(e.g., a reseller, trading company, or exporter) was destined for the United States. In such instances, we will instruct CBP to liquidate unreviewed entries at the all-others rate if there is no rate for the intermediate company(ies) involved in the transaction. ¹⁵ The all-others rate is 16.27 percent. ¹⁶

We intend to issue liquidation instructions to CBP 15 days after publication of the final results of this review.

Cash Deposit Requirements

The following deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(2)(C) of the Act: (1) The cash deposit rate for TAK will be equal to the weighted-average dumping margin established in the final results of this review, except if the rate is less than 0.50 percent and, therefore, de minimis within the meaning of 19 CFR 351.106(c)(1), in which case the cash deposit rate will be zero; (2) for companies not participating in this review, the cash deposit rate will continue to be the company-specific cash deposit rate published for the most recently completed segment; (3) if the exporter is not a firm covered in this review, or the original less-than-fairvalue (LTFV) investigation, but the producer is, then the cash deposit rate will be the cash deposit rate established for the most recently completed segment for the producer of the merchandise; and (4) the cash deposit rate for all other producers or exporters will continue to be 16.27 percent, the all-others rate established in the LTFV investigation.¹⁷ These deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in Commerce's presumption that

reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Notification to Interested Parties

We are issuing and publishing these results in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: June 17, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Regents of the University of Minnesota, et. al; Notice of Decision on Application for Duty-Free Entry of Scientific Instruments

This is a decision pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, as amended by Pub. L. 106-36; 80 Stat. 897; 15 CFR part 301). On March 25, 2020, the Department of Commerce published a notice in the Federal Register requesting public comment on whether instruments of equivalent scientific value, for the purposes for which the instruments identified in the docket(s) below are intended to be used, are being manufactured in the United States. See Application(s) for Duty-Free Entry of Scientific Instruments, 85 FR 16925-26, March 25, 2020 (Notice). We received no public comments.

Docket Number: 20–002. Applicant: Reagents of the University of Minnesota, Center for Magnetic Resonance Research, 2021 6th Street SE, Minneapolis, MN 55455. Instrument: Three-photon far infra-red laser, Germany. Manufacturer: Class 5 Photonics, Germany. Intended Use: See Notice at 85 FR 16925-26, March 25, 2020. Comments: None received. Decision: Approved. We know of no instruments of equivalent scientific value to the foreign instruments described below, for such purposes as this is intended to be used, that were being manufactured in the United States at the time of order. Reasons: The

instrument will be used to study the fine structure which means on the scale of sub-microns (less than 1/1000th of 1 mm resolution) and function of cells and blood vessels in the living brains of mice. Examination of the fine structure is critical to understanding cellular communication and blood flow regulation in the brain. Laboratory mice are anesthetized, the skull is exposed, and 1,300 nm laser light is passed into the brain so that cells and blood vessels can be visualized with a microscope via three-photon fluorescence microscopy. Mice are now the most common research subjects used in biological and neuroscience research.

Dated: June 17, 2020.

Carole Showers,

Executive Director for Policy Enforcement and Compliance.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Alaska Region Crab Permits

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on February 6, 2020 (85 FR 6915), during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic and Atmospheric Administration (NOAA). Title: Alaska Region Crab Permits. OMB Control Number: 0648–0514. Form Number(s): None.

Type of Request: Regular submission, extension of a current information collection.

Number of Respondents: 496. Average Hours Per Response: 20 hours each for Application for Exemption from CR Crab North or South Region Delivery Requirements, and
