

ponds adjacent to the Don Plant, which would require the acquisition of adjacent Federal lands. Additionally, this acquisition would allow Simplot to maximize the operational life of its ongoing phosphate processing operations at the Don Plant by expanding gypsum stacks onto adjacent land.

The formal public scoping process for the EIS began on May 20, 2019, with publication of a Notice of Intent in the **Federal Register**, which initiated a 45-day public comment period. Key resource issues identified during scoping include: Air quality, cultural resources, fish and wildlife, hazardous and solid wastes, lands and realty, recreation, socioeconomics, environmental justice, tribal treaty rights, visual resources, and water resources. The Notice of Availability for the Draft EIS was published on December 20, 2019, initiating a 45-day public comment period. The public comments resulted in the addition of: (1) Information on radioactivity and radionuclides, (2) information on water quality in the Portneuf River, including contributions from upstream sources, especially phosphorous and arsenic, and (3) qualitative information describing how a complete liner failure could occur and general types of effects/impacts. The BLM has responded to substantive comments and made appropriate revisions to the Final EIS or explained why a comment did not warrant a change.

The Final EIS evaluates the Proposed Action and two action alternatives, in addition to a No Action Alternative. The Proposed Action is to exchange 719 acres of Federal land for 667 acres of non-Federal land.

Alternative A (Increased Non-Federal Land Acreage) includes the same area of Federal (719 acres) and non-Federal lands (667 acres) as the proposed action, with the addition of voluntary mitigation and donation parcels (A and B) proposed by Simplot. Parcel A is voluntary mitigation that includes an additional 160 acres of non-Federal land within Blackrock Canyon to mitigate the net loss of Federal acres in the proposed action. The acquired lands would be available to tribal members for aboriginal purposes and would improve existing public access to the Chinese Peak/Blackrock Trail system. Parcel B is a proposed donation consisting of approximately 950 acres within the Fort Hall Reservation that would be offered to the Secretary of the Interior, or to the Shoshone-Bannock Tribes.

Alternative B (Avoiding the West Canyon) was developed from comments received during scoping to adjust the

boundary of the Federal lands to minimize impacts to cultural and tribal resources in the West Canyon area on the north side of Howard Mountain. The Federal lands that would be acquired by Simplot would be reconfigured to eliminate the West Canyon area from the land exchange. This alternative would involve exchanging 711 acres of Federal land for 667 acres of non-Federal land. This alternative also includes the voluntary mitigation and donation parcels (A and B). Simplot would donate \$25,000 to the Shoshone-Bannock Tribes' Language Program as voluntary mitigation for the BLM's conveyance of a National Register of Historic Places (NRHP)-eligible site within the Federal land.

Under the No Action Alternative, the proposed land exchange would not be authorized.

The BLM selected Alternative B as the Preferred Alternative, because it adjusts the boundary of the Federal lands to minimize impacts to cultural resources, allows for a net gain of public lands, and makes additional lands available for tribal uses. The BLM will continue consultation with Native American Tribes on a government-to-government basis in accordance with Executive Order 13175 and other policies. The BLM will give tribal concerns due consideration, including impacts on Native American trust assets and potential impacts to cultural resources.

Authority: 40 CFR 1506.6, 40 CFR 1506.10.

John F. Ruhs,
BLM Idaho State Director.
