The NRC is issuing a single notice to announce the issuance of the exemptions.

DATES: The 21 exemptions were issued between June 2, 2020, and June 30, 2020.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC issued 21 exemptions to 13 licensees in response to requests dated between April 29, 2020, and June 19, 2020. These exemptions temporarily allow the licensees to deviate from certain requirements (as cited below) of various parts of chapter I of title 10 of the *Code of Federal Regulations* (10 CFR).

The exemption from certain requirements of 10 CFR 50.71(e)(4) for Pacific Gas and Electric Company (for the Diablo Canyon Nuclear Power Plant, Units 1 and 2) allows the licensee to submit revisions of the Updated Final Safety Analysis Report (UFSAR) and Technical Specification (TS) Bases later than it would otherwise be required to by the regulations. The exemption from the requirements of 10 CFR 50.71(e)(4) results in benefit to the public health and safety by not conflicting with practices recommended by the Centers for Disease Control and Prevention (CDC) to limit the spread of COVID-19 and does not result in any decrease in safety. The exemption provides only temporary relief from the applicable regulation and the licensee has made good faith efforts to comply with the regulation.

The exemptions from certain requirements of 10 CFR 50.48(b) and 10 CFR part 50, appendix R, section III.I, for Southern Nuclear Operating Company (for Edwin I. Hatch Nuclear Plant, Unit Nos. 1 and 2, and Joseph M. Farley Nuclear Plant, Units 1 and 2), allow the licensee temporary exemption from the quarterly fire brigade drills requirement and the annual live firefighting training requirement in 10 CFR 50.48(b) and 10 CFR part 50, appendix R, section III.I. These exemptions allow the licensee to temporarily defer implementation of requirements that would otherwise cause the licensee to take actions that could conflict with practices recommended by the CDC to limit the spread of COVID-19. This licensee has committed to implement a station-specific process to manage affected personnel while ensuring the safety of its workers in maintaining performance capability.

The exemptions from certain requirements of 10 CFR part 73 for Union Electric Company (for Callaway Plant, Unit No. 1); Pacific Gas and Electric Company (for the Diablo Canyon Nuclear Power Plant, Units 1

and 2); Southern Nuclear Operating Company (for the Edwin I. Hatch Nuclear Power Plant, Unit Nos. 1 and 2, and the Joseph M. Farley Nuclear Power Plant, Units 1 and 2); Entergy Nuclear Operations, Inc. (for the Indian Point Nuclear Generating Unit Nos. 2 and 3); Exelon Generation Company, LLC (for the James A. FitzPatrick Nuclear Power Plant, R. E. Ginna Nuclear Power Plant, and the Three Mile Island Nuclear Station, Unit 1); Duke Energy Carolinas, LLC (for the McGuire Nuclear Station, Units 1 and 2); Dominion Energy Nuclear Connecticut, Inc. (for the Millstone Power Station, Units Nos. 1, 2, and 3); Virginia Electric and Power Company (for the North Anna Power Station, Unit Nos. 1 and 2); NextEra Energy Point Beach, LLC (for the Point Beach Nuclear Plant, Units 1 and 2); Florida Power & Light Company (for the St. Lucie Plant, Units Nos. 1 and 2, and Turkey Point Nuclear Generating Unit Nos. 3 and 4); NextEra Energy Seabrook, LLC (for the Seabrook Station, Unit No.

1); Duke Energy Progress, LLC (for the Shearon Harris Nuclear Power Plant, Unit 1); STP Nuclear Operating Company (for the South Texas Project, Units 1 and 2), allow these licensees temporary exemptions from certain requirements of 10 CFR part 73, appendix B, “General Criteria for Security Personnel,” section VI. The exemptions will help to ensure that these regulatory requirements do not unduly limit licensee flexibility in using personnel resources in a manner that most effectively manages the impacts of the COVID-19 PHE on maintaining the safe and secure operation of these facilities and the implementation of a licensee’s NRC-approved security plans, protective strategy, and implementing procedures. These licensees have committed to certain security measures to ensure response readiness and for their security personnel to maintain performance capability.

The NRC is providing compiled tables of exemptions using a single **Federal**

Register notice for COVID-19-related exemptions instead of issuing individual **Federal Register** notices for each exemption. The compiled tables below provide transparency regarding the number of exemptions the NRC is issuing. Additionally, the NRC publishes tables of approved regulatory actions related to the COVID-19 PHE on its public website at <https://www.nrc.gov/about-nrc/covid-19/reactors/licensing-actions.html>.

II. Availability of Documents

The tables below provide the facility name, docket number, document title, and ADAMS accession number for each exemption issued. Additional details on each exemption issued, including the exemption request submitted by the respective licensee and the NRC’s decision, are provided in each exemption approval listed on the tables below. For additional directions on accessing information in ADAMS, see the **ADDRESSES** section of this document.
