
The Standard specifies two paperwork requirements. The following sections describe who uses the information collected under each requirement, as well as how they use it. The purpose of the requirements is to reduce workers’ risk of death or serious injury by ensuring that manlifts are in safe operating condition.

Periodic Inspections and Records (paragraph [e]). This provision requires that each manlift be inspected at least once every 30 days and it also requires that limit switches shall be checked weekly. The manlift inspection is to cover at least the following items: Steps; step fastenings; rails; rail supports and fastenings; rollers and slides; belt and belt tension; handholds and fastenings; floor landings; guardrails; lubrication; limit switches; warning signs and lights; illumination; drive pulley; bottom (boot) pulley and clearance; pulley supports; motor; driving mechanism; brake; electrical switches; vibration and misalignment; and any “skip” on the up or down run when mounting a step (indicating worn gears). A certification record of the inspection must be prepared upon completion of the inspection. The record must contain the date of the inspection, the signature of the person who performed the inspection, and the serial number or other identifier of the inspected manlift.

Disclosure of Inspection Certification Records. The agency has no annualized cost associated with enforcing the Standard. OSHA would only review records in the context of an investigation of a particular employer to determine compliance with the Standard. These activities are outside the scope of the PRA. See 5 CFR 1320.4(a)(2).

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency’s functions, including whether the information is useful;
- The accuracy of OSHA’s estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by automating or other technological information collection and transmission techniques.

III. Proposed Actions

The agency is requesting no change to the burden hours associated with this Information Collection Request. Therefore, the agency would like to retain the previous estimate of 37,800 hours.

Number of Respondents: 3,000. Number of Responses: 36,000. Frequency of Responses: On Occasion.

Average Time per Response: Varies. Estimated Total Burden Hours: 37,800. Estimated Cost (Operation and Maintenance): $0.

IV. Public Participation—Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows:

(1) Electronically at http://www.regulations.gov, which is the Federal eRulemaking Portal; (2) by facsimile (fax); or (3) by hard copy. All comments, attachments, and other material must identify the agency name and the OSHA docket number for the ICR (Docket No. OSHA–2010–0051).

You may supplement electronic submissions by uploading document files electronically. If you wish to mail additional materials in reference to an electronic or facsimile submission, you must submit them to the OSHA Docket Office (see the section of this notice titled ADDRESSES). The additional materials must clearly identify your electronic comments by your name, date, and the docket number so the agency can attach them to your comments.

Due to security procedures, the use of regular mail may cause a significant delay in the receipt of comments. For information about security procedures concerning the delivery of materials by hand, express delivery, messenger, or courier service, please contact the OSHA Docket Office at (202) 693–2350, (TTY (877) 889–5627).

Comments and submissions are posted without change at http://www.regulations.gov. Therefore, OSHA cautions commenters about submitting personal information such as social security numbers and dates of birth. Although all submissions are listed in the http://www.regulations.gov index, some information (e.g., copyrighted material) is not publicly available to read or download through this website.

All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. Information on using the http://www.regulations.gov website to submit comments and access the docket is available at the website’s “User Tips” link. Contact the OSHA Docket Office for information about materials not available through the website, and for assistance in using the internet to locate docket submissions.

V. Authority and Signature

Loren Sweatt, Principal Deputy Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice. The authority for this notice is the Paperwork Reduction Act of 1995 (44 U.S.C. 3506 et seq.) and Secretary of Labor’s Order No. 1–2012 (77 FR 3912).

Signed at Washington, DC.
Loren Sweatt,
Principal Deputy Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510–26–P

LIBRARY OF CONGRESS
U.S. Copyright Office
[Docket No. 2019–6]

Unclaimed Royalties Study: Notice of Inquiry

AGENCY: U.S. Copyright Office, Library of Congress.

ACTION: Notice of inquiry.

SUMMARY: The U.S. Copyright Office is undertaking a study as directed by the Music Modernization Act to evaluate best practices that the newly-established mechanical licensing collective (“MLC”) may implement to: Identify and locate musical work copyright owners and unclaimed accrued royalties held by the collective; encourage musical work copyright owners to claim their royalties; and reduce the incidence of unclaimed royalties. The MLC is expected to carefully consider, and give substantial weight to, the Office’s recommendations when establishing procedures for the identification and location of musical work copyright owners and the distribution of unclaimed royalties. The Office is soliciting input from music industry participants and other interested members of the public on these issues to aid its study.

