Scott M. Rosenbloom,

Acting Manager, Rules and Regulations Group.

[FR Doc. 2020–14313 Filed 7–2–20; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 95

[Docket No. 31318; Amdt. No. 553]

IFR Altitudes; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts miscellaneous amendments to the required IFR (instrument flight rules) altitudes and changeover points for certain Federal airways, jet routes, or direct routes for which a minimum or maximum en route authorized IFR altitude is prescribed. This regulatory action is needed because of changes occurring in the National Airspace System. These changes are designed to provide for the safe and efficient use of the navigable airspace under instrument conditions in the affected areas.

DATES: Effective 0901 UTC, July 16, 2020.

FOR FURTHER INFORMATION CONTACT: Thomas J. Nichols, Flight Procedures and Airspace Group, Flight Technologies and Procedures Division, Flight Standards Service, Federal Aviation Administration. Mailing Address: FAA Mike Monroney Aeronautical Center, Flight Procedures

and Airspace Group, 6500 South MacArthur Blvd., Registry Bldg. 29, Room 104, Oklahoma City, OK 73125. Telephone: (405) 954–4164.

SUPPLEMENTARY INFORMATION: This amendment to part 95 of the Federal Aviation Regulations (14 CFR part 95) amends, suspends, or revokes IFR altitudes governing the operation of all aircraft in flight over a specified route or any portion of that route, as well as the changeover points (COPs) for Federal airways, jet routes, or direct routes as prescribed in part 95.

The Rule

The specified IFR altitudes, when used in conjunction with the prescribed changeover points for those routes, ensure navigation aid coverage that is adequate for safe flight operations and free of frequency interference. The reasons and circumstances that create the need for this amendment involve matters of flight safety and operational efficiency in the National Airspace System, are related to published aeronautical charts that are essential to the user, and provide for the safe and efficient use of the navigable airspace. In addition, those various reasons or circumstances require making this amendment effective before the next scheduled charting and publication date of the flight information to assure its timely availability to the user. The effective date of this amendment reflects those considerations. In view of the close and immediate relationship between these regulatory changes and safety in air commerce, I find that notice and public procedure before adopting this amendment are impracticable and contrary to the public interest and that good cause exists for making the amendment effective in less than 30 days.

Conclusion

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 95

Airspace, Navigation (air).

Issued in Washington, DC, on June 12, 2020.

Robert C. Carty,

Executive Deputy Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, part 95 of the Federal Aviation Regulations (14 CFR part 95) is amended as follows effective at 0901 UTC, July 16, 2020.

■ 1. The authority citation for part 95 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44719, 44721.

■ 2. Part 95 is amended to read as follows:

REVISIONS TO IFR ALTITUDES & CHANGEOVER POINT

[FR Doc. 2020–13260 Filed 7–2–20; 8:45 am]

BILLING CODE 4910–13–P

CONSUMER PRODUCT SAFETY COMMISSION**16 CFR Parts 1112 and 1239**

[Docket No. CPSC–2019–0014]

Safety Standard for Gates and Enclosures**AGENCY:** Consumer Product Safety Commission.**ACTION:** Final rule.

SUMMARY: Pursuant to the Consumer Product Safety Improvement Act of 2008 (CPSIA), the U.S. Consumer Product Safety Commission (CPSC) is issuing this final rule establishing a safety standard for gates and enclosures that are intended to confine a child. The CPSC is also amending its regulations regarding third party conformity assessment bodies to include the safety standard for gates and enclosures in the list of notices of requirements (NORs).

DATES: This rule will become effective July 6, 2021. The incorporation by reference of the publication listed in this rule is approved by the Director of the Federal Register as of July 6, 2021.

FOR FURTHER INFORMATION CONTACT: Justin Jirgl, Compliance Officer, U.S. Consumer Product Safety Commission, 4330 East West Highway, Bethesda, MD 20814; telephone: 301–504–7814; email: jjirgl@cpsc.gov.

SUPPLEMENTARY INFORMATION:**I. Background and Statutory Authority**

Section 104(b) of the CPSIA, part of the Danny Keysar Child Product Safety Notification Act, requires the Commission to: (1) Examine and assess the effectiveness of voluntary consumer product safety standards for durable infant or toddler products, in consultation with representatives of consumer groups, juvenile product manufacturers, and independent child product engineers and experts; and (2) promulgate consumer product safety standards for durable infant and toddler products. Standards issued under section 104 of the CPSIA are to be “substantially the same as” the applicable voluntary standards or more stringent than the voluntary standard, if the Commission determines that more stringent requirements would further reduce the risk of injury associated with the product.

