this

[1424] The challenge with potential conflict between Federal Title IX expectations regarding a standard of evidence, and CBAs that require a different (usually higher) standard of evidence, is a challenge that has faced recipients since the Department first took a position with respect to an appropriate standard of evidence. In the withdrawn 2011 Dear Colleague Letter the Department insisted that *only* the preponderance of the evidence standard was appropriate in Title IX sexual harassment cases and made no exception for cases against faculty. The Department believes that the approach in these final regulations may help recipients address the challenge that some recipients face in reconciling CBAs with Title IX obligations, by allowing recipients to select one of two reasonable options regarding a standard of evidence for Title IX purposes. *See* Lance Toron Houston, *Title IX Sexual Assault Investigations in Public Institutions of Higher Education: Constitutional Due Process Implications of the Evidentiary Standard Set Forth in the Department of Education's 2011 Dear Colleague Letter,* 34 Hofstra Labor & Employment L. J. 321, 322–23 (2017) (''This issue represents the evolution and eventual collision of years of legal jurisprudence involving collective bargaining rights from the origin of public employee law and the administratively relaxed evidentiary standards at play in Title IX sexual assault investigations in public higher education. In a nutshell, when collectively bargained labor agreements on American public college campuses calls for the heightened 'clear and convincing' evidentiary standard in a sexual assault investigation of a unionized employee, but federally mandated Title IX investigations as required by the 2011 Dear Colleague Letter only require the much lower threshold 'preponderance of the evidence' standard to discipline the accused public employee, which prevails?'').

[1425] *E.g.,* a typical clause included in a college's faculty CBA states: ''This agreement and its component provisions are subordinate to any present or future Federal or New York laws and regulations.'' *Agreement (Faculty) Between Onondaga Community College And The Onondaga Community College Federation Of Teachers And Administrators AFT, Local 1845 September 1, 2014–August 31, 2019.*

[1426] Lance Toron Houston, *Title IX Sexual Assault Investigations in Public Institutions of Higher Education: Constitutional Due Process Implications of the Evidentiary Standard Set Forth in the Department of Education's 2011 Dear Colleague Letter,* 34 Hofstra Labor & Employment L. J. 321, 351 (2017) (stating that ''some schools have taken the bold initiative to preemptively lower the standard of proof in cooperation with university labor unions in order to avoid litigation and potential DOE [Department of Education] Title IX investigations'' and citing a University of Delaware CBA from 2015, and a California State University system CBA from 2014, as examples).

[1427] We disagree that using a clear and convincing evidence standard for formal complaints of sexual harassment, while using a preponderance of the evidence standard for allegations of research misconduct, necessarily places respondents accused of the latter misconduct in a disfavored position. The elements of research misconduct differ from the elements of sexual harassment (as defined in § 106.30) in ways that may justify using different standards of evidence (as explained above, a standard of evidence represents the degree of confidence the decision-maker must have in having reached a factually correct conclusion). For instance, ''research misconduct'' requires the misconduct to be committed intentionally, knowingly, or recklessly, while the § 106.30 definition of sexual harassment does not require an element of intentionality. *E.g.,* Gary S. Marx, *An Overview of The Research Misconduct Process and an Analysis of the Appropriate Burden of Proof,* 42 Journal of Coll. & Univ. L. 311, 317 (2016) (''Under the regulations adopted by HHS and by NSF, the following evidence is required to establish research misconduct: (a) There must be a significant departure from accepted practices of the relevant research community, (b) the misconduct must be committed intentionally, knowingly, or recklessly; and (c) the allegation must be proven by a preponderance of the evidence.'').

