

megahertz guard band, throughout the contiguous United States by transitioning existing services out of the lower portion and in to the upper 200 megahertz of the C-band.

The *3.7 GHz Report and Order* established a search committee to select a Clearinghouse that would be responsible for handling all cost-related aspects of the transition. The *3.7 GHz Report and Order* required the search committee to select, no later than July 31, 2020, an entity that must be able to demonstrate its ability to perform the duties of the Clearinghouse, including: (1) Engaging in strategic planning and adopting goals and metrics to evaluate its performance, (2) adopting internal controls for its operations, (3) using enterprise risk management practices, and (4) using best practices to protect against improper payments and to prevent fraud, waste, and abuse in its handling of funds. The Commission also required that the selected entity create written procedures for its operations and that it use the Government Accountability Office's (GAO) Green Book to serve as a guide in satisfying such requirements.

The *3.7 GHz Report and Order* required the search committee to ensure that the Clearinghouse adopt robust privacy and data security best practices in its operations, given that it will receive and process information critical to ensuring a successful and expeditious transition. The selected entity will be required to hire a third-party firm to independently audit and verify, on an annual basis, the Clearinghouse's compliance with privacy and information security requirements. The Clearinghouse will also be required to: Provide recommendations based on any audit findings; correct any negative audit findings and adopt any additional practices suggested by the auditor; and report the results to the Bureau.

The Commission also required the search committee, in notifying the Commission of its selection for the Clearinghouse, to: (a) Fully disclose any actual or potential organizational or personal conflicts of interest or appearance of such conflict of interest of the Clearinghouse or its officers, directors, employees, and/or contractors; and (b) detail the salary and benefits associated with each position.

On July 31, 2020, the search committee announced that they had selected CohnReznick and subcontractors Squire Patton Boggs (US) LLP (Squire Patton Pogs), and Intellicom Technologies, Inc. (Intellicom), to serve as the Clearinghouse. We seek comment on whether CohnReznick, Squire Patton

Boggs, and Intellicom satisfy the criteria established by the Commission in the *3.7 GHz Report and Order*.

As directed by the Commission in the *3.7 GHz Report and Order*, following the comment period, the Bureau will issue an order announcing whether the selection criteria have been satisfied. Should the Bureau be unable to find that the criteria have been satisfied, the *3.7 GHz Report and Order* required that the selection process will start over and the search committee will submit a new proposed entity.

Synopsis

With this *Public Notice*, the Wireless Telecommunications Bureau (the Bureau) seeks comment on whether the proposed 3.7-4.2 GHz band Relocation Coordinator satisfies the selection criteria established by the Commission in the *3.7 GHz Report and Order*.

On March 3, 2020, the Commission released the *3.7 GHz Band Report and*

Order, which adopted new rules to make available 280 megahertz of mid-band spectrum for flexible use through a Commission-administered public auction of overlay licenses, plus a 20 megahertz guard band, throughout the contiguous United States by transitioning existing services out of the lower portion and in to the upper 200 megahertz of the C-band.

The *3.7 GHz Report and Order* required eligible Fixed Satellite Service (FSS) space station operators to select, no later than July 31, 2020, a Relocation Coordinator that will be responsible for managing the overall transition and coordinating relocation actions among eligible FSS space station operators, incumbent FSS earth station operators, and new 3.7 GHz Service overlay licensees. The *3.7 GHz Report and Order* required that the Relocation Coordinator “must be able to demonstrate that it has the requisite expertise to perform the duties required, which will include: (1) Coordinating the schedule for clearing the band; (2) performing engineering analysis, as necessary, to determine necessary earth station migration actions; (3) assigning obligations, as necessary, for earth station migrations and filtering; (4) coordinating with overlay licensees throughout the transition process; (5) assessing the completion of the transition in each PEA and determining overlay licensees’ ability to commence operations; and (6) mediating scheduling disputes.”

On July 31, 2020, eligible space station operators announced that they had selected RSM US LLP (RSM) to serve as the Relocation Coordinator. We seek comment on whether RSM satisfies the criteria established by the Commission in the *3.7 GHz Report and Order*.

As directed by the Commission in the *3.7 GHz Report and Order*, following the

comment period, the Bureau will issue an order announcing whether the selection criteria have been satisfied. Should the Bureau be unable to find that the criteria have been satisfied, the *3.7 GHz Report and Order* required that the selection process will start over and the search committee of eligible space station operators will submit a new proposed entity.
