### Notice of Lodging of Proposed Consent Decree Under the Clean Water Act

On July 13, 2020, the Department of Justice lodged a proposed consent decree with the United States District Court for the District of New Hampshire in the lawsuit entitled *United States of America v. City of Manchester, New Hampshire*, Civil Action No. 20-cv-762.

The United States' Complaint alleges violations of the Clean Water Act and the City of Manchester's National Pollutant Discharge Elimination System Permit. The claims arise from the City's combined sewer overflows which have resulted in the discharge of pollutants from the City's wastewater collection system. Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal or other mines. Title 30 CFR 56.5005 and 57.5005 require, whenever respiratory equipment is used, that metal and nonmetal mine operators institute a respirator program governing selection, maintenance, training, fitting, supervision, cleaning, and use of respirators. These standards seek to control miner exposure to harmful airborne contaminants by using engineering controls to prevent contamination and vent or dilute the contaminated air. However, where accepted engineering control measures have not been developed or when necessary by the nature of work involved (for example, while establishing controls or occasional entry into hazardous atmospheres to perform maintenance or investigation), employees may work for reasonable periods of time in concentrations of airborne contaminants exceeding permissible levels if they are protected by appropriate respiratory protective equipment. Sections 56.5005 and 57.5005 incorporate by reference, requirements of the American National Standards Institute's Practices for Respiratory Protection (ANSI Z88.2–1969). These incorporated requirements mandate that miners who must wear respirators be fitted to the respirators that they will use. Certain records are also required to be kept in connection with respirators, including: Written standard operating procedures governing the selection and use of respirators; records of the date of issuance of the respirator; and fit-test results. For additional substantive

information about this ICR, see the related notice published in the **Federal Register** on March 25, 2020 (85 FR 16959).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. See 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.
