**SUPPLEMENTARY INFORMATION:** On March 18, 2020 (85 FR 15347), the NRC published a direct final rule amending part 34 of title 10 of the *Code of Federal Regulations* (10 CFR), "Licenses for Industrial Radiography and Radiation Safety Requirements for Industrial Radiographic Operations"; 10 CFR part 36, "Licenses and Radiation Safety Requirements for Irradiators"; and 10 CFR part 39, "Licenses and Radiation Safety Requirements for Well Logging," to authorize the use of modern personnel dosimeters. The amendments align personnel dosimetry requirements in these areas with the requirements for all other NRC licensees.

The NRC also issued supplemental guidance (ADAMS package Accession No. ML19360A184) in conjunction with the direct final rule. The existing guidance for 10 CFR parts 34, 36, and 39 is provided in NUREG-1556, "Consolidated Guidance About Materials Licenses," in the volumes for industrial radiography (Volume 2), irradiators (Volume 6), and well logging (Volume 14). The supplemental guidance documents are in a markup format to these NUREG-1556 volumes and reflect the provisions in the direct

final rule. The NRC intends to incorporate this supplemental guidance into the next comprehensive revision of NUREG-1556. Beginning on June 16, 2020, licensees may use the supplemental guidance to comply with the provisions in the direct final rule.

In the direct final rule, the NRC stated that if no significant adverse comments were received, the direct final rule would become effective on June 16, 2020. As described more fully in the direct final rule, a significant adverse comment is a comment where the commenter explains why the rule would be inappropriate, including challenges to the rule's underlying premise or approach, or would be ineffective or unacceptable without a change.

The NRC received one comment from the public, which agreed with the proposed changes to the regulations. Because no significant adverse comments were received, the direct final rule will become effective as scheduled.

Dated on May 26, 2020.

For the Nuclear Regulatory Commission.

**Cindy K. Bladley,**

*Chief, Regulatory Analysis and Rulemaking Support Branch, Division of Rulemaking, Environmental, and Financial Support, Office of Nuclear Material Safety and Safeguards.*
