

lines. Under section 1415(a)(3) of the Safe Drinking Water Act, on December 16, 2019, the U.S. EPA granted Denver Water a variance from the definition of "optimal corrosion control treatment" in 40 CFR 141.2. The Variance contains requirements to determine the efficacy the filter program. EPA will use the survey results that Denver Water annually distributes to determine the consumer filter adoption rate, and to confirm whether customers are using and maintaining the filters correctly, and per manufacturer's instructions. Each year, the filter adoption survey will be sent by Denver Water via postal mail to as many as 20,000 consumers that have known, suspected, and possible lead service lines. Surveys will be sent via direct mailings and will include an online completion option (the survey questions are included below). Direct mailings will be sent with a unique QR code to track which addresses responses have been received from. Surveys will be sent out in both English and Spanish. Additionally, Denver Water will annually conduct, in person surveys at a minimum of 50 locations in use by customers enrolled in the filter program. Information being collected is information on if, and how, consumers use the filter (e.g., for drinking, cooking, or making infant-fed formula), whether the customers are using and maintain the filters correctly (e.g., washing, replacing the filters per manufacturer's instructions), as well as demographic information to inform filter adoption rate by neighborhood or demographic group so Denver Water's health equity and environmental justice principles set forth in their variance request can be evaluated.

Form Numbers: 6700-009.

Respondents/affected entities: Customers of Denver Water or of other integrated systems that have either known or suspected lead service lines (LSLs).

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: 20,001 (per year).

Frequency of response: Annually for three years.

Total estimated burden: 1,270 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$100,262 per year, includes \$1,000 annualized capital or operations & maintenance costs.

Changes in the Estimates: This is a new collection and therefore there are no changes in burden.

Notice is hereby given by the U.S. Environmental Protection Agency, Region 6, of a proposed bona fide prospective purchaser settlement agreement, embodied in an Administrative Settlement Agreement for Certain Response Action Activities by Bona Fide Prospective Purchaser, with Conroe Logistics Center, LLC. This agreement pertains to a portion of the former Conroe Creosoting Company Superfund Site (Site) located at 1776 East Davis Street in Conroe, Montgomery County, Texas. Conroe Logistics Center, LLC, an affiliate of Trammell Crow Company, intends to purchase a portion of the Site, conduct a response action, and construct a distribution facility. This project will result in a formerly contaminated property being restored to beneficial use.

The settlement includes a covenant by EPA not to sue or take administrative action against Conroe Logistics Center, LLC pursuant to Sections 106 and 107(a) of CERCLA for Existing Contamination, as that term is defined in the settlement agreement. For fifteen (15) days following the date of publication of this notice, EPA will receive written comments relating to the settlement. EPA will consider all comments received and may modify or withdraw its consent to the settlement agreement if comments received disclose facts or considerations that indicate that the proposed settlement is inappropriate, improper, or inadequate. EPA's response to any comments received will be available for public inspection at EPA Region 6, 1201 Elm Street, Suite 500, Dallas, Texas 75270.

Dated: July 7, 2020.
