

detrimental in encouraging copyright owners to claim accrued royalties?

9. Please identify education and outreach practices that the MLC should consider adopting in encouraging copyright owners to claim royalties.

10. Please identify activities or policies that the MLC may take or adopt to encourage groups of musical work copyright owners who may be underrepresented in the MLC's database to come forward and claim accrued royalties. Your response may consider, for example, the unique experiences of self-administered songwriters; genres expected to generate a more diffuse record of musical work ownership;⁶⁴ non-English language works or genres; non-U.S. based musical work copyright owners, including the role of international collection societies; and particular challenges associated with classical music metadata.

C. Reducing Incidence of Unclaimed, Accrued Royalties and Distribution of Royalties

11. Please identify issues for the MLC to consider in establishing policies related to its duty to distribute unclaimed accrued royalties after a prescribed holding period in a manner that incentivizes reduction in the overall incidence of unclaimed accrued royalties. In particular, identify considerations related to the timing of the initial distribution of unclaimed, accrued royalties, as well as the retention of a portion of accrued royalties in the hope that they may later be matched.

12. Please identify preferred methods for the MLC to publicize the existence of unclaimed accrued royalties before they are distributed, in light of the minimum 90-day period required by the statute.

13. Please describe how success in lowering the incidence of unclaimed royalties may best be measured.

D. Others in the Music Marketplace

14. What actions can others, including those engaged in digital platform, sound recording, music publishing, and music creation activities, voluntarily take to contribute to a more accurate musical work data supply chain?

15. What actions can better ensure the accurate assignment of unique identifiers like the International Standard Recording Code ("ISRC") and International Standard Musical Work

Code ("ISWC") identifiers early in the digital supply chain?

16. Please identify education and outreach practices that digital music providers and others may consider adopting in encouraging copyright owners to claim royalties.

17. Please recommend existing guides or other resources regarding music data that can be used by copyright owners and songwriters, and/or information to be included in such educational materials.

E. Other Issues

18. Please identify any pertinent issues not referenced above that the Copyright Office should consider in conducting its study, including any further legislative changes that you believe are needed to reduce the instance of unclaimed royalties.
