substitution of written comment is 12 p.m., Wednesday, August 12, 2020. The following agenda items will be addressed by the SSC during the meeting:

1. Review and approve Statements of Work for the 2023 Snowy Grouper and Tilefish stock assessments;
2. An update on the operational assessment and research track development;
3. Replace an open SSC representative seat on the Citizen Science Operations Committee;
4. Discussion of other business as needed.

The SSC will provide guidance to staff and recommendations for Council consideration as appropriate. Multiple opportunities for comment on agenda items will be provided during SSC meetings. Open comment periods will be provided at the start of the meeting and near the conclusion. Those interested in providing comment should indicate such in the manner requested by the Chair, who will then recognize individuals to provide comment. Additional opportunities for comment on specific agenda items will be provided, as each item is discussed, between initial presentations and SSC discussion. Those interested in providing comment should indicate such in the manner requested by the Chair, who will then recognize individuals to provide comment. All comments are part of the record of the meeting.

Although non-emergency issues not contained in the meeting agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Management Act.

Special Accommodations

This meeting is accessible to people with disabilities. Requests for auxiliary aids should be directed to the SAFMC office (see ADDRESSES) at least 5 business days prior to the meeting.

The Trustees reached and finalized a settlement of their natural resource damage claims with BP in an April 4, 2016. Consent Decree approved by the United States District Court for the Eastern District of Louisiana. Pursuant to that Consent Decree, restoration projects in the Louisiana Restoration Area are selected and implemented by the Louisiana TIG which is composed of the following Trustees: CPRA, LOSCO, LDEQ, LDWF, and LDNR NOAA, DOI, EPA, and USDA.

Background

Notice of Availability of the Deepwater Horizon Oil Spill Louisiana Trustee Implementation Group Draft Restoration Plan and Environmental Assessment #5: Marine Mammals and Oysters (Draft RP/EA #5) was published in the Federal Register at 85 FR 16078 on March 20, 2020. The Louisiana TIG hosted a public webinar on April 8, 2020, and the public comment period for the Draft RP/EA #5 closed on April 20, 2020. The Draft RP/EA #5 evaluated seven restoration alternatives: Two Marine Mammal alternatives, four Oyster project alternatives, and the No Action alternative in accordance with the OPA and the NEPA. The Louisiana TIG considered the public comments received on the Draft RP/EA #5 which informed the analyses and selection of four restoration projects for implementation in the Final RP/EA #5. A summary of the public comments received and the Trustees’ responses to those comments are included in Chapter 6 of the Final RP/EA #5 and all correspondence received are provided in the DWH Administrative Record.

Overview of the Final RP/EA

The Final RP/EA is being released in accordance with the OPA, NRDA implementing regulations, and the NEPA. In the Final RP/EA #5, the Louisiana TIG selects the following preferred alternatives in the Marine Mammals and Oysters restoration types:

- Increasing Capacity and Expanding Partnerships along the Louisiana Coastline for Marine Mammal Stranding Response ($3,955,620).
- Enhancing Oyster Recovery Using Brood Reefs ($9,701,447).
- Cultch Plant Oyster Restoration Projects ($10,070,000).
- Hatchery-based Oyster Restoration Projects ($5,850,000).

The Louisiana TIG has examined the injuries assessed by the Deepwater Horizon Trustees and evaluated restoration alternatives to address the injuries. In the Final RP/EA #5, the Louisiana TIG presents to the public its plan for providing partial compensation for lost living coastal and marine resources. The selected projects are intended to continue the process of using restoration funding to replenish and protect marine mammals and oysters injured by the Deepwater Horizon oil spill. The total estimated cost of the selected projects is approximately $28,717,075.

The funding proposed for implementation of oyster restoration under the trustees’ preferred alternatives represents a commitment of all remaining available funding for oyster restoration in the Louisiana Restoration Area. The programmatic structure of the proposed oyster cultch and brood reef projects would allow the trustees to continue to construct specific reef sites in the future. In alignment with the PDARP, the trustees may propose projects in the future that benefit oysters through the wetlands, coastal, and nearshore habitats restoration allocation. Additional restoration planning for marine mammals and other restoration types in the Louisiana Restoration Area will continue.
