

Plan to begin the drawdown of the reservoir on October 1, 2020 with the reservoir level of 488 ft expected to be reached by April 2021. The proposed low-level outlet works would be located in proximity to the existing outlet at the base of Anderson Dam with construction proposed to start in early 2021 and completed in late 2023. The exemptee also proposes, as mitigation measures, the following actions, including some downstream of the Anderson Dam project: Reservoir rim monitoring and channel stabilization; reconstruct the downstream Coyote Percolation Dam to withstand higher flows from the proposed low-level outlet; extend the Cross Valley Pipeline and add chillers to supplement water to Coyote Creek to support groundwater recharge and fisheries; relocate and rescue steelhead; and build flood walls, and elevate or acquire property that have the potential to be affected by flows from the operation of the proposed low-level outlet.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380, the Office of Energy Projects has reviewed the application for license for the Bear Swamp Project, located on the Deerfield River, in Berkshire and Franklin Counties, Massachusetts, and has prepared a Final Environmental Assessment (FEA) for the project.