The term “durable infant or toddler product” is defined in section 104(f)(1) of the CPSIA as “a durable product

intended for use, or that may be reasonably expected to be used, by children under the age of 5 years,” and the statute specifies 12 categories of products that are included in the definition. Section 104(f)(2)(E) of the CPSIA specifically identifies “gates and other enclosures for confining a child” as a durable infant or toddler product. Additionally, the Commission’s regulation requiring product registration cards defines “gates and other enclosures for confining a child” as a durable infant or toddler product subject to the registration card rule. 74 FR 68668 (Dec. 29, 2009); 16 CFR 1130.2(a)(5).

As required by section 104(b)(1)(A) of the CPSIA, the Commission consulted with manufacturers, retailers, trade organizations, laboratories, consumer advocacy groups, consultants, and the public to develop this rule, largely through ASTM’s standard development process. On July 8, 2019, the Commission issued a notice of proposed rulemaking (NPR) for gates and enclosures.¹ 84 FR 32346. The NPR proposed to incorporate by reference the voluntary standard developed by ASTM International, ASTM F1004–19, *Standard Consumer Safety Specification for Expansion Gates and Expandable Enclosures* (ASTM F1004–19). Additionally, the NPR stated that the Commission agreed that a new requirement in ASTM F1004–19 that all gates, including pressure-mounted gates, meet a 30-pound push-out force test at five test locations, will improve children’s safety if the gate is installed correctly. 84 FR at 32351. The NPR discussed concerns with consumer awareness of correct pressure-mounted gate installation, and discussed improvements to ASTM F1004–19 to increase consumer awareness, including the use of visual side-pressure indicators and a separate warning label along the top rail of the gate. *Id.* at 32351–52. The NPR stated that staff would continue to work with ASTM to improve consumer awareness of the importance of proper installation of pressure-mounted gates, and requested comment on improved warnings and visual side-pressure indicators. *Id.* The Commission did not receive any comments.

Since publication of the NPR, CPSC staff has continued to work with the ASTM subcommittee on gates and enclosures on visual side-pressure

indicators and a separate warning label, as outlined in the NPR. Although the ASTM standard has not yet been updated, the ASTM subcommittee is moving forward to include a separate warning label (for pressure-mounted gates that rely on the use of wall cups to meet the 30-pound push-out force test), and has started moving forward to include visual side-pressure indicators (for pressure-mounted gates that do not use wall cups to meet the 30-pound push-out force test) to improve correct installation of pressure-mounted gates. Accordingly, for the final rule setting a safety standard for gates and enclosures, the Commission incorporates by reference ASTM F1004–19, with the following additional requirements, depending on the design of a pressure-mounted gate, to further reduce the risk of injury associated with incorrectly installed pressure-mounted gates:

(1) For pressure-mounted gates that include wall cups with the product to meet the 30-pound push-out force test,² the gates must include a separate warning label in a conspicuous location on the top rail of the gate regarding correct installation using wall cups, or

(2) For pressure-mounted gates that do not use wall cups to meet the 30-pound push-out force test, the gates must use visual side-pressure indicators to provide consumers feedback as to whether the gate is correctly installed.

Under section 14 of the CPSA, the Commission promulgated 16 CFR part 1112 to establish requirements for accreditation of third party conformity assessment bodies (or testing laboratories) to test for conformity with a children’s product safety rule. The final rule amends the list of notices of requirements (NORs) issued by the Commission in 16 CFR part 1112 to include the safety standard for gates and enclosures.

CPSC staff’s briefing package supporting this rule (Staff’s Final Rule Briefing Package), is available at: https://www.cpsc.gov/s3fs-public/Final%20Rule%20-%20Safety%20Standard%20for%20Gates%20and%20Enclosures.pdf?lhExt6trsEuD56jiQTi7Ab0TjzdVQ_HH.

II. Product Description**A. Definition of “Gates and Other Enclosures”**

ASTM F1004–19 defines an “expansion gate” as a “barrier intended

¹ Staff’s June 19, 2019 Briefing Package for the NPR (Staff’s NPR Briefing Package) is available at: <https://www.cpsc.gov/s3fs-public/Proposed%20Rule%20-%20Safety%20Standard%20for%20Gates%20and%20Enclosures%20-%20June%2019%202019.pdf>.

² Note that section 6.7 of ASTM F1004–19 already requires that pressure-mounted gates that rely on the use of wall cups to meet the 30-pound push-out force test in section 6.3 of the standard to include the wall cups and necessary hardware to install them in the product packaging.
