Employment and Training Administration

Investigations Regarding Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 (“the Act”) and are identified in the Appendix to this notice. Upon receipt of these petitions, the Administrator of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whether

the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing provided such request is filed in writing with the Administrator, Office of Trade Adjustment Assistance, at the address shown below, no later than June 15, 2020.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to

the Administrator, Office of Trade Adjustment Assistance, at the address shown below, not later than June 15, 2020.

The petitions filed in this case are available for inspection at the Office of the Administrator, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, Room N-5428, 200 Constitution Avenue NW, Washington, DC 20210.

Signed at Washington, DC, this 8th day of May 2020.

Hope D. Kinglock,
Certifying Officer, Office of Trade Adjustment Assistance.

SUPPLEMENTARY INFORMATION:**I. Background**

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et*

seq.) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The Anhydrous Ammonia Storage and Handling Standard (29 CFR 1910.111) specifies a number of paperwork requirements. The following is a brief description of the collection of information requirements contained in the standard.

Paragraph (b)(3) of the Standard specifies that systems have nameplates if required, and that these nameplates "be permanently attached to the system (as specified by paragraph (b)(3)(i)) so as to be readily accessible for inspection" In addition, paragraph (b)(3)(ii) requires that markings on containers and systems covered by paragraphs (c) ("Systems utilizing stationary, non-refrigerated storage containers"), (f) ("Tank motor vehicles for the transportation of ammonia"), (g) ("Systems mounted on farm vehicles other than for the application of ammonia"), and (h) ("Systems mounted on farm vehicles for the application of ammonia") provide information regarding nine specific characteristics of the containers and systems. Similarly, paragraph (b)(4) of the Standard specifies that refrigerated containers be marked with a nameplate on the outer covering in an accessible place that provides information regarding eight specific characteristics of the container.

The required markings ensure that employers use only properly designed and tested containers and systems to store anhydrous ammonia, thereby preventing accidental release of, and exposure of workers to, this highly toxic and corrosive substance.