DATES: Written comments must be received no later than August 3, 2020 at 11:59 p.m. Eastern Time. Written reply
Digital services “complain[ed] about the lack of readily available data concerning musical work ownership” and “asserted that the inaccessibility of ownership information leads to costly and burdensome efforts to identify the rightsholders and potentially incomplete or incorrect licenses, exposing them to the risk of statutory infringement damages despite diligent efforts.” 5 Publishers, songwriters, and licensing administrators were also frustrated with noncompliant statutory licensees, noting that NOIs were “frequently deficient, and licenses regularly fail[ed] to timely and accurately pay and report usage.” 6 Some copyright owners sued digital music services for missing mechanical licenses,7 in some instances resulting in settlements whose terms included the establishment of online portals allowing copyright owners to claim their settlement shares.8

A. Identifying and Paying Copyright Owners Under the New Blanket License

The MMA largely eliminated the song-by-song mechanical compulsory licensing regime by establishing a new blanket compulsory license that digital music providers may obtain to make digital phonorecord deliveries (“DPDs”) of musical works, including in the form of permanent downloads, limited downloads, or interactive streams.9 Instead of licensing one song at a time by serving NOIs on individual copyright owners, the blanket license will cover all musical works available for compulsory licensing and will be centrally administered by a new entity called the mechanical licensing collective (“MLC”), which was designated last summer by the Copyright Office.10 Following a present transition period, the MLC will begin administring the blanket license on what the statute terms the “license availability date,” or January 1, 2021.11 The MMA’s legislative history explains that the blanket licensing structure is designed to improve efficiency by allowing digital music services to offer “as much music as possible,” while “ensuring fair and timely payment to all creators” of the musical works used on these digital services.12

By consolidating musical work usage and ownership data and royalty distributions with the MLC, the MMA aims to improve the preexisting problems of missing data and incomplete royalty payments. Digital music providers using the blanket license are required to pay royalties and provide reports of usage for all covered activities to the MLC on a monthly basis.13 The MLC will collect those royalties and distribute them to musical work copyright owners in accordance with the digital service providers’ usage reports and the ownership and other information contained in the MLC’s records, including its public database.14

1. The MLC’s Public Musical Works Database

The MLC’s musical works database will contain information relating to musical works (and shares of such works), including, to the extent known, the identity and location of the copyright owners of such works and the sound recordings in which the musical works are embodied.15 Accurately identifying musical works and their associated sound recordings and owners requires reliable data throughout the statutory licensing ecosystem. To this end, as explained in more detail in separate notices published by the Office,16 the MMA outlines roles for digital music providers, musical work owners, and the MLC in providing, reporting, and curating accurate music data.

Digital music providers operating under the blanket license will “engage in good-faith, commercially reasonable efforts to obtain” various sound recording and musical work information from sound recording copyright owners and other licensors of sound recordings made available through the digital music providers’ services.17 These digital music providers will deliver
reports of usage to the MLC containing usage data for musical works used in covered activities under the blanket license, voluntary licenses, and individual download licenses. Certain entities engaging in covered activities pursuant to voluntary licenses or individual download licenses, but that do not operate under a blanket license (called significant nonblanket licensees), will also submit reports of usage to the MLC. And musical work copyright owners with works listed in the MLC’s database will “engage in commercially reasonable efforts to deliver” to the MLC if not already listed in the database, “information regarding the names of the sound recordings in which that copyright owner’s musical works (or shares thereof) are embodied, to the extent practicable.” On April 22, 2020, the Office issued a notice of proposed rulemaking discussing these matters in more detail and seeking public comment on proposed regulatory language to govern these obligations.

