II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently

submitted a request for renewal of an existing collection of information to OMB for review entitled, "Notice of Enforcement Discretion (NOED) for Operating Power Reactors and Gaseous Diffusion Plants (NRC Enforcement Policy)." The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on December 26, 2019, 84 FR 71006.

1. *The title of the information collection:* Notice of Enforcement Discretion (NOED) for Operating Power Reactors and Gaseous Diffusion Plants (NRC Enforcement Policy).

2. *OMB approval number:* 3150-0136.

3. *Type of submission:* Extension.

4. *The form number if applicable:* N/A.

5. *How often the collection is required or requested:* On Occasion.

6. *Who will be required or asked to respond:* Those licensees that voluntarily request enforcement discretion through the NOED process.

7. *The estimated number of annual responses:* 8 (4 reporting responses + 4 recordkeepers).

8. *The estimated number of annual respondents:* 4.

9. *An estimate of the total number of hours needed annually to comply with the information collection requirement or request:* 680 (600 reporting + 80 recordkeeping).

10. *Abstract:* The NRC's Enforcement Policy includes the circumstances in which the NRC may grant a NOED. On occasion, circumstances arise when a power plant licensee's compliance with a Technical Specification (TS) Limiting Condition for Operation or any other license condition would involve an unnecessary plant shutdown or transient. Similarly, for a gaseous diffusion plant, circumstances may arise where compliance with a Technical Safety Requirement (TSR) or other condition would unnecessarily call for a total plant shutdown, or, compliance would unnecessarily place the plant in a condition where safety, safeguards, or security features were degraded or inoperable.

In these circumstances, a licensee or certificate holder may request that the NRC exercise enforcement discretion, and the NRC staff may choose to not enforce the applicable TS, TSR, or other license or certificate condition. This enforcement discretion is designated as a NOED.

A licensee or certificate holder seeking the issuance of a NOED must justify, in accordance with NRC Enforcement Manual (ADAMS Accession No. ML19193A023), the safety basis for the request, including an evaluation of the safety significance and potential consequences of the proposed request, a description of proposed compensatory measures, a justification for the duration of the request, the basis for the licensee's or certificate holder's conclusion that the request does not have a potential adverse impact on the public health and safety, and does not involve adverse consequences to the environment, and any other information the NRC staff deems necessary before making a decision to exercise discretion.

Dated: May 28, 2020.

For the Nuclear Regulatory Commission.

Kristen E. Benney,

Acting NRC Clearance Officer, Office of the Chief Information Officer.
