History and Description of the Cultural Item(s)

In 1900 and 1901, six cultural items were removed from the site of Payupki

in Navajo County, AZ. The items were removed by Charles Owen over the course of two field seasons. The excavations were sponsored by Stanley McCormick on behalf of the Field Museum of Natural History. The six unassociated funerary objects are one ceramic jar, one ceramic pot, and four ceramic bowls.

Owen's field notes and the corresponding field numbers on the items show by a preponderance of evidence that the items were removed from graves. The items were all removed from the Hopi Reservation. They are culturally affiliated with the Hopi Tribe of Arizona based on academic literature, oral tradition, and consultation with the Hopi Tribe.

The site of Payupki was recorded in Charles Owen's notes as being founded in 1680 by people from the "Rio Grande district" who lived at the site for a few generations before returning from where they had come. Based on academic literature and oral traditional information, these people were the ancestors of the Pueblo of Sandia, New Mexico.

Determinations Made by the Field Museum of Natural History

Officials of the Field Museum of Natural History have determined that:

- Pursuant to 25 U.S.C. 3001(3)(B), the six cultural items described above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony and are believed, by a preponderance of the evidence, to have been removed from a specific burial site of a Native American individual.
- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the unassociated funerary objects and the Hopi Tribe of Arizona.