Once these inputs are provided to the MLC, it will engage in efforts “to identify the musical works embodied in particular sound recordings, as well as to identify and locate the copyright owners of such works (and shares thereof), and update such data as appropriate.” The MMA’s legislative history describes this duty to locate and identify musical work owners as the MLC’s “highest responsibility,” next to the MLC’s “efficient and accurate collection and distribution of royalties.” The Senate Judiciary Chairman subsequently reaffirmed this sentiment, writing to the Office that “[a]ll artists deserve to be fully paid for the uses of their works [and] . . . [r]educing unmatched funds is the measure by which the success of this important legislation should be measured.”

Information for both matched and unmatched works will be provided in the MLC’s public musical works database, and the statute lists a number of fields that must be included with respect to matched and unmatched works. In addition, the Office may promulgate regulations to require additional information to be included in the MLC’s database, and must also “establish requirements by regulations to ensure the usability, interoperability, and usage restrictions of the musical works database.” The Office has recently published a notification of inquiry soliciting information on these topics.

For those musical works (or shares thereof) that are unmatched, copyright owners will be able to come forward and assert ownership claims by viewing the MLC’s public database, including through a public online portal. The MLC has announced intentions that its claiming portal, expected to premiere in the third quarter of this year, will be “user-friendly, ADA-compliant, and can be used by stakeholders of any sophistication.” For technologically sophisticated entities, the MLC will also use “APIs and data transfer processes and formats to allow for bulk submission and updating of rights data.”

2. Education and Outreach

Congress has directed the MLC to “engage in diligent, good-faith efforts to publicize, throughout the music industry . . . the procedures by which copyright owners may identify themselves and provide contact, ownership, and other relevant information to the collective in order to receive payments of accrued royalties.” The digital licensee coordinator (“DLC”) (an entity that was designated by the Copyright Office to represent the interests of digital services pursuant to the statute), and Copyright Office also have roles in educating copyright owners and songwriters about the existence of the MLC and its role in the new blanket license system. For the DLC, this includes encouraging digital music providers to post the MLC’s contact information on services’ websites and applications and conduct in-person songwriter outreach. The Copyright Office has engaged in several activities to fulfill its educational duties thus far, including by establishing a MMLA-related web page with FAQs, informational handouts, seven MMLA-related videos, three new circulars, and information related to the statute’s legislative history, as well as hosting an all-day symposium and speaking at approximately 40 in-person or virtual events.

3. Unclaimed, Accrued Royalties

For those works for which royalties have accrued but the copyright owner is unknown or not located, the MLC will hold such royalties for a designated minimum time period. This holding period will provide the MLC with an additional period of time (compared to the pre-MMLA system) to engage in efforts to identify the musical works embodied in particular sound recordings, and locate their associated copyright owners, and for copyright owners and other songwriters to identify their works in the MLC database and come forward to claim their ownership interests. In general, the MLC must hold accrued royalties for “a period of not less than 3 years after the date on which the funds were received by the [MLC], or not less than 3 years after the date on which the funds were accrued by a digital music provider that subsequently transferred such funds to the [MLC] . . . whichever period expires sooner.” The MMA also states that the first such distribution “shall occur on or after January 1 of the second full calendar year to commence after the license availability date, with not less than 1 such distribution to take place

---

26 See U.S. Copyright Office, MMA Educational Materials, https://www.copyright.gov/music-modernization/educational-materials/ (last visited, May 19, 2020). For works that were initially accrued by a digital music provider prior to the license availability date and then transferred to the MLC, the MLC may have as few as two years to locate the copyright owner, but the minimum total holding period for these funds will be three years. See 17 U.S.C. 115(d)(3)(H)(i), (3)(I)(I)(I), (10)(I)(IV)(III)(III). 27 Conf. Rep. at 11 (“For unmatched works, the collective must wait for the prescribed holding period of three years before making such distribution. This is intended to give the collective time to actively search for the copyright owner.”); see also U.S. Copyright Office, Unclaimed Royalties Study: Kickoff Symposium, Tr. at 194:16–195:01, 213:03–05 (Dec. 6, 2019) (Sarah Rosenbaum, Google) (noting that the MMA allows the music industry to address data issues in a “less time pressured environment”). Transcripts of the Office’s symposium are cited with the abbreviation “Tr.” along with the page and line numbers, and date, of the cited material. These citations also include the name of the speaker and organization (if any) with which the speaker is affiliated. Transcripts of the symposium are available at https://www.copyright.gov/policy/royalties/transcript.pdf.