approach subjects recipients to liability under 34 CFR 106.51, because the Department does not assume that a recipient that changes the standard of evidence used in student cases to be the same standard as the recipient uses under employee CBAs makes that change for the purpose of disadvantaging complainants who allege sexual harassment; the Department believes that a recipient that makes that decision does so because the recipient has determined that the selected standard of evidence is the appropriate standard for resolving sexual harassment allegations. As discussed throughout this ''Section 106.45(b)(7)(i) Standard of Evidence and Directed Question 6'' subsection, commenters noted a variety of reasons to prefer the preponderance of the evidence standard over the clear and convincing evidence standard and vice versa. The Department believes that either standard of evidence (preponderance of the evidence, or clear and convincing evidence) may be applied fairly to reach reliable outcomes. The Department also does not believe that a recipient that selects the clear and convincing evidence standard subjects complainants to discrimination by ''disfavoring'' complainants of sexual harassment compared to complainants of other forms of misconduct just because the preponderance of the evidence is used as the standard in other forms of misconduct. As noted previously with respect to, for example, Federal regulations that require use of the preponderance of the evidence standard in cases of research misconduct, there may be differences in the elements needed to prove a type of misconduct that may justify using different standards of evidence. Further, the severity of potential consequences of a finding of responsibility for sexual misconduct may differ from the potential consequences of a finding of other kinds of misconduct. Additionally, recipients sometimes use a standard of evidence *lower* than the preponderance of the evidence standard for student misconduct. Thus, unless using *preponderance* also ''disfavors'' complainants of sexual harassment because some misconduct may continue to be decided under a *lower* standard of evidence, the Department does not believe that a recipient's use of the clear and convincing evidence standard subjects complainants of sexual harassment to discrimination (by ''disfavoring'' them) just because other types of misconduct may be decided under the preponderance of the evidence standard.[1428]

Whether or not commenters are correct in noting that power differentials between employees (particularly faculty) and students may tempt recipients to treat faculty as more credible than students, the final regulations allow recipients to select one of two standards of evidence consistently to all formal complaints; under either standard selected, the recipient is obligated to assess credibility based on objective evaluation of the evidence and not due to the party's status as a complainant or respondent,[1429] and without bias for or against complainants or respondents generally or for or against an individual complainant or respondent.[1430]

[1428] *E.g.,* Lavinia M. Weizel, *The Process That Is Due: Preponderance of the Evidence as the Standard of Proof for University Adjudications of Student-on-Student Sexual Assault Complaints,* 53 Boston Coll. L. Rev. 1613, 1633, 1637 (2012) (''Substantial evidence is defined as enough relevant evidence that a reasonable person would support the fact-finder's conclusion'' and substantial evidence is a lower standard than the preponderance of the evidence standard because the former requires only ''some reasonable quantity of evidence'' while the latter requires ''facts to be true to the degree of more likely than not''); *id.* at 1642–43 (noting that OCR's interpretation of Title IX and implementing regulations was, as of 2011, that only the preponderance of the evidence standard could be used for sexual harassment cases and ''As a practical matter, schools may be more likely to face constitutional challenges for moving from the higher clear and convincing evidence standard to the lower preponderance of the evidence standard than for moving from the lower substantial evidence standard to the higher preponderance of the evidence standard,'' analyzing ''the benefits of preponderance of the evidence as compared to the lower substantial evidence standard'' focusing on ''whether the preponderance of the evidence standard is sufficient to protect accused students' due process rights or whether the higher standard of clear and convincing evidence is required,'' and asserting that ''the use of the preponderance of the evidence standard, rather than the lower substantial evidence standard, will benefit schools, accused students, and perhaps all students, by lending greater legitimacy and uniformity to school disciplinary proceedings.''); *see also, e.g.,* Miss. Code Ann. § 37–9–71 (in Mississippi, ''The standard of proof in all disciplinary proceedings shall be substantial evidence'' and students may be suspended or expelled for ''unlawful activity'' defined in Miss. Code Ann. § 37–11–29 to include rape, sexual battery, and fondling as well as non-sex crimes such as aggravated assault; thus, if Mississippi follows OCR's position since the withdrawn 2011 Dear Colleague Letter that only the preponderance of the evidence standard should be used for sexual violence cases, and follows Mississippi State law directing schools to apply the substantial evidence standard for unlawful activity, Mississippi would use preponderance of the evidence for sexual harassment complainants and a *lower* standard of evidence for complainants of other types of misconduct, and the Department does not view this as Mississippi subjecting complainants of sexual harassment to discrimination by ''disfavoring'' them as compared to complainants of non-sexual harassment misconduct).

