

specific equipment, software, and services? Would an information sharing system that incorporates both “push” and “pull” capabilities be useful, if possible?

- Are there legal barriers that could impede the ability of trusted providers and suppliers to receive or act on security risk information from the Federal government?

- How can publicly available security risk information be conveyed more expeditiously to more small and rural providers and suppliers?

- What barriers (e.g., awareness, financial, legal) do small and rural providers and suppliers face in accessing security risk information from non-government sources? What could or should the Federal government do to eliminate or mitigate those barriers?

3. Information Declassification and Security Clearances:

NTIA’s information sharing program must include a plan for declassifying materials, where feasible, and expanding and expediting the provision of security clearances to facilitate the dissemination of security risk information to trusted providers and suppliers. Because both actions potentially risk compromising the confidentiality of sensitive government information, NTIA is seeking additional information.

Questions:

- How specific must security risk information be to enable providers and suppliers to make procurement decisions that adequately protect their networks, customers, and users? If, for example, the Federal government issues a security warning about a particular company, how much information do trusted providers or suppliers require about the reason for that warning in order to take appropriate action?

- Is it more helpful for small and rural providers to receive unclassified information through typical civilian channels (for example, by email) or to receive more detailed classified information that would require a staff member to obtain a security clearance and could require travel to receive the classified information in person at a secure location?

- What would be the best way of identifying appropriate staff points of contact at small and rural providers to ensure that they receive security risk information?

- Have small and rural providers and suppliers encountered problems in attempting to obtain security clearances for staff? If so, what has been the nature of those difficulties?

- How many performance-essential security clearances would an

organization need to ensure that government-shared security risk information is fully incorporated into its corporate risk-based decision making and response? What challenges would an organization have, if any, in converting such information into action?

- How should NTIA best raise awareness of this program among small business and rural providers?

Instructions for Commenters: NTIA invites comment on the full range of issues that may be presented in this Notice, including issues that are not specifically raised in the above questions. Commenters are encouraged to address any or all of the above questions. Comments that contain references to studies, research, and other empirical data that are not widely available should include copies of the referenced materials with the submitted comments. Comments submitted by email should be machine-readable and should not be copy-protected. Responders should include the name of the person or organization filing the comment, which will facilitate agency follow up for clarifications as necessary, as well as a page number on each page of their submissions. All comments received are a part of the public record and will generally be posted on the NTIA website, <http://www.ntia.gov/>, without change. All personal identifying information (for example, name, address) voluntarily submitted by the commenter may be publicly accessible. Do not submit confidential business information or otherwise sensitive or protected information.

DEPARTMENT OF EDUCATION

National Assessment Governing Board

Draft Reading Assessment Framework for the 2025 National Assessment of Educational Progress

AGENCY: National Assessment Governing Board, U.S. Department of Education.

ACTION: Notice of opportunity for public comment for the Reading Assessment Framework for the 2025 National Assessment of Educational Progress (NAEP).

SUMMARY: The National Assessment Governing Board (Governing Board) is soliciting public comment for guidance in updating the Assessment Framework for the 2025 National Assessment of Educational Progress (NAEP) in Reading. The Governing Board is authorized to formulate policy guidelines for NAEP. Section 302(e)(1)(c) of Public Law 107-279 s specifies that the Governing Board determines the content to be assessed for each NAEP Assessment. Each NAEP subject area assessment is guided by a framework that defines the scope of the domain to be measured by delineating the knowledge and skills to be tested at each grade and subject, the format of the assessment, and the achievement level definitions—guiding assessments that are valid, reliable, and reflective of widely accepted professional standards. The NAEP Reading Assessment Framework was last revised in 2004. It is anticipated that the current update of the NAEP Reading Assessment Framework will be presented for approval at the National Assessment