during each calendar year thereafter.”39

Reading these provisions together, in no case can these unclaimed royalties be distributed before 2023.40

After the holding period, the MLC “shall distribute [unmatched works] accrued royalties, along with a proportionate share of accrued interest, to copyright owners identified in the records of the collective.”41 It must also “engage in diligent, good-faith efforts to publicize . . . any pending distribution of unclaimed accrued royalties and accrued interest, not less than 90 days before the date on which the distribution is made.”42 Once the MLC makes an initial distribution of unclaimed, accrued royalties, “not less than 1 such distribution [shall] take place during each calendar year thereafter.”43 Copyright owners’ shares of distributions of unclaimed accrued royalties will be determined by the MLC in accordance with unclaimed accrued royalties for particular payment periods, and “determined in a transparent and equitable manner based on data indicating the relative market shares of such copyright owners as reflected in reports of usage provided by digital music providers for covered activities for the periods in question” as well as available “usage data provided to copyright owners under voluntary licenses and individual download licenses for covered activities.”44

By statute, the MLC has established an Unclaimed Royalties Oversight Committee, which will establish policies and procedures “for the distribution of unclaimed accrued royalties and accrued interest . . . including the provision of usage data to copyright owners to allocate payments and credits to songwriters,” subject to the MLC board’s approval.45 During the public process of designating the collective, the MLC noted that it “does not intend to ever distribute the entirety of unclaimed royalties simultaneously,” and that it interprets section 115(d)(3)(J)’ “to grant discretion to MLC to retain unclaimed accrued royalties beyond the year that they become eligible for distribution, to allow diligent attempts to match all uses and works, no matter the vintage, to continue. MLC intends to implement policies allowing use of that discretion to retain unclaimed accrued royalties and continue matching efforts in situations where there is reasonable evidence that this will result in material increases in matching success.”46 In designating the MLC, the Office noted its agreement with this interpretation.47

B. Copyright Office Study on Best Practices Study, and Related Foundational Work

To further Congress’s intent to reduce the instance of unmatched works and unclaimed royalties, the MMA directs the Copyright Office to conduct a policy study, in consultation with the Government Accountability Office, recommending best practices that the MLC may implement to:

(A) Identify and locate musical work copyright owners with unclaimed accrued royalties held by the collective;

(B) encourage musical work copyright owners to claim the royalties of those owners; and

(C) reduce the incidence of unclaimed royalties.48

The MLC must carefully consider and give substantial weight to the Office’s recommendations when establishing procedures to identify and locate musical work copyright owners and to distribute unclaimed royalties.49

1. Educational Symposium

To initiate the study, the Office held an all-day educational symposium to facilitate public understanding and discussion on issues relevant to the study. The Office invited industry participants, including songwriters and other interested members of the public, to discuss topics including: (i) Past and current initiatives to facilitate authoritative and comprehensive music ownership databases; (ii) challenges of matching musical works to sound recordings, including current matching methods and challenges, the role of technology, and how success can be measured; and (iii) the most effective ways to educate creators on the processes effected by the MMA. The symposium featured an update from the MLC and DLC, and a discussion among creators concerning the challenges and benefits associated with accurately capturing metadata during the creative process as well as the role of creators in taking ownership of their song data. The event concluded with an opportunity for audience participation. The Office has posted videos and a transcript of the symposium on its website, as well as a glossary of acronyms and other frequently used terms that arose during discussions.50

While observing that the MLC’s mission shares some similarities with past music ownership database development efforts, panelists noted that the MLC lacks the funding challenges of earlier European efforts, and that it may benefit from being “borrower in scope.”51 There was discussion on the role of standards setting, including the common works registration (“CWR”) standard format used by publishers and DDEX messaging standards; the MLC has confirmed it intends to ingest data through multiple formats, including CWR as well as through its claiming portal.52 The symposium addressed other industry efforts to facilitate improved data quality, including a best practices working group established between record labels and music publishers that generated a platform called the Music Data Exchange and the Open Music Initiative, an effort to build consensus towards establishing open data protocols and promote increased education and monetization opportunities for artists.53 Other panelists discussed ways to determine whether the ownership data for a work is authoritative, which may involve algorithmic matching, different levels of manual review, inspecting the