[1429] Section 106.45(b)(1)(ii).

[1430] Section 106.45(b)(1)(iii).

Changes: The Department has revised § 106.45(b)(7)(i) of the final regulations such that recipients have the choice of either applying the preponderance of the evidence standard or the clear and convincing evidence standard, and § 106.45(b)(1)(vii) requires a recipient to make that choice applicable to all formal complaints of sexual harassment, including those against employees and faculty. We have removed the limitation contained in the NPRM that would have permitted recipients to use the preponderance of the evidence standard only if they used that standard for non-sexual misconduct that has the same maximum disciplinary sanction.

Requiring the Preponderance of the Evidence Standard

Comments: Many commenters urged the Department to mandate the preponderance of the evidence standard in Title IX proceedings. Commenters argued that the preponderance of the evidence standard is the only standard that treats both parties fairly, consistent with Title IX's requirement that grievance procedures be ''equitable,'' and that a higher standard would unfairly tilt proceedings in favor of respondents and against complainants.[1431] Commenters argued that application of a heightened standard specifically in sexual misconduct cases reflects wrongful stereotypes that survivors, mainly girls and women, are more likely to lie than students who report other types of misconduct.[1432] Commenters argued that the preponderance of the evidence standard is most appropriate because both parties have an equal interest in continuing their education. Commenters cited Title IX experts who support the preponderance of the evidence standard because, for example, it treats both parties equitably, levels the playing field between men and women, and because any higher standard than preponderance of the evidence would unfairly benefit respondents and discourage reporting of sexual assault by sending the message that a respondent's future at the institution is more important than the complainant's future

at the institution.[1433] At least one commenter opined that using anything other than the preponderance standard demonstrates caring more about the accused than the complainant.[1434]

Commenters also asserted that the Department's longstanding practice has been to require the preponderance of the evidence standard, that many recipients currently use this standard,[1435] and that courts generally use the preponderance of the evidence standard in civil rights litigation including for Title VI and Title VII.[1436] At least one commenter argued that VAWA created civil rights of action for claims of rape and sexual assault and requires the preponderance of the evidence standard, and thus Title IX should not permit a different evidentiary standard to be used for conduct that also constitutes rape and sexual assault.[1437] One commenter invoked the canon of *in pari materia,* in which similar statutes should be interpreted similarly, and argued that because lawsuits under Title VI and Title VII cases apply the preponderance of the evidence standard and these statutes serve the same basic civil rights purpose as Title IX, the preponderance of the evidence standard should also apply in Title IX proceedings.

Commenters argued that Title IX proceedings do not involve potential denial of significant liberty interests or jail, but rather involve determinations about whether the accused has violated school policy. These commenters described Supreme Court cases requiring a higher standard of evidence (such as clear and convincing evidence) in only a narrow set of cases implicating particularly important interests,[1438] such as civil commitment, deportation, denaturalization, termination of parental rights, and similar cases, and commenters argued that school disciplinary proceedings do not implicate uniquely important interests that would warrant a heightened evidentiary standard.[1439] A few commenters argued that potential damage to future career prospects does not justify a higher standard because the preponderance of the evidence standard applies to Federal research misconduct cases, civil anti-fraud proceedings, and professional discipline cases.[1440]

One commenter asserted that the clear and convincing evidence standard is unfairly vague compared to the preponderance of the evidence standard, and can increase ambiguity in situations where there is already distrust of sexual assault survivors. This commenter asserted that schools often do not have capacity to thoroughly undertake investigations and uncover corroborative evidence, so the preponderance of the evidence standard is the most appropriate standard. Commenters expressed concern that economically disadvantaged students might not have the ability to access resources immediately after being raped or assaulted, and thus might not be able to obtain evidence that courts deem to meet a clear and convincing evidence standard. Another commenter expressed concern that applying a heightened standard for sexual misconduct could
