

POLICY JUSTIFICATION**Kuwait—Patriot Advanced Capability (PAC-3) Missile Segment Enhancements (MSEs) with Canisters**

The Government of Kuwait has requested to buy eighty-four (84) Patriot Advanced Capability (PAC-3) Missile Segment Enhancements (MSEs) with canisters; two (2) Patriot MSE test missiles 2-Pack per unit of issue; thirty-five (35) remanufactured (upgrades): Patriot modification kit, missile launchers A902+ Series to A903 Series; twenty-six (26) PAC-3 Missile Round Trainer (MRT); and twenty-six (26) Empty Round Trainer (ERT). Also included is one (1) Flight Test Target—Zombie, PAC-3 missile spares held in Continental United States (CONUS) for repair and return, two (2) PAC-3 telemetry kits, training devices, simulators, transportation, organizational equipment, spare and repair parts, support equipment, tools and test equipment, technical data and publications, personnel training and training equipment, U.S. government and contractor engineering, technical, and logistics support services, and other related elements of logistics support. The total estimated program cost is \$800 million.

The proposed sale will support the foreign policy and national security of the United States by helping to improve the security of a Major Non-NATO Ally that is an important force for political stability and economic progress in the Middle East.

Patriot PAC-3 MSEs will supplement and improve Kuwait's capability to meet current and future threats and provide greater security for its critical oil and natural gas infrastructure. Kuwait will use the enhanced capability to strengthen its homeland air defense by better meeting current and future air threats. The acquisition of these missiles will allow for integration with U.S. forces for training exercises, which contributes to regional security and interoperability. Kuwait will have no difficulty absorbing this equipment and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor involved in this program is Lockheed Martin Corporation (Grand Prairie), Dallas, TX. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require the assignment of two U.S. Government and three contractor representatives to Kuwait to support delivery of the Patriot PAC-3 MSEs with Canisters and provide support and equipment familiarization.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 20-16

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) Sensitivity of Technology:

1. The Patriot Advanced Capability (PAC-3) Missile Segment Enhancements (MSEs) is a small, highly agile, kinetic kill interceptor for defense against tactical ballistic missiles, cruise missiles and air-breathing threats. The MSE variant of the PAC-3 missile represents the next generation in hit-to-kill interceptors and provided expanded battlespace against evolving threats. The PAC-3 MSE improves upon the original PAC-3 capability with a higher performance solid rocket motor, modified lethality enhancer, more responsible control surfaces, upgraded guidance software and insensitive munitions improvements. The PAC-3 MSE's sensitive/critical technology is primarily in the areas of design and production know-how and manufacturing data and processes. Information on limitations of the PAC-3 MSE, including survivability and vulnerability data, is classified. Classified information could be revealed through reverse engineering or testing the PAC-3 MSE interceptor.

2. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

3. A determination has been made that Kuwait can provide substantially the same degree of protection of this technology as the U.S. Government. This proposed sale is necessary in furtherance of U.S. foreign policy and national security objectives outlined in the Policy Justification.

4. All defense articles and services listed in this transmittal are authorized for release and export to the Government of Kuwait.

* As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Kuwait—Patriot Missile Repair and Return

The Government of Kuwait has requested to buy a Patriot missile Repair and Return program as follow-on support to FMS case KU-B-ULS. Included are Patriot GEM-T missile and missile components repair services, transportation, organizational equipment, repair parts, support equipment, tools and test equipment, technical data and publications, personnel training and training equipment, maintenance services, U.S. government and contractor engineering, technical, and logistics support services, and other related elements of logistics support. The total estimated program cost is \$200 million.

The proposed sale will support the foreign policy and national security of the United States by helping to improve

the security of a Major Non-NATO Ally that is an important force for political stability and economic progress in the Middle East.

The proposed sale of the Repair and Return program for the Kuwait Patriot System will supplement and improve Kuwait's capability to meet current and future threats and provide greater security for its critical oil and natural gas infrastructure. Kuwait will use the enhanced capability to strengthen its homeland defense. Kuwait will have no difficulty absorbing this equipment and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractors involved with this potential sale are Raytheon Company, Huntsville, AL; Lockheed Martin, Huntsville, AL; LEIDOS, Inc., Huntsville, AL; and KBR, Huntsville,

AL. There are no known offsets agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require the temporary assignment of five (5) U.S. contractors to provide handling and documentation support for one (1) to two (2) years.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.
