

would also concentrate the minor amounts of uranium contained in the ore.

- Construction and operation of processing facilities designed to extract and recover vanadium and uranium. The processing facilities would include a processing facility, ancillary facilities, process offices and laboratory, septic tank and leach field, and a pond system.

- Development of various ponds to support ore processing and mine operations that would work together to keep process solution and incident stormwater fully contained within the zero-discharge process solution system.

- Construction and operation of a stormwater management system that would divert stormwater away from mining and processing facilities.

- Development of a borrow area for durable rhyolite rock material, which would be used for overliner, riprap, roads, and infrastructure, was identified from outcrops located approximately one mile to the southeast of the mine site.

- Development of mine access roads including haul, secondary, and general mine roads. The project includes upgrades to approximately 7 miles of the Fish Creek Ranch Road for mine access from State Route 379.

- Construction and operation of power transmission lines (approximately 3.6 miles) that would tie into the 69-kilovolt (kV) power line that currently provides power to the Pan Mine (the Pan Line). The 24.9-kV Gibellini Project power line would extend to the proposed project area and would include a substation in the project area. An additional line would power the water pumps near Fish Creek Ranch.

- Development of mine water resource, which would be supplied by the Fish Creek Ranch irrigation system and pumped from a 15,000-gallon water collection tank south of the ranch to the project area via an approximately 6.25-mile water pipeline. The estimated water use for the project is approximately 500 gallons per minute (gpm) 24 hours per day, 365 days per year for mine use.

- Development of mineral exploration activities, including access roads, drill pads, sumps, trenches, surface sampling, bulk sampling, staging areas, and monitor wells, which would total approximately 46 acres of disturbance in the project area. Exact locations would be identified during plan implementation.

Reclamation of disturbed areas resulting from mining operations would be completed in accordance with BLM and Nevada Division of Environmental

Protection regulations. Reclamation activities proposed in the Plan of Operations include the following:

- Drill hole plugging;
- regrading and reshaping of topography to the approximate original contour;

- wildlife habitat rehabilitation;
- revegetation;

- removal or stabilization of buildings, structures, and support facilities;

- returning of existing roads in project area to pre-project conditions;

- recontouring or regrading of all other mine-related roads and safety berms to approximate original contour; and

- isolation, removal, and/or control of acid-forming, toxic, or deleterious materials.

The purpose of the public scoping process is to identify relevant issues that will influence the scope of the environmental analysis, including alternatives, and guide the process for developing the EIS. The BLM has identified preliminary issues associated with the project: (1) Closure of the heap leach facility; (2) potential impacts to greater sage-grouse, a BLM sensitive species; (3) potential impacts to visual resources; (4) potential impacts to wildlife habitat; (5) potential impacts to surface and groundwater resources; and (6) potential impacts to cultural resources eligible under the National Register of Historic Places.

The BLM will use and coordinate the NEPA scoping process to help fulfill the public involvement process under the NHPA (54 U.S.C. 306108) as provided in 42 CFR 800.2(d)(3). The information about historic and cultural resources within the area potentially affected by the proposed project will assist the BLM in identifying and evaluating impacts to such resources in the context of both NEPA and the NHPA.

The BLM will consult with Native American tribes on a government-to-government basis in accordance with Executive Order 13175 and other policies. Tribal concerns, including impacts on Indian trust assets and potential impacts to cultural resources, will be given due consideration.

Federal, State, and local agencies, along with tribes and other stakeholders who may be interested in or affected by the proposed project that the BLM is evaluating, are invited to participate in the scoping process and, if eligible, may request or be asked by the BLM to participate in the development of the EIS as a cooperating agency.