40 Id.; see also 84 FR at 32291 (July 8, 2019) (noting “the statute does not permit the first such distribution to occur before January 1, 2023”); MLC Designation Proposal at 52 (same).
42 Id. at 115(d)(3)(j)(ii)(II).
43 Id. at 115(d)(3)(j)(ii)(II).
44 Id. at 115 (d)(3)(j)(ii)(II).
45 Id. at 115 (d)(3)(j)(ii)(II).
46 Tr. at 111:15–112:05 (Dec. 6, 2019) [Nicole d’Avis, Open Music Initiative] (discussing the Open Music Initiative’s efforts); Tr. at 90:10–91:07 (Dec. 6, 2019) [David Hughes, Recording Industry Association of America ("RIAA")] ("the MLC has joined and is working with DDEX, and continues to explore the proper formats and standards for efficient and accurate data sharing"); MLC Designation Proposal at 37–38 (discussing the CWR format’s utility).
47 Id. at 115:15–112:05 (Dec. 6, 2019) [Nicole d’Avis, Open Music Initiative] (discussing the Open Music Initiative’s efforts); Tr. at 90:10–91:07 (Dec. 6, 2019) [David Hughes, RIAA] (discussing creation of the MDX best practice working group).
Copyright Office’s records, or reaching directly out to rightsholders to address ownership conflicts.54 Specific practices that frustrate accurate royalty payments were addressed, including instances where digital music providers may alter song titles or artist names supplied by a record label,55 artists and others who work with creators noted the lack of a one-size-fits-all solution to educating self-administered songwriters about how the MMA may affect their interests. Singer-songwriter Rosanne Cash emphasized that increased transparency “would take so much pressure off of musicians and songwriters” and help ensure they are paid fairly.56 There was agreement that talking to creators “in ways that really resonate . . . looks different in LA than it does in Miami.”57 In some cases, reaching creators may involve making free educational information available in the form of blog posts, webinars, e-books, or podcasts58 or it may require “peers talking to peers from their local community that have credibility.”59 It was suggested that the more information that songwriters have and the easier we make it for them to act on that information, the more successful [educating them] is going to be.”60

2. Practices of Other Collective Management Organizations

The Copyright Office also commissioned a report by Susan Butler, publisher of Music Confidential, to provide a factual report detailing matching and royalty distribution practices of global collective management organizations (“CMOs”). In preparing her report, Ms. Butler surveyed CMOs around the world that represent musical works (whether performing rights, mechanical rights, or both) or public performance rights in recordings (neighboring rights).61 Along with the Office’s symposium, Ms. Butler’s report is designed to give commenting parties an understanding of some of the activities and practical solutions that the MLC may potentially consider, based on experiences of CMOs around the world. It also highlights some of the structural distinctions between the MLC on the one hand and the many membership-based collectives throughout the world. Ms. Butler’s report outlines several reasons why CMOs may encounter difficulty linking a recording title reported by a digital music provider to a specific musical work or specific rights holders to be able to distribute money to those rights holders, and methods that CMOs may employ in an attempt to identify and match works to recordings and rights holders, even after automated and manual methods have been employed.62 The Butler report is available on the Copyright Office’s website at https://www.copyright.gov/policy/unclaimed-royalties/CMO-report.

II. Subjects of Inquiry

The Office is seeking public comment on the following topics. While the focus of the study remains on best practices that may be recommended to the MLC, the Office has previously noted that “the problems in the music marketplace need to be evaluated as a whole, rather than as isolated or individual concerns of particular stakeholders.”63 Therefore, the Office is also soliciting limited input related to policies or actions that digital music providers and others may implement to reduce the instance of unclaimed royalties as well as ways to empower and educate songwriters and copyright owners to address ownership data issues themselves.

In responding to the questions below, the Office encourages commenters to provide evidentiary support for their views, including by providing empirical data if possible. A party choosing to respond to this notice of inquiry need not address every topic, but the Office requests that responding parties clearly identify and separately address each topic for which a response is submitted.

