Proposed Action

The applicant has submitted a draft SHA for the Amargosa vole that covers approximately 467 acres of land (enrolled property) in Inyo County, California, within historical but currently unoccupied habitat of the Amargosa vole. The enrolled property comprises marsh habitat in areas irrigated by water from Shoshone Spring or other sources, interspersed trees of various species, open meadow, various degrees of undisturbed and disturbed salt scrub desert, and developed areas. Development within the enrolled property includes the Shoshone Trailer RV Park (camping sites, picnic areas, walking trails, and a swimming pool), various parking areas, and unpaved trails and roads. The broader Enrolled Property is bisected by Old State Highway CA 127 and State Highway CA 127, and lies adjacent to land owned by the Death Valley Unified School District. Within the enrolled property is a core area comprising three connected marsh sites where intensive habitat restoration activities have been implemented by the applicant, the Service, and other cooperators.

The permit and implementation of management activities described in the SHA will enable the translocation and reintroduction of wild Amargosa voles, which will expand the species' current range into historical habitat where it had previously been extirpated. Management activities will also include ongoing restoration in the core area to support this newly established population. The re-establishment of Amargosa vole populations within their historical range is a high-priority recovery action. Management activities in the SHA have been developed to support recovery actions for the Amargosa vole by restoring and protecting suitable habitat, and by implementing habitat management plans. The Service anticipates that implementation of these activities will produce the following net conservation benefits to the Amargosa vole:

- Re-establish Amargosa vole populations at the northern extent of the subspecies' range, in its historical type locality;
- Provide areas where suitable habitat for the Amargosa vole will be maintained, protected, and remain relatively undisturbed;
- Increase population redundancy within the subspecies' range; and
- Reduce the potential for local extirpation and extinction due to

stochastic events (e.g., wildfire and disease) within the species' limited existing occupied habitat.

Species Information

The current range of the Amargosa vole is confined to 36 marshes in the Lower Amargosa River Valley in the vicinity of Tecopa Hot Springs and the northern end of the Amargosa Canyon. The Amargosa vole obligately depends upon, and is closely associated with, wetland vegetation dominated by Olney's three-square bulrush (*Schoenoplectus americanus*), where it generally occurs in isolated and disjunct marshes surrounded by saltgrass-dominated habitats or more xeric desert scrub or barren areas. Although not all of the mechanisms that drive habitat selection are fully understood, plausible explanations for habitat preference may include the presence of standing and flowing water, reliance on Olney's three-square bulrush as a vital food source, and utilization of bulrush litter layers (up to 3.3 feet in depth) for thermoregulation, nesting, and predator avoidance.

National Environmental Policy Act Compliance

The development of the draft SHA and the proposed issuance of an enhancement of survival permit are Federal actions that trigger the need for compliance with the NEPA (42 U.S.C. 4321 *et seq.*). We have prepared a draft EAS to analyze the impacts of permit issuance and implementation of the SHA on the human environment in comparison to the no-action alternative. We have made a preliminary determination that issuing the permit and implementing the SHA would have minor or negligible impacts to the environment, and thus the proposed SHA and permit actions are eligible for categorical exclusion under NEPA. The basis for our preliminary determination is contained in the EAS, which is available for public review (see **ADDRESSES**).

Next Steps

We will evaluate the permit application, associated documents, and comments we receive to determine whether the permit application meets the requirements of the ESA, NEPA, and their implementing regulations. If we determine that all requirements are met, we will sign the proposed SHA and issue a permit under section 10(a)(1)(A) of the ESA to the applicant. We will not make our final decision on the permit application until after the end of the public comment period, and we will

fully consider all comments we receive during the comment period.

Public Availability of Comments

Written comments we receive become part of the public record associated with this action. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that the entire comment, including your personal identifying information, may be made available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority

We provide this notice under section 10(c) of the ESA (16 U.S.C. 1531 *et seq.*) and its implementing regulations (50 CFR 17.22 and 17.32), and NEPA (42 U.S.C. 4371 *et seq.*) and its implementing regulations (40 CFR 1506.6; 43 CFR part 46).
