

## V. Conclusion

Based on the foregoing considerations, the NRC staff has determined that, pursuant to § 72.7, the exemption is authorized by law, will not endanger life or property or the common defense and security, and is otherwise in the public interest. Therefore, the NRC grants the licensee an exemption from the requirements of § 72.212(a)(2), § 72.212(b)(3), § 72.212(b)(5)(i), § 72.212(b)(11), and § 72.214 only with regard to meeting the requirements of Appendix A, TS A.5.1 and TS A.5.4 of CoC No. 1025.

This exemption is effective upon issuance.

Dated: July 2, 2020.

## II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, 10 CFR part 35, "Medical Use of Byproduct Material."

The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on February 26, 2020 (85 FR 11125).

1. *The title of the information collection:* 10 CFR part 35, "Medical Use of Byproduct Material."
2. *OMB approval number:* 3150-0010.
3. *Type of submission:* Extension.
4. *The form number if applicable:* Not applicable.
5. *How often the collection is required or requested:* Reports of medical events, doses to an embryo/fetus or nursing child, or leaking source are reportable on occurrence. A specialty board certifying entity desiring to be recognized by the NRC must submit a one-time request for recognition and infrequently revise the information.
6. *Who will be required or asked to respond:* Physicians and medical institutions holding an NRC license authorizing the administration of byproduct material or radiation from this material to humans for medical use. A specialty board certification entity desiring to have its certifying process and board certificate recognized by NRC.
7. *The estimated number of annual responses:* 299,266 (292,182 reporting responses + 7,019 recordkeepers + 65 third party disclosure responses).
8. *The estimated number of annual respondents:* 7,021 (856 NRC licensees + 6,163 Agreement State licensees + 2 specialty board certification entity).
9. *An estimate of the total number of hours needed annually to comply with the information collection requirement or request:* 1,166,695 hours (69,391 reporting + 1,097,177 recordkeeping + 127 third party disclosure).
10. *Abstract:* 10 CFR part 35, "Medical Use of Byproduct Material," contains NRC's requirements and provisions for the medical use of byproduct material and for issuance of

specific licenses authorizing the medical use of this material. These requirements and provisions provide for the radiation safety of workers, the general public, patients, and human research subjects. Part 35 contains mandatory requirements that apply to NRC licensees authorized to administer byproduct material or radiation to humans for medical use. These requirements also provide voluntary provisions for specialty boards to apply to have their certification processes recognized by the NRC so that their board certified individuals can use the certifications as proof of training and experience.

## II. Additional Information

The NRC is issuing for public comment a draft guide in the NRC's “Regulatory Guide” series. This series was developed to describe methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, to explain techniques that the staff uses in evaluating specific issues or postulated events, and to describe information that the staff needs in its review of applications for permits and licenses.

The DG, titled “Design Limits, Loading Combinations, Materials, Construction and Testing of Concrete Containments,” is a proposed revision temporarily identified by its task number, DG-1372. It is proposed revision 4 of RG 1.136 of the same name. The guide proposes revised guidance to meet regulatory requirements for materials, design, construction, fabrication, examination, and testing of concrete containments in nuclear power plants.

This revision of the guide endorses, with exceptions, the 2019 edition of the American Society of Mechanical Engineers (ASME) Boiler & Pressure Vessel Code (B&PV), Section III, Division 2 (American Concrete Institute Standard 359-19), “Code for Concrete Containments.” This revision of the guide also addresses the acceptability of the Section III Code Cases related to