A. Identifying and Locating Musical Work Copyright Owners

1. Please describe best practices that the MLC may employ in matching musical works to sound recordings and otherwise identifying and locating musical work copyright owners associated with works embodied in sound recordings pursuant to administering the blanket license. As applicable, please identify specific technological or manual approaches, as well as considerations relevant to the MLC’s prioritization of resources.

2. Please identify any special issues with respect to the MLC’s matching and distribution policies for musical works with identified, but unlocated copyright owners, or works for which only a partial amount of ownership information is available.

3. If you believe that practices of similar CMOs, here and abroad, are relevant or helpful, please identify those practices.

4. If you believe that past practices of individual digital music providers or vendors facilitating voluntary or statutory licensing are relevant or helpful, including any under the prior song-by-song licensing system, please identify those practices.

5. Are past efforts to build music ownership databases, such as the Global Repertoire Database, International Music Rights Registry, and International Music Joint Venture, helpful to consider in identifying best practices for the MLC? If so, how?

B. Encouraging Musical Work Copyright Owners To Claim Royalties

6. How can the MLC facilitate claiming of accrued royalties through its public database? If there are specific fields, search capabilities, or tools that would be beneficial, or not, to the MLC’s core project, please identify them.

7. Please identify particular data formats or file types that would be helpful for the MLC to use in connection with encouraging copyright owners to have their works identified in the MLC’s database.

8. What lessons can be learned from prior music dispute settlements and claiming systems, including the Ferrick v. Spotify, Football Association Premier League v. YouTube, and National Music Publishers’ Association/Spotify settlements? What about the claiming portals or opt-in procedures for these agreements were beneficial or
detrimental in encouraging copyright owners to claim accrued royalties?
9. Please identify education and outreach practices that the MLC should consider adopting in encouraging copyright owners to claim royalties.
10. Please identify activities or policies that the MLC may take or adopt to encourage groups of musical work copyright owners who may be underrepresented in the MLC’s database to come forward and claim accrued royalties. Your response may consider, for example, the unique experiences of self-administered songwriters; genres expected to generate a more diffuse record of musical work ownership;64 non-English language works or genres; non-U.S. based musical work copyright owners, including the role of international collection societies; and particular challenges associated with classical music metadata.

C. Reducing Incidence of Unclaimed, Accrued Royalties and Distribution of Royalties

11. Please identify issues for the MLC to consider in establishing policies related to its duty to distribute unclaimed accrued royalties after a prescribed holding period in a manner that incentivizes reduction in the overall incidence of unclaimed accrued royalties. In particular, identify considerations related to the timing of the initial distribution of unclaimed, accrued royalties, as well as the retention of a portion of accrued royalties in the hope that they may later be matched.
12. Please identify preferred methods for the MLC to publicize the existence of unclaimed accrued royalties before they are distributed, in light of the minimum 90-day period required by the statute.
13. Please describe how success in lowering the incidence of unclaimed royalties may best be measured.

D. Others in the Music Marketplace

14. What actions can others, including those engaged in digital platform, sound recording, music publishing, and music creation activities, voluntarily take to contribute to a more accurate musical work data supply chain?
15. What actions can better ensure the accurate assignment of unique identifiers like the International Standard Recording Code (“ISWC”) and International Standard Musical Work Code (“ISMC”) identifiers early in the digital supply chain?
16. Please identify education and outreach practices that digital music providers and others may consider adopting in encouraging copyright owners to claim royalties.
17. Please recommend existing guides or other resources regarding music data that can be used by copyright owners and songwriters, and/or information to be included in such educational materials.

E. Other Issues

18. Please identify any pertinent issues not referenced above that the Copyright Office should consider in conducting its study, including any further legislative changes that you believe are needed to reduce the incidence of unclaimed royalties.

Regan A. Smith,
General Counsel and Associate Register of Copyrights.

64 See Tr. at 263:17–22 (Dec. 6, 2019) (Ed Arrow, Universal Music Publishing Group) (noting collaborative nature of rap, hip-hop, and pop music); Tr. at 264:09–11 (Dec. 6, 2019) (Bill Collette, Music Reports) (noting that the rap song “Grillz” by Nelly has “17 writers and 23 music publishers”).
