Prohibition on Contracting With Entities Using Certain Telecommunications and Video Surveillance Services or Equipment (FAR Case 2019-009)

This interim rule amends the Federal Acquisition Regulation to implement section 889(a)(1)(B) of Title VII of the John S. McCain National Defense Authorization Act (NDAA) for Fiscal Year (FY) 2019 (Pub. L. 115-232). Paragraph (a)(1)(B) of section 889 prohibits executive agencies from entering into, or extending or renewing,

a contract with an entity that uses any equipment, system, or service that uses covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology as part of any system, on or after August 13, 2020 unless an exception applies or a waiver is granted.

To implement paragraph (a)(1)(B) of section 889, the provision at 52.204-24 requires all offerors to represent, after conducting a reasonable inquiry, whether covered telecommunications equipment or services are used by the offeror, and if so, to provide further information. The clause at 52.204-25 prohibits the head of an executive agency from entering into a contract, or extending or renewing a contract, with an entity that uses any equipment, system or service that uses covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology as part of any system, unless

an exception applies or a waiver is granted. The contractor must report use of any such equipment, systems, or services discovered during contract performance.

This rule applies to all acquisitions, including acquisitions at or below the simplified acquisition threshold and to acquisitions of commercial items, including commercially available off-the-shelf items. It may have a significant economic impact on a substantial number of small entities.

This interim rule is being implemented as a national security measure to protect Government information and information and communication technology systems.
