Agency: U.S. Census Bureau.

Title: Report of Organization.

OMB Control Number: 0607-0444.

Form Number(s): NC-99001(L), NC-99001(S), NC-99007.

Type of Request: Regular Submission, Request for an Extension, without change of a Currently Approved Collection.

Number of Respondents: 98,000.

Average Hours per Response: 1.276 hours.

Burden Hours: 125,016.

Needs and Uses: The Census Bureau requests an extension of the currently approved Report of Organization data collection for survey years 2020, 2021 and 2022.

The Census Bureau conducts the annual Report of Organization to update and maintain a centralized, multipurpose Business Register (BR). In particular, the survey supplies critical information on the organizational structure, operating characteristics, and employment and payroll of multi-location enterprises.

The BR serves two fundamental purposes:

- First and most important, it provides sampling populations and enumeration lists for the Census Bureau's economic surveys and censuses, and it serves as an integral part of the statistical foundation underlying those programs. Essential for this purpose is the BR's ability to identify all known United States business establishments and their parent companies. Further, the BR must

accurately record basic business attributes needed to control sampling and enumeration. These attributes include industry and geographic classifications, measures of size and economic activity, ownership characteristics, and contact information (for example, name and address).

- Second, it provides establishment data that serve as the basis for the annual County Business Patterns (CBP) statistical series. The CBP reports present data on number of establishments, first quarter payroll, annual payroll, and mid-March employment summarized by industry and employment size class for the United States, the District of Columbia, island areas, counties, and county-equivalents. No other annual or more frequent series of industry statistics provides comparable detail, particularly for small geographic areas.

Affected Public: Business or other for-profit organizations.

Frequency: Annually.

Respondent's Obligation: Mandatory.

Legal Authority: Title 13 of the United States Code, Sections 131 and 182.

ACTION: Notice; availability of a draft Hatchery and Genetic Management Plan for public comment.

SUMMARY: Notice is hereby given that NMFS has received a Hatchery and Genetic Management Plan (HGMP) outlining a program, operated by the Oregon Department of Fish and Wildlife (ODFW), rearing and releasing Clackamas River spring Chinook salmon into the Clackamas, Willamette, and Lower Columbia River basins. This document serves to notify the public of the availability and opportunity to comment on a draft HGMP. The HGMP was submitted for review and determination under Limit 5 of the Endangered Species Act (ESA) 4(d) Rule for salmon and steelhead.

DATES: Comments must be received at the appropriate address (see **ADDRESSES**) no later than 5 p.m. Pacific time on August 31, 2020. Comments received after this date may not be considered.

ADDRESSES: Written responses should be addressed to the NMFS Sustainable Fisheries Division, 1201 NE Lloyd Blvd., Portland, OR 97232. Comments may be submitted by email. The mailbox address for providing email comments is:

SUPPLEMENTARY INFORMATION:**ESA-Listed Species Covered in This Notice**

- Lower Columbia River Steelhead (*O. mykiss*): Threatened, naturally and artificially propagated
- Lower Columbia River Coho Salmon (*O. kisutch*): Threatened, naturally and artificially propagated
- Columbia River Chum Salmon (*O. keta*): Threatened, naturally and artificially propagated

Background

Section 9 of the ESA and Federal regulations prohibit the "taking" of a species listed as endangered or threatened. The term "take" is defined under the ESA to mean harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct. NMFS may make exceptions to the take prohibitions

in section 9 of the ESA for programs that are approved by NMFS under the 4(d) Rule (50 CFR 223.203(b)(6)).

ODFW has submitted an HGMP for the Clackamas Hatchery Spring Chinook Salmon program in the Clackamas River basin under Limit 5 of the 4(d) Rule. This program is primarily funded by the National Marine Fishery Service through the Mitchell Act, and partially funded by the City of Portland and Portland General Electric.

Prior to making a final determination on the submitted HGMP, NMFS must make it available for the public to have the opportunity comment on how the HGMP addresses the criteria in Limit 5 of the 4(d) Rule.

The submitted HGMP describes the hatchery program along with the associated monitoring and evaluation activities. The program will begin to integrate natural-origin returning adults into the hatchery broodstock in order to promote an increase in genetic fitness and survivability. Through the use of a conservative sliding scale approach, the ODFW will incorporate a small percentage of natural-origin returning adults. This integrated program will provide a much needed increase in genetic fitness to a highly domesticated hatchery stock that has struggled with precipitous declining returns for the last decade. ODFW hopes that this new management approach will supplement the much desired mark-selective Clackamas River spring Chinook salmon fishery. The program is intended to mitigate for fish losses caused by the construction and operation of the mainstem Columbia River and the Clackamas River dams by providing fishing opportunities for tribes and states, and to contribute to the survival and recovery of ESA-listed Lower Columbia River Chinook salmon.

Public comments were previously requested via the **Federal Register** on March 6, 2020 (85 FR 13139) during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Title: Alaska Pacific Halibut Fisheries: Subsistence.

OMB Control Number: 0648–0512.
