Abstract: The New Source Performance Standards (NSPS) for Commercial and Industrial Solid Waste Incineration (CISWI) Units (40 CFR part 60, subpart CCCC) were proposed on November 30, 1999, promulgated on December 01, 2000, and most-recently amended on: February 7, 2013; June 23, 2016; and April 16, 2019. The 2013 amendment re-established emission limits and expanded the rule to cover these CISWI subcategories: energy recovery units; waste burning kilns; incinerators; and small, remote incinerators. The 2016 amendment finalized reconsiderations to certain aspects to the 2013 amendment and finalized actions on the following four topics: the definition of “continuous emission monitoring system (CEMS) data during startup and shutdown periods;” the particulate matter (PM) limit for the waste-burning kiln subcategory; the fuel variability factor (FVF) for coal-burning energy recovery units (ERUs); and the definition of “kiln.” The 2019 amendments further clarified implementation of the 2016 standards, including certain testing and monitoring issues and inconsistencies, and editorial corrections and errors within the rules that required clarification or correction. These regulations apply to Commercial and Industrial Solid Waste Incineration (CISWI) units that either commenced construction after June 4, 2010, or

commenced reconstruction or modification after August 7, 2013. This information is being collected to assure compliance with 40 CFR part 60, subpart CCCC.

In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NSPS.

Form Numbers: None.

Respondents/affected entities:

Owners and operators of commercial and industrial solid waste incineration (CISWI) units that commenced construction after June 4, 2010 or commenced reconstruction or modification after August 7, 2013.

Respondent’s obligation to respond:

Mandatory (40 CFR part 60 Subpart CCCC).

Estimated number of respondents: 11 (total).

Frequency of response: Semiannually and annually.

Total estimated burden: 1,700 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$970,000 (per year), which includes \$769,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in the burden and cost estimates occurred because there is a small increase in the number of sources subject to the rule due to continued, albeit low-growth, within the industry. This ICR reflects the on-going burden and costs for existing facilities. We have adjusted the burden to reflect the increased number of existing respondents that perform annual performance tests, annual monitoring, refresher training, and report parameter exceedances. In addition, there are a small number of new facilities that are in the initial compliance phase, whose costs include purchasing monitoring equipment, conducting performance tests and establishing recordkeeping systems. The

overall result is an increase in burden hours and costs.

Abstract: This ICR is for activities related to the implementation of the EPA's Regional Haze Rule, for the time period between August 31, 2020, and August 31, 2023, and renews the previous ICR. The Regional Haze Rule codified at 40 CFR parts 308 and 309, as authorized by sections 169A and 169B of the Clean Air Act, requires states to develop implementation plans to protect visibility in 156 federally protected Class I areas. Tribes may choose to develop implementation plans. For this time period, states will primarily be developing and submitting periodic comprehensive implementation plan revisions to comply with the regulations.

Form Numbers: None.

Respondents/affected entities: Entities potentially affected by this action are state, local and tribal air quality agencies, regional planning organizations and facilities potentially regulated under the Regional Haze Rule.

Respondent's obligation to respond: Mandatory [see 40 CFR 51.308(b), (f) and (g) and 40 CFR 51.309(d)(10)].

Estimated number of respondents: 52 (total); 52 state agencies.

Frequency of response: Approximately every 5 years.

Total estimated burden: 38,255 hours (per year). Burden is defined at 5 CFR 1320.03(b)

Total estimated cost: \$2,050,007 (per year). There are no annualized capital or operation & maintenance costs.

Changes in Estimates: There is an increase of 24,945 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase in burden reflects changes in the activities conducted due to the normal progression of the program, especially the fact that states will be working on and submitting periodic comprehensive State Implementation Plan (SIP) revisions. There are 52 SIP revisions due by July 31, 2021.
